MUSIC 202 First-Year Theory II (3) VLPA Continued instruction in tonal harmony and counterpoint; triadic progressions with inversions; third and fourth species counterpoint; further analysis of basic forms. Prerequisite: minimum grade of 2.0 in MUSIC 201. Instructors: Bernard, Durand, Hodge
Offered: Sp.

MUSIC 203 First-Year Theory III (3) VLPA Further introduction in tonal harmony and counterpoint; seventh chords; modulations to closely related keys; secondary dominants; introduction to chromaticism; emphasis on analysis and writing of four-part chorales in early eighteenth-century style. Prerequisite: minimum grade of 2.0 in MUSIC 202. Instructors: Bernard, Durand, Hodge
Offered: A.

MUSIC 204 First-Year Ear Training I (0-1, max. 1) VLPA Core ear-training sequence for majors. Prerequisite: minimum grade of 2.0 in MUSIC 113; corequisite: MUSIC 201. Instructors: Bernard, Durand, Hodge
Offered: W.

MUSIC 205 First-Year Ear Training II (0-1, max. 1) VLPA Core ear-training sequence for majors. Prerequisite: minimum grade of 2.0 in MUSIC 204; corequisite: MUSIC 202. Instructors: Bernard, Durand, Hodge
Offered: Sp.

MUSIC 206 First-Year Ear Training III (0-1, max. 1) VLPA Core ear-training sequence for majors. Prerequisite: minimum grade of 2.0 in MUSIC 205; corequisite: MUSIC 203. Instructors: Bernard, Durand, Hodge
Offered: AWSp.

MUSIC 216 Introductory Composition (2) VLPA For students not majoring in composition. Prerequisite: Music 119, Music 120.

MUSIC 217 Introductory Composition (2) VLPA For students not majoring in composition. Prerequisite: MUSIC 216.

MUSIC 218 Introductory Composition (2) VLPA For students not majoring in composition. Prerequisite: MUSIC 217.

MUSIC 240 Reed-Making Techniques (1, max. 6) VLPA Applies basic reed-making principles and techniques. Individualized instruction allows students of all levels to take the course simultaneously.

MUSIC 250 World Music (3) VLPA/I&S, DIV Introduction to world musical traditions, including both sound and socio-cultural dimensions of music. Topics include instruments, rhythm, melody, form, composition, improvisation, music in the family and community, politics, economy, religion, and case studies of major world musical traditions. Prerequisite: MUSIC 201; MUSIC 204.

MUSIC 251 Music Cultures of the World: the Americas (5) VLPA/I&S Music of the Americas.

MUSIC 252 Music Cultures of the World (5) VLPA/I&S Near East, Central Asia, Far East, South and Southeast Asia, Indonesia, and the Philippines. Content varies.

MUSIC 260 Orchestral Music (5) VLPA Orchestral music from its beginnings in the seventeenth century through recent developments; evolution of the symphony.

MUSIC 261 Mozart (5) VLPA Introduction to Mozart's music and to musical life in Habsburg Austria during the Enlightenment. Mozart's musical personality studied through masterpieces in all genres, with principal emphasis on listening. Ability to read music not required.

MUSIC 262 Introduction to Twentieth-Century Music (3) VLPA Starr Listener's survey of important composers and trends from Debussy through electronic music.

MUSIC 263 Opera (5) VLPA Rumph Contributions of music, text, and staging; study of representative works concentrating on problems of combining these elements into a composite work of art.

MUSIC 264 Sacred Music in the European Tradition (5) VLPA Surveys European and American sacred music from the twelfth to twentieth centuries, examining the important role of music in religious worship. Considers the means composers used to make musical works sound the way they do to convey the messages of the texts through music. Offered: jointly with RELIG 264.

MUSIC 270 World Popular Music (5) VLPA/I&S A global survey of popular music, including Latin America, Africa, Eastern Europe, the Middle East, Asia, and the Pacific. Emphasis on students' ability to recognize styles and to analyze the social and historical processes that have shaped them.

MUSIC 291 Composition (3, max. 9) VLPA One-hour private instruction and one-hour laboratory session per week. Prerequisite: MUSIC 191.

MUSIC 300 Fundamentals of Music Technology (3) VLPA Introduction to the principles of music technology. Exploration of different categories of music software, in terms of their

functionality as well as the fundamental basis of these theories. Prerequisite: MUSIC 203; MUSIC 206.

MUSIC 301 Second-Year Theory (3) VLPA Further study of modulation and chromatic harmony; analysis of eighteenth- and nineteenth-century short forms; technical exercises; model composition. Prerequisite: minimum grade of 2.0 in both MUSIC 203 and MUSIC 206. Instructors: Bernard, Durand, Hodge Offered: W.

MUSIC 302 Second-Year Theory (3) VLPA More advanced study in mid- to late nineteenth-century chromaticism and compositional style; analysis of representative works; technical exercises; model composition. Prerequisite: minimum grade of 2.0 in both MUSIC 301 and MUSIC 304; corequisite: MUSIC 305. Instructors: Bernard, Durand, Hodge Offered: Sp.

MUSIC 303 Second-Year Theory (3) VLPA Core theory sequence for majors. Introduction to the theory and analysis of twentieth-century music. Prerequisite: minimum grade of 2.0 in both MUSIC 302 and MUSIC 305; corequisite: MUSIC 306. Instructors: Bernard, Durand, Hodge Offered: A.

MUSIC 304 Second-Year Ear-Training I (0-1, max. 1) VLPA Core ear-training sequence for majors. Prerequisite: minimum grade of 2.0 in both MUSIC 203 and MUSIC 206. Instructors: Bernard, Durand, Hodge Offered: W.

MUSIC 305 Second-Year Ear-Training II (0-1, max. 1) VLPA Core ear-training sequence for majors. Prerequisite: minimum grade of 2.0 in both MUSIC 301 and MUSIC 304; corequisite: MUSIC 302. Instructors: Bernard, Durand, Hodge Offered: Sp.

MUSIC 306 Second-Year Ear-Training III (0-1, max. 1) VLPA Core ear-training sequence for majors. Prerequisite: minimum grade of 2.0 in both MUSIC 302 and MUSIC 305; corequisite: MUSIC 303. Instructors: Bernard, Durand, Hodge Offered: A.

MUSIC 307 Diction for Singers (2) VLPA Application of basic rules of diction, enunciation, and articulation in Italian. Materials include texts from the basic vocal repertoire. Primarily for voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 308 Diction for Singers (2) VLPA Application of basic rules of diction, enunciation, and articulation in French. Materials include texts from the basic vocal repertoire. Primarily for voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 309 Diction for Singers (2) VLPA Application of basic rules of diction, enunciation, and articulation in German. Materials include texts from the basic vocal repertoire. Primarily for voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 318 Music Cultures of the World (5) VLPA/I&S Folk and popular music in Western and Eastern Europe and the Americas. Content varies.

MUSIC 319 Afro-American Music (5) VLPA/I&S Centers on Black music in the United States, but also clarifies the relationship of this music to the musics of other Afro-American cultures as well as to their African roots.

MUSIC 325 Music in Cinema (5) VLPA/I&S *Hodge* Surveys representative film soundtracks from the past one hundred years. Examines the role of music and sound design within cinematic narrative form; explores theories of film music; and lays the groundwork for engaging film as a multimedia.

MUSIC 326 Repertoire (2) VLPA For music majors.

MUSIC 327 Repertoire (2) VLPA For music majors.

MUSIC 328 Repertoire (2) VLPA For music majors.

MUSIC 332 Music in European Society: Antiquity to 1700 (5) VLPA/I&S Music and its relationship to aspects of European culture and society - philosophy, politics, social conditions, and the visual arts from antiquity to 1700.

MUSIC 333 Music in Western Culture (5) VLPA/I&S Music in Europe and North America, drawn from classical, popular, jazz, opera, and musical theatre traditions. Emphasis on the relationship between musical works and their social, philosophical, political, and other contexts.

MUSIC 334 Band Arranging (2) VLPA Prerequisite: MUSIC 303.

MUSIC 336 Jazz Arranging (2) VLPA Writing in jazz style for various instrumental combinations. Students should be able to arrange for modern jazz orchestra. Prerequisite: MUSIC 303.

MUSIC 344 Psychology of Music: Cognition (5) VLPA/I&S Critical examination of questions, designs, and conclusions of previous research in a variety of areas related to music cognition including music perception, music performance, musical development, musical affect, musical preference, social psychology, and neuroscience.

MUSIC 350 Choral Conducting (1) VLPA Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 302; corequisite: MUSEN 307, MUSEN 350 or MUSEN 351.

MUSIC 351 Choral Conducting (1) VLPA Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 350; corequisite: MUSEN 307, MUSEN 350 or MUSEN 351.

MUSIC 352 Choral Conducting (1) VLPA Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for

music and music education majors. Prerequisite: MUSIC 351; corequisite: MUSEN 307, MUSEN 350 or MUSEN 351.

MUSIC 366 Cylinders to Platters: 100 Years of Significant Recorded Music 1880-1980 (5) VLPA T. COLLIER Music as reflected through the influences of the recording industry and the development of related technologies. Examines social and artistic impacts that the recording age has brought to American and European musical cultures.

MUSIC 367 Essential Skills in Jazz Improvisation I (2) VLPA Addresses acquisition of crucial skills in jazz improvisation. Emphasizing strengthening inner time, control of form, and fundamental harmony while addressing motivic development through rhythmic exercises. Students engage in transcription and analysis of exemplarity solos by jazz legends.

MUSIC 368 Essential Skills in Jazz Improvisation II (2) VLPA Addresses skills in jazz improvisation at a more complex level. Emphasizing control of complex cross rhythms and ear training. Harmonic knowledge acquired through improvisational techniques and analysis of selections from the American Songbook. Prerequisite: MUSIC 367

MUSIC 369 Essential Skills in Jazz Improvisation III (2) VLPA Addresses skills in jazz improvisation at a more complex level. Emphasizing advanced harmonic approaches that address extensions, altered extensions and resolutions, intervallic inventions, polytonality, chromatics, and triadic chromatics. Addresses improvisation in odd meter. Prerequisite: MUSIC 368.

MUSIC 379 Junior Recital (1) VLPA For participants in the Bachelor of Music degree program only.

MUSIC 380 Instrumental Conducting (1) VLPA Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques, and score study. Prerequisite: either MUSIC 212 or MUSIC 302. Instructors: Salzman

MUSIC 381 Instrumental Conducting (1) VLPA Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques, and score study. Prerequisite: MUSIC 380. Instructors: Salzman

MUSIC 382 Instrumental Conducting (1) VLPA Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques, and score study. Prerequisite: MUSIC 381. Instructors: Salzman

MUSIC 384 Ideas In Music (5) VLPA/I&S Taricani Examines selected sources and compositions of music from the Western tradition (from the tenth through the twentieth centuries), in relation to the intellectual background of the periods and countries that produced them. Musical studies accompanied by assigned readings in philosophical, religious, literary, and artistic texts in addition to the primary readings in musical history.

MUSIC 388 Jazz Pedagogy (2) VLPA Stylistic and esthetic developments in the performance of jazz. Key musical ingredients in the evolution of jazz as an art form and the skills commensurate with teaching these. Designed for music majors.

MUSIC 390 Special Topics in Music (3, max. 9) VLPA *Starr* Topics vary.

MUSIC 391 Composition (3, max. 9) VLPA One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 291.

MUSIC 400 Computer Applications to Music (3, max. 9) VLPA Music workstation applications using microcomputers, music synthesizers, and analog-to-digital converters: music editing and score production, transcription, waveform and spectral analysis, and introduction to programming.

