View course details in MyPlan: A A 596

A A 597 Networked Dynamics Systems (3)
Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 597/M E 597.
View course details in MyPlan: A A 597

A A 598 Special Topics in Aeronautics and Astronautics (1-5, max. 30)
Introduction of special topics in the field of aeronautics and astronautics. Topics introduced by regular and guest speakers and includes a variety of information that is of current interest in aeronautics and astronautics. Offered: A WSp.
View course details in MyPlan: A A 598

A A 599 Special Projects (1-5, max. 30)
Investigation on a special project by the student under the supervision of a faculty member. Offered: AWSpS.
View course details in MyPlan: A A 599

A A 600 Independent Study or Research (*-)
Offered: AWSpS.
View course details in MyPlan: A A 600

A A 700 Master's Thesis (*-)
Offered: AWSpS.
View course details in MyPlan: A A 700
A A 800 Doctoral Dissertation (*-)
Offered: AWSpS.
View course details in MyPlan: A A 800

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**A E 501 Analytical Methods for Aerospace Engineering (4)**
Applications of analytical and mathematical methods for aerospace engineering, including: ordinary differential equations, partial differential equations, linear algebra, vector calculus, integral theorems, complex analysis, optimization, and probability. Prerequisite: permission of instructor. Offered: A.
View course details in MyPlan: A E 501

**A E 510 Linear Systems Theory (4)**
Covers theoretic methods for state-space linear systems including linearization of nonlinear systems, time-varying and time-invariant linear systems, discrete time and continuous time representations, canonical state space representations, linear system stability, time evolution of systems, controllability, and observability. Prerequisite: A E 501. Offered: W.
View course details in MyPlan: A E 510

**A E 511 Classical Control Theory (4)**
Covers theoretic methods for linear systems in the frequency domain including nonlinear and linear systems; linearization of nonlinear systems; stability, controllability, and observability of linear systems; linear system representations in frequency and time domains; dynamic system response in time and frequency domain; and frequency domain control design. Prerequisite: A E 501. Offered: A, even years.
View course details in MyPlan: A E 511

**A E 512 Dynamics, Stability, and Control of Vehicles (4)**
Covers stability derivatives; effects of stability derivatives on flight characteristics; dynamics of rigid bodies in air, space and underwater applications; responses to control inputs and external disturbances; handling qualities; control system components; sensor characteristics; stability augmentation systems; guidance and navigation; human factors; effects of limited communication; and multivehicle systems. Prerequisite: A E 501. Offered: Sp, odd years.
View course details in MyPlan: A E 512

**A E 513 Multivariable Control (4)**
An introduction to control of systems with multiple inputs and multiple outputs. Topics to be addressed include:
successive single loop design comparison; Lyapunov stability theory; full state feedback controller design; linear quadratic regulator (LQR) and linear quadratic Gaussian (LQG) methods (development, incorporation of noise, design, analysis); separation principle; stability robustness; introduction to H-infinity control. Prerequisite: A E 501, or A E 510. Offered: A, odd years.

View course details in MyPlan: A E 513

A E 514 Estimation Theory (4)
Development of computational tools for estimation and filtering of state variables from sensor measurements. Methods are presented for both linear and nonlinear systems. Topics include discrete and continuous system structures for both linear and nonlinear dynamical systems with notice; rigid body dynamics; least squares; Bayesian estimation; Kalman filtering; extended Kalman filtering; unscented Kalman filtering; particle filtering; smoothing. Prerequisite: A E 501, A E 510 Offered: Sp, even years.

View course details in MyPlan: A E 514

A E 519 Special Topics in Aerospace Engineering: Controls (4, max. 16)
Current research and advanced special topics in the area of aerospace engineering - controls. Prerequisite: A E 501.

View course details in MyPlan: A E 519

A E 520 Fundamentals of Fluid Dynamics (4)

View course details in MyPlan: A E 520

A E 521 Aircraft Propulsions (4)

View course details in MyPlan: A E 521

A E 522 Rocket Propulsion (4)
Covers rocket propulsion (nozzle gas dynamics, non-ideal flow effects); rocket vehicle performance; chemical rockets (solid, liquid propulsion, components and design); physical; and performance characteristics of rockets; and mission requirements; Introduction to electric thrusters. Prerequisite: A E 520. Offered: Sp, odd years.

View course details in MyPlan: A E 522

A E 523 Aircraft Noise (4)
Covers noise characterization; federal aircraft noise regulation; interrelationship between the engine types and noise; aircraft noise generation, propagation, and radiation; noise measurements; and methods for noise reduction. Prerequisite: A E 520.

View course details in MyPlan: A E 523

A E 524 Computational Aerodynamics (4)
Panel methods, finite volume method, grid generation, CFD and its applications to aerodynamics. Prerequisite: A E 520 Offered: W, odd years.

View course details in MyPlan: A E 524

A E 529 Special Topics in Aerospace Engineering: Fluids (4, max. 16)
Current research and advanced topics in the area of aerospace engineering - fluids. Prerequisite: A E 501.

View course details in MyPlan: A E 529

A E 532 Rocket Propulsion (4)
Covers rocket propulsion (nozzle gas dynamics, non-ideal flow effects); rocket vehicle performance; chemical rockets (solid, liquid propulsion, components and design); physical; and performance characteristics of rockets;
and mission requirements; Introduction to electric thrusters. Prerequisite: A E 520. Offered: Sp, odd years.

**A E 539 Special Topics in Aerospace Engineering: Propulsion, Plasma, and Power (4, max. 8)**
Current research and advanced special topics in the area of aerospace engineering - propulsion/plasma/power. Prerequisite: A E 501.

View course details in MyPlan: A E 539

**A E 540 Mechanics of Solids (4)**
Covers general concepts, theory, and application of solid mechanics; mechanical behavior of elastic, plastic and viscoelastic solids; fracture of aerospace structural materials. Prerequisite: A E 501. Offered: W.

View course details in MyPlan: A E 540

**A E 541 Finite Element Analysis (4)**
Covers theory and application of the finite element methods; element types, stiffness matrix and solution procedures; and solution of elasticity, thermal conduction, and other practical problems in aerospace engineering. Prerequisite: A E 540. Offered: Sp, odd years.

View course details in MyPlan: A E 541

**A E 542 Fatigue and Fracture in Aerospace Structures (4)**
Covers theory of failure for metallic aerospace structures; fatigue properties, fatigue load spectrum, fatigue crack propagation, fracture mechanics, damage tolerance, fretting and corrosion fatigue, design applications, and case studies. Prerequisite: A E 540. Offered: A, even years.

View course details in MyPlan: A E 542

**A E 543 Structural Vibrations (4)**

View course details in MyPlan: A E 543

**A E 544 Additive Manufacturing (4)**
Introduction to Additive manufacturing (AM), development of AM technology, generalized AM process chain, designing for AM vat photopolymerization process, powder bed fusion, extrusion-based systems, sheet lamination process, composite laminates, automatics tape laying, designing laminated composites. Project-based examination of model parameters and designing and building an aerospace structure. Offered: W.

View course details in MyPlan: A E 544

**A E 549 Special Topics in Aerospace Engineering: Structures (4, max. 16)**
Current research and advanced special topics in the area of aerospace engineering - structures. Prerequisite: A E 501.

View course details in MyPlan: A E 549

**A E 550 Mechanics of Composite Materials (4)**
Covers the analysis and design of advanced composite materials for aerospace structures including material properties, micromechanics, anisotropic elasticity, theory of laminated plates, bending and buckling, and fracture of composites. Prerequisite: A E 501. Offered: Sp.

View course details in MyPlan: A E 550

**A E 551 Aerospace Composite Design I (4)**
Introduction to advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A E 550 Offered: A, even years.

View course details in MyPlan: A E 551
A E 552 Aerospace Composite Design II (4)
Introduction to concepts of certification by analysis supported by test evidence in aircraft structures, emphasizing regulatory agency requirements and industry approaches. Subjects include allowable approach, bolted and bonded joints, damage resistance and tolerance, specialized test methods, and inspection techniques. Prerequisite: A E 550 Offered: A, even years.
View course details in MyPlan: A E 552

A E 553 Advanced Composite Structural Analysis (4)
Covers advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A E 550. Offered: A, odd years.
View course details in MyPlan: A E 553

A E 554 Manufacture of Aerospace Composites (4)
Fundamentals of composite materials manufacturing and processing, emphasizing modern aviation industry practices. Discussions of auto and out-of-the-autoclave processing of carbon fiber composites, test methods, tooling, secondary processing, commercial processes, and several other topics related to manufacturing of composites. Emphasis on aircraft structures, but applicable to all high-performance lightweight structures. Prerequisite: A E 550 Offered: W, even years.
View course details in MyPlan: A E 554

A E 559 Special Topics in Aerospace Engineering: Composites (4, max. 16)
Current research and advanced special topics in the area of aerospace engineering - composites. Prerequisite: A E 501
View course details in MyPlan: A E 559

A E 598 Aerospace Engineering Colloquium (1, max. 30)
Covers the latest research in aerospace engineering. Includes current trends in professional aerospace engineering (e.g., manufacturing, systems, etc.) and professional development for aerospace engineers (e.g., project management, job searches, etc.). Lectures and discussions led by guest speakers. Credit/no-credit only. Offered: A WSp.
View course details in MyPlan: A E 598

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
Chemical Engineering

Department Overview

105 Benson

The chemical engineering profession is a close-knit group with a common background in chemical processes, systems analysis, and systems economics. Chemical engineering training occurs through course and laboratory work addressing mathematical, scientific, and engineering fundamentals. With a strong background in mathematics, chemistry, and physics, chemical engineering students study transport phenomena (the description of momentum, heat, and mass transfer in chemical processes); chemical kinetics and reaction engineering; process control and design; and optimization of chemical processes. These subjects are common throughout the traditional chemical industry, applying as well to other industries such as electronics manufacture and biological and biochemical engineering. Chemical engineers find industrial employment in areas of electronics, petroleum, consulting, chemical, automotive, forest products, biotechnology, and energy. Chemical engineers also find careers in academia and government and military service.

Undergraduate Program

Adviser
105 Benson, Box 351750
(206) 543-2252
advising@cheme.washington.edu

The Department of Chemical Engineering offers the following programs of study:

- Bachelor of Science in Chemical Engineering (BSChE) degree
- Bachelor of Science in Chemical Engineering (BSChE) degree, with an option in nanoscience and molecular engineering

Bachelor of Science in Chemical Engineering

*Suggested College Courses for First Five Quarters:* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, PHYS 121, PHYS 122, PHYS 123, ENGL 131 (or equivalent), AMATH 301 (or CSE 142)

*Department Admission Requirements*

Core courses within the department form a seven-quarter curriculum designed to start in spring quarter of the sophomore year. Applicants are considered in three groups: Direct
Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. Applicants not admitted under one admission group may subsequently apply to another admission group after completing more coursework. All applicants have the right to petition and appeal the department's admission decision.

*Nanoscience and Molecular Engineering Option (NME):* Admission to the NME option is competitive, and normally occurs upon completion of NME 220. Admission is based on grades, including NME 220 and any CHEM E courses already taken. A small number of students may be admitted into the NME option upon application to the department. Admission is based on the student's academic record and prior experience/work in the field of nanoscience and/or molecular engineering. Students applying for the NME option should so indicate on their chemical engineering application and discuss their interests and background in the essay.

1. *Direct Freshman Admission*

   The department enrolls up to 30 percent of its incoming class directly from high school, prior to completion of University-level prerequisites. Students accepted to the UW who indicate chemical engineering as their preferred major on the freshman application are automatically considered. Competitive applicants have taken or are taking calculus and at least two years of laboratory science (physics, chemistry preferred) in high school. Admission is for autumn quarter only.

2. *Early Admission*

   The department enrolls up to 30 percent of its class from students who have taken one year of college-level coursework through the UW. The application is available at [www.engr.washington.edu/uapp](http://www.engr.washington.edu/uapp). Admission is for autumn quarter only. Application deadline is July 1.

   **Course Requirements:** MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121; and 5 credits of English composition, chosen from CLIT 240, ENGL 109-ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281.

   All courses must be completed prior to the July 1 application deadline.

   **Credit Requirements:** Applicants must be completing their freshman year at the UW and must have completed a minimum 15 credits taken in residence at the UW.

   **Grade Requirements:** Minimum 2.0 grade in each prerequisite course and minimum 2.50 GPA

3. *Upper-Division Admission*

   The department enrolls the majority of its student through Upper-Division Admission. Upper-division applicants have completed at least four quarters of equivalent college-level coursework and are on track to begin the department curriculum in spring quarter of their sophomore year. Application for the department is available at [www.engr.washington.edu/uapp](http://www.engr.washington.edu/uapp). Students not at UW must also apply for admission to the UW for spring quarter, following the admission rules found at [admit.washington.edu](http://admit.washington.edu).
Admission is for spring quarter only. The department application deadline is February 1. The UW application deadline is December 15.

Course Requirements: Minimum 55 academic credits at time of application, including the following: MATH 124, MATH 125, MATH 126, MATH 307 (18 credits); CHEM 142, CHEM 152, CHEM 162 (15 credits); PHYS 121, PHYS 122 (10 credits); and one 5-credit English composition course, chosen from C LIT 240, ENGL 109-ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281.

Applicants are considered for admission if they have completed all but two of the required courses and are currently enrolled in those courses at the time of application to the major (e.g., MATH 307 and PHYS 122). See department adviser with questions.

General Expectations of Academic Progress: To be fully prepared for major coursework and to be on track to complete the degree in a timely manner, students must have completed all admission requirements as well as the following courses by the start of the autumn quarter following admission: organic chemistry I and II (CHEM 237 and CHEM 238, CHEM 223 and CHEM 224, or CHEM 335 and CHEM 336), PHYS 123, AMATH 301 (or CSE 142), MATH 308, CHEM E 310. Students unable to meet the continuation requirement are automatically dropped from the program (appeals for readmission are considered in case of special circumstances). Applicants should take general education or elective credits as space allows. See department academic adviser with questions related to academic progress.

Credit and Grade Requirements: 55 credits completed by application deadline, with a minimum overall 2.50 GPA and minimum 2.0 grade in all courses required for admission. Historically a substantially higher GPA in these categories is required for admission to the major. See department adviser with questions.

Factors included in the admission decision include the course record as indicated above and qualitative considerations such as difficulty of completed courses, frequency of incomplete or withdrawal grades, number of repeated courses, applicable work experience and maturity of attitude, record of honors, a demonstrated ability to take at least 12 credits per quarter, and special circumstances disclosed by the applicant.

Graduation Requirements

180 credits, as follows:

General Education Requirements (97 credits)

1. Written and Oral Communications (8 credits): one 5-credit English composition course from the University list; HCDE 231. University required 4 additional writing credits are met by major core courses.

2. Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits): Minimum of 10 credits required in each area

3. Natural World (65 credits)
   a. Physics (15 credits): PHYS 121, PHYS 122, PHYS 123
b. Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 309 (or MATH 390 or IND E 315)

c. Chemistry (26 credits): CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 455

Major Requirements (74 credits)

1. Engineering Fundamentals (4 credits): AMATH 301 or CSE 142

3. Molecular and Nanoscience Engineering (3 credits): CHEM E 455

4. Engineering Elective Courses (16 credits): Only one, 1-credit seminar is allowed to count toward engineering electives. A maximum of 9 credits of undergraduate research (CHEM E 299, CHEM E 499, of which no more than 3 credits may be CHEM E 299) may count toward engineering electives.

Unspecified Electives (9 credits): to reach 180 credits

Nanoscience and Molecular Engineering Option Major Requirements (77 credits)

1. Engineering Fundamentals (4 credits): AMATH 301 or CSE 142

3. Nanoscience and Molecular Engineering Courses (22 credits): CHEM E 299, CHEM E 455, CHEM E 499 (3-6 credits, maximum 3 credits from CHEM E 299), NME 220, NME 221, NME 321, NME 421; minimum two additional approved nanoscience and molecular engineering electives. See adviser for list of approved electives.

Unspecified Electives (6 credits): to reach 180 credits.

A minimum 2.00 GPA in core chemical engineering courses, based on the first time each course is taken, is required for graduation.

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and CHEM E 486 or CHEM E 497) which involve the design of an integrated chemical system. An optional 9-credit specialty area allows each student to develop special competence in a selected subject by taking a minimum of three courses in that area. Engineering and free electives may be used for this purpose. The areas are biotechnology; fuel cells and energy; polymers, composites, colloids, and interfaces; computers applied to chemical engineering; environmental engineering; and nuclear engineering.

Continuation Policy
All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design. They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

- **Instructional and Research Facilities:** The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Laboratory holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support experiments on process automation). All have fast connections to the Internet and to larger UW computers.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** Students are encouraged to participate in internships, which are generally facilitated through the Engineering Co-op Office.

- **Department Scholarships:** The department awards 20-25 full-tuition scholarships per year. See departmental website for application procedures.

- **Student Organizations/Associations:** The undergraduates in the department run a dynamic chapter of the American Institute of Chemical Engineers.

**Of Special Note:**

Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering and bioresource science and engineering. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and CHEM E 486, which are open to majors only).
Graduate Program

Graduate Program Coordinator
105 Benson, Box 351750
(206) 543-2250
grad.admissions@cheme.washington.edu

The department offers studies leading to the degrees of Doctor of Philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree is centered on the dissertation with a foundation in coursework; it is generally completed in four to five years beyond the baccalaureate degree. In the master's program primary emphasis is placed on coursework, and the degree generally requires 21 months of study. Thesis and non-thesis options are available.

The program of study includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more-specialized courses in chemical engineering or in other departments. Students usually take three courses during their first quarter. In subsequent quarters, less time is spent on coursework, and more on research and independent study.

The department has about seventy full-time graduate students, most of whom are working toward a doctorate. They study and collaborate with faculty members in an atmosphere that is informal, friendly, and intellectually vigorous. Faculty interests are broad, so students become familiar with a variety of areas while receiving individual guidance in a specialty.

Master of Science in Chemical Engineering

Admission Requirements

Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements. To be competitive, applicants must:

1. Be highly ranked (top 10 percent) in a respected chemical engineering program
2. Score at least 750 on the quantitative portion of the GRE
3. Score at least 600 (paper-based), 250 (computer-based), or 70 (Internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

Thesis Option

39 credits to include:

1. At least 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of coursework. These must be 500-599 or approved 400-level courses. They must include five courses from at least four of the following five categories. (The courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
Chemical Engineering

2. Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the BS degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.

3. A minimum 3.00 cumulative GPA in the graduate program

4. At least 30 credits taken through the UW

5. A thesis describing original research. At least 9 credits of thesis are required (CHEM E 700).

6. Final examination consisting of an oral presentation of the thesis.

7. Serve as TA for at least one quarter.

**Non-Thesis Option**

The non-thesis allows a student to receive graduate-level training with the primary focus on coursework. The degree requirements can be completed in four quarters (completion in three is possible).

39 credits, and other requirements, to include:

1. At least 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of coursework. These must be 500-599 or approved 400-level courses. They must include five courses from at least four of the following five categories. (The courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)

   a. **Math/Computer/Statistics:** CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM E 526, STAT 421

   b. **Thermodynamics:** CHEM E 455, CHEM E 525, CHEM E 526, CHEM E 552

   c. **Transport Phenomena:** CHEM E 530, CHEM E 531, M E 533, M E 534

   d. **Reaction Phenomena:** CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565

   e. **Materials and Biotech:** CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590

2. Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the BS degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.

3. A project consisting of at least 6 CHEM E 600 credits (with a numerical grade of 2.7 or above, or an S grade). A member of the chemical engineering graduate faculty must supervise and grade the work. A written report is required.
4. Thesis research (i.e., CHEM E 700 or CHEM E 800) cannot count toward the 39 credits.

5. Minimum 3.00 cumulative GPA in the graduate program

6. At least 30 credits taken through the UW

7. Final examination consisting of an oral presentation of the CHEM E 600 project

Master of Science in Engineering

Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must:

1. Be highly ranked (top 10 percent) in a respected chemical engineering program
2. Score at least 750 on the quantitative portion of the GRE
3. Score at least 600 (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

39 credits

The requirements are the same as for the MSChE thesis option, except that the research adviser considers the student's background and research objectives and tailors the course requirements accordingly (subject to Graduate Program Coordinator approval). Relative to the MSChE options, usually less emphasis is on chemical engineering, more on engineering science and related subjects.

Doctor of Philosophy

Admission Requirements

Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must:

1. Be highly ranked (top 10 percent) in a respected chemical engineering program
2. Score at least 750 on the quantitative portion of the GRE
3. Score at least 600 (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements
90-108 credits, as follows:

1. **Minimum Graduate School Requirements**: Satisfy Graduate School minimum requirements, summarized below. NOTE: Graduate School policy imposes the requirements in force at the time of graduation (not at the time of program entry).
   a. Complete at least 18 credits of courses numbered 500-600 through the University of Washington.
   b. Complete at least 18 numerically graded credits of 400- and 500-level UW courses prior to the general examination. Any 400-level courses must have departmental approval.
   c. Complete a minimum of 90 credits, at least 60 of which are UW credits.
   d. Compile a minimum of 27 dissertation credits (CHEM E 800) over a period of at least three quarters. With the exception of summer, students may take a maximum of 10 dissertation credits per quarter.
   e. Maintain a minimum cumulative GPA of 3.00.
   f. Pass the general examination.
   g. Pass the final examination (includes approval of the dissertation by student's Supervisory Committee).
   h. Maintain full- or part-time graduate student registration at the UW for the quarter in which the above examinations are completed and the degree is conferred.
   i. Complete all work for the doctoral degree within ten years.

2. **Students with a Chemical Engineering Undergraduate Degree**: In addition to the requirements listed above, doctoral students must:
   a. Complete the non-thesis MSChE degree prior to the general examination. (Students with an MS in chemical engineering from another university may petition the Graduate Program Coordinator for an exemption.)
   b. Serve as a TA for at least three quarters. Students should plan on one quarter per year in years 2-4.
   c. Complete at least six graded courses numbered 500-599 or approved 400-level courses to satisfy the following:
   d. Take five courses from at least four of the following five categories. (Courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
      1. **Math/Computer/Statistics**: CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
      2. **Thermodynamics**: CHEM E 455, CHEM E 525, CHEM E 526, CHEM E 552
      3. **Transport Phenomena**: CHEM E 530, CHEM E 531, M E 533, M E 534
      4. **Reaction Phenomena**: CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
      5. **Materials and Biotech**: CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590
   e. Take one CHEM E course in a topic outside the student's main research area.
3. **Non-Chemical Engineering Undergraduates:** Students whose undergraduate degree is in engineering or science (e.g., BS in chemistry or materials science) but not chemical engineering must pass or serve as a TA in the following courses in addition to the requirements listed in the previous section: CHEM E 330 (5), CHEM E 340, CHEM E 435, CHEM E 465, CHEM E 485

4. Students lacking a strong background in thermodynamics are advised (but not required) to take CHEM E 326 prior to attempting CHEM E 525. It is possible to take some graduate courses while completing the required undergraduate courses.

**Research Facilities**

Benson Hall contains classrooms, offices, stockrooms, a machine shop, laboratories, and a variety of specialized research equipment. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computer Center, instrument-making shops, research centers (e.g., biomaterials, nanotechnology, chemical analysis), and the Chemistry and Engineering Libraries.

**Financial Aid**

The department has various sources of support for qualified graduate students. Those interested in applying for admission and support should visit the department's website: [www.cheme.washington.edu](http://www.cheme.washington.edu), which provides details on application procedures. Offers of admission with financial support are usually made in January through March.
COLLEGE OF ENGINEERING
CHEMICAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**CHEM E 299 Undergraduate Research (1-3, max. 9)**
Research or special topics under the supervision of a faculty member. Offered: AWSpS.
[View course details in MyPlan: CHEM E 299](#)

**CHEM E 301 Leadership Seminar (1) Schwartz**
Forum for industrial, academic, and government leaders to share their experiences and insights with students. Includes topics related to leadership in the chemical engineering profession including career planning, management skills, interpersonal skills, effective planning, entrepreneurship, ethics, and strategic decisions. Credit/no-credit only. Offered: A.
[View course details in MyPlan: CHEM E 301](#)

**CHEM E 309 Creativity and Innovation (2) VLPA G. ALLAN**
[View course details in MyPlan: CHEM E 309](#)

**CHEM E 310 Material and Energy Balances (4)**
Chemical and physical process calculations: steady- and unsteady-state material and energy balances with specific examples in vapor-liquid contact operations and multiphase extraction, and introductory thermochemistry. Prerequisite: PHYS 122 and MATH 307. Offered: Sp.
[View course details in MyPlan: CHEM E 310](#)

**CHEM E 325 Energy and Entropy (4)**
Introduction to the basic principles of thermodynamics from both microscopic and macroscopic points of view. Emphasis on equilibrium phenomena, and the trade-off of energy and disorder in determining structure and properties. Applications of thermodynamics in process design and analysis. Prerequisite: CHEM E 310. Offered: A.
[View course details in MyPlan: CHEM E 325](#)
CHEM E 326 Chemical Engineering Thermodynamics (4)
Phase equilibria and chemical equilibria in multicomponent systems; theories of solution; chemical reaction analysis. Prerequisite: CHEM E 325. Offered: W.
View course details in MyPlan: CHEM E 326

CHEM E 330 Transport Processes I (5)
Diffusive transport of momentum, heat, and mass; general aspects of fluid flow; the Navier-Stokes equations; one-dimensional flow with engineering applications. Prerequisite: CHEM E 310; either MATH 136 or MATH 307. Offered: A.
View course details in MyPlan: CHEM E 330

CHEM E 340 Transport Processes II (4)
Heat transfer, basic principles, and applications. Conduction, convection, and radiation. Prerequisite: CHEM E 330. Offered: W.
View course details in MyPlan: CHEM E 340

CHEM E 341 Energy and Environment (3) NW
Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with ENVIR 341/M E 341; A.
View course details in MyPlan: CHEM E 341

CHEM E 355 Biological Frameworks for Engineers (3)
For engineers with no prior experience in the biological sciences. Hands-on, project-based course covers fundamental concepts and language of biology, from an engineering perspective. Topics include functions of life, information processing, proteins, DNA, genetic variability, control loops, energetics, tissues, organisms, ecosystems. Prerequisite: either CHEM 142 or CHEM 145; PHYS 123; either MATH 307 or AMATH 351. Instructors: Shen Offered: W.
View course details in MyPlan: CHEM E 355

CHEM E 375 Chemical Engineering Computer Skills (2) Pfaendtner
Use Excell, Matlab, and AspenPlus to solve typical chemical engineering problems. Solve realistic problems and explore alternatives that would be inaccessible for hand calculations. Includes equations of state, chemical equilibrium of simultaneous reactions, phase equilibria, plug flow reactors, heat transfer in 1-D, and time-dependent heat transfer. Offered: W.
View course details in MyPlan: CHEM E 375

CHEM E 435 Transport Processes III (4)
Mass transfer, basic principles, and applications to equipment design. Physical separation processes. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.
View course details in MyPlan: CHEM E 435

CHEM E 436 Chemical Engineering Laboratory I (3)
Lectures on statistics, experimental design, instrumentation, laboratory safety, and report writing; laboratory experiments on fluid mechanics and heat transfer. Emphasis on teaming, experimental planning, procedures, report writing, and oral presentations. Prerequisite: CHEM E 326; CHEM E 340 which may be taken concurrently; HCDE 231. Offered: Asp.
View course details in MyPlan: CHEM E 436

CHEM E 437 Chemical Engineering Laboratory II (3)
Continuation of CHEM E 436. Laboratory investigation of chemical engineering principles applied to equipment design with emphasis on mass transfer operations and chemical reactors. Prerequisite: CHEM E 435; CHEM E 436; CHEM E 465. Offered: W.
View course details in MyPlan: CHEM E 437
Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Prerequisite: CHEM 455 or CHEM 475 which may be taken concurrently Offered: jointly with CHEM 466/MSE 466; AWSp.
View course details in MyPlan: CHEM E 440

CHEM E 442 Renewable Energy (4) NW P. MALTE
Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either M E 323, CHEM E 325, A A 260, or E E 351. Offered: jointly with M E 442; W.
View course details in MyPlan: CHEM E 442

CHEM E 445 Fuel Cell Engineering (3)
Introduction to electrochemical fuel cells for use in transportation and stationary power applications. Topics covered include types of fuel cells, single cell operation, stack engineering, overall system design, and safety, with emphasis on proton exchange membrane and solid oxide fuel cells. Prerequisite: CHEM E 330. Instructors: Stuve
View course details in MyPlan: CHEM E 445

CHEM E 445 Surface and Colloid Science Laboratory (3) Berg, Pozzo
Laboratory techniques, equipment, and underlying fundamentals in surface and colloid science. Experiments in the measurement of surface tension, adsorption, wetting and spreading, colloid properties, emulsion preparation and stability, electrophoresis, and interfacial hydrodynamics. Offered: ASp.
View course details in MyPlan: CHEM E 445

CHEM E 457 Principles of Molecular Engineering (3)
Covers the basic aspects of statistical mechanics, focusing primarily on the canonical ensemble. Develops and applies a set of tools to regular liquid solutions, phase formation, spinodal decomposition, adsorption, polymer thermodynamics, chemical kinetics, and physical kinetics. Prerequisite: CHEM E 310; CHEM E 325; CHEM 455. Instructors: Hillhouse Offered: Sp.
View course details in MyPlan: CHEM E 457

CHEM E 458 Surface Analysis (3) B. RATNER
View course details in MyPlan: CHEM E 458

CHEM E 460 Polymer chemistry Laboratory (3) C. DEFOREST
Laboratory techniques, equipment, and underlying fundamentals in polymer chemistry, synthesis, and design. Quantitative understanding of polymerization reaction engineering will be developed through careful examination of kinetics and structure-property relationships. Selection of laboratory polymerization and characterization techniques, as well as recent innovations in polymer research, will be highlighted. Prerequisite: CHEM 238. Offered: Sp.
View course details in MyPlan: CHEM E 460

CHEM E 461 Electrochemical Engineering (3) Schwartz
Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Applications to chemical sensors, batteries, corrosion, thin film deposition. In-class demonstrations to illustrate concepts.
View course details in MyPlan: CHEM E 461
CHEM E 465 Reactor Design (4)
Application of chemical kinetics and transport phenomena to the design of chemical reactors; characterization of batch and continuous-flow reactors in homogeneous and heterogeneous systems. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.
View course details in MyPlan: CHEM E 465

CHEM E 467 Biochemical Engineering (3) F: BANEYX
Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with BIOEN 467; W.
View course details in MyPlan: CHEM E 467

CHEM E 468 Air-Pollution Control Equipment Design (3)
Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CEE 494/M E 468.
View course details in MyPlan: CHEM E 468

CHEM E 480 Process Dynamics and Control (4)
Dynamics of process units and systems; instrumentation and control system design and analysis. Includes weekly laboratory. Prerequisite: CHEM E 435; CHEM E 465. Offered: W.
View course details in MyPlan: CHEM E 480

CHEM E 481 Process Optimization (3) Holt
Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods of search, linear and nonlinear programming, dynamic programming, statistical experimental design, and evolutionary operation. Offered: A.
View course details in MyPlan: CHEM E 481

CHEM E 482 Advanced Topics in Process Control (3)
Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: CHEM E 480. Instructors: Holt, Ricker
View course details in MyPlan: CHEM E 482

CHEM E 484 Electronic and Optoelectronic Polymers (3)
Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe Offered: A.
View course details in MyPlan: CHEM E 484

CHEM E 485 Process Design I (4)
Applied economics in chemical engineering design and operations; measures of profitability; capital and operating cost estimates; introduction to design and design strategies. Prerequisite: CHEM E 480 which may be taken concurrently. Offered: W.
View course details in MyPlan: CHEM E 485

CHEM E 486 Process Design II (5)
Comprehensive design of a specific process or product, including economic feasibility studies, utilization of market survey and plant location studies, process equipment design and optimization, and overall plant
CHEM E 486 CHEMICAL ENGINEERING
Prerequisite: CHEM E 485. Offered: Sp.
View course details in MyPlan: CHEM E 486

CHEM E 490 Engineering Materials for Biomedical Applications (3)
Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with BIOEN 490; A.
View course details in MyPlan: CHEM E 490

CHEM E 491 Controlled-Release Systems (3) S. PUN
Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with BIOEN 491; W.
View course details in MyPlan: CHEM E 491

CHEM E 493 Advanced Surface Analysis (3) D. CASTNER
Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with BIOEN 493; W.
View course details in MyPlan: CHEM E 493

CHEM E 497 Special Projects in Chemical Engineering Design ([1-6]-, max. 12)
Chemical engineering design instruction and experience in special projects, such as industrially motivated, timely, or interdisciplinary projects. Project subject and content varies. Majors only. Prerequisite: CHEM E 340.
View course details in MyPlan: CHEM E 497

CHEM E 498 Special Topics in Chemical Engineering (1-4, max. 12)
Topics of current interest in the field. Subject matter changes from quarter to quarter.
View course details in MyPlan: CHEM E 498

CHEM E 499 Undergraduate Research ([1-6]-, max. 12)
Independent research projects in chemical engineering. Offered: AWSpS.
View course details in MyPlan: CHEM E 499

CHEM E 510 Mathematical Foundations of Systems Theory (4)
Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/E E 510/M E 510.
View course details in MyPlan: CHEM E 510

CHEM E 511 Biomaterials Seminar (1, max. 18) D. CASTNER, L. GAMBLE
Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with BIOEN 511.
View course details in MyPlan: CHEM E 511

CHEM E 512 Methods of Engineering Analysis (3)
Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisite: MATH 308, MATH 307 or AMATH 351, MATH 324, or permission of instructor. Offered: jointly with AMATH 512; A.
View course details in MyPlan: CHEM E 512
CHEM E 514 Advanced Chemical Engineering Laboratory (3) Q. YU
Instrumentation and laboratory techniques for chemical, biological, clean energy, and nano technologies. Experiments include surface modification, this film formation, nanoparticle synthesis, micro/nanoscale fabrication, protein adsorption, microorganism identification, and photovoltaic device fabrication/evaluation using advanced instrumentation. Offered: W.

View course details in MyPlan: CHEM E 514

CHEM E 515 Experimental Methods in Chemical Engineering Research (3) Baneyx, Berg, Jiang
Lecture and laboratory studies in current research methods of chemical engineering. Includes surface science, biochemical engineering, colloidal chemistry, light scattering, and nanoscience techniques. Offered: A.

View course details in MyPlan: CHEM E 515

CHEM E 523 Seminar in Chemical Engineering (0-1, max. 30)
Topics of current interest in chemical engineering. Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: CHEM E 523

CHEM E 525 Chemical Engineering Thermodynamics (4)
Review of principles of thermodynamics. Applications to problems in multiphase and multicomponent systems; theories of solutions. Prerequisite: undergraduate thermodynamics. Offered: A.

View course details in MyPlan: CHEM E 525

CHEM E 530 Momentum, Heat, and Mass Transfer I (4)
Derivation of the differential equations for mass, energy, and momentum transport. Principles of fluid mechanics; creeping flow, turbulence, boundary-layer theory. Offered: A.

View course details in MyPlan: CHEM E 530

CHEM E 531 Momentum, Heat, and Mass Transfer II (3)
Continuation of CHEM E 530. Flows of fluid-particle systems; convective heat transfer, natural convection. Prerequisite: CHEM E 530.

View course details in MyPlan: CHEM E 531

CHEM E 540 Energy Materials, Devices, and Systems (3) D. GINGER JR
Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Offered: jointly with CHEM 566/MSE 566; AWSp.

View course details in MyPlan: CHEM E 540

CHEM E 554 Nanoscale Science I: Contact Mechanics and Rheology on the Nanoscale (3) Overney
Introductory nanoscale science with emphasis on contact mechanics, principle and concept of forces, scanning force microscopy, tribology (friction, wear, lubrication), rheology, ultrathin organic films, physical properties of polymers, and computer simulation. Offered: W.

View course details in MyPlan: CHEM E 554

CHEM E 556 Colloidal Systems (3) Berg, Pozzo
Examines the unique properties and application of colloidal materials, i.e., dispersions of micro- or nano-sized particles in various media are described. Explores their inherent instability, and their kinetic, phoretic, electric, optical, and rheological properties. Offered: W.

View course details in MyPlan: CHEM E 556

CHEM E 558 Surface Analysis (3) B. RATNER
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and
thermodynamic methods. Offered: jointly with BIOEN 592.  
View course details in MyPlan: CHEM E 558

CHEM E 560 Reactions at Solid Surfaces (3)  
Fundamental studies of adsorption and reactions on metallic and non-metallic surfaces with emphasis on heterogeneous catalysis and electrochemistry, including fuel cells. Topics include gas phase and liquid phase surface reactions, analyzed both experimentally and computationally. Prerequisite: undergraduate level course in kinetics or catalysis. Instructors: Stuve  
View course details in MyPlan: CHEM E 560

CHEM E 565 Kinetics and Catalysis (3)  
Homogeneous and heterogeneous systems with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisite: CHEM E 525. Instructors: Stuve  
View course details in MyPlan: CHEM E 565

CHEM E 580 Topics in Chemical Engineering Design (3, max. 9)  
Lectures and seminars on current design methods in chemical engineering, including technical and economic feasibility of processes, design and optimization of process equipment, and environmental and social constraints. Prerequisite: undergraduate chemical engineering design, admission to chemical engineering master's program, or permission of instructor.  
View course details in MyPlan: CHEM E 580

CHEM E 584 Electronic and Optoelectronic Polymers (3)  
Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe Offered: A.  
View course details in MyPlan: CHEM E 584

CHEM E 588 Research in Applied Microbiology (1, max. 30)  
Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Instructors: Lidstrom Credit/no-credit only. Offered: jointly with MICROM 588; AWSpS.  
View course details in MyPlan: CHEM E 588

CHEM E 590 Advanced Topics in Biomaterials (3)  
Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with BIOEN 590.  
View course details in MyPlan: CHEM E 590

CHEM E 591 Robotics and Control Systems Colloquium (1, max. 30)  
Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/E E 591/M E 591.  
View course details in MyPlan: CHEM E 591

CHEM E 593 Advanced Surface Analysis (3)  
Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with BIOEN 593; W.  
View course details in MyPlan: CHEM E 593
CHEM E 599 Current Topics in Chemical Engineering (1-5, max. 12)
Readings or lectures and discussions of topics of current interest in the field of chemical engineering. Subject matter changes from year to year. Prerequisite: permission of instructor.
View course details in MyPlan: CHEM E 599

CHEM E 600 Independent Study or Research (*-)
Offered: AWSpS.
View course details in MyPlan: CHEM E 600

CHEM E 700 Master's Thesis (*-)
Offered: AWSpS.
View course details in MyPlan: CHEM E 700

CHEM E 800 Doctoral Dissertation (*-)
Offered: AWSpS.
View course details in MyPlan: CHEM E 800

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
COLLEGE OF ENGINEERING
CHEMICAL ENGINEERING
NANOSCIENCE AND MOLECULAR ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

NME 220 Introduction to Molecular and Nanoscale Principles (4) NW
Introduction to theories and concepts of molecular and nanoscale systems to raise awareness of technological and societal transformations anticipated through progress in nanotechnology. Prerequisite: either CHEM 142, CHEM 144, or CHEM 145; either MATH 126 or MATH 136; PHYS 121.
View course details in MyPlan: NME 220

NME 221 Nanoscience and Molecular Engineering Seminar I (1)
Introduces nanoscience and molecular engineering, and offers the opportunity of a first intellectual and interdisciplinary forum with interactions with members of research groups in the field. First in a series of three. Prerequisite: NME 220, which may be taken concurrently. Instructors: Overney Credit/no-credit only.
View course details in MyPlan: NME 221

NME 321 Nanoscience and Molecular Engineering Seminar II (1) Overney
Demonstrates how to tackle research challenges, put results into the framework of the open literature, and present and interpret data. Discusses contemporary societal and ethical aspects in nanoscience and molecular engineering. Second in a series of three. Credit/no-credit only.
View course details in MyPlan: NME 321

NME 421 Nanoscience and Molecular Engineering Seminar III (1)
Provides students with the opportunity to present their research results obtained during undergraduate research studies. Assessing the work of their peers and receiving feedback on their work, students further refine their ability in conducting and presenting research. Third in a series of three. Prerequisite: NME 321. Instructors: Overney Credit/no-credit only.
View course details in MyPlan: NME 421

NME 498 Special Topics in Nanoscience and Molecular Engineering (1-4, max. 12) Overney
Topics of current interest in the field.
View course details in MyPlan: NME 498
Civil and Environmental Engineering

Display as tabs

Department Overview

201 More

Civil and environmental engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities focus on: transportation infrastructure and construction; heavy construction; hydrology and hydrodynamics; structures, mechanics, and geotechnical engineering; wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and air quality management.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and system analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints. Civil and environmental engineers create and maintain infrastructure in a heavily human-influenced ecosystem.

To accommodate these wide interests, the department is organized into six academic areas: construction engineering; transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

Undergraduate Program

Adviser
201 More, Box 352700
(206) 543-5092
ceadvice@uw.edu

The Department of Civil and Environmental Engineering offers the following program of study:

- The Bachelor of Science in Civil Engineering degree

The BSCE degree is appropriate for students interested in civil and environmental engineering. The BS program is accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).
Bachelor of Science in Civil Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; AMATH 301 (preferred) or CSE 142; A A 210; CEE 220; M E 230; English composition.

Department Admission Requirements

Applicants are considered in three groups - Direct Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only. Applications for Early and Upper-Division Admission are accepted through the College of Engineering online application form. For more information, see information for prospective students on the department website.

Direct Freshman Admission

The department enrolls up to 20% of its incoming class directly from high school, prior to completion of University-level prerequisites. Students accepted to the UW who indicate Civil and Environmental Engineering as their preferred major on the freshman application are automatically considered. Competitive applicants have taken or are taking calculus and at least two years of laboratory science (physics, chemistry preferred) in high school. Admission is for autumn quarter only.

Early Admission

1. Admission is for autumn quarter only. Departmental application deadline is July 1.

2. Course Requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science courses plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.

3. Applicants must be currently enrolled at the UW and must have a minimum 15 credits taken in residence at the UW.

4. Grade Requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission

5. Completion of minimum requirements does not guarantee admission.

Upper-Division Admission

1. Admission is for autumn quarter only. Departmental application deadline is July 1.

2. Course requirements: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; AMATH 301 (preferred) or CSE 142; AA 210; CEE 220; M E 230; and 5 credits of English composition.

3. Grade requirements: Minimum grade of 2.0 in each course and a minimum cumulative GPA of 2.50:

4. Completion of minimum requirements does not guarantee admission.

Graduation Requirements

Minimum 180 credits as follows:
1. General Education Requirements (85-87 credits)
   a. Written and Oral Communication (8 credits): English composition; HCDE 231
   b. Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits): Minimum 10 credits in VLPA and minimum 10 credits in I&S plus 4 additional credits in either area.
   c. Economics (4-5 credits): ECON 200 or IND E 250. ECON 200 may also be applied toward the I&S requirement. IND E 250 may also be applied toward the requirement for an additional Engineering Fundamentals course.
   d. Natural World (49-50 credits)
      i. Mathematics (21 credits): MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352)
      ii. Statistics (3-4 credits): IND 315 (preferred) or STAT 390
      iii. Science (25 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122,
   2. Major Requirements (94-97 credits)
   a. Engineering Fundamentals (20 credits): AMATH 301 or CSE 142, A A 210, CEE 220, and ME 230. Students who complete STAT 390 must complete an additional engineering fundamentals course from A A 260, IND E 250, IND E 280, M E 123, E E 215, or MSE 170. Students who complete IND E 315 must complete either an additional Engineering Fundamentals course from the above list, or an additional 300-level math course other than statistics.
   c. Professional Practice and Capstone Design (7 credits): CEE 440 and one course from CEE 441, CEE 442, CEE 444, or CEE 445. Minimum 2.0 grade required for both courses in this two-course sequence.
   d. Civil Engineering Technical Electives (15 credits): CEE 400-level coursework selected from an approved list (see adviser or department website for list), with at least one core course from three separate areas of concentration within the department. Minimum 2.0 grade required for each of the three courses used to fulfill the core-courses requirement.
   e. Upper-Division Engineering and Science (12 credits): Choice of additional CEE 400-level courses or courses from an approved list from outside the department. Maximum 6 credits of CEE 498 and 3 credits of CEE 499 allowed toward upper-division engineering and science.
   f. Grade Requirements: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving civil and environmental engineering problems; demonstrate sufficient mastery of core civil and environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in
designing systems and components in civil and environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.

- **Instructional and Research Facilities:** The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental science and hazardous waste research laboratory facilities include more than 7,000 square feet of lab space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. The lake-stream laboratory is equipped with limnological equipment, as well as an auto-analyzer, bench-top incubators, and research microscopes. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million pound capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a computer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.

- **Department Scholarships:** The department offers numerous annual scholarships. The application deadline for departmental scholarships is April 1. For more information, see department website. Scholarships are also available through the College of Engineering, the UW Scholarship Office, and external sources, including professional associations and industry.

- **Student Organizations/Associations:** American Society of Civil Engineers. Chi Epsilon, national honor society for civil engineering undergraduate and graduate students. See adviser for details.

---

**Graduate Program**

Graduate Program Coordinator  
201 More, Box 352700  
(206) 543-2574  
ceginfo@uw.edu

The Department of Civil and Environmental Engineering offers programs of study leading to the degrees of Master of Science in Civil Engineering (MSCE), Master of Sustainable Transportation (MST), Master of Supply Chain Transportation and Logistics (MSCTL), and Doctor of Philosophy.

Graduate work is offered in most fields of civil and environmental engineering, including transportation and construction engineering; geotechnical engineering; structural engineering; and environmental engineering.
engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

**Graduate Online Programs:**

*Construction Engineering Master's Program:* The Department of Civil and Environmental Engineering, in collaboration with the Department of Construction Management in the College of Built Environments, offers an online Master of Science in Civil Engineering degree in Construction Engineering. Designed for working professionals, this program can be completed entirely online and at the student's own pace. Areas covered include heavy construction project management, infrastructure construction, and qualitative construction management. For more information on this program, see the Construction Engineering website.

*Master in Sustainable Transportation Program:* The Department of Civil and Environmental Engineering, in partnership with UW Professional and Continuing Education, offers an online Master of Sustainable Transportation degree (MST). The program provides transportation engineers and planners with the latest knowledge, skills, and tools needed to become leaders in developing and maintaining sustainable transportation practices. Students develop an awareness of green transportation strategies and gain a solid background with practical applications. In a part-time online format, the MST program covers three areas of concentration: Planning and Livable Communities; Environmental Issues and Impacts; and Policy Development, Health and Economics. For more information on this program, see the Master of Sustainable Transportation website.

*Supply Chain Transportation and Logistics Master's Program (beginning Autumn 2013):* The Department of Civil and Environmental Engineering, in partnership with UW Professional and Continuing Education, offers an online Master of Supply Chain Transportation and Logistics degree. Combining engineering and business principles with industry best practices, this program provides students with the knowledge needed to successfully design, implement, and manage complex supply chain transportation and logistics strategies. Students study cross-functional areas, such as operations, inventory management, and IT systems, to develop skills in the end-to-end management of transportation in a global supply chain. For more information on this program, see the Master of Supply Chain Transportation and Logistics website.

**Master of Science in Civil Engineering**

*Admission Requirements*

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

*Degree Requirements*

42 credits, as follows:

Two options are available -- thesis and non-thesis.

- **Thesis option:**
  - 30 credits of coursework with at least 18 credits at the 500 level
  - 3 credits (maximum) of CEE 500
- 9 credits of master's thesis, CEE 700
- Non-thesis option:
  - 39 credits of coursework with at least 18 credits at the 500 level
  - 3 credits (maximum) of CEE 500

**Doctor of Philosophy**

**Admission Requirements**

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a research-based graduate degree program. The applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

**Degree Requirements**

90 credits, as follows:

- 60 coursework credits
- 27+ dissertation credits
- 3 seminar credits (for those without a master's degree from CEE at UW)

With the approval of the department, an appropriate master's degree from an accredited institution may be applied towards 30 of the 60 coursework credits.

Because this is a research-based degree, course requirements are individualized depending on student's background and PhD topic area.

**Financial Aid**

Research and teaching assistantships are available on a competitive basis. The number of positions depends upon the current level of funding. Additionally there are a limited number of fellowships, scholarships, and traineeships.

**Research Facilities**

More Hall has structural, concrete, bituminous materials, soil mechanics, computer, water-quality, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydrology and hydrodynamics are located in the Harris Hydraulics Laboratory.
COLLEGE OF ENGINEERING
CIVIL AND ENVIRONMENTAL ENGINEERING
CIVIL & ENVIRONMENTAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

CEE 100 Twenty-First Century Civil and Environmental Engineering (1)
Introduction to the modern discipline of civil and environmental engineering including major sub-disciplines, professional careers, projects, and departmental faculty. Explores the different disciplines and their relevance to today's students. Credit/no-credit only. Offered: W.
[View course details in MyPlan: CEE 100]

CEE 220 Introduction to Mechanics of Materials (4) NW
Introduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships among loads, stresses, and deflections of structural and machine elements such as rods, shafts, and beams. Load-carrying capacity of these elements under tension, compression, torsion, bending, and shear forces. Prerequisite: minimum grade of 2.0 in A A 210. Instructors: Berman, Reed Offered: AWSp.
[View course details in MyPlan: CEE 220]

CEE 250 Environmental Processes and flows (3) NW
Introduces the concepts of environmental materials and energy balance within the context of Pacific Northwest case studies, in particular nutrient loading, eutrophication, hypoxia/fish kills, water treatment, and global climate change and its regional impacts on water resources and hydrologic cycles. Prerequisite: either MATH 120, or MATH 124. Instructors: Brett Offered: Sp.
[View course details in MyPlan: CEE 250]

CEE 291 Introduction to AutoCAD for Civil Engineers (2) NW
Provides an introduction to engineering drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in 2D and 3D drafting in AutoCAD. Introduces reading plan sets and creating portions of plan sets applied to civil and environmental engineering fields. Prerequisite: MATH 124 or MATH 112. Offered: AWSp.
[View course details in MyPlan: CEE 291]

CEE 297 Foreign Study (3-5, max. 15)
For participants in approved foreign-study programs. May not be used to satisfy upper-division major
CIVIL & ENVIRONMENTAL ENGINEERING  

CEE 297  
General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, aggregates, portland cement concrete, bituminous materials, asphalt concrete, wood. Laboratory testing, instrumentation, and investigation into macro-behavior. Sustainability issues including recycling, energy requirements, and greenhouse gas production associated with the materials. Prerequisite: CEE 220. Offered: ASp.
View course details in MyPlan: CEE 337

CEE 298 Special Topics in Civil and Environmental Engineering (1-5, max. 10)  
Explores special topics in civil and environmental engineering.
View course details in MyPlan: CEE 298

CEE 299 Independent Project (1-5, max. 10)  
Research on special topics under supervision of a faculty member. May not be used to satisfy upper-division major requirements. Offered: AWSpS.
View course details in MyPlan: CEE 299

CEE 307 Construction Engineering (5)  
Introduces construction engineering including construction methods, engineering economics, contracts, project delivery methods, plan and specifications, scheduling, estimating, productivity, environmental regulations, safety and green construction. Uses scheduling and estimating software tools and emphasizes communication engineering information. Offered: AW.
View course details in MyPlan: CEE 307

CEE 317 GeoSurveying (5)  
Measurement and digital mapping techniques; integration of surveying methods and techniques, monitoring of structures; spatial data collection and integration with surveying data; adjustment of measurements, concepts of error; surveying control; coordinate systems, transformation; highway vertical curves; Earthwork, leveling and datum consideration, photogrammetry, GPS, GIS, remote sensing, cadastral and construction surveys, digital mapping. Prerequisite: either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: A.
View course details in MyPlan: CEE 317

CEE 327 Transportation Engineering (5)  
Studies vehicular transportation fundamentals including vehicle dynamics, geometric design, pavement design, traffic flow concepts, level of service analysis, intelligent transportation systems, travel demand prediction methods, freight logistics, and management of transportation systems. Includes a review of relevant vehicle operating characteristics. Prerequisite: PHYS 121; either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: WSp.
View course details in MyPlan: CEE 327

CEE 337 Construction Materials (5)  
General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, aggregates, portland cement concrete, bituminous materials, asphalt concrete, wood. Laboratory testing, instrumentation, and investigation into macro-behavior. Sustainability issues including recycling, energy requirements, and greenhouse gas production associated with the materials. Prerequisite: CEE 220. Offered: ASp.
View course details in MyPlan: CEE 337

CEE 347 Introduction to Fluid Mechanics (5)  
View course details in MyPlan: CEE 347

CEE 348 Hydrology and Environmental Fluid Mechanics (4) A. HORNER-DEVINE, E. ISTANBULLUOGLU, J. LUNDQUIST  
Introduction to the physical processes that govern transport and mixing in the environment. The course uses fluid mechanical principles to understand flow in the atmosphere, river basins, groundwater, lakes and estuaries with implications for the movement of water, contaminant and other tracers through the environment.
View course details in MyPlan: CEE 348
Prerequisite: CEE 347 and PHYS 123. Offered: Sp.
View course details in MyPlan: CEE 348

CEE 349 Case Studies in Environmental Engineering (3)
Case studies are used to introduce fundamental environmental engineering concepts with a focus on engineering approaches that consider the interconnectedness of human and environmental systems. Prerequisite: CHEM 162. Offered: A.
View course details in MyPlan: CEE 349

CEE 350 Mass and Energy Balances in Environmental Engineering (4)
Introduces concepts of mass balance, energy balance, and mass transport, and movement of water, chemicals, and energy through natural and engineered environmental systems, with application to water treatment, global elemental cycles, the earth's energy balance. Credit cannot be applied toward graduation for both CEE 350 and CHEM E 310 Prerequisite: CHEM 162, PHYS 122, AMATH 351, or MATH 307.
View course details in MyPlan: CEE 350

CEE 352 Introduction to Environmental Chemistry and Microbiology (4)
Introduction to chemical and microbiological processes in natural and engineered environmental systems. Identification of key classes of chemicals and microorganisms; thermodynamics and kinetics of chemical and microbiological processes, their impacts on ecological and human health, and their importance in biogeochemical cycles and in environmental engineering applications. Prerequisite: CHEM 162, AA 260, CHEM E 326, or ME 323; and BIOL 180.
View course details in MyPlan: CEE 352

CEE 354 Environmental Engineering Applications (5)
Examines sources, impacts, and regulation of soil, water, and air pollutants, with emphasis on technologies for preventing and mitigating environmental pollution. Introduces applications of mass and energy balances and principles of chemistry and microbiology in design and operation of subsurface remediation, water and wastewater treatment, and air pollution control processes. Prerequisite: CEE 350, or CHEME 310; and CEE 352, or CHEM 237, or CHEM 223. Offered: W.
View course details in MyPlan: CEE 354

CEE 356 Quantitative and Conceptual Tools for Sustainability (4)
Conceptual and quantitative tools are introduced that incorporate sustainability principles into environmental engineering. It uses a systems analysis perspective to address critical issues in environmental engineering. Topics include life cycle analysis and long-term system mass balances that facilitate decision making and process optimization at generational time scales. Offered: Sp.
View course details in MyPlan: CEE 356

CEE 357 Environmental Engineering (5)
Describes water and air resources, parameters that characterize their quality, and how their use alters their properties. Elements of hydrology. Mass and energy balances as applied to environmental systems. Global environmental change. Basics of aquatic chemistry and microbiology applied to municipal water and wastewater treatment operation. Groundwater contamination and treatment. Prerequisite: CHEM 142; either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: WSp.
View course details in MyPlan: CEE 357

CEE 367 Geotechnical Engineering (5)
Fundamental engineering properties of soil and rock; depositional processes and physical characteristics, hydroconductive properties and advective flow; volume change characteristics including short- and long-term deformation; shear strength properties; and applications of basic concepts to practical problems such as foundation design and slope stability. Prerequisite: CEE 347. Instructors: Arduino, Kramer, Wartman Offered: WSp.
View course details in MyPlan: CEE 367
**CEE 377 Introduction to Structural Design (5)** Berman, Eberhard, Reed, Roeder
Introduces the concepts, approaches, procedures, and codes for the structural design. Characterization of structural loads. Structural systems and system behavior. Analysis of statically determinate structures and introduction to analysis of statically indeterminate structures including approximate methods. Introduction to the behavior and design of fundamental structural member. Prerequisite CEE 220. Offered: AW.
View course details in MyPlan: CEE 377

**CEE 404 Infrastructure Construction (4)** S. MUENCH
Basic concepts of large transportation infrastructure construction projects including planning, scheduling, life-cycle cost analysis (LCCA), construction cost, logistics, productivity and, where applicable, traffic impacts. Term project is designed around a large-scale I-5 pavement reconstruction project involving construction, traffic, and the interaction between the two. Involves presentations on local transportation infrastructure projects. Prerequisite: CEE 307. Offered: W.
View course details in MyPlan: CEE 404

**CEE 409 Engineering Rome: Study Abroad (5)** Muench
Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day. Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and historical perspective on engineering and the contributions of engineers to infrastructure and society.
View course details in MyPlan: CEE 409

**CEE 410 Traffic Engineering Fundamentals (3)**
General review of the fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with emphasis on calculations and procedures in the Highway Capacity Manual; field surveys and data analysis. Prerequisite: CEE 327. Offered: W.
View course details in MyPlan: CEE 410

**CEE 412 Transportation Data Management (3)**
Introduction to modern concepts, theories, and tools for transportation data management and analysis. Applications of software tools for transportation data storage, information retrieval, knowledge discovery, data exchange, online information sharing, statistical analysis, system optimization, and decision support. Prerequisite: CEE 327. Instructors: Wang Offered: W.
View course details in MyPlan: CEE 412

**CEE 416 Urban Transportation Planning and Design (3)**
Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. Uses a systems framework, including goals and objectives, evaluation, implementation, and monitoring. A design term project, individual or small groups, utilizes material presented on a contemporary problem. Prerequisite: CEE 327. Offered: A.
View course details in MyPlan: CEE 416

**CEE 418 Computer-Aided Planning of Urban Systems (3)**
Survey of online planning applications; use of various on-line systems to solve urban systems design problems; investigations of hardware/software tradeoffs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with URBDP 429.
View course details in MyPlan: CEE 418

**CEE 420 Engineering with Developing Communities (3)** DIV
Introduces key technologies, theories, and challenges of infrastructure design for development. Covers technologies for energy, water, sanitation, and disaster response in low-resource contexts. Explores development theory and cross-cultural communication as they pertain to global infrastructure design.
View course details in MyPlan: CEE 420

http://www.washington.edu/students/crs/cat/cee.html
CEE 421 Pavement Design & Construction (4) J. MAHONEY, S. MUENCH, J. YAMAURA
structural design and construction processes associated with bituminous and concrete pavements. Covers theory, practice, and software tools for structural thickness design and layered elastic analysis; as well as construction methods, materials, and logistics. Includes small group case-study work on actual paving projects and state-of-the-art mobile project inspection software use. Prerequisite: CEE 337. Offered: Sp.
View course details in MyPlan: CEE 421

CEE 422 Energy and Transportation (3) T. LARSON, J. MAHONEY
Introduces climate change; vehicles, energy requirements and pollution; transportation fuels; energy and power plant terminology; traditional fossil fuel, nuclear, and renewable energy plants; permitting power plants and projects. Prerequisite: CEE 327. Offered: Sp.
View course details in MyPlan: CEE 422

CEE 424 GIS for Civil Engineers (3)
View course details in MyPlan: CEE 424

CEE 425 Reinforced Concrete Construction (3) D. JANSSEN
Processes in constructing reinforced concrete structures. Identification and development of solutions to potential constructability problems. Lectures augmented with industry speakers and a field trip to a building under construction. Requires senior or graduate standing in Civil Engineering or Construction Management and familiarity with reinforced concrete design/construction. Prerequisite: either CEE 291 or AutoCAD experience; a minimum grade of 2.5 in either CEE 428 or CEE 452. Offered: Sp.
View course details in MyPlan: CEE 425

CEE 428 Lightweight Cementitious Composites (1-2-2, max. 2) Janssen
Introduces the process of designing within constraints and introductory experimental design. Covers the importance of proper laboratory documentation. Examines the characteristics of cementitious binders and elementary composite behavior. Considers constructability. Interprets pre- and post-cracking elastic behavior. Includes organization and production of technical report the documents work performed. Offered: A.
View course details in MyPlan: CEE 428

CEE 429 Sustainability in Building Infrastructure (3)
Provides an overview of how to plan, design, construct, and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, green building design codes and energy standards, measurement and verification of building performance, and retrofitting existing building through building energy audit. Prerequisite: CEE 307. Offered: A.
View course details in MyPlan: CEE 429

CEE 431 Seismology and Earthquake Engineering (3) NW
Presents an overview of earthquake processes and details of the characteristics of destructive ground motion; illustrates the effects of such motion on engineering structures; reviews current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either ESS 310, MATH 126, MATH 134, or both MATH 307 and MATH 308. Offered: jointly with ESS 465.
View course details in MyPlan: CEE 431

CEE 436 Foundation Design (3)
Design considerations for foundations and retaining structures. Subsurface investigations and determination of soil properties for design. Design of shallow and deep foundations and retaining structures. Foundations and soil considerations for waterfront structures. Prerequisite: CEE 367. Offered: AW.
View course details in MyPlan: CEE 436
CEE 437 Engineering Geology I (3)
General overview of engineering geology and its importance to civil engineers. Topics include geologic processes, hazards, subsurface investigations, classification of geologic materials, data synthesis, and natural construction materials.
View course details in MyPlan: CEE 437

CEE 440 Professional Practice Studio (2)
Fundamentals of integrated civil engineering design, professional services marketing, project management, team dynamics, total quality management, value engineering, professional liability, and applied ethics in engineering practice. Emphasis on written and oral communications and on ethical, social, and economic factors. Offered: W.
View course details in MyPlan: CEE 440

CEE 441 Transportation and Construction Capstone Design Project (5)
Comprehensive design project focusing on planning, design, and construction of a transportation project such as highways, transit, and airports. Prerequisite: CEE 327; CEE 440; either CEE 404, CEE 410, CEE 412, CEE 416, CEE 421, CEE 424, or CEE 425. Offered: Sp.
View course details in MyPlan: CEE 441

CEE 442 Structural Geotechnical Capstone Design Project (5)
Comprehensive team design project focusing on structural and geotechnical engineering. Requires design drawings, written reports, and oral presentations interfacing with related fields such as aesthetics and architecture, mechanical systems, traffic, environmental planning. Prerequisite: CEE 440; either CEE 451 or CEE 452; one additional course from CEE 436, CEE 451, CEE 452, CEE 453, CEE 454, CEE 456, or CEE 457. Offered: Sp.
View course details in MyPlan: CEE 442

CEE 444 Water Resources and Hydraulic Engineering Capstone Design Project (5)
Opportunity to effect design solutions for projects or major project components in such representative areas as reservoirs and associated systems for flood control, water supply, irrigation, and hydroelectric power, surface water control systems, fisheries related projects, small harbors, and coastal engineering problems. Prerequisite: either CEE 345 or CEE 347; CEE 440; either CEE 475, CEE 476, CEE 482, CEE 483, or CEE 484. Offered: Sp.
View course details in MyPlan: CEE 444

CEE 445 Environmental Engineering Capstone Design Project (5)
Individual and group design studies addressing environmental engineering problems such as stormwater management, water and wastewater treatment facilities, and residual processing. Prepare proposals, engineering reports, and alternative evaluations; process equipment design, present reports on selected design problems. Prerequisite: either CEE 345 or CEE 347; CEE 440; either CEE 473, CEE 475 CEE 476, CEE 481, CEE 482, CEE 483, or CEE 484. Offered: Sp.
View course details in MyPlan: CEE 445

CEE 451 Design of Metal Structures (3)
J. BERMAN, C. ROEDER
Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: CEE 377. Offered: A.
View course details in MyPlan: CEE 451

CEE 452 Design of Reinforced Concrete Structures (3)
D. LEHMAN, D. REED, J. STANTON
Fundamentals of design of buildings in reinforced concrete in accordance with current codes and practices. Prerequisite: CEE 377. Offered: AS.
View course details in MyPlan: CEE 452

CEE 453 Prestressed Concrete Design (3)
Analysis, design, and construction of prestressed concrete structures. Prerequisite: CEE 452. Instructors:
CEE 454 Design of Timber Structures (3)
Includes the design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and manufactured wood products. Prerequisite: CEE 377. Instructors: Berman, Reed Offered: W.
View course details in MyPlan: CEE 454

CEE 455 Structural Unit Masonry (3)
Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CEE 377. Instructors: Tawresey Offered: jointly with ARCH 426.
View course details in MyPlan: CEE 455

CEE 456 Structural Analysis (5)
Fundamental analysis and modeling of civil structural systems. Equilibrium, kinematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving real structures; introduction to finite element analysis of 2D continua. Prerequisite: CEE 377. Instructors: Berman, Eberhard, Lowes Offered: Sp.
View course details in MyPlan: CEE 456

CEE 457 Advanced Structures I (3) L. LOWES
Introduction to the finite element method for modeling civil structures. Formulation of line and continuum elements using virtual work and the principal of minimum potential energy. MATLAB programming of the finite element method. Use of commercial software to model real structures. Prerequisite: CEE 456. Offered: W.
View course details in MyPlan: CEE 457

CEE 458 Advanced Structures II (3)
Introduction to stability, including a consideration of elastic and inelastic buckling with applications to beam-columns and plates. Introduction to plastic analysis. Prerequisite: CEE 456. Instructors: Miller, Stanton
View course details in MyPlan: CEE 458

CEE 459 Advanced Structural Mechanics (3)
Formulation and solution of the basic equations of elasticity. Applications in 2-D stress analysis, torsion, thermal stresses, and beams on elastic foundation. Plate theory optional. Prerequisite: CEE 377.
View course details in MyPlan: CEE 459

CEE 462 Applied Limnology and Pollutant Effects on Freshwater (3) NW
Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Offered: W.
View course details in MyPlan: CEE 462

CEE 463 Limnology Laboratory (2) NW
Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CEE 462, which may be taken concurrently. Offered: jointly with BIOL 474/FISH 474; A.
View course details in MyPlan: CEE 463

CEE 472 Introduction to Hydraulics in Water Resources (3)
Hydraulics related to environmental issues. Global hydrology; stratified flows; two-phase (bubble) flows; pollutant transport and mixing in reservoirs, lakes, coastal waters, and oceans; diffuser design and related case studies. Prerequisite: CEE 347.
View course details in MyPlan: CEE 472
CEE 473 Coastal Engineering I (3)
Linear theory of water waves, wave transformations near shore, sediment motion, and elementary tidal theory; shoreline protection methods; and applications illustrated by selected case histories. Prerequisite: CEE 347. Instructors: Thomson

View course details in MyPlan: CEE 473

CEE 474 Hydraulics of Sediment Transport (3) A. HORNER-DEVINE
Introduction to sediment transport in steady flows with emphasis on physical principles governing the motion of sediment particles. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, streambed roughness analysis, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. Prerequisite: CEE 347. Offered: Sp.

View course details in MyPlan: CEE 474

CEE 475 Analysis Techniques for Groundwater Flow (3) R. NEUMANN
Presents the fundamentals of subsurface flow and transport, emphasizing the role of groundwater in hydrologic cycle, the relation of groundwater flow to geologic structure, and the management of contaminated groundwater. Concepts are applied to well-known hydrogeologic sites. Prerequisite: CEE 347. Offered: W.

View course details in MyPlan: CEE 475

CEE 476 Physical Hydrology (3)
Global water picture, data sources and data homogeneity, precipitation and streamflow hydrography analysis; calculation of surface runoff, evapotranspiration, and groundwater recharge. Hydrologic data frequency analysis and probability theory. Hydrologic design: flood mitigation, drainage. Introduction to deterministic and stochastic models. Prerequisite: CEE 347. Instructors: Istanbulluoglu Offered: A.

View course details in MyPlan: CEE 476

CEE 477 Open-Channel Flow (3)
Water flow in natural and engineered channels, rivers, and streams. Analysis and design of channels (lined, vegetated), flow controls (weirs, spillways), and structures affecting fish passage (culverts). Prediction of water surface profiles. Introduction to river mechanics. Design-oriented problems. Prerequisite: CEE 347. Instructors: Jessup. Offered: W.

View course details in MyPlan: CEE 477

CEE 480 Air-Quality Modeling (3) NW
Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Emphasis on models used for air pollution permits. Emphasizes current problems. Prerequisite: MATH 125. Offered: jointly with ATM S 480; W.

View course details in MyPlan: CEE 480

CEE 481 Hydraulic Design for Environmental Engineering (3) E. ISTANBULLUOGLU
Introduction to the theory and the practice of planning and design of urban water supply distribution, pump stations, sewage and storm-water collection systems, and green stormwater infrastructure. Engineering methods and computer programs are applied for designing basic system elements. Prerequisite: CEE 347; CEE 357. Offered: W.

View course details in MyPlan: CEE 481

CEE 482 Wastewater Reuse and Resource Recovery (3)
Introduces wastewater treatment and systems, emphasizing fundamental biological, chemical, and physical processes related to protection of public health environmental quality and water reuse. Process analysis of the configuration and sizing of major types of treatment processes for various sizes of plants and effluent requirements. Prerequisite: CEE 357. Offered: A.

View course details in MyPlan: CEE 482

CEE 483 Drinking Water Treatment (3)
Studies scientific, engineering, and regulatory principles underlying drinking water treatment; development of
conceptual models for how and why treatment processes work and mathematical models describing their performance under various design and operating scenarios; field trips to water treatment systems. Prerequisite: CEE 357. Offered: A.

View course details in MyPlan: CEE 483

**CEE 484 Decentralized and On-Site Wastewater Management and Reuse (3)**

Design and performance of on-site and decentralized wastewater treatment. Determination of appropriate alternatives based on endpoints of water reuse, economics, policy, management, water quality, and ecological considerations. Meeting sanitation and water reuse for situations including, individual homes, rural areas, developing countries, and high density urban dwellings. Prerequisite: CEE 357.

View course details in MyPlan: CEE 484

**CEE 487 Solid-Waste Disposal (3)**

Describes sources and handling of municipal and industrial solid waste, with examination of collection, processing, recycling and resource recovery, and disposal alternatives. Public policy issues, local agencies and solid waste facilities, the legal and regulatory framework are all addressed in context of solid waste engineering.

View course details in MyPlan: CEE 487

**CEE 488 Hazardous Waste Engineering (3)**

Classification of hazardous wastes; resource conservation, Recovery Act regulations; characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling; landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: CEE 357. Offered: Sp.

View course details in MyPlan: CEE 488

**CEE 489 Water and Air Quality Sampling (2)**

Samples collected from lakes, streams, precipitation, and air. Resulting (and supplemental) data interpreted for cause-effect and statistical inference. Design for water and air quality monitoring programs. Prerequisite: CEE 462.

View course details in MyPlan: CEE 489

**CEE 490 Air-Pollution Control (4)**

Fundamental concepts of air pollution control including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions. Offered: jointly with ENV H 461; ASp.

View course details in MyPlan: CEE 490

**CEE 491 Deterministic Systems (3)**

Development of quantitative methods for mathematical problem solving with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Offered: A.

View course details in MyPlan: CEE 491

**CEE 492 Stochastic Systems (3)**

Introduction to probability distributions and statistics useful in systems analysis, conditional distributions, queuing theory and applications, Monte Carlo simulation, chance-constrained mathematical programming, and stochastic dynamic programming. Emphasis on application of the techniques to civil engineering systems problems, including transportation, water resources, and structures. Prerequisite: CEE 491.

View course details in MyPlan: CEE 492

**CEE 493 Air-Pollution Source Testing and Equipment Evaluation (3)**

Engineering evaluation of air pollutant sources and air control equipment. Fundamentals of source testing and stack sampling, including laboratory exercises.

View course details in MyPlan: CEE 493
### CEE 494 Air-Pollution Control Equipment Design (3)
Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CHEM E 468/M E 468.

View course details in MyPlan: CEE 494

### CEE 495 Sustainability and Design for Environment (3) Cooper
Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/M E 415.

View course details in MyPlan: CEE 495

### CEE 496 Fate and Transport of Chemicals in the Environment (3) Neumann
Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A.

View course details in MyPlan: CEE 496

### CEE 497 Engineering Jordan: Water in an Arid Land Study Abroad (5) Gough
Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering.

View course details in MyPlan: CEE 497

### CEE 498 Special Topics (1-5, max. 12)
Special topics in civil engineering offered as course with lecture or laboratory.

View course details in MyPlan: CEE 498

### CEE 499 Independent Study/Research (1-5, max. 12)
Individual undergraduate research project.

View course details in MyPlan: CEE 499

### CEE 500 Civil and Environmental Engineering Seminars (1, max. 3)
Prerequisite: graduate standing in Civil and Environmental Engineering. Credit/no-credit only.

View course details in MyPlan: CEE 500

### CEE 501 Structural Mechanics (6) Mackenzie, Miller

View course details in MyPlan: CEE 501

### CEE 502 Structural Dynamics (3)

View course details in MyPlan: CEE 502

### CEE 503 Materials Modeling (3)
Behavior of materials used in civil engineering structures. Yield and failure surfaces. Physical and
phenomenological models of plastic and viscoelastic behavior. Fracture mechanics. Fatigue models and predictions. Damping and friction. Behavior of anisotropic and composite materials. Offered: S.

View course details in MyPlan: CEE 503

**CEE 504 Finite Element Methods in Structural Mechanics (3)**
Extension of the matrix methods of structural analysis to the solution of elasticity, plate, and shell problems by use of finite element approximations. Discussion of convergence and bounding and extension to investigation of stability and finite deformations. Prerequisite: CEE 501 or permission of instructor. Instructors: Mackenzie, Lowes, Miller Offered: W.

View course details in MyPlan: CEE 504

**CEE 505 Engineering Computing (3) Lowes, Mackenzie, Miller**
Applied computing in civil and environmental engineering contexts, including physical systems modeling, graphics and visualization, and data management. Program development using contemporary tools and strategies. Computer architecture fundamentals, theoretical and practical issues affecting memory use and performance. Offered: A.

View course details in MyPlan: CEE 505

**CEE 506 Nonlinear Analysis of Structural Systems (3)**
Instructors: Lowes, Miller, Mackenzie Offered: Sp.

View course details in MyPlan: CEE 506

**CEE 507 Structural Stability (3) M. MOTLEY, R. WIEBE**
Covers concepts and fundamental principles of mechanics of equilibrium states and their stability properties; analysis of the stability and critical loads of columns; beams, and frames with various boundary conditions and loads; application of design formulas; and approximate method to calculate elastic and inelastic buckling loads. Prerequisite: CEE 501. Offered: W.

View course details in MyPlan: CEE 507

**CEE 509 Engineering Rome: Study Abroad (5) Muench**
Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day. Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and historical perspective on engineering and the contributions of engineers to infrastructure and society.

View course details in MyPlan: CEE 509

**CEE 511 Advanced Reinforced Concrete (3)**
Behavior and design of reinforced concrete members and structures. Members subject to torsion and torsion combined with flexure and shear; members with small shear span/depth ratios, slabs. Prerequisite: CEE 452 or equivalent. Instructors: Eberhard, Stanton Offered: A.

View course details in MyPlan: CEE 511

**CEE 512 Advanced Structural Systems (3)**

View course details in MyPlan: CEE 512

**CEE 513 Advanced Steel I (3)**
Factors influencing strength and serviceability of steel structures; LRFD limit state design procedures. Use of theories of plasticity and stability in development of design methods and specifications, bolted and welded connections, temperature effects, and affect of different fabrication methods on behavior of structure.
Prerequisite: CEE 501. Instructors: Berman, Roeder Offered: W.
View course details in MyPlan: CEE 513

**CEE 515 Earthquake Engineering I (3)**
View course details in MyPlan: CEE 515

**CEE 516 Earthquake Engineering II (3)**
Performance-based design, development of fragility curves, characteristics and effects of ground-shaking records, design methods, passive and active control, dynamic inelastic time history analysis, design of parts, system detailing, soil-structure interaction, repair and retrofit of structures. Prerequisite: CEE 515. Instructors: Roeder Offered: A.
View course details in MyPlan: CEE 516

**CEE 517 Wind Engineering Design (3) Reed**
Wind effects on structures, including atmospheric boundary layer flow; bluff body aerodynamics; structural dynamics and aeroelasticity; development and use of the ASCE Standards; estimation of along-wind, across-wind, and torsional response of tall buildings; design strategies for avoiding wind-induced discomfort. Fundamentals of wind tunnel testing. Offered: A.
View course details in MyPlan: CEE 517

**CEE 518 Reliability and Design (3) Reed**
Introduction to theory of structural reliability and its application to design procedures in civil engineering, including probability theory; assessment of uncertainties; code specification and the related concept of risk and the influence of socioeconomic factors; loads, load combinations, and probabilities of damage. Offered: AS.
View course details in MyPlan: CEE 518

**CEE 521 Seepage and Consolidation (3)**
Confined and unconfined seepage through porous media, flow net solutions, consolidation, settlement, numerical solution of seepage, and consolidation problems. Prerequisite: CEE 367 or equivalent.
View course details in MyPlan: CEE 521

**CEE 522 Shear Strength and Slope Stability (3)**
Shear strength of cohesive and granular soils and slope stability analysis of natural and man-made slopes. Prerequisite: CEE 367 or equivalent.
View course details in MyPlan: CEE 522

**CEE 523 Advanced Foundation Engineering (3)**
Design of shallow and deep foundations for bearing capacity and settlement. Construction considerations. Prerequisite: CEE 522 and CEE 527.
View course details in MyPlan: CEE 523

**CEE 524 Lateral Earth Pressures and Retaining Structures (3)**
Lateral earth pressure theory. Design of temporary and permanent retaining structures including in situ reinforcement. Prerequisite: CEE 523; CEE 527.
View course details in MyPlan: CEE 524

**CEE 525 Soil Dynamics (3)**
Dynamics of discrete systems; dynamics of continuous systems, wave propagation; dynamic soil properties; linear, nonlinear, and equivalent linear ground response analysis; vibrations of footings; construction vibrations; vibration isolation.
View course details in MyPlan: CEE 525
CEE 526 Geotechnical Earthquake Engineering (3)
Plate tectonics and elastic rebound theory of earthquakes and faults; characterization of ground motions; seismicity; seismic risk analysis; effect of local soil conditions on ground response; development of design ground motions; liquefaction; dynamic lateral earth pressures; seismic slope stability. Prerequisite: CEE 525 or permission of instructor.
View course details in MyPlan: CEE 526

CEE 527 Advanced Geotechnical Laboratory (4)
Soil and site investigation, classification and engineering properties of soils and rock as determined by standard and advanced test procedures and equipment. Evaluation of test data. Report writing. Prerequisite: CEE 367 or equivalent. Offered: A.
View course details in MyPlan: CEE 527

CEE 528 Geosynthetic Engineering (3)
Identification and testing of geosynthetics. Design of geosynthetic filters, roadway stabilization, earth reinforcement, and waste containment systems. Prerequisite: CEE 522 and CEE 523.
View course details in MyPlan: CEE 528

CEE 529 Foundation Soil Improvement (3)
Analysis and design of physical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structure. Prerequisite: CEE 523.
View course details in MyPlan: CEE 529

CEE 530 Engineering Geology II (3)
Application of engineering geology fundamentals to: location, design, and maintenance of engineered structures; policy decisions related to potential geological hazards. Case histories, governmental policy discussions, interpretation of geological maps for engineering purposes. Prerequisite: CEE 437 or permission of instructor.
View course details in MyPlan: CEE 530

CEE 531 Rock Engineering (3)
Engineering classification, physical and mechanical properties of rocks, failure modes and initial stresses in rocks, laboratory and field testing of rocks, rock slope engineering, underground openings, foundations on rocks. Prerequisite: CEE 437 or permission of instructor.
View course details in MyPlan: CEE 531

CEE 540 Microbiological Process Fundamentals (3)
Fundamental concepts for microbial processes including organic chemical structure, nomenclature and environmental properties, principles of microbial metabolism, study of specific types of bacteria important to environmental engineering and their metabolism, development of microbial kinetic equations, including substrate utilization, energetics, and stoichiometry. Prerequisite: permission of instructor. Instructors: Stahl
Offered: A.
View course details in MyPlan: CEE 540

CEE 541 Biological Treatment Systems (3)
Basic reactions, design principles, current design models, and operational considerations for biological treatment systems used in environmental engineering. Applications include activated sludge design and optimization, fixed film reactors, nitrification, nitrogen removal, phosphorus removal, anaerobic treatment, biomethane production, resource recovery, and toxic organics removal. Prerequisite: either both CEE 540 and CEE 482 or equivalent. Offered: W.
View course details in MyPlan: CEE 541

CEE 543 Aquatic Chemistry (4)
Principles of chemical equilibrium applicable to natural water systems and water and waste treatment processes. Chemical thermodynamics. Characteristics of acid/base, gas/liquid, solid/liquid, and oxidation/reduction
equilibria. Computer models for chemical speciation. Offered: A. View course details in MyPlan: CEE 543

CEE 544 Physical-Chemical Treatment Processes (4)
Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment. Topics include chemical kinetics, reactor design and analysis, ion exchange, adsorption, and gas transfer. Development of mathematical models and evaluation of current design practice. Offered: W. View course details in MyPlan: CEE 544

CEE 545 Environmental Organic Chemistry (3)
Covers characterization and modeling of properties and processes governing the distribution, fate, and transformation of organic pollutants in environmental systems. Explores linear free energy relationships and their application to examining the water/soil/air partitioning, bioaccumulation, substitution and redox reaction kinetics, and abiotic transformations of organic pollutants. Prerequisite: CEE 543 or permission of instructor. Offered: W. View course details in MyPlan: CEE 545

CEE 546 Topics in Ecological Effects of Wastewater (3)
Application of ecological concepts for analysis and interpretation of bioenvironmental problems and data (eutrophication, acid rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: CEE 462 or BIOL 473 or permission of instructor. View course details in MyPlan: CEE 546

CEE 547 Lake and Watershed Management (3)
Application of current techniques for lake and watershed analysis and modeling using fundamentals of limnology. Approaches to restoring eutrophic lakes, land use impacts on water quality. Practical exercises using data from real lake systems. Prerequisite: CEE 462/FISH 434, BIOL 473, or permission of instructor. Offered: Sp. View course details in MyPlan: CEE 547

CEE 549 Advanced Topics in Environmental Engineering, Chemistry, and Biology (3)
Special topics of current importance in environmental engineering. Application of fundamental chemical and biological principles to the study of such phenomena as the behavior of aqueous colloids, corrosion processes, and bacterial metabolism in chemically complex solutions. Prerequisite: CEE 540, CEE 541. Offered: Sp. View course details in MyPlan: CEE 549

CEE 550 Environmental Chemical Modeling (3)
Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications focus on groundwater systems. Prerequisite: CEE 551. Offered: Sp. View course details in MyPlan: CEE 550

CEE 551 Fate and Transport of Chemicals in the Environment (3) Neumann
Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A. View course details in MyPlan: CEE 551

CEE 552 Environmental Regulations (3) I&S
Principal emphasis on regulations pertaining to construction site stormwater runoff, including regulatory background and requirements, how to analyze potential site problems and prepare plans to solve them, and specifying practices to avoid or reduce water pollutant releases. Briefer coverage of regulations concerning air pollutions, wetlands, hazardous wastes, and endangered species. View course details in MyPlan: CEE 552
**CEE 553 Seminar - Topics in Atmospheric Chemistry (1-3, max. 6)**
Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with ATM S 525.
[View course details in MyPlan: CEE 553](http://www.washington.edu/students/crsCat/cee.html)

**CEE 554 Acoustics of Environmental Noise (4)**
Offered: jointly with M E 528.
[View course details in MyPlan: CEE 554](http://www.washington.edu/students/crsCat/cee.html)

**CEE 555 Topics in Environmental Health (3)**
Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.
[View course details in MyPlan: CEE 555](http://www.washington.edu/students/crsCat/cee.html)

**CEE 557 Air Resources Management (3)**
Technical, administrative, and legal aspects of air conservation. Topics include urban and regional scale air quality measurement and modeling systems, receptor modeling based on chemical fingerprinting of sources and current case studies involving engineering analysis, air-quality modeling, and regulatory aspects at local, state, and federal governmental levels. Offered: A.
[View course details in MyPlan: CEE 557](http://www.washington.edu/students/crsCat/cee.html)

**CEE 560 Risk Assessment for Environmental Health Hazards (3/4)**
Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with ENV H 577/PUBPOL 589; A.
[View course details in MyPlan: CEE 560](http://www.washington.edu/students/crsCat/cee.html)

**CEE 561 Transportation Planning and Design (5) Avery**
Provides an overview of transportation planning and how sustainability fits into this field. Topics include institutional frameworks, legal/legislative issues, land use, capacity analysis, supply management and Intelligent Transportation Systems (ITS). Covers tasks/tools of transportation planning at the site, city, region, and state levels. Offered: A.
[View course details in MyPlan: CEE 561](http://www.washington.edu/students/crsCat/cee.html)

**CEE 562 Livable Communities and Design (4) Bassok**
Explores the positives and negatives affecting livability. Covers sprawl and compact cities, energy issues and environmental quality, transit-oriented and traditional neighborhood development, and mixed-use and mixed income developments. Includes context-sensitive solutions to transportation projects. Offered: A.
[View course details in MyPlan: CEE 562](http://www.washington.edu/students/crsCat/cee.html)

**CEE 563 Transportation Choices and Technology (4) Rutherford**
Explores the range of sustainable transportation choices for both people and goods. Studies passenger modes of transportation including bicycles, single-occupancy vehicles, car and van pools, shared autos, bus, rail, ferries, trolleys, and foot travel in the context of sustainability. Offered: A.
[View course details in MyPlan: CEE 563](http://www.washington.edu/students/crsCat/cee.html)

**CEE 564 Sustainable Transportation from a Systems Perspective (5) McCormack**
Covers tools to evaluate and develop sustainable transportation systems. Emphasizes design approaches that support sustainable transportation, methods to evaluate the full life cycle impacts of transportation systems, and tools to assess transportation networks as resilient systems. Offered: A.
[View course details in MyPlan: CEE 564](http://www.washington.edu/students/crsCat/cee.html)
CEE 565 Climate Change and Energy (5) Larson, Mahoney
Covers the nature of global climate systems, global warming, ozone depletion, and human influences. Introduces tools to evaluate current and alternative energy production and conversion options for transportation. Explores the nexus between transportation and energy in the context of climate change adaptation and mitigation. Offered: W.
View course details in MyPlan: CEE 565

CEE 566 Environmental Analysis and Assessment (5) Watkins
Reviews statistical methods necessary to analyze environmental issues. Uses environmental data to demonstrate how significant impacts are measured and reported. Discusses transportation data sources, sustainable transportation indicators, and related statistical analysis. Includes travel demand forecasting and a review of engineering economy. Offered: Sp.
View course details in MyPlan: CEE 566

CEE 567 Health and Sustainable Transportation (5) Rowangould
Examines how transportation policy is driven by human health impacts. Highlights water and air impacts on health along with the health benefit of human powered transportation. Presents legal and regulatory issues. Case studies provide examples of application of these principles to real world transportation issues. Offered: A.
View course details in MyPlan: CEE 567

CEE 568 Transportation Economics (5) Niemeier
Economics applied to transportation planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; and the effect of uncertainty. Presents the effect of tolls, parking pricing, transit subsides, and other pricing and incentive policies. Offered: W.
View course details in MyPlan: CEE 568

CEE 569 Policy Development, Finance, and Sustainable Transportation (5) Rutherford
Covers the development and implementation of transportation policies to support sustainable transportation systems. Reviews regulations and finance opportunities at the local, state, and federal level highlighting those that promote sustainable transportation. Offered: Sp.
View course details in MyPlan: CEE 569

CEE 570 Hydrodynamics (4) A. HORNER-DEVINE
Applications of the equations of motion to ideal and real fluid flow, with topics in Environmental Fluid Mechanics. Kinematics, Navier-Stokes equations, viscous flows, Coriolis, density driven flows, free surface flows, and introduction to turbulence. Applications include: tidal flushing, lakes, estuaries, gravity currents and river plumes. Prerequisite: CEE 357 or equivalent. Offered: Sp.
View course details in MyPlan: CEE 570

CEE 571 Hydrodynamics in Water Quality (3)
Theoretical, field study, and laboratory model approaches to diffusion in transport problems of concern to water resources engineers. Prerequisite: CEE 342 or permission of instructor.
View course details in MyPlan: CEE 571

CEE 572 Water Wave Mechanics for Coastal Engineers (4) J. THOMSON
Covers theory and numerical modeling of water waves; classical water wave problem and approximate solution techniques; evolution equations and their solutions for wave systems; viscous damping effects and mass transport; nonlinear shallow-water waves and the Korteweg-deVries equation; and waves on beaches and structures. Prerequisite: CEE 347. Offered: Sp, even years.
View course details in MyPlan: CEE 572

CEE 573 Snow Hydrology (3) Lundquist
Introduces snow hydrology research, emphasizing current research methods and results in both measurements and modeling. Explores the impact of snow on hydrology and water resources. Offered: W.
View course details in MyPlan: CEE 573
CEE 574 Advanced Hydrology (3)  
E. ISTANBULLUOGLU
Detailed treatment of statistical methods used in hydrology: trend analysis, hypothesis testing, flood frequency, and elements of stochastic hydrology and data generation. Detailed examination of hydrologic models with emphasis on evapotranspiration and water budget, use of a watershed model (e.g., Stanford Watershed Model) in catchment. Offered: Sp.  
View course details in MyPlan: CEE 574

CEE 576 Water Resources Planning (3)  
Engineering, social, and economic factors involved in water resource development and management; water policies, programs, and administration; use relationships and conflicts; considerations for regional water resource systems.  
View course details in MyPlan: CEE 576

CEE 577 Water-Quality Management (3)  
Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Offered: Sp.  
View course details in MyPlan: CEE 577

CEE 578 Water Resource System Management and Operations (3)  
Readings in recent literature related to the modeling and management of water resources. Topics include drought management, expansion of existing water supplies, hydropower production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Offered: Sp.  
View course details in MyPlan: CEE 578

CEE 579 Advanced Traffic Detection Systems (3)  
Wang
Introduction to advanced tracking and detection technologies in transportation engineering, including Global Positioning Systems (GPS), inductance loop detection systems, remote traffic microwave radar, computer-vision based technologies, and other emerging detection technologies with cutting-edge research in these areas.  
View course details in MyPlan: CEE 579

CEE 580 Urban Transportation Planning (4)  
Rutherford
Introduction to transportation planning, including trends and issues, land use and transportation interaction, surveys, public involvement, demand management, technology, forecasting, impacts, and policy strategies. Offered: A.  
View course details in MyPlan: CEE 580

CEE 581 Travel Demand Forecasting (4)  
Application of mathematical models to forecast urban travel behavior. Introduces emerging methods, land use models, travel demand models, including trip generation, trip distribution, mode choice, and network assignment. Discusses validation and ethics. Offered: A.  
View course details in MyPlan: CEE 581

CEE 582 Intelligent Transportation Systems (3)  
Application of modern computer and communication technologies to transportation systems. Benefits to public agencies, commercial companies, and travelers. Coordination between private and public sectors. Intelligent Transportation System's (ITS) social, organizational, and operational changes. Offered: A.  
View course details in MyPlan: CEE 582

CEE 583 Transportation Energy and Sustainability (3)  
D. MACKENZIE
Addresses technical and policy options for making transportation more sustainable, considering economic, environmental, and equity impacts. Topics include transportation demand management; vehicle technologies; alternative fuels; dynamics of technology change; and roles of state, federal, and international policy. Prepares students to think broadly, analyze systematically, and communicate effectively in this area. Offered: Sp.  
View course details in MyPlan: CEE 583
CEE 584 Analytical Methods in Transportation I (3)
Application of analytical and statistical methods to issues in transportation and driving. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: either IND E 315, MATH 390/STAT 390, or equivalent. Instructors: Boyle
Offered: jointly with IND E 546; W.
View course details in MyPlan: CEE 584

CEE 585 Analytical Methods in Transportation II (3)
Applications of advanced econometric methods to transportation issues. Topics include, but not limited to, systems of equations, duration models, limited dependent variable approaches, and count models. Hands-on modeling, with numerous data sets, available for application. Collaborative projects. Prerequisite: CEE 584 or permission of instructor.
View course details in MyPlan: CEE 585

CEE 586 Pedestrian Travel, Land Use, and Urban Form (3)
Seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: jointly with URBDP 576.
View course details in MyPlan: CEE 586

CEE 587 Global Trade, Transportation, and Logistics Management (4)
Provides an overview of trade, transportation, and logistics activities. Develops an understanding of the physical and information flows in supply chains, and the economic drivers of supply chain choices. Includes methods to analyze and improve logistics and transportation systems, including applications of policy, technology, and infrastructure. Offered: Sp.
View course details in MyPlan: CEE 587

CEE 588 Energy Infrastructure and the Environment (3) Larson, Mahoney
Focuses on energy infrastructure, including site selection, permitting, design, construction, and maintenance. Includes electrical production facilities as well as transmission, focusing on permitting and construction of renewable energy facilities. Covers renewable energy infrastructure, emphasizing wind, solar, and geothermal. Offered: A.
View course details in MyPlan: CEE 588

CEE 589 Transit Systems Planning (3)
View course details in MyPlan: CEE 589

CEE 590 Traffic Systems Operations (3) Goodchild, McCormack
Operational planning, management of arterial and freeway traffic systems. Review of transportation system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages. Prerequisite: CEE 327. Offered: A.
View course details in MyPlan: CEE 590

CEE 591 Freight Transportation (3)
Overview of the technical and institutional aspects of transporting freight. Topics include the different modes of moving freight, the technology of transferring freight between modes at ports and terminals, issues that impact freight movement such as congestion and government regulation, and the future of freight mobility. Also covers
regional freight demand modeling techniques. Offered: A.

View course details in MyPlan: CEE 591

CEE 592 Statistical Fundamentals for Construction and Materials Applications (3) S. MUENCH
Overview of statistical measures used in various construction and materials decision-making processes. Subjects include data distributions, hypothesis tests (making decisions with statistics), regression analysis, sampling, quality control and assurance, and experimental design. Uses construction data to illustrate these measures. Offered: Sp.

View course details in MyPlan: CEE 592

CEE 593 Construction Labor Law (3) Goldblatt
In-depth study of construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Examines importance of labor relations in construction firms, whether in a union setting or an open shop environment.

View course details in MyPlan: CEE 593

CEE 594 Computer-Aided Construction (3)
Application of information technology to construction management and cost estimating. Topics include, but not limited to, computerized construction, fundamentals of computer hardware, construction management software tools, web publishing, GPS application, and construction data management. Offered: S.

View course details in MyPlan: CEE 594

CEE 595 Construction Materials (3) Mahoney
Examines the use of aggregates, bituminous mixtures, Portland cement concrete, roller compacted concrete, soil and site stabilization, utility cuts, and flowable backfill in construction projects. Emphasis on behavior of materials in various construction applications. Offered: W.

View course details in MyPlan: CEE 595

CEE 596 Pavement Construction (3) Muench
Examines pavement construction, including pavement contracts and specifications, quality control and assurance programs, and plant and laydown operations. Reviews both national and international pavement construction practices. Offered: Sp.

View course details in MyPlan: CEE 596

CEE 598 Engineering Jordan: Water in an Arid Land Study Abroad (5) Gough
Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering.

View course details in MyPlan: CEE 598

CEE 599 Special Topics in Civil and Environmental Engineering (1-5, max. 20)
Special topics in civil and environmental engineering offered occasionally by permanent or visiting faculty members.

View course details in MyPlan: CEE 599

CEE 600 Independent Study or Research ([1-5]-)
Topics covered depend on faculty and student interest. Prerequisite: permission of instructor.

View course details in MyPlan: CEE 600

CEE 601 Internship (2)
Internship in an established program between industry, government, and the University. Prerequisite: permission of Graduate Program Coordinator and committee chair.

View course details in MyPlan: CEE 601
CEE 700 Master's Thesis (*-)
Prerequisite: permission of adviser.
View course details in MyPlan: CEE 700

CEE 800 Doctoral Dissertation (*-)
Prerequisite: permission of adviser.
View course details in MyPlan: CEE 800
Detailed course offerings (Time Schedule) are available for

- **Spring Quarter 2017**
- **Summer Quarter 2017**
- **Autumn Quarter 2017**

**CESI 501 Distributed Renewable Power Systems (3)**
Electrical distributed renewable generation. The depth of coverage is suitable for civil engineers and their role as project managers. Topics covered include: (1) microgrids, (2) renewable generation fundamentals, (3) utility economics, and (4) energy planning and simulation. Prerequisite: Graduate Standing Offered: Sp.
View course details in MyPlan: CESI 501

**CESI 502 Geomatics in Energy Infrastructure (3)**
Overview of basic techniques for location measurements in energy construction projects using traditional surveying techniques, recently developed technologies for surface creation, and data management and analysis using GIS. Prerequisite: Graduate Standing Offered: A.
View course details in MyPlan: CESI 502

**CESI 503 Operation of a Power Plant (3)**
Explores power plant operations. Topics include plant operating principles, regulatory permitting, maintenance requirements, and plant design and upgrades. Prerequisite: Graduate Standing Offered: Sp.
View course details in MyPlan: CESI 503

**CESI 504 Buildings, LEED, and Energy Use (3)**
Overview on how to plan, design, construct and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, building energy modeling, indoor environmental qualities, and green building economics. Prerequisite: Graduate Standing Offered: SpS.
View course details in MyPlan: CESI 504

**CESI 505 Air Pollution Control and Occupational Safety and Health (3)**
Overview on the fundamental air pollution issues involved in construction and operation of energy facilities and the management of large vehicle fleets. Topics include emission estimation, control technology assessment, ambient air impacts, and technology specific issues of worker safety and health. Prerequisite: Graduate Standing
CESI 506 Management of Site Remediation, Hazardous Waste, and On-Site Treatment (3)
Covers the project management practices to ensure protection of human health and the environment when handling sites contaminated with hazardous waste generated by traditional and renewable energy sources. It includes identification of hazards, communication of risks and introduces alternatives for hazardous waste clean-up. Prerequisite: Graduate Standing
Offered: Sp.
View course details in MyPlan: CESI 506

CESI 508 Accounting and Finance for Construction (3)
Introduction to construction oriented financial management. Explains why construction financial management is different than financial management in other industries. Describes how to account for a company's financial resources and how to build a company's accounting system. Prerequisite: Graduate Standing
Offered: W.
View course details in MyPlan: CESI 508

CESI 510 Electric Grids (1)
Overview of utility design, operation and construction including an electrical grid's system components and functions. This includes generation, transmission, sub-transmission and distribution. These grid components will be explained as to how they are operated by a utility. Credit/no-credit only. Offered: A.
View course details in MyPlan: CESI 510

CESI 511 Grid Integration of Variable Sources of Generation (1)
Overview of the advantages and challenges associated with the integration of variable sources of generation into the electric grid and distribution systems. It will focus on weather-driven renewables such as wind, solar, and hydropower. Credit/no-credit only. Offered: W.
View course details in MyPlan: CESI 511

CESI 512 Regulating Electric Utilities (1)
Overview on how state utility commissions function including how they regulate utilities, influence permitting and participate in rid management and regional electric markets. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: CESI 512

CESI 513 Operation and Maintenance of a Wind Farm (1)
Operation and maintenance associated with a wind and solar project owned and operated by a major utility in Washington State. Included is an overview of the project including construction aspects, how it is managed and the major maintenance issues. Credit/no-credit only. Offered: W.
View course details in MyPlan: CESI 513

CESI 514 Hydroelectric Project Relicensing (1)
Relicensing of a hydroelectric project in Washington State and includes an overview of the project and the issues faced by the owner in applying for an extension to its federal operating license. This includes the design and construction of a floating fish enhancement structure. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: CESI 514

CESI 519 Trends and Applications in E-Construction (1)
Developments in eConstruction. The focus will be heavy construction such as bridges, pavements and energy infrastructure. Specific content will be on eConstruction inspector tools and related construction applications. Emphasis will be placed on the use of mobile multi-platform tools and devices. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: CESI 519

CESI 520 Electricity Fundamentals (1)
Refresher for engineers as to the basics associated with electricity as it relates to power production and
distribution. Credit/no-credit only. Offered: A.

View course details in MyPlan: CESI 520

**CESI 521 Introduction to AutoCAD and Bluebeam (1)**
Introduction to engineering drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in AutoCAD and Bluebeam software. It should only be taken by those without prior knowledge of this topic area. Credit/no-credit only. Offered: W.

View course details in MyPlan: CESI 521

**CESI 522 Introduction to AutoTURN (1)**
Focus on AutoTURN which is used to analyze road and site design projects including vertical and horizontal curves, intersections, haul roads and vehicle clearances and turning maneuvers. The software is commonly used in energy infrastructure design and construction activities. Credit/no-credit only. Offered: Sp.

View course details in MyPlan: CESI 522

**CESI 524 Statistical Methods for Construction (1)**
Overview of basic statistical measures used in construction and materials decision-making including data distributions, hypothesis testing, regression analysis, sampling and quality control/assurance. Credit/no-credit only. Offered: A.

View course details in MyPlan: CESI 524
Computer Science and Engineering

Department Overview

AC101 Paul G. Allen Center for Computer Science and Engineering

UW Computer Science & Engineering (CSE) educates students to become leaders in the design and implementation of the computing systems that touch every aspect of modern society. CSE is widely recognized as one of the top programs in the world, with passionate faculty bringing the latest advances into the classroom and the lab.

CSE offers two undergraduate degrees: Computer Science (through the College of Arts & Sciences) and Computer Engineering (through the College of Engineering). While the degree requirements differ in some details, undergraduate majors working toward either degree have the same broad opportunities to take the wide array of courses that CSE offers. Many of our graduates go on to careers at the world's great technology companies, from the largest industry titans to the smallest start-ups. Others join innovative companies and non-profit organizations outside the traditional computing industry to use software, hardware, and data to solve the world's greatest challenges. Still others go on to challenging graduate programs in a variety of fields.

At the graduate level, CSE offers (1) an integrated Master's program for some of our undergraduate majors seeking a deeper education before leaving campus, (2) an evening Master's program for currently employed software professionals, and (3) a PhD program for students seeking a research career.

The field of computing is broad and growing, and CSE's course catalog reflects this breadth. Beyond the popular introductory programming courses taken by thousands of students from every major on campus, our courses cover everything from the mathematical foundations of what computers can and cannot do; to hands-on experiences building software and hardware artifacts with a range of programming languages and tools; to advanced courses in software engineering, human-computer interaction, computer graphics and animation, artificial intelligence, machine learning, large-scale data management, natural language processing, computer networking, computational biology, robotics, computer security and privacy, and much more.

Computers are the most flexible and powerful machines ever created. While the applications of computing continue to grow and change, the core magic of CSE is timeless: computer scientists and engineers combine creative problem-solving, rigorous design, and the creation of algorithms, software, and hardware systems to build solutions that change the world.

Undergraduate Program

http://www.washington.edu/students/gencat/academic/cse.html
The Department of Computer Science and Engineering offers the following programs of study:

- The Bachelor of Science in Computer Engineering degree
- The Bachelor of Science degree with a major in computer science (see Computer Science in the Arts and Sciences section of this catalog)

The core requirements of the two undergraduate majors are similar. The computer engineering major includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole. It may be more appropriate for students who are interested in building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints.

The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the design of software systems and applications.

**Bachelor of Science in Computer Engineering**

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CSE 142, CSE 143; English composition.

**Department Admission Requirements**

Applicants are considered in two groups: Direct Admission and Regular Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

1. **Direct Admission:** Computer Science and Engineering enrolls up to 30 percent of its incoming class directly out of high school, prior to completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.

2. **Regular Admission**
   a. Minimum 2.0 grade in each of the following courses: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121; CSE 142, CSE 143; and at least five credits of English composition.
   b. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.
   c. Individual application prerequisites may be waived or substituted with departmental permission for matriculated students who have excelled in CSE
introductory courses. Information is available from the department adviser.

**Graduation Requirements**

180 credits as follows:

**General Education Requirements (83 credits)**

1. *Written and Oral Communication (12 credits)*: 5-credit course in English composition from the University-approved list; HCDE 231; 4 credits of UW approved writing (W) or additional UW approved composition (C) courses.

2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (30 credits)*: Minimum 10 credits required in each area.

3. *Natural World (41 credits)*:
   a. *Mathematics (15-18 credits)*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waved if MATH 136 taken)
   b. *Science (20 credits)*: PHYS 121, PHYS 122, and 10 additional credits from the list of approved natural science courses in the CS&E handbook
   c. *Mathematics or Science (3-6 credits)*: 3 to 6 additional credits of math/science (to bring total to 41) chosen from approved natural science courses in the CS&E handbook: STAT 390, STAT 391, STAT 394, MATH 307, MATH 309, MATH 334, MATH 335, AMATH 351, or AMATH 353 (STAT 391 recommended)

**Major Requirements (72 credits)**

1. *Required Courses (36 credits)*: CSE 142, CSE 143, CSE 311, CSE 312, CSE 332, CSE 351, CSE 369, CSE 371/E E 371, E E 215 or E E 205

2. *CSE Electives (36 credits)*:
   a. One course chosen from: CSE 403, CSE 474/E E 474, or CSE 484
   b. Three additional courses chosen from the computer engineering systems electives list in the online CSE handbook
   c. Two additional courses chosen from the CSE core course list in the online CSE handbook
   d. A design capstone course from the approved list in the CSE handbook.
   e. 4 credits of College of Engineering courses from the CSE elective list
   f. Additional (0-5 credits) CSE electives to bring total CSE electives to 36 credits

3. Minimum 2.0 grade for any course applied to the major, Natural World, or Written and Oral Communications requirements. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.

4. Free Electives (20-25 credits, to bring total for the degree to 180)

**Student Outcomes and Opportunities**

- *Learning Objectives and Expected Outcomes:*
**Engineering Quality:** Graduates engage in the productive practice of computer engineering to identify and solve significant problems across a broad range of application areas.

**Leadership:** Graduates engage in successful careers in industry, academia, and public service, providing technical leadership for their business, profession, and community.

**Economic Impact:** Graduates enhance the economic well-being of Washington State through a combination of technical expertise, leadership, and entrepreneurship.

**Lifelong Learning:** Graduates adapt to new technologies, tools, and methodologies to remain at the leading edge of computer engineering practice with the ability to respond to the challenges of a changing environment.

The computer engineering undergraduate degree is housed in the College of Engineering and is thereby accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. The department has adopted the following student outcomes. Upon graduation from the computer engineering program, students have:

a. An ability to apply knowledge of mathematics, science, and engineering
b. An ability to design and conduct experiments, as well as to analyze and interpret data
c. An ability to design a computing system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
d. An ability to function on multi-disciplinary teams
e. An ability to identify, formulate, and solve computer engineering problems
f. An understanding of professional and ethical responsibility
g. An ability to communicate effectively
h. The broad education necessary to understand the impact of computer engineering solutions in a global, economic, environmental, and societal context
i. A recognition of the need for, and an ability to engage in life-long learning
j. Knowledge of contemporary issues
k. An ability to use the techniques, skills, and modern computer engineering tools necessary for engineering practice.

- **Instructional and Research Facilities:** The department is housed in the state-of-the-art Paul G. Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer
graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

- **Honors Options Available:** With College Honors (Completion of Honors Core and Departmental Honors requirements). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** Internships and co-op opportunities are available for computer science undergraduates. See www.engr.washington.edu/coop and careers.washington.edu for information.

- **Departmental Scholarships:** CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html.

- **Student Organizations/Associations:** A student chapter of the Association for Computing Machinery (ACM) operates within CSE. The ACM helps to coordinate new student orientations, research nights, technical talks, and various tutorials.

---

**Graduate Program**

Graduate Program Coordinator  
AC101 Paul G. Allen Center for Computer Science and Engineering, Box 352350  
(206) 543-1695  
grad-admissions@cs.washington.edu

The Department of Computer Science and Engineering offers programs of study leading to the degrees of Master of Science and Doctor of Philosophy. Students can pursue full-time graduate study leading to a PhD with an integrated MS. Students can also pursue part-time graduate study in the evening, leading to an MS. Moreover, current undergraduate computer science and computer engineering majors can apply to a full-time MS program integrated with the bachelor's degree. Programs are designed to provide considerable breadth of knowledge, as well as depth in an area of specialization.

CSE has a large faculty, with expertise across the range of modern computing topics and with considerable focus on several interdisciplinary topics. Topics in graduate-level courses and opportunities for independent research reflect this breadth.

**Combined Bachelor of Science/Master of Science - 5th year Program**

**Admission Requirements**

Open only to students currently enrolled as computer science or computer engineering majors at the University of Washington. Students must apply and be admitted to be eligible for this master's degree. To apply, students must complete all required 300-level CSE courses for their CS or CE degree. Applications are generally accepted once a year in the spring.
**Degree Requirements**

40 credits, as follows:

Students complete master's requirements primarily through a combination of approved coursework from the PhD-track master's courses, the Professional Master's Program courses, and 400-level courses.

1. Minimum 36 credits of approved graded 400-level and 500-level courses except as substituted by research credit:
   a. Minimum 32 credits in computer science and engineering courses. Students who wish to substitute courses in other fields for computer science and engineering courses may petition to do so by presenting a coherent course plan and written justification for this plan to the program adviser for approval by the start of their master's degree program.
   b. Minimum 20 credits from 500-level computer science and engineering 4-credit graded courses or other approved computer science and engineering graded coursework at the 500-level.

2. Four additional credits of computer science and engineering research colloquia (CSE 519 or CSE 520) or single-credit research seminars (CSE 590).

3. Students may substitute up to 12 credits of CSE 600, which includes a final written report on research, in place of graded computer science and engineering courses in 1.a. above. Of these, 4 credits of research may be substituted for graded credits in 1.b. above.

4. Subsequent to admission to the master's program, students must complete:
   a. Either an approved internship/co-op or at least 3 credits of computer science and engineering research.
   b. At least one approved course from the computer science and engineering Integrated Project (capstone) course list. These include new 500-level capstone-style courses to be developed as well as CSE 428, CSE 454, CSE 441, CSE 460, CSE 468, CSE 477, and CSE 481.

5. Courses taken prior to completion of the bachelor's degree may apply to the master's requirements only if all the following points are met:
   a. Courses numbered 500-level or higher
   b. Courses fulfil master's requirements as outlined above.
   c. Courses taken after a student is admitted to the BS/MS program
   d. Credits do not satisfy any undergraduate requirements, such as departmental requirements or general elective credits.
   e. A maximum of 12 graduate credits taken as an undergrad may apply to the master's degree.

**Master of Science**

**Degree Requirements**

40 credits, as follows:

**Non-Thesis Option**

1. 20 credits in courses numbered 500 or above; 30 credits in CSE courses. 10 credits may be in one or more supporting fields
2. MS qualifying evaluation. The faculty assesses whether the student has satisfactorily completed a breadth requirement and an independent project requirement as described below.

3. A breadth requirement, satisfied through coursework. The required course list may change from time to time. Students may meet requirements in place when they are admitted. Students must take one course in four of five areas below plus two additional courses in any area (18 credits total) for graded credit (a waiver is possible for graduate courses taken elsewhere):
   a. Theory: CSE 521, CSE 525, or CSE 531
   b. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
   c. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
   d. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
   e. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
   f. Non-CSE: GENOME 540; HCDE 544 or INSC 570 (Non-CSE courses do not belong in any of the five areas above.)

4. An independent project completed under the supervision of a primary and a secondary faculty adviser. A written summary and an oral presentation are required.

Thesis option

1. 9 credits CSE 700, master's thesis - a written thesis acceptable to a CSE Supervisory Committee and an oral examination on the thesis work

2. Of the 31 remaining credits,
   a. 24 credits in CSE courses
   b. At least 16 credits numbered 500 or above
   c. 7 credits may be in one or more supporting fields such as engineering, mathematics, natural sciences, business administration, linguistics, philosophy, psychology, or medicine.

Professional Master's Program

Degree Requirements

40 credits, as follows:

Eight 4-credit PMP (Professional Master's Program) courses (determined in consultation with an adviser) and other courses for 8 additional credits. The additional credits may be earned through participation in the department's colloquium series, which features leading-edge researchers and developers in computer science from around the world. Students who take one course per quarter, plus 1 credit of colloquium, complete the program in two-and-a-half years.

Doctor of Philosophy

Admission Requirements

Most entering students are expected to have a solid background in computer science, including programming, machine organization, data structures, discrete mathematics, automata theory, and programming systems (i.e., the equivalent of CSE 321, CSE 322, CSE 326,, and CSE 378, and either CSE 401 or CSE 451). Some exceptions are made for
otherwise promising students. Graduate Record Examination scores are required, earned within the preceding five years. The Computer Science and Engineering Graduate Program home page for prospective students gives full details of application procedures.

Application deadline is December 15 for both U.S. and international students for autumn quarter admission.

**Degree Requirements**

90 credits, to include:

1. PhD qualifying evaluation, to include:
   a. A breadth requirement, satisfied through coursework. The required course list may change from time to time. Students may meet requirements in place when they are admitted.
   b. One course in four of five areas below plus two additional courses in any area (18 credits total) for graded credit (a waiver is possible for graduate courses taken elsewhere):
      i. Theory: CSE 521, CSE 525, or CSE 531
      ii. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
      iii. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
      iv. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
      v. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
      vi. Non-CSE: GENOME 540; HCDE 544 or INSC 570. (Non-CSE courses do not belong in any of the five areas above.)
   c. An independent project completed under the supervision of a primary and a secondary faculty adviser. A written summary and an oral presentation are required.

2. General examination. The applicant must demonstrate depth of knowledge in a principal area acceptable to the PhD Supervisory Committee.

3. At least 90 credits of coursework, at least 40 of which are numbered 500 or above. 45 credits should be in courses chosen from the computer science course list. At least two CSE courses numbered 500 or above (or approved courses in related disciplines) must be taken for graded credit in addition to courses taken to satisfy the breadth component of the qualifying evaluation. Coursework taken toward the MS degree is applicable toward the PhD degree.

4. Two quarters of teaching assistantship within the department

5. Dissertation acceptable to the Supervisory Committee. Students must register for at least 27 credits of CSE 800 (Dissertation).

6. Oral examination on the dissertation work.

**Assistantships**

Research and teaching assistantships are allocated on the basis of scholastic excellence and potential. All students accepted are awarded three years of funding. Students applying for
assistantships starting in autumn quarter should complete applications to the Graduate School and the department by December 15.

COLLEGE OF ENGINEERING
COMPUTER SCIENCE & ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

CSE 120 Computer Science Principles (5) NW, QSR
Introduces fundamental concepts of computer science and computational thinking. Includes logical reasoning, problem solving, data representation, abstraction, the creation of digital artifacts such as web pages and programs, managing complexity, operation of computers and networks, effective web searching, ethical, legal and social aspects of information technology. May not be taken for credit if credit earned in CSE 100/INFO 100. View course details in MyPlan: CSE 120

CSE 131 Science and Art of Digital Photography (4) VLPA Hemingway
Covers the fundamentals of digital photography, including computational imaging; the elements of photographic composition and design; and the future of internet-enabled photography. View course details in MyPlan: CSE 131

CSE 142 Computer Programming I (4) NW, QSR
Basic programming-in-the-small abilities and concepts including procedural programming (methods, parameters, return, values), basic control structures (sequence, if/else, for loop, while loop), file processing, arrays, and an introduction to defining objects. Intended for students without prior programming experience. Offered: AWSpS. View course details in MyPlan: CSE 142

CSE 143 Computer Programming II (5) NW, QSR
Continuation of CSE 142. Concepts of data abstraction and encapsulation including stacks, queues, linked lists, binary trees, recursion, instruction to complexity and use of predefined collection classes. Prerequisite: CSE 142. Offered: AWSpS. View course details in MyPlan: CSE 143

CSE 154 Web Programming (5) QSR
Covers languages, tools, and techniques for developing interactive and dynamic web pages. Topics include page styling, design, and layout; client and server side scripting; web security; and interacting with data sources such as databases. Prerequisite: minimum grade of 2.0 in either CSE 142, CSE 143, or CSE 160. View course details in MyPlan: CSE 154
CSE 160 Data Programming (4) NW, QSR
Introduction to computer programming. Assignments solve real data manipulation tasks from science, engineering, business, and the humanities. Concepts of computational thinking, problem-solving, data analysis, Python programming, control and data abstraction, file processing, and data visualization. Intended for students without prior programming experience. No credit if CSE 143 has been taken.
View course details in MyPlan: CSE 160

CSE 190 Current Topics in Computer Science and Engineering (1-5, max. 15)
View course details in MyPlan: CSE 190

CSE 301 CSE Internship Education (1-2, max. 12)
CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to CSE Internship Program or by special permission of the Department. Offered credit/no credit only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: CSE 301

CSE 311 Foundations of Computing I (4) QSR
Examines fundamentals of logic, set theory, induction, and algebraic structures with applications to computing; finite state machines; and limits of computability. Prerequisite: CSE 143; either MATH 126 or MATH 136.
View course details in MyPlan: CSE 311

CSE 312 Foundations of Computing II (4) QSR
Examines fundamentals of enumeration and discrete probability; applications of randomness to computing; polynomial-time versus NP; and NP-completeness. Prerequisite: CSE 311.
View course details in MyPlan: CSE 312

CSE 331 Software Design and Implementation (4)
Explores concepts and techniques for design and construction of reliable and maintainable software systems in modern high-level languages: specifications; program structure and design; program-correctness approaches, including testing; and event-driven programming (e.g., graphical user interface). Prerequisite: CSE 143
View course details in MyPlan: CSE 331

CSE 332 Data Structures and Parallelism (4)
Covers abstract data types and structures including dictionaries, balanced trees, hash tables, priority queues, and graphs; sorting; asymptotic analysis; fundamental graph algorithms including graph search, shortest path, and minimum spanning trees; multithreading and parallel algorithms; P and NP complexity classes. No credit if CSE 373 has been taken. Prerequisite: CSE 311.
View course details in MyPlan: CSE 332

CSE 333 Systems Programming (4)
Includes substantial programming experience in languages that expose machine characteristics and low-level data representation (e.g., C and C++); explicit memory management; modern libraries and language features; interacting with operating-system services; introduction to concurrent programming. Prerequisite: CSE 351.
View course details in MyPlan: CSE 333

CSE 341 Programming Languages (4)
Basic concepts of programming languages, including abstraction mechanisms, static and dynamic typing, scope, syntax vs. semantics, first-class function closures, and algebraic datatypes. Detailed study of functional programming and other paradigms. No credit if CSE 413 has been taken. Prerequisite: CSE 143.
View course details in MyPlan: CSE 341

CSE 344 Introduction to Data Management (4)
Introduces database management systems and writing applications that use such systems; data models (e.g., relational, semi-structured), query languages (e.g., SQL, XQuery), language bindings, conceptual modeling,
transactions, security, database tuning, data warehousing, parallelism, and web-data management. Prerequisite: CSE 311.

**CSE 351 The Hardware/Software Interface (4)**
Examines key computational abstraction levels below modern high-level languages; number representation, assembly language, introduction to C, memory management, the operating-system process model, high-level machine architecture including the memory hierarchy, and how high-level languages are implemented. Prerequisite: CSE 143.

**CSE 352 Hardware Design and Implementation (4)**
Covers digital circuit design, processor design, and systems integration and embedded-systems issues. Includes substantial hardware laboratory. Prerequisite: CSE 311; CSE 351.

**CSE 369 Introduction to Digital Design (2)**
Introduces the implementation, specification, and simulation of digital logic. Boolean algebra; combinational circuits including arithmetic circuits and regular structures; sequential circuits including finite-state-machines; and use of field-programmable gate arrays (FPGAs). Emphasizes simulation, high-level specification, and automatic synthesis techniques. No credit if EE 271 has been taken. Prerequisite: CSE 311.

**CSE 371 Design of Digital Circuits and Systems (5)**
Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with E E 371.

**CSE 373 Data Structures and Algorithms (4)**

**CSE 374 Intermediate Programming Concepts and Tools (3)**
Covers key software development concepts and tools not in introductory courses. Concepts of lower-level programming (C/C++) and explicit memory management; techniques and tools for individual and group software development; design, implementation, and testing strategies. Intended for non-majors. Cannot be taken for credit if credit received for CSE 333. Prerequisite: CSE 143.

**CSE 390 Special Topics in Computer Science and Engineering (1-5, max. 10)**
Covers topics of current interest in computer science and engineering.

**CSE 391 System and Software Tools (1)**
Introduction to tools commonly used in software development. Topics include using a command-line interface, writing scripts for file and string manipulation, managing user permissions, manipulating text with regular expressions, using build-management tools, and using version-control systems. Prerequisite: CSE 143. Credit/no-credit only.
CSE 399 CSE Foreign Study (*)
Upper-division computer science or computer engineering course, taken through an approved study abroad program, for which there is no direct University of Washington equivalent. Credit/no-credit only.
View course details in MyPlan: CSE 399

CSE 401 Introduction to Compiler Construction (4)
Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation, and optimizations for general purpose programming languages. No credit to students who have taken CSE 413. Prerequisite: CSE 332; CSE 351.
View course details in MyPlan: CSE 401

CSE 403 Software Engineering (4)
Fundamentals of software engineering using a group project as the basic vehicle. Topics covered include the software crisis, managing complexity, requirements specification, architectural and detailed design, testing and analysis, software process, and tools and environments. Prerequisite: CSE 331; CSE 332.
View course details in MyPlan: CSE 403

CSE 410 Computer Systems (3)
Structure and components of hardware and software systems. Machine organization, including central processor and input-output architectures; assembly language programming; operating systems, including process, storage, and file management. Intended for non-majors. No credit to students who have completed CSE 351 or CSE 451. Prerequisite: CSE 373.
View course details in MyPlan: CSE 410

CSE 413 Programming Languages and Their Implementation (3)
Basic concepts and implementation strategies for modern functional and object-oriented programming languages such as Scheme and Java. Intended for non-majors. No credit to students who have completed CSE 341 or CSE 401. Prerequisite: CSE 373.
View course details in MyPlan: CSE 413

CSE 414 Introduction to Database Systems (4)
Introduces database management systems and writing applications that use such systems; data models, query languages, transactions, database tuning, data warehousing, and parallelism. Intended for non-majors. Not open for credit to students who have completed CSE 344. Prerequisite: minimum grade of 2.5 in CSE 143.
View course details in MyPlan: CSE 414

CSE 415 Introduction to Artificial Intelligence (3) NW
Principles and programming techniques of artificial intelligence: LISP, symbol manipulation, knowledge representation, logical and probabilistic reasoning, learning, language understanding, vision, expert systems, and social issues. Intended for non-majors. Not open for credit to students who have completed CSE 473. Prerequisite: CSE 373.
View course details in MyPlan: CSE 415

CSE 416 Introduction to Machine Learning (4) NW
Provides practical introduction to machines learning. Modules include regression, classification, clustering, retrieval, recommender systems, and deep learning, with a focus on an intuitive understanding grounded in real-world applications. Intelligent applications are designed and used to make predictions on large, complex datasets. Prerequisite: CSE 143 or CSE 160; and STAT 311 or STAT 390 Offered: jointly with STAT 416.
View course details in MyPlan: CSE 416

CSE 417 Algorithms and Computational Complexity (3)
View course details in MyPlan: CSE 417
CSE 421 Introduction to Algorithms (3)
Techniques for design of efficient algorithms. Methods for showing lower bounds on computational complexity. Particular algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Prerequisite: CSE 312; CSE 332.
View course details in MyPlan: CSE 421

CSE 427 Computational Biology (3)
Algorithmic and analytic techniques underlying analysis of large-scale biological data sets such as DNA, RNA, and protein sequences or structures, expression and proteomic profiling. Hands-on experience with databases, analysis tools, and genome markers. Applications such as sequence alignment, BLAST, phylogenetics, and Markov models. Prerequisite: CSE 312; CSE 332.
View course details in MyPlan: CSE 427

CSE 428 Computational Biology Capstone (5)
Designs and implements a software tool or software analysis for an important problem in computational molecular biology. Prerequisite: CSE 312; CSE 331; CSE 332.
View course details in MyPlan: CSE 428

CSE 431 Introduction to Theory of Computation (3)
Models of computation, computable and noncomputable functions, space and time complexity, tractable and intractable functions. Prerequisite: CSE 312.
View course details in MyPlan: CSE 431

CSE 440 Introduction to HCI: User Interface Design, Prototyping, and Evaluation (5)
Human-Computer Interaction (HCI) theory and techniques. Methods for designing, prototyping, and evaluating user interfaces to computing applications. Human capabilities, interface technology, interface design methods, and interface evaluation tools and techniques. Prerequisite: CSE 332.
View course details in MyPlan: CSE 440

CSE 441 Advanced HCI: Advanced User Interface Design, Prototyping, and Evaluation (5)
Human-Computer Interaction (HCI) theory and techniques. Advanced methods for designing, prototyping, and evaluating user interfaces to computing applications. Novel interface technology, advanced interface design methods, and prototyping tools. Prerequisite: CSE 440.
View course details in MyPlan: CSE 441

CSE 442 Data Visualization (4)
Techniques for creating effective visualizations of data based on principles from graphic design, perceptual psychology, and statistics. Topics include visual encoding models, exploratory data analysis, visualization software, interaction techniques, graphical perception, color, animation, high-dimensional data, cartography, network visualization, and text visualization. Prerequisite: CSE 332.
View course details in MyPlan: CSE 442

CSE 444 Database Systems Internals (4)
View course details in MyPlan: CSE 444

CSE 446 Machine Learning (4)
Methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling: decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: CSE 332; either STAT 390, STAT 391, or CSE 312.
View course details in MyPlan: CSE 446
CSE 450 Animation Production Seminar (1)
Open to all students who have an interest in digital animation. Reviews and analyzes films, animated feature films, and television commercials. Emphasizes the technical and aesthetic basics of animation production in industry studio environments.
View course details in MyPlan: CSE 450

CSE 451 Introduction to Operating Systems (4)
Principles of operating systems. Process management, memory management, auxiliary storage management, resource allocation. No credit to students who have completed CSE 410. Prerequisite: CSE 351; CSE 332; CSE 333.
View course details in MyPlan: CSE 451

CSE 452 Introduction to Distributed Systems (4)
Covers abstractions and implementation techniques in the construction of distributed systems, including cloud computing, distributed storage systems, and distributed caches. Prerequisite: CSE 451.
View course details in MyPlan: CSE 452

CSE 454 Advanced Internet and Web Services (5)
Design of Internet search engines, including spider architecture, inverted indices, frequency rankings, latent semantic indexing, hyperlink analysis, and refinement interfaces. Construction of scalable and secure web services. Datamining webservice logs to provide personalized and user-targeted services. Large project. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.
View course details in MyPlan: CSE 454

CSE 455 Computer Vision (4)
Introduction to image analysis and interpreting the 3D world from image data. Topics may include segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: CSE 333; CSE 332.
View course details in MyPlan: CSE 455

CSE 456 Story Design for Computer Animation (4)
Animation principles and production for story development and design. Design, development, and production of several storyreels, which are a tool for the pre-production of animated features and shorts. Student use authoring tools to present finished work.
View course details in MyPlan: CSE 456

CSE 457 Computer Graphics (4)
Introduction to computer image synthesis, modeling, and animation. Topics may include visual perception, displays and framebuffers, image processing, affine and projective transformations, hierarchical modeling, hidden surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, character animation, and animation principles. Prerequisite: CSE 333; CSE 332.
View course details in MyPlan: CSE 457

CSE 458 Computer Animation (5)
Introduction to basic principles of computer generated animation. Focus on the modeling and lighting of animated characters. Students from art, CSE, and music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: CSE 457.
View course details in MyPlan: CSE 458

CSE 459 Pre-Production for Collaborative Animation (5)
Pre-production of collaboratively designed animated shorts. In-depth analysis of classical and computer generated works. Character design and pre-planning, model sheets, character rigging, storyreel and animatics, character motion, design for multiple characters, and principles of animation as applied to character motion and effects. Prerequisite: CSE 458.
View course details in MyPlan: CSE 459
CSE 460 Animation Capstone (5)
Apply the knowledge gained in previous animation courses to produce a short animated film. Topics include scene planning, digital cinematography, creature and hard surface modeling, animatics and basics of character animation, and rendering techniques. Prerequisite: CSE 458, CSE 459.
View course details in MyPlan: CSE 460

CSE 461 Introduction to Computer-Communication Networks (4)
Computer network architectures, protocol layers, network programming. Transmission media, encoding systems, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: either CSE 326 or CSE 332; either CSE 303 or CSE 333.
View course details in MyPlan: CSE 461

CSE 464 Advanced Topics in Digital Animation (1-5, max. 10)
Students design individual animated works for professional quality demo reels. 2- and 3-D animatics, special effects design, advanced character animation techniques, 3-D paint techniques and integration, short design, sequence planning, non-photorealistic rendering options, interactive animation for pre-planning, and advanced production techniques and strategies.
View course details in MyPlan: CSE 464

CSE 467 Advanced Digital Design (4)
Advanced techniques in the design of digital systems. Hardware description languages, combinational and sequential logic synthesis and optimization methods, partitioning, mapping to regular structures. Emphasis on reconfigurable logic as an implementation medium. Memory system design. Digital communication including serial/parallel and synchronous/asynchronous methods. Prerequisite: CSE 352; CSE 332.
View course details in MyPlan: CSE 467

CSE 469 Computer Architecture I (5)
Introduction to computer architecture. Assembly and machine language, microprocessor organization including control and datapath. Computer arithmetic. Memory systems and caching. Performance modeling of microprocessors. Prerequisite: either E E 271 or CSE 369; CSE 143 Offered: jointly with E E 469; AWSp.
View course details in MyPlan: CSE 469

CSE 470 Computer Architecture II (4)
View course details in MyPlan: CSE 470

CSE 472 Introduction to Computational Linguistics (5) VLP A/NW E. BENDER
Introduction to computational approaches to modeling language, for linguistic research and practical applications, including analyses at different levels of linguistic structure and symbolic as well as statistical approaches. Prerequisite: either LING 200 or LING 400; either LING 461 or CSE 311. Offered: jointly with LING 472.
View course details in MyPlan: CSE 472

CSE 473 Introduction to Artificial Intelligence (3)
Principal ideas and developments in artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Not open for credit to students who have completed CSE 415. Prerequisite: CSE 332.
View course details in MyPlan: CSE 473
CSE 474 Introduction to Embedded Systems (4)
Introduces the specification, design, development, and test of real time embedded system software. Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with E E 474; AWSpS.
View course details in MyPlan: CSE 474

CSE 475 Embedded Systems Capstone (5)
Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with E E 475; AWSp.
View course details in MyPlan: CSE 475

CSE 481 Capstone Software Design (5, max. 15)
Student teams design and implement a software project involving multiple areas of the CSE curriculum. Course emphasizes the development process, rather than the product. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.
View course details in MyPlan: CSE 481

CSE 482 Capstone Software Design to Empower Underserved Populations (5, max. 15) DIV
Students work in teams to design and implement a software project involving multiple areas of the CSE curriculum, for the purpose of empowering marginalized or underserved populations. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.
View course details in MyPlan: CSE 482

CSE 484 Computer Security (4)
Foundations of modern computer security, including software security, operating system security, network security, applied cryptography, human factors, authentication, anonymity, and web security. Prerequisite: CSE 332; CSE 351.
View course details in MyPlan: CSE 484

CSE 486 Introduction to Synthetic Biology (3)
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 423/E E 423; A.
View course details in MyPlan: CSE 486

CSE 487 Advanced Systems and Synthetic Biology (3)
Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/E E 424; W.
View course details in MyPlan: CSE 487

CSE 488 Laboratory Methods in Synthetic Biology (4)
Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/E E 425; W.
View course details in MyPlan: CSE 488
CSE 490 Special Topics in Computer Science and Engineering (1-5, max. 15)
Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses.
View course details in MyPlan: CSE 490

CSE 491 Data Science and Society Seminar (1)
Current topics related to the societal implications of data science. Topic selection will vary from quarter to quarter and may include data privacy and security, data anonymization, hypothesis-testing on a shared database, impact of data science-based decisions on society. Includes both guest speakers and case-study or article-based discussions. Credit/no-credit only. Credit/no-credit only.
View course details in MyPlan: CSE 491

CSE 495 Project Practicum ([1-5]-, max. 5)
Available in special situations for computer science majors to compete, under instructor guidance, a substantial computing project that deepens one's knowledge and experience in the field. Projects may involve a group of students.
View course details in MyPlan: CSE 495

CSE 497 Undergraduate Research Seminar (1)
Students prepare and give a public talk on their faculty-sponsored research projects.
View course details in MyPlan: CSE 497

CSE 498 Senior Project ([1-9]-, max. 9)
A report (and perhaps demonstration) describing a development, survey, or small research project in computer science or an application to another field. Objectives: (1) integrating material from several courses, (2) introducing the professional literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work.
View course details in MyPlan: CSE 498

CSE 499 Reading and Research (1-24, max. 24)
Available in special situations for advanced computer science majors to do reading and research in field, subject to approval of undergraduate adviser and CSE faculty member. Free elective, but does not replace core course or computer science elective. Credit/no-credit only.
View course details in MyPlan: CSE 499

CSE 501 Programming Language Analysis and Implementation (4)
Design and implementation of compilers and run-time systems for imperative, object-oriented, and functional languages. Intra- and interprocedural analyses and optimizations. Prerequisite: CSE 341.
View course details in MyPlan: CSE 501

CSE 503 Software Engineering (4)
Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications.
View course details in MyPlan: CSE 503

CSE 504 Advanced Topics in Software Engineering (4)
Topics vary but may include software design and evolution, formal methods, requirements specifications, software and system safety, reverse engineering, real-time software, metrics and measurement, programming environments, and verification and validation.
View course details in MyPlan: CSE 504

CSE 505 Principles of Programming Languages (4)
Design and formal semantics of modern programming languages, includes functional and object-oriented languages. Prerequisite: CSE 341.
View course details in MyPlan: CSE 505
CSE 506 Advanced Topics in Programming Languages (4)
May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combinators, parallelism, various optimization techniques. Implementation project required. Prerequisite: CSE 501 which may be taken concurrently, and CSE 505.
View course details in MyPlan: CSE 506

CSE 507 Computer-Aided Reasoning for Software (4)
Covers theory, implementation, and applications of automated reasoning techniques, such as satisfiability solving, theorem proving, model checking, and abstract interpretation. Topics include concepts from mathematical logic and applications of automated reasoning to the design, construction, and analysis of software.
View course details in MyPlan: CSE 507

CSE 510 Advanced Topics in Human-Computer Interaction (4)
Content varies, including interface issues for networks, embedded systems, education applications, safety and critical systems, graphics and virtual reality, databases, and computer-supported cooperative work.
View course details in MyPlan: CSE 510

CSE 512 Data Visualization (4)
Covers techniques and algorithms for creating effective visualizations based on principles from graphic design, visual art, perceptual psychology, and cognitive science. Topics include data and image models; visual encoding; graphical perception; color; animation; interaction techniques; graph layout; and automated design. Lectures, reading, and project.
View course details in MyPlan: CSE 512

CSE 515 Statistical Methods in Computer Science (4)
Introduction to the probabilistic and statistical techniques used in modern computer systems. Graphical models, probabilistic inference, statistical learning, sequential models, decision theory. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.
View course details in MyPlan: CSE 515

CSE 517 Natural Language Processing (4)
Overview of modern approaches for natural language processing. Topics include language models, text, classification, tagging, parsing, machine translation, semantic, and discourse analysis.
View course details in MyPlan: CSE 517

CSE 519 Current Research in Computer Science (1, max. 18)
Weekly presentations on current research activities by members of the department. Only computer science graduate students may register, although others are encouraged to attend. Credit/no-credit only.
View course details in MyPlan: CSE 519

CSE 520 Computer Science Colloquium (1, max. 18)
Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no-credit only.
View course details in MyPlan: CSE 520

CSE 521 Design and Analysis of Algorithms I (4)
Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, network flow, linear programming. Correctness and analysis of algorithms. NP-completeness. Prerequisite: either CSE 332 or equivalent.
View course details in MyPlan: CSE 521

CSE 522 Design and Analysis of Algorithms II (4)
Analysis of algorithms more sophisticated than those treated in CSE 521. Content varies and may include such topics as algebraic algorithms, combinational algorithms, techniques for proving lower bounds on complexity,
CSE 523 Computational Geometry (4)
Algorithms for discrete computational geometry. Geometric computation, range searching, convex hulls, proximity, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisite: CSE 521.
View course details in MyPlan: CSE 523

CSE 524 Parallel Algorithms (4)
Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems, and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and on limitations to their efficacy. Prerequisite: CSE 521.
View course details in MyPlan: CSE 524

CSE 525 Randomized Algorithms and Probabilistic Analysis (4)
Examines algorithmic techniques: random selection, random sampling, backwards analysis, algebraic methods, Monte Carlo methods, and randomized rounding; random graphs; the probabilistic method; Markov chains and random walks; and analysis tools: random variables, moments and deviations, Chernoff bounds, martingales, and balls in bins. Prerequisite: either CSE 521 or equivalent.
View course details in MyPlan: CSE 525

CSE 527 Computational Biology (4)
Introduces computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, regulatory analysis. Techniques such as dynamic programming, Markov models, expectation-maximization, local search.
View course details in MyPlan: CSE 527

CSE 528 Computational Neuroscience (3)
Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with NEURO 528.
View course details in MyPlan: CSE 528

CSE 529 Neural Control of Movement: A Computational Perspective (3)
Systematic overview of sensorimotor function on multiple levels of analysis, with emphasis on the phenomenology amenable to computational modeling. Topics include musculoskeletal mechanics, neural networks, optimal control and Bayesian inference, learning and adaptation, internal models, and neural coding and decoding. Prerequisite: vector calculus, linear algebra, MATLAB, or permission of instructor. Offered: jointly with AMATH 533.
View course details in MyPlan: CSE 529

CSE 531 Computational Complexity I (4)
View course details in MyPlan: CSE 531

CSE 532 Computational Complexity II (4)
Advanced computational complexity including several of the following: circuit complexity lower bounds, \( \#p \) and counting classes, probabilistically-checkable proofs, de-randomization, logical characteristics of complexity, communication complexity, time-space tradeoffs, complexity of data structures.
View course details in MyPlan: CSE 532
CSE 533 Advanced Topics in Complexity Theory (4)
An in-depth study of advanced topics in computational complexity.
View course details in MyPlan: CSE 533

CSE 544 Principles of Database Systems (4)
View course details in MyPlan: CSE 544

CSE 546 Machine Learning (4)
Explores methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling; decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.
View course details in MyPlan: CSE 546

CSE 547 Machine Learning for Big Data (4)
Covers machine learning and statistical techniques for analyzing datasets of massive size and dimensionality. Representations include regularized linear models, graphical models, matrix factorization, sparsity, clustering, and latent factor models. Algorithms include sketching, random projections, hashing, fast nearest-neighbors, large-scale online learning, and parallel learning (Map-Reduce, GraphLab). Prerequisite: either STAT 535 or CSE 546. Instructors: Fox, Guestrin Offered: jointly with STAT 548; W.
View course details in MyPlan: CSE 547

CSE 548 Computer Systems Architecture (4)
View course details in MyPlan: CSE 548

CSE 549 High-Performance Computer Architectures (4)
Algorithm design, software techniques, computer organizations for high-performance computing systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, interconnection networks, reconfigurable systems, memory hierarchies in multiprocessors, algorithmically specialized processors, data flow architectures. Prerequisite: CSE 548 or permission of instructor.
View course details in MyPlan: CSE 549

CSE 550 Computer Systems (4)
Explores computer system design, implementation, and evaluation. Covers principles, techniques, and examples related to the construction of computer systems, including concepts that span network systems, operating systems, web servers, parallel computing, and databases. Prerequisite: CSE 451.
View course details in MyPlan: CSE 550

CSE 551 Operating Systems (4)
Operating system design and construction techniques. Concurrent programming, operating system kernels, correctness, deadlock, protection, transaction processing, design methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisite: CSE 451.
View course details in MyPlan: CSE 551

CSE 552 Distributed and Parallel Systems (4)
Principles, techniques, and examples related to the design, implementation, and analysis of distributed and
parallel computer systems. Prerequisite: CSE 551.
View course details in MyPlan: CSE 552

CSE 553 Real-Time Systems (4)
View course details in MyPlan: CSE 553

CSE 557 Computer Graphics (4)
Introduction to image synthesis and computer modeling, emphasizing the underlying theory required for undertaking computer graphics research. Topics include color theory, image processing, affine and projective geometry, hidden-surface determination, photorealistic image synthesis, advanced curve and surface design, dynamics, realistic character animation. Prerequisite: solid knowledge of linear algebra.
View course details in MyPlan: CSE 557

CSE 558 Special Topics in Computer Graphics (4)
Advanced topics in computer graphics not treated in CSE 557. Topics vary from year to year but typically include advanced aspects of image synthesis, animation, and 3D photography. Prerequisite: CSE 557 or permission of instructor.
View course details in MyPlan: CSE 558

CSE 561 Computer Communication and Networks (4)
View course details in MyPlan: CSE 561

CSE 564 Computer Security and Privacy (4)
Examines the fundamentals of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.
View course details in MyPlan: CSE 564

CSE 567 Principles of Digital Systems Design (4)
Principles of logic design, combinational and sequential circuits, minimization techniques, structured design methods, CMOS technology, complementary and ratioed gates, delay estimation and performance analysis, arithmetic circuits, memories, clocking methodologies, synthesis and simulation tools, VLSI processor architecture. Prerequisite: basic knowledge of logic design.
View course details in MyPlan: CSE 567

CSE 568 Introduction to VLSI Systems (4)
Introduction to CMOS technology and circuit design; combinational logic-design alternatives; register-design and system-clocking methodologies; datapath and subsystem design; VLSI system-design methodologies; CAD tools for synthesis, layout, simulation, and validation; design of a complex VLSI chip. Prerequisite: either CSE 567 or permission of instructor.
View course details in MyPlan: CSE 568

CSE 571 AI-based Mobile Robotics (4)
Overview of mobile robot control and sensing. Behavior-based control, world modeling, localization, navigation, and planning Probabilistic sensor interpretation, Bayes filters, particle filters. Projects: Program real robots to perform navigation tasks. Prerequisite: either CSE 473 or permission of instructor.
View course details in MyPlan: CSE 571

CSE 573 Artificial Intelligence I (4)
Intensive introduction to artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Prerequisite: either
CSE 421 or equivalent; exposure to logic, probability, and statistics.
View course details in MyPlan: CSE 573

CSE 574 Artificial Intelligence II (4)
Advanced topics in artificial intelligence. Subjects include planning, natural language understanding, qualitative physics, machine learning, and formal models of time and action. Students are required to do projects.
Prerequisite: CSE 573.
View course details in MyPlan: CSE 574

CSE 576 Computer Vision (3)
Principles and methods for interpreting the three-dimensional world from images. Topics include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: solid knowledge of linear algebra; good programming skills. Offered: jointly with EE 576.
View course details in MyPlan: CSE 576

CSE 577 Special Topics in Computer Vision (3)
Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/EE 576. Offered: jointly with EE 577.
View course details in MyPlan: CSE 577

CSE 579 Intelligent Control through Learning and Optimization (3)
Design or near-optimal controllers for complex dynamical systems, using analytical techniques, machine learning, and optimization. Topics from deterministic and stochastic optimal control, reinforcement learning and dynamic programming, numerical optimization in the context of control, and robotics. Prerequisite: vector calculus; linear algebra; MATLAB. Offered: jointly with AMATH 571.
View course details in MyPlan: CSE 579

CSE 583 Software Development for Data Scientists (4)
Provides students outside of CSE with a practical knowledge of software development that is sufficient to do graduate work in their discipline. Modules include Python basics, software version control, software design, and using Python for machine learning and visualization.
View course details in MyPlan: CSE 583

CSE 586 Introduction to Synthetic Biology (3)
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/EE 523/MOLENG 525.
View course details in MyPlan: CSE 586

CSE 587 Advanced Systems and Synthetic Biology (3)
Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, EE 523, or CSE 586. Offered: jointly with BIOEN 524/EE 524; W.
View course details in MyPlan: CSE 587

CSE 590 Research Seminar (*, max. 50)
Several offerings each quarter, on topics of current interest.
View course details in MyPlan: CSE 590

CSE 591 Group Projects in Computer Science (1-3, max. 25)
Focuses on specialized topics and research activities in computer science.
View course details in MyPlan: CSE 591

**CSE 599 Special Topics in Computer Science (1-5, max. 30)**
Studies of emerging areas and specialized topics in computer science.
View course details in MyPlan: CSE 599

**CSE 600 Independent Study or Research (-)**
Credit/no-credit only.
View course details in MyPlan: CSE 600

**CSE 601 Internship (1-2, max. 12)**
CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to CSE Internship Program or by special permission of the Department. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: CSE 601

**CSE 700 Master's Thesis (-)**
Credit/no-credit only.
View course details in MyPlan: CSE 700

**CSE 800 Doctoral Dissertation (-)**
Credit/no-credit only.
View course details in MyPlan: CSE 800
COLLEGE OF ENGINEERING
COMPUTER SCIENCE & ENGINEERING
COMP SCI & ENGR ACCELERATED MASTERS PRG

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

CSE M 544 Database Systems (4)
Relational data model and SQL query language. Conceptual modeling; normal forms; XML. Transactions: recovery and concurrency control. Implementation of a database system. Application project using a relational database system. Study of database research papers. May not be taken for credit if student has taken CSE 444. Prerequisite: CSE 332; CSE 344.
View course details in MyPlan: CSE M 544

CSE M 552 Introduction to Distributed Systems (4)
Covers abstractions and implementation techniques in the construction of distributed systems, including cloud computing, distributed storage systems, and distributed caches. Prerequisite: CSE 451
View course details in MyPlan: CSE M 552

CSE M 584 Computer Security (4)
Explores foundations and new directions in computer security and privacy, including: risk analysis, system security, applied cryptography, human-computer interaction, design and implementation issues, anonymity, web security, and side channels. Studies security and privacy research papers. Prerequisite: CSE 351; either CSE 451 or CSE 461.
View course details in MyPlan: CSE M 584
COLLEGE OF ENGINEERING
COMPUTER SCIENCE & ENGINEERING
COMP SCI AND ENGINEERING - DATA SCIENCE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

CSE D 515 Software Design for Data Science (5)
Introduces software design and engineering practices and concepts, including version control, testing, and automatic build management. Intended for professional students and non-CSE-majors. Prerequisite: CSE D/DATA 514 or permission of instructor. Offered: jointly with DATA 515; Sp.
View course details in MyPlan: CSE D 515

CSE D 516 Scalable Data Systems and Algorithms (5)
Principles and algorithms for data management and analysis at scale. Designs of traditional and modern big data systems and how to use those systems. Basics of cloud computing. Prerequisite: CSE D/DATA 514 and CSE D/DATA 515 or permission of instructor. Offered: jointly with DATA 516; A.
View course details in MyPlan: CSE D 516
COLLEGE OF ENGINEERING
COMPUTER SCIENCE & ENGINEERING
COMP SCI & ENGR PROFESSIONAL MASTERS PRG

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

CSE P 501 Compiler Construction (4)
Principles and practice of building efficient implementations of modern programming languages. Lexical, syntactic, and semantic analysis of programs. Intermediate program representations. Intra- and interprocedural analysis and optimization. Run-time system techniques. Related programming environment facilities such as source-level debuggers and profilers.
View course details in MyPlan: CSE P 501

CSE P 503 Principles of Software Engineering (4)
Study of major developments in software engineering over the past three decades. Topics may include design (information hiding, layering, open implementations), requirements specification (informal and formal approaches), quality assurance (testing, verification and analysis, inspections), reverse and re-engineering (tools, models, approaches).
View course details in MyPlan: CSE P 503

CSE P 504 Advanced Topics in Software Systems (4)
Topics include software architecture, software tools, programming language analysis, type systems, formal reasoning, and other pertinent topics in software engineering and programming languages research.
View course details in MyPlan: CSE P 504

CSE P 505 Programming Languages (4)
A study of non-imperative programming paradigms such as functional, object-oriented, logic, and constraint programming. Programming language semantics and type theory.
View course details in MyPlan: CSE P 505

CSE P 510 Human Computer Interaction (4)
Topics in human-computer interaction, including tools and skills for user interface design, user interface software architecture, rapid prototyping and iterative design, safety and critical systems, evaluation techniques,
CSE P 517 Natural Language Processing (4)
Provides an overview of modern approaches for natural language processing. Topics include language models, text classification, tagging, parsing, machine translation, semantics, and discourse analysis.
View course details in MyPlan: CSE P 517

CSE P 521 Applied Algorithms (4)
Principles of design of efficient algorithms with emphasis on algorithms with real world applications. Examples drawn from computational geometry, biology, scientific computation, image processing, combinatorial optimization, cryptography, and operations research.
View course details in MyPlan: CSE P 521

CSE P 524 Parallel Computation (4)
Survey of parallel computing including the processing modes of pipelining, data parallelism, thread parallelism, and task parallelism; algorithmic implications of memory models; shared memory and message passing; hardware implementations; bandwidth and latency; synchronization, consistency, interprocessor communication; programming issues including implicit and explicit parallelism, locality, portability.
View course details in MyPlan: CSE P 524

CSE P 527 Computational Biology (4)
Introduction to the use of computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, motif discovery, expression analysis, and regulatory analysis. Techniques such as dynamic programming, Markov models, MCMC, expectation-maximization, and local search.
View course details in MyPlan: CSE P 527

CSE P 531 Computability and Complexity Theory (4)
Survey of the theory of computation including Turing Machines, Church's Thesis, computability, incompleteness, undecidability, complexity classes, problem reductions, Cook's theorem, NP-completeness, randomized computation, cryptography, parallel computation, and space complexity. Some emphasis placed on historical and philosophical aspects of the theory of computation.
View course details in MyPlan: CSE P 531

CSE P 544 Database Management System (4)
Introduction to the principles of database management systems. Topics include database system architecture, data models, theory of database design, query optimization, concurrency control, crash recovery, and storage strategies.
View course details in MyPlan: CSE P 544

CSE P 545 Transaction Processing (4)
Technology supporting reliable large-scale distributed computing, including transaction programming models, TP monitors, transactional communications, persistent queuing, software fault tolerance, concurrency control and recovery algorithms, distributed transactions, two-phase commit, data replication.
View course details in MyPlan: CSE P 545

CSE P 546 Data Mining (4)
Methods for identifying valid, novel, useful, and understandable patterns in data. Induction of predictive models from data: classification, regression, probability estimation. Discovery of clusters and association rules.
View course details in MyPlan: CSE P 546

CSE P 548 Computer Architecture (4)
Architecture of the single-chip microprocessor: instruction set design and processor implementation (pipelining, multiple issue, speculative execution). Memory hierarchy: on-chip and off-chip caches, TLBs and their...
management, virtual memory from the hardware viewpoint. I/O devices and control: buses, disks, and RAIDs.