MUSIC 401 Digital Sound Synthesis (5) VLPA Introduction to software sound synthesis techniques. Project-based course focused on creating experimental sound compositions framed by context of the Western Art Music Tradition. Includes acoustics and psychoacoustics; virtual synthesizers; wavetable synthesis; additive synthesis; ring, amplitude, and frequency modulation synthesis; granular synthesis; and noise and subtractive synthesis. Offered: jointly with DXARTS 461; A.

MUSIC 402 Digital Sound Processing (5) VLPA Introduction to digital sound processing techniques. Project-based course focused on creating experimental sound compositions framed by context of the Western Art Music Tradition. Includes digital effects; delay lines; introduction to digital filtering; FIR and IIR filters; reverberation; virtual-room acoustics and sound location; time-domain transformation of sound; and granulation and time stretching. Prerequisite: DXARTS 461/MUSIC 401. Offered: jointly with DXARTS 462; W.

MUSIC 403 Advanced Digital Sound Synthesis and Processing (5) VLPA Advanced sound processing and synthesis techniques. Includes sound time warping; analysis-synthesis techniques; linear predictive coding; the phase vocoder; frequency-domain sound transformations; introduction to physical modeling. Prerequisite: DXARTS 462/MUSIC 402. Offered: jointly with DXARTS 463; Sp.

MUSIC 405 Liturgics and Hymnology: Practical Applications I (3) VLPA Prepares organ majors and other advanced organ students to play hymns in a manner that inspires congregational singing. Includes a study of hymnology from the early church to contemporary hymns of today. Explores several denominational hymns and many styles of improvisation, including baroque, romantic, and contemporary techniques. Prerequisite: MUSIC 302; MUSIC 305; MUHST 212. Instructors: Cleveland Offered: A.

MUSIC 406 Liturgics and Hymnology: Practical Applications II (3) VLPA Surveys small and large choral works including anthems, oratorios, Requiem Masses, and Mass settings of major composers of the sixteenth century to present day. Resources drawn from the performing ensembles library, and from area church libraries, and include a detailed study of choral styles

and editions. Prerequisite: either MUSIC 303, MUSIC 306, MUHST 210, or MUSIC 405.
Instructors: Cleveland Offered: W.

MUSIC 407 Liturgics and Hymnology: Practical Applications III (3) VLPA Includes a survey of the necessary skills to run a successful music program in a church or synagogue. Provides an overview of traditional and contemporary liturgies, handbells, orchestral instruments and their use in worship and a special emphasis on the directing of children's choirs. Prerequisite: either MUSIC 303, MUSIC 306, MUHST 210, or MUSIC 406. Instructors: Cleveland Offered: Sp.

MUSIC 410 ElectroAcoustic Music: History and Analysis (3) VLPA Examines the music of major electro-acoustic composers. Emphasis on the relationship between technological resources and compositional advances. Addresses issues raised by the diversity of approaches to musical composition; relates particular creative contributions to the historical, cultural, and technological contexts in which they originated. Prerequisite: MUSIC 303; MUSIC 306; MUHST 210. Offered: Sp.

MUSIC 411 Free Improvisation/Modern Jazz Composition I (2) VLPA *Vu* Guides students through the process of experimentation while discovering and developing musical originality and striving for innovations in jazz. Students address conceptual approaches to non-idiomatic group improvisation and original composition that incorporates and fosters improvisation, and explore techniques in generating and developing building blocks of musical material and form. Offered: A.

MUSIC 412 Free Improvisation/Modern Jazz Composition II (2) VLPA Continuation of MUSIC 411, working at a more developed and complex level to experiment and strive for originality and innovation in jazz. Students address conceptual approaches to non-idiomatic group improvisation and original composition that incorporates and fosters improvisation, and explore techniques in generating and developing building blocks of musical material and form. Prerequisite: MUSIC 411. Instructors: Vu Offered: W.

MUSIC 413 Free Improvisation/Modern Jazz Composition III (2) VLPA Continuation of MUSIC 411, working at a more advanced and complex level to experiment and strive for originality and innovation in jazz. Students address conceptual approaches to non-idiomatic group improvisation and original composition that incorporates and fosters improvisation, and explore techniques in generating and developing building blocks of musical material and form. Prerequisite: MUSIC 412. Instructors: Vu Offered: Sp.

MUSIC 414 Finding an American Voice (3) VLPA Investigation of why certain works have been received as characteristically and representatively “American” in nature, extending the inquiry concerning an “American voice” to arts like poetry and painting, along with music. Examples for study include music by composers such as Gershwin, and Dickinson's poetry, along with composers' settings of it. Instructor: Starr.

MUSIC 415 The American Musical (3) VLPA Advanced course in the American stage and film musical, emphasizing detailed study of representative works as totalities: *Show Boat*, *Porgy*

and Bess, shows by Rodgers & Hammerstein and Sondheim, film musical starring Astaire and Rogers, and others. Contributions of composers, lyricists, choreographers, directors, and performers to development of the genre. Instructor: Starr.

MUSIC 416 The Blues (3) VLPA Investigation of the many forms, styles, and genres of music linked with the blues, and of the ways in which the blues has contributed to the shaping and essence of musical culture, from the early twentieth century to the present. Instructor: Starr.

MUSIC 417 Classical Music in America (3) VLPA History of classical music composers, performers, audiences, and institutions in America, with a critical look at the situation of these groups and institutions today, in light of how they arrived at their current status, and a consideration of what the future may hold for them. Instructor: Starr.

MUSIC 418 Baroque Ornamentation and Improvisation (3) VLPA Terry The study of ornamentation and improvisation for keyboard, woodwinds, voice, and strings of selected German, Italian, French, and English repertoire from 1600 to 1800.

MUSIC 420 Organ Improvisation and Service Playing I (2) VLPA Prepares students to improvise, especially for the church/synagogue service. Includes a brief study of hymnology, hymn elaboration, altered harmonizations, improvisation based on existing hymn tunes, interludes, chorale preludes, ornamented chorales. Prerequisite: MUSIC 303; MUSIC 306. Offered: A.

MUSIC 421 Organ Improvisation and Service Playing II (2) VLPA Continuation of MUSIC 420. Includes brief review of figured bass and functional harmony, free improvisation in simple antecedent/consequent ABA forms and more complex forms (rondo, theme, and variation), improvising partitas, interludes, improvisations based on plainchant. A survey of important improvisation texts. Prerequisite: MUSIC 420. Offered: W.

MUSIC 422 Organ Improvisation and Service Playing III (2) VLPA Continuation of MUSIC 421. Advanced improvisation: baroque improvisation techniques, fughettas, baroque prelude and fantasias, canons, toccatas, duos, trios, and simple fugues. Prerequisite: MUSIC 421. Offered: Sp.

MUSIC 426 Advanced Jazz Arranging (2) VLPA Advanced arranging techniques for jazz ensembles of various sizes, exploring methods employed by Duke Ellington, Gil Evans, and others. Assignments include one original arrangement each for small-combo and full-jazz ensemble. Prerequisite: MUSIC 336. Offered: W.

MUSIC 427 Music of Africa (3) VLPA/I&S Music cultures of Africa. Traditional styles and more recent developments. Open to all students with an interest in the area. Prerequisite: MUSIC 317.

MUSIC 428 Music of North India (3) VLPA/I&S Classical music of North India, the Hindustani tradition with emphasis on the Dhrupad and Khyal styles.

MUSIC 429 String Orchestral Repertoire (2, max. 18) VLPA Intended for undergraduate BA/BM and BM music majors. Offered: AWSp.

MUSIC 430 Organology (3) VLPA Systematic study of musical instruments, involving the history, acoustical phenomena, and physical topologies of instruments from around the world, with emphasis on non-Western music.

MUSIC 433 Music of Latin America (3) VLPA/I&S The music of the Spanish-, French-, and Portuguese-speaking New World countries.

MUSIC 434 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 435 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 436 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 437 Studio Class (2, max. 24) VLPA Performance and pedagogical concepts. Topics vary. Offered: AWSp.

MUSIC 438 Problems in Contemporary Music Performance (3, max. 9) VLPA An active course examining and solving problems relevant to the successful performance of twentieth-century music. Preparation for complex rhythms, odd groupings, new notation, and extended performing techniques.

MUSIC 439 Music of Indonesia (3) VLPA/I&S Includes the traditions of Sumatra, Sunda, Java, Bali, Sunda Islands, and the Philippines. Open to students in music and to students with an interest in the area.

MUSIC 440 Music in Asian America (3) VLPA/I&S C. SUNARDI Introduces students to Asian American communities through examination of music and issues related to music, including migration, memory, gender, the body, tradition, and generation. Explores how Asian Americans have expressed their experiences and asserted their senses of identity through music, thereby making sense of and claiming Americanness. Offered: AWSp.

MUSIC 442 Comparative Analysis and Musicianship (3) VLPA Analysis of selected world music genres, with an emphasis on concepts and skills that are required to perform.

MUSIC 443 Music and Community (3) VLPA S. DUDLEY An introduction to theories and methods of community arts facilitation and community-building, including active engagement with local artists and organizations.

MUSIC 444 Music of the Near East (3) VLPA/I&S Classical and folk musical traditions of Iran, Turkey, and the Arab world. Prerequisite: MUSIC 316.

MUSIC 445 Selected Topics in Ethnomusicology (3/5, max. 15) VLPA/I&S Deals with areas not covered by other courses in ethnomusicology. Content varies with different instructors.

MUSIC 446 Music in American Cultures (3) VLPA/I&S Compares musical history and experience of selected American cultures that have fed into the American musical mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latino/a Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with AES 446.

MUSIC 447 Music of Southern India (3) VLPA/I&S Classical music of South India, the Karnatic tradition, with emphasis on the concert repertoire.

MUSIC 448 Music of China (3) VLPA/I&S Confucian philosophies that relate to music, theory, scale systems, cosmology. Development of instrumental styles, vocal and dramatic regional forms from early historical periods to the present.

MUSIC 449 Advanced Piano Repertoire (2, max. 6) VLPA/I&S For piano majors who wish an in-depth survey of major areas of the piano repertoire. Prerequisite: MUSIC 328. Instructors: McCabe, Sheppard Offered: AWSp.

MUSIC 450 Percussion Education Institute (2) VLPA Intensive four-week institute focusing on techniques in percussion, timpani, and mallet performance. Intended for music educators with little or no percussion experience desiring additional training to enhance their careers as music teachers. Includes private instruction, master classes, and percussion ensemble participation. Prerequisite: MUSAP 217. Instructors: Collier, Crusoe

MUSIC 451 Summer Jazz Institute (1) VLPA *Brockman, Collier, Seales* Intensive one-week institute designed for the serious jazz student as well as for music educators. Six hours of daily instruction in jazz theory, ear-training, improvisation, arranging, as well as emphasis on rehearsal and performance techniques through sectional workshops and small group “jam sessions.”

MUSIC 454 Organ Pedagogy (3) VLPA *Terry* Pedagogical approaches to organ techniques and performance practice; provides opportunity for practical application by means of student teaching. Offered: Sp, even years.

MUSIC 455 Choral Arranging (3) VLPA Primarily for choral conductors who need to modify, arrange, or compose material to suit the capabilities of specific choral groups and performance situations.

MUSIC 457 Jazz Laboratory: Theory and Application of Rhythm (1) VLPA Establishes a fundamental comprehension of the complex and nuanced rhythmic structures inherent in traditional and modern jazz. Through transcription, analysis, dictation, composition and performance. Students develop a personal understanding of, and the ability to execute, the detailed rhythmic language that defines this art form. Offered: A.

MUSIC 458 Organ Repertoire: Middle Ages through Baroque (3) VLPA Analysis and performance practices of organ literature, Middle Ages through baroque period. Development of the organ as musical instrument. Prerequisite: either MUHST 400, MUHST 401, MUHST 402, MUHST 403, MUHST 406, or MUHST 407. Instructors: Terry Offered: A, even years.