**CSE P 551 Computer Operating Systems (4)**
A study of developments in operating systems from the 1960s to the present. Topics include operating system structure, protection, virtual memory, communication mechanisms, concurrency, lightweight threads, object-oriented systems, distributed systems, and transaction support in operating systems.

**CSE P 552 Distributed Systems (4)**
Principles, techniques, and examples related to the design, implementation, and analysis of distributed computer systems.

**CSE P 557 Current Trends in Computer Graphics (4)**
Introduction to computer image synthesis, modeling, and animation emphasizing the state-of-the-art algorithm applications. Topics may include visual perception, image processing, geometric transformations, hierarchical modeling, hidden-surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, realistic character animation, and traditional animation principles.

**CSE P 561 Network Systems (4)**
Current choices and challenges in network systems. Fundamental concepts combined with emphasis on evaluation of design/operations alternatives. Topics include alternative link, network, and transport-layer technologies, topologies, routing, congestion control multimedia, IPv6, aTM v. IP, network management and policy issues.

**CSE P 564 Computer Security and Privacy (4)**
Examines the fundamental of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.

**CSE P 567 Design and Implementation of Digital Systems (4)**
Overview of current implementation technologies for digital systems including custom integrated circuits, field-programmable logic, and embedded processors. Systems components such as buses and communications structures, interfaces, memory architectures, embedded systems, and application-specific devices. Focus on the design of large systems using modern CAD tools.

**CSE P 573 Applications of Artificial Intelligence (4)**
Introduction to the use of Artificial Intelligence tools and techniques in industrial and company settings. Topics include foundations (search, knowledge representation) and tools such as expert systems, natural language interfaces, and machine learning techniques.

**CSE P 576 Computer Vision (4)**
Provides an overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, pre-attentive image processing, boundary and region representations, and case studies of vision architectures.

**CSE P 590 Special Topics in Computer Science (1-4, max. 20)**
**CSE P 595 Software Entrepreneurship (4)**
Provides an overview of the major elements of entrepreneurial activity in software, including market identification and analysis, evaluation and planning of the business, financing, typical operating and administrative problems, and alternatives for growth or sale.
[View course details in MyPlan: CSE P 595](http://www.washington.edu/students/crs-cat/csep.html)

**CSE P 596 Business Basics Computer Science Professionals (4)**
Business principles relevant to the software industry in four areas: competitive strategy, finance, accounting, and human resources. Organized as a series of case studies and lectures. Progresses from an emphasis on tools to a more high-level look at competitive dynamics in high-tech industries.
[View course details in MyPlan: CSE P 596](http://www.washington.edu/students/crs-cat/csep.html)

**CSE P 600 Independent Study or Research ([1–4]–)**
[View course details in MyPlan: CSE P 600](http://www.washington.edu/students/crs-cat/csep.html)
Electrical Engineering

Department Overview

AE100R Paul Allen Center

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Dramatic advances in personal communication services, digital imaging, and network hardware and software are changing the texture of everyday life for an increasing portion of the world's population.

Undergraduate Program

Adviser
AE 100R Paul Allen Center
(206) 543-2142
undergrad@ee.washington.edu

The Department of Electrical Engineering offers the following programs of study:

- The Bachelor of Science in Electrical Engineering degree
- The Bachelor of Science in Electrical Engineering degree with an option in nanoscience and molecular engineering

Bachelor of Science in Electrical Engineering

*Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; CHEM 142; English composition; PHYS 121 (and beyond if possible).* Students should start in math courses right away and follow with physics, chemistry, computer programming, etc., as soon as possible. The department publishes a sample four-year plan of study for
fulfilling all degree requirements, including those to be taken during the first year, online at www.engr.washington.edu/files/curr_students/docs/EE_2014.pdf.

**Department Admission Requirements**

Because resources are limited, students must apply for admission to the electrical engineering program. Admission to the department is competitive and completion of the requirements does not guarantee admission. Appeal of the department’s admission decision is possible only if there was an error in the data considered by the admissions committee. Additional information on the program and admission is available through the department’s website.

**Direct Freshman Admission**

The Department of Electrical Engineering enrolls up to one-third of its incoming class directly out of high school, prior to completion of University-level prerequisites. Freshman applicants to the UW who list electrical engineering as their intended major are automatically considered. Competitive applicants have taken or are taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

**General Admission**

Application for general admission is through the online College of Engineering Departmental Application. Application deadlines are February 1 for spring quarter and July 1 for autumn quarter

1. **Course Requirements:** MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CHEM 142; 5 credits of English composition.

2. **Grade Requirements:** minimum overall 2.50 GPA and minimum 2.50 GPA in courses required for admission.

**Nanoscience and Molecular Engineering Option (NME):** Admission to the NME option is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all electrical engineering prerequisites and formal admission to the BS electrical engineering major. Students who have completed NME 220 with a minimum 2.0 grade are eligible. To declare, students schedule an appointment with an EE undergraduate adviser. Students applying for the NME option should indicate that interest on their electrical engineering major application and discuss their interests/background in their application personal statement.

**Graduation Requirements**

**General Education Requirements (81 credits)**

1. **Written and Oral Communications:** 12 credits, to include one 5-credit English composition course from the University list; HCDE 231; HCDE 333 (or department-approved alternative).

2. **Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (25 credits):** Minimum 10 credits required in each area.

3. **Natural World (44 credits):**
   a. **Mathematics (24 credits):** MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), and MATH 324.
b. Science (20 credits): CHEM 142; PHYS 121, PHYS 122, PHYS 123

Major Requirements (80-81 credits)

1. Computer Programming (9 credits): CSE 142, CSE 143
2. Electrical Engineering Core (14 credits): E E 215, E E 233, E E 235
3. Electrical Engineering Major Concentration Area (24 credits minimum)
4. Electrical Engineering Electives (up to 20 credits): See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
5. Professional Issues: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
7. Statistics (3-4 credits): STAT 390/MATH 390 or IND E 315
8. Grade Requirements: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Nanoscience and Molecular Engineering Option Requirements (80-81 credits)

1. Computer Programming (9 credits): CSE 142, CSE 143
2. Electrical Engineering Core (14 credits): E E 215, E E 233, E E 235
3. Nanoscience and Molecular Engineering Courses (6 credits): NME 220, NME 221, NME 421
4. Electrical Engineering Major Concentration Area (24 credits minimum) See adviser for list of acceptable courses.
5. Electrical Engineering Electives (up to 20 credits): See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
6. Professional Issues: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
8. Statistics (3-4 credits): STAT 390/MATH 390 or IND E 315
9. Grade Requirements: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Electives (18-19 credits)

1. Approved Non-Electrical Engineering Electives (10 credits): Selected from courses listed in the departmental handbook.
2. Free Electives (8-9 credits)

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Graduates with a degree in electrical engineering find employment in industries such as aerospace, communications, computer manufacturing, power distribution, consumer electronics, and biomedical engineering. Positions can be found focusing on the research, design, and testing of
new products; in technical sales and marketing; business consulting; and even growing areas such as intellectual property. Students who pursue graduate studies are quite successful in highly competitive national and international programs.

The BSEE program is accredited by the Accrediting Board for Engineering and Technology (ABET) and the department has adopted the following student outcomes:

a. ability to apply knowledge of mathematics, science, and engineering
b. ability to apply knowledge of probability and statistics, including applications appropriate to the program name and objectives
c. ability to apply knowledge of mathematics through differential and integral calculus, basic science, and engineering sciences necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components
d. ability to apply knowledge of advanced mathematics, typically involving differential equations, linear algebra, complex variables, and discrete mathematics
e. ability to design and conduct experiments, as well as to analyze and interpret data
f. ability to design a system, component, or process to meet desired needs
g. ability to function on multi-disciplinary teams
h. ability to identify, formulate, and solve engineering problems
i. understanding of professional and ethical responsibility
j. ability to communicate effectively
k. the broad education necessary to understand the impact of engineering solutions in a global and societal context

- **Instructional and Research Facilities**: The department maintains a number of instructional and research laboratories to support courses and independent study activities. There are three general-purpose computing laboratories Instructional laboratories include a large instrumentation laboratory supporting numerous electronics courses; individual laboratories for digital design courses; a power laboratory to support the power/energy systems classes; and laboratories that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research laboratories of their supervising faculty member.

- **Honors Options Available**: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning**: Many electrical engineering students participate every year in internship and co-op (cooperative education) programs. The Engineering Co-op Office is one source for companies recruiting for internship and co-op students. The Center for Career Services also lists a variety of internship opportunities.

- **Department Scholarships**: Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may
obtain information from the Department of Electrical Engineering Scholarship Award Committee Chair.

- **Student Organizations/Associations:** The Institute of Electrical and Electronics Engineers (IEEE), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. Eta Kappa Nu (HKN) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

---

### Graduate Program

Graduate Program Coordinator  
AE100R Paul Allen Center, Box 352500  
(206) 543-2142  
grad@ee.washington.edu

The Department of Electrical Engineering offers graduate programs leading to the degrees of Master of Science in Electrical Engineering (MSEE) and Doctor of Philosophy (PhD). Graduate courses and research programs are offered in biosystems, circuits and network theory, computational intelligence, computer networks and distributed systems, computer architecture, digital systems, software engineering, operating systems, microprocessors, VLSI design, control systems, electromagnetics (including optics and radio science), electronic materials (including devices and micro-electronics), energy systems (including power electronics and electric drives), signal and image processing, telecommunications, and virtual reality. Numerous interdisciplinary research opportunities exist, including projects relating to bioengineering, computer engineering, and marine acoustics. The department does extensive research in coordination with the University of Washington's Applied Physics laboratory and Washington Technology Center.

The MSEE degree may be earned in three ways, each of which requires the accumulation of 45 credits. A student may perform research and write a thesis; a student may pursue a one-quarter project as part of his or her studies; or a student may simply accumulate a suitable distribution of 45 credits of coursework. Coursework for each of the options is developed with the advice of faculty advisers as well as through the department advising staff.

For the PhD degree, students must pass the departmental qualifying examination, pass an advanced General Examination, pursue an original research problem, and report the results of that research in a dissertation that must be a contribution to knowledge. At least one year of coursework beyond the MSEE degree is usually desirable.

### Master of Science in Electrical Engineering

**Admission Requirements**

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following
some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admission qualifications, visit the department's website at www.ee.washington.edu/admissions/graduate/index.html.

**Degree Requirements**

Master's students have the option of choosing between two different pathways for pursuing their degree:

1. **Thesis option:** The thesis option is best for students who wish to pursue an in-depth research experience with intended preparation for pursuing a PhD

2. **Coursework option:** A student whose main goal is to work in industry immediately upon graduation may find the coursework option more suitable to his or her needs.

These two options have several related requirements:

1. Complete a plan of study by second quarter of study
2. Complete a minimum of 45 credits
3. Register full time (10 credits) per quarter (less in summer)
4. Apply no more than 3 credits of E E 500. 1 credit required
5. Apply no more than 5 credits of E E 599 to the degree
6. Take 1 credit of E E 592, offered autumn quarter

**Thesis Option**

45 credits, as follows:

1. 9-12 credits of E E 700
2. At least 20 credits in E E courses numbered 500 and above
3. No more than 12 credits in E E 400-level courses
4. No more than 9 credits from non-E E courses

The thesis option is an opportunity to pursue an individual problem in depth and in close collaboration with a faculty member. Typical problems involve basic research or application of classroom principles to a professional problem beyond the routine practice of electrical engineering. Students who choose the thesis option must complete a written thesis and oral examination based upon the thesis material before their degree is granted.

**Coursework Option**

45 credits, as follows:

1. At least 25 credits in E E courses numbered 500 and above
2. No more than 12 credits in E E 400-level courses
3. No more than 9 credits from non-E E courses
The coursework option allows students to pursue the MSEE by taking a prearranged course load specific to each of the seven curriculum areas. A generic coursework option is also available. The curriculum group chair and the Graduate Program Coordinator must approve deviation from these prearranged plans.

**Doctor of Philosophy**

**Admission Requirements**

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admission qualifications, visit the department's Website at [www.ee.washington.edu/admissions/graduate/index.html](http://www.ee.washington.edu/admissions/graduate/index.html).

**Degree Requirements**

Minimum 90 credits, to include:

The PhD is awarded based on general proficiency and distinctive attainments in electrical engineering, particularly on the demonstrated ability of independent investigation. As evidence of ability, the student must produce a doctoral dissertation embodying original research yielding a new contribution to knowledge and presented with a satisfactory degree of literary skill. The majority of PhD students hold master's degrees within the same field, although students with degrees in the physical sciences and other engineering fields are also admitted. To earn a PhD, students must:

1. Pass the department qualifying examination
2. Complete an individualized course of study approved by the student's PhD Supervisory Committee
3. Pass the University general examination
4. Prepare and defend a satisfactory dissertation based on original research
5. Complete at least 90 credits of coursework, independent study, and dissertation (60 of which must be completed at the UW), 18 of which must be graded credits
6. Maintain a cumulative minimum GPA of 3.00.
7. Complete 30 credits of dissertation credits (E E 800)

**Research Groups**

Facilities in the Department of Electrical Engineering include research laboratories for advanced digital systems, advanced power technology, applied electromagnetics, optics, remote sensing, applied signal and image processing, mechatronics and intelligent control, modern sensors, and semiconductor technology

**Financial Aid**
Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.
COLLEGE OF ENGINEERING
ELECTRICAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

E E 135 The Digital World of Multimedia (4) NW
Introduces signal processing concepts behind multimedia creation, storage, and communication. Includes digitizing, decomposing, and modifying sounds and images; coding information for compression, errors, and security; and basics of network communication. Team-oriented labwork involves creating digital sounds and images using MATLAB, and experiments with streaming media technology.
View course details in MyPlan: E E 135

E E 205 Introduction to Signal Conditioning (4) QSR
Introduces analog circuits interfacing sensors to digital systems. Includes connection, attenuation, amplification, sampling, filtering, termination, controls, Kirchhoff's Laws, sources, resistors, op amps, capacitors, inductors, PSice, and MATLAB. Intended for non-EE majors. Prerequisite: either MATH 126 or MATH 136; PHYS 122. Offered: W.
View course details in MyPlan: E E 205

E E 215 Fundamentals of Electrical Engineering (4) NW
Introduction to electrical engineering. Basic circuit and systems concepts. Mathematical models of components. Kirchhoff's laws. Resistors, sources, capacitors, inductors, and operational amplifiers. Solution of first and second order linear differential equations associated with basic circuit forms. Prerequisite: either MATH 136, or MATH 126 and either MATH 307 or AMATH 351, either of which may be taken concurrently; PHYS 122. Offered: AWSpS.
View course details in MyPlan: E E 215

E E 233 Circuit Theory (5)
View course details in MyPlan: E E 233

E E 235 Continuous Time Linear Systems (5)
Introduction to continuous time signal analysis. Basic signals including impulses, pulses, and unit steps. Periodic signals. Convolution of signals. Fourier series and transforms in discrete and continuous time. Computer laboratory. Prerequisite: either MATH 136, MATH 307, or AMATH 351, any of which may be taken
concurrently; PHYS 122; either CSE 142 or CSE 143, either of which may be taken concurrently. Offered: AWSp.

View course details in MyPlan: E E 235

**E E 271 Digital Circuits and Systems (5)**

Overview of digital computer systems. Covers logic, Boolean algebra, combinational and sequential circuits and logic design; programmable logic devices; and the design and operation of digital computers, including ALU, memory, and I/O. Weekly laboratories. No credit if CSE 369 has been taken. Prerequisite: either CSE 142 or CSE 143. Offered: AWSpS.

View course details in MyPlan: E E 271

**E E 294 Innovation Readiness: Cultivating an Innovation Mindset (5) I&S/NW**

Explores concepts and principles of innovation readiness and entrepreneurial thinking. Looks at innovation as a process, not an accident. Develops set of skills for innovation in companies, communities, teams and schools, in technology, education, arts, retail, and science. Prerequisite: either C LIT 240, both ENGL 109 and 110, ENGL 111, ENGL 212, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: Sp.

View course details in MyPlan: E E 294

**E E 299 Introductory Topics in Electrical Engineering (1-5, max. 10) NW**

New and experimental approaches to basic electrical engineering. May include design and construction projects.

View course details in MyPlan: E E 299

**E E 331 Devices and Circuits I (5)**

Physics, characteristics, applications, analysis, and design of circuits using semiconductor diodes and field-effect transistors with an emphasis on large-signal behavior and digital logic circuits. Classroom concepts are reinforced through laboratory experiments and design exercises. Prerequisite: 1.0 in E E 233. Offered: AWSpS.

View course details in MyPlan: E E 331

**E E 332 Devices and Circuits II (5)**

Characteristics of bipolar transistors, large- and small- signal models for bipolar and field effect transistors, linear circuit applications, including low and high frequency analysis of differential amplifiers, current sources, gain stages and output stages, internal circuitry of op-amps, op-amp configurations, op-amp stability and compensation. Weekly laboratory. Prerequisite: 1.0 in E E 331. Offered: AWSpS.

View course details in MyPlan: E E 332

**E E 341 Discrete Time Linear Systems (5)**

Discrete time signals and systems, impulse response, convolution, Z-transforms, discrete time Fourier analysis. Computer laboratory. Prerequisite: 1.0 in E E 235. Offered: WSpS.

View course details in MyPlan: E E 341

**E E 351 Energy Systems (5)**

Develops understanding of modern energy systems through theory and analysis of the system and its components. Discussions of generation, transmission, and utilization are complemented by environmental and energy resources topics as well as electromechanical conversion, power electronics, electric safety, renewable energy, and electricity blackouts. Prerequisite: 1.0 in E E 233. Offered: ASp.

View course details in MyPlan: E E 351

**E E 361 Applied Electromagnetics (5)**

Introductory electromagnetic field theory and Maxwell's equations in integral and differential forms; uniform plane waves in linear media; boundary conditions and reflection and transmission of waves; guided waves; transmission lines and Smith chart; electrostatics. Prerequisite: 1.0 in E E 233; MATH 324; PHYS 123. Offered: AW.

View course details in MyPlan: E E 361
E E 371 Design of Digital Circuits and Systems (5)
Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with CSE 371.
View course details in MyPlan: E E 371

E E 393 Advanced Technical Writing in Electrical Engineering (4)
Develops formal technical writing skills for engineering students. Includes organization and structure of papers and reports, clear and concise technical language, choice of appropriate terminology, and an overview of common grammatical errors. Covers implementation of figures, equations, and literature citations, with specific recommendations for electrical engineers. Prerequisite: either ENGR 231 or HCDE 231. Offered: AWSp.
View course details in MyPlan: E E 393

E E 398 Introduction to Professional Issues (1)
Covers topics of interest to students planning their educational and professional path, including salaries, the value of advanced degrees, societal expectations of engineering professionals, the corporate enterprise, ethical dilemmas, patents and trade secrets, outsourcing, and the global market. Offered: AWSp.
View course details in MyPlan: E E 398

E E 399 Special Topics in Electrical Engineering (1-5, max. 10)
New and experimental approaches to current electrical engineering problems. May include design and construction projects.
View course details in MyPlan: E E 399

E E 400 Advanced Topics in Electrical Engineering (1-5, max. 10)
Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.
View course details in MyPlan: E E 400

E E 406 Engineering Design for K-12 Outreach (3)
Design process targeted toward development of relevant activities for K-12 audiences in such areas of science and engineering. Instruction in basic design process, design specification combined with an overview of relevant cognitive/social development in K-12. Prerequisite: either E E 271, E E 331, E E 341, E E 351 or E E 361.
View course details in MyPlan: E E 406

E E 415 Computer-Aided System Analysis and Design (3)
Concepts, principles, and techniques concerned with the design, testing, and application of general-purpose problem-oriented computer programs for analyzing large-scale systems.
View course details in MyPlan: E E 415

E E 416 Random Signals for Communications and Signal Processing (4)
Probability and random processes in communications. Random variables, distributions, and expectation. Statistical filter design for detection and estimation. Prerequisite: E E 341; either STAT 390 or IND E 315. Offered: A.
View course details in MyPlan: E E 416

E E 417 Modern Wireless Communications (4)
Introduction to wireless networks as an application of basic communication theorems. Examines modulation techniques for digital communications, signal space, optimum receiver design, error performance, error control coding for high reliability, multipath fading and its effects, RF link budget analysis, WiFi and Wimax systems. Prerequisite: E E 341; either IND E 315, MATH 390, or STAT 390. Offered: W.
View course details in MyPlan: E E 417
E E 418 Network Security and Cryptography (3)
Fundamental principles of cryptography and its application to network and communication security. An introduction to the fundamental tools in cryptography and the protocols that enable its application to network and communication security. Prerequisite: MATH 308; either MATH 390, STAT 390, or IND E 315. Offered: A.
View course details in MyPlan: E E 418

E E 420 Design in Communications (4)
Design projects in communications. Frequent projects solved by student teams. Reports and presentations. Prerequisite: 1.0 in E E 417 which may be taken concurrently. Offered: Sp.
View course details in MyPlan: E E 420

E E 423 Introduction to Synthetic Biology (3)
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 423/CSE 486; A.
View course details in MyPlan: E E 423

E E 424 Advanced Systems and Synthetic Biology (3)
Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/CSE 487; W.
View course details in MyPlan: E E 424

E E 425 Laboratory Methods in Synthetic Biology (4)
Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/CSE 488; W.
View course details in MyPlan: E E 425

E E 426 Capstone Project in Synthetic Biology (4) E. KLAIVINS
Capstone design experience in synthetic biology. Provides students with skills in handling open-ended design problems in synthetic biology. Students participate on a team that designs, builds and tests a new transgenic microorganism with potential applications ranging from advanced materials, bio-sensing and/or remediation, or human health. Prerequisite: either BIOEN 425, E E 425, or CSE 488; CSE 142 Offered: Sp.
View course details in MyPlan: E E 426

E E 433 Analog Circuit Design (5)
Design of analog circuits and systems applying modern integrated circuit technology: operational amplifiers, differential amplifiers, active filters, voltage references and regulators. Prerequisite: 1.0 in E E 332. Offered: A.
View course details in MyPlan: E E 433

E E 436 Medical Instrumentation (4)
Introductory course in the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For upper-division and first-year graduate students preparing for careers in bioengineering - both research and industrial. Prerequisite: E E 332. Offered: Sp.
View course details in MyPlan: E E 436

E E 438 Instrumentation Design Project Capstone (5) R. DARLING
Team-based design for developing an electronic instrumentation system and constructing and validating a
prototype using modern printed circuit board technology. Teams develop design requirements; investigate tradeoffs for miniaturization, integration, performance, and cost; and consider use cases, failure modes, manufacturability, and testability. Includes extensive laboratory. Prerequisite: either E E 433 or E E 436. Offered: Sp.

View course details in MyPlan: E E 438

E E 440 Introduction to Digital Imaging Systems (4)
Image representation and standards, visual perception and color spaces, spatial domain image filtering and enhancement, image restoration, image transforms, image and video coding, image geometrical transformation and camera modeling. Prerequisite: E E 341. Offered: A.

View course details in MyPlan: E E 440

E E 442 Digital Signals and Filtering (3)

View course details in MyPlan: E E 442

E E 443 Design and Application of Digital Signal Processing (5)
Application of learned theories/algorithms and available computer technologies to modern image and speech processing problems. Two-dimensional signals and systems. Image transform, enhancement, restoration, coding. Characteristics of speech signals, linear predictive coding (LPC) of speech, pitch detection, and LPC speech synthesis, speech recognition, hardware designs for signal processing. Prerequisite: 1.0 in E E 442. Offered: Sp.

View course details in MyPlan: E E 443

E E 447 Control System Analysis I (4)
Linear Servomechanism theory and design principles. Pole-zero analysis, stability of feedback systems by root locus and real-frequency response methods. Design methods of Bode and Nichols. Introduction to advanced topics in automatic control theory, state variable methods. Prerequisite: E E 233; E E 235; MATH 308. Offered: A.

View course details in MyPlan: E E 447

E E 448 Systems, Controls, and Robotics Capstone (4–)
In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results. Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 447. Offered: W.

View course details in MyPlan: E E 448

E E 449 Systems, Controls, and Robotics Capstone (4–)
In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results. Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 448. Offered: Sp.

View course details in MyPlan: E E 449

E E 451 Wind Energy (4)
Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: E E 351. Offered: Sp, odd years.

View course details in MyPlan: E E 451
E E 452 Power Electronics Design (5)
Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, design of magnetics, and control of power converters. Also ac/ac, ac/dc, and dc/dc power converters; circuit simulation; extensive laboratory work; a four-week power converter design project. Prerequisite: 1.0 in E E 331; 1.0 in E E 351. Offered: A.
View course details in MyPlan: E E 452

E E 453 Electric Drives (5)
Elements of drive systems, speed-torque characteristics of electric motors and industrial loads, solid-state converter. Starting and braking methods of loaded motors. Speed control of electric motors. Solid-state drives. Transient analysis of loaded motors. Special forms of individual- and multimotor drives. Prerequisite: 1.0 in E E 452. Offered: W.
View course details in MyPlan: E E 453

E E 454 Power System Analysis (4)
Introduction to methods of analyzing power systems. Includes symmetrical components, calculation of line parameters, representation of transmission lines and power components, and power flow control. Prerequisite: 1.0 in E E 351. Offered: A.
View course details in MyPlan: E E 454

E E 455 Power System Dynamics and Protection (4)
Analysis of symmetrical and unsymmetrical power systems' networks, fault analysis, and stability studies. Prerequisite: 1.0 in E E 351. Offered: W.
View course details in MyPlan: E E 455

E E 456 Computer-Aided Design in Power Systems (4)
Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, or distribution systems. Each involves formulation of design criteria, development of approach, application of existing software. Prerequisite: either 1.0 in E E 454 or 1.0 in E E 455. Offered: Sp.
View course details in MyPlan: E E 456

E E 457 Electric Energy Distribution Systems (4)
Introduction to electric utility distribution systems. Primary and secondary network analysis and design, distribution substation problems, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 1.0 in E E 351. Offered: W.
View course details in MyPlan: E E 457

E E 461 Introduction to Computer-Communication Networks (4)
View course details in MyPlan: E E 461

E E 462 Electromagnetics I: Microwave Engineering (4)
Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions. Prerequisite: minimum grade of 1.0 in E E 361. Offered: A.
View course details in MyPlan: E E 462

E E 463 Microwave Electronic Design (4)
Design of microwave circuits using S-parameter techniques. Measurement techniques, CAD of microwave systems. Includes design, fabrication, and evaluation of a microwave amplifier. Prerequisite: E E 361; E E 332,
which may be taken concurrently. Offered: W.

View course details in MyPlan: E E 463

E E 464 Antennas: Analysis and Design (4)
Fundamentals of antennas, analysis, synthesis, and computer-aided design, and applications in communications, remote sensing, and radars. Radiation pattern, directivity, impedance, wire antennas, arrays, numerical methods for analysis, horn antennas, microstrip antennas, and reflector antennas. Prerequisite: 1.0 in E E 361. Offered: Sp.

View course details in MyPlan: E E 464

E E 465 Fiber Optics, Devices, and Applications (4)
Wave propagation in optical waveguiding structures, signal distortion, coupling of modes, modulation, sources and detectors, fabrication and measurement methods, communication and sensor systems. Prerequisite: E E 331; E E 361.

View course details in MyPlan: E E 465

E E 469 Computer Architecture I (5)
Introduction to computer architecture. Assembly and machine language, microprocessor organization including control and datapath. Computer arithmetic. Memory systems and caching. Performance modeling of microprocessors. Prerequisite: either E E 271 or CSE 369; CSE 143 Offered: jointly with CSE 469; AWSp.

View course details in MyPlan: E E 469

E E 470 Computer Architecture II (4)

View course details in MyPlan: E E 470

E E 473 Linear Integrated Circuits (5)
Design of linear integrated circuits applying modern MOS and BJT integrated circuit technologies: single-stage amplifiers; current-mirror DC bias and active load circuits; stability and frequency compensation of single-stage and two-stage operational amplifiers; output stages; current and voltage reference circuits. Prerequisite: 1.0 in E E 332. Offered: W.

View course details in MyPlan: E E 473

E E 474 Introduction to Embedded Systems (4)
Introduces the specification, design, development, and test of real time embedded system software. Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with CSE 474; AWSp.

View course details in MyPlan: E E 474

E E 475 Embedded Systems Capstone (5)
Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with CSE 475; AWSp.

View course details in MyPlan: E E 475

E E 476 Digital Integrated Circuit Design (5)
Comprehensive view of digital integrated circuit design. Topics to be covered include the design of inverters, static logic circuits, switch logic, and synchronous logic. Students design, simulate, and layout a complete digital IC using modern computer-aided design tools. Prerequisite: either E E 205 or E E 215; E E 271. Offered:
A. View course details in MyPlan: E E 476

E E 477 VLSI II (5)
Provides a fairly deep understanding of how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 331; E E 476. Offered: W.
View course details in MyPlan: E E 477

E E 482 Semiconductor Devices (4)
Fundamentals of semiconductor theory: carrier diffusion and drift; concept of direct and indirect energy materials, effective mass of mobile carriers; device physics: homo- and heterojunctions, operating principles of bipolar, junction, and MOS field-effect transistors. Prerequisite: E E 331; E E 361. Offered: A.
View course details in MyPlan: E E 482

E E 483 Nanotechnology Design (4) S. DUNHAM
Open-ended design of a nanoscale solid state device using advanced technology computer-aided design (TCAD) tools. Prerequisite: EE 482. Offered: W.
View course details in MyPlan: E E 483

E E 484 Sensors and Sensor Systems (4)
Introduction to optical and solid-state chemical and physical sensors. Topics include transduction mechanisms, design parameters, fabrication methods and applications. Prerequisite: E E 331. Offered: Sp.
View course details in MyPlan: E E 484

E E 485 Introduction to Photonics (4)
Introduction to optical principles and phenomena. Topics include electromagnetic theory of light, interference, diffraction, polarization, photon optics, laser principles, Gaussian beam optics, semiconductor optics, semiconductor photonic devices. Prerequisite: E E 361 or PHYS 123. Offered: W.
View course details in MyPlan: E E 485

E E 486 Fundamentals of Integrated Circuit Technology (3)
Processing physics, chemistry, and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: EE 331 or MSE 351. Offered: jointly with MSE 486; AW.
View course details in MyPlan: E E 486

E E 488 Photonics Design Capstone (4)
Design of optical and optoelectronic devices using fundamental principles of photonics. Recent advances in contemporary research. Construction of microscopes or spectrometers. Involves a major design experience. Prerequisite: E E 485.
View course details in MyPlan: E E 488

E E 490 Reading and Research (1-5, max. 25)
Reading and research in the field under supervision of an E E faculty member. Credit/no-credit only.
View course details in MyPlan: E E 490

E E 491 Undergraduate Seminar (1, max. 2)
Weekly seminars on current topics in electrical engineering. Credit/no-credit only.
View course details in MyPlan: E E 491

E E 492 Electrical Engineering Leadership Seminar (1)
Weekly seminar with program alumni presenting their workforce experience, demonstrating the depth and
breadth possible in the field and best practices. Credit/no-credit only. Offered: W.
View course details in MyPlan: E E 492

**E E 497 Engineering Entrepreneurial Capstone I (4)**
Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes cross-disciplinary teamwork. Offered: W.
View course details in MyPlan: E E 497

**E E 498 Engineering Entrepreneurial Capstone II (4)**
Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes cross-disciplinary teamwork. Prerequisite: E E 497. Offered: Sp.
View course details in MyPlan: E E 498

**E E 499 Undergraduate Research and Special Projects (1-5, max. 10)**
Undergraduate research or design project carried out under the supervision of a faculty sponsor.
View course details in MyPlan: E E 499

**E E 500 Graduate Seminar (1, max. 9)**
Weekly seminars on current topics in electrical engineering. More than one section may be offered in a given quarter. Credit/no-credit only.
View course details in MyPlan: E E 500

**E E 501 Academic Writing (4) A. MAMISHEV**
Develops formal technical writing skills for graduate engineering students. Covers organization and structure of archival papers, theses, reports, and proposals; concise technical language; terminology; literature search; peer review process; analysis of grammatical and stylistic errors; organization of multi-authored writing and implementation of figures, equations, and citations. Offered: Sp.
View course details in MyPlan: E E 501

**E E 503 Modeling of MEMS (4)**
Microelectro mechanical systems (MEMS) including lumped modeling, conjugate power variables, electrostatic and magnetic actuators, linear transducers, linear system dynamics, design optimization, and thermal analysis. Numerical modeling topics include electro (quasi) static, mechanical, electro mechanical, magneto (quasi) static, and fluidic phenomena; parametric analysis, visualization of multi-dimensional solutions; and verification of results.
View course details in MyPlan: E E 503

**E E 504 Introduction to Microelectro Mechanical Systems (4)**
Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with M E 504/MSE 504.
View course details in MyPlan: E E 504

**E E 505 Probability and Random Processes (4)**
Foundations for the engineering analysis of random processes: set theoretic fundamentals, basic axioms of probability models, conditional probabilities and independence, discrete and continuous random variables, multiple random variables, sequences of random variables, limit theorems, models of stochastic processes, noise, stationarity and ergodicity, Gaussian processes, power spectral densities. Prerequisite: graduate standing and understanding of probability at the level of E E 416.
View course details in MyPlan: E E 505
E E 506 Fundamentals of Wireless Communication (4)
Reviews fundamentals of wireless communications including signal and noise theory, modulation techniques, fading channels, error analysis, synchronization, and coding. Prerequisite: E E 505.
View course details in MyPlan: E E 506

E E 507 Communication Theory II (3)
View course details in MyPlan: E E 507

E E 508 Stochastic Processes in Engineering (3) A. GHATE
Non-measure theoretic introduction to stochastic processes. Topics include Poisson processes, renewal processes, Markov and semi-Markov processes, Brownian motion, and martingales, with applications to problems in queuing, supply chain management, signal processing, control, and communications. Prerequisite: E E 505. Offered: jointly with IND E 508; W.
View course details in MyPlan: E E 508

E E 510 Mathematical Foundations of Systems Theory (4)
Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/CHEM E 510/M E 510.
View course details in MyPlan: E E 510

E E 511 Introduction to Statistical Learning (4)
Covers classification and estimation of vector observations, including both parametric and nonparametric approaches. Includes classification with likelihood functions and general discriminant functions, density estimation, supervised and unsupervised learning, feature reduction, model selection, and performance estimation. Prerequisite: either E E 505 or CSE 515.
View course details in MyPlan: E E 511

E E 512 Graphical Models in Pattern Recognition (4)
Bayesian networks, Markov random fields, factor graphs, Markov properties, standard models as graphical models, graph theory (e.g., moralization and triangulation), probabilistic inference (including pearl's belief propagation, Hugin, and Shafer-Shenoy), junction theorems, dynamic Bayesian networks (including hidden Markov models), learning new models, models in practice. Prerequisite: E E 508; E E 511.
View course details in MyPlan: E E 512

E E 514 Information Theory I (4)
Includes entropy, mutual information, Shannon's source coding theorem, data compression to entropy limit, method of types, Huffman coding, Kraft inequality, arithmetic coding, Kolmogorov complexity, communication at channel capacity (channel coding), coding theory, introduction to modern statistical coding techniques, differential entropy, and Gaussian channels. Prerequisite: E E 505.
View course details in MyPlan: E E 514

E E 515 Information Theory II (4)
Includes advanced modern statistical coding techniques (statistical coding), advanced codes and graphs, source coding with errors (rate distortion), alternating minimization principles, channel coding with errors, network information theory, multiple description coding, and information theory in other areas including pattern recognition, bio-informatics, natural language processing, and computer science. Prerequisite: E E 514.
View course details in MyPlan: E E 515

E E 516 Computer Speech Processing (4)
Introduction to automatic speech processing. Overview of human speech production and perception.
Fundamental theory in speech coding, synthesis and reproduction, as well as system design methodologies. Advanced topics include speaker and language identification and adaptation. Prerequisite: E E 505; E E 518.

View course details in MyPlan: E E 516

**E E 517 Continuous-Space Language Processing (4)**
Introduction to human language technology, with in-depth coverage of continuous-space statistical models of language and application to natural language processing tasks. Methods covered include low rank distributional representations, neural networks, and log bilinear statistical models, which are leveraged for language modeling, similarity scoring, classification, and translation/generation. Prerequisite: E E 505.

View course details in MyPlan: E E 517

**E E 518 Digital Signal Processing (4)**
Covers discrete-time processing of continuous-time signals; sampling rate conversion; frequency magnitude, phase delay, and group delay; design techniques for non-recursive (FIR) filters; multirate signal processing; all-pass/minimum phase decompositions; discrete Fourier transforms, fast Fourier transforms; overlap-add; short-time Fourier analysis; and filter banks. Includes applications such as machine learning. Prerequisite: E E 442.

View course details in MyPlan: E E 518

**E E 519 Stochastic Analysis of Data From Physical Systems (4)**
Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, probability densities. Interpretation of statistical measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: E E 505.

View course details in MyPlan: E E 519

**E E 520 Spectral Analysis of Time Series (4)**

View course details in MyPlan: E E 520

**E E 521 Quantum Mechanics for Engineers (4)**
Covers the basic theory of quantum mechanics in the context of modern examples of technological importance involving 1D, 2D, and 3D nanomaterials. Develops a qualitative and quantitative understanding of the principles of quantization, band structure, density of states, and Fermi's golden rule (optical absorption, electron-impurity/phonon scattering). Prerequisite: MATH 307 or AMATH 351.

View course details in MyPlan: E E 521

**E E 523 Introduction to Synthetic Biology (3)**
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/CSE 586/MOLENG 525.

View course details in MyPlan: E E 523

**E E 524 Advanced Systems and Synthetic Biology (3)**
Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with BIOEN 524/CSE 587; W.

View course details in MyPlan: E E 524
E E 525 VLSI II (5)
Analyzes how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525.
Prerequisite: E E 476.
View course details in MyPlan: E E 525

E E 526 VLSI III (4)
Ultra-high speed digital logical families based on output prediction logic; high-speed division; input and output pad design; state-of-the-art latch and flip-flop design; clock distribution, including PLLs and DLLs; noise considerations in high-speed digital IC design. Prerequisite: E E 477 or E E 525.
View course details in MyPlan: E E 526

E E 527 Microfabrication (4)
Principles and techniques for the fabrication of microelectronics devices and integrated circuits. Includes clean room laboratory practices and chemical safety, photolithography, wet and dry etching, oxidation and diffusion, metallization and dielectric deposition, compressed gas systems, vacuum systems, thermal processing systems, plasma systems, and metrology. Extensive laboratory with limited enrollment.
View course details in MyPlan: E E 527

E E 528 Physics and Modeling of VLSI Fabrication (4)
Physics of VLSI fabrication, emphasizing processing modeling and simulation. CMOS process, sequences, point defects and diffusion, ion implantation and annealing, film growth kinetics, deposition and etching, advanced photolithography. Process interactions and process integration. Extensive use of process simulation software. Prerequisite: either E E 486/MSE 467, E E 502/M E 504/MSE 504, or E E 527. Offered: jointly with MSE 528.
View course details in MyPlan: E E 528

E E 529 Semiconductor Optoelectronics (4)
Covers optical processes in semiconductors; optical waveguide theory; junction theory; LEDs; lasers photodetectors; photovoltaics; and optical modulators and switches. Prerequisite: E E 485. Offered: jointly with MSE 529.
View course details in MyPlan: E E 529

E E 530 Wavelets: Data Analysis, Algorithms, and Theory (3)
View course details in MyPlan: E E 530

E E 531 Semiconductor Devices and Device Simulation (4)
Physical principles in semiconductor devices. Generation, recombination, p-n junctions, MOS, metal-semiconductor and other interface structures. Carrier transport at low and high level injection levels. Device simulation used to demonstrate physical principles and basic device operation. Project using device simulation. Prerequisite: E E 482.
View course details in MyPlan: E E 531

E E 533 Photodetectors and Photodetection (4)
Includes both the device physics and signal processing aspects of photodetection. Photodiodes, photoconductors, photomultipliers, and solar cells. Noise, signal-to-noise ratios, and imaging considerations. Prerequisite: E E 482.
View course details in MyPlan: E E 533
E E 534 Power Electronics (4)  
Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control.  
View course details in MyPlan: E E 534

E E 536 Design of Analog Integrated Circuits and Systems (4)  
Design of analog VLSI: specifications, design, simulation, layout. Covering CMOS and Bi CMOS technologies. Prerequisite: E E 433.  
View course details in MyPlan: E E 536

E E 537 Computation Methods for Circuit Analysis and Simulation (3)  
Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical aspects of important analyses: large-signal nonlinear DC, small-signal AC, nonlinear transient, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices.  
View course details in MyPlan: E E 537

E E 538 Topics in Electronic Circuit Design (1-5, max. 16)  
Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge.  
View course details in MyPlan: E E 538

E E 539 Advanced Topics in Solid-State Electronics (1-5, max. 16)  
Lectures or discussions of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty.  
View course details in MyPlan: E E 539

E E 540 VLSI Testing (4)  
VLSI testing and design-for-test techniques, covering digital systems, mixed analog-digital systems, integrated sensor systems, and radio-frequency systems. Projects include test algorithm design, testing of fabricated circuits, and parametric testing of state-of-the-art industry circuits. Prerequisite: either E E 477 or E E 525.  
View course details in MyPlan: E E 540

E E 541 Automatic Layout of Integrated Circuits (4)  
Examines the algorithms behind the following commonly used physical design automation tools: floorplanning, partitioning, placement, routing, compaction, and verification. Prerequisite: either E E 271 or CSE 370; CSE 143.  
View course details in MyPlan: E E 541

E E 542 Advanced Embedded Systems Design (5)  
Studies advanced embedded system design principles and practices. Emphasizes formal design methodologies such as hardware-software co-design, investigates techniques for performance optimization, and examines distributed embedded systems. Prerequisite: E E 478.  
View course details in MyPlan: E E 542

E E 543 Models of Robot Manipulation (4)  
Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra.  
View course details in MyPlan: E E 543

E E 546 Advanced Topics in Control System Theory (1-5, max. 16)  
Topics of current interest in control system theory for advanced graduate students with adequate preparation in
linear and nonlinear system theory. Prerequisite: permission of instructor. Offering when adequate enrollment develops prior to close of advance registration.

**EE 547 Linear Systems Theory (4)**

Linearity, linearity and linearity, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory.

Offered: jointly with AA 547/M E 547.

**View course details in MyPlan: EE 547**

**EE 548 Linear Multivariable Control (3)**

Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: AA 547/E E 547/M E 547. Offered: jointly with AA 548/M E 548.

**View course details in MyPlan: EE 548**

**EE 549 Estimation and System Identification (3)**

**View course details in MyPlan: EE 549**

**EE 550 Nonlinear Optimal Control (3)**

Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with AA 550/M E 550.

**View course details in MyPlan: EE 550**

**EE 551 Wind Energy (4)**

Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: EE 351.

**View course details in MyPlan: EE 551**

**EE 552 Power Systems Dynamics and Control (4)**

Advanced computer modeling and analysis of power systems. Application of modern systems and control theories. Prerequisite: EE 351 and EE 455.

**View course details in MyPlan: EE 552**

**EE 553 Power System Economics (4)**

Economic structure of power systems. Problem formulation, optimization methods and programming for economic analysis of power system operation and planning. Economic dispatch, load forecasting, unit commitment, interchange, planning and reliability analysis. Provides background to pursue advanced work in planning and operation.

**View course details in MyPlan: EE 553**

**EE 554 Large Electric Energy Systems Analysis (4)**

Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: EE 456.

**View course details in MyPlan: EE 554**
E E 556 Analyzing the Power Grid (4)
Discusses the models of the various components of an electricity grid and how they are combined into a set of
equations that can be used to analyze the grid under normal, steady state conditions, as well as to calculate fault
currents and assess its transient stability.
View course details in MyPlan: E E 556

E E 557 Dynamics of Controlled Systems (4)
Explores control techniques for high precision motion control. Covers state variable feedback of linear and
nonlinear, multivariable systems in depth. Uses physical system modeling, graphical analysis, and numerical
analysis to describe system performance. Uses simulation mini-projects to emphasize the dynamics of controlled
systems and their performance.
View course details in MyPlan: E E 557

E E 558 Substation and Distribution Automation (4)
Examines how smart grid technologies affect substation and distribution operations and how history, customer
expectations, and state and federal policies have shaped the existing infrastructure. Studies the capabilities of
various emerging technologies to assess how they are able to solve existing issues.
View course details in MyPlan: E E 558

E E 559 Special Topics in Electrical Energy Systems (1-5, max. 16)
Topics of current interest in electrical power and energy devices and systems. Content varies from year to year,
based on current professional interests of faculty member in charge.
View course details in MyPlan: E E 559

E E 560 Advanced Electric Machines and Drives (4)
Fundamentals of electric machines and drives, including brush DC, brushless DC, PM synchronous, induction
machines, inverter topologies, and control techniques. Evaluation of torque production and control in machines
with electronic drives (motor controllers).
View course details in MyPlan: E E 560

E E 562 Artificial Intelligence for Engineers (3)
Covers main areas of artificial intelligence (AI) without need for extensive prerequisites. Programming
languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus;
rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisite: CSE 373.
View course details in MyPlan: E E 562

E E 565 Computer-Communication Networks I (4)
Network architectures and protocols; layered model; reliable transmission protocols at the data control layer;
Transmission Control Protocols (TCP); routing algorithms; performance modeling, and analysis of packet-
switched networks. Multi-access. Projects involving routing and multi-access principles. Prerequisite: E E 505.
View course details in MyPlan: E E 565

E E 566 Computer-Communication Networks II (3)
Local area, metropolitan area, satellite, and packet radio networks; routing algorithms for wide area networks;
optimal design of packet-switched networks; congestion and flow control; fast packet switching; gigabit
networks. Prerequisite: E E 565.
View course details in MyPlan: E E 566

E E 567 Mobile Radio Networks (4)
Wireless communication networks, including digital broadcasting, wireless LAN, wireless access networks and
ultra wide band (UWB); OFDM modem design; dirty-paper coding; MAC and RLP; TCP/UDP over wireless;
multi-radio networks; cross-layer protocol optimization; radio network planning. Prerequisite: E E 506; E E 565.
View course details in MyPlan: E E 567
E E 568 Digital Image Processing (4)
Digital image processing techniques and various special topics such as image restoration, image segmentation, multi-resolution imaging with wavelet transform, and image registration. Prerequisite: permission of instructor. View course details in MyPlan: E E 568

E E 570 Manifolds and Geometry for Systems and Control (3)
Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate vs. coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with A A 570/M E 570; W, even years. View course details in MyPlan: E E 570

E E 571 High Frequency Circuits and Antennas: Computation of Fields and Waves (4)
Planar microstrip structures are high frequency circuits and antennas used in communication, aerospace and computer industries. Examines the computation of fields and waves in such structures. How to calculate circuit parameters and radiation characteristics. Structures studied include microstrip lines, coupled lines, antennas, resonators, and discontinuities. Prerequisite: either E E 482 or E E 572. View course details in MyPlan: E E 571

E E 572 Electromagnetics I: Microwave Engineering (4)
Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions. Prerequisite: E E 361. Offered: A. View course details in MyPlan: E E 572

E E 573 Electromagnetics II (4)
Covers Green's functions; radiation from apertures and beam waves; periodic structures and coupled-mode theory; dispersion and anisotropic media; antennas, apertures, and arrays; and scattering of waves by conducting and dielectric objects. Prerequisite: E E 572. View course details in MyPlan: E E 573

E E 574 Antennas: Analysis and Design (4)
Covers fundamentals of antennas, analysis, synthesis, and computer-aided design; applications in communications, remote sensing, and radars; radiation pattern; directivity; impedance; wire antennas; arrays; numerical methods for analysis; horn antennas; microstrip antennas; and reflector antennas. Offered: Sp. View course details in MyPlan: E E 574

E E 575 Radar Remote Sensing (4)
Introduces radar remote sensing. Covers the fundamentals of radar systems, monostatic and bistatic topologies, radar equation, range-time diagram; ambiguity function, pulse compression, elementary estimation and detection theory, spectrum estimation for underspread and overspread targets; interferometry, source imaging; and Time Difference of Arrival, Aperture Synthesis (SAR and ISAR). View course details in MyPlan: E E 575

E E 576 Computer Vision (3)
Principles and methods for interpreting the three-dimensional world from images. Topics include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: solid knowledge of linear algebra; good programming skills. Offered: jointly with CSE 576. View course details in MyPlan: E E 576

E E 577 Special Topics in Computer Vision (3)
Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/E E 576. Offered:
jointly with CSE 577.

View course details in MyPlan: E E 577

**E E 578 Convex Optimization (4)**

View course details in MyPlan: E E 578

**E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5, max. 16)**
Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge.

View course details in MyPlan: E E 579

**E E 580 Geometric Methods for Non-Linear Control Systems (3)**
Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with A A 580/M E 580; Sp, even years.

View course details in MyPlan: E E 580

**E E 581 Digital Control System Design (4) M. BERG**

View course details in MyPlan: E E 581

**E E 582 Introduction to Discrete Event Systems (3)**

View course details in MyPlan: E E 582

**E E 583 Nonlinear Control Systems (3)**

View course details in MyPlan: E E 583

**E E 585 System Identification and Adaptive Control (3)**

View course details in MyPlan: E E 585

**E E 586 Digital Video Coding Systems (4)**
Introduction to digital video coding algorithms and systems. Theoretical and practical aspects of important topics on digital video coding algorithms, motion estimation, video coding standards, systems issues, and visual communications.

View course details in MyPlan: E E 586
E E 587 Multimedia Compression and Networking (4)
Addresses four major components of multimedia: 1) data compression of multimedia (e.g., speech, audio, image, and video); 2) quality of service (QoS) issues for data transmission over IP; 3) multimedia streaming and conferencing applications; and 4) intellectual property management and protection (IPMP) of multimedia contents. Co-requisite: E E 518.
View course details in MyPlan: E E 587

E E 589 Advanced Topics in Sensors and Sensor Systems (3)
Topics of current interest in sensors and sensor systems.
View course details in MyPlan: E E 589

E E 590 Advanced Topics in Digital Computers (2-5, max. 16)
Lectures or discussions of topics of current interest in the field of digital systems. Subject matter may vary from year to year.
View course details in MyPlan: E E 590

E E 591 Robotics and Control Systems Colloquium (1, max. 30)
Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/CHEM E 591/M E 591.
View course details in MyPlan: E E 591

E E 592 Electrical Engineering Research Survey (1, max. 2)
Weekly presentations on current research activities by members of the department. Credit/no-credit only.
View course details in MyPlan: E E 592

E E 593 Feedforward Control (3)
Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with A A 593/M E 593; Sp, even years.
View course details in MyPlan: E E 593

E E 594 Robust Control (3)
Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 594/M E 594; Sp, odd years.
View course details in MyPlan: E E 594

E E 595 Advanced Topics in Communication Theory (1-5, max. 16)
Extension of E E 507, E E 508, E E 518, E E 519, E E 520. Material differs each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes.
View course details in MyPlan: E E 595

E E 596 Advanced Topics in Signal and Image Processing (2-5, max. 16)
Topics of current interest in signal and image processing. Content may vary from offering to offering.
View course details in MyPlan: E E 596

E E 597 Networked Dynamics Systems (3)
Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance
measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/M E 597.

View course details in MyPlan: E E 597

E E 598 Special topics in Electrical Engineering (1-5, max. 16)
Topics of current interest in non-traditional areas of electrical engineering. Offered: AWSpS.
View course details in MyPlan: E E 598

E E 599 Special Projects in Electrical Engineering (1-5, max. 15)
Prerequisite: permission of instructor.
View course details in MyPlan: E E 599

E E 600 Independent Study or Research (*-)
View course details in MyPlan: E E 600

E E 700 Master's Thesis (*-)
View course details in MyPlan: E E 700

E E 800 Doctoral Dissertation (*-)
View course details in MyPlan: E E 800
Human Centered Design and Engineering

**Department Overview**

423 Sieg

In the Department of Human Centered Design and Engineering (HCDE), students are designing the future by building innovative technologies and systems. Putting people first, HCDE students and faculty research, design, and engineer interactions between humans and technology. HCDE students and faculty focus on understanding human needs and interests as they design and build engineering solutions to the world’s problems.

HCDE faculty are award-winning and interdisciplinary, with graduate degrees in fields such as computer science, information studies, industrial engineering, design, education, English, linguistics, public policy, and technology and society studies.

HCDE prepares students for leadership roles in user interface design, user experience research and design, human-computer interaction, information and communication systems, computer-supported cooperative work, and related specializations, all from a human-centered perspective, internationally and globally. Whatever their professional direction, classes, directed research groups, and capstone projects, students develop portfolio quality products. HCDE graduates obtain jobs, primarily in the high-tech industry (e.g., Microsoft, Intel, Amazon, Facebook, T-Mobile, Google, Boeing), researching and designing user interfaces, websites, and other form factors to improve the user experience.

HCDE emphasizes student-centered, hands-on learning. Beyond taking traditional classroom courses, students join research groups and work side-by-side with top-ranked professors and graduate students to enhance the knowledge base of this dynamic field. The educational mission is supported by up-to-date facilities.

HCDE prepares students to assume positions of intellectual leadership in industry, government, non-profit organizations, and academia, HCDE students learn the research skills appropriate to their interests, the most effective design strategies, and the most current technologies and practices. They also learn enduring theory and principles so they can dynamically respond to the evolving field of human centered design and engineering.

Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. Human centered design and engineering prepares students to design, create, edit, and evaluate technical and scientific discourse. The department provides coursework in the development of online help systems and in the design of general-audience content for delivery by means of advanced communication technologies such as the web.

http://www.washington.edu/students/gencat/academic/hcde.html
The complexities of modern life have greatly increased the number of people who need to communicate about technical and other specialized topics. Scientific journal articles, manuals, proposals, and other genres are important for a vast array of readers. With the Information Age, gaining and sharing technological understanding and capability has become a crucial human activity. People communicate in more genres, address broader (often global) audiences, and face more complex rhetorical problems than ever before.

To achieve success in their communication activities, progressive organizations are employing sophisticated planning and development methods, including user-centered design and evaluation, content management, and systems-based analyses. In addition, they undertake research projects and apply existing research to their own needs. Contemporary research in technical communication ranges from controlled empirical research on the processing of text, graphics, and multimedia content to observational research on how meaning is created and negotiated in business environments and virtual communities.

Other major interests include the human-computer interface, hypermedia, communications technology, rhetoric of technical discourse, international communication, visual communication, publications and communications management, policy analysis of technological systems, and research and testing.

www.hcde.washington.edu

The Department of Human Centered Design and Engineering (HCDE) offers the following programs of study:

- Bachelor of Science in Human Centered Design and Engineering degree
- A minor in technical Japanese

Bachelor of Science in Human Centered Design and Engineering

Suggested First-Year College Courses: See regular admission requirements

Department Admission Requirements

Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

Direct Freshman Admission

The department enrolls up to 30% of its incoming class directly from high school, before completion of University-level prerequisites. Students accepted to the UW are automatically considered for admission to HCDE if they indicate Human Centered Design and Engineering as their preferred major on the freshman application. Competitive applicants have taken or are taking calculus and at least two years of laboratory science (physics and chemistry preferred) in high school. Admission is for autumn quarter only.
Regular Admission

1. Course requirements:
   a. Minimum 5 credits of mathematics: MATH 120 or MATH 124
   b. Minimum 3 credits of statistics: STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, STAT 390/MATH 390, IND E 315, QMETH 201, or Q SCI 381
   c. Minimum 10 credits of science: BIOL 118, BIOL 180, BIO A 201, CHEM 142, CHEM 152, PHYS 114, PHYS 115, PHYS 121, PHYS 122, or PSYCH 202
   d. Minimum 5 credits of English composition
   e. CSE 142 or CSE 160
   f. All courses must be completed before July 1 or February 1 application deadlines.

2. Application deadline: July 1 for autumn quarter; February 1 for spring quarter

3. Grade requirement: Minimum 2.00 cumulative GPA

Graduation Requirements

180 credits as follows:

General Education Requirements (88 credits)

1. Written and Oral Communication (8 credits): 5 credits English composition from the University list; HCDE 231. University-required additional 5 writing credits are built into the major core requirements

2. Visual, Literary, & Performing Arts (VLP A), and Individuals & Societies (I&S) (30 credits): Minimum 10 credits required in both areas

3. Natural World (50 credits):
   a. Mathematics (minimum 15 credits; see list of qualifying courses on HCDE website)
   b. Science (minimum 15 credits; see list of qualifying courses on HCDE website)

Major Requirements (83–87 credits)

1. HCDE Core (46 credits): HCDE 300, HCDE 301, HCDE 308, HCDE 310, HCDE 313, HCDE 318, HCDE 321, HCDE 322, HCDE 492, HCDE 493, HCDE 495 (3), HCDE 496 (2)

2. Engineering Fundamentals (minimum 12 credits): either CSE 142 or CSE 160; see department for approved list of additional courses

3. HCDE Electives (25-29 credits)
   a. Standard Option: See department for approved list of HCDE electives
   b. HCI (Human-Computer Interaction) Option: At least one course in HCI foundations, and three additional courses from at least two of the four HCI course areas – user interface, software, and technology; design; usability, and user research; and social and ethical dimensions. See department website for approved area courses. Students take additional approved HCDE elective courses to reach the overall electives requirements (25-29 credits)

Free Electives (as needed)
**Continuation Policy**

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

**Minor**

*Minor Requirements*: Technical Japanese: Minimum 25 credits to include HCDE 461, HCDE 462, HCDE 463, plus 10 credits from the approved list of elective courses. For more information, contact the departmental adviser.

**Student Outcomes and Opportunities**

- *Expected Outcomes*: HCDE BS graduates contribute to society by applying design and engineering processes to solve problems through a deep understanding of people and their contexts. In particular, they are leaders in:
  - Investigating people and systems, using quantitative and qualitative methods, to identify opportunities for new systems and strengths and weaknesses of existing systems.
  - Designing, building, and evaluating systems according to a variety of perspectives, with an emphasis on understanding the relationships between social and technical elements of systems.
  - Bringing ideas to actualization through expertise in design strategy and processes, effective communication and collaboration skills, and ethical perspectives.
  - Identifying and learning new skills, perspectives, and tools that help them and others accomplish their goals.

The Department of Human Centered Design and Engineering prepares students to assume positions in industry, government, and non-profit organizations and to apply to graduate programs.

- *Instructional and Research Facilities*: Department facilities include the HCDE Design Laboratory and Laboratory for Usability Testing and Evaluation (LUTE).

- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning*: HCDE undergraduates are required to complete at least one 3-credit internship. The supervised internship must be approved by the faculty internship adviser. As an internship substitution, students may elect to take part in a six-month co-op, sponsored by the Engineering Co-op program. Additionally, undergraduates work in research groups with HCDE faculty and graduate students.

- *Department Scholarships*: HCDE selects one recipient of a College of Engineering Scholarship annually. The criteria for this scholarship are the applicant's academic history and likelihood for success in the technical communication field.

- *Student Organizations/Associations*: Students in the HCDE degree program participate in student activities such as the HCDE Student Association, the Minority Science and Engineering Program (MSEP), and Women in Science and Engineering (WISE).
Of Special Note: The HCDE department is an inclusive, interdisciplin ary academic community. Students generally call their professors by their first name and have the opportunity to work individually on projects and research supervised by HCDE faculty. Undergraduate students are encouraged to work in research groups and to attend conferences and professional meetings.

Master of Science in Human Centered Design and Engineering

The Department of Human Centered Design and Engineering (HCDE) offers a Master of Science in Human Centered Design and Engineering (MS HCDE) — an engineering degree. An evening program is offered through UW Educational Outreach, serving full time and part time students HCDE offers a Master of Science in Human Centered Design and Engineering (MSHCDE). (An evening program is offered through UW Educational Outreach.) A total of 48 credits is required for the MSHCDE degree, which includes 25 credits of required HCDE graduate courses and 23 credits of approved electives. MSHCDE students may elect to pursue a master's thesis or project report with the approval of their Supervisory Committee.

Upon completion of the HCDE MS degree, students assume leadership roles in human-centered design and engineering in academia, industry, government, and non-profits. HCDE MS graduates are able to:

- Evaluate and understand human needs as a basis for designing and engineering new technologies.
- Master conceptual frameworks that motivate interdisciplinary research and design in HCDE.
- Select and critically evaluate user research methods for a variety of stakeholders and product contexts.
- Create visual, interactive, experience, and systems designs and prototypes.
- Translate organizational requirements into interface and product solutions, while accounting for all stakeholder perspectives and working ethically and collaboratively.
- Communicate effectively in oral, written, and visual forms, while scaling communications to audience needs and sociotechnical contexts.

Admission Requirements

In making recommendations for admission, the faculty consider the following from an applicant's record:

1. Undergraduate GPA
2. Undergraduate degree program and work experience
3. Test of English as a Foreign Language (TOEFL) score (if applicable)
4. Letters of recommendation
5. Statement of goals and career objectives. A limited number of prerequisite undergraduate courses may be required.

**Degree Requirements**

48 credits, to include:

1. Core courses (22 credits): HCDE 501, HCDE 503, HCDE 517, HCDE 518, HCDE 521 (1 credit required, max. 2), HCDE 592, HCDE 593
2. Specialized content areas (minimum 12 credits): minimum 4 credits in each of the three areas: research, design, and engineering. Research courses: HCDE 502, HCDE 516, HCDE 519; design courses: HCDE 508, HCDE 511, HCDE 520, HCDE 536; engineering courses: HCDE 530, HCDE 532, HCDE 537, HCDE 539. Students are encouraged to gain depth in any or all of the three areas by taking additional courses beyond the minimum.
3. Additional coursework to complete at least 48 HCDE credits. May include credits from electives, directed research groups, and optional internships. Students select electives based on specific academic, research, and professional goals.
4. Students may also pursue a formal transcripted option in User-Centered Design (UCD).

**Certificate in User-Centered Design (UCD)**

An evening, graduate-level, one-year, four-course program for students who wish to explore a wide range of UCD issues. Involves sophisticated methods for planning and developing intuitive, user-friendly product designs. Students study the latest user research and design theories and practices for placing user needs at the forefront of each stage of the design process.

Focuses on usability studies, user-centered design theory and practice, visual communication and information visualization, and web design.

12 of the 13 credits earned for the UCD certificate may later count toward the MS in Human Centered Design and Engineering if students apply for Graduate Non-Matriculated Status prior to taking coursework.

**Certificate Requirements**

1. HCDE 517 (autumn)
2. HCDE 518 (winter)
3. HCDE 521 (winter only)
4. One of the following electives: HCDE 508, HCDE 511, HCDE 536, HCDE 537 (optional prerequisite for HCDE 537 is HCDE 532)

**Inter-Engineering Master's in Technical Japanese**

The inter-engineering master's in technical Japanese is a two-year degree program that combines the study of engineering and technical Japanese. Students take classes in an
engineering specialty and in advanced Japanese. After their first year, they spend summer quarter and optionally the following autumn quarter in Japan doing a required internship in a Japanese company or research lab. Students graduate with an inter-engineering MSE or MS degree.

**Admission Requirements**

Program no longer accepts applications: 2014 - 2015 is its last year.

**Degree Requirements**

Minimum 54 credits, to include:

1. *Engineering Fields:* Students must select an engineering field (usually the same as the undergraduate area of concentration) from among the following:
   a. Aeronautics and Astronautics
   b. Bioengineering
   c. Chemical Engineering
   d. Civil and Environmental Engineering
   e. Computer Science and Engineering
   f. Electrical Engineering
   g. Mechanical Engineering

2. *Credit Requirements:*
   a. *Distribution:* 24 credits in one engineering specialty, 27 credits of coursework in technical Japanese, and 3 credits of summer internship in Japan. Note: 3 credits of internship may be substituted for 3 credits of coursework.
   b. Technical Japanese coursework:
      i. Oral communication in technical and business settings: HCDE 471, HCDE 472, HCDE 473
      ii. Reading techniques in technical Japanese: HCDE 461, HCDE 462, HCDE 463
      iii. Advanced Japanese for technical and business professionals: HCDE 561, HCDE 562, HCDE 563

**Doctor of Philosophy**

The Department of Human Centered Design and Engineering (HCDE) offers a PhD in Human Centered Design and Engineering (PhD HCDE)—an engineering degree. The program provides unparalleled depth and experience for students interested in studying the conception, design, implementation, use, evaluation, and effects of technologies.

HCDE is an interdisciplinary engineering department at the University of Washington in Seattle, an internationally ranked, R1 research institution. HCDE's interdisciplinary faculty have graduate degrees from fields such as computer science, industrial engineering, information studies, design, education, English, linguistics, public policy, and technology and society studies. The faculty's research and teaching focus on six areas of study: influencing awareness, thinking, and behavior; design for emergent collaborations and organizations; low resource and underserved populations; material and embodied
technologies, and ubiquitous computing; data visualization and big data; and learning in professional and technical environments.

The HCDE doctoral program prepares students for careers as scholars and researchers through relevant coursework, mentorship from faculty, and collaboration with peers. Early in the program, students may explore different topics and research areas through directed research groups and other independent projects.

Goals of the HCDE PhD program are as follows:

- To prepare graduates for a career as researchers, teachers, and intellectual leaders in the discipline of HCDE
- To enable graduates to develop theoretical frameworks, apply investigative methods, and translate theory and research findings into technical or strategic innovations in the field of HCDE
- To foster the development and dissemination of new knowledge in HCDE
- To foster the development of an international, multi-cultural perspective and a diverse, inclusive student body and workforce in HCDE

**Admission Requirements**

Completion of either an undergraduate degree or a master's degree in HCDE or a relevant field (up to 30 credits of master's work may be applied toward the 105-credit requirement). Applicants often come from a wide range of backgrounds.

Applicants must submit the following:

1. UW HCDE PhD admission forms
2. Official transcripts of all academic study
3. Evidence of a minimum 3.00 GPA
4. Three letters of recommendation
5. A curriculum vitae
6. A personal statement of objectives and research area of interest.

International students must also submit a TOEFL iBT test score of at least 106 (including a speaking sub-score of 26), obtained within the last two years.

**Degree Requirements**

105 credits, to include:

1. 34 core credits (HCDE 541, HCDE 542, HCDE 543, HCDE 544, HCDE 545, HCDE 546, HCDE 547, HCDE 548); 12 credits of directed research (HCDE 596); HCDE 521, HCDE 523; 30 credits of approved electives to include HCDE 518 and one additional graded, graduate-level course in each of four thematic areas; minimum 27 dissertation credits
2. Preliminary examination
3. Select committee chair within two quarters of passing preliminary examination
4. Successfully complete all course distribution and credit-hour requirements
5. Successfully complete the requirements for directed research.

6. Pass a general examination to attain formal candidacy for the PhD program (candidate's certificate).

7. Successfully defend a dissertation proposal before a supervisory committee.

8. Successfully defend the dissertation itself before a reading committee (final examination).

Students are encouraged but not required to teach.

Early in the program, students often explore different topics and research areas through directed research groups and other independent projects. No later than the end of the quarter following passing the preliminary exam (usually the end of the fourth quarter in the program), students choose a dissertation adviser and begin to focus on a research area for the dissertation. Students are often supported by a research assistantship by that adviser.

Students who enter the PhD program with a previous graduate degree relevant to HCDE can petition to have up to 30 credits transferred toward this program. Check with the doctoral adviser for details.

**Research Facilities**

The Department of Human Design and Engineering has well-equipped laboratories that effectively support its courses and research projects. Also, HCDE graduate students can utilize significant College of Engineering and University-level research facilities.

**Financial Aid**

A limited number of teaching and research assistantships and scholarships are available for the financial support of graduate students in HCDE. More information and application forms can be obtained by contacting the department.

COLLEGE OF ENGINEERING
HUMAN CENTERED DESIGN AND ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

HCDE 100 Introduction to Human Centered Design and Engineering (5)
Topics may include: virtual communities, human-computer interaction, web design, usability testing, visual design, and others. Explores course content through individual and group hands-on projects. Offered: A.
View course details in MyPlan: HCDE 100

HCDE 210 Explorations in Human Centered Design (3) I&S
Explores the core principles, methodologies, and applications of human centered design practice. Areas of investigation include user research, ideation, interaction design, visualization, prototyping, and usability. Offered: AWSp.
View course details in MyPlan: HCDE 210

HCDE 231 Introduction to Communication in HCDE (3)
Examines fundamentals of researching, writing, and presenting technical information for diverse audiences and purposes. Students learn to conduct secondary research; design and present information written and orally; revise for content, organization and style; and work individually and collaboratively in teams. Assignments are framed around ethical and sustainable human-centered design practices. Prerequisite: either C LIT 240, both ENGL 109 and ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: AWSp.
View course details in MyPlan: HCDE 231

HCDE 300 Foundations of Human Centered Design and Engineering (5)
Examines principles and practices of human centered design and engineering. Includes overview of conceptual problems in human centered design and engineering, issues related to communicating scientific and technical information to a variety of audiences, and human centered design approaches. Includes attention to social contexts and environments (legal, ethical, cultural).
View course details in MyPlan: HCDE 300

HCDE 301 Advanced Communication in HCDE (5)
Reviews writing as an iterative process. Students learn to analyze purpose, use, and audience; write and design communications that meet the needs of stakeholders with differing priorities and cultures; work with different
genres; understand the impact of writing style and the ethical implications of communication decisions in human-centered design. Prerequisite: HCDE 231 or ENGR 231.

View course details in MyPlan: HCDE 301

**HCDE 303 Project Management and Computer Supported Collaboration and Work (5)**
Addresses how to understand and manage communication practices and projects in scientific and technical organizations. Topics include: system design, project design, supporting workflow, communication practices, information structures, and planning. Focuses on CMC and CSC principles and practices.

View course details in MyPlan: HCDE 303

**HCDE 308 Visual Communication in Human Centered Design and Engineering (5) VLP A**
Introduces principles of visual communication and design used in human centered design and engineering so that students gain a systematic understanding as they create visual communication components of print, interactive, and video media. Students develop this understanding through hands-on exercises, design critiques, discussions, lectures, and readings in a studio environment.

View course details in MyPlan: HCDE 308

**HCDE 310 Interactive Systems Design and Technology (5)**
Provides opportunities to identify and build interactive systems to solve problems in human centered design and engineering. Students specify, design, build, and justify design solutions in terms of user experience and technical design choices. Prerequisite: CSE 142 or CSE 160. Offered: A.

View course details in MyPlan: HCDE 310

**HCDE 313 Introduction to User Research (5)**
Introduces user research methods, such as interviews, surveys, usability tests, content analysis, and focus groups. Reviews selecting an appropriate research method, how to conduct research and analyze results, conveying research data in the form of design requirements, and ethics.

View course details in MyPlan: HCDE 313

**HCDE 318 Introduction to User-Centered Design (5)**
Explores the user-centered design paradigm from a broad perspective, with an emphasis on the importance of developing and applying design processes and strategies. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design.

View course details in MyPlan: HCDE 318

**HCDE 321 Portfolio (2)**
Covers recent trends in design and communication portfolios, as well as foundational considerations for portfolio development. Credit/no-credit only.

View course details in MyPlan: HCDE 321

**HCDE 322 Organizational Teamwork (2)**
Introduces students to teamwork and leadership competencies of particular significance to interdisciplinary, design-oriented, creative, and distributed work of human-centered design and engineering. Particular emphasis on competencies related to interpersonal interactions, group dynamics, and civic responsibility. Credit/no-credit only.

View course details in MyPlan: HCDE 322

**HCDE 333 Advanced Technical Writing and Oral Presentation (4)**
Emphasizes the principles of written and oral communication for the engineering workplace. Designs solutions to professional communication problems: technical reports, proposals, correspondence, resumes, and oral presentations. Focuses on needs assessment and designing solutions that call for effective selection and integration of verbal and visual components. For engineering majors. Prerequisite: HCDE 231. Offered: AWSpS.

View course details in MyPlan: HCDE 333
HCDE 407 Software User Assistance (5)
Concepts, skills, and industry practices for designing the full spectrum of information resources that users need to master complex interfaces. Includes interface text, embedded and standard help, manuals, wizards, tutorials, SDK documentations and troubleshooting (Knowledge Base) content, and the role of social media and user-generated content. Prerequisite: HCDE 310. Offered: Sp.
View course details in MyPlan: HCDE 407

HCDE 408 Public Documents: Proposals, EISs, Assessments (3)
Analyzing special documents of public character: proposals, EISs, questionnaires, technology assessments. Understanding socio-political milieu in which they are planned, organized, written; the specialized audiences (e.g., agencies with their missions, guidelines, constituencies; citizen groups; commercial interests) they serve. Documents, the decision-making process. Offered: Sp, odd years.
View course details in MyPlan: HCDE 408

HCDE 411 Information Visualization (5) VLPA/I&S
Introduces the design and presentation of digital information. Covers the use of graphics, animation, sound, and other modalities in presenting information to the user; understanding vision and perception; methods of presenting complex information to enhance comprehension and analysis; and the incorporation of visualization techniques into human-computer interfaces. Prerequisite: HCDE 308 and HCDE 310.
View course details in MyPlan: HCDE 411

HCDE 417 Usability Research Techniques (5)
Introduces usability research methods used in the product-development process; contextual inquiry, surveys and interviews, focus groups, user profiling, usability testing, cognitive walkthroughs, heuristics, and others. Prerequisite: HCDE 313.
View course details in MyPlan: HCDE 417

HCDE 418 User Experience Design (5)
Provides a project-based introduction to the user interface design process and is oriented toward practical methods for approaching a design problem. Focuses on developing conceptual designs based on user need. Prerequisite: HCDE 318.
View course details in MyPlan: HCDE 418

HCDE 419 Concepts in Human-Computer Interaction (5) I&S
Studies the social, cognitive, behavioral, and contextual aspects of information systems and informational dimensions of the human-computer interface, and other user-centered design concepts. Surveys research literature of human information behavior, as well as ethical standards. Prerequisite: HCDE 300.
View course details in MyPlan: HCDE 419

HCDE 421 Current Practices in Technical Communication (3)
Covers principles and practices of writing to communicate scientific and technical information to a variety of readers. Teaches how to write for the expert, general scientific and technical reader, manager, and general public.
View course details in MyPlan: HCDE 421

HCDE 422 Style in Technical Communication (3)
Covers principles and practices of writing publication-ready American English writing for global audiences. Teaches how to write for the expert, general scientific and technical reader, manager, and general public.
View course details in MyPlan: HCDE 422

HCDE 423 Introduction to Technical Editing (3)
Covers editorial practices and responsibilities in communication of scientific and technical information. Includes the editor's role as an editor of documents, a collaborator in document development, and a manager of publication projects and groups.
View course details in MyPlan: HCDE 423
HCDE 424 The Computer in Technical Communication (4)
Introduces popular tools used by TC professionals. Students examine the tools' functionality, the types of design activities supported, and techniques for designing effective solutions. Project-driven course project teaches students how to transform unformatted content, using these tools, into a polished set of documents in multiple formats.
View course details in MyPlan: HCDE 424

HCDE 426 Software User Assistance (3)
Covers how to write effective documentations for a variety of software users, from end-users to developers. Students produce a complete documentation set for a software product or service using the most appropriate delivery mechanisms for the content and the audience. Prerequisite: HCDE 310.
View course details in MyPlan: HCDE 426

HCDE 427 Production Editing (4)
Covers the editorial role in the preparation of text and visual materials, both print and online, for production. Teaches the editor's responsibilities and prerogatives as they relate to those of other professionals in the production phase of the publication's field.
View course details in MyPlan: HCDE 427

HCDE 435 Introduction to Content Management (3)
Principles and practices of building, managing, and using content management systems in the workplace. Examines both the intricacies of collaborative workflow technologies and the organizational contexts that surround them.
View course details in MyPlan: HCDE 435

HCDE 437 Web Design and Web Publishing (5) VLP A/I&S
Design principles and skills including navigation, functional design, visual design, and content development. Includes the ongoing process of Web publishing. Addresses societal issues pertaining to the web and Internet. Students build a website and plan for ongoing web publishing. Prerequisite: HCDE 318. Offered: W.
View course details in MyPlan: HCDE 437

HCDE 438 Web Technologies (5)
Markup languages and styles, JavaScript, Flash, Photoshop, and the fundamentals of digital sound and video. Includes an introduction to server-side technologies. Students expand their existing design skills to encompass the use of these web technologies. Prerequisite: HCDE 310. Offered: Sp.
View course details in MyPlan: HCDE 438

HCDE 439 Physical Computing (5)
Introduction to engineering and prototyping interactive systems and environments for human-centered applications that employ basic digital electronics components and circuits. Students build systems using micro-controllers and software tools. Provides hands-on experience in a project-based, studio environment. Prerequisite: HCDE 310 or permission of instructor.
View course details in MyPlan: HCDE 439

HCDE 451 User Experience Prototyping Techniques (5)
Introduces students to a variety of prototyping techniques for different kinds of user experience design problems. Structured as a series of independent explorations, each on a different prototyping methodology, aimed at many platforms. Prerequisite: HCDE 318.
View course details in MyPlan: HCDE 451

HCDE 455 User Interface Design (4) Furness
Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with IND E 455; A.
View course details in MyPlan: HCDE 455
HCDE 461 Japanese for Technical and Business Professions I (5) VLPA Kato
Strengthens knowledge of grammar and vocabulary and applies this to basic technical business communication situations. Covers cultural concepts underlying these situations. Reviews authentic materials on technology-related topics. Teaches skills to analyze sentence structure for accurate interpretation. Laboratory work required. Placement test before admission. Offered: A.
View course details in MyPlan: HCDE 461

HCDE 462 Japanese for Technical and Business Professions II (5) VLPA
Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Reviews skills (such as prediction) for more effective reading and improves skills for analyzing complex sentence structure. Additional grammar, vocabulary, and kanji are introduced. Laboratory work required. Prerequisite: HCDE 461. Instructors: Kato Offered: W.
View course details in MyPlan: HCDE 462

HCDE 463 Japanese for Technical and Business Professions III (5) VLPA
Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Further improves skills introduced in previous courses and reviews skills for understanding inter-sentence structure. Additional grammar, vocabulary, and kanji introduced. Laboratory work required. Prerequisite: HCDE 462. Instructors: Kato Offered: Sp.
View course details in MyPlan: HCDE 463

HCDE 492 Capstone Planning (2)
Helps students define capstone topics, form project teams, and develop initial concepts, deliverables, and schedules for the HCDE capstone project. Prerequisite: HCDE 300; HCDE 301; HCDE 308; HCDE 310; HCDE 313; and HCDE 318. Credit/no-credit only.
View course details in MyPlan: HCDE 492

HCDE 493 Senior Capstone (5)
Capstone design experience. Integrates knowledge and skills acquired during major program into one paper or project. Prerequisite: HCDE 492.
View course details in MyPlan: HCDE 493

HCDE 495 Professional Practice (3-10, max. 10)
Supervised internship in a publications organization approved by the faculty adviser. A minimum of one internship is required of students majoring in human centered design and engineering. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: HCDE 495

HCDE 496 Directed Research in Human Centered Design and Engineering (1-5, max. 10)
Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: HCDE 496

HCDE 497 Study Abroad: Human Centered Design and Engineering (3-5, max. 15)
Upper-division human centered design and engineering courses, for which there are no direct University of Washington equivalents, taken through the Department of Human Centered Design and Engineering's study abroad program. Credit/no-credit only. Offered: S.
View course details in MyPlan: HCDE 497

HCDE 498 Special Topics (1-5, max. 15)
Special topics in human centered design and engineering to be offered occasionally by permanent or visiting faculty members.
View course details in MyPlan: HCDE 498
HCDE 499 Special Projects (1-5, max. 10)  
Individual undergraduate projects in human centered design and engineering. Offered: AWSpS.  
View course details in MyPlan: HCDE 499

HCDE 501 Theoretical Foundations of Human Centered Design and Engineering (4)  
Examination of the theories that inform work in human centered design and engineering, focusing particularly on communication and interaction design theories. Topics include the complexities of communication as it is configured in different theoretical frameworks, the implications of these different configurations, and why these differences matter to people engaged in professional practice or research. Prerequisite: admission to an engineering master's program or permission of instructor. Offered: A.  
View course details in MyPlan: HCDE 501

HCDE 502 Empirical Traditions in Human Centered Design and Engineering (4)  
Introduction to empirical traditions that inform research and practice in field of human centered design and engineering. Topics include epistemological assumptions underlying empirical research, empirical methods, and survey of results of empirical research on effects of text and visual media on comprehension, recall, and performance. Prerequisite: graduate standing or permission of instructor. Offered: Sp.  
View course details in MyPlan: HCDE 502

HCDE 503 Navigating Design in Organizations (4)  
Examines how to manage the incubation and development of an idea, communicate it effectively to stakeholders, and deliver a quality product. Students learn to manage a design project from start to finish, collaborating across disciplines, working with partners and end-users, and communicating strategies for project management in organizations.  
View course details in MyPlan: HCDE 503

HCDE 505 Computer-Assisted Communication (4)  
Explores computer-assisted communication from three perspectives: (1) cultural roles of communication technologies; (2) relationships between communication and information including information technologies in the workplace, academe, and other settings; and (3) application to design including models for audience analysis, task analysis, and cognitive systems engineering. Prerequisite: graduate standing or permission of instructor. Offered: Sp.  
View course details in MyPlan: HCDE 505

HCDE 508 Visual Communication (4)  
Reviews principles of visual communication and design used in HCDE so that students gain a systematic and critical understanding so they can create visual communication components of print and interactive media. Students develop this understanding through hands-on exercises, design critiques, discussions, lectures, and readings in a studio environment.  
View course details in MyPlan: HCDE 508

HCDE 509 Writing the Scientific Article (3)  
Examination of principles and practice of writing research manuscripts, articles, abstracts, and oral presentations. Detailed examination of scientific publication process includes issues of style, organization, and ethics. Students draft, critique, and revise their own manuscripts and learn to review the manuscripts of others. Offered: Sp.  
View course details in MyPlan: HCDE 509

HCDE 510 Information Design (4)  
Examination of the design principles and procedures underlying the creation of both print and electronic information presentations. Topics include: print vs. electronic media, designing for the page and screen, information topologies, and hypermedia. Seminar includes a design project. Prerequisite: HCDE 501 or permission of instructor. Offered: A.  
View course details in MyPlan: HCDE 510
HCDE 511 Information Visualization (4)
Covers the design and presentation of digital information. Uses graphics, animation, sound, and other modalities in presenting information to users. Studies understanding vision and perception. Includes methods of presenting complex information to enhance comprehension and analysis; and incorporation of visualization techniques into human-computer interfaces.
View course details in MyPlan: HCDE 511

HCDE 512 International User Experience and Communication (4)
Covers theory, research, and approaches for creating digital media for international audiences. Topics include cultural schemata and contrastive rhetoric, content, and text types and corresponding translation and localization strategies, market relevance and adaptation, international user research and usability, international polices and geopolitics, and cross-cultural business management and teamwork. Offered: Sp.
View course details in MyPlan: HCDE 512

HCDE 513 Globalization and Localization Management (4) Spyridakis
Examines globalization and localization business processes. Topics include localization challenges for various business sectors and audiences as well as selecting localization software, services, and content; project types; and associated start-to-finish processes. Offered: S.
View course details in MyPlan: HCDE 513

HCDE 514 Strategies for International Product Management (4)
Examines best practices in establishing localization work in technology companies. Covers facets important to research, planning, and decision-making processes, including use of internal company data, and economic, marketing, and technology factors. Uses real-life scenarios to demonstrate how companies have instituted localization processes given user-centered practices. Prerequisite: HCDE 512; HDCE 513; or permission of instructor. Instructors: Spyridakis
View course details in MyPlan: HCDE 514

HCDE 516 Experimental Research Methods (4)
Introduction to experimental research methods in human centered design and engineering. Examines the relationship between theory and research, hypothesis testing, experimental designs, modes of observation, sampling, validity, and data analysis and interpretation. Prerequisite: introductory statistics course. Offered: Sp.
View course details in MyPlan: HCDE 516

HCDE 517 Usability Studies (4)
Discusses the human-computer interface (HCI) as the communicative aspect of a computer system. Analyzes usability issues in HCI design, explores design-phase methods of predictability, and introduces evaluative methods of usability testing. Prerequisite: substantial experience with computers and graduate standing, or permission of instructor. Offered: A.
View course details in MyPlan: HCDE 517

HCDE 518 User-Centered Design (4)
Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with IND E 545; W.
View course details in MyPlan: HCDE 518

HCDE 519 Qualitative Research Methods (4)
Provides hands-on experience with qualitative research methods, such as interviewing and participant observation, as used in human-centered design and engineering. Students learn to develop appropriate research questions, collect observational data, develop interview protocols, conduct interviews, analyze data, and communicate findings.
View course details in MyPlan: HCDE 519
HCDE 520 Design and Management of Complex Systems (4)
Focuses on how to design and implement improvements to complex work systems. Emphasis on Agile development, including sprints using scrum teams to achieve rapid iteration design with system users, developers and owners. Investigates decision support systems, including sense making and adaptation in ambiguous situations.
View course details in MyPlan: HCDE 520

HCDE 521 Seminar: Current Issues in Human Centered Design and Engineering (1-2, max. 3)
Presentations on current issues in human centered design and engineering. Prerequisite: HCDE graduate student status or permission of instructor. Credit/no-credit only. Offered: AW.
View course details in MyPlan: HCDE 521

HCDE 523 Design Use Build (DUB) Seminar (1, max. 3)
Exploration of advanced issues in human centered design and engineering research and practice. Students are encouraged to join the dub mailing list for calendar of events. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: HCDE 523

HCDE 530 Computational Concepts in HCDE (4)
Introduces basic computational concepts and programming skills needed to work with interactive systems in HCDE. Draws on topics such as log analysis, visualization, prototyping, and data mining. Students analyze data to inform user research and design.
View course details in MyPlan: HCDE 530

HCDE 532 Web Design Studio (2)
Provides an overview of basic principles and practices of professional web site design and programming. Students gain hands-on experience with designing and building a successful website using industry standard techniques. For students planning to take HCDE 535 or HCDE 537 without previous programming experience.
View course details in MyPlan: HCDE 532

HCDE 534 Designing a Human Centered Venture (4)
Explores the planning of a new venture related to human-centered design. Examines relevant topics, such as team formation, user and market research, value creation, and the iterative demand planning for a new venture.
View course details in MyPlan: HCDE 534

HCDE 536 Interaction Design and Prototyping (4)
Investigates advanced topics in the theory and practice of interaction design, using a project-oriented approach. Develops expertise in design, development, and critique of solutions in online and mobile platforms. Examines issues such as interaction theory, requirements and specifications, design language, prototyping, and presentation of projects. Prerequisite: HCDE 518.
View course details in MyPlan: HCDE 536

HCDE 537 User-Centered Web Design (4)
Theory and practice of the user-centered web development process. Principles and processes for documenting and implementing various development stages, including requirements analysis, user needs analysis, information architecture, prototyping, mock-ups, and production. Prerequisite: HCDE 518.
View course details in MyPlan: HCDE 537

HCDE 539 Physical Computing and Prototyping (4)
Reviews fundamentals of designing and prototyping human-centered interactive systems and environments that include software and hardware components. Students build projects using electronic devices and fabrication tools. Provides hands on experience in a project-based, studio environment.
View course details in MyPlan: HCDE 539

HCDE 541 Grant Writing for Career Development (4)
Introduces the steps on compiling a grant proposal, with an emphasis on increasing research fluency. Provides
hands-on experience with communicating research topics, particularly for the purpose of applying for grant support.

View course details in MyPlan: HCDE 541

**HCDE 542 Theoretical Foundations in Human Centered Design and Engineering (4)**
Examines theories that inform work in human centered design and engineering, focusing particularly on theories of communication and interaction design. Topics include complexities of interaction as it is configured in different theoretical frameworks, implications of these different configurations, and why these differences matter to people engaged in professional practice/research.

View course details in MyPlan: HCDE 542

**HCDE 543 Empirical Traditions in Human Centered Design and Engineering (4)**
Introduces empirical traditions that inform research and practice in the field of human centered design and engineering. Topics include epistemological assumptions underlying research approaches and a survey of empirical methods.

View course details in MyPlan: HCDE 543

**HCDE 544 Research Methods I (4)**
Introduces experimental, quasi-experimental, and related research methods in human centered design and engineering. Examines the relationship between theory and research, hypothesis testing, experimental designs, modes of observation, sampling, validity, and data analysis and interpretation. Students undertake an intensive research project. Prerequisite: Introductory statistics course.

View course details in MyPlan: HCDE 544

**HCDE 545 Research Methods II (4)**
Provides hands-on experience with qualitative research methods with particular emphasis on how ethnographic fieldwork methods (e.g., interviewing and participant observation) are used in human centered design and engineering. Students undertake an intensive research project at a field site, collecting and analyzing data.

View course details in MyPlan: HCDE 545

**HCDE 546 Design Thinking (4)**
Examines how design is enacted within disciplines, exploring commonalities and differences in design practices. Surveys empirical studies of design practices and approaches.

View course details in MyPlan: HCDE 546

**HCDE 547 Academic Development Seminar (1, max. 10)**
Addresses academic research and professional competencies necessary for doctoral students. Credit/no-credit only.

View course details in MyPlan: HCDE 547

**HCDE 548 Advanced Topics in Human Centered Design and Engineering (4, max. 20)**
In-depth examination of a specialized topic in an emerging area of human centered design and engineering.

View course details in MyPlan: HCDE 548

**HCDE 592 Capstone Planning (1)**
Helps students define capstone topics, form project teams, and develop initial concepts, deliverables, and schedules for the HCDE capstone project.

View course details in MyPlan: HCDE 592

**HCDE 593 Capstone (4)**
Capstone design experience. Integration of knowledge and skills acquired during program into one project. Prerequisite: HCDE 518; HCDE 592.

View course details in MyPlan: HCDE 593
HCDE 596 Directed Research in Human Centered Design and Engineering (1-5, max. 18)
Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: HCDE 596

HCDE 597 Approaches to Teaching Technical Communication (1-2, max. 2)
Examines theory and practice of teaching engineering undergraduate students written and oral technical communication competencies, strategies for developing teaching skills and philosophies. Teaching seminar for instructors of HCDE 231 and HCDE 333. Prerequisite: concurrent teaching appointment or permission of instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: HCDE 597

HCDE 599 Special Projects (1-5, max. 5)
Written report required. Prerequisite: permission of graduate adviser or committee chair. Offered: AWSpS.
View course details in MyPlan: HCDE 599

HCDE 600 Independent Study or Research (*-)
View course details in MyPlan: HCDE 600

HCDE 601 Internship (2-10, max. 10)
Written report required. Prerequisite: permission of committee chair. Offered: AWSpS.
View course details in MyPlan: HCDE 601

HCDE 700 Master's Thesis (*-)
Prerequisite: permission of thesis adviser. Offered: AWSpS.
View course details in MyPlan: HCDE 700

HCDE 800 Doctoral Dissertation ([1-10]-)
Prerequisite: permission of thesis adviser. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: HCDE 800
Industrial and Systems Engineering

Department Overview

G-7 Mechanical Engineering Building

Industrial and systems engineering (ISE) prepares students for careers in an increasingly diverse, dynamic, and technological world. Industrial engineers focus on the integration of humans, machines, materials, and information to achieve optimum performance of operating systems. This focus on the "big picture" makes industrial and systems engineering one of the most people-oriented and customer-focused of the engineering disciplines.

Industrial and systems engineering involves the study of engineering design, system integration, optimization, quality and reliability, supply chain management, virtual reality, and manufacturing.

Being an industrial engineer is about choices. Industrial engineers have the opportunity to work in many different kinds of businesses and nonprofit organizations. The most distinctive aspect of industrial engineering is the flexibility it offers. Many industrial engineers eventually move into supervisory or management positions where they continue to draw on their technical background. Demand for industrial engineers has grown dramatically over the past two decades.

Undergraduate Program

Adviser
G7 Mechanical Engineering, Box 352650
(206) 543-5041
ieadvise@uw.edu

Industrial and Systems Engineering offers the following program of study:

- The Bachelor of Science in Industrial Engineering degree (BSIE)

Bachelor of Science in Industrial Engineering

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; English composition; courses to fulfill VLPA and I&S requirements.

**Department Admission Requirements**
Applicants are considered in three groups -- Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive, and completion of the minimum requirements does not necessarily guarantee admission. Applicants not admitted under one admission group may subsequently apply to another admission group after completing more coursework. All applicants have the right to petition and appeal the department's admission decision.

**Freshman Admission**

The UW Industrial and Systems Engineering program enrolls up to 10 percent of its incoming class directly out of high school, prior to completion of university-level prerequisites. Freshman applicants to the UW who have listed industrial and systems engineering as their intended major are automatically considered. Competitive applicants have taken or are taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

**Early Admission**

1. **Course requirements:** MATH 124, MATH 125, MATH 126; 10 credits of physical-science courses plus accompanying laboratory, at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. Admission is for autumn quarter only.

2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.

3. **Grade requirements:** Minimum 2.0 grade in each prerequisite course and a minimum 2.50 overall GPA.

**Upper-Division Admission**

1. **Course requirements:** MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; and at least 5 credits of English composition.

2. 45 credits completed by application deadline. Applications are accepted for autumn quarter admission only. Application deadline is July 1.

**Graduation Requirements**

180 credits as follows:

**General Education Requirements (91 credits)**

1. **Written and Oral Communications (12 credits):** 5-credits English composition from the University-approved list; HCDE 231; HCDE 333 (or department-approved alternative).

2. **Visual, Literary, & Performing Arts (VLP A) and Individuals & Societies (I&S) (30 credits):** Minimum 10 credits in each area

3. **Natural World (49 credits)**
   a. **Mathematics (24 credits):** MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; IND E 315
b. **Science (25 credits):** CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

**Major Requirements (89 credits)**

1. **Engineering Fundamentals (28 credits):** CSE 142, MSE 170, A A 210, E E 215, CEE 220, M E 230, IND E 250

2. **Industrial Engineering Core (24 credits):** IND E 316, IND E 337, IND E 410, IND E 411, IND E 494, IND E 495

3. **Technical Electives (37 credits):** At least one class from approved courses in each of the following areas: operations research, statistics, production/operations, design, and general engineering. See adviser for list of approved technical electives.

4. **Grade Requirements:** Minimum 2.00 cumulative GPA in all engineering courses with no grade below 1.0 in these courses.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Industrial and systems engineering graduates are proficient in mathematics, sciences, engineering fundamentals, and the use of computers; use a broad knowledge of industrial engineering methods and tools associated with operations research, quality engineering, and human factors; apply engineering design methods and tools to represent, integrate, and solve problems, including the ability to recognize problem context and integrate knowledge and skills from allied disciplines; communicate effectively; and possess the professional characteristics of leadership, ethics, and the ability to motivate and work with others.

  IE prepares students to serve as the efficiency experts of organizational change. Students are encouraged to take a systems view when solving problems, recognize the organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative. Industrial engineers draw upon specialized knowledge and skills in math, the physical sciences, and social sciences together with the principles and methods of engineering analysis and design.

- **Instructional and Research Facilities:** Industrial and systems engineering provides designated computing facilities for undergraduate students. Research facilities include the Human Interface Technology Laboratory, the Production Systems Laboratory, the Manufacturing Laboratory, and the Center for Engineering Learning and Teaching.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** Students have the opportunity to pursue cooperative and internship programs at the College level through the College's Engineering Co-op Program ([www.engr.washington.edu/coop/](http://www.engr.washington.edu/coop/)).

- **Department Scholarships:** ISE offers scholarships to outstanding undergraduate students. All applicants to the BSIE program are considered for these scholarships. Awards are made based on both merit and financial need.

- **Student Organizations/Associations:** Students are actively involved in the UW student chapter of the Institute of Industrial Engineers (IIE); the ISE National Honor
The Department of Industrial and Systems Engineering offers graduate programs leading to the Master of Science in Industrial Engineering (M.S.I.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in manufacturing, operations research, large-scale assembly, experimental statistics, production planning, quality control, reliability engineering, computer-integrated manufacturing, simulation, supply chain, human factors, virtual reality, and human interface technology.

Master of Science in Industrial and Systems Engineering

Admission Requirements

For consideration, applicants are expected to have a bachelor's degree in engineering, mathematics, or science, with a minimum 3.00 GPA.

Degree Requirements

41 credits, as follows:

1. Coursework Only Program:
   a. 21 graded credits in industrial engineering (500 level or above) courses
   b. 17 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
   c. 3 credits of industrial engineering seminar: IND E 591, IND E 592, IND E 593

2. Thesis Program:
   a. 18 graded credits in industrial engineering (500 level or above) courses
   b. 11 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
   c. 9 credits of master's thesis (IND E 700)
   d. 3 credits of industrial engineering seminar: IND E 591, IND E 592, IND E 593

Doctor of Philosophy

Admission Requirements

For consideration to the Ph.D. in Industrial Engineering degree, applicants should have, or be close to completing, their master's degree in any discipline of engineering when applying, with a minimum 3.00 GPA.

Degree Requirements
90 credits, as follows:

1. 3 credits of industrial engineering graduate seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)

2. 60 credits of coursework, with at least 18 credit hours of 500-level courses. A master's degree from the UW or another institution may be used as a substitute for 30 of these 60 credits.

3. General examination

4. Dissertation: 27 credits of dissertation (IND E 800) over a period of at least three quarters.

5. Final examination
COLLEGE OF ENGINEERING
INDUSTRIAL AND SYSTEMS ENGINEERING
INDUSTRIAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**IND E 101 Introduction to Industrial Engineering (1) I&S**
Examines the basic concepts and methods of industrial engineering through team-based hands-on activities. Explores the profession of industrial engineering. Discusses resources available to industrial engineering students at the University of Washington. Offered: A. 
View course details in MyPlan: IND E 101

**IND E 250 Fundamentals of Engineering Economy (4) NW W. CHAOVALITWONGSE, C. LIU**
View course details in MyPlan: IND E 250

**IND E 315 Probability and Statistics for Engineers (3) NW L. BOYLE, P. JOHNSON, C. MASTRANGELO**
Application of probability theory and statistics to engineering problems, distribution theory and discussion of particular distributions of interest in engineering, statistical estimation and data analysis. Illustrative statistical applications may include quality control, linear regression, and analysis of engineering data sets. Prerequisite: either MATH 136, MATH 307, or AMATH 351. Offered: AWSpS. 
View course details in MyPlan: IND E 315

**IND E 316 Design of Experiments and Regression Analysis (4) NW L. BOYLE**
Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with STAT 316; W. 
View course details in MyPlan: IND E 316

**IND E 321 Statistical Quality Control (4)**
Design of quality control and assurance systems. Statistical Process Control (SPC) design and implementation. Control charts for attributes and variables. Process capability analysis and process improvement techniques.
Statistical tolerance design. Quality management and recent developments. Prerequisite: IND E 315 Offered: W.

View course details in MyPlan: IND E 321

IND E 337 Introduction to Manufacturing Systems (4) J. HEIM
Description of manufacturing systems. Includes discussion of current trends in manufacturing. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification.

View course details in MyPlan: IND E 337

IND E 351 Human Factors in Design (4) Boyle
Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Offered: Sp.

View course details in MyPlan: IND E 351

IND E 410 Linear and Network Programming (4)
Modeling and optimization of linear network problems. Topics include: optimization of linear systems, mathematical model design, simplex method, primal-dual algorithms, parametric programming, goal programming, network problems and algorithms, and PERT/CPM. Prerequisite: either MATH 136 or MATH 308; CSE 142. Instructors: Ghate, Zabinsky Offered: A.

View course details in MyPlan: IND E 410

IND E 411 Stochastic Models and Decision Analysis (4) A. GHATE, Z. ZABINSKY
Stochastic systems analysis to industrial engineering problems. Topics include: Markov chains, queueing theory, queueing applications, and decision analysis. Prerequisite: IND E 315; IND E 410. Offered: W.

View course details in MyPlan: IND E 411

IND E 412 Integer and Dynamic Programming (4)
Modeling and optimization of problems and dynamic programming approach to optimization. Topics include: integer programming formulation techniques, linear and Lagrangian relaxation, branch-and-bound and cutting-plane methods, integer programming applications, and dynamic programming. Prerequisite: IND E 411.
Instructors: Ghate, Zabinsky Offered: Sp.

View course details in MyPlan: IND E 412

IND E 424 Simulation (4) A. BANERJEE, J. HEIM
Discrete-event simulation methodology emphasizing model formulation and construction with modern simulation languages and environments, statistical basis for evaluating model results, design and management of simulation projects. Application to manufacturing, retail, and service industries. Prerequisite: IND E 337, which may be taken concurrently; IND E 411 Offered: W.

View course details in MyPlan: IND E 424

IND E 426 Reliability Engineering and System Safety (4)
Reliability and system safety measures. Life distributions and their applications in reliability. System reliability models. Design by reliability and probabilistic design. Reliability and safety analysis through FMECA and FTA. Reliability estimation and measurement by testing for binomial, exponential, and Weibull distributions. Prerequisite: IND E 315.

View course details in MyPlan: IND E 426

IND E 430 Manufacturing Scheduling and Inventory (4) W. CHAOVALITWONGSE
Manufacturing scheduling and inventory control for different work organizations. Coverage of workforce scheduling, job- and flow-shop scheduling and order release, production line balancing, MRP II, Lean Production, and data management. Particular attention to computer-based aspects of management and scheduling for manufacturing and service industries. Prerequisite: IND E 337; IND E 410, both of which may be taken concurrently. Offered: A.

View course details in MyPlan: IND E 430
IND E 439 Plant Layout and Material Handling (4)  W. CHAOVALITWONGSE
Design of new or expanding industrial facilities. Consideration of work organization and layout. Study of basic design of plant systems, including plumbing, electrical, HVAC, illumination, acoustics, and waste handling. In depth coverage of material handling system design and equipment choices. Prerequisite: IND E 410 which may be taken concurrently. Offered: A.
View course details in MyPlan: IND E 439

IND E 455 User Interface Design (4)  Furness
Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with HCDE 455; A.
View course details in MyPlan: IND E 455

IND E 470 Systems Engineering (4)
Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with A A 470; A.
View course details in MyPlan: IND E 470

IND E 494 Design in the Manufacturing Firm (4)
Engineering design in manufacturing firms is presented. Topics include design methodology, concurrent engineering, and project management. Focus on the relationship between product design and manufacturing (design for production and assembly). Prerequisite: IND E 337. Instructors: Mastrangelo Offered: W.
View course details in MyPlan: IND E 494

IND E 495 Industrial Engineering Design (4)
Capstone senior design project involving identification and synthesis of industrial engineering skills. Students apply their knowledge of industrial engineering to actual industrial problems. Prerequisite: IND E 494. Instructors: Mastrangelo Offered: Sp.
View course details in MyPlan: IND E 495

IND E 496 Technology-Based Entrepreneurship (3)  Furness
Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Offered: jointly with M E 496; Sp.
View course details in MyPlan: IND E 496

IND E 498 Special Topics in Industrial Engineering (1-5, max. 9)
Lecture and/or laboratory.
View course details in MyPlan: IND E 498

IND E 499 Special Projects (2-5, max. 12)
View course details in MyPlan: IND E 499

IND E 508 Stochastic Processes in Engineering (3)  A. GHATE
Non-measure theoretic introduction to stochastic processes. Topics include Poisson processes, renewal processes, Markov and semi-Markov processes, Brownian motion, and martingales, with applications to problems in queuing, supply chain management, signal processing, control, and communications. Prerequisite: E E 505. Offered: jointly with E E 508; W.
View course details in MyPlan: IND E 508

IND E 512 Introduction to Optimization Models (3)  Chaovalitwongse, Zabinsky
Presents optimization models that are used in applications such as industrial engineering, production,
transportation, financial investment, healthcare systems, and environmental ecology. Problems span a variety of continuous and integer optimization models, with discussion of multi-objectives and incorporating randomness into optimization models.

View course details in MyPlan: IND E 512

IND E 513 Linear Optimization Models in Engineering (3)  
W. CHAVALITWONGSE, A. GHATE, Z. ZABINSKY
Advanced formulation techniques to expand applications of linear programming to large-scale models. Appreciation of role of optimization models in engineering applications through introduction of techniques such as decomposition. Individual engineering projects. Prerequisite: IND E 410 and MATH 308 or permission of instructor.

View course details in MyPlan: IND E 513

IND E 515 Fundamentals of Optimization (5)

View course details in MyPlan: IND E 515

IND E 516 Applications of Optimization in Engineering Design (3)
Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisite: AMATH 515/MATH 515/IND E 515 and MATH 328 or permission of instructor. Instructors: Zabinsky

View course details in MyPlan: IND E 516

IND E 519 Healthcare Modeling and Decision Making (3)
Applications of operations research in healthcare. Introduction to a variety of modeling techniques including decision analysis, cost-effectiveness analysis, Markov models, Markov decision processes, dynamic programming, simulation, queuing, scheduling, machine learning and their applications in healthcare management and medical decision making.

View course details in MyPlan: IND E 519

IND E 521 Quality Control in Manufacturing (3)
Design of quality control systems in manufacturing. Use of advanced statistical process controls, sampling inspection techniques, process capability, and other statistical tools. Also includes vendor sourcing and control tools, methods for establishing specifications and tolerances, quality function deployment, and other quality control techniques.

View course details in MyPlan: IND E 521

IND E 524 Robust Design and Quality Engineering (3)
Introduction to robust design and quality engineering. Applications of design of experiments for product and process design optimization. Experimental design using orthogonal arrays and linear graphs. System models using Chebyshev's orthogonal polynomials. Robustness in design and quality improvement for complex systems including Taguchi methods for quality engineering. Prerequisite: IND E 316 or equivalent. Instructors: Kapur

View course details in MyPlan: IND E 524

IND E 526 Reliability in Product Design and Testing (3)
Product assurance including reliability and quality engineering. Reliability design, measurement, and optimization. Advanced topics in probabilistic design. Design of reliability test plans and analysis of test data. Design of reliability programs and their management.

View course details in MyPlan: IND E 526
IND E 535 Engineering Simulation (3) A. BANERJEE, J. HEIM
Advanced applications of discrete event, continuous, and combined discrete-continuous simulation modeling, detailed examination of fundamental computer programming concepts underlying the design and development of simulation languages, variance reduction techniques, and output analysis for various engineering, service systems, and manufacturing applications. Prerequisite: IND E 424 or equivalent.
View course details in MyPlan: IND E 535

IND E 537 Introduction to Manufacturing Systems (3) A. BANERJEE, J. HEIM
Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with ENV H 537; A.
View course details in MyPlan: IND E 537

IND E 543 Virtual Interface Technology (3)
Explores advanced concepts and technologies for interfacing humans to complex machines, with focus on virtual interfaces. Interface design principles reviewed from psychological and technological perspectives. Hardware, software, and mindware aspects of virtual interfaces investigated. Applications postulated and designed. Prerequisite: graduate standing in College of Engineering or permission of instructor. Instructors: Furness
View course details in MyPlan: IND E 543

IND E 544 Virtual World Development (3)
Software implementation, physiological and cognitive constraints, and the mathematics and philosophy of inclusion. Development of software tools, editing and interaction techniques, disposition of virtual world entities, nature of space, situated knowledge, divergent models for multiple participants, experiential mathematics, cyberspace. Cultural, legal, moral, ethical issues. Prerequisite: IND E 543 or permission of instructor. Instructors: Furness
View course details in MyPlan: IND E 544

IND E 545 User-Centered Design (4)
Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with HCDE 518; W.
View course details in MyPlan: IND E 545

IND E 546 Analytical Methods in Transportation I (3)
Application of analytical and statistical methods to issues in transportation and driving. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: either IND E 315, MATH 390/STAT 390, or equivalent. Instructors: Boyle
Offered: jointly with CEE 584; W.
View course details in MyPlan: IND E 546

IND E 549 Human Factors in Engineering Design (3) L. BOYLE
Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Covers traditional human factors material with a project-based focus/emphasis. Offered: jointly with ENV H 549; Sp.
View course details in MyPlan: IND E 549

IND E 564 Recognition of Health and Safety Problems in Industry (2)
Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of
several local facilities, stressing a multidisciplinary approach. Offered: jointly with ENV H 564; A.

**IND E 566 Introduction to Ergonomics (3)**
Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/NSG 508; W.

**IND E 567 Applied Occupational Health and Safety (3)**
Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with ENV H 559/NSG 505; Sp, even years.

**IND E 569 Occupational Biomechanics (4)**
Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with ENV H 569; Sp, even years.

**IND E 570 Supply Chain Systems (3)**
Develops concepts related to the design, evaluation, and performance of supply chain systems through an exploration of contemporary practice and research, focusing on current issues, analytical frameworks, and case studies. Prerequisite: IND E 315 or equivalent. Instructors: Beamon

**IND E 575 Inventory Management (5) Jain**
Examines modeling and analysis of inventory flow in supply chains in order to improve service and decrease cost. Covers tools and methods for making long-term and short-term inventory related decisions for items with different demand and supply characteristics. Topics include forecasting, production planning, deterministic and stochastic inventory models, and supply management. Offered: jointly with SCTL 503; W.

**IND E 576 Facility Design and Operations Management (5) Heim**
Introduces the fundamental principles, concepts, and procedures for designing and managing supply-chain networks of factories, suppliers, warehouses, and distribution centers. Students learn to use engineering systems design methodologies and software to construct appropriately detailed quantitative models, evaluate alternative supply network configurations, and assess the management of their operations. Offered: jointly with SCTL 504; Sp.

**IND E 581 Navigating the Business Environment (3) Mastrangelo**
Covers the fundamentals of finance and accounting, marketing, strategy, and business communication as well as the skill of identifying and influencing the key decision maker. Offered: A.

**IND E 582 Technical Leadership (3) Mastrangelo**
Includes how to motivate, reach consensus, work virtually, recruit, and work with engineers from different cultures. Offered: W.
IND E 583 Decision Analysis in Engineering (3) Mastrangelo
Examines multi-criteria decision tools involving qualitative and quantitative methods. Covers decision trees, subjective probability, utility and value theories, goals and objectives, risk, optimization, and simulation. Includes case studies in decision and systems analysis. Offered: Sp.
Learn more about this course in MyPlan: IND E 583

IND E 584 Project Performance (3) Mastrangelo
Examines the fundamentals of project performance and application of systems engineering theory, concepts, and tools and techniques to plan, manage, and accomplish organizational objectives in a project framework. Also considers the critical roles leadership and team development plays in successful completion of projects. Offered: S.
Learn more about this course in MyPlan: IND E 584

IND E 585 Systems Architecture and Model-Based Systems Engineering (3) C. MASTRANGELO
Introduction to systems architecture through development of system requirements, allocations of functionality and reintegration. Utilizes model systems engineering as a graphical, mathematical, and modeling tool for systems analysis. Offered: A.
Learn more about this course in MyPlan: IND E 585

IND E 586 Systems Engineering Risk: Assessment and Management (3)
Management of systems engineering risk ensures costs, schedule, and technical performance objectives are achieved. Covers analysis methods and stochastic modeling for assessing and making decisions about projects and financial and technical risks associated with complex systems engineering projects. Also covers balancing risks across the systems development like cycle.
Learn more about this course in MyPlan: IND E 586

IND E 591 Seminar (1-)
Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: A.
Learn more about this course in MyPlan: IND E 591

IND E 592 Seminar (-1-)
Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: W.
Learn more about this course in MyPlan: IND E 592

IND E 593 Seminar (-1)
Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: Sp.
Learn more about this course in MyPlan: IND E 593

IND E 595 Global Integrated Systems Engineering ([4/5]-, max. 9) C. MASTRANGELO
Covers systems engineering, project management, finance and economics in a global environment. Offered: jointly with AA 595; AW.
Learn more about this course in MyPlan: IND E 595

IND E 596 Global Integrated Systems Engineering Project (3)
Project-based systems design course. Prerequisite: AA/INDE 595. Instructors: Mastrangelo Offered: jointly with AA 596; Sp.
Learn more about this course in MyPlan: IND E 596

IND E 599 Special Topics in Industrial Engineering (1-5, max. 9)
Prerequisite: permission of supervisor.

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
Materials Science and Engineering

Department Overview

302 Roberts

Materials science and engineering is an interdisciplinary field that addresses the structure, processing, and property relationships in materials for engineering applications. Basic principles of chemistry and physics are applied to provide an understanding of the structure of materials and the manner in which the structure determines the properties. Scientific processing methods are then applied to yield the necessary properties, which then can be integrated with, and designed to accommodate the needs of, modern technology.

Advances in materials enable technological progress in many fields. Historically, this connection between materials and technology has been so intimate that major periods in civilization have been named after the dominant material used in that era (e.g., Bronze Age, Iron Age). In the past few decades, at the core of the progress in such diverse fields as transportation, communication, electronics, energy and environment are significant advances in materials. Materials science and engineering is a broad and growing discipline.

Materials Science and Engineering at the University of Washington has recently experienced rapid expansion into new research areas, including polymers, hybrids, biomaterials, biomimetics, nanomaterials, photonic and magnetic materials. These areas have applications in current and emerging industries, and complement existing strength in ceramics, metals, electronic materials, and composites.

Undergraduate Program

Adviser
302A Roberts, Box 352120
(206) 543-2600
mse@uw.edu

The Department of Materials Science and Engineering offers the following programs of study:

- The Bachelor of Science in Materials Science and Engineering degree
- The Bachelor of Science in Materials Science and Engineering degree with an option in nanoscience and molecular engineering
- A minor in materials science and engineering
Bachelor of Science in Materials Science and Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; English composition; CSE 142 or AMATH 301; MSE 170.

Department Admission Requirements

Applicants are considered in three groups - Direct Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. Applicants not admitted under one admission group may subsequently apply to another admission group after completing more coursework. All applicants have the right to appeal the department's admission decision.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option for MSE majors is by self-selection and normally occurs upon completion of NME 220, all MSE prerequisites, and formal admission to the MSE Department. A small number of advanced students may be admitted into the NME option upon application to the department. Admission is based on the student's academic record, including grades in NME 220 and any MSE courses already taken and on prior experience/work in the field of nanoscience and/or molecular engineering. Students applying for the NME option should indicate that interest in the Materials Science and Engineering application and discuss their interests and background in the essay.

Direct Freshman Admission

1. Open to freshman students formally admitted to the UW
2. High school GPA of 3.70 or higher; SAT (or equivalent) scores of 1300 or higher
3. Indication on the application that Materials Science and Engineering is the first choice for the major

Early Admission

1. Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or above; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Applications are accepted for autumn quarter only. Application deadline is July 1.
3. Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission

Upper-Division Admission

1. Course requirements: MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122; CHEM 142, CHEM 152; CSE 142 or AMATH 301; MSE 170; 5 credits of English composition
2. 64 credits completed by application deadline. Applications are accepted for autumn quarter only. Application deadline is July 1.
3. Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.
Graduation Requirements

Minimum 180 credits to include:

General Education Requirements (87-92 credits)

1. Written and Oral Communications: 8 credits, to include one 5-credit English composition course from the University list; HCDE 231. University-required 4 additional writing credits are met by major core courses.

2. Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (24 credits): Minimum 10 credits required in each area.

3. Natural World (55-60 credits):
   a. Mathematics (24-25 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 318); one from MATH 309, MATH 324, IND E 315, or STAT 390
   b. Science (31-35 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; two additional natural science courses from the department's approved list

Major Requirements (93 credits)

1. Engineering Fundamentals (24 credits): CSE 142 or AMATH 301, MSE 170, A A 210, CEE 220; two of the following: E E 215, M E 123, A A 260 or CHEM E 325, IND E 250, CHEM E 220

2. Materials Science and Engineering Core (53 credits): MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499

3. Technical Electives (16 credits): See department advising office for list of acceptable courses.

4. Grade Requirement: Minimum 2.00 departmental cumulative GPA

Major Requirements for Nanoscience and Molecular Engineering Option (97 credits)

1. Engineering Fundamentals (24 credits): CSE 142 or AMATH 301, MSE 170, A A 210, CEE 220; two of the following: E E 215, M E 123, A A 260 or CHEM E 325, IND E 250, CHEM E 220

2. Materials Sciences and Engineering Core (53 credits): MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499. The senior project (MSE 499) must be in an NME area.

3. Nanoscience and Molecular Engineering Courses (20 credits): NME 220, NME 221, NME 321, NME 421; additional approved nanoscience and molecular engineering electives to reach 20 credits. See adviser for list of approved electives.

4. Grade Requirements: Minimum 2.00 departmental cumulative GPA

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy contact the department adviser or refer to the department website (http://www.mse.washington.edu/current/undergrad/continuation)
Minor

Minor Requirements: 30 credits as follows: MSE 170, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362. Minimum 2.0 grade of 2.0 required for each course.

The following courses serve as prerequisites for the departmental courses in the minor: MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 or MATH 318; CHEM 142 or CHEM 145, CHEM 152 or CHEM 155; PHYS 121, PHYS 122, PHYS 123; MSE 170; English composition. Students should take these courses before beginning the minor program.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes:

Undergraduate students are offered both broad core and in-depth courses. The broad core provides the needed background and understanding of all types of engineering materials, including metals, ceramics, polymers, electronic materials, and composites. The curriculum provides an opportunity to use basic knowledge in science and engineering fundamentals to synthesize and design materials for engineering applications. The undergraduate curriculum emphasizes hands-on experience, oral and written communication, and teamwork, and encourages participation in research. Graduates with a degree in materials science and engineering find employment in a broad range of industries including aerospace, biomedical, electronic manufacturing, materials processing, and transportation.

The Bachelor of Science in Materials Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

a. An ability to apply knowledge of mathematics, science and engineering
b. An ability to design and conduct experiments, as well as to analyze and interpret data
c. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
d. An ability to function on multi-disciplinary teams
e. An ability to identify, formulate and solve engineering problems
f. An understanding of professional and ethical responsibilities
g. An ability to communicate effectively
h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
i. A recognition of the need for, and an ability to engage in life-long learning
j. Knowledge of contemporary issues
k. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice
l. An ability to apply advanced science (such as chemistry and physics) and engineering principles to ceramics, metals, polymers and composite materials
systems

m. An integrated understanding of the scientific and engineering principles underlying the four major elements of the field: structure, properties, processing and performance related to material systems

n. An ability to apply and integrate knowledge from each of the four major elements of the field to solve materials selection and design problems

o. An ability to utilize experimental, statistical and computational methods consistent with the goals of the program

p. Experience in laboratory work and in research and/or design problem solving

q. Preparation, as appropriate to the student and the area of interest, to enter graduate degree programs.

- **Instructional and Research Facilities:** Facilities include equipment for electron and optical microscopy, x-ray diffraction, high-temperature heat treatment and mechanical testing, specialized processing equipment, including hot and cold isostatic presses, nitrogen reaction furnaces, and automated TGA, DTA analysis systems. Equipment for analyses of particle size, surface areas, and pore size is also available. Students have liberal access to University computing facilities.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** Materials Science and Engineering students interested in paid internship experiences should contact the Engineering Co-op and Internship Program, 301 Loew Hall, Box 352180, (206) 543-8711, coop@engr.washington.edu.

- **Department Scholarships:** In addition to need-based aid provided through the University's Office of Student Financial Aid, companies and individuals with interest in developing materials science and engineering students have provided scholarships for students admitted to the program. Specific information and application forms are available from the academic counselor in 302 Roberts.

- **Student Organizations/Associations:** Keramos (materials honor society); American Ceramic Society (ACerS); ASM/TMS (the joint student chapter of ASM International and TMS); Society for the Advancement of Materials and Process Engineering (SAMPE).

**Of Special Note:**

**Combined BS/MS Degree Program**

The goal of the combined BS/MS program in Materials Science and Engineering is to provide a more direct route to the master's degree for well-qualified undergraduate students who wish for more in-depth graduate-level work in preparation for work in industry or for a PhD program. The combined program creates a more efficient and continuous academic experience that leads directly to the Master of Science degree. Students earn both the BS and MS degrees in five years. This program is available to students after they are admitted to the department. Information is available below.
Graduate Program Coordinator  
302 Roberts, Box 352120  
(206) 543-2600  
mse@uw.edu

The Department of Materials Science and Engineering offers programs of study leading to the Master of Science in Materials Science and Engineering (MSMSE) and the Doctor of Philosophy in either materials science and engineering or materials science and engineering/nanotechnology.

In addition, the degree of Master of Science (without designation) is offered through the College of Engineering. This degree is intended to accommodate students with undergraduate majors outside physical science or engineering who desire a special graduate program to encompass a broad range of materials science studies.

The primary goals of the master's and doctoral programs are to prepare students for industrial employment and research/development careers and to generate new knowledge. The specific objectives are as follows:

- Deepen knowledge and capabilities broadly and in a chosen specialty area: A student's knowledge, attained through coursework and scholarly investigation of literature relevant to thesis project, should be commensurate with that of leading researchers in the field.
- Master and develop state-of-the-art research techniques appropriate to specialty: Analytical, computational, and experimental tools are learned via instruction by adviser(s) and peers in conjunction with maintaining currency with literature.
- Contribute new knowledge of lasting value to the field by creative and independent research: A student's thesis research must demonstrate originality and high quality, as judged by faculty committee.
- Broaden candidate's knowledge of field and societal issues: Through coursework, department and group seminars, and attendance at professional meetings, a student learns to appreciate context of specialty within materials science and engineering and gain ability to apply knowledge and methods to a spectrum of engineering and scientific challenges.
- Learn to work effectively with colleagues and contribute to professional community: Attained by cooperation in team research projects, presentation of research and professional meetings.

**Combined Bachelor of Science/Master of Science**

**Admission Requirements**

Students may apply to enter the combined BS/MS program any time after they are accepted into the MSE department as an undergraduate major. Requirements for application include:

1. Overall minimum 3.20 GPA in the last 90 credits before application
2. At least 15 credits of MSE courses completed with a minimum 3.40 GPA
3. Statement of interest in and goals for the MS degree
4. Interview with admissions committee
Students accepted into the combined BS/MS program by the department apply to the Graduate School in December of their senior year. These students normally enroll in the materials science option for the MS degree.

**Degree Requirements**

216 credits.

Requirements are the same as for the current BS and MS programs. However, up to 7 credits of 400- or 500-level courses taken as an undergraduate over and above the BS requirement may be counted towards the MS degree. These credits transfer to the graduate program when the student enters as a graduate student, subject to approval of the MSE Graduate Program Committee. The Graduate School waives the restrictions on transfer credits for this purpose.

Students admitted into the BS/MS program combine their BS senior project requirement (MSE 499) with the MS thesis requirement (MSE 700) and begin research starting summer or autumn quarter of their senior year. The student receives 4 credits of MSE 499 for the undergraduate portion of the research program, then registers for 9 or more credits of MSE 700 for the thesis. Written and oral reports are required to complete the MSE 499 credits, to be submitted before the end of the senior year. The thesis is required for completion of the MS degree.

**Master of Science in Materials Science and Engineering**

**Admission Requirements**

The applicant must have a minimum 3.00 undergraduate GPA in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

Students with backgrounds in engineering and the physical sciences are admitted into the MSMSE program. After admission, students with a minimum three years' industrial experience in an engineering position may apply for the engineering materials (practice-oriented, non-thesis) option.

Specific program pre-requisites, which may be satisfied after entry into the program, are as follows:

1. Knowledge of fundamentals of Materials Science and Engineering equivalent to MSE 170
2. Knowledge of crystallography equivalent to MSE 331
3. Background in materials properties equivalent to MSE 362 and MSE 351
4. Knowledge of kinetics equivalent to MSE 322
5. Understanding of thermodynamics equivalent to the level of MSE 421

**Degree Requirements**

36 credits, as follows:

1. At least 27 credits must be for coursework, including 3 credits of MSE 520 seminar (see below). Of these 27 credits, 18 must be in courses numbered in the 500 series (these 18 may include the 3 seminar credits). Numerical grades from approved 400-
level and all 500-level courses must be received for at least 18 quarter credits of coursework taken at the UW. A minimum 3.00 cumulative GPA is required for a graduate degree at the University. Required courses may not be taken on the S/NS grading option. The S/NS grading option in other courses must have the approval of the student's faculty adviser.

2. Thesis Option
   1. Three required core courses (9 credits): MSE 510, MSE 525, MSE 541
   2. Three optional core courses
   3. 3 credits of seminar (MSE 520)
   4. 9 credits of thesis work (MSE 700)
   5. 6 credits of electives (400- or 500-level physical science or engineering courses) to meet the 36-credit requirement

3. Non-Thesis Option
   1. Three required core courses (9 credits): MSE 510, MSE 525, MSE 541
   2. Four practice-oriented materials or related engineering courses, 12 credits minimum, chosen to complement the student's program
   3. Materials engineering project, MSE 598, 4 credits, taken during the last quarter of the master's program
   4. Electives to meet the 36 credit requirement.
   5. Of the above credits, all must be at the 400 or 500 level, with a minimum of 18 at the 500 level, and other Graduate School requirements must be met. Numerical grades are also required for at least 18 credits of 400- or 500-level coursework.

Doctor of Philosophy

Admission Requirements

The applicant must have a minimum 3.00 GPA in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

In general, entering graduate students with only the BS degree are required to enroll as MS students.

Prerequisite:

1. Knowledge of fundamentals of materials science and engineering equivalent to MSE 170
2. Knowledge of crystallography equivalent to MSE 331
3. Background in materials properties equivalent to MSE 362 and MSE 351
4. Knowledge of kinetics equivalent to MSE 322

The department also requires that all entering graduate students have an understanding of thermodynamics equivalent to the level of MSE 421. If the student does not have two undergraduate thermodynamics courses upon entry to the graduate program, then MSE 421 is required for the PhD degree.
Students interested in materials science and engineering with the nanotechnology option must make formal application to the UW's Center for Nanotechnology after being admitted to the MSE graduate program.

**Degree Requirements**

90 credits as follows:

1. 30 credits from MSMSE degree or equivalent
2. Three required core courses (9 credits): MSE 510, MSE 525, MSE 541
3. 6 credits of seminar (MSE 520)
4. 9 credits of elective MSE courses
5. 36 credits of MSE 800
6. Qualifying examination
7. General examination
8. Portfolio review
9. Dissertation
10. Final examination

**Advising and Progress to Degree**

The graduate coursework is designed to provide a higher level expertise than a BS in both core topics and specialty areas chosen by the student. Thus, all students must take three required core courses (MSE 510, MSE 525, and MSE 541) and a series of elective courses. Students are also required to enroll for the department seminar series.

Graduate students are advised by their Supervisory/Thesis Committee chair, members of the Supervisory/Thesis Committee, and the academic counselor, each with a specific advising role. The department also maintains a Graduate Student Handbook, given to each graduate student upon entry. Graduate students work closely with their committee chairs. Through this interaction, students develop a professional identity which includes learning how to do research, defining research problems, research supervision, data analysis and synthesis, presentation and participation in professional meetings, writing papers and reports, writing research proposals, and receiving information and advice regarding career options and help with placement.

**Financial Support**

Graduate students are eligible for a variety of competitive financial awards while they pursue their MSE degrees. Awards include teaching and research assistantships and a broad spectrum of internal and external fellowships. Almost all graduate students receive some financial support. Further details are on the departmental website and in the Graduate Student Handbook.

**Engineering Materials Option for the Master of Science**

The Engineering Materials option for an MS in Materials Science and Engineering is a non-thesis program designed for students with substantive industrial experience who want a master's degree to further their career goals or to meet work requirements. Students selecting this degree option should be practicing materials engineers with a bachelor of
science degree. This program contains practice-oriented courses in addition to the usual graduate core courses. In place of a research-oriented thesis, students carry out a complete analysis and develop recommended solutions to an engineering materials problem. This project is industrially oriented, undertaken at an industrial site and supervised by an experienced engineer in industry and an MSE faculty member. Written and oral final project reports are required. The engineering materials option is designed to be completed in one year (four quarters) for on-campus students; it is also available for part-time students through the Education at a Distance for Growth and Excellence (EDGE) program.
COLLEGE OF ENGINEERING
MATERIALS SCIENCE & ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

MSE 170 Fundamentals of Materials Science (4) NW
Fundamental principles of structure and properties of materials utilized in practice of engineering. Properties of materials are related to atomic, molecular, crystalline structure. Metals, ceramics, multiphase systems, and polymeric materials. Relationships between structure and electrical, mechanical, thermal, chemical properties. For advanced freshmen and sophomores. Prerequisite: either CHEM 152, CHEM 154, or CHEM 155. Offered: AWSpS.
View course details in MyPlan: MSE 170

MSE 273 Introduction to Molecular Engineering of Interfaces and Surfaces (2) NW
Covers interfaces and surfaces critical in every field of science, engineering, and medicine from catalytic reactions, drug delivery systems, biocompatibility, carbon fiber composites, semiconductor design, and global warming. Combines active learning, case studies, and hands-on laboratory exploration in nanotechnology. Offered: W.
View course details in MyPlan: MSE 273

MSE 298 Introduction to Modern Materials (1)
Materials and advances in materials are at the core of a large number of significant technological advances. Seminar format highlights processing, properties, and uses of a broad class of materials for a variety of applications, each introduced by a faculty member from the department. Offered: ASp.
View course details in MyPlan: MSE 298

MSE 310 Introduction to Materials Science and Engineering (3)
Introduces the materials field to new department majors. Examples are drawn from ceramics, metals, polymers, electronic materials, and composites. Structure-properties-manufacturing-design relationships are emphasized. Materials selection design project. Introduction to research. Offered: A.
View course details in MyPlan: MSE 310

MSE 311 Integrated Junior Laboratory I (3)
Laboratory experimental techniques including writing, literature search, research planning, and computer applications. Optical microscopy experiments, sample preparations, X-ray equipment, and X-ray diffraction analysis of materials. Prerequisite: MSE 170. Offered: A.
View course details in MyPlan: MSE 311
MSE 312 Integrated Junior Laboratory II (3)
Materials processing related laboratory experiments, including powder synthesis, redox reactions of particulate materials, grain growth, recrystallization, phase transformation, green tape processing, particle interaction and rheology, slip and tape casting and dry processing, sol-gel processing, polymer processing, sintering behavior, metal welding, and heat treatment. Prerequisite: MSE 311. Offered: W.
View course details in MyPlan: MSE 312

MSE 313 Integrated Junior Laboratory III (3)
Kinetics and phase transformation related laboratory experiments, including solidification. Mechanical properties related laboratory experiments, including stress-strain behavior of materials and elastic modulus of materials, effect of work hardening on stress strain behavior, and effect of surface condition of the strength of glass. Prerequisite: MSE 312. Offered: Sp.
View course details in MyPlan: MSE 313

MSE 321 Thermodynamics and Phase Equilibrium (4)
Phase equilibria in materials systems of one, two, and three components. Determination of phase diagrams. Quantitative applications of thermodynamics to systems of interest to materials scientists; detained review of thermodynamic laws and principles. Offered: A.
View course details in MyPlan: MSE 321

MSE 322 Kinetics and Microstructural Evolution (4)
Applications of thermodynamic and kinetic principles to the study of transport processes, transformations and reactions in engineering materials. Thermal activation and rates of processes, nucleation and growth, phase transformations, grain growth, sintering, among other processes. Prerequisite: MSE 321. Offered: W.
View course details in MyPlan: MSE 322

MSE 331 Crystallography and Structure (3)
Theory and practice of x-ray diffraction with applications to materials sitemaps. Principles of crystal symmetry, lattice systems, and stereographic projections. Bragg's law of diffraction, Laue conditions, diffraction by X-rays, single crystal and powder diffraction techniques and their applications to lattice, phase, strain, and texture analyses. Prerequisite: MSE 170. Offered: A.
View course details in MyPlan: MSE 331

MSE 333 Materials Characterization (3)
Principles and applications of analytical techniques, imaging, diffraction and spectroscopy for materials characterization including crystal structures, texture formation, phase analysis. Nano- and micro-structures of materials including defects and second phases, chemistry, bonding, compositions of materials. Demonstrations and lab experiments involving light scattering and diffraction techniques. Prerequisite: MSE 170; MSE 331; MSE 351. Offered: Sp.
View course details in MyPlan: MSE 333

MSE 342 Materials Processing I (3)
Provides students with the fundamentals and applications of metal and alloy processing techniques. Focuses on relationships between the processing fundamentals and practice, and between processing, microstructure, and properties. Ferrous and non-ferrous metal and alloy processing discussed. Prerequisite: MSE 170; MSE 321. Offered: W.
View course details in MyPlan: MSE 342

MSE 351 Electronic Properties of Materials (3)
Introduction to elementary solid-state concepts in materials, free electrons, and band theories. Principles to conduction in metals, insulators, semiconductors, and applications of semiconductors and devices. Prerequisite: MSE, 170, MSE 331. Offered: W.
View course details in MyPlan: MSE 351
MSE 352 Functional Properties of Materials I (3)
Introduction to thermal properties, electrical (ionic and polaron) conduction and optical properties, including origins of color, interaction of light wave with materials, lasers and optoelectronics. Focuses on the relations between physical properties and chemical composition, crystal structure, and microstructure. Prerequisite: MSE 351. Offered: Sp.
View course details in MyPlan: MSE 352

MSE 362 Mechanical Behavior of Materials I (3)
Influence of structure on the mechanical properties materials. Definition of different mechanical properties and experimental techniques to measure them. Elastic, viscoelastic, and plastic deformation. Introduction to fracture. Prerequisite: MSE 170. Offered: Sp.
View course details in MyPlan: MSE 362

MSE 399 Undergraduate Research Seminar (1)
Introduces MSE majors to various research projects available to MSE faculty laboratories. Credit/no-credit only. Offered: W.
View course details in MyPlan: MSE 399

MSE 421 Case Studies in Thermodynamics (3)
View course details in MyPlan: MSE 421

MSE 431 Failure Analysis and Durability of Materials (3)
Treats the areas of failure analysis and durability in a wide range of materials applications. Reviews concepts in mechanical and environmental behavior of materials. Includes instruments available to engineers, both destructive and nondestructive, and case studies. Prerequisite: MSE 333; MSE 342; MSE 362. Offered: W.
View course details in MyPlan: MSE 431

MSE 442 Materials Processing II (3)
Develops a basic understanding of both engineering and science aspects of ceramic processing. Fundamentals of powder processing and characterization, green body formation, sintering, microstructural development and properties. Prerequisite: MSE 342. Offered: A.
View course details in MyPlan: MSE 442

MSE 443 Process Principles in Ferrous and Non-Ferrous Materials Production (3)
View course details in MyPlan: MSE 443

MSE 450 Magnetism, Magnetic Materials, and Related Technologies (3)
Introduces magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetics materials, structure-sensitive properties, magnetic phenomena, small particles, thin films, and applications (magnetic recording, permanent magnets, and spin-electronics.
View course details in MyPlan: MSE 450

MSE 452 Functional Properties of Materials II (3)
Functional materials including dielectrics, ferroelectrics, piezoelectrics, pyroelectrics, opto-electronics, and magnetic materials. Detailed discussion of fundamental relations between the chemical composition, crystal structure, microstructure, and physical properties. Description of general devices and applications of these functional materials. Prerequisite: MSE 352. Offered: W.
View course details in MyPlan: MSE 452
MSE 462 Mechanical Behavior of Materials II (3)
Structural influences on mechanical properties of materials and strengthening mechanisms. States of stress and strain, failure criteria, multiaxial loads. Dynamic loading, kinematic and isotropic hardening, plasticity; Flaws and material reliability, probabilistic failures, fracture and toughening mechanisms. Stress life fatigue, fatigue crack growth, viscoelasticity, viscoplasticity. Prerequisite: AA 210; CEE 220; MSE 362. Offered: Sp.
View course details in MyPlan: MSE 462

MSE 463 Corrosion and Wear of Materials (3)
Mechanisms of corrosion, thermodynamics, kinetics of corrosion. Passivity; Pourbaix diagrams; corrosion rate testing and measurements; forms of corrosion; effects of alloy and environmental variables; corrosion testing. Wear mechanisms: adhesive, abrasive, erosive. Fretting; surface roughness, wear testing. Coatings for corrosion and wear protection. Offered: Sp.
View course details in MyPlan: MSE 463

MSE 466 Energy Materials, Devices, and Systems (3) D. GINGER JR
Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Prerequisite: CHEM 455 or CHEM 475 which may be taken concurrently Offered: jointly with CHEM 466/CHEM E 440; AWSp.
View course details in MyPlan: MSE 466

MSE 471 Introduction to Polymer Science and Engineering (3)
Introduction of preparative methods of polymers; physical chemistry of polymeric molecules in solution, liquid and solid phase; thermodynamics of polymers; methods of characterization; mechanical properties; fabrication techniques; properties of commercial polymers. Offered: A.
View course details in MyPlan: MSE 471

MSE 473 Noncrystalline State (3)
Chemistry and physics of inorganic glass and amorphous semiconductors; structure, properties, and processing of vitreous materials. Prerequisite: MSE 342; MSE 351. Offered: Sp.
View course details in MyPlan: MSE 473

MSE 475 Introduction to Composite Materials (3)
Microstructural design and processing of composite materials; polymeric, metallic, and ceramic matrices; fibers and fiber-reinforced composites, thermal, mechanical, and electrical properties. Offered: A.
View course details in MyPlan: MSE 475

MSE 476 Introduction to Optoelectronic Materials (3)
Introduces the optical properties of dielectrics, semiconductors, and metals, and their applications in optoelectronic and photonic devices used in telecommunications, biomedical, and renewable energy industries. Prerequisite: CSE 142 or AMATH 301; Completion or concurrent enrollment in MSE 331; or permission of instructor.
View course details in MyPlan: MSE 476

MSE 477 High Temperature Materials (4)
Chemical and mineralogical composition; processing methods; thermal, physical, and chemical properties and tests; application in high-temperature processes. Prerequisite: MSE 310, MSE 321. Offered: Sp.
View course details in MyPlan: MSE 477

MSE 481 Science and Technology of Nanostructures (3)
Comprehensive introduction to the developing field of nanoscience and nanotechnology. Includes materials properties as a function of length-scale and dimensionality, applications in medicine/biology, electronics, magnetism, and electro-mechanical systems. Cooperative learning approaches involving student participation
with team assignments, class activities, lectures, and laboratory visits. Offered: W.

**MSE 481**

**MSE 482 Biomaterials/Nanomaterials in Tissue Engineering (3)**
Provides fundamental understanding of biomaterials, implant applications, and their design consideration. Includes the fundamentals of synthesis, properties, and biocompatibility of metallic, ceramic, polymeric, composite, and biological materials and their applications for both hard and soft tissue replacement, and controlled drug delivery.

**View course details in MyPlan: MSE 482**

**MSE 483 Nanomedicine (3)**
Covers methods of synthesis and characterization of nano-sized materials and specific considerations for use in biological systems.

**View course details in MyPlan: MSE 483**

**MSE 484 Electronic and Optoelectronic Polymers (3) NW**
Covers the chemistry, physics, materials science, and applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Examplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 453 or CHEM 455. Offered: jointly with CHEM 484; ASp.

**View course details in MyPlan: MSE 484**

**MSE 485 Introduction to Electronic Packaging and Materials (3)**
The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Instructors: Taya Offered: jointly with M E 485; AW.

**View course details in MyPlan: MSE 485**

**MSE 486 Fundamentals of Integrated Circuit Technology (3)**
Processing physics, chemistry, and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: EE 331 or MSE 351. Offered: jointly with E E 486; AW.

**View course details in MyPlan: MSE 486**

**MSE 487 Laboratory in Electronic Packaging and Materials (1) Taya, Stoebbe**

**View course details in MyPlan: MSE 487**

**MSE 491 Design in Materials Engineering I (2)**
Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews materials design, teamwork, leadership, engineering economics, and ethics. Reports on the professional components important to the senior thesis and begins a two-quarter, team design project on materials engineering. Prerequisite: MSE 313. Offered: A.

**View course details in MyPlan: MSE 491**

**MSE 492 Design in Materials Engineering II (2)**
Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews process design, manufacturability, and quality control. Completes the two-quarter team design project on materials engineering. Prerequisite: MSE 491. Offered: W.

**View course details in MyPlan: MSE 492**
MSE 497 Undergraduate Research (1-5, max. 12)
Research in materials under faculty supervision other than the MSE senior project. Cannot be used toward the technical elective requirements in the MSE major. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MSE 497

MSE 498 Special Topics (1-5, max. 15)
Special topics in materials science and engineering offered as a course with lectures, conferences, or laboratory. Offered: AWSpS.
View course details in MyPlan: MSE 498

MSE 499 Special Project (*-, max. 5)
Materials science and engineering field or laboratory investigations in group or individual setting. Written report required. Offered: AWSpS.
View course details in MyPlan: MSE 499

MSE 501 Advanced Processing of Inorganic Materials (3)
Discusses advanced processes of inorganic materials including metals, ceramics, and electronic materials, such as high temperature processing, sintering, solidification, single crystal growth form liquid, and vapor phase deposition. Emphasizes both the fundamentals and practical approaches of these processing techniques. Offered: A, even years.
View course details in MyPlan: MSE 501

MSE 502 Sol-Gel Processing (3)
Fundamentals of colloid science and the physics and chemistry of the sol-gel process. Emphasizes the synthesis and applications of various materials, such as multi-component oxides, nano-composites, meso- and microporous materials, organic/inorganic hybrids, and biomaterials that have important applications in both leading technologies and modern industries. Offered: A, odd years.
View course details in MyPlan: MSE 502

MSE 504 Introduction to Microelectro Mechanical Systems (4)
Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 504/M E 504.
View course details in MyPlan: MSE 504

MSE 510 Bonding, Crystallography, and Symmetry-Related Properties of Materials (3)
Rigorous introduction to the fundamentals of bonding, symmetry, crystallography, and related properties. Quantum mechanical foundation of cohesion and properties of solids. Geometric approach to understanding symmetry elements in 2-D and 3-D, including point groups, space groups, stereographic projections, and bravais lattices. Tensor properties of crystals related to crystallography and symmetry. Offered: A.
View course details in MyPlan: MSE 510

MSE 512 Experimental Transmission Electron Microscopy (3)
Fundamentals of electron optics as applied to microscopy; applications of contrast theories and electron diffraction with emphasis on defects and multiphase structures in crystalline solids. Prerequisite: MSE 510. Offered: W, odd years.
View course details in MyPlan: MSE 512

MSE 513 Transmission Electron Microscopy Laboratory (2)
One four-hour laboratory and one two-hour discussion/demonstration per week; metallic, ceramic, electronic biological sample preparation techniques; diffraction, imaging, and spectroscopy techniques in electron microscopy. Prerequisite: MSE 512 which may be taken concurrently. Offered: W, odd years.
View course details in MyPlan: MSE 513
MSE 515 Advanced Transmission Electron Microscopy (3)
Principles of image formation in crystalline and amorphous materials at the atomic resolution level; high spatial resolution electron diffraction with emphasis on convergent beam electron diffraction; quantitative elemental compositional and chemical analysis with energy dispersive X-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: MSE 512 and MSE 513.
View course details in MyPlan: MSE 515

MSE 518 Advanced Mineralogy (3)
Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of Earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with ESS 537; A.
View course details in MyPlan: MSE 518

MSE 520 Seminar (1, max. 6)
Review of research problems in recent literature. Registration required for all graduate students. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: MSE 520

MSE 524 Applied Rate Phenomena (3)
Introduction to rate theory and transport processes. The principal thrust is on applications in ceramics and metallurgy. Prerequisite: basic course in transport phenomena or permission of instructor. Offered: W.
View course details in MyPlan: MSE 524

MSE 525 Kinetics and Phase Transformations (3)
Thermodynamic basis for kinetic processes, including diffusion and phase transformation kinetics. Diffusion problems and solution methodologies, statistical treatment of diffusion, solid-liquid and solid-solid transformations, ordering transitions. Special topics related to grain growth, sintering, martensitic transformations. Prerequisite: MSE 322 and MSE 421 or equivalent. Offered: Sp.
View course details in MyPlan: MSE 525

MSE 528 Physics and Modeling of VLSI Fabrication (4)
View course details in MyPlan: MSE 528

MSE 529 Semiconductor Optoelectronics (4)
Covers optical processes in semiconductors; optical waveguide theory; junction theory; LEDs; lasers photodetectors; photovoltaics; and optical modulators and switches. Prerequisite: E E 485. Offered: jointly with E E 529.
View course details in MyPlan: MSE 529

MSE 541 Defects in Materials (3)
Detailed study of the general properties and effects of point, line, and planar defects in crystalline solids. Prerequisite: MSE 331 or equivalent. Offered: W.
View course details in MyPlan: MSE 541

MSE 550 Magnetism, Magnetic Materials, and Related Technologies (3)
Introduce magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetic materials, magnetic phenomena, small particles, thin films, and applications (magnetic recording, permanent magnets, and spin-electronic). Offered: Sp.
View course details in MyPlan: MSE 550
MSE 555 Biomimetics: Bioinspired Design and Processing of Materials (4)
How biological organisms produce materials with controlled structure, chemistry, and hierarchy to attain physical properties far superior to traditional engineering materials. Fundamental biological building materials, their synthesis, and their self-assembly with emphasis on examples of soft and hard tissues. Offered: W, even years.
View course details in MyPlan: MSE 555

MSE 560 Organic Electronic and Photonic Materials/Polymers (3)
Physical and material concepts determining properties of organic electronic and photonic materials. Discusses electronic structure, physico-chemical characterization, and device application. Includes introduction of electronic band structure of polymers, electrically conducting polymers; organic nonlinear optical electroluminescent materials; polymer optical fibers; tow-photon absorption materials for 3-D microfabrication. Offered: jointly with CHEM 564/MOLENG 530; W.
View course details in MyPlan: MSE 560

MSE 562 Introduction to Electronic Composites (3) Taya
Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic, and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Offered: jointly with M E 562; Sp.
View course details in MyPlan: MSE 562

MSE 563 Advanced Composites: Design and Manufacturing (3)
Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with M E 563; Sp.
View course details in MyPlan: MSE 563

MSE 565 Electron Theory of Materials (3)
View course details in MyPlan: MSE 565

MSE 566 Energy Materials, Devices, and Systems (3) D. GINGER JR
Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Offered: jointly with CHEM 566/CHEM E 540; A WSp.
View course details in MyPlan: MSE 566

MSE 568 Active and Sensing Materials (3) Taya
Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials include: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with M E 568; Sp.
View course details in MyPlan: MSE 568

MSE 570 Graduate Tutorial in Materials Science and Engineering (3)
A materials science and engineering tutorial for beginning graduate students who did not major in the field as an undergraduate, or who wish to broaden their knowledge of materials science and engineering. Focuses on materials' physical and chemical structures, and their relationship to mechanical, electrical, dielectric, optical,
magnetic, and thermal properties.
View course details in MyPlan: MSE 570

MSE 576 Introduction to Optoelectronic Materials (3)
Introduces the optical properties of dielectrics, semiconductors, and metals, and their applications in optoelectronic and photonic devices used in telecommunication, biomedical, and renewable energy industries.
View course details in MyPlan: MSE 576

MSE 582 Biomaterials/Nanomaterials in Tissue Engineering (3)
Provides fundamental understanding of biomaterials, implant applications, and their design consideration. Includes the fundamentals of synthesis, properties, and biocompatibility of metallic, ceramic, polymeric, composite, and biological materials and their applications for both hard and soft tissue replacement, and controlled drug delivery.
View course details in MyPlan: MSE 582

MSE 583 Nanomedicine (3)
Covers methods of synthesis and characterization of nano-sized materials and specific considerations for use in biological systems.
View course details in MyPlan: MSE 583

MSE 598 Engineering Materials Problems (4)
Involves a concentrated project which may include the design of a system or process, or analysis of a set of data related to the materials engineering area. Requires a professional quality report and an oral presentation of the results. Offered: AWSpS.
View course details in MyPlan: MSE 598

MSE 599 Special Topics in Materials Science (1-5, max. 15)
Studies of special advanced topics in materials science. Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: MSE 599

MSE 600 Independent Study or Research (*-)
Offered: AWSpS.
View course details in MyPlan: MSE 600

MSE 700 Master's Thesis (*-)
Offered: AWSpS.
View course details in MyPlan: MSE 700

MSE 800 Doctoral Dissertation (*-)
Offered: AWSpS.
View course details in MyPlan: MSE 800
Mechanical Engineering

Display as tabs

Department Overview

143 Mechanical Engineering Building

Mechanical engineering is one of the broadest and oldest of the engineering disciplines and therefore provides some of the strongest interdisciplinary opportunities in the engineering profession. Power utilization (and power generation) is often used to describe the focus of mechanical engineering. Within this focus are such diverse topics as thermodynamics, heat transfer, fluid mechanics, machine design, mechanics of materials, manufacturing, stress analysis, system dynamics, numerical modeling, vibrations, turbomachinery, combustion, heating, ventilating, and air conditioning. Degrees in mechanical engineering open doors to careers not only in the engineering profession but also in business, law, medicine, finance, and other non-technical professions.

Undergraduate Program

Adviser
143 Mechanical Engineering Bldg., Box 352600
(206) 543-5090
meadvise@uw.edu

The Department of Mechanical Engineering offers the following program of study:

- The Bachelor of Science in Mechanical Engineering (BSME) degree
- The Bachelor of Science in Mechanical Engineering (BSME) degree with an option in mechatronics
- The Bachelor of Science in Mechanical Engineering (BSME) degree with an option in nanoscience and molecular engineering

Bachelor of Science in Mechanical Engineering

Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only.

Nanoscience and Molecular Engineering Option (NME)
Admission to the NME option for mechanical engineering majors is by self-selection and normally occurs upon completion of NME 220, all mechanical engineering prerequisites, and formal admission to the mechanical engineering major. A small number of advanced students (either UW or transfer) may be admitted into the NME option upon application to the department. Admission is based on the student’s academic record, including grades in NME 220 and any mechanical engineering courses already taken and on prior experience/work in the field of nanoscience or molecular engineering. Students applying for the NME option should indicate that interest on their mechanical engineering application and discuss their interests and background in the essay.

Early Admission

1. *Course requirements*: MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or higher; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline

2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.

3. *Grade requirements*: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission

Upper-Division Admission

1. *Course requirements*: MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122; CHEM 142, CHEM 152; A A 210; CEE 220; M E 230; 5 credits of English composition

2. 65 credits completed by July 1 application deadline

3. *Grade requirements*: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission

**Graduation Requirements**

180 credits as follows:

**General Education Requirements (85 credits)**

1. *Written and Oral Communication*: 12 credits, to include one 5-credit English composition course from the University list; HCDE 333 (or department-approved alternative).

2. *Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (24 credits)*: Minimum 10 credits in each area

3. **Natural World (49 credits)**:
   a. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), MATH 309 (or AMATH 353 or MATH 324)
   b. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

**Major Requirements (95-102 credits)**

1. *Engineering Fundamentals (31 credits)*: A A 210; AMATH 301; CEE 220; E E 215; IND E 315 (or MATH 390/STAT 390); M E 123; M E 230; MSE 170
2. **Mechanical Engineering Core Courses (45 credits):** ME 323, ME 331, ME 333, ME 354, ME 355, ME 356, ME 373, ME 374, ME 395, ME 495

3. **Mechanical Engineering Option Courses (19-26 credits)**
   b. Mechatronics Option (19-21 credits): ME 471, ME 473, ME 477, ME 494; two of ME 469, ME 470, ME 478, ME 480, PHYS 334, PHYS 335
   c. Nanoscience and Molecular Engineering Option (26 credits): NME 221, NME 321, and NME 421; ME 410, ME 411; 13 credits of approved nanoscience and molecular engineering electives. See department for approved list.

4. Minimum 2.00 cumulative GPA

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:**

  1. **Success in the Profession.** The department's goal is success for its graduates in industry, research, and academic careers by virtue of skills and attributes learned in the program. Graduates succeed in their professional and academic positions by:
     a. using fundamental science and analysis to solve engineering problems,
     b. successfully executing engineering designs, and
     c. performing effectively in design teams, in the use of management tools, and through effective oral, written, and graphical communication.

  2. **Contribution to Society.** Graduates should be critical thinkers in the tradition of the broad liberal arts education. They succeed in this goal by being able to:
     a. think critically, in the sense of broadly educated individuals (i.e., be informed evaluators/consumers of information),
     b. perform independent, informed analysis on issues inside and outside of technology, and
     c. continue lifelong learning.

The BSME program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

   a. An ability to apply knowledge of mathematics, science, and engineering
   b. An ability to design and conduct experiments, as well as to analyze and interpret data
   c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
   d. An ability to function on multi-disciplinary teams
   e. An ability to identify, formulate, and solve engineering problems
   f. An understanding of professional and ethical responsibilities
   g. An ability to communicate effectively
h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

i. A recognition of the need for, and an ability to engage in, life-long learning

j. Knowledge of contemporary issues

k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Each student's success is measured by demonstration of the following learning outcomes:

1. Ability to apply this knowledge to the formulation and solution of mechanical engineering problems

2. Ability to design thermal and mechanical components to achieve a desired goal. Ability to develop, conduct, and analyze experiments or tests that may aid in this design process.

3. An understanding of the necessary professional abilities of a practicing engineer including ethical conduct, teamwork in the pursuit of a goal, and effective communication

4. Ability to conduct computer-based design and analysis in engineering applications

5. Exposure to a general education program that aids in the understanding of and increases the appreciation for the "non-technical" world

6. Realization of the business environment in which engineering is practiced.

7. Awareness and necessity of continuing education, graduate study, and other lifelong learning experiences

8. Interest groups within the faculty provide instruction in four areas: design; energy and fluids; mechanics, materials and manufacturing; and systems and dynamics. Departmental thrust areas for graduate and undergraduate research include: environment; healthcare; information technology; and manufacturing. Several on-going senior capstone design projects provide both undergraduate and graduate students with hands-on, interdisciplinary, team-driven opportunities that encompass such diverse topics as Formula SAE car; human-powered submarine, mechatronics, and fuel cell technology.

• **Instructional and Research Facilities:** The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.

• **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- **Research, Internships, and Service Learning:** The department participates in the College of Engineering Co-op Program. The Center for Career Services also lists internship opportunities.

- **Department Scholarships:** The department offers approximately forty scholarships each year. Scholarship applications are available on the College of Engineering Website. The deadline for scholarship applications is April 1. Sophomores may apply for scholarship consideration before being admitted to the department.

- **Student Organizations/Associations:**
  - American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE)
  - American Society of Mechanical Engineers (ASME)
  - Pi Tau Sigma - Mechanical Engineering Honor Society (PTS)
  - Society of Automotive Engineers (SAE)
  - Society of Manufacturing Engineers (SME)
  - Society of Naval Architects and Marine Engineers (SNAME)
  - Society of Women Engineers (SWE)

---

**Graduate Program**

Graduate Program Coordinator  
143 Mechanical Engineering Bldg, Box 352600  
(206) 543-5090  
megrad@uw.edu

The Department of Mechanical Engineering offers graduate programs leading to the degrees of Master of Science in Mechanical Engineering (MSME) and Doctor of Philosophy (PhD). The department also provides authorized options leading to the College-wide Master of Science in Engineering (MSE) degree. These degrees provide balanced combinations of formal instruction and independent research or design experience. Although there are thesis and non-thesis options for the MSME, completion of a thesis is highly recommended.

Individual projects may be drawn from a wide spectrum of topics, which include mechanical and energy conservation systems, heat transfer, combustion, fluid mechanics, applied mechanics, computational mechanics, computer-aided design and manufacturing, production systems, materials behavior, robotics, controls, vibrations, and applications of mechanical engineering science to a variety of such interdisciplinary fields as bioengineering, ocean engineering, environmental engineering, nanotechnology, micro electro-mechanical systems, and acoustics. Flexible requirements for coursework provide opportunities both for a broad scientific and professional background and for specialty training.

**Master of Science in Mechanical Engineering**

**Admission Requirements**

1. **Grade Point Average:** The Graduate School requires a minimum 3.00 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework to
receive consideration. The department prefers an minimum overall 3.20
dergraduate GPA. In addition, the department prefers that PhD applicants have a
minimum 3.5 MS GPA.

2. Quality and difficulty of courses taken and universities and colleges attended.

3. GRE General Test: Minimum GRE scores of 450 Verbal (350 if English is not a
native language), 650 Quantitative, and 4.0 Analytical Writing

4. Three letters of recommendation

5. Statement of purpose

6. Official transcripts from all colleges/universities attended

7. Professional experience, if applicable

8. English requirements for foreign nationals: TOEFL scores for foreign nationals
whose native language is not English, with a minimum score of 580 for the paper
examination and 237 for the computer-based examination

**Degree Requirements**

42 credits, as follows:

1. Thesis-option students must register for 12 credits of thesis research and 30 credits
of related numerically graded coursework. Non-thesis option students must take all
42 credits in numerically graded courses.

2. Course grades must be 2.7 or above

3. At least 12 credits for the thesis option and 18 credits for the non-thesis option must
be taken in 500-level mechanical engineering courses, including 6 credits of
mathematical and engineering analysis requirements: M E 564 and M E 565.

4. At least 3 credits of computational or numerical analysis must be taken from the
following list of approved courses (or from an approved plan of individual study
conducted as part of thesis research): M E 535, AA 543, AA 540, CEE 504, E E
578, AMATH 581, and AMATH 584.

5. The remaining credits (18 for thesis-option students and 24 for non-thesis option
students) may be from other departments, and may include a maximum of 9 credits
(12 credits for non-thesis) at the 400 course level (excluding M E 498 and M E 499).

6. Non-thesis option students may substitute up to 6 credits of M E 599 Special
Projects (not to be confused with the class M E 599) for 6 credits of classroom
courses. Permission forms for project proposals can be obtained from the
Mechanical Engineering Student Services Office. The student must write a research
paper under the supervision of a faculty member and the credits must be taken for a
numerical grade.

For thesis-option students, special projects courses such as M E 599 and M E 600 do not
count toward the 42-credit total unless the project is recommended by the student's faculty
supervisor and pre-approved by the Graduate Program Coordinator. Seminar requirement:
All full-time students must register for a seminar course every quarter while in the master's
program. Quarterly registration for seminars is necessary for satisfactory progress in the
program, but does not count toward the 42 credits of numerically graded coursework and
thesis research required for graduation.

**Doctor of Philosophy**
Admission Requirements

1. **Grade Point Average:** The Graduate School requires a minimum 3.00 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework for admission. The department prefers an overall minimum 3.20 undergraduate GPA. In addition, the department prefers that PhD applicants have a minimum 3.50 MS GPA.

2. Quality and difficulty of courses taken and universities and colleges attended

3. **GRE General Test:** The department requires the following minimum GRE scores:
   - 450 Verbal (350 if English is not a native language),
   - 650 Quantitative,
   - 4.0 Analytical Writing.

4. Three letters of recommendation

5. Statement of purpose

6. Official transcripts from all colleges/universities attended

7. Professional experience, if applicable

8. **English requirements for foreign nationals:** TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper exam and 237 for the computer-based exam

Degree Requirements

90 credits, to include:

1. **Advisory Committee:** During the first year of post-master's study, the student should select a two- to three-person advisory committee from the Mechanical Engineering Department.

2. **Coursework:** All new post-master's students must successfully complete two to three graduate courses per quarter in their first year of study, as approved by the advisory committee. Normally this includes a sequence in advanced applied mathematics.

3. **Seminar Requirement:** Post-master's students register for the mechanical engineering seminar (M E 520), in the autumn quarter of their matriculation year. Otherwise, students are encouraged to register for engineering seminar courses offered by other UW engineering programs, i.e., M E 518, M E 523, M E 591, AMATH 501, IND E 591, IND E 592, IND E 593, MSE 520. Seminar must be taken on a quarterly basis throughout the entire PhD program.

4. **Research:** Post-master's students must conduct initial research in their first year of study under the direction of the advisory committee. This requirement applies even if the student holds a teaching assistantship.

5. **Qualifying Examination:** Every full-time student in the department's PhD program is required to take the examination within one calendar after entry into the program.

6. **Supervisory Committee:** A graduate student is not considered a doctoral student until a Supervisory Committee has been appointed by the Dean of the Graduate School. Students need to provide the name of the committee chair, Graduate School Representative (GSR), and at least two mechanical engineering faculty for approval to the Graduate Program Coordinator (GPC). The department requires that at least three members of the committee be Mechanical Engineering faculty, two of whom must be core Mechanical Engineering faculty. This committee, established before the end of the second year of PhD study and no less than four months prior to scheduling the general examination, replaces the first-year Advisory Committee.
7. Dissertation Proposal: Prepared after the student has conducted one or two quarters of in-depth research, during which time the student should meet frequently with the committee chair. Submit copies of the proposal to all members of the Supervisory Committee prior to the examination. The proposal must be approved by the committee chair before the general examination is scheduled.

8. Dissertation Research: Registration for a minimum of 27 credits of dissertation research over a period of at least three quarters -- and at least two quarters after the general examination.

9. Reading Committee: The reading committee, consisting of three members drawn from the Supervisory Committee, must include at least two core Mechanical Engineering faculty.

10. Final Examination

11. Dissertation Defense

Research Facilities

The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.

Financial Aid

Financial aid is offered to full-time graduate students as funds permit. Funds, however, are limited and the assignment of assistantships and fellowships is highly competitive. Aid may be in the form of a research assistantship for sponsored programs, a fellowship provided by the University or industry, or a teaching assistantship.
COLLEGE OF ENGINEERING
MECHANICAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

M E 123 Introduction to Visualization and Computer-Aided Design (4) VLPA/NW Adee
Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional skills through freehand sketching and computer-aided design using parametric solid modeling. Offered: AWSpS.
View course details in MyPlan: M E 123

M E 124 Visualization and Computer-Aided Design Laboratory (2) VLPA/NW Adee
Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional visualization skills through computer-aided design using parametric solid modeling. Offered: AWSpS.
View course details in MyPlan: M E 124

M E 230 Kinematics and Dynamics (4) NW
Kinematics of particles, systems of particles, and rigid bodies; moving reference frames; kinetics of particles, systems of particles, and rigid bodies; equilibrium, energy, linear momentum, angular momentum. Prerequisite: A A 210. Instructors: Fabien
View course details in MyPlan: M E 230

M E 323 Engineering Thermodynamics (5)
Engineering thermodynamics, including thermodynamic concepts and properties, the first and second laws of thermodynamics, energy conversion, refrigeration, humidification, and combustion. Engineering design applications. Prerequisite: either CHEM 142 or CHEM 144; MATH 126; PHYS 121. Instructors: Kramlich
View course details in MyPlan: M E 323

M E 331 Introduction to Heat Transfer (4)
Study of heat transfer by conduction, radiation, and convection; elementary heat-exchanger design. Prerequisite: either M E 333 or CEE 342. Instructors: Emery
View course details in MyPlan: M E 331

M E 333 Introduction to Fluid Mechanics (5)
Introduction to the basic fluid laws and their application. Conservation equations, dynamic similarity, potential flow, boundary-layer concepts, effects of friction, compressible flow, fluid machinery, measurement techniques.
Prerequisite: AMATH 301; M E 323; either MATH 307 or AMATH 351. Instructors: Riley
View course details in MyPlan: M E 333

**M E 341 Energy and Environment (3) NW**  
Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with CHEM E 341/ENVIR 341; A.
View course details in MyPlan: M E 341

**M E 354 Mechanics of Materials Laboratory (5)**  
Properties and behavior of engineering materials including stress-strain relations, strength, deformation mechanisms, strength, deformation, fracture, creep, and cyclic fatigue. Introduces experimental techniques common to structural engineering, interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Lecture and laboratory. Prerequisite: MSE 170, CEE 220. Instructors: Tuttle
View course details in MyPlan: M E 354

**M E 355 Introduction to Manufacturing Processes (4)**  
Study of manufacturing processes, including interrelationships between the properties of the material, the manufacturing process, and the design of components. Interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Prerequisite: M E 354. Instructors: Ramulu
View course details in MyPlan: M E 355

**M E 356 Machine Design Analysis (4)**  
Analysis, design, and selection of mechanical and electromechanical subsystems and elements, such as gears, linkages, cams, motors, and bearings. Prerequisite: M E 354. Instructors: Chung
View course details in MyPlan: M E 356

**M E 373 Introduction to System Dynamics (5)**  
Mathematical modeling, analysis, and design of physical dynamic systems involving energy storage and transfer by lumped-parameter linear elements. Time-domain response by analytical methods and numeric simulation. Laboratory experiments. Prerequisite: either AMATH 351 or MATH 307; either AMATH 352 or MATH 308; E E 215; M E 230. Instructors: Garbini
View course details in MyPlan: M E 373

**M E 374 Systems Dynamic Analysis and Design (5)**  
Extension of M E 373. Frequency response analysis, generalized impedance concepts and applications, Fourier series analysis and Laplace transform techniques. Modeling and analysis of electromechanical actuators and rotating machinery. Laboratory experiments and design projects. Prerequisite: AMATH 301; M E 373. Instructors: Garbini
View course details in MyPlan: M E 374

**M E 395 Introduction to Mechanical Design (4)**  
Design process and methodology; decision making; optimization techniques; project planning; engineering economics; probabilistic and statistical aspects of mechanical design; ethical and legal issues. Prerequisite: M E 123; M E 323; IND E 315 or MATH 390/STAT 390 either of which may be taken concurrently. Instructors: Cooper
View course details in MyPlan: M E 395

**M E 406 Corrosion and Surface Treatment of Materials (3) Sandwith**  
Corrosion fundamentals and forms (galvanic, crevice, pitting, stress corrosion, erosion, hydrogen, and leaching). Principles of design, materials selection, cathodic protection and surface treatments (coatings, carburizing, nitriding, and plating) applied to reduce corrosion. Failure analysis applied to case studies.
View course details in MyPlan: M E 406
M E 409 Introduction to Numerical Control and Computer-Aided Manufacturing (3) Control system fundamentals, numerical control (NC) machine control systems, and the design aspect of NC machine tools, programming methods of NC machines, computer-aided manufacturing, CNC, DNC, and process optimization. Prerequisite: M E 355 which may be taken concurrently. Instructors: Ramulu View course details in MyPlan: M E 409

M E 411 Biological Frameworks for Engineers (3) Sniadecki Introduces the fundamentals of biology for an engineer. Covers mechanisms and biomechanics of DNA, proteins, cells, connective tissue, musculoskeletal tissue, and cardiovascular tissue, integration principles of living systems, structure-function relationships, and techniques to study biology and medicine, and tissue engineering. Offered: A. View course details in MyPlan: M E 411

M E 414 Engineering Innovation and Medicine (3) J. POSNER, P. REINHALL, K. STEELE Introduces the role of innovation and engineering in the design of medical devices and healthcare technologies, applicable both to medical practice and healthcare-focused engineering. May serve as the first course in a medically related senior design project sequence. Discusses medical practice, clinical needs finding, FDA regulation, insurance reimbursement, intellectual property, and the medical device design process. Offered: A. View course details in MyPlan: M E 414

M E 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/ENVIR 415. View course details in MyPlan: M E 415

M E 416 Engineering Innovation in Medicine Design Preparation (3) J. POSNER, K. STEELE Team based design of solutions to challenges in healthcare. Second course in a health focused senior capstone design project sequence. Student teams are asked to define the clinical need, identify core functions and design specifications, identify prior art, ideate and evaluate designs, and develop engineering models of designs. Prerequisite: M E 414. Offered: W. View course details in MyPlan: M E 416

M E 425 HVAC Engineering (4) Heating, ventilating, and air conditioning of built environment. Human comfort, psychometric processes, load computations, fluid distribution, and controls. Design analysis of HVAC system is taught in the lectures and applied in the class project. Prerequisite: M E 323; M E 331. Instructors: Emery View course details in MyPlan: M E 425

M E 426 Renewable Energy II (3) B. POLAGYE Explores renewable energy principles and practices of energy conversion, focusing on energy conversion from wind and water. Prerequisite: M E 333. View course details in MyPlan: M E 426

M E 430 Advanced Energy Conversion Systems (4) Advanced and renewable energy conversion systems and technologies are treated. Included are high efficiency combined cycles; renewable energy conversion involving solar, wind, and biomass; direct energy conversion and fuel cells; and nuclear energy. Environmental consequences of energy conversion and environmental control
are discussed. Prerequisite: M E 323. Instructors: Kramlich
View course details in MyPlan: M E 430

M E 431 Advanced Fluid Mechanics (4)
Advanced topics in fluid mechanics, including kinematics, potential theory and vortex dynamics, viscous flow, turbulence, experimental and numerical methods, and design. Prerequisite: M E 333. Instructors: Mescher
View course details in MyPlan: M E 431

M E 433 Turbomachinery (4) Aliseda
Thermodynamics, gas dynamics, and fluid mechanics of axial and centrifugal compressors, pumps, and turbines. Selection of components for engineering applications. Design problems and/or laboratory experiments to illustrate operating characteristics of turbomachines.
View course details in MyPlan: M E 433

M E 440 Advanced Mechanics of Materials and Solids (3)
View course details in MyPlan: M E 440

M E 442 Renewable Energy (4) NW P. MALTE
Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either M E 323, CHEM E 325, A A 260, or E E 351. Offered: jointly with CHEM E 442; W.
View course details in MyPlan: M E 442

M E 445 Introduction to Biomechanics (4) J. SANDERS
Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with BIOEN 440; Sp.
View course details in MyPlan: M E 445

M E 450 Introduction to Composite Materials and Design (3) Tuttle
Stress and strain analysis of continuous fiber composite materials. Orthotropic elasticity, lamination theory, failure criterion, and design philosophies, as applied to structural polymeric composites.
View course details in MyPlan: M E 450

M E 459 Introduction to Fracture Mechanics (3)
Deformation processes leading to fracture, and linear elastic fracture mechanics. Fatigue crack propagation. Fracture control and failure analysis. Prerequisite: M E 354; M E 356. Instructors: Ramulu
View course details in MyPlan: M E 459

M E 460 Kinematics and Linkage Design (3) Ganter
Synthesis of linkage-type mechanisms using graphical and computer methods.
View course details in MyPlan: M E 460

M E 461 Mechanics of Thin Films (3) Wang
Provides an overview of the thin film deposition processes; the stress and microstructure development during film growth; the mechanisms of adhesion; delamination and fracture; and the state-of-the-art characterization techniques for the microstructure and mechanical properties of thin films, coatings, and nanomaterials. Offered: A.
View course details in MyPlan: M E 461
M E 468 Air-Pollution Control Equipment Design (3)
Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CEE 494/CHEM E 468.
View course details in MyPlan: M E 468

M E 469 Applications of Dynamics in Engineering (4)
Application of the principles of dynamics to selected engineering problems, such as suspension systems, gyroscopes, electromechanical devices. Includes introduction to energy methods, Hamilton's principle and Lagrange equations, and the design of dynamic system. Prerequisite: M E 374. Instructors: Storti
View course details in MyPlan: M E 469

M E 470 Mechanical Vibrations (3)
View course details in MyPlan: M E 470

M E 471 Automatic Control (4)
Dynamic system modeling; control system stability and performance analysis; compensator design by Bode and root-locus methods. Prerequisite: M E 374. Instructors: Berg
View course details in MyPlan: M E 471

M E 473 Instrumentation (4)
Principles and practice of industrial and laboratory measurement. Dynamics of instrument response; generalized performance analysis of sensor systems; theory of transducers for motion, force, pressure, flow, and other measurements. Lecture and laboratory. Prerequisite: M E 374. Instructors: Garbini
View course details in MyPlan: M E 473

M E 477 Embedded Computing in Mechanical Systems (4)
Analysis of electromechanical systems employing microcomputers for control or data acquisition. Microcomputer architecture, memory organization, C language programming, interfaces, and communications. Particular emphasis on design of hardware and software interfaces for real-time interaction with mechanical systems. Weekly laboratory. Prerequisite: M E 374. Instructors: Garbini
View course details in MyPlan: M E 477

M E 478 Finite Element Analysis (4)
Development of theory and concepts of finite element analysis. Applications in all areas of mechanical engineering, including mechanics of solids, heat transfer, and design of dynamical systems. Weekly computer exercises. Prerequisite: M E 123; M E 374; either MATH 308 or AMATH 352. Instructors: Reinhall
View course details in MyPlan: M E 478

M E 480 Introduction to Computer-Aided Technology (4)
Principles of computer-aided technology. Computer-aided design, engineering, drafting, and manufacturing; computer-aided design systems, geometry, computer graphics, hardware, computer-aided vehicle/system design synthesis. System demonstrations, laboratories, and site visits. Prerequisite: M E 123; AMATH 301. Instructors: Ganter
View course details in MyPlan: M E 480

M E 481 Internal Combustion Engines (4)
Internal combustion engines including spark and compression ignition piston engines, with focus on engine performance and the thermodynamics, combustion, emissions, and efficiency of engines. Impact of greenhouse gas constraints on engines. Prerequisite: either M E 323, A A 260, or CHEM E 325. Instructors: Kramlich,
ME 485 Introduction to Electronic Packaging and Materials (3)
The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Instructors: Taya Offered: jointly with MSE 485; AW.

ME 487 Laboratory in Electronic Packaging and Materials (1) Taya, Stoebe
Laboratory course to accompany ME 485 Experiments related to design, processing and reliability of electronic packaging used in consumer electronics. Co-requisite: ME 485. Offered: jointly with MSE 487.

ME 494 Mechatronics Design Preparation (1)
Design laboratory preparation. Covers the development of functional specifications; exploration of prior art; static and dynamic modeling. Prerequisite: ME 471; M 473. Instructors: Garbini Offered: W.

ME 495 Mechanical Engineering Design (4)
Design laboratory involving the identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and prerequisite texts used as reference sources. Prerequisite: ME 395. Instructors: Cooper

ME 496 Technology-Based Entrepreneurship (3) Furness
Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Offered: jointly with IND E 496; Sp.

ME 498 Special Topics in Mechanical Engineering (1-5, max. 6)
Lecture and/or laboratory. Maximum of 6 credits may be applied toward an undergraduate degree.

ME 499 Special Projects (2-5, max. 6)
Written report required.

ME 500 Advanced Composite Structural Analysis (3)
Covers advanced stress analysis methods for composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A A 532. Offered: jointly with A A 535; Sp, odd years.

ME 501 Modern Manufacturing Processes (3) Ramulu
General survey and introduction to modern manufacturing engineering processes. Fundamental principles and practices of modern manufacturing processes. Case studies and exercises relating the course material directly to modern industrial practice. Offered: A.
M E 503 Continuum Mechanics (3)
Reviews concepts of motion, stress, energy for a general continuum; conservation of mass, momentum, and energy; and the second law; constitutive equations for linear/nonlinear elastic, viscous/inviscid fluids, and general materials; and examples/solutions for solid/fluid materials. Offered: jointly with A A 503; A. 
View course details in MyPlan: M E 503

M E 504 Introduction to Microelectro Mechanical Systems (4)
Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 504/MSE 504.
View course details in MyPlan: M E 504

M E 507 Fluid Mechanics (3)
Covers inviscid and viscous incompressible flows, exact solutions of laminar flows, creeping flows, boundary layers, free-shear flows, vorticity equation, and introduction to vortex dynamics. Offered: jointly with A A 507; W.
View course details in MyPlan: M E 507

M E 508 Theory and Design for Mechanical Measurements (3)
Fundamental concepts of mechanical measurements, principles of sensors and transducers, signal conditioning and data acquisition, advanced experiment planning and analysis, and applications in mechanical engineering. 
View course details in MyPlan: M E 508

M E 510 Mathematical Foundations of Systems Theory (4)
Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/CHEM E 510/E E 510. 
View course details in MyPlan: M E 510

M E 511 Biological Frameworks for Engineers (3) Sniadecki
Introduces the fundamentals of biology for an engineer. Covers mechanisms and biomechanics of DNA, proteins, cells, connective tissue, musculoskeletal tissue, and cardiovascular tissue, integration principles of living systems, structure-function relationships, and techniques to study biology and medicine, and tissue engineering. Offered: A. 
View course details in MyPlan: M E 511

M E 515 Life Cycle Assessment (3) Cooper
Presents and discusses the computation structure and data sources for environmental Life Cycle Assessment. Uses Life Cycle Assessment to analyze materials, products, and services. The analysis either identifies opportunities for improvements or selects a superior alternative on the basis of pollution prevention and resource conservation. Offered: W.
View course details in MyPlan: M E 515

M E 520 Seminar (-1, max. 6)
Credit/no-credit only. Offered: AWSp. 
View course details in MyPlan: M E 520

M E 521 Thermodynamics (3)
Fundamental concepts of temperature, thermodynamic properties, and systems. The first, second, and combined laws. Development of the relations of classical thermodynamics. Introduction to statistical thermodynamics. Prerequisite: M E 323 and graduate standing in mechanical engineering or permission of instructor. Instructors: Kramlich Offered: A. 
View course details in MyPlan: M E 521
M E 522 Thermodynamics (3)  
Topics from statistical thermodynamics, including the Boltzmann, Bose-Einstein, and Fermi-Dirac statistics. Solutions of the Schrödinger wave equation and evaluation of the partition function for translation, rotation, and vibration. Prerequisite: M E 521 or permission of instructor. Instructors: Malte  
View course details in MyPlan: M E 522

M E 523 Energy and Environment Seminar (1, max. 20) Malte  
Student discussions of topics in combustion science and technology, alternative fuels, renewable energy, environmental consequences of energy conversion, and design for environment. Also, presentations by outside experts. May be repeated for credit. Credit/no-credit only. Offered: AWSp.  
View course details in MyPlan: M E 523

M E 524 Combustion (3)  
Chemical and physical processes of combustion with applications to design of combustors, fuel selection, and consideration of environmental effects. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Instructors: Kramlich Offered: Sp, odd years.  
View course details in MyPlan: M E 524

M E 525 Applied Acoustics I (3)  
Introduces acoustics through various applications such as medical ultrasound, underwater sound, noise control and vibrations. Includes linear acoustics, wave equation, planewave solutions, acoustics scales; reflection, refraction, scattering and diffraction, acoustic sources, radiation form transmission through plates. Prerequisite: graduate standing in Engineering, allied field, or permission of instructor. Instructors: Dahl, Reinhall Offered: Sp.  
View course details in MyPlan: M E 525

M E 526 Special Topics in Acoustics (3)  
Advanced study of special topics in acoustics, such as medical ultrasound, underwater sound, noise control and vibrations. Prerequisite: ME 525, or permission of instructor. Instructors: Dahl, Reinhall Offered: A.  
View course details in MyPlan: M E 526

M E 527 Musculoskeletal Biomechanics (4) R. CHING  
Engineering principles and mechanics applied to the musculoskeletal system including structure-function property relationships of musculoskeletal tissues, the biomechanics of joint systems, and applications of biomechanics in industry and research. Offered: jointly with BIOEN 520; W.  
View course details in MyPlan: M E 527

M E 528 Acoustics of Environmental Noise (4)  
Offered: jointly with CEE 554.  
View course details in MyPlan: M E 528

M E 529 Advanced Energy Conservation Systems (4) Kramlich  
Covers advanced energy conversion systems and technologies, including high efficiency combined cycles, advanced rankine, integrated gasification combined cycle, nuclear, biomass thermal conversion, and fuels cells. Discusses environmental consequences. Offered: A.  
View course details in MyPlan: M E 529

M E 530 Radiative Heat Transfer (3) Mescher  
Covers black and gray body radiation, radiative material properties, radiation exchange between surfaces, radiation in participating media, and combined radiation with conduction or convection. Offered: W.  
View course details in MyPlan: M E 530

M E 531 Conductive Heat Transfer (3)  
Analysis of steady-state and transient heat conduction in single- and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Prerequisite: graduate standing in mechanical engineering or
M E 532 Convective Heat Transfer (3)
Introduction to fluid flow and boundary-layer theory as applicable to forced- and natural-convection heat transfer. Condensation and boiling heat transfer. Prerequisite: graduate standing or permission of instructor. Instructors: Kramlich Offered: Sp.
View course details in MyPlan: M E 532

M E 534 Fluid Mechanics II (3)
Review of basic principles, some exact solutions and their interpretation, waves (water waves, sound waves, shock waves), boundary layers, jets and wakes, flow stability, turbulence, applications. Prerequisite: M E 507 or permission of instructor. Instructors: Riley Offered: W.
View course details in MyPlan: M E 534

M E 535 Computational Techniques in Mechanical Engineering (3)
Advanced heat transfer studies of interest to mechanical engineers. Subject coverage varies from year to year. Prerequisite: permission of instructor. Instructors: Emery Offered: Sp.
View course details in MyPlan: M E 535

M E 536 Micro and Nanoscale Fluid Transport Phenomena (3) Posner, Shen
Focuses on fundamental fluid transport physics at the micro/ and nanometer scale for applications in micro/nanofluidic devices. Presents the core concepts of low-Reynolds number Newtonian fluid mechanics; mass transfer; charged double layers; electrokinetically driven flow and transport; and surface tension. Discusses state of the art micro and nanoscale total analytical devices. Offered: WSp.
View course details in MyPlan: M E 536

M E 537 Topics in Fluid Mechanics (3)
Selected fluid mechanics relevant to current advances in research and application. Topics selected vary with faculty and student interest, but have included flow stability, special topics in turbulence, and turbulent reacting flows.
View course details in MyPlan: M E 537

M E 538 Advanced Fluid Mechanics (4) J. RILEY
Advanced topics in fluid mechanics, including kinematics; potential theory and vortex dynamics; viscous flow; turbulence; numerical methods; and design. Offered: A.
View course details in MyPlan: M E 538

M E 539 Renewable Energy I (4) Malte
Renewable energy, principles and practices of energy conversion, with focus on solar energy and bio-energy. Offered: W.
View course details in MyPlan: M E 539

M E 540 Renewable Energy II (3) Malte
Explores renewable energy, principles and practices of energy conversion, focusing on wind and hydrokinetic energy. Offered: Sp.
View course details in MyPlan: M E 540

M E 541 Fatigue of Materials (3) Ramulu
Macro and micro aspects of fatigue of metals and fatigue mechanisms. Analytical methods for fatigue and life assessment in advanced materials. Offered: W.
View course details in MyPlan: M E 541

M E 543 Fluid Turbulence (3)
Methods of characterizing fluid turbulence; probability concepts; spatial and temporal velocity correlations;
spectral energy transfer; turbulent diffusion; isotropic turbulence and Kolmogoroff’s hypothesis; Taylor’s hypothesis; hot-wire measurement techniques. Prerequisite: 3 credits of graduate level fluid mechanics or permission of instructor. Offered: W, even years.

View course details in MyPlan: M E 543

M E 544 Advanced Turbulence Modeling Techniques (3)
The Reynolds stress transport equations; plane homogeneous shear flow; modeling the pressure-strain, diffusion, and dissipation rate correlation tensors; one and two-equation turbulence models; near-wall turbulence and wall functions; limitations of length scale and eddy viscosity modeling. Prerequisite: 3 credits of turbulence-related coursework. Instructors: Riley Offered: Sp, even years.

View course details in MyPlan: M E 544

M E 546 Micro-Scale Heat Transfer (3) Mescher
Covers advanced heat conduction and radiation principles, emphasizing micro-scale applications. Offered: Sp, odd years.

View course details in MyPlan: M E 546

M E 547 Linear Systems Theory (4)
Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Offered: jointly with A A 547/E E 547.

View course details in MyPlan: M E 547

M E 548 Linear Multivariable Control (3)
Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/E E 548.

View course details in MyPlan: M E 548

M E 549 Estimation and System Identification (3)

View course details in MyPlan: M E 549

M E 550 Nonlinear Optimal Control (3)
Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with A A 550/E E 550.

View course details in MyPlan: M E 550

M E 551 Elasticity I: Elastostatics (3) Taya
Elastostatics, including general formulations of 2D and 3D elastostatic problems (stress function method, complex variable method, displacement potential method). Eshelby’s method is emphasized and used to solve 2D and 3D problems with special application to composite materials. Offered: W.

View course details in MyPlan: M E 551

M E 552 Viscoelasticity and Plasticity (3) Taya
Covers viscoelasticity, including the stress-strain equations in terms of convolution integral, Fourier transform, and Laplace transform modes. Plasticity focuses on generalized plastic behavior.

View course details in MyPlan: M E 552
M E 553 Adhesion Mechanics (3)
Introduction to adhesive systems and test/evaluation techniques. Stress/strain analysis methods used with adhesive joints. Examples of practical applications. Prerequisite: graduate student status or permission of instructor. Instructors: Tuttle Offered: Sp, even years.
View course details in MyPlan: M E 553

M E 555 Thermoelasticity (3)
Basic equations of thermoelasticity for isotropic elastic solids. Analysis of disks, cylinders, spheres, beams, and plates under steady temperature and sudden and slow heating and cooling. Introduction to thermoelastic stability. Prerequisite: M E 551 or permission of instructor. Instructors: Emery
View course details in MyPlan: M E 555

M E 556 Experimental Stress Analysis I (3)
Theory and practice of experimental techniques including strain gages and strain gage-based devices, thermocouples, LVDTs, and transducer design. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Instructors: Tuttle Offered: A.
View course details in MyPlan: M E 556

M E 557 Experimental Stress Analysis II (3)
Theory and practice of optical mechanics, including interferometric techniques (moire and holographic), geometric moir methods, and photoelasticity. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Instructors: Tuttle Offered: W, even years.
View course details in MyPlan: M E 557

M E 559 Introduction to Fracture Mechanics (3) Ramulu
Applications of linear fracture mechanics to failure analysis and fracture control based on actual case studies. Fracture toughness and fatigue testing techniques, crack initiation, and propagation fatigue life prediction of mechanical components subjected to environmental effects. Offered: W.
View course details in MyPlan: M E 559

M E 561 Mechanics of Thin Films (3) Wang
Provides an overview of the thin film deposition processes; the stress and microstructure development during film growth; the mechanisms of adhesion; delamination and fracture; and the state-of-the-art characterization techniques for the microstructure and mechanical properties of thin films, coatings, and nanomaterials. Offered: A.
View course details in MyPlan: M E 561

M E 562 Introduction to Electronic Composites (3) Taya
Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic, and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Offered: jointly with MSE 562; Sp.
View course details in MyPlan: M E 562

M E 563 Advanced Composites: Design and Manufacturing (3)
Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with MSE 563; Sp.
View course details in MyPlan: M E 563

M E 564 Mechanical Engineering Analysis (3)
Application of mathematical methods to the description and analysis of systems in mechanical engineering. Analogies in heat transfer, fluid flow, stress distribution, dynamics, and feedback control. Prerequisite: graduate
standing in mechanical engineering or permission of instructor. Instructors: Storti Offered: A.
View course details in MyPlan: M E 564

M E 565 Mechanical Engineering Analysis (3)
Applications of vectors, matrices, and partial differential equations to mechanical engineering systems, including computational techniques and analogies. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Instructors: Storti Offered: W.
View course details in MyPlan: M E 565

M E 567 Micro- and Nanostructured Biosensors (3)
Focuses on biosensors based on micromachining and nanotechnology. The working principles on molecular detection and analysis are introduced with the fabrication process, system integration and evaluation. Helps students to classify biosensors detecting molecules, design the fabrication process and identify the evaluation methods. Offered: jointly with MOLENG 567; W.
View course details in MyPlan: M E 567

M E 568 Active and Sensing Materials (3) Taya
Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials include: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with MSE 568; Sp.
View course details in MyPlan: M E 568

M E 570 Manifolds and Geometry for Systems and Control (3)
Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate vs. coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with A A 570/E E 570; W, even years.
View course details in MyPlan: M E 570

M E 572 Methodologies for Engineering Design: Conceptual Design (3)
Methodologies particularly useful in the conceptual or preliminary phase of a design. The design process. Impact of formulating independent functional requirements. Physical and functional coupling in design. Case studies in conceptual design of products and processes. Prerequisite: graduate standing or permission of instructor. Instructors: Kumar Offered: W, even years.
View course details in MyPlan: M E 572

M E 578 Convex Optimization (4)
View course details in MyPlan: M E 578

M E 580 Geometric Methods for Non-Linear Control Systems (3)
Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with A A 580/E E 580; Sp, even years.
View course details in MyPlan: M E 580

M E 581 Digital Control System Design (4) M. BERG
Digital control system design by classical methods. Discrete-time systems and the z-transform. Modeling

**View course details in MyPlan: M E 581**

**M E 582 Introduction to Discrete Event Systems (3)**

**View course details in MyPlan: M E 582**

**M E 583 Nonlinear Control Systems (3)**

**View course details in MyPlan: M E 583**

**M E 585 System Identification and Adaptive Control (3)**

**View course details in MyPlan: M E 585**

**M E 588 Dynamics and Vibrations (3)**
Variational techniques, Hamilton's principle, Lagrange's equations applied to dynamics of particles and rigid bodies. Vibration analysis of multi-degree-of-freedom and continuous systems. Prerequisite: graduate standing in engineering or permission of instructor. Instructors: Shen Offered: A.

**View course details in MyPlan: M E 588**

**M E 589 Vibrations (3)**
Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Nonlinear systems are emphasized. Prerequisite: M E 588 or permission of instructor. Instructors: Storti Offered: W, even years.

**View course details in MyPlan: M E 589**

**M E 591 Robotics and Control Systems Colloquium (1, max. 30)**
Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/CHEM E 591/E E 591.

**View course details in MyPlan: M E 591**

**M E 593 Feedforward Control (3)**
Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with A A 593/E E 593; Sp, even years.

**View course details in MyPlan: M E 593**

**M E 594 Robust Control (3)**
Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered:
jointly with A A 594/E E 594; Sp, odd years.
View course details in MyPlan: M E 594

M E 597 Networked Dynamics Systems (3)
Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/E E 597.
View course details in MyPlan: M E 597

M E 598 Graduate Projects (1-6)
Doctoral seminar. Offered: AWSpS.
View course details in MyPlan: M E 598

M E 599 Special Topics (1-5, max. 9)
Written report required. Prerequisite: permission of department chairperson. Offered: AWSpS.
View course details in MyPlan: M E 599

M E 600 Independent Study or Research (*-)
Written report required. Offered: AWSpS.
View course details in MyPlan: M E 600

M E 700 Master's Thesis (*-)
Offered: AWSpS.
View course details in MyPlan: M E 700

M E 800 Doctoral Dissertation (*-)
Offered: AWSpS.
View course details in MyPlan: M E 800
College of the Environment

College Overview

Dean
Lisa Graumlich
209 Ocean Sciences

Associate Deans
Bruce Nelson, Research
Julia Parrish, Academic Affairs and Diversity

Rapidly changing interactions between the Earth’s environment and human activities drive the research and teaching at the College of the Environment. By connecting some of the world’s leading educators and researchers with students, practitioners, and citizens, the College cultivates communities that work with and learn from each other as they tackle the environmental challenges of the twenty-first century.

For decades the UW has been recognized as home to one of the strongest constellations of environmental and intellectual talent in the world. In fulfillment of a vision for a bold, resourced, enduring, and effective environmental hub, the UW launched the College of the Environment in July 2009. The College fosters existing and new collaborations between faculty, staff, and students who are engaged in the study of the Earth’s dynamic land, water, and atmosphere systems; the development and application of engineering and technological advances; and the impact of policy and human dimensions on the environment and the management of natural resources.

Offering more than 20 degree programs, ranging from bachelor to doctoral, and granting more than 450 degrees annually, the College is comprised of the following core units:

- School of Aquatic and Fishery Sciences
- Department of Atmospheric Sciences
- Department of Earth and Space Sciences
- Program on the Environment
- School of Environmental and Forest Sciences
- School of Marine and Environmental Affairs
- School of Oceanography
- Friday Harbor Laboratories
- Joint Institute for the Study of the Atmosphere and Ocean
- Washington NASA Space Grant Consortium
- Washington Sea Grant Program

http://www.washington.edu/students/gencat/academic/college_environment.html
College Facilities

The College of the Environment main office is in the Ocean Sciences Building, Suite 200, located at 1492 NE Boat Street. For locations of all College of the Environment buildings, see the Academics-at-a-Glance page for links to campus maps showing the College's school and departmental buildings.

The College’s facilities and field stations include the following, among others: Center for Sustainable Forestry at Pack Forest, Friday Harbor Laboratories, Pacific Northwest Seismic Network, Research Vessel Thomas G. Thompson, and Wind River Crane Canopy Research Center.

Undergraduate Program

The College of the Environment offers the following undergraduate degree options:

Bachelor Degree Programs

Bachelor of Science:

- Aquatic and Fishery Sciences
- Atmospheric Sciences
- Bioresource Science and Engineering
- Earth and Space Sciences (degree options areas: biology, environmental, geology, and physics)
- Environmental Science and Resource Management (degree option areas: landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation)
- Oceanography

Bachelor of Arts:

- Environmental Studies

Minors

- Aquatic and Fishery Sciences
- Arctic Studies
- Atmospheric Sciences
- Climate Science
- Earth and Space Sciences
- Environmental Science and Resource Management
- Environmental Studies
Admission

The College does not have admission requirements beyond those required for admission to the University of Washington. Most of the majors within the College are open admission and can be declared at any time by students in good academic standing, except for the major in Bioresource Science and Engineering within the School of Environmental and Forest Sciences, which has a competitive admission process.

General Education Requirements

Minimum 85 credits as follows:

- **Written & Oral Communication**: One 5-credit English composition (C) course from the approved University list with a minimum 2.0 grade; 10 additional writing credits.
- **Quantitative & Symbolic Reasoning (QSR)**: 10 credits. See departmental lists for specific quantitative and symbolic reasoning requirements.
- **Areas of Knowledge**
  - **Visual, Literary, & Performing Arts**: 10 credits. Visual, Literary, & Performing Arts (VLPA) includes courses such as literature, art, music, and drama which stress the essential qualities of individual forms of expression. First- and second-quarter language courses may not be counted toward the VLPA requirement. (May substitute first-year language courses for VLPA requirements by completing a third quarter of a three-course sequence. Language courses at the second-year level and beyond may be counted toward the VLPA requirement.)
  - **Individuals & Societies (I&S)**: 20 credits, with at least 10 credits out of major*. Individuals & Societies includes courses in subjects such as history, economics, psychology, and sociology which stress the social nature of mankind, and the development and analysis of societies and social institutions.
  - **Natural World (NW)**: 20 credits, with at least 10 credits out of major*. See departmental list for specific natural world requirements.
  - **Additional Areas of Knowledge**: 10 credits

* Definition of "out of major": Course must have an out-of-major prefix and may not overlap with courses required for the major. This includes cross-listed courses.

Graduate Program

The College of the Environment offers the following graduate degree options:

- **Master's Degree Programs**
  - Master of Science:
    - Aquatic and Fishery Sciences
    - Atmospheric Sciences
    - Earth and Space Sciences
Science for Teachers Program Overview

The Master of Science in Science for Teachers (MSST) is a graduate degree in science developed specifically for teachers and administered by the College of the Environment. Because science is moving at ever-increasing speeds, with new breakthroughs, innovations and technologies, keeping pace requires science educators to engage in hands-on, high-level, real-life science. The MSST program has three core components: practicing science through an independently-designed research project, deepened disciplinary content knowledge, and the development of an interdisciplinary skill set. These components work together to give teachers the opportunity to experience directly how the three dimensions of the Next Generation Science Standards (cross-cutting concepts, science and engineering practices, core disciplinary ideas) are integrated and realized in cutting-edge contemporary science.

Graduate Program

Master of Science (Science for Teachers)

The College of the Environment offers the Master of Science in Science for Teachers (MSST), a graduate degree in science developed specifically for teachers. The MSST program provides a unique opportunity to conduct scientific research with world-renowned UW faculty and research professionals as a mechanism to strengthen and broaden content knowledge and scientific skill sets. This degree is designed to:

- Move science teachers through the skills that are fundamental to today’s scientific practice – experimental design, data manipulation, data visualization, and science communication
- Create a flexible and personally-tailored elective set within the student’s discipline of choice
- Culminate in the design and implementation of an individualized and independent scientific research project

The flexible course structure is especially designed to fit the needs of K-12 teachers. Course work can be taken throughout the UW, and faculty research mentors range across Colleges of the Environment, Arts and Sciences, Public Health, and Medicine. MSST is intended to be completed in two years and may be compatible with part-time work or teaching. Students may take additional time to complete their degree if needed.

The Master of Science in Science for Teachers does not lead to teacher certification.

Admission Requirements

Admission to the Master of Science (Science for Teachers) degree program is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general test scores, three letters of recommendation, official academic transcripts, minimum GPA of 3.0 required for last two years of study, a bachelor’s degree in a science field (or demonstrated equivalency), and experience working in an educational setting. Applicants must apply directly to, and be accepted by, the University’s Graduate School. Applications are accepted for Autumn Quarter only.

Degree Requirements

36 total credits as follows:

1. 18 credits at the 500-level or higher
2. Minimum 2.7 grade in 18 credits at the 400-level or higher
3. Minimum 3.00 GPA
4. Core courses based on shared skills sets, with a secondary focus on developing student cohorts:
   - SCI T 501; SCI T 502; SCI T 503; SCI T 600 (9-10 credits)
5. Statistics course (5 credits) at the 300-500 level
6. An elective pathway that the student and Graduate Program Coordinator develop based on the disciplinary needs of the student.

Financial Aid
The Master of Science (Science for Teachers) program does not provide funding to students. Applicants in need of support are encouraged to contact the UW Office of Student Financial Aid to explore options for grants, loans, scholarships, and work-study; to apply for College of the Environment Scholarships; and to investigate outside sources of funding.
Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

C ENV 110 Introduction to Food and the Environment (5) I&S/NW Hilborn
Relates the production and consumption of food to the major areas of environmental science including energy use, water consumption, biodiversity loss, soil loss, pollution, nutrient cycles, and climate change. Studies the basic science and how food production impacts the key processes.
View course details in MyPlan: C ENV 110

C ENV 190 Introductory Topics in Environment (1-5, max. 15)
Covers topics related to all areas of the environment.
View course details in MyPlan: C ENV 190

C ENV 410 MESA Introductory Tutor Training Workshop (1)
Tutor skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: ASp.
View course details in MyPlan: C ENV 410

C ENV 420 MESA Introductory Tutor Training Seminar (1-2)
Second course in the tutor training program. Continued development of tutoring skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: AW.
View course details in MyPlan: C ENV 420

C ENV 425 MESA Tutoring Practicum (1-3, max. 15)
Trained MESA tutors work in small groups with Seattle middle and high school students in math and science. Develop tutoring skills, share best practices, and problem solve through online interactions with the MESA tutoring program. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: C ENV 425

C ENV 430 MESA Advanced Tutor Training Seminar (1-2)
Advanced tutor training program. Continued development of tutoring skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: A.
View course details in MyPlan: C ENV 430
C ENV 490 Special Topics in Environment (1-5, max. 15)
Covers topics related to all areas of the environment depending on curricular needs and interests of students and faculty.
View course details in MyPlan: C ENV 490

C ENV 500 Communicating Science to the Public Effectively (3)
Teaches emerging scientists how to effectively communicate their research to the public. Uses lessons and tools such as group discussion, feedback, and practice. Credit/no-credit only. Offered: W.
View course details in MyPlan: C ENV 500

C ENV 590 Special Topics in Environment (1-5, max. 15)
Covers topics related to all areas of the environment depending on curricular needs and interests of students and faculty.

COLLEGE OF THE ENVIRONMENT
FRIDAY HARBOR LABS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**FHL 101 Introduction to Marine Biology in the San Juan Islands (1) NW M. DETHIER**
One-weekend, one-credit course designed to introduce students to the marine ecosystem of the San Juan Archipelago and the facilities of the Friday Harbor Laboratories, while doing basic exploration of marine biology. Students will spend two full-schedule days doing a variety of field and lab studies. Offered: Sp.
*View course details in MyPlan: FHL 101*

**FHL 305 Biology of Fishes (5) NW**
Covers the morphological, physiological, behavioral, and ecological diversity of fishes worldwide; provides a basic foundation for advanced courses in all areas of aquatic sciences. Participants engage in field-based collecting, copious dissection/illustration laboratories, and delve into scientific literature on this fascinating group's biology. Recommended: Recommended: 10 credits biological science. Offered: ASp.
*View course details in MyPlan: FHL 305*

**FHL 333 Special Topics in Marine Science (3/5)**
Selected topics in marine science, from science-content courses to courses in communicating science. Format may range from seminar/discussion to formal lectures to laboratory work. 5-credit versions will involve additional lab or working group time. Offered: ASp.
*View course details in MyPlan: FHL 333*

**FHL 375 Marine Mammals of the Salish Sea (5) NW D. GILES**
An overview of the marine mammals found in the Salish Sea: their biology, habitats and conservation. Field trips throughout the San Juan Archipelago allow observation of common species, involving identification and recording of behavior in nature. Prerequisite: BIOL 180, FISH 250, ENVIR 100, OCEAN 101, or OCEAN 200. Offered: Sp.
*View course details in MyPlan: FHL 375*

**FHL 430 Marine Zoology (5) NW**
Survey of groups of invertebrate animals represented in the San Juan Archipelago; natural history, functional morphology, ecology, distribution, habitat, adaptation, trophic interrelationships, and evolution. Prerequisite: BIOL 445, which must be taken concurrently; permission of Friday Harbor director. Offered: jointly with BIOL
FHL 430 Marine Invertebrate Zoology (9) NW
Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed live, and studied in detail. Taken at Friday Harbor Laboratories. Not open for credit to students who have taken BIOL 434. Offered: jointly with BIOL 432; S.
View course details in MyPlan: FHL 430

FHL 432 Marine Invertebrate Zoology (9) NW
Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed live, and studied in detail. Taken at Friday Harbor Laboratories. Not open for credit to students who have taken BIOL 434. Offered: jointly with BIOL 432; S.
View course details in MyPlan: FHL 432

FHL 435 Research Apprenticeship in Marine Science (15) NW
Immersive quarter in research in close collaboration with one-three faculty mentors on a specific topic that varies with the apprenticeship. Students engage in laboratory or field research in marine science, involving gathering, analyzing, and communicating results as part of a research team. Offered: jointly with BIOL 435/MARBIO 435; ASpS.
View course details in MyPlan: FHL 435

FHL 440 Marine Botany (5) NW
Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Taken at Friday Harbor laboratories. Prerequisite: either BIOL 220, B BIO 220, or TESC 140; BIOL 430, which must be taken concurrently. Offered: jointly with BIOL 445.
View course details in MyPlan: FHL 440

FHL 446 Marine Botany: Diversity and Ecology (9) NW T. MUMFORD
Introduces marine plants - the diversity, life histories, physiology, and ecology of seaweeds, seagrasses, and marsh plants in the Salish Sea. Emphasizes field and laboratory work, including the application of molecular techniques to explore algal diversity and evolution. Offered: S.
View course details in MyPlan: FHL 446

FHL 450 Nearshore Ecology Research Experience (6) NW M. DETHIER
A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research around a thematic focus of ecology of nearshore marine ecosystems, with lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 450; ASp.
View course details in MyPlan: FHL 450

FHL 460 Aquatic Animals Research Experience (6) NW P. DITSCHE-KURU
A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research around a thematic focus of aquatic animals, with lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 460; ASp.
View course details in MyPlan: FHL 460

FHL 470 Research in Marine Biology (1-15, max. 15) NW B. SWALLA
A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research in marine biology; credits vary with the scale of the project which may include lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 470; ASp.
View course details in MyPlan: FHL 470

FHL 490 Marine Sciences Seminar (1, max. 3) NW P. DITSCHE-KURU
Students attend seminars by marine scientists each week and ask questions about their seminars. Offered: ASpS.
View course details in MyPlan: FHL 490

FHL 492 Ecology and Conservation of Marine Birds and Mammals (9/15) NW
An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand
learning and individual research projects. Offered: jointly with FISH 492/MARBIO 492; S.
View course details in MyPlan: FHL 492

**FHL 528 Advanced Topics in Fish Biology (9, max. 27)**
Focuses on various aspects of fish biology, such as functional morphology, sensory biology, or swimming mechanics. Taught at Friday Harbor Laboratories. Offered: S.
View course details in MyPlan: FHL 528

**FHL 536 Comparative Invertebrate Embryology (9)**
Studies diversity in developmental patterns in major marine taxa. Analyzes evolutionary changes in development, with emphasis on observation of live embryos and larvae. Offered: jointly with BIOL 536; S.
View course details in MyPlan: FHL 536

**FHL 548 Advanced Topics in Evolution and Development (9, max. 27)**
Focuses on various aspects of evolution and development of marine organisms, such as larval biology or evolution and development of metazoans. Students work on individual projects during the course. Taught at Friday Harbor Laboratories. Offered: S.
View course details in MyPlan: FHL 548

**FHL 568 Advanced Topics in Ecology and Biomechanics (9, max. 27)**
Focuses on various aspects of ecology and biomechanics of marine organisms, such as experimental ecology, ocean acidification, deep sea biodiversity, or biomechanics. Taught at Friday Harbor Laboratories. Offered: S.
View course details in MyPlan: FHL 568

**FHL 578 Special Topics in Science Communication (9) NW**
This FHL course focuses on different aspects of linkages between scientists and the public, including multiple ways to communicate science. Offered at Friday Harbor Laboratories; see FHL website for topic for next summer.
View course details in MyPlan: FHL 578

**FHL 585 Advanced Topics in Neurobiology and Physiology (9, max. 27)**
Focuses on various aspects of neurobiology or physiology of marine organisms, such as neurobiology, ethology, or marine chemosensory biology. Taught at Friday Harbor Laboratories. Offered: S.
View course details in MyPlan: FHL 585

COLLEGE OF THE ENVIRONMENT
SCIENCE FOR TEACHERS
SCIENCE TEACHING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

SCI T 501 Observational Science and Experimental Design for Teachers (2)
Students consider the nature of scientific exploration; practice using observations, evidence, and explanation to make hypotheses; and explore case studies demonstrating various experimental designs. Combines on-line activities, readings, hands-on activities, presentations, and discussions. Offered: A.
View course details in MyPlan: SCI T 501

SCI T 502 Data Analysis and Visualization for Teachers (2)
Students gain experience analyzing and visualizing data sets, evaluate the use of common data visualization tools, and create graphs of their own data sets. Combines on-line activities, readings, hands-on activities, presentations, and discussions. Offered: W.
View course details in MyPlan: SCI T 502

SCI T 503 Science Communication for Teachers (2)
Students examine effective communication of scientific research. Students critically evaluate example presentation from on-campus departmental seminars, practice communicating their own scientific research to mentors and peers, and deliver a formal oral presentation. Offered: Sp.
View course details in MyPlan: SCI T 503
Aquatic and Fishery Sciences

School Overview

116 Fishery Sciences

The School of Aquatic and Fishery Sciences (SAFS) encompasses multi-disciplinary programs at the interface between the traditional fields of natural history, environmental biology, and natural resource management. Primary foci are the management of sustainable fisheries of commercially important species; biocomplexity and ecosystem-based management; and sustainable aquaculture. In addition, human-induced effects on natural ecosystems (including habitat change and restoration, impacts of climate change, emerging diseases, the effects of invasive species, and processes affecting endangered species and declining populations) are major areas of research. In pursuit of these objectives, a variety of basic sciences are used, including ecology and evolution, population biology, behavior, physiology, microbiology, and genetics. The scope of aquatic systems ranges from watersheds, rivers and lakes, to estuarine and near-shore shelf, open ocean systems and culture facilities. Graduates of the School of Aquatic and Fishery Sciences are uniquely qualified for careers in universities as well as other educational settings, natural resources management agencies at the local to international levels, environmental consulting, and non-profit organizations with an environmental focus.

Undergraduate Program

Adviser
116 Fishery Sciences, Box 355020
(206) 543-7457
safsadv@uw.edu

The School of Aquatic and Fishery Sciences (SAFS) offers the following programs of study:

- The Bachelor of Science, with a major in aquatic and fishery sciences
- A minor in aquatic and fishery sciences
- An interdisciplinary minor in marine biology
- An interdisciplinary minor in quantitative science

The school's undergraduate program has been substantially modified in recent years to reflect student and faculty interests in ecology and conservation biology, as well as more traditional fields such as stock assessment and fishery management. Faculty dedication to teaching, substantial benefit gained in close faculty contact within a relatively small
program, and significant experiential training and research have made SAFS an appealing major that has doubled in recent years. The bachelor of science degree provides an underpinning in sciences such as biology, chemistry, and mathematics/statistics, then adds a core curriculum within aquatic sciences. Students study within areas of individual interest, grouped in three primary areas: aquatic ecology, conservation and management of aquatic resources, and biology and culture of aquatic animals.

**Bachelor of Science**

*Suggested First- and Second-Year College Courses:* Recommended courses for first year students: English composition; calculus; CHEM 120 or CHEM 142, and CHEM 220; BIOL 180; and FISH 250 and/or FISH 101. Recommended courses for second year students: BIOL 200 and BIOL 220; Q SCI 381; FISH 310 and/or FISH 311; and any additional courses that meet the College general education requirements. Students should start FISH core courses as soon as they meet the appropriate prerequisites.

**Department Admission Requirements**

Students in good academic standing may declare this major at any time, including on their application for admission to the UW. After notification of admission and before registration, new students should visit or email the Student Services Office for help in planning their programs.

**Graduation Requirements**

180 credits

**General Education Requirements**

All majors must satisfy the College of the Environment general education requirements.

**Major Requirements**

1. *Foundation Courses (50-55 credits)*
   a. *Mathematics (15 credits):* either MATH 124 and MATH 125, or Q SCI 291 and Q SCI 292; Q SCI 381
   b. *Chemistry (9-10 credits):* either CHEM 120 or CHEM 142;
   c. *Biology (15 credits):* BIOL 180, BIOL 200; either BIOL 220 or FISH 270/OCEAN 270/MARBIO 270
   d. *Physics (4-5 credits):* either PHYS 114 or PHYS 121
   e. *Two of the following (7-10 credits):* either PHYS 115 or PHYS 122; either PHYS 116 or PHYS 123; OCEAN 210; GEOG 205; ATM S 211; OCEAN 230/ESS 230; OCEAN 285; FISH 330/ENVIR 330; ENVIR 313/ESS 315. See adviser for other acceptable courses in this category.

2. *Core (minimum 29 credits)*
   a. FISH 290; FISH 300/OCEAN 300/MARBIO 300; FISH 310; FISH 311/BIOL 311
   b. Minimum 15 credits from three of the following: FISH 312, FISH 323, FISH 324, and FISH 340/BIOL 340
3. **Electives (minimum 16 credits, four courses):** 400-level courses from within the School of Aquatic and Fishery Sciences for the major, excluding FISH 453/OCEAN 453, and FISH 477/BIOL 477/OCEAN 477

   a. Maximum 3 credits total from FISH 479/BIOL 479/OCEAN 479, FISH 492/FHL 492/MARBIO 492, FISH 498, FISH 499

   b. Maximum 5 credits from each of FISH 489 and FISH 491

4. **Capstone (7-13 credits):** FISH 493, FISH 494, FISH 495

5. Minimum 2.00 cumulative GPA in all core, elective, and capstone courses applied to the major.

**Continuation Policy**

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

**Minor**

**Aquatic and Fishery Sciences**

*Minor Requirements:* Minimum 28 credits to include three courses (two of which must be at least at the 300 level) from FISH 101, FISH 250, FISH 310, FISH 311, FISH 312, FISH 323, and FISH 324; Q SCI 381 or Q SCI 482; minimum two upper-division FISH courses totaling at least 8 credits. Maximum 11 credits may overlap with a student’s major.

**Marine Biology**

The minor in marine biology is sponsored jointly by the School of Aquatic and Fishery Sciences, the School of Oceanography, and the College of Arts and Sciences, and is designed to immerse students in the study of marine organisms and ecosystems, starting in the freshman year. Because the experience of marine sciences cannot be taught entirely within the classroom, the minor is structured to provide ample opportunity for fieldwork and research within the coursework. A description of the minor can be found under the Interdisciplinary Undergraduate Program section of the catalog.

**Quantitative Science**

Students interested in quantitative skills applied to biological and ecological fields should consider minoring in quantitative science, an interdisciplinary minor supported by the School of Aquatic and Fishery Sciences and the School of Environmental and Forest Sciences. More information may be found on the Center for Quantitative Science website.

**Student Outcomes and Opportunities**

- *Learning Objectives and Expected Outcomes:* Aquatic and fishery sciences is a life science major designed to provide students a broad framework of knowledge and sets of skills for employment in a variety of areas (e.g., natural resource management, environmental consulting, fish or aquatic wildlife biology, aquaculture). In addition, students receive excellent preparation for graduate study in a number of life science fields. Expected student outcomes include:

  1. Skills in written and oral communication, data analysis, field and laboratory skills. Skill sets have been integrated into all core and flagship courses.
2. Exposure to career paths in the field and interaction with professionals. Skills gained allow students to obtain an entry-level aquatic scientist position or admission to graduate school.

3. Emphasis in one of three focus areas (aquatic ecology, conservation and management, aquatic biology and culture); students get a broad overview, then may specialize in one of the three areas.

4. Strong encouragement to pursue multiple internship and research experiences, including opportunities like FHL research apprenticeships and Alaska Ecological Research Program.

5. Understanding not only of the science, but also the socio-political-economic environment and its impact on the field of aquatic and fishery sciences.

6. All students participate in a capstone experience that requires them to demonstrate acquired skill sets (including public presentation in an undergraduate research symposium).

SAFS graduates pursue careers in the private sector (environmental consulting firms, private companies), the public sector (state and federal agencies, non-profit organizations, non-governmental agencies, education), and many continue into graduate programs in either research or policy. The undergraduate degree prepares students for either direct employment in a number of fields within public and private sectors, or for competitive entry into applicable graduate programs worldwide.

- **Instructional and Research Facilities:** The School of Aquatic and Fishery Sciences is housed in several buildings on the University of Washington campus. In addition, the school maintains various facilities off campus, including field research stations in Washington State and Alaska.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major).

- **Research, Internships, and Service Learning:** SAFS scientists work closely with employers in both the public and private sectors, leading to opportunities for undergraduates to receive both internship and research experience. Scientists from area agencies (NOAA, National Marine Fisheries, Alaska Fisheries Sciences Center, National Marine Mammal Lab, the U.S. Forest Service, the Student Conservation Association, and the Seattle Aquarium) come to the school to attend weekly SAFS departmental seminars; undergraduates are encouraged to attend. The School of Aquatic and Fishery Sciences is second only to the UW Medical School in federal research dollars brought to the UW campus, providing many paid hourly student positions within the department.

- **Department Scholarships:** Scholarships are awarded on the basis of academic merit, financial need, and other factors. The annual application process for continuing students begins in spring; check with the Office of Student Services for applications and deadlines. All undergraduates, both freshmen and transfers, are considered for recruitment scholarships if they have declared AFS as their major on their application to the University of Washington.

- **Student Organizations/Associations:** SURF (Society for Undergraduate Resources in Fisheries) organizes social, career, and educational activities for undergraduates in aquatic and fishery sciences. SURF also prints t-shirts, welcomes new students to the program, represents the program at events, and collaborates with student groups in other related departments on events.
**Of Special Note:**

- The School of Aquatic and Fishery Sciences has sent a small group of students and three faculty members to two Alaska Salmon Field Stations for a six-week course in aquatic ecology. These students receive education in ecology, limnology, population modeling, field techniques, scientific writing, and presentation skills.

---

**Graduate Program**

Graduate Program Coordinator  
116 Fishery Sciences, Box 355020  
(206) 616-5893  
safs@uw.edu

The School of Aquatic and Fishery Sciences, established in 1919, offers courses and conducts research on the conservation, management, and effective use of natural resources. Education and research in the school include studies of aquatic ecology; ichthyology; population dynamics; management of free-ranging stocks; restoration ecology; and effects of human activities on freshwater and marine ecosystems. SAFS is recognized internationally for its graduate programs, especially in the area of quantitative fisheries management, all research programs are well respected.

Students may apply for admission into programs leading to the master of science or doctor of philosophy. Students who apply for the PhD program must hold a master's degree prior to beginning their doctoral studies. All students who receive a master's degree from the school and wish to pursue a PhD are reviewed by the Recruitment, Admissions, and Scholarship Committee before being accepted into the PhD program.

**Master of Science**

**Admission Requirements**

1. A bachelor's degree from an institution of recognized standing with a minimum 3.00 GPA in the last two years (90 quarter credits or 60 semester credits) of college work
2. Typically at least a 500 on both the verbal and quantitative portions of the GRE and a 5 on the analytic portion (a 500 if taken before October 2002)
3. If an international student, a minimum TOEFL score of 580 on written examination or 237 on computerized examination, or 70 on Internet-based examination

**Degree Requirements**

45 credits as follows:

1. School of Aquatic and Fishery Sciences Core Courses:
   a. Q SCI 482
   b. At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
   c. FISH 521
   d. FISH 522
e. 18 credits of thesis research: FISH 700

2. **Additional Course Requirements:** At least 12 credits of coursework at the 400 or 500 level, in addition to the SAFS core courses listed above. 4 of the 12 credits must be in 500-level courses. At least 9 of the additional 12 credits must be numerically graded.

---

**Doctor of Philosophy**

**Admission Requirements**

1. Minimum 3.00 GPA for last two years (90 quarter credits or 60 semester credits) of graded college work
2. GRE scores of 500 on the verbal and quantitative sections and 5 on the analytical section (500 if before October 2002)
3. If an international student, a minimum TOEFL score of 580 on written examination or 237 on computerized examination, or 70 on Internet-based examination

---

**Admission to the PhD Program after Receiving an MS Degree from the School of Aquatic and Fishery Sciences**

Students who wish to continue study toward the doctoral degree after receiving a master's from the School must apply to the Graduate Program Coordinator by way of the Student Services Office; the application is considered by the Recruitment, Admissions, and Scholarship Committee and a recommendation is then sent to the director for concurrence or denial. Applications must be submitted by the sixth week of the quarter in which the master's degree is conferred. For more information, refer to the SAFS website.

---

**Bypassing the Master's Degree**

Students admitted to the school at the pre-master's level may, under exceptional circumstances, proceed directly to post-master's study. Application should be made to the Graduate Program Coordinator via the Student Services Office for consideration by the Recruitment, Admissions and Scholarship Committee. More information is available on the SAFS website.

Students who bypass the master's degree must complete all PhD requirements within ten years of beginning graduate study, including MS coursework if used to fulfill any PhD requirements.

---

**Degree Requirements**

Minimum 90 credits, as follows:

1. **SAFS Core Courses:** Same as those required of MS students. Must be taken as part of the doctoral program if they or their equivalents have not been taken during an MS program.
   a. Q SCI 482
   b. At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
   c. FISH 521
   d. FISH 522
e. 27 credits of doctoral dissertation: FISH 800 (a maximum of 10 dissertation credits may be taken in any one academic quarter)

2. Additional Course Requirements: At least 48 credits of coursework at the 400 level or above, including dissertation credits, are required in addition to the required core courses listed above. Of those, at least 9 credits must be numerically graded.

Financial Aid

General information on graduate student support is available from the Office of Student Financial Aid, 105 Schmitz. The majority of first-year graduate students are offered research assistantships by appropriate faculty members, depending on the availability of research funding. The School of Aquatic and Fishery Sciences also has a limited number of fellowship opportunities for outstanding entering students. Other students may have their studies supported by the agency for which they work or they may be international students with scholarships from their home countries.

Graduate applicants are urged to discuss their financial needs with professors in their potential major fields during the early stages of the graduate application process. The graduate applicant is automatically considered for any fellowships, research assistantships, or teaching assistantships available from the School of Aquatic and Fishery Sciences when the admission application is submitted.

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**FISH 101 Water and Society (5) I&S/NW**
Examines ecological and social issues associated with water resources as human populations increase and climate warms. Offered: W.  
[View course details in MyPlan: FISH 101](http://www.washington.edu/students/crsctf/fish.html)

**FISH 230 Economics of Fisheries and Oceans (5) I&S/NW, QSR C. ANDERSON**
Examines how and why people and businesses make choices that lead to over-fishing, hypoxic zones, and oil spills in aquatic environments. Applies economic principles to understand how alternative policies might change these decisions, and how distributional effects influence politically feasible solutions. Offered: jointly with ECON 230; Sp.  
[View course details in MyPlan: FISH 230](http://www.washington.edu/students/crsctf/fish.html)

**FISH 250 Marine Biology (3/5) I&S/NW**
Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Weekend field trip. Honors section research project. Offered: jointly with BIOL 250/OCEAN 250; AS.  
[View course details in MyPlan: FISH 250](http://www.washington.edu/students/crsctf/fish.html)

**FISH 260 Recreational Fisheries: Science, Management, and Policy (3/5) I&S/NW Grue**
Provides an overview of Washington's recreational fisheries emphasizing science, management, and policy. Optional laboratory focuses on science and technology behind fishing tactics, tackle, and equipment, ways to minimize impacts and enhance conservation, and politics associated with opportunities for recreational anglers. Suitable for students with or without a strong science background. Offered: Sp.  
[View course details in MyPlan: FISH 260](http://www.washington.edu/students/crsctf/fish.html)

**FISH 261 Recreational Fisheries Seminar (1) C. GRUE**
Overview of issues and perspectives associated with management of Washington's recreational fisheries:  
[View course details in MyPlan: FISH 261](http://www.washington.edu/students/crsctf/fish.html)
opportunity; science and technology behind tactics, tackle and equipment; ways to minimize environmental impacts and enhance conservation of target and non-target species; etiquette; and challenges of enforcing regulations. Suitable for undergraduate students with or without a science background. Offered: S. View course details in MyPlan: FISH 261

**FISH 270 Aquatic Ecophysiology (5) NW**
Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with MARBIO 270/OCEAN 270. View course details in MyPlan: FISH 270

**FISH 290 Scientific Writing and Communication (3)**
Designed to teach undergraduate students how to gather information on scientific questions; critically read scientific writing; learn the structure and functions of scientific papers to effectively communicate; learn techniques for effective communication of science in oral and poster presentations; and understand the ethical boundaries associated with scientific communication. Offered: AW. View course details in MyPlan: FISH 290

**FISH 296 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW**
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit not does not apply to major requirements without approval. View course details in MyPlan: FISH 296

**FISH 300 Exploring Opportunities in Marine Science (1)**
Explores academic, research, and career opportunities in the field of marine science and helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with MARBIO 300/OCEAN 300; W. View course details in MyPlan: FISH 300

**FISH 310 Biology of Shellfishes (5) NW**
Aquatic invertebrates with emphasis on taxa with economic and cultural significance. Dramatic diversity, adaptation to environment, and evolutionary forces highlighted. Laboratories, field trips. Offered: Sp. View course details in MyPlan: FISH 310

**FISH 311 Biology of Fishes (3/5) NW**
Covers morphological, physiological, behavioral, and ecological diversity of fishes of the world; designed to provide a basic foundation for advanced courses in all areas of aquatic sciences. 3-credit option does not include laboratory. Offered: jointly with BIOL 311; W. View course details in MyPlan: FISH 311

**FISH 312 Fisheries Ecology (3/5) NW**
Ecological characteristics of fishes and shellfishes in the important freshwater and marine habitats of North America. Relationship between physical aspects of the habitats and community structure. Impacts of human activities on diversity and abundance. Prerequisite: BIOL 220 or FISH 270. Offered: Sp. View course details in MyPlan: FISH 312

**FISH 323 Conservation and Management of Aquatic Resources (5) NW**
Topics include population dynamics, extinction risk, meta-populations, marine reserves, bioeconomics, protection of endangered species, sustainable harvesting, and management institutions. Examines case studies such as salmon, albatross, and whales as representative of conservation issues in aquatic sciences. Sampling, experimental design, computer skills, and research writing. Offered: A. View course details in MyPlan: FISH 323

**FISH 324 Aquatic Animal Physiology and Reproduction (3/5) NW**
Adaptations of aquatic animals to environmental challenges. Energy pathways from feeding and digestion
through maintenance (metabolism, movement, repair), homeostasis (respiration, osmoregulation, thermoregulation), growth and reproduction (sex determination, manipulation, sex change). Roles of sensory, nervous, and endocrine systems in mediating environmental information. Hands-on laboratory. Prerequisite: BIOL 220 or FISH 270. Offered: W.

View course details in MyPlan: FISH 324

FISH 328 Forestry-Fisheries Interactions (4) NW
Offered: jointly with ESRM 328.

View course details in MyPlan: FISH 328

FISH 330 Climate Change Impacts on Marine Ecosystems (5) NW
Links physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Recommended: Requires high school or college physics and algebra with a basic understanding of Newton's Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with ENVIR 330; Sp.

View course details in MyPlan: FISH 330

FISH 340 Genetics and Molecular Ecology (5) NW
Application of molecular markers to ecology, evolution, and the management of living resources. Emphasis on understanding the strengths and weaknesses of the approach based on case studies. Prerequisite: BIOL 200. Offered: jointly with BIOL 340; A.

View course details in MyPlan: FISH 340

FISH 370 Marine Evolutionary Biology (5) NW
Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with MARBIO 370/OCEAN 370; Sp.

View course details in MyPlan: FISH 370

FISH 404 Diseases of Aquatic Animals (5) NW
Overview of communicable and noncommunicable diseases that affect fish and shellfish. Major pathogens of free-ranging as well as captive animals discussed. Students learn to recognize, prevent, and control economically and ecologically important disease syndromes. Offered: Sp, even years.

View course details in MyPlan: FISH 404

FISH 423 Aquatic Invasion Ecology (4) QSR
Explores the patterns, drivers, and consequences of species invasions in freshwater, estuary, and marine ecosystems. Focuses on the science and management needs for preventing, controlling, and eradicating invasive species. Topics illustrated with cases from the Pacific Northwest and the world. Prerequisite: either BIOL 462 or BIOL 180.

View course details in MyPlan: FISH 423

FISH 424 Biology and Culture of Aquatic Organisms (5) NW
Explores the concept of sustainability and the interrelationship between environment, aquatic species, and culture of aquatic animal and plant species globally. Current practices, animal biology and health, near-shore ecosystem conservation, water quality, and strategies to improve the sustainability of aquaculture for food production and species conservation. Offered: Sp, odd years.

View course details in MyPlan: FISH 424

FISH 428 Stream and Watershed Restoration (5) NW
Overview of restoration principles and techniques with specific application to freshwater aquatic systems. Develops knowledge and skills to assess ecosystems conditions, identify and prioritize restoration opportunities, and evaluate them from a scientific and economic perspective. Prerequisite: either BIOL 356, ESRM 304, or
FISH 312. Offered: Sp, even years.
View course details in MyPlan: FISH 428

FISH 437 Fisheries Oceanography (4)
Investigates how the environment influences distributions and abundances of marine vertebrate and invertebrate species. Uses studies to understand fish and zooplankton life histories, predict trends in populations, reduce uncertainty in resource management, and to decouple anthropogenic from natural effects on aquatic populations. Offered: W.
View course details in MyPlan: FISH 437

FISH 441 Integrative Environmental Physiology (3/5) NW
Comparative advanced aquatic physiology focusing on the functional response of organisms to natural and human-associated environmental stress. Offered: A.
View course details in MyPlan: FISH 441

FISH 444 Conservation Genetics (5) NW
Advanced genetic concepts and methods related to species' conservation and management. Includes genetic diversity and evolution, small populations and fragmentation, genetic viability, management of wild and captive populations, reintroductions, hatchery-wild interactions and forensics. Labs include molecular techniques. Offered: W.
View course details in MyPlan: FISH 444

FISH 447 Watershed Ecology and Management (3) NW G. HOLTGRIEVE
Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and function of flowing aquatic ecosystems and their catchments. Topics include river/stream hydrology, geomorphology, nutrient spiraling, food webs, and global change. Case studies explore human interactions with rivers and approaches to river management. Prerequisite: BIOL 180 or ESRM 201 or FISH 101. Offered: jointly with ESRM 447; Sp.
View course details in MyPlan: FISH 447

FISH 448 Watershed Ecology and Management Lab (2)
Hands-on examination of river and stream ecosystems with emphasis on physical and biological processes, field methods, analysis of data, and writing scientific papers, includes field trips. Prerequisite: ESRM 447 or FISH 447 which may be taken concurrently. Offered: jointly with ESRM 448; Sp.
View course details in MyPlan: FISH 448

FISH 450 Salmonid Behavior and Life History (3/5) NW
Behavior, ecology, life history, and conservation of salmon and trout, including their distribution, homing migration, reproduction, ecology of juveniles in different freshwater habitats, seaward migration, and the ecological and evolutionary factors affecting them. Offered: A.
View course details in MyPlan: FISH 450

FISH 452 Marine Geospatial Information Science (3) NW
Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with OCEAN 452; A.
View course details in MyPlan: FISH 452

FISH 454 Ecological Modeling (5) NW T. ESSINGTON
Examines concepts in ecological modeling focusing on the rationale, interpretation, and motivation for modeling in ecological sciences. Explores individual, population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Offered: jointly with Q SCI 454; W.
View course details in MyPlan: FISH 454
FISH 455 Fish and Wildlife Toxicology (3/5) NW
Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with ESRM 457; W.
View course details in MyPlan: FISH 455

FISH 458 Modeling and Estimation in Conservation and Resource Management (4) NW T. BRANCH
Explores the use of models in the evaluation of alternative management policies for natural resources, including modeling approaches, fitting models to data, and evaluating alternative management policies. Emphasizes calculating risk of extinction, and design of biological reserves. Offered: jointly with Q SCI 458; Sp.
View course details in MyPlan: FISH 458

FISH 461 Resource Economics for Management and Policy (4) I&S, DIV
Examines how and why resource users make decisions leading to over fishing and pollution. Introduces market and non-market economic tools that support the natural resource management process. Evaluates incentives presented by alternative policies, with an emphasis on regional and global fishery management case studies. Prerequisite: either FISH 230/ECON 230, ENVIR 235/ESRM 235/ECON 235, or a 300-level FISH course. Offered: A.
View course details in MyPlan: FISH 461

FISH 464 Arctic Marine Vertebrate Ecology (4) NW
Explores the structure and function of Arctic ecosystems, life history, and adaptations of vertebrates, and how species are affected by climate warming. Emphasizes upper-level trophic interactions, evolutionary drivers, food chains, energy transport paths, and influence of sea ice. Case studies provide background on Arctic conservation and management. Prerequisite: BIOL 180. Offered: W, odd years.
View course details in MyPlan: FISH 464

FISH 473 Limnology (3) NW
Ecology, conservation, and management of inland aquatic ecosystems. Explores interactions among biological, chemical, and physical features of lakes and other aquatic habitats. Prerequisite: BIOL 180. Offered: jointly with BIOL 473; A.
View course details in MyPlan: FISH 473

FISH 474 Limnology Laboratory (2) NW
Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CEE 462, which may be taken concurrently. Offered: jointly with BIOL 474/CEE 463; A.
View course details in MyPlan: FISH 474

FISH 475 Marine Mammalogy (3/5) NW
Evolution, taxonomy, physiology, life history, and behavior of marine mammals; the techniques of studying and the management and conservation of them. Offered: Sp.
View course details in MyPlan: FISH 475

FISH 477 Seminar in Marine Biology (3) NW
Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 477/OCEAN 477; W.
View course details in MyPlan: FISH 477

FISH 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW
Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species,
citizen action, co-management, and marine ethics. Offered: jointly with BIOL 478/ENVIR 478.

View course details in MyPlan: FISH 478

FISH 479 Research in Marine Biology (1-15, max. 15)
Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/OCEAN 479; AWSpS.
View course details in MyPlan: FISH 479

FISH 480 Human Dimensions of Fishery Management (3) I&S/NW
Techniques and philosophy for conservation, management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with SMEA 480.
View course details in MyPlan: FISH 480

FISH 489 Peer Teaching Assistants in Aquatic and Fishery Sciences (1-5, max. 10)
Designed to prepare graduate and public school teaching by developing mentoring and communication skills through direct experience. Skills gained through attending lectures and weekly preparation sessions, directed discussions with faculty and TAs, and teaching course lab or discussion sections. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: FISH 489

FISH 491 Aquatic Ecological Research in Alaska (12) NW
Intensive, full-time research training experience where a team of students works on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Examines behavioral ecology, limnology, and population dynamics. Students also choose specific research questions for their own exploration. Course location: Alaska. Offered: S, even years.
View course details in MyPlan: FISH 491

FISH 492 Ecology and Conservation of Marine Birds and Mammals (9/15) NW
An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand learning and individual research projects. Offered: jointly with FHL 492/MARBIO 492; S.
View course details in MyPlan: FISH 492

FISH 493 Capstone Preparation (1)
Includes defining a capstone research question, conducting a literature review, preparing a project proposal and budget, reviewing peer proposals, and attending/critiquing the quarterly capstone symposium. Prerequisite: FISH 290. Offered: ASP.
View course details in MyPlan: FISH 493

FISH 494 Capstone Project I ([1-9], max. 9)
Self-directed research or project under direction of a faculty member. Includes defining research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. Required for graduation for majors. May be taken concurrently with FISH 495. Prerequisite: either FISH 290 or FISH 493; Q SCI 381.
View course details in MyPlan: FISH 494

FISH 495 Capstone Project II (~[3/4])
Self-directed research project under direction of a faculty member. Typically includes defining a research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. May be taken concurrently with FISH 494 with permission of instructor.
View course details in MyPlan: FISH 495
FISH 496 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.
View course details in MyPlan: FISH 496

FISH 497 Special Topics in Aquatic and Fishery Sciences (1-15, max. 15) NW
One-time offerings of topics in fisheries by resident or visiting faculty.
View course details in MyPlan: FISH 497

FISH 498 Internship/Experiential Learning (1-15, max. 15)
Structured, practical training in the fishing industry, government agencies, and other areas utilizing fisheries, food science, or quantitative science expertise. Experiences are supervised and evaluated. Written reports required. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: FISH 498

FISH 499 Undergraduate Research (1-15, max. 15)
Individual research within the School of Aquatic and Fishery Sciences. Each project supervised by an individual faculty member. Written reports required. Offered: AWSpS.
View course details in MyPlan: FISH 499

FISH 502 Marine Geospatial Information Science (3)
Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with OCEAN 502; A.
View course details in MyPlan: FISH 502

FISH 503 Geospatial Pattern Analysis and Geostatistics (3) Logsdon
Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Offered: jointly with OCEAN 503; W.
View course details in MyPlan: FISH 503

FISH 507 Special Topics in Fisheries (1-15, max. 15)
View course details in MyPlan: FISH 507

FISH 510 Current Topics in Genetics and Physiology (1-5, max. 15)
Contemporary problems and issues in genetics and physiology as they relate to aquatic and fisheries sciences.
View course details in MyPlan: FISH 510

FISH 511 Current Topics in Evolution, Ecology, and Behavior (1-5, max. 15)
Contemporary problems and issues in evolution, ecology, and behavior as they relate to aquatic and fisheries sciences.
View course details in MyPlan: FISH 511

FISH 512 Current Topics in Quantitative Science (1-5, max. 15)
Contemporary problems and issues in quantitative science as they relate to aquatic and fisheries sciences.
View course details in MyPlan: FISH 512

FISH 513 Current Topics in Management, Conservation, and Restoration (1-5, max. 15)
Contemporary problems and issues in management, conservation, and restoration as they relate to aquatic and fisheries sciences.
View course details in MyPlan: FISH 513
FISH 514 Current Topics Aquaculture, Utilization, and Pathology (1-5, max. 15)
Contemporary problems and issues in aquaculture, utilization, and pathology as they relate to aquatic and fisheries sciences.
View course details in MyPlan: FISH 514

FISH 520 Advanced Ecology of Marine Fishes (4)
Focuses on the unique ecological challenges facing marine fishes, including individual, population, community, and ecosystem-scale processes. In-depth discussions of issues based on extensive reading of primary literature and analysis.
View course details in MyPlan: FISH 520

FISH 521 Research Proposal Writing for Graduate Students (4)
Practice in reading, writing, critiquing, and evaluating research grant and contract proposals. Lecture and discussion of funding resources, structure of proposals, proposal review, evaluation criteria, and agency feedback. Examples of successful and unsuccessful grant applications. Preparing proposals and critiquing others' efforts. Offered: W.
View course details in MyPlan: FISH 521

FISH 522 Hot Topics in Aquatic and Fishery Sciences (2)
Discussion of the primary literature of aquatic and fishery sciences. All readings are current, high profile papers which spark a new avenue of investigation, set out a new paradigm, or define a central problem, etc. Credit/no-credit only. Offered: A.
View course details in MyPlan: FISH 522

FISH 526 Ecology of Aquatic Ecosystems (3)
Explores natural and human-driven processes regulating the structure and functioning of freshwater and marine ecosystems. Topics include biogeochemistry, energy, and material flows among habitats, evolution in ecological time, commonality of marine and freshwater habitats, and the issues of scale in understanding ecosystem dynamics.
View course details in MyPlan: FISH 526

FISH 530 Application of Bioenergetics Models to Aquatic Food Webs (4)
Modeling framework quantifying bioenergetics, including consumption, growth, nutrient recycling and contaminant bioaccumulation; links physiology and behavior of individual organisms to ecological processes within populations and aquatic food webs. Common applications include estimating predation, carrying capacity, or growth potential in different habitats. Offered: Sp, odd years.
View course details in MyPlan: FISH 530

FISH 531 Aquatic Food Web Processes (4)
Examines how temporal-spatial variability in environmental conditions, nutrient, food supply, predation, and competition among species and life stages regulate species in freshwater and marine food webs. Demonstrates how behavior and physiology of individuals are mechanistically linked to distribution, trophic interactions, and processes relevant to ecosystem-based management. Offered: Sp, even years.
View course details in MyPlan: FISH 531

FISH 538 Fisheries Acoustics (3-5) Horne
Studies the use of sound as an aquatic sampling tool and application of acoustic technologies to resource management and aquatic research. Topics include: sonar equation, survey design, equipment use, and abundance estimates. Uses case studies in bio-acoustic predation, habit evaluation, ocean observatories, and marine renewable energy. Offered: A.
View course details in MyPlan: FISH 538

FISH 539 U.S. Fisheries Management and Policy (3)
Examination of basic laws and policies in the US that govern fisheries management and their implementation by managers at federal, tribal, state, and international levels. Includes lectures, guest speakers, and field trips.
Offered: jointly with SMEA 539.
View course details in MyPlan: FISH 539

**FISH 541 Integrative Environmental Physiology (3/5)**
Comparative advanced aquatic physiology focusing on the functional response of organisms to natural and human-associated environmental stress. Includes lecture, laboratory work, and team-based research project.
View course details in MyPlan: FISH 541

**FISH 545 Applied Population Genetics (3)**
Collection, analysis, and interpretation of genetic data (allele frequencies, microsatellite data, DNA sequences) for detection of population structure, population assignment, estimation of population size, and phylogenography. Includes discussion of scientific papers and analysis of example data sets.
View course details in MyPlan: FISH 545

**FISH 546 Bioinformatics for Environmental Sciences (3)**
Examines how to incorporate molecular information into environmental and conservation sciences, with an emphasis on analysis of DNA and RNA sequence information. Prerequisite: introductory biology, genetics, and statistics courses.
View course details in MyPlan: FISH 546

**FISH 547 River Ecology and Watershed Management (3)**
Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and dynamics of flowing aquatic ecosystems and the riparian zone. Case studies explore human interactions with rivers and approaches to river management.
View course details in MyPlan: FISH 547

**FISH 552 Introduction to R Programming for Natural Scientists (2)**
Introduces R, a freely available and widely used platform for statistical analysis. Covers reading, storing, and manipulating data; introductory graphics; basic statistical analyses; and fitting linear models. Credit/no-credit only. Offered: A.
View course details in MyPlan: FISH 552

**FISH 553 Advanced R Programming for Natural Scientists (2)**
Covers the use of maximum likelihood estimation and programming in R. Uses R functions to estimate parameters of models and to quantify uncertainty. Prerequisite: FISH 552; Q SCI 381 or Q SCI 482, or permission of instructor. Credit/no-credit only. Offered: A.
View course details in MyPlan: FISH 553

**FISH 554 Beautiful Graphics in R (2)** *Branch*
Explores how to create beautiful scientific graphics in the open-source language R. Covers the theory of visualization, critically examines elements of good and bad graphics, and teaches students how to translate data in their graduate theses into publication-quality graphics. Offered: W.
View course details in MyPlan: FISH 554

**FISH 557 Estimation of Population Parameters (4)**
Statistical analysis of population data; design and analysis of mark-recapture experiments on natural populations; laboratory work on computers. Offered: W, even years.
View course details in MyPlan: FISH 557

**FISH 558 Decision Analysis in Natural Resource Management (4)**
Focuses on age and size-structured population models; Bayesian methods; Sample Importance Resample algorithm; Markov chain Monte Carlo algorithm; policy evaluation; and risk analysis and uncertainty in fisheries management. Offered: A, odd years.
View course details in MyPlan: FISH 558
FISH 559 Numerical Computing for the Natural Resources (5)
Focuses on generalized linear and mixed effects models; numerical integration and differentiation; Bayesian and maximum likelihood parameter estimation; root finding; ADMB and WinBUGS coding; and risk analysis. Offered: A, even years.
View course details in MyPlan: FISH 559

FISH 560 Applied Multivariate Statistics for Ecologists (4)
Use and interpretation of multivariate analysis, including the majority of approaches in common use by ecologists. Emphasizes the conceptual understanding and practical use of the methods, illustrated with ecological case studies. Prerequisite: Q SCI 482 or equivalent.
View course details in MyPlan: FISH 560

FISH 561 Resource Economics for Management and Policy (4)
Examines how and why resource users make decisions leading to over fishing and pollution. Introduces market and non-market economic tools that support the natural resource management process. Evaluates incentives presented by alternative policies, with an emphasis on regional and global fishery management case studies. Offered: A.
View course details in MyPlan: FISH 561

FISH 562 Ecosystem Based Fisheries Management (2)
Theory and practice of ecosystem based fisheries management. Areas of emphasis includes by-catch avoidance, the interaction between physical and biotic habitat and fish productivity, trophic ecosystem models, area based management and dynamics of fishing fleets. Offered: Sp, odd years.
View course details in MyPlan: FISH 562

FISH 563 Ecosystem Based Fisheries Management Laboratory (2)
Laboratory covering the theory and practice of ecosystem based fisheries management. Areas of emphasis includes by-catch avoidance, the interaction between physical and biotic habitat and fish productivity, trophic ecosystem models, area based management and dynamics of fishing fleets. Recommended: either Fish 454, Fish 458, or Fish 558; R programming experience. Offered: Sp, odd years.
View course details in MyPlan: FISH 563

FISH 567 Topics in Advanced Ecology (3, max. 6)
Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/SEFS 567; W.
View course details in MyPlan: FISH 567

FISH 578 Graduate Topics in Sustainable Fisheries (2, max. 6)
Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Case studies. Conservation/restoration in practice. Post-seminar discussion section led by speaker on topics covered in lecture. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Credit/no-credit only.
View course details in MyPlan: FISH 578

FISH 581 Case Study Research: Design and Methods (3)
Provides in-depth training in case study theory, design, and methods. Designed for exploring prospectus ideas or beginning analysis of thesis research. Through readings, discussions, exercises, and lectures, students learn how to select units of analysis, control data quality, and collect, analysis, and report data. Offered: jointly with SMEA 581.
View course details in MyPlan: FISH 581

FISH 600 Independent Study or Research (*-)
Credit/no-credit only.
View course details in MyPlan: FISH 600
FISH 700 Master's Thesis (*-)
Credit/no-credit only.
View course details in MyPlan: FISH 700

FISH 800 Doctoral Dissertation (*-)
Credit/no-credit only.
View course details in MyPlan: FISH 800
Atmospheric Sciences

Department Overview

416 Atmospheric Sciences-Geophysics Building

Atmospheric sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Nino, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society. These problems are addressed with theory, measurements, and computer simulations.

Undergraduate Program

Adviser
416 Atmospheric Sciences-Geophysics Building, Box 351640
(206) 543-4576
advise@atmos.washington.edu

The Department of Atmospheric Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in atmospheric sciences
- A minor in atmospheric sciences
- The minor in Climate Science is offered jointly with the Department of Atmospheric Sciences, the Department of Earth and Space Sciences, and the School of Oceanography.

Bachelor of Science

Suggested First- and Second-Year Courses: ATM S 220; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CSE 142. The first upper-division core course is ATM S 301, which is offered autumn quarter only. Any lower-division atmospheric sciences courses except ATM S 220 count as electives and not as part of the major.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements
Minimum 97-117 credits as follows:

1. **Core requirements (58-59 credits):** MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; either STAT 390/MATH 390, or Q SCI 381; ATM S 220, ATM S 301, ATM S 321, ATM S 340, ATM S 341, ATM S 370, ATM S 431.

2. **Options (39 to 58 credits):**
   
   a. **Meteorology (42-45 credits)**
      
      i. **Core (33 credits):** AMATH 301; ATM S 358, ATM S 441, ATM S 442, ATM S 444, ATM S 451, ATM S 452; CSE 142
      
      ii. **Advanced Mathematics (9-12 credits):** MATH 324; either AMATH 351 and AMATH 353 or MATH 307, MATH 308, and MATH 309

   b. **Climate (39-49 credits)**
      
      i. **Core (27-29 credits):** AMATH 301; ATM S 358, ATM S 380, ATM S 460, ATM S 487; CSE 142; either ESS 431 or ESS 433; either OCEAN 423 or OCEAN 450
      
      ii. **Electives (12-20 credits):** minimum four courses from an approved list. See adviser for approved list of electives.

   c. **Chemistry (52-58 credits)**
      
      i. **Core (40 credits):** ATM S 451, ATM S 458, ATM S 480; CHEM 142, CHEM 152, CHEM 162, CHEM 223, CHEM 224, CHEM 321
      
      ii. **Electives (12-18 credits):** minimum four courses from an approved list. See adviser for approved list of electives.

3. Minimum 2.0 grade in courses applied to the major

**Pre-graduate Program for Physical Science, Mathematics, and Engineering Majors**

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

**Minor**

**Minor Requirements:** 25 credits to include ATM S 301 plus other approved courses. The minor may include a maximum of 6 independent study credits. Prerequisites include MATH 126 or MATH 136, and PHYS 123. Some courses may require further math or chemistry experience.

**Minor in Climate Science:** See description in the [Climate Science](#) listing in the Undergraduate Interdisciplinary Programs section of the General Catalog.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The degree program qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences.

- **Instructional and Research Facilities:** Extensive computer resources are available in the departmental computer laboratory. The department also maintains an extensive collection of weather data in graphical and numerical electronic format. A study area
is provided for undergraduates. An instrument laboratory is maintained with a wide range of observing and data collection systems. Students also have access to a machine shop and an electronics laboratory.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** Internships are available either within the department or with outside organizations, providing a valuable opportunity to test a student's interests in various meteorological career paths and to extend the student's knowledge. A limited number of departmental scholarships are available each year, based on academic excellence or financial need. Employment opportunities are often available in one of the many departmental research groups, and some internships are paid.

Students majoring in atmospheric sciences may take advantage of a variety of opportunities to enhance their education. Undergraduate students are welcome at the department's many seminars and colloquia and are encouraged to join in the annual forecast contest. They may work on independent research projects under the guidance of a faculty member, or be an active participant in a field program.

- **Department Scholarships:** The Bruce Caldwell Memorial Scholarship and the Anonymous Donor Atmospheric Sciences Scholarship are both awarded annually, based on both academic excellence and financial need.

- **Student Organizations/Associations:** Student Chapter of American Meteorological Society, Puget Sound American Meteorological Society Chapter, Weekly Weather Discussion for all majors.

### Graduate Program

Graduate Program Coordinator  
416 Atmospheric Sciences-Geophysics, Box 351640  
(206) 543-4576  
advise@atmos.washington.edu

Rapid growth of research in atmospheric sciences began in the late 1940s in response to needs and opportunities in weather forecasting. Extensive research is now underway to extend the time scale over which useful forecasts can be made and to increase the amount of regional and temporal detail in short-range forecasts. In addition, the atmospheric sciences now address a broad range of other problems of fundamental interest and importance. Examples include changes in climate that could result from increases in atmospheric CO2 and other greenhouse gases, and the application of remote-sensing techniques to the monitoring and understanding of weather and climate.

Graduate students in the atmospheric sciences come from a variety of disciplines: physics, chemistry, engineering, atmospheric, or geophysical sciences, and applied mathematics. Opportunities are broad enough that each of these backgrounds is valuable for specific subfields within the atmospheric sciences. However, students of atmospheric sciences should have in common a sound background in the fundamentals of physics and applied mathematics and an interest in complex natural phenomena. Research projects and
graduate courses in the Department of Atmospheric Sciences are closely related, and the well-prepared graduate student may expect to begin research work rather quickly.

**Master of Science**

**Admission Requirements**

1. Complete Graduate School application (a copy must be sent to the department)
2. Official copy of transcripts
3. Statement of interest(s) “one page essay, must address reasons why the student wishes to pursue a graduate program in atmospheric sciences
4. GRE General Examination scores sent from the Educational Testing Service
5. Three letters of recommendation, either submitted online or, using the appropriate forms, sent directly to the department by the evaluators
6. For international applicants: TOEFL scores, sent by the testing service
7. Deadline: December 31, for admission the following autumn. Autumn is the only quarter for which the department accepts applications.

**Degree Requirements**

36 credits, to include

1. *Core classes (25-28 credits):* ATM S 501, ATM S 502, ATM S 532, ATM S 535, ATM S 558. One of the following sequences: ATM S 505, ATM S 509, ATM S 542; or ATM S 503, ATM S 504
2. The two-course dynamics sequence (ATM S 503, ATM S 504) is intended for those whose research specialty is outside the realm of dynamic meteorology. Most students are encouraged to take the three-course sequence in dynamics (ATM S 505, ATM S 509, ATM S 542).
3. Master's students need 36 credits to graduate (excluding seminars and colloquia); 27 of the credits presented must be from graded courses numbered 500 or above, of which at least 3 credits must be in approved applied mathematics courses and 24 must be in core atmospheric sciences courses. The remaining 9 credits are for the master's thesis. However, students intending to pursue a PhD should take all the courses required above.

**Doctor of Philosophy**

**Admission Requirements**

1. All students admitted into the Atmospheric Sciences graduate program are admitted initially to the MS track of study. Students in the MS track who seek entry into the PhD program are evaluated by the departmental committee on graduate studies.
2. A student who wishes to be considered by the committee must first write a letter to the academic counselor and also to the student's MS committee, requesting admission into the PhD program, and choosing one of the three following evaluation options:
   a. MS thesis in atmospheric sciences or a closely related discipline, completed before entering the department, submitted the first week of autumn quarter of the student's second academic year in the department.
b. Draft of UW Department of Atmospheric Sciences MS thesis approved by the MS Supervisory Committee.

c. Manuscript of a peer-reviewed journal article on which the student is lead author.

**Degree Requirements**

Minimum 90 credits, to include:

1. **Coursework**
   a. ATM S 501, ATM S 502
   b. ATM S 505, ATM S 509 (Students whose anticipated research has minimal connection with atmospheric dynamics, such as laboratory or fieldwork in atmospheric chemistry or cloud microphysics, may take ATM S 503 and ATM S 504 in place of ATM S 505 and ATM S 509. See Graduate Program Coordinator before enrolling in ATM S 503.)
   c. Either ATM S 532 or ATM S 558
   d. ATM S 535, ATM S 542
   e. Each of the following, every quarter coursework is taken: ATM S 520, either ATM S 521 or ATM S 524, and ATM S 600 (up to 10 credits each quarter)
   f. **Electives**: Courses in the student's areas of interest, as determined in consultation with adviser
   g. **Applied math**: Either AMATH 401, AMATH 567 or AMATH 581; either AMATH 402 or AMATH 568
   h. ATM S 700 (10 credits each quarter, beginning the second year of the program)

2. General examination
3. Dissertation
4. Final examination

**Assistantships**

Nearly all graduate students are supported by either research assistantships or fellowships. Students are usually a teaching assistant during at least one quarter, in the second year of study. Students are supported full-time during the summer.
COLLEGE OF THE ENVIRONMENT
ATMOSPHERIC SCIENCES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**ATM S 101 Weather (5) NW**
The earth's atmosphere, with emphasis on weather observations and forecasting. Daily weather map discussions. Highs, lows, fronts, clouds, storms, jet streams, air pollution, and other features of the atmosphere. Physical processes involved in weather phenomena. Intended for nonmajors. Offered: AWSpS.
[View course details in MyPlan: ATM S 101](#)

**ATM S 103 Hurricanes and Thunderstorms: Their Science and Impact (3) I&S/NW**
Explores the science, history, and impacts of thunderstorms and hurricanes. Includes basic processes responsible for thunderstorms and hurricanes and for the lightning, hail, high winds, and storm surges that accompany them. Presents significant historical examples, along with the impact on human activities, strategies for personal safety, and societal adaptation. Offered: Sp.
[View course details in MyPlan: ATM S 103](#)

**ATM S 111 Global Warming: Understanding the Issues (5) I&S/NW**
*Ackerman, Anderson, Bitz, Fu, Jaegle, Thornton*
Includes a broad overview of the science of global warming. Discusses the causes, evidence, future projections, societal and environmental impacts, and potential solutions. Introduces the debate on global warming with a focus on scientific issues. Offered: AWSp.
[View course details in MyPlan: ATM S 111](#)

**ATM S 211 Climate and Climate Change (5) I&S/NW**
[View course details in MyPlan: ATM S 211](#)

**ATM S 212 Air Pollution: From Urban Smog to the Ozone Hole (5) I&S/NW**
*Alexander, Jaegle', Thornton*
Introduction to air pollution on local, regional, and global scales, with focus on the sources, transformation, and dispersion of pollutants responsible for urban smog, acid rain, climate change, and the ozone hole. Health and environmental effects of air pollutants, technological solutions, and international policy regulations.
[View course details in MyPlan: ATM S 212](#)
ATM S 220 Exploring the Atmospheric Sciences (1, max. 2) NW
Focuses on current research in the atmospheric sciences and the related implications for public health, business, and environmental policy. Credit/no-credit only.
View course details in MyPlan: ATM S 220

ATM S 290 The Weather Challenge (1, max. 8) NW McMurdie
Includes participation in a national weather forecast contest; weekly discussion on forecast models, forecasting methods, and unique considerations for specific forecast locations. Prerequisite: either ATM S 101 or ATM S 301. Credit/no-credit only. Offered: AW.
View course details in MyPlan: ATM S 290

ATM S 301 Introduction to Atmospheric Sciences (5) NW
Composition and structure of the atmosphere. Clouds and weather phenomena. Thermodynamic processes. Solar and terrestrial radiation. Air motions. Daily weather discussions and forecasts. For majors and nonmajors. Prerequisite: minimum grade of 2.0 in each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; and PHYS 123. Offered: A.
View course details in MyPlan: ATM S 301

ATM S 321 The Science of Climate (3) NW
Evolution and present state of earth's climate. Emphasis on physical processes determining the climate of the earth's atmosphere and surface: radiative transfer, energy balance, hydrologic cycle, and atmospheric and oceanic energy transport. Factors controlling climate change. Prerequisite: minimum of grade of 2.0 each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; PHYS 123. Offered: Sp.
View course details in MyPlan: ATM S 321

ATM S 340 Introduction to Thermodynamics and Cloud Processes (3) NW
Examines thermodynamics and hydrostatics. Studies cloud and precipitation processes with emphasis on the microphysics. Prerequisite: ATM S 301. Offered: W.
View course details in MyPlan: ATM S 340

ATM S 341 Atmospheric Radiative Transfer (3)
Comprehensive introduction to atmospheric radiation, including solar and infrared radiation, the earth's radiation budget, and remote sensing. Prerequisite: ATM S 301. Offered: Sp.
View course details in MyPlan: ATM S 341

ATM S 358 Fundamentals of Atmospheric Chemistry (3) NW
Review of basic principles of physical chemistry; evolution and chemical composition of earth's atmosphere; half-life, residence and renewal time; sources, transformation, transport and sinks of gases in the troposphere; atmospheric aerosols; chemical cycles; air pollution; stratospheric chemistry. Offered: Sp.
View course details in MyPlan: ATM S 358

ATM S 370 Atmospheric Structure and Analysis (5) NW
Structure and evolution of extratropical cyclones, fronts, and convective systems. Surface and upper air analysis techniques. Radar and satellite data. Real-world applications of basic dynamical principles. Introduction to operational products and forecasting. Prerequisite: ATM S 301. Offered: W.
View course details in MyPlan: ATM S 370

ATM S 380 Weather and Climate Prediction (3) NW
Applies weather and climate models to solve problems in atmospheric sciences. Includes visualization of atmospheric phenomena and Earth's energy and hydrologic cycles; and basics in numerical modeling and high-performance computing. Prerequisite: MATH 126; PHYS 122; either ATMS 101, ATM S 111, ATM S 211, ATM S 301, ASTR 150, ASTR 321, or ESS 201. Offered: W.
View course details in MyPlan: ATM S 380
ATM S 390 Honors Tutorial in Atmospheric Sciences (*, max. 6)
Review and discussion of selected problems in atmospheric sciences. Introduction to research methods. Presentation of a research paper. Offered: AWSpS. View course details in MyPlan: ATM S 390

ATM S 431 Boundary-Layer Meteorology (3) NW
Introduction to boundary-layer meteorology. Surface energy budgets, structure and evolution of boundary layers, and basic ideas of turbulence theory. Prerequisite: either ATM S 340 or PHYS 224. Offered: A. View course details in MyPlan: ATM S 431

ATM S 441 Atmospheric Motions I (3) NW
Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Prerequisite: either AMATH 353 or MATH 309; MATH 324. Offered: A. View course details in MyPlan: ATM S 441

ATM S 442 Atmospheric Motions II (5) NW
Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Includes laboratory exercises. Prerequisite: ATM S 441. Offered: W. View course details in MyPlan: ATM S 442

ATM S 444 Design and Application of Ensemble Prediction Systems (4) NW
Covers the fundamental of chaos theory to help compare and contrast traditional, deterministic forecasting versus ensemble forecasting. Explores the various components of an ensemble prediction system. Introduces decision science to show how to apply probabilistic weather information in optimal decision making. Prerequisite: ATM S 370; either STAT/MATH 390 or Q SCI 381; AMATH 301. Offered: Sp. View course details in MyPlan: ATM S 444

ATM S 451 Instruments and Observations (5) NW
Principles of operating instruments for measuring important atmospheric parameters (e.g., temperature, humidity, aerosol concentration). Concepts of sensitivity, accuracy, representativeness, time response. Manipulation of output data including signal processing and statistical analysis. Experimental design and implementation of the design in actual field experiments is included. Prerequisite: ATM S 370; either STAT/MATH 390 or Q SCI 381. View course details in MyPlan: ATM S 451

ATM S 452 Weather Forecasting and Advanced Synoptic Meteorology (5) NW
Basic forecasting techniques. Application of numerical modeling and statistical approaches. Structure, evolution, and forecasting of convective systems. Radar applications. Diurnal and topographically-forced circulations. Aviation meteorology. Laboratories include extensive practice in forecasting and surface map analysis. Prerequisite: ATM S 370; ATM S 442; either STAT/MATH 390 or Q SCI 381. Offered: Sp. View course details in MyPlan: ATM S 452

ATM S 458 Air Pollution Chemistry (4) NW
Global atmosphere as a chemical system emphasizing physical factors and chemical processes that give rise to elevated surface ozone, particulate matter, and air toxics; international issues of air pollution transport and changing tropospheric background composition; and regulatory control strategies and challenges. Aimed at science and engineering majors. Offered: jointly with CHEM 458; A. View course details in MyPlan: ATM S 458

ATM S 460 Water in the Environment (3) NW
Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either ESS 310, MATH 126, or MATH 136; PHYS 123. Offered: jointly with ESS 424/PHYS 460. View course details in MyPlan: ATM S 460
ATM S 475 Current Research in Climate Science Seminar (3, max. 6)
Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ESS 475/OCEAN 475; A.
View course details in MyPlan: ATM S 475

ATM S 480 Air-Quality Modeling (3) NW
Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Emphasis on models used for air pollution permits. Emphasizes current problems. Prerequisite: MATH 125. Offered: jointly with CEE 480; W.
View course details in MyPlan: ATM S 480

ATM S 487 Fundamentals of Climate Change (3)
Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Prerequisite: ATM S 321.
View course details in MyPlan: ATM S 487

ATM S 490 Current Weather Analysis (1, max. 6) NW
Reviews and analyzes current weather situations and forecasts. Promotes active discussion between the leader and attendees, and provides exposure to practical aspects of forecasting, the structure of synoptic and local weather phenomena, and applications of basic meteorological concepts. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: ATM S 490

ATM S 492 Readings in Meteorology or Climatology (*, max. 15)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ATM S 492

ATM S 495 EarthGames Studio (2-6, max. 15) D. FRIERSON
Students will work in teams to create their own video games or interactive digital experience relating to climate change or other pressing environmental issues. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ATM S 495

ATM S 497 Undergraduate Internship (1-5, max. 30)
Internship experience with a public agency or private company, supervised and approved by a faculty member. Requires preparation of a professional report reflecting on the experience. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ATM S 497

ATM S 499 Undergraduate Independent Research (1-5, max. 30)
Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or surveys. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ATM S 499

ATM S 501 Fundamentals of Physics and Chemistry of the Atmosphere (5)
Fundamentals of hydrostatics, thermodynamics, radiation, cloud physics, and atmospheric chemistry. Offered: A.
View course details in MyPlan: ATM S 501

ATM S 502 Introduction to Synoptic Meteorology (3)
Overview of weather systems; atmospheric observations and data assimilation. Elementary manual and computer-aided synoptic analysis techniques. Interpretation of satellite and ground-based observations. Kinematics. Fronts and frontogenesis; life cycles of extratropical cyclones; related mesoscale phenomena.
Numerical weather prediction; interpretation of forecast products. Offered: Sp.

View course details in MyPlan: ATM S 502

ATM S 503 Atmospheric Motions I (3)
Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Offered: A.

View course details in MyPlan: ATM S 503

ATM S 504 Atmospheric Motions II (5)
Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Prerequisite: either ATM S 441 or ATM S 503. Offered: W.

View course details in MyPlan: ATM S 504

ATM S 505 Introduction to Fluid Dynamics (4)
Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: either a course in partial differential equations or permission of instructor. Offered: jointly with AMATH 505/OCEAN 511; A, odd years.

View course details in MyPlan: ATM S 505

ATM S 508 Geochemical Cycles (4)
Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with CHEM 523/OCEAN 523.

View course details in MyPlan: ATM S 508

ATM S 509 Geophysical Fluid Dynamics I (4)

View course details in MyPlan: ATM S 509

ATM S 510 Physics of Ice (3)
Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Offered: jointly with ESS 531.

View course details in MyPlan: ATM S 510

ATM S 511 Snow and Ice on the Earth's Surface (3)

View course details in MyPlan: ATM S 511

ATM S 512 Dynamics of Snow and Ice Masses (3)
Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ESS 533.

View course details in MyPlan: ATM S 512

ATM S 514 Ice and Climate (3)
Examines the role of ice and snow in climate. Polar climate dynamics. Polar-global interactions. Modeling snow
cover, sea ice, and ice-sheet balance, and flow in the climate system. Prerequisite: permission of instructor. Offered: jointly with ESS 535.

**ATM S 519 Scientific Writing and Graphics (2)** *Waddington, Warren*
Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ESS 519/OCEAN 518; Sp, odd years.

**ATM S 520 Atmospheric Sciences Colloquium (1, max. 24)**
Seminars on current research in advanced topics related to atmospheric sciences, conducted by faculty and visiting professors/scientists. Includes presentation of doctoral dissertations by department graduate students. For Atmospheric Sciences graduate students only. Prerequisite: permission of department. Credit/no-credit only. Offered: A/WSp.

**ATM S 521 Seminar in Atmospheric and Climate Dynamics (*, max. 24)**
Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A/WSp.

**ATM S 523 Seminar in Atmospheric Physics and Chemistry (*, max. 24)**
Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

**ATM S 524 Seminar in Climate Dynamics and Energy Transfer (*, max. 24)**
Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

**ATM S 525 Seminar - Topics in Atmospheric Chemistry (1-3, max. 6)**
Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with CEE 553.

**ATM S 532 Atmospheric Radiation: Introductory (3)**
Fundamentals of radiative transfer; absorption and scattering by atmospheric gases; elementary applications to constraints on the thermal structure, photochemistry, and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: Sp.

**ATM S 533 Atmospheric Radiation: Advanced (3)**
Optical properties and particle absorption and scattering; solutions of radiative transfer equation in multiple scattering atmospheres; applications to atmospheric and surface energy balance and remote sensing. Prerequisite: ATM S 532/ESS 571 or permission of instructor.

**ATM S 534 Remote Sensing of the Atmosphere and Climate System (3)**
Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiances. Applications to research. Prerequisite: ATM S 532 or ATM S 533.
ATM S 535 Cloud Microphysics and Dynamics (3)
Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ESS 573; Sp.
View course details in MyPlan: ATM S 535

ATM S 536 Mesoscale Storm Structure and Dynamics (3)
Techniques of observing storm structure and dynamics by radar and aircraft, observed structures of precipitating cloud systems, comparison of observed structures with cloud models. Prerequisite: either ATM S 535, ATM S 504, or ATM S 509.
View course details in MyPlan: ATM S 536

ATM S 542 Synoptic and Mesoscale Dynamics (3)
Quasi-geostrophic theory, baroclinic instability, symmetric instability, tropical disturbances, frontogenesis, orographic disturbances, convective storms. Prerequisite: ATM S 509/OCEAN 512 and AMATH 402 or equivalents. Offered: Sp.
View course details in MyPlan: ATM S 542

ATM S 544 Design and Application of Ensemble Prediction Systems (4)
Covers the fundamental of chaos theory to help compare and contrast traditional, deterministic forecasting versus ensemble forecasting. Explores the various components of an ensemble prediction system. Introduces decision science to show how to apply probabilistic weather information in optimal decision making. Prerequisite: ATM S 501; ATM S 502; and ATM S 552 or permission of instructor. Offered: Sp.
View course details in MyPlan: ATM S 544

ATM S 545 General Circulation of Atmosphere (3)
Requirements of the global angular momentum, heat, mass, and energy budgets upon atmospheric motions as deduced from observations. Study of the physical processes through which these budgets are satisfied. Prerequisite: ATM S 509/OCEAN 512 or permission of instructor. Offered: A.
View course details in MyPlan: ATM S 545

ATM S 547 Boundary Layer Meteorology (3)
View course details in MyPlan: ATM S 547

ATM S 551 Atmospheric Structure and Analysis I: Synoptic Scale Systems (4)
View course details in MyPlan: ATM S 551

ATM S 552 Objective Analysis (3)
Review of objective analysis techniques commonly applied to atmospheric problems; examples from the meteorological literature and class projects. Superposed epoch analysis, cross-spectrum analysis, filtering, eigenvector analysis, and optimum interpolation techniques. Offered: W.
View course details in MyPlan: ATM S 552

ATM S 554 Paleoclimate Proxies (3) Alexander, Sachs
Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ESS 554/OCEAN 554.
View course details in MyPlan: ATM S 554

ATM S 555 Planetary Atmospheres (3)
Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all;
roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ESS 581.

**View course details in MyPlan: ATM S 555**

**ATM S 556 Planetary-Scale Dynamics (3)**
Zonally symmetric circulations, planetary waves, equatorial waves, dynamics of the middle atmosphere, trace constituent transport, nonlinear aspects of atmospheric flows. Prerequisite: ATM S 542 or permission of instructor.

**View course details in MyPlan: ATM S 556**

**ATM S 558 Atmospheric Chemistry (3)**
Photochemistry of urban, rural, and marine tropospheric air, and of the natural and perturbed ozone in the middle atmosphere. Unity of the chemistries in these apparently different regimes. Prerequisite: ATM S 458 or ATM S 501 or CHEM 457 or permission of instructor. Offered: Sp.

**View course details in MyPlan: ATM S 558**

**ATM S 559 Climate Modeling (3)**

**View course details in MyPlan: ATM S 559**

**ATM S 560 Atmosphere/Ocean Interactions (3)**
Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Prerequisite: ATM S 509/OCEAN 512. Credit/no-credit only. Offered: jointly with OCEAN 560.

**View course details in MyPlan: ATM S 560**

**ATM S 564 Atmospheric Aerosol and Multiphase Atmospheric Chemistry (3)**
Physics and chemistry of particles and droplets in the atmosphere. Statistics of size distributions, mechanics, optics, and physical chemistry of atmospheric aerosols. Brownian motion, sedimentation, impaction, condensation, and hydrosopic growth. Prerequisite: permission of instructor.

**View course details in MyPlan: ATM S 564**

**ATM S 571 Advanced Physical Climatology (3)**

**View course details in MyPlan: ATM S 571**

**ATM S 575 Large Scale Dynamics of the Tropical Atmosphere (3)**
Observations and underlying dynamics of large-scale tropical circulations. Factors that determine regions of large-scale persistent precipitation in the tropics, thermal forcing of atmospheric circulations by these regions, and temporal variability of the forcing and response. Prerequisite: ATM S 509/OCEAN 512, ATM S 542.

**View course details in MyPlan: ATM S 575**

**ATM S 581 Numerical Analysis of Time Dependent Problems (5)**
Numerical methods for time-dependent differential equations, including explicit and implicit methods for hyperbolic and parabolic equations. Stability, accuracy, and convergence theory. Spectral and pseudospectral methods. Prerequisite: either AMATH 581, AMATH 584/MATH 584, AMATH 585/MATH 585, or permission of instructor. Offered: jointly with AMATH 586/MATH 586; Sp.

**View course details in MyPlan: ATM S 581**
ATM S 582 Advanced Numerical Modeling of Geophysical Flows (3)

ATM S 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ENVIR 585/ESS 585/SMEA 585; Sp. View course details in MyPlan: ATM S 585

ATM S 586 Current Research in Climate Change (2, max. 20)
Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ESS 586/OCEAN 586. View course details in MyPlan: ATM S 586

ATM S 587 Fundamentals of Climate Change (3)
Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ESS 587/OCEAN 587. View course details in MyPlan: ATM S 587

ATM S 588 The Global Carbon Cycle and Climate (3) Emerson
Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ESS 588/OCEAN 588; W. View course details in MyPlan: ATM S 588

ATM S 589 Paleoclimatology: Data, Modeling, and Theory (3)

ATM S 591 Special Topics (1-4, max. 9)
Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor. View course details in MyPlan: ATM S 591

ATM S 593 Climate Science Seminar (1) Mote
Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ESS 593/OCEAN 593; W. View course details in MyPlan: ATM S 593

ATM S 596 Climate Science Capstone Project (1-5, max. 5) Mote
Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective
communication of climate science. Offered: jointly with ESS 596/OCEAN 596; AWSpS.
View course details in MyPlan: ATM S 596

**ATM S 600 Independent Study or Research (**)**
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ATM S 600

**ATM S 700 Master's Thesis (**)**
Offered: AWSpS.
View course details in MyPlan: ATM S 700

**ATM S 800 Doctoral Dissertation (**)**
Offered: AWSpS.
View course details in MyPlan: ATM S 800
Earth and Space Sciences

Department Overview

070 Johnson Hall

Earth and space sciences seeks to further the understanding of the Earth, the solar system, and their histories. The scope extends from the center of Earth to the rim of the solar system, and activities cut across traditional disciplines of physics, chemistry, biology, geology, and mathematics. The discipline examines Earth's interior structure, chemistry, motion, and dynamics; geologic hazards; processes affecting the surface environment and climate; the surrounding space environment; planetary processes; and geobiology.

Undergraduate Program

Adviser
070 Johnson Hall, Box 351310
(206) 616-8511
advising@ess.washington.edu

The Department of Earth and Space Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in earth and space sciences, with options in biology, geology, physics, and environmental earth sciences
- The Bachelor of Arts degree with a major in earth and space sciences
- A minor in earth and space sciences
- A minor in climate science (offered jointly with the Department of Atmospheric Sciences and the School of Oceanography)

The Bachelor of Science degree is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field and technology experiences and problem-solving skills are an important asset. The biology option enables B.S. students interested in paleontology and paleobiology to emphasize biology courses. The physics option allows for an emphasis in physics and geophysics. The environmental earth sciences option is designed for students interested in environmentally focused courses and careers. The Bachelor of Arts degree is designed for students who wish to obtain a broad understanding of earth sciences as a background for careers such as science journalism, environmental law, K-12 teaching, or environmental policy.

Bachelor of Science
Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

101 credits as follows:

1. Science Core (35 credits):
   a. Basic Supporting Science (20 credits): MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students wishing to pursue the ESS Physics Option must take PHYS 121.)
   b. ESS Required Core Courses (15 credits): ESS 211, ESS 212, ESS 213. (Students in the ESS Physics Option may substitute ESS 205 for one of these.)

2. One of the four ESS Options below (minimum 61-71 credits, depending on option):
   a. Biology Option (69 credits)
      i. Supporting science (26 credits): CHEM 152, CHEM 162; BIOL 180, BIOL 200; and one of BIOL 220, PHYS 115/PHYS 118, PHYS 122, MATH 126, STAT 311.
      ii. ESS required (31 credits): Three of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400; ESS 418.
      iii. ESS electives (12 credits): ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered ESS 489 through ESS 499).
   b. Environmental Earth Sciences Option (69-71 credits)
      i. Supporting science (15 credits): STAT 311 or Q SCI 381; CHEM 152 or CHEM 220; and one of CHEM 162, PHYS 115/PHYS 118, or PHYS 122, MATH 126
      ii. ESS required (44 to 46 credits): ESS 201; two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 326; two from ESS 315, ESS 421, ESS 426, ESS 427, ESS 454, ESS 455, ESS 456, ESS 457, ESS 459; ESS 400; ESS 418.
      iii. Electives (10 credits): Additional courses chosen from any ESS 311-series course not taken as a required course above, from ESS 400-level courses (may not include independent study or seminar courses numbered ESS 489 through ESS 499), or from an approved list of courses outside ESS.
   c. Geology Option (67-71 credits)
      i. Supporting Science (18-20 credits): MATH 126, PHYS 115/PHYS 118 or PHYS 122 and two of PHYS 116/PHYS 119 or PHYS 123; CHEM 152, MATH 307, MATH 308, STAT 311
      ii. ESS Required (31 credits): Three of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400; ESS 418
iii. **ESS Electives (18-20 credits):** ESS 400-level courses or any ESS 311-series course not taken as a required course, above. May not include independent study or seminar courses numbered ESS 489 through ESS 499).

d. **Physics Option (61-67 credits)**

i. **Supporting science (32-35 credits):** MATH 126, MATH 308, MATH 324 or MATH 136, MATH 324; PHYS 122, PHYS 123, PHYS 227, PHYS 228, PHYS 321, PHYS 322.

ii. **ESS required (14 credits):** Two of ESS 311, ESS 312, ESS 313, ESS 314, ESS 418.

iii. **ESS electives (15-18 credits):** ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered ESS 489 through ESS 499).

3. All courses counted towards the major must be completed with a minimum grade of 2.0

**Bachelor of Arts**

*Suggested First- and Second-Year College Courses:* Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121; CHEM 142.

**Department Admission Requirements**

Students in good academic standing may declare this major at any time.

**Major Requirements**

90 credits as follows:

1. **Supporting Science (35 credits):**
   a. **Basic Supporting Science (20 credits):** CHEM 142; Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121.
   b. **Additional courses:** 15 credits from department's approved list of courses in science and mathematics. See adviser for current list.

2. **ESS Courses (55 credits):**
   1. **Required courses (15 credits):** Two of ESS 211, ESS 212, ESS 213. One of ESS 311, ESS 312, ESS 313, ESS 314.
   2. **Elective Courses:** 40 upper-division credits (300 and 400 level) with at least 10 credits at the 400 level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.)

3. All courses counted towards the major must be completed with a minimum grade of 2.0

**Continuation Policy**

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.
Minor

Minor Requirements: 30 ESS credits with at least 15 at the upper-division level (300- or 400-level) of which at least 3 credits must be at the 400-level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.) All courses must be completed with a minimum grade of 2.0.

Minor in Climate Science: See description in the Climate Science listing in the Undergraduate Interdisciplinary Programs section of the General Catalog.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** Students who graduate with an undergraduate degree in Earth and Space Sciences (ESS) have achieved these learning goals:
  1. Have a general knowledge of the basic areas of solid earth geology and geophysics, geobiology, surface processes, space physics, and analogues of processes within the solar system.
  2. Be proficient in one of the core disciplines through the completion of requirements in one of four options: standard (geology), (geo)biology, (geo)physics, or environmental.
  3. Think critically and obtain quantitative predictions using skill sets that involve multiple disciplines and all core sciences.
  4. Have obtained hands-on experience from extensive fieldwork and/or laboratory experience.
  5. Have the ability to communicate scientific information clearly and precisely, both orally and in writing.
  6. Have the ability to read, understand, and use scientific literature.

- **Instructional and Research Facilities:** See below, at end of graduate program requirements.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors in the major). See adviser or department website for requirements.

- **State Licensing Endorsement Available:** Students interested in pursuing State Licensing for Geologists can receive guidance in course selection that meets state requirements for the geologist licensing examination (see adviser for requirements or visit department website).

- **Research, Internships, and Service Learning:** Job and internship possibilities are posted in the department and forwarded by email to all undergraduate students.

- **Department Scholarships:** A limited number of departmental scholarships are available. Scholarship applications are invited from all undergraduate students in the major during spring quarter. The awards are applicable to the following academic year.

- **Student Organizations/Associations:** Geo Club organizes field trips and social gatherings. Information about meetings and events is forwarded to undergraduate majors by email.
Graduate Program

Graduate Program Coordinator
070 Johnson Hall, Box 351310
206-616-8511
advising@ess.washington.edu

The Department of Earth and Space Sciences offers graduate programs leading to the Master of Science (M.S.) degree and the Doctor of Philosophy (PhD) degree in both geological sciences and geophysics. The programs emphasize a rigorous quantitative approach in conjunction with detailed in-situ and/or laboratory observations to address significant problems that lead to a better understanding of the Earth and its environment.

Major areas of interest are the internal and surface structures and materials of the Earth and planets, dynamic processes within the earth, oceans, atmosphere, and space environments, their history and the interaction of life with these environments. The required curriculum is flexible to facilitate interdisciplinary research approaches. Earth and Space Sciences is also one of the core departments (with the Department of Atmospheric Sciences and the School of Oceanography) in the interdisciplinary graduate program on climate change and a participant in the astrobiology program.

Master of Science

Admission Requirements

1. Official test scores for the Graduate Record Exam (GRE)
2. Official TOEFL scores for international applicants. TSE scores are not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
4. Three letters of recommendation (submitted via the UW Web Application for Graduate Admission)
5. Departmental application form (submitted via the UW Web Application for Graduate Admission)
6. Personal resume and personal statement (submitted via the UW Web Application for Graduate Admission)

Degree Requirements

36-45 credits, as follows:

Since the department encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the M.S. degree beyond those specified by the Graduate School.

Departmental requirements for graduate students in Earth and Space Sciences include the following:

1. Courses determined in consultation with the student's advisory committee to insure both depth and breadth
2. ESS 594, each quarter offered in the first year
3. ESS 599, every quarter (except summer)
4. Two ESS introductory breadth courses (any 50X course)
5. An experiential learning experience
6. A data analysis course or a research project with a significant data analysis component
7. Preliminary examination (see below)
8. Draft thesis or research paper
9. Final examination

With Thesis: 36 credits, of which 18 must be in courses at the 400 level or above and up to 9 may be for thesis (ESS 700). Final examination consists of oral presentation and defense of thesis.

Without Thesis: 45 credits, of which 18 must be in courses at the 400 level or above, which includes a 5-credit research paper (ESS 600). Final examination is oral and is administered by a Supervisory Committee.

Preliminary Examination: Required for every graduate student in the department's program. Provides one component the department uses to evaluate admission to the PhD program early in the student's second year. Along with the first-year research seminar sequence, the preliminary examination encourages students to learn how to develop and present a research project, and get an early, structured start on graduate research. All entering graduate students must present and defend an research proposal before a Student Evaluation Committee (SEC) at the beginning of their second year in the department.

For the preliminary examination, a graduate student must demonstrate the ability to think critically, logically, and creatively and to communicate effectively; and must show knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology).

Doctor of Philosophy

Admission Requirements

1. Official test scores for the Graduate Record Exam (GRE)
2. Official TOEFL scores for international applicants. TSE scores are not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
4. Three letters of recommendation (submitted via the UW Online Application for Graduate Admission)
5. Departmental application form (submitted via the UW Online Application for Graduate Admission)
6. Personal resume and personal statement (submitted via the UW Online Application for Graduate Admission)

Degree Requirements

90 credits, to include:
Since the department encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the PhD degree beyond those specified by the Graduate School.

Departmental requirements for graduate students in both geological sciences and geophysics include the following:

1. Courses determined in consultation with the student's advisory committee to insure both depth and breadth
2. ESS 594, each quarter offered in the first year
3. ESS 599, every quarter (except summer)
4. Two ESS introductory breadth courses (any 50X course)
5. An experiential learning experience
6. A data analysis course or a research project with a significant data analysis component
7. Preliminary examination (see below)
8. General examination
9. Draft dissertation
10. Dissertation defense

**Preliminary Examination:** An ESS requirement for every graduate student. Provides one component the department uses to evaluate admission to the PhD program early in the second year. Along with the first-year research seminar sequence, the preliminary examination encourages students to learn how to develop and present a research project, and get an early, structured start on graduate research. All entering graduate students must present and defend a research proposal before a Student Evaluation Committee (SEC) at the beginning of their second year in the department.

For the preliminary examination, a student must demonstrate the ability to think critically, logically, and creatively and to communicate effectively; and must show knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology).

**Research Facilities**

Extensive laboratory facilities are available for a wide range of experimental/field work. These include a wet chemistry laboratory, a JEOL 733 Superprobe with EDS/WDS and a high resolution laser Raman spectrometer for mineral analysis, a thermal-ionization mass spectrometer, a multi-collector inductively-coupled-plasma mass spectrometer and associated clean laboratories for analysis of stable and radiogenic isotopes, a computer laboratory, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and high temperature controlled atmosphere furnaces. There is also field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including a laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent, regional seismic network; a portable telemetered seismic network for studying volcanoes and active faults in western North America; geodetic-quality global-positioning-system receivers; a cold laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical-fluids laboratory; two cloud microphysics laboratories; a space physics and
aeronomy laboratory for preparing ground-based, balloon, rocket, and satellite experiments; and a laboratory for the study of advanced plasma propulsion concepts. Additional facilities are provided by the Quaternary Research Center (which houses state-of-the art cosmogenic isotope and stable-isotope research laboratories, palynology, snow and ice research, and a periglacial laboratory) and the Burke Memorial Washington State Museum (which houses paleontological laboratories and extensive reference collections of invertebrate, vertebrate, and plant fossils, and minerals).

**Financial Aid**

Most graduate students receive support in the form of teaching or research assistantships, and endowed fellowships and scholarships.
COLLEGE OF THE ENVIRONMENT
EARTH AND SPACE SCIENCES

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

ESS 100 Dinosaurs (2) NW
Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested.
View course details in MyPlan: ESS 100

ESS 101 Introduction to Geological Sciences (5) NW
Survey of the physical systems that give the earth its form. Emphasizes the dynamic nature of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms in the understanding of past events. A course with laboratory for non-science majors. Not open for credit to students who have taken ESS 105, or ESS 210. Field trips. Offered: AWSp.
View course details in MyPlan: ESS 101

ESS 102 Space and Space Travel (5) I&S/NW
Explores the sun, solar storms, observations from space and from Earth; Earth's space environment, radiation belts and hazards, plasma storms and auroras, rockets and propulsion, human exploration efforts, societal impact, planetary systems and resources, and project highlighting space and its exploration. Open to non-majors. Offered: AWSp.
View course details in MyPlan: ESS 102

ESS 103 Minerals and Gems (3) NW
Introduction to the nature of minerals: composition, structure, physical properties, and origins, with emphasis on gem minerals. Focuses on topics of particular interest in gemology, such as mechanisms of color, history and lore of gems, and uses of gems. Hands-on laboratories using about one hundred representative gems and minerals.
View course details in MyPlan: ESS 103

ESS 104 Prehistoric Life (3) NW
Fossils and how they are preserved. What fossils tell us about past life and environments. How the history of life unfolded and what caused the great events in biological evolution. Open to non-science majors, but also lays a foundation for higher-level geobiology courses.
View course details in MyPlan: ESS 104
ESS 105 The Earth: Its Processes and Hazards (5) NW
Introduction to physical and environmental geology. Focuses on both large-scale tectonic forces that create Earth's continents and oceans, and surficial forces that shape Earth's landscapes. Emphasizes processes that endanger human populations (such as earthquakes, volcanic eruptions, and floods). Not open for credit to students who have taken ESS 101.
View course details in MyPlan: ESS 105

ESS 106 Living with Volcanoes (3) I&S/NW
Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.
View course details in MyPlan: ESS 106

ESS 115 Astrobiology: Life in the Universe (5) NW R. BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN
View course details in MyPlan: ESS 115

ESS 119 Introduction to Laboratories (1, max. 3)
Reviews research being performed in visited and independent research opportunities and possibilities. Includes weekly visits to labs in ESS and related fields. Credit/no-credit only.
View course details in MyPlan: ESS 119

ESS 201 The Earth System and Climate (5) NW
Earth's dynamic environment, global energy balance, interplay of chemical, physical, and biological processes shaping the Earth's surface and climate. Emphasis on quantitative methods for measuring, evaluating, and understanding contemporary changes relative to the last several thousand years. Prerequisite: either MATH 124, MATH 134, or Q SCI 291.
View course details in MyPlan: ESS 201

ESS 202 Earthquakes (5) I&S/NW
Earthquakes of the Pacific Northwest and around the world - their cause and relationship to plate tectonics; why, where, and when they occur. How earthquakes affect human life: shaping landscape, hazards. Laboratory explores physical processes associated with earthquakes. One field trip. Open to non-science majors.
View course details in MyPlan: ESS 202

ESS 203 Glaciers and Global Change (5) I&S/NW
Explores how glaciers record climate change and human activities through bubbles of ancient air and trace impurities in the ice. Also reviews glaciers impact on societies through sea-level, coastlines, water supplies, and transportation routes. Open to non-science majors.
View course details in MyPlan: ESS 203

ESS 204 The Paleobiology and Geobiology of Mass Extinctions (3-4) NW P. WARD
Covers the origin and diversification of life on Planet Earth, and abrupt die-offs in mass extinctions. Explores how new instrumentation and experimentation in biology and chemistry, and improved sampling of the fossil record in geology, combine with astrobiology and geobiology to revise out history of Earth and its life. Prerequisite: a minimum grade of 1.7 in ESS 100. Offered: W.
View course details in MyPlan: ESS 204

ESS 205 Access to Space (5) NW
Group development of student experiments to the outer rim of our atmosphere and the beginning of space; investigation of stratosphere, mesosphere, thermosphere, magnetosphere, development of exploration packages; basic electronic fabrication, global positioning, radio tracking, expectations at high altitudes. Open to all
disciplines. No previous experience of electronics required.  
View course details in MyPlan: ESS 205

ESS 209 Interdisciplinary Earth Sciences Field Seminar (3-12, max. 12) NW  
Miscellaneous field-based and experiential learning activities in earth and space sciences.  
View course details in MyPlan: ESS 209

ESS 210 Physical Geology (5) NW  
Introduction to the physical and chemical processes of the earth's surface and interior. Plate tectonics, earthquakes, volcanism, glaciation. Optional field trips to Cascades and Olympics. Background in geology not required but science background desirable. Not open for credit to students who have taken ESS 101. Recommended: High school or college precalculus and high school or college chemistry.  
View course details in MyPlan: ESS 210

ESS 211 Physical Processes of the Earth (5) NW  
Overview of Earth. Deformation of soil, sediment, and rock. Erosional and depositional processes and landforms. Seismicity and plate-tectonics. Structural, geomorphic, and climatic interactions in major tectonic regimes. Use of stereonets, air photos, geologic maps, and cross sections. Two one-day field excursions. Prerequisite: a minimum grade of 1.7 in either MATH 124, MATH 134, or Q SCI 291, either of which may be taken concurrently; a minimum grade of 1.7 in either both PHYS 114 and PHYS 117 or PHYS 121. Offered: A.  
View course details in MyPlan: ESS 211

ESS 212 Earth Materials and Processes (5) NW  
Crystallography, crystal chemistry, and characteristics of rock-forming and ore minerals. Description, phase equilibria, origin, and associations of igneous, sedimentary, and metamorphic rocks. Laboratory study of hand specimens. Two one-day field excursions. Prerequisite: minimum grade of 1.7 in CHEM 142, or CHEM 145. Offered: W.  
View course details in MyPlan: ESS 212

ESS 213 Evolution of the Earth (5) NW  
Introduction to paleontology, types of stratigraphy, and radiometric dating. The physical, chemical, biological, and plate tectonic evolution of the earth's crust, seawater, and atmosphere. Comparison with other planets. Climate changes and man as a geologic agent. Two one-day field excursions. Prerequisite: minimum grade of 1.7 in either ESS 210, ESS 211, or ESS 212. Offered: Sp.  
View course details in MyPlan: ESS 213

ESS 230 Rivers and Beaches (3/5) NW  
Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focuses on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with OCEAN 230.  
View course details in MyPlan: ESS 230

ESS 290 Special Topics (1-10, max. 20) NW  
Selected topics in earth and space sciences.  
View course details in MyPlan: ESS 290

ESS 301 Geology of the Northwest (5) NW  
Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Weekend field trips optional. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.  
View course details in MyPlan: ESS 301

ESS 302 Great Ice Age (5) NW  
Growth of mile-thick ice sheets, worldwide lowering of sea level, and other geological and paleoclimatological
changes that accompany the harsh environments of a global glaciation. Geology of the last three million years, focusing on the causes and effects of global glaciation and future climate change. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

**ESS 304 Volcanoes and Glaciers of the Pacific Northwest (5) NW**

Introduction to volcanic and glacial processes, emphasizing examples in the Pacific Northwest. Volcanic products, landforms, hazards, prediction, and history. Relationship to tectonics. Nature and distribution of present and former glaciers in Washington. Two all-day Saturday field trips to Cascade volcanoes required.

**ESS 305 Geology of the National Parks (5) NW**

Reviews a wide range of fundamental geological processes, using North American parks and monuments as examples of natural laboratories. Includes plate-tectonic history, volcanism, mountain-building, and glacial, fluvial, and a host of other geomorphic forces as preserved in geologic exposures of National Parks. Prerequisite: either ESS 101, ESS 105, ESS 210, or ESS 211.

**ESS 306 Planetary Geology (5) NW**

Up-to-date survey of geological features and processes on and within planets and their moons deduced from sampling, remote sensing, spacecraft imagery, and theory. Comparative discussion of volcanism, tectonics, surface processes, and thermal evolution. Examination of moon rocks and meteorites. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

**ESS 307 Diversity Outreach Program in Earth and Space Sciences (3-5) I&S/NW, DIV**

Students will lead Earth and Space Sciences outreach events to underserved and underrepresented populations in the Northwest. Gain an understanding to the barriers to education and participate in events to remove some of these barriers. Prerequisite: ESS 101, ESS 102, ESS 211, ESS 212, ESS 213, or ESS 472.