MUSIC 459 Organ Repertoire: Bach to Present (3) VLPA Analysis and performance practices of organ literature, classical period through the twentieth century. Development of the organ as a musical instrument. Prerequisite: either MUHST 408, MUHST 409, MUHST 410, MUHST 411, MUHST 412, MUHST 413, MUHST 414, MUHST 415, MUHST 417, MUHST 418, MUHST 419, MUHST 423, MUHST 424, or MUHST 426. Instructors: Terry Offered: W, even years.

MUSIC 460 Advanced Vocal Repertoire: Pre-Nineteenth-Century Art Songs (2, max. 6) VLPA Professional preparation of pre-nineteenth-century songs with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 328.

MUSIC 461 Advanced Vocal Repertoire: Nineteenth-Century Art Songs (2, max. 6) VLPA Professional preparation of works from the literature of nineteenth-century German lieder, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 460.

MUSIC 462 Advanced Vocal Repertoire: Twentieth-Century Art Songs (2, max. 6) VLPA Preparation of works from the twentieth-century repertoire of French, German, Italian, Spanish, and English songs, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 461.

MUSIC 464 Jazz Laboratory (1, max. 9) VLPA Forum for testing new technical skills, improvisational techniques, and jazz compositions and/or arrangements in a formal laboratory setting.

MUSIC 465 Acting for Singers (2, max. 6) VLPA Workshop designed specifically for the singing actor, focusing on character analysis, movement, and audition deportment skills.

MUSIC 467 Advanced Jazz Improvisation I (1) VLPA Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 369. Instructors: Collier, Seales

MUSIC 468 Advanced Jazz Improvisation II (1) VLPA Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 467. Instructors: Collier, Seales

MUSIC 469 Advanced Jazz Improvisation III (1) VLPA Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 468. Instructors: Collier, Seales

MUSIC 470 Analysis of Tonal Music: Introduction to Schenker (3) VLPA Introduction to the theories of Heinrich Schenker and their subsequent development; analysis of music from the

common-practice period (1700-1900), with possible excursions into the twentieth century. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215. Instructors: Bernard

MUSIC 471 Introduction to Atonal Theory and Analysis (3) VLPA Theory of atonal music, including the “classical” twelve-tone repertoire. Analysis of works by Schoenberg, Berg, Webern, and others. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215. Instructors: Bernard

MUSIC 472 Analysis of Twentieth Century Music, 1900-1950 (3, max. 6) VLPA Analytical examination of musical works of the first half of the twentieth century in Europe and the United States, with emphasis on music other than that of the second Viennese school. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215. Instructors: Bernard, Durand, Hodge

MUSIC 473 Keyboard Harmony and Transposition (3) VLPA Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215. Instructors: Terry Offered: A, odd years.

MUSIC 474 Keyboard Harmony and Transposition (3) VLPA Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: MUSIC 473. Instructors: Terry Offered: W, odd years.

MUSIC 475 Figured Bass Realization (3) VLPA Various styles of continuo realization for keyboardists, emphasizing Bach cantatas, Haydn symphonies, and Mozart operas. Prerequisite: MUSIC 474. Instructors: Terry Offered: Sp, odd years.

MUSIC 476 Advanced Vocal Repertoire: Seventeenth and Eighteenth Centuries (2) VLPA Opera repertoire, 1600 to the Bel Canto era (Bellini, Rossini, Donizetti); style, traditions, embellishments in Italian, French, and German arias. Prerequisite: MUSIC 328.

MUSIC 477 Advanced Vocal Repertoire: Nineteenth Century (2) VLPA Opera repertoire, the post Bel Canto era through Verdi, Puccini and verismo, and significant German, French, and Slavic repertoire. Prerequisite: MUSIC 476.

MUSIC 478 Advanced Vocal Repertoire: Twentieth Century (2) VLPA Opera repertoire, twentieth-century opera literature (Barber, Menotti, Bartok, Dvorak); understanding of style, character, and overall artistic and musical needs of the present. Prerequisite: MUSIC 477.

MUSIC 479 Senior Recital (1) VLPA

MUSIC 480 The Anthropology of Music (3) VLPA/I&S Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation, e.g., evolutionist, diffusionist, historical

particularist, structuralist, functionalist, symbolist, and semiotic, through detailed examination of seminal texts. Offered: jointly with ANTH 430.

MUSIC 481 Choral Repertoire: Sixteenth and Seventeenth Centuries (3) VLPA *Boers, Wyers* Sacred and secular choral literature from the Renaissance through the early baroque, covering Europe and England. Various genres and styles of major composers, including performance practice, rehearsals, and conducting.

MUSIC 482 Choral Repertoire: Eighteenth Century (3) VLPA *Boers, Wyers* Sacred and secular choral literature of the baroque, covering mainland Europe and England. Choral works of Bach, his predecessors, and contemporaries. Stylistic analysis and study of performance practice.

MUSIC 483 Choral Repertoire: Nineteenth Century (3) VLPA *Boers, Wyers* Sacred and secular choral literature of the nineteenth century, covering mainland Europe and England. Analysis of accompanied and a cappella choral works by major composers with implications for conducting and programming of literature.

MUSIC 484 Choral Repertoire: Twentieth Century (3) VLPA *Boers, Wyers* Choral literature of the twentieth century, covering America, England, and mainland Europe. Various genres and styles, including score study and teaching strategies.

MUSIC 485 Topics in the Analysis of American Music (3, max. 9) VLPA *Bernard* Includes close analytical study of specific repertoires of American music. Prerequisite: MUHST212 AND MUSIC302, or permission of instructor

MUSIC 487 Tonal Counterpoint (3) VLPA Introduction to tonal counterpoint through exercises in analysis and composition, focusing on eighteenth-century styles. Study of melody principles of counterpoint in two and three voices, dance forms, inventions, fugue. Prerequisite: either MUSIC 311 or MUSIC 202. Instructors: Bernard, Hodge

MUSIC 489 Special Topics in Music Theory (3/5, max. 15) VLPA Prerequisite: either both MUSIC 303 and MUHST 210 or both MUSIC 312 and MUHST 314. Instructors: Bernard, Durand, Hodge

MUSIC 491 Composition (3, max. 18) VLPA One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 391.

MUSIC 492 Opera Direction and Production (4) VLPA Practical experience with problems of the theater.

MUSIC 493 Opera Direction and Production (4) VLPA Practical experience with problems of the theater. Prerequisite: MUSIC 492.

MUSIC 495 Music of Japan (3) VLPA/I&S Survey of major Japanese musical traditions. Open to students in music and East Asian area studies. Prerequisite: MUSIC 316.

MUSIC 496 Instrumentation (3) VLPA *Durand, Hodge* Survey of the basic characteristics and techniques of instruments of the orchestra and practical experience in scoring for various instrumental combinations. Also covers topics such as transcription of solo works for ensemble and basic arranging in jazz and other styles. Prerequisite: MUSIC 303; MUSIC 306.

MUSIC 497 Orchestration (3) VLPA Study of the instruments of orchestra and practical experience in combining them. Examines questions of timbre, acoustics, psychoacoustics, as well as orchestration analysis of a variety of works. Prerequisite: MUSIC 496.

MUSIC 498 Senior Thesis (3-, max. 9) VLPA Design and completion of an individual research project and writing of a thesis under supervision of a faculty member.

MUSIC 499 Undergraduate Research (*, max. 6)

MUSIC 504 Ethnographic Research in Music (3) Campbell, Morrison Seminar in ethnographic research in music, with attention to the nature of participant-observation and informal interviewing suitable to the discovery of the social and cultural life of individual musicians, and communities and institutions of music.

MUSIC 511 Seminar in Field and Laboratory Methods (3) Methodology of field research in ethnomusicology along with practical experience. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 512 Seminar in Ethnomusicology (3/5, max. 30) Deals with advanced theoretical and methodological problems in ethnomusicology, and with the relationship of ethnomusicology to allied disciplines. Prerequisite: graduate-student standing in ethnomusicology or permission of instructor.

MUSIC 520 Music in Higher Education (3) Morrison Philosophical and practical issues surrounding music within the context of higher education. Topics include mission and structure of music programs, development of teaching expertise, teacher/student evaluation, academic freedom, and job opportunities. Appropriate for all graduate music students and does not require background in teaching or education.

MUSIC 523 Seminar in Music and Socialization (3, max. 9) The socialization process and music, including the interaction whereby music culture is learned. Prerequisite: MUSIC 345 or permission of instructor.

MUSIC 526 History of Theory (3) Ancient, medieval, early Renaissance.

MUSIC 527 History of Theory (3) Bernard Renaissance, baroque, early classic.

MUSIC 528 History of Theory (3) Bernard Classic, romantic, twentieth century.

MUSIC 530 Seminar in Music Cognition (3, max. 9) Study of research literature in cognition and music cognition, particularly as it relates to nonverbal musical experience. Prerequisite: MUSIC 344, or MUSIC 544, or permission of instructor.

MUSIC 531 Proseminar in Ethnomusicology (3) Theoretical and methodological issues in ethnomusicology based on historical and contemporary major writings. Critical evaluations of works with a broad view toward developing ethnomusicological research. Prerequisite: permission of instructor.

MUSIC 532 Opera Direction and Production (4/6, max. 12) Practical experience with problems of the opera theatre.

MUSIC 533 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Asia. Meets with MUSIC 316. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 534 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Africa, the Americas, and Oceania. Meets with MUSIC 317. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 535 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Europe and North America. Meets with MUSIC 318. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 536 Transcription and Analysis (3) Study of the methodological principles of transcription and analysis, together with practical exercises in developing transcription skills. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 540 Music in Asian America (3) *C. SUNARDI* Introduces students to Asian American communities through examination of music and issues related to music, including migration, memory, gender, the body, tradition, and generation. Explores how Asian Americans have expressed their experiences and asserted their senses of identity through music, thereby making sense of and claiming Americanness. Offered: AWSp.

MUSIC 542 Comparative Analysis and Musicianship (3) Analysis of selected world music genres, with an emphasis on concepts and skills that are required to perform.

MUSIC 543 Music and Community (3) *S. DUDLEY* An introduction to theories and methods of community arts facilitation and community-building, including active engagement with local artists and organizations.

MUSIC 544 Psychology of Music: Music Cognition (5) Critical examination of questions, designs, and conclusions of previous research in a variety of areas related to music cognition including music performance, musical creativity, musical affect, musical preference, social psychology, and neuroscience. Discusses the role of theory, method, and typical procedures for psychological research.

MUSIC 551 Practicum in Music Instruction (3, max. 9) Practical application and validation of results of investigation in curriculum, music teaching and learning, performance, and theoretical studies. Prerequisite: teaching experience, or permission of instructor.

MUSIC 553 Advanced Choral Techniques (2, max. 18) *Boers, Wyers* Practical application of technique and pedagogy related to choral music. Surveys major choral repertoire. Concurrent enrollment in MUSIC 583 required.

MUSIC 559 Master's Recital (3, max. 6) Public performance for students in the Master of Music degree program. Prerequisite: permission of instructor and Master of Music program standing.

MUSIC 570 Seminar in Schenkerian Analysis (3, max. 9) Advanced work in Schenkerian analysis. Prerequisite: MUSIC 470. Instructors: Bernard

MUSIC 571 Seminar in Serialism (3, max. 9) Advanced theoretical and analytical work in serialism and other nontonal systems. Prerequisite: MUSIC 471, or equivalent. Instructors: Bernard

MUSIC 572 Advanced Topics in Computer Music (3) *Karpen* Topics vary. Offered: AWSpS.