**ESS 310 Mathematical Methods in the Earth Sciences (5) NW**

Presents mathematical methods for Earth Sciences applications. Focuses on setting up equations and on the quality of written solutions. Prerequisite: either Q SCI 292, MATH 125 or MATH 135; either PHYS 114/PHYS 117 or PHYS 121.

**ESS 311 Geomechanics (5) NW**

Introduction to continuum mechanics: elasticity, fluid dynamics, diffusion, porous flow, multiphase flow, dimensional analysis, and natural convection. Example applications: earthquakes and rock mechanics, flow of glaciers, slope stability, debris flows, groundwater flow, contaminant transport, flow in rivers and channels, mantle and magma convection. Prerequisite: 2.0 in either MATH 125, MATH 135, or QSCI 292; 2.0 in either PHYS 114 and 117 or PHYS 121; and ESS 211; recommended: Previous experience with MATLAB. Offered: W.

**ESS 312 Geochemistry (5) NW**

Geochemical concepts essential to earth science studies. Crystal chemistry and elemental affinities, thermodynamics of geologic processes, trace element and isotopic fractionation, weathering, cosmochemistry, and exploration of basic global geochemical cycles. Laboratory exercises explore the dynamics of geochemical processes. Prerequisite: 2.0 in CHEM 142 or CHEM 145; 2.0 in either MATH 125, MATH 135, or QSCI 292; ESS 212 Offered: Sp.
ESS 313 Geobiology (5) NW
Introduction to the early record of life on earth. Environmental factors leading to life's diversification. The role of life in biomineralization. The history of biodiversity. The role of life in landform and soil formation. Laboratory exercises demonstrate specimens and techniques. Prerequisite: 2.0 in either CHEM 142 or CHEM 145; ESS 213. Offered: A.
View course details in MyPlan: ESS 313

ESS 314 Geophysics (5) NW
Introduction to geophysical methods including refraction and reflection seismology, gravity, magnetics, electrical resistivity, heat flow, and geodesy. Laboratory exercises explore interpretation of geophysical data to determine elastic wave speed, density, magnetic susceptibility, and electrical conductivity at depth. Prerequisite: 2.0 in either MATH 126, MATH 136, or ESS 310; 2.0 in either PHYS 115 and PHYS 118 or PHYS 122. Offered: A.
View course details in MyPlan: ESS 314

ESS 315 Environmental Earth Science (5) NW
Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211. Offered: jointly with ENVIR 313.
View course details in MyPlan: ESS 315

ESS 326 Geomorphology (5) NW
Introduction to landforms and surficial deposits. Emphasis on landscape-forming processes. Intended for students who wish to take additional courses in geomorphology. Prerequisite: either PHYS 114 or PHYS 121.
View course details in MyPlan: ESS 326

ESS 345 The Environment of Fuel and Mineral Deposits (3) I&S/NW
Fuels and nonmetallic ores as the substrate of industrial civilization. Provides non-majors with sufficient information about these resources to allow for informed decisions of related geological, environmental, and societal issues. Prerequisite: either ESS 210 or ESS 211.
View course details in MyPlan: ESS 345

ESS 400 Field Geology (12) NW
Six weeks of geologic mapping in a variety of rock types in the Western United States. Enhances students' knowledge of geologic phenomena and processes. Development of skills in mapping, field interpretation, and report writing. Students responsible for own living expenses while in the field. Prerequisite: ESS 211; ESS 212; ESS 213; one course selected from ESS 311, ESS 312, ESS 313, or ESS 314. Offered: S.
View course details in MyPlan: ESS 400

ESS 401 Regional Geology of the Pacific Northwest (3) NW
Explores the geological diversity of the Pacific Northwest temporally (Archean to Pleistocene), tectonically (craton, terranes, and cover sequences), and lithologically (ophiolites to coal). Three weekend field trips required.
View course details in MyPlan: ESS 401

ESS 402 International Field Geology (3-12, max. 12) NW
Supervised geological field work in classic, instructive international sites. Venue varies from year to year. Work may include geologic mapping, construction of cross sections, measurement and analysis of stratigraphic sections, field excursion, and supervised individual research projects.
View course details in MyPlan: ESS 402

ESS 403 Global Tectonics (5) NW
Introduction to large-scale plate tectonics processes and observations including motions on a sphere, polar-wander paths, plate-boundary seismicity, focal mechanisms, gravity, magnetics, and heat flow. Also includes
observations and theories of plate deformation and continental dynamics with emphasis on Western North America. Prerequisite: PHYS 121; recommended: either MATH 126, MATH 136, or ESS 310; PHYS 123; either ESS 311 or 314; a background in quantitative analysis using a computer based environment like MATLAB.

ESS 406 Earth Sciences for Middle and High School Science Teachers: Solid Earth (3) NW
Topics of contemporary interest selected to meet state academic standards. Topics include Pacific Northwest earthquakes and volcanoes, global and regional plate tectonics, history of the Earth, the Earth's interior, planetary geology, and surface processes on the Earth. Does not count toward the ESS degree. Prerequisite: ESS 101.

ESS 408 Great Geological Issues (3) NW
History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Offered: A.

ESS 410 Marine Geology and Geophysics (4) NW
Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either ESS 210, ESS 211, or ESS 212. Offered: jointly with OCEAN 410; A.

ESS 411 Geophysical Continuum Mechanics (5) NW
Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the Earth's lithosphere. Creep of solids and flow of geological materials. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352.

ESS 412 Introduction to Seismology (3) NW
Examines stress and strain, the wave equation, travel times, amplitude and phase, reflection seismology, surface waves, and source theory, including moment tensors, radiation patterns, far-field wave shapes, source spectra, stress drop, and magnitude. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352; recommended: ESS 411 and PHYS 123.

ESS 413 Geophysics: The Earth (3) NW
The Earth and its interior; gravity, magnetism, heat flow, seismology. Earth's outer structure, studied through the unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Prerequisite: either ESS 412 or PHYS 322.

ESS 414 Geophysics: Fluids (3) NW
Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352; and PHYS 322.

ESS 415 Space and Plasmas (3) NW
Survey of various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Prerequisite: PHYS 321.
ESS 416 Geophysics: The Atmosphere (3) NW
Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Prerequisite: ESS 414.
View course details in MyPlan: ESS 416

ESS 418 Geoscience Communication (4)
Covers principles of organizing, developing, and writing geoscience information including abstracts, presentations, scientific articles, correspondences, and proposals. Reviews writing conventions, use of illustrations, style, and tone. Prerequisite: Two of ESS 201, ESS 205, ESS 211, ESS 212, ESS 213, any of which may be taken concurrently. Offered: WSp.
View course details in MyPlan: ESS 418

ESS 420 Introduction to Geographic Information Systems for the Earth Sciences (5) S. WALTERS
Examines principles of GISA applied to the geological sciences. Covers basics of GIScience, data types, and GIS analyses. Includes hands-on analysis applied to geologic patterns and phenomena: sources geological data; geological mapping; measures of topography; hydrologic flow patterns; and topics of the students’ own interests. Offered: Asp.
View course details in MyPlan: ESS 420

ESS 421 Introduction to Geological Remote Sensing (4) NW
View course details in MyPlan: ESS 421

ESS 422 Intermediate Spectral Remote Sensing (4) NW
Explores spectral image processing with ENVI software, used in individualized projects involving satellite or aircraft images. Emphasis on integration of remote sensing and field measurement using process models and Geographic Information Systems (GIS). Prerequisite: ESS 421.
View course details in MyPlan: ESS 422

ESS 424 Water in the Environment (3) NW
Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either ESS 310, MATH 126, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/PHYS 460.
View course details in MyPlan: ESS 424

ESS 425 Tectonic Geomorphology (3) A. DUVALL
Advanced-level survey of tectonic geomorphology topics, focusing on the interplay between tectonic and surface processes that shape the landscape in regions of active deformation and at time scales ranging from days to millions of years. Prerequisite: either ESS 311, ESS 326, ESS 426, or ESS 427. Offered: Sp.
View course details in MyPlan: ESS 425

ESS 426 Fluvial Geomorphology (5)
Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, report writing. Prerequisite: either ESS 311 or ESS 326.
View course details in MyPlan: ESS 426

ESS 427 Hillslope Geomorphology (5) NW
Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Prerequisite: either ESS 311 or ESS 326.
View course details in MyPlan: ESS 427
ESS 431 Principles of Glaciology (4) NW
Covers snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, Ice Age theories. Prerequisite: PHYS 121.
View course details in MyPlan: ESS 431

ESS 432 Glacial Geology (5) NW
Interpretation of glacial environments and history through study of sediments and landforms. The laboratory component is largely field based and visits some spectacular glaciated landscapes. Provides students an experiential learning approach to the field as well as an opportunity to conduct independent research.
View course details in MyPlan: ESS 432

ESS 433 Environmental Change in the Glacial Ages (5) NW
Physical, biological evidence of climatic change during Quaternary Period; emphasizing stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth's terrestrial, marine environments. Theories on causes of climatic variation.
View course details in MyPlan: ESS 433

ESS 435 Glacial-Periglacial Geomorphology NW (3) NW
Introduces glacial processes that shape mountainous and polar regions, creating a wealth of characteristic landforms; and periglacial processes that profoundly impact nearly twenty percent of the land surface of the plant and Mars through frost action and thermal fluctuations. Prerequisite: either Q SCI 292, MATH 125, or MATH 135; either PHYS 114 and PHYS 117 or PHYS 121; ESS 211; ESS 326.
View course details in MyPlan: ESS 435

ESS 437 Mineralogy (5) NW
Symmetry of crystals and crystal structures. Rules of crystal chemistry. Microscopic, diffraction, and spectroscopic techniques of mineral characterization. Transformation processes in minerals: order-disorder, phase transition, and exsolution. Crystal chemistry and phase relations. Reactions on mineral surfaces. Physical properties, deformation, and creep. Prerequisite: CHEM 142 or CHEM 145; ESS 212; ESS 312.
View course details in MyPlan: ESS 437

ESS 439 Petrology of Igneous Rocks (5) NW
Systematic study of the major families of volcanic and plutonic igneous rocks with emphasis on tectonic setting, phase relations, geochemistry, and models of their origin and evolution throughout geologic time. Laboratory emphasizes thin-section study of rocks using transmitted and reflected light. Prerequisite: ESS 312.
View course details in MyPlan: ESS 439

ESS 440 Petrography and Petrology of Metamorphic Rocks (5) NW
Mineralogy, textures, and origins of metamorphic rocks; metamorphic facies and metamorphic phase equilibria; controls of metamorphism. Prerequisite: ESS 312.
View course details in MyPlan: ESS 440

ESS 441 Petrology and Petrography of Sedimentary Rocks (5) NW
Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisite: ESS 312.
View course details in MyPlan: ESS 441

ESS 445 Geology of Ore Deposits (5) NW
The geologic principles, environmental aspects, and exploration strategies of selected types of metallic and nonmetallic ore deposits and coal. Prerequisite: ESS 312.
View course details in MyPlan: ESS 445

ESS 447 Engineering Geology: Methods and Application (4)
Applies the application of geologic principles to geotechnical and environmental problems; includes investigation and characterization of soil and rock properties. Includes two weekend field trips. Prerequisite:
ESS 210 or ESS 211; either ESS 311, ESS 411, ESS 463, or CEE 220.
View course details in MyPlan: ESS 447

**ESS 449 Intensive Field Experience in Biology (3-5) NW**
Introduces field methods and research in various areas of biology, e.g., paleontology, ecology, climate change, and mycology. Includes two or more weeks away from campus at field site. Offered: jointly with BIOL 475; S.
View course details in MyPlan: ESS 449

**ESS 450 Paleobiology (3) NW**
Biological evolution over the past 500 million years, considering how the reciprocal interactions between environment and evolution have influenced the major episodes in life's history and providing a background for assessing the evolutionary impact of modern environmental change.
View course details in MyPlan: ESS 450

**ESS 451 Invertebrate Paleontology (5) NW**
Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with BIOL 451.
View course details in MyPlan: ESS 451

**ESS 452 Vertebrate Paleontology (5) NW C. SIDOR**
Examines fossil vertebrate life, focusing on systematics and morphology of major lineages (fish, reptiles, bird, and early mammal relatives). Examines fossil and modern vertebrates from the Burke Museum collection in the lab. Weekend field trip. Prerequisite: either BIOL 354, BIOL 452, BIOL 453 or ESS 100. Offered: jointly with BIOL 450.
View course details in MyPlan: ESS 452

**ESS 453 Fossil Mammals (5) NW**
Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology, adaptations, extinctions, evolutionary patterns. Structures and relationships of most major groups. Field trip. Prerequisite: either ESS 100 or ESS 452.
View course details in MyPlan: ESS 453

**ESS 454 Hydrogeology (4) NW**
Covers the analysis of groundwater flow systems, geologic controls, and hydrologic properties; basics of chemistry and solute transport in groundwater; and the use of numerical models. Considers local examples and groundwater resource management. Prerequisite: either ESS 311 or ESS 314; recommended: either MATH 126, MATH 136, or ESS 310; a background in quantitative analysis using spreadsheets or MATLAB
View course details in MyPlan: ESS 454

**ESS 455 Stratigraphy (4) NW**
Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biostratigraphy, magnetostratigraphy, seismic stratigraphy, subsurface analysis. Basin analysis, evolution of sedimentary basins and continental margins. Prerequisite: ESS 213.
View course details in MyPlan: ESS 455

**ESS 456 Depositional Environments (4) NW**
Principles of sedimentary facies analysis, including survey of modern processes that produce sedimentary sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: ESS 213; recommended: ESS 311 and either ESS 326, ESS 425, ESS 426, or ESS 427
View course details in MyPlan: ESS 456

**ESS 457 Environmental Geochemistry (4) NW**
Geochemistry of natural waters, emphasizing applications in geology. Topics include groundwater composition, weathering, mineral adsorption, equilibrium computer modeling, clay minerals, organic geochemistry, and
groundwater quality. Prerequisite: ESS 312, CHEM 152, or CHEM 155. Offered: W.
View course details in MyPlan: ESS 457

ESS 459 Environmental Isotope Geology (3) NW
The geochemistry of stable isotopes. Topics include the theory of isotope fractionation, application of isotopes in earth surface processes, climate, and biogeochemical cycles. Includes extensive laboratory experience. Prerequisite: ESS 312.
View course details in MyPlan: ESS 459

ESS 460 Cosmogenic Nuclides in Geomorphology (3) NW
Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Open to undergraduate students only. Prerequisite: either ESS 311 or ESS 312.
View course details in MyPlan: ESS 460

ESS 461 Geological Time (3) NW
Principles of radiometric dating. Methods applicable to Earth history from planetary formation to the recent past. Radiocarbon dating; geological dating with long-lived isotopes; uranium series, trapped charge and cosmogenic isotope techniques. Applications in archaeology, climate change, geomorphology, tectonics, and Earth evolution.
View course details in MyPlan: ESS 461

ESS 462 Volcanic Processes (4) NW
Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruptive phenomena, syn- and post-eruption lahars and other re-working of deposits. Prerequisite: either ESS 212, ESS 311, or ESS 312.
View course details in MyPlan: ESS 462

ESS 463 Structure and Tectonics (5) NW
Geometry, kinematics, and tectonic setting of major types of structures, including those in contractional fold-and-thrust belts; extended crust; strike-slip-dominated regimes; and shear zones. Laboratory exercises develop basic tools of structural geology. Prerequisite: ESS 211; ESS 212; and ESS 213.
View course details in MyPlan: ESS 463

ESS 465 Seismology and Earthquake Engineering (3) NW
Presents an overview of earthquake processes and details of the characteristics of destructive ground motion; illustrates the effects of such motion on engineering structures; reviews current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either ESS 310, MATH 126, MATH 134, or both MATH 307 and MATH 308. Offered: jointly with CEE 431.
View course details in MyPlan: ESS 465

ESS 466 Seismic Exploration and Stratigraphy (5) NW
Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: either ESS 311 or OCEAN 410; either MATH 126 or MATH 136 or ESS 310; and PHYS 123. Offered: jointly with OCEAN 412.
View course details in MyPlan: ESS 467

ESS 471 Introduction to Space Physics (3) NW
Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisite: PHYS 123.
View course details in MyPlan: ESS 471
ESS 472 Rockets and Instrumentation (2-4, max. 12)
Students launch science payloads to high altitude using high power amateur rockets, providing design, fabrication, test, integration, and management experience; covers science motivation, engineering aspects, and delivery systems. Project may vary each year. Offered: AW.
View course details in MyPlan: ESS 472

ESS 475 Current Research in Climate Science Seminar (3, max. 6)
Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ATM S 475/OCEAN 475; A.
View course details in MyPlan: ESS 475

ESS 480 Advanced Methods in Isotope Geochemistry (3, max. 18) NW
Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science. Prerequisite: either ESS 312, ESS 424, ESS 457, ESS 459. Instructors: Huntington, Steig
View course details in MyPlan: ESS 480

ESS 482 Environmental Geochemistry Laboratory (4) NW
Laboratory techniques and experiments relevant to analyses of natural waters. Topics include alkalinity measurements, iron analyses, colorimetric analyses, heavy metal adsorption and geochemical modeling. Prerequisite: ESS 312 or ESS 457. Offered: Sp.
View course details in MyPlan: ESS 482

ESS 489 Honors Seminar (3)
Covers current scientific topics in earth and space sciences; philosophy and methodology of science strategies for developing research projects; scientific education and career planning. May require colloquium or local conference attendance. Offered: A.
View course details in MyPlan: ESS 489

ESS 490 Special Topics (1-10, max. 20) NW
View course details in MyPlan: ESS 490

ESS 492 Undergraduate Teaching Experience and Outreach (1-3, max. 12) NW
Designed to help undergraduate majors acquire effective teaching skills at the college and public school level. Teaching experience gained through assisting graduate student teaching assistant or K-12 public school outreach. Involves classroom teaching experience and improving communications and presentation skills.
View course details in MyPlan: ESS 492

ESS 495 NASA Science and Engineering Research Seminar (1, max. 4) NW
Review of current space science-related research. Emphasis varies, but topics may include planetary geology, astronomy, global change, aeronautical engineering, and remote sensing. Credit/no-credit only.
View course details in MyPlan: ESS 495

ESS 498 Undergraduate Thesis (5) NW
The thesis must be submitted at least one month before graduation.
View course details in MyPlan: ESS 498

ESS 499 Undergraduate Research (*, max. 15)
View course details in MyPlan: ESS 499

ESS 501 Geochemical Systems (3)
Geochemical systems through time, from solar system origin to present. Explores fundamental geochemical concepts using current research issues and discussion. Concepts include radiogenic and stable isotope
systematic, thermodynamics, high and low temperature chemistry of rocks and water, geochemical cycles through Earth's history. Prerequisite: graduate student standing or permission of instructor. Instructors: Nelson
View course details in MyPlan: ESS 501

ESS 502 The Solid Earth (3)
Concepts of internal earth processes: Earth as heat engine and chemical processor, style of mantle convection, origin and evolution of the Earth's magnetic field, Cascadia subduction and hazards. Introduces seismology, fluid dynamics, heat flow, gravity, and geomagnetism. Focuses on the analysis, critique, and communication of ideas from scientific literature.
View course details in MyPlan: ESS 502

ESS 503 Introduction to Solar Terrestrial Physics (3)
Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the Earth. Prerequisite: PHYS 123.
View course details in MyPlan: ESS 503

ESS 504 The Earth Surface (3)
Investigates the coupled tectonic and geomorphic processes that shape the surface of the Earth, creates the surface environment that sustains humanity and other life systems, and produces natural hazards. Introduces modern tools, techniques, and theories applicable to analysis of this coupled dynamic system.
View course details in MyPlan: ESS 504

ESS 505 The Cryosphere (4)
Covers snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, and Ice Age theories. Prerequisite: PHYS 121. Instructors: Waddington, Warren Offered: A.
View course details in MyPlan: ESS 505

ESS 508 Great Geological Issues (3)
History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary material. Prerequisite: graduate standing in earth sciences, or in history of science, or permission of instructor.
View course details in MyPlan: ESS 508

ESS 509 Field Methods in Applied Geology I (3)
Introduction to problems and techniques of applied geology. Studies the interactions among land use, infrastructure, and the dynamic landscape of the Pacific Northwest. Includes nine-day intensive, mid-September field course held near Mount Rainier. Prerequisite: strong background in field methods and geology. Instructors: Crider Offered: A.
View course details in MyPlan: ESS 509

ESS 510 Field Methods in Applied Geology II (3)
Application of applied geology core curriculum to field problems. Includes nine-day intensive, mid-June field course held on the Olympic Peninsula and coastal Puget Sound. Prerequisite: ESS 509; three of ESS 420, ESS 454, ESS 526, ESS 527, or ESS 547. Instructors: Troost Offered: S.
View course details in MyPlan: ESS 510

ESS 511 Geophysical Continuum Mechanics (5)
View course details in MyPlan: ESS 511
ESS 512 Seismology (3)
Examines stress and strain, the wave equation, travel times, amplitude and phase, reflection seismology, surface waves, and source theory, including moment tensors, radiation patterns, far-field wave shapes, source spectra, stress drop, and magnitude. Prerequisite: either ESS 511 or PHYS 123 and one of MATH 307 or MATH 308. View course details in MyPlan: ESS 512

ESS 513 Geophysics: The Earth (3)
Study of gravity, magnetism, heat flow, seismology. Earth's outer structure studied through unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Includes advanced, research-oriented problems. Prerequisite: ESS 512; PHYS 322. View course details in MyPlan: ESS 513

ESS 514 Geophysics: Fluids (3)
Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322, MATH 307, and MATH 308 or equivalent. View course details in MyPlan: ESS 514

ESS 515 Geophysics: Space (3)
Various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Includes advanced, research-oriented problems. Prerequisite: PHYS 321 or equivalent. View course details in MyPlan: ESS 515

ESS 516 Geophysics: The Atmosphere (3)
Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Includes advanced, research-oriented problems. Prerequisite: ESS 514. View course details in MyPlan: ESS 516

ESS 517 Early Earth Evolution (3)
Geological, biological, and environmental evolution of the Earth over the first 4 billion years of its history, as an analogue for the development of other habitable planets. View course details in MyPlan: ESS 517

ESS 518 Technical Communication in Applied Geosciences (1, max. 3)
Reading, writing, and presentation of technical information in the geosciences. Topics vary by quarter Offered: AWSp. View course details in MyPlan: ESS 518

ESS 519 Scientific Writing and Graphics (2) Waddington, Warren
Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/OCEAN 518; Sp, odd years. View course details in MyPlan: ESS 519

ESS 520 Application in Geographic Information Systems for the Earth Sciences (4) S. WALTERS
Covers applied uses of GIS in the applied earth sciences. Includes hands-on instruction in and discussion of analysis of geologic patterns and phenomena: terrain analysis and interpretation; riverbed modeling; floodplain analysis; rainfall patterns and effects; landslide forecasting; isostatic phenomena; and topics of the students' own interest. Also covers basic instruction in geospatial statistics. Prerequisite: ESS 420 or permission of instructor. Offered: W. View course details in MyPlan: ESS 520
ESS 522 Geophysical Data Collection and Analysis (3)
Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system.
View course details in MyPlan: ESS 522

ESS 523 Geophysical Inverse Theory (3) K. CREAGER
Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Offered: Sp, even years.
View course details in MyPlan: ESS 523

ESS 524 Numerical Heat and Mass Flow Modeling in the Earth Sciences (3)
Numerical solution of steady and transient advective-diffusion equations describing heat and mass transport processes in earth sciences, emphasizing finite-volume methods and their relationship to finite-difference and finite-element methods. Topics include discretization methods; coordinate systems; boundary conditions; accuracy; and stability. Prerequisite: MATH 307; MATH 308 or equivalent; or permission of instructor.
Instructors: Waddington
Offered: Sp, even years.
View course details in MyPlan: ESS 524

ESS 525 Tectonic Geomorphology (3) A. DUVALL
Advanced-level survey of tectonic geomorphology topics, focusing on the interplay between tectonic and surface processes that shape the landscape in regions of active deformation and at time scales ranging from days to millions of years. Offered: Sp.
View course details in MyPlan: ESS 525

ESS 526 Fluvial Geomorphology (5) Collins
Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises and independent project emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, and report writing.
View course details in MyPlan: ESS 526

ESS 527 Hillslope Geomorphology (5) Duvall
Theoretical and applied study of hillslope processes including erosion and deposition; mass wasting; and slope forms and evolution.
View course details in MyPlan: ESS 527

ESS 528 Interpretation of Sedimentary Structures (2-4, max. 4)
Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required.
View course details in MyPlan: ESS 528

ESS 529 Principles of Fluid Dynamics, Heat, and Mass Transfer in Earth Sciences (3)
Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions.
View course details in MyPlan: ESS 529

ESS 531 Physics of Ice (3)
View course details in MyPlan: ESS 531
ESS 532 Snow and Ice on the Earth's Surface (3)
View course details in MyPlan: ESS 532

ESS 533 Dynamics of Snow and Ice Masses (3)
View course details in MyPlan: ESS 533

ESS 535 Ice and Climate (3)
Examines the role of ice and snow in climate. Polar climate dynamics. Polar-global interactions. Modeling snow cover, sea ice, and ice-sheet balance, and flow in the climate system. Prerequisite: permission of instructor. Offered: jointly with ATM S 514.
View course details in MyPlan: ESS 535

ESS 537 Advanced Mineralogy (3)
Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of Earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with MSE 518; A.
View course details in MyPlan: ESS 537

ESS 538 Petrogenesis of Igneous Rocks (3)
Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: ESS 439 or equivalent.
View course details in MyPlan: ESS 538

ESS 540 Advanced Igneous Petrology (4)
View course details in MyPlan: ESS 540

ESS 541 Applied Fluvial Geomorphology (4)
Application of theory in fluvial geomorphology to framing and addressing questions in basic research and problems in applied contexts such as river engineering, land use planning, resource management, and river restoration. Prerequisite: either ESS 426, ESS 526, or permission of instructor.
View course details in MyPlan: ESS 541

ESS 544 Applied Tsunami Hazard Science (4)
Broad introductory overview of tsunami science and physical, social, and economic impacts of tsunami hazards. Designed for scientific, engineering, earth-science professionals, and graduate students interested in tsunami hazard assessment, mitigation, or warning. Prerequisite: MATH 126; PHYS 123; AMATH 301, or equivalents.
Instructors: Gonzalez
View course details in MyPlan: ESS 544

ESS 546 Continental-Margin Sedimentation (3)
Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities.
ESS 547 Engineering Geology: Methods and Application (4)
Applies the application of geologic principles to geotechnical and environmental problems; includes investigation and characterization of soil and rock properties. Includes two weekend field trips.
View course details in MyPlan: ESS 547

ESS 550 Electromagnetic and Potential Field Methods (3)
Development of equations of electromagnetic fields in conducting media. Solution of forward and inverse problems with natural and controlled sources: magnetotelluric and related methods. Includes the special case of static fields: DC resistivity, gravity, and magnetic interpretation. Prerequisite: PHYS 323; ESS 522; and either ESS 413 or ESS 513; or permission of instructor.
View course details in MyPlan: ESS 550

ESS 551 Mineral Physics (3)
Applications of condensed matter physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the Earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor.
View course details in MyPlan: ESS 551

ESS 553 Electron Beam Microanalysis (4)
Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems.
View course details in MyPlan: ESS 553

ESS 554 Paleoclimate Proxies (3) Alexander, Sachs
Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/OCEAN 554.
View course details in MyPlan: ESS 554

ESS 555 Physics and Chemistry of the Earth's Interior (3)
Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of subducted lithosphere and geochemical constraints on mantle convection. Prerequisite: permission of instructor.
View course details in MyPlan: ESS 555

ESS 557 Vertebrate Paleontology (5)
Examines the biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips and introduction to regional vertebrate fauna. Offered: jointly with BIOL 557.
View course details in MyPlan: ESS 557

ESS 558 Introduction to Graduate Research in Paleobiology (1)
Introduction to paleobiology techniques and resources. Credit/no-credit only. Offered: jointly with BIOL 555; A.
View course details in MyPlan: ESS 558

ESS 559 Climate Modeling (3)
View course details in MyPlan: ESS 559

http://www.washington.edu/students/crsCat/ess.html
ESS 560 Cosmogenic Nuclides in Geomorphology (3)
Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Prerequisite: either AMATH 301, AMATH 351, or permission of instructor.

View course details in MyPlan: ESS 560

ESS 562 Observational Seismology (1, max. 18)
Quarterly research themes introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no-credit only.

View course details in MyPlan: ESS 562

ESS 563 Theoretical Seismology I (3)

View course details in MyPlan: ESS 563

ESS 564 Theoretical Seismology II (3)

View course details in MyPlan: ESS 564

ESS 567 Environmental Geochemistry (4) NW
Geochemistry of natural waters, emphasizing applications in geology. Topics include groundwater composition, weathering, mineral adsorption, equilibrium computer modeling, clay minerals, organic geochemistry, and groundwater quality. Offered: W.

View course details in MyPlan: ESS 567

ESS 568 Oceanic Lithosphere (3)
Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with OCEAN 545.

View course details in MyPlan: ESS 568

ESS 573 Cloud Microphysics and Dynamics (3)
Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535; Sp.

View course details in MyPlan: ESS 573

ESS 575 Advanced Rockets and Instrumentation (2-4, max. 12)
Students launch science payloads to high altitude using high power amateur rockets, providing design, fabrication, test, integration, and management experience; covers science motivation, engineering aspects, and delivery systems. Project may vary each year. Offered: AW.

View course details in MyPlan: ESS 575

ESS 576 Space and Laboratory Plasma Physics (3)
Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with AA 556; W, odd years.

View course details in MyPlan: ESS 576
ESS 577 Advanced Space Plasma Physics (3)
Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: ESS 415, or permission of instructor.
View course details in MyPlan: ESS 577

ESS 578 Kinetic Theory and Simulation of Space Plasmas (3)
Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves to Alfvén waves. Beam, Weibel, and masers instabilities, heavy ion interactions. Particle simulations, electrostatic and electromagnetic, for non-linear wave evolution and particle heating.
View course details in MyPlan: ESS 578

ESS 579 Computational Methods and Modeling in Geophysics I (3)
Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects.
View course details in MyPlan: ESS 579

ESS 580 Advanced Methods in Isotope Geochemistry (3, max. 18)
Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science. Prerequisite: one of ESS 312, ESS 424, ESS 457, ESS 459, ESS 501, ESS 554, OCEAN 583, or permission of instructor. Instructors: Huntington, Steig
View course details in MyPlan: ESS 580

ESS 581 Planetary Atmospheres (3)
Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ATMS 555.
View course details in MyPlan: ESS 581

ESS 582 Environmental Geochemistry Laboratory (4) NW
Laboratory techniques and experiments relevant to analyses of natural waters. Topics include alkalinity measurements, iron analyses, colorimetric analyses, heavy metal adsorption and geochemical modeling. Offered: Sp.
View course details in MyPlan: ESS 582

ESS 583 Origin of the Solar System (3)
Nebular and nonnebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.
View course details in MyPlan: ESS 583

ESS 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/SMEA 585; Sp.
View course details in MyPlan: ESS 585
ESS 586 Current Research in Climate Change (2, max. 20)
Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ATM S 586/OCEAN 586.
View course details in MyPlan: ESS 586

ESS 587 Fundamentals of Climate Change (3)
Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/OCEAN 587.
View course details in MyPlan: ESS 587

ESS 588 The Global Carbon Cycle and Climate (3) Emerson
Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/OCEAN 588; W.
View course details in MyPlan: ESS 588

ESS 589 Paleoclimatology: Data, Modeling, and Theory (3)
View course details in MyPlan: ESS 589

ESS 590 Special Topics (2-10, max. 20)
View course details in MyPlan: ESS 590

ESS 592 Professional Practice in Applied Geosciences (1, max. 3)
Covers major issues and current topics in the practice of Geosciences: professional licensing, ethics, business trends, environmental regulation, emerging technologies. Includes internships and career guidance, as well as weekly guest speakers. Offered: AWSp.
View course details in MyPlan: ESS 592

ESS 593 Climate Science Seminar (1) Mote
Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/OCEAN 593; W.
View course details in MyPlan: ESS 593

ESS 594 Introduction to Earth and Space Sciences Research (1-2, max. 4)
Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results.
View course details in MyPlan: ESS 594

ESS 595 Earth and Space Sciences Research Methods (2, max. 30)
Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students. Credit/no-credit only.
View course details in MyPlan: ESS 595
ESS 596 Climate Science Capstone Project (1-5, max. 5) Mote
Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/OCEAN 596; AWSpS.
View course details in MyPlan: ESS 596

ESS 597 Applied Geoscience Investigation (1-5, max. 10)
Independent investigation in applied geosciences guided by a faculty member and commonly in association with an off-campus mentor or stakeholder organization. Must complete project agreement in advance of registration. Prerequisite: ESS 592 and permission of instructor Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ESS 597

ESS 599 Seminar (1, max. 24)
Review of current literature in geophysics and graduate student research with faculty participation. Credit/no-credit only.
View course details in MyPlan: ESS 599

ESS 600 Independent Study or Research (*)
Credit/no-credit only.
View course details in MyPlan: ESS 600

ESS 601 Internship (*)
Graduate internship and final exam. Prerequisite: permission of instructor. Instructors: Crider, Troost
View course details in MyPlan: ESS 601

ESS 700 Master's Thesis (*)
View course details in MyPlan: ESS 700

ESS 800 Doctoral Dissertation (*)
View course details in MyPlan: ESS 800
The Program on the Environment (PoE) is the home for Environmental Studies education at the University of Washington. Environmental Studies focuses on the interactions between humans and environments, drawing on an interdisciplinary approach to understand and address complex environmental issues.

The Environmental Studies program offers a BA major in Environmental Studies, a minor in Environmental Studies, and a Graduate Certificate in Environmental Management.

Building on a foundation of natural science, social science, and humanities courses, the curriculum offers students flexibility in choosing an individual course of study. Internship, research, and study abroad opportunities develop skills and leadership for careers in environmental policy, sustainability, conservation, education, or consulting.

Undergraduate Program

Adviser
12 Wallace Hall, Box 355679
(206) 616-1208
poeadv@uw.edu

The Program on the Environment offers the following programs of study:

- The Bachelor of Arts degree with a major in environmental studies
- A minor in environmental studies

Bachelor of Arts

*Suggested First and Second-Year College Courses:* ENVIR 100, ENVIR 200, ENVIR 250, and all foundational courses listed below.

Program Admission Requirements
Students in good academic standing may declare this major at any time.

**General Education Requirements**

All majors must satisfy the College of the Environment general education requirements.

**Major Requirements**

82-88 credits, as follows:

1. **Core Courses (20 credits):** ENVIR 100, ENVIR 200, ENVIR 250, ENVIR 300

2. **Foundation Courses (31-35 credits)**
   a. **Biology (5 credits):** BIOL 180 and one course (or sequence) from among BIOL 200, BIOL 118/BIOL 119, BIOL 250/FISH 250/OCEAN 250, ENVIR 280
   b. Biological Systems (3-5 credits): on course from BIOL 200, BIOL 250/FISH 250/OCEAN 250, ENVIR 240, ENVIR 280
   c. **Chemistry (5 credits):** CHEM 120 or CHEM 142
   d. **Earth Systems Literacy (3-5 credits):** one course from ATM S 211, ATM S 212, or ESS 201, ESS 210, ESS 230/OCEAN 230, OCEAN 200, GEOG 205
   e. **Statistics (5 credits):** one course from Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311
   f. **Economics (5 credits):** one course from ENVIR 235/ESRM 235/ECON 235 or FISH 230/ECON 230
   g. **Values and Cultures (5 credits):** one course from ANTH 210, ANTH 211/ENVIR 211, ENVIR 239, GEOG 272, HSTAA 221/ENVIR 221, or ENVIR 243/PHIL 243

3. **Analytical Methods (3-5 credits):** one course from ESRM 304, ESRM 430, ESS 421, OCEAN 452/FISH 452, GEOG 360, GEOG 471, Q SCI 482

4. **Environmental Perspectives and Experiences (18 credits):** Minimum 18 credits from the list of approved courses (see department website or advising office for list). Minimum 3 credits in each of the six following categories: perspectives: human and social dimensions; natural sciences, and policy and decision making; experiences: bioregional; international; and fieldwork. Courses listed under both perspectives and experiences may count toward either, but not both. Environmentally related independent study courses, study abroad programs, and other courses not on the approved list may count toward this requirement if approved in advance by the Environmental Studies adviser.

5. **Capstone Experience (10 credits):** ENVIR 490, ENVIR 491, ENVIR 492

6. **GPA Requirements:** Minimum 2.00 cumulative GPA for courses within the major.

**Continuation Policy**

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

**Minor**
Minor Requirement: 30 credits, including ENVIR 100; either ENVIR 200 or ENVIR 250. Five (5) credits from among ECON 235/ENVIR/235/ESRM235, HSTAA 221/ENVIR 221, and PHIL 243/ENVIR 243.

Remaining 15 credits drawn from the environmental perspectives course list (see program website adviser for list). At least one course (minimum 3 credits) in each environmental perspectives course category, i.e. natural sciences, human and social dimensions, and policy and decision making. Ten (10 of these 15 credits must be at the 300 or 400 level. Minimum 2.0 for each course presented for the minor.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The environmental studies major offers a rigorous, interdisciplinary, experiential curriculum designed to prepare future environmental leaders to respond to bioregional and global environmental opportunities and challenges. It takes advantage of the extraordinary environmental research at the UW, and makes that social, scientific, humanistic, and professional expertise accessible to students in innovative ways.

- Students completing the BA in environmental studies have developed skills in the following:
  1. **Earth Systems Knowledge:** Understand the structure, function, and integration of the Earth, its inhabitants, and its four major spheres: land, water, living things, and air.
  2. **Interdisciplinary Approach:** Apply an interdisciplinary approach to the study of the environment, integrating multiple kinds of information, tools, methods, and scholarship from a variety of disciplines, in order to analyze and construct arguments about complex environmental issues.
  3. **Experiential Learning:** Understand the connections between classroom and experiential learning and successfully practice multiple forms of hands-on, real world applications.
  4. **Communication:** Demonstrate proficiency in multiple modes of communication (writing for different audiences and purposes, using a range of disciplinary norms; oral presentations and public speaking; online publishing; and visual display of environmental information).
  5. **Public Policy and Decision Making:** Understand how uncertainty, risk, law, politics, ethics, economics, and culture interact with environmental public policy and decision making.
  6. **Teamwork:** Collaborate as members of teams, effectively working with multiple stakeholders from various backgrounds to address environmental issues.
  7. **History of Environmental Inquiry:** Understand and reflect critically on the intellectual and cultural history of environmental studies including the history of environmental preservation and conservation.
  8. **Temporal Scales:** Understand various temporal scales inherent in environmental studies and situate themselves on the continuum of geologic time, evolutionary history, human environment history, and decision making for future generations.
  9. **Spatial Scales:** Understand various spatial scales inherent in environmental studies spanning the continuum from the local/bioregional to the international/global.
10. Diversity: Understand how environmental perspectives, policies, and decisions are related to issues of diversity, privilege, and power.

11. Technical Knowledge: Be familiar with some of the technological tools commonly used to address environmental challenges.

12. Professional Development: Understand how their education will serve them as environmental professionals.

- **Instructional and Research Facilities:** The Program on the Environment office in Wallace Hall Suite 12 includes a commons area for student and faculty events and presentations, four study areas, and a computer lab. Because PoE is an interdisciplinary program, students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** All environmental studies majors complete a senior capstone experience, which includes an internship with a community-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad.

- **Student Organizations/Associations:** SAGE (Student Association for Green Environments) is a club to spread awareness for environmental issues on and off campus and to promote events for a greener, sustainable environment. SAGE is committed to community engagement and education and creating professional development opportunities for environmental studies students.

COLLEGE OF THE ENVIRONMENT
PROGRAM ON THE ENVIRONMENT

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

ENVIR 100 Introduction to Environmental Studies (5) I&S/NW T. BILLO, K. STRAUS, Y. WENG, E. WHEAT
Introduces environmental studies through interdisciplinary examination of the ethical, political, social, and scientific dimensions of current and historical environmental issues. Integrates knowledge from different disciplines, and applies insights and methods to actual environmental problems and situations at scales from local to global. Offered: AWSp.
View course details in MyPlan: ENVIR 100

ENVIR 103 Society and the Oceans (5) I&S/NW
Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with JSIS B 103/SMEA 103.
View course details in MyPlan: ENVIR 103

ENVIR 110 Introduction to Food and the Environment (5) I&S/NW R. HILBORN
Relates the production and consumption of food to the major areas of environmental science including energy use, water consumption, biodiversity loss, soil loss, pollution, nutrient cycles, and climate change. Studies the basic science and how food production impacts the key processes. Offered: A.
View course details in MyPlan: ENVIR 110

ENVIR 200 Communication for Environmental Studies (5) VLPA/I&S E. SCHAUMBERG
Helps develop the skills necessary to engage, analyze, write, and speak about complex environmental issues in a variety of disciplinary contexts with particular values and emphases. Focuses on reading, writing, presentation, and critical analysis of written material. Prerequisite: minimum grade of 2.0 in ENVIR 100; minimum grade of 2.0 in either C LIT 240, ENGL 109 and ENGL 110; ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, ENGL 281, ENGL 297, ENGL 298, or ENGL 299. Offered: AWSp.
View course details in MyPlan: ENVIR 200

ENVIR 211 Environmental Justice (5) I&S, DIV D. PENA
Examines introductory studies of environmental racism and ecological injustice in the United States and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem
management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for "eco-justice." Offered: jointly with AES 211/ANTH 211.

View course details in MyPlan: ENVIR 211

ENVIR 221 Environmental History of the U.S. (5) I&S L. NASH
Surveys the relationship between nature and human history, including the impact of the non-human environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics. Offered: jointly with HSTAA 221; A.

View course details in MyPlan: ENVIR 221

ENVIR 235 Introduction to Environmental Economics (5) I&S/NW S. RABOTYAGOV
Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: jointly with ECON 235/ESRM 235; SpS.

View course details in MyPlan: ENVIR 235

ENVIR 239 Sustainability: Personal Choices, Broad Impacts (3-5) I&S/NW K. STRAUS
Presents frameworks of sustainability via exploration of key pillars of sustainability, the history of sustainability movements, and sustainability in action. Students examine personal and global aspects of sustainability through issues such as smart growth, environmental and natural building, green business and energy, ecotourism, and international policy. Offered: AW.

View course details in MyPlan: ENVIR 239

ENVIR 240 The Urban Farm (5) NW E. WHEAT
Develops students' understanding the ecological connections between food production, human health, and planetary sustainability. Teaches basic skills needed for food production in urban areas and the ethics behind sustainable urban agriculture, including a hands-on component on the farm at the biology greenhouse. Offered: Sp.

View course details in MyPlan: ENVIR 240

ENVIR 243 Environmental Ethics (5) VLP A/I&S L. NICHOLS
Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with PHIL 243.

View course details in MyPlan: ENVIR 243

ENVIR 250 Research Methods in Environmental Studies (5) NW, QSR T. BILLO, K. STRAUS, Y. WENG, E. WHEAT
Introduces the processes involved in research design, including methods for environmental data collection, analysis, and presentation. Introduces ecological and social research methods through case studies, followed by practical lab and field work. Offered: AWSp.

View course details in MyPlan: ENVIR 250

ENVIR 280 Natural History of the Puget Sound Region (5) NW T. BILLO
Focuses on identification and ecology of defining organisms in major habitats of the Puget Sound region. Geology, climate, and early human history provide a framework for understanding the distribution and development of these habitats. Emphasizes a variety of techniques for the observation and description of nature. Offered: Asp.

View course details in MyPlan: ENVIR 280

ENVIR 295 Special Topics in Environmental Studies (1-5, max. 10)
Selected topics in environmental studies. Format may range from seminar/discussion to formal lectures to laboratory or modeling work. Offered: AWSpS.

View course details in MyPlan: ENVIR 295
ENVIR 296 Study Abroad - Environmental Studies (1-15, max. 15)
Environmental studies course taken through an approved study abroad program, for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.
View course details in MyPlan: ENVIR 296

ENVIR 300 Analysis of Environmental Cases (5) I&S/NW T. BILLO, K. STRAUS, Y. WENG, E. WHEAT
Guides students through the analysis of environmental case studies. Encourages synthesis of information from diverse sources and stakeholder perspectives. Frameworks are provided to help students work through the complexities of socioecological systems in a systematic way. Culminates with significant group project and presentation. Prerequisite: minimum grade of 2.0 in ENVIR 200 and ENVIR 250. Offered: ASp.
View course details in MyPlan: ENVIR 300

ENVIR 313 Environmental Earth Science (5) NW
Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211. Offered: jointly with ESS 315.
View course details in MyPlan: ENVIR 313

ENVIR 330 Climate Change Impacts on Marine Ecosystems (5) NW
Links physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Recommended: Requires high school or college physics and algebra with a basic understanding of Newton's Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with FISH 330; Sp.
View course details in MyPlan: ENVIR 330

ENVIR 341 Energy and Environment (3) NW
Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with CHEM E 341/M E 341; A.
View course details in MyPlan: ENVIR 341

ENVIR 350 Internship (1-5, max. 15)
Fieldwork, coursework, or other learning experience conducted off-campus, but supervised by UW faculty. Credit/no-credit only.
View course details in MyPlan: ENVIR 350

ENVIR 360 Environmental Norms in International Politics (5) I&S Ingebritsen
Surveys development of international environmental consciousness from 1960s to present. Models of "green development"; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with JSIS B 350/SCAND 350.
View course details in MyPlan: ENVIR 360

ENVIR 362 Introduction to Restoration Ecology (5) NW/I&S J. BAKKER
An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ESRM 362; A.
View course details in MyPlan: ENVIR 362

ENVIR 371 Anthropology of Development (5) I&S
Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-
urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.

**View course details in MyPlan: ENVIR 371**

**ENVIR 379 Environmental Sociology (5) I&S/NW S. ASAH**
Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; A.

**View course details in MyPlan: ENVIR 379**

**ENVIR 384 Global Environmental Politics (5) I&S K. LITFIN**
Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural, and political processes. Offered: jointly with POL S 384.

**View course details in MyPlan: ENVIR 384**

**ENVIR 385 Political Ecology of the World Food System (5) I&S/NW K. LITFIN**
Investigates the intersection of globalization and food politics, the pivotal role of petroleum in the world food system, and the commodity chains for some foods. Includes an optional service learning component. Offered: jointly with POL S 385.

**View course details in MyPlan: ENVIR 385**

**ENVIR 410 Growing Stuff: Ecology, Economy, and Culture of Resource-Production Ecosystems (5) I&S/NW S. HARRELL**
Examines the connections between ecological, economic, and cultural aspects of local ecosystems that produce natural resources, through three case studies involving reading, writing, class discussion, and three required Saturday or weekend field trips. Case studies may include forest products, seafood, dairy products, biofuels, orchard crops, or others. Offered: jointly with ANTH 410/ESRM 405; Sp.

**View course details in MyPlan: ENVIR 410**

**ENVIR 415 Sustainability and Design for Environment (3) Cooper**
Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415.

**View course details in MyPlan: ENVIR 415**

**ENVIR 416 Ethics and Climate Change (5) I&S S. GARDINER, L. NICHOLS**
Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with PHIL 416.

**View course details in MyPlan: ENVIR 416**

**ENVIR 417 Advanced Topics in Environmental Philosophy (5) I&S S. GARDINER**
Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with PHIL 417.

**View course details in MyPlan: ENVIR 417**

**ENVIR 418 Communication and the Environment (5) I&S**
Examines how communication about the environment influences beliefs, values, and treatment of the natural world. Topics include new coverage of the environment; media strategies and rhetoric used by activists, government agencies, and industry to address environmental issues; representations of the environment in

http://www.washington.edu/students/crsCat/envst.html
popular culture; and/or political argumentation about environmental policy. Offered: jointly with COM 418.

**ENVIR 431 Ecopsychology (5) I&S P. KAHN**
Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ESRM 431/PSYCH 431; W.

**ENVIR 433 Environmental Degradation in the Tropics (5) I&S/NW Christie**
Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with JSIS B 433/SMEA 433.

**ENVIR 439 Attaining a Sustainable Society (3) I&S/NW E. WHEAT**
Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: W.

**ENVIR 440 Environmental Pedagogy (3) I&S/NW**
Introduces the art of teaching in non-traditional settings. Designed to help students become effective environmental educators such as park naturalists, interpretive guides, or urban garden educators. Students learn pedagogical philosophy and gain skills to become more effective environmental educators. Offered: A.

**ENVIR 459 Culture, Ecology, and Politics (5) I&S, DIV D. PENA**
Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecosocialism, environmental justice, and social ecology. Offered: jointly with ANTH 459.

**ENVIR 460 Power, Privilege, and Preservation (5) I&S/NW, DIV**
Critically examines strategies of resource managers to integrate local communities and cultures in protected areas management. Explores issues of power, privilege, and injustice and their impacts on individuals, society, and resource management decisions. Examines the potential for more socially just and ecologically sustainable approaches to protected areas management. Offered: jointly with ESRM 460; A.

**ENVIR 476 Introduction to Environmental Law and Process (3) I&S Bryant**
Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law and advanced undergraduate students. Offered: jointly with SMEA 476; A.

**ENVIR 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW**
ENVIR 480 Sustainability Studio (5, max. 10)
Exploration of definitions and critical concepts of sustainability and analysis of sustainability practices on the UW campus. Student research teams analyze specific sustainability practices related to food, water, energy, and climate, among other topics. Sustainability project topic focus is different each quarter. Offered: AWSp.
View course details in MyPlan: ENVIR 480

ENVIR 485 Environmental Planning and Permitting in Practice (5) I&S T. WILDERMUTH
Advanced survey of environmental planning and permitting as encountered by environmental and natural resource professionals in Washington State and beyond. Focuses on Washington State acts (SEPA, SMA, GMA) and Federal systems (NEPA, CWA, ESA) that shape environmental land use planning and federal planning and permitting systems Offered: jointly with ESRM 485; W.
View course details in MyPlan: ENVIR 485

ENVIR 489 Peer Teaching Assistants in Environmental Studies (1-5, max. 10)
Develops and enhances teaching skills through supervised direct teaching experience. Prepares students for graduate school teaching or other teaching by developing leadership, mentoring, and communication skills. Includes attending lectures and weekly preparation sessions, directed discussions with faculty and TAs, and teaching course lab, field, or discussion sections. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ENVIR 489

ENVIR 490 Capstone Preparation (2) P. MCDONALD
Students engage with representatives of established projects or develop a project around their own interests. Students complete a project learning contract and proposal and take part in professional development activities. First in a series of three. Prerequisite: minimum grade of 2.0 in ENVIR 300. Offered: ASp.
View course details in MyPlan: ENVIR 490

ENVIR 491 Environmental Studies Capstone: Internship and Research ([1-12]-, max. 12)
Projects arranged during ENVIR 490 may include internships, directed environmental research, or other experiential learning opportunities working in a professional setting either on campus or with an outside organization. Students complete assignments connecting their hand-on professional experience to scholarly research on related topics. Second in a series of three. Prerequisite: ENVIR 490. Offered: AWSpS.
View course details in MyPlan: ENVIR 491

ENVIR 492 Environmental Studies Capstone: Synthesis and Communication (-3) P. MCDONALD
Students synthesize knowledge gained through hand-on, applied work with academic research. Students refine their writing skills, get practice conveying information orally and visually, and make formal presentations. Professional development exercises help students market their experience and expertise. Third in a series of three. Prerequisite: ENVIR 491. Offered: ASp.
View course details in MyPlan: ENVIR 492

ENVIR 495 Advanced Topics in Environmental Studies (1-5, max. 15)
Advanced topics in environmental studies. Offered: AWSpS.
View course details in MyPlan: ENVIR 495

ENVIR 496 Study Abroad - Advanced Environmental Studies (1-15, max. 15)
Environmental studies course taken through an approved study abroad program for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.
View course details in MyPlan: ENVIR 496

ENVIR 497 Seminar in Environmental Studies (1-3, max. 6)
Intensive and advanced reading and discussion of selected works in interdisciplinary environmental studies. Topics vary. Credit/no-credit only.
View course details in MyPlan: ENVIR 497
ENVIR 498 Independent Study (1-5, max. 15)
Independent reading and/or research. Limited to majors and minors in Environmental Studies.
View course details in MyPlan: ENVIR 498

ENVIR 499 Undergraduate Research (1-15, max. 15)
Undergraduate research in environmental studies. Offered: AWSpS.
View course details in MyPlan: ENVIR 499

ENVIR 500 Graduate Seminar in Environmental Studies (1-5, max. 15)
Exploration of interdisciplinary themes in environmental science communication. Topics vary.
View course details in MyPlan: ENVIR 500

ENVIR 501 Graduate Seminar in Environmental Management (1-5, max. 15)
Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lectures by academic and/or external practitioners.
View course details in MyPlan: ENVIR 501

ENVIR 502 Business Strategy and the Natural Environment (4)
Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respond to and seek competitive advantage from firms' interactions with the environment.
View course details in MyPlan: ENVIR 502

ENVIR 511 Environmental Management - Keystone Project I (4)
First in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Offered: A.
View course details in MyPlan: ENVIR 511

ENVIR 512 Environmental Management - Keystone Project II (4)
Second in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Prerequisite: ENVIR 511. Offered: W.
View course details in MyPlan: ENVIR 512

ENVIR 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ESS 585/SMEA 585; Sp.
View course details in MyPlan: ENVIR 585

ENVIR 600 Independent Study or Research ([1-5]-)
Independent reading and research. Limited to students enrolled in the Program on the Environment's graduate certificate programs.
View course details in MyPlan: ENVIR 600

Thomas DeLuca
107 Anderson

The School of Environmental and Forest Sciences, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.

Founded in 1907, the school holds a position of national and international leadership in instruction and research. Its location in one of the world's largest forested regions provides students access to a unique urban-to-wildland world-class laboratory in which to study. Approximately 400 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.

The school's programs focus on the sustainability and functionality of complex natural resource and environmental systems, using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFORE), the Water Center, the UW Botanic Gardens, which include the Center for Urban Horticulture and the Washington Park Arboretum, the Olympic National Resources Center (ONRC), the Stand Management Cooperative (SMC), and the Precision Forestry Cooperative. For current information on these centers and cooperatives, visit www.sefs.washington.edu/centersPrograms/.

Office of Student and Academic Services

Director, Student and Academic Services
130 Anderson
sefsadv@uw.edu

The Office of Student and Academic Services in the School of Environmental and Forest Sciences assists prospective students with admission to the school and advises current students, including interpretation of school and University requirements and assistance in course planning. At the graduate level, faculty advisers assist students in choosing a course plan to help build an appropriate academic background for their research areas.
The office also helps to sponsor a career fair winter quarter. Students are strongly urged to seek summer employment and internship positions relevant to their career goals.

**Research Programs**

Areas of research are closely tied to the school's graduate program research areas. These include bioresource science and engineering; forest ecology; forest soils; forest systems and bioenergy; restoration ecology and environmental horticulture; social sciences; sustainable resource management; and wildlife science.

**Outreach Programs**

The school, through its interdisciplinary centers and through collaboration with UW and external partners, undertakes and promotes continuing public and professional education for citizens of the state.

**Facilities**

The school occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winkenwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture, a part of the UW Botanic Gardens, is located near the Union Bay natural area on the east side of the Seattle Campus. The center maintains a library that serves students, faculty, landscape professionals, and the public. The center's herbarium supports fieldwork in environmental horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Burke Museum and Department of Biology, is available for use by the school's students.

The school's laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.

The school computing facilities include computer systems and staff dedicated to specific research areas, a computer student laboratory, and a local area network with several servers offering access to the Internet and local printers.

**Field Facilities**

School field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the school concerned with the research and teaching of natural resources science and management.
The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washington, and is home to the Center for Sustainable Forestry at Pack Forest. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages the facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The Center for Sustainable Forestry is charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the school's strategic themes of sustainable forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mission of the center is to conduct research and education on natural-resources management practices that integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. Both a forest management program and a marine program are in place to study the relationship between the terrestrial and marine environment.

The Lee Memorial Forest, approximately 160 acres, is located about 22 miles northeast of the University, near Maltby. This forested property provides valuable academic and research opportunities near the campus. Characterized by forest types and soils common to Western Washington lowlands, Lee Forest is used extensively for short field trips and for long-term research and demonstration projects especially related to changing land uses.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are used by the school in cooperation with Seattle Public Utilities for studies in forest ecology and soil science in representative low and high elevation forest ecosystems.

The UW Botanic Gardens include the Center for Urban Horticulture, which has offices, laboratories, public-education resources, and field sites for teaching and research along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former landfill, now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Herbarium is dedicated to plants of urban and environmental horticultural significance. The Miller Seed Vault stores seeds of Washington's rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Library is the Northwest's foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center for Urban Horticulture also conducts courses, lectures, and special events for the public and professionals as part of the school's outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the center.

The UW Botanic Gardens' largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants'
diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and other research projects, including many independent student projects. The arboretum, established in 1934, offers numerous formal and informal classes for the general public and, in addition, serves the community as a public park and open space.

Undergraduate Program

Adviser
116 Anderson
(206) 543-3077
sefsadv@uw.edu

The School of Environmental and Forest Sciences offers the following programs of study:

- Bachelor of Science degree with a major in environmental science and terrestrial resource management. Within this major, options in landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation are offered.

- Bachelor of Science degree with a major in bioresource science and engineering. Bioresource science and engineering has ABET accreditation which is recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education as the accrediting agency for engineering in the United States.

- Minors in ecological restoration (available through Bothell, Seattle, and Tacoma campuses), and environmental science and terrestrial resource management.

Bachelor of Science

Suggested First- and Second-Year School Courses:

- Environmental Science and Terrestrial Resource Management: ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 180, BIOL 200, BIOL 220; CHEM 120, CHEM 220; any 5-credit VLPA course; MATH 120 or Q SCI 291; ESRM 210.

- Bioresource Science and Engineering: CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English composition course); HCDE 231; CHEM E 260; MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; BSE 150; BSE 201, BSE 202, BSE 248, and BSE 450.

Department Admission Requirements

- Environmental Science and Terrestrial Resource Management: Students in good academic standing may declare this major at any time.

- Bioresource Science and Engineering: Students may apply for freshman admission or upper-division admission. Applications are available in Student and Academic Services, 116 Anderson, or through the College of Engineering, 356 Loew, or by visiting the school website. Prospective upper-division BSE applicants should have
most pre-engineering coursework completed before applying (see suggested sequencing at: www.sefs.washington.edu/academicPrograms/undergrad/bse/BSEflier.pdf), especially MATH 126 and CHEM 238. See adviser for further information. Admission is competitive; completion of requirements does not guarantee admission. Students may also apply to the chemical engineering degree program through the College of Engineering advanced admission program (see College of Engineering section for advanced admission entrance and continuation requirements).

**Graduation Requirements**

*Environmental Science and Terrestrial Resource Management*

180 credits, to include:

1. **General Education Requirements (70 credits)**
   a. *Written Communication (12 credits):* 5 credits English composition (ENGL 131 preferred); and seven additional credits.
   b. *Quantitative and Symbolic Reasoning (20 credits):* Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
   c. *Natural World (30 credits):* BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
   d. *Visual, Literary, & Performing Arts (VLPA) (10 credits):* COM 202 or COM 220; five additional credits from the University VLPA list.
   e. *Individuals & Societies (Id&S) (10 credits):* ENVIR 235/ECON 235 or ECON 200 or ECON 201; and five additional credits, which are satisfied by core courses shown below.

2. **Major Requirements (62 credits for the major):**
   a. *Core Courses (17 credits):* ESRM 200, ESRM 201, ESRM 300, ESRM 304.
   b. *Restricted Electives (minimum 35 credits):* 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists: 15 credits must be at the 400 level.
   c. *Capstone (10 credits):* ESRM 462 and ESRM 463 and ESRM 464; or ESRM 494 and ESRM 496; or ESRM 494 and ESRM 495
   d. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.

3. **Free electives:** As needed to bring minimum total to 180 credits.

*Environmental Science and Terrestrial Resource Management voluntary program options:*

All requirements for any of the four voluntary options are the same as for the major shown directly above.

1. **Landscape Ecology and Conservation Option (minimum 35 credits):** ESRM 323; ESRM 350; ESRM 381; ESRM 400; ESRM 426; ESRM 470. Minimum one course each from the two approved lists. See adviser for approved lists.
2. Restoration Ecology and Environmental Horticulture Option (minimum 35 credits):
   Courses selected from an approved list. See adviser for approved list.

3. Sustainable Forest Management Option (minimum 35 credits): ESRM 323, ESRM 368; ESRM 430; ESRM 461; ESRM 470. Minimum one course each from the three approved lists. See adviser for approved lists.

4. Wildlife Conservation Option (minimum 35 credits): ESRM 350; ESRM 351; ESRM 441; ESRM 450; ESRM 455 (taken twice); ESRM 458; Q SCI 482.

Bioresource Science and Engineering

1. General Education Requirements (105 credits)
   a. Written Communication (12 credits total, 4 of which are satisfied by major requirements, shown below): 5 credits English composition (ENGL 131 preferred); HCDE 231 (3 credits).

   b. Natural World (NW) (68 credits): MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352); Q SCI 381 or IND E 315 or STAT 390. CHEM 152, CHEM 162; CHEM 237, CHEM 238; PHYS 121, PHYS 122, PHYS 123; A A 260; 10 credits from the University NW list (outside the major).

   c. Visual, Literary, & Performing Arts (VLPA) (10 credits), chosen from the University VLPA list.

   d. Individuals & Societies (I&S) (20 credits, totally, 5 of which are satisfied by BSE requirements, shown below): ECON 200; 10 credits chosen from the University I&S list (outside the major).

2. Major Requirements (74 credits)
   a. Bioresource Science (59 credits): BSE 150, BSE 201, BSE 202, BSE 248, BSE 391, BSE 392, BSE 406, BSE 420, BSE 421, BSE 422, BSE 426, BSE 430, BSE 436, BSE 480, BSE 481, BSE 497. All required BSE courses must be completed with a minimum 2.0 grade.

   b. Engineering Electives (15 credits minimum): Taken from a list of approved engineering electives.

   c. Business Option (additional 12 credits minimum): ESRM 320, ESRM 321, and one course from approved list.

3. Free Electives: To bring minimum total to 180 credits.

Minors

Ecological Restoration

Minor Requirements: 25 credits as follows:

2. Capstone (10 credits): One of the following sequences: ESRM 462/ENVIR 462, ESRM 463/ENVIR 463, ESRM 464/ENVIR 464; or BES 462, BES 463, BES 464; or TESC 462, TESC 463, TESC 464.

3. Electives: 10 credits from approved list of electives maintained by each campus.

4. Minimum 2.00 cumulative GPA for courses presented for the minor.
5. Minimum 15 credits from outside the student's major.
6. Minimum 15 credits completed through the UW.

**Environmental Science and Terrestrial Resource Management**

**Minor Requirements:** Minimum 25 ESRM credits, 20 of which must be upper division. Maximum 5 credits from BSE courses allowed.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the bioresource science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the paper and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.

The goal of the environmental science and terrestrial resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields through the formal program options, which include: landscape ecology and conservation; restoration ecology and environmental horticulture; sustainable forest management; and wildlife conservation; or to construct individual coursework to fit their educational goals.

Career opportunities abound in the area of environmental science and terrestrial resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

- **Instructional and Research Facilities:** See the main school page for details.
- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements or visit [www.sefs.washington.edu/academicPrograms/undergrad/honors.shtml](http://www.sefs.washington.edu/academicPrograms/undergrad/honors.shtml).
- **Research, Internships, and Service Learning:** The Office of Student and Academic Services regularly receives internship announcements, which are forwarded to all SEFS students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.
Undergraduate research opportunities are available. Students should contact faculty members in their areas of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

- **Department Scholarships**: For majors, the School of Environmental and Forest Sciences has a strong scholarship program that provides in-state tuition to students, based on merit or need. Application information can be found at [www.sefs.washington.edu/academicPrograms/scholarship/index.shtml](http://www.sefs.washington.edu/academicPrograms/scholarship/index.shtml).

The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the bioresource science and engineering curriculum. For information, contact Professor Rick Gustafson in Bloedel 364 or visit the foundation website at: [depts.washington.edu/wppf/](http://depts.washington.edu/wppf/).

- **Student Organizations/Associations**: The School has student organizations which organize student symposia, field trips, parties, slide shows and talks, public service projects, and other social activities. Current SEFS student organizations can be found at [www.sefs.washington.edu/people/organizations.shtml](http://www.sefs.washington.edu/people/organizations.shtml).

*Of Special Note*: Some classes include field trips or require laboratory supplies or material duplication at student expense.

---

**Graduate Program**

Graduate Program Adviser  
116 Anderson, Box 352100  
(206) 543-7081  
sefsadv@uw.edu

Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science.

Graduate programs offered in forest resources lead to the degrees of Master of Environmental Horticulture, Master of Forest Resources in sustainable forest management, master of science, and doctor of philosophy. Graduate students may center their study in one of the special fields within the school's divisions.

**Master of Environmental Horticulture**

**Admission Requirements**

1. Evidence of academic readiness for the program.
   a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
   b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
   c. Adequate scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
d. **International applicants only:** Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)

2. Evidence of knowledge of intended area of study.
   a. Clearly written statement of objectives in pursuing further education.
   b. Ideally work or field experience in the planned area of study.

   a. Recommendations from references familiar with applicant's academic ability and potential.
   b. Recommendations from employers in field related to applicant's educational goals.
   c. Application deadline is December 1 for admission the following autumn quarter.

**Degree Requirements**

45 credits, as follows:

1. SEFS 500, SEFS 503, SEFS 549, SEFS 561, ESRM 411, ESRM 451, ESRM 480, ESRM 481; and 13 credits of restricted electives.

2. **Internship/independent research:** A formal public presentation and written professional paper are required. A member of the EHUF faculty advise the student on his/her project, which is completed as SEFS 601 (9 credits minimum)

3. Electives (7 credits)

**Master of Forest Resources - Forest Management**

**Admission Requirements**

1. Evidence of academic readiness for the program.
   a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
   b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
   c. Adequate scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
   d. **International applicants only:** Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)

2. Evidence of knowledge of intended area of study.
   a. Clearly written statement of objectives in pursuing further education.
   b. Ideally work or field experience in the planned area of study.

   a. Recommendations from references familiar with applicant's academic ability and potential.
   b. Recommendations from employers in field related to applicant's educational goals.
c. Application deadline is December 1 for admission the following autumn quarter.

**Degree Requirements**

45 credits, as follows:

1. SEFS 500, SEFS 509, SEFS 526
2. Directed electives: 24 credits distributed among the following four areas, with at least two classes required in each area: forest biology/ecology, forest management, forest measurements, forest policy and administration. See adviser for list of approved courses for each area.
3. Unrestricted electives: 9 credits
4. Capstone project: SEFS 600 or SEFS 601

**Master of Forest Resources - Peace Corps Master International**

**Admission Requirements**

1. Evidence of academic readiness for the program.
   a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
   b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
   c. Adequate scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
   d. *International applicants only:* Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
   a. Clearly written statement of objectives in pursuing further education.
   b. Ideally work or field experience in the planned area of study
3. Supporting evidence from reference persons (3 recommendations total)
   a. Recommendations from references familiar with applicant's academic ability and potential.
   b. Recommendations from employers in field related to applicant's educational goals
   c. Application deadline is December 1 for admission the following autumn quarter.

**Degree Requirements**

45 credits, as follows:

1. SEFS 500, SEFS 504, SEFS 550, SEFS 590, ESRM 403, ESRM 411, Q SCI 482 (24 credits)
2. Directed electives in applied research (4 credits)
3. Graduate-level free electives (8 credits)
4. SEFS 600. Independent research - study complete on return from Peace Corps (9 credits)

**Master of Science**

**Admission Requirements**

1. Evidence of academic readiness for the program
   a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
   b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
   c. Adequate Scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
   d. *International applicants only:* Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)

2. Evidence of knowledge of intended area of study
   a. Clearly written statement of objectives in pursuing further education
   b. Ideally work or field experience in the planned area of study

3. Supporting evidence from reference persons (3 recommendations total)
   a. Recommendation from references familiar with applicant's academic ability and potential
   b. Letters of recommendation from employers in field related to applicant's educational goals

**Degree Requirements**

Minimum 45 credits, to include:

1. *Orientation:* SEFS 500
2. *Social and Natural Sciences Applied to Natural Resource and Environmental Issues:* SEFS 509
3. *Disciplinary Knowledge:* minimum 10 credits from list of approved courses according to interest area
4. *Research Design and Quantitative Analysis:* minimum 8 credits from list of approved courses according to interest area
5. *Current Topics:* 2 credits (500 level), topics vary from year to year
6. *Thesis Research:* SEFS 700 (9 credits minimum)

Current interest groups:
- Forest ecology
- Forest soils
- Bioresource science and engineering
- Restoration ecology and environmental horticulture
- Social sciences
Doctor of Philosophy

Admission Requirements

1. Evidence of academic readiness for the program.
   a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
   b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
   c. Adequate Scores on the GRE (156 Verbal: 148 Quantitative; 5.0 Writing recommended).
   d. *International applicants only*: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)

2. Evidence of knowledge of intended area of study
   a. Clearly written statement of objectives in pursuing further education. PhD applicants should have earned a master's degree; most apply for the master's and then continue on to the PhD.
   b. Ideally work or field experience in the planned area of study
   c. Publications written by the student related to the planned area of study

   a. Recommendations from references familiar with applicant's academic ability and potential
   b. Recommendations from employers in field related to applicant's educational goals
   c. Application deadline is December 1 for admission the following autumn quarter.

Degree Requirements

90 credits, to include:

1. Same as for Master of Science degree (above) with one additional course in each of the categories:
   a. Disciplinary knowledge
   b. Research design and quantitative analysis
   c. Current topics

2. Qualifying examination
3. General examination
4. Dissertation research: SEFS 800 (27 credits minimum)
5. Final examination

Financial Assistance
The school has a limited number of appointments for teaching and research assistantships that provide a stipend, tuition waiver, and benefits. Teaching and research assistant responsibilities are half-time, allowing time to pursue a full academic load. Students may contact faculty directly about available research assistantships.

Fellowships without teaching or research obligations are also available. Requests for consideration must be submitted by December 31 for the following academic year. Applications are in the school's admission packet, available on the school's website at: www.sefs.washington.edu/academicPrograms/graduate/applicant.shtml.
COLLEGE OF THE ENVIRONMENT
SCHOOL OF ENVIRONMENTAL & FOREST SCIENCE
SCHOOL OF ENVIRONMENT AND FOREST RSRCS

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

SEFS 500 Graduate Orientation Seminar (1)
Introduction to graduate study at the School, student resources and services, and current research. Required for all new graduate students in SEFS. Offered: A.
View course details in MyPlan: SEFS 500

SEFS 501 Forest Ecosystems - Community Ecology (5)
Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition, and disturbance in determining community composition, structure, and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.
View course details in MyPlan: SEFS 501

SEFS 502 Analytical Techniques for Community Ecology (4) J. BAKKER
Analysis of ecological data, focusing on community-level data. Topics include distance measures, group comparison methods (Mantel test, permutational MANOVA), ordinations (PCA, DCA, NMS), methods of identifying groups (cluster analysis, classification trees), as well as Indicator Species Analysis, diversity measures, and related topics. Prerequisite: Q SCI 482, which may be taken concurrently. Offered: W.
View course details in MyPlan: SEFS 502

SEFS 503 Current Issues in Restoration Ecology and Environmental Horticulture (1, max. 10)
Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: SEFS 503
SEFS 504 Research Processes in Forest Resources (4)
Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi-method strategies for gathering and analyzing data, and interpretation and presentation of results.
View course details in MyPlan: SEFS 504

SEFS 505 Introduction to Pulp, Paper, and Bioproducts (3) R. GUSTAFSON
Introduction to pulp and paper technology for BSE graduate students who do not have a prior background in pulp and paper. Broad overview of pulp and paper technology and the pulp and paper industry. Offered: A.
View course details in MyPlan: SEFS 505

SEFS 507 Soils and Land Use Problems (4)
Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites. Offered: W.
View course details in MyPlan: SEFS 507

SEFS 509 Analysis of Research Problems (3) S. RABOTYAGOV
Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals, including development of a research plan. Offered: W.
View course details in MyPlan: SEFS 509

SEFS 510 Graduate Studies in Forest Soils (1-5, max. 15)
Offered: AWSpS.
View course details in MyPlan: SEFS 510

SEFS 512 Biogeochemical Cycling in Soils and Forest Ecosystems (3)
Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemical cycling. Prerequisite: one soils course or permission of instructor. Offered: W, even years.
View course details in MyPlan: SEFS 512

SEFS 513 Advanced Soil Genesis and Classification (5)
Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: CFR 510 or permission of instructor. Offered: Sp, even years.
View course details in MyPlan: SEFS 513

SEFS 514 Advanced Forest Soil Fertility and Chemistry (4) R. HARRISON
Chemical properties of soil, nutrient, and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understanding of the chemical function of forest ecosystems. Prerequisite: general chemistry and geology of soils. Offered: Sp, odd years.
View course details in MyPlan: SEFS 514

SEFS 515 Advanced Soil and Plant Analysis (3) R. HARRISON
Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: Sp, even years.
View course details in MyPlan: SEFS 515
SEFS 519 Conducting Financial, Environmental, and Social Responsibility Performance Research (3, max. 12) D. PAUN
Focuses on the concepts of accounting, finance, and financial statement analysis; techniques for analyzing firm performance; and conducting competitor analyses. Conduct in-depth, comparative performance analyses of U.S. and Canadian paper firms and publish the findings as a peer-reviewed manuscript in a journal. Offered: WSp.
View course details in MyPlan: SEFS 519

SEFS 520 Geographic Information Systems in Forest Resources (5) J. LAWLER
Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: A WSp.
View course details in MyPlan: SEFS 520

SEFS 521 Current Topics in Forest Resources (2-5, max. 10)
Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: A WSp.
View course details in MyPlan: SEFS 521

SEFS 522 Plant-Microbe Interactions (1, max. 3) S. DOTY
Discusses current research related to forest tree-microbe interactions. Credit/no-credit only. Offered: W, odd years.
View course details in MyPlan: SEFS 522

SEFS 523 Environmental Applications of Plants: Bioenergy and Bioremediation (3) S. DOTY
Covers phytoremediation (removing pollutants using plants), biofuel production, and carbon sequestration. Focuses on the biology rather than the chemistry. Emphasizes the latest research on how current practices in these areas are being improved. Offered: A.
View course details in MyPlan: SEFS 523

SEFS 524 Current Topics in Phytoremediation (2) S. DOTY
Discussion of current scientific research in the use of plants for remediation of pollution. One paper is student-presented per week and critiqued and discussed in class. Prerequisite: SEFS 523 Credit/no-credit only.
View course details in MyPlan: SEFS 524

SEFS 525 Advanced Wildland Hydrology (4)
Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.
View course details in MyPlan: SEFS 525

SEFS 526 Seminar in Advanced Silviculture (3)
Seminar on current and emerging silvicultural issues and underlying biological principles. Topics include: stand management to enhance wildlife, biodiversity, and high productivity in sub-tropical and tropical regions; computer simulation of stand growth; adaptation to changes in management objectives; soil conditions and productivity during stand rotation; and minimizing effects of catastrophic disruption. Prerequisite: ESRM 428. Offered: W.
View course details in MyPlan: SEFS 526

SEFS 527 Ecosystems Seminar (1)
Discussion by invited speakers on current research related to ecosystems. Credit/no-credit only.
View course details in MyPlan: SEFS 527

SEFS 529 School of Environmental and Forest Sciences Seminar (1, max. 6)
Weekly seminars covering School of Environmental and Forest Sciences topics, with lectures from scientists on
and off campus. Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: SEFS 529

SEFS 530 Introduction to Restoration Ecology (3/5) J. BAKKER
Provides introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: A.

View course details in MyPlan: SEFS 530

SEFS 533 Airborne Lidar for Remote Sensing of Vegetation and Geomorphology (5) L. MOSKAL
Focuses on the applications of lidar data, its interpretation, and processing. Students apply information learned from lectures and laboratory projects to a final project that analyzes vegetation structure, geomorphology, or hydrology. Prerequisite: either ESRM 250, SEFS 520, ESRM 430, FISH 452, FISH 502, FISH 552, or GEOG 360. Offered: Sp.

View course details in MyPlan: SEFS 533

SEFS 535 Fire Ecology (4) E. ALVARADO-CELESTIN
Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in Western United States with emphasis on Pacific Northwest. One weekend field trip. Offered: A.

View course details in MyPlan: SEFS 535

SEFS 540 Optimization Techniques for Natural Resources (5) S. TOTH
Studies optimization techniques for natural resources managers including spatial optimization; linear, integer, and multi-objective programming; and stochastic and combinatorial optimization. Emphasizes model building rather than on algorithmic concepts. Prerequisite: MATH 308 or permission of instructor. Offered: Sp.

View course details in MyPlan: SEFS 540

SEFS 541 Advanced Landscape Ecology (5) J. LAWLER
Hands-on, applied, project-based research class. Students work in a team in conjunction with one or more outside partners to address real landscape-scale conservation problems. Covers scaling, landscape processes, pattern measurement, connectivity, landscape modeling, and conservation planning. Prerequisite: SEFS 501. Offered: W, odd years.

View course details in MyPlan: SEFS 541

SEFS 549 Urban Horticulture Seminar (1, max. 6)
Discussion by invited speakers on current topics in urban horticulture. Credit/no-credit only. Offered: A.

View course details in MyPlan: SEFS 549

SEFS 550 Graduate Seminar (2-5, max. 10)
Graduate seminar to evaluate and discuss current research topics. Topics and requirements vary. Offered: AWSp.

View course details in MyPlan: SEFS 550

SEFS 554 Wildlife Seminar (1-2, max. 10)
Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: SEFS 554

SEFS 561 Public Presentation in Urban Horticulture (2)
Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics, are discussed. Offered: Sp.

View course details in MyPlan: SEFS 561

SEFS 564 Advanced Forest Biometry (3/5) E. TURNBLOM
Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and
estimation processes in forest biometry. Offered: W, even years.
View course details in MyPlan: SEFS 564

SEFS 567 Topics in Advanced Ecology (3, max. 6)
Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/FISH 567; W.
View course details in MyPlan: SEFS 567

SEFS 570 Seminar in Environmental Sociology (3)
Offered: jointly with SOC 570.
View course details in MyPlan: SEFS 570

SEFS 571 Resource Policy and Administration (4)
Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PUBPOL 592.
View course details in MyPlan: SEFS 571

SEFS 574 Restoration Problem Solving: Ecological Engineering (5) J. FRIDLEY
Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.
View course details in MyPlan: SEFS 574

SEFS 590 Graduate Studies (1-5, max. 10)
Study of emerging scientific developments in forest resources that may develop into regular course offerings. Offered: AWSpS.
View course details in MyPlan: SEFS 590

SEFS 591 Seminar in Resource Policy and Management (1)
Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the School of Environmental and Forest Sciences. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PUBPOL 591.
View course details in MyPlan: SEFS 591

SEFS 592 Environmental Policy Processes (3-4)
Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PUBPOL 590.
View course details in MyPlan: SEFS 592

SEFS 595 Graduate Teaching Practicum (1-5, max. 5)
Principles of teaching and learning applied to undergraduate instruction in the School of Environmental and Forest Sciences. Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for SEFS students only. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: SEFS 595

SEFS 600 Independent Study or Research (*-)
Offered: AWSpS.
View course details in MyPlan: SEFS 600
SEFS 601 Internship (3-9, max. 9)
Graduate internship under the supervision of a faculty member. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: SEFS 601

SEFS 700 Master's Thesis (*-)
Offered: AWSpS.
View course details in MyPlan: SEFS 700

SEFS 800 Doctoral Dissertation (*-)
Offered: AWSpS.
View course details in MyPlan: SEFS 800
BSE 150 Bioresource Science and Engineering Seminar (1) R. GUSTAFSON
Introduces the science and technology of bioresources, including paper. Faculty, advisers, and guest lectures present on topics throughout the quarter. Credit/no-credit only. Offered: A.
View course details in MyPlan: BSE 150

BSE 190 Special Topics (1-5, max. 10) NW R. BURA
Introduces current topics or courses under development to address the latest issues in bioresource science and engineering.
View course details in MyPlan: BSE 190

BSE 201 Introduction to Pulp, Paper, and Bioproducts (3) NW
Broad overview of the science and technology of producing pulp and paper. Introduction of the BSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: W.
View course details in MyPlan: BSE 201

BSE 202 Pulp and Paper Lab and Field Studies (1) NW
Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for BSE majors. Credit/no-credit only. Offered: W.
View course details in MyPlan: BSE 202

BSE 211 Creativity and Society (5) VLPA/I&S G. ALLAN
Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: AWS.
View course details in MyPlan: BSE 211
BSE 231 Technical Communication for Process Engineers (3) NW S. EWANICK
Introduces technical communication skills for process engineers. Topics covered include general communication, technical writing, oral presentations and engineering ethics. Students work individually and in teams to complete oral and written assignments based on modern, industrially relevant bioresource and process engineering problems. Prerequisite: Either C LIT 240, both ENGL 109 and ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: Sp.
View course details in MyPlan: BSE 231

BSE 248 Paper Properties (4) NW
Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Offered: A.
View course details in MyPlan: BSE 248

BSE 309 Creativity and Innovation (2) VLPA G. ALLAN
View course details in MyPlan: BSE 309

BSE 391 Engineering Principles of Biorefineries (5) NW F. PACHECO DE RESENDE
Introduction to biofinery processes, including material and energy balances; sustainability aspects and environmental issues; and process modeling. Application of conservation laws to calculation of flow rates, chemical composition, and heat requirements of non-reactive and reactive systems typical of processes involving lignocellulosic biomass. Prerequisite: A A 260; either CHEM 237 or CHEM 223; MATH 307 Offered: A.
View course details in MyPlan: BSE 391

BSE 392 Bioresource Transport Phenomena (5) NW F. PACHECO DE RESENDE
Focusses on transport phenomena involved in the biofinery processes, including: momentum, heat, and mass transfer; paper drying, transport in biochemical and thermochemical processes, and product separation; and computational tools. Application of conservation laws to calculations of flow rates, chemical composition, and heat requirements involving lignocellulosic biomass. Prerequisite: minimum grade of 2.0 in BSE 391. Offered: W.
View course details in MyPlan: BSE 392

BSE 399 Undergraduate Internship (1-5, max. 15)
Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: BSE 399

BSE 406 Natural Products Chemistry (5) NW R. BURA
Provides knowledge of chemistry of aqueous and solvent-rich systems, natural and synthetic polymers, and of interactions with inorganic materials and trace substances present in biomass processing systems. Covers the chemistry of lignocellulosic biomass components: cellulose, hemicellulose, lignin, and extractives. Presents the fundamental chemistry of biomass conversion process. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335. Offered: A.
View course details in MyPlan: BSE 406

BSE 420 Bioresource Engineering I (4) R. BURA
Covers chemistry and reaction kinetics of conversion of biomass into molecules and fibers for use in making fuels and high value products. Includes chemical, biological, and thermal conversion of biomass. Develops
applications of reaction kinetics to design reactor configurations. Prerequisite: BSE 406. Offered: W.  
View course details in MyPlan: BSE 420

BSE 421 Bioresource Engineering II (4) R. GUSTAFSON
Introduces basic mass transfer processes and physical basis: diffusion, convection, and mass transfer coefficients. Analyzes separation processes used in forest products and bioresources industries: membrane separations, flow through porous media, leaching and extraction, and evaporation. Includes industrial processes: dialysis, reverse osmosis, fiber web formation, pulp washing, and black liquor evaporation. Prerequisite: minimum grade of 2.0 in both BSE 392 and BSE 420. Offered: Sp.  
View course details in MyPlan: BSE 421

BSE 422 Bioresource Engineering III (4) R. GUSTAFSON
Introduces process simulators and their application to model unit operations and large scale integrated facilities such as biorefineries and pulp and paper mills. Covers applications to optimize processes for production and environmental impact, basic control equipment, process models used in control, types of controllers, and simple controller tuning. Prerequisite: minimum grade of 2.0 in BSE 421. Offered: A.  
View course details in MyPlan: BSE 422

BSE 426 Bioresource Laboratory (4) R. BURA
Covers bioconversion laboratory techniques, focusing on design and operation of conversion processes to produce high value biorenewable products based on chemistry of biomass. Products include ethanol, pulp, glycols, and sugar streams. Includes significant product design component, and hands-on laboratory creation of products based on design. Prerequisite: minimum grade of 2.0 in BSE 420; Q SCI 381 or STAT 311 which may be taken concurrently. Offered: Sp.  
View course details in MyPlan: BSE 426

BSE 430 Papermaking Processes (5)
Examines stock preparation operations (refining, screening, and cleaning) for papermaking and sheet forming as a unit of operations. Considers related unit operations of fluid dynamics and heat transfer as they apply to the commercial process. Covers sheet finishing operations of surface sizing, calendaring, and rewinding. Analyzes physics of fiber webs. Prerequisite: either BSE 392 or CHEM E 340. Offered: A.  
View course details in MyPlan: BSE 430

BSE 436 Pulp and Paper Laboratory II (4)
Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: BSE 430. Offered: W.  
View course details in MyPlan: BSE 436

BSE 480 Bioresource Design I (4) I&S/NW R. GUSTAFSON
Design and production of biomass derived products meeting given specifications and financial constraints, integrating coursework knowledge to solve complex, open-ended design problems. Specific considerations in design include: economic, marketability, environmental, sustainability, ethical, health and safety, social, and political. Prerequisite: minimum grade of 2.0 in BSE 406; 2.0 in BSE 420; 2.0 in BSE 430. Offered: W.  
View course details in MyPlan: BSE 480

BSE 481 Bioresource Design II (5) I&S/NW R. GUSTAFSON
Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: BSE 480. Offered: Sp.  
View course details in MyPlan: BSE 481

BSE 489 Foreign Study (1-5, max. 15)
Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.  
View course details in MyPlan: BSE 489
BSE 490 Special Topics (1-5, max. 15)
Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSp.
View course details in MyPlan: BSE 490

BSE 497 Pulp and Paper Internship (1, max. 3)
Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Offered: AWSpS.
View course details in MyPlan: BSE 497

BSE 499 Undergraduate Research (1-5, max. 15)
Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.
View course details in MyPlan: BSE 499
COLLEGE OF THE ENVIRONMENT
SCHOOL OF ENVIRONMENTAL & FOREST SCIENCE
ENVIRONMENTAL SCI & RESOURCE MANAGEMENT

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

ESRM 100 Introduction to Environmental Science (5) I&S/NW R. HARRISON
Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Cannot be taken for credit if ESC 110 already taken. Offered: AWSpS.
View course details in MyPlan: ESRM 100

ESRM 101 Forests and Society (5) I&S/NW K. VOGT
Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Cannot be taken for credit if CFR 101 already taken. Offered: ASp.
View course details in MyPlan: ESRM 101

ESRM 150 Wildlife in the Modern World (5) I&S/NW
Covers major wildlife conservation issues in North America. Some global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf. Offered: A.
View course details in MyPlan: ESRM 150

ESRM 200 Society and Sustainable Environments (5) I&S/NW S. ASAH, P. KAHN
Introduces the application of social concepts and theories to understanding and managing urban, urbanizing, and wildland landscapes in a sustainable manner. Of particular interest are factors that shape patterns on the landscape and resulting social and economic benefits. Explores landscapes across the urban to wildland gradient. Offered: WSp.
View course details in MyPlan: ESRM 200
ESRM 201 Sustaining Pacific Northwest Ecosystems (5) I&S/NW  
D. BUTMAN, S. DOTY
Introduces the principles of ecology across an urban to wildland gradient and discusses how these landscapes can be sustainably managed. Explores basic ecological theories, plant communities, soil, climate, pollution, hydrology, and wildlife in classroom, labs, and field trips. Offered: ASp.
[View course details in MyPlan: ESRM 201]

ESRM 210 Introductory Soils (5) NW
Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology and genesis, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.
[View course details in MyPlan: ESRM 210]

ESRM 235 Introduction to Environmental Economics (5) I&S/NW  
S. RABOTYAGO
Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: jointly with ECON 235/ENVIR 235; SpS.
[View course details in MyPlan: ESRM 235]

ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR
Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSpS.
[View course details in MyPlan: ESRM 250]

ESRM 300 Principles of Sustainability (2) I&S/NW
Overview of principles of sustainability, including discussion of current literature, presentation, and discussion with practitioners, and methods for balancing social, economic, and ecological consequences of proposed policies and actions. Students develop a plan to further their studies in natural resources and environmental sustainability. Credit/no-credit only. Offered: W.
[View course details in MyPlan: ESRM 300]

ESRM 304 Environmental and Resource Assessment (5) NW, QSR  
E. TURNBLOM, D. VOGT
The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Offered: ASpS.
[View course details in MyPlan: ESRM 304]

ESRM 311 Soils and Land Use (3) NW
Intended for students concerned with environmental problems in the Puget Sound basin; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.
[View course details in MyPlan: ESRM 311]

ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I&S/NW  
J. FRANKLIN
Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.
[View course details in MyPlan: ESRM 315]

ESRM 320 Marketing and Management from a Sustainability Perspective (5) I&S/NW  
D. PAUN
Introduction to business concepts relating to marketing, human resource management, small businesses and
entrepreneurship, and economics in the context of environmental resource management. Offered: AS.

View course details in MyPlan: ESRM 320

ESRM 321 Finance and Accounting from a Sustainability Perspective (5) I&S/NW  D. PAUN
Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: WS.

View course details in MyPlan: ESRM 321

ESRM 323 Silviculture (5) NW  E. TURNBLOM
Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips. Offered: Sp.

View course details in MyPlan: ESRM 323

ESRM 325 Environmental Applications of Plants: Bioenergy and Bioremediation (3) NW  S. DOTY
Explores current topics in forest bioresources with an emphasis on bioenergy, remediation of pollutants, and carbon sequestration. Offered: A.

View course details in MyPlan: ESRM 325

ESRM 328 Forestry-Fisheries Interactions (4) NW
Offered: jointly with FISH 328.

View course details in MyPlan: ESRM 328

ESRM 331 Landscape Plant Recognition (3) NW
Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Offered: jointly with BIOL 331; Sp.

View course details in MyPlan: ESRM 331

ESRM 350 Wildlife Biology and Conservation (5) NW  A. WIRSING
Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Prerequisite: either BIOL 162, BIOL 180, BIOL 220, or ESRM 162, any of which may be taken concurrently. Offered: A.

View course details in MyPlan: ESRM 350

ESRM 351 Wildlife Research Techniques (5) NW
Scientific approaches to the field study of wildlife populations including study design, species identification, data collection, and report writing. Emphasis on direct experience with current field techniques used in the study of vertebrate populations. Prerequisite: either BIOL 162, BIOL 180, ESRM 162, or ESRM 350. Offered: Sp.

View course details in MyPlan: ESRM 351

ESRM 362 Introduction to Restoration Ecology (5) NW/I&S  J. BAKKER
An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ENVIR 362; A.

View course details in MyPlan: ESRM 362

ESRM 368 Natural Resource Measurements (4) NW  E. TURNBLOM
Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315, Q SCI 381, STAT 220, or STAT
311. Offered: W.
View course details in MyPlan: ESRM 368

ESRM 371 Environmental Sociology (5) I&S/NW S. ASAH
Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ENVIR 379/SOC 379; A.
View course details in MyPlan: ESRM 371

ESRM 381 Management of Wildland Recreation and Amenities (3) NW
Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: A.
View course details in MyPlan: ESRM 381

ESRM 399 Field or Teaching Internship (1-5, max. 15)
Internship experience in undergraduate teaching or in the environmental field, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: ESRM 399

ESRM 400 Natural Resource Conflict Management (3) I&S/NW C. RYAN
Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.
View course details in MyPlan: ESRM 400

ESRM 401 Spring Comes to the Cascades (3) NW
Examines the interaction between forests, environment, and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associate observations are linked to classroom or group project activities and are used to understand a number of ecological, physiological, and meteorological concepts. Offered: Sp.
View course details in MyPlan: ESRM 401

ESRM 403 Forest and Economic Development in the Developing World (4) NW
Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions. Offered: A.
View course details in MyPlan: ESRM 403

ESRM 404 Plant Microbiology Laboratory (5) NW S. DOTY
Focuses on measuring impacts of beneficial microorganisms on plants. Assays include colonization of plants, N stress alleviation, photosynthesis, and growth enhancement. Microorganisms are characterized by phytohormone production, provision of nutrients, and growth. Microbial strains are identified using standard molecular analysis methods (PCR, cloning, sequencing). Includes short lectures. Prerequisite: Prerequisite: BIOL 180; either CHEM 120 or CHEM 142; recommended ESRM 201. Offered: WS.
View course details in MyPlan: ESRM 404

ESRM 405 Growing Stuff: Ecology, Economy, and Culture of Resource-Production Ecosystems (5)
I&S/NW S. HARRELL
Examines the connections between ecological, economic, and cultural aspects of local ecosystems that produce

http://www.washington.edu/students/crs/cat/esrm.html
natural resources, through three case studies involving reading, writing, class discussion, and three required Saturday or weekend field trips. Case studies may include forest products, seafood, dairy products, biofuels, orchard crops, or others. Offered: jointly with ANTH 410/ENVIR 410; Sp.

View course details in MyPlan: ESRM 405

ESRM 409 Soil Ecology (5) NW
Soil organisms in forest and other ecosystems, decomposition, nutrient cycling. Nitrogen transformation, mycorrhizae, effects of forest management. Offered: A, even years.

View course details in MyPlan: ESRM 409

ESRM 410 Forest Soils and Site Productivity (5) NW
Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Offered: A, odd years.

View course details in MyPlan: ESRM 410

ESRM 411 Plant Propagation: Principles and Practice (3) NW S. KIM
Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Offered: Sp.

View course details in MyPlan: ESRM 411

ESRM 412 Native Plant Production (3) NW J. BAKKER
Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Offered: Sp.

View course details in MyPlan: ESRM 412

ESRM 413 Soil Genesis and Classification (5) NW
Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Offered: Sp, even years.

View course details in MyPlan: ESRM 413

ESRM 414 Forest Soil Fertility and Chemistry (3) NW
Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Offered: Sp, odd years.

View course details in MyPlan: ESRM 414

ESRM 415 Biology, Ecology, and Management of Plant Invasions (5) NW
Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: either BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 201, ESRM 401, ESRM 472, or ESRM 473. Offered: A.

View course details in MyPlan: ESRM 415

ESRM 420 Wildland Fire Management (5) NW E. ALVARADO-CELESTIN

View course details in MyPlan: ESRM 420
ESRM 425 Ecosystem Management (5) NW  J. FRANKLIN
Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.
View course details in MyPlan: ESRM 425

ESRM 426 Wildland Hydrology (4) NW
Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.
View course details in MyPlan: ESRM 426

ESRM 428 Principles of Silviculture and Their Application (5) NW
Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development in plantation forest systems and its relationship to forest yield, the advantages and limitations of plantation silviculture relating to specific biotic, abiotic, and economic conditions, and management for objectives other than time yield. Prerequisite: ESRM 323. Offered: A.
View course details in MyPlan: ESRM 428

ESRM 429 Environmental Science and Resource Management Seminar (1, max. 6) NW
Weekly presentations covering environmental topics by scientists on and off campus Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: ESRM 429

ESRM 430 Remote Sensing of the Environment (5) NW  Moskal
Focuses on hyperspatial remote sensing fundamentals, interpretation and manipulation of aerial photography, satellite imagery, and Light Detection and Ranging (LiDAR). Uses traditional and 'state of the art' image processing techniques. Students learn to evaluate available hyperspatial remote sensing data sources and design simple projects related to environmental applications. Offered: W.
View course details in MyPlan: ESRM 430

ESRM 431 Ecopsychology (5) I&S  P. KAHN
Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ENVIR 431/PSYCH 431; W.
View course details in MyPlan: ESRM 431

ESRM 433 Airborne Lidar for Remote Sensing of Vegetation and Geomorphology (5) L. MOSKAL
Focuses on the applications of lidar data, its interpretation, and processing. Students apply information learned from lectures and laboratory projects to a final project that analyzes vegetation structure, geomorphology, or hydrology. Prerequisite: either ESRM 250, SEFS 520, ESRM 430, FISH 452, FISH 502, FISH 552, or GEOG 360 Offered: Sp.
View course details in MyPlan: ESRM 433

ESRM 435 Insect Ecology (3) NW
Covers major principles of ecology as they apply to insects, and follows a level of organization from the individual to populations to communities. Applications of insect ecology are extended to insect ecosystem services, conservation, and pest management. Prerequisite: BIOL 161, BIOL 180, BIOL 200, BIOL 220, or ESRM 161. Offered: Sp.
View course details in MyPlan: ESRM 435

ESRM 436 Laboratory in Insect Ecology (2) NW
Supplements the lecture course (ESRM 435) by providing hands-on lab and field experience on ecological principles as they pertain to insects. Prerequisite: ESRM 435, which may be taken concurrently.
View course details in MyPlan: ESRM 436
ESRM 441 Landscape Ecology (5) NW J. LAWLER
Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Offered: A.
View course details in MyPlan: ESRM 441

ESRM 447 Watershed Ecology and Management (3) NW G. HOLTGRIEVE
Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and function of flowing aquatic ecosystems and their catchments. Topics include river/stream hydrology, geomorphology, nutrient spiraling, food webs, and global change. Case studies explore human interactions with rivers and approaches to river management. Prerequisite: BIOL 180 or ESRM 201 or FISH 101. Offered: jointly with FISH 447; Sp.
View course details in MyPlan: ESRM 447

ESRM 448 Watershed Ecology and Management Lab (2)
Hands-on examination of river and stream ecosystems with emphasis on physical and biological processes, field methods, analysis of data, and writing scientific papers, includes field trips. Prerequisite: ESRM 447 or FISH 447 which may be taken concurrently. Offered: jointly with FISH 448; Sp.
View course details in MyPlan: ESRM 448

ESRM 450 Wildlife Ecology and Conservation (5) NW A. WIRSING
Covers principles of wildlife ecology such as habitat use and selection, population and metapopulation dynamics, and predator-prey interactions, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Prerequisite: minimum grade of 2.0 in ESRM 350. Offered: W.
View course details in MyPlan: ESRM 450

ESRM 452 Field Ornithology (3) NW J. MARZLUFF
Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: ESRM 456 which may be taken concurrently; either BIOL 162, BIOL 180, or BIOL 220, any of which may be taken concurrently. Offered: A.
View course details in MyPlan: ESRM 452

ESRM 455 Wildlife Seminar (1, max. 8) NW
Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: ESRM 455

ESRM 456 Biology and Conservation of Birds (3) NW J. MARZLUFF
Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and unhunted birds. Emphasis on western United States. Prerequisite: either BIOL 162, BIOL 180, or BIOL 220, ESRM 162, any of which may be taken concurrently. Offered: A.
View course details in MyPlan: ESRM 456

ESRM 457 Fish and Wildlife Toxicology (3/5) NW
Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.
View course details in MyPlan: ESRM 457

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW J. MARZLUFF
Biological underpinnings and political realities of endangered species management, including: legal issues,
recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: W.

View course details in MyPlan: ESRM 458

**ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW J. MARZLUFF, A. WIRSING**

Extended field course offers wildlife science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESRM 350; may not be repeated. Offered: Sp.

View course details in MyPlan: ESRM 459

**ESRM 460 Power, Privilege, and Preservation (5) I&S/NW, DIV**

Critically examines strategies of resource managers to integrate local communities and cultures in protected areas management. Explores issues of power, privilege, and injustice and their impacts on individuals, society, and resource management decisions. Examines the potential for more socially just and ecologically sustainable approaches to protected areas management. Offered: jointly with ENVIR 460; A.

View course details in MyPlan: ESRM 460

**ESRM 461 Forest Management and Economics (5) I&S/NW**

Presents important contemporary decision tools, especially how they are used by forest managers to interpret, critique, and develop their basic applications in forestry. Topics include optimization techniques, including linear and nonlinear programming, concepts in interest and time evaluation of alternatives, marginal cost analysis, and computer spreadsheet assisted analysis. Prerequisite: Q SCI 381 or STAT 311; Q SCI 291 or MATH 124. Offered: Sp.

View course details in MyPlan: ESRM 461

**ESRM 462 Restoration Ecology Capstone: Introduction (2-) NW**

First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with BES 462/T BIOL 462.

View course details in MyPlan: ESRM 462

**ESRM 463 Restoration Ecology Capstone: Proposal and Plan (-3-) NW**

Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with BES 463/T BIOL 463.

View course details in MyPlan: ESRM 463

**ESRM 464 Restoration Ecology Capstone: Field Site Restoration (-5) NW**

Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with BES 464/T BIOL 464.

View course details in MyPlan: ESRM 464

**ESRM 465 Economics of Conservation (3) I&S/NW**

Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues. Offered: A.

View course details in MyPlan: ESRM 465

**ESRM 468 Forest Operations (5)**

Examines forest land surveying, low volume road access planning, and timber harvesting concepts. Low volume road design principles and practical application of field road location. Overview of road drainage design, construction techniques and maintenance. Reviews basic harvest systems and setting design processes, including cost, production control, environmental and safety considerations. Prerequisite: ESRM 250; ESRM 368; ESRM
323 which may be taken concurrently. Offered: Sp.

View course details in MyPlan: ESRM 468

**ESRM 470 Natural Resource Policy and Planning (5) I&S/NW**
Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A.

View course details in MyPlan: ESRM 470

**ESRM 473 Restoration in North America (5) NW K. EWING**
Investigates the vegetation and climate of North American ecosystems. Includes an ecosystem by ecosystem review of how restoration is done in each system, including some tropical ecosystems. Offered: W.

View course details in MyPlan: ESRM 473

**ESRM 474 Restoration Problem Solving: Ecological Engineering (5) J. FRIDLEY**
Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.

View course details in MyPlan: ESRM 474

**ESRM 478 Plant Ecophysiology (5) NW S. KIM**
Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant's occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 180, B BIO 180, TESC 120, ESRM 201, ESRM 162, or FISH 162. Offered: jointly with BIOL 424; W.

View course details in MyPlan: ESRM 478

**ESRM 479 Restoration Design (5) I&S/NW K. EWING, J. FRIDLEY**
Covers the design process in ecosystem restoration by presenting a series of weekly design problems that students solve as teams. Categorizes problems by disturbance type, including restoration necessitated by agriculture, urbanization, salt-marsh filling or diking, construction of transport corridors, etc. Includes a team design portfolio. Offered: Sp.

View course details in MyPlan: ESRM 479

**ESRM 480 Landscape Plant Science and Sustainable Management (5) NW S. KIM**
Principles and practices of plant management in urban and modified landscapes. Physiological basis for plant management and selection; site analysis and preparation; plant installation and aftercare; plant performance evaluation; long-term sustainable management and plant health care. Offered: A, even years.

View course details in MyPlan: ESRM 480

**ESRM 485 Environmental Planning and Permitting in Practice (5) I&S T. WILDERMUTH**
Advanced survey of environmental planning and permitting as encountered by environmental and natural resource professionals in Washington State and beyond. Focuses on Washington State acts (SEPA, SMA, GMA) and Federal systems (NEPA, CWA ESA) that shape environmental land use planning and federal planning and permitting systems Offered: jointly with ENVIR 485; W.

View course details in MyPlan: ESRM 485

**ESRM 489 Foreign Study (1-5, max. 15)**
Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

View course details in MyPlan: ESRM 489
ESRM 490 Special Topics (1-5, max. 15)
Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSpS.
View course details in MyPlan: ESRM 490

ESRM 491 Field Studies (1-5, max. 10)
Independent field study or one time organized field courses with emphasis outside the traditional classroom. Offered: AWSpS.
View course details in MyPlan: ESRM 491

ESRM 494 Senior Capstone Proposal (5-)
Selection of a capstone topic and type, either thesis or project. Students select a faculty adviser to assist them in the proposal writing process. Regular or Honors credit. Prerequisite: ESRM 200; ESRM 201; ESRM 300; ESRM 304. Offered: AWSpS.
View course details in MyPlan: ESRM 494

ESRM 495 Senior Project (-5)
Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.
View course details in MyPlan: ESRM 495

ESRM 496 Senior Thesis (-5)
Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisers to complete field or laboratory research and then prepare the senior thesis. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.
View course details in MyPlan: ESRM 496

ESRM 499 Undergraduate Research (1-5, max. 15)
Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.
View course details in MyPlan: ESRM 499
Marine and Environmental Affairs

School Overview

3707 Brooklyn Avenue Northeast

The School of Marine and Environmental Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses in marine affairs, economics, law, marine sciences, and public affairs, with emphasis on human dimensions of the environment.

Graduate Program

Graduate Program Coordinator
3707 Brooklyn NE, Box 355685
(206) 543-4326, (206) 543-7004
uwsmea@uw.edu

Master of Marine Affairs

The School of Marine and Environmental Affairs offers an internationally recognized master's degree program for launching careers in marine policy and administration. Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the MMA program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty Supervisory Committee. Individual courses of study may be adjusted to accommodate prior experience and academic
background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

**Admission Requirements**

Admission to the School of Marine Environmental Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University's Graduate School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

**Degree Requirements**

59 credits as follows:

- **The Core Curriculum (29 credits minimum)**
  1. Introduction to Marine Affairs: SMEA 500, SMEA 501
  2. Economics: SMEA 536. (The Graduate Program Coordinator may waive SMEA 536 for students with adequate undergraduate training, but students must take at least one economics course at the 400 or 500 level. The following courses are suggested: SMEA 537, SMEA 538, ECON 435, ECON 436.)
  3. Marine Law: SMEA 506/LAW 561 or SMEA 515/LAW 565
  4. Policy Analysis: SMEA 519 or PB AF 513
  5. Policy Processes: one of the following: SMEA 507, SMEA 508, SMEA 521, SMEA 523, PB AF 590/CFR 592 (when course content appropriate; check with Graduate Program Coordinator); PB AF 592/FM 571
  6. Marine Science: SMEA 591. (The Graduate Program Coordinator may waive from SMEA 591, but students must take at least one 400- or 500-level science course. The following courses are suggested: SMEA 510; FISH 450 (4); FISH 454; BIOL 472; or BIOL 473.)
  7. Quantitative Skills: one of the following: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals and regression equations. Students not meeting this requirement through undergraduate classes or experience should take one appropriate course while at SMEA. Recommended courses include: Q SCI 381, STAT 301, or STAT 311. (Although 300-level courses do not qualify for graduation credits, the school waives 3 credits of the 59-credit SMEA graduation requirement for students completing one of these courses.)
  8. Social Science Data Collection and Analysis: one of the following: SMEA 476, SMEA 512, PB AF 507, GEOG 425, or CRF 400
  9. Marine Affairs Seminar: SMEA 550

- **Electives (20 credits minimum – or 10 additional elective credits for non-thesis track)**: Elective credits must qualify as graduate credit (typically 400- or 500-level courses) offered in any UW department or school. Students should consult their advisor or thesis committee chair in choosing a set of elective courses. At least 6 credits, and two courses must come from the following list of SMEA courses: SMEA 433, SMEA 480, SMEA 485, SMEA 499 (var.) (when subject is African Population, Development and Marine Enviroment), SMEA 509, SMEA 510, SMEA 514, SMEA
516, SMEA 517, SMEA 540, SMEA 555, SMEA 581, SMEA 550 (cannot simultaneously be used to meet core requirements).

- **The Thesis and Thesis Presentation (10 credits minimum – for thesis track students):** SMEA 700 (minimum 9 credits); SMEA 570.
- **Career Skills (non-credit requirement):** First year: One career counseling appointment during fall quarter. One resume review session during winter quarter. Second year: One career counseling appointment during fall quarter. One resume review session during winter quarter.

**Financial Aid**

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.
COLLEGE OF THE ENVIRONMENT
SCHOOL OF MARINE & ENVIRONMENTAL AFFAIRS
SCHOOL MARINE AND ENVIRONMENTAL AFFAIRS

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

SMEA 103 Society and the Oceans (5) I&S/NW
Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with ENVIR 103/JSIS B 103.

View course details in MyPlan: SMEA 103

SMEA 407 International Organizations and Ocean Management (3) I&S
Surveys the manner in which international regimes and organizations govern and manage ocean use. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain organizations in different issues or regions, such as climate change or the Arctic.

View course details in MyPlan: SMEA 407

SMEA 430 Development and the Environment (3) I&S, DIV Dolsak
Critically examines policy approaches that balance economic development, natural resource use/environmental protection, and socioeconomic and political diversity. Examined policy approaches include market instruments, standards, information-based regulation, and corporate responsibility. Offered: A.

View course details in MyPlan: SMEA 430

SMEA 433 Environmental Degradation in the Tropics (5) I&S/NW Christie
Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with ENVIR 433/JSIS B 433.

View course details in MyPlan: SMEA 433

http://www.washington.edu/students/crs/cat/smea.html
SMEA 476 Introduction to Environmental Law and Process (3) I&S Bryant
Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with ENVIR 476; A.
View course details in MyPlan: SMEA 476

SMEA 480 Human Dimensions of Fishery Management (3) I&S/NW
Techniques and philosophy for conservation, management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480.
View course details in MyPlan: SMEA 480

SMEA 485 Pacific Recreation and Tourism Issues (3) I&S/NW, DIV Miller
Examines how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include: ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.
View course details in MyPlan: SMEA 485

SMEA 499 Undergraduate Research (1-15, max. 15)
Research on assigned topics under the supervision of faculty members.
View course details in MyPlan: SMEA 499

SMEA 500 Introduction to the Human Dimensions of Global Change (3) D. FLUHARTY, T. LESCHINE
Introduces students to human dimensions of global change in the marine environment. Examines how changes are physical, social, and institutional; and how global climate change affects the ability of ecosystems to provide services that support humankind. Explores changes the use of costal and ocean resources. Offered: A.
View course details in MyPlan: SMEA 500

SMEA 501 Integrated Marine Affairs Practice (3)
Survey of tools used in integrated assessment of contemporary problems in marine affairs explored through evaluation and comparison of theory and practical application. Prerequisite: SMEA 500 plus two of the following: SMEA 519, SMEA 536, SMEA 591, or permission of instructor. Instructors: Allison Offered: W.
View course details in MyPlan: SMEA 501

SMEA 502 Decision Making and Action Taking in Marine Affairs (3) P. CHRISTIE
Focuses on the dynamic interaction between human- and natural-world marine environmental systems and the policy- and decision-making, implementation, evaluation, and adjustment that must follow for effective response to problems that emerge within the human dimensions of global change in the marine environments framework. Prerequisite: SMEA 500; SMEA 501.
View course details in MyPlan: SMEA 502

SMEA 506 International Law of the Sea (3)
View course details in MyPlan: SMEA 506

SMEA 507 International Organizations and Ocean Management (3)
Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with PUBPOL 538.
View course details in MyPlan: SMEA 507

SMEA 508 National Marine Policy Processes (3) Dolsak
Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and
the dynamics that drive policy formulation and policy implementation.
View course details in MyPlan: SMEA 508

SMEA 509 Integrated Coastal Management (3)
Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMEA 500 or permission of instructor. Instructors: Christie
View course details in MyPlan: SMEA 509

SMEA 510 Topics in Marine Ecology (3) Klinger
Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such as species declines, species additions, pollution, and global change. Offered: W.
View course details in MyPlan: SMEA 510

SMEA 511 Coastal Environment Management (3)
Evaluation of human uses of the coastal and upland areas in the context of coupled social-ecological systems. Concepts and techniques for evaluation and practical application.
View course details in MyPlan: SMEA 511

SMEA 512 Interviewing Methods and Environmental Topics (3) Miller
Focuses on qualitative techniques employed by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.
View course details in MyPlan: SMEA 512

SMEA 514 Marine Pollution Management Issues (3) Leschine
Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental managers and environmental and policy scientists which shapes policy.
View course details in MyPlan: SMEA 514

SMEA 515 U.S. Coastal and Ocean Law (3-5) Kelly
Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.
View course details in MyPlan: SMEA 515

SMEA 517 Marine Uses: Transportation and Commerce (3)
Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMEA 500 or permission of instructor.
View course details in MyPlan: SMEA 517

SMEA 519 Marine Policy Analysis (3) Dolsak
Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.
View course details in MyPlan: SMEA 519

SMEA 521 Climate Change Governance (3)
Exploration of major scientific, policy, and legal issues pertaining to governance of global climate change mitigation and adaptation by a diverse set of governmental and non-governmental actors. Offered: A.
View course details in MyPlan: SMEA 521
SMEA 523 International Science and Technology Policy (3) Dolsak
Analyzes the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.
View course details in MyPlan: SMEA 523

SMEA 525 Marine Protected Area Management and Science (3) Fluharty
Examines management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.
View course details in MyPlan: SMEA 525

SMEA 530 Development and the Environment (3) Dolsak
Examines two intertwined concepts that are frequently in conflict, economic development and the environment. Examines sustainable development, growth management, sustainable yield, and corporate social responsibility; the emergence, effectiveness, and their relationships with democracy and equity. Offered: A.
View course details in MyPlan: SMEA 530

SMEA 536 Applied Microeconomics for Marine Affairs (3)
Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price and outputs in competitive markets, effects of other market structures, market failure, and applied welfare economics.
View course details in MyPlan: SMEA 536

SMEA 537 Economic Aspects of Marine Policy (3)
Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with ECON 537; W.
View course details in MyPlan: SMEA 537

SMEA 538 Economics of Living Marine Resources (3)
Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with ECON 538; Sp.
View course details in MyPlan: SMEA 538

SMEA 539 U.S. Fisheries Management and Policy (3)
Examination of basic laws and policies in the US that govern fisheries management and their implementation by managers at federal, tribal, state, and international levels. Includes lectures, guest speakers, and field trips. Offered: jointly with FISH 539.
View course details in MyPlan: SMEA 539

SMEA 540 International Strategic Planning for Marine Resources (3)
Marine economies are affected by declining resources, population pressure, and economic globalization. International examples and case studies are used to explore opportunities for strategic planning. Prerequisite: SMEA 500 or permission of instructor. Instructors: Kaczynski Offered: A.
View course details in MyPlan: SMEA 540

SMEA 550 Special Topics in Marine Studies (1-3, max. 18)
Examination of various aspects of marine studies. Content varies, depending upon the interests of the faculty and students. Intended for the joint participation by the faculty and advanced students in the investigation of selected topics. One or more groups are organized each quarter.
View course details in MyPlan: SMEA 550
SMEA 570 Thesis Presentation (1) *Fluharty*
Completion of the thesis requirement for SMEA. Prepare a professional presentation to a peer audience. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: SMEA 570

SMEA 571 Non-Thesis Seminar (1) *Leschine*
Capstone course for students enrolled in non-thesis track to synthesize and integrate their learning into concrete products. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: SMEA 571

SMEA 581 Case Study Research: Design and Methods (3)
Provides in-depth training in case study theory, design, and methods. Designed for exploring prospectus ideas or beginning analysis of thesis research. Through readings, discussions, exercises, and lectures, students learn how to select units of analysis, control data quality, and collect, analyze, and report data. Offered: jointly with FISH 581.
View course details in MyPlan: SMEA 581

SMEA 584 Statistics for Marine and Environmental Policy (3) *S. JARDINE*
Surveys statistical approaches to data analysis with applications to marine and environmental policy, including descriptive statistics, data visualization, and hypothesis testing. Students learn how to make and use data-based claims, critically examine properties and limitation of various datasets relevant for marine and environmental policy, and use appropriate statistical software. Offered: A.
View course details in MyPlan: SMEA 584

SMEA 585 Climate Impacts on the Pacific Northwest (4) *Mantua, Snover*
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/ESS 585; Sp.
View course details in MyPlan: SMEA 585

SMEA 591 Marine Science in the Coastal Zone (3) *R. KELLY*
Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with OCEAN 591; A.
View course details in MyPlan: SMEA 591

SMEA 600 Independent Study or Research (*-)
View course details in MyPlan: SMEA 600

SMEA 650 Marine and Environmental Affairs Capstone Project (4-5, max. 9) *N. DOLSAK*
Student teams develop, manage, and complete an applied project relevant to marine or environmental affairs, in collaboration with an outside stakeholder and in consultation with faculty adviser.
View course details in MyPlan: SMEA 650

SMEA 700 Master's Thesis (*-)
View course details in MyPlan: SMEA 700
Oceanography

Display as tabs

School Overview

108 Oceanography Teaching Building

Oceanography - study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere - is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. As an interdisciplinary science, oceanography integrates the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

Biological Oceanography examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.

Chemical Oceanography investigates the complex chemistry, distribution, and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them, and their origins and fates.

Marine Geology and Geophysics studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

Physical Oceanography endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

Undergraduate Program

Adviser
108 Oceanography Teaching Building, Box 357940
(206) 543-5039
student@ocean.washington.edu

The School of Oceanography offers the following programs of study:
• Bachelor of Arts degree with a major in oceanography
• Bachelor of Science degree with a major in oceanography
• Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
• A minor in oceanography
• A minor in marine biology (offered jointly with the Departments of Biology and Aquatic and Fishery Sciences)
• A minor in climate science (offered jointly with the Departments of Atmospheric Sciences and Earth and Space Sciences)
• A minor in arctic studies (offered jointly between the Jackson School of International Studies and the School of Oceanography)

Bachelor of Arts

*Suggested Pre-College Courses:* Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, physics, and earth sciences recommended.

*Suggested First- and Second-Year College Courses:* MATH 124; CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; PHYS 121; either OCEAN 215 or CSE 160; OCEAN 200, OCEAN 201, OCEAN 210, OCEAN 220, OCEAN 285, and OCEAN 295; and English composition.

*Department Admission Requirements*

Students in good academic standing may declare this major at any time.

*General Education Requirements*

All majors must satisfy the College of the Environment general education requirements. University-required additional writing credits may include OCEAN 220, OCEAN 443, and OCEAN 445.

*Major Requirements*

Minimum 104 credits, to include the following:

1. Core requirements (74 credits): PHYS 121; MATH 124, MATH 125; CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 295, OCEAN 320, OCEAN 330, OCEAN 351
2. Elective foundational science (5 credits): one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270
3. 300- or 400-level oceanography coursework that may include the senior thesis sequence, selected in the studentâ€™s area of specialization, in consultation with a faculty adviser (minimum 15 credits)
4. Upper-division science, mathematics, or engineering, selected in the studentâ€™s area of specialization, in consultation with a faculty adviser (10 credits)

Bachelor of Science
Suggested Pre-College and First- and Second-Year College Courses: Same as for Bachelor of Arts degree (shown above)

Department Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

Same as for the Bachelor of Arts degree (shown above).

Major Requirements

Minimum 116 credits, to include the following:

1. Core requirements (74 credits): PHYS 121; MATH 124, MATH 125; CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 295, OCEAN 320, OCEAN 330, OCEAN 351.

2. Senior thesis sequence (8 credits): OCEAN 443, OCEAN 444, OCEAN 445

3. Elective foundational science (5 credits): one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270

4. 300- or 400-level oceanography coursework selected in the student’s area of specialization, in consultation with a faculty adviser (9 credits)

5. Upper-division science, mathematics, or engineering, selected in the student’s area of specialization, in consultation with a faculty adviser (20 credits)

Students with introductory science and mathematics courses equivalent to those listed are encouraged to contact the Oceanography adviser.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements: 26 credits as follows:

1. OCEAN 200, OCEAN 210

2. One of the following sequences: OCEAN 285 and OCEAN 320, or OCEAN 295 and OCEAN 330

3. 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

Minor in Arctic Studies: See entry for Arctic Studies in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Minor in Marine Biology: See entry for Marine Biology in the Interdisciplinary Undergraduate Programs section of the General Catalog.
Minor in Climate Science: See entry for Climate Science in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally students acquire familiarity with the specialized instruments of oceanographic research.

The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.

- **Instructional and Research Facilities:** The school has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The school operates two research vessels: the 274 foot R/V Thomas G. Thompson, used chiefly for open ocean research throughout the world, and the 65 foot R/V Clifford A. Barnes, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- **Research, Internships, and Service Learning:** Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.

- **Department Scholarships:** See adviser for availability.

- **Student Organizations/Associations:** The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

---

**Graduate Program**

Graduate Student Services  
108 Ocean Teaching, Box 357940

http://www.washington.edu/students/gencat/academic/ocean.html
The School of Oceanography provides instruction and research opportunities at the graduate level: biological, chemical, and physical oceanography, and marine geology and geophysics. The program emphasizes independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students work across scientific boundaries. Coursework during the first two years is required in each option; specialized coursework is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

**Master of Science**

Includes coursework in the student's area of interest and the other oceanography options, as well as completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

**Admission Requirements**

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives, which may include any or all of the following: how or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms. Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), should include at least one letter from academic faculty.

**Degree Requirements**

36 credits, as follows:

2. Minimum 18 credits numbered 500 and above. (In a thesis program, 9 credits may be OCEAN 700. With the exception of summer quarter, students are limited to 9 thesis credits per quarter.)
3. Numerical grades in at least 18 quarter credits taken through the UW. Minimum cumulative 3.00 GPA
4. Minimum three full-time quarters of residence credit. Part-time quarters may be accumulated to meet this requirement.
5. A final master's examination, either oral or written, as determined by the student's Supervisory Committee
**Biological Oceanography Option:** OCEAN 530, OCEAN 531, OCEAN 532, OCEAN 533. Master's level students must take a minimum 3 credits of advanced biological oceanography courses.

**Chemical Oceanography Option:** OCEAN 520. Master's level students must take a minimum three advanced chemical oceanography courses.

**Marine Geology and Geophysics Option:** OCEAN 540, OCEAN 541, OCEAN 545.

**Physical Oceanography Option:** OCEAN 500, OCEAN 510, OCEAN 511, OCEAN 512, OCEAN 513, OCEAN 514, OCEAN 515, OCEAN 517. Three courses in applied mathematics.

**Out-of-Option Requirement:** All graduate students take a minimum of one 3-credit, numerically graded, 500-level course from each option outside their own (9 credits). See department website for list of suitable courses. Students complete this breadth requirement prior to receiving an MS degree.

**Doctor of Philosophy**

The degree program places a strong emphasis on research following completion of course requirements and the general examination. Upon successful completion of the general examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the final examination.

**Admission Requirements**

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives (to be defined in online application), which may include any or all of the following: how or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms (available in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

**Degree Requirements**

Minimum 90 credits, as follows:

1. Completion of a program of study and research as planned by the Graduate Program Coordinator in the student's major department or college and the Supervisory Committee. Half the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of coursework at the 500 level and above must be completed prior to scheduling the general examination.
2. Minimum three years (nine full-time quarters) of resident study, two being at the UW with at least one year in continuous full-time residence. The year of full-time residence, satisfied by completing any three full-time quarters (not necessarily continuous) at the UW, must be completed prior to the general examination. Residence requirement cannot be met solely by part-time study. Minimum two academic years of resident study must be completed prior to scheduling the general examination.

3. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study at the UW.

4. Numerical grades in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative 3.00 GPA is required for a graduate degree at the University.

5. Creditable passage of a examination. Registration as a graduate student is required the quarter the examination is taken and candidacy is conferred.

6. Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credits. The candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the general examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (OCEAN 800).

7. Creditable passage of a final examination, usually devoted to defense of the dissertation and the field with which it is concerned. General and final examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the examination is taken and the degree is conferred.

8. Completion of all work for the doctoral degree within ten years. This includes quarters spent on leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.

**Biological Oceanography Option:** Core curriculum consists of OCEAN 530, OCEAN 531, OCEAN 532, OCEAN 533. Doctoral level students take a minimum 9 credits of advanced biological oceanography courses.

**Chemical Oceanography Option:** Core curriculum consists of OCEAN 520. Doctoral-level students must take a minimum of six advanced chemical oceanography courses.

**Marine Geology and Geophysics Option:** Core curriculum consists of OCEAN 540, OCEAN 541, OCEAN 545.

**Physical Oceanography Option:** Core curriculum consists of OCEAN 500, OCEAN 510, OCEAN 511, OCEAN 512, OCEAN 513, OCEAN 514, OCEAN 515, OCEAN 517. Students take a sequence of three courses in applied mathematics.

**Out-of-Option Requirement:** All graduate students take a minimum of one 3-credit, numerically graded, 500-level course from each option outside their own for a total of three courses (9 credits). Each option provides a list of courses that can be taken to fulfill this requirement. See department website or adviser for list of suitable courses. Students complete this breadth requirement prior to receiving an MS degree. A graduate student
affairs committee, chaired by the Graduate Program Coordinator, addresses any requests for waivers.

Financial Aid

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.
COLLEGE OF THE ENVIRONMENT
SCHOOL OF OCEANOGRAPHY
OCEANOGRAPHY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

OCEAN 100 Explore Oceanography at UW (1)
Explores the research and experiences of the Oceanography school's faculty, graduate students, and undergraduate students. Intended for freshmen, new transfer students, and other considering oceanography as a major. Credit/no-credit only. Offered: A.
View course details in MyPlan: OCEAN 100

OCEAN 101 Oceanography of the Pacific Northwest (5) NW
Introduces the fundamental principles of oceanography by focusing on the waters that surround us - the Washington coast and Puget Sound. Investigates the geologic history of the Pacific Northwest, and the physics, chemistry, and biology of coastal waters using case studies. Intended for nonmajors. Offered: A.
View course details in MyPlan: OCEAN 101

OCEAN 102 The Changing Oceans (5) I&S/NW
Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science. Intended for nonmajors. Offered: W.
View course details in MyPlan: OCEAN 102

OCEAN 115 Astrobiology: Life in the Universe (5) NW R. BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN
View course details in MyPlan: OCEAN 115

OCEAN 121 Deep Sea Exploration: Submarine Volcanoes and Novel Life Forms (2) NW
Examines the dynamic marine processes that shape the planet and cutting-edge oceanographic technologies used to explore the deepest oceans. Includes imagery of rarely seen submarine volcanic eruptions, hot springs, and novel life forms highlighting the interconnected geological-biological processes creating the most extreme
OCEAN 200 Introduction to Oceanography (3) NW
Focuses on importance of ocean processes for the functioning of our planet. Interdisciplinary case studies are used to examine relationships and interactions at macro-, meso-, and microscales in the ocean. Case studies build upon previous topics and examines human influence on these systems. Intended for science majors. Offered: Sp.
View course details in MyPlan: OCEAN 200

OCEAN 201 Introduction to Oceanography Lab (2) NW
Provides opportunities to experiment with oceanographic concepts through laboratory and field experiences. Students apply the scientific method of inquiry as it applies to the study of geology, physics, chemistry, and biology of the ocean. Emphasizes topics that explore current challenges faced by the ocean and its ecosystem. Co-requisite: OCEAN 200. Offered: Sp.
View course details in MyPlan: OCEAN 201

OCEAN 210 Integrative Oceans (4) NW
Presents fundamentals of ocean science through regional case studies that illustrate the relationship between interdependent physical, chemical, biological, and geological process. Students apply tools from these scientific disciplines to understand major changes predicted for future oceanic environments. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH 250. Offered: A.
View course details in MyPlan: OCEAN 210

OCEAN 215 Methods of Oceanographic Data Analysis (4)
Statistics, graphical representations, and analysis methods for oceanographic datasets using the PYTHON programming language. Prerequisite: Prerequisite: MATH 125. Offered: A.
View course details in MyPlan: OCEAN 215

OCEAN 220 Introduction to Field Oceanography (3/5) NW
Design and conduct a field study in oceanography. Focuses on active learning, deployment of instruments, data collection, interpretation, and presentation. Required field trip during spring break. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH/250. Offered: Sp.
View course details in MyPlan: OCEAN 220

OCEAN 230 Rivers and Beaches (3/5) NW
Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focuses on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with ESS 230.
View course details in MyPlan: OCEAN 230

OCEAN 235 Arctic Change (2/3) I&S/NW
Investigates the Arctic system of ocean, ice, atmosphere, and sea-floor; how human interact with it, and what the future of the Arctic means to the world. Includes sea-ice loss, climate impacts, and Arctic resource exploitation. Offered: W.
View course details in MyPlan: OCEAN 235

OCEAN 240 Special Topics in Oceanography (1-5, max. 9) NW
Selected topics of contemporary interest in oceanography such as hydrothermal vents, planetary volcanism, biogeochemical cycling, the ecology of Puget Sound, and the ocean's role in climate.
View course details in MyPlan: OCEAN 240

OCEAN 250 Marine Biology (3/5) I&S/NW
Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine
environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Weekend field trip. Honors section research project. Offered: jointly with BIOL 250/FISH 250; AS.

View course details in MyPlan: OCEAN 250

OCEAN 261 Introduction to Ocean Technology (2) NW *M. LOGSDON*
Introduces ocean science and technology in observational ocean science. Covers the basics of underwater sensor design, power, and data communication, and introduces the design and build process and the operational scope of the ERIS cabled observatory. Offered: S.

View course details in MyPlan: OCEAN 261

OCEAN 270 Aquatic Ecophysiology (5) NW
Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with FISH 270/MARBIO 270.

View course details in MyPlan: OCEAN 270

OCEAN 285 Physics Across Oceanography: Fluid Mechanics and Waves (3) NW
In the context of oceanography applications, explores fluid mechanics, waves, light, acoustics, and heat transfer. Prerequisite: either MATH 125 or Q SCI 292, which may be taken concurrently; either PHYS 114 or PHYS 121; recommended: OCEAN 210 concurrently. Offered: A.

View course details in MyPlan: OCEAN 285

OCEAN 286 Physics Across Oceanography: Fluid Mechanics and Waves Laboratory (2) NW
Laboratory and tutorial further exploring the oceanography applications of fluid mechanics, waves, light, acoustics, and heat transfer. Prerequisite: OCEAN 285, which must be taken concurrently; either MATH 125 or Q SCI 292, either of which may be taken concurrently; either PHYS 114 or PHYS 121. Offered: A.

View course details in MyPlan: OCEAN 286

OCEAN 295 Chemistry of Marine Organic Carbon (5) NW
Explores the movement of organic carbon through the global carbon cycle, in the context of earth sciences and marine biogeochemical cycles. Prerequisite: either CHEM 152 or CHEM 120. Offered: W.

View course details in MyPlan: OCEAN 295

OCEAN 300 Exploring Opportunities in Marine Science (1)
Explores academic, research, and career opportunities in the field of marine science and helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with FISH 300/MARBIO 300; W.

View course details in MyPlan: OCEAN 300

OCEAN 310 Marine Geology and Geochemistry (5) NW
This course focuses on marine geologic processes including the formation and evolution of the ocean crust; marine sedimentation and diagenesis; subduction zone dynamics; the role of marine geology in seawater composition and sustaining the deep biosphere; and the relationship between marine geological processes and climate. Prerequisite: OCEAN 200; and either ESS 210 or ESS 211; and OCEAN 285 which may be taken concurrently. Offered: A.

View course details in MyPlan: OCEAN 310

OCEAN 320 Coastal Oceanography (5) NW
The formation of, and processes within, coastal ocean systems emphasizing the geological evolution of coastal and estuarine environments and the physical dynamics within them, including waves, currents, river plumes, and sedimentary processes. Influences of physical processes on marine chemical cycling and biological productivity in the coastal ocean. Prerequisite: OCEAN 285; ESS 210. Offered: Sp.

View course details in MyPlan: OCEAN 320
OCEAN 330 Marine Biogeochemical Cycles (5) NW
Covers the distribution of life and chemical elements in the ocean; the relationship between them; and the physical processes affecting these patterns. Emphasizes how marine organisms and the structure of marine ecosystems influence the fate of carbon and other elements in the ocean. Prerequisite: OCEAN 210; OCEAN 295; BIOL 200. Offered: Sp.
View course details in MyPlan: OCEAN 330

OCEAN 340 Interdisciplinary Topics in Oceanography (1-5) NW
Special topics of an interdisciplinary nature setting ocean into a broader context.
View course details in MyPlan: OCEAN 340

OCEAN 351 Foundations of Ocean Sensors (3) NW, QSR
Experiential learning giving students foundational knowledge of methods used to observe key quantities that characterize marine environments. Includes theory and application of sensor design and construction principles, in the context of inferences and hypothesis-testing about key physical, biological, chemical, and geological dynamics in the oceans. Prerequisite: OCEAN 215; OCEAN 285. Offered: W.
View course details in MyPlan: OCEAN 351

OCEAN 355 From Big Bang to the Blue Planet (3) NW
Explores the origin and evolution of the Earth, ocean, atmosphere, and life, with an emphasis on climate as the integrator of changes in the biosphere, cryosphere, hydrosphere, atmosphere, and lithosphere. Prerequisite: either CHEM 120 or CHEM 142; either PHYS 114 or PHYS 121; either BIOL 161, or BIOL 180.
View course details in MyPlan: OCEAN 355

OCEAN 361 Ocean Technology I: Introduction to Underwater Observational Sensor Design and Build (2) NW
Combines ocean science and technology in a design and build course utilizing the ERIS cabled observatory at the UW Oceanography dock. Students apply the basics of sensor design, power, and data communication to individual underwater observatory projects. Prerequisite: OCEAN 261, which may be taken concurrently. Offered: S.
View course details in MyPlan: OCEAN 361

OCEAN 365 Practicing Sustainability Science (8) I&S/NW S. Veirs, V. Veirs
Intensive off-campus experience. Studies sustainability science, marine policy, and "clean" technologies. Includes interaction with community stakeholders for five weeks and experimentation with sustainable technologies and practices in the marine environment during a five-week cruise aboard an energy-efficient sailing catamaran. Offered: ASp.
View course details in MyPlan: OCEAN 365

OCEAN 370 Marine Evolutionary Biology (5) NW
Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with FISH 370/MARBIO 370; Sp.
View course details in MyPlan: OCEAN 370

OCEAN 400 Chemical Oceanography (4) NW
Physical and chemical properties of seawater and marine products; processes determining the chemical makeup of the oceans. Prerequisite: either CHEM 152 or CHEM 155; OCEAN 210. Offered: W.
View course details in MyPlan: OCEAN 400

OCEAN 401 Special Topics in Chemical Oceanography (3) NW
View course details in MyPlan: OCEAN 401
OCEAN 409 Marine Pollution (3) I&S/NW
Explores anthropogenic impacts on the oceans and marine organisms. Examines how scientific understanding informs environmental management, thereby linking science and society. Students develop a detailed understanding of the major categories of anthropogenic pollutants on marine systems, how they impact the environment, their sources, and fates. Prerequisite: either OCEAN 200 or OCEAN 250; OCEAN 210. Offered: A.
View course details in MyPlan: OCEAN 409

OCEAN 410 Marine Geology and Geophysics (4) NW
Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either ESS 210, ESS 211, or ESS 212. Offered: jointly with ESS 410; A.
View course details in MyPlan: OCEAN 410

OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW
View course details in MyPlan: OCEAN 411

OCEAN 412 Seismic Exploration and Stratigraphy (5) NW
Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: either ESS 311 or OCEAN 410; either MATH 126 or MATH 136 or ESS 310; and PHYS 123. Offered: jointly with ESS 467.
View course details in MyPlan: OCEAN 412

OCEAN 421 Special Topics in Physical Oceanography (3) NW
View course details in MyPlan: OCEAN 421

OCEAN 423 Ocean Circulation and Climate (3) NW
Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: MATH 125; and PHYS 123 or OCEAN 285.
View course details in MyPlan: OCEAN 423

OCEAN 430 Biological Oceanography (4) NW
Examines marine organisms, their quantitative distribution in time and space, and their interactions with the ocean. Emphasizes dominant pelagic forms of phytoplankton, bacterioplankton, and archaeoplankton; and their predators, viruses, and zooplankton. Case studies explore extreme environments, coral reefs, influence of climate change on oceanic ecosystems, and the coastal ocean. Prerequisite: BIOL 200; OCEAN 210. Offered: A.
View course details in MyPlan: OCEAN 430

OCEAN 431 Special Topics in Biological Oceanography (3) NW
Reviews current research. Topics include global change effects on marine organisms, marine pathogens and emerging diseases, introduced species, marine viruses, astrobiology, hydrothermal vents, symbiosis, animal physiology, larval forms and dispersal, biogeography, and environmental ethics. Prerequisite: either OCEAN 430 or any 400-level BIOL, FISH, or MICROM course.
View course details in MyPlan: OCEAN 431

OCEAN 443 Undergraduate Thesis: Proposal (3) NW
Work closely with faculty mentors to conceptualize and write a proposal for independent thesis research. Prerequisite: OCEAN 320 or OCEAN 330, which may be taken concurrently.
View course details in MyPlan: OCEAN 443

OCEAN 444 Undergraduate Thesis: Research (2)
Work closely with faculty mentors to conduct thesis research as designed in OCEAN 443 in a field, laboratory, or other guided research setting. Prerequisite: OCEAN 443. Offered: W.
View course details in MyPlan: OCEAN 444
OCEAN 445 Undergraduate Thesis: Data Analysis and Writing (3) NW
Analyze results from senior thesis experiments and present results in a series of drafts and a final paper. Results are presented at a two-day long public research symposium and on the students' individual websites. Prerequisite: OCEAN 444. Offered: Sp.
View course details in MyPlan: OCEAN 445

OCEAN 450 Climatic Extremes (4) NW
Course examines Earth history for extreme climatic conditions to predict future climate changes. Numerical climate models use PC-based computer programs to identify processes and feedbacks that control climate. Offered: W.
View course details in MyPlan: OCEAN 450

OCEAN 452 Marine Geospatial Information Science (3) NW
Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 452; A.
View course details in MyPlan: OCEAN 452

OCEAN 454 Hydrothermal Systems: An Interdisciplinary View (3) NW
Provides a general, interdisciplinary overview of seafloor hydrothermal systems including important geological, chemical, and biological processes. Topics include tectonic and volcanic controls on hydrothermal systems, water/rock reactions, phase separation, temporal variability, fluxes to the deep sea, micro- and macro biology. Offered: W.
View course details in MyPlan: OCEAN 454

OCEAN 455 Introduction to Modeling in Oceanography (3) NW, QSR
Explores roles of ocean models in understanding past, current, and future conditions in marine environments. Focuses on active learning using models to ask and answer questions about biotic and abiotic processes in marine environments. Prerequisite: either OCEAN 200, FISH 250, OCEAN 250, BIOL 250, or ATM S 211. Instructors: Grunbaum Offered: A.
View course details in MyPlan: OCEAN 455

OCEAN 460 Marine Field Research (10) NW, QSR S. Veirs, V. Veirs
Intensive off-campus marine research experience. Includes five weeks designing a field experiment and a five-week cruise aboard a sailing research vessel to implement it. Offered: ASp.
View course details in MyPlan: OCEAN 460

OCEAN 461 Advanced Ocean Technology - Project Design and Management (2) NW
Project management practicum in the design, build, operations, and management of observational ocean science technology. Students oversee and mentor ongoing design and build projects, with attention to design criteria and deployment timelines. Prerequisite: OCEAN 361. Offered: S.
View course details in MyPlan: OCEAN 461

OCEAN 475 Current Research in Climate Science Seminar (3, max. 6)
Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ATM S 475/ESS 475; A.
View course details in MyPlan: OCEAN 475

OCEAN 477 Seminar in Marine Biology (3) NW
Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 477/FISH 477; W.
View course details in MyPlan: OCEAN 477
OCEAN 479 Research in Marine Biology (1-15, max. 15)
Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/FISH 479; AWSpS.
View course details in MyPlan: OCEAN 479

OCEAN 481 Puget Sound and Estuarine Oceanography (3) NW
Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.
View course details in MyPlan: OCEAN 481

OCEAN 482 The Changing Arctic Ocean (3) NW
Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent scientific advances. Considers the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Prerequisite: OCEAN 200 or OCEAN 210 and BIOL 180, BIOL 200 or BIOL 220. Offered: Sp, even years.
View course details in MyPlan: OCEAN 482

OCEAN 492 Friday Harbor Apprenticeship (9/15) NW
Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Research questions vary.
View course details in MyPlan: OCEAN 492

OCEAN 494 Field Experiences in Marine Science (1-15, max. 30) NW
For participants in oceanography field work. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.
View course details in MyPlan: OCEAN 494

OCEAN 496 Study Abroad: Oceanography (1-15, max. 30) NW
For participants in UW study abroad program. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.
View course details in MyPlan: OCEAN 496

OCEAN 497 Advanced Special Topics in Oceanography (1-15, max. 15)
View course details in MyPlan: OCEAN 497

OCEAN 499 Undergraduate Research (1-15, max. 24)
Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or literature surveys. Offered: AWSpS.
View course details in MyPlan: OCEAN 499

OCEAN 500 Current Problems in Oceanography (1, max. 10)
Discussion of research topics that are currently being investigated within the school. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AW.
View course details in MyPlan: OCEAN 500

OCEAN 502 Marine Geospatial Information Science (3)
Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 502; A.
View course details in MyPlan: OCEAN 502
OCEAN 503 Geospatial Pattern Analysis and Geostatistics (3) Logsdon
Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Offered: jointly with FISH 503; W.
View course details in MyPlan: OCEAN 503

OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12)
Lectures, discussions, and work on selected problems of an interdisciplinary nature. Prerequisite: permission of instructor.
View course details in MyPlan: OCEAN 506

OCEAN 507 Puget Sound and Estuarine Oceanography (3) Keister, MacCready
Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.
View course details in MyPlan: OCEAN 507

OCEAN 508 The Changing Arctic Ocean (3) Deming, Woodgate
Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent advances and considering the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Offered: Sp.
View course details in MyPlan: OCEAN 508

OCEAN 509 Seminar (1, max. 30)
Introduction to current research topics for beginning graduate students. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: OCEAN 509

OCEAN 510 Physics of Ocean Circulation (3)
Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.
View course details in MyPlan: OCEAN 510

OCEAN 511 Introduction to Fluid Dynamics (4)
Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: either a course in partial differential equations or permission of instructor. Offered: jointly with AMATH 505/ATM S 505; A, odd years.
View course details in MyPlan: OCEAN 511

OCEAN 512 Geophysical Fluid Dynamics I (4)
View course details in MyPlan: OCEAN 512

OCEAN 513 Geophysical Fluid Dynamics II (3)
Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green's function, setup of general circulation; atmospheric "channels" versus ocean "basins";
wave-mean flow interaction, mountain drag, internal momentum flux; "Lagrangian" motion of particles, tracers; cascades, eddy flux of heat, moisture, Q. Prerequisite: OCEAN 512. Offered: Sp. 
View course details in MyPlan: OCEAN 513

OCEAN 514 Waves (3)
Application of marine hydrodynamics principles to wave motion in oceans. Offered: W. 
View course details in MyPlan: OCEAN 514

OCEAN 515 Ocean Circulation: Observations (3)
Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp. 
View course details in MyPlan: OCEAN 515

OCEAN 517 Methods and Measurements in Physical Oceanography (3)
Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor. 
View course details in MyPlan: OCEAN 517

OCEAN 518 Scientific Writing and Graphics (2) Waddington, Warren
Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/ESS 519; Sp, odd years. 
View course details in MyPlan: OCEAN 518

OCEAN 520 Marine Chemistry (3)
Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world's oceans. Offered: A. 
View course details in MyPlan: OCEAN 520

OCEAN 521 Aquatic Chemistry (3)
Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid/base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: OCEAN 520 or permission of instructor. Offered: A. 
View course details in MyPlan: OCEAN 521

OCEAN 522 Marine Organic Geochemistry (3)
Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor. 
View course details in MyPlan: OCEAN 522

OCEAN 523 Geochemical Cycles (4)
Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with ATM S 508/CHEM 523. 
View course details in MyPlan: OCEAN 523

OCEAN 529 Seminar on Chemical Oceanography (*, max. 30) 
Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of
OCEAN 530 Marine Bacteria, Archaea, and Viruses (3)
Explores the role of marine microorganisms in transformations of dissolved and particulate organic matter. Covers the functional and phylogenetic diversity of bacteria, archaea, and viruses in the marine environment; the fate of organic carbon in the microbial loop; and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W, odd years.

View course details in MyPlan: OCEAN 530

OCEAN 531 Marine Phytoplankton and Biogeochemistry (3)
Covers phytoplankton in the marine environment: evolution, ecology, primary productivity, and physiology, emphasizing their role in the global carbon cycle; spatial and temporal distributions of phytoplankton and how these patterns may change as ocean conditions change; and methods for determining distributions and rates in different ocean ecosystems. Prerequisite: permission of instructor. Offered: W, even years.

View course details in MyPlan: OCEAN 531

OCEAN 532 Marine Zooplankton Ecology (3)
Examines the roll of zooplankton in ecosystems and biogeochemical cycles. Covers the distribution and abundance of zooplankton in space and time; small-scale distributions; morphology and behavior; population dynamic, energetics, and secondary production; trophic structure and dynamics; biogeography; impacts of climate change; and models of populations and food chains.

View course details in MyPlan: OCEAN 532

OCEAN 533 Marine Benthic Ecology (3)
Analyzes marine communities associated with the porous boundaries of the ocean, from sedimented seafloor and hydrothermal vents to sea ice (inverted benthos); emphasizing nutrition to these communities, including sinking organic aggregates, themselves porous habitats, and the role of symbiosis. Prerequisite: permission of instructor. Offered: W, even years.

View course details in MyPlan: OCEAN 533

OCEAN 535 Biological Oceanography (3)
Examines major patterns and processes in upper ocean pelagic ecosystems, emphasizing quantitative analysis of mechanisms controlling production and abundances of organisms, from plankton to fish. Introduces interdisciplinary study of effects of anthropogenically induced changes in climate and ocean chemistry on organisms, ecosystem processes, and biogeochemical cycles. Offered: A.

View course details in MyPlan: OCEAN 535

OCEAN 539 Seminar in Biological Oceanography (*, max. 30)
Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

View course details in MyPlan: OCEAN 539

OCEAN 540 Marine Geology and Geophysics Processes (3) Nittrouer, Solomon
Synthesis of processes that form ocean basins and fill them with sediment, including: plate tectonics and the creation, evolution, and subduction of ocean crust; accumulation of terrestrial, biogenic, and authigenic sediments; and the history of paleoceanographic events recorded in the seafloor. Offered: W.

View course details in MyPlan: OCEAN 540

OCEAN 541 Marine Sedimentary Processes (3)
Investigates fundamental process of marine sedimentation, including equations characterizing boundary-shear flows, initiation of grain motion, bedload and suspended-load transport, and sediment accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.