MUSIC 573 Seminar in Tonal Analysis (3, max. 9) Modern theoretical and analytical methods appropriate to study of western music of the eighteenth and nineteenth centuries, conceived independently of or in response to the work of Heinrich Schenker. Prerequisite: MUSIC 470 or permission of instructor.

MUSIC 574 Analysis of Twentieth-Century Music: 1950 - Present (3) Analytical examination of major works of second half of twentieth century. Prerequisite: MUSIC 471; MUSIC 472, or permission of instructor. Instructors: Bernard, Durand, Hodge, Karpen

MUSIC 575 Seminar in Theory (3, max. 18) *Bernard* Development and discussion of current student and faculty research in compositional/analytical theory and metatheory.

MUSIC 576 Critical Theory of Music (3, max. 18) Philosophical foundations of the criticism of music, including relevant contemporary thought in the criticism of literature and the other arts.

MUSIC 577 Composers of the Twentieth Century (3, max. 9) Analytical examination of the work of a major composer of the twentieth century. Prerequisite: MUSIC 574, or permission of instructor. Instructors: Bernard, Durand, Hodge, Karpen

MUSIC 580 Advanced Conducting (3, max. 9) *Salzman*

MUSIC 581 Advanced Conducting (3, max. 9) *Salzman*

MUSIC 582 Advanced Conducting (3, max. 9) *Salzman*

MUSIC 583 Advanced Choral Conducting (2, max. 18) *Boers, Wyers*

MUSIC 590 Keyboard and Doctoral Lecture Recital or Concerto Recital (6, max. 18)

Lecture recital or concerto recital for students in the Doctor of Musical Arts in piano performance, in harpsichord performance, and in organ performance degree programs.

MUSIC 591 Graduate Composition (*, max. 30) *Bernard, Durand, Karpen*

MUSIC 599 Advanced Selected Topics (1-3, max. 27) Selected readings on current issues and problems in music. Prerequisite: permission of a supervising music faculty member.

MUSIC 600 Independent Study or Research (*-)

MUSIC 700 Master's Thesis (*-)

MUSIC 800 Doctoral Dissertation (*-)

Applied Music

MUSAP 133 Basic Keyboard (2) VLPA Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSIC 116.

MUSAP 134 Basic Keyboard (2) VLPA Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSAP 133.

MUSAP 135 Basic Keyboard (2) VLPA Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSAP 134.

MUSAP 136 Basic Jazz Keyboard (2, max. 6) VLPA *Seales* Basics of jazz and pop chord voicings, reading lead sheets, basic accompanying in various jazz and pop styles. Audition required.

MUSAP 137 Class Instruction: Voice (1) VLPA Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required.

MUSAP 138 Class Instruction: Voice (1) VLPA Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 137.

MUSAP 139 Class Instruction: Voice (1) VLPA Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 138.

MUSAP 205 String Techniques (2, max. 12) VLPA Designed to prepare music education students to teach beginning and intermediate strings in the public schools.

MUSAP 210 Wind Techniques (2, max. 12) VLPA Designed to prepare music education students to teach beginning and intermediate woodwinds and brass in the public schools.

MUSAP 217 Percussion Techniques (2, max. 4) VLPA *Collier* The study of basic percussion techniques as they apply to music in the public schools. Acquaints the prospective music education major with percussion performance and teaching techniques.

MUSAP 218 Guitar Techniques (2, max. 4) VLPA *Partington* Includes exercises to develop a good basic technique emphasizing correct position and movement of both hands, basic folk song accompaniments including a variety of strums, finger picking patterns, hammering on and bass runs, reading guitar music, classical pieces, special effects, and access to other styles. Offered: W.

MUSAP 233 Secondary Piano (2) VLPA Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 135.

MUSAP 234 Secondary Piano (2) VLPA Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 233.

MUSAP 235 Secondary Piano (2) VLPA Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 234.

MUSAP 237 Secondary Class Instruction: Voice (2, max. 6) VLPA Continuation of basic fundamentals of good singing: breathing, diction, voice focus, and repertoire. Designed for students not yet prepared for private instruction. Audition required. Prerequisite: MUSAP 139.

MUSAP 239 Secondary Piano (2, max. 8) VLPA Intermediate level keyboard repertory. Private instruction. Audition required. Prerequisite: MUSAP 235.

MUSAP 389 World Music (2, max. 24) VLPA/I&S World music traditions taught by visiting native artists. Consult ethnomusicology staff for current offerings. Intended for undergraduate majors. Audition required. Credit/no-credit only.

MUSAP 442 Jazz and Non-Western Drumming Techniques (2/3, max. 18) VLPA *Collier* Focused study of American jazz drumming and/or hand drumming techniques of various world music cultures to broaden the skills of percussion students, preparing them for new demands of contemporary musical styles. Designed primarily for music undergraduates enrolled in the percussion program. Audition required.

MUSAP 443 Percussion Lab (1, max. 12) *Collier, Crusoe, Poor* Primarily for percussion majors. Includes techniques and topics not normally covered in private lessons. Non-percussion music majors with permission of instructor. Offered: AWSp.

MUSAP 589 World Music Laboratory (2, max. 24) World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied

changes from year to year. Required of all graduate students in ethnomusicology. Audition required. Credit/no-credit only.

Music Education

MUSED 301 Techniques for Teaching Music to Children (2) VLPA Exercises and applied experiences in sight-singing and error detection, keyboard skills, record and instruments of the Orff ensemble relevant to the teaching of music to children. Prerequisite: either MUSIC 212 or MUSIC 302; MUSAP 135. Instructors: Campbell

MUSED 304 Introductory Music Methods I (2, max. 4) VLPA Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, and problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to public school ensemble instruction. Must be taken concurrently with MUSED 301; MUSED 340. Offered: A.

MUSED 305 Introductory Music Methods II (2, max. 4) VLPA Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to public school ensemble instruction. Offered: W.

MUSED 306 Introductory Music Methods III (2, max. 4) VLPA Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to public school ensemble instruction. Offered: Sp.

MUSED 340 Music in Education (3) VLPA An orientation to the broad scope of issues regarding music in the schools (K-12), including curriculum, the development of instructional strategies, and evaluation techniques.

MUSED 401 Tin Pan Alley: Concepts and Teaching Strategies for Music Educators (1) VLPA Overview of Tin Pan Alley phenomenon that dominated the American popular music industry for nearly 70 years. For music educators. Focuses on cooperative learning strategies and performance considerations in the school environment.

MUSED 402 Rock and Roll Roots for Music Educators (1) VLPA Overview of the musical and cultural roots of American Rock and Roll for music educators. Explores teaching strategies and performance possibilities in the school environment.

MUSED 403 Part-Time Student Teaching in Music (6) VLPA Campbell, Morrison Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Credit/no-credit only. Offered: AWSp.

MUSED 404 Full-Time Student Teaching in Music (15) VLPA Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Prerequisite: MUSED 403. Instructors: Campbell, Morrison Credit/no-credit only. Offered: AWSp.

MUSED 405 Marching Band Technique (2) VLPA *McDavid, Morrison, Salzman* Basics of marching and maneuvering discussed and used to write drill. Covers selection of music, use of marching procession, and show design. Students complete a drill for their own band or for an instrumentation determined by the instructor.

MUSED 410 Instrumental Rehearsal Techniques (3) VLPA *Salzman* Includes score preparation, rehearsal formats, and error detection.

MUSED 431 Curriculum in Music Education (3) VLPA *Campbell, Morrison* Principles and practices of curriculum design applied to the development of the music curriculum. Individual or group work on elementary and secondary school music curriculum projects.

MUSED 432 Comprehensive Music in the Secondary School (3) VLPA The teaching of music and its literature in music classes other than traditional ensembles from grade six through adults. Prerequisite: MUSED 340.

MUSED 440 Music for Children (3) VLPA Identification and selection of appropriate objectives, materials, teaching strategies, and evaluation techniques used in teaching music from birth through grade five, with consideration of various approaches (e.g., Delcroze, Kodaly, Orff) for the musical development of children. Prerequisite: MUSED 302; MUSED 340 Instructors: Campbell

MUSED 442 Instrumental Curriculum: Methods and Materials (3) VLPA Study of the organization and administration of school instrumental music; the selection and use of materials and teaching strategies from beginning to advanced levels of instrumental instruction. Prerequisite: MUSED 340. Instructors: Morrison

MUSED 443 Choral Curriculum: Methods and Materials (3) VLPA Study of the organization and administration of school choral music; the selection and use of materials and teaching strategies from beginning to advanced levels of choral instruction. Prerequisite: MUSED 340.

MUSED 452 Ethnomusicology in the Schools (3) VLPA Issues, teaching materials, and techniques involved in incorporating music cultures of United States and related world music repertoires in K-12 classroom instruction. Prerequisite: MUSED 340. Instructors: Campbell

MUSED 453 Approaches to Classroom Instruction: K-12 (3) VLPA Examines such major instructional approaches as MMCP, Orff, Kodaly, and Dalcroze. Included are the philosophy of each and the methods, materials, and instructional skills needed for classroom application. Prerequisite: MUSED 403. Instructors: Campbell

MUSED 465 Classroom Management and Evaluation in Music Education (3) VLPA

Provides future teachers with strategies and techniques for classroom management, motivation, assessment, and evaluation for applications to K-12 school music programs. Prerequisite: MUSED 340. Instructors: Morrison

MUSED 475 Teaching the Music of Selected Cultures (1, max. 6) VLPA *Campbell*

Music and culture of a specific world region with particular attention to songs, stories, and instrumental pieces applicable to the teaching of music and the arts in elementary and secondary schools.

MUSED 480 Music Methods for Classroom Teachers (3) VLPA *Campbell*

Addresses the basic fundamentals of music and methods for teaching K-6 school children. Topics include repertoire appropriate for different age levels, methods and materials for integrating music into the K-6 curriculum.

MUSED 496 Special Topics in Music Education (1-3, max. 10) VLPA

Special studies designed to reflect contemporary emphases and concerns in the music education profession.

MUSED 501 Introduction to Research in Music Education (3) *Campbell, Morrison*

Seminar in research design and method with emphasis on identification of problems in music instruction, interpretation of data, and application of findings to classroom settings.

MUSED 502 Quantitative Research in Music Education (3)

Seminar in quantitative research utilizing experimental, quasi-experimental, and descriptive design, with emphasis on the pursuit of solutions to pedagogical problems through appropriate research procedures, analysis, and interpretation of findings. Prerequisite: MUSED 501. Instructors: Campbell, Morrison

MUSED 522 Psychology of Music Learning and Teaching (3) *Campbell, Morrison*

Examines previous research in areas related to music cognition, including music perception, music performance, musical creativity, musical affect, musical preference, and social psychology. Explores how this research relates to curriculum and practice in music education. Role of theory, method, and procedure for psychological research in music education.

MUSED 523 Tests and Measurement (3) *Campbell, Morrison*

Examination of currently published aptitude and achievement tests in music and their uses in music education. Explores the basic methods for constructing classroom tests and their use in evaluation. Selected readings include researching test construction and application of tests and measurement to program evaluation.

MUSED 524 Seminar in Music Education (3)

Special problems in the teaching and supervision of music in the elementary grades. Prerequisite: one year of teaching experience. Instructors: Campbell, Morrison

MUSED 525 Seminar in Music Education (3)

Special problems in the teaching and administration of music in the secondary school and community college. Prerequisite: one year of teaching experience. Instructors: Campbell, Morrison

MUSED 530 Administration and Supervision in Music Education (3) *Campbell, Morrison* Survey of issues in policy and systems for facilities, student/personnel, technology, school/community relations, and special programs in music education. Focuses on evaluating and improving existing programs. Includes supervision of student teachers.