View course details in MyPlan: OCEAN 541
OCEAN 544 Subseafloor Hydrogeology and Geochemistry (3) Soloman
Introduces the occurrence, composition, and movement of groundwater in the ocean crust and its role in a wide range of geologic and biogeochemical processes. Includes basic theories of groundwater motion, heat transport, solute transport, and hydromechanics with applications to diverse subseafloor environments ranging from mid-ocean ridges to subduction zones. Offered: Sp.
View course details in MyPlan: OCEAN 544

OCEAN 545 Oceanic Lithosphere (3)
Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.
View course details in MyPlan: OCEAN 545

OCEAN 546 Continental-Margin Sedimentation (3)
Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with ESS 546.
View course details in MyPlan: OCEAN 546

OCEAN 549 Seminar in Geological and Geophysical Oceanography (*, max. 30)
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: A/WSp.
View course details in MyPlan: OCEAN 549

OCEAN 550 Geochemistry and Geophysics of Melt Generation (3)
Mantle flow beneath mid-ocean ridges and hotspots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor.
View course details in MyPlan: OCEAN 550

OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1)
Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.
View course details in MyPlan: OCEAN 552

OCEAN 554 Paleoclimate Proxies (3) Alexander, Sachs
Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/ESS 554.
View course details in MyPlan: OCEAN 554

OCEAN 558 Climate Modeling (3)
View course details in MyPlan: OCEAN 558

OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (*, max. 9)
Lectures, discussions, and practical work on selected topics of current interest in mid-ocean ridge research. Prerequisite: permission of instructor.
View course details in MyPlan: OCEAN 559
OCEAN 560 Atmosphere/Ocean Interactions (3)
Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Prerequisite: ATM S 509/OCEAN 512. Credit/no-credit only. Offered: jointly with ATM S 560.
View course details in MyPlan: OCEAN 560

OCEAN 569 Topics in Physical Oceanography (1-4, max. 30)
Lecture series on topics of major importance in physical oceanography. Offered: AWSp.
View course details in MyPlan: OCEAN 569

OCEAN 570 Marine Microbial Interactions (1-3, max. 9)
View course details in MyPlan: OCEAN 570

OCEAN 572 Marine Protist Ecology (1-3, max. 9)
Examines the phagotrophic (protozoa) and mixotrophic (both photosynthetic and phagotropic) protists, including: interactions with predators and prey; and adaptations to changing environments, evolutionary, and ecological implications of mixotrophy. Prerequisite: OCEAN 532 or permission of instructor. Offered: Sp.
View course details in MyPlan: OCEAN 572

OCEAN 578 Advanced Topics in Biological Oceanography (*, max. 18)
Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.
View course details in MyPlan: OCEAN 578

OCEAN 580 Aquatic Kinetics (3)
Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO2 hydrolysis, Fe, Mn, and H2S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O2/H2S interfaces. Prerequisite: permission of instructor.
View course details in MyPlan: OCEAN 580

OCEAN 582 River Basin Biogeochemistry (3)
The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations. Prerequisite: permission of instructor.
View course details in MyPlan: OCEAN 582

OCEAN 583 Isotope Biogeochemistry (3)
The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO3 dissolution, methanogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.
View course details in MyPlan: OCEAN 583

OCEAN 584 Ocean Tracers and Mixing (3)
The applications of tracers to studies of ocean circulation and ventilation. Processes within the ocean for which tracers have provided important information include gas exchange, mixed layer dynamics, thermocline ventilation, deep water formation and spreading, and mixing. Knowledge of partial differential equations suggested.
View course details in MyPlan: OCEAN 584

OCEAN 586 Current Research in Climate Change (2, max. 20)
Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers
(both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ATM S 586/ESS 586.

**View course details in MyPlan: OCEAN 586**

**OCEAN 587 Fundamentals of Climate Change (3)**
Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587.

**View course details in MyPlan: OCEAN 587**

**OCEAN 588 The Global Carbon Cycle and Climate (3) Emerson**
Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ESS 588; W.

**View course details in MyPlan: OCEAN 588**

**OCEAN 589 Paleoecology: Data, Modeling, and Theory (3)**

**View course details in MyPlan: OCEAN 589**

**OCEAN 590 Advanced Topics in Oceanography (9-18, max. 18)**
Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

**View course details in MyPlan: OCEAN 590**

**OCEAN 591 Marine Science in the Coastal Zone (3) R. KELLY**
Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with SMEA 591; A.

**View course details in MyPlan: OCEAN 591**

**OCEAN 592 Communicating Ocean Sciences (4)**
Explores improving communicating scientific knowledge through instruction of inquiry-based science in school classrooms. Students practice communicating science, and receive mentoring on how to improve their presentations. Prerequisite: Marine sciences studies background. Instructors: Robigou Offered: Sp.

**View course details in MyPlan: OCEAN 592**

**OCEAN 593 Climate Science Seminar (1) Mote**
Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/ESS 593; W.

**View course details in MyPlan: OCEAN 593**

**OCEAN 596 Climate Science Capstone Project (1-5, max. 5) Mote**
Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/ESS 596; AWSpS.

**View course details in MyPlan: OCEAN 596**
OCEAN 600 Independent Study or Research (*-)
Offered: AWSpS.
View course details in MyPlan: OCEAN 600

OCEAN 700 Master's Thesis (*-)
Offered: AWSpS.
View course details in MyPlan: OCEAN 700

OCEAN 800 Doctoral Dissertation (*-)

Quantitative Science

Display as tabs

Program Overview

The Center for Quantitative Science is an interdisciplinary program administered by the College of Environment with cooperation from the School of Aquatic and Fishery Sciences and the School of Environmental and Forest Sciences. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the School of Environmental and Forest Sciences and the School of Aquatic and Fishery Sciences.

Adviser
006 Anderson Hall, Box 352100
(206) 543-1191
cqs@uw.edu

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

Undergraduate Program

The Center for Quantitative Science offers the following program of study:

- A minor in quantitative science

Minor

Minor Requirements: A minimum of 27 credits, as follows:

1. Core courses (24-25 credits): Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482; Q SCI 483 (or Q SCI 403/STAT 403)

2. Electives (3-5 credits): Selected from an approved list of electives, a partial list of which includes Q SCI 210/ENVIR 210, Q SCI 403/STAT 403 (if not taken as part of core courses, above), Q SCI 454/FISH 454, Q SCI 480/STAT 480, Q SCI 483 (if not taken as part of core courses, above), Q SCI 486/STAT 486. See adviser for possible additional qualifying courses.
3. A minimum 2.0 grade is required in each course taken as part of the minor.
COLLEGE OF THE ENVIRONMENT
QUANTITATIVE SCIENCE (FISHERIES & FOR R)

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

Q SCI 190 Quantitative Analysis for Environmental Science (5) NW, QSR B. BARE
Covers applications of precalculus techniques and concepts to environmental, ecological, biological, and natural resource problems stressing the formulation, solution, and interpretation of mathematical procedures. Prerequisite: minimum grade of 2.0 in MATH 098 or MATH 103, a score of 151-169 on the MPT-GS test, or a score of 145-163 on the MPT-AS test. Not available for credit to students who have completed MATH 124. Or higher. Offered: AWS.
View course details in MyPlan: Q SCI 190

Q SCI 291 Analysis for Biologists I (5) NW, QSR J. JOHNSON
Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, Q SCI 190, a minimum score of 2 on advanced placement test, or a score of 153-163 on MPT-AS placement test. Not available for credit to students who have completed MATH 124 with a 2.0 or higher. Offered: AWS.
View course details in MyPlan: Q SCI 291

Q SCI 292 Analysis for Biologists II (5) NW, QSR V. GALLUCCI, J. JOHNSON
Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include areas under curves, volumes, and differential equations. Prerequisite: minimum grade of 7 in either Q SCI 291 or MATH 124. Not available for credit to students who have completed MATH 125 with a 2.0 or higher. Offered: WSpS.
View course details in MyPlan: Q SCI 292

Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR V. GALLUCCI, G. HOLTGRIEVE, P. TOBIN
Applications to biological and natural resource problems stressing the formulation and interpretation of statistical tests. Random variables, expectations, variances, binomial, hypergeometric, Poisson, normal, chi-square, "t" and "F" distributions. Prerequisite: either MATH 120, MATH 124, MATH 125, MATH 126, Q SCI 190, or Q SCI 291, or a minimum score of 2 on advanced placement test, or a score of 153-163 on the MPT-AS
placement test. Offered: AWSpS.
View course details in MyPlan: Q SCI 381

Q SCI 403 Introduction to Resampling Inference (4) NW V. MININ
Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Experience programming in R is beneficial. Credit allowed for STAT 403 or STAT 503 but not both. Prerequisite: either STAT 311/ECON 311, STAT 341, STAT 390/MATH 390, STAT 481/ECON 481, or Q SCI 381 and Q SCI 482. Offered: jointly with STAT 403; Sp.
View course details in MyPlan: Q SCI 403

Q SCI 454 Ecological Modeling (5) NW T. ESSINGTON
Examines concepts in ecological modeling focusing on the rationale, interpretation, and motivation for modeling in ecological sciences. Explores individual, population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Offered: jointly with FISH 454; W.
View course details in MyPlan: Q SCI 454

Q SCI 458 Modeling and Estimation in Conservation and Resource Management (4) NW T. BRANCH
Explores the use of models in the evaluation of alternative management policies for natural resources, including modeling approaches, fitting models to data, and evaluating alternative management policies. Emphasizes calculating risk of extinction, and design of biological reserves. Offered: jointly with FISH 458; Sp.
View course details in MyPlan: Q SCI 458

Q SCI 480 Sampling Theory for Biologists (3) NW J. SKALSKI
Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482. Offered: jointly with STAT 480; W, odd years.
View course details in MyPlan: Q SCI 480

Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AW.
View course details in MyPlan: Q SCI 482

View course details in MyPlan: Q SCI 483

Q SCI 486 Experimental Design (4) NW
Emphasizes data modeling using structured means resulting from choice of experimental and treatment design. Examines experimental designs, including crossed, nested designs; block; split-plot designs; and covariance analysis. Also covers multiple comparisons, efficiency, power, sample size, and pseudo-replication. Prerequisite: Q SCI 482. Offered: jointly with STAT 486; W, even years.
View course details in MyPlan: Q SCI 486

Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW
Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures,
laboratory or modeling work. Offered: AWSpS.
View course details in MyPlan: Q SCI 497

**Q SCI 498 Internship (1-15, max. 15) NW**
Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Offered: AWSpS.
View course details in MyPlan: Q SCI 498

**Q SCI 499 Research Experience (1-15, max. 15)**
Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no-credit only.
View course details in MyPlan: Q SCI 499

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
Quaternary Research Center

Display as tabs

Program Overview

19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:

1. To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.

2. To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.

3. To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.

4. To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.

5. To seek applications of quaternary studies to modern environmental problems that help predict consequences of policy decisions.

Graduate Program

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.
Research Facilities

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems.

QRC Resource Center

This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC webpage.

Cosmogenic Nuclide Laboratory
John Stone, Director

The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on Quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory's website.

Geochemistry Library
Ronald S. Sletten, director

The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physicochemical soil processes in Antarctica and Alaska.

Periglacial Laboratory
Bernard Hallet, Director

Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

Stable Isotope Laboratory
Eric J. Steig, Director

The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory include off-line and online preparation systems for
D/H and $^{18}O/^{16}O$ on water $^{13}C^{12}C$ on carbonates and organic materials, and $^{15}N/^{14}N$ on nitrate and organics. Additional information, data, and other resources are available via the laboratory's [website](http://www.washington.edu/students/gencat/academic/quat.html).
COLLEGE OF THE ENVIRONMENT
COLLEGE OF THE ENVIRONMENT
QUATERNARY SCIENCES

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6)
Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no-credit only.
View course details in MyPlan: QUAT 501

QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6)
Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT 501 and pursues a problem-oriented case study concurrently under faculty direction. Required paper on case study. Prerequisite: graduate standing. Credit/no-credit only.
View course details in MyPlan: QUAT 502

QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3)
Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Prerequisite: background courses in earth sciences and ecology. Credit/no-credit only.
View course details in MyPlan: QUAT 504

The Information School

Display as tabs

School Overview

370 Mary Gates Hall
Box 352840

Dean
Harry Bruce

Associate Deans
Carole Palmer, Research
Matthew Saxton, Academics

Never in our society's history has there been such a great need to manage so much information quickly and efficiently. The Information School is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate, and share information.

The School offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and PhD in Information Science. The School also offers certificate programs, continuing education opportunities for professionals, and service courses for undergraduates in information fluency, research strategies, and technology. Graduates of the School assume a variety of professional roles in the public, private, and non-profit sectors, with positions that span from information architects to children's librarians, from web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information field.

The community is interdisciplinary, bringing together a variety of social science traditions, including: library and information science, computer science, sociology, communication, philosophy, and engineering. Most research addresses topics in the following broad categories:

- Ethics and Information
- Personal Information Management
- Human-Computer Interaction and Design
- Information Management
- Knowledge Organization
- Information Literacy
- Access to Information
- Information in Everyday Life
The School's work remains focused on the human impact of information. The research and curriculum of the school examines information systems and technology from a user-centered perspective. By retaining a focus on the human impact of information systems and technology, the School builds on our community values of trust, transparency, and mutual respect.

**History**

Originally established in 1911, the Information School has the oldest library and information science program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, faculty, and state of the art facilities, the Information School became the University's sixteenth independently organized school/college in 2001.

The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and ever-changing information frontiers.

**Vision**

The School envisions a world where more effective use of information helps everyone discover, learn, innovate, solve problems, have fun, and make a better world. Information changes lives.

**Mission**

The School prepares information leaders through researching the problems and opportunities of information, designing solutions to information challenges, and making information work.

Informatics students design, build, implement, and secure information systems that meet human, organizational, and societal needs.

Students have a strong people focus and they excel as user experience designers, business analysts, data managers, information architects, web developers, and information assurance professionals.

**Undergraduate Program**

Adviser  
470 Mary Gates Hall  
Box 352840  
(206) 543-1794  
informatics@uw.edu

The Information School offers a Bachelor of Science degree with a major in informatics, with options in human-computer interaction and information architecture.
Bachelor of Science

Suggested First- and Second-Year College Courses: INFO 101, INFO 200, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 221, STAT 311, STAT 293, or QMETH 201; courses that develop strong analytical, qualitative, and quantitative reasoning skills; courses that develop strong written and oral communication skills; courses that provide exposure to a variety of social science fields such as psychology, sociology, anthropology, or philosophy.

Program Admission Requirements

Regular Admission

1. INFO 200; CSE 142; either STAT 221, STAT 311, STAT 390, or QMETH 201; one English composition course selected from the University list, with a minimum 2.0 grade in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses.

2. Minimum 2.00 cumulative college GPA.

3. Admission is competitive, based on the following criteria:
   a. Overall academic performance
   b. Grades in courses required for admission to the major
   c. Personal statement reflecting an interest in and commitment to becoming a major in this field
   d. Other evidence of interest in and commitment to the field (e.g., work experience, internships).

   Meeting the above criteria does not guarantee admission.

4. Application deadline is June 15. Students apply online at www.ischool.uw.edu. Admission is for autumn quarter only.

5. Admission is done annually and new students enter the program autumn quarter. Most students apply spring of their sophomore year and begin the program the following autumn quarter as a junior.

6. There is not an equivalent course to INFO 200 taught elsewhere; therefore, transfer students can apply to the program and be admitted with the provision that they complete INFO 200 with a minimum 2.0 grade before the end of their first year in the program.

Freshman Direct Admission Program (FDAP)

1. Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.

2. The number of early admission (FDAP) students does not exceed 10 percent of the number of majors admitted each year.
**Major Requirements**

94-99 credits as follows:

1. Courses required for admission to the program (18-19 credits, as shown above)
2. Core courses (50 credits): INFO 340, INFO 343, INFO 360, INFO 380, INFO 450, INFO 470, INFO 481, INFO 490 (4), INFO 491 (4), CSE 143, CSE 373
3. Areas of study (16-20 credits): Students may choose a transcriptable option in either human-computer interaction (HCI), information architecture (IA), information assurance and cybersecurity (IAC), or data science (See below.) Alternatively students may work with their adviser to select a minimum of four classes (16-20 credits) to create a customized program aligned with their personal interests or career goals. For example, web and mobile, as well as social computing/social informatics, are additional areas of strength within the School.
4. Free elective (10 credits): At least one additional 300- or 400-level INFO elective in any area, totalling at least 10 credits.

**General Education and Areas of Knowledge**

1. English composition (5 credits)
2. Quantitative/Symbolic Reasoning (5 credits)
3. Writing courses (10 credits)
4. Natural World (20 credits)
5. Individuals & Societies (20 credits)
6. Visual, Literary, & Performing Arts (20 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirement (Natural World; Individuals & Societies; Visual, Literary, & Performing Arts).

**Options**

*Human-Computer Interaction (HCI) Option (16-20 credits):* Minimum four courses from a department-approved list (https://ischool.uw.edu/current/informatics/degree-plan/options). INFO 360 is the informatics foundation course in HCI; however, it is a major core requirement and hence not included in the 16-20 credits.

*Information Architecture (IA) Option (16-20 credits).* Minimum four courses from an approved list. See department website for list.

*Information Assurance and Cybersecurity Option (16-20 credits).* See department website for list.

1. **Foundation Course:** INFO 310 or equivalent
2. Minimum three additional courses from an approved list (11-15 credits). Includes courses at participating departments on all three UW campuses. See program website for list: ischool.uw.edu/academics/informatics/degree-options. No more than one of these three may be a networking course (INFO 341, T INFO 250, or CSS 432).

**Continuation Policy**

http://www.washington.edu/students/gencat/academic/school_information.html
All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

**Student Outcomes**

- **Learning Objectives and Expected Outcomes**: The informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

  Graduates of the informatics program are qualified for jobs in the information and technology industry and in business, public service, and other professions. Possible job titles include user experience designer, business analyst, consultant, usability engineer, data manager, information architect, web developer, network manager, project manager, and information assurance professional.

  The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science, information science, biomedical informatics, business and accounting, and information technology.

  Informatics student-learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively; ability to manage projects; ability to build working systems; ability to organize and manage information; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- **Instructional and Research Facilities**: Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) laboratory, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia production, web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

  The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- **Honors Options Available**: With College Honors; With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Distinction (Departmental Honors). See adviser for requirements.

- **Research, Internships, and Service Learning**: Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A
significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. A significant percentage of informatics students participates in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- **School Scholarships**: The Henry Scholarships, in the amount of approximately $1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.

- **Student Organizations/Associations**: Undergraduates participate in a number of the School's many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

**Of Special Note:**

**Capstone Projects**: Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. Through capstone projects, students demonstrate the skills, understanding, and competencies they can successfully use to prepare for employment and graduate studies.

**Information Sessions**: Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the School website at ischool.uw.edu/informatics/prospective/more_info.

---

**Graduate Programs**

The School offers graduate programs leading to the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy (PhD) in Information Science.

**Master of Library and Information Science**

MLIS Adviser  
420 Mary Gates Hall, Box 352840  
(206) 543-1794  
mlis@uw.edu

**Admission Requirements**

The MLIS program is offered in two delivery modes: residential (on-campus, full-time, two-year program) and online (part-time three-year program). When applying, applicants must indicate for which program they are applying. Applications should also include:
1. Personal statement of educational and professional goals
2. Answers to supplemental questions
3. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
4. Three letters of recommendation
5. Transcripts from each relevant institution attended
6. TOEFL score (for international students)

**Degree Requirements**

63 credits, as follows:

1. **Core Curriculum (31 credits):** LIS 500, LIS 510, LIS 520, LIS 530, LIS 550, LIS 560, LIS 570, LIS 580, and one information technology core course.
2. **Electives (27 credits):** Options vary and allow students to design a problem of study specific to their interests and career goals.
3. **Capstone (5 credits):**
4. **Optional Internship:** Directed Fieldwork: LIS 590 is an elective course designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor.

**Master of Library and Information Science, Law Librarianship**

The Law Librarianship program is designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

**Admission Requirements**

1. Personal statement of educational and professional goals
2. Answers to supplemental questions
3. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
4. Three letters of recommendation
5. Transcripts from each relevant institution attended
6. Earned JD prior to enrollment in the MLIS program
7. TOEFL score (for international students)

**Degree Requirements**

43 credits, as follows:

1. **Core Curriculum (23 credits):** LIS 500, LIS 510, LIS 520, LIS 526, LIS 530, LIS 550, LIS 587
2. **Law Librarianship Courses (16 credits):** LIS 592, LIS 593, LIS 594, LIS 595. The final degree project is completed as part of LIS 595.
3. **Internship (4 credits):** directed fieldwork (LIS 590)
Master of Science in Information Management

MSIM Adviser
420 Mary Gates Hall, Box 352840
(206) 543-1794
msim@uw.edu

Admission Requirements

1. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE or GMAT scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE or GMAT scores.
7. Mid-career applicants must show five years of relevant work experience in management or technology.

Degree Requirements, Full-Time Option

65 credits minimum, to include:

1. Core Curriculum: IMT 500, IMT 535, IMT 55, IMT 570
2. Capstone (5 credits): INFX 595, INFX 596
3. Electives (24 credits): Beyond the required core courses, students have the option of crafting a program of study by selecting a specialization specific to their interests and career goals, or to choose more broadly from across specializations. MSIM specializations include data science, information architecture, information security, user experience design, and information management and consulting.
4. Internship: MSIM internships are structured around IMT 590 and provide students an opportunity to work in an information environment under supervision of an experienced professional mentor. While not required, internships are strongly encouraged. During internship placement, the student works to meet meaningful learning objectives mutually defined by the student and internship supervisor. Internship credits fall under electives.

Degree Requirements, Mid-Career Option

47 credits minimum, to include:

1. Core Curriculum (16 credits): IMT 500, IMT 535, IMT 550, IMT 570
2. Capstone (optional 5 credits): INFX 595, INFX 596
3. Electives (26 credits): Beyond required core courses, students craft a program of study by selecting a specialization specific to their interests and career goals, or choose more broadly from across specializations. MSIM specializations include data science, information architecture, information security, user experience design, and information management and consulting.
science, information architecture, information security, user experience design, and information management and consulting.

All students in the MSIM program may elect to complete one or more of the following specializations:

a. Data Science and Analytics (19-20 credit): Students use methods, tools, and frameworks for analyzing and deriving insight from large-scale, heterogeneous data.

b. Information Architecture and Organization (17-20 credits) Students assess existing information structures and create new systems to effectively structure information.

c. Information Management and Consulting (18-20 credits): Students develop and manage information policies, strategies, innovations, projects, and initiatives in public, private, and non-profit institutions.

d. Information Policy and Society (13-17 credits): Students gain strategies and processes for critical analysis, development, and management of information policies and social, cultural, and policy issues.

e. Information Security (9 credits): Students assure the quality, security, and appropriate use of information assets.

f. User Experience (20-21 credits): Students design, prototype, and formally evaluate interactive information interfaces, systems, and experiences from a user-centered perspective.

Doctor of Philosophy in Information Science

Adviser
420 Mary Gates Hall, Box 352840
(206) 543-1794
ischoolphd@uw.edu

Admission Requirements

1. Current curriculum vitae highlighting any academic and/or work experience, honors, publications, presentations, and research experience

2. Three letters of recommendation

3. Personal statement of educational and professional goals

4. Official transcript from each relevant institution attended

5. GRE Scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE scores.

6. TOEFL score (for international students)

Degree Requirements

90 credits minimum, to include:

1. Required courses: INSC 500, INSC 501, INSC 570, INFC 571, INSC 572; two research practica; two teaching practica
2. Additional elective coursework selected in consultation with faculty advisers
3. 18 graded credits in courses at the 500 level and above (taken prior to general examination)
4. 60 credits taken prior to general examination
5. 27 dissertation credits (INSC 800)
6. Preliminary review determined by a School-based advisory committee at the end of the required first year of full-time study
7. General examination upon completion of coursework and practica components to attain formal candidacy for the PhD program (candidate's certificate)
8. Successful defense of a dissertation before a Supervisory Committee (final examination)

Financial Aid

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Student Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available online.

Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. Prospective MLIS and MSIM students are encouraged to apply during the admission process and throughout the year as other positions become available. Visit the Student Employment Opportunities page at ischool.uw.edu/jobs/students to apply for open positions. All students admitted to the PhD program are guaranteed a minimum four years of funding.

MLIS and MSIM admission committees have a limited number of merit-based scholarships to award to incoming students. Continuing students also have the opportunity to apply for scholarships. All eligible applicants and students are encouraged to complete the Free Application for Federal Student Aid (FAFSA) each year.

Additional scholarship and financial aid information is available on the following sites:

MLIS, https://ischool.uw.edu/future/mlis/fiancial-aid

MSIM, https://ischool.uw.edu/future/msim/financial-aid

PhD, https://ischool.uw.edu/future/phd/funding

Special Research Facilities

Located on the third and fourth floors of Mary Gates Hall, one of the University's high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) lab, a Datalab for Data Science and Analytics, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, web development, Internet exploration and collaboration, and office
productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

The School also has a dedicated information science research facility in Bloedel Hall, which includes offices, workstations, research labs, and meeting spaces.

**Continuing and Professional Education**

The Information School works with University of Washington Professional and Continuing Education to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include web technology solutions; information assurance and cybersecurity; and school library professional. Those interested in continuing education or certificate programs should contact UW Professional and Continuing Education, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: (206) 543-2320 or see [www.pce.uw.edu/](http://www.pce.uw.edu/).
Detailed course offerings (Time Schedule) are available for

- **Spring Quarter 2017**
- **Summer Quarter 2017**
- **Autumn Quarter 2017**

**INFO 101 Social Networking Technologies (5) I&S/NW**
Explores today's most popular social networks, gaming applications, and messaging applications. Examines technologies, social implications, and information structure. Focuses on logic, databases, networked delivery, identity, access, privacy, ecommerce, organization, and retrieval.
[View course details in MyPlan: INFO 101](#)

**INFO 102 Gender and Information Technology (5) I&S, DIV**
Explores the social construction of gender in relation to the history and contemporary development of information technologies. Considers the importance of diversity and difference in the design and construction of innovative information technology solutions. Challenges prevailing viewpoints about who can and does work in the information technology field. Offered: A.
[View course details in MyPlan: INFO 102](#)

**INFO 198 Exploring Informatics (1-5, max. 15)**
Introduces a variety of Informatics and Information Science topics to pre-Informatics and non-Informatics students.
[View course details in MyPlan: INFO 198](#)

**INFO 200 Intellectual Foundations of Informatics (5) I&S**
Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.
[View course details in MyPlan: INFO 200](#)

**INFO 201 Technical Foundations (5) QSR**
Introduces fundamental tools and technologies necessary to transform data into knowledge. Covers the full information lifecycle, including the collection, storage, analysis and visualization of data. Core competencies underlying this process, including functional programming, use of databases, data wrangling, version control,
and command line proficiency, are acquired through real-world data-driven challenges. View course details in MyPlan: INFO 201

INFO 240 Database Management Fundamentals I (5)
Covers database overview and history, the relational model, entity-relationship diagrams, database design and normalization, and Structured Query Language (SQL). Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems. View course details in MyPlan: INFO 240

INFO 245 Database Management Fundamentals II (5)
Covers conceptual, logical, and physical database design: distributed databases; web technology and databases; advanced queries; and enterprise database administration. Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems. Prerequisite: INFO 240. View course details in MyPlan: INFO 245

INFO 310 Information Assurance and Cybersecurity (5)
Provides a theoretical and practical introduction to information assurance and cyber-security (IAC). Includes methods and practices for securing information and information systems. Covers how vulnerabilities arise, recognizing evolving threats, and mitigating them. Explores the role of risk analysis, information privacy, accountability, and policy. View course details in MyPlan: INFO 310

INFO 312 Enterprise Risk Management (4)
Examines the risk inherent in use of technology, and how to manage risk to information, data, and technology in organizations. Topics include risk management frameworks, risk tolerance, key risk indicators, the legislative and regulatory environment, compliance, and new avenues of risk such as social media and mobile. View course details in MyPlan: INFO 312

INFO 320 Technical and Social Perspectives on Search (5)
Fundamentals of search including data acquisition and processing, index construction, query processing, ranking and display. Covers building a customized search service, search engine optimization, individual and social perspectives on search. Prerequisite: CSE 142 or CSE 143; and INFO 343 which may be taken concurrently. View course details in MyPlan: INFO 320

INFO 330 Introduction to Information Architecture (5)
Introduction to Information Architecture (IA) methodologies and tools used to design and build information spaces. Discusses IA core concepts of navigation, labeling, data modeling, taxonomy and information personas. Also discusses wireframes, sitemaps, information design and integrating IA work with a UX strategy. Prerequisite: minimum grade of 2.0 in INFO 360. View course details in MyPlan: INFO 330

INFO 340 Introduction to Relational Database Management Systems (5) NW
Introduction to relational database management systems, focused on relational theory and the application of conceptual, logical, and physical database modeling. Key topics include the relational model, SQL, entity-relationship modeling, three-tier architectures, implementation of database applications, and related topics in information systems. View course details in MyPlan: INFO 340

INFO 341 Computer Networks and Distributed Applications (5) NW
Basic concepts of local and wide-area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 142 or CSE 143. View course details in MyPlan: INFO 341
INFO 343 Client-Side Web Development (5) NW
Introduction to client-side web development including markup, programming, protocols, libraries, frameworks, and techniques for creating effective, usable, dynamic, and responsive applications that meet user needs. Includes an introduction to web development roles within organizations, content management systems, and other tools to build and manage websites and applications. Prerequisite: CSE 142 or CSE 143; and INFO 201. View course details in MyPlan: INFO 343

INFO 344 Server-Side Web Development (5)
Introduces server-side web development programming, services, tools, protocols, best practices and techniques for implementing data-driven and scalable web applications. Connects topics from human-centered design, information architecture, databases, data analytics and security to build a solution. Prerequisite: CSE 142 or CSE 143; and either INFO 343 or CSE 154; and INFO 340. View course details in MyPlan: INFO 344

INFO 360 Design Thinking (5) I&S
Design methods for identifying user needs, devising new design concepts, prototyping these concepts, and evaluating utility and usability. Introduces theory and practice of user-centered design. Methods for identifying users' needs, understanding users' behaviors, envisioning and prototyping new systems, and evaluating the usability of systems. Emphasizes incorporating people in the entire design process. View course details in MyPlan: INFO 360

INFO 362 Visual Information Design (5)
Build fluency in expressing information visually as diagrams, charts, maps, and icons. Learn to solve design problems, give and receive critique, follow an iterative process of design refinement, and learn technical skills. Understand the nature of visual potential, visual design principles, and the impact of color and typography. View course details in MyPlan: INFO 362

INFO 365 Mobile Application Design (5)
Fundamentals of mobile UX & UI design through the lens of creating your own mobile OS and core mobile apps in a design studio setting. Includes creating a mobile design language and mobile patterns, app review by professional designers, and how design for mobile is unique from other mediums. Recommended: INFO 360 View course details in MyPlan: INFO 365

INFO 370 Introduction to Data Science (5) QSR
Surveys the major topics within data science, including data ingestion, cloud computing, statistical inference, machine learning, information visualization, and data ethics. Includes programming in R and Python. Prerequisite: INFO 201; and CSE 142 or CSE 143; and either CS&SS 221, SOC 221, STAT 221, STAT 311, MATH 390, STAT 390, QMETH 201, or Q SCI 381. View course details in MyPlan: INFO 370

INFO 371 Core Methods in Data Science (5) QSR
Introduces modern methods in applied data science. Emphasizes practical applications and analysis of real-world data through a survey of common techniques in supervised and unsupervised machine learning, and methods for experimental design and causal inference. Students learn functional, procedural, and statistical programming techniques for working with data. Prerequisite: INFO 370. View course details in MyPlan: INFO 371

INFO 380 Information Systems Analysis and Design (5)
Prepares students to participate in structured systems analysis and design efforts. Students learn how to analyze system context, behavior, and structure; identify stakeholders; gather requirements; and redesign systems to make them more beneficial to the organization. View course details in MyPlan: INFO 380

INFO 386 Professionalism in Informatics (4)
Examines professionalism, communication, teamwork, leadership, and interpersonal networking to strengthen
students as they seek to excel professionally. Covers developing and presenting business cases and project plans, personal branding, conducting informational interviews, and effective written and oral communication.

View course details in MyPlan: INFO 386

INFO 415 Emerging Topics in Information Assurance and Cybersecurity (1-5, max. 15)
Explores emerging topics and unique subjects in information assurance and cybersecurity (IAC) not otherwise covered in the IAC curriculum. Prerequisite: INFO 310.

View course details in MyPlan: INFO 415

INFO 431 Metadata Design (3)
Explores principles of metadata schema and application profile design and implementation using XML technologies. Examines syntactic and semantic interoperability among diverse schemas and application profiles. Prerequisite: INFO 330; INFO 340.

View course details in MyPlan: INFO 431

INFO 432 Ontology Design (3)
Covers concepts and technologies supporting semantic interoperability among different metadata and ontologies including topic maps, RDF, schema, and Web Ontology Language (OWL). Includes advanced semantic modeling of complex data. Prerequisite: INFO 431.

View course details in MyPlan: INFO 432

INFO 433 Content Strategy in Information Architecture (4) I&S
Introduces key concepts in understanding the content lifecycle in context of an organization's web, mobile, and other communication channels. Provides knowledge of key theories and principles in information architecture and practical application of skills including user research; information collection and analysis; and information organization and presentation.

View course details in MyPlan: INFO 433

INFO 444 Value-Sensitive Design (5)
Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: either INFO 360, DESIGN 383, CSE 440, or HCDE 419.

View course details in MyPlan: INFO 444

INFO 445 Advanced Database Design, Management, and Maintenance (5)

View course details in MyPlan: INFO 445

INFO 447 Computer Supported Cooperative Work (5) I&S
Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral and social aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities.

View course details in MyPlan: INFO 447

INFO 448 Mobile Development: Android (5)
Application development for Android devices. Covers implementation of mobile apps, including build tools, programming languages and libraries, user interfaces, application architecture, and industry practices. Focuses on harnessing communication systems and sensors specific to mobile platforms, to create interactive, user-
focused systems, programming in Java and XML. Prerequisite: CSE 143; and INFO 343 or CSE 154.

View course details in MyPlan: INFO 448

INFO 449 Mobile Development: IOS (5)
Application development for iOS devices. Covers implementation of mobile apps, including build tools, programming languages and libraries, user interfaces, application architecture, and industry practices. Focuses on harnessing communication systems and sensors specific to mobile platforms, to create interactive, user-focused systems. Programming in Swift and XML. Prerequisite: CSE 143; and INFO 343 or CSE 154.

View course details in MyPlan: INFO 449

INFO 450 Information Ethics and Policy (5) I&S
Provides a framework for analyzing the ethical, legal, economic, and socio-political issues surrounding information, information technologies, and the information industries. Explores policy and ethical issues of information access and control including; intellectual property, file sharing, free speech, privacy, and national security.

View course details in MyPlan: INFO 450

INFO 461 Cooperative Software Design (5)
Introduces the theory and practice of cooperative user-centered software design, applying fundamental theories and techniques from social psychology, computer-supported collaborative work, and software engineering. Prerequisite: INFO 360; and INFO 343 or CSE 154.

View course details in MyPlan: INFO 461

INFO 463 Input and Interaction (5)
Introduces input and interaction techniques for desktop, mobile, and other computing environments. Combines motor and perceptual psychology, interaction design, and input devices and software in the study of human-computer systems. Emphasizes using human performance models inform the design of new interaction techniques. Prerequisite: INFO 360.

View course details in MyPlan: INFO 463

INFO 466 Immersive Information Environments (5) VLP A/I&S
Introduction to immersive technologies and approaches to analyzing, designing, and building immersive worlds utilizing game theory, 3D interactive design, environments, and learning theory. Conducted exclusively in a virtual world environment through a hands-on and practical educational approach.

View course details in MyPlan: INFO 466

INFO 467 Immersive Information Environment Design (5) VLP A
Design, build, and curate immersive environments in a hands-on studio. Learn tools and techniques for contributing to immersive information environments such as virtual worlds, 3D simulations, and serious games, Utilize 3D information architecture to create personalized, community based environments for education, business and entertainment. Prerequisite: INFO 466.

View course details in MyPlan: INFO 467

INFO 470 Research Methods in Informatics (5)
Introduction to the research methods used in informatics for understanding technology, information, and human behavior. Methods incorporate those from design, engineering, and social science. Topics include science and invention, research contribution types, research through design, theory, ethics, and qualitative/quantitative empirical methods. Prerequisite: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, QMETH 201, or Q SCI 381.

View course details in MyPlan: INFO 470

INFO 474 Interactive Information Visualization (5) VLPA, QSR
Techniques and theory for visualizing, analyzing, and supporting interaction with structured data like numbers, text, and relations. Provides practical experience designing and building interactive visualizations for the web. Exposes students to cognitive science, statistics, and perceptual psychology. An empirical approach will be used
to design and evaluate visualizations. Prerequisite: INFO 343 or CSE 154; and CSE 143; and either QMETH 201, Q SCI 381, STAT 221/CS&SS 221/SOC221, STAT 311, or STAT 390/MATH 390.

**INFO 481 Project Management in Informatics (4)**
Introduces project management principles within the context of Informatics. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and the use of computer-based project management tools.

**INFO 490 Project Capstone I (4)**
Student-driven team project including definition of an information problem, a method of investigation, creation of a project proposal, and completion of project deliverables. Prerequisite: INFO 360; INFO 470; INFO 481.

**INFO 491 Project Capstone II (4)**
Includes design and implementation of a system or development of a research question intended to solve an information problem. Incorporates stakeholder and peer feedback, creation of project deliverables, presentation of the project in a public forum, and final assessment. Prerequisite: INFO 490.

**INFO 495 Internship in Informatics (1-5, max. 12)**
Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

**INFO 496 Service Learning in Informatics (1-5, max. 12)**
Utilization of skills in service of the community, as approved by faculty member. Work to be jointly supervised by faculty member (or approved academic sponsor) and on-site service supervisor. Credit/no-credit only.

**INFO 497 Informatics Study Abroad (1-8, max. 18)**
International seminar, led by Information School faculty or researchers. Addresses a specialized area of informatics. Topics vary. May require language proficiency.

**INFO 498 Special Topics in Informatics (1-5, max. 15)**
Various topics in informatics.

**INFO 499 Independent Study (1-5, max. 15)**
Readings, design projects, or research under faculty supervision.
Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**IMT 500 Foundations of Information Management (3)**
Examines the role and function of information and information management in individual, organizational, community, and social contexts. Topics include information and information management concepts; methods of managing information and information flows within organizations; and internal and external communication in professional settings.

View course details in MyPlan: IMT 500

**IMT 501 Teamwork for Information Professionals (1)**
Introduces the theory and skills that support functional working groups, preparing students to work together effectively in the classroom and the workforce. Major topics include: theoretical perspectives on teams; processes and structural characteristics that influence team effectiveness; dynamics of individual behavior and interpersonal relationships in team interactions; and team leadership.

View course details in MyPlan: IMT 501

**IMT 502 Effective Written Communications for Information Professionals (1)**
Provides the theory and skills necessary to communicate in writing in a manner that will accomplish the writer's goals. Major topics include: basic communication theory; effective organization; use of visuals; making writing accessible; managing tone; and writing online.

View course details in MyPlan: IMT 502

**IMT 503 Effective Oral Communications for Information Professionals (1)**
Provides the theory and skills necessary to make effective oral presentations that will accomplish the presenter's goals. Major topics include: basic communication theory; preparing effective presentations; presentation best practices; and nonverbal communication cues.

View course details in MyPlan: IMT 503

**IMT 510 Human Aspects of Information Systems (4)**
Social, organizational, cognitive, behavioral, and contextual aspects of information, including basic concepts in
human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

**IMT 520 Information Services and Resources (4)**

Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation, and presentation of appropriate results; and modalities for delivery of services.

View course details in MyPlan: IMT 520

**IMT 525 Information Management and Technology in Sports (3)**

Explores the information perspective, including the role and the use of information, information management, and information technologies applied to the sports context. Examines modern and emerging information management and technology systems and their design and use in administering intercollegiate athletic functions.

View course details in MyPlan: IMT 525

**IMT 530 Organization of Information Resources (4)**

Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

View course details in MyPlan: IMT 530

**IMT 535 Introduction to Information Architecture (5)**

Introduces concepts and methods of front- and back-end information architecture. Covers back-end topics including data and content modeling, taxonomy, controlled vocabulary, SEO, search, and analytics. Covers front-end topics including design thinking, design process, design patterns, navigation, workflow, labeling, orientation, and information scent. Unifies front- and back-end IA.

View course details in MyPlan: IMT 535

**IMT 540 Design Methods for Interactive Systems (4)**

Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

View course details in MyPlan: IMT 540

**IMT 541 Enterprise Information Systems Analysis and Design (4)**

Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for assessing system and technology needs, defining information and work specifications, process and data modeling, and stakeholder analysis process; and input and output design, database design, test plans and implantation strategies in the design process.

View course details in MyPlan: IMT 541

**IMT 550 Policy and Ethics in Information Management (4)**

Explores a range of information issues in the social and organizational context of information professionals, including professional ethics, privacy, freedom of expression, and intellectual property. Gives students tools for analysis of the kinds of social and ethical issues that will arise in their future lives as information professionals.

View course details in MyPlan: IMT 550

**IMT 551 Foundations of Organizational Information Assurance (3)**

Concepts, elements, strategies, skills related to life cycle of information assurance--involving policies, practices, mechanisms, dissemination, and validation--that ensure the confidentiality, integrity, and availability of
information and information systems. Analyzes the information assurance planning process, including determination and analysis of information assurance organization goals, threat spectrum, risk, and legal and ethical issues.

View course details in MyPlan: IMT 551

**IMT 552 Information Assurance Risk Assessment and Management (3)**
Examines the concepts, processes, and skills related to risk management in information assurance involving risk assessment, risk analysis, and mitigation planning. Analysis of the risk management process through several structured approaches that facilitate information assurance decision-making. Prerequisite: IMT 551.

View course details in MyPlan: IMT 552

**IMT 553 Establishing and Managing Information Assurance Strategies (3)**
Applies and combines information assurance concepts, processes, and skills to solve case studies from practitioner experiences and explore the role of policy in creating a successful information assurance program. Prerequisite: IMT 551, IMT 552.

View course details in MyPlan: IMT 553

**IMT 554 Information Economics (3)**
Theoretical and practical examination of how information economics impacts design decision in context of information systems and information organizations. How information is priced, commoditized, exchanged, preserved in economic transactions. How strategic decisions within organizations are made through information and strategic games, information signaling, information strategies, information-based network economics, and information incentives.

View course details in MyPlan: IMT 554

**IMT 556 Information and Operational Risk (3)**
Examines the information dimensions of the most common types of operational risk including: internal and external fraud, regulatory noncompliance, processing errors, information security breaches, and technology failures; practical application of operational risk frameworks where the intersection of people, information, processes, systems, and external events can lead to financial loss.

View course details in MyPlan: IMT 556

**IMT 557 Operational Risk Management in the Public and Private Sectors (4)**
Learn to identify, monitor, and mitigate operational risk exposures in corporations and government agencies, analyze risk appetites, and drive risk awareness at each level of corporate or government hierarchies. Examines technology failure and information sharing in crisis management, intellectual property, and data risk in various infrastructure sectors. Prerequisite: IMT 556.

View course details in MyPlan: IMT 557

**IMT 570 Analytic Methods for Information Professionals (4)**
Sharpens critical thinking processes by studying and applying scientific methods to problem solving in the information management area. Provides a framework to resolve information management research problems, interpret research findings, and to understand the interaction among the various parts of the research process.

View course details in MyPlan: IMT 570

**IMT 576 Foundations of Strategic and Managerial Business Intelligence (4)**
Provides a broad overview of business intelligence (BI) including foundational BI concepts, strategies, techniques, and technologies. Primary emphasis is on the strategic and managerial perspective, focusing on how one designs, implements, and leverages business intelligence systems and strategies in management and leadership roles. Prerequisite: INFX 543

View course details in MyPlan: IMT 576

**IMT 577 Business Intelligence Systems (4)**
Introduces fundamentals of how to architect and develop business intelligence systems for decision making. Topics include dimensional data modeling; extracting, transforming, and loading data (ETL); online analytical
processing (OLAP); data warehouse architecture; developing data visualizations to answer key business questions. Prerequisite: INFX 543

View course details in MyPlan: IMT 577

**IMT 580 Management of Information Organizations (4)**
Introduction to internal and external management issues and practices in information organizations. Examines key topics drawn from the fields of organizational theory and behavior, including planning and decision-making, organizational structure, leadership, and motivation. Reviews strategic and operational issues including human and organizational issues related to technology introduction, use, and management.

View course details in MyPlan: IMT 580

**IMT 582 Strategic Information Initiatives (4)**
Tools, techniques, approaches for identifying and planning entrepreneurial initiatives within organizations, including business information assessments, organizational readiness assessments, alignment with organizational priorities, information audits, processes for obtaining organizational investment in and commitment to new initiatives. Focuses on building business and economic justifications and leading strategic initiatives in organizations.

View course details in MyPlan: IMT 582

**IMT 583 Finance and Accounting Foundations for Information Professionals (3)**
Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget.

View course details in MyPlan: IMT 583

**IMT 584 Marketing Foundations for Information Professionals (3)**
Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing, channels, retail/wholesale, marketing communication, and direct selling.

View course details in MyPlan: IMT 584

**IMT 585 Consulting Practices (4)**
Provides an overview of Information consulting practices including consulting concepts, methodologies, approaches to consultative analysis and problem solving. Emphasizes a systems-thinking approach to practicing effective technical and interpersonal consulting behaviors as well as processes for internal and external consulting. Interpersonal/communication skills, client relationship management and change management are strongly emphasized. Prerequisite: IMT 580.

View course details in MyPlan: IMT 585

**IMT 586 Information Dynamics I (4)**
Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with INSC 586.

View course details in MyPlan: IMT 586

**IMT 587 Principles of Information Project Management (4)**
Introduces project management principles within information-related business contexts. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and their use of computer-based project management tools.

View course details in MyPlan: IMT 587

**IMT 588 Enterprise Project Management in Information Organizations (4)**
Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-
functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with INSC 588.

IMT 589 Special Topics in Information Management (1-4, max. 12)
Special study and research in topics of current concern to faculty and students.

IMT 590 Internship in Information Management (1-5, max. 10)
Internship in the private or public sector, jointly supervised by faculty member and an on-site work sponsor. Prerequisite: enrollment in the MSIM program. Credit/no-credit only.

IMT 598 Emerging Trends in Information Management and Technology (3)
Focus on emerging trends in information management and information technology. Attention given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use, and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: permission of instructor.

IMT 600 Independent Study or Research in Information Management ([1-4]-)
Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program. Credit/no-credit only.
Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**INFX 501 Concepts in Algorithmic Thinking for Information (1)**

Presents programming concepts in the context of information science including the concepts of the algorithm, data storage, expressions, syntax, logic, objects, commands, and events. Introduces the algorithmic manipulation of information objects, and the mindset and methods of computer programming and application development. Credit/no-credit only.

View course details in MyPlan: INFX 501

**INFX 502 Database Concepts for Information Professionals (3)**

Introduces the terminology and concepts of managing data with relational database management systems. Students will gain introductory exposure to data modeling, relational database design, creation, and use. Credit/no-credit only. Credit/no-credit only.

View course details in MyPlan: INFX 502

**INFX 503 Website Design Concepts for information Professionals (1)**

Introduces the context and construction of websites presenting an integrated understanding of web design principles, information behavior, and technical skills. Emphasizes the roll of markup in information display and organization, the development of large sites, web strategy, and site construction. Credit/no-credit only.

View course details in MyPlan: INFX 503

**INFX 504 Networking and Network Applications for Information Professionals (1)**

Introduces the concepts, terminology, and technologies of digital networks, including how networks operate and the influence networks have on the workplace and society. Includes preparation to think critically about the impacts of networking technologies on organizations, work groups, and information systems. Credit/no-credit only.

View course details in MyPlan: INFX 504

**INFX 505 Project Management Basics for Information Professionals (1)**

Introduces the terminology, concepts, and skills used in working with project management and project management software. Emphasizes developing, refining, and monitoring work schedules using software tools.
Credit/no-credit only.

**INFX 508 Reading Seminar (2)**
Discusses theoretical works and contemporary research in areas related to information science, information management, or information technology and design. Introduces students to the intellectual traditions that underlie the field. Credit/no-credit only.

*View course details in MyPlan: INFX 508*

**INFX 511 Introduction to Programming for Information and Data Science (4)**
Introduces fundamentals of computer programming as used for data science. Covers foundational skills necessary for writing stand-alone computer scripts, including programming syntax, data structuring, and procedural definition (functions). Includes programming environments (command-line) and version control. Emphasizes skills in algorithmic thinking, abstraction, debugging, and code reuse. Assumes no previous programming background.

*View course details in MyPlan: INFX 511*

**INFX 512 Beginning Web Development (4)**
Teaches students how to build custom websites/applications from scratch, manage files in a version control system, and deploy them to publicly-accessible web servers. Focus is on client-side technologies, including HTML, CSS, and JavaScript. Existing basic programming knowledge is beneficial but not required.

*View course details in MyPlan: INFX 512*

**INFX 531 Metadata Design (3)**
Design principles of metadata schemas and application profiles - implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.

*View course details in MyPlan: INFX 531*

**INFX 532 Ontology Design (3)**
Studies semantic interoperability among different metadata schemas and ontologies. Elaborates on concepts and technology related to Topic Maps, RDF Schema, and Web Ontology Language (OWL) to achieve advanced and semantic data modeling of complex data that exist in the real world. Prerequisite: INFX 531 or permission of instructor.

*View course details in MyPlan: INFX 532*

**INFX 536 Metadata for Interactive Media (3)**
Explore new ideas and approaches for organizing and providing access to interactive media, particularly from a user-centered perspective. Design and conduct formative and evaluative user studies employing various qualitative and quantitative methods to determine information needs and seeking behaviors of various stakeholders in one or more interactive media domains.

*View course details in MyPlan: INFX 536*

**INFX 537 Construction of Indexing Languages (4)**
Exploration of the design, construction, evaluation, and maintenance of controlled indexing languages, including studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Prerequisite: either LIS 530 or IMT 530. Credit/no-credit only.

*View course details in MyPlan: INFX 537*

**INFX 538 Metadata Design Studio (4)**
Principles, skills and practices in the conceptualization and implementation of metadata systems with a focus on semantic web. Project-based exploration of domain and abstract data modeling, attribute/value space definition,
and machine encoding decision. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.

**INFX 542 Information Structures Using XML (4)**

Introduces the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight given to understanding structures and implementing them. Topics include information analysis and organizational methods as well as XML and metadata concepts and application. Prerequisite: INFX 503.

[View course details in MyPlan: INFX 542](http://www.washington.edu/students/crsclst/infx.html)

**INFX 543 Relational Database Management Systems (4)**

Introduces relational database design, implementation, and management, with a focus on using relational database management systems (DBMS) to manage data in an organization. Topics include: data modeling tools and techniques, conceptual and logical database design, physical implementation, SQL, data management, and database administration. Recommended: INFX 502.

[View course details in MyPlan: INFX 543](http://www.washington.edu/students/crsclst/infx.html)

**INFX 544 Information Retrieval Systems (3)**

Introduction to theory and models in information retrieval and the systems for storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation, methods and tools for document analysis, interfaces, and usability.

[View course details in MyPlan: INFX 544](http://www.washington.edu/students/crsclst/infx.html)

**INFX 546 Data Communications and Networking (4)**

Covers local and wide-area computer networking including topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks.

[View course details in MyPlan: INFX 546](http://www.washington.edu/students/crsclst/infx.html)

**INFX 547 Social Media Data Mining and Analysis (4)**

Explores techniques for collecting and analyzing social media. Students gain direct experience with methods for collecting a social media corpus, defining features of activity that are relevant for analysis, and analyzing those features. Prerequisite: either INFX 501 or permission of instructor.

[View course details in MyPlan: INFX 547](http://www.washington.edu/students/crsclst/infx.html)

**INFX 551 Fundamentals of Data Curation (4)**

Examines principles, practices, and trends in the curation of digital research data. Provides a foundation in data management and data services for professional in institutions involved with data intensive research, scholarship, and innovation. Emphasizes data sharing, preservation, open access, metadata, and policy for development of reusable and accessible data resources.

[View course details in MyPlan: INFX 551](http://www.washington.edu/students/crsclst/infx.html)

**INFX 554 Information and Contemplation (4)**

Explores how contemplative practices and perspectives can offer insights into today's information-intensive culture and how they can provide guidelines and design principles for the development of new information practices and technologies. Students explore a variety of contemplative/attentional practices and use these to investigate information trends, practices, and concerns.

[View course details in MyPlan: INFX 554](http://www.washington.edu/students/crsclst/infx.html)

**INFX 561 Visualization Design (4)**

Students develop a human-centered visualization design practice using real-world data. This process includes applying graphic principles of visual encoding to data; conducting design explorations using sketches and prototyping; and gathering user feedback to assess output. Design workshops provide opportunities for hands-on engagement with concepts and technical skills.

[View course details in MyPlan: INFX 561](http://www.washington.edu/students/crsclst/infx.html)
INFX 562 Interactive Information Visualization (4)
Introduces techniques for visualizing, analyzing, and supporting interaction with structured data (numbers, text, graphs). Provides experience creating interactive visualizations for the web. Exposes students to cognitive science, statistics, and perceptual psychology principles. Students design and evaluate visualizations using perceptual and statistical accuracy.
View course details in MyPlan: INFX 562

INFX 563 Advanced Relational Database Management Systems (4)
Conducts deeper investigation into construction of high-volume, robust database systems from conception through deployment. Topics include Enhanced ERDs, explicit transaction-management (control-of-flow, error-handling), coded business rules, troubleshooting and optimization. Investigation of disaster recovery, security, high-availability and scalability solutions as well as NoSQL and data warehousing topics. Prerequisite: INFX 543.
View course details in MyPlan: INFX 563

INFX 565 Designing Information Experiences (4)
Explores experience design including user experience, customer experience, and service design. Covers the philosophical foundations of experience, how to design and evaluate experiences, and the business aspects of customer experience. The focus is on experiences of and with information.
View course details in MyPlan: INFX 565

INFX 567 Strategic Management of Social Media (4)
Offers an overview of social media use in organizations of any type. Covers a variety of social media platforms and technologies, business strategies, and uses and related issues. Gives a historical perspective on social media and its development. Students learn to develop social media strategies and implementation plans for organizations.
View course details in MyPlan: INFX 567

INFX 571 Research Seminar (1-4, max. 10)
Students work in teams under the supervision of individual faculty members to engage in research or design activities and learn through hands-on participation and study. Learning activities include data collection, data analysis, building prototypes, testing or evaluation, or dissemination activities.
View course details in MyPlan: INFX 571

INFX 572 Introduction to Data Science (4)
Introduces a broad, non-technical overview of key concepts, skills, and technologies used in "data science". Provides a high-level introduction to common data science pipelines, such as experimental design, data collection and storage, basic analytics, machine learning, and data visualization, focusing on analyzing in real-world datasets using industry standard statistical packages.
View course details in MyPlan: INFX 572

INFX 573 Data Science I: Theoretical Foundations (4)
Introduces technically focused theoretical foundations of "Data Science." Provides an overview of key concepts, focusing on foundational concepts such as exploratory data analysis and statistical inference. Assignments are data-intensive, and require significant programming and statistical analysis. Students are expected to have college-level statistics and programming experience (R and python preferred). Prerequisite: either Q METH 201, IMT 570, or equivalent college coursework; either CSE 142, INFX 501, or equivalent college coursework.
View course details in MyPlan: INFX 573

INFX 574 Data Science II: Machine Learning and Econometrics (4)
Provides theoretical and practical introduction to modern techniques for the analysis of large-scale, heterogeneous data. Covers key concepts in inferential statistics, supervised and unsupervised machine learning, and network analysis. Students will learn functional, procedural, and statistical programming techniques for working with real-world data. Prerequisite: INFX 573.
View course details in MyPlan: INFX 574
INFX 575 Data Science III: Scaling, Applications, and Ethics (4)
Focuses on utilizing advanced skills for analyzing and deriving insights from large-scale, heterogeneous data. Provides methods, tools, and frameworks for analyzing large-scale data, with topics including scaling and distributed computing, and network analysis. Special attention will be paid to ethical considerations in modern Data Science. Prerequisite: INFX 574.
[View course details in MyPlan: INFX 575]

INFX 576 Social Network Analysis (4)
Provide students with an understanding of the fundamental concepts, common methods, and analytical tools of social network analysis. Student will gain experience applying both exploratory and inferential methods to real-world problems within the social network domain.
[View course details in MyPlan: INFX 576]

INFX 583 Cross Cultural Approaches to Leadership (3)
Explores alternative leadership models as reflected in the literatures of multiple cultures. Examines ethical dimensions of leadership in the context of complex relationships among the peoples and agencies that comprise the global environment. Uses imagination in the application of cross cultural forms of leadership. Prerequisite: permission of instructor.
[View course details in MyPlan: INFX 583]

INFX 594 Degree Research Project (3)
Includes analysis, design, completion, documentation, and presentation of a faculty-defined individual or group research project demonstrating professional-level knowledge and skills. Meets culminating experience master's degree requirement. Prerequisite: completion of 30 credits and adviser approval of an MLIS degree plan or completion of 38 MSIM core credits. Credit/no-credit only.
[View course details in MyPlan: INFX 594]

INFX 595 Capstone I - Project Planning (2)
Analysis and preliminary design of an approved individual or group research or implementation project demonstrating professional-level knowledge and skills. Prerequisite: either completion of all MSIM core courses or completion of 30 credit hours and advisor approval of an MLIS degree plan. Credit/no-credit only.
[View course details in MyPlan: INFX 595]

INFX 596 Capstone II - Project Implementation (3)
Implementation of a project demonstrating professional-level knowledge and skills based on a project plan developed in INFX 595. Prerequisite: INFX 595. Credit/no-credit only.
[View course details in MyPlan: INFX 596]

INFX 597 Information Science Study Abroad (1-8, max. 18)
International seminar, led by Information School faculty or researchers. Addresses a specialized area of information studies. Topics vary. May require language proficiency.
[View course details in MyPlan: INFX 597]

INFX 598 Special Topics (1-4, max. 30)
Introduces innovation and specialized topics relating to the study of information in any context.
[View course details in MyPlan: INFX 598]
INSC 500 Faculty Seminar (2)
Presentations by faculty concerning research projects in which they are involved. Credit/no-credit only.
View course details in MyPlan: INSC 500

INSC 501 Theoretical Foundations for Information Science (3)
In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.
View course details in MyPlan: INSC 501

INSC 512 Community Analysis (4)
Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with LIS 512.
View course details in MyPlan: INSC 512

INSC 518 Seminar in Human Information Interaction (4)
Investigates conceptual frameworks, assumptions, analytical tools, concepts, models, and theories in human information interaction (HII). Topics may include theories of information behavior, information behavior in everyday life, social informatics, HII in organizations, or personal information management. Previous readings in HII preferred. Prerequisite: permission of instructor.
View course details in MyPlan: INSC 518

INSC 535 Classification Theory (3)
View course details in MyPlan: INSC 535
INSC 538 Seminar in Information Organization (4)
Seminar on information organization, focusing on any area of information organization, including classification theory, metadata, document theory, information organization in information systems; social and political aspects of classification, controlled vocabularies, and cataloging history.
View course details in MyPlan: INSC 538

INSC 541 HCI Design Foundations for Interactive Systems (4)
Develops knowledge and skills for design-based inquiry of interactive systems. Students practice user-centered design methods and study theories of human-computer interaction, including but not limited to: goal-based design and task analysis, scenario-based design, soft systems methodology, value sensitive design, universal design, and participatory design.
View course details in MyPlan: INSC 541

INSC 542 HCI Design Studio for Interactive Systems (4)
Develops knowledge and skills for design-based inquiry of interactive systems. Includes a quarter-long project using appropriate methods and iteratively engages research, design, prototyping, and evaluation activities. Opportunity to reflect upon practice and receive critical review of work throughout the quarter.
View course details in MyPlan: INSC 542

INSC 543 Value Sensitive Design (4)
Develops knowledge and skills to account for human values in design, development, and deployment of information systems. In-depth examination of value sensitive design theory, methods, and practice, including stakeholder project. Prerequisite: permission of instructor.
View course details in MyPlan: INSC 543

INSC 546 Assistive Technology and Inclusive Design (4)
Examines interactive technologies for users with alternative skills or in alternative contexts. Covers universal design, inclusive design, and assistive technologies. Addresses needs of users with physical limitations, children/elders, users in developing nations, and mobile users.
View course details in MyPlan: INSC 546

INSC 547 Collaborative and Social Computing (4)
Seminar on the design of collaborative and social computing systems. Introduces theories for analyzing collaborative on-line and face-to-face. Student apply a theoretical perspective through the design of a social or collaborative application. Application domains include blogging, tagging, on-line communities, social recommending, ubiquitous computing, and collaboration in domestic settings.
View course details in MyPlan: INSC 547

INSC 555 Information and Values (4, max. 12)
Explores value systems within a range of different social and technological environments.
View course details in MyPlan: INSC 555

INSC 557 Cultural and Ethnic Dimensions in Information Science (4)
Examines ethnic and cultural dimensions of information storage and transfer, knowledge creation and exchange, and information-related values in an increasingly global world. Readings from anthropology, cultural learning, cross-cultural communications, and ethnic traditions provide the basis for discussions about conducting research across culturally distinct communities. Prerequisite: permission of instructor.
View course details in MyPlan: INSC 557

INSC 561 PhD Colloquium on Professional Issue (1, max. 12)
Covers topics relating to the professional concerns of doctoral students and their future lives as academics and researchers. Credit/no-credit only.
View course details in MyPlan: INSC 561
INSC 565 Teaching Practicum I (3)
Doctoral student participation in teaching in a faculty-taught course. Credit/no-credit only.
View course details in MyPlan: INSC 565

INSC 566 Teaching Practicum II (3)
Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison. Prerequisite: INSC 565. Credit/no-credit only.
View course details in MyPlan: INSC 566

INSC 570 Research Design (4)
Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.
View course details in MyPlan: INSC 570

INSC 571 Quantitative Methods in Information Science (5)
Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.
View course details in MyPlan: INSC 571

INSC 572 Qualitative Methods in Information Science (5)
Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.
View course details in MyPlan: INSC 572

INSC 573 Design Inquiry and Methods in Information Science (5)
Acquire theory, methods, and skills for design-based inquiry, focusing on making artifacts - technical, informational, managerial, or organizational - and devising courses of action that enable people to mobilize. Students develop knowledge for design in Information Science through practical application of design methods and scholarly investigation of selected literatures.
View course details in MyPlan: INSC 573

INSC 575 Research Practicum I (3)
Students work with a researcher from the Information School as an active member of a research team. Credit/no-credit only.
View course details in MyPlan: INSC 575

INSC 576 Research Practicum II (3)
Students work with an approved researcher as an active member of a research team. Prerequisite: INSC 575 or permission of instructor. Credit/no-credit only.
View course details in MyPlan: INSC 576

INSC 578 Research Seminar (1-2, max. 15)
Research presentations on a wide variety of topics in information science. Credit/no-credit only.
View course details in MyPlan: INSC 578

INSC 579 Research Colloquium in Information Science (2, max. 30)
Research colloquium on various research topics in information science. Faculty, visitors, and students present current research. Prerequisite: permission of instructor. Credit/no-credit only.
View course details in MyPlan: INSC 579
INSC 581 Organizational Theories of Information Systems (4)
Surveys major strands of management of information systems research. Covers the behavioral, economic, strategic, and technical research perspectives of MIS research. View course details in MyPlan: INSC 581

INSC 586 Information Dynamics I (4)
Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with IMT 586. View course details in MyPlan: INSC 586

INSC 588 Enterprise Project Management in Information Organizations (4)
Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with IMT 588. View course details in MyPlan: INSC 588

INSC 598 Special Topics in Information Science (1-5, max. 12) View course details in MyPlan: INSC 598

INSC 599 Independent Study in Information Science (1-5, max. 15)
Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and Ph.D. program chair. View course details in MyPlan: INSC 599

INSC 600 Independent Study or Research (*)
Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee or graduate program adviser. Credit/no-credit only. View course details in MyPlan: INSC 600

INSC 800 Doctoral Dissertation (*)
Credit/no-credit only. View course details in MyPlan: INSC 800

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**ITA 340 Introduction to Web Publishing (3)**
Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and web site publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, online privacy and security, and eXtensible Markup Language (XML).
[View course details in MyPlan: ITA 340](#)

**ITA 341 Client-side Scripting and Design (3)**
Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.
[View course details in MyPlan: ITA 341](#)

**ITA 342 Introduction to SQL and Data Storage Technologies (3)**
Fundamentals of database design in a client-server architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database applications, and XML as a alternate database storage technology. Prerequisite: ITA 341
[View course details in MyPlan: ITA 342](#)

**ITA 343 Server-Side Programming and Web-data Integration (3)**
Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.
[View course details in MyPlan: ITA 343](#)
THE INFORMATION SCHOOL

THE INFORMATION SCHOOL

LIBRARY & INFORMATION SCIENCE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3)
Introduction to the Big6 TM Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation.
View course details in MyPlan: LIS 462

LIS 498 Special Topics (1-5, max. 15)
Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.
View course details in MyPlan: LIS 498

LIS 500 The Question of Information (2)
Provides an overview of the major questions, concepts, and challenges engaging library and information science through seminar discussion. Exploration of the social context in which these questions and challenges occur, and their implications for both research and practice. Credit/no-credit only.
View course details in MyPlan: LIS 500

LIS 501 History and Foundations of Libraries and Librarianship (3)
Introduces the history of libraries, major issues in contemporary library and information work, and types of libraries. Examines the role of libraries in society, the development of professional librarianship, and the role of librarians.
View course details in MyPlan: LIS 501

LIS 505 Archival and Manuscript Services (3)
Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.
View course details in MyPlan: LIS 505
LIS 507 Preservation and Conservation of Library Materials (3)
Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.
View course details in MyPlan: LIS 507

LIS 508 History of Recorded Information (4)
Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.
View course details in MyPlan: LIS 508

LIS 510 Information Behavior (3)
Introduction to the user-centered approach to information behavior. Theoretical foundations of need, creation, seeking, sharing, assessment, management, and use. Synthesis of information behavior studies, performance of information behavior field research, and application of the results of information behavior studies to design information systems, services, and policy.
View course details in MyPlan: LIS 510

LIS 512 Community Analysis (4)
Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with INSC 512.
View course details in MyPlan: LIS 512

LIS 516 Youth Development and Information Behavior in a Digital Age (3)
Introduction to major theories of human development from birth through age eighteen and application of these theories to examine youth's information behavior and digital media use at various developmental stages. Explores new research on the impact of digital media tools and practices on youth development. Prerequisite: either LIS 510 or permission of instructor.
View course details in MyPlan: LIS 516

LIS 520 Information Resources, Services, and Collections (4)
Concepts, processes, and skills related to information, including production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; and principles associated with development of recorded knowledge and collections.
View course details in MyPlan: LIS 520

LIS 521 Principles of Information Services (4)
Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques.
View course details in MyPlan: LIS 521

LIS 522 Collection Development (3)
Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.
View course details in MyPlan: LIS 522

LIS 524 Adult Reader Services in the Public Library (3)
Focuses on developing and performing readers' advisory services for contemporary adult fiction and non-fiction. Includes interpersonal and marketing skills necessary to promote reading including reading advocacy, readers' advisory interviewing, writing advisory annotations, presenting book talks, and conducting book discussion
LIS 525 Genres for Adult Readers (3)
Reviews characteristics of the most popular genres of fiction, including speculative fiction, mystery/thriller/suspense, romance, westerns, and graphic fiction/memoir. Helps to develop practice in book talking, preparing annotated booklists, and making reading suggestions to library users.
View course details in MyPlan: LIS 525

LIS 526 Government Publications (3)
Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public's right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no-credit only.
View course details in MyPlan: LIS 526

LIS 527 Business Information Resources (3)
Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources.
View course details in MyPlan: LIS 527

LIS 528 Health Sciences Information Needs, Resources, and Environment (3) S. FULLER
Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with BIME 570; Sp.
View course details in MyPlan: LIS 528

LIS 529 Digital Humanities Librarianship (3)
Investigates the intersections between content and technology in humanities librarianship with a focus on information problems and resources in the fields of philosophy, religion, the arts, language, and literature. Prerequisite: LIS 520
View course details in MyPlan: LIS 529

LIS 530 Organization of Information and Resources (4)
Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of metadata elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.
View course details in MyPlan: LIS 530

LIS 531 Catalogs, Cataloging, and Classification (4)
Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout. Prerequisite: LIS 530.
View course details in MyPlan: LIS 531

LIS 533 Advanced Cataloging and Classification (4)
In-depth theory and practice in library cataloging and classification. Includes introduction to cataloging materials in a variety of formats. Prerequisite: LIS 530, and LIS 531.
View course details in MyPlan: LIS 533

LIS 534 Indigenous Systems of Knowledge (3)
Conceptual foundations and comparative analysis of indigenous knowledge organization systems. Feasibility and use of contemporary knowledge organization mechanisms including thesauri and ontologies in expressing
LIS 535 Classification Theory (3)

LIS 547 Design Methods for Librarianship (4)
Focused on the human fabric of libraries - stakeholders, values, information technology, and policy - students develop theoretical knowledge and practical skills for design. Methods include futures workshops, scenarios, paper-prototyping, usability methods, among others. To conceptualize and steer design processes, the course includes an introduction to design methodologies and theory. View course details in MyPlan: LIS 547

LIS 550 Information and Society (3)
Covers concepts, processes, and issues related to the larger social context within which the life cycle of information and knowledge in society are investigated. Discussion topics include codes of ethics, professionalization, privacy, freedom of expression, intellectual property, social inequalities, and quality of life. View course details in MyPlan: LIS 550

LIS 551 Intellectual Freedom in Libraries (3)
Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no-credit only. View course details in MyPlan: LIS 551

LIS 560 Instructional and Training Strategies for Information Professionals (3)
Develops knowledge and skills in instruction while applying theories of information literacy, teaching, and learning to instruction in an information environment. Teaches students how to design, develop, and evaluate instructional programs for specific users. View course details in MyPlan: LIS 560

LIS 561 Storytelling in a Digital Age (3)
Instruction in the art and technique of oral and digital storytelling for all ages. Addresses both traditional and contemporary modes of storytelling, including transmedia. Sources include personal and family stories, folktales, and literary stories. Also explores non-library storytelling: therapeutic storytelling, organizational storytelling, and storytelling for qualitative research. View course details in MyPlan: LIS 561

LIS 564 Multicultural Resources for Youth (3)
Facilitates development of cross-cultural competence through authentic resources for children, tweens, and teens produced by or about ethnic minorities in the United States. "Issues" focus, providing knowledge in critical examination of various genres of multicultural resources as well as in strategies to use them. View course details in MyPlan: LIS 564

LIS 565 Resources for Digital Age Children (3)
Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for children, birth to age twelve. Applies theories form human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers'/users'/ advisory for children. Prerequisite: LIS 516. View course details in MyPlan: LIS 565
LIS 566 Resources for Digital Age Teens (3)
Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for teens. Applies theories form human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers'/users' advisory for teens. Prerequisite: LIS 516.
View course details in MyPlan: LIS 566

LIS 567 Libraries as Learning Labs in a Digital Age (3)
Application of theories and research on youth development to inform practice about programming and resources for youth. Create programs based on current research, including programming such as story times, book talks, and maker spaces. Prerequisite: LIS 516.
View course details in MyPlan: LIS 567

LIS 568 Information Literacy in a Digital Age (3)
Explores theories, process, and practical applications of information literacy. Examines the development of information literacy programs for libraries, community agencies, business, education, and other information settings. Explores the integral relationship between technology ad information literacy, and assessment and evaluation of programs. Prerequisite: LIS 560.
View course details in MyPlan: LIS 568

LIS 570 Research, Assessment, and Design (4)
Students recognize research and design opportunities, translate them into researchable frameworks, and conduct research in libraries and other information agencies. Covers problem definition, data collection and analysis, design and validation of alternative solutions, and reporting of results.
View course details in MyPlan: LIS 570

LIS 580 Management of Information Organizations (4)
Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently.
View course details in MyPlan: LIS 580

LIS 581 Marketing and Planning for Libraries (3)
Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed.
View course details in MyPlan: LIS 581

LIS 582 Community Engagement Strategies in Information Science (3)
Introduces students to strategies for building and sustaining relationships with community partners and other organizations to provide innovative services possible inside and outside of libraries. Students examine case studies, consider partner resources and needs, evaluate outcomes, and develop partner-based services in order to achieve community impact.
View course details in MyPlan: LIS 582

LIS 584 Knowledge Management (3)
Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems.
View course details in MyPlan: LIS 584

LIS 585 Administration Library Programs for Youth in a Digital Age (3)
Develops competency in administering library programs for children and youth in public and school libraries.
Management of information and technology literacy instruction, administration of reading advocacy, and information management and services. Acquiring organizing, and managing resources for access and use, and communicating programs to young users. Prerequisite: LIS 580.

View course details in MyPlan: LIS 585

LIS 586 Public Libraries and Advocacy (3)
Examine the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

View course details in MyPlan: LIS 586

LIS 587 Library Technology Systems (4)
Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities. Prerequisite: LIS 580.

View course details in MyPlan: LIS 587

LIS 588 Special Librarianship (3)
Seminar in the practice of special librarianship in business and commercial firms, government agencies, other non-profits, and the independent consultant sector. Emphasis on management of non-traditional information organizations and the targeted information role.

View course details in MyPlan: LIS 588

LIS 590 Directed Fieldwork (1-5, max. 10)
Minimum of 50 hours, maximum 250 hours of professional, supervised fieldwork in a library or professional information setting. Fieldwork is a one quarter experience, however, may be repeated in a different setting with a different set of learning objectives for a subsequent quarter. Prerequisite: LIS 510 or LIS 547, LIS 520, LIS 530, and LIS 570 Credit/no-credit only.

View course details in MyPlan: LIS 590

LIS 591 Legal Research I (3)

View course details in MyPlan: LIS 591

LIS 592 Legal Research Methods (3/4)
Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LAW A 599.

View course details in MyPlan: LIS 592

LIS 593 Selection and Processing of Law Library Materials (3)
Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

View course details in MyPlan: LIS 593

LIS 594 Law Library Administration (4)
Administration in law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Prerequisite: LIS 591 or permission of instructor. Credit/no-credit only.

View course details in MyPlan: LIS 594
LIS 595 Current Issues in Law Librarianship ([1-4]-, max. 5)
From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Prerequisite: law librarianship majors or permission of instructor. Credit/no-credit only.
View course details in MyPlan: LIS 595

LIS 596 Professional Portfolio (3)
Preparation and presentation of reflective working and presentation portfolios representing the student's goals, achievements, knowledge and skills, experience, and professional objectives. Development of plans for ongoing professional development. Prerequisite: completion of 30 credit hours and adviser approval of MLIS degree plan. Credit/no-credit only.
View course details in MyPlan: LIS 596

LIS 598 Special Topics in Information and Library Science (1-6, max. 18)
Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.
View course details in MyPlan: LIS 598

LIS 600 Independent Study or Research (*-)
Credit/no-credit only.
View course details in MyPlan: LIS 600
Interdisciplinary Graduate Degree Programs

These programs are administered by interdisciplinary groups of the Graduate School. Certain courses carrying the particular program prefix appear below; other courses with the same prefix appear elsewhere as indicated. Other courses included in these programs are selected from many disciplines throughout the University and carry the prefix of the respective discipline.
Astrobiology

**Program Overview**

C319 Physics-Astronomy Building

Astrobiology -- the study of life in the universe -- investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond. Such investigation demands intense interdisciplinarity, for which the astrobiology program at the University of Washington is creating a new community of scholars, investigators, and educators -- a community skilled in multidisciplinary methods and thinking that pushes boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous methodology.

Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.

The internationally recognized graduate certificate program offers a rigorous, interdisciplinary curriculum in cooperation with the PhD programs of participating departments. The program's unique features bond students and faculty from widely disparate departments. Participating graduate students gain the personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

The emerging field of astrobiology benefits from and is shaped by the perspectives of multiple disciplines directed at a common problem. It benefits also from the breadth of perspective offered by diversity in culture and race among the program's participants.

**Graduate Program**

Graduate Program Coordinator
C304 Physics-Astronomy, Box 351580
(206) 685-2392
office@astro.washington.edu

**Graduate Certificate Program**

**Admission Requirements**

UW academic departments participating in the graduate certificate program in astrobiology provide expertise in the following primary collaborating disciplines:

- Aeronautics and Astronautics
Students wishing to participate in the astrobiology graduate certificate program must be accepted for admission by the PhD program of one of these departments. Contact the appropriate participating department for PhD program application requirements and deadlines.

**Certificate Requirements**

15 credits minimum, to include:

1. ASTBIO 501, ASTBIO 502
2. Three astrobiology-only seminar series (1 credit)
3. One cognate course approved by the student's advisory committee to ensure sufficient breadth (see program website for current list of cognate courses)
4. One quarter of a research rotation in an area outside the student's home discipline (3 to 10 credits)
5. Participation in a minimum of three workshops comprising the capstone experience (non-credit)
6. Astrobiology ethics seminar (variable credits)

Additional credits may be earned through:

- Other approved cognate courses
- Astrobiology public lecture series (1 credit)

Successful completion of the certificate requires a minimum cumulative 3.00 GPA for all required courses and a minimum 2.7 grade for each elective course.
COLLEGE OF ARTS & SCIENCES
ASTROBIOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

ASTBIO 115 Astrobiology: Life in the Universe (5) NW R. BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN
Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors.
Offered: jointly with ASTR 115/BIOL 114/ESS 115/OCEAN 115.
View course details in MyPlan: ASTBIO 115

ASTBIO 501 Astrobiology Disciplines (4) R. BUICK, D. CATLING, V. MEADOWS
Review of research and subject matter relevant to astrobiology from within the disciplines of biology, astronomy, oceanography, atmospheric science, chemistry, planetary science, and geology. Offered: A, even years.
View course details in MyPlan: ASTBIO 501

ASTBIO 502 Astrobiology Topics (4) R. BUICK, D. CATLING, V. MEADOWS
Investigation in detail of research topics of current interest. Offered: A, odd years.
View course details in MyPlan: ASTBIO 502

ASTBIO 550 Professional Development for Astrobiology (2)
Seminar in preparation for the academic job market; writing and reviewing grant proposals; building and managing interdisciplinary research teams; understanding the multiple career paths available in astrobiology; interdisciplinary teaching; and professional ethics. Credit/no-credit only. Offered: W, odd years.
View course details in MyPlan: ASTBIO 550

ASTBIO 575 Seminar in Astrobiology (1, max. 10)
Discussion of recent research in astrobiology. Credit/no-credit only. Offered: W, even years.
View course details in MyPlan: ASTBIO 575

ASTBIO 576 Astrobiology Colloquium (1, max. 15)
Current research topics in astrobiology. Credit/no-credit only. Offered: ASp.
View course details in MyPlan: ASTBIO 576
ASTBIO 600 Independent Study or Research (*)
Study or research under the supervision of individual faculty members.
View course details in MyPlan: ASTBIO 600
Biomolecular Structure and Design

N107 Foege, Box 355061

Display as tabs

The department's graduate program is directed toward the education of doctoral students who anticipate careers that involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical sub-disciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

Graduate Program

Graduate Program Coordinator
G514 Health Sciences, Box 357420
206-543-5474

Master of Science

Admission Requirements

1. Minimum 3.00 GPA
2. A bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
3. GRE
4. Minimal course requirements for successful applicants:
   a. Chemistry: general, organic, and physical
   b. Physics: one year
   c. Mathematics: one year of calculus; multivariable calculus and/or linear algebra are strongly recommended
   d. Biology and/or biochemistry: one year general biology plus one advanced course in biology or biochemistry
5. Undergraduate research experience strongly recommended.
6. International students must have a minimum score on one test as follows: 7.0 IELTS; 92 TOEFL iBT; 237 TOEFLC; 580 TOEFL; 90 MLT.
7. International students hoping to study with BMSD faculty in the Chemistry Department must have a minimum score on one test as follows: 26 on the speaking portion of the TOEFL iBT; 7.0 on the speaking portion of the IELTS; 70 on the Versant English Test; 55 on the TSE; 230 on the SPEAK test administered at the UW.

**Degree Requirements**

36 credits, to include:

1. *Required courses*: BIOC 530; BMSD 540, BMSD 541, BMSD 542; BMSD 520 to be taken every quarter

2. 12 graded credits of elective courses covering at least three of the four BMSD categories of topics: biomolecular structure, techniques in biomolecular structure, molecular and cellular biology, and chemistry

3. At least one sequence of Biomedical Research Integrity workshops in the first or second year of the program. The Biomedical Research Integrity (BRI) series is a sequence of lectures and workshops offered during summer quarter each year.

4. *Teaching*: In order to gain practical teaching experience, students in the program serve as teaching assistants for two quarters.

5. *Research*: Students rotate through a minimum of two and a maximum of three participating laboratories during their first year. The opportunity exists for students to do an early rotation during summer quarter.
INTERDISCIPLINARY GRADUATE PROGRAMS
BIOLOGICAL PHYSICS, STRUCTURE AND DESIGN

BIOLOGICAL PHYSICS, STRUCTURE, & DESIGN

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

BPSD 520 Research Seminar (1, max. 9)
Group conferences on graduate student research. Prerequisite: BPSD graduate student or permission of instructor.
View course details in MyPlan: BPSD 520

BPSD 540 Literature Review (2) D. VEESLER
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: jointly with BIOC 540; A.
View course details in MyPlan: BPSD 540

BPSD 541 Literature Review in Biomolecular Structure and Design (2)
Emphasizes critical evaluation of original articles in literature from all fields relevant to biological physics, structure, and design. Emphasizes scientific writing and oral presentations. Prerequisite: first year BPSD student or permission of instructor. Offered: W.
View course details in MyPlan: BPSD 541

BPSD 542 Literature Review in Biomolecular Structure and Design (2)
Emphasizes critical evaluation of original articles in literature from all fields relevant to biological physics, structure, and design. Emphasizes scientific writing and oral presentations. Prerequisite: first year BPSD student or permission of instructor. Offered: W.
View course details in MyPlan: BPSD 542

BPSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24)
Students work with one of the research groups within the Biological Physics, Structure and Design program. Minimum two rotations must be in a different laboratory. Prerequisite: BPSD student or permission of instructor.
Offered: AWSpS.
View course details in MyPlan: BPSD 599

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
Biology Teaching

Program Overview

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in science for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes broadening the student's understanding of the various fields of biological science, with the improvement of the student's effectiveness as a teacher as the primary goal. Opportunities for coursework within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

Graduate Program

Graduate Program Coordinator
222 Hitchcock, Box 355320
(206) 543-1689

Master of Science

Admission Requirements

1. Secondary teaching certificate or evidence of professional involvement in K-12 or public education
2. Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
3. Minimum 3.00 GPA in the most recent 90 graded quarter credits (60 semester credits)
4. Graduate Record Examination test scores
5. Two or three letters of recommendation
6. Statement of professional experience and objectives

Degree Requirements

36 credits, to include:
1. Minimum 18 credits at the graduate level: minimum 18 must be graded. These categories are not mutually exclusive.

2. All coursework must be at or above the 400 level.

3. Each student plans a program to meet his or her own educational objectives, selecting at least one course from each of the following areas: botany, genetics, microbiology, zoology, and from the College of Education. One course in biochemistry is also required unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, etc. may be appropriate for the student's interests. The Graduate Program Coordinator assists the student in this planning.
INTERDISCIPLINARY GRADUATE PROGRAMS
INTERDISCIPLINARY DATA SCIENCE GROUP
DATA SCIENCE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

DATA 501 Data Science Visualization Lab (1)
The Data Science Visualization Lab class will provide students additional opportunities to practice and discuss data visualization concepts, with additional emphasis on user-centered design approaches and software development. Students will work in small groups on structured data visualization exercises and UCD methods, and implement simple visualizations.
View course details in MyPlan: DATA 501

DATA 512 Human-Centered Data Science (5)
Fundamental principles of data science and its human implications. Data ethics, data privacy, differential privacy, algorithmic bias, legal frameworks and intellectual property, provenance and reproducibility, data curation and preservation, user experience design and usability testing for big data, ethics of crowdwork, data communication and societal impacts of data science.
View course details in MyPlan: DATA 512

DATA 514 Data Management for Data Science (5)
Introduces database management systems and techniques that use such systems; data models, query languages, database tuning and optimization, data warehousing, and parallel processing. Intended for professional students and non-CSE-majors.
View course details in MyPlan: DATA 514

DATA 515 Software Design for Data Science (5)
Introduces software design and engineering practices and concepts, including version control, testing, and automatic build management. Intended for professional students and non-CSE-majors. Prerequisite: CSE D/DATA 514 or permission of instructor. Offered: jointly with CSE D 515; Sp.
View course details in MyPlan: DATA 515

DATA 516 Scalable Data Systems and Algorithms (5)
Principles and algorithms for data management and analysis at scale. Designs of traditional and modern big data systems and how to use those systems. Basics of cloud computing. Prerequisite: CSE D/DATA 514 and CSE
DATA 515 or permission of instructor. Offered: jointly with CSE D 516; A.
View course details in MyPlan: DATA 516

DATA 556 Introduction to Statistics and Probability (5)
Overview of probability; conditional probability and independence; Bayes Theorem; discrete and continuous random variables including jointly distributed; key distributions including the normal and its spin offs; properties of expectation and variance; conditional expectation; covariance and correlation; Central Limit Theorem; law of large numbers; Parameter Estimation. Offered: jointly with BIOST 556/STAT 556; A.
View course details in MyPlan: DATA 556

DATA 557 Applied Statistics and Experimental Design (5)
Inferential statistical methods for discrete and continuous random variables including tests for difference in means and proportions; linear and logistic regression; causation versus correlation; confounding; resampling methods; study design. Prerequisite: STAT/BIOST/DATA 556 or instructor's permission. Offered: jointly with BIOST 557/STAT 557; W.
View course details in MyPlan: DATA 557

DATA 558 Statistical Machine Learning for Data Scientists (5)
Bias-variance trade-off; training versus test error; overfitting; cross-validation; subset selection methods; regularized approaches for linear/logistic regression: ridge and lasso; non-parametric regression: trees, bagging, random forests; local regression and splines; generalized additive models; support vector machines; k-means and hierarchical clustering; principal components analysis. Prerequisite: STAT/BIOST/DATA 557, or permission of instructor. Offered: jointly with BIOST 558/STAT 558; Sp.
View course details in MyPlan: DATA 558

DATA 590 Data Science Capstone I- Project Preparation (2)
Part one of a two-course capstone sequence where students organize project teams, select project topics, write a project proposal and begin preparing project data sets.
View course details in MyPlan: DATA 590

DATA 591 Data Science Capstone II- Project Implementation (3)
Part two of a two-course capstone sequence designed to build upon the student driven project from DATA 590. Students will synthesize and apply knowledge and techniques acquired throughout the MSDS program in working with large data sets, deriving insights from data and sharing insights with other people. Prerequisite: DATA 590
View course details in MyPlan: DATA 591

http://www.washington.edu/students/crsCat/data.html
Environmental Management

Display as tabs

Program Overview

274 Mary Gates Hall

The graduate certificate in Environmental Management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a culminating two-quarter-long keystone project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. Keystone projects provide a unique opportunity for graduate students to gain practical experience working in an interdisciplinary team with students from a variety of disciplines, a faculty mentor, and in collaboration with a community partner. The EM program provides education and training opportunities for a diverse array of graduate students preparing for management careers in the non-profit, for-profit, and public sectors, as well as for those who contribute legal, scientific, and technical expertise to environmental decision making locally, nationally, and internationally. Key benefits of the program include:

- Broadening knowledge, perspectives, and skills beyond the academic home discipline through core courses, keystone projects, and participation in a community of faculty and students from various departments that share the common goal of environmental stewardship and sustainability.

- Gaining practical experience crafting interdisciplinary solutions to real-world environmental issues and making connections with community partners outside the University.

- Receiving a printed certificate and record on the transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few. There is no other comparable interdisciplinary educational experience currently available to graduate students at the University of Washington.

Graduate Program

Graduate Program Coordinator
274 Mary Gates Hall
Box 352802
(206) 221-6129
envirmgt@uw.edu
Admission Requirements

1. Enrollment in a graduate and professional degree program in any school of the University of Washington

2. Completion of a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); or social or natural science

3. Facility with written argument and communication. This skill is demonstrated in the letter of application

The program is governed by the steering committee for Environmental Management.

The certificate's courses and projects prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

Certificate Requirements

Minimum 20 credits, to include:

1. Three core courses (9+ credits); courses vary by year

2. Team-based keystone project (8 credits): ENVIR 511, ENVIR 512

3. Electives (3+ credits): selected in consultation with the Graduate Program Coordinator and approved by the EM director

Always display text without tabs
INTERDISCIPLINARY GRADUATE PROGRAMS

GRADUATE SCHOOL

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

GRDSCH 200 Preparing for Graduate Education (2)
Explores graduate education and its structure and organization. Students use interactive assignments, individual reflective work, and professional portfolio development to explore their preparation for graduate education, and develop strategies for pursuing graduate school. Credit/no-credit only.

View course details in MyPlan: GRDSCH 200

GRDSCH 501 TA/RA Preparation (1)
A hybrid course (in-person at the TA/RA Conference in September and online during Autumn Quarter) to support graduate students in their work as TAs and RAs. Students will gain post-conference support, opportunities to connect with other students, and strategies and resources for their teaching and research roles. Credit/no-credit only.

View course details in MyPlan: GRDSCH 501

GRDSCH 515 Teaching and Learning in Higher Education: Frameworks and Practices (2)
Designed for graduate students seeking to build knowledge and skills in effective teaching practices as a teaching assistant or independent instructor. Students will be introduced to fundamental pedagogical frameworks and practices applicable across the disciplines in: Course design, assessment, active learning strategies, teaching inclusively, and using technology effectively in teaching. Credit/no-credit only.

View course details in MyPlan: GRDSCH 515

GRDSCH 525 Interactive Theater as Pedagogy (3)
Builds skills in social change interactive theater to challenge institutional oppression, advance community dialogue, and promote inclusive educational environments. Emphasizes political education; storytelling; collaborative playwriting; rehearsal of plays and interventions; discussion; and self-reflection. Culminates in student-organized, public interactive theater performance and dialogue workshops. No previous acting experience required.

View course details in MyPlan: GRDSCH 525

GRDSCH 540 Hybrid Pedagogies: Using Technology in Teaching (2) C. CHANCELLOR, K. MALCOLM
Students explore pedagogies and practices using technologies for promoting student learning through active engagement; designing and assessing online assignments; and teaching inclusively. Through a blend of face-to-face and online class meetings, students will experience and reflect on models of hybrid teaching. Credit/no-
GRDSCH 550 Teaching in Global Classrooms: Strategies for Teaching International and Multilingual Students (1)
Explores teaching and learning opportunities created by the increasing enrollment of international and multilingual students in U.S. universities. Focuses on evidence-based teaching practices that leverage the diverse linguistic and cultural assets of global classrooms to enrich learning for all students. Credit/no-credit only.

GRDSCH 595 Teaching and Learning in Higher Education: From Campus to Career (2)
Focuses on the development of teaching materials for academic job searches. Centers on developing engaging and comprehensive written materials that dovetail with research materials. Includes online group work, peer review, and mock interviews. Recommended for advanced graduate students, year 3 or beyond. Credit/no-credit only.

GRDSCH 610 Teaching Mentorship (3, max. 6)
Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student's ability to make innovative contributions in teaching. Prerequisite: permission of faculty member, graduate program coordinator, and the Associate Dean of the Graduate School. Credit/no-credit only.

GRDSCH 615 Teaching Assistant and Research Assistant Preparation (1-6, max. 6)
Instruction and teaching, learning, research, and resources for teaching and research assistants. Credit/no-credit only.

GRDSCH 620 Teaching Mentorship Seminar (2)
Credit/no-credit only.

GRDSCH 630 Special Topics in College/University Teaching (2, max. 6)
Interdisciplinary discussion of topics related to college/university teaching, with an emphasis on innovative teaching and preparing for faculty careers. Designed to address topics across disciplines, as a complement to discipline-specific courses offered in departments. Credit/no-credit only.

GRDSCH 640 Seminar on Topics of Diversity and Justice (1)
Interdisciplinary course which engages students as co-creators of a learning environment. Through guest presentations, facilitated discussions, small group work, and other dynamic learning, students gain critical understanding of privilege based on intersecting identities and its use. Also, students will gain skills to work across differences to address oppression. Credit/no-credit only.
The graduate program in Health Services Administration offers two tracks for earning a Master of Health Administration (MHA) degree: a traditional day program (MHA) and an executive program (EMHA).

Accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), the MHA provides the educational foundation for careers in management, planning, consulting, and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the healthcare field.

Interdisciplinary by design and innovative in its approach to curriculum delivery, the program develops leaders prepared strategically and effectively to transform healthcare organizations and systems at the local, regional, and national level. The MHA program’s interdisciplinary priority is evidenced by faculty that has been assembled from the graduate schools of Public Health, Foster School of Business, Public Affairs, Nursing, Medicine, and Law, as well as from the community of healthcare administration leaders in the Seattle metropolitan area.

Concurrent degree programs combining health administration with business, medicine, law, public health, or public administration are also an option for in-residence students. Many concurrent programs can be completed in three years of intensive academic study.

For in-residence MHA students, the two-year academic experience is augmented by a career development program with opportunities for mentorships with regional healthcare leaders, an internship experience in a health facility or agency – typically under the preceptorship of the administrator or director of that organization.

The Executive Master of Health Administration (EMHA) is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services managers, who have demonstrated interest or competency in administration or management. Best-practice healthcare is a team process, and the team-based learning model, especially emphasized in year one, positions students for leadership roles within such an environment. Executive students build critical competencies while benefiting from the broad expertise already held among the working professionals in the classroom. EMHA classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 24 months. Additionally, once each week faculty lead students in a web-based session.
ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

Both the MHA and EMHA programs operate under a fee-based structure and are administered in collaboration with UW Professional & Continuing Education. Complete application details can be viewed at www.mha.uw.edu and www.executivemha.edu.

Financial Aid

Students enrolled in both the MHA and EMHA programs are eligible for federal financial aid, as well as most other types of financial support that are not funded by state tuition revenues. When exploring financial aid options, students should emphasize they are applying for a fee-based program. Financial aid questions should be directed to the UW Office of Student Financial Aid (206) 543-6101, osfa@uw.edu.
INTERDISCIPLINARY GRADUATE PROGRAMS
DESIGN USE BUILD
HUMAN-COMPUTER INTERACTION DESIGN

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

HCID 510 Designing Interactive Systems (3)
Covers issues relating to the design and interactive technologies, favoring design thinking in lieu of implementation concerns. Skills include design processes, design rationale, adductive reasoning, structured brainstorming, design techniques, and design critiques.
View course details in MyPlan: HCID 510

HCID 511 Ideation Studio (5)
Introduces student to ideation: the systematic process of generating design ideas, developing idea variations, and identifying ideas that open promising design directions; with hands-on exercises that give students the skills to participate in and lead ideation processes on their own.
View course details in MyPlan: HCID 511

HCID 520 User Interface Software and Technology (3)
Covers fundamental skills in user interface prototyping and implementation, including tools for low and high fidelity prototyping, software architectures for implementing graphical user interfaces on desktop and mobile platforms, and the toolkits that use these software architectures.
View course details in MyPlan: HCID 520

HCID 521 Prototyping Studio (5)
Examines user-interface prototyping as a foundational skill in user-centered design. Introduces the tools and uses hands-on exercises to enable students to create and refine user-interface prototypes as part of a design process.
View course details in MyPlan: HCID 521

HCID 530 Usability and User Research (3)
Teaches concepts on engaging with users in the context of a technology design project. Covers both empirical and analytic evaluation techniques. Methods include user interviewing, in-lab usability testing, field deployments, heuristic evaluation, and cognitive walkthrough.
View course details in MyPlan: HCID 530
**HCID 531 Evaluation Studio (5)**
Teaches concepts related to conducting user research and usability evaluations. Introduces students to the methods and hands-on exercises that will enable them to determine user needs and usability and acceptability of interactive system designs.
[View course details in MyPlan: HCID 531](http://www.washington.edu/students/crsctl/hcid.html)

**HCID 540 Capstone Planning (1)**
Students conduct initial research on topic themes, learn to form effective project teams, and identify appropriate industry sponsors, delivering formal project proposals. HCID students only. Offered: W.
[View course details in MyPlan: HCID 540](http://www.washington.edu/students/crsctl/hcid.html)

**HCID 541 Capstone Studio (8)**
Team-based capstone design an interactive product relevant to industry challenges. Students apply iterative design, prototyping and research techniques in an studio format, with peer, faculty, and industry sponsor reviews of deliverables, culminating in a portfolio presentation documenting process and final solutions. Studio content supplemented by demonstrations and guest lecturers.
[View course details in MyPlan: HCID 541](http://www.washington.edu/students/crsctl/hcid.html)

**HCID 590 Design, Use, Build Seminar (1, max. 10)**
Covers the latest research in human-computer interaction and design, through talks by both UW and outside researchers. Credit/no-credit only. Offered: AWSpS.
[View course details in MyPlan: HCID 590](http://www.washington.edu/students/crsctl/hcid.html)

**HCID 598 Special Topics (1-5, max. 6)**
Studies of emerging areas and specialized topics in human-computer interaction and design.
[View course details in MyPlan: HCID 598](http://www.washington.edu/students/crsctl/hcid.html)

**HCID 599 Special Projects (1-5, max. 6)**
Individual graduate projects in human-computer interaction and design.

Molecular and Cellular Biology

The Molecular and Cellular Biology program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Twelve departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genome Sciences, Immunology, Microbiology, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics.

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of basic sciences and molecular medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.

Recently the MCB Program has established relationships with the Institute for Systems Biology (ISB) as well as Seattle Biomed. These collaborations allow MCB students access to labs conducting research using a systems approach to biology or a global focus on infectious disease.

Faculty Interests

Over 250 faculty members from the UW, the FHCRC, the ISB, and Seattle Biomed are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests are categorized into eight areas of interest: cancer biology; genetics: genomics and evolution; microbiology, infection and immunity; molecular structure and computational biology; and neuroscience.

Graduate Program

Graduate Program Coordinator
T466 Health Sciences, Box 357275
(206) 543-0253
mcb@uw.edu
Doctor of Philosophy

Admission Requirements

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.

2. GRE scores. General Test. A Subject Test (e.g., biology, biochemistry, chemistry) is not required but recommended.

3. Letters of recommendation

4. Statement of purpose

5. Personal resume

Degree Requirements

90 credits, including:

1. Credit Requirements: MCB students complete 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. M.S.T.P. students receiving a Ph.D. through the MCB Program are required to have 18 graded credits, and should petition the MCB directors to accept medical school courses in lieu of the remaining 3 credits.

2. First Year: Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review and one or more graded elective classes. Following the third rotation, students generally choose a permanent adviser in whose lab they pursue research for the rest of their educational career, generally three to four years. During the summer, students complete the biomedical research integrity lecture series.

3. Second Year: Students form their doctoral Supervisory Committee by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for a minimum of one quarter, complete either a second academic teaching assistantship or an alternative education experience, and hold their first committee meeting.

4. Third Year and Beyond: By the end of spring quarter of the third year, the student completes the general examination and is conferred official Ph.D. candidacy by the Graduate School. The student then focuses on the dissertation research and continues to meet with the Supervisory Committee each spring quarter to report on research progress and plans for the coming year. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of the final examination and acceptance of the completed dissertation by the Graduate School, a student is conferred the degree of Doctor of Philosophy.

Financial Aid

The MCB Program provides a stipend plus tuition and health benefits for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

INTERDISCIPLINARY GRADUATE PROGRAMS
MOLECULAR & CELLULAR BIOLOGY
MOLECULAR AND CELLULAR BIOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

MCB 511 Cell Cycle Control (3) Breeden, Roberts, Edgar
Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, Drosophila, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.
View course details in MyPlan: MCB 511

MCB 512 Scientific Speaking Seminar (1.5) Biggins, Peichel
Teaches how to effectively give a scientific seminar about research. Offered: jointly with CONJ 512; W.
View course details in MyPlan: MCB 512

MCB 513 Development Journal Seminar (1, max. 12) Moens, Soriano, Swalla
Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.
View course details in MyPlan: MCB 513

MCB 514 Molecular and Cellular Biology Literature Review (2) Raible
Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology program.
View course details in MyPlan: MCB 514

MCB 515 Molecular and Cellular Biology Literature Review (2) Emerman
Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.
View course details in MyPlan: MCB 515

MCB 516 Molecular and Cellular Biology Literature Review (2) Emerman
Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in
the Molecular and Cellular Biology Program. Offered: S.
View course details in MyPlan: MCB 516

MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 40)
Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.
View course details in MyPlan: MCB 517

MCB 519 Topics in Cancer (1, max. 6)
Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no-credit only.
View course details in MyPlan: MCB 519

MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 40) M. EMERMAN
Special topics reading and discussion. Offered: A.
View course details in MyPlan: MCB 520

MCB 522 Development I: The Developmental Basis of Human Disease (3) Moens
Uses recent discoveries in human genetics to guide student learning about animal development. Explores the normal developmental function of genes that have been identified as causal in human developmental disorders such as skeletal dysmorphologies, ciliopathies, autism, and cancer. Offered: A, odd years.
View course details in MyPlan: MCB 522

MCB 529 Cell Migration (1.5) Cooper, Moens
Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with CONJ 529; W.
View course details in MyPlan: MCB 529

MCB 532 Human Pathogenic Viruses (3) Emerman
Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lecturers focus on viral immunology, measles, herpes simplex virus, and HHV-8. Offered: A.
View course details in MyPlan: MCB 532

MCB 533 Evolutionary Genetics and Genomics (3) Malik, Peichel
Introduces classic concepts and approaches in evolutionary genetics. Familiarizes students with genomic approaches, tools and resources, and demonstrates how evolutionary approaches and modern genomic tools are brought to bear on important biological questions. Offered: A.
View course details in MyPlan: MCB 533

MCB 539 Biological Basis of Neoplasia (3) Kemp, Zarbl
Introduces the major themes in research in the biology of neoplastic change. Covers principle molecular mechanisms responsible for tumor initiation and progression, with a specific emphasis on intracellular signaling, DNA repair, cell cycle checkpoints, and loss of normal tissue homeostasis. Offered: Sp.
View course details in MyPlan: MCB 539

MCB 540 Nucleic Acid Enzymes (1.5) Stoddard
Surveys a wide variety of enzymatic process that control the structure and modification of DNA and RNA, with particular focus on structure, function and mechanism. Unifying features of major reaction types (such as
phosphoryl transfers and base modifications) constitute core material. Offered: W.
View course details in MyPlan: MCB 540

**MCB 543 Logic Constructs and Methodologies of Biological Research** (3)
Explores the logic and methods of general scientific practice, form historical, logical, and practical points of view. Covers philosophical and methodological matters upon which there is consensus, and cutting issues of ongoing controversy. Includes both theoretical and practical application of scientific method.
View course details in MyPlan: MCB 543

**MCB 560 Biotechnology Externship** (2-12, max. 12)
Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy.
Instructors: Moon Offered: AWSpS.
View course details in MyPlan: MCB 560

**MCB 580 Teaching Practicum in Molecular and Cellular Biology** (2, max. 4)
Supervised training in the teaching of molecular and cellular biology. Prerequisite: permission of instructor.
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MCB 580

**MCB 599 Research in Molecular and Cellular Biology** (*, max. 40)
The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no-credit only.
Offered: AWSpS.
View course details in MyPlan: MCB 599

INTERDISCIPLINARY GRADUATE PROGRAMS
MOLECULAR ENGINEERING AND SCIENCES
MOLECULAR ENGINEERING

Detailed course offerings (Time Schedule) are available for

- **Spring Quarter 2017**
- **Summer Quarter 2017**
- **Autumn Quarter 2017**

**MOLENG 510 Molecular Engineering Principles (3)**
Covers molecular aspects of condensed organic materials, particularly molecular and collective interactions and resulting interfacial forces, entropic phenomena and condensation to systems of higher complexity. Includes the exploration of molecular system constraints and the molecular origin of resulting macroscale properties. Provides introduction into computer modeling.
View course details in MyPlan: MOLENG 510

**MOLENG 515 Advanced Molecular Bioengineering (4) P. STAYTON**
Covers fundamentals of molecular recognition and design: thermodynamics, dynamics, and kinetics. Includes molecular design of macromolecules, recognition processes for current molecular engineering applications in biomedicine, and therapeutics based on cells. Offered: jointly with BIOEN 557; A.
View course details in MyPlan: MOLENG 515

**MOLENG 520 Seminar in Molecular Engineering (1, max. 30)**
Weekly seminars on current topics in molecular Engineering. Credit/no-credit only. Offered: jointly with CHEM 597; AWSp.
View course details in MyPlan: MOLENG 520

**MOLENG 525 Introduction to Synthetic Biology (3)**
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/CSE 586/E E 523.
View course details in MyPlan: MOLENG 525

**MOLENG 530 Organic Electronic and Photonic Materials/Polymers (3)**
Physical and material concepts determining properties of organic electronic and photonic materials. Discusses electronic structure, physico-chemical characterization, and device application. Includes introduction of electronic band structure of polymers, electrically conducting polymers; organic nonlinear optical
moleng 530 electroluminescent materials; polymer optical fibers; tow-photon absorption materials for 3-D microfabrication. Offered: jointly with CHEM 564/MSE 560; W.
View course details in MyPlan: MOLENG 530

MOLENG 567 Micro- and Nanostructured Biosensors (3)
Focuses on biosensors based on micromachining and nanotechnology. The working principles on molecular detection and analysis are introduced with the fabrication process, system integration and evaluation. Helps students to classify biosensors detecting molecules, design the fabrication process and identify the evaluation methods. Offered: jointly with M E 567; W.
View course details in MyPlan: MOLENG 567

MOLENG 599 Current Topics in Molecular Engineering (1-5, max. 30) M. SARIKAYA
Readings, lectures, and discussions on topics of current interest in the field of molecular engineering. Offered: AWSpS.
View course details in MyPlan: MOLENG 599

MOLENG 600 Independent Study/Research (*)
Study and research under the supervision of an affiliated faculty member.
View course details in MyPlan: MOLENG 600

MOLENG 800 Doctoral Dissertation (*)
Study and research under the supervision of an affiliated faculty member.
View course details in MyPlan: MOLENG 800
Museology

Graduate Program

The museology graduate program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Coursework is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums, and internships.

Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection, and the University Libraries. The Burke Museum acts as host of the museology program. Located on the campus of the University of Washington, the Burke Museum is Washington state's natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

Graduate Program Coordinator
Burke Museum, Box 353010
(206) 616-8280

Master of Arts

Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date are reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

Degree Requirements

Minimum 36 credits

The museology graduate program takes two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and
15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll part time with permission from the program director

1. Minimum 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of coursework numbered 500 or above, including a thesis or thesis project

2. Minimum three quarters of full-time residence credit or part-time equivalent

3. Reading competence in one foreign language, if required by the student's supervisory committee because of the student's area of specialization

4. Internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student's thesis or thesis project

5. Thesis proposal presented by the beginning of the fourth quarter of study

6. Oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project

7. All degree requirements completed within six years.

The following courses are required of all students unless exempted by petition to the program coordinating committee or credited for relevant coursework completed at other universities: MUSEUM 580, MUSEUM 581; MUSEUM 583 or MUSEUM 584 or MUSEUM 585; MUSEUM 582, MUSEUM 598, MUSEUM 590, MUSEUM 593, MUSEUM 594, MUSEUM 595; MUSEUM 700 or MUSEUM 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The museology program also offers a graduate certificate in museum studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of key courses in areas that emphasize either collection research and management, or museum administration and interpretation, to include hands-on work experience. Information and application materials for the certificate can be obtained from the museology program office.
INTERDISCIPLINARY GRADUATE PROGRAMS

MUSEOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

MUSEUM 500 Introduction to Museology (5)
Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics.
View course details in MyPlan: MUSEUM 500

MUSEUM 520 Learning in Museums (3)
Explore a range of learning theories and frameworks and their implications for museum practice. The course is organized around three key questions: What is learning What do we know about learning in museums, specifically? How do we design for learning in museums?
View course details in MyPlan: MUSEUM 520

MUSEUM 524 Seminar in Museum Exhibition (5)
Theory, methodology, and fundamental principles of museum exhibition process. Exhibition elements include planning, conceptual development, interpretation, design, production, installation, evaluation, and community impact of museum exhibitions. Application of exhibition principles through term exhibit project.
View course details in MyPlan: MUSEUM 524

MUSEUM 528 Advocacy and Social Change (3) K. MORRISSEY
Explore the ways museums have engaged in representing and advocating for social change and the implications of that engagement. Readings, discussion, and assignments consider the fragile and interesting boundaries between museums and society and the changing expectation of museums to contribute to the common good of society. Offered: A.
View course details in MyPlan: MUSEUM 528

MUSEUM 540 Preservation and Management of Collections (3)
Focus on fundamental issues related to collections management, ranging from artifact handling and artifact storage solutions, to cataloging and photographing, as well as registration methods such as accessioning, deaccessioning, loans, and legal aspects of managing a museum collection.
View course details in MyPlan: MUSEUM 540

MUSEUM 541 Collections Management Lab (2)
Practical training in the fundamental areas of collections management including: artifact handling, cataloging,
condition reporting, photo-documentation and various storage methods. Prerequisite: MUSEUM 540, concurrent enrollment.

**MUSEUM 542 Preservation of Collections II (5)**
Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel.

**MUSEUM 544 Philosophy and Ethics of Museum Collections (3)**
Explores ethics and issues related to collections housed in contemporary museums, addressing collections of many types including tangible and intangible aspects. Explores the meaning of "preserving cultural/natural significance": what museums, zoos, aquaria, and botanical gardens preserve, what they do not preserve, for whom, and how.

**MUSEUM 560 Museum Administration and Leadership (5)**
Principles and practices of museum administration and leadership. Organizational structures and policies; management and leadership theory; board issues; organizational conflicts; planning issues; collection concerns; financial constructs; professional standards; and museum/community relations from an organizational and management perspective.

**MUSEUM 562 Legal Issues in Museums (4)**
Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with LAW E 562.

**MUSEUM 566 Grant Writing in Museums (3)**
Students learn how to identify relevant grant funding opportunities for museums and determine the fit for a particular institution or project; gain familiarity with the components of a grant proposal; understand how proposals are reviewed, what funders typically look for, and the characteristics of a high quality grant proposal.

**MUSEUM 570 Research Design and Museology Practice (4)** *K. MORRISSEY*
Prepares students to identify, interpret, analyze, and design research that advances the field of museology.

**MUSEUM 574 Introduction to Museum Evaluation (3)**
Provides an introduction to the field of evaluation as it relates to museum practice. Introduces basic types, ethics, and practices of evaluation and practices them through readings, reflective fieldwork, mentorships, and discussions.

**MUSEUM 575 Museum Evaluation Project I (3)** *N. VISSCHER*
Applies museological training in Museum Evaluation. Students participate in a quarter-long evaluation project, designed by instructors to further student skills in data collection, and provide an introduction to data management, analysis and presentation within a variety of museum settings. Credit/no-credit only. Offered: Sp.

**MUSEUM 576 Evaluation Project II (3, max. 9)** *N. VISSCHER*
Applies museological training in museum evaluation. Includes design and implementation of a yearlong-long
evaluation project, intended to further student skills in evaluation planning, outcome development, instrumentation design, data analysis, and reporting in a variety of museum settings. Prerequisite: MUSEUM 574; MUSEUM 575 Credit/no-credit only. Offered: A WSp.

View course details in MyPlan: MUSEUM 576

MUSEUM 583 Directed Fieldwork in Museum Operations (1-5, max. 15)
Application of general museological training in one or more areas of supervised operation areas, including registration, education, exhibition, development, marketing or public relations. Credit/no-credit only.

View course details in MyPlan: MUSEUM 583

MUSEUM 584 Directed Fieldwork in Archaeological Collections (1-5, max. 15)
Application of museological training in curation of archeological collections at the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects. Prerequisite: MUSEUM 581.

View course details in MyPlan: MUSEUM 584

MUSEUM 585 Directed Fieldwork in General Collections (1-5, max. 15)
Application of museological training in the curation of art, historic, botanical, geological, zoological, or other collections. Supervised work ranges from fundamental collection documentation and research to preventive conservation or storage, and other special curation projects. Credit/no-credit only.

View course details in MyPlan: MUSEUM 585

MUSEUM 588 Special Topics in Museology (1-5, max. 15)
In-depth examination of selected current issues within the field of museology.

View course details in MyPlan: MUSEUM 588

MUSEUM 594 Seminar in Museum Education (5)
Focus on museums as educational institutions with consideration of the place of education in the mission of museums, the educational role of museums compared to that of other institutions, the museum's diverse audiences and their needs, and the educational methods and techniques museums may employ in pursuing their goals.

View course details in MyPlan: MUSEUM 594

MUSEUM 597 Directed Fieldwork in Audience Research (1-5, max. 15)
Applies museological training in visitor studies gained from audience research coursework. Includes implementation of audience research and evaluation projects within a variety of local museums, zoos, and aquaria. Students develop and practice skills in data collection, analysis, and reporting of results. Prerequisite: MUSEUM 596. Instructors: Morrissey, Satwicz, Visscher Credit/no-credit only. Offered: A WSp.

View course details in MyPlan: MUSEUM 597

MUSEUM 599 Careers and Social Capital (3-5) O'Donnell
Prepares students to transition from the academic community of a world-class university to a place of responsibility within a professional community that is committed to stewardship of the vast natural and created resources of our global communities and environments, including our stories, values, knowledge, mistakes, questions, and aspirations. Offered: Sp.

View course details in MyPlan: MUSEUM 599

MUSEUM 600 Independent Study or Research ([1-10]-)

View course details in MyPlan: MUSEUM 600

MUSEUM 601 Internship (1-15, max. 15)
Faculty supervised off-campus internships in museums and allied institutions. Each internship is individually established and provides students with practical experience and the opportunity to apply and learn new professional skills. Prerequisite: permission of instructor.

View course details in MyPlan: MUSEUM 601
MUSEUM 700 Master's Thesis ([1-10]-)
View course details in MyPlan: MUSEUM 700

MUSEUM 710 Master's Project ([1-10]-, max. 10)
Credit/no-credit only.
View course details in MyPlan: MUSEUM 710

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
The interdisciplinary PhD program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: (Judaism, Christianity, and Islam); and interdisciplinary investigations of modern topics using the social sciences. The program, administered by an interdisciplinary Graduate School faculty group, includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students must take courses in both the humanities and social sciences.

Graduate Program Coordinator
311 Loew Hall, Box 352192
(206) 543-6398

Doctor of Philosophy

Admission Requirements

1. MA or equivalent in a discipline or field directly related to the proposed PhD work
2. Third-year competence in a regional language, and reading knowledge of a second language pertinent to the PhD research
3. Application deadline for autumn quarter admission is February 1. Application procedures are at www.grad.washington.edu/students/interdisciplinary/nme/application.shtml.

Degree Requirements

Minimum 90 credits

Specific coursework and areas of concentration are determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.
2. Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which
must be in the Department of History. These courses are in addition to work the student may have done at the BA and MA level.

3. Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the M.A. level.

4. A student is expected to have studied three languages, two of which must be regional languages and one of which must be a "Western" European language other than English, such as French, German, Italian, Russian, or Spanish. The student's Supervisory Committee decides whether a fourth language is required and whether the fourth required language is European or regional. Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the general examination (see below) may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.

5. Disciplinary method and theory requirements: For all students conducting fieldwork or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550; and (b) POL S 491; or (c) their equivalents in appropriate disciplines.

For students doing humanities-oriented research but not conducting fieldwork, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.

6. Disciplinary core courses: Each student is required to take two disciplinary core courses in appropriate fields. Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory, ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student's general field.

PhD Examinations and Dissertation

1. Preliminary examinations, consisting of three written and an oral. The three written examinations include: area of specialization, theory and discipline, and a self-designated field, revolving around the student's interest. The oral examination, following the written examinations, is two hours in length and addresses all these areas.

2. General examination, consisting of a take-home part and an oral part

3. Final examination, the PhD thesis defense

Annual Review: A subcommittee of the Near and Middle Eastern Studies program faculty meets each spring to review the progress of all students in the PhD program. Either the chair of the student’s committee, the program’s graduate adviser, or the program’s director informs students of the results of this annual review.
INTERDISCIPLINARY GRADUATE PROGRAMS
NEAR & MIDDLE EASTERN STUDIES

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

N&MES 800 Doctoral Dissertation (*)
View course details in MyPlan: N&MES 800
Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in neurobiology and behavior. The laboratories of more than 120 faculty members in over 20 departments within the School of Medicine, College of Arts and Sciences, and College of Engineering have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross University boundaries.

The program is designed to allow students to obtain both broad training in the neurosciences and more intensive coursework in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions.

**Graduate Program**

Graduate Program Coordinator  
T471 Health Sciences, Box 357270  
(206) 685-1647  
neubehav@uw.edu

**Doctor of Philosophy**

**Admission Requirements**

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.

2. GRE scores: general test required; subject test not required, but recommended

3. Minimum three (3) letters of recommendation

4. Statement of purpose and curriculum vitae

5. All must be submitted online via the Graduate School application process.

Applications received after the deadline are considered at the discretion of the directors.
Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

**Degree Program Requirements**

90 credits, to include:

1. **Credit Requirements:** 20 graded credits of coursework with NEUBEH core curriculum and 10 credits of graded/ungraded elective courses approved by the curriculum committee chairs and the student's advisers.

2. **First Year:** Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes the NEUBEH 501, NEUBEH 502, NEUBEH 503, NEUBEH 504, NEUBEH 532, NEUBEH 559 series, three lab rotations, and three quarters of the seminar series and journal clubs. Following the third rotation, students generally choose a permanent dissertation adviser in whose lab they pursue research for the rest of their educational career, generally four to five years.

3. **Second Year:** Students form their doctoral Supervisory Committee by the end of winter quarter, define their doctoral projects, take additional elective courses, and participate in a teaching internship for a minimum of two quarters (or equivalent), and hold their first committee meeting.

4. **Third Year and Beyond:** By the end of autumn quarter of the third year, the student completes the general examination and is conferred official PhD candidacy by the Graduate School. The student then focuses on dissertation research and continues to meet with the Supervisory Committee annually. Annual student evaluations and progress reports are due each spring quarter. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of that examination and acceptance of the completed dissertation by the Graduate School, the student is conferred the PhD degree.

**Financial Aid**

The NEUBEH program provides a salary with benefits (insurance plus tuition) for the first three quarters of study during rotations. Once the student has entered a dissertation laboratory, support is provided by the department of the dissertation adviser. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.
INTERDISCIPLINARY GRADUATE PROGRAMS
NEUROSCIENCE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

NEURO 501 Introduction to Neurobiology (3) Carlson
Survey of molecular, cellular, and developmental neuroscience, including gene regulation, the cytoskeleton, protein sorting in the secretory pathway, growth factors, and neurotransmitter receptors. Includes lecture discussion of original literature.
View course details in MyPlan: NEURO 501

NEURO 502 Introduction to Neurobiology (5) Sherk
Systems level survey of vertebrate system, focusing on sensory system, on motor system, and on neuroanatomy. Lectures cover topics in sensory and motor systems. Laboratory includes brain dissection and study of intact, prosected, and sectioned brain and spinal cord. Emphasis is on human nervous system.
View course details in MyPlan: NEURO 502

NEURO 503 Cognitive and Integrative Neurobiology (4) Phillips
Survey of all aspects of neuroscience, including a discussion of higher neural processes like motivation, decision making, attention, learning, and memory. Lecture and discussion of original literature.
View course details in MyPlan: NEURO 503

NEURO 504 Biophysics of Nerve, Muscle, and Synapse (3) Sullivan
Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with P BIO 504.
View course details in MyPlan: NEURO 504

NEURO 510 Seminar in Neurobiology and Behavior (0.5, max. 30)
Biweekly seminar on current topics. Required for students in the graduate program in neurobiology and behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/no-credit only.
View course details in MyPlan: NEURO 510

NEURO 511 Seminar in Advanced Neurobiology (1-3, max. 30)
Weekly faculty lectures, student presentations, and discussions of past and current scientific literature in neurobiology and behavior.
View course details in MyPlan: NEURO 511
NEURO 512 Readings in Advanced Neurobiology and Behavior (1-3, max. 30)
Guided study of the primary literature of neurobiology and behavior. Emphasizes critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Credit/no-credit only.
View course details in MyPlan: NEURO 512

NEURO 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 30)
Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: graduate standing in the neurobiology and behavior graduate program and permission of the instructor. Credit/no-credit only.
View course details in MyPlan: NEURO 515

NEURO 526 Introduction to Laboratory Research in Neurobiology (4, max. 30)
Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Prerequisite: first-year graduate students in neurobiology. Credit/no-credit only.
View course details in MyPlan: NEURO 526

NEURO 527 Current Topics in Neurobiology and Behavior (1, max. 30)
Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Instructors: Rieke Credit/no-credit only.
View course details in MyPlan: NEURO 527

NEURO 528 Computational Neuroscience (3)
Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with CSE 528.
View course details in MyPlan: NEURO 528

NEURO 535 Research Opportunities in Neurobiology and Behavior (1)
View course details in MyPlan: NEURO 535

NEURO 541 Neuroendocrinology (3)
Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: BIOL 220; BIOC 442 or permission of instructor. Instructors: Steiner Offered: jointly with P BIO 509; W, even years.
View course details in MyPlan: NEURO 541

NEURO 545 Quantitative Methods in Neuroscience (3)
Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Instructors: Rieke Offered: jointly with P BIO 545.
View course details in MyPlan: NEURO 545

NEURO 548 Molecular Mechanisms of Synaptic Plasticity (2) Barria
Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with P BIO 548; Sp, even years.
View course details in MyPlan: NEURO 548

NEURO 550 Biophysics of Calcium Signaling (1)
Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection
and biological conclusions. Prerequisite: CONJ 531. Instructors: Hille, Santana Offered: jointly with P BIO 550; Sp, odd years.

**NEURO 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter**
Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

**NEURO 555 Sensory Receptors (1) Detwiler, Rieke**
Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

**NEURO 556 Axon Pathfinding Mechanisms (1) Bothwell**
Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.

**NEURO 557 Ion Channel Gating (1) Zagotta**
Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

**NEURO 559 Neurobiology of Disease (3)**
Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/P BIO 559.

**NEURO 561 From Biophysics to Neural Computation (2)**
Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with P BIO 561; Sp.

**NEURO 600 Independent Study or Research (–)**
Credit/no-credit only.

**NEURO 700 Master's Thesis (–)**

**NEURO 800 Doctoral Dissertation (–)**

ugnutr@uw.edu

Minor

The minor provides a foundation of knowledge in the study of nutritional sciences, with a unique focus on the intersection of food, food systems, and population health. Students pursuing the minor are presented with a multidisciplinary perspective on the field of nutritional sciences, including its metabolic/biochemical, behavioral, and public health aspects.

Minor Requirements: 25 credits, to include the following:

1. Core (11-12 credits): NUTR 200; two courses selected from NUTR 302, NUTR 303, and NUTR 310; NUTR 400

2. Electives (minimum 13-14 credits) selected from an approved list (may include additional core course not already applied toward the minor). See website for approved list

3. Minimum 13 credits from School of Public Health

4. Minimum 15 credits of upper-division courses

5. Minimum 15 credits taken outside student's major requirements

6. Minimum 15 credits in residence through the UW

7. Minimum 2.0 cumulative GPA for courses applied toward the minor

Graduate Program

Graduate Program Coordinator
305 Raitt, Box 353410
(206) 543-1730
nutr@uw.edu
Nutritional Sciences is an interdisciplinary program in the School of Public Health that offers Master of Science (MS), Doctor of Philosophy (PhD), and Master of Public Health (MPH) degrees. The program is designed for the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice.

The Graduate Coordinated Program in Dietetics (GCPD) combines the MS, MPH, and PhD programs with a supervised practice experience (internship equivalent), which gives students eligibility to take the national registration examination to become a Registered Dietitian (RD). The GCPD includes additional coursework and a nine-month practice experience at regional community, clinical, and food service facilities.

Principal areas of study are biochemical and molecular nutrition, community or public health nutrition, food safety, nutrition and chronic disease, and clinical nutrition. Members of the core faculty represent the School of Public Health, the Fred Hutchinson Cancer Research Center, and the School of Medicine. The program also draws on a larger group of affiliate and clinical faculty from the College of Arts and Sciences, schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.

All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the MPH curriculum. For specific degree requirements, see program website.

Students have access to faculty mentors and research facilities through the Medical Center, the South Lake Union Research Hub, and the Fred Hutchinson Cancer Research Center. Clinical facilities include UW Medical Center, Harborview Medical Center, Northwest Kidney Center, Seattle Children's hospital, Seattle Cancer Care Alliance, Northwest Hospital and Medical Center, Valley Medical Center, and the Center for Human Development and Disabilities.

Students may apply to the graduate degree program after completing a bachelor's or a master's degree. Prerequisite coursework in nutrition, chemistry, biochemistry, and human physiology is required. For specific admission requirements, see program website. Students who wish to supplement their degree program with the Academy of Nutrition and Dietetics-accredited GCPD must also complete prerequisite coursework in microbiology, psychology, food science, and English. Students who have completed a didactic program in dietetics may apply to the graduate program and the GCPD.
SCHOOL OF PUBLIC HEALTH
SCHOOL OF PUBLIC HEALTH
NUTRITIONAL SCIENCE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

NUTR 141 Introduction to Foods (5) NW  A. GLOSTER
Examines how foods are used by different people and cultures to deliver nutrients and energy. Explores the evolution of the global food supply, food preparation techniques, food patterns, and eating habits as they relate to diets, nutrition, and personal and public health.
View course details in MyPlan: NUTR 141

NUTR 200 Nutrition for Today (4) NW
Examines the role of nutrition in health, wellness, and prevention of chronic disease. Topics include nutrients and nutritional needs across the lifespan, food safety, food security, wellness, body weight regulation, eating disorders, sports nutrition, and prevention of chronic disease. May not be taken for credit if credit earned in NUTR 300. Offered: AWSp.
View course details in MyPlan: NUTR 200

NUTR 241 Culinary Nutrition Science (3) NW
Explores scientific principles behind modern culinary techniques that transform raw foodstuffs into prepared foods that have sensory appeal. Hands-on kitchen demonstrations show how physical and chemical forces acting on solids, liquids, and gases transform raw ingredients into foods with desirable taste, texture, and aroma. Requires access to a full kitchen to complete assignments. Cannot be taken for credit if credit earned in NUTR 441. Prerequisite: NUTR 200.
View course details in MyPlan: NUTR 241

NUTR 302 Food Studies: Harvest to Health (3) I&S/NW
Examines the many facets of the modern food supply from production and processing to distribution, marketing, and retail. Systems approach to foods studies considers geopolitical, agricultural, environmental, social, and economic factors along the pathway from harvest to health. Prerequisite: NUTR 200. Instructors: Otten Offered: Sp.
View course details in MyPlan: NUTR 302

NUTR 303 Neighborhood Nutrition (3) NW
Examines the food environment in the local community from the public health perspective. Explores where
people eat their food, what influences this decision, and various aspects of the local food movement, including access to healthy food, urban agriculture, farmers markets, and farm-to-school programs. Prerequisite: NUTR 200. Instructors: Drewnowski Offered: W.

View course details in MyPlan: NUTR 303

NUTR 310 Nutrition and the Life Course (4) NW
Explores nutrient needs from infancy through adolescence and adulthood, including the physiological basis of nutrient requirements and the genetic, social, and environmental influences on food choices and nutrition status. Uses an evidence-based approach to assess the impact of nutrition across life stages and ways to improve population health by improving nutrition. Prerequisite: NUTR 200.

View course details in MyPlan: NUTR 310

NUTR 400 Nutrition Seminar (1, max. 4) I&S A. DREWNOWSKI
Examines emerging issues in food and nutrition as they relate to personal and public health. Reviews evidence in the context of health policy. Credit/no-credit only. Offered: AW.

View course details in MyPlan: NUTR 400

NUTR 405 Physical Activity in Health and Disease (3) NW

View course details in MyPlan: NUTR 405

NUTR 406 Sports Nutrition (3) NW
Covers the essentials of human nutrition that improve and sustain optimal performance for sport and exercise. Discusses the effect of eating disorders (in both male and female athletes), weight management, and sport nutrition resources. Prerequisite: NUTR 200. Instructors: Kirk Offered: Sp.

View course details in MyPlan: NUTR 406

NUTR 411 Diet in Health and Disease (3) QSR
Impact of diet on health and the prevention of obesity, diabetes, cardiovascular disease, and other non-communicable diseases. Examines diet-health relationships; social, environmental, and economic factors in eating behavior; and evidence base behind dietary guidelines. Draws on seminal and recent research in nutrition science and uses examples from recent media coverage. Prerequisite: NUTR 200. Offered: Sp.

View course details in MyPlan: NUTR 411

NUTR 412 United States Food and Nutrition Policy (3) I&S
Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Prerequisite: NUTR 200. Instructors: Otten Offered: A.

View course details in MyPlan: NUTR 412

NUTR 420 Global Nutrition: Challenges and Opportunities (3) I&S J. GORSTEIN
Examines global dimensions of malnutrition, its assessment and classification, and global policies and programs to improve nutritional status in developing countries. Emphasizes global consequences of poor nutrition on health, cognition, and development with a focus on the first 1,000 days from conception to age two. Prerequisite: NUTR 200. Offered: A.

View course details in MyPlan: NUTR 420

NUTR 446 Food Safety and Health (3) Rosenfeld
Presentation of emerging issues in food safety and toxicology, microbiology, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international and national polices that promote regional solutions for a safe food supply and access to nutritious foods. Offered:
NUTR 465 Nutritional Anthropology (3) I&S/NW
Examines the interrelationships between biomedical, sociocultural, and ecological factors and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, and nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with BIO A 465.

NUTR 490 Special Topics in Nutritional Sciences (1-5, max. 10)
Examines emerging issues in nutrition. Reviews the evidence and potential policy implications.

NUTR 499 Undergraduate Research (1-5, max. 10)
Independent study and research supervised by a faculty member with appropriate academic interest. Credit/no-credit only. Offered: AWSpS.

NUTR 500 Graduate Seminar: Current Issues in Nutrition (1, max. 4)
A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Credit/no-credit only. Offered: AWSp.

NUTR 505 Physical Activity in Health and Disease (3)

NUTR 511 Survey of Advanced Nutrition (2-3) Averill
Advanced introduction to nutritional sciences. Topics include macronutrient and micronutrient metabolism, energy balance and obesity, nutrient utilization in physical activity, nutritional needs and recommendations throughout the lifecycle, and the relationships between nutrition and atherosclerosis, diabetes, and cancer risk. Offered: A.

NUTR 512 United States Food and Nutrition Policy (3)
Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Prerequisite: NUTR 300. Instructors: Otten Offered: A.

NUTR 513 Food and Society: Exploring Eating Behaviors in a Social, Environmental, and Policy Context (2) J. OTTEN
Socio-cultural, environmental, and policy factors interact with biological and psychological characteristics to influence the foods we eat, and when, where, and how we eat them. Uses contemporary readings, films, and critical discussion to explore these macro-scale influences on food, nutrition, and eating behavior. Offered: A.

NUTR 520 Nutrition and Metabolism I (3)
Metabolic/physiologic concepts related to energy balance, carbohydrate, and protein nutrition. Addresses energy-producing pathways, as well as food sources, digestion, absorption, and utilization of carbohydrates,
protein, and various micronutrients. Additional topics include low-carbohydrate diets, vegetarianism, protein deficiency, and inborn errors in carbohydrate and protein metabolism. Prerequisite: biochemistry. Instructors: Rosenfeld Offered: A.

View course details in MyPlan: NUTR 520

NUTR 521 Nutrition and Metabolism II (3)
Discussion of normal lipid components of animal tissues, with review of their metabolism and physiological functions. Topics include digestion, absorption, transport, and utilization of dietary fats, cholesterol, and fat-soluble vitamins. Discusses in-depth the roles played by lipids and various micronutrients in altering risk of atherosclerosis. Prerequisite: biochemistry. Instructors: Rosenfeld Offered: W.

View course details in MyPlan: NUTR 521

NUTR 522 Nutrition and Metabolism III (3) M. ROSENFELD
Advanced study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, and excretion; imbalance, deficiency, and toxicity; dietary structures; and role of these nutrients in prevention of diseases directly or indirectly. Recommended: biochemistry. Offered: Sp.

View course details in MyPlan: NUTR 522

NUTR 526 Maternal and Pediatric Nutrition (4)
Examines the influence of maternal, infant, and children's nourishment on growth, development, and health, including children with special healthcare needs, in both individual and population-based environments. Includes nutrition and assessment, critical evaluation of normative data, and evidence-based clinical and community nutritional care and family-centered care. Prerequisite: human nutrition and human physiology. Offered: A.

View course details in MyPlan: NUTR 526

NUTR 529 Nutrition Research Design ([1-3]-, max. 3)
Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and data presentations. Prerequisite: BOST 511. Credit/no-credit only. Offered: A.

View course details in MyPlan: NUTR 529

NUTR 531 Public Health Nutrition (4)
Explores the functions and essential services of public health as they apply to assuring access to a safe and nutritious food supply. Examines the practice of public health nutrition: nutrition environment, program planning, implementation, and evaluation; policy development, implementation, and evaluation; and links between basic science and public health nutrition practice. Prerequisite: introductory nutrition. Offered: W.

View course details in MyPlan: NUTR 531

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12)
Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: nutritional sciences graduate student and permission of instructor. Instructors: Lund Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: NUTR 532

NUTR 536 Nutrition Education Principles and Practice (2)
Examines theory-based design and delivery of nutrition education, including conducting needs assessments and developing lesson plans, activities, visual aids, and evaluation material. Explores design features of written, oral, and technology-based nutrition education materials and initiatives. Addresses differing learning styles, cultural groups, and literacy levels. Offered: Sp.

View course details in MyPlan: NUTR 536

NUTR 537 Laboratory Rotation (1-4, max. 6)
Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to ongoing research for preparation of dissertation
topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NUTR 537

NUTR 538 Nutritional Epidemiology (3) Beresford, Kratz
Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology. Prerequisite: EPI 511 or EPI 512 or instructor permission. Offered: jointly with EPI 538.
View course details in MyPlan: NUTR 538

NUTR 545 Food Safety and Health (3)
Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Offered: jointly with ENV H 540; W.
View course details in MyPlan: NUTR 545

NUTR 555 Nutrition in Developing Countries (3) Gorstein
Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with G H 555; Sp, odd years.
View course details in MyPlan: NUTR 555

NUTR 559 Orientation to Clinical Dietetics Practice (3) Averill
Provides an orientation to dietetics in clinical settings, including the nutrition care process and integration of evidence-based practice. Offered: A.
View course details in MyPlan: NUTR 559

NUTR 560 Nutritional Counseling for Chronic Disease (1-3) Simon
Examines nutritional intervention strategies and counseling skills that pertain to chronic disease prevention and management. Builds knowledge and skills needed to create appropriate care plans and counseling strategies designed to meet individual client assessment/counseling situations. Offered: Sp.
View course details in MyPlan: NUTR 560

NUTR 561 Graduate Coordinated Program in Dietetics (1-10, max. 35)
Focuses on the competencies for entry-level practice in dietetics. Includes supervised practice experience in wellness, public health, food services, ambulatory care, and clinical care. Prerequisite: GCPD students only. Instructors: Lund Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NUTR 561

NUTR 562 Nutrition and Chronic Disease (4)
Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Instructors: Kirk Offered: Sp.
View course details in MyPlan: NUTR 562

NUTR 563 Nutrition in Acute Care (4)
Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: either NUTR 562 or permission of instructor. Instructors: Averill Offered: A.
View course details in MyPlan: NUTR 563

NUTR 564 Management of Nutrition Services (3)
Examines healthcare policy and administrative issues that impact delivery of nutritional services in different healthcare settings. Topics include organizational behavior, productivity, project management, financial reporting, and human resources. Offered: S.
View course details in MyPlan: NUTR 564
NUTR 590 Special Topics in Nutritional Science (1-4, max. 4)
Examines emerging issues in nutrition. Reviews the evidence and potential policy implications. Prerequisite: permission of instructor. Credit/no-credit only.
View course details in MyPlan: NUTR 590

NUTR 595 Nutritional Sciences Master's Practicum (1-12, max. 12)
Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; NUTR 521; NUTR 522. Instructors: Lund Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NUTR 595

NUTR 596 Nutrition Practice Capstone (1-10)
Applies and extends students' nutritional sciences, dietetics, or public health knowledge and skills to a practice-focused problem or question with the completion of a mentored capstone project and report. Credit/no-credit only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NUTR 596

NUTR 600 Independent Study or Research (*-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NUTR 600

NUTR 700 Master's Thesis (*-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NUTR 700

NUTR 800 Doctoral Dissertation (*-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NUTR 800

Pathobiology

Graduate Program

Graduate Program Coordinator
310C Harris Hydraulics, Box 357965
(206) 543-4338
pathobio@uw.edu

The Pathobiology graduate program offers graduate training in the application of basic biomedical research to diseases of public health interest. The program of study involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

Master of Science

The master's program is designed for students to develop an understanding of the applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. The focus in this two-year program is developing basic research skills and understanding the scientific method. Students are expected to fulfill their course requirements during the first year. Under the guidance of a faculty research mentor, students propose and complete a thesis that includes an original research project.

Admission Requirements

Students are admitted directly into the PhD program. The department does not currently accept applications for the Master of Science.

Degree Requirements

A minimum of 60 credits as follows:

1. 21.5 credits of required courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1)

2. Research Credits: Sufficient credits of PABIO 600 and PABIO 700 to complete a research project.

3. Electives: Additional courses in pathobiology or the biomedical sciences may be taken to fulfill the graded course requirement, to encompass the interests of the student, or to

http://www.washington.edu/students/gencat/academic/pabio.html
fulfill any additional requirements set forth by the student's committee.

**MS Thesis Research Proposal:** The M.S. thesis research proposal should be done by the end of the fourth quarter of the first year and should contain the following, in this order:

1. A brief synopsis of background relevant to the project.
2. A summary of preliminary experiments.
3. A description of experiments planned for the next year.

**MS Thesis:** The thesis must be provided to the MS advisory committee two weeks prior to the oral presentation. Corrections should be made following their review before submission of the document to the Graduate School.

**MS Oral Presentation and Defense:** Students give a formal seminar prior to the completion of the master's program.

**Doctor of Philosophy**

The doctoral program lasts four to five years and is designed for students to become capable of conducting independent research leading to the expansion of knowledge by developing skills to approach unfamiliar experimental systems and identify and explore important questions concerning pathogenesis and infection. Students develop familiarity with the paradigms for control, prevention, and treatment; develop an understanding of epidemiology and disease processes; learn basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develop familiarity with the major classes of pathogens.

**Admission Requirements**

1. *Personal Statement:* The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of the student's background and readiness for graduate studies in pathobiology.

2. One official set of transcripts from all collegiate institutions attended.

3. Three letters of recommendation.

4. Curriculum vitae

5. Official Graduate Record Examination (GRE) scores

6. International applicants are in addition required to submit official Test of English as a Foreign Language (TOEFL) scores. The Pathobiology program does not admit international applicants who have a TOEFL score of less than 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

**Degree Requirements**

90 credits minimum, as follows:

1. *Required Courses:* PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1), PABIO 598 (2), PABIO 500 (variable), PABIO 600 (variable), PABIO 800 (27); either IMMUN 441 (4) or IMMUN 532 (3).
2. Students are required to attend Seminar (PABIO 580) and Journal Club (PABIO 581) every quarter of the academic year while enrolled, but may be excused for up to two quarters while writing the dissertation. Students give research presentations in the Graduate Research Symposium annually after the first year. 3 credits each of Seminar and Journal Club may be counted towards the degree.

3. Electives: The following are recommended tracks for elective credits:
   1. **Eukaryotic Pathogens:** PABIO 536, PABIO 548, CONJ 531 through CONJ 544, EPI 532, MICROM 444
   2. **Bacterial Pathogens:** PABIO 540, PABIO 568, EPI 520, EPI 529, MICROM 552, MICROM 555. (Students without a background in bacteriology are required to take MICROM 442 or an equivalent course as a prerequisite for entry into the Bacterial Pathogens track.)
   3. **Viral Pathogens:** Two or more of the following are strongly recommended: CONJ 531-CONJ 544, EPI 520, EPI 524, EPI 530, IMMUN 532, MICROM 540

**Research Facilities**

Research facilities are geographically dispersed and located in the Health Science Center of the School of Medicine, Fred Hutchinson Cancer Research Center, and Seattle Biomedical Research Institute. External support includes computer facilities and the Health Sciences Library with access to more than 345,000 volumes, 4,000 periodicals, and online bibliographic services for all national libraries of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a world-renowned research institution. Its mission for more than 20 years has been to eliminate cancer. Shared facilities are available, including electron microscopy, flow cytometry, tissue culture, image analysis, biotechnology center for DNA and protein synthesis and sequencing, animal facilities, biological production facility focused on monoclonal antibody production, extensive libraries, and a biocomputing center.

The Seattle Biomedical Research Institute is an independent nonprofit organization studying causes of and interventions to infectious diseases of worldwide impact, including targeted research producing leading-edge findings and applied research creating diagnostic tests and treatments.

**Financial Aid**

The department offers a twelve-month competitive salary, as well as paying tuition and health insurance, which includes medical, dental, and vision benefits. Students with satisfactory academic progress can anticipate funding for the duration of their studies.
SCHOOL OF PUBLIC HEALTH
PATHOBIOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

PABIO 498 Undergraduate Thesis (*)
View course details in MyPlan: PABIO 498

PABIO 499 Undergraduate Research (*, max. 12)
View course details in MyPlan: PABIO 499

PABIO 500 Introduction to Pathobiology Research (3-9, max. 15)
Rotation through research laboratory. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PABIO 500

PABIO 536 Bioinformatics and Gene Sequence Analysis (3) T. ROSE
Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PHG 536; Sp.
View course details in MyPlan: PABIO 536

PABIO 548 Molecular and Cellular Parasitology (3)
Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor. Instructors: Feagin
View course details in MyPlan: PABIO 548

PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4)
Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Instructors: L. Campbell Offered: jointly with G H 566; A.
View course details in MyPlan: PABIO 551

PABIO 552 Cell Biology of Human Pathogens and Disease (4)
Cell biology and immunology explored through diseases of public health importance. Examples of pathogen
interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens, perturbations of these systems in non-infectious diseases, and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate-level coursework in biology or molecular biology or permission of instructor. Offered: W. View course details in MyPlan: PABIO 552

PABIO 553 Survival Skills for Scientific Research (2)
Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no-credit only. Offered: W. View course details in MyPlan: PABIO 553

PABIO 580 Pathobiology Seminar (1, max. 21)
Research from students, faculty members, and invited speakers presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response, and other related topics. Offered: W. View course details in MyPlan: PABIO 580

PABIO 581 Current Literature in Pathobiology (1, max. 15)
Develops skills in analyzing data and assessing conclusions through an analysis of current literature in pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program. View course details in MyPlan: PABIO 581

PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5, max. 12)
Analysis of issues, hypothesis and experimental design and testing. Prerequisite: graduate standing in pathobiology. Instructors: Lingappa Credit/no-credit only. Offered: Sp. View course details in MyPlan: PABIO 582

PABIO 590 Selected Topics (1-20, max. 20)
Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Prerequisite: permission of instructor. View course details in MyPlan: PABIO 590

PABIO 591 Rotating Pathobiology Minicourses (1)
Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format with discussion. Offered: Sp. View course details in MyPlan: PABIO 591

PABIO 598 Didactic Pathobiology (*, max. 12)
Supervised teaching experience in pathobiology courses for PhD candidates. Prerequisite: permission of instructor. View course details in MyPlan: PABIO 598

PABIO 600 Independent Study or Research (*-)
Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only. View course details in MyPlan: PABIO 600

Public Health Genetics

F363 Health Sciences Building

Program Overview

331 Raitt Hall, Box 353410

Public health genetics is an emerging field that applies advances in human genetics, genomics, and molecular biotechnology to improve public health and prevent disease.

Founded in 1997, the University of Washington's Institute for Public Health Genetics (IPHG) is a leader in the emerging field of public health genetics. Alone among U.S. universities, the UW, through IPHG, offers graduate degrees at both the master's and PhD levels.

The mission of the IPHG is to provide broad, interdisciplinary training for future public health professionals, to facilitate research in public health genetics, and to serve as a resource for continuing professional education.

Graduate Program

Graduate Program Coordinator
331 Raitt Hall, Box 353410
206-616-9286
phgen@uw.edu

Master of Science, Genetic Epidemiology

An interdisciplinary field that draws on training in epidemiology, genetics, and biostatistics and examines how genes and environmental factors interact to influence health and disease in human populations. Training in genetic epidemiology focuses on methods to identify genetic influences on human diseases and interactions with environmental exposures in populations, emphasizing applied research skills.

Admission Requirements

1. Statement of purpose
2. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable)
substitutes for the GRE).

4. International applicants: official TOEFL scores

5. Three letters of recommendation from professors, supervisors, or others who know the student's work reasonably well. At least two letters should be academic references.

6. Recent copy of resume or curriculum vitae

**Degree Requirements**

68 credits minimum, to include:

1. **Required Courses**: PHG 511/EPI 517 (3), PHG 518/EPI 518 (4), PHG 519/BIOST 516/EPI 516 (3), EPI 573/ENV H 573 (3), PHG 512/LAW H 504/B H 514 (3); EPI 512 (4), EPI 513 (4); BIOST 517 (4), BIOST 518 (4); PHG 536/MEBI 536/PABIO 536 (3), GENOME 552 (1.5)

2. **Elective Courses**: Elective courses (excluding independent study and thesis credits) must be in epidemiology, biostatistics, genetics, public health genetics, or be related to the biological, physical, or social/behavioral factors which affect health, in particular ethical, legal and social issues related to genetic epidemiology.

3. **Thesis**: PHG 700 (9 credits minimum)

**Master of Public Health, Public Health Genetics**

Public Health Genetics is an emerging, interdisciplinary field that applies the rapid advances in human genetics, genomics, and bioinformatics to improve public health and prevent disease on a population basis. Training focuses on two core knowledge areas: genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implication of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

**Admission Requirements**

1. Statement of purpose.

2. Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school

3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).

4. International applicants: official TOEFL scores

5. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.

6. A recent copy of the applicant's resume or curriculum vitae

**Degree Requirements**

63 credits, as follows:

1. **Required Courses**: 53 credits as follows: EPI 511 (4), BIOST 511 (4), HSERV 511 (3), ENV H 511 (3), HSERV 510 (3); PHG 511 (3), PHG 512 (3), PHG 513 (3), three of PHG 521 (3), PHG 522 (3), PHG 523 (3), PHG 525 (3), and PHG 542 (3); PHG 580 (6); PHG 595(3); at least 9 credits of PHG 700
2. Electives: Remaining 10 credits may combine approved elective courses, PHG 600 credits, and PHG 700 credits

Doctor of Philosophy

Public Health Genetics is an emerging, interdisciplinary field that applies the rapid advances in human genetics, genomics, and bioinformatics to improve public health and prevent disease on a population basis. Training focuses on two core knowledge areas: genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implications of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

Admission Requirements

1. Statement of purpose.
2. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school.
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
6. A recent copy of the applicant's resume or curriculum vitae.