MUSED 535 Seminar in Musical Development (3) *Campbell, Morrison* Critical review of theories, methods of inquiry, designs, and conclusions of research in musical development from early childhood through adolescence. Emphasis on evaluating theories and methods of studying musical development and exploring their relationship to theories of general intellectual development; adult music cognition research; and curriculum and practice in music education.

MUSED 540 History of American Music Education (3) *Campbell, Morrison* A chronological examination of individual, social, and political events, and educational philosophies, that characterized the development of music instruction in American schools from colonial times to the present.

MUSED 542 Comparative Music Education (3) *Campbell, Morrison* A transcultural examination of philosophy and practice of music instruction.

MUSED 550 Proseminar in Music Education (3) *Campbell, Morrison* Examination of the major literature in the philosophy, history, psychology, and sociology of formal school music instruction.

MUSED 552 World Music Education (3) *Campbell* Seminar on issues of multiculturalism and the world music “movement” as they affect school music curriculum and instruction. Curricular content and cultural context examined in relation to teaching K-12 students, teachers, and undergraduate students in music education programs. Offered: AWSpS.

MUSED 560 Contemporary Issues in Music Education (1-3, max. 6) Seminar focusing on review of literature on psychological and sociological aspects of music education, including historical and philosophical foundations of music education in the United States. Appropriate for MA students seeking guidance in preparation of topic for examinations. Prerequisite: MUSED 501. Instructors: Campbell, Morrison

MUSED 561 Seminar in Theories of Music Instruction (3, max. 9) Theories of music instruction, with special attention to curriculum, instructional procedures, and assessment of learning. Prerequisite: MUSED 501, or permission of instructor. Instructors: Campbell, Morrison

MUSED 575 Seminar in Music Education Research (1-3, max. 6) *Campbell, Morrison* Examines research and research-based issues relevant to music instruction and learning. Doctoral students should register each quarter until successful completion of general examination. Offered: A.

Music Ensemble

MUSEN 100 University Singers (1, max. 15) VLPA Credit/no-credit only.

MUSEN 110 Beginning Steelband (1, max. 3) VLPA Introduction to basic playing techniques for the steel pan, and teaches a variety of Caribbean music styles with emphasis on rhythmic ensemble. Offered: AWP.

MUSEN 200 Men's Glee Club (1, max. 15) VLPA Non-auditioned ensemble open to all men in the campus community. Offers a number of performance opportunities throughout the year. Credit/no-credit only. Offered: AWP.

MUSEN 201 Women's Chorus (1, max. 15) VLPA Non-auditioned ensemble open to all women in the campus community. Offers a number of performance opportunities throughout the year. Credit/no-credit only. Offered: AWP.

MUSEN 210 Campus Philharmonia Orchestra (1, max. 15) VLPA Orchestral opportunity for non-majors. Meets once weekly, rehearses under the direction of the Masters and Doctoral orchestral conducting students. Serves as a laboratory for the conducting students. Performances are community outreach events which occur once per quarter. Major string, chamber orchestra, and symphonic repertoire rehearsed and performed.

MUSEN 300 University of Washington Symphony Orchestra (1, max. 15) VLPA Top orchestral ensemble, performing symphonic literature six to seven times per year. Includes rehearsals three times per week and collaborative performances with local institutions such as the Seattle Symphony. Open to all students. Auditions held at the beginning of each academic year; seating rotates

MUSEN 301 Wind Ensemble (1, max. 15) VLPA *Salzman*

MUSEN 302 Symphonic Band (1, max. 10) VLPA *Salzman*

MUSEN 303 Marching Band (1-2, max. 10) VLPA *McDavid*

MUSEN 304 Percussion Ensemble (1, max. 12) VLPA *Collier*

MUSEN 305 Brass Ensemble (1, max. 12) VLPA

MUSEN 306 Woodwind Ensemble (1, max. 12) VLPA *Shin*

MUSEN 307 Recital Choir (1, max. 15) VLPA *Boers* Choir presents two recital programs per quarter, surveying a wide variety of repertoire of all styles and periods. Credit/no-credit only.

MUSEN 308 Guitar Ensemble (1, max. 18) VLPA *Partington* Study and performance works for two, three, and four guitars and one guitar with various solo instruments or voice. Designed

for guitar performance majors. Other instrumentalists may register with instructor's permission. Offered: AWP.

MUSEN 309 Concert Band (1, max. 10) VLP *Salzman* Open for membership without audition to students from any major field of study as well as faculty and community members. Also a forum for music majors to refine skills on primary or secondary instruments. Offered: AWP.

MUSEN 325 Accompanying (2, max. 30) VLP

MUSEN 340 Vocal Jazz Ensemble (1, max. 6) VLP Credit/no-credit only.

MUSEN 345 Jazz Workshop (1, max. 12) VLP *Collier, Seales*

MUSEN 346 Studio Jazz Ensemble (1, max. 6) VLP

MUSEN 347 Opera Chorus (1, max. 12) VLP

MUSEN 350 University Chorale (1, max. 12) VLP *Wyers* Credit/no-credit only.

MUSEN 351 Chamber Singers (1, max. 15) VLP *Boers*

MUSEN 361 Piano Ensemble (1, max. 3) VLP Study and performance of works for four hands at one or two pianos. Designed for upper-level piano majors or students with equivalent ability.

MUSEN 368 Harp Ensemble (1, max. 12) VLP

MUSEN 369 Baroque Chamber Ensemble (1, max. 18) VLP *Terry*

MUSEN 375 Opera Workshop (1, max. 6) VLP Preparation of operatic repertoire. Intended for the mature voice student.

MUSEN 381 Chamber Music (1, max. 18) VLP

MUSEN 382 Opera Theatre (2, max. 6) VLP Public performance of roles in opera.

MUSEN 383 Collegium Musicum (1, max. 6) VLP

MUSEN 384 Modern Music Ensemble (1, max. 6) VLP *Durand* Exploration of notation and performance problems in modern music; preparation for public performance.

MUSEN 389 World Music Ensemble (1) VLP Ensemble performance in a variety of world music traditions, taught by visiting artists. Content varies. Credit/no-credit only. Offered: AWP.

MUSEN 410 Steelband (1, max. 6) VLPA Performing and arranging techniques for the steelband, and percussion, in a variety of Caribbean and Latin American music styles, including calypso, soca, reggae, and salsa.

MUSEN 411 Gamelan Ensembles (1) *Sunardi* Explores gamelan ensembles; percussion ensembles primarily associated with musical cultures on the Indonesian islands of Java, Madura, Bali, and Lombok. Introduces basic playing techniques of selected styles of gamelan. Includes instruction in the instruments in a gamelan through study of compositions. Offered: AWSpS.

MUSEN 446 Advanced Studio Jazz Ensemble (1, max. 9) VLPA Preparation and performance of material appropriate to large jazz ensemble concerts, clinics, and radio and television broadcasts.

MUSEN 500 University of Washington Symphony Orchestra (1, max. 9) Top orchestral ensemble, performing symphonic literature six to seven times per year. Includes rehearsals three times per week and collaborative performances with local institutions such as the Seattle Symphony. Open to all students. Auditions held at the beginning of each academic year; seating rotates.

MUSEN 501 Wind Ensemble (1, max. 9) *Salzman*

MUSEN 502 Symphonic Band (1, max. 6)

MUSEN 503 Marching Band (1-2, max. 10) *McDavid*

MUSEN 504 Percussion Ensemble (1, max. 9) *Collier*

MUSEN 505 Brass Ensemble (1, max. 9)

MUSEN 506 Woodwind Ensemble (1, max. 9) *Shin*

MUSEN 507 Recital Choir (1, max. 9) Choir presents two recital programs per quarter, surveying a wide variety of repertoire of all styles and periods. Credit/no-credit only.

MUSEN 508 Guitar Ensemble (1, max. 9) *Partington* Study and performance works for two, three, and four guitars and one guitar with various solo instruments or voice. Designed for guitar performance majors. Other instrumentalists may register with instructor's permission. Offered: AWSp.

MUSEN 509 Concert Band (1, max. 6)

MUSEN 511 Gamelan Ensembles (1) *Sunardi* Explores gamelan ensembles; percussion ensembles primarily associated with musical cultures on the Indonesian islands of Java, Madura, Bali, and Lombok. Introduces basic playing techniques of selected styles of gamelan. Includes instruction in the instruments in a gamelan through study of compositions. Offered: AWSpS.

MUSEN 525 Accompanying (2, max. 18)

MUSEN 540 Vocal Jazz Ensemble (1, max. 9) Credit/no-credit only.

MUSEN 545 Jazz Workshop (1, max. 9) *Collier, Seale, Vu*

MUSEN 546 Studio Jazz Ensemble (1, max. 9) Credit/no-credit only.

MUSEN 547 Opera Chorus (1, max. 9)

MUSEN 550 University Chorale (1, max. 9) *Wyers* Credit/no-credit only.

MUSEN 551 Chamber Singers (1, max. 9) *Boers*

MUSEN 561 Piano Ensemble (1, max. 9) Study and performance of works for four hands at one or two pianos. Designed for upper-level piano majors or students with equivalent ability.

MUSEN 568 Harp Ensemble (1, max. 9)

MUSEN 569 Baroque Chamber Ensemble (1, max. 9) *Terry*

MUSEN 575 Opera Workshop (1, max. 9) Preparation of operatic repertoire. Intended for the mature voice student.

MUSEN 580 Sinfonietta (1, max. 9)

MUSEN 581 Chamber Music (1, max. 9)

MUSEN 582 Opera Theatre (2, max. 18) Public performance of roles in opera.

MUSEN 583 Collegium Musicum (1, max. 9)

MUSEN 584 Modern Music Ensemble (1, max. 9) *Durand* Exploration of notation and performance problems in modern music; preparation for public performance. Credit/no-credit only.

MUSEN 589 World Music Ensemble (1) VLPA Ensemble performance in a variety of world music traditions, taught by visiting artists. Content varies. Credit/no-credit only. Offered: AWSp.

Music History

MUHST 210 Introduction to the History of Western Music I (3) VLPA Introduction to the critical study of Western music history, including representative composers, works, and genres, as well as significant concepts and issues. Origins of Western music. Prerequisite: MUSIC 120; either MUSIC 203 or MUSIC 206, which may be taken concurrently. Instructors: Taricani
Offered: A.

MUHST 211 Introduction to the History of Western Music II (3) VLPA Introduction to the critical study of Western music history, including representative composers, works, and genres, as well as significant concepts and issues. Baroque and classical periods. Prerequisite: MUSIC 203, MUSIC 206; either a minimum grade of 3.0 in MUSIC 120 or minimum score of 80% on music history placement test. Instructors: Rumph, Starr, Taricani Offered: W.

MUHST 212 Introduction to the History of Western Music III (3) VLPA Introduction to the critical study of Western music history including representative composers, works, and genres as well as significant concepts and issues - nineteenth and twentieth centuries. Prerequisite: minimum grade of 2.0 in MUHST 211. Instructors: Starr Offered: Sp.

MUHST 301 Music and the American Experience (3) VLPA/I&S Survey of American music from the colonial period to the present day, with emphasis on in-depth examination of representative works from both cultivated and vernacular traditions. Prerequisite: MUHST 210; MUSIC 303; MUSIC 306. Instructors: Starr Offered: WSp.

MUHST 310 Perspectives in Music History (3, max. 6) VLPA/I&S Overview of different stylistic periods in music history. Perspectives include music and philosophy, music and gender, and music and text. Students develop an insight into the manner in which similar questions have been approached in diverse cultures and periods. Prerequisite: MUHST 210; MUSIC 303; MUSIC 306. Offered: WSp.