Degree Requirements

90 credits minimum, to include:

1. Additional writing courses may be required. Students should consult their faculty adviser.
2. Human Genetics: required -- PHG 551 or GENOME 565 (4); highly recommended -- GENOME 552 (1.5), PHG 536 (3)
3. Public Health: required -- EPI 511 (4); BIOST 511 (4) or BIOST 517 (4); ENV H 511 (3); HSERV 511 (3)
4. Core Knowledge Areas
   a. Genomics in Public Health: PHG 511 (3), PHG 513 (3), PHG 542 (3), PHG 580 (1)
   b. Implications of Genetics for Society: PHG 512 (3), PHG 521 (3), PHG 522 (3) or PHG 523 (3), PHG 525 (3)
5. PHG 580 is required each quarter for all PhD students until they pass the preliminary examination.
6. Preliminary Examination: Following completion of required courses, usually taken at the end of the second year of study.
7. Selective Courses for Core Knowledge Areas and Development of Dissertation Topic: Once students begin to develop their dissertation project, they are expected to take at least nine additional units related to that project. Students need to work with their Supervisory Committee to identify selectives that are most useful in completing their dissertation. A list of example selective courses is available on the program website.
8. General examination
9. Dissertation
10. Final examination/dissertation defense

SCHOOL OF PUBLIC HEALTH
PUBLIC HEALTH GENETICS

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

PHG 200 Implications of Public Health Genomics for the Modern World (3) I&S/NW  J. GOGARTEN
Introduces the field of public health genomics through examples of genetic, ethical, political, and social issues emerging in the wake of the Human Genome Project. Students develop the skills to analyze and critique public health, clinical, personal, and social implications resulting from emerging genomic technologies. Offered: A. View course details in MyPlan: PHG 200

PHG 301 Introduction to Genetic Epidemiology (3) I&S/NW  J. GOGARTEN
Explores basic approaches that are used to identify genetic and environmental factors in health and disease, and how application of this information can be used to improve population health. Discusses the relevant ethical, legal, and social implications that occur in research and translation to practice. Offered: W. View course details in MyPlan: PHG 301

PHG 302 Forensic Genetics (3) I&S/NW, QSR  B. WEIR
Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to perform calculations relevant for parentage determination; the identification of remains; and to consider the implications of familial searching of DNA databases. Prerequisite: either BIOST 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, Q SCI 381, or Q METH 201. Offered: jointly with BIOST 302; W. View course details in MyPlan: PHG 302

PHG 511 Genetic Epidemiology (3) B. WEIR
Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENOME 371, or equivalent. Offered: jointly with EPI 517. View course details in MyPlan: PHG 511

PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3)
Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts.
Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/LAW H 504; A.
View course details in MyPlan: PHG 512

PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) K. THUMMEL
Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PCEUT 513; W.
View course details in MyPlan: PHG 513

PHG 519 Statistical Methods in Genetic Epidemiology (3)
Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/EPI 535.
View course details in MyPlan: PHG 519

PHG 521 Culture, Society, and Genomics (3) B. MCGRATH
Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/NURS 582; Sp.
View course details in MyPlan: PHG 521

PHG 523 Genetics and the Law (3)
Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: either LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with LAW H 520; Sp.
View course details in MyPlan: PHG 523

PHG 527 Social Science Research Methods (3) D. BOWEN
Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: jointly with B H 527; Sp.
View course details in MyPlan: PHG 527

PHG 536 Bioinformatics and Gene Sequence Analysis (3) T. ROSE
Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536; Sp.
View course details in MyPlan: PHG 536

PHG 545 Biostatistical Methods for Big Omics Data (3)
This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIOST 512, 514, or 517. Offered: jointly with BIOST 545/GENOME 545.
View course details in MyPlan: PHG 545

PHG 580 Interactive Seminar (1, max. 30) B. WEIR
Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with LAW H 579; AWSp.
View course details in MyPlan: PHG 580
PHG 590 Selected Topics in Public Health Genetics (1-6, max. 6)
Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics, usually of a current nature.
View course details in MyPlan: PHG 590

PHG 595 Master's Practicum (1-12, max. 12)
Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: practicum agreement.
View course details in MyPlan: PHG 595

PHG 600 Independent Study or Research (*-)
Credit/no-credit only.
View course details in MyPlan: PHG 600

PHG 700 Master's Thesis (*-)
Credit/no-credit only.
View course details in MyPlan: PHG 700

PHG 800 Doctoral Dissertation (*-)
Credit/no-credit only.
View course details in MyPlan: PHG 800
Quantitative Ecology and Resource Management

**Program Overview**

The Quantitative Ecology and Resource Management (QERM) interdisciplinary graduate program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to develop or enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

**Graduate Program**

Graduate Program Coordinator

depts.washington.edu/qerm

The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to further enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, sociology, anthropology, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

Both a Master of Science and Doctor of Philosophy degree are offered; graduates are capable of continuing with the development and extension of biometrical and biomathematical modeling as they enter the educational, research, or private-sector work force.
Admission Requirements

1. Background in probability and mathematical statistics, linear algebra, and differential equations. Applicants with little or no statistical background are advised to take additional coursework prior to applying. Although not mandatory, this background makes a student's application more competitive.

2. Successful completion of the following coursework (or equivalent) prior to applying: MATH 126 (or equivalent); MATH 308 (or equivalent).

3. Strongly recommended: MATH 394-MATH 395; STAT 341-STAT 342, or STAT 481.

4. Also taken into consideration:
   a. Minimum 3.00 GPA in last 60 semester or last 90 quarter credits required.
   b. Normally, completion of college-level courses in probability and mathematical statistics, linear algebra, and differential equations.
   c. Scores on Graduate Record Examination (GRE). Competitive applicants generally score above the 75th percentile on the verbal and analytic sections, and above the 85th percentile on the quantitative section.
   d. Minimum TOEFL score of 580 (237 for computer-based tests) - for international students only.
   e. Knowledge of the intended area of study, including clearly written statement of objectives.
   f. Recommendations from persons familiar with the applicant's academic ability and potential.
   g. Admission is also dependent on program resources and fit between student interests and faculty research. Students should explore faculty research interests by reviewing the QERM website, depts.washington.edu/qerm, to determine if their area of research interest is conducted at the UW. Students are not required to enter the QERM program with a faculty adviser selected in advance. Typically students identify their research and faculty adviser during their first year of study.

5. Application deadline for autumn quarter is January 1.

Degree Requirements (for Master of Science and Doctor of Philosophy)

Required coursework reflects the expectation that the student already has a fundamental understanding of the principles of statistical inference and ecological modeling. Required coursework taken during the first year includes:

1. STAT 516 and STAT 517
2. IND E 513 or IND E 599 (offered alternating years)
3. AMATH 523 or AMATH 535 (offered alternating years)
4. QERM 514 and QERM 597
5. SEFS 540
6. BIOL 567/SEFS 567/FISH 567
7. Ecology elective
Following the first year of core coursework, students select elective coursework in an area of emphasis ranging from biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology gives students greater insight into the environmental systems in which they expect to apply their quantitative training.

**Master of Science**

Minimum 36 credits

Requirements for successful completion of the master of science degree include:

1. Successful completion of a minimum 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of coursework numbered 500 or above, including a thesis
2. Receipt of numerical grades in at least 18 quarter credits of coursework taken at the UW
3. Completion of a seminar on results of the research and oral defense of the thesis
4. Completion of all University requirements for graduation

**Doctor of Philosophy**

Minimum 90 credits

Requirements for successful completion of the doctoral degree, minimum of 90 credits, include:

1. Successful completion of the QERM qualifying examinations at the PhD level, following the first year of study
2. Successful completion of a minimum of 90-quarter credits, including 27 dissertation credits. Completion of an MS degree may be applied toward one year of the PhD program. The core QERM courses must be taken if the student has obtained an MS from a different program
3. A seminar on results of the research and an oral defense of the dissertation
4. Completion of all University requirements for graduation

**Financial Aid**

The QERM program offers incoming students a nine month fellowship funded by the Graduate School. Students secure their own funding starting at year two, typically in the form of a teaching or research assistantship. Tuition and health insurance are typically included as part of the financial package. Funding decisions are made annually; attempts are made to continue support for students making satisfactory progress.
INTERDISCIPLINARY GRADUATE PROGRAMS
QUANTITATIVE ECOLOGY & RESOURCE MGMT

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

QERM 514 Analysis of Ecological and Environmental Data I (4)
Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMS: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+/R used throughout. Offered: Sp.
View course details in MyPlan: QERM 514

QERM 597 Seminar in Quantitative Ecology (2, max. 20) T. ESSINGTON
Current topics in quantitative ecology and resource management. Fisheries, forestry, and marine resources. Offered: Asp.

Urban Design and Planning

Program Overview

The PhD in Urban Design and Planning at the University of Washington is one of 39 PhD programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from architecture to sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.

The program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and nature in metropolitan regions throughout the world. It provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy, and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners, and educators who focus on improving the quality of life and environment in metropolitan regions.

Graduate Program

Graduate Program Coordinator
311 Loew, Box 352192
(206) 543-6398

Doctor of Philosophy

Admission Requirements

Admission to the PhD program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admission evaluation.
Applicants typically have a master's degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the [master's program in urban design and planning](https://depts.washington.edu/urbdpphd/).

**Application Deadline:** All application materials are due by February 1. International applicants are encouraged to submit the Graduate School on-line application form by November 1.

For more information, see the program's [website](http://www.washington.edu/students/gencat/academic/urban_design.html).

### Degree Requirements

90 credits, divided into three phases.

#### Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within urban and environmental planning and policy, it provides a common foundation for all students to build upon. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student, the core requirements can be met within one to two years.

**Required Courses:** Five courses, normally completed during the first year unless schedule conflicts make this infeasible. Courses from Phase II requirements may also be taken in the first year.

1. **Core Sequence:** URBDP 591, URBDP 592, URBDP 593
2. **Restricted Electives (before completion of Phase I):**
   a. Qualitative Research Methods - one of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POL S 493.
   b. Quantitative Research Methods - one of the following: CS&SS 594, CS&SS 504, CEE 584

#### Phase II: Area of Study

Students develop with their Supervisory Committee a description of their proposed areas of study. These areas of scholarship must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the Supervisory Committee that addresses the following advanced study requirements:

**Curriculum Requirements:** Seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some courses may be taken in the first year.

1. Urban Processes and Patterns: Three courses – For course options, see program website at [depts.washington.edu/urbdpphd/Phase_II.shtml](http://depts.washington.edu/urbdpphd/Phase_II.shtml)
2. Research Design and Methods: Two courses – For course options, see program Website at [depts.washington.edu/urbdpphd/Phase_II.shtml](http://depts.washington.edu/urbdpphd/Phase_II.shtml)
3. Urban and Environmental Design and Planning: Two courses – For course options, see program Website at [depts.washington.edu/urbdpphd/Phase_II.shtml](http://depts.washington.edu/urbdpphd/Phase_II.shtml)
4. Teaching Methods: One teaching seminar and experience as a TA for at least one quarter, before completion of Phase III.

*General Examination:* A critical review of the literature in the area of study, developed by the student, which integrates interdisciplinary research on that area of study and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

**Phase III: Dissertation**

Once the student passes the general examination, he or she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

**Financial Aid**

The interdisciplinary PhD program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

Bioengineering

Department Overview

N107 William H. Foege Building

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the healthcare system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering program in the world. Major areas of research and education include biomaterials and regenerative medicine, molecular and cellular engineering, technology for expanding access to healthcare, instrumentation, imaging and image-guided therapy, and systems, synthetic, and quantitative biology.

Undergraduate Program

Adviser
N107 William H. Foege Building, Box 355061
(206) 685-2000
bioeng@uw.edu
depts.washington.edu/bioe/programs/bachelors/bs.html

The Bioengineering program offers the following programs of study:

- The Bachelor of Science in Bioengineering degree
- The Bachelor of Science in Bioengineering degree with an option in nanoscience and molecular engineering
- A five-year BS/MS option (consult website or adviser for details)

Bachelor of Science in Bioengineering

Suggested First- and Second-Year College Courses: CHEM 142, CHEM 152, and CHEM 162; CSE 142, English composition, MATH 124, MATH 125, MATH 126, PHYS 121.

Department Admission Requirements

Admission is competitive. Students may be admitted at three different points. Consult the department's website for more information.
1. **Direct Admission.** The department enrolls up to 35 percent of its incoming class directly from high school. Students accepted to the UW who indicate bioengineering as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school. Admission is for autumn quarter only.

2. **Early Admission.** Students enrolled at the UW are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; and 5 credits of English composition. A 2.50 GPA guarantees consideration but not admission. Application deadline is July 1 for autumn quarter admission.

3. **Upper Admission.** Requires 63 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, and MATH 126; CHEM 142, CHEM 152, CHEM 162; CHEM 223 or CHEM 237; PHYS 121, PHYS 122; BIOL 180, BIOL 200; AMATH 301; and 5 credits of English composition. Any of BIOL 180, PHYS 122, and AMATH 301 may be in progress at time of application. A 2.50 GPA guarantees consideration but not admission. Application deadline is February 1 for spring quarter. Consult the department's website or adviser for more details.

**Nanoscience and Molecular Engineering Option (NME):** Admission to the NME option for bioengineering majors is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to the BS bioengineering major. Students applying for the NME option should indicate that interest on their bioengineering major application and discuss their interests/background in their application personal statement.

**Graduation Requirements**

Students follow requirements in effect at time of entry into the department. 180 credits as follows:

**General Education Requirements (105 credits):**

1. **Areas of Knowledge:** 24 total credits in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S), with at least 10 credits in each area.

2. **Written and Oral Communication (5 credits):** 5 credits of English composition, from the approved University list. Additional writing credits are built into the major core courses.

3. **Mathematics (24 credits):** MATH 124, MATH 125, MATH 126; either MATH 307 or AMATH 351; either MATH 308 or AMATH 352; STAT 390 or IND E 315

4. **Natural Science (44 credits):** CHEM 142, CHEM 152, CHEM 162 and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122; BIOL 180, BIOL 200, BIOL 220

5. **General Electives (8 credits); (6 credits for the NME option)**

**Major Requirements (75 credits):**

1. **Engineering Fundamentals (4 credits):** AMATH 301

2. **Bioengineering Core (47 credits):** BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402, or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405.
3. **Bioengineering Senior Electives (15 credits):** Fifteen (15) credits from an approved departmental list, including completion of one of three concentration areas:

- **Molecular and Materials Bioengineering:** four courses from approved departmental concentration list.
- **Cells, Tissue, and Systems Bioengineering:** four courses from approved departmental concentration list.
- **Diagnostics and Therapeutic Instruments:** PHYS 123; four courses from approved departmental concentration list. See department for approved list.

4. **Approved Engineering Electives (9 credits):** Chosen from a departmentally approved list or from additional bioengineering senior elective credit. See department for approved list.

5. **Grade Requirements:** Minimum 2.0 grade in each bioengineering course applied to the major

---

**Nanoscience and Molecular Engineering Option Requirements (77 credits):**

1. **Engineering Fundamentals (4 credits):** AMATH 301

2. **Bioengineering Core (47 credits):** BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402 or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405

3. **Nanoscience and Molecular Engineering Courses (21 credits):** NME 220, NME 321, NME 421; minimum four additional approved nanoscience and molecular engineering electives, to be chosen from an approved departmental list; additional senior elective credits as needed to total 15. The senior capstone (4-10 credits from BIOEN 402 or BIOEN 403) must be in an NME area.

4. **Approved Engineering Electives:** 5 credits

5. Minimum 2.0 grade in each bioengineering course applied to the major

---

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and healthcare. Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and
biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.

- **Instructional and Research Facilities:** The department is housed in the newly constructed Foege North building. Amenities include instructional laboratories, an advanced computing lab for class instruction and student use, a general computer lab for student use, a student work room, a seminar room, and meeting space. Departmental offices are also located in this building. Other laboratories are located in the College of Engineering and the School of Medicine. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in computational bioengineering, distributed diagnosis and home healthcare, engineered biomaterials, medical imaging and image-guided therapy, and molecular bioengineering and nanotechnology.

- Honors Options Available: College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors (see adviser for requirements). For Interdisciplinary Honors, see University Honors Program.

- **Research, Internships, and Service Learning:** Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship website for majors.

- **Department Scholarships:** Several scholarships are available for majors.

- **Student Organizations/Associations:** The Biomedical Engineering Society (BMES), the campus chapter of the national professional organization, organizes social events as well as events that support student interest in medical school, graduate school, and industry.

*Of Special Note:* Courses on technology commercialization are available to seniors.

---

**Graduate Program**

Graduate Program Coordinator  
N107 William H. Foege Building, Box 355061  
(206) 685-2000  
[bpeng@uw.edu](mailto:bioeng@uw.edu)

The Department of Bioengineering offers programs of study which lead to the Master of Science (MS), the Master of Pharmaceutical Bioengineering (PHARBE), and Doctor of Philosophy (PhD) degrees.

**Master of Science**

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

**Admission Requirements**

All application materials must be received in the appropriate office by the deadline. International applications are due by December 1; domestic applications are due by
December 15. Late and/or incomplete applications are not reviewed. Required application items include:

1. Online application: [www.grad.washington.edu/applForAdmiss](http://www.grad.washington.edu/applForAdmiss).
2. Department of Bioengineering Admission Form
3. Statement of Purpose
4. Resume/Curriculum Vitae
5. Three letters of recommendation
6. Unofficial transcripts only (official transcripts are requested once an offer has been made)
7. Official GRE scores (sent to code 4854, and must be sent before the deadline)
8. Official TOEFL scores (from international applicants only, and must be received before the deadline)

More information about the application is online at [depts.washington.edu/bioe/education/prospective/educ_prospective.html](http://depts.washington.edu/bioe/education/prospective/educ_prospective.html). Materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Applicants are expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the MS program.

**Degree Requirements**

Course requirements for the MS in Bioengineering are detailed below. All core and elective courses must be taken for a numerical grade. Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

Note: A single course may not count for two separate requirements.

36 credits as follows:

1. Molecular Bioengineering: BIOEN 501
2. Cellular Bioengineering: BIOEN 502
3. Systems Bioengineering: BIOEN 503
4. Biostatistics
5. Bioengineering seminar: BIOEN 510
6. Bioengineering elective courses, chosen in consultation with faculty adviser: 10 credits
7. Master's thesis: BIOEN 700

**Master of Pharmaceutical Bioengineering**

The Master of Pharmaceutical Bioengineering (PHARBE) program is an evening degree program designed to enable working local engineers, scientists, researchers, and
professionals in the biotechnology, pharmaceutical, and related industries to explore advanced education in the areas of molecular and cellular biology, drug discovery and design, pharmaceutics, and translational pharmaceutics. Professionals may also complete three certificate programs without applying for degree status.

**Admission Requirements**

1. BS degree or equivalent in a relevant science (field/research), public health (biomedical related) or engineering (field/research) related, or a BS degree or equivalent in unrelated field and two years' experience working within a scientific or engineering group for a biotechnology or pharmaceutical company or related industry. Clinical degrees are considered.

2. Applicants who have a bachelor's degree other than a BS, professional experience, and completed recommended prerequisite course work are also considered for admission.

3. Minimum 3.00 GPA in the last 90 quarter credit hours (60 semester credit hours). Students who have a BA/BS degree with under a 3.00 GPA and have two years' work experience may be approved for graduate non-matriculated (GNM) status for basic biosciences. Students who receive a 3.0 or above in their basic biosciences courses under GNM status are considered for degree admissions.

4. Official GRE scores

5. One set of official (unopened) transcripts from each non-UW institution attended

6. **Prerequisite Course Requirements:** The following courses must be completed with a minimum 2.0 in each course before applying to the degree program. Students whose undergraduate degree majors are in engineering, biology, chemistry or pharmacy are exempt from the prerequisite course requirement.
   a. **Calculus:** Minimum one quarter (or one semester) of college calculus
   b. **Chemistry:** Minimum two quarters (one semester) of college general chemistry Additional course in organic chemistry recommended.
   c. **Biology:** Minimum one quarter (semester) of general biology
   d. **Physics:** one quarter (PHYS 114).

7. Applicants are evaluated on professional experience, previous degrees earned, most recent/undergraduate GPA, basic biosciences courses GPA (if applicable), letters of recommendation, statement of intent, and GRE test scores. Admission to the program is not guaranteed.

8. Applicants who do not qualify for admission to the PHARBE degree program may be admitted to courses and/or to Pharmaceutical Bioengineering Certificate programs.

9. **English Proficiency:** Students who are non-native English speakers are expected to have adequate English language proficiency. The Graduate School requires a TOEFL score of at least 580, unless applicants are citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or hold a bachelor's or advanced degree from an accredited institution in any of these countries.

**Degree Requirements**

Minimum 40 credits, with a minimum 3.00 cumulative GPA, as follows:
1. **Basic Biosciences Curriculum (20 credits):** Molecular and Cellular Biology I, Molecular and Cellular Biology II, Pharmaceutics I, Pharmaceutics II, Statistics and Experimental Design

2. **Advanced Tracks:** 16 credits from one of two advanced tracks in translational pharmaceutics or drug discovery and design. Students must complete 20 credits of the basic biosciences core courses before enrolling in advanced track courses.
   a. **Translational Pharmaceutics (16 Credits):** Preclinical Development, Process Development, Formulation and Delivery, Clinical Development
   b. **Drug Discovery and Design (16 Credits):** Molecular Biotechnology, Drug Discovery & Design, Molecular Targets & Drug Classes, Systems Biology and Bioinformatics

3. Departmental Seminar (4 Credits)

4. **Optional Capstone Project:** Students have the option of completing a professional capstone project in either the drug discovery and design or Process development courses.

**Doctor of Philosophy**

The objective of the PhD program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the PhD program does not require prior completion of the MS degree and may be made directly after the BS An optional dual PhD degree in bioengineering and nanotechnology is available; see [www.nano.washington.edu](http://www.nano.washington.edu) for more information.

**Admission Requirements**

See the application process detailed in the MS section.

While it is not required to complete an MS degree before beginning the PhD, every graduate student is expected to have the following courses as part of her or his undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the PhD program.

**Degree Requirements**

90 credits, to include:

Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

All core and elective courses must be taken for a numerical grade. A single course may not count for two separate requirements. Required courses include:

---

[http://www.washington.edu/students/gencat/academic/bioen.html](http://www.washington.edu/students/gencat/academic/bioen.html)
1. Molecular Bioengineering: BIOEN 501
2. Cellular Bioengineering: BIOEN 502
3. Systems Bioengineering: BIOEN 503
4. Biostatistics
5. Bioengineering seminar: BIOEN 510
6. 16 credits of bioengineering elective courses, chosen in consultation with faculty adviser
7. 27 credits of dissertation writing (BIOEN 800)

Ordinarily, a student progressing well follows this schedule:

1. First Year: Complete one to three lab rotations and select a thesis adviser no later than the end of spring quarter.
2. Second Year: Pass the qualifying examination and form a Supervisory Committee by the end of that year.
3. Third Year: Pass the general examination.
4. Fourth Year (and subsequent years): Make an annual progress report to, and receive feedback from, the Supervisory Committee.
5. Fifth Year: Defend the dissertation.

**Medical Scientist Program**

A Medical Scientist Training Program (MSTP) exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the MD and PhD degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at (206) 685-0762.

**Research Facilities**

As the department is established within the College of Engineering and the School of Medicine, bioengineering students have access to all engineering and health science departments and facilities. A wide range of technologies and virtually all aspects of biomedical research tools are available.

**Financial Support**

Financial support is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the adviser.
INTERSCHOOL OR INTERCOLLEGE PROGRAMS
BIOENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**BIOEN 215 Introduction to Bioengineering Problem Solving (3)** *D. HENDRICKS, A. TAYLOR AMOS*
Introduces bioengineering through a problem solving approach. Topics include: creative problem solving techniques, self-directed inquiry, engineering ethics, social constraints, and engineering design process.
[View course details in MyPlan: BIOEN 215](#)

**BIOEN 290 Guided Independent Studies on Transformative Science (4)** *NW G. POLLACK*
Intensive laboratory experience mixed with lectures, readings, and discussions aimed at achieving deep understanding of scientific approach, particularly the nature of paradigm shifts, role of governmental support and management of science, power of orthodoxy, role of challenger, and fate of unpopular scientific views. Offered: W.
[View course details in MyPlan: BIOEN 290](#)

**BIOEN 299 Introduction to Bioengineering (1)** *G. POLLACK*
Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no-credit only. Offered: ASp.
[View course details in MyPlan: BIOEN 299](#)

**BIOEN 315 Biochemical Molecular Engineering (3)** *D. RATNER*
Introduces the requisite organic, physical, and biochemistry for incoming bioengineers to understand biological systems at the molecular level. Prerequisite: CHEM 223, CHEM 237 or CHEM 335; BIOL 200, which may be taken concurrently. Offered: Sp.
[View course details in MyPlan: BIOEN 315](#)

**BIOEN 316 Biomedical Signals and Sensors (4)** *C. NEILS*
Introduces the sources, detection, and processing of signals in medical instrumentation. Includes analog and digital signal processing in the time and frequency domains. Emphasizes component strengths and limitations, to develop systems that improve safety, accuracy, and reliability. Prerequisite: AMATH 301 and PHYS 122; BIOEN 317, which must be taken concurrently; either MATH 307 or AMATH 351, which may be taken concurrently. Offered: Sp.
[View course details in MyPlan: BIOEN 316](#)
BIOEN 317 Biomedical Signals and Sensors Laboratory (2) F. CURRA
View course details in MyPlan: BIOEN 317

BIOEN 325 Biotransport I (4) Y. ZHENG
Introduces momentum and heat transport in medical and biological systems. Examines how differential and control-volume analyses produce ordinary and partial differential equations; develops analytical and computational solution methods. Prerequisite: AMATH 301; either MATH 136, MATH 307, or AMATH 351; PHYS 122. Offered: Sp.
View course details in MyPlan: BIOEN 325

BIOEN 326 Solid and Gel Mechanics (4) W. THOMAS
Introduces solid mechanics and interactions of biological structures and medical materials. Emphasizes the relationships between composition, structure, properties, and performance of metals and ceramics, synthetic and natural macromolecules, cells, tissues, and self-assembling systems. Prerequisite: either CHEM 162, CHEM 164, or CHEM 165; PHYS 122; minimum grade of 2.0 in BIOEN 315. Offered: A.
View course details in MyPlan: BIOEN 326

BIOEN 327 Fluids and Materials Laboratory (2) C. NEILS
Practical exploration of the behavior of fluids and soft materials that occur in biological systems and biomedical devices; and the interaction between cells and their environment. Includes methods of measurement, analysis, and design. Co-requisite: BIOEN 325 and BIOEN 326. Offered: A.
View course details in MyPlan: BIOEN 327

BIOEN 335 Biotransport II (3) J. BRYERS
Studies the principles of combined mass transport in homogeneous and heterogeneous reaction systems as applied to biological processes. Introduces chemical and biochemical reaction kinetics, methods of evaluating kinetic parameters for reaction rate data, and prediction of the performance of biological and biochemical processes. Prerequisite: minimum grade of 2.0 in BIOEN 325. Offered: W.
View course details in MyPlan: BIOEN 335

BIOEN 336 Bioengineering Systems and Control (3) H. SAURO
Reviews linear and nonlinear systems analysis and control system design and biological and medical applications. Prerequisite: minimum grade of 2.0 in BIOEN 327; either MATH 136, MATH 308, or AMATH 352. Offered: W.
View course details in MyPlan: BIOEN 336

BIOEN 337 Mass Transport and Systems Laboratory (2) A. TAYLOR AMOS
Uses computational and experimental laboratory exercises to demonstrate time- and space-dependent linear and nonlinear systems with specific emphasis on bioengineering application. Prerequisite: BIOEN 327; BIOEN 335 and BIOEN 336, which must be taken concurrently; either MATH 390, STAT 390, or IND E 315, which may be taken concurrently. Offered: W.
View course details in MyPlan: BIOEN 337

BIOEN 345 Failure Analysis and Human Physiology (4) S. PUN, M. REGNIER, Y. ZHENG
Applies engineering analysis to understand human physiology of the engineering of solutions to medical and biological problems. Includes laboratory. Prerequisite: BIOL 220; minimum grade of 2.0 in each of BIOEN 215, BIOEN 335, BIOEN 336, and BIOEN 337. Offered: Sp.
View course details in MyPlan: BIOEN 345

BIOEN 400 Fundamentals of Bioengineering Design (3)
Preparatory project-based course that develops understanding of the engineering design process and incorporates modern tools and methodologies for developing innovative health technologies. Prerequisite: BIOEN 337;
BIOEN 401 Bioengineering Capstone Principles (3)  
*K. WOODROW*
Teaches design principles in bioengineering and guides the development of design and research-based senior capstone projects. Prerequisite: either MATH 390, STAT 390, or IND E 315. Offered: Sp.  
*View course details in MyPlan: BIOEN 401*

BIOEN 402 Bioengineering Capstone Research and Design ([2-6]-, max. 10)  
Independent senior design project. Prerequisite: BIOEN 401. Offered: A/WSpS.  
*View course details in MyPlan: BIOEN 402*

BIOEN 403 Bioengineering Capstone Research (2-, max. 4)  
Independent senior research project. Prerequisite: BIOEN 401. Offered: AW.  
*View course details in MyPlan: BIOEN 403*

BIOEN 404 Bioengineering Team Design I (3)  
*C. NEILS*
First course in team design project course sequence. Prerequisite: BIOEN 401. Offered: W.  
*View course details in MyPlan: BIOEN 404*

BIOEN 405 Bioengineering Team Design II (3)  
*A. TAYLOR AMOS*
Second course in team design project course sequence. Prerequisite: BIOEN 404. Offered: Sp.  
*View course details in MyPlan: BIOEN 405*

BIOEN 410 Bioengineering Honors Seminar (1)  
*D. HENDRICKS*
Service-learning for departmental honors students. Credit/no-credit only. Offered: A.  
*View course details in MyPlan: BIOEN 410*

BIOEN 420 Medical Imaging (4)  
*C. YUAN*
Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT optical imaging, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: either BIOEN 316 or E E 235; either MATH 136, MATH 308, or AMATH 352; either CSE 142 or AMATH 301.  
*View course details in MyPlan: BIOEN 420*

BIOEN 424 Advanced Systems and Synthetic Biology (3)  
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with CSE 486/E E 423; A.  
*View course details in MyPlan: BIOEN 424*

BIOEN 425 Laboratory Methods in Synthetic Biology (4)  
Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered:
BIOEN 440 Introduction to Biomechanics (4) J. SANDERS
Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.
View course details in MyPlan: BIOEN 440

BIOEN 447 Fundamentals of Magnetic Resonance and Ultrasound Imaging (4) M. AVERKIOU
Principles and uses of biomedical imaging with magnetic resonance imaging (MRI) and ultrasound are presented from an engineering viewpoint. Topics include the physics of MRI and ultrasound, principles of image formation, clinical applications, and the technology supporting important modes of modern imaging equipment. Prerequisite: BIOEN 316 or BIOEN 317. Offered: W.
View course details in MyPlan: BIOEN 447

BIOEN 449 Therapeutic and Diagnostic Ultrasound (4) M. AVERKIOU
Fundamentals of ultrasound leading to real-time ultrasound imaging; sound beams and signals, transducers, arrays and array beamforming; ultrasound interaction with tissue; Doppler and Color-flow; nonlinear imaging and contrast agents. Ultrasound bioeffects and therapeutic ultrasound: thermal therapies, HIFU, hyperthermia and BIO heat equation; cavitation, lithotripsy; drug delivery. Elastography, photoacoustic imaging. Prerequisite: BIOEN 316 or BIOEN 317. Offered: W.
View course details in MyPlan: BIOEN 449

BIOEN 455 BioMEMS (4) A. FOLCH
Introduction to BioMEMS. State-of-the-art techniques in patterning biomolecules, machining three-dimensional microstructures and building microfluidic devices. Various biomedical problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Biweekly labs. Prerequisite: BIOEN 316. Offered: W.
View course details in MyPlan: BIOEN 455

BIOEN 457 Advanced Molecular Bioengineering (4) P. STAYTON
View course details in MyPlan: BIOEN 457

BIOEN 460 Neural Engineering (3) L. JOHNSON DYHR
Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Prerequisite: BIO 162 or BIO 220 and one of the following: MATH 308, AMATH 352 or AMATH 301. Offered: A.
View course details in MyPlan: BIOEN 460

BIOEN 461 Neural Engineering Tech Studio (4) L. JOHNSON DYHR
Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 460. Offered: W.
View course details in MyPlan: BIOEN 461

BIOEN 466 Neural Computation and Engineering Laboratory (3) NW L. JOHNSON DYHR
Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods. Prerequisite: AMATH 345 or BIOL 162 or BIOL 220 and one of the following: MATH 308, AMATH
BIOEN 467 Biochemical Engineering (3)  F. BANEYX
Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with CHEM E 467; W.
View course details in MyPlan: BIOEN 467

BIOEN 474 Immunoengineering (3)  K. WOODROW
Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases.
View course details in MyPlan: BIOEN 474

BIOEN 485 Computational Bioengineering (4)  W. THOMAS
Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems. Prerequisite: BIOEN 335; either AMATH 351 or MATH 307. Offered: Sp.
View course details in MyPlan: BIOEN 485

BIOEN 486 Tissue Engineering (3)  D. KIM
Tissue structure and function, scaffold design, applications to specialized tissues and organs. Prerequisite: BIOEN 315. Offered: A.
View course details in MyPlan: BIOEN 486

BIOEN 487 Bioengineering and Nanotechnology (4)  X. GAO
Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine. Prerequisite: CHEM 142, CHEM 144, or CHEM 145; BIOL 180.
View course details in MyPlan: BIOEN 487

BIOEN 488 Computational Protein Design (4)  V. DAGGETT
Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems. Prerequisite: BIOEN 315.
View course details in MyPlan: BIOEN 488

BIOEN 490 Engineering Materials for Biomedical Applications (3)
Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; A.
View course details in MyPlan: BIOEN 490

BIOEN 491 Controlled-Release Systems (3)  S. PUN
Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; W.
View course details in MyPlan: BIOEN 491
BIOEN 492 Surface Analysis (3)  B. RATNER
View course details in MyPlan: BIOEN 492

BIOEN 493 Advanced Surface Analysis (3)  D. CASTNER
Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with CHEM E 493; W.
View course details in MyPlan: BIOEN 493

BIOEN 494 Advanced Drug Delivery (3)  S. PUN
Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Prerequisite: BIOEN 491. Offered: Sp.
View course details in MyPlan: BIOEN 494

BIOEN 497 Bioengineering Education Outreach (1-2, max. 6)
Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities. Credit/no-credit only.
View course details in MyPlan: BIOEN 497

BIOEN 498 Special Topics (1-6, max. 15)
Topics of current interest in the field, offered as lectures, conferences, or laboratory. Offered: AWSpS.
View course details in MyPlan: BIOEN 498

BIOEN 499 Special Projects (1-6, max. 24)
Individual undergraduate bioengineering projects (research or independent study) under the supervision of an instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: BIOEN 499

BIOEN 501 Molecular Bioengineering (4)
Examines advanced topics in molecular diffusion, reaction kinetics, and convective transport modeling as applied to biological systems. Includes mathematical analysis and numerical simulation techniques applied to: Non-Fickian diffusion, rotational versus translational diffusion, immobilized enzyme kinetics, drug release, and gene delivery. Offered: A.
View course details in MyPlan: BIOEN 501

BIOEN 502 Cellular Bioengineering (4)
Covers basic principles of cell biology (including cell structure, function, and signaling), recombinant DNA/DNA technology, and specific examples of cellular bioengineering applications including gene delivery, RNA silencing, and tissue engineering. Prerequisite: BIOEN 501. Offered: W.
View course details in MyPlan: BIOEN 502

BIOEN 503 Systems Bioengineering (4)
Explores whole-body or organ physiology topics from an engineering perspective. Uses various model systems to elucidate engineering principles such as feedback control and homeostatic regulation. Includes real-world examples, computer modeling, and research design approaches. Prerequisite: BIOEN 502. Offered: Sp.
View course details in MyPlan: BIOEN 503

BIOEN 504 Introduction to Technology Commercialization (4)  M. O'DONNELL, B. RATNER
Explores essential business, legal, engineering, and other skills necessary to take new technology from research
to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing.

View course details in MyPlan: BIOEN 504

**BIOEN 505 Biomedical Entrepreneurship (4)**
Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing; introduces strategic planning, management of commercialization effort.

View course details in MyPlan: BIOEN 505

**BIOEN 506 Applying Technology Commercialization (1)**
Focuses knowledge of entrepreneurship within the spaces of medical devices, hardware/software, and energy, into a practical description of a potential start-up company. Corequisite: ENTRE 540. Credit/no-credit only.

View course details in MyPlan: BIOEN 506

**BIOEN 509 Bioengineering Departmental Seminar (1, max. 16)**
Research review and discussions centered on demonstrating approaches and solving scientific problems. Seminar lectures led by faculty and visiting faculty in Bioengineering and related disciplines. Credit/no-credit only. Offered: WSp.

View course details in MyPlan: BIOEN 509

**BIOEN 511 Biomaterials Seminar (1, max. 18) D. CASTNER, L. GAMBLE**
Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with CHEM E 511.

View course details in MyPlan: BIOEN 511

**BIOEN 513 Current Topics in Cardiac Physiology (1, max. 3) M. REGNIER**
Current research in cardiac physiology. Student presentation and discussions of current research methodologies. Credit/no-credit only.

View course details in MyPlan: BIOEN 513

**BIOEN 516 Medical Imaging Seminar (1)**
Weekly seminars, presented by UW faculty members, researchers and graduate students from UW, other academic institutions, and industry, on image computing and medical imaging. Topics include digital video, image processing, computer graphics, video/image compression, image analysis, algorithms and systems, pattern recognition, multimedia computer architectures, and other applications. Credit/no-credit only.

View course details in MyPlan: BIOEN 516

**BIOEN 518 Healthcare Transformation: Forces, Directions, Implications (2) L. HUNTSMAN**
Introduces the history, current realities and forces driving change in healthcare and provides an opportunity to use this knowledge to evaluate contemporary attempts to innovate. Addresses implications for those involved in the science, technology, business and policy of medicine. Offered: W.

View course details in MyPlan: BIOEN 518

**BIOEN 520 Musculoskeletal Biomechanics (4) R. CHING**
Engineering principles and mechanics applied to the musculoskeletal system including structure-function property relationships of musculoskeletal tissues, the biomechanics of joint systems, and applications of biomechanics in industry and research. Offered: jointly with M E 527; W.

View course details in MyPlan: BIOEN 520

**BIOEN 522 Biomechanics of Soft Tissue (3) J. SANDERS**
Applies soft tissue biomechanics to medical research. Develops specific biomechanical questions and experiments to address those aims or hypotheses.

View course details in MyPlan: BIOEN 522
BIOEN 523 Introduction to Synthetic Biology (3)
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with CSE 586/E E 523/MOLENG 525.

View course details in MyPlan: BIOEN 523

BIOEN 524 Advanced Systems and Synthetic Biology (3)
Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with CSE 587/E E 524; W.

View course details in MyPlan: BIOEN 524

BIOEN 530 Bioengineering Professional Series I: Literature Analysis (2) V. DAGGETT
Skills in scientific literature analysis developed through topics in bioengineering. Credit/no-credit only. Offered: A.

View course details in MyPlan: BIOEN 530

BIOEN 531 Bioengineering Professional Series II: Proposal Writing (2) M. SCATENA
Covers grant and fellowship proposal writing. Offered: W.

View course details in MyPlan: BIOEN 531

BIOEN 532 Bioengineering Professional Series III: Professional Skills Development (1) C. GIACHELLI
Key areas of professional development related to the bioengineering field, including oral communication, management, networking, and interviewing. Credit/no-credit only. Offered: Sp.

View course details in MyPlan: BIOEN 532

BIOEN 540 Bioengineering Clinical Practicum (4)
Clinical needs identification for the Master of Applied Bioengineering. Students observe diagnosis and treatment in a clinical setting to learn current practice, drivers, and constraints. students learn to identify and communicate clinical needs not met by current technology, but with potential bioengineering design solutions. Addresses ethics, patient privacy, and medical/academic communication.

View course details in MyPlan: BIOEN 540

BIOEN 541 Design Skills I: Clinical Needs Evaluation (4)
First quarter of Design Skills sequence in Master of Applied Bioengineering. Student teams initiate design process through needs evaluation, market analysis, prior art research, identification of design specifications, and brainstorming of design concepts. Prerequisite: BIOEN 540. Offered: A.

View course details in MyPlan: BIOEN 541

BIOEN 542 Design Skills II: Clinical Needs Evaluation (4)
Second quarter of Design Skills sequence. Students conceive, evaluate, and present design options to potential clinical users, utilize feedback to revise design concepts, and prepare a formal design proposal. Prerequisite: BIOEN 541 Offered: W.

View course details in MyPlan: BIOEN 542

BIOEN 543 Design Skills III: Project Implementation (4) M. BLANK
Culmination of the three-quarter Design Skills sequence in the Master of Applied Bioengineering. Students create and test a proof-of-principle deliverables for the device or system proposed in the previous quarter, and prepare a formal business plan. Prerequisite: BIOEN 542. Offered: Sp.

View course details in MyPlan: BIOEN 543

BIOEN 547 Fundamentals of Magnetic Resonance and Ultrasound Imaging (4) M. AVERKIOU
Principles and uses of biomedical imaging with magnetic resonance imaging (MRI) and ultrasound are
presented from an engineering viewpoint. Topics include the physics of MRI and ultrasound, principles of image formation, clinical applications, and the technology supporting important modes of modern imaging equipment. Prerequisite: BIOEN 316 or BIOEN 317. Offered: W.

**View course details in MyPlan: BIOEN 547**

**BIOEN 549 Therapeutic and Diagnostic Ultrasound (4) M. AVERKIOU**
Fundamentals of ultrasound leading to real-time ultrasound imaging; sound beams and signals, transducers, arrays and array beamforming; ultrasound interaction with tissue; Doppler and Color-flow; nonlinear imaging and contrast agents. Ultrasound bioeffects and therapeutic ultrasound: thermal therapies, HIFU, hyperthermia and BIO heat equation; cavitation, lithotripsy; drug delivery. Elastography, photoacoustic imaging. Prerequisite: BIOEN 316 or BIOEN 317. Offered: Sp.

**View course details in MyPlan: BIOEN 549**

**BIOEN 552 Microfabrication and Microfluidics (3) A. FOLCH, P. YAGER**
Studies the use of 2- and 3-dimensional structures in research and biomaterials, cells, and complex liquids. Focuses on micropatterning of surfaces and microfluidic chemical analytical systems. Co-requisite: BIOEN 553.

**View course details in MyPlan: BIOEN 552**

**BIOEN 553 Microfabrication and Microfluidics Laboratory (2) A. FOLCH, P. YAGER**
Studies the creation of 2- and 3-dimensional structures for use in research with biomaterials, cells, and complex liquids. Each student will fabricate at least one PDMS device and demonstrate its function. Co-requisite: BIOEN 552. Credit/no-credit only.

**View course details in MyPlan: BIOEN 553**

**BIOEN 555 Water, Nature, and Biological Function (3) G. POLLACK**
Explores emerging concepts of water at interfaces as a new and simpler way to understand many features of chemistry, physics, and biology. Considers new understanding in cell function, energy transduction, solar energy, flow, transport, weather, green science, and other basics of nature and engineering. Offered: Sp.

**View course details in MyPlan: BIOEN 555**

**BIOEN 557 Advanced Molecular Bioengineering (4) P. STAYTON**
Covers fundamentals of molecular recognition and design: thermodynamics, dynamics, and kinetics. Includes molecular design of macromolecules, recognition processes for current molecular engineering applications in biomedicine, and therapeutics based on cells. Offered: jointly with MOLENG 515; A.

**View course details in MyPlan: BIOEN 557**

**BIOEN 560 Neural Engineering (3) L. JOHNSON DYHR**
Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Offered: A.

**View course details in MyPlan: BIOEN 560**

**BIOEN 561 Neural Engineering Tech Studio (4) L. JOHNSON DYHR**
Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 560 Offered: W.

**View course details in MyPlan: BIOEN 561**

**BIOEN 566 Neural Computation and Engineering Laboratory (3)**
Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods.

**View course details in MyPlan: BIOEN 566**

**BIOEN 573 Biosensors and Biomedical Sensing (3) P. YAGER**
In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in

http://www.washington.edu/students/crsCat/bioeng.html
sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing.

View course details in MyPlan: BIOEN 573

**BIOEN 574 Immunoengineering (3) K. WOODROW**
Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases.

View course details in MyPlan: BIOEN 574

**BIOEN 576 Laboratory Techniques in Protein Engineering (4)**
Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or permission of instructor.

View course details in MyPlan: BIOEN 576

**BIOEN 577 Cell and Protein Reaction with Foreign Materials (3) T. HORBETT**
Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor.

View course details in MyPlan: BIOEN 577

**BIOEN 578 Biomembranes (3) P. YAGER**
Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water.

View course details in MyPlan: BIOEN 578

**BIOEN 579 Host Response to Biomaterials (3) C. GIACHELLI**
Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthetic use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently), or permission of instructor.

View course details in MyPlan: BIOEN 579

**BIOEN 585 Computational Bioengineering (4) W. THOMAS**
Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems.

View course details in MyPlan: BIOEN 585

**BIOEN 586 Tissue Engineering (3) D. KIM**
Tissue structure and function, scaffold design, applications to specialized tissues and organs. Offered: A.

View course details in MyPlan: BIOEN 586

**BIOEN 587 Bioengineering and Nanotechnology (4) Gao**
Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine.

View course details in MyPlan: BIOEN 587

**BIOEN 588 Computational Protein Design (4) V. DAGGETT**
Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes
molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems.

View course details in MyPlan: BIOEN 588

BIOEN 590 Advanced Topics in Biomaterials (3)
Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590.

View course details in MyPlan: BIOEN 590

BIOEN 591 Controlled Release Systems (3) S. PUN
Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: W.

View course details in MyPlan: BIOEN 591

BIOEN 592 Surface Analysis (3) B. RATNER
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectrosopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558.

View course details in MyPlan: BIOEN 592

BIOEN 593 Advanced Surface Analysis (3) D. CASTNER
Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with CHEM E 593; W.

View course details in MyPlan: BIOEN 593

BIOEN 594 Advanced Drug Delivery (3) S. PUN
Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: Sp.

View course details in MyPlan: BIOEN 594

BIOEN 598 Research Rotation (1-10, max. 30)
Research rotation in the laboratories of core or adjunct faculty in the Department of Bioengineering. Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: BIOEN 598

BIOEN 599 Special Topics in Bioengineering (1-6, max. 30)
Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic.

View course details in MyPlan: BIOEN 599

BIOEN 600 Independent Study or Research (*-)
Offered: AWSpS.

View course details in MyPlan: BIOEN 600

BIOEN 601 Internship (1-10, max. 10)
Bioengineering graduate internship program. Requires written report. Prerequisite: permission of supervisory
committee chair. Offered: AWSpS. View course details in MyPlan: BIOEN 601

**BIOEN 700 Master's Thesis (**)**
Offered: AWSpS. View course details in MyPlan: BIOEN 700

**BIOEN 800 Doctoral Dissertation (**)**
Offered: AWSpS. View course details in MyPlan: BIOEN 800
INTERSCHOOL OR INTERCOLLEGE PROGRAMS

BIOENGINEERING

PHARMACEUTICAL BIOENGINEERING

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

PHARBE 500 Molecular and Cellular Biology for Pharmaceutical Bioengineering I (4) K. THICKMAN
Case based examination of fundamental molecular processes that occur in organisms. Topics include structure and organization of prokaryotic and eukaryotic cells, prokaryotic and eukaryotic gene structure and regulation, signaling pathways, RNA, DNA, metagenomics, and systems biology. Integrates online literature/media resources and bioinformatics. Cultivates critical thinking approaches to latest developments. Offered: A. View course details in MyPlan: PHARBE 500

PHARBE 502 Pharmaceutics I (4)
Covers the drug development process for both small molecules and biological form discovery stage through the end of phase 1. Addresses the science, logistics, and regulatory environment of preclinical (pharmacology, PKDM, toxicology, CMC) and early clinical development. Offered: A. View course details in MyPlan: PHARBE 502

PHARBE 503 Pharmaceutics II (4)
Covers phases II and III of the drug development process. Topics include clinical study design, safety, pharmacology, and statistics. Provides an overview of the preparation and filing of the New Drug Application (NDA). Uses case studies to demonstrate key concepts. Prerequisite: PHARBE 502 or permission of instructor. Offered: W. View course details in MyPlan: PHARBE 503

PHARBE 505 Pathophysiology for Pharmaceutical Bioengineering (4) R. WONG
Introduction to human anatomy, physiology, molecular biology and cell biology of major organ systems. Emphasis on the structural, molecular, and cellular mechanisms of common pathological conditions (pathophysiology). Additional emphasis on pharmaceutics development for common pathologic states. Students will understand the basics of normal and aberrant human physiology. Offered: W. View course details in MyPlan: PHARBE 505
PHARBE 506 Pharmaceutical Bioengineering Seminar (2)  K. THICKMAN
Provides a deeper understanding of the biotech and pharmaceutical industries through a mix of scientific talks, presentations by industry leaders, and discussions with program alumni. Students also practice professional skills, such as resume and cover letter writing and interviewing skills. Credit/no-credit only. Offered: A.
View course details in MyPlan: PHARBE 506

PHARBE 510 Applied Pharmacokinetics (5)  E. KELLY
Covers basic principle of pharmacokinetics and its impact on treatment, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Offered: A.
View course details in MyPlan: PHARBE 510

PHARBE 511 Process Development (4)  Laursen
Examines the principles involved in designed and developing production processes for protein therapeutics. Covers technologies, methods, and unit operations used in the development and GMP manufacture of biopharmaceuticals. Includes interdependencies of upstream, downstream, analytical, formulation and drug delivery technologies, illustrated with key biochemical, chemical, and physical chemical reaction examples. Offered: W.
View course details in MyPlan: PHARBE 511

PHARBE 512 Formulation and Delivery (4)  Nehilla
Introduces drug delivery and formulation principles, systems, and applications. Reviews administration routes and associated delivery barriers, connection to drug pharmacokinetics/pharmacodynamics, and drug diffusion and permeation principles. Includes current and developmental biomaterials used for formulation and drug delivery systems. Offered: Sp.
View course details in MyPlan: PHARBE 512

PHARBE 513 Clinical Development (4)
Evaluates clinical development strategies including comprehensive drug candidate life cycle plan. Covers clinical trial design, FDA and Institutional Review Boards, ethics, consents, safety, and quality. Discusses target product profiles, phase III study synopses, informed consents, and SWOT analyses. Students present phase II results and debate go no go decisions. Offered: A.
View course details in MyPlan: PHARBE 513

PHARBE 520 Molecular Biotechnology (4)  To
Emphasizes concepts and the techniques/methodologies used in molecular biotechnologies. Uses practice-oriented lectures and laboratories to cover issue culture and assays, recombinant DNA methodologies such as SNA isolation, restriction mapping, cloning, site-directed mutagenesis, DNA sequencing, PCR techniques and applications, protein electrophoresis, ELISA analysis, and Western/Southern blotting methodologies. Offered: A.
View course details in MyPlan: PHARBE 520

PHARBE 521 Drug Discovery and Design (5)  D. BALDWIN
Explores general principles and current approaches involved in modern drug discovery and development. Includes specific aspects of human biology and disease, case studies in discovery, and the evolution of how these topics have merged. Covers novel drug discovery techniques, emerging non-standard therapeutics, and the history of drugs and drug discovery. Offered: A.
View course details in MyPlan: PHARBE 521

PHARBE 522 Molecular Targets and Drug Classes (4)  Wong
Discusses select medicinal compounds, emphasizing mechanism of action, biotransformation, and structural and physical properties governing absorption, distribution, and excretion. Design of therapeutics to focus on maximizing efficacy while reducing toxicities. Compounds include classical organic small-molecules, peptides, proteins, nucleic acids, lipids, carbohydrates, and other bioactive chemical classes. Offered: Sp.
View course details in MyPlan: PHARBE 522
PHARBE 523 Systems Biology and Bioinformatics (4)
Surveys methods in bioinformatics and systems biology, including genomics, proteomics, protein-folding prediction, phylogenetics, and simulations, making particular use of tools available online. Emphasizes student presentations. Offered: A.
View course details in MyPlan: PHARBE 523

University of Washington Course Descriptions

Global Health

Display as tabs

The Department of Global Health was established in 2007, bridging the schools of Medicine and Public Health, with a mandate to harness the expertise and interdisciplinary power of all 16 UW schools and colleges. The department is the second largest at the UW in terms of funding for research and training programs. Departmental efforts include 31 centers, programs, initiatives, and the Institute for Health Metrics and Evaluation.

The mission is to close the gap between the world’s one billion people who experience relatively good health and the five billion who experience much lower levels of health, through teaching (education, training, and mentoring), research, and service programs.

The department offers an undergraduate minor, a Master of Public Health, and two PhD options: global health, and pathobiology. Four graduate certificate offerings are available for graduate students, as well as a global health pathway for UW medical students. Current and emerging focus areas include health metrics and evaluation, infectious diseases, workforce development, health system strengthening and implementation science, climate change, global trauma and violence, global medicines safety, and a strong cross-cutting focus on social justice and equity.

Undergraduate Program

The Department of Global Health offers the following program:

- A minor in global health

Minor

Minor Requirements (30 credits):

1. Required courses (8 credits): G H 101/GEOG 180/JSIS B 180; and G H 210 or G H 410
2. Perspectives in global health series (3 credits): G H 401; G H 402; G H 403
3. Electives (to bring total to 30 credits): Minimum of one elective course from each of the four content areas selected from a list of approved courses available from the Department of Global Health website, [globalhealth.washington.edu/academics/undergraduate-minor/requirements](http://globalhealth.washington.edu/academics/undergraduate-minor/requirements)
4. Minimum 15 credits outside the student's major
5. Minimum 15 credits completed through the UW
6. Minimum 15 upper-division credits
Graduate Program

Master of Public Health

The Global Health MPH program emphasizes a social justice approach to global health with a focus on the social, economic, and political determinants of health, and the history and context of global responses to health problems. The core curriculum develops competencies in the basic tools of public health, including epidemiology, biostatistics, global health systems, environmental health, and social behavioral sciences. Courses in research methods and management are also required. A practicum provides hand-on experience with local or international agencies engaged in global health activities, and academic coursework culminates with independent scholarship leading to a research or practice thesis. The curriculum is highly interdisciplinary, with faculty and courses from across campus including natural and social sciences and the humanities. Case studies and applied learning are common approaches, and contributions by students provide a major component of the learning environment.

For current listings of MPH program options and their requirements, visit the program website.

Admission Requirements

Applicants must have completed at least a baccalaureate degree by the time of matriculation, and some tracks require at least two years of relevant post-college work or volunteer experience prior to matriculation as well. Each MPH track has its own admission requirements.

1. Completed Graduate School online application. Deadline midnight, December 1
2. Official scores from the general Graduate Record Examination (GRE), required for applicants who have not already earned a doctoral-level degree (e.g., MD, PhD, JD) from a U.S. institution of higher learning
   Unofficial transcripts: Applicants upload unofficial transcripts from each college and/or university attended into the online application.
3. Three recent letters of recommendation, preferably from former supervisors and professors
4. Personal statement, including background, goals, and research interests
5. Resume - maximum three pages

Degree Requirements

63 credits, for all MPH tracks
At least 30 credits must be from graduate-level, in-classroom courses, and at least 18 of these must be from global health in-classroom courses.

All tracks require a foundation course, epidemiology, biostatistics, environmental health, social and behavioral sciences, research methods, a practicum, and a thesis. Beyond these shared requirements, each track also has its own set of requirements. See program website for track-specific requirements.

**Doctor of Philosophy**

Program Manager
Institute for Health Metrics and Evaluation
2301 5th Avenue, Suite 600, Box 358210
Seattle, WA
(206) 897-2870
ghpdh@u.washington.edu

The Department of Global Health, in collaboration with the Institute for Health Metrics and Evaluation and Health Alliance International, has developed a unique PhD program, building on faculty expertise in the areas of metrics and implementation science. The program provides students the most innovative tools to advance global health solutions, and includes two emphasis areas:

*Metrics:* Students translate evidence into useful knowledge by learning and applying advanced quantitative methods, impact evaluation techniques, and analytic tools. Students design and develop new, innovative ways to tackle critical global health measurement challenges.

*Implementation Science:* Students identify and address barriers to effective implementation and scale-up of evidence-based interventions by developing and applying cutting-edge methodologies and analytical approaches.

For comprehensive information, see the PhD program website.

**Admission Requirements**

The department recruits students who wish to pursue a long-term career in global health, whether in academic institutions, ministries of health, non-governmental organizations, or the private sector. All indicators of future success, including past work, service, and research experience; level of enthusiasm and detail in letters of recommendation; previous academic records and performance on standardized tests; applicant’s written statement of purpose; and an ability to discuss research or practice work and future goals are considered. The department reviews all variables without a preset formula.

**Minimum Qualifications**

1. Bachelor’s degree from an accredited college or university in the United States, or its equivalent from a foreign institution. Strong candidates have prior master-level training or significant experience working in the global health field, ideally in a low-resource setting.

2. Demonstrated passion and commitment to the field of global health

3. High academic standing: Minimum 3.30 cumulative GPA in previous undergraduate-and graduate-degree work, though the department expects applicants to have a minimum 3.70 GPA.
4. Graduate Record Examination (GRE) scores greater than or equal to 120 (700) on the quantitative section

5. English proficiency: For students who have not completed a degree in an institution where English is the primary language of instruction, results from the Test of English as a Foreign Language (TOEFL) are required.

**Degree Requirements**

Minimum 96 credits

1. *Coursework:* Minimum 27 dissertation credits, 37 credits in core requirements, 16 credits in area of emphasis, and remaining credits in electives. See details about curriculum and course paths on program website.

2. Preliminary written examination
3. General examination
4. Research and dissertation
5. Final examination

INTERSCHOOL OR INTERCOLLEGE PROGRAMS
GLOBAL HEALTH

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

G H 101 Introduction to Global Health: Disparities, Determinants, Policies, and Outcomes (5) I&S S. GLOYD, M. SPARKE
Provides an introduction to global health, including: the burden and distribution of disease and mortality; the determinants of global health disparities; the making of global health policies; and the outcomes of global health interventions. Offered: jointly with GEOG 180/JSIS B 180; W.
View course details in MyPlan: G H 101

G H 210 Confronting Global Diseases: Introductory Biologic Principles and Context (3) NW M. PARSONS
Provides a broad introduction to the leading causes of disability and death globally. Covers the basic biologic and scientific principles of globally prevalent human health problems, including the connections between the biology of disease and current prevention and treatment interventions used in public health. Not intended for biological science majors. Offered: Sp.
View course details in MyPlan: G H 210

G H 220 Global Environmental Change and Public Health (3) I&S K. EBI, J. HESS
Humans are the primary drivers of global environmental changes that are changing the planet on the scale of geological forces. Students will be introduced to these changes and their consequences for human health and well-being, with a focus on climate change and its consequences. Offered: jointly with ENV H 220.
View course details in MyPlan: G H 220

G H 399 Global Health Study Abroad (1-5, max. 15) I&S
For participants in approved study abroad programs. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.
View course details in MyPlan: G H 399

G H 401 Core Topics in Global Health (1) Gonzales, Wade
Addresses a variety of foundational topics and central themes in global health, including the history and scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Credit/no-credit only. Offered: A.
View course details in MyPlan: G H 401
G H 402 Contemporary Issues in Global Health (1) J. BESCHTA, D. WADE
Explores contemporary topics in global health. Offered: W.
View course details in MyPlan: G H 402

G H 403 Multidisciplinary Perspectives in Global Health (1) Gonzales, Wade
Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: G H 403

G H 410 Advanced Biologic Principles of Global Diseases (3) NW R. COLER
Presents selected communicable and noncommunicable diseases of global health importance at an advanced level. Students learn about biological principles, host-pathogen interactions, and other factors that influence the burden of global health diseases. Prerequisite: either BIOL 180, G H 210, or MICROM 301. Offered: W.
View course details in MyPlan: G H 410

G H 418 Understanding and Managing the Health Risks of Climate Change (3) K. EBI, J. HESS
The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with ENV H 418.
View course details in MyPlan: G H 418

G H 419 War and Health (4) I&S A. HAGOPIAN, E. KANTER
Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 415; Sp.
View course details in MyPlan: G H 419

G H 446 Global Perspectives on Reproductive Health (3) I&S, DIV
Provides comprehensive overview of global reproductive health, with an emphasis on current issues and challenges in resource-limited settings. Students will be engaged in topics from diverse disciplines, including public health, demography, epidemiology, policy, sociology, and medicine. Topics covered include contraception, abortion, human rights, HIV, access to services, and politics.
View course details in MyPlan: G H 446

G H 456 Global Mental Health (3) I&S, DIV Rao
Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: Sp.
View course details in MyPlan: G H 456

G H 458 Global Violence and Health (3) I&S, DIV C. MOCK, D. RAO
Examines the socio-politico-cultural forces that give rise to violence and the impact of violence on population health. Discusses public health methods, policies, and interventions that can be used to decrease the occurrence and severity of violence in real world circumstances, including countries at all economic levels. Offered: W.
View course details in MyPlan: G H 458

G H 482 The Health of Populations (4) I&S, DIV
Explores what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago. Offered: jointly with HSERV 482.
View course details in MyPlan: G H 482
G H 490 Special Topics (1-5, max. 15)
Offered: AWSpS.
View course details in MyPlan: G H 490

G H 499 Undergraduate Research (1-15, max. 15)
Offered: AWSpS.
View course details in MyPlan: G H 499

G H 501 Core Topics in Global Health (1) Gonzales, Wade
Addresses a variety of foundational topics and central themes in global health, including the history and scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Offered: A.
View course details in MyPlan: G H 501

G H 502 Contemporary Issues in Global Health (1) J. BESCHTA, D. WADE
Explores contemporary topics in global health. Offered: W.
View course details in MyPlan: G H 502

G H 503 Multidisciplinary Perspectives in Global Health (1) Gonzales, Wade
Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic, and socio-political realities. Offered: Sp.
View course details in MyPlan: G H 503

G H 505 P-Advanced Global Health (2)
Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with MED 560.
View course details in MyPlan: G H 505

G H 511 Problems in Global Health ([0-4]-, max. 4) Gloyd
Explores social, political, economic, environmental determinants of developing countries' health; traces development of societal responses to problems. Includes: origins of primary healthcare; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: A.
View course details in MyPlan: G H 511

G H 514 Global Societal Determinants of Health (2-3) Bezruchka
Examines societal determinants of heath of nations around the globe. Asks why there is an increasing inequity in health outcomes today? Topics include early life, population health biology, medical care, mental health, and the environment. Offered: Sp.
View course details in MyPlan: G H 514

G H 516 Health and Human Rights (3)
Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with LAW H 540; W.
View course details in MyPlan: G H 516

G H 518 Understanding and Managing the Health Risks of Climate Change (3) K. EBI, J. HESS
The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate...
continues to change. Offered: jointly with ENV H 518.
View course details in MyPlan: G H 518

G H 519 War and Health (4) A. HAGOPIAN, E. KANTER
Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 515; Sp.
View course details in MyPlan: G H 519

G H 521 Leadership Development in Global Health (3)
Focus on enhancing ability to lead in complex global health environments. Self and group assessment, case studies, and small group work. Topics include personal and professional vision, mission, and values; communication and influencing strategies; understanding strengths and weaknesses as a leader. Offered: A.
View course details in MyPlan: G H 521

G H 522 Global Program Management and Leadership (3) Downer
Focuses on management and leadership skills for complex global health settings. Includes personal leadership strengths/values; management dilemmas, data-driven decisions; program planning design and evaluation; and resource management. Offered: W.
View course details in MyPlan: G H 522

G H 523 Policy Development and Advocacy for Global Health (3) Katz, Lane
Primarily taught through case- and problem-based learning and small group work, explores complex factors affecting global health policy and how context (e.g., ideology, culture, and history), international institutions, scientific knowledge, and stakeholder interests affect the structure of and changes to a nation's health system and its performance. Offered: Sp.
View course details in MyPlan: G H 523

G H 531 Research and Evaluation Methods in Global Health (3-4) Mock, O'Malley
Provides an overview of a range of evaluation and research designs used in global health. Students learn practical methodologies to obtain, validate, and analyze information regarding health status, services, and programs. Discusses usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, and qualitative methods. Offered: jointly with EPI 539.
View course details in MyPlan: G H 531

G H 532 Responsible Conduct of Research: Global and Local (3) A. DRAKE, C. FARQUHAR
Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Credit/no-credit only. Offered: jointly with EPI 586.
View course details in MyPlan: G H 532

G H 533 Survey Research Methods (4) A. MOKDAD
Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/HSERV 527.
View course details in MyPlan: G H 533

G H 538 Advanced Qualitative Methods in Anthropology and Public Health (5) J. PFEIFFER
Provides students with both a theoretical foundation in qualitative approaches to research in anthropology and public health and in-depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame research questions, design, appropriate research strategies that incorporate qualitative methods, and analyze data. Offered: jointly with ANTH 519/HSERV 521; Sp, even years.
View course details in MyPlan: G H 538
G H 539 Methods, Tools, and Data in Global Health (2) Gakidou
Familiarizes students with current global health issues and their analytical challenges. Introduces analytical methodologies, quantitative concepts, statistical packages applied to global health challenges, and software used in health metrics and evaluations research. (Two weeks). Credit/no-credit only. Offered: A.
View course details in MyPlan: G H 539

G H 541 Fundamentals of Implementation Science in Global Health (4-5) Sherr, Wasserheit
Provides an introduction to the emerging field of implementation research by outlining various methods that are applied to improving implementation (including applied engineering, management tools, health systems, and policy research), and using experiential case studies from global health leaders. Addresses barriers to effective replication and scale-up in local settings. Offered: Sp.
View course details in MyPlan: G H 541

G H 543 Global Health Pharmacy: Medicines, Practice, and Policy (2) J. BABIGUMIRA, A. STERGACHIS
Introduces the critical role of pharmaceuticals in addressing the major diseases affecting persons in resource-limited settings, such as HIV/AIDS, malaria, and tuberculosis. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoconomics, financing, intellectual property, and drug trade policies. Offered: W.
View course details in MyPlan: G H 543

G H 544 Maternal and Child Health in Low and Middle Income Countries (3) D. DENNO
Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544; W.
View course details in MyPlan: G H 544

G H 545 Child Health in Low and Middle Income Countries ([0-3]-, max. 3) Denno
Provides an understanding of the causes and functional effects of the most prominent child health problems. Examines trends and progress in global child health and explores potential explanations for these trends. Offered: Sp.
View course details in MyPlan: G H 545

G H 546 Global Perspectives on Reproductive Health (3) I&S, DIV
Provides comprehensive overview of global reproductive health, with an emphasis on current issues and challenges in resource-limited settings. Students will be engaged in topics from diverse disciplines, including public health, demography, epidemiology, policy, sociology, and medicine. Topics covered include contraception, abortion, human rights, HIV, access to services, and politics.
View course details in MyPlan: G H 546

G H 555 Nutrition in Developing Countries (3) Gorstein
Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp, odd years.
View course details in MyPlan: G H 555

G H 556 Global Mental Health (3) Rao
Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: Sp.
View course details in MyPlan: G H 556

G H 558 Global Violence and Health (3) C. MOCK, D. RAO
Examines the socio-politico-cultural forces that give rise to violence and the impact of violence on population health. Discusses public health methods, policies, and interventions that can be used to decrease the occurrence
and severity of violence in real world circumstances, including countries at all economic levels. Offered: W.

**G H 560 Principles of STD/HIV Research (2)** Graham, Winer
Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no-credit only. Offered: S.

**View course details in MyPlan: G H 560**

**G H 561 Tropical Medicine (1)** F. BUCKNER, P. POTTINGER
Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with MED 561; Sp.

**View course details in MyPlan: G H 561**

**G H 562 AIDS: A Multidisciplinary Approach (2)** C. FARQUHAR
Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/MED 530.

**View course details in MyPlan: G H 562**

**G H 563 HIV/STI Prevention Research Methods (3)** J. BAETEN, R. HEFFRON
Focuses on current research and implementation of HIV/STI prevention including biomedical, behavioral, and public health interventions. Includes analyzing strength of research evidence to support novel interventions, understanding key features of study design, and applying interventions that are most appropriate and feasible for specific settings and populations. Offered: jointly with EPI 549.

**View course details in MyPlan: G H 563**

**G H 566 Biochemistry and Genetics of Pathogens and Their Hosts (4)**
Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Instructors: L. Campbell Offered: jointly with PABIO 551; A.

**View course details in MyPlan: G H 566**

**G H 571 Essential of Clinical Care and Capacity Building in Low Income Countries (2)** Pak-Gorstein, Zunt
An interdisciplinary case-based forum of presentations by local and international lecturers and class discussions on realities of providing healthcare in low-income settings. Covers issues in prevention, socioeconomic underpinnings, management of medical and surgical conditions, and sustainable strategies to build capacity. Credit/no-credit only. Offered: W.

**View course details in MyPlan: G H 571**

**G H 572 Global Health Fieldwork: Preparation, Integration, Reentry (2)** S. GRAHAM
Prepares students for community-based global health experiences, and provides them the opportunity to share, discuss, and reflect on these experiences after returning to the United States. Explores the problems and promise of current global health strategies. Prerequisite: participation in International Health Opportunities Program or similar experience. Credit/no-credit only. Offered: S.

**View course details in MyPlan: G H 572**

**G H 573 Clinical Management of HIV (2-3)** M. CHUNG, H. KIM
Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-
limited settings. Offered: jointly with CONJ 553; Sp.
View course details in MyPlan: G H 573

G H 575 Global Health Leadership for the Clinician (3)
One-month intensive course for clinicians interested in careers in global health. Designed to teach the skills necessary to become future leaders in this field. Comprised of several different components, including field visits to local global health organizations, lectures, and small group case-based discussions. Credit/no-credit only. Offered: A.
View course details in MyPlan: G H 575

G H 576 Health in Complex Humanitarian Emergencies (2) D. TOWNES
Covers the principles of planning, implementing, and evaluating health programs for refugees and internally displaced persons during complex humanitarian emergencies in resource poor countries. Topics include rapid assessment; surveys; surveillance; nutrition; camp management; epidemiology of infectious diseases; water and sanitation; and vaccination campaigns during international relief operations for complex humanitarian emergencies. Credit/no-credit only. Offered: A.
View course details in MyPlan: G H 576

G H 580 Global Health Doctoral Seminar: Biology, Systems, and Measurement (2, max. 8) Gakidou, Lukehart, Sherr
Examines the most critical issues in global health and currently available solutions. Introduces complementary perspectives of pathobiology, metrics, and implementation science to build a multidisciplinary understanding of these issues, including effective and appropriate strategies for their control. Offered: AWSp.
View course details in MyPlan: G H 580

G H 590 Selected Topics in Global Health (1-5, max. 15)
Focuses on topics relevant to global health. Offered: AWSpS.
View course details in MyPlan: G H 590

G H 592 Program Seminars (1-6, max. 6)
Addresses specific educational needs of students within the Department of Global Health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: G H 592

G H 593 MPH Workshop (1, max. 3)
Highlights include presentations from fellow students, guest lecturers from various departments and visiting activists and scholars who share their interdisciplinary, global perspectives, and expertise. Students are invited to select topics and prepare student-led sessions. Prerequisite: first-year Global Health MPH students. Offered: AWSp.
View course details in MyPlan: G H 593

G H 595 Master's Practicum (1-6, max. 6)
Supervised practice experience providing an opportunity to apply knowledge and skills in a setting of relevance to global health. Prerequisite: permission of faculty adviser. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: G H 595

G H 600 Independent Study or Research (*-)
Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: G H 600

G H 700 Master's Thesis (*-)
Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: G H 700
G H 800 Doctoral Dissertation (*)
Prerequisite: permission of Graduate Program Advisor. Offered: AWSpS.
View course details in MyPlan: G H 800

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
INTERSCHOOL OR INTERCOLLEGE PROGRAMS
UNIVERSITY CONJOINT

Detailed course offerings (Time Schedule) are available for

- **Spring Quarter 2017**
- **Summer Quarter 2017**
- **Autumn Quarter 2017**

**UCONJ 100 Introduction to Health Professions (1) Garcia**
Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.
[View course details in MyPlan: UCONJ 100](#)

**UCONJ 290 Diversity Issues in the Healthcare Environment (1-2, max. 2) I&S**
Introduction to the complexity of the issues surrounding culture and health, the interrelatedness of ethic and cultural characteristics and healthcare access, health and healthcare concerns of specific communities, traditional and alternative health-care practices, and community-based promotion and disease prevention programs. Credit/no-credit only.
[View course details in MyPlan: UCONJ 290](#)

**UCONJ 411 Psychology of Aging (3) Kiyak**
Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.
[View course details in MyPlan: UCONJ 411](#)

**UCONJ 412 The Family in Later Life (3)**
Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; inter-generational relationships; economic, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.
[View course details in MyPlan: UCONJ 412](#)

**UCONJ 413 Current Issues in Aging (3)**
Describes the population trends at work in the United States and other developed nations with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term
care models.  
View course details in MyPlan: UCONJ 413

UCONJ 420 Biological Safety Practices (1) Kenny  
General introduction to appropriate laboratory procedures used for handling potentially hazardous biological agents. Particular focus on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no-credit only.  
View course details in MyPlan: UCONJ 420

UCONJ 422 Sexually Transmitted Diseases: An Overview (2) Gardner  
Clinically oriented course designed to provide a knowledge base for upper-division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.  
View course details in MyPlan: UCONJ 422

UCONJ 440 Biological Aspects of Aging (3)  
Introduction to aspects of the biology of human aging and functional changes associated with normal aging and with illnesses that may be present in the elderly. Explores the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.  
View course details in MyPlan: UCONJ 440

UCONJ 442 Social and Cultural Aspects of Aging (3)  
Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.  
View course details in MyPlan: UCONJ 442

UCONJ 500 Seminar in Interprofessional Collaboration ([1-3]-, max. 7)  
Interdisciplinary teams of students and community members placed in diverse urban settings address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and sociocultural sensitivity. Offered through Graduate School of Public Affairs. Offered: AWSp.  
View course details in MyPlan: UCONJ 500

UCONJ 504 Advanced Interdisciplinary Case Studies in Global Health (3) Gorstein, Kurth, Shell-Duncan  
Uses actual multidisciplinary case studies to (1) analyze quantitative parameters of diseases, (2) contrast the descriptive and analytic approaches of health sciences, anthropology, and nutritional sciences, (3) integrate diverse disciplinary perspectives into cohesive information, (4) organize class presentations, and (5) apply critical thinking in approaching complex health issues. Offered: Sp.  
View course details in MyPlan: UCONJ 504

UCONJ 510 Introductory Laboratory Based Biostatistics (2)  
Introduces methods of data description and statistical inference for experiments. Covers principles of design and analysis of experiments; descriptive statistics; comparison of group means and proportions; linear regression; and correlation. Emphasizes examples from laboratory-based biomedical sciences, and provides demonstrations using standard statistical programs.  
View course details in MyPlan: UCONJ 510

UCONJ 517 Interdisciplinary Clinical Research Methods Seminar (2)  
Provides an introduction to clinical/translational relational research methods, including selection of research questions, study design, measurement, data analysis, and practical aspects of conducting research in clinical settings. Prerequisite: Students from Health Sciences schools conducting research under the Multidisciplinary
Predoctoral Clinical Research Training Program. Credit/no-credit only. Offered: S.
View course details in MyPlan: UCONJ 517

UCONJ 520 Molecular Biophysics Research Seminar (1) Parson
A series of research seminars for faculty and students involved with the molecular biophysics program.
Credit/no-credit only.
View course details in MyPlan: UCONJ 520

UCONJ 524 Developmental Neurobiology (3)
Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation;
electrophysiological, morphological, and biochemical regulation of cellular phenotype; neuronal pathways
and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological,
morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology,
neuroanatomy, molecular neurobiology. Instructors: Raible, Reh Offered: Sp.
View course details in MyPlan: UCONJ 524

UCONJ 525 Overview of Faculty Research in Neurobiology (1)
Reviews research topics currently being studied in neurobiology. Student preparation consists of reading
pertinent articles published on each topic. Prerequisite: first-year graduate student in neurobiology. Credit/no-
credit only.
View course details in MyPlan: UCONJ 525

UCONJ 530 Issues in Indian Health (2)
Surveys historical and contemporary issues in Indian health. Covers Indian contributions to health, traditional
Indian medicine, current disease epidemiology, development of federal Indian health policy, the Indian Health
Service, tribal health programs, and consequences of major legislation on Indian health. Prerequisite: current
health science student or permission of instructor.
View course details in MyPlan: UCONJ 530

UCONJ 531 Introduction to Mind Body Medicine-An Experiential Elective (2)
Sessions contain a didactic component followed by an experiential component and cover a variety of self-care
techniques including meditation, exercise, and nutrition. Goals are to promote personal well being, a healthy
lifestyle, reduce burnout, and reduce academic difficulties. Credit/no-credit only.
View course details in MyPlan: UCONJ 531

UCONJ 532 Health Sciences Common Book Seminar (1, max. 4) R. ARNOLD
Covers material related to the current health sciences common book, and provides knowledge of key barriers
underserved populations face in obtaining adequate healthcare, and strategies health professions can use to
effectively care for underserved individuals. Guest speakers include community leaders. Service learning course.
Credit/no-credit only. Offered: W.
View course details in MyPlan: UCONJ 532

UCONJ 545 Emergency Preparedness for Health Professionals (1)
Introduces the roles of health professionals in preparing for community-wide disasters. Emergency preparedness
content for graduate and professional students in health sciences. First of two interdisciplinary courses focusing
on "all-hazards" preparedness. Credit/no-credit only.
View course details in MyPlan: UCONJ 545

UCONJ 546 Emergency Response for Health Professionals (2, max. 6)
Focuses on interdisciplinary emergency preparedness and response for graduate students in health professions.
Includes system and policy issues with emphasis on clinical relevance for health professionals. Second of two
interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.
View course details in MyPlan: UCONJ 546
UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3)
Historical and intergenerational antecedents of tribal psychiatric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for neuro-development and developmental psychopathology. Traditional vs. mental health and substance abuse assessment and treatment. Self as provider to tribal clients, communities, systems.
View course details in MyPlan: UCONJ 548

UCONJ 550 Healthcare in the Underserved Community (1)
Gives graduate/professional students in health sciences an introduction to health related issues faced by underserved populations. Credit/no-credit only.
View course details in MyPlan: UCONJ 550

UCONJ 584 Plant Tumors (1, max. 9)
Discussion of the literature of plant tumors and current research work being done in this area at the University. Offered cooperatively by the departments of Biochemistry, Biology, and Microbiology and Immunology. Prerequisite: offered only to persons actively pursuing work in this area. Instructors: Gordon Credit/no-credit only.
View course details in MyPlan: UCONJ 584

UCONJ 599 Selected Readings in Interdisciplinary Clinical Research (1, max. 6)
Analysis and synthesis of selected readings and works in progress related to multidisciplinary and interdisciplinary clinical research. Prerequisite: UCONJ 517; permission of instructor. Instructors: Marshall, Mitchell Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: UCONJ 599

UCONJ 624 Health Equity and Community Organizing (1) Arnold
Equips students with tools to organize themselves and others to address social and structural injustices that perpetuate health disparities. Didactic coursework complemented with opportunities to apply skills and gain confidence through hands-on collaboration with local leaders and engagement in community-driven listening and advocacy campaigns. Credit/no-credit only. Offered: AW.
View course details in MyPlan: UCONJ 624
School of Law

Department Overview

Dean
Kellye Y. Testy

Associate Deans
Steve Calandrillo
Penny A. Hazelton
Mary Hotchkiss
Peter Nicolas

Assistant Dean
Naomi Sanchez

Interim Assistant Dean
Stephanie Cox

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current School of Law catalog.

Facilities and Services

The School of Law, housed in William Gates Hall since 2003, is equipped with classroom, clinical, library, lounge, and office facilities. Eleven classrooms are equipped for multi-media presentations, wireless internet connection, and assistive-listening systems.

The Marian Gould Gallagher Law Library is among the largest university law collections on the West Coast. The collection currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.
Juris Doctor Program

The Juris Doctor (JD) degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. JD candidates are required to perform 60 hours of public-service legal work during the second or third year.

Admission

New students may enter the School of Law only in autumn quarter. For first-year students, instruction begins earlier than for upper-class students. Students must have earned a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, Newtown, PA 18940-0998. www.lsac.org

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in The Official Guide to U.S. Law Schools (2000 Edition). Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, $50) also is required.

Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply for admission with advanced standing, with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 10.

Applications are considered only if vacancies exist. Selection is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.
Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

**Financial Aid**

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, (206) 543-6101, offa@uw.edu. Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship or other factors may be considered for certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; uwlawaid@uw.edu.

**Inquiries**

A more detailed statement on admission policy and application procedure is available from the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; admissions@law.washington.edu; (206) 543-4078.

---

**Graduate Program**

Graduate Program Coordinator
William Gates Hall, Box 353020
(206) 543-4937
gradlaw@uw.edu

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LLM) in Asian and Comparative Law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (PhD) degree in Asian and Comparative Law only.

### Master of Laws

**Admission Requirements**

1. Minimum B or 3.00 GPA in the most recent two years of study.

2. U.S. applicants must have completed their first degree in law (JD or equivalent) at a school accredited by the American Bar Association.

3. International students must have a first degree in law (LLB, BLaw) or equivalent and a minimum TOEFL score of 580 or 237 (TOEFLC).

**Degree Requirements, Asian and Comparative Law**
36 credits, as follows:

1. *Required courses:* LAW B 551, LAW 600, LAW B 550; two courses in Asian and comparative law
2. *Elective courses:* Additional courses, chosen in consultation with adviser, to bring total credits to 36.

**Degree Requirements, Intellectual Property Law and Policy**

40 credits, to include:

1. *Required core courses:* LAW P 501, LAW P 510
2. *Additional requirement for students not trained in the common law system:* LAW P 503
3. At least 16 additional credits drawn from a list of approved elective courses.
4. Research project and thesis

**Degree Requirements, Law of Sustainable International Development**

40 credits, as follows:

1. 15 credits in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable international development students are required to take courses in at least three departments other than the Law School.
2. *Writing and Research Requirement:* Completion of a research paper is required and is generally satisfied by LAW B 578.
3. LAW A 545

**Degree Requirements, Taxation**

36 credits, as follows:

1. *Required courses:* LAW T 501, LAW T 502, LAW T 503, LAW T 504, LAW T 510, LAW T 511
2. *Core electives:* Two of the following courses: LAW T 515, LAW T 516, LAW T 521, LAW T 530
3. *Electives:* Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

**Doctor of Philosophy**

**Admission Requirements**

Admission to the PhD program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective PhD students must normally complete the LLM program before being accepted as PhD students. The School does, however, welcome applications from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

**Degree Requirements**

90 credits, to include:
1. An LLM degree is counted toward the credit necessary for the PhD program.

2. Doctoral thesis seminar (4 credits)

3. Other coursework (26-29 credits): Coursework varies according to student's research interest areas and is determined in consultation with Supervising Committee

4. Doctoral dissertation (27-30 credits)

Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu; (206) 543-4937.

Inquiries

Requests for applications and program brochures for all School of Law LLM programs except the LLM in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195.; gradlaw@uw.edu.

Requests for applications and program brochures for the LLM in taxation should be addressed to Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu.
SCHOOL OF LAW

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

LAW 100 Introduction to American Law (2-5, max. 5) I&S  
T. MYHRE
Examines the structure of the American legal system and how laws are made. Surveys key doctrinal areas of the law learning fundamental legal concepts, and explore how the law functions and evolves over time, including legal issues and decision-making related to statutory or common law. Offered: A.
View course details in MyPlan: LAW 100

LAW 300 Introduction to Law (3-6, max. 6) I&S
Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.
View course details in MyPlan: LAW 300

LAW 301 Introduction to Common Law Legal Reasoning (3) I&S
Examines legal reasoning based on case law precedent using short, modern judicial decisions, summarizing those decisions in case briefs, breaking legal rules down into their elements, applying rules to facts, and reasoning by analogy from judicial decisions to hypothetical fact patterns.
View course details in MyPlan: LAW 301

LAW 305 Global Health and Justice (3-5) I&S
View course details in MyPlan: LAW 305

LAW 310 Law, Science, and Technology (4) I&S
View course details in MyPlan: LAW 310

LAW 410 Problems in Professional Responsibility (4) I&S
View course details in MyPlan: LAW 410

LAW 415 Criminal Justice (3) I&S
Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.
View course details in MyPlan: LAW 415
LAW 416 International Contracting: Negotiation and Drafting (3) I&S
Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Open to nonlaw students only. Credit/no-credit only.
View course details in MyPlan: LAW 416

LAW 422 Copyright (3) I&S
View course details in MyPlan: LAW 422

LAW 429 Public Land Law (3) I&S
View course details in MyPlan: LAW 429

LAW 440 Legal Issues of Internet Law (3) I&S
Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.
View course details in MyPlan: LAW 440

LAW 442 Land Law and the Urban Environment (3) I&S
Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Open to law and nonlaw students. Credit/no-credit only.
View course details in MyPlan: LAW 442

LAW 443 The Legal Process I (3/5) I&S
The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students.
View course details in MyPlan: LAW 443

LAW 444 Constitution and American Public Education (3-6, max. 6) I&S
Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with EDLPS 444.
View course details in MyPlan: LAW 444

LAW 445 Major Issues in American Constitutional Law (3) I&S
Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court's recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and presidential powers. Open to law and nonlaw students.
View course details in MyPlan: LAW 445

LAW 447 Critical Perspectives in Law (3) I&S
Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.
View course details in MyPlan: LAW 447

LAW 476 International Economic Relations and Trade Policy (3) I&S
Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.
View course details in MyPlan: LAW 476
LAW 477 Law, Literature, and Film ([2-4]-, max. 4) VLPA/I&S
An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."
View course details in MyPlan: LAW 477

LAW A 543 Business Reorganization Under the Bankruptcy Code (4)
View course details in MyPlan: LAW A 543

LAW A 544 Transnational Commercial Law (1-4, max. 4)
Examines the political economy of transnational commercial law. Uses select international harmonization instruments (e.g. Cape Town Convention on International Interests in Mobile Equipment, UNCITRAL Model Law on Cross-Border Insolvency, Vienna Convention on Contracts for the International Sale of Goods) to
illustrate and critique different methodological and institutional approaches.
View course details in MyPlan: LAW A 544

LAW A 545 International Environmental Law (3-4)
View course details in MyPlan: LAW A 545

LAW A 546 Patents ([2-4]-, max. 4)
View course details in MyPlan: LAW A 546

LAW A 547 Critical Perspectives on Law Seminar ([2-4]-, max. 4)
Considers law from the point of view of Continental philosophy and critical social theory. Involves close readings and intensive discussion of canonical texts from various critical traditions of thinking about law. Students also write and present papers concerning themes raised by the readings. Offered: A.
View course details in MyPlan: LAW A 547

LAW A 548 Civil Rights ([2-6]-, max. 6)
View course details in MyPlan: LAW A 548

LAW A 549 Advanced Legal Research (4)
View course details in MyPlan: LAW A 549

LAW A 550 Constitutional Law ([2-8]-, max. 8)
View course details in MyPlan: LAW A 550

LAW A 551 Global Governance Seminar (3-4)
Introduces international and transnational regimes governing issues as varied as international economic inequality and instability; conflict and peace-building; humanitarian crises and intervention; and global environmental change. Explores principles of regime design and legal architecture. Evaluates the effectiveness and legitimacy of various modes of global governance.
View course details in MyPlan: LAW A 551

LAW A 552 Antitrust Law and Policy ([2-5]-, max. 5)
View course details in MyPlan: LAW A 552

LAW A 553 Feminist Jurisprudence (4)
Explores the intersections of law and sex, gender, and sexuality with the aid of various theoretical lenses, prominently feminist legal theory. Focuses on those areas of law where notions of sex, gender, and sexuality seem conflated and confused.
View course details in MyPlan: LAW A 553

LAW A 554 Labor Relations and the Law ([1-5]-, max. 5)
View course details in MyPlan: LAW A 554

LAW A 556 Employment Discrimination ([2-4]-, max. 4)
View course details in MyPlan: LAW A 556

LAW A 558 National Security Law Seminar ([2-6]-, max. 6)
Three-quarter seminar that provides an opportunity for study and research in selected legal issues relating to national security law and its processes and institutions. Prerequisite: LAW A 507. Instructors: Allen Offered: AWSp.
View course details in MyPlan: LAW A 558

LAW A 560 Employment Issues (2/3)
Examination of issues under selected employee protection laws. Analysis of the Fair Labor Standards Act, Workers' Compensation, and Social Security Act (related to retirement, disability, and supplemental income
benefits). Includes assessment of public assistance issues for low-wage workers. Prerequisite: LAW A 2004, LAW A 562, or permission of instructor.

**View course details in MyPlan: LAW A 560**

**LAW A 561 Law and Economics (2-4, max. 4)**
Offered: jointly with PUBPOL 519.

**View course details in MyPlan: LAW A 561**

**LAW A 562 Employment Law (3-5)**
Examines the law governing the employment relationship, including the establishment and termination of employment. Topics include employee duties, prohibited employment practices, regulation of wages, hours, and benefits of employment, workers' compensation, and occupational safety and health.

**View course details in MyPlan: LAW A 562**

**LAW A 563 Local Government Law (3)**

**View course details in MyPlan: LAW A 563**

**LAW A 564 American Legal History (1-4, max. 4)**
Reviews the American legal history from colonial times to the civil rights era. Readings cover early constitutionalism, the republican revolution, the antebellum movement, the end of slavery, the regulatory state, and rights of women and minority groups.

**View course details in MyPlan: LAW A 564**

**LAW A 565 American Indian Law (3-4)**

**View course details in MyPlan: LAW A 565**

**LAW A 566 Theories of Justice ([2-4]-, max. 4)**

**View course details in MyPlan: LAW A 566**

**LAW A 567 Closely Held Business Organizations (4)**
Examines elements of various unincorporated business forms and closely held corporations. Reviews relevant state statutes and case law related to each form relevant to advising small business clients on the choice of business form utilized in their ventures. Not open to students who have taken LAW A 515. Offered: A.

**View course details in MyPlan: LAW A 567**

**LAW A 568 Collective Bargaining and Labor Arbitration (2-4)**

**View course details in MyPlan: LAW A 568**

**LAW A 569 Investments Funds and Managers Seminar (3) Krug**
Explores U.S. regulation of investment managers and invest companies, including hedge funds and mutual funds. Topics draw heavily from federal securities laws, particularly the Investment Advisers Act and the Investment Company Act of 1940, and encompass regulatory developments/proposals and policy considerations underpinning investment industry regulation. Offered: Sp.

**View course details in MyPlan: LAW A 569**

**LAW A 571 International Organizations Seminar (3)**
Provides a critical introduction to some of the issues that are important to understanding how international organizations function today. Focuses on the role of international organizations in the modern forms of international law-making, regulation, and global governance.

**View course details in MyPlan: LAW A 571**

**LAW A 572 Criminal Justice Policy (4)**
Provides overview of key policy issues arising in the criminal justice system, such as mass incarceration, victim's rights movement, racial disparities, and wrongful conviction. Considers role of prosecutors and public defenders in contributing to or alleviating these problems, and how participants in the system can provide
leadership in addressing them.
View course details in MyPlan: LAW A 572

LAW A 574 International Law (2-4, max. 4)
View course details in MyPlan: LAW A 574

LAW A 575 Human Rights History: Rights, Revolutions, Republics, 1750-1850 (4) Walsh
Comparative constitutional history of rights lawyering. Includes political trials form French Revolution in Europe through postcolonial Jacksonian American Republic. Covers basic rhetoric of early human rights discourse: on treason, seditious libel, racial equality, servitude, labor conspiracy, religious liberty, consumer protection, and codification. Offered: W.
View course details in MyPlan: LAW A 575

LAW A 576 Cross-Border and International Criminal Law (3-4)
Examines responses by states and international organizations to international and transnational crimes. Covers substantive and procedural international criminal law, criminal responsibility, defenses and immunities, and the prosecution and punishment of international criminals in both national and in international tribunals. Prerequisite: LAW A 505. Instructors: Allen Offered: W.
View course details in MyPlan: LAW A 576

LAW A 577 Immigration Law (3/4)
View course details in MyPlan: LAW A 577

LAW A 578 International Business Transactions ([1-4]-, max. 4)
View course details in MyPlan: LAW A 578

LAW A 579 Child Advocacy Seminar (2-4, max. 4)
Includes child abuse and neglect, parental rights termination, paternity, and an overview of other practice areas as they intersect with issues of child abuse and neglect. Focuses on Washington law and practice, covering applicable substantive and procedural law, local practice rules, and professional responsibility. Offered: A.
View course details in MyPlan: LAW A 579

LAW A 580 Family Law (3-5)
View course details in MyPlan: LAW A 580

LAW A 581 Washington Constitutional Law ([1-4]-, max. 4)
Studies the history, structure, content, and role of state constitutions generally, and the development of Washington's constitution in particular. Examines the important distinctions between the federal constitution and state document, and the interplay between them. Covers state declarations of rights and the substantive sections of state constitutions that relate to the structure, role, and constraints. Offered: A.
View course details in MyPlan: LAW A 581

LAW A 582 Bankruptcy (3-4)
View course details in MyPlan: LAW A 582

LAW A 583 Insurance Law (4)
View course details in MyPlan: LAW A 583

LAW A 584 American Public School Law (3)
Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law in a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp.
View course details in MyPlan: LAW A 584
LAW A 585 Admiralty (3-5)
View course details in MyPlan: LAW A 585

LAW A 586 Advanced Family Law Seminar (2-4)
Discusses family law topics previously excluded or covered only minimally including: adoption, paternity, guardianship, third-party custody, parenting plans in the child welfare context, and family law in the intimate partner violence context. Prerequisite: LAW A 580.
View course details in MyPlan: LAW A 586

LAW A 589 Elder Law (4)
View course details in MyPlan: LAW A 589

LAW A 590 Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (2-5, max. 5)
View course details in MyPlan: LAW A 590

LAW A 591 Constitutional Law: Freedom of Expression (4-5)
View course details in MyPlan: LAW A 591

LAW A 592 Constitutional Law II ([2-8]-, max. 8)
Examines individual constitutional rights, primarily involving guarantees of due process and equal protection found in the 5th and 14th Amendments. Focuses on constitutionality of laws that classify people on basis of race, sex, sexual orientation, and other bases, as well as laws that restrict abortion, contraception, sexual activity, and other individual freedoms. Prerequisite: LAW A 507.
View course details in MyPlan: LAW A 592

LAW A 595 Jurisprudence and Legal Philosophy ([2-4]-, max. 4)
Surveys classic jurisprudential questions in the study of the nature, norms, and justifications of legal systems. Focuses on theories of adjudication, and covers the major twentieth and twenty-first century schools of jurisprudential thought, especially American Legal Realism, Natural Law, Legal Positivism, and Critical Legal Theory.
View course details in MyPlan: LAW A 595

LAW A 597 Intensive Legal Writing Workshop (2-4)
Focuses on how the rhetorical situation of legal writing influences choices about grammar, syntax, sentence structure, and paragraph structure. Students learn to use structures that best serve law-trained readers' needs for clear, concise, cohesive writing, and practice critical reading skills and techniques for self- and peer-editing.
View course details in MyPlan: LAW A 597

LAW A 598 Legal Research I (3)
View course details in MyPlan: LAW A 598

LAW A 599 Legal Research Methods (3/4)
Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LIS 592.
View course details in MyPlan: LAW A 599
SCHOOL OF LAW

Credit/no-credit only.
View course details in MyPlan: LAW B 539

LAW B 540 Japanese Law (3-4)
Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with JSIS A 540.
View course details in MyPlan: LAW B 540

LAW B 541 Chinese Law (4)
Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic, and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with JSIS A 541.
View course details in MyPlan: LAW B 541

LAW B 542 Comparative Korean Law (2-4)
Introduction to basic institutions and processes of the Korean legal systems. Emphasis on the historical development and traditional roles of law, the reception of Western law, and cultural and structural factors that influence the function of law and legal institutions.
View course details in MyPlan: LAW B 542

LAW B 543 Pro Bono Advocacy (2-, max. 4)
Explores the entrepreneurial, leadership, and lawyering skills required by student-led pro bono projects. Students examine best practices for building and sustaining organizational mission, vision, and core values. Students submit a reflective paper and a final report. Credit/no-credit only.
View course details in MyPlan: LAW B 543

LAW B 544 Civil Litigation in Comparative Context (2-4, max. 4)
Covers international jurisdiction, service process abroad, taking evidence abroad, applicable laws and treaties, comparison of trial procedures, enforcement of foreign judgments, and use of arbitration. Uses United States and translated Japanese cases.
View course details in MyPlan: LAW B 544

LAW B 545 Deposition Practice (3)
Offers intensive training in the applicable law, strategy, skills, and techniques of deposition practice. Combines traditional lectures and demonstrations with the case model developed by the National Institute for Trial Advocacy. Students have opportunities to prepare, take, and defend depositions, with substantial feedback and criticism. Prerequisite: LAW B 503; LAW B 520, either of which may be taken concurrently. Credit/no-credit only.
View course details in MyPlan: LAW B 545

LAW B 546 Cross-Border Business Transactions Between China and the United States (4)
Uses case study methodology to explore how United States law and Chinese economic policy and business laws are used in achieving Chinese-United States cross-border transactions. Open to law, business, and international studies students.
View course details in MyPlan: LAW B 546

LAW B 547 Comparative Constitutional Law (2-5)
Examines the constitutional structure of the U.S. government and the jurisprudence of U.S. constitutional courts,
and compares them with the constitutional structures and jurisprudence of several foreign countries.

View course details in MyPlan: LAW B 547

LAW B 548 Forensics (4) Bailey
Introduces the world of expert witnesses in both criminal and civil cases, looking at the forms of scientific and technical knowledge commonly involved. Covers not only the standard and rules governing expert testimony, but also provide opportunities for hand on experience. Offered: W.
View course details in MyPlan: LAW B 548

LAW B 549 Government Regulation of Business in Japan (3)
Offered: jointly with JSIS D 549.
View course details in MyPlan: LAW B 549

LAW B 550 American Legal Systems and Method ([1-6]-, max. 6)
Provides an integrated introduction to the basic structure and principles of the U.S. public and private law systems; the sources and techniques for basic legal research; and the analytical and writing skills expected of U.S. trained lawyers.
View course details in MyPlan: LAW B 550

View course details in MyPlan: LAW B 551

LAW B 552 Tutorial in Comparative Law ([1-4]-, max. 6)
View course details in MyPlan: LAW B 552

LAW B 553 Chinese Legal Tradition (3)
Offered: jointly with JSIS D 553.
View course details in MyPlan: LAW B 553

LAW B 554 Research Tutorial ([1-15]-, max. 15)
Introduces students to social science research methods that may be applicable to their research agenda. Focuses on reading, discussion, commentary, writing, and especially rewriting under close and targeted supervision by the professor. Offered: jointly with JSIS 595.
View course details in MyPlan: LAW B 554

LAW B 555 Roman Law (3)
View course details in MyPlan: LAW B 555

LAW B 556 Islamic Law (2-5)
Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 536.
View course details in MyPlan: LAW B 556

LAW B 557 Graduate Writing Seminar ([2-6]-, max. 6)
Through class instruction and individual tutoring, students select research topics, submit periodic writing assignments, and make formal presentations, culminating in the submission of a major research paper.
View course details in MyPlan: LAW B 557

LAW B 558 Doctoral Thesis Seminar (2-10, max. 10)
Students draft thesis abstracts, tables of contents, preliminary chapters, and present arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.
View course details in MyPlan: LAW B 558
LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)
View course details in MyPlan: LAW B 559

LAW B 560 Criminal Justice Externship (1-18, max. 18)
Credit/no-credit only.
View course details in MyPlan: LAW B 560

LAW B 561 International Law of the Sea (3-4)
View course details in MyPlan: LAW B 561

LAW B 562 Quantitative Methods (4)
Covers logic, applications, and limits of quantitative reasoning in the law. Includes mathematics from areas such as statistics, game theory, and social-choice theory, together with legal examples from areas such as discrimination, torts, and CLS to help (re)consider issues such as proof, deterrence, and identity politics.
View course details in MyPlan: LAW B 562

LAW B 563 Marine Law and Policy Seminar ([2-6]-, max. 6)
Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.
View course details in MyPlan: LAW B 563

LAW B 565 U.S. Coastal and Ocean Law (3-5)
Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.
View course details in MyPlan: LAW B 565

LAW B 566 Legal Problem Solving in the Corporate Context (3)
This course will focus on the lawyer as a problem-solver in advising corporate and business clients and, in particular, resolution of legal risks at the intersection of the duties of officers and directors, corporate governance, securities regulation, internal investigations, whistleblowers, alternative means of resolving disputes, and related issues. Offered: Sp.
View course details in MyPlan: LAW B 566

LAW B 567 General Externship Perspectives Seminar (2, max. 6)
Credit/no-credit only.
View course details in MyPlan: LAW B 567

LAW B 568 Field Seminar in Law, Rights, and Governance (3-5) K. FRIEDMAN, A. GODOY, S. PEKKANEN, M. SPARKE
Exposes students to theoretical and policy debates about the causes and consequences of legal evolution, rule of law, and a broad range of world governance concerns. Topics include human rights, markets, commerce, climate, environment, migration, institutions, justice, order, and rule of law. Offered: jointly with JSIS 599.
View course details in MyPlan: LAW B 568

LAW B 569 Development Innovations Laboratory (1-3, max. 6) J. LENGA
Students work in teams on international development and human rights projects for nonprofit/nongovernmental organizations under the close supervision of faculty. The work includes legal and factual research and often fact-gathering through interviews. Students present their findings and recommendations to client organizations orally and in writing. Offered: WSp.
View course details in MyPlan: LAW B 569

LAW B 570 Bio-entrepreneurship and the Law (3)
Covers legal issues in bio-entrepreneurship by tracking product development through a VC-backed start-up
company. View course details in MyPlan: LAW B 570

LAW B 571 PhD Colloquium (1-3, max. 3)
Designed for students to engage with research agendas in the academy and to build a professional skill set for success - from writing conference abstracts and preparing articles for publication to 'workshopping' papers and developing their dissertations. Credit/no-credit only. View course details in MyPlan: LAW B 571

LAW B 572 Election Law (3-4)
Examines the law of elections in the United States. Major themes include the design of electoral maps; the protection of voting rights; political parties and state action; money in politics; and the administration of elections. View course details in MyPlan: LAW B 572

LAW B 573 Supreme Court Decision Making (2-4, max. 4)
Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court's current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills. View course details in MyPlan: LAW B 573

LAW B 575 Family Law: Selected Topics (2-3)
Covers current cutting-edge and complex areas of family law that challenge traditional definitions of "family." Examines marriage, dissolution, and parenting disputes through the lens of "nontraditional" families and families created through medical intervention. Prerequisite: LAW A 580 or permission of instructor. Instructors: Mastroianni, Price Offered: A. View course details in MyPlan: LAW B 575

LAW B 576 Climate Justice Seminar ([1-6]-, max. 6) View course details in MyPlan: LAW B 576

LAW B 577 Law, Literature and Film ([2-4]-, max. 4)
An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world." View course details in MyPlan: LAW B 577

LAW B 578 Seminar on Legal Problems of Economic Development ([1-6]-, max. 6) View course details in MyPlan: LAW B 578

LAW B 579 Law and Development: History and Theories (3-4) Ramasastry
Examines the role of law in fostering economic and social development in developing countries, emerging markets, and nations in transition. Provides a historical overview of the role of law in alleviating poverty and exposes students to key theoretical perspectives. Offered: A. View course details in MyPlan: LAW B 579

LAW B 580 Externship Tutorial (2)
Credit/no-credit only. View course details in MyPlan: LAW B 580

LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6) View course details in MyPlan: LAW B 581
LAW B 582 International Development Practicum (1-8, max. 8)
Provides experience with an approved non-profit organization, business, judicial or legislative body, or intergovernmental or governmental agency on issues related to law and development and sustainable development. Students work under the guidance of experienced practitioners. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: LAW B 582

LAW B 583 Comparative Commercial Law (1-2, max. 2) J. WOOL
Examines commercial law from a comparative perspective. Using documents and business transactions representative of real-world practice, it considers core commercial law topics including contracts, property, guarantees, secured transactions, and bankruptcy and compares the handling of those topics by seven major legal systems. Offered: W.
View course details in MyPlan: LAW B 583

LAW B 584 Indigenous Governance Law ([2-6]-, max. 6)
Covers advanced topics in Indian Law. Prerequisite: LAW A 565 or permission of instructor.
View course details in MyPlan: LAW B 584

LAW B 585 Natural Resources Law ([1-4]-, max. 4)
View course details in MyPlan: LAW B 585

LAW B 586 Global Development Law and Policy Workshop (2-, max. 4) R. HEDIN, A. RAMASAstry
Students engage in hands on legal research to address current development challenges in partnership with key development organizations. Offered: WSp.
View course details in MyPlan: LAW B 586

LAW B 588 Title Leadership in Sustainable Development Colloquium (1-2, max. 2) A. RAMASAstry
Professional development colloquium for students in Sustainable international Development graduate program. Students will meet with experts from the nonprofit sector, governmental and intergovernmental organizations and the private sector to learn about different career paths in the field of sustainability. Students will learn about key skills necessary for career placement. Offered: Sp.
View course details in MyPlan: LAW B 588

Address two primary topics related to the Voting Rights Act of 1965, Sections 2 and 5, and their application today: 1) redistricting and minority representation; and 2) the protection or suppression of the right to vote. Also includes introductory research methods and statistical analysis.
View course details in MyPlan: LAW E 558

**LAW E 560 Contemporary Muslim Legal Systems Seminar (2-6, max. 6)**
Provides a forum for in-depth research of legal developments in nations where governments are trying to establish legal systems that ensure economic development and human rights, while at the same time ensuring that their law respects "Islamic norms." Prerequisite: LAW B 556. Instructors: Lombardi Offered: A.
View course details in MyPlan: LAW E 560

**LAW E 561 Critical Race Theory (2-4)**
Provides an overview of Critical Race Theory (CRT) and the contrasts between CRT and liberal and conservative analytical frameworks on race and the law. Examines the questions and criticisms raised about CRT, as well as the impact of the field on legal and political discourse.
View course details in MyPlan: LAW E 561

**LAW E 562 Legal Issues in Museums (4)**
Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with MUSEUM 562.
View course details in MyPlan: LAW E 562

**LAW E 566 Innocence Project Northwest Clinic (3-4, max. 12)**
Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.
View course details in MyPlan: LAW E 566

**LAW E 567 Technology Transfer Law and Policy Seminar (2) O'Conner**
Covers the law and policy affecting university and non-profit research commercialization and technology transfer. Focuses on the Bayh-Dole Act, the laws and regulations covering data, copyrightable works, materials, tax exempt issues, employee assignments, and other matters. Offered: W.
View course details in MyPlan: LAW E 567

**LAW E 568 Indian Law Clinic (4-, max. 12)**
Supervised practice component on Indian law practice and procedure and advocacy skills. Provide legal advice, brief services, and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWSp.
View course details in MyPlan: LAW E 568
LAW E 569 Advanced Mediation Practicum (3)  
Ewalt
Advanced clinical practicum in mediation under the supervision of the faculty and experienced mediators. Students convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW B 526, or have other comparable experience. Offered: A.
View course details in MyPlan: LAW E 569

LAW E 570 International Economic Relations and Comparative Trade Policy (3/4)
View course details in MyPlan: LAW E 570

LAW E 571 LatCrit Theory, Praxis and Community Seminar (2)
This course provides an introduction to the history of Latinas/os and the U.S. legal system and an overview of LatCrit Theory from its origins to its present focus with particular attention on contemporary legal and social issues affecting Latina/o communities.
View course details in MyPlan: LAW E 571

LAW E 572 Race and the Law (3-4)
Evaluates the legal regulation of race in the United States. Addresses the racial and legal history of major groups in the United States, including African-Americans, Asian-American, Latinos, Native Americans, and whites, and examines the nexus between law and the construction of race as a concept and locus of identity.
View course details in MyPlan: LAW E 572

LAW E 575 Veterans Legal Aid Clinic (3, max. 9)
Students provide legal aid to low income veterans on upgrading military discharges, child support, VA housing programs, correcting criminal convictions, reinstating suspended driver licenses, assistance before VA on overpayments or complex benefits issues. Specialized outreach and service provided to incarcerated veterans, veterans in treatment courts, women veterans and homeless/at-risk veterans.
View course details in MyPlan: LAW E 575

LAW E 578 LLM Early Bar Prep (2-8, max. 8)  
M. SHAW
Provides LLM students an early start on bar exam preparation. Students review heavily tested areas across several bar exam subject areas while learning test taking strategy for the Essay Multistate and MPT portions of the Washington UBE, NY, or CA bar exams. Offered: WSp.
View course details in MyPlan: LAW E 578

LAW E 579 International and Foreign Law Research (2-3)
Overview of international law materials. Examines primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties, and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.
View course details in MyPlan: LAW E 579

LAW E 580 Gender Violence and the Law (3-4)
Introduces substantive legal areas including: evidence and rape shield laws; protection orders; civil liability of perpetrators and third-parties, and restorative civil remedies in housing, employment, and education contexts. Looks at national trends and primarily focuses on Washington State Law.
View course details in MyPlan: LAW E 580

LAW E 581 Reproductive Rights and Justice Seminar (4)  
Ainsworth
Provides students with an in-depth study of the constitutional framework governing reproductive rights, as well as critiques of that framework from feminist theorist, those who oppose abortion and contraception, and those whose reproduction and sexuality have been historically marginalized and regulated. Studies different bases in the law for reproductive rights claims, including privacy, equality, and dignity. Offered: A.
View course details in MyPlan: LAW E 581
LAW E 582 Information Policy: Domestic and Global (5)
National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.
View course details in MyPlan: LAW E 582

LAW E 583 Globalization and the Law (1-6, max. 6)
Focuses on the rise of global law, intersection of national, international, and global law, and the legitimacy of global law.
View course details in MyPlan: LAW E 583

LAW E 588 Trademark and Unfair Competition Law (3) Hoffmann
Provides a comprehensive review of issues relating to protection of trademarks and other trade identity symbols under the common law and the Federal Lanham Act. Offered: A.
View course details in MyPlan: LAW E 588

LAW E 590 Incarcerated Parents Advocacy Clinic ([4-5]-, max. 9)
Students advocate for incarcerated parents seeking to preserve relationships with children despite incarceration. Supervised by clinic faculty, students represent incarcerated parents in dependency and other court proceedings, working with clients and families to maintain the parent-child relationship. Students develop interviewing and counseling, negotiations, and trial preparation skills. Credit/no-credit only.
View course details in MyPlan: LAW E 590

LAW E 591 Non-Profit Organizations Clinic (1-3, max. 3)
Provides students with an opportunity to represent a real client in setting up a non-profit organization and applying for tax-exempt status. Students draft multiple documents such as articles of incorporation, applications for tax-exempt status, and client communications. Credit/no-credit only.
View course details in MyPlan: LAW E 591

LAW E 592 Federal Appellate Advocacy (1-6, max. 6)
Representation of an otherwise pro se litigant in an appeal in the Ninth Circuit. Preparation of the opening and reply brief and conduct the oral argument. Requires substantial research, multiple drafts, and painstaking familiarity with the record. Prerequisite: permission of the instructor. Credit/no-credit only.
View course details in MyPlan: LAW E 592

LAW E 594 Regulatory Environmental Law and Policy ([1-12]-, max. 12)
Examines the applied and theoretical dimensions of environmental rule-making, with particular emphasis on the development of an administrative record. Students prepare written comments on pending rules proposed by governmental agencies. Prerequisite: either LAW A 527 or LAW B 585; LAW A 509, which may be taken concurrently. Credit/no-credit only.
View course details in MyPlan: LAW E 594

LAW E 595 Animal Law (3)
Examines substantive law and procedure, specific cases, legislation, and background societal mores that force an evolution and backlash in the level of jurisprudential and legislative comfort with new ways of seeing and speaking about animals other than humans. Offered: WSp.
View course details in MyPlan: LAW E 595

LAW E 596 Wildlife Law Seminar (3) Anderson, Knudsen
Covers the basic issues involved in the law of fish and wildlife management. Topics include the relationship between property and wildlife, federalism issues, and international regulatory regimes.
View course details in MyPlan: LAW E 596

LAW E 597 Global Warming and Justice Seminar (4) Rodgers
Explores case studies (worldwide but with an emphasis on indigenous peoples) addressing multiple legal
responses to the consequences of climate change. Explores remedies under U.S. and international law. Offered: WSp.

View course details in MyPlan: LAW E 597

**LAW E 598 Climate Change Law (3-4) Rodgers**
Develops student understanding of the consequences of anticipated climate change across a spectrum of issues that include human health, the Earth, and its oceans. Covers the practice of agriculture, revised energy futures, legislative responses to climate change, and local, state, regional, and tribal efforts to address it. Offered: Sp.

View course details in MyPlan: LAW E 598

**LAW E 599 Legislative Advocacy Clinic (2-6, max. 15)**
Clinical training in legislative and public policy advocacy. Topics include the legislative process, drafting commentary, advocacy, building a legislative agenda, working with coalitions, and ethics. Direct work with non-profit and other organizations advocating in the state legislature to develop and move legislation as well as respond to proposed legislation. Prerequisite: LAW A 579. Offered: AWSp.

SCHOOL OF LAW

LAW (HEALTH)

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

LAW H 501 Fundamentals of Health Law (4)
Topics include: healthcare reform; obligations to provide care (including EMTALA); medical decision-making law; private health insurance and managed care (including ERISA, HIPAA, and COBRA); Medicare; Medicaid and SCHIP; regulation of healthcare providers; staff privileges and hospital-physician contracts; tax exemption; antitrust, and fraud and abuse laws.
View course details in MyPlan: LAW H 501

LAW H 502 Medical Malpractice (3-4)
View course details in MyPlan: LAW H 502

LAW H 503 Medical Ethics and Jurisprudence (3-) Dudzinski, Kuszler
Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with B H 535.
View course details in MyPlan: LAW H 503

LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3)
Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/PHG 512; A.
View course details in MyPlan: LAW H 504

LAW H 506 International Bioethics, Social Justice, and Health Seminar (1, max. 3) Kuszler, Rivin
Explores case studies of ethical dilemmas in research and medical practice and violations of international human rights norms in the design, implementation, and evaluation of health programs and policies. Bioethics and human rights law are the foundational tools for critically evaluating global health impact. Offered: AWSp.
View course details in MyPlan: LAW H 506
LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2)
Reviews the problem of physicians failing to relieve pain of patients in the dying process and legal and ethical issues they face as well as cultural sources of the problem.
View course details in MyPlan: LAW H 507

LAW H 508 Beginning of Life: Rights and Choices (2)
Addresses the controversial legal issues engendered by our increasing control over the beginning of life. Focuses on the law, regulation, and policy implications of contraception; new reproductive and genetic technologies, including surrogate parenthood, sperm and egg donation, in-vitro fertilization, and other methods of conquering infertility; and abortion.
View course details in MyPlan: LAW H 508

LAW H 509 End of Life: Rights and Choices (2)
Address controversial legal issues engendered by our increasing control over the end of life. Focuses on patient autonomy issues at the end of life including withdrawal of life support, surrogate decision making, advance directives, and patient choice to hasten death with medical assistance (physician aid in dying). Offered: Sp.
View course details in MyPlan: LAW H 509

LAW H 510 Topics in Law and Medicine ([1-4]-, max. 4)
View course details in MyPlan: LAW H 510

LAW H 511 International Research Ethics, Law, and Policy (3) Kuszler, Rivin
Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with B H 553; A.
View course details in MyPlan: LAW H 511

LAW H 512 Public Health Law (2)
Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Offered: jointly with HSERV 551.
View course details in MyPlan: LAW H 512

LAW H 515 Global Health Law (3) Kuszler
Provides an examination of the legal, economic, social, ethical, and political aspects of global health. Explores the emergence of global health law as a multilateral tool to address health disparities and improve the health of the vulnerable. Offered: A.
View course details in MyPlan: LAW H 515

LAW H 516 Study Abroad: Global Health, Human Rights, and the Rights of the Child in Cambodia (10)
Study abroad exploring the theoretical underpinnings and practical aspects of the rights of the child in the context of Cambodia's health system, focusing on children with disabilities. Approaches the rights of the child from legal and health services perspectives, combining methodologies of research and analysis for practical application. Offered: S.
View course details in MyPlan: LAW H 516

LAW H 517 Legal Issues for Global Health Programs (2) J. Lane
Examines the role of the law, legal strategy and legal research in supporting and advancing global health programs. Provides students an outline of the legal issues impacting global health programs and instruction on working with local counsel and research partners in foreign jurisdictions. Offered: W.
View course details in MyPlan: LAW H 517

LAW H 518 Legal and Policy Solutions to Improve Global Health of Women, Adolescents, and Children (1-2, max. 2) J. Lenga-Long, B. Shah, J. Sylker
Explores specific examples of how legal and policy frameworks can impact health inequities for women, children, and adolescents. Teaches to formulate multi-disciplinary strategies to improve health outcomes. Credit/no-credit only. Offered: W.

View course details in MyPlan: LAW H 518

**LAW H 520 Genetics and the Law (3)**

Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: either LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523; Sp.

View course details in MyPlan: LAW H 520

**LAW H 521 Medicare and Medicaid Finance and Reimbursement (2-3)** *Gould, Williams*

Covers the history of Medicare and Medicaid, how they are administered, how eligibility is determined, payments are made, and financing is structured. Includes changes to both programs from the Affordable Care Act, how the federal government audits providers, and the available appeals. Offered: W.

View course details in MyPlan: LAW H 521

**LAW H 522 Affordable Care Act Seminar: Legal and Policy Issues in Health Reform Implementation (2)** *K. Merrikin, S. Thieme Sanford*

Delves into the Affordable Care Act, including its historical context, key provisions, policy choices, legal challenges, implementation issues and future directions. As part of the seminar, which utilizes a multi-disciplinary approach, each student analyses an ACA provision of interest.

View course details in MyPlan: LAW H 522

**LAW H 524 Forensic Evidence (3)**

Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.

View course details in MyPlan: LAW H 524

**LAW H 525 Business Transactions in Healthcare (3)** *Snyder*

Focuses on the complex business transactions involved in modern healthcare mergers. In addition to the transactional business aspects, the students also address government rules, regulations, and prohibitions that arise. Students in teams represent different sides of the transaction in this simulated experiential learning opportunity. Offered: W.

View course details in MyPlan: LAW H 525

**LAW H 526 Healthcare Employment Law (3)** *Lehmann*

Focuses on employment in health care settings, and will specifically cover "at will" employment and the development of implied and express individual employment contracts; recruiting and hiring; negotiated collective bargaining agreements; managing health care employees; and termination of employment. Offered: Sp.

View course details in MyPlan: LAW H 526

**LAW H 528 Health Law Practicum (1-6, max. 6)**

Provides experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to health law or policy. Students work under the guidance of experienced practitioners. Both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: LAW H 528

**LAW H 529 HIV and the Law: Legal and Political Developments of the AIDS Crisis (2-4, max. 4)** *Price*

Traces thirty years of the HIV/AIDS epidemic, beginning with the discovery of the disease through the present. Focuses on many of the socio-political-legal aspects of the HIV/IDS crisis, including discrimination, quarantine,
immigration, criminal law, insurance, public health, and family law issues. Offered: Sp.
View course details in MyPlan: LAW H 529

**LAW H 530 Disability Law and Policy (3-4)**
Considers the definition of disability as defined by statute (ADA, FRA), case law, and social perception. Focuses on education law and entitlements, access to and discrimination in employment, housing, public transportation, and healthcare.
View course details in MyPlan: LAW H 530

**LAW H 531 Health Law Advocacy (2-4, max. 4) Fox, Lenga-Long**
Explores select aspects of legal advocacy for vulnerable patients and surrogate decision-makers in healthcare settings. Focuses on practical, pragmatic solutions to complex health law advocacy issues, using both classroom participation and mock guardianship hearings. Offered: Sp.
View course details in MyPlan: LAW H 531

**LAW H 534 Mental Health and the Law (3)**
Covers medical and legal definitional issues as well as major civil and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutionalization/community-based treatment; the insanity defense; competency to stand trial; and punishment of the mentally ill convict.
View course details in MyPlan: LAW H 534

**LAW H 536 Research Ethics and Regulation (3) Mastroianni**
Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with B H 536; W.
View course details in MyPlan: LAW H 536

**LAW H 540 Health and Human Rights (3)**
Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with G H 516; W.
View course details in MyPlan: LAW H 540

**LAW H 545 FDA Law (3) Kuszler**
Surveys the scope of regulatory authority accorded to the FDA. Focuses on products used in medical care, notably pharmaceutical drugs, medical devices, and biologics. Considers food safety, regulation of cosmetics, and oversight of carcinogenic substances. Offered: Sp.
View course details in MyPlan: LAW H 545

**LAW H 550 Medical Products Liability Law (3)**
Focuses on product liability claims arising from defective design/development, manufacture, marketing, and distribution of medical technologies. Considers the concepts of strict liability, negligence, breach of warrant, and informed consent as well as the relative roles of state and federal law. Offered: W.
View course details in MyPlan: LAW H 550

**LAW H 579 Interactive Seminar (1, max. 30) B. WEIR**
Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with PHG 580; AWSp.
View course details in MyPlan: LAW H 579

**LAW H 580 Competition in Health Care (3)**
Examines the role competition and its opposite, regulation, play in the healthcare industry in the United States.
View course details in MyPlan: LAW H 580
**LAW H 582 Healthcare Fraud and Abuse (2-3)**
Considers federal and state laws that impose criminal and civil penalties on healthcare providers for activities ranging from payment for referrals, submissions of false claims, misconduct in medical research, the illegal disclosure of patient information, and the abuse and neglect of patients in long term care settings.
View course details in MyPlan: LAW H 582

**LAW H 590 Advanced Research and Writing Seminar in Health Law (2-, max. 4) Kuszler**
Dedicated research and writing seminar. Includes a substantial paper on a health law topic. Offered: WSp.
View course details in MyPlan: LAW H 590

**LAW H 599 Health Law Tutorial (1-4, max. 4)**
Focuses on a specialized area of health law. Prerequisite: limited to students in the graduate program in health law; must be approved by the program director. Offered: AWSp.
View course details in MyPlan: LAW H 599
SCHOOL OF LAW

SCHOOL OF LAW

LAW (INTELLECTUAL PROPERTY)

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

LAW P 501 Intellectual Property Law Core (6-8)
Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles, their underlying policies, and how the laws inter-relate. Not open to students who have taken LAW A 522, LAW A 546, LAW E 567, or LAW E 588. View course details in MyPlan: LAW P 501

LAW P 503 Introduction to American Legal Systems and Skills (2-3)
Introduces the U.S. system of state and federal courts in the context of intellectual property. Discusses how intellectual property laws come from the common law as well as state and federal statutes and regulations. Teaches legal research, writing, case briefing, and analysis skills. Offered: A. View course details in MyPlan: LAW P 503

LAW P 504 Economic Analysis of Intellectual Property (2-3)
Explores the intersection between intellectual property law and economics from both a macro and micro economic perspective; economic justification of intellectual property law; and portfolio management tools that can evaluate intellectual property protection as an investment. Prerequisite: either LAW P 501 or LAW E 567. Offered: W. View course details in MyPlan: LAW P 504

LAW P 505 International Intellectual Property Law (2-3)
Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either LAW A 522, LAW E 567, LAW E 588, or LAW P 501. View course details in MyPlan: LAW P 505

LAW P 506 Transnational Intellectual Property Law Theory and Practice (4) Takenaka
Studies comparative intellectual property law using a series of lectures, license exercises, and a mock trial. Consists of a series of lectures on campus followed by a one-week intensive transnational seminar hosted by a
LAW P 509 Antitrust and Intellectual Property Rights (2-4) *Bangasser*
Examines in-depth application of competition law and policy to the creation and exploration of intellectual property. Offered: Sp.
View course details in MyPlan: LAW P 509

LAW P 510 Advanced Research and Writing Seminar (2-, max. 4) *Gomulkiewicz*
Instructs IP LL.M students in the research and writing skills necessary to write a major legal research paper. Offered: A.
View course details in MyPlan: LAW P 510

LAW P 522 Advanced Copyright Law (2-5)
Advanced, in-depth study of copyright law and policy. Explores the boundaries of copyright protection and how copyright law relates to other intellectual property laws. Prerequisite: either LAW A 522, LAW E 567, or LAW P 501.
View course details in MyPlan: LAW P 522

LAW P 525 Intellectual Property Law Seminar ([1-4]-, max. 4)
Explores current controversies and important topics in intellectual property law and policy. Welcomes visiting speakers from industry, government, and the academy to discuss these cutting-edge issues.
View course details in MyPlan: LAW P 525

LAW P 528 LLM Intellectual Property Law Practicum (1-4, max. 6)
Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only.
View course details in MyPlan: LAW P 528

LAW P 535 Entertainment Law (3)
A primer on the various forms of legal protection (trade secrets, copyright, trademarks, publicity law, and licensing) that form the bases for various types of entertainment. Considers key industries: books, music, movies, television, internet, and computer games. Prerequisite: LAW P 501 or permission of the instructor.
View course details in MyPlan: LAW P 535

LAW P 539 Law, Technology, and Development (2-3) *Snyder, Winn*
Provides an overview of selected principles and theories of development economies, and considers the implications of technological innovation, intellectual property rights, government regulation, trade policy, and technical standards for the achievement of development objectives. Mass media coverage of current developments enriches class discussions.
View course details in MyPlan: LAW P 539

LAW P 543 Intellectual Property Law in East Asia (2-3)
View course details in MyPlan: LAW P 543

LAW P 545 Advanced Patent Law Seminar (3)
Studies public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Prerequisite: either LAW A 546 or LAW P 501. Instructors: Taylor Offered: W.
View course details in MyPlan: LAW P 545

LAW P 546 Advanced Trademark Law (3)
Covers advanced procedural and substantive topics of trademark law including protection of trade dress, online
trademark infringement, and global trademark protection including gray market issues. Students write and present a research paper on a topic related to trademark law and policy. Prerequisite: either LAW P 501 or LAW P 567 Instructors: Takenaka Offered: W.

View course details in MyPlan: LAW P 546

LAW P 547 Legal Protection for Computer Software (3)
Addresses copyright, patent, trademark, trade dress, trade secret, and contract protection for software. Also addresses how the law places boundaries around legal protection through anti-trust law and the doctrines of fair use and preemption.

View course details in MyPlan: LAW P 547

LAW P 548 Litigation Strategies in Technology Protection (3)
Deals with procedural and substantive legal issues in enforcement of patents. Proceeds through a litigation in the order that parties normally would. Teaches substantive legal issues in conjunction with procedural and strategic considerations. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

View course details in MyPlan: LAW P 548

LAW P 550 Patent Prosecution (4)
Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

View course details in MyPlan: LAW P 550

LAW P 551 Patent Prosecution and Counseling Practicum (4) T. CULBERT
Explores the representation of under-resourced investors in prosecuting patent applications before the United States Patent and Trademark Office. Practicing patent attorneys guide the students on the mechanics of patent prosecution. A weekly lecture will provide instruction on patent law fundamentals. Classroom time will include small group collaborative exercises.

View course details in MyPlan: LAW P 551

LAW P 552 Strategic Intellectual Property Commercialization (3)
Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

View course details in MyPlan: LAW P 552

LAW P 567 Survey of Intellectual Property (3-6, max. 6)
Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeking a certificate in intellectual property law and policy. Designed as an alternative to Patents, Trademark and Unfair Competition Law, and Copyrights. Prerequisite: either LAW A 522, LAW A 546, LAW E 588, or LAW P 501. Instructors: O’Connor Offered: W.

View course details in MyPlan: LAW P 567

LAW P 577 Drafting Intellectual Property Licenses (3)
Covers advanced drafting and negotiating licenses and other technology agreements. Credit/no-credit only.

View course details in MyPlan: LAW P 577

LAW P 589 IP Innovations in Science and Technology (2-, max. 6) Takenaka
Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

View course details in MyPlan: LAW P 589
LAW P 590 Graduate Intellectual Property Law Tutorial (1-4, max. 4)
Focuses on a specialized area of intellectual property law. Limited to students in the graduate program in intellectual property law and policy. Tutorial must be approved by the program director.

View course details in MyPlan: LAW P 590
SCHOOL OF LAW

SCHOOL OF LAW

LAW (TAXATION)

Addresses the fundamental issues of the taxation of income related to businesses and investments. Topics include business deductions; capital expenditures; depreciation; below market loans; non-recourse debt; methods of accounting; gains and losses; like-kind exchanges; installment sales; passive activity losses and credits; and the at-risk rules. Offered: A.
*View course details in MyPlan: LAW T 504*

**LAW T 505 Introduction to Income Taxation (2)**
Addresses a number of fundamental income tax concepts, including the computation of individual tax liability, statutory exclusions, deductions, and gains. Also deals with issues related to character and timing.
*View course details in MyPlan: LAW T 505*

**LAW T 506 Tax Practice and Skills (1-4, max. 4)**
Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative authority of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research. Credit/no-credit only.
*View course details in MyPlan: LAW T 506*

**LAW T 507 Federal Tax Policy Seminar (2-4, max. 4)**
Examines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.
*View course details in MyPlan: LAW T 507*
LAW T 510 Estate and Gift Taxation (3)
View course details in MyPlan: LAW T 510

LAW T 511 Taxation of Partners and Partnerships ([1-4]-, max. 4)
View course details in MyPlan: LAW T 511

LAW T 512 Exempt Organizations ([2-4]-, max. 4)
View course details in MyPlan: LAW T 512

LAW T 513 Estate Planning (3)
View course details in MyPlan: LAW T 513

LAW T 514 Drafting Estate Planning Documents (2)
Includes the drafting of several documents used in contemporary estate planning practice, including wills, trusts, client letters, powers of attorney, healthcare directives, gift and estate tax returns, and opinion letters.
Prerequisite: LAW T 513, which may be taken concurrently. Instructors: Adams Offered: Sp.
View course details in MyPlan: LAW T 514

LAW T 515 International Taxation I (3)
View course details in MyPlan: LAW T 515

LAW T 516 International Taxation II (3)
View course details in MyPlan: LAW T 516

LAW T 517 Estate and Gift Taxation II (2)
View course details in MyPlan: LAW T 517

LAW T 518 Taxation of S Corporations (2)
View course details in MyPlan: LAW T 518

LAW T 519 Canadian-United States Tax Issues (2)
Overview to various cross-border issues, including the Canadian income tax (and its GST tax), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation, and U.S. investment in Canada and similar repatriation issues.
View course details in MyPlan: LAW T 519

LAW T 520 Professional Regulation of Tax Lawyers (2-3)
Addresses the professional regulation of tax lawyers by Congress, the IRS, state bars, and professional associations. May address legal malpractice and criminal liability issues for tax lawyers.
View course details in MyPlan: LAW T 520

LAW T 521 Compensation and Benefits I (3)
View course details in MyPlan: LAW T 521

LAW T 522 Compensation and Benefits II (2)
View course details in MyPlan: LAW T 522

LAW T 523 International Estate Planning (2)
View course details in MyPlan: LAW T 523

LAW T 524 Transfer Pricing Seminar (2) Andrade
Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm's length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.
View course details in MyPlan: LAW T 524
LAW T 525 Advising Privately-Owned Businesses (3)
Explores the role of the lawyer as an adviser through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.

View course details in MyPlan: LAW T 525

LAW T 526 Federal Tax Clinic ([2/3]-, max. 9)
Clinical training in federal tax litigation under the supervision of members of the law school faculty.

View course details in MyPlan: LAW T 526

LAW T 527 Taxation of Financial Instruments (2)
Examines the classification and tax consequences of various financial instruments including: fixed, variable, and contingent rate debt instruments; secondary market transactions in debt instruments, such as coupon stripping and market discount purchases; and transactions in common stock-equity derivatives, such as notional principal contracts, hedging transactions, and monetization strategies.

View course details in MyPlan: LAW T 527

LAW T 528 Graduate Tax Practicum (1-6, max. 6)
Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit. Credit/no-credit only.

View course details in MyPlan: LAW T 528

LAW T 529 International Tax Practice Seminar (2-3) Kadet
Utilizes case studies of real-world, multi-faceted international business transactions to develop the knowledge and skills to apply international tax principles and tools to both inbound and outbound investments. Offered: Sp.

View course details in MyPlan: LAW T 529

LAW T 530 Tax Issues in Mergers and Acquisitions (2-3)
Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.

View course details in MyPlan: LAW T 530

LAW T 531 Advanced Transactional Tax Problems (2)
Examination (through case studies) of consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

View course details in MyPlan: LAW T 531

LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3)

View course details in MyPlan: LAW T 532

LAW T 533 Tax Crimes: Investigations, Prosecutions, and Penalties (2) Chiconie
Focuses on elements of tax and related crimes with a view of the governmental investigative tools and powers, including IRS summonses, search warrants, and Grand Jury investigations. Covers taxpayer's rights and defenses in a criminal case; the IRS voluntary disclosure program; and the elements of civil penalties. Offered: AWSp.

View course details in MyPlan: LAW T 533

LAW T 534 State and Local Taxation (2)

View course details in MyPlan: LAW T 534

LAW T 536 Taxation of Trans-Pacific Transactions (2-3)

View course details in MyPlan: LAW T 536
LAW T 537 Business Planning ([2-6]-, max. 6)
View course details in MyPlan: LAW T 537

LAW T 538 Estate Planning for Business Interests (2-3)
Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510
View course details in MyPlan: LAW T 538

LAW T 539 Matrimonial Tax (2)
Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child support, and marital property transfers incident to divorce.
View course details in MyPlan: LAW T 539

LAW T 540 Federal Tax Research and Writing (2-4)
View course details in MyPlan: LAW T 540

LAW T 541 Limited Liability Companies (2)
View course details in MyPlan: LAW T 541

LAW T 542 State and Local Tax II: Advanced State Tax Concepts (2) Okimoto
Covers the interplay between the federal tax and state tax systems. Covers attributional and economic nexus, unitary business principle, state combined reporting versus federal consolidated filings, expense disallowance, adjustments to the federal tax base, fair appointment, alternative business tax, and state tax implications of mergers and acquisitions. Offered: W.
View course details in MyPlan: LAW T 542

LAW T 543 Advanced Partnership Tax (2)
Builds on the material covered in the basic course, Taxation of Partners and Partnership. Covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale or exchange of partnership interests. Prerequisite: LAW T 511.
View course details in MyPlan: LAW T 543

LAW T 544 Tax Aspects of Charitable Giving (2)
Examines income, gift, and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.
View course details in MyPlan: LAW T 544

LAW T 545 International Taxation of Intellectual Property (2) Smith
Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-sharing arrangement, and the use of intangible holding companies.
View course details in MyPlan: LAW T 545

LAW T 546 Taxation of Real Estate Interests (2)
An in-depth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to structuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss
rules in real estate.
View course details in MyPlan: LAW T 546

**LAW T 547 International Taxation of Electronic Commerce (2-, max. 4)**
Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.
View course details in MyPlan: LAW T 547

**LAW T 548 Tax Writing (2)**
Designed to improve writing skills as they relate to practice of tax law. Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice.
View course details in MyPlan: LAW T 548

**LAW T 549 International Merger and Acquisition Transactions (2)**
Examines the rules applicable to international merger and acquisition transactions, both tax-deferred and table, including the anti-inversion rules of 7874 and the rules under 367 for a variety for tax-deferred transaction structures. Also covers the unique considerations applicable to taxable acquisitions of foreign target companies.
View course details in MyPlan: LAW T 549

**LAW T 550 Global Perspectives on International Taxation (2)**
Concentrates on the global perspectives on international taxation with an experiential and problem-based approach to learning. Each class addresses a separate issue in international taxation from a particular jurisdiction and will focus on legal regimes, theory, and practical application. Offered: W.
View course details in MyPlan: LAW T 550

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 11, 2017
School of Medicine

School Overview

Dean
Paul G. Ramsey
C314 Health Sciences

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Seattle Children's hospital, Northwest Hospital & Medical Center, Valley Medical Center, and the Veterans Affairs Puget Sound Healthcare System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits approximately 240 medical students to its first-year class and has a total enrollment of over 1000 students pursuing the Doctor of Medicine degree. The full-time faculty numbers more than 2,100 members and there are more than 4,500 clinical faculty located throughout the WWAMI region. The affiliated University residency-training network enrolls more than 1,200 house officers. Enrollment in the graduate programs in the basic sciences exceeds 600 students, and approximately 1,000 postdoctoral fellows are enrolled in advanced training programs. The School has baccalaureate and/or graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

WWAMI Program

The WWAMI program was initiated in 1971 as an effort to address the maldistribution and shortage of physicians in the Northwest region, provide a broader range of educational opportunities for students, and address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

Foundations of Science Phase Training
The University of Washington School of Medicine is nationally recognized for its regional training program (WWAMI). In addition to providing unique clinical learning opportunities, the WWAMI program allows a small-group learning experience at the regional training sites, which many students prefer. Students from Washington (Spokane), Alaska, Montana, and Idaho complete their 18-month foundational curriculum in small learning groups in their respective home states. Wyoming students complete their first 12-month foundational curriculum in Wyoming. The state of Washington provides two sites for medical students to complete their 18-month foundations curriculum:

**Seattle:** uwmedicine.washington.edu/Education/Md-Program

**Spokane:** www.medicalsciences.wsu.edu/prospectivestudents/wwamiprograminfo.html

Small group learning experiences are available in Spokane. All Washington residents are required to rank one or more of these two sites in order of preference in their secondary application. Every effort is made to match accepted Washington students with one of their preferred sites.

More information and video testimonials from first-year Spokane medical students are available at: uwmedicine.washington.edu/Education/MD-Program/Admissions/WWAMI-First-Year/Pages/default.Aspx

Offers of acceptance are conditional upon agreement to participate in the WWAMI program.

**Patient Care Phase Training**

At the conclusion of the foundations of science phase, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described below. As part of clinical training, students complete clerkships at the UW, at its affiliated hospitals, or at community clinical units located in the five-state region. During third- and fourth-year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships through the WWAMI region.

### Academic Programs

**Bachelor of Science**

A program leading to a baccalaureate degree with a major in [microbiology](#) is offered through the College of Arts and Sciences.

**Bachelor of Clinical Health Sciences**

A program leading to a baccalaureate degree with a major in clinical health services is offered through the MEDEX program.

**Bachelor of Science in Medical Technology**

A curriculum in medical laboratory science is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists.
for a variety of employment opportunities. Information concerning admission to the medical laboratory science program appears under Laboratory Medicine in this catalog.

**Bachelor of Science in Prosthetics and Orthotics**

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under Rehabilitation Medicine in this catalog.

**MEDEX Northwest Physician Assistant Training**

MEDEX Northwest, UW School of Medicine, is a program designed to train physician assistants. The program has been in existence since 1978 and is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX currently trains approximately 80 students annually in three didactic training sites (Seattle, Yakima, and Spokane). Discussions are currently underway to have a fourth training site in Anchorage, AK. Students return to their home communities in the WWAMI region (Washington, Wyoming, Alaska, Montana, Idaho) plus a variety of sites in Oregon and Nevada for their clinical year of training.

MEDEX Northwest is currently an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of the didactic training sites. The final four quarters are spent in clinical experiences throughout the Northwest region. At the completion of the program, students are eligible to sit for the National Certifying Examination for Physician Assistants.

**Master of Occupational Therapy**

The Department of Rehabilitation Medicine offers a graduate degree in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under Rehabilitation Medicine in this catalog.

**Doctor of Physical Therapy**

The Department of Rehabilitation Medicine offers a graduate degree in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under Rehabilitation Medicine in this catalog.

**Master of Science and Doctor of Philosophy**

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of Biochemistry, Bioengineering, Biological Structure, Immunology, Microbiology, Pathology, Pharmacology, and Physiology and Biophysics. Master's degree programs are offered by the departments of Laboratory Medicine, Medical History and Ethics, and Rehabilitation Medicine. Students may work toward these degrees concurrently with the MD degree, taking additional years beyond the typical four-year medical curriculum.
Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

**Doctor of Medicine**

Upon completion of the curriculum of the School of Medicine, the MD degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

**Admission**

(Procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.)

**Selection Factors**

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of healthcare delivery issues are desired. Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This examination must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admission process; however, if accepted, the applicant is required to take the MCAT prior to matriculation.

The following science course requirements must be completed before matriculation but preferably by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) physics, 4 semester/6 quarter hours; (c) biology, 8 semester/12 quarter hours; and (d) other ("open") science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and is taught with the presumption that participants have already mastered the
fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.

Students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.

Completion of three years of coursework at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor’s degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

Pre-Medical Requirements

The following pre-medical course requirements must be completed prior to matriculation but preferably by the time of application; undergraduate or post-baccalaureate courses must be completed at a college or university accredited by the appropriate regional accrediting body. All candidates must demonstrate substantial academic ability in their major field as well as in the required science courses. Candidates should be proficient in the use of the English language and basic mathematics, and are expected to have a basic understanding of personal computing and information technology. All entrants in recent years have fulfilled requirements for a bachelor’s degree. No specific major is advised. A broad background in the humanities and liberal arts is encouraged and expected.

Courses must include a minimum of:

1. 4 semesters or 6 quarters of social science or humanities
2. 6 semesters or 9 quarters of chemistry and biology. The subject matter in these courses must include general chemistry, general biology, biochemistry, molecular genetics, and cell biology/cell physiology, although applicants are not required to take courses with these specific titles.
3. 2 semesters or 3 quarters of physics; or 1 semester or 2 quarters of physics plus 1 semester or 2 quarters of calculus or linear algebra

The following courses are recommended, but not required:

- Ethics
- Anatomy or comparative anatomy
- Human or mammalian physiology
- Embryology
- The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and it is taught with the assumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism.
For further information, consult:

- UW School of Medicine Admissions website
- The American Association of Medical Colleges’ publication, 2012–2013 Medical School Admission Requirements (MSAR)
- Email

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise.

Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine asks qualified individuals to submit a $35 application fee and supplemental application materials. Every attempt is made to notify applicants of the final action by the middle of April of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Candidates from Wyoming, Alaska, Montana, and Idaho are required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application.

Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations are considered. Foreign applicants, in addition to the above requirements, must also have a permanent-resident visa.

Individuals with a demonstrated interest in research may apply for the MD/PhD program (Medical Scientist Training Program, or MSTP) regardless of residency.

Applications are not considered from persons who have failed to meet minimum standards at this or another medical or dental school.

The deadline for submitting additional application materials is January 13, 2012. These supplemental materials include:

1. A supplemental application form. This is sent to qualified applicants after the School of Medicine has received the AMCAS application.

2. An autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician with specific emphasis on steps taken to explore a career in medicine and eventual professional goals. Any other issues of importance to the candidate should also be included. The applicant may request that the personal comments section of the AMCAS application be used to fulfill this requirement.

3. Three additional short essays (250 word limit each)
   a. How have your experiences prepared you to be a physician?
   b. How do you imagine your personal and professional lives intersecting 10 years from now?
c. What obstacles to your goals have you experienced and how have you dealt with them?

d. For reapplicants: From your most recent application until now, how have you strengthened your application?

4. A premedical-committee letter of recommendation or three letters from instructors (either sciences or humanities) from whom the candidate has taken courses. These letters should critically evaluate the candidate's academic ability, strengths and weaknesses, the difficulty of coursework undertaken, motivation for medicine, personal maturity, and special attributes and assets. We accept up to three additional letters of recommendation. Letters of recommendation from current employers may be advantageous. All letters of recommendation should be submitted via the AMCAS Letters of Evaluation/Recommendation service. We must receive letters from AMCAS by the secondary application deadline (January 13, 2012).

5. A $35 non-refundable application fee (check or money order only). This is automatically waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.

6. On-line acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention, and Graduation Standards.

7. All acceptances are contingent on a criminal background check. Falsifying information may lead to the withdrawal of an acceptance.

Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or email askuwsom@uw.edu.

**Medical Curriculum**

**Basic Science Curriculum - 147 credits**

The first two years of the medical-student curriculum are identified as the Basic Science Curriculum, consisting of three phases, or groups, of courses in the human biology series, courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed on learning the normal and pathophysiologic properties of several human organ systems, and upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the introduction to clinical medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

The academic demands of the Basic Science Curriculum are scaled so that most students are also able to take elective courses that broaden their background.

**Basic Sciences Curriculum (generally defined as 500-level courses) - 159 credits**

1. Required human biology (basic science) first-year courses
   a. Biochemistry I and II
b. Gross anatomy and embryology (including trunk and head and neck anatomy)
c. Introduction to clinical medicine
d. Introduction to immunology
e. Mechanisms in cell physiology
f. Medical information for decision making
g. Microbiology and infectious disease
h. Microscopic anatomy (histology)
i. Musculoskeletal system
j. Nervous system
k. Systems of human behavior

2. Required human biology (basic science) second-year courses
   a. Cardiovascular system
   b. Cases in clinical ethics
   c. Clinical epidemiology and evidence-based medicine
d. Gastro-intestinal system
e. Genetics
f. Hematology
g. Hormones and nutrients
h. Introduction to clinical medicine II
   i. Medicine, health, and society
   j. Mind, brain, and behavior
   k. Pathology II
   l. Principles of pharmacology
m. Reproduction
n. Respiratory system
   o. Rheumatology
   p. Skin system
   q. Urinary system

3. Required preceptorship:

A mentoring experience in which a practicing physician volunteers to give personal instruction, training, and supervision to a medical student during the first two years of medical school. Preceptorships offer the preclinical student an opportunity to follow a patient over time, to get to know the particular clinical field, and to experience a clinical setting over a period of eight weeks. Students report that preceptorships can be an excellent way of preparing for board examinations and clinical training.

4. Non-clinical selectives (500-level medical school courses) - 4 credits:

Students taking courses in the basic sciences curriculum are expected to pursue electives that enhance their personal medical education – i.e., special electives offered throughout the University relevant to medical education, but not involving direct
patient care (must be approved by the School of Medicine). All UW non-clinical selectives run on the regular quarterly academic calendar; hence, they may not correspond with other courses in the School of Medicine.

5. Independent investigative inquiry (III) - 8 credits:

Involves independent investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is to allow the student to gain an understanding of the philosophy and methods of scientific investigation.

The III portion of the curriculum engages students in activities that foster the skills of life-long learning essential for practicing physicians in the twenty-first century. Students gain experience generating questions related to the practice of medicine and explore the various methods available to resolve such questions. Students are strongly urged to select a topic of particular interest and to investigate the subject independently, utilizing the advice of a faculty adviser and other resources in the WWAMI community. This is a unique opportunity for students to choose both the content and form of their learning and to pursue an interest that may not be included elsewhere in the curriculum.

Clinical Curriculum (generally defined as 600-level courses) - 148 credits

The clinical curriculum is pursued in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students (84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical electives (32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical selectives (a minimum of 32 credits or 16 weeks) are also required.

During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medical-care team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

1. Required clinical clerkships in the third year
   a. Family Medicine (6 weeks, 12 credits)
   b. Internal Medicine (12 weeks, 24 credits)
   c. Obstetrics/gynecology (6 weeks, 12 credits)
   d. Pediatrics (6 weeks, 12 credits)
   e. Psychiatry (6 weeks, 12 credits)
   f. Surgery (6 weeks, 12 credits)

2. Required clinical selectives in third or fourth year(s)
   a. Emergency medicine (4 weeks, 8 credits)
   b. Rehabilitation medicine/chronic care (4 weeks, 8 credits)
   c. Neurology (4 weeks, 8 credits)
   d. Surgery (4 weeks, 8 credits)

3. Other clinical electives (16 weeks, 32 credits)
Capstone: Preparation for Residency - 2 credits

Capstone is a required, one week course taught primarily in a small group and workshop format, designed as a “continuing medical education” course, in which fourth-year students (graduating in June of the current year) choose sessions to attend relating to the medical issues, evaluation, management, and procedures involved in their planned specialties. Grading is credit/no-credit only, and is based on attendance and tracked via evaluations.

Total minimum credits for the MD degree - 309 credits

Student Evaluation and Promotion

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and noncognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School's professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based on observations by the faculty and others involved in teaching of the student's behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and to complete an approved independent investigative inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School's committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.

The Faculty Council on Academic Affairs (FCAA) reviews the Student Progress Committee's action, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the FCAA. Reinstatement is not considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one petition through the FCAA is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admission process. If a reinstatement petition is denied by the FCAA, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through standard admission procedures.

Honor Society

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by AOA. Members are elected by AOA on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, encourage high standards and conduct, and recognize high attainment in medical science, practice, and related fields. Its motto is "Worthy to serve the suffering."

Grading System

Grades awarded in each course in the MD curriculum are Pass or Fail in the first-year basic science curriculum; Honors, Pass, or Fail in the applied-science curriculum; and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School's goal is to provide a
curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student's performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Graduation with Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing MD or MD-PhD degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numerous opportunities to interact with other minority health-care professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities.

U-DOC, a high-school summer-enrichment program offered by the Office of Multicultural Affairs, is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school students' interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic-enrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A prematriculation program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates students' access to the multiple resources in the School of Medicine, the WWAMI region, and the community.
The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate Western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; (206) 685-2489.

**Medical Scientist Training (MD-PhD) Program**

A limited number of highly qualified candidates who wish to pursue both the MD and PhD degrees are considered annually. MD/PhD students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, and physiology and biophysics. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the MD/PhD program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to applicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program: MSTP
University of Washington
Health Sciences Building, Room I264
Box 357470
Seattle WA 98195-7470
(206) 685-0762
mstp@pathology.washington.edu
www.pathology.washington.edu/mstp/

**Financial Information**

**Fees and Other Charges**

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 2003-2004 is $4,149 per quarter; nonresident tuition is $9,796 per quarter.

**Financial Assistance**

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires
Disclosure of financial information from the student and the student's parents. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.

Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student's parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at www.fafsa.ed.gov or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical-school coursework.

Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Brief descriptions of two of the more formally structured programs follow.

Rural/Underserved Opportunities Program (RUOP)

This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy of Family Physicians, Area Health Education Centers, and the School of Medicine.

Medical Student Research Training Program

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.
The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Seattle Children's hospital, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

### Continuing Medical Education

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and healthcare professionals in the Pacific Northwest and throughout the nation.

Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information on offerings is available from its website at [www.uwcme.org](http://www.uwcme.org).

All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

Anesthesiology

Display as tabs

Department Overview

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at (206) 231-2847 or bramhall@uw.edu. Other training questions may be directed to the Residency Coordinator at (206) 543-2773 or lfg@uw.edu.

SCHOOL OF MEDICINE
ANESTHESIOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**ANEST 498 Undergraduate Thesis (*) Sivarajan**
By special arrangement. Time and credit to be arranged. Offered: AWSpS.
View course details in MyPlan: ANEST 498

**ANEST 499 Undergraduate Research (*)**
Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. Offered: AWSpS.
View course details in MyPlan: ANEST 499

**ANEST 501 P-Preceptorship in Anesthesiology (1, max. 12)**
An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in the operating room. Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: ANEST 501

**ANEST 650 P-Pain Medicine Clerkship (8)**
Participation as part of a Pain Medicine team in evaluation and management of patients experiencing short term post injury (surgery, trauma) pain and/or long-term pain. (Four weeks, full time). Prerequisite: Third- or fourth-year student.
View course details in MyPlan: ANEST 650

**ANEST 663 Basic Anesthesia Clerkship - Cheyenne, WY (4)**
Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation.
View course details in MyPlan: ANEST 663

**ANEST 665 P-Basic Anesthesia Clerkship - Anchorage (4)**
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 665
ANEST 667 P-Basic Anesthesia Clerkship - Billings (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 667

ANEST 668 P-Basic Anesthesia Clerkship - Missoula (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 668

ANEST 671 P-Basic Anesthesia Clerkship - Boise (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 671

ANEST 672 Basic Anesthesiology - Boise, ID VA (4)
Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation (Two weeks, full-time). Prerequisite: third- or fourth-year Medicine student.
View course details in MyPlan: ANEST 672

ANEST 674 P-Basic Anesthesia Clerkship - Spokane (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 674

ANEST 677 P-Basic Anesthesia Clerkship - Swedish (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 677

ANEST 678 P-Basic Anesthesia Clerkship - VA (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 678

ANEST 679 P-Basic Anesthesia Clerkship - HMC (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 679

ANEST 680 P-Basic Anesthesia Clerkship - UWMC (4)
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.
View course details in MyPlan: ANEST 680
ANEST 681 P-Advanced Clerkship in Anesthesiology - UWMC (8)
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.
View course details in MyPlan: ANEST 681

ANEST 682 P-Advanced Clerkship in Anesthesia - HMC (8)
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student.
View course details in MyPlan: ANEST 682

ANEST 683 P-Advanced Clerkship in Anesthesiology - VAMC (8)
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.
View course details in MyPlan: ANEST 683

ANEST 684 P-Advanced Clerkship in Anesthesiology - Spokane (8)
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: third- or fourth-year medical students.
View course details in MyPlan: ANEST 684

ANEST 688 Advanced Anesthesia - Cheyenne, WY (8)
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic.
View course details in MyPlan: ANEST 688

ANEST 697 P-Anesthesiology Special Electives (*, max. 24)
Special clerkships, externships, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the dean's office at least one month before advance registration. (Four to twelve weeks, full-time.). Prerequisite: permission of instructor.
View course details in MyPlan: ANEST 697

ANEST 699 P-WWAMI Anesthesiology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.
View course details in MyPlan: ANEST 699
Biochemistry

Program Overview

303 Bagley

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

Undergraduate Program

Adviser
303 Bagley, Box 351700
(206) 616-9880, (206) 543-9343, (206) 685-8376
advisers@chem.washington.edu

The Biochemistry Program offers the following programs of study:

- The Bachelor of Science degree with a major in biochemistry (requires 195 credits)
- The Bachelor of Arts degree with a major in biochemistry

Suggested First- and Second-Year Courses: BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165), CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

Bachelor of Science

Program Admission Requirements

Application to BA and BS degree programs in biochemistry is competitive. Applicants are considered in the following groups: Direct Freshman Admission, Research/Honors Admission, Early Admission, and Regular Admission. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered twice each academic year and are due on the second Friday of October and the second Friday of April, with the exception of Direct Freshman Admission. The application and additional information is available at depts.washington.edu/chem/undergrad/.

Direct Freshman Admission
Open to freshman students formally admitted to the UW

Score of 5 on the AP chemistry examination

Indication on the UW freshman application of biochemistry as the student’s first choice of major

Successful direct-admission applicants generally have received a minimum 1400 on the SAT (math and verbal sections), or minimum 30 on the ACT

Admission is for autumn quarter only

Research/Honors Admission

1. Students with exceptional records can apply for consideration for admission to the biochemistry major via the Honors or Research track. Students seeking admission should submit an application that includes:
   a. Cover sheet (available on the Department of Chemistry website)
   b. Unofficial transcript
   c. Statement of purpose. May include a description of interest in biochemistry, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.
   d. (Research track only) Written letter or recommendation from research adviser

2. Honors Track. Students participating in the chemistry Honors sequence who have completed the following courses with a minimum 3.00 cumulative GPA: CHEM 145, CHEM 155; MATH 124 and MATH 125, or MATH 134 and MATH 135

3. Research Track. Students who have performed at least 6 credits of undergraduate research (CHEM 199, CHEM 299, or higher) and who provide a strong recommendation from faculty research adviser. Chemistry undergraduate research may be considered as well.

Early Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165). BIOL 180; MATH 124, MATH 125 (or MATH 134, MATH 135)

2. Factors included in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.

3. Successful applicants for the BS biochemistry program typically have a cumulative GPA greater than 3.20 in courses listed above under course requirements. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 3.00 in courses listed above under course requirements.

Regular Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238 (or CHEM 335, CHEM 336); BIOL 180, BIOL 200; MATH 124, MATH 125 (or MATH 134, MATH 135)

2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed,
frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.

3. Successful applicants for the BS biochemistry program typically have over the minimum 2.5 cumulative GPA or in courses listed above under course requirements, with no individual course grade lower than a 2.0. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 2.00 in courses listed above under course requirements, with no individual grade below a 1.7.

**Major Requirements**

105 credits, as follows:

1. *General Chemistry:* CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry:* CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
3. *Physical Chemistry:* CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457)
4. *Biochemistry:* BIOC 426, BIOC 440, BIOC 441, BIOC 442
5. *Biology:* BIOL 180, BIOL 200
6. *Mathematics:* MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
7. *Physics:* PHYS 121, PHYS 122, PHY 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
8. *Genome Science:* GENOME 361 or GENOME 371
9. 11 credits chosen from a current department list (available in 303 Bagley or at depts.washington.edu/chem/undergrad/degreereqs.html) of upper-division science classes including math, biology, microbiology, chemistry, and genome sciences. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.
10. *Grade and Graduation Requirements:* A minimum 2.0 grade and a minimum 2.50 cumulative GPA required for all chemistry, biology, and biochemistry courses counted toward the major. Minimum 2.50 GPA required for the BIOC 440, BIOC 441, and BIOC 442 sequence. Minimum 2.50 cumulative GPA required for graduation.

**Bachelor of Arts**

Program admission requirements same as for BS degree, above.

**Major Requirements**

90-92 credits as follows:

1. *General Chemistry:* either CHEM 142, CHEM 152, CHEM 162, (or CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry:* either CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347
3. **Biochemistry**: BIOC 405, BIOC 406

4. **Physical Chemistry**: CHEM 452, CHEM 453

5. **Biology**: BIOL 180, BIOL 200

6. **Mathematics**: either MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136

7. **Physics (12-15 credits)**: either PHYS 121, PHYS 122, PHYS 123, or PHYS 114, PHYS 115, PHYS 116

8. **Science Electives**: 9 credits to be taken from a current department list available in 303 Bagley or at depts.washington.edu/chem/undergrad/degreereqs.html. Up to 3 credits of advanced undergraduate research may count toward this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.

9. **Grade and Graduation Requirements**: Minimum 1.7 grade in chemistry, biochemistry, and biology courses required for the major. Minimum 2.00 cumulative GPA required for graduation.

### Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

### Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes**: At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors.

Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- **Instructional and Research Facilities**: Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology, and molecular and cellular biology, with which the department has common research interests. Laboratories are equipped with modern research equipment and are supported by external, centralized research.
facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.

- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

  **Research, Internships, and Service Learning:** No formal internship program. Students are encouraged to pursue national and regional internships. See adviser for more information.

- **Program Scholarships:** Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department adviser for more information.

- **Student Organizations/Associations:**
  - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
  - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
  - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

  **Of Special Note:**

  - The Bachelor of Science in biochemistry degree requires a minimum of 195 credits.
  - Students are strongly encouraged to participate in undergraduate research.
SCHOOL OF MEDICINE
BIOCHEMISTRY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**BIOC 405 Introduction to Biochemistry (3) NW**
Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Instructors: DiMaio, Hol, Hurley. Offered: A.
View course details in MyPlan: BIOC 405

**BIOC 406 Introduction to Biochemistry (3) NW**
Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Instructors: Ailion, Brzovic. Offered: W.
View course details in MyPlan: BIOC 406

**BIOC 426 Basic Techniques in Biochemistry (4) NW**
Introduction to basic biochemistry experiments. Acquaints students (largely biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concurrently. Instructors: Lewis, Verlinde. Offered: ASp.
View course details in MyPlan: BIOC 426

**BIOC 440 Biochemistry (4) NW**
Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.5 BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124, MATH 134, or MATH 144. Instructors: Brockerhoff, Klevit, Kollman. Offered: A.
View course details in MyPlan: BIOC 440

**BIOC 441 Biochemistry (4) NW**
Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.2 in
BIOC 440. Instructors: Hoppins, Miller, Morris, Weiner Offered: W.  
View course details in MyPlan: BIOC 441

BIOC 442 Biochemistry (4) NW  
Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 2.2 in BIOC 406 or 2.2 in BIOC 441, or a 2.2 in BIOC 451. Offered: Sp.  
View course details in MyPlan: BIOC 442

BIOC 450 Honors Biochemistry: Visualizing Biochemical Concepts (4) NW R. KLEVIT, A. WILLS  
For Biochemistry majors and molecular and cell biology majors. Core concepts in biochemistry, including protein structure, compartmentalization of reactions, thermodynamics and kinetics in a biological context, energy production, and regulation of metabolic pathways. HONORS BIOC covers the same topics as BIOC 440, but emphasizes group exercises and analysis of primary literature. Offered: A.  
View course details in MyPlan: BIOC 450

BIOC 451 Honors Introduction to Biochemistry (4) D. MORRIS, A. WEINER  
BIOC is the honors version of BIOC 441; it covers the same topics in metabolism and gene expression using the same textbook, but is taught as a group discussion of selected publications from the primary literature, with an emphasis on research strategy, experimental design, creative thinking, and scientific communication. Offered: W.  
View course details in MyPlan: BIOC 451

BIOC 499 Undergraduate Research (*, max. 35)  
Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: BIOC 499

BIOC 510 ISCRM Research Updates and Stem Cell Club ([0/1]-, max. 12) Ruohola-Baker, Ware  
Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with CONJ 510.  
View course details in MyPlan: BIOC 510

BIOC 520 Seminar (1) J. HURLEY  
Seminar dealing with timely topics in the field of biochemistry. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.  
View course details in MyPlan: BIOC 520

BIOC 530 Introduction to Structural Biology (3)  
Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Instructors: Baker, Daggett, Hol, Klevit, Merritt, Verlinde, Weiner, Zheng Offered: A.  
View course details in MyPlan: BIOC 530

BIOC 533 Topics In Biochemistry (1, max. 30)  
Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Instructor: Miller Offered: AWSp.  
View course details in MyPlan: BIOC 533

BIOC 534 Topics In Molecular Biophysics (1.5, max. 30)  
Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography,
NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSp.

View course details in MyPlan: BIOC 534

**BIOC 540 Literature Review (2)** *D. VEESLER*
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: jointly with BPSD 540; A.

View course details in MyPlan: BIOC 540

**BIOC 541 Literature Review (2)** *Chamberlain, Loeb, Palmiter*
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: W.

View course details in MyPlan: BIOC 541

**BIOC 542 Literature Review (2)** *Hauschka*
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: Sp.

View course details in MyPlan: BIOC 542

**BIOC 581 Introduction to Biochemical Research (4, max. 16)**
Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Prerequisite: graduate standing in biochemistry or permission of instructor. Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: BIOC 581

**BIOC 600 Independent Study or Research (*)**
Offered: AWSp.

View course details in MyPlan: BIOC 600

**BIOC 700 Master's Thesis (*)**
Offered: AWSp.

View course details in MyPlan: BIOC 700

**BIOC 800 Doctoral Dissertation (*)**
Offered: AWSp.

bhinfo@uw.edu

The Department of Bioethics and Humanities offers the following program of study:

- A minor in bioethics and humanities

Minor

Minor Requirements: 25 credits, as follows:

1. One of the following core courses: BH 311, BH 420, BH 456, BH 474/PHIL 411, or PHIL 242
2. One of the following core courses: BH 401, BH 481, or BH 485
3. Electives from an approved list to reach 25 credits. Core courses (listed in items 1 and 2, above) may be used as electives if they are not counted toward the core requirements. If a BH course is cross-listed with another department's course, the course may be counted toward the BH-course minimum even if taken under the other department's prefix. See program website for more information on electives.
4. Minimum 15 credits of bioethics and humanities courses
5. Minimum 2.0 grade in courses presented for the minor

Graduate Program

Graduate Program Coordinator
(206) 221-6548
gradprog@uw.edu

The department offers a two-year Master of Arts in bioethics, which provides students the foundational knowledge, skills, and experience to enrich their careers and broaden their competency in bioethics. The program offers training in research and clinical aspects of bioethics as well as empirical and normative methods of analysis.
Students have the opportunity to study with diverse and well-respected faculty from the University of Washington, the Treuman Katz Pediatric Bioethics Center, and the Seattle Veterans' Health Administration. The program helps prepare students to teach, publish, and conduct research that incorporates bioethics analysis.

**Application and Admission**

Qualified candidates include:

1. Practicing clinicians, biomedical scientists, health lawyers, post-doctoral fellows, and physicians accepted into a UW clinical fellowship program or the Treuman Katz Pediatric Bioethics Fellowship program.

2. Students currently enrolled in a professional degree program at the University of Washington (i.e. Law, Nursing, or Medicine).

Candidates should possess strong writing, critical thinking, and verbal communication skills. GRE scores are not required. Application due date is March 1.

**Degree Requirements**

40 credits, as follows:

1. Ethical theory (10 credits)
2. Empirical research methods (6 credits)
3. Clinical ethics (6 credits)
4. Research ethics (3 credits)
5. Approved electives (6 credits)
6. Practicum (3 credits)
7. Master's project (6 credits)

Students are encouraged to take additional electives based on interest and area of specialty, with guidance from their faculty mentor(s).

Opportunities for in-depth study on a topic of interest are available through elective courses, mentored research, and practicum experiences.
SCHOOL OF MEDICINE
BIOETHICS AND HUMANITIES

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**B H 201 Topics in Bioethics and Humanities (2)**
Introduces topics in clinical, research, and population health ethics and methods of ethical analysis and argumentation. Addresses topics such as the birth of bioethics, informed consent, end-of-life care, genomic medicine, social justice in healthcare and in population health, and global bioethics. Credit/no-credit only.
[View course details in MyPlan: B H 201](http://www.washington.edu/students/crscat/bh.html)

**B H 311 Ethical Issues in Modern Medicine (3) I&S N. JECKER**
Case-based approach to ethical topics in medicine, such as abortion, genetic testing, physician-assisted death, and euthanasia. Emphasizes utilizing ethical principles and methods of case analysis. Offered: Sp.
[View course details in MyPlan: B H 311](http://www.washington.edu/students/crscat/bh.html)

**B H 402 Ethical Theory (5) I&S N. JECKER**
Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: jointly with PHIL 412.
[View course details in MyPlan: B H 402](http://www.washington.edu/students/crscat/bh.html)

**B H 404 Metaethical Theory (5) I&S N. JECKER**
Studies the major metaethical theories, including both cognitivist and noncognitivist approaches. Emphasizes moral philosophy during the twentieth century, as well as contemporary commentary. Offered: jointly with PHIL 413.
[View course details in MyPlan: B H 404](http://www.washington.edu/students/crscat/bh.html)

**B H 420 Philosophical Problems in Bioethics (3) I&S Jecker**
Introduces the philosophical concepts and controversies that underlie contemporary bioethical debates. Explores issues using the literature of bioethics and philosophy, contemporary film, works of fiction, and conversations with health professionals. Students learn philosophical methods of analysis and argument, and debate different sides of ethical issues.
[View course details in MyPlan: B H 420](http://www.washington.edu/students/crscat/bh.html)

**B H 421 History of Eugenics (5) I&S Woiak**
Examines the history of ideas, policies, and practices associated with eugenics and human genetics from the late
nineteenth century to the present in American society and other national contexts. Offered: jointly with DIS ST 421.

View course details in MyPlan: B H 421

B H 440 Philosophy of Medicine (5) I&S N. JECKER
Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Offered: jointly with PHIL 459.

View course details in MyPlan: B H 440

B H 444 Ethical Implications of Emerging Biotechnology (3) S. FULLERTON
Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: W.

View course details in MyPlan: B H 444

B H 456 Social Justice and Health (5) I&S Blacksher
Examines the moral grounds for the view that social inequalities in health are unjust using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

View course details in MyPlan: B H 456

B H 460 Reflections on Research, Responsibility, and Society (3) I&S
Explores ethical and policy issues that emerge in the conduct of basic, applied, translational, community-based, and collaborative research. Addresses the ethical debates that arise in the context of planning, implementing, and disseminating research.

View course details in MyPlan: B H 460

B H 474 Justice in Health Care (5) VLPA/I&S N. JECKER
Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Offered: jointly with PHIL 411.

View course details in MyPlan: B H 474

B H 497 Bioethics and Humanities Special Electives (*-, max. 30)
View course details in MyPlan: B H 497

B H 499 Undergraduate Research (*, max. 5)
Investigative work in biomedical ethics or history of the biomedical sciences.

View course details in MyPlan: B H 499

B H 502 Ethical Theory (5) Jecker
Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: A.

View course details in MyPlan: B H 502

B H 509 Ethics and the Social Determinants of Health (2) Blacksher
Engages student in ethical questions that confront healthcare workers who serve poor and minority patient populations. Using literature from social epidemiology, bioethics, and case studies, students examine questions about clinicians' duties and patient responsibilities, controversial disease prevention programs and policies, and broader questions of social justice. Credit/no-credit only. Offered: Sp.

View course details in MyPlan: B H 509

B H 513 P-Ethical Responsibilities of Medical Practice (2) Dudzinski, McCormick
Provides intensive and practical guidance about management of principal ethical and legal problems that arise in clinical practice: informed consent, confidentiality, decisions regarding life-support, advance directives and
surrogate decision-makers, duty to care for indigent and risky patients. One week intensive course. Offered: S. View course details in MyPlan: B H 513

B H 514 Legal, Ethical, and Social Issues in Public Health Genetics (3)
Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with LAW H 504/PHG 512; A. View course details in MyPlan: B H 514

B H 518 Spirituality in Healthcare (2)
Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with FAMED 547/SOC W 587; Sp. View course details in MyPlan: B H 518

B H 527 Social Science Research Methods (3) D. BOWEN
Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: jointly with PHG 527; Sp. View course details in MyPlan: B H 527

B H 535 Medical Ethics and Jurisprudence (3-) Dudzinski, Kuszler
Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with LAW H 503. View course details in MyPlan: B H 535

B H 536 Research Ethics and Regulation (3) Mastroianni
Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with LAW H 536; W. View course details in MyPlan: B H 536

B H 544 Ethical Implications of Emerging Biotechnology (3) S. FULLERTON
Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: W. View course details in MyPlan: B H 544

B H 548 Methods in Clinical Ethics (3)
Introduces the history, practice, and research methods in clinical ethics. Case-based examination of methods including principality, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor. Instructors: Schellenberg Offered: A. View course details in MyPlan: B H 548

B H 551 Human Genomics: Science, Ethics, and Society (3)
Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Instructors: Fullerton Offered: jointly with GENOME 573; A. View course details in MyPlan: B H 551

B H 552 Advanced Qualitative Methods (4) Starks
Examines and compares phenomenology, discourse analysis, and grounded theory. Reviews the history of ideas and critically reads examples of published articles to appreciate how each method frames questions and
produces different analyses. View course details in MyPlan: B H 552

**B H 553 International Research Ethics, Law, and Policy (3) Kuszler, Rivin**

Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with LAW H 511; A. View course details in MyPlan: B H 553

**B H 556 Social Justice and Health (5) Blacksher**

Examines the moral grounds for the view that social inequalities in health are unjust, using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity. View course details in MyPlan: B H 556

**B H 560 Genomics, Ethics, and Policy (2, max. 10) Burke, Edwards, Fullerton, Starks**

Explores the intersection of genomics, ethics, and policy, with a particular focus on examining the benefits of genomics for medically underserved communities. Offered: S. View course details in MyPlan: B H 560

**B H 566 Introduction to Person Centered and Interprofessional Palliative Care (5)**

Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply an interdisciplinary approach to palliative care. Offered: A. View course details in MyPlan: B H 566

**B H 567 Advanced Topics in Person Centered and Interprofessional Palliative Care (5)**

Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice. Offered: Sp. View course details in MyPlan: B H 567

**B H 568 Palliative Care: Quality Metrics and System Integration (5)**

Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Offered: Sp. View course details in MyPlan: B H 568

**B H 574 Justice for Healthcare (5) N. JCKER**

Examination of the ethical problem of allocating scarce medical resources. Emphasizes fundamental principles of justice that support alternative health policies. Offered: W. View course details in MyPlan: B H 574

**B H 590 Health Ethics: Theory (4)**

Explores ethical theories and shows how they are interpreted and applied in clinical contexts. Examines deontological and teleological approaches, including utilitarianism, kant's ethics, Aristotel's ethics, Rawls's ethics, and feminist ethics. Builds knowledge of ethical theories, skills of ethical argument, and practice using theories in case analysis. Credit/no-credit only. Offered: A. View course details in MyPlan: B H 590

**B H 591 Health Ethics: Law (4)**

Explores legal cases, laws, statutes as well as paradigm ethics cases that inform clinical ethics consultation. Focus on ethical and legal issues that arise for ethics consultants from conception (assisted reproductive technologies) through death (withdrawing life-sustaining treatments). Addresses equity issues inherent in our
polarized health care system. Credit/no-credit only. Offered: W.
View course details in MyPlan: B H 591

B H 592 Health Ethics: Theory (4)
Explores the methodologies through which students can employ ethical theory in clinical contexts. Coursework investigates ethical approaches, such as Virtue Theory, Feminist Ethics, and Casuistry. Assignments build the skills of communication and ethical analysis used in the clinical setting, such as writing chart notes and facilitating case discussion. Offered: Sp.
View course details in MyPlan: B H 592

B H 595 Ethics Practicum (1-6, max. 6)
Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Prerequisite: permission of instructor. Credit/no-credit only.
View course details in MyPlan: B H 595

B H 596 Master's Research Project ([1-12]-, max. 12)
Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Majors only. Credit/no-credit only.
View course details in MyPlan: B H 596

B H 597 Special Topics in Medical Ethics (1-5, max. 15)
View course details in MyPlan: B H 597

B H 600 Independent Study or Research (*-)
View course details in MyPlan: B H 600
Biological Structure

Display as tabs

Department Overview

G520 Health Sciences

The department promotes an understanding of biological processes through the study and analysis of structure-function relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The Department of Biological Structure recruits students through interdisciplinary PhD programs at the University of Washington. Faculty of the Department of Biological Structure are affiliated with one or more of these programs that provide high quality training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genetics, Immunology, Microbiology. Molecular Biotechnology, Oceanography, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics, as well as research groups in the Fred Hutchinson Cancer Research Center.

The department does not offer a specific course of study leading to a Master of Science degree. An MS degree may be awarded, however, for students who meet the following requirements: One year of coursework (30 credits), concentrating in one or more areas that include neurobiology, cell and molecular biology, or developmental biology. Minimum 30 credits of research. Basic knowledge of statistics. One quarter of teaching as an assistant. A thesis committee approves the course of study, administers a general examination, and reviews the research proposal prior to the thesis defense.

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**B STR 301 General Anatomy (4) NW**
Survey of systemic human anatomy, including human skeletal system, muscular system, respiratory system, circulatory system, nervous system, digestive system, endocrine system, urinary system, and reproductive system. For second-, third-, and fourth-year undergraduates.
[View course details in MyPlan: B STR 301](#)

**B STR 498 Undergraduate Thesis (*, max. 30)**
Individual research projects under the supervision of an instructor. For senior medical students. Offered: AWSpS.
[View course details in MyPlan: B STR 498](#)

**B STR 499 Undergraduate Research (*, max. 30)**
Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: AWSpS.
[View course details in MyPlan: B STR 499](#)

**B STR 510 Seminar in Anatomy (1)**
Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.
[View course details in MyPlan: B STR 510](#)

**B STR 515 Biological X-Ray Structure Analysis (3)**
Theory of x-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Instructors: Stenkamp Offered: W.
[View course details in MyPlan: B STR 515](#)

**B STR 519 Current Problems in Macromolecular Structure (2, max. 10) Stenkamp**
Macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: AWSpS.
[View course details in MyPlan: B STR 519](#)
B STR 520 Structure Based Design of Drugs (3, max. 9) *Hol, Verlinde*
Research papers illustrating protein-structure-based design of new drugs. Review of methods and extensive discussion of all known mechanisms of drug resistance. Offered: W, even years.
*View course details in MyPlan: B STR 520*

B STR 521 Advanced Biomacromolecular Crystallography (3, max. 9) *Hol, Merritt, Stenkamp*
Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: W, odd years.
*View course details in MyPlan: B STR 521*

B STR 540 Special Problems in Anatomy (1-6, max. 6)
Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: AWSpS.
*View course details in MyPlan: B STR 540*

B STR 555 Laboratory Rotation in Biological Structure (*, max. 5)
Introduction to experimental design, research methods, and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of instructor. Offered: AWSpS.
*View course details in MyPlan: B STR 555*

B STR 557 Biomolecular Structure Seminar (1, max. 9)
Literature review of key research in biomolecular structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Instructors: Hol Credit/no-credit only. Offered: AWSp.
*View course details in MyPlan: B STR 557*

B STR 580 P-Anatomy Teaching Practicum (*, max. 8)
Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson. Instructors: Clark Offered: AWSp.
*View course details in MyPlan: B STR 580*

B STR 584 Seminar in Neurogenesis (1, max. 16)
Current research on process by which neurons are generated in the nervous system. Prerequisite: permission of instructor. Instructors: Bermingham-McDonogh, Dhaka Offered: AWSpS.
*View course details in MyPlan: B STR 584*

B STR 590 Electron Cryo-Microscopy of Biological Macromolecules and Complexes (3) *Wang*
Introduces high-resolution cryo-electron microscopy (cryoEM); image formation and three-dimensional reconstruction theories and available software. Includes hands-on experience using the cryoEM facility for data collection and analysis; and presentations on student projects. Offered: ASp.
*View course details in MyPlan: B STR 590*

B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9)
Current topics in research on molecular structure, usually emphasizing techniques of x-ray crystallography. Prerequisite: permission of instructor. Instructors: Hol Credit/no-credit only. Offered: AWSpS.
*View course details in MyPlan: B STR 591*

B STR 598 Reading in Biological Structure (2)
Critical evaluation of research in biological structure, including current problems, methods, and future directions by reading and discussing research and review papers. Prerequisite: permission of instructor. Credit/no-credit
only. Offered: AWSpS.
View course details in MyPlan: B STR 598

**B STR 600 Independent Study or Research (**)**
Offered: AWSpS.
View course details in MyPlan: B STR 600

**B STR 700 Master's Thesis (**)**
Offered: AWSpS.

Biomedical Informatics and Medical Education

Department Overview

E312 Health Sciences

The Department of Biomedical Informatics and Medical Education is comprised of two units: (1) the Division of Medical Education and Evaluation and (2) the Division of Biomedical and Health Informatics. The Division of Medical Education and Evaluation provides training, research and service in educational areas central to medical education including faculty and course evaluation, construction and scoring exams, curriculum development, implementation of innovative educational methodologies such as standardized patients and web-based simulated patients, faculty development, and research consultation (www.meded.washington.edu). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students (www.bhi.washington.edu). BHI houses a National Library of Medicine Training Grant in Biomedical and Health Informatics supporting pre- and postdoctoral fellows.

The Department of Biomedical Informatics and Medical Education offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. BIME offers applied and research master's and doctoral degrees, as well as fellowship training, in biomedical and health informatics.

Graduate Program

Graduate Training Program Coordinator
I-264 Health Sciences, Box 357240
(206) 616-0369
informat@uw.edu

Master of Science

Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States
2. Minimum 3.00 undergraduate GPA, for the last 90 graded quarter credits or 60 graded semester credits.

3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.

4. GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. GRE scores must be from testing within the past five years.

5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).

6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

Degree Requirements

60 credits, as follows:

1. Foundational courses: MEBI 530, MEBI 550, MEBI 552; either LIS 510 or LIS 544; two of the following courses: MEBI 534, MEBI 535, HSERV 503/EPI 503; a graduate-level statistics class.

2. Elective courses: Four additional courses to establish depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.

3. Research seminars: At least 3 credits of MEBI 590 and at least 3 credits of MEBI 591.

4. Thesis and final examination: All students must complete an M.S. thesis and pass a final examination for the master's degree.

Doctor of Philosophy

Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.

2. A minimum 3.00 undergraduate GPA for the last 90 graded quarter credits or 60 graded semester credits.

3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.

4. GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.

5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).

6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree.
from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

**Degree Requirements**

90 credits, to include:

1. *Foundational courses:* MEBI 520, MEBI 530, MEBI 550, MEBI 552; either LIS 510 or LIS 544; two of the following: MEBI 534, MEBI 535, HSERV 503/EPI 503; a graduate level statistics class

2. *Courses for depth of knowledge:* Five additional courses to establish the necessary depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.

3. *Research seminars:* 12 credits of research seminars that must include at least 3 credits of MEBI 590 and at least 6 credits of MEBI 591

4. *Oral presentations:* All students must satisfactorily present material in an oral format. Students should present at least once per year. This requirement is fulfilled by journal club and research seminar (MEBI 590 and MEBI 591) presentations.

5. *Formal examinations:*
   - *The qualifying examination:* All students must pass a qualifying examination (oral and written) that covers breadth of knowledge prior to formally creating a PhD Supervisory Committee and proceeding with their dissertation research.
   - *The general examination:* The general examination includes an oral and written part. The oral portion is a public presentation of the student's area of research, and includes an oral examination covering the student's in-depth knowledge of her or his area.
   - *Final examination (dissertation defense):* A candidate for the PhD must present a dissertation demonstrating original and independent investigation and significant achievement in the field of biomedical and health informatics.
SCHOOL OF MEDICINE
BIOMEDICAL INFORMATICS & MEDICAL EDUCATION
BIOMEDICAL INFORMATICS AND MEDICAL EDUCATION

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**BIME 498 Special Topics in Biomedical and Health Informatics (1-5, max. 15)**
Readings, lectures, and discussions pertaining to significant problems or issues in biomedical and health informatics.
View course details in MyPlan: BIME 498

**BIME 499 Undergraduate Research (*, max. 12)**
Investigative research or directed readings in medical education and in biomedical and health informatics. Prerequisite: permission of instructor.
View course details in MyPlan: BIME 499

**BIME 520 Teaching Methods in Medical Education (2)** *C. SCOTT*
Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: Sp.
View course details in MyPlan: BIME 520

**BIME 521 Evaluation of Learning in the Health Sciences (3)** *J. CARLINE*
Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems.
View course details in MyPlan: BIME 521

**BIME 522 Research in Medical Education (2)** *C. SCOTT*
Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, including proposal development, project implementation, data management, analysis,
and write-up. Assessment and critical reading of related literature stressed. Offered: A.

View course details in MyPlan: BIME 522

BIME 530 Introduction to Biomedical and Health Informatics (3) J. GENNARI
Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in healthcare settings. Offered: A.

View course details in MyPlan: BIME 530

BIME 533 Public Health and Informatics (3) A. TURNER
Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with HSERV 509; W.

View course details in MyPlan: BIME 533

BIME 534 Biology and Informatics (3) N. ABERNETHY
Provides an introduction to some of the fundamental concepts in core fields of biology; the information representation and management problems that arise from these fields; and current and potential informatics solutions to these problems. Offered: Sp.

View course details in MyPlan: BIME 534

BIME 535 Clinical Care and Informatics (3) D. MASUDA
Explores the ways in which information technology affect healthcare delivery system design and delivery. Considers current and future research questions and trends as well as current and future application opportunities and challenges. Offered: A.

View course details in MyPlan: BIME 535

BIME 537 Informatics Research and Evaluation Methods (4) N. ABERNETHY
Introduces the many facets of evaluation and research for biomedical and health informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service. Offered: W.

View course details in MyPlan: BIME 537

BIME 539 Teaching, Learning, and Communication in Biomedical and Health Informatics (4) D. MASUDA
Covers learning theory and teaching/communication skills specific to informatics practitioners and researchers. Reviews current learning theories applicable to undergraduate and graduate education. Helps to develop and practice effective teaching techniques. Offered: A.

View course details in MyPlan: BIME 539

BIME 540 Critically Appraising and Applying Evidence in Healthcare (3) F. WOLF
Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with HSERV 528; W.

View course details in MyPlan: BIME 540

BIME 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) F. WOLF
Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with EPI 541/HSERV 529/PHARM 529.

View course details in MyPlan: BIME 541

http://www.washington.edu/students/crscti/bime.html
BIME 543 Consumer Health Informatics (3)
This course provides an introduction to consumer health informatics (CHI) including theories of health behavior and information behavior; key concepts and terminology; and application domains. The course will cover issues such as health literacy, patient-centered communication, patient empowerment, and privacy; and application domains including personal health records, m-Health, and telehealth.
View course details in MyPlan: BIME 543

BIME 550 Knowledge Representation and Applications (3) J. GENNARI
Defines knowledge representations and explores how knowledge presentations and ontologies are used in the semantic web and why these issues are important for biomedical informatics application builders. Uses a research focus to explore foundational theoretical issues and choices facing application builders. Offered: W.
View course details in MyPlan: BIME 550

BIME 554 Biomedical Information Interactions and Design (4)
Introduction to theoretical frameworks and research methodologies that underpin the study of human-information interactions and the design of biomedical information systems to support them. Emphasis on understanding informational needs and specifications that drive the design of health information systems. Offered: Sp.
View course details in MyPlan: BIME 554

BIME 570 Health Sciences Information Needs, Resources, and Environment (3) S. FULLER
Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with LIS 528; Sp.
View course details in MyPlan: BIME 570

BIME 581 Telehealth Systems and Applications (4) G. DEMIRIS
Prepares consumers, managers, and researchers of telehealth systems through guided exploration into the components of such systems. Introduces challenges and opportunities facing designers and managers of telehealth and remote healthcare delivery networks. Offered: jointly with NSG 540.
View course details in MyPlan: BIME 581

BIME 590 Selected Topics in Biomedical and Health Informatics (1-3, max. 12)
Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Prerequisite: permission of instructor. Credit/no-credit only.
View course details in MyPlan: BIME 590

BIME 591 Biomedical and Health Informatics Research Colloquium (1, max. 12)
Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research.), but also journal articles, current topics of debate, and other. Credit/no-credit only.
View course details in MyPlan: BIME 591

BIME 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12)
Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary.
View course details in MyPlan: BIME 598

BIME 600 Independent Study/Research ([1-10]–)
Individual readings or study, including independent study in preparation for doctoral examinations, research, etc.
Prerequisite: permission of instructor.
View course details in MyPlan: BIME 600

BIME 700 Master's Thesis ([1-15]-)
Prerequisite: permission of instructor.
View course details in MyPlan: BIME 700

BIME 800 Doctoral Dissertation ([1-10]-)
View course details in MyPlan: BIME 800
Comparative Medicine

Department Overview

T142 Health Sciences

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

Graduate Programs

Graduate Program Coordinator
T136 Health Sciences, Box 351790
(206) 685-3261

Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of coursework, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided. A detailed description of the postdoctoral program is available on the department's website at depts.washington.edu/compmed/.

Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's postdoctoral training program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

Predoctoral Program
This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.
SCHOOL OF MEDICINE
COMPARATIVE MEDICINE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

C MED 499 Undergraduate Laboratory Research (1-6, max. 12) B. IRITANI, W. LADIGES, L. PRICE, M. RUDDELL
Specific problems in comparative medicine. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: C MED 499

C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2, max. 10) J. SNYDER, P. TREUTING
Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445, or equivalent, and permission of instructor. Enrollment limited: two students per quarter. Offered: AWSpS.
View course details in MyPlan: C MED 512

C MED 514 Comparative Pathology Conference (1, max. 6) J. SNYDER, P. TREUTING
Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underline them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: C MED 514

C MED 516 Research and Literature Review Seminar (1, max. 12) C. HSU, B. IRITANI
Alternates between research seminars and literature review presentations. Research seminar topics relate to basic and translational animal models. Literature review seminars involve critical evaluation of recent articles on laboratory animal medicine and other scientific or medical topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: C MED 516

C MED 518 Clinical Conference and Comparative Pathology Seminar (1, max. 12) N. REYES, P. TREUTING
Alternates between clinical veterinary medicine and comparative pathology discussions. Clinical discussions include case reports of spontaneous and induced diseases. Comparative pathology discussions cover gross and histopathology of natural occurring and experimentally induced lesions in laboratory animals and wildlife.
Prerequisite: either PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: C MED 518

C MED 520 Biology of Laboratory Animals (1) T. BRABB, B. IRITANI, P. TREATING
Fundamentals of morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of commonly used laboratory animal species. Discusses similarities and differences within and between species, including humans. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.

View course details in MyPlan: C MED 520

C MED 521 Biology of Laboratory Animals (1) T. BRABB, B. IRITANI, P. TREATING
Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including humans are discussed. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: W.

View course details in MyPlan: C MED 521

C MED 530 Diseases of Laboratory Animals (1-) T. BRABB, B. IRITANI, P. TREATING
Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

View course details in MyPlan: C MED 530

C MED 531 Diseases of Laboratory Animals (1-) T. BRABB, B. IRITANI, P. TREATING
Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

View course details in MyPlan: C MED 531

C MED 540 Animal Models (2) T. BRABB, C. HSU, B. IRITANI, P. TREATING
Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases lacking animal models, and approaches to identifying new models. Discusses animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology). Prerequisite: permission of instructor. Offered: Sp.

View course details in MyPlan: C MED 540

C MED 590 Selected Topics in Animal Medicine (1-5, max. 10) T. BRABB, L. COLBY, C. FREVERT, B. IRITANI, P. TREATING
Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWSpS.

View course details in MyPlan: C MED 590

C MED 592 Comparative Pathology for the Scientist (3) C. FREVERT
Introduces the interpretation of pathological changes in animals used for biomedical research, with a focus on the mouse. Covers study design and interpretation, techniques to measure pathological changes in major organ systems, plus other topical material related to preclinical drug studies and translational research.

View course details in MyPlan: C MED 592

C MED 600 Independent Study or Research (*)
Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: C MED 600

C MED 601 Internship Rotation - Laboratory Animal Medicine (*)
Prerequisite: DVM degree. Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: C MED 601
C MED 700 Master's Thesis (*-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: C MED 700
Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**CONJ 401 Human Anatomy and Physiology (4) T. LINDER, A. MELBY**
Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: BIOL 220; either CHEM 155 or CHEM 162. Offered: A.
View course details in MyPlan: CONJ 401

**CONJ 402 Human Anatomy and Physiology (4) T. LINDER, A. MELBY**
Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.
View course details in MyPlan: CONJ 402

**CONJ 403 Human Anatomy and Physiology (4) T. LINDER, A. MELBY**
View course details in MyPlan: CONJ 403

**CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2) Kivilhan, Samson**
For medical students in the allied health sciences in any year that covers an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.
View course details in MyPlan: CONJ 475

**CONJ 480 Neuroscience for Rehabilitation Professionals (5) Anderson, Mulligan, Slimp**
Structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.
View course details in MyPlan: CONJ 480
CONJ 504 Topics of Molecular Medicine (1.5, max. 5)
Focuses on an important topic in medicine and science. Lectures introduce clinical and basic science background, followed by a seminar/discussion with speakers. Prerequisite: Graduate standing and permission of instructor. Offered: jointly with MOLMED 504; Sp.
View course details in MyPlan: CONJ 504

CONJ 505 P-Pain Clinic Preceptorship (1, max. 12)
One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at UW Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.
View course details in MyPlan: CONJ 505

CONJ 510 ISCRM Research Updates and Stem Cell Club ([0/1]-, max. 12) Ruohola-Baker, Ware
Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with BIOC 510.
View course details in MyPlan: CONJ 510

CONJ 511 Genomic Dissection (1) Clark, Horwitz, Shedure
Uses state of the art technology to sequence the genome of a cadaver. Explores the structure of the genome, as well as genetic variants responsible for human individualization and disease. Credit/no-credit only. Offered: A.
View course details in MyPlan: CONJ 511

CONJ 512 Scientific Speaking Seminar (1.5) Biggins, Peichel
Teaches how to effectively give a scientific seminar about research. Offered: jointly with MCB 512; W.
View course details in MyPlan: CONJ 512

CONJ 513 Clinical Medical and Human Genetics (4) Byers
Rotations through medical genetics clinics for graduate students enrolled in the molecular medicine pathway. Students review clinical data, identify the molecular basis of genetic disorders, and assess how scientific studies have changed the assessment and natural history of these conditions. Limit of four students per quarter. Offered: jointly with MOLMED 513; AWSp.
View course details in MyPlan: CONJ 513

CONJ 514 Molecular Medicine (1.5, max. 3) Eary, Rosen
Introduces how basic sciences impact the practice of medicine, using patient case histories to introduce key areas of clinical research and investigative medicine. Topics include cancer biology; drug development; gene- and cell-based therapeutics; inflammation and host response; vascular disease; and obesity and weight regulation. Offered: jointly with MOLMED 514; W.
View course details in MyPlan: CONJ 514

CONJ 515 Interdisciplinary Health and Human Services Delivery in Rural Communities (1)
Provides opportunities for students in health and human services to explore current trends and issues of service delivery in rural communities. Addresses demographics, economics, community structure, culture, and professional/personal issues. Field trip fee. Prerequisite: major standing in a health or human services profession. Instructors: House Credit/no-credit only. Offered: Sp.
View course details in MyPlan: CONJ 515

CONJ 516 What Every Physician Should Know about Oral Health (1) Lewis, Mouradian, Slayton
Didactic elective for students interested in understanding oral health and its relationship to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: CONJ 516
CONJ 524 Structural Basis of Signal Transduction (1.5)
Focuses on the structure-function relationship of key enzymes in signal transduction (protein/lipid kinases; phosphatases etc.) and the structural consequences of protein phosphorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Instructors: Xu Offered: W.
View course details in MyPlan: CONJ 524

CONJ 526 Introduction to Systems Biology and Quantitative Approaches to Biomedical Sciences (1.5)
Aitchison
Covers philosophy of systems biology, experimental design, and the linkages between discovery and hypothesis-driven science. Reviews quantitative systems biology tools for genomics, proteomics, modeling and data integration, and emerging technologies. Offered: W.
View course details in MyPlan: CONJ 526

CONJ 529 Cell Migration (1.5) Cooper, Moens
Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with MCB 529; W.
View course details in MyPlan: CONJ 529

CONJ 530 Directing Stem Cells Toward Regenerative Medicine (3)
An introduction to the rapidly developing field of human embryonic stem cells in regenerative medicine crossing all medical disciplines including ethics. Requires a strong background in biological sciences. Offered: Sp.
View course details in MyPlan: CONJ 530

CONJ 531 Signaling Mechanisms in Excitable Cells (1.5) W ZAGOTTA
Mechanisms of cellular signaling, particularly in nerve and muscle. Electrical, chemical, and mechanical signaling in the cell that lead to processes such as electrical excitability, action potentials, and muscle contraction. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.
View course details in MyPlan: CONJ 531

CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (1.5) R. GARDNER, C. HAGUE, S. ONG, J. SCOTT, D. STORM
Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: A.
View course details in MyPlan: CONJ 532

CONJ 533 The Dynamic Chromosome (1.5)
The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of genes. Genetic, biochemical, and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Instructors: Henikoff, Roth Offered: A.
View course details in MyPlan: CONJ 533

CONJ 534 Selected Problems in Nervous System Development (1.5)
Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.
View course details in MyPlan: CONJ 534

CONJ 537 Mechanism of Transcriptional Regulations (1.5) Tsukiyama
Biochemical mechanisms of gene transcription covering a broad range of transcriptional regulation, including
mechanisms of transcriptional initiation, elongation, and termination. Regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.

View course details in MyPlan: CONJ 537

CONJ 538 Genetic Instability and Cancer (1/1.5)
Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor. Instructors: Maizels, Monnat
View course details in MyPlan: CONJ 538

CONJ 539 Modern Approaches to Vaccines (1.5) Fuller
Covers selected topics based on recent publications in viral and bacterial vaccine research. Emphasizes understanding the latest advanced and issues in vaccine discovery, mechanisms of action, and special topics in viral vaccines. Offered: Sp.
View course details in MyPlan: CONJ 539

CONJ 540 Basic Science of Urologic Complications (3)
Introduction to the multidisciplinary nature of the most common urologic complications ranging from prostate cancer to erectile dysfunction. Covers epidemiology, clinical and surgical treatments, current dogmas and approaches/models in basic study of underlying disease mechanisms, and a journal review of each complication. Prerequisite: biological science course.
View course details in MyPlan: CONJ 540

CONJ 541 Molecular Biology of Cellular Processes (1.5)
Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Instructors: Bornstein Offered: Sp.
View course details in MyPlan: CONJ 541

CONJ 542 Development (1.5)
Molecular mechanisms of development; molecules and pathways used for the patterning of developing organisms. Similarities and differences in the making of plants, invertebrates, and vertebrates. Prerequisite: comprehensive undergraduate courses in biology, molecular biology, or permission of instructor. Instructors: Li Offered: W.
View course details in MyPlan: CONJ 542

CONJ 544 Protein Structure, Modification and Regulation (1.5)
Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology. Instructors: Stoddard, Strong
View course details in MyPlan: CONJ 544

CONJ 545 Molecular Interactions and Medicine (1.5) Verlinde
Forces governing molecular interactions in biology; with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands, and their complexes. In computro ligand discovery; drug design, and the understanding at the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.
View course details in MyPlan: CONJ 545

CONJ 546 Survey of Technologies for Molecular Biology (1.5) Bumgarner
Broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the
theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.

View course details in MyPlan: CONJ 546

CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5) Katze
Interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.

View course details in MyPlan: CONJ 547

CONJ 548 Modeling Proteins and Proteomes (1.5) Samudrala
Hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Technologies involved for protein structure modeling. Offered: W.

View course details in MyPlan: CONJ 548

CONJ 549 Microbial Population Biology (1.5)
Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced undergraduates with permission of instructor. Instructors: MIttler Offered: Sp, even years.

View course details in MyPlan: CONJ 549

CONJ 550 P-Clinical Infectious Diseases (3)
Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no-credit only.

View course details in MyPlan: CONJ 550

CONJ 551 Immunity (1.5) Strong
Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of B and T cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.

View course details in MyPlan: CONJ 551

CONJ 552 Metabolic Flexibility in Biology (1.5)
Small molecules and the ways that chemistry of these molecules facilitates life under changing conditions. Includes systems from microbiology to human physiology to understand aspects of cancer, aging, and animation. Explores topics including bioenergetics/metabolic flux, adaptation, and allometric scaling. Prerequisite: undergraduate organic chemistry and biochemistry.

View course details in MyPlan: CONJ 552

CONJ 553 Clinical Management of HIV (2-3) M. CHUNG, H. KIM
Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: jointly with GH 573; Sp.

View course details in MyPlan: CONJ 553

CONJ 554 Fundamentals of Hypnosis (1) McCann, Schneeweiss
Examines phenomena associated with hypnosis, as well as its safe use in clinical practice. Credit/no-credit only. Offered: W.

View course details in MyPlan: CONJ 554

CONJ 556 Drug Addiction: Mechanisms, Prevention, and Treatment (2) Chavkin
Key advances, insights, methods, and challenges for our understanding of drug addiction from psychological, pharmacological, psychiatric, community prevention, legal, and neurodevelopmental perspectives. Enhances
familiarity with the multidisciplinary approaches required to understand addiction as a disease. Offered: A.
View course details in MyPlan: CONJ 556

CONJ 557 Microbial Evolution and Ecology (2)
Selected topics in microbial evolution including evolution of the main lines of descent, and bacterial and archaeal speciation and co-speciation, and evidence for early microbial life on Earth. Prerequisite: MICROM 412 or general microbiology background. Offered: ASp.
View course details in MyPlan: CONJ 557

CONJ 558 Fundamentals of Prokaryotic Biology (1.5) Harwood, Leigh
Basic principles in prokaryotic cell structure, genomics, and metabolism. Introduction to prokaryotic physiology, bacterial pathogenesis, and microbial ecology.
View course details in MyPlan: CONJ 558

CONJ 559 Scientific Ideas at Work (1.5) Gray, Maizels
Examines how basic biomedical research leads to discovery of new therapeutics and diagnostics for treatment of human disease. Considers disease mechanism and impact, need for a drug, preclinical studies, clinical testing and drug approval, and how technology developed in an academic laboratory is translated into a commercial product. Offered: jointly with MOLMED 559; Sp.
View course details in MyPlan: CONJ 559

CONJ 562 Advanced Topics in Bacterial Physiology (1.5)
Covers cutting edge research and concepts pertaining to the complexity of the bacterial cell with an emphasis on primary literature and discussion. Offered: Sp.
View course details in MyPlan: CONJ 562

CONJ 570 Introduction to the Clinical Management of Transgender Patients (1)
Covers the steps and protocols providers need to know to provide culturally proficient care for trans-identified patients. Prior completion of FAMED 561 highly recommended. Prerequisite: current graduate health science student and permission of course coordinator. Credit/no-credit only.
View course details in MyPlan: CONJ 570

CONJ 571 Introduction to the Clinical Management of Patients who are Transgender (1)
Covers the steps and protocols providers need to know to provide culturally proficient care for trans identified patients. Credit/no-credit only.
View course details in MyPlan: CONJ 571

CONJ 583 Molecular Targets in Cancer Therapy (1.5) Maizels, Monnat
Examines how molecular targets for cancer therapies are discovered and validated. Covers disease mechanisms, need for new therapeutics, how small molecule and antibody therapeutics are identified and developed, and how preclinical studies are used to establish safety and efficacy. Offered: jointly with MOLMED 583; A.
View course details in MyPlan: CONJ 583

CONJ 585 Surgical Anatomy (1-3, max. 12)
Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure. Instructors: Graney
View course details in MyPlan: CONJ 585

CONJ 598 P-Chronic Care Independent Study and Remediation (*, max. 8)
Designed for medical students required to complete additional study related to the required Chronic Care clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.
View course details in MyPlan: CONJ 598
**CONJ 605 P-Introduction to Palliative Care - Consultation (4)**
Introduction to palliative care in the consultation setting. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care. Offered: AWSpS.
[View course details in MyPlan: CONJ 605](http://www.washington.edu/students/crscat/conj.html)

**CONJ 606 P-Advanced Palliative Care - Inpatient Hospice Track (8)**
Intensive four week experience in palliative care in the inpatient hospice setting. Students work in interdisciplinary teams to assess and manage symptoms for patients near the end of life under appropriate supervision. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.
[View course details in MyPlan: CONJ 606](http://www.washington.edu/students/crscat/conj.html)

**CONJ 607 P-Advanced Palliative Care (8)**
Intensive four week experience in palliative care in inpatient and outpatient settings. Students work in interdisciplinary teams to treat and communicate with seriously ill patients and their families to make decisions regarding care. Includes exposure to hospice care. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.
[View course details in MyPlan: CONJ 607](http://www.washington.edu/students/crscat/conj.html)

**CONJ 608 P-Introduction to Palliative Care, Consult Track - ANMC (4)**
Introduction to palliative care in the consultation setting in Anchorage, AK. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.
[View course details in MyPlan: CONJ 608](http://www.washington.edu/students/crscat/conj.html)

**CONJ 609 P-Introduction to Palliative Care, Consult Track - Bellingham, WA (4)**
Introduction to palliative care in the consultation setting in Bellingham, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.
[View course details in MyPlan: CONJ 609](http://www.washington.edu/students/crscat/conj.html)

**CONJ 610 P-Introduction to Palliative Care, Consult Track - Olympia, WA (4)**
Introduction to palliative care in the consultation setting in Olympia, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.
[View course details in MyPlan: CONJ 610](http://www.washington.edu/students/crscat/conj.html)

**CONJ 611 P-Introduction to Palliative Care, Consult Track - Billings, MT (4)**
Introduction to palliative care in the consultation setting in Olympia, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.
[View course details in MyPlan: CONJ 611](http://www.washington.edu/students/crscat/conj.html)

**CONJ 612 P-Introduction to Palliative Care Consultation- Bozeman, MT (4)**
Introduction to palliative care in the consultation setting in Bozeman, MT. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.
[View course details in MyPlan: CONJ 612](http://www.washington.edu/students/crscat/conj.html)

**CONJ 613 P-Introduction to Palliative Care Consultation- Boise, ID (4)**
Introduction to palliative care in the consultation setting in Boise, ID. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.
[View course details in MyPlan: CONJ 613](http://www.washington.edu/students/crscat/conj.html)
communication and assisting patients with serious illness and their families to make decisions regarding care. View course details in MyPlan: CONJ 613

CONJ 614 P-Correction and Addiction Medicine - Gray's Harbor County, WA (4-8)
Clinical elective primarily at Greys Harbor County Jail. Covers a variety of acute and chronic diseases common outpatient procedures in jail and addiction treatment settings. In-depth experience working with incarcerated and known addicted individuals. Offered: AWSpS. View course details in MyPlan: CONJ 614

CONJ 615 P-Advanced Correction and Addiction Medicine - Gray's Harbor County, WA (8)
Advanced clinical elective primarily at Greys Harbor County Jail. Covers variety of acute and chronic diseases common outpatient procedures in jail and addiction treatment settings. In-depth experience working with incarcerated and known addicted individuals. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS. View course details in MyPlan: CONJ 615

CONJ 616 P-Prison/Corrections Medicine Clerkship - Washington (*, max. 16)
Covers a wide variety of diseases in a variety of outpatient settings, including urgent care, a chronic care clinic, and a long-term care facility for elderly and medically frail inmates in a men's prison setting. Also includes the option to learn common procedures including suturing, joint injections, skin biopsies, and toenail removals. Prerequisite: completion of the medicine and family medicine required clerkships. Offered: AWSpS. View course details in MyPlan: CONJ 616

CONJ 617 P-Subinternship in Neurocritical Care Medicine (8)
As sub-interns on the Neurocritical Care Service, students learn about critical illness, focusing on neurosurgical critical illness. Through direct patient care responsibilities, students gain experience managing traumatic brain injury, acute spinal cord injury, acute cerebral hemorrhage, and other common critical-care issues. Offered: AWSpS. View course details in MyPlan: CONJ 617

CONJ 618 P-Sleep Medicine (4)
Exposure to sleep disorders including sleep apnea, narcolepsy, hypoventilation, parasomnias and circadian rhythm disorders. Students primarily see outpatients in the UW Medicine Sleep center at Harborview with various sleep faculty. Appropriate for students interested in internal medicine, family medicine, otolaryngology, neurology, psychiatry, anesthesiology and/or a career in sleep medicine. View course details in MyPlan: CONJ 618

CONJ 625 Global Health Clinical Elective (*, max. 24)
Provides a better understanding of the challenges of providing medical care in international resource-limited settings. Students spend a minimum of five weeks at a developing county medical center, with the goal of learning more about the local burden of disease and strategies for diagnosis and treatment. Prerequisite: fourth year medical students. Instructors: S. McClelland Offered: WSp. View course details in MyPlan: CONJ 625

CONJ 626 Global HIV Medicine Elective (10-20, max. 20) Chung
Prepares health profession students for work in developing countries. Includes experience treating HIV-positive patients in resources-poor settings, analyzing the relationship between poverty and health, recognizing tropical diseases that are common in Sub-Saharan Africa or Southeast Asia, and understanding the epidemiology of HIV in Sub-Saharan Africa or Southeast Asia. Offered: AWSpS. View course details in MyPlan: CONJ 626

CONJ 630 P-Write Chronic Care Clerkship (8)
Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: approved by the WRITE committee. View course details in MyPlan: CONJ 630
CONJ 654 P-Chronic Care/Pain Management - Alaska - NAPM (8)
Exposures to pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 654

CONJ 655 P-Chronic Care - Olympia (8)
Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 655

CONJ 656 P-Chronic Care/Palliative Care - Cheyenne, WY (8)
Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 656

CONJ 657 P-Chronic Care/Pain - VAPSHCS - Seattle, WA (8)
Exposure to pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 657

CONJ 658 P-Chronic Care/Palliative Care - Providence Spokane (8)
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 658

CONJ 659 P-Chronic Care/Geriatrics - Missoula VHC (8)
Exposure to rehabilitation, palliative care, pain management, and geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 659

CONJ 660 P-Chronic Care/Palliative Care - Group Health Everett (8)
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 660

CONJ 661 P-Chronic Care/Palliative Care - Coeur d'Alene (8)
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 661

CONJ 662 P-Chronic Care/Alaska - Fairbanks APCA (8)
Exposure to rehabilitation, geriatrics, palliative care, and pain management through the Chronic Care website and didactics. Students focus their clinical activities on chronic pain management.
View course details in MyPlan: CONJ 662

CONJ 663 P-Chronic Care/Alaska - Providence Palliative Care (8)
Exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Includes didactic
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

View course details in MyPlan: CONJ 665

CONJ 666 P-Chronic Care/Spokane - VAMC Geriatrics Unit (8)
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

View course details in MyPlan: CONJ 666

CONJ 667 P-Chronic Care/Palliative Care - Evergreen Hospice (8)
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

View course details in MyPlan: CONJ 667

CONJ 668 P-Chronic Care/Spokane - St. Luke's Rehab, Pain Management (8)
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

View course details in MyPlan: CONJ 668

CONJ 669 P-Chronic Care/Spokane - Deaconess Palliative Care (8)
Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate clinical activities.

View course details in MyPlan: CONJ 669

CONJ 670 P-Chronic Care/Billings - St. Vincent Healthcare (8)
Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

View course details in MyPlan: CONJ 670

CONJ 671 P-Chronic Care/Boise - Saint Alphonsus Palliative Care (8)
Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

View course details in MyPlan: CONJ 671

CONJ 672 P-Chronic Care/Boise - St. Luke's Palliative Care (8)
Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

View course details in MyPlan: CONJ 672

CONJ 673 P-Chronic Care/Boise - VAMC (8)
Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor
and clinical site to concentrate their clinical activities. View course details in MyPlan: CONJ 673

**CONJ 674 P-Chronic Care/Alaska - Anchorage APCA (8)**
Exposure to rehabilitation, geriatrics, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. View course details in MyPlan: CONJ 674

**CONJ 675 P-Chronic Care/Palliative Care - GHHH Tacoma (8)**
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactics on the last day. View course details in MyPlan: CONJ 675

**CONJ 677 P-Clinical Allergy and Immunology (*, max. 12)**
Clinic and office experience in diagnosing and managing allergic disease. Clinical conferences, hospital rounds on clinical immunology and allergy. Student may elect a flexible program, emphasizing adult or pediatric allergy. (Four weeks, full-time). Prerequisite: MED 665 or basic clerkships in departments of Family Medicine or Pediatrics. Instructors: (Boise Veterans' Affairs Hospital), (University of Washington Medical Center) View course details in MyPlan: CONJ 677

**CONJ 679 P-Chronic Care/Palliative Care - PRMC (8)**
Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical studies. Includes didactic orientation on the first day and patient case presentations during didactics on last day. View course details in MyPlan: CONJ 679

**CONJ 680 P-Detoxification and Rehabilitation Program for Alcoholism and Drug Abuse (*, max. 16) J. REOUX**
Supervised introduction to alcoholic detoxification and rehabilitation and drug abuse. Supervised clinical experience in a variety of alcoholism and drug abuse treatment programs; accompanied by a core series of lectures and discussions. For medical students only. Prerequisite: Completion of 3rd year psychiatry clerkship. View course details in MyPlan: CONJ 680

**CONJ 681 P-Chronic Care/Palliative Care - Children's (8)**
Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day. View course details in MyPlan: CONJ 681

**CONJ 682 P-Chronic Care/Palliative Care - HMC (8)**
Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day. View course details in MyPlan: CONJ 682

**CONJ 683 P-Chronic Care/Palliative Care - UWMC PC Consult (8)**
Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day. View course details in MyPlan: CONJ 683

**CONJ 684 P-Chronic Care/Palliative Care - Multicare Hospice (8)**
Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day. View course details in MyPlan: CONJ 684
CONJ 685 P-Chronic Care/Palliative Care - Providence Everett (8)
Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 685

CONJ 686 P-Chronic Care/Rehab - Children's (8)
Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 686

CONJ 687 P-Chronic Care/Rehab - HMC (8)
Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 687

CONJ 688 P-Chronic Care/Rehab - VA RMS (8)
Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 688

CONJ 689 P-Chronic Care/Rehab - VA SCI (8)
Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 689

CONJ 690 P-Chronic Care/Rehab - UWMC (8)
Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 690

CONJ 691 P-Clerkship in Chronic Care - Boise PMR (8)
Required clerkship for fourth year medical students, concentrating on geriatrics, palliative care, and rehab medicine using lectures, group discussions, standardized patients, and case scenarios.
View course details in MyPlan: CONJ 691

CONJ 692 P-Chronic Care Clerkship - Spokane, St. Luke's Rehab (8)
Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 692

CONJ 693 P-Chronic Care/Geriatrics - HMC (8)
Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 693
CONJ 694 P-Chronic Care/Geriatrics - VA (8)
Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 694

CONJ 695 P-Chronic Care/Pain Management - Roosevelt (8)
Exposure to pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
View course details in MyPlan: CONJ 695

CONJ 696 P-WRITE Clinical Electives (*, max. 24)
Clinical electives for WRITE program. Offered: AWSpS.
View course details in MyPlan: CONJ 696

CONJ 697 International Exchange Clerkship (12) Hunt
Participation in healthcare delivery systems in developing countries; observation of relationship of host country's traditional medicine with Western medicine. Students live in cross-cultural setting to better understand their own assumptions about healthcare and life styles. Offered: Sp.
View course details in MyPlan: CONJ 697

CONJ 698 P-Foreign Medical Student Clerkship (*, max. 24)
A limited number of students from foreign medical schools are accepted for individually designed clinical clerkships at available sites after all UWMC students are accommodated. Prerequisite: permission of Associate Dean for Academic Affairs, School of Medicine.
View course details in MyPlan: CONJ 698

CONJ 699 P-Clinical Clerkships (*, max. 32)
View course details in MyPlan: CONJ 699

Department Overview

C408 Health Sciences

The University of Washington Department of Family Medicine, founded in 1971, improves the health and well-being of individuals, families, and communities through leadership in education, scholarship, and clinical care. With over 800 clinical faculty members located throughout the Washington, Wyoming, Alaska, Montana and Idaho (WWAMI) region, and approximately 40 regular faculty located at the University site in Seattle, the department is one of the largest of its kind in the country.

Direct patient care is offered primarily through the clinical operations at the UW Neighborhood Clinic in Northgate and the Family Medicine Clinic at Harborview. The Medical Student Education Section develops and delivers innovative, high-quality training to students who serve the evolving needs of the diverse individuals, families, and communities of the WWAMI region, with emphasis on rural and urban underserved and other vulnerable populations. The residency program is known for its full spectrum training of residents that allows its graduates to enter a variety of practice settings, including careers with an academic or health policy focus. The UW Family Medicine Residency Network is a group of 18 family medicine residency programs located within the WWAMI region. The network exists to promote excellence in family medicine residency education, provide academic leadership, and to respond to societal needs for family physicians. Organized in October 1977, the research section’s efforts are focused primarily in four areas -- rural health, the health workforce, chronic disease, and medical education. MEDEX Northwest, established in 1969, joined the Department in 2011. Its mission is to train physician assistants who will primarily practice in medically underserved and rural areas of WWAMI.

SCHOOL OF MEDICINE
FAMILY MEDICINE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

FAMED 499 Undergraduate Research (*, max. 35) W. PHILLIPS
Research activities arranged with University or community-based physicians in diverse areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: A WSpS.
View course details in MyPlan: FAMED 499

FAMED 501 P-Introduction to Family Medicine: Preceptorship (2, max. 12) J. CAWSE-LUCAS
Medical students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 501

FAMED 502 P-Preclinical Continuity Preceptorship in Family Medicine (1-8, max. 12) J. CAWSE-LUCAS
Introduces medical students to continuity of care in family medical settings, especially regarding what it means to be someone's doctor and what it is like to work with individuals to help them achieve optimal health for a minimum of two quarters. Prerequisite: first- and second-year medical students; permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 502

FAMED 525 African American Health and Health Care Disparity (1) F. OVERSTREET
Examines the most pressing health issues facing African Americans. Provides a forum to examine the root causes of health disparity in African descendants. Explores strategies to remedy problems in public health and healthcare delivery systems. Prerequisite: current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: A.
View course details in MyPlan: FAMED 525

FAMED 530 Primary Care (1) W. PHILLIPS
Introduces primary care, the foundation of medical care and cornerstone of healthcare reform. Addresses history, clinical content, practitioner workforce, delivery models, research methods, and policy issues. Explores the role of primary care in personal and population health. Includes lectures, discussions, student presentations, and practice observation. Prerequisite: permission of course coordinator. Offered: W.
View course details in MyPlan: FAMED 530
FAMED 540 Topics in Health and Human Services in Rural Communities (1)
Explores topics important to rural clinical practice. Includes rural health research, rural health policy, cultural competency, models of rural health practice, and others. Includes panel discussions, a case study, and a required field trip to a rural community. Prerequisite: permission of course coordinator. Instructors: Shin Offered: W. View course details in MyPlan: FAMED 540

FAMED 541 Targeted Rural Underserved Track: Intersession 1 (3)
First of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: A. View course details in MyPlan: FAMED 541

FAMED 542 Targeted Rural Underserved Track: Intersession 2 (3)
Second of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: W. View course details in MyPlan: FAMED 542

FAMED 543 Targeted Rural Underserved Track: Intersession 3 (4)
Third of four TRUST intersessions. Students will spend four days and three nights together at a retreat center training to be leaders in their future practice communities. Students will discuss rural practice, leadership skills and other related topics. Regional clinical deans and other rural health leaders facilitate the retreat. Credit/no-credit only. Offered: Sp. View course details in MyPlan: FAMED 543

FAMED 544 Targeted Rural Underserved Track: Intersession 4 (3)
Fourth of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: A. View course details in MyPlan: FAMED 544

FAMED 547 Spirituality in Healthcare (2)
Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/SOC W 587; Sp. View course details in MyPlan: FAMED 547

FAMED 556 Spanish for Health Professionals (1)
Instruction in interviewing/history taking Spanish-speaking patient. Prerequisite: Spanish fluency at intermediate level; current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: Sp. View course details in MyPlan: FAMED 556

FAMED 559 Tobacco Related Health Disparities (1/2)
Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental illness, social stress, acculturation processes, and genetics. Offered: jointly with HSERV 556. View course details in MyPlan: FAMED 559

FAMED 561 LGBTQ Health and Health Disparities (1)
Covers the history and health status of the Lesbian, Gay, Bisexual, Transgendered, Queer, and Intersex (LGBTQ) community in the United States; effective strategies and skills for working with the LGBTQ community; designed to help the learner understand and respond better to healthcare needs of the LGBTQ community. Prerequisite: permission of course coordinator. Offered: W. View course details in MyPlan: FAMED 561

http://www.washington.edu/students/crs/540.html 2/7
FAMED 598 P-Family Medicine Independent Study and Remediation (*, max. 8)
Designed for medical students required to complete additional study related to the required Family Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.
View course details in MyPlan: FAMED 598

FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24)
Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: permission of course coordinator.
View course details in MyPlan: FAMED 630

FAMED 631 P-LIC Family Medicine Clinical Clerkship - Olympia, WA (12)
Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: permission of course coordinator.
View course details in MyPlan: FAMED 631

FAMED 632 P-Clinical Clerkship in Family Medicine - Bozeman (12)
Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.
View course details in MyPlan: FAMED 632

FAMED 633 P-Clinical Clerkship in Family Medicine - Leavenworth (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 633

FAMED 634 P-Clinical Clerkship in Family Medicine - Sitka (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 634

FAMED 635 P-Clinical Clerkship in Family Medicine - Cheyenne (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 635

FAMED 636 P-Clinical Clerkship in Family Medicine - Wenatchee (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 636

FAMED 637 P-Clinical Clerkship in Family Medicine - Spokane GHC (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 637

FAMED 638 P-Clinical Clerkship in Family Medicine - Othello (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 638

FAMED 639 P-Clinical Clerkship in Family Medicine - Douglas WY (12)
Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Offered: AWSpS.
View course details in MyPlan: FAMED 639
FAMED 640 P-Clinical Clerkship in Family Medicine - Boise (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 640

FAMED 641 P-Clinical Clerkship in Family Medicine - Spokane (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 641

FAMED 642 P-Clinical Clerkship in Family Medicine - Madigan (12)
For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 646 P-Clinical Clerkship in Family Medicine - Swedish First Hill (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 646

FAMED 647 P-Clinical Clerkship in Family Medicine - Swedish Cherry Hill (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 647

FAMED 648 P-Clinical Clerkship in Family Medicine - Renton Valley (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 648

FAMED 649 P-Clinical Clerkship in Family Medicine - Olympia (12)
For description and prerequisites, see FAMED 636. Offered: AWSpS.
View course details in MyPlan: FAMED 649

FAMED 650 P-Clinical Clerkship in Family Medicine - Anacortes (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 650

FAMED 651 P-Clinical Clerkship in Family Medicine - Omak (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 651

FAMED 653 P-Clinical Clerkship in Family Medicine - Anchorage (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 653

FAMED 656 P-Clinical Clerkship in Family Medicine - Whitefish (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 656
FAMED 657 P-Clinical Clerkship in Family Medicine - Pocatello (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 657

FAMED 658 P-Clinical Clerkship in Family Medicine - Sea Mar Clinic (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 658

FAMED 659 P-Clinical Clerkship in Family Medicine - Country Doctor (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 659

FAMED 660 P-Clinical Clerkship in Family Medicine - Yakima (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 660

FAMED 661 P-Clinical Clerkship in Family Medicine - Bremerton (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 661

FAMED 662 P-Clinical Clerkship in Family Medicine - Buffalo (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 662

FAMED 663 P-Clinical Clerkship in Family Medicine - Petersburg (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 663

FAMED 664 P-Clinical Clerkship in Family Medicine - Billings (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 664

FAMED 665 P-Clinical Clerkship in Family Medicine - Missoula (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 665

FAMED 666 P-Clinical Clerkship in Family Medicine - Torrington (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 666

FAMED 667 P-Clinical Clerkship in Family Medicine - Harrison - Bremerton (12)
Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both
genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency
site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community
resources. Offered: AWSpS.
View course details in MyPlan: FAMED 667

FAMED 669 P-Clinical Clerkship in Family Medicine (12)
For description and prerequisite, see FAMED 632.
View course details in MyPlan: FAMED 669

FAMED 670 P-Advanced Underserved Clerkship (*, max. 24)
Students gain experience, knowledge, and skills needed to care for rural, specific ethnic, or underserved
populations. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered:
AWSpS.

View course details in MyPlan: FAMED 670

FAMED 671 P-Social and Structural Determinates of Health (8)
Students increase awareness of and begin to address the social and structural determinants of health impacting underserved populations. Time divided between community engagement and advocacy activities and advanced clinical clerkship in an underserved primary care setting. Credit/no-credit only.
View course details in MyPlan: FAMED 671

FAMED 672 P-Advanced Preceptorship International (*, max. 24)
For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on healthcare delivery. Prerequisite: late third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 672

FAMED 673 P-Clinical Clerkship in Family Medicine - Spokane Sacred Heart (1-12, max. 12)
Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.
View course details in MyPlan: FAMED 673

FAMED 674 P-Advanced Interviewing in Primary Care (8) L. MAUKSCH
Emphasizes developing competency in patient-centered interviewing, interview organization, and time management. Introduces primary care counseling skills and methods of health behavior change. Prerequisite: permission of course faculty.
View course details in MyPlan: FAMED 674

FAMED 676 P-Clinical Clerkship in Family Medicine - Libby (12)
For description and prerequisites, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 676

FAMED 677 P-Clinical Clerkship in Family Medicine - Grand Coulee (12)
For description and prerequisites, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 677

FAMED 678 P-Clinical Clerkship in Family Medicine - Port Angeles (12)
For description and prerequisites, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 678

FAMED 679 P-Clinical Clerkship in Family Medicine - Ferndale (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 679

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16)
Broadens students' knowledge about the traditional Indian perception of health and illness, and expands their experience and skills with Traditional Indian Medicine (TIM) by interacting with a TIM practitioner, Native physician, patients and their families, and the local Native community. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 680

FAMED 681 P-Indian Healthcare Clerkship (*, max. 16)
Examines the health disparities, health systems, and cultural/community strengths associated with American Indian/Alaska Native or other indigenous peoples. Prerequisite: either UCONJ 530, Indian Health Pathway
declaration, or permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 681

FAMED 682 P-Clinical Clerkship in Family Medicine - Ellensburg (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 682

FAMED 683 P-Clinical Clerkship in Family Medicine - Lewiston (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 683

FAMED 684 P-Clinical Clerkship in Family Medicine - Butte, MT (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 684

FAMED 685 P-Clinical Clerkship in Family Medicine - Valley - Juneau, AK (12)
For description and prerequisite, see FAMED 632. Offered: AWSpS.
View course details in MyPlan: FAMED 685

FAMED 686 P-Clinical Clerkship in Family Medicine - Port Townsend (12)
For description and prerequisite, see FAMED 632.
View course details in MyPlan: FAMED 686

FAMED 687 P-Clinical Clerkship in Family Medicine - While Salmon (12)
For description and prerequisite, see FAMED 632.
View course details in MyPlan: FAMED 687

FAMED 688 P-Family Medicine Subinternship (*, max. 24)
Students serve as interns for family medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the fourth-year student may have the same call as R-1 on service. Prerequisite: permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 688

FAMED 689 P-Sports Medicine in Family Medicine- Spokane (4-8)
Introduces medical students to treatment of sports related injuries in the non-operative, family medicine setting. Includes routine sports physicals, advanced musculoskeletal examination, and assessment of acutely injured athletes. Offered: AWSpS.
View course details in MyPlan: FAMED 689

FAMED 697 P-Family Medicine Special Electives (*, max. 24)
Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the UW SOM family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 697

FAMED 699 P-WWAMI Family Medicine Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.
View course details in MyPlan: FAMED 699
The Department of Genome Sciences was created in 2001 with the merger of the Department of Genetics and the Department of Molecular Biotechnology.

The Department of Genome Sciences offers a graduate program leading to the doctor of philosophy degree. Students are admitted only to the doctoral program.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of *E. coli*, yeast, *C. elegans*, *Drosophila*, and mouse; human and medical genetics; mathematical, statistical, and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of the graduate program, generally over a period of five years, leads to the PhD in Genome Sciences.

The department's goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic, and computational approaches that take advantage of genomic information now available for humans, model organisms, and a host of other species.

**Doctor of Philosophy**

**Admission Requirements**

1. Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. The most competitive applicants have excellent GRE scores as well as extensive laboratory research experience.

2. Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying.
3. Curriculum vitae

4. Unofficial copies of transcripts.

5. Unofficial copies of GRE scores (and TOEFL scores, for international applicants).
   Applicants who have provided official scores to the UW Graduate School need not
   send additional copies.

6. Three letters of reference from professors or others who are able to provide insight on
   the applicant's qualifications. Reference letters may be submitted online or by hard
   copy.

7. Applicants still in school who will have earned additional courses not yet listed on the
   transcript should send a list of such additional courses to be taken before graduation.

**Degree Requirements**

90 credits, to include:

1. **First year:** Core courses, covering such topics as gene regulation, genomics, genetic
   analysis, genomic informatics, computational biology, proteomics, and population
   genetics, as well as literature review. Students rotate through a minimum of three
   laboratories before selecting a thesis laboratory at the end of the first year. Actual
   courses are determined in consultation with adviser.

   Electives focused on specific areas of interest. Students have the option of selecting
   mentors from core faculty members in the Department of Genome Sciences as well as
   from adjunct and affiliate faculty members from several UW departments and the Fred
   Hutchinson Cancer Research Center.

2. **Second year:** Thesis research and additional electives. At the end of the second year,
   the student takes the general examination for PhD candidacy.

3. **Third year:** Students serve as teaching assistants for two undergraduate courses.

4. **Final years:** Most students complete their research and defend their dissertation
   during their fifth year.

5. During all years, students participate in the departmental Journal Club and research
   reports functions, and attend presentations of well-known researchers via the
   departmental seminar series.

**Financial Aid**

Genome Sciences provides full funding, including a competitive twelve-month salary,
  tuition waiver, and health insurance. Support is contingent upon satisfactory academic
  progress.

**Research Facilities**

The department is located in the William H. Foege Building. Students are assigned space in
  the laboratories of faculty members with whom they do their rotations or dissertation
  research. State-of-the-art research facilities are available in the department for cellular,
  protein, and DNA analysis. Extensive computer and library resources are available to
  students.
SCHOOL OF MEDICINE
GENOME SCIENCES

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

GENOME 151 Human Genetics: The Individual and Society (4) NW
Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. For non-science majors only. Offered: Sp.
View course details in MyPlan: GENOME 151

GENOME 261 Genomes and Society (4) NW
Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors.
View course details in MyPlan: GENOME 261

GENOME 361 Fundamentals of Genetics and Genomics (3) NW
Introduces fundamentals concepts in genetics and genomics including patterns of inheritance, genetic variation, and the relationship between genotype and phenotype. Prerequisite: minimum grade of 1.5 in BIOL 200; may not be taken if GENOME 371 is already taken; may not be repeated. Offered: WSpS.
View course details in MyPlan: GENOME 361

GENOME 371 Introductory Genetics (5) NW
Covers gene transmission, including chromosome mapping, genetic pathways; mutational analysis of biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics - cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. Prerequisite: minimum grade of 1.7 in BIOL 180; minimum grade of 1.7 in BIOL 200; may not be repeated. Offered: A.
View course details in MyPlan: GENOME 371

GENOME 372 Genomics and Proteomics (5) NW
Covers emerging fields of genomics and proteomics. Discusses key technologies and their applications to the study of human and model organism genomes.
View course details in MyPlan: GENOME 372
GENOME 373 Genomic Informatics (4) NW
Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis.
View course details in MyPlan: GENOME 373

GENOME 414 Molecular Evolution (5) NW
Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414.
View course details in MyPlan: GENOME 414

GENOME 453 Genetics of the Evolutionary Process (3) NW
Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 361 or GENOME 371.
View course details in MyPlan: GENOME 453

GENOME 454 The Origins of Genetics (4) NW
Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel’s work and its rediscovery. Evidence contributing to cornerstone of classical genetics - the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.
View course details in MyPlan: GENOME 454

GENOME 463 Hands-On Science for Elementary School Teachers (5)
Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level.
View course details in MyPlan: GENOME 463

GENOME 465 Advanced Human Genetics (4) NW
Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Instructors: Eichler, King Offered: W.
View course details in MyPlan: GENOME 465

GENOME 466 Cancer Genetics (3) NW
Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 361, GENOME 371, or GENOME 372.
View course details in MyPlan: GENOME 466

GENOME 475 Debates in Genetics (3) NW
Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either BIOL 355, BIOL 401, BIOL 402, GENOME 361, or GENOME 371.
View course details in MyPlan: GENOME 475

GENOME 490 Undergraduate Seminar (2, max. 6) NW
Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale...
for research projects and the presentation and interpretation of research findings. Offered: AWSp.

View course details in MyPlan: GENOME 490

GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5)
Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Prerequisite: GENOME 371. Credit/no-credit only.

View course details in MyPlan: GENOME 496

GENOME 499 Undergraduate Research (*, max. 30)
Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: GENOME 499

GENOME 501 Introduction to Research Materials (1-10, max. 10)
The student undertakes a research project in one of the research groups within the department for a quarter at a time. Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: GENOME 501

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6)
Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

View course details in MyPlan: GENOME 503

GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9)
Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

View course details in MyPlan: GENOME 504

GENOME 505 StarNet: Teacher Research Experience (9)
Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

View course details in MyPlan: GENOME 505

GENOME 506 The Science Education Partnership (5, max. 15)
Provides secondary school teachers training in molecular biology, genetics, and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required. Credit/no-credit only.

View course details in MyPlan: GENOME 506

GENOME 520 Seminar (1, max. 30)
Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: GENOME 520

GENOME 522 Journal Club (1, max. 30)
Presentation and discussion of current scientific literature. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: GENOME 522

GENOME 523 Research Reports (1, max. 30) Thomas
Presentation and discussion of current student research. For Genome Sciences graduate students only. Credit/no-
credit only. Offered: AWSp.

View course details in MyPlan: GENOME 523

GENOME 525 Current Literature in Human Genetics (1)
Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Prerequisite: graduate or postdoctoral status. Credit/no-credit only. Offered: AWSp.

View course details in MyPlan: GENOME 525

GENOME 531 Genetics of Human Disease (3)
Covers modern approaches to the identification of human disease genes permitted by their isolation. Reviews how functional conservation of proteins throughout eukaryotic evolution is modeled in systems such as somatic cell culture, transgenic mice, menatodes, Drosophila, and yeast. Credit/no-credit only.

View course details in MyPlan: GENOME 531

GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4)
Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

View course details in MyPlan: GENOME 540

GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4)
Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Offered: Sp.

View course details in MyPlan: GENOME 541

GENOME 545 Biostatistical Methods for Big Omics Data (3)
This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIST 512, 514, or 517. Offered: jointly with BIST 545/PHG 545.

View course details in MyPlan: GENOME 545

GENOME 547 Scientific Writing (1.5)
For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications. Credit/no-credit only.

View course details in MyPlan: GENOME 547

GENOME 550 Methods and Logic in Genetics (3)
Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

View course details in MyPlan: GENOME 550

GENOME 551 Principles of Gene Regulation (1.5)
A detailed examination of the mechanisms of transcription and translation as determined by experimental genetics, molecular biology, and biochemistry.

View course details in MyPlan: GENOME 551

GENOME 552 Technologies for Genome Analysis (1.5)
Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

View course details in MyPlan: GENOME 552
GENOME 553 Advanced Genetic Analysis (1.5)
Classical genetic analysis is a powerful approach to dissect complex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.
View course details in MyPlan: GENOME 553

GENOME 554 Genomic Informatics (1.5)
Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.
View course details in MyPlan: GENOME 554

GENOME 555 Protein Technology (1.5)
Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology, and medicine.
View course details in MyPlan: GENOME 555

GENOME 559 Introduction to Statistical and Computational Genomics (3)
Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant web databases.
View course details in MyPlan: GENOME 559

GENOME 561 Molecular Population Genetics and Evolution (1.5)
Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.
View course details in MyPlan: GENOME 561

GENOME 562 Population Genetics (4)
Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Instructors: Felsenstein Offered: W, odd years.
View course details in MyPlan: GENOME 562

GENOME 565 Advanced Human Genetics (4)
Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure, and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Instructors: Eichler, King Offered: W.
View course details in MyPlan: GENOME 565

GENOME 570 Phylogenetic Inference (3)
Methods for inferring phylogenies (evolutionary trees) - biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Instructors: Felsenstein Offered: W, even years.
View course details in MyPlan: GENOME 570

GENOME 573 Human Genomics: Science, Ethics, and Society (3)
Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Instructors: Fullerton Offered: jointly with B H 551; A.
View course details in MyPlan: GENOME 573
GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5)
In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.
View course details in MyPlan: GENOME 576

GENOME 580 Ethics in Biomedical Research and Teaching (1)
Explores ethical issues in research and teaching and discusses avenues of responsible conduct. Credit/no-credit only.
View course details in MyPlan: GENOME 580

GENOME 581 Seminar in Drosophila Genetics (1) Berg
View course details in MyPlan: GENOME 581

GENOME 582 Seminar in Mouse Genetics (1) Braun
Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no-credit only.
View course details in MyPlan: GENOME 582

GENOME 584 Seminar in DNA Replication (1) Brewer, Fangman
Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: GENOME 584

GENOME 585 Seminar in Bacterial Genetics (1)
Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no-credit only.
View course details in MyPlan: GENOME 585

GENOME 586 Seminar in Mammalian Genetics (1) Sibley
Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no-credit only.
View course details in MyPlan: GENOME 586

GENOME 587 Seminar in Nematode Genetics (1) Thomas
Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no-credit only.
View course details in MyPlan: GENOME 587

GENOME 590 Population Genetics Seminar (1)
Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Prerequisite: GENOME 562 or permission of instructor. Instructors: Felsenstein Credit/no-credit only.
View course details in MyPlan: GENOME 590

GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12)
Prerequisite: permission of instructor. Offered: AWSp.
View course details in MyPlan: GENOME 599

http://www.washington.edu/students/crs Cat/genome.html
GENOME 600 Independent Study or Research (*-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: GENOME 600

GENOME 700 Master's Thesis (*-)
Offered: AWSpS.
View course details in MyPlan: GENOME 700

GENOME 800 Doctoral Dissertation (*-)
Offered: AWSpS.
View course details in MyPlan: GENOME 800
SCHOOL OF MEDICINE
HUMAN BIOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3)
Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student's preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS. View course details in MyPlan: HUBIO 500

HUBIO 501 P-Human Biology Special Projects (*)
Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS. View course details in MyPlan: HUBIO 501

HUBIO 505 P-WWAMI Preceptorship (*, max. 6)
Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices. Offered: ASp. View course details in MyPlan: HUBIO 505

HUBIO 510 P-Microscopic Anatomy: Histology (6) Bermingham-McDonogh
Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A. View course details in MyPlan: HUBIO 510

HUBIO 511 P-Human Anatomy and Embryology (8/13) Clark
Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A. View course details in MyPlan: HUBIO 511
HUBIO 512 P-Mechanisms in Cell Physiology (5) Detwiler
Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.
View course details in MyPlan: HUBIO 512

HUBIO 513 P-Introduction to Clinical Medicine (3-) Issac, Maestas
Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is obtained. Attention to developing comfort in the physician role. Offered: A.
View course details in MyPlan: HUBIO 513

HUBIO 514 P-Biochemistry I-A (4-) Maizels
Explores molecular biology of the genome. Examines how the genome serves as a source of information, how molecular understanding of gene function identifies new therapeutic targets and provides new therapeutic and diagnostic tools. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: A.
View course details in MyPlan: HUBIO 514

HUBIO 516 P-Systems of Human Behavior (5) Harrington
Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: A.
View course details in MyPlan: HUBIO 516

HUBIO 522 P-Introduction to Clinical Medicine (4-) Isaac, Maestas
Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.
View course details in MyPlan: HUBIO 522

HUBIO 523 P-Introduction to Immunology (2) Gale
Topics covered include: basic concepts such as antigens; antibodies; complement; B-and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmunity, blood transfusion, and transplantation).
View course details in MyPlan: HUBIO 523

HUBIO 524 P-Biochemistry I-B (-4) Maizels
Metabolism as integrated in the organs and tissue of the human body for the purpose of generating energy from food and converting small molecules to essential building block of our cells. Discusses principles of nutrition in the context of human health and disease. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: W.
View course details in MyPlan: HUBIO 524

HUBIO 530 P-Clinical Epidemiology and Evidence-Based Medicine (2) Kestenbaum
Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: W.
View course details in MyPlan: HUBIO 530

HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5)
View course details in MyPlan: HUBIO 531
HUBIO 532 P-Nervous System (8) Dacey, Mulligan
An integrated approach to the normal structure and function of the nervous system, including the eye. Presents neuropathological examples as well as clinical manifestations of neurological disease.

View course details in MyPlan: HUBIO 532

HUBIO 534 P-Microbiology and Infectious Disease (9) Moseley

View course details in MyPlan: HUBIO 534

HUBIO 535 P-Introduction to Clinical Medicine (-4) Isaac, Maestas
Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one other. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.

View course details in MyPlan: HUBIO 535

HUBIO 540 P-Cardiovascular System (6) Feigl
Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.

View course details in MyPlan: HUBIO 540

HUBIO 541 P-Respiratory System (4) Culver, Luks
Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acid-base balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.

View course details in MyPlan: HUBIO 541

HUBIO 542 P-Introduction to Clinical Medicine (4-) McDonough
Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

View course details in MyPlan: HUBIO 542

HUBIO 543 P-Principles of Pharmacology I (5) McKnight
Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.

View course details in MyPlan: HUBIO 543

HUBIO 547 P- Pathology IIA (5)
Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

View course details in MyPlan: HUBIO 547

HUBIO 548 P-Cases in Clinical Ethics (1)
Provides exposure to key issues in clinical ethics as well as the tools for ethical reasoning and critical thinking that support the student's current and future work. Prerequisite: second-year medical students. Instructors: Edwards, Timberlake

View course details in MyPlan: HUBIO 548

HUBIO 550 P-Introduction to Clinical Medicine (-4-) McDonough
Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.
HUBIO 551 P-Gastro-Intestinal System (4) Silverstein
Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.
View course details in MyPlan: HUBIO 551

HUBIO 552 P-Hematology (3) Richard
Familiarizes students with the basic pathophysiological mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.
View course details in MyPlan: HUBIO 552

HUBIO 553 P-Musculoskeletal System (4) Schmale
Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem-based learning. Offered: W.
View course details in MyPlan: HUBIO 553

HUBIO 554 P-Genetics (2)
Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.
View course details in MyPlan: HUBIO 554

HUBIO 555 P-Medicine, Health, and Society (3) Chen, Masuda
Interdisciplinary introduction to health services designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries. Offered: W.
View course details in MyPlan: HUBIO 555

HUBIO 556 P-Hormones and Nutrients (4) DeSantis
Introduction to principles of human endocrinology, metabolism, and nutrition; the physiology and pathophysiology of endocrine systems, glucose and lipid metabolism, and fluid and salt balance; and the importance of proper nutrition in certain disease states.
View course details in MyPlan: HUBIO 556

HUBIO 557 P-Pathology IIB (2-)
Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.
View course details in MyPlan: HUBIO 557

HUBIO 558 P-Rheumatology (1)
An intensive immersion course in rheumatology for second year students. Lectures and small group patient demonstrations link concepts of immunology, pathology and pharmacology with inflammatory and autoimmune disease, teach differential diagnosis of symptoms seen in rheumatic disease and use if diagnostic to demonstrate features of common childhood and adult rheumatic diseases and their management.
View course details in MyPlan: HUBIO 558

HUBIO 559 P-Problem Based Learning (3) Scott
Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a healthcare team by
including medical, nursing, and physician assistant students in each group. Offered: W.

View course details in MyPlan: HUBIO 559

HUBIO 560 P-Introduction to Clinical Medicine (-5) McDonough
Introduction to clinical and laboratory diagnosis. Offered: Sp.
View course details in MyPlan: HUBIO 560

HUBIO 562 P-Urinary System (4) Jefferson
Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.
View course details in MyPlan: HUBIO 562

HUBIO 565 P-Reproduction (4) Steiner
Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.
View course details in MyPlan: HUBIO 565

HUBIO 566 P-Pathology IIC (-3)
Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which affect more than one organ system including cardiovascular, renal, and respiratory.
View course details in MyPlan: HUBIO 566

HUBIO 567 P-Skin System (2) Colven
Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.
View course details in MyPlan: HUBIO 567

HUBIO 569 P-Mind, Brain, and Behavior (6) O. Pascualy
Defines and describes major psychiatric disorders and presents a systematic approach to differential diagnosis. Discusses conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry; along with physiological and biochemical mechanisms, and therapeutic and adverse effects. Offered: Sp.
View course details in MyPlan: HUBIO 569

HUBIO 590 P-Medical Information for Decision Making (1)
Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies, reviews of primary studies, or other medical information sources that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical students. Instructors: Tarczy-Hornoch Offered: W.
View course details in MyPlan: HUBIO 590

HUBIO 591 P-WWAMI Non-clinical Selectives - Pullman (*, max. 30)
Courses offered at WWAMI university site in Pullman designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
View course details in MyPlan: HUBIO 591

HUBIO 592 P-WWAMI Non-clinical Selectives - Spokane (*, max. 30)
Courses offered at WWAMI university site in Spokane designed to satisfy the non-clinical selective graduation
requirements for medical students. Offered: AWSp.
View course details in MyPlan: HUBIO 592

HUBIO 593 P-WWAMI Non-clinical Selectives - Laramie (*, max. 30)
Courses offered at WWAMI university site in Laramie, WY designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
View course details in MyPlan: HUBIO 593

HUBIO 594 P-WWAMI Non-clinical Selectives - Anchorage (*, max. 30)
Courses offered at WWAMI university site in Anchorage, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
View course details in MyPlan: HUBIO 594

HUBIO 595 P-Independent Investigative Inquiry, GHIP (8) S. GRAHAM
With faculty mentorship, students investigate a global health issue, work on a community health project, and create an academic poster. Prerequisite: GHIP students only. Offered: S.
View course details in MyPlan: HUBIO 595

HUBIO 596 P-WWAMI Non-Clinical Selectives - Bozeman (*, max. 30)
Courses offered at WWAMI university site in Bozeman, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
View course details in MyPlan: HUBIO 596

HUBIO 597 P-Independent investigative Inquiry (8)
Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.
View course details in MyPlan: HUBIO 597

HUBIO 598 P-WWAMI Non-Clinical Selectives - Moscow (*, max. 30)
Courses offered at WWAMI university site in Moscow, ID, designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.
View course details in MyPlan: HUBIO 598

HUBIO 599 P-Independent Study in Medical Science (6)
Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.
View course details in MyPlan: HUBIO 599

HUBIO 600 P-Capstone Course: Preparation for Residency (2, max. 4)
A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.
View course details in MyPlan: HUBIO 600
Immunology

Display as tabs

Department Overview

H564 Health Sciences

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now includes more than 30 faculty and 200 scientists, students, post-docs and staff, all engaged in elucidating fundamental immunological mechanisms and how these mechanisms impact human health, infectious, autoimmune and allergic diseases, and cancer. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Consider the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar 'self' components. How is such specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These are questions being addressed by members of the program at the molecular, cellular, and whole organism levels.

Graduate Program

Graduate Program Coordinator
H564 Health Sciences, Box 357650
immgrad@uw.edu
(206) 685-3955, fax (206) 543-1013

The graduate program, organized through the Department of Immunology, occupies contemporary laboratory and office space in the H and I wings of the Health Sciences complex, where many faculty are based. Other members of the training faculty are based in contiguous wings of the Health Sciences complex or at one of four affiliated institutions: Fred Hutchinson Cancer Research Center, Benaroya Research Center at Virginia Mason, Seattle Children's hospital, and the Institute for Systems Biology. The University of Washington is a premier institution for biomedical research in the nation, ranking second...
among all institutions in overall support from the NIH. The research environment is augmented by affiliated institutions, creating an open and collegial partnership for basic, translational, and clinical research in which collaborations and open sharing of ideas and reagents take place. Members of the program have been instrumental in development and application of contemporary technologies, including flow cytometry, confocal microscopy, high-throughput genomic, proteomic, and computational analysis, and generation and analysis of transgenic/knockout/knockin mice to address important immunological and biological questions. Training of students occurs in an open environment which is intellectually stimulating, scientifically diverse, and strongly interactive. All immunology graduate students are assured financial support for the term of their studies.

Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the Ph.D.

Doctor of Philosophy

Admission Requirements

Students are admitted for autumn quarter; application deadline is January 1 for U.S. citizens and November 1 for international applicants. Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.

International students must take the Test of English as a Foreign Language (TOEFL); 250 is the minimum acceptable score on computer test.

Degree Requirements

90 credits, to include:

1. 18 graded credits in the first two years of study. First-year coursework consists of consecutive five-week-long courses taken autumn through spring quarters – two per quarter (for 1.5 to 2 graded credits each); winter quarter, all first year students also take IMMUN 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices. In the second year, 4.5 or 5 additional graded credits are required, earned by taking electives winter and/or spring quarters. As part of the first- and second-year coursework, students take two five-week courses that specifically focus on cancer immunology.

2. Autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students are required to attend the departmental seminar series, Journal Club, and research-in-progress talks beginning the first quarter and continuing throughout enrollment.

3. All elective courses must be relevant to biomedical research, and be rigorous enough to include either a final examination or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.
4. Each graduate student takes the qualifying examination during July immediately following the second year of classes. (MSTP students take qualifying examinations following the first year of graduate classes.) The qualifying examination is two parts—written and oral.

5. Students who pass the qualifying examination then prepare for the General Examination, which must be taken within 15 months of the qualifying examination.

6. The dissertation must meet all format requirements before being accepted by the Graduate School.
SCHOOL OF MEDICINE
IMMUNOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**IMMUN 441 Introduction to Immunology (4) NW**
General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: BIOL 220; may not be repeated. Offered: A.

View course details in MyPlan: IMMUN 441

**IMMUN 499 Undergraduate Research (*, max. 24)**
Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSpS.

View course details in MyPlan: IMMUN 499

**IMMUN 532 Intersection of Innate and Adaptive Immunity in Disease (4)**
Examines the molecular and cellular basis of immune function. Topics include: hematopoiesis, innate immunity, antigen receptor structure, lymphocyte development, antigen presentation, effector T-cell functions, and immune-mediated diseases. Prerequisite: coursework in molecular genetics; graduate standing in immunology; other graduate students with permission of instructor. Offered: W.

View course details in MyPlan: IMMUN 532

**IMMUN 534 Central Issues in Immunology (3)**
Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in immunology. Offered: Sp.

View course details in MyPlan: IMMUN 534

**IMMUN 537 Immunological Methods (1.5) Fink, Weinmann**
Introduces whole animal, cellular, biochemical, and molecular techniques used in immunological research. Discusses strengths and limitations of each technique and emphasizes caveats in interpreting the resulting data. Offered: A.

View course details in MyPlan: IMMUN 537
IMMUN 538 Immunological Based Diseases and Treatments (2)  
E. BETTELLI, R. SAVAN  
Addresses the mechanisms leading to the development of immunologically based diseases. In particular, covers immunological basis and treatment of infection, autoimmunity, and cancer. Offered: Sp.  
View course details in MyPlan: IMMUN 538

IMMUN 550 Selected Topics in Immunology (1, max. 30)  
Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSp.  
View course details in MyPlan: IMMUN 550

IMMUN 551 Research Conference in Regulation of T Cell-Dependent B Cell Maturation (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Clark Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 551

IMMUN 552 Research Conference in Principles of Antiviral Immunity (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Prerequisite: immunology graduate student; permission of instructor. Instructors: Stetson Offered: AWSpS.  
View course details in MyPlan: IMMUN 552

IMMUN 553 Research Conference in Recombination and Repair in B Cell Development (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Maizels Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 553

IMMUN 554 Research Conference in Immunogenetic Aspects of Human Autoimmunity (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Nepom Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 554

IMMUN 555 Research Conference in Model of Autoimmune Disease and Their Regulation (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Goverman Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 555

IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30)  
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Ziegler Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 556

IMMUN 557 Research Conference in the Mechanisms and Consequences of Programmed Cell Death (1, max. 30)  
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology or permission of instructor. Instructors: Oberst Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 557
IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30)
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Elkon Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 558

IMMUN 559 Research Conference in T Cell Responses during Mycobacterium tuberculosis (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate student; permission of instructor. Instructors: Urdahl Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 559

IMMUN 560 Research Conference in Progress in T Cell Research (1, max. 30)
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Bevan, Fink, Goverman, Greenberg, Pepper, Stetson Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 560

IMMUN 561 Research Conference in Mechanisms of Peripheral Tolerance (1, max. 30)
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Fink Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 561

IMMUN 562 Research Conference in Structural Molecular Immunology and Vaccinology (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate students; permission of instructor. Instructors: Strong Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 562

IMMUN 563 Research Conference in Macrophage Biology: Signaling and Phagocytosis (1, max. 30)
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Aderem Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 563

IMMUN 564 Research Conference in Cellular/Molecular Regulation of T Cell Responses (1, max. 30)
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Greenberg Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 564

IMMUN 565 Research Conference in Innate Immune Defenses against Virus Infection (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus on understanding virus and host regulation of innate immune processes. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Gale Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 565

IMMUN 566 Research Conference in the Studies of Lymphocyte Memory (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Pepper Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: IMMUN 566
IMMUN 567 Research Conference in the Role of miRNAs in Modulating the Immune System (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Savan Credit/no-credit only. Offered: AWSpS. View course details in MyPlan: IMMUN 567

IMMUN 568 Research Conference in Regulation of the Inflammatory Response of Myeloid Cells (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding the regulation of the inflammatory response of myeloid cells. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Hamerman Credit/no-credit only. Offered: AWSpS. View course details in MyPlan: IMMUN 568

IMMUN 569 Research Conference in T cells in autoimmunity (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Bettelli Credit/no-credit only. Offered: AWSpS. View course details in MyPlan: IMMUN 569

IMMUN 570 Research Conference in Mucosal Immunity (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Oukka Credit/no-credit only. Offered: AWSpS. View course details in MyPlan: IMMUN 570

IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Rawlings Credit/no-credit only. View course details in MyPlan: IMMUN 571

IMMUN 572 Research Conference in Signal Transduction in B-Cells (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Scharenberg Credit/no-credit only. View course details in MyPlan: IMMUN 572

IMMUN 573 Immunology Seminar Series (1, max. 30)
Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Prerequisite: graduate standing in immunology; other graduate students with firm background in immunology and permission of instructor. Credit/no-credit only. View course details in MyPlan: IMMUN 573

IMMUN 574 Research Conference in Kaposi's Sarcoma-Associated Herpes Virus: Interactions with B-Cells and Endothelial Cells (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Lagunoff Credit/no-credit only. View course details in MyPlan: IMMUN 574

IMMUN 575 Research Conference in Infection and Immunity (1, max. 30)
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in
IMMUN 575 Research Conference in Innate Immune Mechanisms of Response and Regulation (1, max. 30)  
A. LACY-HULBERT  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology; permission of instructor. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 575

IMMUN 576 Research Conference in Innate Immune Mechanisms of Response and Regulation (1, max. 30)  
A. LACY-HULBERT  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology; permission of instructor. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 576

IMMUN 577 Research Conference in Lymphocyte Homing and Function (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Campbell Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 577

IMMUN 578 Research Conference in Immunology and the Pathogenesis of Tuberculosis (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Ramakrishnan Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 578

IMMUN 579 Research Conference in Liver Immunology (1, max. 30)  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Crispe Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 579

IMMUN 580 Research Conference in Immune Imaging and Structure-Function Biology (1, max. 30)  
M. GERNER  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 580

IMMUN 581 Research Conference on the Initiation of Type 2 Immune Responses by Parasitic Worms and Allergens (1)  
J. VON MOLTKE  
Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 581

IMMUN 599 Introduction to Immunology Research (1-10, max. 40)  
Current problems in immunological research. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 599

IMMUN 600 Independent Study or Research (*-)
Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 600

IMMUN 700 Master's Thesis (*-)
Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.  
View course details in MyPlan: IMMUN 700

IMMUN 800 Doctoral Dissertation (*-)
Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.
Laboratory Medicine

Display as tabs

Department Overview

NW 120, UW Medical Center

Medical laboratory science, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of healthcare, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

Undergraduate Program

Adviser
NW 120, UW Medical Center
(206) 598-6131
medtech@uw.edu

The Department of Laboratory Medicine offers the following program of study:

- Bachelor of Science in Medical Laboratory Science degree

Bachelor of Science

1. Pre-professional Phase. During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.

2. Professional Phase. The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENOME 351, GENOME 371, B
STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

**Department Admission Requirements**

1. BIOL 118, BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); one of STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or Q SCI 381.

2. Complete all general education requirements including 10 credits of Individuals & Societies, and 10 credits of Visual, Literary, & Performing Arts, as well as all required English and writing courses.

3. Students admitted to the medical laboratory science program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission is cancelled.

*Application Procedure:* See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

**Major requirements**

152-155 credits as follows:

1. **Courses Required for Admission (48-51 credits):** See list above.

2. **Didactic Courses (59 credits):** IMMUN 441, MICROM 442, MICROM 443, MICROM 444, MICROM 445; LAB M 418, LAB M 419, LAB M 420, LAB M 421, LAB M 426, LAB M 428, LAB M 429, LAB M 430, LAB M 434, LAB M 435

3. **Clinical Rotations (50 credits):** LAB M 423, LAB M 424, LAB M 425, LAB M 431, LAB M 432, LAB M 433

4. Minimum 2.0 grade in all didactic and clinical rotation courses

5. Minimum 2.00 GPA, both cumulative and in required courses

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Graduates of the medical laboratory science program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical laboratory scientists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical laboratory scientist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical laboratory
scientists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- **Instructional and Research Facilities:** The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Seattle Children's hospital, Labcorp Dynacare, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, Virginia Mason Medical Center, Evergreen Hospital Medical Center, and Highline Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.

- **Honors Options Available:** For Interdisciplinary Honors, see University Honors Program.

- **Internship Opportunities:** One or two internships per year in Japan available to graduates of the medical technology program.

- **Department Scholarships:** Several offered.

- **Student Organizations/Associations:** None currently active.

*Of Special Note:* The medical laboratory science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, (847) 939-3597, (773) 714-8880, (773) 714-8886 (fax), info@naacls.org, www.naacls.org. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

---

**Graduate Program**

Graduate Program Coordinator  
NW 120, Box 357110  
(206) 598-2148  
hschil@uw.edu

The Department of Laboratory Medicine offers a Master of Science in Laboratory Medicine and prepares the graduate for advanced technical and supervisory positions in the clinical and research laboratories as well as in pharmaceutical and diagnostic industries.

The curriculum is flexible, usually two years for full-time students, and up to six years for part-time students. Students select one of five pathways and work with a mentor on a thesis project. In addition to the 25 credits of required courses, they take courses related to their area of study. The target population is medical technology (MT/MLS) graduates with ASCP certification.
The Department of Laboratory Medicine also offers a combined undergraduate/graduate program (CUG). Students may enter this CUG either as undergraduates or college graduate/postbaccalaureate students. To be admitted to the CUG program, the student must first be accepted into the undergraduate program shown above. Undergraduates or college graduate/postbaccalaureate students may apply simultaneously to the CUG program, or delay application until graduation. Once accepted into the CUG, the student completes the undergraduate program, then immediately enrolls in the Graduate School. Students receive a BS in Medical Laboratory Science at the completion of their undergraduate studies and an MS in Laboratory Medicine at the completion of their graduate studies.

**Admission Requirements**

The program accepts mostly ASCP certified medical laboratory scientists (MLS/MT). For medical laboratory scientists (MLS/MT), MLT (medical laboratory technician), students from a four-year program, or laboratorians with significant experience in a clinical laboratory, admission requirements include:

2. Minimum 3.00 GPA in the last 90 graded quarter credits or the last 60 graded semester credits
3. Certification as a medical laboratory scientist (MLS/MT) or equivalent, or as a medical laboratory technician (MLT) or equivalent, or as a specialist in a clinical laboratory field
4. Completion if the Graduate Record Examination (GRE) Aptitude Test within the last five years
5. Foreign students must have a satisfactory command of the English language. Results of the TOEFL, MLT, or IELTS must be submitted to the Graduate School. These scores are good for only two years.
6. A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
7. Three letters of recommendation
8. A personal interview

For students with an undergraduate degree in a scientific field such as chemistry, microbiology, or biology, without ASCP certification, the program is highly competitive. Admission requirements include:

1. Outstanding academic achievements, including a minimum 3.20 GPA in the last 90 graded quarter credits or the last 60 graded semester credits.
2. Completion of the Graduate Record Examination (GRE) Aptitude Test within the last five years, with excellent scores.
3. Foreign students must have an excellent command of the English language. Results of the TOEFL or IELTS must be submitted to the Graduate School. Scores are good for only two years.
4. A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
5. Three letters of recommendation
6. Personal interviews with department faculty
Application deadline is February 15 to begin the following autumn quarter. Application forms and procedures for admission to the Graduate School are available at www.grad.washington.edu/.

**Degree Requirements**

Minimum 36 credits, of which nine are thesis credits. Full-time medical laboratory scientists typically complete the program in two years. Students select one of five pathways, as follows:

1. Chemistry/Immunology
   a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
   b. Recommended: MICRO 441
   c. Electives relevant to thesis, chosen with advice from mentor: BIOC 426, BIOC 440, BIOC 441, BIOC 442, BIOC 540, BIOC 541, BIOC 542, BIOST 512, BIOST 513, CHEM 428, CHEM 429, CHEM 436, CONJ 546, IMMUN 532, IMMUN 533 IMMUN 534, IMMUN 535, PATH 500, PATH 502, PATH 513, PATH 515, PATH 516, PATH 517, P BIO 505, P BIO 506, P BIO 507, PHCOL 401, PHCOL 402

2. Hematology/Coagulation
   a. Required: BIOC 440, BIOC 441, BIOC 442, BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
   b. Recommended: PATH 516
   c. Elective relevant to thesis chosen with advice from mentor: BIOST 512, BIOST 513, CHEM 428, CHEM 429, CONJ 546, GENOME 465, IMMUN 441, IMMUN 532, P BIO 506, PATH 500, PATH 512, PATH 514, PATH 515, PATH 516, PATH 522, PATH 560 (*, max. 10).

3. Microbiology/Virology
   a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
   b. Recommended: IMMUN 441, MICRO 442, MICRO 444, MICRO 445, MICRO 555 (2.5)
   c. Electives relevant to thesis chosen with advice from mentor: BIOC 440, BIOC 441, BIOC 442, BIOC 541, BIOST 512, BIOST 513, CHEM 428, CHEM 429, CONJ 547, CONJ 550, EPI 503, EPI 507, EPI 510, EPI 511 (3-4), EPI 512, IMMUN 533, MICROM 411, MICROM 431, MICROM 450, MICROM 529, MICROM 530, MICROM 531, MICROM 553, P BIO 505, P BIO 506, PATH 512, PATH 513, PATH 515, PATH 516

4. Molecular Diagnostics/Genetics
   a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
   b. Recommended: BIOC 440 or equivalent, BIOC 441 or equivalent, BIOC 442 or equivalent, GENOME 465
   c. Electives relevant to thesis chosen with advice from mentor: BIOST 512, BIOST 513, BIOST 516, CHEM 428, CHEM 429, CONJ 546, EPI 516, EPI
517, GENOME 411, GENOME 466, GENOME 531, IMMUN 441, IMMUN 532, IMMUN 536, MICROM 450, MICROM 530, P BIO 505, P BIO 506

5. Management/Medical Informatics
   a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
   b. Electives relevant to thesis chosen with advice from mentor
      1. Business Administration: B A 470, B A 472
      2. Business Communications: B CMU 510

SCHOOL OF MEDICINE
LABORATORY MEDICINE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

LAB M 418 Introductory Clinical Chemistry (6) Bankson
Introduces the fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Limited to medical laboratory science students. Offered: Sp.
View course details in MyPlan: LAB M 418

LAB M 419 Clinical Coagulation (4) Hansen-Suchy
Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Limited to medical laboratory science students. Offered: S.
View course details in MyPlan: LAB M 419

LAB M 420 Laboratory Analysis of Urine and Body Fluids (3) Schiller
Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Limited to medical laboratory science students. Offered: S.
View course details in MyPlan: LAB M 420

LAB M 421 Medical Microbiology (1/6, max. 6) Abbott
Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Limited to medical laboratory science students. Offered: S.
View course details in MyPlan: LAB M 421

LAB M 423 Clinical Chemistry (*-, max. 24) lamma
View course details in MyPlan: LAB M 423

LAB M 424 Clinical Microbiology (*-, max. 24) G. VAN KEKERIX
Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation,
LAB M 424 Clinical Laboratory Medicine

Identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Limited to medical laboratory science students. Offered: AWSp.

View course details in MyPlan: LAB M 424

LAB M 425 Clinical Hematology (*-, max. 24)

Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Limited to medical laboratory science students. Offered: AWSp.

View course details in MyPlan: LAB M 425

LAB M 426 Clinical Immunohematology ([1-7]-, max. 7) D. SABA TH

Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Limited to medical laboratory science students. Offered: A.

View course details in MyPlan: LAB M 426

LAB M 427 Selected Studies in Laboratory Medicine (*-, max. 24) H. EGGLESTON

Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Limited to medical laboratory science students. Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: LAB M 427

LAB M 428 Clinical Biochemistry for Medical Laboratory Scientists (4) D. BANKSON

Introduces medical applications and the clinically relevant aspects of biochemistry necessary for understanding biochemical diseases. Teaches the structures and human metabolism of proteins, carbohydrates, lipids, and nucleotides in health, along with their roles in disease processes. Stressess normal biochemical pathways and subsequent diseases when the pathways are disrupted or diverted. Limited to medical laboratory science students. Offered: A.

View course details in MyPlan: LAB M 428

LAB M 429 Foundations of Medical Laboratory Science (5)

Lecture and laboratory cover the essential theories, concepts, and practices that define medical laboratory science as a distinctive profession within Laboratory Medicine and which circumscribe its scope of practice. Instructional areas comprise the pre-analytical, analytical, and post-analytical components of contemporary medical lab services. Limited to medical laboratory science students. Offered: A.

View course details in MyPlan: LAB M 429

LAB M 430 Medical Laboratory Science: Introductory Clinical (6)

Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Limited to medical laboratory science students. Prerequisite: LAB M 429. Offered: W.

View course details in MyPlan: LAB M 430

LAB M 431 Clinical Immunohematology Rotation (7-)

Practicum emphasizing application of knowledge and skills to perform a wide variety of basic testing routinely performed in contemporary blood laboratory and further develop discipline-specific competencies. Limited to medical laboratory science students. Offered: AWSp.

View course details in MyPlan: LAB M 431

LAB M 432 Phlebotomy Rotation (-2-)

Covers the theories, concepts, and practices underlying the safe and reliable collection of blood (phlebotomy)
for analysis by medical laboratory techniques. Limited to medical laboratory science students. Offered: AWSp.
View course details in MyPlan: LAB M 432

LAB M 433 Enrichment Rotation (-9) Xu
Selected practical experience emphasizing application of knowledge and skills to perform a wide variety of testing in a clinical setting and further develop discipline-specific competency in the major scientific disciplines of laboratory medicine, including hematology, clinical chemistry, microbiology, and immunohematology or pursuance of a clinical research study. Limited to medical laboratory science students. Offered: AWSp.
View course details in MyPlan: LAB M 433

LAB M 434 Virology Laboratory (1)
Laboratory coverage of testing procedures and techniques routinely performed in the contemporary virology lab to detect and identify viruses which cause disease in humans and to monitor therapies used to treat human viral infections. Limited to medical laboratory science students. Offered: Sp.
View course details in MyPlan: LAB M 434

LAB M 435 Molecular Diagnostics for Medical Laboratory Science (2) C. PRITCHARD
Provides a comprehensive overview of the fundamental principles of molecular diagnostics and explores its use in the diagnosis of disease. Topics include: nucleic acid structure and function, genetics, DNA chemistry, nucleic acid isolation, amplification techniques, components of a molecular laboratory, and evaluation of controls to validate results obtained. Limited to medical laboratory science students. Offered: W.
View course details in MyPlan: LAB M 435

LAB M 499 Undergraduate Research (*, max. 35)
Specific project in clinical laboratory investigation. Offered: AWSpS.
View course details in MyPlan: LAB M 499

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) Shirts
Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: LAB M 502

LAB M 510 Laboratory Medicine Research Conference (1, max. 6)
Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Prerequisite: permission of instructor. Instructors: Hoffman Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: LAB M 510

LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3)
Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in Laboratory Medicine or permission of instructor. Instructors: Schiller Offered: Sp, odd years.
View course details in MyPlan: LAB M 520

LAB M 521 Advanced Laboratory Hematology (1, max. 6)
Lectures on diagnostic clinical hematology with emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Instructors: Sabath Offered: AWSp.
View course details in MyPlan: LAB M 521

LAB M 522 Hematopathology Seminar (2) Wood
Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with PATH 522; W, even years.
View course details in MyPlan: LAB M 522
LAB M 590 P-Research Projects in Laboratory Medicine (*)
Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Instructors: Tait
Offered: AWSpS.
View course details in MyPlan: LAB M 590

LAB M 600 Independent Study or Research (*-)
Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: LAB M 600

LAB M 601 Internship (3-9, max. 9)
Prerequisite: graduate standing in laboratory medicine. Instructors: Schiller Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: LAB M 601

LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (*, max. 30) Wener
Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples. Offered: AWSpS.
View course details in MyPlan: LAB M 680

LAB M 685 P-Laboratory Case Studies for Clinical Diagnosis (4)
Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. (Four weeks half-time). Prerequisite: completion of required clerkships. Instructors: Nester Offered: Sp.
View course details in MyPlan: LAB M 685

LAB M 699 P-WWAMI Laboratory Medicine Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.
View course details in MyPlan: LAB M 699

LAB M 700 Master's Thesis (-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: LAB M 700
SCHOOL OF MEDICINE
MEDEX (DEGREE PROGRAM)
MEDEX

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

MEDEX 401 Introduction to Paramedicine (8)
Introduces the history of paramedicine and role of the paramedic, as well as medical concepts and technical skills relevant to its practice. Prerequisite: Seattle/King County paramedic students only. Offered: A.
View course details in MyPlan: MEDEX 401

MEDEX 402 Airway Management (3)
Teaches cognitive and psychomotor skills critical to basic and advanced airway management. Includes enhanced techniques of rapid sequence intubation. Prerequisite: MEDEX 401 which may taken concurrently. Offered: A.
View course details in MyPlan: MEDEX 402

MEDEX 403 Patient Assessment (4)
Teaches patient assessment and total patient care management. Provides didactic and laboratory exposure necessary to perform complete and thorough patient exams. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.
View course details in MyPlan: MEDEX 403

MEDEX 404 Medical Emergencies I (5)
Studies the pathophysiology and treatment of medical emergencies encountered in cardiopulmonary, neurovascular, endocrine, renal, and obstetric patients. Introduces the pharmacology of neurovascular and cardiopulmonary medications. Prerequisite: MEDEX 403. Offered: W.
View course details in MyPlan: MEDEX 404

MEDEX 405 Trauma Emergencies (5)
Emphasizes advanced pre-hospital management of the critical trauma patient. Teaches the pathophysiology and treatment of burns and trauma to the head, chest, and abdomen. Includes advanced techniques in surgical airway. Prerequisite: MEDEX 403 which may be taken concurrently. Offered: W.
View course details in MyPlan: MEDEX 405

MEDEX 406 Medical Emergencies II (3)
Studies the pathophysiology and treatment of alcoholism, environmental disorders, infections and
communicable diseases, hematology, toxicology, and psychiatric emergencies. Prerequisite: MEDEX 405.
Offered: Sp.
View course details in MyPlan: MEDEX 406

MEDEX 407 Special Considerations for Paramedicine (4)
Emphasizes the care and treatment of pediatric, geriatric, and bariatric patients. Reviews special considerations encountered in scenarios such as multiple casualty, confined space, and extrication incidents. Prerequisite: MEDEX 406 which may be taken concurrently. Offered: Sp.
View course details in MyPlan: MEDEX 407

MEDEX 408 Advanced Certifications (5)
Instruction in PEPP, PALS, ACLS, ATLS, and National Registry curricula and certifications. Prerequisite: MEDEX 407. Credit/no-credit only. Offered: S.
View course details in MyPlan: MEDEX 408

MEDEX 414 Paramedic Clinical Practicum I (3)
Participation in all aspects of patient care in the HMC-ER and OR with a primary focus on patient assessment and examination, as well as proficiency in IV cannulation and airway management. Prerequisite: MEDEX 401 which may be taken concurrently; Seattle/King County paramedic students only. Credit/no-credit only. Offered: A.
View course details in MyPlan: MEDEX 414

MEDEX 415 Paramedic Field Practicum I (6)
Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes aspects of scene management and total patient care competence. Prerequisite: MEDEX 401 which may be taken concurrently. Credit/no-credit only. Offered: A.
View course details in MyPlan: MEDEX 415

MEDEX 424 Paramedic Clinical Practicum II (3)
Participation in patient care in the HMC-ER with a focus on patient assessment, examination, IV cannulation, and airway management. Emphasizes the critical care of patients in the cardiovascular intensive care unit. Prerequisite: MEDEX 414. Credit/no-credit only. Offered: W.
View course details in MyPlan: MEDEX 424

MEDEX 425 Paramedic Field Practicum II (7)
Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes scene management and total patient care competence. Prerequisite: MEDEX 415. Credit/no-credit only. Offered: W.
View course details in MyPlan: MEDEX 425

MEDEX 434 Paramedic Clinical Practicum III (4)
Participation in patient care in the CHRMC-ER and OR with a focus on pediatric patient assessment, examination, and proficiency in IV cannulation and airway management. Emphasizes the care of expectant mother and newborn through rotations in the UW Labor and Delivery department. Prerequisite: MEDEX 424. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: MEDEX 434

MEDEX 435 Paramedic Field Practicum III (8)
Consists of regularly scheduled ride time with Seattle Medic One. The student assumes graduated responsibility for patient care and scene management while being closely evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes the field care of the pediatric patient and expectant mother. Prerequisite: MEDEX 425. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: MEDEX 435
MEDEX 444 Paramedic Clinical Practicum IV (3)
Participation in patient care in the HMC Emergency Department, Neurology Clinic, Pulmonary Clinic, and Cardiology Clinic. Focuses on trauma management, extrication, MCI, and search/rescue. Includes observation of a minimum of three autopsies with the medical examiner. Prerequisite: MEDEX 434. Credit/no-credit only. Offered: S.
View course details in MyPlan: MEDEX 444

MEDEX 445 Paramedic Field Practicum IV (11)
Consists of regularly scheduled ride time with Seattle Medic One paramedics. The student assumes all responsibilities for scene management and patient care. Evaluations determine completion of the program. Prerequisite: MEDEX 435. Credit/no-credit only. Offered: S.
View course details in MyPlan: MEDEX 445

MEDEX 450 Basic Science in Clinical Medicine (6)
Review of important basic science concepts that include relevant topics for a healthcare clinician. Prerequisite: permission of the MEDEX program. Offered: WS.
View course details in MyPlan: MEDEX 450

MEDEX 451 Anatomy and Physiology in Clinical Medicine (6)
Uses an organ system approach to human anatomy and physiology relevant for a healthcare clinician. Offered: AS.
View course details in MyPlan: MEDEX 451

MEDEX 452 Pathophysiology for Primary Care (6)
Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Offered: A.
View course details in MyPlan: MEDEX 452

MEDEX 453 Basic Clinical Skills (5)
Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Offered: ASp.
View course details in MyPlan: MEDEX 453

MEDEX 454 Adult Medicine I (7)
Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.
View course details in MyPlan: MEDEX 454

MEDEX 456 Maternal and Child Health for the MEDEX Practitioner I (3)
Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.
View course details in MyPlan: MEDEX 456

MEDEX 457 Behavioral Medicine I (2)
Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: A.
View course details in MyPlan: MEDEX 457

MEDEX 458 Behavioral Medicine (2)
Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: W.
View course details in MyPlan: MEDEX 458

MEDEX 459 Behavioral Medicine (2)
Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional
problems in a clinical setting. Offered: Sp.
View course details in MyPlan: MEDEX 459

**MEDEX 460 Principles of Patient Management (3)**
Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: W.
View course details in MyPlan: MEDEX 460

**MEDEX 461 Principles of Patient Management (3)**
Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: Sp.
View course details in MyPlan: MEDEX 461

**MEDEX 462 Maternal and Child Health for the MEDEX Practitioner II (3)**
View course details in MyPlan: MEDEX 462

**MEDEX 463 Clinical Clerkships I (19)**
Full-time clinical clerkship spent in institution-based or specialty practice settings with the supervision of licensed health care providers. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 463

**MEDEX 465 Clinical Clerkships II (19)**
Continuation of clinical clerkships spent in institution-based or specialty practice settings with supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 465

**MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (19) Ballweg**
Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 466

**MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (19) Ballweg**
Further experience in primary-care practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 467

**MEDEX 468 Emergency Medicine I for the MEDEX Practitioner (2)**
Approach to the diagnosis and management of common emergency conditions for primary-care physician assistants. Organ system approach. Offered: W.
View course details in MyPlan: MEDEX 468

**MEDEX 469 Emergency Medicine II for the MEDEX Practitioner (2)**
View course details in MyPlan: MEDEX 469

**MEDEX 470 Professional Role Development (1)**
Explores professional role development, health access issues, licensing issues, healthcare quality,
interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.
View course details in MyPlan: MEDEX 470

**MEDEX 471 Professional Role Development (1)**
Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.
View course details in MyPlan: MEDEX 471

**MEDEX 472 Professional Role Development (1)**
Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.
View course details in MyPlan: MEDEX 472

**MEDEX 473 Technical Skills (1)**
Introduces clinical skills and procedures through hands-on experiences. Offered: A.
View course details in MyPlan: MEDEX 473

**MEDEX 474 Technical Skills (1)**
Introduces clinical skills and procedures through hands-on experiences. Offered: W.
View course details in MyPlan: MEDEX 474

**MEDEX 475 Technical Skills (1)**
Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.
View course details in MyPlan: MEDEX 475

**MEDEX 499 Special Field Projects/Independent Study (1-19, max. 19)**
Clinical clerkships and independent study activities. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 499

**MEDEX 510 Healthcare for Rural and Medically Underserved Populations (5)**
Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations for practicing clinicians. Prerequisite: EMCHS students only. Offered: S.
View course details in MyPlan: MEDEX 510

**MEDEX 511 Healthcare Administration and Public Health (5)**
Applies the basic principles of healthcare administration and public health to specific communities and practices. Prerequisite: EMCHS students only. Offered: S.
View course details in MyPlan: MEDEX 511

**MEDEX 512 Academic Medicine and Specialty Practice for Practicing Clinicians (5)**
Overview for practicing clinicians of primary care as well as medical and surgical specialty practice within the academic medicine environment. Prerequisite: admission to the program. Offered: S.
View course details in MyPlan: MEDEX 512

**MEDEX 513 Global Health for Practicing Clinicians (5)**
Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Prerequisite: admission to the program. Offered: S.
View course details in MyPlan: MEDEX 513

**MEDEX 521 Capstone Project I (3)**
Includes capstone project introduction, literature review, critical reading, research design and proposals, ethics, IRB, research writing, and results presentation. (Two weeks on the Seattle campus, six weeks online). Prerequisite: EMCHS students only. Credit/no-credit only. Offered: S.
View course details in MyPlan: MEDEX 521

http://www.washington.edu/students/crscti/medex.html
MEDEX 522 Capstone Project II (3)
Details students' choice of capstone project and preparation of a detailed proposal including the timeline for completion. Prerequisite: MEDEX 521. Credit/no-credit only. Offered: A.
View course details in MyPlan: MEDEX 522

MEDEX 523 Capstone Project III (3)
Students work on capstone projects. Prerequisite: MEDEX 522. Credit/no-credit only. Offered: W.
View course details in MyPlan: MEDEX 523

MEDEX 524 Capstone Project IV (3)
Continuation of work on the capstone project. Prerequisite: MEDEX 523. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: MEDEX 524

MEDEX 525 Capstone Project V (5)
Completion of the capstone project, preparation of final drafts, submission of finished project to faculty mentors, and presentation of project. Prerequisite: MEDEX 524. Credit/no-credit only. Offered: S.
View course details in MyPlan: MEDEX 525

MEDEX 528 Investigative Skills for Practicing Clinicians (5)
Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Applications critically appraise the public health and biomedical literatures drawing examples from current scientific literature and existing data. Prerequisite: admission to EMCHS program. Offered: S.
View course details in MyPlan: MEDEX 528

MEDEX 531 Clinical Residencies I (3)
Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 531

MEDEX 532 Clinical Residencies II (3)
Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 532

MEDEX 533 Clinical Residencies III (3)
Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 533

MEDEX 536 Health Policy for Practicing Clinicians (4)
Overview of United States health policy issues including payment structures, quality, disparities, workforce and legislative impact. Prerequisite: EMCHS students only. Offered: W.
View course details in MyPlan: MEDEX 536

MEDEX 537 Leadership for Practicing Clinicians (4)
Leadership skills for clinical practice, community, the profession, and organizations. Prerequisite: EMCHS students only. Offered: A.
View course details in MyPlan: MEDEX 537

MEDEX 538 The Physician Assistant Profession (4)
Overview of the physician assistant profession, focusing on the history of the profession, education, economics, legal, political, and professional aspects of the physician assistant profession, current and future physician assistant roles, and hot topics. Prerequisite: EMCHS students only. Offered: Sp.
View course details in MyPlan: MEDEX 538

http://www.washington.edu/students/crs-cat/medex.html
MEDEX 540 Healthcare for Rural and Underserved Populations (5)
Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations. Offered: S.
View course details in MyPlan: MEDEX 540

MEDEX 541 Healthcare Administration and Public Health (5)
Application of the basic principles of healthcare administration and public health to specific communities and practices. Offered: S.
View course details in MyPlan: MEDEX 541

MEDEX 542 Academic Medicine and Specialty Practice (5)
Overview of primary care as well as medical and surgical specialty practice within the academic medicine environment. Offered: S.
View course details in MyPlan: MEDEX 542

MEDEX 543 Global Health (5)
Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Offered: S.
View course details in MyPlan: MEDEX 543

MEDEX 550 Basic Science in Clinical Medicine (6)
Intensive review of important basic scientific concepts relevant to clinical medicine. Prerequisite: MEDEX Northwest students only. Offered: S.
View course details in MyPlan: MEDEX 550

MEDEX 551 Anatomy and Physiology (6)
Overview and review of human anatomy and physiology by organ system. Prerequisite: MEDEX students only. Offered: S.
View course details in MyPlan: MEDEX 551

MEDEX 552 Pathophysiology for Primary Care (6)
Examines pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Studies pathophysiology per organ system. Offered: A.
View course details in MyPlan: MEDEX 552

MEDEX 553 Basic Clinical Skills (5)
Provides the student with mastery of history-taking and physical examination skills, thoroughness in data collection, medical record-keeping, and verbal presentation skills. Offered: A.
View course details in MyPlan: MEDEX 553

MEDEX 554 Adult Medicine I (7)
Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: W.
View course details in MyPlan: MEDEX 554

MEDEX 555 Adults Medicine II (7)
Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: Sp.
View course details in MyPlan: MEDEX 555

MEDEX 556 Maternal Child Health I (3)
Examines the principles of prenatal care and primary-care pediatrics. Offered: W.
View course details in MyPlan: MEDEX 556
MEDEX 557 Behavioral Medicine I (2)
Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: A.
View course details in MyPlan: MEDEX 557

MEDEX 558 Behavioral Medicine II (2)
Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: W.
View course details in MyPlan: MEDEX 558

MEDEX 559 Behavioral Medicine III (2)
Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: Sp.
View course details in MyPlan: MEDEX 559

MEDEX 560 Principles of Patient Management I (3)
Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: W.
View course details in MyPlan: MEDEX 560

MEDEX 561 Principles of Patient Management II (3)
Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: Sp.
View course details in MyPlan: MEDEX 561

MEDEX 562 Maternal Child Health II (3)
Emphasizes the diagnosis and treatment of common pediatric problems. Prerequisite: MEDEX 556. Offered: Sp.
View course details in MyPlan: MEDEX 562

MEDEX 563 Clinical Clerkships I (19)
Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 563

MEDEX 565 Clinical Clerkships II (19)
Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Prerequisite: MEDEX 563. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 565

MEDEX 566 Family Practice Clerkship I (19)
Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 566

MEDEX 567 Family Practice Clerkship II (19)
Further experience in primary-care practice with an emphasis on independent patient management by the student supervised by family practitioners. Prerequisite: MEDEX 566. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 567

MEDEX 568 Emergency Medicine I (2)
Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system
approach. Offered: W.
View course details in MyPlan: MEDEX 568

MEDEX 569 Emergency Medicine II (2)
Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: Sp.
View course details in MyPlan: MEDEX 569

MEDEX 570 Professional Role Development I (1)
Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.
View course details in MyPlan: MEDEX 570

MEDEX 571 Professional Role Development II (1)
Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.
View course details in MyPlan: MEDEX 571

MEDEX 572 Professional Role Development III (1)
Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.
View course details in MyPlan: MEDEX 572

MEDEX 573 Technical Skills I (1)
Introduces clinical skills and procedures through hands-on experiences. Offered: A.
View course details in MyPlan: MEDEX 573

MEDEX 574 Technical Skills II (1)
Introduces clinical skills and procedures through hands-on experiences. Offered: W.
View course details in MyPlan: MEDEX 574

MEDEX 575 Technical Skills III (1)
Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.
View course details in MyPlan: MEDEX 575

MEDEX 580 Homelessness in Seattle (2)
Multi-disciplinary course developing knowledge and skills in the area of acute and chronic homeless health problems, understanding the history and social constructs as well as the services and disparities facing this population.
View course details in MyPlan: MEDEX 580

MEDEX 588 Investigative Skills for Entry-Level Clinicians (5)
Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Application appraise the public health and biomedical literatures drawing on examples from current scientific literature and existing data. Offered: S.
View course details in MyPlan: MEDEX 588

MEDEX 599 Independent Study (1-19, max. 19)
Supervised clinical clerkship or independent study activities to meet specific needs. Prerequisite: permission of the MEDEX program. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDEX 599

Department Overview

RR512 University of Washington Medical Center

domchair@uw.edu

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veterans' Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

SCHOOL OF MEDICINE
EMERGENCY MEDICINE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

MED EM 501 P-Emergency Medicine Preceptorship (1, max. 12)
Provides opportunities for first- and second-year medical students to gain experience working in an emergency setting. Students shadow faculty in emergency medicine during their shifts. Includes learning about common conditions seen in the emergency department and the opportunity to work on history taking and physical exam skills. Prerequisite: permission of instructor. Credit/no-credit only.
View course details in MyPlan: MED EM 501

MED EM 550 P-Introduction to Emergency Medicine (1)
Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care. Credit/no-credit only.
View course details in MyPlan: MED EM 550

MED EM 598 P-Emergency Medicine Independent Study and Remediation (*, max. 8)
Designed for medical students required to complete additional study related to the required Emergency Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission Offered: AWSpS.
View course details in MyPlan: MED EM 598

MED EM 600 Independent Study/Research (*)
Provides medical students the opportunity to participate in research as part of their medical education. Must obtain permission through submission of a proposal to department and securing a faculty sponsor.
View course details in MyPlan: MED EM 600

MED EM 605 P-Emergency Medicine - UWMC (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 605
MED EM 606 P-Emergency Medicine - HMC/UWMC (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI, PEDS; and SURG required clerkships.
View course details in MyPlan: MED EM 606

MED EM 607 P-Emergency Medicine - Madigan (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 607

MED EM 608 P-Emergency Medicine - Swedish Cherry Hill (8)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI; PEDS; and SURG required clerkships.
View course details in MyPlan: MED EM 608

MED EM 609 Emergency Medicine - Seattle Children's (8)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 609

MED EM 617 P-Emergency Medicine - Olympia (8)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 617

MED EM 624 P-Emergency Medicine - Shelton (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 624

MED EM 625 P-Emergency Medicine - Spokane (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 625

MED EM 626 P-Emergency Medicine - Spokane Deaconess (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 626

MED EM 645 P-Emergency Medicine - Boise, St. Lukes (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 645

MED EM 646 P-Emergency Medicine - Boise, Saint Alphonsus (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 646

MED EM 656 P-Emergency Medicine - Juneau, AK (8)
Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
View course details in MyPlan: MED EM 656
MED EM 657 P-Emergency Medicine - Fairbanks (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. View course details in MyPlan: MED EM 657

MED EM 658 P-Emergency Medicine - Anchorage (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. View course details in MyPlan: MED EM 658

MED EM 662 P-Emergency Medicine - Bozeman, MT (8)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. View course details in MyPlan: MED EM 662

MED EM 663 P-Emergency Medicine - Billings, MT (8)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. View course details in MyPlan: MED EM 663

MED EM 668 P-Emergency Medicine - Casper (*, max. 16)
Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. View course details in MyPlan: MED EM 668

MED EM 669 P-Emergency Medicine - Cheyenne, WY (8)
Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. View course details in MyPlan: MED EM 669

MED EM 680 P-Emergency Medicine Subinternship - Madigan (8)
Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only; permission of department. View course details in MyPlan: MED EM 680

MED EM 681 P-Emergency Medicine Subinternship - HMC/UWCR (*, max. 16)
Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only; permission of department. View course details in MyPlan: MED EM 681

MED EM 683 Emergency Medicine Point-of-Care Ultrasound (4)
Introduction to point-of-care ultrasound in an emergency department setting. Students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated and patient care settings. Incorporates classroom didactics, procedure simulation and clinical application. Offered: WSp. View course details in MyPlan: MED EM 683

MED EM 697 P-Emergency Medicine Special Electives (*, max. 24)
By specific arrangement, for qualified students, special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least one month before preregistration. (Two, four, six, or twelve weeks). Prerequisite: required EM clerkship; permission of instructor at away site and
MED EM 699 P-WWAMI Emergency Medicine Special Elective (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington, within the WWAMI region. Prerequisite: permission of department and away site.
View course details in MyPlan: MED EM 699

SCHOOL OF MEDICINE
MEDICINE

Detailed course offerings (Time Schedule) are available for

- **Spring Quarter 2017**
- **Summer Quarter 2017**
- **Autumn Quarter 2017**

**MED 498 Undergraduate Thesis (*)&**
View course details in MyPlan: MED 498

**MED 499 Undergraduate Research (1-10, max. 25)**
Case studies, with laboratory research. Available to undergraduates and medical students. Offered: AWSpS.
View course details in MyPlan: MED 499

**MED 505 P-Preceptorship in Medicine (1, max. 12)**
To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of department. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MED 505

**MED 507 HIV in Latinos (1-, max. 12)**
Students shadow an attending physician, and participate in routine and acute visits for a primarily Spanish-speaking patient population. Includes Spanish-language health education and rapid HIV testing sessions, and encourages attendance at a community event targeting the Latino HIV community. Prerequisite: permission of instructor; conversational Spanish proficiency or FAMED 556. Credit/no-credit only.
View course details in MyPlan: MED 507

**MED 510 Health Issues of Sexual Minorities (1)**
Introduction to the special healthcare issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts.
View course details in MyPlan: MED 510

**MED 515 Medicine as Culture (1)**
Examines the ways that medical practice, the medical profession, and ideas about sickness and health are embedded in society and culture, as a way of contextualizing biological phenomena and medical knowledge. Credit/no-credit only.
View course details in MyPlan: MED 515
MED 522 Introduction to Human and Medical Genetics (3)
Provides in-depth examination of current topics in human and medical genetics with an emphasis on clinical and molecular diagnosis of genetic conditions, approaches to therapy, research, and molecular genetic technology. Credit/no-credit only. Offered: AWSp. View course details in MyPlan: MED 522

MED 525 Introduction to Gerontology and Geriatric Medicine (1)
Introduces gerontology and geriatric medicine. Explores topics in geriatric medicine including: multidisciplinary care, dementia and delirium, falls, polypharmacy, urinary incontinence, fragility, and end-of-life care. Employs a combination of lectures, time spent interviewing and observing patients in hospital-based clinics, private homes, long term care and continuing retirement communities, and bedside teaching with a healthcare provider. Credit/no-credit only. View course details in MyPlan: MED 525

MED 530 AIDS: A Multidisciplinary Approach (2) C. FARQUHAR
Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/GH 562. View course details in MyPlan: MED 530

MED 531 P-Human Genetics (*)
Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics. View course details in MyPlan: MED 531

MED 533 P-Clinical Endocrinology (2)
Includes brief lectures followed by instructor-led interviews with patients to illustrate the clinical presentation, diagnosis, and treatment of the major endocrinopathies. Students gain a greater appreciation of the impact these disorders have on patients' lives. Prerequisite: second year medical students. View course details in MyPlan: MED 533

MED 534 Wilderness Medicine (1)
Provides training in medical emergencies and clinical situations unique to wilderness settings where access to medical care is limited. Students gain experience in patient assessment, extrication, and the management of common wilderness situations including altitude illness, burns, trauma, diving injuries, hypo- and hyperthermia, and toxin exposures. Offered: Sp. View course details in MyPlan: MED 534

MED 536 Introduction to Critical Care Medicine (1)
Uses a combination of didactics, time spent observing rounds and physicians on-call in the ICU as well as dedicated bedside teaching by a critical care attending physician to teach about core topics in pediatric and adult critical care medicine including shock, respiratory failure, sepsis, mechanical ventilation, and palliative care. Offered: W. View course details in MyPlan: MED 536

MED 540 Preventing Healthcare Associated Infections (1)
Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with EPI 505. View course details in MyPlan: MED 540

MED 546 Clinical Applications of Gene Therapy (2)
Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews. View course details in MyPlan: MED 546
MED 547 Quantitative Methods in Medical Genetics (2)
Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.
View course details in MyPlan: MED 547

MED 549 Clinical Medical Genetics (1)
Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor.
View course details in MyPlan: MED 549

MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1)
Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.
View course details in MyPlan: MED 555

MED 556 Visual Thinking: How to Observe in Depth (1)
Uses visual thinking strategies to look at art and enhance diagnostic acumen. Expands observational and critical thinking skills, and encourages open-ended discussion. Skills applied in assessing patients. Combination of slide sessions and observation of original objects at Seattle museums. Credit/no-credit only. Offered: A.
View course details in MyPlan: MED 556

MED 557 Hispanic Health and Healthcare Disparities (1) Acosta
Covers Hispanic culture and language, history of Hispanics in the United States, Hispanic health status issues, and effective strategies for working across cultures and linguistic barriers. Designed to help the learner understand and respond better to the healthcare needs of the Hispanic community.
View course details in MyPlan: MED 557

MED 560 P-Advanced Global Health (2)
Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with G H 505.
View course details in MyPlan: MED 560

MED 561 Tropical Medicine (1) F. BUCKNER, P. POTTINGER
Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with G H 561; Sp.
View course details in MyPlan: MED 561

MED 565 P-The Healer's Art: Awakening the Heart of Medicine (1)
Encourages cultivation of human dimensions in practice of medicine while strengthening personal commitment to medicine as a life's work. Facilitates student recognition of commonality of personal concerns among peers and student response to the dimension of mystery in the experience of illness as well as development of the capacity for awe. Credit/no-credit only. Offered: Sp.
View course details in MyPlan: MED 565

MED 598 P-Medicine Independent Study and Remediation (*, max. 8)
Designed for medical students required to complete additional study related to the required Internal Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered:
AWSpS.
View course details in MyPlan: MED 598

MED 599 P-Transfusion Machine (3)
Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.
View course details in MyPlan: MED 599

MED 600 Independent Study or Research (*)
Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: MED 600

SCHOOL OF MEDICINE
SCHOOL OF MEDICINE
ELECTIVE CLERKSHIPS

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

MEDECK 601 P-Ward Medicine Subinternship - Seattle (*, max. 24)
Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks).
Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 601

MEDECK 602 P-Primary Care - Seattle (8/12)
Four-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Roosevelt Clinic following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 602

MEDECK 603 P-Clinical Cardiology and Electrocardiography - Seattle (8)
Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks).
Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 603

MEDECK 604 P-Clinical Dermatology - Seattle (8)
Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks).
Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 604

MEDECK 605 P-Clinical Endocrinology and Metabolism - Seattle (*, max. 12)
Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 605

MEDECK 606 P-Clinical Gastroenterology - Seattle (8)
Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional
Staff, plus directed tutorial work. Students are scheduled at one of three sites: UWMC, Harborview Medical Center, and Veterans' Administration hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 606

**MEDECK 607 P-Clinical Hematology/Oncology - Seattle (8)**
Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 607

**MEDECK 608 P-Clinical Infectious Diseases - Seattle (8)**
Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 608

**MEDECK 609 P-Nephrology and Fluid Balance - Seattle (8)**
Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 609

**MEDECK 610 P-Clinical Respiratory Disease (8)**
Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 610

**MEDECK 612 P-Clinical HIV Care - Seattle (8)**
Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 612

**MEDECK 613 P-Clinical Nutrition - Seattle (8)**
Instruction in nutritional assessment and care of both inpatients and outpatients. Students work with preceptors at a variety of hospital and clinic teaching sites, attend nutrition-related seminars, and practice interview skills on standardized patients. (Four weeks). Prerequisite: HUBIO 568; third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 613

**MEDECK 614 P-Oncology Subinternship (8)**
Students participate in the oncology service in the inpatient oncology consult service at UWMC hospital, obtaining exposure to the management of patients with cancer, oncological complications and emergencies, oncological drug mechanisms of action, side effects, and interactions. Obtain basic understanding of principles of oncology care. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

View course details in MyPlan: MEDECK 614

**MEDECK 615 P-Rheumatology - Seattle (8)**
Full-time inpatient-outpatient clerkship in rheumatology. Includes diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the UW Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In
addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 615

**MEDECK 616 P-Advanced Dermatology Clinic - Seattle (8)**
Advanced clinical dermatology clerkship at various sites including HMC, UWMC, VA Seattle, and Children's Hospital. Students choose from four tracks within the rotation: dermatopathology, pediatric dermatology, dermatologic surgery, and advanced medical dermatology. (Four weeks). Prerequisite: third-year required Medicine clerkship.; MEDECK 604. Offered: AWSpS.
View course details in MyPlan: MEDECK 616

**MEDECK 617 P-Harborview Evening Clinic - Seattle (2)**
A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students must apply to this program, and are expected to participate for the full academic year. Prerequisite: third-year required Medicine clerkship.
View course details in MyPlan: MEDECK 617

**MEDECK 618 P-Medical Consultation - Seattle (8)**
Full-time outpatient and inpatient elective in peri-operative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 618

**MEDECK 619 P-Management of Sexually Transmitted Diseases - Seattle (2, max. 12)**
Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. (Two weeks). Prerequisite: third-year required Medicine, OB/GYN, and Surgery clerkships. Offered: AWSpS.
View course details in MyPlan: MEDECK 619

**MEDECK 620 P-Critical Care Medicine Subinternship - Seattle (8)**
Participating students function at the sub-intern level on the MICU service at either Harborview Medical Center, UWMC, or VAMC. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 620

**MEDECK 622 P-Clinical Medical Genetics (8)**
Students see outpatients and attend a variety of outpatient clinics including subspecialty clinics in cancer genetics, connective tissue genetics, neurogenetics, Turner syndrome and dermatologic genetics, and pediatric general genetics clinics with an emphasis on dysmorphology, developmental delay, disorders of sexual differentiation, skeletal dysplasia, craniofacial anomalies, and neurogenetics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 622

**MEDECK 623 P-Clinical Wound Management (*)**
Opportunity for medical student to be exposed to and learn wound care management in clinical setting. At end of rotation students should be able to diagnose cause of chronic ulcer or wound, outline the approach to the management of diabetic foot ulcer, peripheral artery disease ulcer and VLU, and initiate treatments such as sharp debridement, VAC, dressing, and Unna Boot placement. (Two weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 623
MEDECK 624 Hospitalist Subinternship - Seattle, WA (8)
Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist.
View course details in MyPlan: MEDECK 624

MEDECK 625 Cardiology Subinternship - Seattle, WA (8)
Students serve as intern on the cardiology service under the supervision of senior resident and cardiology attending physicians.
View course details in MyPlan: MEDECK 625

MEDECK 626 P-Clinical Cardiology and Electrocardiography - Tacoma (8)
Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship.
View course details in MyPlan: MEDECK 626

MEDECK 627 P-Clinical Endocrinology and Metabolism - Tacoma (*, max. 12)
Clerkship in clinical endocrinology and metabolism. Combined inpatient and outpatient assignments at selected hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship.
View course details in MyPlan: MEDECK 627

MEDECK 628 P-Clinical Infectious Diseases - Tacoma (8)
Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 628

MEDECK 629 P-Clinical Respiratory Disease and Critical Care - Tacoma (8)
Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 629

MEDECK 630 P-Ward Medicine Subinternship - Tacoma (*, max. 24)
Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 630

MEDECK 631 P-Ward Medicine Subinternship - Spokane (8)
Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 631

MEDECK 633 P-Clinical Cardiology and Electrocardiography - Washington (8)
Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 633

MEDECK 634 P-Clinical Dermatology - Washington (8)
Participation in dermatology clinics and inpatient consultations. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 634
MEDECK 636 P-Clinical Gastroenterology - Washington (8)
Participation in consulting ward rounds, procedures, conferences, and selected clinics at Sacred Heart Hospital in Spokane. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 636

MEDECK 637 Clinical Infectious Diseases - Yakima, WA (8)
Students participate in the clinic and consulting service at area hospitals. Includes patients with a range of community acquired and hospital acquired infectious diseases. Students participate in antibiotic stewardship discussions and infection control meetings.
View course details in MyPlan: MEDECK 637

MEDECK 638 Clinical Infectious Diseases - Spokane (8)
Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 638

MEDECK 639 P-Nephrology and Fluid Balance - Washington (8)
Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 639

MEDECK 640 Critical Care Medicine Subinternship - Washington (8)
Participating students function at the sub-intern level on the MICU. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 640

MEDECK 644 P-Clinical Dermatology - Wyoming (8)
Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 644

MEDECK 651 P-Ward Medicine Subinternship - Alaska (*, max. 24)
Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 651

MEDECK 652 P-Infectious Disease Consults - Alaska (8)
Intensive four week experience caring for patients with complex infectious diseases and immune compromise. Outpatient management of HIV-infected patients, execution of antimicrobial stewardship program, and exposure to treatment of a wide range of infectious disease pathology seen in Alaska. Prerequisite: Required internal medicine clerkship.
View course details in MyPlan: MEDECK 652

MEDECK 653 P-Clinical Cardiology and Electrocardiography - Alaska (8)
Clerkship in clinical cardiology. Combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 653
MEDECK 654 P-Clinical Dermatology - Alaska (8)
Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 654

MEDECK 658 P-Clinical Infectious Diseases Alaska (8)
Students participate in clinic and in the consulting service throughout the hospital, attend ICU, antimicrobial stewardship rounds, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship; fourth-year standing. Offered: AWSpS.
View course details in MyPlan: MEDECK 658

MEDECK 660 P-Critical Care Subinternship - Alaska (8)
Participating students function at the sub-intern level on the MICU service at Alaska Native Medical Center. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four Weeks). Prerequisite: Third-year required Medicine clerkship.
View course details in MyPlan: MEDECK 660

MEDECK 661 P-Ward Medicine Subinternship-Billings, MT (8)
Students act in the capacity of interns on the medical wards under supervision of the house staff and visiting physicians. They attend all regular medicine rounds and conference as their schedules permit. Prerequisite: Third year required Medicine clerkship.
View course details in MyPlan: MEDECK 661

MEDECK 664 P-Clinical Dermatology - Montana (8)
Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 664

MEDECK 665 P-Clinical Endocrinology- Bozeman (8)
Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals in Bozeman, MT. Prerequisite: Third-year required Medicine Clerkship Offered: AWSpS.
View course details in MyPlan: MEDECK 665

MEDECK 669 P-Nephrology and Fluid Balance - Montana (8)
Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consultations, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MEDECK 669

MEDECK 670 P-Clinical Medicine Critical Care - Idaho Falls (8)
Inpatient critical care rotation in community hospital setting at Eastern Idaho Regional Medical Center in Idaho Falls. Assist in diagnosis and management of common ICU problems and major trauma resuscitation under supervision of critical care physicians. Exposure to common ICU problems, which may include sepsis, respiratory failure, hypotension, organ failure, and gastrointestinal hemorrhage. Students work as multidisciplinary team. (Four weeks) Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 670

MEDECK 671 P-Ward Medicine Subinternship - Idaho (*, max. 24)
Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks).
Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 671

MEDECK 672 P-Clinical Endocrinology and Metabolism - Idaho Falls, ID (8)
Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: medicine required clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 672

MEDECK 673 P-Clinical Cardiology and Electrocardiography - Idaho (8)
Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
View course details in MyPlan: MEDECK 673

MEDECK 674 P-Clinical Dermatology - Idaho (8)
Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship.
Offered: AWSpS.
View course details in MyPlan: MEDECK 674

MEDECK 675 P-Clinical Allergy and Immunology - Boise, ID (4)
Clinical experience seeing a combination of new and recheck patients with allergy, asthma and immunology disorders for example but not limited to, seasonal allergies, allergic rashes, asthma, chronic cough, chronic sinusitis, contact dermatitis, bee sting allergy, and food allergy. Prerequisite: Medicine Clerkship and 4th year standing.
View course details in MyPlan: MEDECK 675

MEDECK 676 P-Critical Gastroenterology - Boise, ID (8)
Clerkship in clinical gastroenterology in Boise, ID. Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff, plus directed tutorial work.
View course details in MyPlan: MEDECK 676

MEDECK 677 P-Clinical Hematology/Oncology - Idaho (8)
Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship.
Offered: AWSpS.
View course details in MyPlan: MEDECK 677

MEDECK 678 P-Clinical Infectious Diseases - Idaho (8)
Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship.
Offered: AWSpS.
View course details in MyPlan: MEDECK 678

MEDECK 679 P-Nephrology and Fluid Balance - Idaho (8)
Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship.
Offered: AWSpS.
View course details in MyPlan: MEDECK 679

MEDECK 680 P-Clinical Respiratory Disease and Critical Care Medicine - Idaho (8)
Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship.
Offered: AWSpS.
View course details in MyPlan: MEDECK 680
**MEDECK 681 P-Clinical Aspects of Aging - Idaho (8)**
Work with elderly patients as subintern with senior care program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
*View course details in MyPlan: MEDECK 681*

**MEDECK 682 P-critical Care Subinternship- Idaho (8)**
Students function at the sub-intern level on the MICU service. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four Weeks). Prerequisite: Third-year required Medicine clerkship. Offered: AWSpS.
*View course details in MyPlan: MEDECK 682*

**MEDECK 683 P-Outpatient Clinical Cardiology Virgina Mason (8)**
Four-week clerkship in clinical outpatient cardiology at Virginia Mason Heart Institute. Covers ECG interpretation, stress testing, coronary angiography, stenting EP procedures, and echo cardiography. Prerequisite: third-year required Internal Medicine clerkship. Offered: AWSpS.
*View course details in MyPlan: MEDECK 683*

**MEDECK 684 Subinternship in Hospital Medicine and Hematology/Oncology - Seattle, WA (8)**
Intensive experience in hospital medicine in which the student acts as an intern for the Medicine O service.
*View course details in MyPlan: MEDECK 684*

**MEDECK 686 P-Advanced Clinical Dermatology Clinic - Idaho (8)**
Advanced clinical dermatology clerkship. (Four weeks). Prerequisite: third-year required Medicine clerkship; either MEDECK 604, MEDECK 634, MEDECK 644, MEDECK 664, or MEDECK 674. Offered: AWSpS.
*View course details in MyPlan: MEDECK 686*

**MEDECK 690 P-General Internal Medicine - Shiprock (8)**
Clerkship located at the Northern Navajo Medical Center in Shiprock, New Mexico. Students are involved in all aspects of patient care, including home visits, ambulatory care, and hospital stays. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.
*View course details in MyPlan: MEDECK 690*

**MEDECK 691 P-Medicine Special Electives - Seattle (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
*View course details in MyPlan: MEDECK 691*

**MEDECK 692 P-Medicine Special Electives - Washington (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
*View course details in MyPlan: MEDECK 692*

**MEDECK 693 P-Medicine Special Electives - Wyoming (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
*View course details in MyPlan: MEDECK 693*

**MEDECK 694 P-Medicine Special Electives - Alaska (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
*View course details in MyPlan: MEDECK 694*
MEDECK 695 P-Medicine Special Electives - Montana (*, max. 24)
By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
View course details in MyPlan: MEDECK 695

MEDECK 696 P-Medicine Special Electives - Idaho (*, max. 24)
By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
View course details in MyPlan: MEDECK 696

MEDECK 697 P-Medicine Special Electives - Away (*, max. 24)
Special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least three months before preregistration. (Two, four, six, or twelve weeks). Prerequisite: permission of department.
View course details in MyPlan: MEDECK 697

MEDECK 701 P-Occupational and Environmental Medicine (8)
Overview of Occupation and Environmental Medicine subspecialty. Introduction to Washington Worker's Compensation system and diagnosis and treatment of occupational injuries and illness. Students complete special projects in OEM aligning with student interest, participate in worksite visits, and attend conferences.
View course details in MyPlan: MEDECK 701

MEDECK 704 P-Intro to Clinical Dermatology (2 Wks) (4)
Students develop a basic approach to diagnosis and management of common skin conditions. Students see patients in dermatology resident under the supervision of dermatology faculty. (2-weeks) Offered: AWSpS.
View course details in MyPlan: MEDECK 704

MEDECK 711 P-Introduction to Community Internal Medicine Subspecialty Practice (4)
Introduction to the outpatient Medicine specialty clinics of Endocrinology, Gastroenterology (GI), and Rheumatology in the Olympia medical community. Two weeks. Offered: Sp.
View course details in MyPlan: MEDECK 711

MEDECK 713 P-Intro to Clinical Nutrition (2 Wks) (4)
Develop a basic approach to the assessment of nutritional status and management of nutrition across a variety of disease states. Mix of hands-on patient centered learning, interactive didactic based teaching sessions and independent learning. Exposure to inpatients and outpatients. Prerequisite: Completion of Foundation Curriculum. Offered: Sp.
View course details in MyPlan: MEDECK 713

MEDECK 724 P-Interprofessional Hospital Medicine (4)
Introduction to inpatient internal medicine focusing on interprofessional hospital services. Students work as a member of Hospitalist service, managing 1-2 patients, under direction of an attending physician with afternoons dedicated to rounding with other interprofessional services.
View course details in MyPlan: MEDECK 724

MEDECK 744 P-Intro to Clinical Dermatology (2 Wks) - Sheridan, WY (4)
Students develop a basic approach to diagnosis and management of common skin conditions. Students see patients in dermatology clinic while paired with a PA and attending dermatologist. Prerequisite: Completion of Foundation Curriculum. Offered: AWSpS.