MUHST 311 Beethoven in Western Culture (3) VLPA/I&S Comprehensive study of Beethoven's works and their nineteenth- and twentieth-century reception, with consideration of how Western culture has used Beethoven's music in its constructions of subjectivity, genius, and national and other collective identities. Prerequisite: MUSIC 303; MUSIC 306; MUHST 210. Offered: WSp.

MUHST 400 Medieval Music: To 1400 (3) VLPA Taricani Critical readings on issues in medieval music. Works to be studied include repertory from chant, motets, and sacred and secular music of the Middle Ages.

MUHST 401 Early British Music: 1300-1700 (3) VLPA Taricani Examines the history of British music from its earliest polyphony through the music of Purcell. Stylistic features of English music studied, including medieval polyphony, Tudor music, Elizabethan music, and seventeenth-century music through Purcell.

MUHST 402 Late Renaissance Secular Music: 1525-1630 (3) VLPA Taricani The madrigal in Italy, England, and Germany. The Chanson, Jannequin through Lassus.

MUHST 403 Late Renaissance Sacred and Instrumental Music: 1525-1630 (3) VLPA Taricani Latin church music. Willaert through G. Gabrieli; early Reformation church music, Walther through Gibbons; instrumental music, Cabezon, the English virginal school, and Sweelinck.

MUHST 404 Baroque Keyboard Music (3) VLPA Forms and styles: Frescobaldi through J.S. Bach and C.P.E. Bach.

MUHST 405 Orchestral Music: 1620-1760 (3) VLPA Corelli through the Mannheim School. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306.

MUHST 406 Baroque Choral Music (3) VLPA Monteverdi through Handel. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Bozarth

MUHST 407 Baroque Opera (3) VLPA Monteverdi through Handel.

MUHST 408 Keyboard Music: 1760-1830 (3) VLPA Haydn through Schubert. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Bozarth

MUHST 409 Chamber Music: 1760-1830 (3) VLPA Haydn through Schubert. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306.

MUHST 410 Orchestral Music: 1760-1830 (3) VLPA Haydn through early Berlioz.

MUHST 411 Art Song, 1760-1830 (3) VLPA The art song in European culture during the classical and early Romantic periods. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306.

MUHST 412 Choral Music: 1750-1830 (3) VLPA Large works for chorus and orchestra, Haydn through Beethoven.

MUHST 413 Opera: 1750-1830 (3) VLPA *Rumph* Gluck through Bellini.

MUHST 414 Keyboard Music: 1830-1915 (3) VLPA Schumann through Debussy. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Bozarth

MUHST 415 Chamber Music: 1830-1915 (3) VLPA Schumann through Ravel. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306.

MUHST 416 Orchestral Music: 1830-1915 (3) VLPA Schumann and Mendelssohn through early Schoenberg and Stravinsky. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, MUSIC 306.

MUHST 417 Art Song: 1830-1915 (3) VLPA The Lieder of Schumann, Brahms, Wolf, Strauss, Mahler, and Schoenberg. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Bozarth

MUHST 418 Choral Music: 1830-1915 (3) VLPA *Bozarth* Selected choral masterpieces. Mendelssohn through Schoenberg.

MUHST 419 Opera: 1830-1915 (3) VLPA German, French, and Italian operatic traditions. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Rumph

MUHST 420 Authenticity and Performance (3) VLPA The practical and philosophical issues raised by historically informed performance of early music on period instruments. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306.

MUHST 421 Music Criticism (3) VLPA Study of the various forms of music criticism, with an emphasis on the writing of valid examples and evaluation of one's own work along with that of others - classmates, journalists, and academic critics. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Starr

MUHST 422 Gender and Music (3) VLPA/I&S, DIV Investigates how gender issues have shaped the creation and perception of music; introduces women composers and their music. Topics include writing women's biography; creation of the music canon; gender issues in opera; intertwining issues of race, class, and gender, blues women; and popular music. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Tsou
Offered: W.

MUHST 423 Twentieth-Century Music to 1945 (3) VLPA Intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of the twentieth century. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Starr

MUHST 424 Music Since 1945 (3) VLPA Diversity of the contemporary musical scene. Vocabularies appropriate for the description and understanding of the new music, developed through study of representative composers and works, and appropriate readings. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Starr

MUHST 425 Jazz History and Analysis (3) VLPA Major eras and styles of jazz with emphasis on technical aspects of jazz music: composition, arranging, improvisation practices. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Collier

MUHST 426 American Popular Music (3) VLPA An in-depth consideration of American popular music styles and repertory from about 1920 to the present day. Analysis of representative pieces; consideration of critical and aesthetic issues relating to popular music; relationship of popular music to "art" music and to American culture and society. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Starr

MUHST 429 Music, Literature, and the Arts (3) VLPA Literary and visual art works that include musical subject matter and forms; musical genres that incorporate other arts such as

opera and ballet. Related philosophical writings. Includes works of a particular time period or investigation of a specific problem in comparative arts. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306.

MUHST 497 Special Topics in Music History (1-5, max. 15) VLPA Topics vary each quarter. Prerequisite: minimum grade of 2.0 in each of MUHST 210, MUSIC 303, and MUSIC 306. Instructors: Bozarth, Rumph, Taricani, Tsou

MUHST 500 Seminar in Methods of Music Research (3) *Rumph, Taricani* Explores various critical approaches to research in music at the graduate level, examining specialized bibliographical resources, controversial arguments about musical issues, and other matters of musical criticism required to begin advanced study of music. Prerequisite for all graduate music history courses except MUHST 515.

MUHST 503 Readings in Medieval and Renaissance Music (5) Musical styles, genres, and forms of the Middle Ages and Renaissance. Focuses upon musicological problems and controversy related to music composed circa 1000 - 1600. Prerequisite: permission of instructor. Instructors: Taricani

MUHST 504 Seminar in Medieval Music (3, max. 6) Prerequisite: MUHST 500. Instructors: Taricani

MUHST 505 Seminar in Renaissance Music (3, max. 6) Prerequisite: MUHST 500. Instructors: Taricani

MUHST 506 Seminar in Baroque Music (3, max. 6) Prerequisite: MUHST 500. Instructors: Bozarth

MUHST 508 Seminar in the Viennese Classical Period: 1760-1830 (3, max. 6) Prerequisite: MUHST 500. Instructors: Bozarth

MUHST 509 Seminar in Nineteenth-Century Music: 1830-1890 (3, max. 6) Prerequisite: MUHST 500. Instructors: Bozarth, Rumph

MUHST 510 Seminar in Music Since 1890 (3, max. 6) Prerequisite: MUHST 500. Instructors: Starr

MUHST 515 Seminar in Medieval and Renaissance Notation (5) *Taricani* Gregorian chant through sixteenth-century prints.

MUHST 519 Seminar in Modern Editorial Procedures (5) *Bozarth* Study of modern procedures for preparing critical editions. Related areas of study may include analysis of musical style and historical and performance problems inherent in works being edited.

MUHST 520 Seminar in American Music (3, max. 6) Research in the life, works, and times of composers in the United States from colonial days to the present. Prerequisite: MUHST 500.
Instructors: Starr

MUHST 537 Seminar on Opera (3, max. 6) Prerequisite: MUHST 500.

Music Performance

MUSICP 300 Private Instruction for Non-Majors: Voice (2, max. 44) VLPA *Harper*
Intended for undergraduate non-majors. Audition required.

MUSICP 301 Private Instruction for Non-Majors: Piano (2, max. 44) VLPA *McCabe, Seales, Sheppard* Intended for undergraduate non-majors. Audition required.

MUSICP 302 Private Instruction for Non-Majors: Organ (2, max. 44) VLPA *Terry* Intended for undergraduate non-majors. Audition required.

MUSICP 303 Private Instruction for Non-Majors: Harpsichord (2, max. 44) VLPA *Terry*
Intended for undergraduate non-majors. Audition required.

MUSICP 304 Private Instruction for Non-Majors: Violin (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 305 Private Instruction for Non-Majors: Violoncello (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 306 Private Instruction for Non-Majors: Double Bass (2, max. 44) VLPA *Lieberman* Intended for undergraduate non-majors. Audition required.

MUSICP 307 Private Instruction for Non-Majors: Flute (2, max. 44) VLPA *Shin* Intended for undergraduate non-majors. Audition required.

MUSICP 308 Private Instruction for Non-Majors: Oboe (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 309 Private Instruction for Non-Majors: Clarinet (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 310 Private Instruction for Non-Majors: Bassoon (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 311 Private Instruction for Non-Majors: Saxophone (2, max. 44) VLPA *Brockman*
Intended for undergraduate non-majors. Audition required.

MUSICP 312 Private Instruction for Non-Majors: Horn (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 313 Private Instruction for Non-Majors: Trumpet (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 314 Private Instruction for Non-Majors: Trombone (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 315 Private Instruction for Non-Majors: Tuba (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 316 Private Instruction for Non-Majors: Harp (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 317 Private Instruction for Non-Majors: Percussion (2, max. 44) VLPA *Collier, Crusoe* Intended for undergraduate non-majors. Audition required.

MUSICP 318 Private Instruction for Non-Majors: Guitar (2, max. 44) VLPA *Partington* Intended for undergraduate non-majors. Audition required.

MUSICP 319 Private Instruction for Non-Majors: Viola da Gamba (2, max. 44) VLPA Intended for undergraduate non-majors. Audition required.

MUSICP 320 Private Instruction: Voice (3, max. 45) VLPA *T. HARPER* Intended for undergraduate majors. Audition required.

MUSICP 321 Private Instruction: Piano (3, max. 45) VLPA *R. MCCABE, M. SEALES, C. SHEPPARD* Intended for undergraduate majors. Audition required.

MUSICP 322 Private Instruction: Organ (3, max. 45) VLPA *C. TERRY* Intended for undergraduate majors. Audition required.

MUSICP 323 Private Instruction: Harpsichord (3, max. 45) VLPA *C. TERRY* Intended for undergraduate majors. Audition required.

MUSICP 324 Private Instruction: Violin (3, max. 45) VLPA *R. PATTERSON* Intended for undergraduate majors. Audition required.

MUSICP 325 Private Instruction: Violoncello (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 326 Private Instruction: Double Bass (3, max. 45) VLPA *B. LIEBERMAN* Intended for undergraduate majors. Audition required.

MUSICP 327 Private Instruction: Flute (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 328 Private Instruction: Oboe (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 329 Private Instruction: Clarinet (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 330 Private Instruction: Bassoon (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 331 Private Instruction: Saxophone (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 332 Private Instruction: Horn (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 333 Private Instruction: Trumpet (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 334 Private Instruction: Trombone (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 335 Private Instruction: Tuba (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 336 Private Instruction: Harp (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 337 Private Instruction: Percussion (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 338 Private Instruction: Guitar (3, max. 45) VLPA *Partington* Intended for undergraduate majors. Audition required.

MUSICP 339 Private Instruction: Viola da Gamba (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 340 Private Instruction: Timpani (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 341 Private Instruction: Mallet Percussion (3, max. 45) VLPA *Collier* Intended for undergraduate majors. Audition required.

MUSICP 342 Private Instruction: Jazz Drum Set (3, max. 45) VLPA Primarily for jazz studies and percussion majors. Audition required for non-majors.

MUSICP 343 Private Instruction for Non-Majors: Viola (2, max. 44) VLPA *Watras*
Intended for undergraduate non-majors. Audition required.

MUSICP 363 Private Instruction: Viola (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 420 Private Instruction: Voice (3, max. 45) VLPA *T. HARPER* Intended for undergraduate majors. Audition required.

MUSICP 421 Private Instruction: Piano (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 422 Private Instruction: Organ (3, max. 45) VLPA *Terry* Intended for undergraduate majors. Audition required.