SCHOOL OF MEDICINE
HUMAN BIOLOGY
MEDICAL SCIENCE

Detailed course offerings (Time Schedule) are available for

- **Spring Quarter 2017**
- **Summer Quarter 2017**
- **Autumn Quarter 2017**

**MEDSCI 500 Research Methods (6)**
Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: AWSp.
View course details in MyPlan: MEDSCI 500

**MEDSCI 501 P-Independent investigative Inquiry (6)**
Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.
View course details in MyPlan: MEDSCI 501

**MEDSCI 502 Foundations of Clinical Medicine (4-)**
Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: AWSp.
View course details in MyPlan: MEDSCI 502

**MEDSCI 503 P-Clinical Skills (2) Isaac, McDonough**
Instruction in communication skills, interviewing techniques, physical examination, documentation, and clinical reasoning. Includes hospital-based patient encounters and developing comfort and introduction to the physician role. Pass/Fail only. Offered: AWSp.
View course details in MyPlan: MEDSCI 503

**MEDSCI 504 Foundations of Clinical Medicine (-4-)** _J. CAWSE-LUCAS_
Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics
covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: W.

View course details in MyPlan: MEDSCI 504

MEDSCI 506 Foundations of Clinical Medicine (-4)  J. CAWSE-LUCAS
Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Recommended: Offered: W.

View course details in MyPlan: MEDSCI 506

MEDSCI 508 Foundations of Clinical Medicine (4)
Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: A.

View course details in MyPlan: MEDSCI 508

MEDSCI 510 P-Molecular and Cellular Basis of Disease (11)
Introduces cell physiology and cell biology; genetics and genetic diseases; and genes. Topics includes membrane physiology; sensory receptors; muscle energetics and contractibility; autonomic nervous system; tissue response to disease; pharmacodynamics and pharmacokinetics; genetic disorders; and pharmacogenetics. Incorporates relevant fundamental principles in anatomy, pathology, and pharmacology. Pass/Fail only. Detwiler, Horwitz, Merz Offered: A.

View course details in MyPlan: MEDSCI 510

MEDSCI 511 Independent Study Molecular Cellular Basis of Disease Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Molecular and cellular Basis of Diseases block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission. Offered: AWSpS.

View course details in MyPlan: MEDSCI 511

MEDSCI 515 Ecology of Health & Medicine- Foundations 1 (1)  A. KOST
This course integrates School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

View course details in MyPlan: MEDSCI 515

MEDSCI 520 P-Invaders and Defenders (10)  Lynch, Pottinger, Torgerson, Voyich
Covers the immune system; microbial biology; infectious diseases; inflammation and repair; and skin and connective tissue. Topics include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, and the basis of immunologic diagnostics. Includes relevant fundamental scientific principles in anatomy, pathology, and pharmacology. Pass/Fail only. Offered: A.

View course details in MyPlan: MEDSCI 520

MEDSCI 521 Independent Study Invaders and Defenders Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Invaders and Defenders block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund knowledge. Prerequisite: Department permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 521
MEDSCI 525 Ecology of Health & Medicine- Foundations 2 (1)
This course integrates School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only.
View course details in MyPlan: MEDSCI 525

MEDSCI 530 P-Circulatory Systems (16)
Interdisciplinary approach to cardiovascular, respiratory, and renal-urinary medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Includes cardiac electrophysiology and cardiac muscle mechanics; myocardial infarction and cardiac repair; thoracic and pulmonary anatomy; ventilation mechanics; obstructive, restrictive, and pulmonary-vascular diseases; renal function; and common kidney diseases. Pass/Fail only. Offered: W.
View course details in MyPlan: MEDSCI 530

MEDSCI 531 Independent Study Circulatory Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Circulatory block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: A WSpS.
View course details in MyPlan: MEDSCI 531

MEDSCI 535 Ecology of Health & Medicine- Foundations 3 (1)
This course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.
View course details in MyPlan: MEDSCI 535

MEDSCI 540 P-Blood and Cancer (5) Harris, Richard
Familiarizes students with the basic pathophysiologic mechanism leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems, with an emphasis on pathophysiology. Includes relevant fundamental scientific principles in anatomy, pathology, and pharmacology. Pass/Fail only. Offered: W.
View course details in MyPlan: MEDSCI 540

MEDSCI 541 Independent Study Blood and Cancer Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Blood and cancer block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: A WSpS.
View course details in MyPlan: MEDSCI 541

MEDSCI 545 Ecology of Health & Medicine- Foundations 4 (1)
This course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.
View course details in MyPlan: MEDSCI 545

MEDSCI 550 P-Energetics and Homeostasis (10) DeSantis, Silverstein
Covers metabolism, nutrition, obesity, diabetes, gastrointestinal/liver physiology, and endocrinology. Topics include physiology and pathology of digestion and hepatic function; principles and practice of clinical nutrition; the endocrine integration of metabolism; and clinically important endocrine pathophysiology. Includes anatomy,
pathology, and pharmacology of the endocrine and GI systems. Pass/Fail only. Offered: Sp.

View course details in MyPlan: MEDSCI 550

MEDSCI 551 Independent Study Energetics Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Energetics block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 551

MEDSCI 555 Ecology of Health & Medicine- Patient Care 1 (1)
This Patient Care course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: A.

View course details in MyPlan: MEDSCI 555

MEDSCI 560 P-Mind, Brain, and Behavior (14)
Explains the foundational principles of the organization and function of the head, neck, and central nervous system with a focus on clinical application of this knowledge to systematically approach the differential diagnosis and management of major neurologic, psychiatric, and behavioral disorders. Covers current therapeutic approaches to disease including pharmacological, behavioral, surgical, and other therapies. Pass/Fail only. Offered: A.

View course details in MyPlan: MEDSCI 560

MEDSCI 561 Independent Study Mind, Brain and Behavior Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Mind, Brain, and Behavior block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 561

MEDSCI 565 Ecology of Health & Medicine- Patient Care 2 (1)
This Patient Care course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: A.

View course details in MyPlan: MEDSCI 565

MEDSCI 570 P-Lifecycle and Reproduction (8)
Covers normal and abnormal human development reproductive functions including formation and maturation of ova and sperm, menstruation, normal pregnancy, and labor and delivery. Provides information concerning infertility, family planning techniques, urinary disorders, and reproductive aging and demography of human population. Includes relevant fundamental scientific principles in pelvic anatomy, pathology, histology, imaging, and pharmacology. Offered: A.

View course details in MyPlan: MEDSCI 570

MEDSCI 571 Independent Study Lifecycle Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Lifecycle block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 571
MEDSCI 575 Ecology of Health & Medicine- Explore and Focus (1)
This Explore & Focus Phase course provides students with a deep understanding of systems that constitute health care are fundamental to becoming a successful physician. The course encourages reflections from clinical clerkships experiences and requires the completion of a capstone project. Pass/Fail only. Offered: AWSp.
View course details in MyPlan: MEDSCI 575

MEDSCI 580 P-Consolidation & Transition (11)
Reinforces content in the UWSOM foundations phase. Learning experiences will address key content areas which need further review identified throughout terms 1 and 2, with specific sessions developed as indicated; faculty/staff and peer educators will provide sessions for this basic science review as well as preparation for clerkships. Offered: W.
View course details in MyPlan: MEDSCI 580

MEDSCI 584 Independent Study Foundations of Clinical Medicine Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Foundations of Clinical Medicine offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master knowledge & skills. Prerequisite: Department Permission Offered: AWSpS.
View course details in MyPlan: MEDSCI 584

MEDSCI 585 Independent Study Epidemiology and Biostatistics Term 1 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Epidemiology and Biostatistics Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.
View course details in MyPlan: MEDSCI 585

MEDSCI 586 Independent Study Epidemiology and Biostatistics Term 2 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Epidemiology and Biostatistics Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.
View course details in MyPlan: MEDSCI 586

MEDSCI 587 Independent Study Epidemiology and Biostatistics Term 3 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Epidemiology and Biostatistics Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.
View course details in MyPlan: MEDSCI 587

MEDSCI 588 Independent Study Human Form & Function Term 1 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.
View course details in MyPlan: MEDSCI 588

MEDSCI 589 Independent Study Human Form & Function Term 2 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered:
MEDSCI 590 Independent Study Human Form & Function Term 3 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 590

MEDSCI 591 Independent Study Pathology Term 1 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 591

MEDSCI 592 Independent Study Pathology Term 2 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 592

MEDSCI 593 Independent Study Pathology Term 3 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. The course title includes terms to identify which quarter the course is being offered. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 593

MEDSCI 594 Independent Study Pharmacology Term 1 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.

View course details in MyPlan: MEDSCI 594

MEDSCI 595 Independent Study Pharmacology Term 2 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 595

MEDSCI 596 Independent Study Pharmacology Term 3 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

View course details in MyPlan: MEDSCI 596
MEDSCI 597 Indep Study USMLE Step 1 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required USMLE Step 1 licensing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSSpS.
View course details in MyPlan: MEDSCI 597

MEDSCI 598 Indep Study USMLE Step 2 (1-24, max. 24)
Designed for medical students required to complete additional study related to the required USMLE Step 2 licensing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSSpS.
View course details in MyPlan: MEDSCI 598

MEDSCI 599 Indep Study or Research (1-24, max. 24)
Designed for medical students who elect a special or research related to the required foundation phase pre-clinical courses. Prerequisite: Department Permission Offered: AWSSpS.
View course details in MyPlan: MEDSCI 599

MEDSCI 602 Adolescent Health in Low-Resource Settings (1)
Highlights issues for adolescents in resource limited settings with an initial focus on what makes adolescents unique. Topic-based seminars, readings, discussions, and cases will include: adolescent development; physical and psychological trauma; nutrition; illicit activities; adolescent-focused research; adolescent-friendly health services; and reproductive and sexual health.
View course details in MyPlan: MEDSCI 602

MEDSCI 603 Introductory Hands-On Cardiac Ultrasound (1)
Acquire cardiac ultrasound images at three acoustic windows, identify cardiac anatomy in standard views, and recognize key pathologies: left and right ventricular dysfunction and dilatation and pericardial effusion. Following a course introduction, students will work self-paced, alone or in pairs, on a mannequin-based simulator.
View course details in MyPlan: MEDSCI 603

MEDSCI 604 Introduction to Chronic Pain (1)
Medical students will be paired with a pain specialist for three morning sessions in an outpatient chronic pain clinic. Students will be exposed to musculoskeletal, neuropathic, and visceral pain conditions while learning about various management options. A 1-2 page reflection on a patient or pain topic will be required. Offered: SpS.
View course details in MyPlan: MEDSCI 604

MEDSCI 605 From Electrons to the Emergency Department: The Cell Biology of Poisons (1)
This course will describe how various poisons (naturally occurring or following overdose) interrupt molecular pathways to produce toxicity. Concepts will be introduced in a base-based manner before describing in depth the metabolic pathway affected. Examples include electron transport chain poisons, sodium channel poisons, and free poisons (iron).
View course details in MyPlan: MEDSCI 605

MEDSCI 606 Emergency Medicine Point-of-Care Ultrasound (1) A. ADEDIPE, B. BACKLUND, M. VRABLIK
Introduction to point-of-care ultrasound. This elective will help students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated and patient care settings. The elective is designed to be interactive and will incorporate
View course details in MyPlan: MEDSCI 606

**MEDSCI 607 Science and Practice of Empathy and Compassion Cultivation in Medicine (1)**
This course will aim at helping students develop the ability to face suffering and pain with empathy, kindness, and compassion. Emphasis will be on cultivating a non-judgmental and curious attitude, self-compassion, appreciation of common humanity and acknowledging that suffering is universal to the human condition, and the practice of compassion. Offered: AS.
View course details in MyPlan: MEDSCI 607

**MEDSCI 608 Ethical Issues in Solid Organ Transplantation and Allocation (1) A. WIGHTMAN**
Explore the ethical issues that underlie some of the major controversies in transplantation through brief readings (including selections from the press, canonic texts, and academic articles) and case-based discussion. Students will be evaluated based on participation and a written response to a case. Offered: W.
View course details in MyPlan: MEDSCI 608

**MEDSCI 609 Ethics in emergency Medicine Workshop (1)**
Learn how to consider and evaluate the ethical issues surrounding various real-life, frequently encountered medical situations. Discuss various approaches to ethical reasoning and decision-making, then implement in case evaluation. Students will be encouraged to both participate in and lead discussions of each case.
View course details in MyPlan: MEDSCI 609

**MEDSCI 610 Food, Health, and the Environment (1)**
A multi-modal session comprised of interactive presentations, documentaries, guest speakers, and small group discussions covering major nutrition topics, such as: nutrition and effects on health, the American food industry and the environment, changing eating behaviors on individual, community, and national levels, as well as food insecurities and health disparities.
View course details in MyPlan: MEDSCI 610

**MEDSCI 611 Intersection of Genetics with Patient Care (2)**
Create hypothesis-driven clinical inquiry in an interactive learning environment. Employ peer-review sessions and team-based analysis of genetics case scenarios. Apply your science and clinical knowledge towards solving your patient's specific healthcare need. A team experienced clinicians and researchers will give support and feedback.
View course details in MyPlan: MEDSCI 611

**MEDSCI 612 Introduction to Humanitarian Emergencies (1)**
The course provides an introduction to health related issues faced by acutely displaced populations, including refugees and internally displaced persons, in developing countries, in the setting of humanitarian emergencies. Challenges in planning, implementing, and evaluating health programs for these populations will be discussed through case studies of recent humanitarian emergencies.
View course details in MyPlan: MEDSCI 612

**MEDSCI 613 Mind Body Medicine: Mind Body Skills for Medical Students (2) L. ERLANGER, C. SCOTT**
This seminar course will provide scientific background and foundational self-care skills for stress management through mindfulness and mutual support. Students will be encouraged to develop self-care and related pt care philosophy statement. Includes highly interactive, short didactic sessions, practice with experiential activities, and sharing reflections with group members.
View course details in MyPlan: MEDSCI 613

**MEDSCI 614 Theoretical and Clinical Aspects of Pain (1)**
The course will introduce pain and pain neurobiology with a close look into nociceptive, neuropathic and visceral pain and treatments to pain and addiction. The course will be a combination of articles, lecture, videos of real patients with chronic pain, and discussion.
View course details in MyPlan: MEDSCI 614
MEDSCI 615 Community Engagement and the School of Medicine Pathways (1)
The interactive and engaging Pathways intersession will cover the following topic area: determinants of health, the built environment, health equity and advocacy, structural competency, narrative medicine and additional topics related to working effectively with underserved, vulnerable and marginalized communities. Open to all WWAMI medical students. View course details in MyPlan: MEDSCI 615

MEDSCI 616 The Physician Online: Mindful Use of Digital Media (1) A. BROWN, A. CHIPMAN, M. JACKSON, J. JAUREGUI, J. RIDDELL
This course explores the use of social media in medicine by exploring online identity, interactions, consumption and creation of content, and reflection. The goal is to equip students to use digital media mindfully while leveraging it to collaborate intelligently, teach more efficiently, and learn for a lifetime. View course details in MyPlan: MEDSCI 616

MEDSCI 617 Prison/Jail Health Care, Part 1 (1) M. STERN, L. STRICK
This 2-day course serves as an introduction to correctional healthcare. The instructors will provide a short overview of the US correctional system and why and how health care is delivered in jails and prisons. The class will tour a busy county jail on Day 1 and a state prison on Day 2. Offered: AW. View course details in MyPlan: MEDSCI 617

MEDSCI 618 Prison/Jail Health Care, Part 2 (1) M. STERN, L. STRICK
This course will explore the unique ethical challenges of correctional medicine through case-based discussions. There will be an opportunity to better understand some of those challenges first hand through a guided visit to a prison caring for the state's most seriously mentally ill. Offered: S. View course details in MyPlan: MEDSCI 618

MEDSCI 619 Refugee and Immigrant Health (1)
This is a weeklong UWSOM intersession course familiarizing students with various aspects of immigrant and refugee health care. There will be an emphasis on the social context of clinical care and the importance of effective teamwork and collaboration. View course details in MyPlan: MEDSCI 619

MEDSCI 620 Rheumatology Foundations (1) H. EMERY, K. HAYWARD, M. THAPA, T. TORGERSON
This course reviews pathology, clinical presentation, initial evaluation and management of patients with musculoskeletal complaints and common rheumatologic disorders. The in-class sessions include interactive lectures, case-based small groups and a volunteer patient panel that allow students to synthesize knowledge from earlier Foundations blocks and prepare for transition into clinical clerkships. Offered: Sp. View course details in MyPlan: MEDSCI 620

MEDSCI 621 Basic Skills in Emergency Resuscitation (1)
Impart the critical skills needed to evaluate and manage common emergencies that medical students will encounter during their clinical clerkships and internship. View course details in MyPlan: MEDSCI 621

MEDSCI 622 Topics in Global Infectious Diseases (1)
This course will combine didactic sessions presented by local topic experts on global infectious diseases with interactive case-based learning. Small groups will tackle cases that explore epidemiology, diagnosis and management of significant global infections. The course will conclude with a career panel of speakers highlighting various global health career paths. View course details in MyPlan: MEDSCI 622

MEDSCI 623 Introduction to Toxicology: The Intersection of Natural Toxins and Human Physiology (1)
This is a didactic-based course illustrating the pathophysiology of natural toxins. Toxins from multiple organ systems including central nervous system, hepatic, hematologic, immunologic, and renal toxins will be covered. Specific examples include: shellfish poisonings, plant and mushroom poisonings, and envenomations from
jellyfish, snakes, scorpions, and spiders.

MEDSCI 624 Medical Students as Advocates: Practical Skills for Effective Advocacy (1)
Students will develop tangible, hands-on skills for moving beyond witnessing health disparities to upstream action that is rooted in effective and community-centered advocacy. Through a cycle of interactive learning, research, action and reflection, this course both explores and develops the role of medical students and future physicians as advocates. Credit/no-credit only.

MEDSCI 625 Building a Framework for Effective Service-Learning, Health Equity, and Leadership (1)
This course hones student leadership skills for: cultivating strong teams, assessing community strengths and needs, building community partnerships, sustaining projects, transitioning leadership, and facilitating reflective practices rooted in an analysis of systemic inequalities and cultural humility. Students will emerge with renewed confidence and refined skills for developing or strengthening projects. Credit/no-credit only.

MEDSCI 626 Foundations of Scholarship: Discovery (1)
Investigate different types of scholarship of discovery within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AW.

MEDSCI 627 Foundations of Scholarship: Integration (1)
Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: A WSp.

MEDSCI 628 Foundations of Scholarship: Engagement (1)
Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: A WSp.

MEDSCI 629 Foundations of Scholarship: Teaching (1)
Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: A WSp.

MEDSCI 630 Procedures and Advanced Skills for Clinical Practice (1)
Explore common diagnostic and therapeutic clinical procedures through a hands-on approach. Experience more advanced skills needed for clinical practice in a mentored environment. Credit/no-credit only. Offered: A WSp.

MEDSCI 631 Skills and Strategies for Personal and Professional Development (1)
Teach skills and strategies required to sustain lifelong personal and professional growth. Equip students with resources and strategies that will improve their studying and learning skills. Topics will include time management, stress management, adult learning and organizational skills. Guest presenters will include professionals in the fields of health and education. Offered: W.

MEDSCI 632 Clinical Global Health and Social Medicine (1) P. DRAIN
Applying clinical global health and social medicine principles are critical to providing excellent medical care. In
this intersession, students will learn and discuss elements of clinical global health and social medicine through interactive case-based lectures, group discussions, and independent reading. Students will be graded (pass/fail) on participation and an essay. Offered: W.
View course details in MyPlan: MEDSCI 632
Microbiology

**Department Overview**

K-335A Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

**Undergraduate Program**

Adviser
K-335A Health Sciences, Box 357242
(206) 543-2572
advmicro@uw.edu

The Department of Microbiology offers the following programs of study:

- The Bachelor of Science degree with a major in microbiology
- A minor in microbiology

**Bachelor of Science**

*Suggested First- and Second-Year Courses:* PHYS 114, PHYS 115, PHYS 116, or PHYS 121, PHYS 122, PHYS 123; one of the following: MATH 112, MATH 124, MATH 144, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 101, MICROM 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

**Department Admission Requirements**
1. Minimum 75 credits applicable to graduation, with a minimum 2.00 overall cumulative GPA.

2. Completion of the following prerequisite courses with a minimum 2.25 cumulative GPA: BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223 or CHEM 237.

**Major Requirements**

Minimum 90 credits (including microbiology courses) in the biological, physical, and mathematical sciences, as follows:

1. BIOL 180, BIOL 200, BIOL 220, or equivalent (15 credits/one year)
2. Inorganic chemistry: CHEM 142, CHEM 152, CHEM 162 (16 credits) (or CHEM 145, CHEM 155); organic chemistry: CHEM 223, CHEM 237, or CHEM 335
3. Core Courses (8 credits): MICROM 402; MICROM 410; MICROM 496
4. Distribution: 15 credits from the following, to include at least one course in each distribution group and a minimum of two courses with a laboratory component.
   a. Medical Microbiology: IMMUN 441, MICROM 442, MICROM 443, or MICROM 444.
   b. Virology: MICROM 445 or MICROM 450
   c. Diversity and Ecology: MICROM 412 or MICROM 435
   d. Genetics and Molecular Biology: MICROM 411, MICROM 431, and GENOME 361 or GENOME 371
5. 13 credits of approved electives. See adviser for approved list. Approved electives may include any of the above courses not taken as a distribution requirement.
6. PHYS 114, PHYS 115 (8 credits) (or PHYS 121, PHYS 122) (PHYS 116 or PHYS 123 recommended)
7. Either MATH 112, MATH 124, MATH 144, Q SCI 381, or STAT 311 (5 credits)
8. BIOC 405, BIOC 406 (6 credits) (or BIOC 440, BIOC 441, BIOC 442)
9. For all required and elective microbiology courses used toward graduation, a minimum 2.25 cumulative GPA and a minimum 1.8 grade in each course
10. Transfer students must complete at least 20 of the required and elective microbiology credits through the UW.

**Continuation Policy**

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

**Minor**

**Minor Requirements**: 29 credits as follows:

1. 14 credits to include BIOL 200; one of CHEM 152, CHEM 155, CHEM 162, or CHEM 165; one of CHEM 223, CHEM 237, or CHEM 355.
2. 15 credits from the following: MICROM 410; one from MICROM 302, MICROM 402, MICROM 431, or MICROM 443; and approved 400-level, graded microbiology courses to reach 29 credits. See adviser for approved list.

3. Minimum cumulative 2.00 GPA for all courses counted toward the minor

**Student Outcomes and Opportunities**

- *Learning Objectives and Expected Outcomes*: The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal BS degree or qualify to pursue advanced degrees in graduate or professional schools.

Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves.

Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.

- *Instructional and Research Facilities*: Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.

- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning*: MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.

- *Department Scholarships*: The department offers four awards each year. More information is available at the department's website.

- *Student Organizations/Associations*: The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topics such as research and career opportunities, graduate school, and peer teaching.

**Graduate Program**

Graduate Program Coordinator
K335A Health Sciences, Box 357242
The Department of Microbiology offers a graduate program leading to the doctor of philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

**Admission Requirements**

Students can be admitted to the PhD program with a background in any biological science discipline. Selection is based on the evaluation of a student's undergraduate record for indications of the ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. To be competitive with the applicant pool, prospective students are also strongly advised to seek opportunities to carry out undergraduate research.

**Required background courses** (generally satisfied prior to entry into the graduate program):

1. A one-year course in biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
2. A course in classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
3. A course in general microbiology (equivalent to MICROM 410)
4. A course in medical microbiology and basic immunology is recommended for those considering research in the area of medical microbiology or virology

**Degree Requirements**

90 credits minimum, as follows:

1. **Conjoint Courses (6 credits):** 6 credits from the following conjoint courses: CONJ 524, CONJ 531, CONJ 532, CONJ 533, CONJ 534, CONJ 535, CONJ 537, CONJ 538, CONJ 539, CONJ 541, CONJ 543, CONJ 544, CONJ 545, CONJ 546, CONJ 547, CONJ 548, CONJ 549 (1.5 credits each). It is recommended that students take additional conjoint courses or choose one or more of the genome sciences modules: GENOME 551, GENOME 552, GENOME 553, GENOME 554, GENOME 555, GENOME 556, GENOME 559 (1.5 credits each).

2. **Virology and Bacteriology Courses (6-7 credits):** Three of the following courses; one virology and one bacteriology course must be among those selected: MCB 532, MCB 542, MICROM 441, MICROM 450, MICROM 510, MICROM 530, MICROM 553

3. **Faculty Research Presentations** for first-year students: MICROM 599

4. **Laboratory Rotation:** MICROM 500, minimum three quarters

5. **Journal Club:** MICROM 522, continuous enrollment

6. **Seminar:** MICROM 520 seminar series or attendance at Fred Hutchinson seminars. Students at Fred Hutchinson are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.

7. **Research Discussion Groups:** taken every quarter. Students register for the appropriate course number for credit.
8. **Additional requirements:**
   a. Be a teaching assistant in at least two laboratory courses for undergraduates (usually satisfied in the first and/or second year).
   
   b. Give at least two formal lectures in an undergraduate course (third or fourth year).
   
   c. Be first author on multiple papers related to thesis research which are published or accepted for publication in refereed journals. Under some circumstances, one first-author publication satisfies this requirement.

9. General examination, dissertation, final examination

SCHOOL OF MEDICINE
MICROBIOLOGY (MEDICINE)
MICROBIOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

MICROM 101 Microbes and Society (5) NW
Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts.
View course details in MyPlan: MICROM 101

MICROM 301 General Microbiology (3) NW D. ANDERSON, R. BUMGARNER
Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145. Offered: ASpS.
View course details in MyPlan: MICROM 301

MICROM 302 General Microbiology Laboratory (2) NW
Laboratory course primarily for students taking MICROM 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Offered: ASpS.
View course details in MyPlan: MICROM 302

MICROM 402 Fundamentals of General Microbiology Laboratory (3) NW
Isolation of a broad range of nonpathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: BIOL 200. Offered: ASp.
View course details in MyPlan: MICROM 402

MICROM 410 Fundamentals of General Microbiology I (3) NW
Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: minimum grade of 2.3 in BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Instructors: Parsek, Traxler Offered:
A. View course details in MyPlan: MICROM 410

MICROM 411 Bacterial Genetics (4) NW
Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: W. View course details in MyPlan: MICROM 411

MICROM 412 Prokaryotic Diversity (3) NW
Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: BIOL 200. Instructors: Greenberg, Leigh Offered: Sp. View course details in MyPlan: MICROM 412

MICROM 413 Special Topics in Microbiology (1, max. 3)
Examines current subjects in microbiology. Credit/no-credit only. View course details in MyPlan: MICROM 413

MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NW
Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200 or MICROM 301. Offered: W. View course details in MyPlan: MICROM 431

MICROM 435 Microbial Ecology (3) NW
Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: BIOL 180. Instructors: Stahl View course details in MyPlan: MICROM 435

MICROM 442 Medical Bacteriology (3) NW
Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course, MICROM 443 coordinates. Prerequisite: BIOL 200. Instructors: Cookson Offered: AW. View course details in MyPlan: MICROM 442

MICROM 443 Medical Bacteriology Laboratory (3) NW
Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: BIOL 200. Offered: AW. View course details in MyPlan: MICROM 443

MICROM 445 Medical Virology (3) NW
Introduces medical virology emphasizing basic understanding of the pathogenesis and replication of medically important viruses including the spread, diagnosis, epidemiology, treatment, and prevention of human viral diseases. Prerequisite: either BIOL 180 or BIOL 200; Sp. Instructors: Lagunoff, Smith View course details in MyPlan: MICROM 445

MICROM 450 Molecular Biology of Viruses (3) NW
Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: BIOL 200.
Instructors: Champoux Offered: W.
View course details in MyPlan: MICROM 450

MICROM 460 Medical Mycology and Parasitology (3) D. ANDERSON, M. CHANDLER, C. FISHER, S. MURPHY
Examines medically important fungi and parasites in terms of the symptoms, diagnosis, epidemiology, and therapy of the diseases they cause as well as their mechanisms of pathogenesis. The laboratory course MICROM 461 complements this lecture course but is not required. Prerequisite: BIOL 200 or MICROM 301 Offered: Sp.
View course details in MyPlan: MICROM 460

MICROM 461 Medical Mycology and Parasitology Laboratory (2) D. ANDERSON, M. CHANDLER
Hands-on practice to identify medically important fungi and parasites, using live, preserved, and stained samples. Demonstrations along with limited procedures are used to illustrate important features used to distinguish organisms. Prerequisite: MICROM 460, which may be taken concurrently. Offered: Sp.
View course details in MyPlan: MICROM 461

MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10)
Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/grading of quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. Prerequisite: MICROM 402; MICROM 410. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 482

MICROM 495 Honors Undergraduate Research (*-*) Leigh
Specific problems in microbiology or immunology. Offered: AWSpS.
View course details in MyPlan: MICROM 495

MICROM 496 Undergraduate Library Research (2)
An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.
View course details in MyPlan: MICROM 496

MICROM 499 Undergraduate Laboratory Research (*-, max. 35) Leigh
Specific problems in microbiology or immunology. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 499

MICROM 500 Introduction to Research (*, max. 20)
Introduction to research areas of the faculty and the techniques employed in their investigations. Prerequisite: graduate standing in microbiology or permission of instructor. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 500

MICROM 520 Seminar (1, max. 30) Fang
Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: MICROM 520

MICROM 522 Current Research in Microbiology (1, max. 30)
Weekly student and faculty seminar presentations based on the current literature. Prerequisite: graduate standing in microbiology. Instructors: Harwood, Merrikh, Parsek Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: MICROM 522

MICROM 526 Research of Cell Surface Problems (1, max. 30)
Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Prerequisite: permission of instructor. Instructors: Traxler Credit/no-credit only.
View course details in MyPlan: MICROM 526
MICROM 529 Mechanisms of Bacterial Pathogenesis (1, max. 30)
Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Prerequisite: graduate standing in microbiology. Instructors: Fang Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: MICROM 529

MICROM 532 Methanogenesis Research Meeting (1, max. 30)
Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Prerequisite: MICROM 410, permission of instructor. Instructors: Leigh Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 532

MICROM 533 Herpesvirus Research Meeting (1, max. 30)
Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Prerequisite: permission of instructor. Instructors: Lagunoff Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 533

MICROM 534 Research Seminar in Salmonella Pathogenesis (1, max. 30) Fang
Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 534

MICROM 540 Virology (3)
Introduces new approaches and technologies being used in modern virology laboratories to provide a better understanding of the fields of virology and virus-host interactions. Covers topics in bio-defense, viral genomics and proteomics, and systems biology as it pertains to virus/host infection. Prerequisite: permission of instructor. Instructors: Katze
View course details in MyPlan: MICROM 540

MICROM 553 Molecular Interactions of Bacteria with their Hosts (3)
The processes bacteria employ to shape interactions with their hosts will be explored in molecular detail through selected examples in the literature. Prerequisite: One year of undergraduate cellular and molecular biology; recommended: An introductory course in microbiology is recommended. Offered: A, odd years.
View course details in MyPlan: MICROM 553

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15)
Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Prerequisite: permission of instructor. Instructors: Cookson Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: MICROM 554

MICROM 555 Advanced Clinical Microbiology (2.5)
Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Prerequisite: MICROM 443 and permission of instructor. Instructors: Butler-Wu, Fang Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: MICROM 555

MICROM 560 Research and Journal Club in Retrovirology (1, max. 30)
Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate standing or permission of instructor. Instructors: Linial Offered: AWSpS.
View course details in MyPlan: MICROM 560

MICROM 562 Oncogene and Retrovirus Research Seminar (1, max. 30)
Weekly discussions of ongoing research related to retroviral replication, retroviral oncogeneses and pathology.
MICROM 562
Prerequisite: graduate standing or permission of instructor. Instructors: Linial, Overbaugh Offered: AWSpS.
View course details in MyPlan: MICROM 562

MICROM 585 Research in Cell and Molecular Biology (1, max. 30)
Weekly research seminar. Prerequisite: permission of instructor. Instructors: Champoux Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 585

MICROM 588 Research in Applied Microbiology (1, max. 30)
Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Instructors: Lidstrom Credit/no-credit only. Offered: jointly with CHEM E 588; AWSpS.
View course details in MyPlan: MICROM 588

MICROM 599 Research Presentations (2)
Current research review. Credit/no-credit only.
View course details in MyPlan: MICROM 599

MICROM 600 Independent Study or Research (*-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 600

MICROM 700 Master's Thesis (*-)
Credit/no-credit only.
View course details in MyPlan: MICROM 700

MICROM 800 Doctoral Dissertation (*-)
Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: MICROM 800

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 30, 2017
Neurological Surgery

Department Overview

325 9th Avenue, Harborview Medical Center

askuwns@uw.edu

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Seattle Children's hospital. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

SCHOOL OF MEDICINE
NEUROLOGICAL SURGERY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

NEUR S 498 Undergraduate Thesis (*, max. 35) D’Ambrosio, Ellenbogen, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez
Offered: AWSpS.
View course details in MyPlan: NEUR S 498

NEUR S 499 Undergraduate Research (*, max. 35)
Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Instructors: D’Ambrosio, Ellenbogen, Ferreira, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez, Rostomily, Silber Offered: AWSpS.
View course details in MyPlan: NEUR S 499

NEUR S 505 P-Preceptorship in Academic Neurosurgery (1, max. 12)
Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Instructors: Chestnut, Ellenbogen, Ferreira, Hofstetter, Kim, Lee, Ojemann, Rostomily, Sekar, Silbergeld, Zhang Offered: AWSpS.
View course details in MyPlan: NEUR S 505

NEUR S 655 P-Clinical Neurosurgery Clerkship- Spokane WA (1-8, max. 8)
Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students. Offered: AWSpS.
View course details in MyPlan: NEUR S 655

NEUR S 665 P-Clinical Neurosurgery Clerkship (8) Ellenbogen, Lee
Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students.
View course details in MyPlan: NEUR S 665

NEUR S 680 P-Neurological Surgery Clerkship (*, max. 8)
Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient
care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. (Four weeks). Prerequisite: HUBIO 563. Instructors: Ellenbogen, Lee Offered: AWSpS.

View course details in MyPlan: NEUR S 680

**NEUR S 697 P-Neurological Surgery Special Electives (*, max. 24)**
By specific arrangement, for qualified students, special clerkship, externship, or research opportunities made available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Instructors: Ellenbogen Offered: AWSpS.

View course details in MyPlan: NEUR S 697

**NEUR S 699 P-WWAMI Neurological Surgery Special Electives (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Instructors: Ellenbogen

View course details in MyPlan: NEUR S 699
Neurology

Department Overview

RR650 University of Washington Medical Center

neurolog@uw.edu

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Seattle Children's hospital, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.
SCHOOL OF MEDICINE
NEUROLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (*, max. 5) Fraser, Clemmons
Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.
View course details in MyPlan: NEURL 495

NEURL 499 Undergraduate Research (*, max. 25)
Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.
View course details in MyPlan: NEURL 499

NEURL 505 P-Preceptorship in Neurology (1, max. 12)
Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Instructors: Kraus Offered: Sp.
View course details in MyPlan: NEURL 505

NEURL 536 Topics in Clinical Neurology (1) Spain
Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Credit/no-credit only. Offered: S.
View course details in MyPlan: NEURL 536

NEURL 555 Frontiers in Neuroimmunology (1)
Current concepts and developments in neuroimmunology. Prerequisite: either NBIO 301 or IMMUN 441. Instructors: Moeller Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: NEURL 555

NEURL 559 Neurobiology of Disease (3)
Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly
with NEURO 559/P BIO 559.
View course details in MyPlan: NEURL 559

NEURL 598 P-Neurology Independent Study and Radiation (1-8, max. 8)
Designed for medical students required to complete additional study related to the required Neurology clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.
View course details in MyPlan: NEURL 598

NEURL 600 P-Independent Study or Research (*)
Prerequisite: Instructor permission.
View course details in MyPlan: NEURL 600

NEURL 632 P-Introduction to Neurology - Casper, WY (8)
Provides the medical student with a general understanding of basic clinical neurology in Casper, WY. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus
Offered: AWSpS.
View course details in MyPlan: NEURL 632

NEURL 633 P-Introduction to Neurology - Anchorage - Alaska Neurology Clinic (8)
Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus Offered: AWSpS.
View course details in MyPlan: NEURL 633

NEURL 634 P-Introduction to Neurology - Anchorage - ANMC (8)
Provides the medical student with a general understanding of basic clinical neurology at Alaska Native Medical Center in Anchorage, Alaska. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 634

NEURL 636 P-Introduction to Neurology-Kalispell (8)
Provides the medical student with a general understanding of basic clinical neurology, at kalispell Regional Medical Center. For third- or fourth-year students. Prerequisite: Medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.
View course details in MyPlan: NEURL 636

NEURL 637 P-Introduction to Neurology-Missoula (8)
Provides the medical student with a general understanding of basic clinical neurology at Montana Neurobehavioral Specialist in Missoula, MT. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 637

NEURL 638 P-Introduction to Neurology - Great Falls (8)
Provides the medical student with a general understanding of basic clinical neurology at Advanced Neurology Specialists in Great Falls, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 638

NEURL 639 P-Introduction to Neurology - Billings Regional Neuroscience Clinic (8)
Provides the medical student with a general understanding of basic clinical neurology at Neurology Associates in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 639
NEURL 640 P-Introduction to Neurology - Billings Clinic (8)
Provides the medical student with a general understanding of basic clinical neurology at Billings Clinic in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 640

NEURL 642 P-Introduction to Neurology- St. Lukes Boise (8)
Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus Offered: AWSpS.
View course details in MyPlan: NEURL 642

NEURL 643 P-Introduction to Neurology - Dr. Lyons, Boise (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. George Lyons in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 643

NEURL 644 P-Introduction to Neurology - Idaho Falls EINA (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Stephen Vincent in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 644

NEURL 645 P-Introduction to Neurology - Idaho Falls Neurology (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Erich Garland in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 645

NEURL 647 P-Introduction to Neurology - Boise St. Alphonsus (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Karin Lindholm in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 647

NEURL 648 P-Introduction to Neurology - Coeur D' Alene (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Michael Coats in Coeur d' Alene, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 648

NEURL 649 P-Introduction to Neurology - Tacoma St. Joseph (8)
Provides the medical student with a general understanding of basic clinical neurology in Tacoma, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.
View course details in MyPlan: NEURL 649

NEURL 650 P-Introduction to Neurology - Lacey, WA (8)
Provides the medical student with a general understanding of basic clinical neurology in Lacey, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.
View course details in MyPlan: NEURL 650

NEURL 651 P-Introduction to Neurology - Kirkland, WA (8)
Provides the medical student with a general understanding of basic clinical neurology in Kirkland, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics. Offered:
A WSpS.

View course details in MyPlan: NEURL 651

NEURL 652 P-Introduction to Neurology - Spokane Rockwood Clinic (8)
Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: A WSpS.
View course details in MyPlan: NEURL 652

NEURL 653 P-Introduction to Neurology - Spokane CMA, WA (8)
Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 653

NEURL 654 P-Introduction to Neurology - Dr. Greeley, Spokane (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. David Greeley in Spokane, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 654

NEURL 655 P-Introduction to Neurology - Spokane (8)
Provides the medical student with a general understanding of basic clinical neurology in Spokane, Washington. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: A WSpS.
View course details in MyPlan: NEURL 655

NEURL 656 P-Introduction to Neurology - Wenatchee (8)
Provides the medical student with a general understanding of basic clinical neurology at Wenatchee Valley Medical Center in Wenatchee, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 656

NEURL 657 P-Introduction to Neurology - Yakima (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Richard Sloop in Yakima, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 657

NEURL 658 P-Introduction to Neurology - Olympia Neurology (8)
Provides the medical student with a general understanding of basic clinical neurology at Olympia Neurology in Olympia, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 658

NEURL 659 P-Introduction to Neurology - NW Neurology, Lakewood (8)
Provides the medical student with a general understanding of basic clinical neurology at Northwest Neurology, a Franciscan Medical Group clinic, in Lakewood, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 659

NEURL 660 P-Introduction to Neurology - Madigan (8)
Provides the medical student with a general understanding of basic clinical neurology at Madigan Army Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 660
NEURL 661 P-Introduction to Neurology - Tacoma/Puyallup Multicare (8)
Provides the medical student with a general understanding of basic clinical neurology at Neurology and Neurosurgery Associates in Tacoma and Puyallup, Washington. Students spend time at both clinics. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 661

NEURL 662 P-Introduction to Neurology - Group Health, Tacoma (8)
Provides the medical student with a general understanding of basic clinical neurology at Group Health Tacoma Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 662

NEURL 663 P-Introduction to Neurology - Group Health, Eastside (8)
Provides the medical student with a general understanding of basic clinical neurology at Group Health Eastside Specialty Center in Redmond, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 663

NEURL 664 P-Introduction to Neurology - Burien (8)
Provides the medical student with a general understanding of basic clinical neurology at South Seattle Neurology Associates in Burien. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 664

NEURL 665 P-Introduction to Neurology- UWMC (8)
Provides the medical student with a general understanding of basic clinical neurology, at UWMC. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus Offered: AWSpS. 
View course details in MyPlan: NEURL 665

NEURL 666 P-Introduction to Neurology - HMC (8)
Provides the medical student with a general understanding of basic clinical neurology at Harborview Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 666

NEURL 667 P-Introduction to Neurology - VA (8)
Provides the medical student with a general understanding of basic clinical neurology at the VA Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 667

NEURL 668 P-Introduction to Neurology - Northwest Hospital (8)
Provides the medical student with a general understanding of basic clinical neurology at Northwest Hospital in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 668

NEURL 669 P-Introduction to Neurology - Virginia Mason (8)
Provides the medical student with a general understanding of basic clinical neurology at Virginia Mason Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. 
View course details in MyPlan: NEURL 669
NEURL 670 P-Introduction to Neurology - Minor and James (8)
Provides the medical student with a general understanding of basic clinical neurology at Minor and James Medical in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 670

NEURL 671 P-Introduction to Neurology - Swedish (8)
Provides the medical student with a general understanding of basic clinical neurology at Swedish Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 671

NEURL 672 P-Introduction to Neurology - Group Health, Seattle (8)
Provides the medical student with a general understanding of basic clinical neurology at Group Health Capitol Hill Campus in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
View course details in MyPlan: NEURL 672

NEURL 673 P-Introduction to Neurology - Renton, Valley Medical Center (8)
Provides the medical student with a general understanding of basic clinical neurology in Renton, WA. For third-or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics.
View course details in MyPlan: NEURL 673

NEURL 674 P-Introduction to Neurology - Bellingham (8)
Provides the medical student with a general understanding of basic clinical neurology at Peace Health in Bellingham, Washington. Prerequisite: Completion of one required clerkship in medicine, family medicine, surgery or pediatrics. Offered: AWSpS.
View course details in MyPlan: NEURL 674

NEURL 681 P-Seizure Clinic Clerkship (2.5)
Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Instructors: A. Wilensky Offered: AWSpS.
View course details in MyPlan: NEURL 681

NEURL 685 Epilepsy and Clinical Electroencephalography (4/8, max. 8) Miller
Introduction into epilepsy and the use and interpretation of the electroencephalogram and other clinical studies used to assess it, under the direct supervision of several of the faculty epileptologists and clinical neurophysiologists. Offered: AWSpS.
View course details in MyPlan: NEURL 685

NEURL 686 P-Clinical Neurology (8) Swanson
Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWSpS.
View course details in MyPlan: NEURL 686

NEURL 687 Advanced Clerkship in Child Neurology (4, max. 8)
Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Instructors: Gospe Offered: AWSpS.
View course details in MyPlan: NEURL 687

NEURL 697 Neurology Away Elective (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students obtain special assignment form from the dean's office at least one month
prior to preregistration. Prerequisite. permission of department adviser. Offered: AWSpS.
View course details in MyPlan: NEURL 697

**NEURL 699 WWAMI Neurology Special Assignment Elective (4/8, max. 24)**
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite. permission of adviser. Offered: AWSpS.
View course details in MyPlan: NEURL 699

SCHOOL OF MEDICINE
OBSTETRICS AND GYNECOLOGY

OBSTETRICS & GYNECOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

OB GYN 498 Undergraduate Thesis (*, max. 30)
By arrangement.
View course details in MyPlan: OB GYN 498

OB GYN 499 Undergraduate Research (*, max. 30)
View course details in MyPlan: OB GYN 499

OB GYN 505 P-OB GYN Preceptorship (1, max. 12)
Provides an opportunity for first- and second-year medical students to gain direct obstetrics and gynecology experience with a variety of clinical faculty members in diverse patient-care settings. Includes opportunities to observe labor and delivery, gynecologic surgery in the operating room, ambulatory obstetrics and gynecology in clinic, and family planning.
View course details in MyPlan: OB GYN 505

OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) Prager
A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical student as elective credit.
View course details in MyPlan: OB GYN 550

OB GYN 551 Perinatal Care Elective (1)
Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on late third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relationship. Optional labor and delivery observation. Offered: AWSp.
View course details in MyPlan: OB GYN 551

OB GYN 579 P-Obstetric and Gynecologic Investigation (*)
The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.
View course details in MyPlan: OB GYN 579
OB GYN 598 P-OB/GYN Independent Study and Remediation (*, max. 8)
Designed for medical students required to complete additional study related to the required Obstetrics and Gynecology clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSp.
View course details in MyPlan: OB GYN 598

OB GYN 630 P-WRITE Obstetrics and Gynecology Clinical Clerkship (6-12)
Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: Completion of Foundations Phase curriculum; acceptance to the WRITE program. Offered: AWSpS.
View course details in MyPlan: OB GYN 630

OB GYN 631 P-Introduction to Obstetrics and Gynecology, NWHMC (*, max. 12)
See OB GYN 665. Offered at Northwest Hospital, Seattle, WA. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.
View course details in MyPlan: OB GYN 631

OB GYN 632 P-Introduction to Obstetrics and Gynecology - Bellingham (*, max. 12)
See OB GYN 665.
View course details in MyPlan: OB GYN 632

OB GYN 633 P-Introduction to Obstetrics and Gynecology- Spokane Rockwood (12)
Clerkship equivalent to OB GYN 665 offered in Spokane, WA. (Six weeks, full time) Offered: AWSpS.
View course details in MyPlan: OB GYN 633

OB GYN 638 P-Gynecology Planned Parenthood- Spokane, WA (4)
Clinical elective in family planning at Planned Parenthood in Spokane, WA. Exposure to contraceptive and options counseling. Experience in evaluating patients for sexually transmitted infections and appropriate therapies. May participate in first trimester ultrasound, medical and surgical abortions. Prerequisite: Basic OB GYN clerkship. Offered: AWSpS.
View course details in MyPlan: OB GYN 638

OB GYN 639 P-Introduction to Obstetrics and Gynecology, St. Alphonsus (*, max. 12)
See OB GYN 665. Offered at St. Alphonsus, Boise, ID. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.
View course details in MyPlan: OB GYN 639

OB GYN 643 P-Introduction to Obstetrics and Gynecology- Powell WY (*, max. 12)
See OB GYN 665. Offered in Powell, WY. (6 weeks, full time.)
View course details in MyPlan: OB GYN 643

OB GYN 644 P-Introduction to Obstetrics and Gynecology - Gillette, WY (12)
General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 644

OB GYN 645 P-Introduction to Obstetrics and Gynecology - Sheridan, WY (12)
General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 645

OB GYN 646 Introduction to Obstetrics and Gynecology - Rock Springs, WY (12)
Clerkship equivalent to OB GYN 665 offered in Rock Springs, WY. (Six weeks, full-time).
View course details in MyPlan: OB GYN 646
OB GYN 647 Introduction to Obstetrics and Gynecology - Nampa, ID (*, max. 12)
General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Offered in Nampa, ID. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565. Offered: AWSpS.
View course details in MyPlan: OB GYN 647

OB GYN 650 P-Introduction to Obstetrics and Gynecology - Kalispell, MT (12)
General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 650

OB GYN 651 P-Introduction to Obstetrics and Gynecology - Helena, MT (12)
General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 651

OB GYN 652 P-Introduction to Obstetrics and Gynecology - Bozeman, MT - Deaconess Women's Specialists (12)
See OB GYN 665 for description. Located at Deaconess Women's Specialists in Bozeman, MT. (six weeks. Limit: one student).
View course details in MyPlan: OB GYN 652

OB GYN 653 Introduction to Obstetrics and Gynecology - Ellensburg, WA (12)
Clerkship equivalent to OB GYN 665 offered in Ellensburg, WA. (Six weeks, full-time). Prerequisite: HUBIO series; 3rd Year medical students.
View course details in MyPlan: OB GYN 653

OB GYN 654 Introduction to Obstetrics and Gynecology - Moses Lake, WA (12)
Clerkship equivalent to OB GYN 665 offered in Ellensburg, WA. (Six weeks, full time).
View course details in MyPlan: OB GYN 654

OB GYN 656 P-Introduction to Obstetrics and Gynecology - Wasilla (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Wasilla, AK. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.
View course details in MyPlan: OB GYN 656

OB GYN 657 P-Introduction to Obstetrics and Gynecology - Lander (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Lander, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.
View course details in MyPlan: OB GYN 657

OB GYN 659 P-Introduction to Obstetrics and Gynecology - Cody (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Cody, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.
View course details in MyPlan: OB GYN 659

OB GYN 660 P-Introduction to Obstetrics and Gynecology - Billings, St. Vincent (*, max. 12)
Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 660

OB GYN 662 P-Introduction to Obstetrics and Gynecology - Libby (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Libby, Montana. Includes experience in several private
OB GYN 663 P-Introduction to Obstetrics and Gynecology - Wenatchee (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Wenatchee, WA. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.
[View course details in MyPlan: OB GYN 663]

OB GYN 664 P-Introduction to Obstetrics and Gynecology - GH Tacoma (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Tacoma, WA. Includes experience in several private physicians' offices. (Six weeks, full time) Prerequisite: HUBIO series; third-year medical student status.
[View course details in MyPlan: OB GYN 664]

OB GYN 665 P-Introduction to Obstetrics and Gynecology - UH-HMC (*, max. 12)
Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Rotations occur at UWMC and Harborview Medical Center. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 665]

OB GYN 666 P-Introduction to Obstetrics and Gynecology - Boise (*, max. 12)
Clerkship equivalent to 665 offered in Boise, Idaho (WWAMI). Includes experience in several private physician offices. (Six weeks. Limit: one student. Not offered summer quarter). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 666]

OB GYN 667 P-Introduction to Obstetrics and Gynecology - Madigan (*, max. 12)
Clerkship equivalent to OB GYN 665 offered at Madigan Army Medical Center, Tacoma. (Six weeks. Limit: three students). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 667]

OB GYN 668 P-Introduction to Obstetrics and Gynecology - Spokane (12)
Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 668]

OB GYN 669 P-Introduction to Obstetrics and Gynecology - Swedish (12)
Clerkship equivalent to OB GYN 665 offered at Swedish Hospital Medical Center. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 669]

OB GYN 670 P-Introduction to Obstetrics and Gynecology - GH-Central (12)
Clerkship equivalent to OB GYN 665 offered at the Central facility of Group Health Cooperative of Puget Sound in Seattle. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 670]

OB GYN 671 P-Introduction to Obstetrics and Gynecology - Anchorage (12)
Clerkship equivalent to OB GYN 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians' offices as well as Providence Hospital. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 671]

OB GYN 672 P-Introduction to Obstetrics and Gynecology - GH-East (12)
Clerkship equivalent to OB GYN 665 offered at the Eastside facility of Group Health Cooperative of Puget Sound in Redmond. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.
[View course details in MyPlan: OB GYN 672]
OB GYN 676 P-Introduction to Obstetrics and Gynecology - Missoula (12)
Clerkship equivalent to OB GYN 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 676

OB GYN 677 P-Introduction to Obstetrics and Gynecology - Rock Springs (12)
Equivalent of OB GYN 665, offered in Rock Springs, Wyoming. Student rotates among outpatient clinic, labor and delivery, operating suites, and medical/surgical inpatient areas. (Limit: two students.) Offered: AS.
View course details in MyPlan: OB GYN 677

OB GYN 678 P-Introduction to Obstetrics and Gynecology - Billings (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 678

OB GYN 679 P-Introduction to Obstetrics and Gynecology - Cheyenne (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Cheyenne, WY. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 679

OB GYN 681 P-Gynecological Oncology Subspecialty (8)
Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Limit: two students each four weeks). Prerequisite: basic OB GYN clerkship.
View course details in MyPlan: OB GYN 681

OB GYN 682 P-Antenatal High-Risk Obstetrics (8)
Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks).
View course details in MyPlan: OB GYN 682

OB GYN 683 P-Gynecological Oncology Subspecialty - Boise, ID (4/8, max. 8)
Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Two- and four-week options). Prerequisite: basic OB GYN clerkship. Offered: AWSps.
View course details in MyPlan: OB GYN 683

OB GYN 685 P-Subspeciality Gynecology - UWMC (8)
Specialty areas in gynecology including urogynecology, family planning, adolescent gynecology, and reproductive endocrinology and infertility. Patients in both outpatient and inpatient setting, follow patients to operating room and fully participate in their hospital care. Consult on inpatients and emergency room visits. Exposes interested students to the breadth and depth of benign gynecologic subspecialty areas. (Limit: one student/four weeks.)
View course details in MyPlan: OB GYN 685

OB GYN 686 P-Introduction to Obstetrics and Gynecology - Yakima (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Yakima (WWAMI). Includes experience in several private
OB GYN 687 P-Introduction to Obstetrics and Gynecology - Fairbanks (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Fairbanks, AK. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 687

OB GYN 689 P-Introduction to Obstetrics and Gynecology - Havre (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Havre, MT. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 689

OB GYN 690 P-Introduction to Obstetrics and Gynecology - Sandpoint (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Sandpoint, ID. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 690

OB GYN 691 P-Introduction to Obstetrics and Gynecology - Tacoma (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in Tacoma. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 691

OB GYN 692 P-Introduction to Obstetrics and Gynecology - Bozeman, MT - Bozeman OB/GYN (*, max. 12)
Clerkship equivalent to OB GYN 665 offered Bozeman, MT. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 692

OB GYN 693 P-Introduction to Obstetrics and Gynecology - Valley Medical Center (*, max. 12)
Clerkship equivalent to OB GYN 665 offered at Valley Medical Center. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 693

OB GYN 695 P-Introduction to Obstetrics and Gynecology - Tri Cities (*, max. 12)
Clerkship equivalent to OB GYN 665 offered in the Tri Cities. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.
View course details in MyPlan: OB GYN 695

OB GYN 697 P-Obstetrics and Gynecology Special Electives (*, max. 24)
By arrangement, for qualified students, special clerkship or research opportunities are sometimes made available at other institutions. Prospective students obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of department.
View course details in MyPlan: OB GYN 697

OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located inside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.
View course details in MyPlan: OB GYN 699
Department Overview

RR801 University of Washington Medical Center

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.

Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship, are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Seattle Children's hospital.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at ingrid@uw.edu. For more information on medical student clerkships, contact Dorrie Quirante at dorrieq@uw.edu.
SCHOOL OF MEDICINE
OPHTHALMOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

**OPHTH 498 Undergraduate Thesis (*, max. 25) Francis**
Thesis-based research in vision and ophthalmology. Elective. Offered: AWSpS.
View course details in MyPlan: OPHTH 498

**OPHTH 499 Undergraduate Research (*, max. 25) Francis**
Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSpS.
View course details in MyPlan: OPHTH 499

**OPHTH 501 P-Ophthalmology Preceptorship (1, max. 12)**
Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Instructors: Francis Offered: AWSpS.
View course details in MyPlan: OPHTH 501

**OPHTH 600 Independent Study or Research (*)**
Prerequisite: Permission of instructor.
View course details in MyPlan: OPHTH 600

**OPHTH 681 P-Ophthalmology Clerkship - HMC/Eye Institute (4/8, max. 12)**
Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. Offered: AWSpS.
View course details in MyPlan: OPHTH 681

**OPHTH 683 P-Pediatric Ophthalmology Clerkship - Seattle Children's (4)**
Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Furnishes programmed text in general ophthalmology. Prerequisite: completion of human biology series. Offered: WS.
View course details in MyPlan: OPHTH 683
OPHTH 685 P-Ophthalmology Clerkship - VAPSHCS (4)
Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, as well as neuro-ophthalmologic, retinal, and glaucoma consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.
View course details in MyPlan: OPHTH 685

OPHTH 686 P-Ophthalmology Clerkship - Kaiser Permanente (4)
Diagnosis and treatment of ocular disease in outpatients. Weekly assignments to Kaiser Permanente ophthalmologist responsible for the care of walk-in and urgent patients, demonstrating findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.
View course details in MyPlan: OPHTH 686

OPHTH 688 P-Ophthalmology Clerkship - Anchorage (8)
Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.
View course details in MyPlan: OPHTH 688

OPHTH 689 P-Ophthalmology Clerkship - Spokane (4)
Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.
View course details in MyPlan: OPHTH 689

OPHTH 690 P-Ophthalmology Clerkship - Missoula (4)
Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.
View course details in MyPlan: OPHTH 690

OPHTH 691 P-Ophthalmology Clerkship - Nampa (4)
Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.
View course details in MyPlan: OPHTH 691

OPHTH 695 P-Ophthalmology Advanced Clerkship - HMC (4)
Students gain advanced experience in the diagnosis, evaluation, and treatment of inpatient and emergency department ophthalmology consults, including emergency surgeries. Prerequisite: completion of human biology series; prior ophthalmology clerkship. Offered: AWSpS.
View course details in MyPlan: OPHTH 695

OPHTH 697 P-Ophthalmology Special Electives (*, max. 24)
By specific arrangement, for qualified students, special clerkship, externship, or research opportunities are at times made available at institutions or clinics other than the UW. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Instructors: Francis Offered: AWSpS.
View course details in MyPlan: OPHTH 697

OPHTH 699 P-WWAMI Ophthalmology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.
View course details in MyPlan: OPHTH 699
Orthopaedics

Display as tabs

Department Overview

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.
SCHOOL OF MEDICINE
ORTHOPEDICS

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

ORTHP 498 Undergraduate Thesis (*, max. 30) Eyre
Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.
View course details in MyPlan: ORTHP 498

ORTHP 499 Undergraduate Research (*, max. 90) Eyre
Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.
View course details in MyPlan: ORTHP 499

ORTHP 505 P-Preceptorship in Orthopaedic Surgery (1, max. 12)
Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.
View course details in MyPlan: ORTHP 505

ORTHP 585 P-Sports Medicine (2)
Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries, and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Instructors: O’Kane Offered: Sp.
View course details in MyPlan: ORTHP 585

ORTHP 643 P-General Orthopedic Clerkship - Cody, WY (8)
Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students.
View course details in MyPlan: ORTHP 643

ORTHP 644 P-General Orthopaedic Clerkship - Jackson (*, max. 8)
Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO
series; third- and fourth-year students. Enrollment limited to three a year. Instructors: Khoury Offered: AWSpS. View course details in MyPlan: ORTHP 644

ORTHP 650 P-General Orthopaedic Clerkship - Billings (*, max. 8)
Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Instructors: Shenton Offered: AWSpS. View course details in MyPlan: ORTHP 650

ORTHP 655 P-General Orthopaedic Clerkship - Boise (*, max. 8)
Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternative in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Instructors: Scheffel View course details in MyPlan: ORTHP 655

ORTHP 662 P-General Orthopaedic Surgery-Casper, WY (8)
Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: Third or fourth year medical student. View course details in MyPlan: ORTHP 662

ORTHP 668 P-Pediatric Orthopaedics - Spokane (*, max. 8)
Acquaints students with all aspects of musculoskeletal problems in childhood. Includes didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Shriners Hospital for Children in Spokane. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Instructors: Caskey Offered: AWSpS. View course details in MyPlan: ORTHP 668

ORTHP 669 P-General Orthopaedic Clerkship - Spokane (*, max. 8)
Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students. Instructors: Scott Offered: AWSpS. View course details in MyPlan: ORTHP 669

ORTHP 675 P-Preceptorship in Orthopaedics (*, max. 4)
Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. (Two weeks, full-time). Prerequisite: SURG 665 or HUBIO 553 and permission of department. Offered: AWSpS. View course details in MyPlan: ORTHP 675

ORTHP 676 P-Pediatric Orthopaedics - Seattle Children's (*, max. 8)
Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Seattle Children's Hospital, and correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Instructors: Burton, Dales, Jinguji, Krengel, Lindberg, Mosca, Schmale, Steinman, White Offered: AWSpS. View course details in MyPlan: ORTHP 676

ORTHP 677 P-Musculoskeletal Trauma (*, max. 8)
Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665, HUBIO 553. Instructors: Barei, Beingessner, Bellabarba, Bransford, Dunbar, Firoozabadi, Henley, Kleweno, Nork, Taitsman Offered: AWSpS. View course details in MyPlan: ORTHP 677
ORTHOPEDICS

ORTH P678 P-Musculoskeletal Oncology (8/12)
In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Instructors: Conrad, Davidson Offered: AWSpS.
View course details in MyPlan: ORTHP 678

ORTH P680 P-General Orthopaedic Clerkship - VAMC (*, max. 8)
Veterans' Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Instructors: Chansky Offered: AWSpS.
View course details in MyPlan: ORTHP 680

ORTH P681 P- Sports Medicine Orthopaedic Clerkship (8)
Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Instructors: Green, Larson, O' Kane, Twaddle Offered: AWSpS.
View course details in MyPlan: ORTHP 681

ORTH P682 P-Outpatient Orthopaedics (8)
Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Instructors: Conrad, Davidson, Manner, Matsen, Wagner, Warme Offered: AWSpS.
View course details in MyPlan: ORTHP 682

ORTH P684 P-Disorders of the Spine (8)
Evaluation and assessment strategies of spinal disorders for patients of all ages and wide variety of clinical conditions including trauma, deformity, degenerative disorders, metabolic, and inflammatory diagnoses. Outpatient, surgical, and conference-based teaching sessions aimed at all experience levels and individualized for practitioners with interest in medical specialties, emergent care, radiology, physiatry, intervention pain management. Offered: AWSpS.
View course details in MyPlan: ORTHP 684

ORTH P685 P-Adult Reconstruction: Total Joint Service (8) Manner
Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscopy. Offered: AWSpS.
View course details in MyPlan: ORTHP 685

ORTH P686 P-Sports Medicine - Boise, ID (*, max. 8) G. SCHMALE
Orthopaedic clinical clerkship in Boise, ID. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care focused on the treatment and rehabilitation of foot and ankle injuries. Students work primarily in one subspecialty area (foot and ankle) and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.
View course details in MyPlan: ORTHP 686
ORTH P 687 P-Shoulder and Elbow (8) *Matsen, Warne*
Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.
*View course details in MyPlan: ORTHP 687*

ORTH P 688 P-Sports Medicine- Spokane, WA (4-8)
Orthopedic clinical clerkship in sports medicine. Students participate in care of patients with sports-related injuries. Emphasis on physical examination and determining appropriate operative interventions and rehabilitation. Offered: AWSpS.
*View course details in MyPlan: ORTHP 688*

ORTH P 697 P-Orthopaedic External Elective (*, max. 24)
Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.
*View course details in MyPlan: ORTHP 697*

ORTH P 699 P-WWAMI Orthopedics Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.
*View course details in MyPlan: ORTHP 699*

Modified: May 30, 2017
Otolaryngology -- Head and Neck Surgery

Department Overview

BB1165 University of Washington Medical Center

The Department of Otolaryngology - Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.
SCHOOL OF MEDICINE
OTOLARYNGOLOGY, HEAD AND NECK SURGERY
OTOLARYNGOLOGY, HEAD & NECK SURGERY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

OTOHN 498 Undergraduate Thesis (*, max. 35) Rubel, Futran
Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: A/WSpS.
View course details in MyPlan: OTOHN 498

OTOHN 499 Undergraduate Research (*, max. 35) Rubel, Futran
Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: A/WSpS.
View course details in MyPlan: OTOHN 499

OTOHN 501 P-Preceptorship in Otolaryngology - Head and Neck Surgery (1, max. 12)
One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at the University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS office. Instructors: Hillel Offered: A/WSpS.
View course details in MyPlan: OTOHN 501

OTOHN 678 P-Otolaryngology - Head and Neck Surgery Clerkship - Cheyenne (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Instructors: Futran Offered: A/WSpS.
View course details in MyPlan: OTOHN 678

OTOHN 679 P-Otolaryngology - Head and Neck Surgery Clerkship - Missoula (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Instructors: Futran, Hillel, Manning, Whipple Offered: A/WSpS.
View course details in MyPlan: OTOHN 679
OTOHN 680 P-Otolaryngology - Head and Neck Surgery Clerkship - UWMC (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Rotation at UWMC. Prerequisite: human biology series. Instructors: Futran Offered: AWSpS.
View course details in MyPlan: OTOHN 680

OTOHN 681 P-Otolaryngology - Head and Neck Surgery Clerkship - HMC (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Instructors: Whipple Offered: AWSpS.
View course details in MyPlan: OTOHN 681

OTOHN 682 P-Otolaryngology - Head and Neck Surgery Clerkship - VA (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Instructors: Coltrera Offered: AWSpS.
View course details in MyPlan: OTOHN 682

OTOHN 683 P-Otolaryngology - Head and Neck Surgery Clerkship - Madigan (*, max. 8)
Individual externship training at an outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. (Two or four weeks, full-time). Prerequisite: completion of human biology series. Instructors: (Madigan Army Medical Center) Offered: AWSpS.
View course details in MyPlan: OTOHN 683

OTOHN 684 P-Otolaryngology - Head and Neck Surgery Clerkship - Seattle Children's (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Instructors: Manning Offered: AWSpS.
View course details in MyPlan: OTOHN 684

OTOHN 685 P-Otolaryngology - Head and Neck Surgery Clerkship - Boise (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to operating room. Prerequisite: human biology series. Offered: AWSpS.
View course details in MyPlan: OTOHN 685

OTOHN 686 P-Otolaryngology - Head and Neck Surgery Clerkship - Greater Seattle Private Practice (4)
Provides exposure to all aspects of patient care through a private practice setting. The student is exposed to the outpatient clinic and operating room procedures with daily directed contact with one attending faculty member. Contact administrator to arrange rotation. Prerequisite: permission of course director. Instructors: Hillel Offered: AWSpS.
View course details in MyPlan: OTOHN 686

OTOHN 687 P-Otolaryngology - Head and Neck Surgery Clerkship - Spokane (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.
View course details in MyPlan: OTOHN 687
OTOHN 688 P-Otolaryngology - Head and Neck Surgery Clerkship - Anchorage (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join impatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.
View course details in MyPlan: OTOHN 688

OTOHN 697 P-Otolaryngology - Head and Neck Surgery - Away Externship (*, max. 8)
By specific arrangement. Special clerkship, externship, or research opportunities are at times made available at institutions other than the University of Washington. Prospective students obtain a special assignment form from the dean's office at least one month before preregistration. Prerequisite: permission of clerkship director. Instructors: Fultran Offered: AWSpS.
View course details in MyPlan: OTOHN 697

OTOHN 699 P-Otolaryngology - Head and Neck Surgery Clerkship - WWAMI (4/8, max. 8)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.
View course details in MyPlan: OTOHN 699
Pathology

Department Overview

C516 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by MDs, it includes the laboratory evaluation of organs, tissues, and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by PhDs, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. Emphasis is on development of skills in hypothesis generation and testing, including the design, accomplishment, and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

Graduate Program

Graduate Program Adviser
C516 Health Sciences, Box 357470
(206) 616-7551

Doctor of Philosophy

Admission Requirements

1. Copy of the Graduate School Application
2. Official transcripts
3. Official GRE scores. The department also recommends that applicants take the Subject Test in Biology or related area.
4. Statement of purpose and research interests
5. Three or more letters of recommendation
6. Personal statement that addresses the relationship between personal background and aspirations

**Special Requirements**

Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory is strongly recommended. Those wishing to matriculate toward both the MD and PhD degrees must gain admission to both the Graduate School and the School of Medicine.

**Degree Requirements**

90 credits, to include:

1. **Required coursework:** PATH 500, PATH 501, PATH 507, PATH 512, PATH 513, PATH 515, PATH 516, PATH 551; BIOST 511; CONJ 538, CONJ 539
2. **Research before the general examination:** PATH 600
3. **Research after the general examination:** PATH 800
4. **Recommended courses:** CONJ 531, CONJ 532
5. General examination
6. Dissertation
7. Final examination

**Financial Aid**

Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

**Research Facilities**

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

**Residency Training Program**

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100, or visit the residency program website.
SCHOOL OF MEDICINE
PATHOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

PATH 498 Undergraduate Thesis (*, max. 35)
Elective.
View course details in MyPlan: PATH 498

PATH 499 Undergraduate Research (*, max. 35)
Elective.
View course details in MyPlan: PATH 499

PATH 501 Pathology Proseminars (1, max. 9)
Small group discussions and presentations by students based on critical reading of original papers, or on concurrent seminars, in many areas of experimental pathology and medicine. Topic varies by quarter. Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: PATH 501

PATH 502 Inflammation and Repair (2)
Lecture-seminar; a seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Prerequisite: permission of instructor. Credit/no-credit only. Offered: even years.
View course details in MyPlan: PATH 502

PATH 507 Introduction to Pathology Research (2)
Current developments and approaches to investigation of the molecular and cellular basis of disease. Members of the Pathology faculty present and discuss their own research projects. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.
View course details in MyPlan: PATH 507

PATH 510 Introduction to Pathology Methods (3)
Laboratory course designed to introduce graduate students to the fundamentals of image analysis, histology, histopathology, post mortem evaluation, surgical pathology, and other methods used to investigate disease etiology, progression, and manifestation in humans and in animal models. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.
View course details in MyPlan: PATH 510
PATH 511 Topics in Experimental Pathology (1-2, max. 10)
Focus on areas of research relevant to experimental pathology. Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: PATH 511

PATH 512 Molecular Basis of Disease: Death and Repair (1.5)
First in a series designed to introduce students to medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.
View course details in MyPlan: PATH 512

PATH 513 Mechanisms of Neurodegeneration (1.5)
Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.
View course details in MyPlan: PATH 513

PATH 516 Molecular Basis of Human Genetic Disease (3)
Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: Sp.
View course details in MyPlan: PATH 516

PATH 517 The Biology and Pathology of Aging (3/4) M. KAEBERLEIN
Surveys the biology and pathologies of the aging phenomena in multiple species and at multiple organismal levels from whole animals to molecules. Prerequisite: coursework in biology, biochemistry, molecular biology, and genetics. Offered: Sp.
View course details in MyPlan: PATH 517

PATH 520 Experimental Pathology Seminar (1)
Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: PATH 520

PATH 521 Anatomy and Autopsy (1)
Students view an autopsy, and learn how autopsy can diagnose disease, determine cause of death, and improve patient care. Requirements include orientation session, autopsy, and a clinical-autopsy conference. Participants must be free at least one morning per week to attend an autopsy at UWMC. Prerequisite: UW medical students only. Instructors: Fligner Offered: WSp.
View course details in MyPlan: PATH 521

PATH 522 Hematopathology Seminar (2) Wood
Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with LAB M 522; W, even years.
View course details in MyPlan: PATH 522

PATH 530 Human Cytogenetics (*, max. 4)
View course details in MyPlan: PATH 530
PATH 535 In innate Immunity and Immunopathology (1.5) I. CRISPE, K. SMITH
Explores the relationship between the innate immune system and disease processes, using a student-led seminar format. Students analyze, present, and critique primary research literature, and use the knowledge gained to develop a sophisticated insight into the mechanisms of immunopathology. Offered: Sp.
View course details in MyPlan: PATH 535

PATH 540 Translational Research Topics (1) Horwitz
First and second year students in the M.D./Ph.D. program present and discuss current papers form the biomedical literature in journal club format, and describe their own research in seminar format. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: PATH 540

PATH 544 General and Systemic Pathology ([2-3]-, max. 5) W. MAHONEY
Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite: for non-dental students: permission of instructor.
View course details in MyPlan: PATH 544

PATH 550 Mechanisms of Disease (3) Conrad-Liles, Rendi
Examines the mechanisms of inflammation, cell injury, death, repair, immunity, and neoplasia as well as diseases of various organ systems. Systems covered include the cardiovascular, pulmonary, gastrointestinal, neurologic, endocrine, and genitourinary/renal systems. Topics presented through lecture, primary literature, and small-group discussion. Offered: A.
View course details in MyPlan: PATH 550

PATH 551 Experimental and Molecular Pathology (2-5, max. 20)
Introduction to experimental pathobiology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: Pathology PhD student; permission of instructor Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: PATH 551

PATH 555 Environmental Pathology (3)
Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520. Instructors: Monnat Offered: Sp, even years.
View course details in MyPlan: PATH 555

PATH 560 Molecular Analysis of Human Disease (*, max. 10)
Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Credit/no-credit only. Offered: AWSp.
View course details in MyPlan: PATH 560

PATH 580 Mitochondria and Metabolism in the Pathogenesis of Human Disease (1.5) Hawkins, Tian
Explores the fundamentals of mitochondrial biology, bioenergetics, and cellular metabolism. Includes topical lectures and literature reviews introducing students to advanced metabolic concepts within the context of human disease. Offered: A.
View course details in MyPlan: PATH 580

PATH 590 Patient-Centered Translational Research (1) Horwitz
MSTP students preparing to return to clerkships are partnered with a senior MD/PhD medical student or house
office, preview the medical or surgical ward team environment, select a patient-focused translation research
topic based on their clinical experience, and prepare a plan for refreshing introductory clinical skills. Offered:
WSp.
View course details in MyPlan: PATH 590

PATH 600 Independent Study or Research (*-)
Prerequisite: Pathology PhD student. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PATH 600

PATH 667 P-Renal Pathology Laboratory (*, max. 6)
Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal
biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students
earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite:
permission of instructor.
View course details in MyPlan: PATH 667

PATH 676 P-Diagnostic Pathology Clerkship - Spokane (*, max. 24)
Medical student participation in dissection and study of autopsy and surgical pathology cases at Sacred Heart
Medical Center in Spokane. Can be taken for either two or four weeks.
View course details in MyPlan: PATH 676

PATH 677 P-Neuropathology Clerkship - HMC (*, max. 16)
Includes participation in dissection and study of neuropathology cases. Students work up cases under senior staff
including dissection, microscopic examination, and literature review.
View course details in MyPlan: PATH 677

PATH 678 P-Diagnostic Pathology Clerkship - Medical Examiner's Office, Alaska (*, max. 24)
Medical student participation in dissection and study of autopsy and forensic pathology cases at the Anchorage Medical Examiner's Office.
View course details in MyPlan: PATH 678

PATH 680 P-Diagnostic Pathology Clerkship - University of Washington Medical Center (*, max. 24)
Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year medical student standing. Instructors:
Swanson
View course details in MyPlan: PATH 680

PATH 681 P-Diagnostic Pathology Clerkship - Harborview Medical Center (*, max. 24)
View course details in MyPlan: PATH 681

PATH 682 P-Diagnostic Pathology Clerkship - Veterans' Administration Hospital (*, max. 24)
View course details in MyPlan: PATH 682

PATH 683 P-Diagnostic Pathology Clerkship - Medical Examiner's Office (*, max. 24) Raven
View course details in MyPlan: PATH 683

PATH 687 P-Diagnostic Pathology Clerkship - Seattle Children's Hospital (*, max. 24)
View course details in MyPlan: PATH 687

PATH 688 P-Diagnostic Pathology Clerkship - Madigan Army Medical Center (*, max. 24)
View course details in MyPlan: PATH 688

PATH 690 P-Diagnostic Pathology Clerkship - Northwest Medical Center (*, max. 24)
View course details in MyPlan: PATH 690
PATH 691 P-Diagnostic Pathology Clerkship - General Hospital of Everett (*, max. 24)
View course details in MyPlan: PATH 691

PATH 697 P-Pathology Special Electives (*, max. 24)
By specific arrangement, students have clerkships, externships, or research opportunities at institutions other than the University of Washington. Prospective students obtain special assignment forms from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.
View course details in MyPlan: PATH 697

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.
View course details in MyPlan: PATH 699

PATH 700 Master's Thesis (*-)
View course details in MyPlan: PATH 700

PATH 800 Doctoral Dissertation (*-)
Prerequisite: Pathology PhD student. Offered: AWSpS.
View course details in MyPlan: PATH 800
Pediatrics

Department Overview

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Seattle Children's hospital, University of Washington Medical Center, and Harborview Medical Center.

SCHOOL OF MEDICINE

PEDIATRICS

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

PEDS 498 Undergraduate Thesis (*, max. 35)
For medical students. Offered: AWSpS.
View course details in MyPlan: PEDS 498

PEDS 499 Undergraduate Research (*, max. 35)
Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.
View course details in MyPlan: PEDS 499

PEDS 505 P-Preceptorship in Pediatrics (1, max. 12)
To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PEDS 505

PEDS 530 P-Homeless Youth and Their Medical Care (1)
Seminar and interview practice; students learn how to deal with special health problems and other related problems of "street kids" through interviews and observations. Credit/no-credit only. Offered: W.
View course details in MyPlan: PEDS 530

PEDS 598 P-Pediatrics Independent Study and Remediation (*, max. 8)
Designed for medical students required to complete additional study related to the required Pediatrics Clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission Offered: AWSpS.
View course details in MyPlan: PEDS 598

PEDS 600 Independent Study or Research (*)
Facilitates and promotes mentored independent study/scholarship related to the care of children. Students participate in projects that promote individual, self-directed and creative scholarly activity with appropriate
supervision, oversight, and mentorship with an emphasis on the process of scholarship.

View course details in MyPlan: PEDS 600

PEDS 611 P-Country Doctor Free Teen Clinic (*, max. 24)
Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/treatment, and the impact of a homeless lifestyle on general health. (Limit per rotation: two students.) Offered: AWSpS.

View course details in MyPlan: PEDS 611

PEDS 619 P-Introduction to Care of the Newborn Infant (4)
2-week clinical elective at Overlake Hospital. Students participate in the women's and baby follow-up clinic and neonatal nutrition clinic. Students attend rounds in the neonatal ICU, attend deliveries and participate as able in delivery room resuscitations. Offered: AWSpS.

View course details in MyPlan: PEDS 619

PEDS 622 P-Pediatric Child Abuse and Neglect - Boise (4/8, max. 24)
Exposes future clinicians to the most common issues relating to child abuse and neglect. Prerequisite: fourth-year medical students; core pediatrics rotation. (Limit: one student; by departmental permission). Offered: AWSpS.

View course details in MyPlan: PEDS 622

PEDS 623 P-Pediatrics Child Abuse - Spokane, WA (4-8, max. 8)
Exposes future clinicians to the most common issues relating to child abuse and neglect. (Limit: one student). Prerequisite: fourth-year medical students who have completed their core pediatrics rotation; permission of department. Offered: AWSpS.

View course details in MyPlan: PEDS 623

PEDS 624 Pediatric Emergency Medicine - Spokane (8)
Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: PEDS core clerkship; by departmental permission. Offered: AWSpS.

View course details in MyPlan: PEDS 624

PEDS 625 Pediatric Emergency Medicine (8)
Elective in Pediatric Emergency Department at Seattle Children's Hospital. Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: fourth-year medical students. Offered: AWSpS.

View course details in MyPlan: PEDS 625

PEDS 629 P-Neonatal Pediatrics- Missoula, MT (1-24, max. 24)
Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Offered: AWSpS.

View course details in MyPlan: PEDS 629

PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24)
Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: PEDS 665, impatient only; acceptance in the WRITE program.

View course details in MyPlan: PEDS 630

PEDS 631 P-LIC Pediatrics Clinical Clerkship (12)
Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

View course details in MyPlan: PEDS 631
**PEDS 635 P-Pediatric Cardiology - Boise, ID (*, max. 24)**
Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student; by departmental permission). Offered: AWSpS.
[View course details in MyPlan: PEDS 635](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 636 P-Pediatric Cardiology - Spokane (*, max. 24)**
Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
[View course details in MyPlan: PEDS 636](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 637 P-Pediatric Cardiology - Anchorage (*, max. 24)**
Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
[View course details in MyPlan: PEDS 637](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 640 P-Pediatric Gastroenterology - Boise (4/8, max. 24)**
Elective rotation where students see clinical pediatric gastrointestinal problems, participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. (Limit: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
[View course details in MyPlan: PEDS 640](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 647 P-Pediatric General Clerkship- Lewiston, ID (1-24, max. 24)**
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time) Offered: AWSpS.
[View course details in MyPlan: PEDS 647](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 648 Pediatric General Clerkship - Everett, WA (12)**
General introductory pediatric clerkship. One half in hospital setting; one half in outpatient department, clinic, or private office. Open to all third- and fourth year students. (Six weeks, full-time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.
[View course details in MyPlan: PEDS 648](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 649 P-Pediatric General Clerkship - Centralia/Olympia, WA (12)**
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.
[View course details in MyPlan: PEDS 649](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 650 P-Pediatric General Clerkship - Moses Lake, WA (12)**
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.
[View course details in MyPlan: PEDS 650](http://www.washington.edu/students/crscti/pEDIAT.html)

**PEDS 651 P-Pediatric General Clerkship - Bozeman, MT (12, max. 24)**
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students).
Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 651

PEDS 652 P-Pediatric General Clerkship - Idaho Falls, ID (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students).
Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 652

PEDS 653 P-Pediatric General Clerkship - Helena, MT (*, max. 24)
General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in Helena, MT.
View course details in MyPlan: PEDS 653

PEDS 655 P-Pediatric General Clerkship - Jackson, WY (*, max. 24)
General introductory inpatient and outpatient pediatric clerkship. Takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities, including access to a community hospital with nursery, pediatric beds, and physician-staffed emergency room. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSp.
View course details in MyPlan: PEDS 655

PEDS 656 P-Pediatric General Clerkship - Wenatchee (*, max. 24)
General introductory inpatient and outpatient pediatric clerkship. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 656

PEDS 657 P-Pediatric General Clerkship - Missoula (*, max. 24)
General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at Community Medical Center. (Six weeks, full time. Limit per rotation: one or two students.) Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 657

PEDS 658 P-Pediatric General Clerkship - Boise (*, max. 24)
General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at St. Luke's Medical Center. (Six weeks, full time. Limit per rotation: one or two students). Prerequisite: HUBIO 563. Offered: AWSp.
View course details in MyPlan: PEDS 658

PEDS 659 Pediatric General Clerkship - Billings, MT (*, max. 24)
General introductory inpatient and outpatient pediatric clerkship. Exposes students to diverse settings where children receive health services. The six-week experience takes place primarily in two active pediatric group practices with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit: per rotation: one student.) Offered: AWSp.
View course details in MyPlan: PEDS 659

PEDS 660 Pediatric General Clerkship - Cheyenne, WY (*, max. 24)
Introductory inpatient and outpatient pediatric clerkship that exposes students to environments in settings where children receive medical and health services. The six-week experience takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 660
PEDS 661 P-Pediatric General Clerkship - Anchorage (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three students). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 661

PEDS 663 P-Pediatric General Clerkship - Mary Bridge (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three or four students). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 663

PEDS 664 P-Pediatric General Clerkship - Pocatello, ID (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 664

PEDS 665 P-Pediatric General Clerkship - Seattle (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: ten students). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 665

PEDS 666 P-Pediatric General Clerkship - Great Falls, MT (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 666

PEDS 667 P-Pediatric General Clerkship - Madigan (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSp.
View course details in MyPlan: PEDS 667

PEDS 668 P-Pediatric General Clerkship - Spokane (*, max. 24)
General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two or three students). Prerequisite: HUBIO 563. Offered: AWSpS.
View course details in MyPlan: PEDS 668

PEDS 669 P-Neonatal Pediatrics - Clerkship (*, max. 24)
Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. (Limit per rotation: one or two students). Prerequisite: PEDS and OB GYN core clerkships. Offered: AWSpS.
View course details in MyPlan: PEDS 669

PEDS 670 P-Pediatric Infectious Diseases (*, max. 24)
Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; fourth-year medical student standing. Offered: AWSpS.
View course details in MyPlan: PEDS 670
PEDS 671 Pediatric Endocrinology (*, max. 24)
Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis, and management of a variety of endocrine problems. Includes participation in clinics, inpatient endocrine rounds, and a variety of conferences at Seattle Children's Hospital. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship. Offered: AWSpS.
View course details in MyPlan: PEDS 671

PEDS 672 P-Office Practice - Spokane (*, max. 12)
Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
View course details in MyPlan: PEDS 672

PEDS 673 P-Office Practice (*, max. 12)
Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
View course details in MyPlan: PEDS 673

PEDS 674 P-Pediatric Genetics - Spokane (*, max. 24)
Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Two or four weeks. Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
View course details in MyPlan: PEDS 674

PEDS 675 P-Clinical Elective in Complementary and Alternative Medicine (4/8, max. 8)
Clinical elective for students interested in a better understanding of CAM. Students arrange different clinical placements with selected CAM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Students are expected to arrange their own schedule and must be prepared to do so at least four weeks in advance of the start of the rotation. (Limit per rotation: one or two students). Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing; departmental permission. Offered: AWSpS.
View course details in MyPlan: PEDS 675

PEDS 677 P-Pediatric Intensive Care (8)
Students manage patients with the supervision of the Pediatric Critical Care attending or fellow at Seattle Children's Hospital. Includes the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensive-care setting. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
View course details in MyPlan: PEDS 677

PEDS 678 P-Pediatric Infectious Diseases - Boise (*, max. 24)
Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing; departmental permission. Offered: AWSpS.
View course details in MyPlan: PEDS 678

PEDS 679 P-Clinical Problems in Developmental Disabilities (*, max. 12)
Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. (Limit per
PEDS 681 P-Medical Genetics (*, max. 24)
Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
View course details in MyPlan: PEDS 681

PEDS 683 P-Pediatric Nephrology (8)
Four-week elective clerkship at Seattle Children's Hospital. Students participate in nephrology and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. (Limit per rotation: one student). Prerequisite: third- or fourth-year medical student; PEDS and MED core clerkships; departmental permission. Offered: AWSpS.
View course details in MyPlan: PEDS 683

PEDS 684 P-Pediatric Pulmonary Medicine (8)
Respiratory disorders, diagnostic techniques, and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. (Limit per rotation: one student). Prerequisite: PEDS core clerkship, fourth-year medical student standing. Offered: AWSpS.
View course details in MyPlan: PEDS 684

PEDS 685 P-Pediatric Hematology and Oncology (*, max. 24)
One-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. (Two or four weeks, full-time. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
View course details in MyPlan: PEDS 685

PEDS 686 P-Pediatric Cardiology (*, max. 24)
Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
View course details in MyPlan: PEDS 686

PEDS 688 Pediatric Rheumatology (8)
Exposes students to a wide range of pediatric rheumatologic diseases and provides them with the opportunity to evaluate new patients, help work up and manage inpatients with complex multisystem disease, and learn key elements of evaluation and treatment of childhood rheumatic diseases. Open to 4th year medical students. Prerequisite: completion of core pediatrics rotation; interest in rheumatology.
View course details in MyPlan: PEDS 688

PEDS 689 P-Advanced Rural Pediatrics - Ft. Washakie, WY (8)
Student functions at the sub-intern level to care for patients with acute pediatric illness, proved well child care, and provide follow up care to patients seen in the newborn nursery, Level II Neonatal ICU, hospitalizations, and previous clinic visits. Students interested should make arrangements well in advance of registration. Prerequisite: required clerkship in Pediatrics, Obstetrics and Gynecology, Internal Medicine, and Surgery.
View course details in MyPlan: PEDS 689

PEDS 690 P-Advanced Pediatric Clerkship - Boise (*, max. 24)
Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis,
and care at St. Lukes Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.  
View course details in MyPlan: PEDS 690

PEDS 691 P-Advanced Pediatric Clerkship - Seattle (*, max. 24)  
Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care as Seattle Children's. (Limit per rotation: three students). Prerequisite: PEDS core clerkship. Offered: AWSpS.  
View course details in MyPlan: PEDS 691

PEDS 692 P-Advanced Pediatric Clerkship - Spokane (*, max. 24)  
Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at Sacred Hearth Children's Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.  
View course details in MyPlan: PEDS 692

PEDS 693 P-Advanced Pediatric Subinternship - Mary Bridge (*, max. 24)  
Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. (Limit per rotation: one student). Prerequisite: Core Clerkship in PEDS, OB/GYN, I-Med, Surgery; departmental permission.  
View course details in MyPlan: PEDS 693

PEDS 694 P-Pediatric Adolescent Medicine (8)  
Elective in Adolescent Medicine at Seattle Children's Hospital. Open to 4th year medical students who have completed their Core pediatrics Rotation. Students will be expected to manage patients with the supervision of attending physicians. Students will have the opportunity to manage adolescent patients in the outpatient setting and learn key elements of subspecialty care of adolescents.  
View course details in MyPlan: PEDS 694

PEDS 697 P-Pediatric Special Electives (*, max. 24)  
By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than University of Washington. The faculty can advise of possible opportunities. Obtain special assignment form from the Department of Pediatrics at least one month before preregistration. Prerequisite: permission of department and the away site. Offered: AWSpS.  
View course details in MyPlan: PEDS 697

PEDS 698 Pediatric Advanced Therapeutics/Pediatric Boot Camp (4)  
Focuses on what is needed on day one of internship to care for children through hands-on experience, simulation, group problem solving, role-playing, didactics, and supplemental reading material. Emphasizes the acquisition and practice of core skills. Themes include communication, procedural competency, and medical decision making pertinent to both inpatient and outpatient pediatrics. (Two weeks.) Prerequisite: Prerequisite: fourth-year standing; departmental approval. Offered: Sp.  
View course details in MyPlan: PEDS 698

PEDS 699 P WWAMI Pediatrics Special Electives (*, max. 24)  
By special arrangement for qualified students, special clerkships or externships may be within the WWAMI region. Prerequisite: permission of department and the away site. Offered: AWSpS.  
View course details in MyPlan: PEDS 699
Pharmacology

Department Overview

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program

Graduate Program Coordinator
E-417 Health Sciences, Box 357280
(206) 685-9252
phcoladm@uw.edu

The Department of Pharmacology offers the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirement

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

Graduation Requirements

Minimum 90 credits, to include:

1. PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 with a minimum 2.7 grade for each class. Enrollment in PHCOL 507 throughout graduate school; PHCOL 514 in the first, second, and third years of graduate study.

2. PHCOL 519 (laboratory rotations) for autumn, winter, and spring quarters of the first year acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL
519. Students entering the PhD program with an MS degree or equivalent may petition to enroll in only one quarter of PHCOL 519 before selecting a laboratory. Rotations may occur outside the department by special permission only.

3. Four advanced 2-3 credit graded elective courses in pharmacology in addition to the PHCOL 510 through PHCOL 513 series. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas. The courses should strengthen the foundation of the student's thesis proposal.

4. Creditable passage of the general examination consisting of a comprehensive take-home written examination on general pharmacology, taken during summer quarter of the second year, followed by preparation of a grant proposal on the thesis project, and an oral examination, given by the Supervisory Committee during the first quarter of the third year of study. The student is evaluated on the proposed dissertation research and on his or her knowledge of the major disciplines important to the research. Based on the student's performance, the committee recommends approval and candidacy for the PhD degree, further work and subsequent reexamination, or termination.

5. After successful completion of the general examination, the student devotes most of his or her time to thesis research in the third and subsequent years of study. Students are expected to finish all degree requirements and complete their thesis research within a six-year time period from matriculation.

6. The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. Research must represent a worthy and fundamental contribution showing originality in concept and implementation.

When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor obtains approval of the Graduate School and sets a date for the final examination. The final examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.
SCHOOL OF MEDICINE
PHARMACOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

PHCOL 401 General Pharmacology I (2-4, max. 4) Wang
Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Offered: A.
View course details in MyPlan: PHCOL 401

PHCOL 402 General Pharmacology II (3/4)
General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Instructors: Storm Offered: W.
View course details in MyPlan: PHCOL 402

PHCOL 434 General Pharmacology (2) Grubbs
Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.
View course details in MyPlan: PHCOL 434

PHCOL 435 General Pharmacology (2) Grubbs
Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.
View course details in MyPlan: PHCOL 435

PHCOL 498 Undergraduate Thesis (*, max. 35)
Offered: A.
View course details in MyPlan: PHCOL 498

PHCOL 499 Undergraduate Research (*, max. 35)
Participation in departmental research projects. Offered: AWSpS.
View course details in MyPlan: PHCOL 499

PHCOL 507 Pharmacology Seminar (1, max. 30)
Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance.
Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.

**View course details in MyPlan: PHCOL 507**

**PHCOL 510 Drug Discovery and Emerging Therapeutics (2)**
Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Instructors: Zheng Offered: W.

**View course details in MyPlan: PHCOL 510**

**PHCOL 511 Autonomic/Cardiovascular Pharmacology (2.5)**
Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Instructors: Nathanson Offered: W.

**View course details in MyPlan: PHCOL 511**

**PHCOL 512 Neuropharmacology (2) Bajjalieh**
Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addition. Lecture, group discussion, and analysis of recent research. Offered: Sp.

**View course details in MyPlan: PHCOL 512**

**PHCOL 513 Endocrine Pharmacology and Chemotherapeutics (2)**
Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Basic principles of chemotherapy of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Instructors: McKnight Offered: Sp.

**View course details in MyPlan: PHCOL 513**

**PHCOL 514 Current Topics in Pharmacology (1, max. 30)**
Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Instructors: Gardner Offered: AWSp.

**View course details in MyPlan: PHCOL 514**

**PHCOL 515 General Pharmacology Laboratory (*, max. 9)**
Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

**View course details in MyPlan: PHCOL 515**

**PHCOL 519 Introduction to Laboratory Research in Pharmacology (4) Storm**
On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSp.

**View course details in MyPlan: PHCOL 519**

**PHCOL 527 Drug Metabolism (4) A. RETTIE, K. THUMMEL**
Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of
inhibition and activation, steroid and amine metabolism. Offered: jointly with MEDCH 527; W, odd years.

View course details in MyPlan: PHCOL 527

PHCOL 529 Ion Channel Pharmacology (2)
Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Instructors: Catterall, Tempel Offered: A, odd years.

View course details in MyPlan: PHCOL 529

PHCOL 530 Neuronal Signaling Pathways (2)
Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis, and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Instructors: Beavo, Hague, Storm, Xia Offered: W, even years.

View course details in MyPlan: PHCOL 530

PHCOL 531 Genetic Analysis of Signaling Systems (3)
Current topics involving signal transduction are discussed with an emphasis on genetic analysis of multicellular systems and creative experimental design. Prerequisite: 9 credits of graduate-level courses in molecular and cellular biology, biochemistry, or genetics, or permission of instructor. Instructors: McKnight, Moon Offered: Sp, odd years.

View course details in MyPlan: PHCOL 531

PHCOL 534 Molecular Basis of Addictive Drug Action (2)
Advanced consideration and discussion of current literature addressing the basis of opiate, psychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Instructors: Chavkin, Phillips, Stella Offered: A, even years.

View course details in MyPlan: PHCOL 534

PHCOL 535 Transcriptional Control in Human Disease (3)
Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Instructors: Bomszytk, Wang Offered: Sp, even years.

View course details in MyPlan: PHCOL 535

PHCOL 550 An Overview of Faculty Research (1)
Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Prerequisite: first-year student standing in pharmacology. Instructors: Wang Credit/no-credit only. Offered: A.

View course details in MyPlan: PHCOL 550

PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases (1)
Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research. Prerequisite: permission of instructor. Instructors: Beavo Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: PHCOL 560

PHCOL 561 Molecular Properties of Ion Channels (1)
Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Catterall Credit/no-credit only. Offered: AWSpS.

View course details in MyPlan: PHCOL 561
PHCOL 562 Molecular Basis for Motivated Behavior (1)
Discussion of research strategies and methodologies involved in the regulation of motivated behavior by understanding signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Chavkin Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 562

PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1)
Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Storm Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 563

PHCOL 564 Cellular Regulation by Protein Kinases (1)
Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Prerequisite: permission of instructor. Instructors: McKnight Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 564

PHCOL 565 Intercellular Signaling in Development (1)
Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to Drosophila segment polarity genes. Prerequisite: permission of instructor. Instructors: Moon Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 565

PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neurokinin Receptors (1)
Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokinin receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Nathanson Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 566

PHCOL 567 Mechanisms of Carcinogenesis (2)
Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with ENV H 567; A, even years.
View course details in MyPlan: PHCOL 567

PHCOL 569 Molecular Genetics of Potassium Channel Function (1)
Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Tempel Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 569

PHCOL 571 Molecular Mechanisms of Neurosecretion (1)
Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Bajjalieh Credit/no-credit only.
View course details in MyPlan: PHCOL 571
PHCOL 572 Transcriptional Regulation of Growth Control Genes (1)
Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Wang Credit/no-credit only.
View course details in MyPlan: PHCOL 572

PHCOL 573 Signaling Systems Linked to Neuroinflammation (1)
Discussion of research strategies, methodologies, and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Stella Offered: AWSpS.
View course details in MyPlan: PHCOL 573

PHCOL 575 Structural Biology of Ubiquitination (1)
Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Zheng Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 575

PHCOL 576 Pharmacological, Molecular, and Functional Characterization of G-protein Coupled Receptors (1)
Discusses research strategies, methodologies, and literature relating to the pharmacological characterization, molecular biology, and functional coupling of GPCRs. Emphasizes practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Hague Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 576

PHCOL 577 Regulatory Roles of Ubiquitin in the Nucleus (1)
Focuses on the design and implementation of research aimed at understanding the nuclear functions of the small protein modifier ubiquitin. Strongly emphasizes the understanding of current literature, experimental design and troubleshooting, data analysis, and presentation of experimental results. Prerequisite: permission of instructor. Instructors: Gardner Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 577

PHCOL 578 A-Kinase Anchoring Proteins in Cell Signaling Research (1) Scott
Focuses on the design and implantation of research A-Kinase anchoring proteins in cell signaling. Emphasizes understanding experimental design and troubleshooting, data analysis, and presentation of experimental results. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 578

PHCOL 579 Genetic Regulation of Emotional Behavior (1) Zweifel
Provides background in the materials and methods used in the study of the genetic basis of learning and memory and neural circuit function achieved through discussion of current literature, data acquisition and analysis, and experimental design. Offered: AWSpS.
View course details in MyPlan: PHCOL 579

PHCOL 580 Proteomics for Cellular Systems (1) Ong
Discusses and reviews literature for proteomics and other genome-wide approaches to study cellular systems. Trains students to integrate knowledge form existing literature with ongoing laboratory research to enhance data analysis and experimental design. Offered: AWSpS.
View course details in MyPlan: PHCOL 580

PHCOL 600 Independent Study or Research (*)
Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 600
PHCOL 700 Master's Thesis (*-)
Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 700

PHCOL 800 Doctoral Dissertation (*-)
Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.
View course details in MyPlan: PHCOL 800

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 30, 2017
Physiology and Biophysics

Department Overview

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences anatomy, molecular biology, immunology, biochemistry, pharmacology, pathology, and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program

Graduate Program Coordinator
G424 Health Sciences, Box 357290
(206) 685-0519
pbio@uw.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a PhD degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. The department participates in interdisciplinary PhD degree programs in neurobiology and behavior and in molecular and cellular biology. The department also participates in the medical scientist training program, and the biological physics structure and design program.

Master of Science
The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of the graduate program, there are no specific prerequisites for admission. However, most students have backgrounds in the physical and/or biological sciences. These include majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

Degree Requirements

90 credits minimum, as follows:

Due to the broad nature of research interests in the department and the diversity of graduate-student backgrounds, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. Courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least six mini courses.

Required Courses:

1. CONJ 531, CONJ 532, P BIO 532, NEUBEH 501, NEUBEH 502, P BIO 508, must be taken three times); P BIO 513, P BIO 519
2. Six departmental mini-courses, to be completed prior to the general examination, from the following: P BIO 509, P BIO 545, P BIO 550, P BIO 551, P BIO 552, P BIO 553, P BIO 554, P BIO 555, P BIO 556, P BIO 557, P BIO 559.
3. P BIO 600 (before general examination)
4. P BIO 800 (after general examination)
5. Note: P BIO 503 is highly recommended, but not required

General Examination

The general examination must be taken by the last day of autumn quarter of the third year. After passing the general examination the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continues working on thesis research.

Final Examination

The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

Research Facilities
The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.
SCHOOL OF MEDICINE
PHYSIOLOGY & BIOPHYSICS

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

P BIO 498 Undergraduate Thesis (*, max. 35)
Offered: AWSpS.
View course details in MyPlan: P BIO 498

P BIO 499 Undergraduate Research (*, max. 35)
Offered: AWSpS.
View course details in MyPlan: P BIO 499

P BIO 504 Biophysics of Nerve, Muscle, and Synapse (3) Sullivan
Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with NEURO 504.
View course details in MyPlan: P BIO 504

P BIO 505 Human Physiology (4-) Binder
Provides an introduction to the study of human physiology. Covers the physiology of excitable cells, muscle physiology, renal physiology, gastrointestinal physiology, and the physiology of the central nervous system. Offered: A.
View course details in MyPlan: P BIO 505

P BIO 506 Human Physiology (4)
Provides an introduction to the study of human physiology. Covers cardiovascular physiology, respiratory physiology, acid base balance, neuroendocrinology, and reproductive physiology. Prerequisite: P BIO 505, or equivalent with permission of instructor. Instructors: Wordeman Offered: W.
View course details in MyPlan: P BIO 506

P BIO 508 Introduction to Laboratory Research in Physiology (1-5, max. 15)
Students participate in the performance of ongoing projects in designated research laboratories. Emphasis is on experimental design, methodology, and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.
View course details in MyPlan: P BIO 508
P BIO 509 Neuroendocrinology (3)
Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: BIOL 220; BIOC 442 or permission of instructor. Instructors: Steiner Offered: jointly with NEURO 541; W, even years.
View course details in MyPlan: P BIO 509

P BIO 513 Practicum in Teaching Physiology and Biophysics (4)
Students undertake instructional material development, presentation of materials, and develop problem-solving techniques. Credit/no-credit only. Offered: AW.
View course details in MyPlan: P BIO 513

P BIO 519 Membrane and Muscle Biophysics Seminar (1)
Lectures on current research topics in cell membrane function and muscle contraction. Prerequisite: permission of instructor. Instructors: Hille Credit/no-credit only. Offered: Sp.
View course details in MyPlan: P BIO 519

P BIO 520 Physiology Seminar (*)
Selected topics in physiology. Prerequisite: permission of instructor.
View course details in MyPlan: P BIO 520

P BIO 521 Biophysics Seminar (*)
Selected topics in biophysics. Prerequisite: permission of instructor.
View course details in MyPlan: P BIO 521

P BIO 522 Selected Topics in Respiratory Physiology (1-3, max. 3)
Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Instructors: Hildebrandt Offered: AWSpS.
View course details in MyPlan: P BIO 522

P BIO 523 Heat Transfer and Temperature Regulation (2-5, max. 5)
Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy. Prerequisite: permission of instructor. Instructors: Brengelmann Credit/no-credit only.
View course details in MyPlan: P BIO 523

P BIO 525 Readings in Advanced Physiology and Biophysics (*)
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.
View course details in MyPlan: P BIO 525

P BIO 526 Readings in Advanced Physiology and Biophysics (*)
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.
View course details in MyPlan: P BIO 526

P BIO 527 Readings in Advanced Physiology and Biophysics (*)
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: SpS.
View course details in MyPlan: P BIO 527
P BIO 540 Molecular Mechanisms of Cardiac Remodeling and Heart Failure (1)
The mini-course discusses recent progress on novel molecular mechanisms underlying cardiac hypertrophy, myocardial remodeling, and heart failure development. Novel methodologies in basic and translational cardiovascular research will also be discussed.
View course details in MyPlan: P BIO 540

P BIO 545 Quantitative Methods in Neuroscience (3)
Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Instructors: Rieke Offered: jointly with NEURO 545.
View course details in MyPlan: P BIO 545

P BIO 548 Molecular Mechanisms of Synaptic Plasticity (2) Barria
Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with NEURO 548; Sp, even years.
View course details in MyPlan: P BIO 548

P BIO 550 Biophysics of Calcium Signaling (1)
Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Instructors: Hille, Santana Offered: jointly with NEURO 550; Sp, odd years.
View course details in MyPlan: P BIO 550

P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter
Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEURO 554.
View course details in MyPlan: P BIO 554

P BIO 555 Sensory Receptors (1) Detwiler, Rieke
Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEURO 555.
View course details in MyPlan: P BIO 555

P BIO 556 Axon Pathfinding Mechanisms (1) Bothwell
Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEURO 556.
View course details in MyPlan: P BIO 556

P BIO 557 Ion Channel Gating (1) Zagotta
Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEURO 557.
View course details in MyPlan: P BIO 557

P BIO 558 Concepts and Mechanisms in Mitosis (2) Asbury, Wordeman
Examines how the mitotic spindle organizes and separates duplicated chromosomes during cell division. Overview of spindle components and key mechanistic concepts. Discusses recent or classic papers from the primary literature.
View course details in MyPlan: P BIO 558
**P BIO 559 Neurobiology of Disease (3)**
Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/NEURO 559.
View course details in MyPlan: P BIO 559

**P BIO 561 From Biophysics to Neural Computation (2)**
Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with NEURO 561; Sp.
View course details in MyPlan: P BIO 561

University of Washington Course Descriptions
gencat@u.washington.edu
Modified: May 30, 2017
Psychiatry and Behavioral Sciences

Department Overview

BB1644 Health Sciences

pbsci@uw.edu

The department offers coursework, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

Graduate Program

The Medical School curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

Residency Training in Psychiatry

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liaison services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liaison psychiatry, and psychiatric neuroscience are available.
Clinical Psychology Internship Program

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research skills training is also available as part of an INH-funded training grant for selected internship participants.

Postdoctoral Fellowship Training

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.
SCHOOL OF MEDICINE
PSYCHIATRY & BEHAVIORAL SCIENCES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

**PBSCI 498 Undergraduate Thesis (*, max. 15)**
Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research. Offered: AWSpS.
[View course details in MyPlan: PBSCI 498](#)

**PBSCI 499 Undergraduate Research (*, max. 15)**
Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor. Offered: AWSpS.
[View course details in MyPlan: PBSCI 499](#)

**PBSCI 505 P-Psychiatry Preceptorship (1, max. 12)**
Opportunity for first- and second-year medical students to gain direct experience with clinical faculty members in psychiatry. Includes opportunities to observe different areas of psychiatry including addiction, child, geriatrics, community, crisis, and consultation. Prerequisite: permission of department. Instructors: Combs
Offered: AWSp.
[View course details in MyPlan: PBSCI 505](#)

**PBSCI 525 P-Psychiatry and the Law (3)**  
_E. GOLDENBERG, J. PIEL_
Explores issues at the interface of law and psychiatry through didactic curriculum and research. Trainees develop an individualized research project with the assistance of their faculty mentors. Covers topics in civil and criminal forensic psychiatry, research ethics, research design, grantsmanship, and mental health law. Offered: Sp.
[View course details in MyPlan: PBSCI 525](#)

**PBSCI 546 Psychiatric Epidemiology (3)**  
_A. VANDER STOEP_
Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with EPI 546.
[View course details in MyPlan: PBSCI 546](#)
PBSCI 580 Applied Research in Behavioral Health and Justice Policy (2)
Direct experience working with community agencies to build research capacity. Emphasized child welfare, children's mental/behavioral health, and juvenile justice. Seminars cover translational research, community-based research, and communicating research to program and policy audiences. For graduate students, psychiatric residents, and graduate psychology, psychosocial nursing, social work, and public health students. Offered: AW.

View course details in MyPlan: PBSCI 580

PBSCI 598 P-Psychiatry Independent Study and Remediation (*, max. 8)
Designed for medical students required to complete additional study related to the required Psychiatry Clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

View course details in MyPlan: PBSCI 598

PBSCI 600 Research in Psychiatry ([1-15]-)
Independent laboratory research under the guidance and supervision of research scientists in the Psychiatry Department. Faculty permission required.

View course details in MyPlan: PBSCI 600

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, max. 24)
Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

View course details in MyPlan: PBSCI 630

PBSCI 631 P-Basic Psychiatry Clerkship - Juneau, AK (12)
Basic psychiatry clerkship in Juneau, Alaska. Fulfills graduation requirements for clerkship in psychiatry.

View course details in MyPlan: PBSCI 631

PBSCI 632 P-LIC Psychiatry Clinical Clerkship (1-12, max. 12)
Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

View course details in MyPlan: PBSCI 632

PBSCI 637 P-Basic Psychiatry Clerkship - Fairfax - Kirkland, WA (12)
Basic psychiatry clerkship in Kirkland, Washington. Fulfills graduation requirements for clerkship in psychiatry.

View course details in MyPlan: PBSCI 637

PBSCI 639 P-Basic Psychiatry Clerkship - Olympia (12)
Basic psychiatry clerkship at Olympia, WA. Fulfills graduation requirement for clerkship in psychiatry.

View course details in MyPlan: PBSCI 639

PBSCI 640 P-Basic Psychiatry Clerkship - Pocatello (12)
Basic psychiatry clerkship at in Pocatello, ID. Fulfills graduation requirement for clerkship in psychiatry.

View course details in MyPlan: PBSCI 640

PBSCI 641 P-Basic Psychiatry Clerkship - Orofino, ID (12)
Basic psychiatry clerkship in Orofino, ID. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWSpS.

View course details in MyPlan: PBSCI 641

PBSCI 649 P-Basic Psychiatry Clerkship-Eastern State Hospital-Spokane (12)
Basic psychiatry clerkship at Eastern State Hospital in Spokane, WA. Fulfills graduation requirement for clerkship in Psychiatry. Offered: AWSpS.

View course details in MyPlan: PBSCI 649

PBSCI 655 P-Basic Psychiatry Clerkship - Cheyenne (12)
Basic psychiatry clerkship in Cheyenne, WY. Fulfills graduation requirement for clerkship in psychiatry.

http://www.washington.edu/students/crs-cat/psychbehav.html
PBSCI 660 P-Basis Psychiatry Clerkship-Bozeman (12)
Basic psychiatry clerkship in Bozeman, MT. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWSpS.
View course details in MyPlan: PBSCI 660

PBSCI 661 P-Basic Psychiatry Clerkship - Helena (12)
Basic psychiatry clerkship in Helena, MT. Fulfills graduation requirement for clerkship in psychiatry.
View course details in MyPlan: PBSCI 661

PBSCI 662 P- Basic Psychiatry Clerkship - Missoula (12)
Students work at St. Patrick Hospital with adult and adolescent inpatients and in the emergency room for emergent-care exposure. Students have outpatient experience through the adult intensive outpatient program, Pain Treatment Center, and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.
View course details in MyPlan: PBSCI 662

PBSCI 663 P- Basic Psychiatry Clerkship - Billings (12)
Students work at South Center Regional Mental Health Center and Behavioral Sciences Clinic with adult and adolescent inpatients, in the emergency room for emergent care exposure. Outpatient experience including consultations at the community mental health center, Indian reservation, and prison. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. A vehicle is needed by students at this site. Prerequisite: completion of the HUBIO series; third and fourth year students.
View course details in MyPlan: PBSCI 663

PBSCI 665 P-Basic Clinical Clerkship (*, max. 24)
Inpatient clerkship in psychiatry. Students have primary responsibility under direction of attending psychiatrists and residents for diagnosis and care of patients at UW Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)
View course details in MyPlan: PBSCI 665

PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12)
Rotation aims to increase student's skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of white, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and community settings. Third-, fourth-year medical students. (Limit: Two or three students). Prerequisite: HUBIO 563.
View course details in MyPlan: PBSCI 666

PBSCI 667 P-Basic Psychiatry Clerkship - Boise (12)
Basic psychiatry clerkship at Veterans' Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in psychiatry.
View course details in MyPlan: PBSCI 667

PBSCI 668 P-Psychiatry Clerkship - Spokane (12)
Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. (Limit: two or three students). Prerequisite: completion of HUBIO series; third and fourth-year medical students.
View course details in MyPlan: PBSCI 668
PBSCI 669 P-Basic Psychiatry Clerkship - Casper, Wyoming (12)
Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.
View course details in MyPlan: PBSCI 669

PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry - UWMC (*, max. 24)
Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; two or four weeks.) Prerequisite: satisfactory completion of required psychiatry clerkship.
View course details in MyPlan: PBSCI 670

PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry - HMC (*, max. 24)
Students receive organized instruction and supervised clinical experience in the evaluation of psychiatric and/or behavioral problems in patients on medical and surgical services, and in effectively consulting with their health care providers regarding their clinical management. Includes evaluation of (non-financial) decisional competency. (Limit: two students). Prerequisite: satisfactory completion of required psychiatry clerkship.
View course details in MyPlan: PBSCI 671

PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry - Boise, VAMC (8/12)
Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: satisfactory completion of required psychiatry clerkship (Four weeks; visiting students interested in the Boise Psych Residency Track allowed.)
View course details in MyPlan: PBSCI 672

PBSCI 673 P-Outpatient Psychiatry Elective (*, max. 24)
Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. (Four to six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.
View course details in MyPlan: PBSCI 673

PBSCI 674 P-Elective in Therapeutic Communication (4) J. CARR, H. COMBS
Students participate in diverse, interdisciplinary clinical encounters while being supervised by advanced psychotherapists. Includes multidisciplinary chemical dependency evaluations, cognitive assessments, cognitive-behavioral training, and hypnosis. Students complete a holistic patient assessment and are introduced to the complexities of therapeutic communication and improvement methods.
View course details in MyPlan: PBSCI 674

PBSCI 676 P-Inpatient Clerkship in Psychiatry - American Lake VA (8/12)
For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship. Instructors: Johnston
View course details in MyPlan: PBSCI 676

PBSCI 677 P-Alcohol and Drug Treatment Clerkship - American Lake VA (8/12)
Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: satisfactory completion of required psychiatry clerkship. (Four or six
weeks, full-time). Instructors: Lim
View course details in MyPlan: PBSCI 677

PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (*, max. 12)
Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; satisfactory completion of required psychiatry clerkship. Instructors: Johnston
View course details in MyPlan: PBSCI 678

PBSCI 680 P-Clerkship in Emergency Psychiatry (*, max. 24)
Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only.
(Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship. Instructors: Pasic
View course details in MyPlan: PBSCI 680

PBSCI 682 P-Addiction Medicine - Rock Spring WY (4)
Students identify, assess, diagnose, and treat addiction disorders in inpatient and outpatient settings through hospital rounds, inpatient hospital consults, and observation of intensive outpatient groups. 2 weeks.
View course details in MyPlan: PBSCI 682

PBSCI 685 P-Geriatric Psychiatry Clerkship (*, max. 12)
Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: satisfactory completion of required psychiatry clerkship, vehicle required for this rotation.
View course details in MyPlan: PBSCI 685

PBSCI 688 P-Subinternship in General Psychiatry (*, max. 16)
Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship; permission of instructor.
View course details in MyPlan: PBSCI 688

PBSCI 695 P-Advanced Clerkship in Child Psychiatry - CSTC (*, max. 24)
Provides an opportunity to participate in evaluation and treatment of children and adolescents in Lakewood, WA. Prerequisite: satisfactory completion of required psychiatry clerkship; fourth year medical student status. 2/4/6 weeks.
View course details in MyPlan: PBSCI 695

PBSCI 696 P-Advanced Clerkship in Child Psychiatry (*, max. 24)
Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. (Four or six weeks, full-time. Limit: one student). Prerequisite: satisfactory completion of required psychiatry clerkship.
View course details in MyPlan: PBSCI 696

PBSCI 697 P-Psychiatry Special Electives (*, max. 24)
By special arrangement, clerkships, externships, and research opportunities can be taken at other institutions. Students obtain permission from Dr. Combs before contacting the dean's office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in
psychiatry.
View course details in MyPlan: PBSCI 697

PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.
View course details in MyPlan: PBSCI 699

Radiation Oncology

Display as tabs

Department Overview

NN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work, particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

SCHOOL OF MEDICINE
RADIATION ONCOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

R ONC 499 Undergraduate Research (*, max. 24) Phillips, Schwartz, Wilbur
Opportunities in clinical or laboratory investigation in radiation oncology, radiation physics, or computer-related research. Student participation in ongoing or new projects. Open to students in the biological or physical sciences.
View course details in MyPlan: R ONC 499

R ONC 505 P-Radiation Oncology Preceptorship (1, max. 12) Kane, Kelly, Kim, Koh, Laramore, Liao, Patel, Rockhill, Russell
Students choose either to follow an attending physician through all aspects of radiation oncology including consults, follow-up, and treatment planning; or to follow a small cohort of patients throughout their treatment course to learn about the experience of a cancer patient undergoing treatment for life-threatening disease. Credit/no-credit only.
View course details in MyPlan: R ONC 505

R ONC 600 Independent Study or Research (*)
Prerequisite: permission of department and faculty sponsor. Offered: AWSpS.
View course details in MyPlan: R ONC 600

R ONC 694 P-Clinical Cancer Management - SCCA (*, max. 8)
Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.
View course details in MyPlan: R ONC 694

R ONC 695 P-Clinical Cancer Management - UWMC (*, max. 8)
Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of
instructor. Instructors: Kane

View course details in MyPlan: R ONC 695

**R ONC 697 P-Radiation Oncology Special Elective (*, max. 24)**
By specific arrangement for qualified students, special clerkship, externship, or research opportunities are made available at institutions other than the University of Washington. Students obtain a "special assignment" form from the dean's office at least one month before advance registration. Prerequisite: permission of instructor. Instructors: Kane

View course details in MyPlan: R ONC 697

**R ONC 699 P-WWAMI Radiation Oncology Special Electives (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships may be available at institutions located within the WWAMI region, other than the University of Washington. Prerequisite: permission of department. Instructors: Kane

Radiology

Display as tabs

Department Overview

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.
SCHOOL OF MEDICINE
RADIOLOGY

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

RADGY 498 Undergraduate Thesis (*, max. 30)
Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.
View course details in MyPlan: RADGY 498

RADGY 499 Undergraduate Research (*, max. 35)
Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.
View course details in MyPlan: RADGY 499

RADGY 505 P-Preceptorship in Radiology (1-, max. 24)
Opportunity for medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of diagnostic radiology, interventional radiology, or nuclear medicine, including clinical problems, the different relationships in clinic between physician and patient, and research aspects of the department. Prerequisite: permission of instructor. Offered: AWSpS.
View course details in MyPlan: RADGY 505

RADGY 508 Physical Aspects of Medical Imaging (4)
Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound, and Doppler ultrasound.
View course details in MyPlan: RADGY 508

RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5)
Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. Discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.
View course details in MyPlan: RADGY 580

RADGY 600 Independent Study or Research (*-)
Prerequisite: permission faculty sponsor. Offered: AWSpS.
View course details in MyPlan: RADGY 600
RADGY 686 P-Introduction to Diagnostic Radiology - Idaho Falls (4)
Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.
View course details in MyPlan: RADGY 686

RADGY 687 P-Introduction to Diagnostic Radiology - Casper (4)
Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSps.
View course details in MyPlan: RADGY 687

RADGY 688 P-Introduction to Diagnostic Radiology - Boise (4)
View course details in MyPlan: RADGY 688

RADGY 689 P-Introduction to Diagnostic Radiology - Billings (4)
Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSps.
View course details in MyPlan: RADGY 689

RADGY 690 P-Introduction to Diagnostic Radiology - Nampa (4)
Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSps.
View course details in MyPlan: RADGY 690

RADGY 691 P-Introduction to Diagnostic Radiology - Alaska (4)
Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSps.
View course details in MyPlan: RADGY 691

RADGY 692 P-Introduction to Diagnostic Radiology - Spokane (4)
Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSps.
View course details in MyPlan: RADGY 692

RADGY 694 P-Advanced Radiology Clerkship (8) G. REDDY
Clerkship for third- or fourth-year medical students providing a more in depth experience in diagnostic or interventional radiology. Prerequisite: RADGY 695. Offered: AWSps.
View course details in MyPlan: RADGY 694

RADGY 695 P-Radiology Elective Clerkship (*, max. 8)
Clinical rotations for third- or fourth-year medical students in one to four subspecialty areas of radiology at University of Washington and affiliated hospitals for those who have not previously completed a radiology clerkship. Offered: AWSps.
View course details in MyPlan: RADGY 695

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12)
Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching
conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.

View course details in MyPlan: RADGY 696

**RADGY 697 P-Radiology Special Electives (*, max. 24)**
Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.

View course details in MyPlan: RADGY 697

**RADGY 699 P-WWAMI Radiology Special Electives (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

View course details in MyPlan: RADGY 699
Rehabilitation Medicine

Department Overview

BB928 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, Master of Prosthetics and Orthotics, and a PhD in rehabilitation science.

Occupational Therapy

Head
Janet M. Powell

The profession of occupational therapy appeals to people who enjoy thinking creatively and flexibly to solve problems, and who want to help people with disabilities perform activities important in their daily lives. Occupational therapists provide services related to occupational performance (activities) in everyday life in the areas of self-care, work, education, or play and leisure. They work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies to enhance health and well-being; and with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations live as productive and as high quality of life as life as possible. Services focus on increasing independence, enhancing development, providing compensatory strategies, and minimizing or preventing disability. Therapists adapt activities and environments, select therapy activities meaningful to clients, and provide client, family, and caregiver education. For example, an occupational therapist may teach adaptive dressing techniques to a client who has lost use of a hand following a stroke, help a child with autism interact with peers, or modify a computer for a young adult with a spinal cord injury returning to work.
Today's occupational therapists practice in rehabilitation centers, outpatient rehabilitation clinics, schools, hospitals, mental health facilities, private practice, skilled nursing facilities, home healthcare, and community health programs. The most common work settings for occupational therapists are school systems, hospitals, and long-term care facilities. The current and future job outlook for occupational therapists is excellent. The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) located at 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449. ACOTE's telephone number, c/o AOTA, is (301) 652-2682 and its web address is www.acoteonline.org. Standards comply with the U.S. Department of Education criteria for recognition of accrediting agencies. Graduates of the program are eligible to sit for the national certification examination for occupational therapists. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for development and implementation of this examination. All states currently require state licensure in order to practice.

**Master of Occupational Therapy**

**Admission Requirements**

1. Bachelor's degree in any major and Graduate Record Examination (GRE) taken within the past five years. Seven prerequisite courses as shown below. Volunteer or work experience in at least two practice areas of occupational therapy. Admission is once a year for entry autumn quarter; applications are due December 15.

2. Specific prerequisite courses at the UW. (Students who have attended schools other than the UW must take comparable courses.)
   a. *Natural Sciences:* BIOL 118; B STR 301; CHEM 120; EDPSY 490
   b. *Social Sciences:* PSYCH 305; PSYCH 306; SOC 110 or ANTH 202

3. *Requirements to Apply:* Completion of five prerequisite courses, including three courses in the natural sciences; 3.00 minimum GPA in prerequisite courses with no single course graded less than 2.7. Applicants must have a cumulative college-level grade point average of at least a 3.00 (B) to be considered for admission. This includes all baccalaureate and post-baccalaureate courses. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information are available by consulting the program's website at rehab.washington.edu/education/degree/ot, by emailing ot@uw.edu, or by calling (206) 598-5764.

**Degree Requirements**

*Courses:* To be completed in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 510, REHAB 520, REHAB 522, REHAB 533, REHAB 541, REHAB 542, REHAB 543, REHAB 544, REHAB 545, REHAB 548, REHAB 551, REHAB 564, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 591, and REHAB 594.

*GPA Requirement:* cumulative 3.00 GPA in all required professional coursework to retain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's website at rehab.washington.edu/education/degree/ot/.
Continuation Policy: If at any point the OT curriculum cumulative GPA falls below 3.00, the student is placed on academic probation and must raise the GPA to 3.00 by the end of two subsequent quarters. Students unable to remove their probation status are subject to dismissal from the program. If a student receives a grade below 2.7 in a required course, continuation in the program is reviewed and determined by the Occupational Therapy Advisory and Evaluation Committee.

Fieldwork Placement: The student must satisfactorily complete all academic coursework before taking the two required Level II Fieldwork placements (REHAB 594). Both fieldwork placements must be satisfactorily completed within 24 months following completion of the academic portion of the program in order to graduate.

For more information on the Master of Occupational Therapy program, visit the department's website at rehab.washington.edu/education/degree/ot/.

Physical Therapy

Interim Head
Sarah Westcot McCoy

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular conditions.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is rebuilding self-confidence and creating a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality healthcare is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Intervention procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and assisted ambulation training.
As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formal mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education. For complete program details visit rehab.washington.edu/education/degree/pt.

**Doctor of Physical Therapy**

**Admission Requirements**

1. Enrollment is limited to 44 students each year and admission is competitive.

2. Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.

3. Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).

4. Prior to the application deadline of December 15, the student must have met the following academic requirements:
   a. Minimum 3.00 GPA on all college-level courses
   b. Minimum 3.00 GPA on PT prerequisite courses
   c. Minimum 2.0 (C) grade on each PT prerequisite course
   d. Half (50%) of PT prerequisite courses completed.
      For a list of PT prerequisite course descriptions, see the program Website at depts.washington.edu/rehab/pt/eligibility.asp#prereq

5. Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.

6. Most clinical internship placement sites require potential trainees to undergo a criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore are able to finish the clinical portion of the curriculum, the completion of a criminal background check process is required of applicants accepting admission.

**Degree Requirements**

157 credits, as follows:

1. **Year One**
   a. *Autumn Quarter*: REHAB 504, REHAB 509, REHAB 517, REHAB 521, REHAB 522, REHAB 541, REHAB 544
   b. *Winter Quarter*: REHAB 506, REHAB 517, REHAB 533, REHAB 542, REHAB 545, REHAB 551
   c. *Spring Quarter*: REHAB 507, REHAB 517, REHAB 525, REHAB 533, REHAB 536, REHAB 543, REHAB 548
   d. *Summer Quarter*: REHAB 500, REHAB 508, REHAB 517, REHAB 537, REHAB 538, REHAB 540
### Prosthetics and Orthotics

**Division Director**  
Ann Yamane

The prosthettist-orthotist is a member of the rehabilitation healthcare team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. The interdisciplinary rehab team works with physically challenged individuals to increase their functional abilities, enhance their daily life, and help them to participate in activities they enjoy.

Certified Prosthetists Orthotists (CPOs) provide direct patient care and management. CPOs work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. Prostheses replace or substitute for a missing limb or part of a limb, and orthoses help with the control of motion and the support of a weakened body segment. Before designing a specific device, the prosthettist-orthotist examines a patient to find any conditions that might affect the future success of that device. Following the evaluation, the prosthettist-orthotist obtains an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthettist-orthotist assesses the fit and function of the device and follows up with the patient, as necessary. To evaluate the fit and function, the prosthettist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength, human locomotion, material science, and the human-device interaction.

**Graduate Program Coordinator**  
BB808 Health Sciences Center  
(206) 543-6763  
pando96@uw.edu

The prosthetics and orthotics division offers the following program of study:

- The Master of Prosthetics and Orthotics degree

**Master of Prosthetics and Orthotics**

**Admission Requirements**

---

2. **Year Two**
   a. *Autumn Quarter:* REHAB 510, REHAB 511, REHAB 523, REHAB 547, REHAB 566  
   b. *Winter Quarter:* REHAB 502, REHAB 512, REHAB 527, REHAB 529  
   c. *Spring Quarter:* REHAB 502, REHAB 503, REHAB 531, REHAB 566, REHAB 569  
   d. *Summer Quarter:* REHAB 505, REHAB 514, REHAB 535, REHAB 515, REHAB 567, REHAB 801

3. **Year Three**
   a. *Autumn Quarter:* REHAB 595, REHAB 801  
   b. *Winter Quarter:* REHAB 595, REHAB 801  
   c. *Spring Quarter:* REHAB 595, REHAB 801

---

http://www.washington.edu/students/gencat/academic/rehab.html
1. Bachelor's degree in any major from a regionally accredited U.S. college or university
2. Minimum 3.00 cumulative GPA
3. Prior to the start of the program, all prerequisites must be completed, including one course each in the areas of biology* (or other life science), statistics, and chemistry*; a two-course series in the areas of (1) anatomy and physiology and (2) physics*, and two courses in psychology (to include a general psychology course as well as either a developmental or abnormal psychology course). Laboratories must be taken with courses marked with an asterisk*.
4. Minimum 3.00 cumulative prerequisite GPA. No single course graded less than 2.0. Grades lower than 2.0 are not accepted.
5. GRE general test scores. Test must be taken within the past five years.
6. Volunteer or work experience in a prosthetics-orthotics clinic is strongly encouraged
7. Admission is competitive based on scholastic achievement, written skills, references, and involvement in activities or experiences related to the health professions.
8. Admission occurs once a year for entry autumn quarter; applications are evaluated starting December 15.
9. International applicants must meet several requirements in addition to those required of U.S. applicants to be admitted to the UW Graduate School. Consult the FAQs on the UW Graduate School website for more information.

See program [website](http://www.washington.edu/students/gencat/academic/rehab.html) for complete details on admissions requirements.

**Degree Requirements**

112 credits as follows:

1. **Courses:** To be satisfactorily completed in a specific sequence beginning autumn quarter of entry year, and only at the UW: REHAB 522, REHAB 544, REHAB 541, REHAB 504, REHAB 509, RHB PO 511, RHB PO 501, REHAB 533, REHAB 545, REHAB 542, REHAB 551, REHAB 506, RHB PO 515, REHAB 548, REHAB 543, RHB PO 512, RHB PO 581, RHB PO 541, RHB PO 502, RHB PO 521, RHB PO 522, RHB PO 523, REHAB 580, RHB PO 561, REHAB 510, RHB PO 524, RHB PO 525, RHB PO 526, RHB PO 527, RHB PO 581, RHB PO 582, RHB PO 562, RHB PO 528, RHB PO 529, RHB PO 583, RHB PO 563, RHB PO 530, RHB PO 531, RHB PO 534, RHB PO 558, RHB PO 584, RHB PO 564.

2. **Grade Requirements:** A student must maintain a minimum 3.00 cumulative program GPA, and receive "credit" grades in all courses graded credit/no credit only, to maintain good standing in the program and be eligible for graduation.

3. **Continuation Policy:** If at any point the cumulative GPA in the curriculum courses falls below 2.70, the student is placed on academic probation. In order to be removed from probation, the student must achieve a cumulative GPA of 3.00 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program.

**Post-Professional Programs**

http://www.washington.edu/students/gencat/academic/rehab.html
Doctor of Philosophy in Rehabilitation Science

Director
Deborah Kartin

Rehabilitation science is an interdisciplinary field that focuses on human function and disability. Basic and applied research from health sciences, social sciences, engineering, and related fields is directed toward (1) enhancing physical and psychosocial functioning, participation in life situations, and quality of life for people with disabilities; and (2) informing relevant social and healthcare policy.

The program targets students from diverse backgrounds in rehabilitation-related fields including occupational therapy, physical therapy, speech and language pathology, rehabilitation counseling, medicine, nursing, prosthetics and orthotics, and engineering.

The goal of the PhD program in rehabilitation science is to prepare future researchers, educators, and leaders in the area of rehabilitation science. Graduates contribute to the field of rehabilitation science, working in settings such as academic and research institutions, service delivery systems (e.g., hospitals, public schools), government agencies, and the private sector. These individuals are prepared to address research, education, service delivery, and policy issues from an interdisciplinary perspective.

1. Demonstrate advanced knowledge and productivity in rehabilitation science specific to research, education, service delivery, and/or policy.
2. Demonstrate leadership in interdisciplinary collaboration for the purpose of optimizing research, education, service delivery, and/or policy.
3. Generate and extend knowledge that is innovative and rigorously tested within a focused area of rehabilitation science.

Admission Requirements

1. Baccalaureate degree from a college or university of recognized rank
2. Copy of current professional certification/licensure to practice (as appropriate)
3. Letters of recommendation from three persons knowledgeable about the individual's potential for doctoral-level work in rehabilitation science
4. Letter of application
5. Resume/CV
6. Official university transcripts
7. Official Graduate Record Examination (GRE) General Test Scores

Degree Requirements

100 credits minimum, as follows:

Core course series (21 credits): coursework and practicum experiences in teaching (minimum 5 credits), and coursework in statistics and research methods (minimum 18 credits). In addition, each student must complete three cognates (minimum 6 credits each) specific to the student's goals. The student's committee and the core faculty in the rehabilitation science doctoral program must approve the entire course of study.
General requirements: In addition to meeting all requirements of the UW Graduate School, all students are expected to meet the following general requirements.

1. Minimum 3.00 cumulative and quarterly GPA.
2. 100 credits minimum, of which 27 are dissertation credits.
3. Completion of at least one teaching practicum (3-credit minimum).
4. Satisfactory completion of a research and scientific inquiry day manuscript and presentation.
5. Satisfactory completion of general examinations.
7. Final examination.

For more information on the PhD program in rehabilitation science, visit the program's website at rehab.washington.edu/education/degree/rehabsci/.
SCHOOL OF MEDICINE
REHABILITATION MEDICINE

Detailed course offerings (Time Schedule) are available for

- Spring Quarter 2017
- Summer Quarter 2017
- Autumn Quarter 2017

REHAB 300 Introduction to Occupational Therapy (1)
Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no-credit only.
View course details in MyPlan: REHAB 300

REHAB 496 Special Topics in Rehabilitation (1-9, max. 14)
Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.
View course details in MyPlan: REHAB 496

REHAB 498 Undergraduate Thesis (*, max. 15)
View course details in MyPlan: REHAB 498

REHAB 499 Undergraduate Research (*, max. 15)
Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bioengineering.
View course details in MyPlan: REHAB 499

REHAB 500 Clinical Clerkship in Physical Therapy (4) Robinson
Observation, instruction, and supervised practice in treatment of patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no-credit only.
View course details in MyPlan: REHAB 500

REHAB 502 Pediatric Physical Therapy (4-, max. 8) C. KERFELD
Provides foundational knowledge in development and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement models.
View course details in MyPlan: REHAB 502
REHAB 503 Lifespan III: Geriatric Physical Therapy (3) Matsuda