MUSICP 423 Private Instruction: Harpsichord (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 424 Private Instruction: Violin (3, max. 45) VLPA *Patterson* Intended for undergraduate majors. Audition required.

MUSICP 425 Private Instruction: Violoncello (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 426 Private Instruction: Double Bass (3, max. 45) VLPA *Lieberman* Intended for undergraduate majors. Audition required.

MUSICP 427 Private Instruction: Flute (3, max. 45) VLPA *Shin* Intended for undergraduate majors. Audition required.

MUSICP 428 Private Instruction: Oboe (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 429 Private Instruction: Clarinet (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 430 Private Instruction: Bassoon (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 431 Private Instruction: Saxophone (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 432 Private Instruction: Horn (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 433 Private Instruction: Trumpet (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 434 Private Instruction: Trombone (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 435 Private Instruction: Tuba (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 436 Private Instruction: Harp (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 437 Private Instruction: Percussion (3, max. 45) VLPA *Collier, Crusoe* Intended for undergraduate majors. Audition required.

MUSICP 438 Private Instruction: Guitar (3, max. 45) VLPA *Partington* Intended for undergraduate majors. Audition required.

MUSICP 439 Private Instruction: Viola da Gamba (3, max. 45) VLPA Intended for undergraduate majors. Audition required.

MUSICP 440 Private Instruction: Timpani (3, max. 45) VLPA *Crusoe* Intended for undergraduate majors. Audition required.

MUSICP 441 Private Instruction: Mallet Percussion (3, max. 45) VLPA *Collier* Intended for undergraduate majors. Audition required.

MUSICP 442 Jazz Drum Set (3, max. 45) VLPA Individual instruction in drum set techniques. Prerequisite: minimum of 18 credits of MUSICP 342. Instructors: Poor Offered: AWSp.

MUSICP 463 Private Instruction: Viola (3, max. 45) VLPA *Watras* Intended for undergraduate majors. Audition required.

MUSICP 494 Private Instruction: Jazz (3, max. 45) VLPA *Collier, Seales, Vu* Guides students through the process of historical examination of jazz while discovering and developing musical originality. Addresses jazz methods and approaches, aiming for mastery in jazz performance in a one-on-one environment with instrumentalists chosen from the core jazz instrumentation of trumpet, piano, bass, and drums. Offered: AWSp.

MUSICP 495 Private Instruction: Free Improvisation (3, max. 45) VLPA *Bergman, Hodge, Karpen, Vu* Guides students through the process of discovering and developing musical originality in improvised music. Students aim for mastery of improvised performance in a one-on-one environment with instructor chosen from various School of Music faculty. Primarily for jazz majors. Offered: AWSp.

MUSICP 500 Private instruction for Non-Majors: Voice (2, max. 44) *Harper* Intended for graduate non-majors. Audition required.

MUSICP 501 Private Instruction for Non-Majors: Piano (2, max. 44) *R. MCCABE, M. SEALES, C. SHEPPARD* Intended for graduate non-majors. Audition required.

MUSICP 502 Private Instruction for Non-Majors: Organ (2, max. 44) *C. TERRY* Intended for graduate non-majors. Audition required.

MUSICP 503 Private Instruction for Non-Majors: Harpsichord (2, max. 44) *C. TERRY* Intended for graduate non-majors. Audition required.

MUSICP 504 Private Instruction for Non-Majors: Violin (2, max. 44) *Patterson* Intended for graduate non-majors. Audition required.

MUSICP 505 Private Instruction for Non-Majors: Violoncello (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 506 Private Instruction for Non-Majors: Double Bass (2, max. 44) *B. LIEBERMAN* Intended for graduate non-majors. Audition required.

MUSICP 507 Private Instruction for Non-Majors: Flute (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 508 Private Instruction for Non-Majors: Oboe (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 509 Private Instruction for Non-Majors: Clarinet (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 510 Private Instruction for Non-Majors: Bassoon (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 511 Private Instruction for Non-Majors: Saxophone (2, max. 44) *Brockman* Intended for graduate non-majors. Audition required.

MUSICP 512 Private Instruction for Non-Majors: Horn (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 513 Private Instruction for Non-Majors: Trumpet (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 514 Private Instruction for Non-Majors: Trombone (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 515 Private Instruction for Non-Majors: Tuba (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 516 Private Instruction for Non-Majors: Harp (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 517 Private Instruction for Non-Majors: Percussion (2, max. 44) *T. COLLIER*
Intended for graduate non-majors. Audition required.

MUSICP 518 Private Instruction for Non-Majors: Guitar (2, max. 44) *M. PARTINGTON*
Intended for graduate non-majors. Audition required.

MUSICP 519 Private Instruction for Non-Majors Viola da Gamba (2, max. 44) Intended for graduate non-majors. Audition required.

MUSICP 520 Private Instruction: Voice (3, max. 45) *Harper* Intended for graduate majors. Audition required.

MUSICP 521 Private Instruction: Piano (3, max. 45) *McCabe, Sheppard* Intended for graduate majors. Audition required.

MUSICP 522 Private Instruction: Organ (3, max. 45) *Terry* Intended for graduate majors. Audition required.

MUSICP 523 Private Instruction: Harpsichord (3, max. 45) *Terry* Intended for graduate majors. Audition required.

MUSICP 524 Private Instruction: Violin (3, max. 45) *Patterson* Intended for graduate majors. Audition required.

MUSICP 525 Private Instruction: Violoncello (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 526 Private Instruction: Double Bass (3, max. 45) *Lieberman* Intended for graduate majors. Audition required.

MUSICP 527 Private Instruction: Flute (3, max. 45) *Shin* Intended for graduate majors. Audition required.

MUSICP 528 Private Instruction: Oboe (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 529 Private Instruction: Clarinet (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 530 Private Instruction: Bassoon (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 531 Private Instruction: Saxophone (3, max. 45) *Brockman* Intended for graduate majors. Audition required.

MUSICP 532 Private Instruction: Horn (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 533 Private Instruction: Trumpet (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 534 Private Instruction: Trombone (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 535 Private Instruction: Tuba (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 536 Private Instruction: Harp (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 537 Private Instruction: Percussion (3, max. 45) *Collier, Crusoe* Intended for graduate majors. Audition required.

MUSICP 538 Private Instruction: Guitar (3, max. 45) *Partington* Intended for graduate majors. Audition required.

MUSICP 539 Jazz Drum Set (3, max. 45) *Poor* Individual instruction in drum set techniques. Offered: AWSp.

MUSICP 540 Private Instruction: Timpani (3, max. 45) *Crusoe* Intended for graduate majors. Audition required.

MUSICP 541 Private Instruction: Mallet Percussion (3, max. 45) *Collier* Intended for graduate majors. Audition required.

MUSICP 542 Private Instruction: Viola da Gamba (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 543 Private Instruction for Non-Majors: Viola (2, max. 44) *M. WATRAS* Intended for graduate non-majors. Audition required. Offered: AWSpS.

MUSICP 563 Private Instruction: Viola (3, max. 45) *Watras* Intended for Master's degree candidates. Audition required. Offered: AWSpS.

MUSICP 570 Private Instruction: Voice (3, max. 45) *Harper* Intended for graduate majors. Audition required.

MUSICP 571 Private Instruction: Piano (3, max. 45) *McCabe, Sheppard* Intended for graduate majors. Audition required.

MUSICP 572 Private Instruction: Organ (3, max. 45) *Terry* Intended for graduate majors. Audition required.

MUSICP 573 Private Instruction: Harpsichord (3, max. 45) *Terry* Intended for graduate majors. Audition required.

MUSICP 574 Private Instruction: Violin (3, max. 45) *Patterson* Intended for graduate majors. Audition required.

MUSICP 575 Private Instruction: Violoncello (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 576 Private Instruction: Double Bass (3, max. 45) *Lieberman* Intended for graduate majors. Audition required.

MUSICP 577 Private Instruction: Flute (3, max. 45) *Shin* Intended for graduate majors. Audition required.

MUSICP 578 Private Instruction: Oboe (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 579 Private Instruction: Clarinet (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 580 Private Instruction: Bassoon (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 581 Private Instruction: Saxophone (3, max. 45) *Brockman* Intended for graduate majors. Audition required.

MUSICP 582 Private Instruction: Horn (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 583 Private Instruction: Trumpet (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 584 Private Instruction: Trombone (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 585 Private Instruction: Tuba (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 586 Private Instruction: Harp (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 587 Private Instruction: Percussion (3, max. 45) *Collier, Crusoe* Intended for graduate majors. Audition required.

MUSICP 588 Private Instruction: Guitar (3, max. 45) *Partington*

MUSICP 590 Private Instruction: Timpani (3, max. 45) *Crusoe* Intended for graduate majors. Audition required.

MUSICP 591 Private Instruction: Mallet Percussion (3, max. 45) *Collier* Intended for graduate majors. Audition required.

MUSICP 592 Private Instruction: Viola da Gamba (3, max. 45) Intended for graduate majors. Audition required.

MUSICP 593 Private Instruction: Viola (3, max. 45) *Watras* Intended for Doctoral degree candidates. Audition required. Offered: AWSpS.

MUSICP 594 Private Instruction: Jazz (3, max. 45) *Collier, Seales, Vu* Guides students through the process of historical examination of jazz while discovering and developing musical originality. Addresses jazz methods and approaches, aiming for mastery in jazz performance in a one-on-one environment with instrumentalists chosen from the core jazz instrumentation of trumpet, piano, bass, and drums. Offered: AWSp.

MUSICP 595 Private Instruction: Free Improvisation (3, max. 45) *Bergman, Hodge, Karpen, Vu* Guides students through the process of discovering and developing musical originality in improvised music. Students aim for mastery of improvised performance in a one-on-one environment with instructor chosen from various School of Music faculty. Primarily for jazz majors. Offered: AWSp.

Near Eastern Languages and Civilization

Department Overview

229 Denny

Near Eastern languages and civilization focuses on the languages and civilizations of the Near East with an emphasis on the ancient and medieval roots of these civilizations as well as more recent cultural developments. Each language offered represents a major literary tradition. Arabic, Persian, Turkish, and Central Asian Turkic are the languages of the most significant literary manifestations of Islamic civilization. Hebrew and Aramaic are the languages of the Bible and are central to Judaism and Jewish culture. Egyptian languages (Coptic, hieroglyphic) and other Mesopotamian and Mediterranean languages (Akkadian, Ugaritic, Phoenician) are important to the ancient and Christian cultures of the Near East. These languages are taught in conjunction with courses on the social, cultural, and religious history of the Near East, providing students with a broad understanding and solid foundation for more advanced studies or professional career development.

Undergraduate Program

Adviser

206-685-3743

nelcua@uw.edu

The department offers the following programs of study:

- The Bachelor of Arts degree with a major in Near Eastern studies with options in Near Eastern languages and cultures, Near Eastern comparative civilizations, comparative Islamic studies, and Biblical and ancient Near Eastern studies
- A minor in Near Eastern languages and civilization

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses in any discipline that deals with the Near East. Courses in writing, history, literature, comparative religion, French, and German are also recommended. Students should begin their studies of Near Eastern languages as soon as possible.

Department Admission Requirements

Students in good academic standing may declare this major at any time. Admission to the comparative Islamic studies option is suspended through spring, 2015.

Major Requirements

Near Eastern Studies -- Languages and Cultures

69 credits as follows:

1. Gateway Course (5 credits): NEAR E 101
2. One introductory (200 level) course on the Near East (5 credits)
3. Primary Language (30 credits): Two years of one Near Eastern language, or its equivalent as evidenced by examination
4. Advanced level coursework in primary language (10 credits): Advanced literature or text courses in primary language
5. Senior Seminar (2 credits): NEAR E 491
6. Near East Electives (20 credits): Supporting coursework from the following categories: advanced literature: 300- or 400-level courses from NEAR E or language prefixes; second Near Eastern language (must not exceed 15 credits); approved relevant exceptions from other departments (must not exceed 15 credits). NEAR E 498 may be used toward this requirement.
7. At least 22 of the 72 required credits must be taken in residence through the department.

Near Eastern Studies - Comparative Civilizations

72 credits as follows:

1. Gateway Course (5 credits): NEAR E 101
2. One introductory (200 level) course on the Near East (5 credits)
3. Primary Language (30 credits): Two years of one Near Eastern language, or its equivalent as evidenced by examination
4. Senior Seminar (2 credits): NEAR E 491
5. Senior essay on a topic of Near Eastern civilization (5 credits): NEAR E 498
6. Near East Electives (25 credits): Supporting coursework at the 300 level or above (maximum 15 credits of approved exceptions)
7. At least 22 of the 72 required credits must be taken in residence through the department.

Near Eastern Studies - Comparative Islamic Studies

Admission to this option is suspended through spring, 2015.

70 credits as follows:

1. Two years of one of the following languages or its equivalent as evidenced by examination: Arabic, Persian, Turkish, Uzbek, Kazakh, or other appropriate languages with approval of adviser
2. NEAR E 210
3. NEAR E 212 or NEAR E 240
4. An approved program of 10 credits in courses in Islamic religious traditions and texts, and 15 credits in history, society, and culture of Islam
5. A senior essay on a topic in comparative Islamic studies (5 credits).

Near Eastern Studies -- Biblical and Ancient Studies

72 credits as follows:

1. Gateway Course (5 credits): NEAR E 101
2. NEAR E 201 and NEAR E 202
3. Two years of Biblical Hebrew or its equivalent as evidenced by examination. Alternatively a student may satisfy this language requirement by combining a minimum four quarters of Biblical Hebrew with two quarters of other ancient Near Eastern languages, including Aramaic, Ge'ez, hieroglyphic Egyptian, Coptic, Akkadian, second-year Greek, or other appropriate languages as approved by adviser and/or faculty (30 credits)
4. Senior Seminar (2 credits): NEAR E 491
5. Near East Electives (25 credits): Supporting coursework from the following categories: advanced literature - 300- or 400-level courses from NEAR E or language prefixes; second ancient Near Eastern language (must not exceed 15 credits); approved relevant exceptions from other departments (must not exceed 15 credits). NEAR E 498 may be used toward this requirement.
6. A senior essay on a topic in Biblical and ancient Near Eastern studies (5 credits)
7. At least 22 of the 72 required credits must be taken in residence through the department.

Minor

Minor Requirements: 30 credits as follows:

1. NEAR E 101 (5 credits)
2. Two introductory courses (200-level) on the Near East (10 credits)
3. 15 additional credits from Near Eastern civilization or advanced-level language courses (may not include language courses at the beginning or intermediate level).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The NELC undergraduate degree offers a liberal arts education with a particular focus on the study of cultures and languages of the Near East and Central Asia. Educational outcomes from this degree serve a broad spectrum of undergraduates, ranging from those intending to begin the acquisition of specific linguistic and cultural proficiencies for the purpose of pursuing some career, academic or otherwise, related to these regions, to students for whom the Near East and/or Central Asia are regions with histories and cultures that are of special intellectual or personal interest. Students often combine Near Eastern studies as a double major with some other degree program that may be in a quite different discipline. For these students the NELC undergraduate major offers the important opportunity, as a core element in a broader liberal arts education, for expanding their cultural vision and understanding in ways made possible only through serious study of a language and literature other than one's own. Graduates from the BA degree have followed a wide range of post-baccalaureate paths, including further graduate study in the humanities or social sciences, professional degree programs in law or medicine, and employment with government or non-governmental organizations.
- *Instructional and Research Facilities:* The department draws on collections of books, serials, and other resources in the UW libraries that are unusually rich in the quantity and quality of items relating to Near Eastern and Central Asian languages and cultures. Students in the department's language classes make use of the University's well-equipped Language Learning Center.
- *Honors Options Available:* With College Honors (Completion of Honors core curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Undergraduate research is carried out under the supervision of faculty members. Students can also undertake research and internship opportunities while studying abroad.
- *Department Scholarships:* See departmental website for most current information.
- *Student Organizations/Associations:* There are no formal student organizations in the department, but the department frequently sponsors educational and cultural events organized by students and faculty involved in interest groups such as the Central Asian Circle or the Persian Circle.

Graduate Program

Graduate Program Coordinator

neareast@uw.edu

Master of Arts

The department offers a graduate program of studies leading to the master of arts degree, designed to provide students advanced training in at least one Near Eastern language and in a field of specialization. Students may concentrate in Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended both for students who wish to continue their studies at the doctoral level and for students who wish to pursue careers in government or business.

Admission Requirements

1. Statement of purpose
2. Sample of written academic work
3. Three letters of recommendation, of which at least two must attest to scholarly ability
4. Official transcripts from all collegiate institutions attended
5. Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years' study of the language in which they plan to concentrate.
6. Bachelor's degree from an accredited institution
7. Minimum 3.00 (or B) GPA for last 90 quarter (60 semester) credits
8. GRE scores
9. TOEFL scores for international students

Degree Requirements

36 credits

1. Reading knowledge of French or German; or, with prior approval of the student's MA committee, any other language pertinent to the student's research. To satisfy this requirement, the student normally passes a reading examination before beginning the second year of study.
2. A seminar paper representing the student's best work
3. Coursework determined in consultation with M.A. committee to prepare for written examinations.
4. A written examination consisting of four parts: (1) general culture of the Near East, (2) student's field of specialization, (3) student's language of concentration, (4) second Near Eastern language related to the language of concentration

Doctor of Philosophy

Some department faculty are part of an interdisciplinary faculty group which offers doctoral study in Near and Middle Eastern studies. See the Interdisciplinary Graduate Degree Programs section of this catalog.

Summer Programs

The department offers summer intensive language programs in Arabic, Hebrew, and Central Asian languages (Uzbek, Kazakh, Tajik, and others).

Research Facilities

UW libraries hold an extensive collection of books and materials in languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. The library participated in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials. Library staff includes Near East and Central Asia specialists. The library maintains book exchanges with the Central Asian republics, handled through the Near East and Slavic sections of the University's Suzzallo Library. Staff include an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the East Asia Library.

Financial Aid

A limited number of teaching assistantships are available for graduate students fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

Exchange Agreements

The department participates in exchange programs, sending students abroad and training students from institutions overseas. Formal UW exchange agreements exist with several universities in North Africa and the Middle East, such as American University in Cairo; Al-Akhawayn University in Ifrane, Morocco; Yarmouk University and Mu'tah University in Jordan; American University in Beirut; Hebrew University in Jerusalem; and Bogazici University in Istanbul. Department-level exchange agreements have also existed with Xinjiang University in Urumchi, China (for Uighur, Kazakh, Kirghiz), or institutions in Central Asia such as Tashkent State University, the Humanities University of Bishkek, Kyrgyzstan, or Kyrgyz State National University, Bishkek. NELC students also study at institutions in which there are not currently formal exchanges, such as the University of Damascus (for the study of Arabic and related subjects).

Course Descriptions

Arabic

ARAB 101 Elementary Arabic (5) Develops the four communicative language skills: listening, speaking, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 105 or ARAB 411 taken for credit. First in a sequence of three.

ARAB 102 Elementary Arabic (5) Develops the four communicative language skills: listening, speaking, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 105 or ARAB 411 taken for credit. Second in a sequence of three. Prerequisite: ARAB 101.

ARAB 103 Elementary Arabic (5) Develops the four communicative language skills: listening, speaking, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 105 or ARAB 411 taken for credit. Third in a sequence of three. Prerequisite: ARAB 102.

ARAB 105 Intensive Elementary Arabic (15) Develops the four communicative language skills: listening, speaking, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 101-ARAB 103, ARAB 411-ARAB 413 taken for credit. If Arabic is the student's language of admission only 10 credits count towards graduation

ARAB 199 Study Abroad (1-15, max. 15) Credit for elementary or intermediate Arabic in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

ARAB 201 Intermediate Arabic (5) VLPA Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 205 taken for credit. First in a sequence of three. Prerequisite: either ARAB 103 or ARAB 105.

ARAB 202 Intermediate Arabic (5) VLPA Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 205 taken for credit. Second in a sequence of three. Prerequisite: ARAB 201.

ARAB 203 Intermediate Arabic (5) VLPA Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 205 taken for credit. Third in a sequence of three. Prerequisite: ARAB 202.

ARAB 205 Intensive Intermediate Arabic (15) VLPA Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 201, ARAB 202, ARAB 203 taken for credit. Prerequisite: either ARAB 103 or ARAB 105.

ARAB 399 Study Abroad (1-15, max. 15) Credit for elementary or intermediate Arabic in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

ARAB 401 Current Issues in Arab Media (5) Studies authentic, unedited Arabic language materials from Arabic media. Topics include politics, economics, business, sports, and women's issues. Emphasis on developing fluency in oral and written expression through discussions, debates, presentations, and written work. Taught in Arabic. Prerequisite: ARAB 203 or 205. Offered: S.

ARAB 402 Current Issues in Arab Media (5) Studies authentic, unedited Arabic language materials from Arabic media. Topics include politics, economics, business, sports, and women's issues. Emphasis on developing fluency in oral and written expression through discussions, debates, presentations, and written work. Taught in Arabic. Prerequisite: ARAB 401.

ARAB 403 Current Issues in Arab Media (5) Studies authentic, unedited Arabic language materials from Arabic media. Topics include politics, economics, business, sports, and women's issues. Emphasis on developing fluency in oral and written expression through discussions, debates, presentations, and written work. Taught in Arabic. Prerequisite: ARAB 402.

ARAB 404 Arabic Short Stories (5) VLPA Introduces student to prominent twentieth-century Arab authors via selected examples of their short stories, read in Arabic. Emphasizes use of literature as a popular technique for teaching basic language skills (i.e. listening, speaking, reading, and writing) and language areas (i.e. vocabulary, grammar, and pronunciation). Prerequisite: either ARAB 203 or ARAB 205.

ARAB 405 Modern Arabic Poetry (3) VLPA Neoclassical poetry of the nineteenth and twentieth centuries, and the development of modern verse. Prerequisite: either ARAB 203 or ARAB 205. Instructors: DeYoung

ARAB 406 Development of Modern Arabic Prose (5) VLPA Modern essays, fiction, and ideological writings. Prerequisite: either ARAB 203 or ARAB 205.

ARAB 407 Grammatical and Lexical Arabic Texts (3) VLPA Introduction to concepts and terminology of Arabic grammar and lexicography through readings from scholars such as Sibawayh, Ibn Aqil, and Ibn Manzur. Prerequisite: either ARAB 203 or ARAB 205.

ARAB 408 Historical Texts (3) VLPA/I&S Readings in Arab historians with particular reference to scholars such as Tabari, Ibn al-Jawzi, and Ibn al-Athir. Prerequisite: either ARAB 203 or ARAB 205.

ARAB 409 Quran and Its Interpretation (3) VLPA Reading of selected passages from the Quran in relation to their interpretation in classical commentaries (tafsir) and in legal texts (ahkam al-Quran). Focus on the various types of classical scholarship applied to the text of the Quran (ulum al-Quran). Prerequisite: either ARAB 203 or ARAB 205.

ARAB 410 Islamic Theological and Mystical Literature (3) VLPA Reading of selected texts representative of Islamic theological and mystical schools. Prerequisite: either ARAB 203 or ARAB 205.

ARAB 411 Arabic through Song (5) VLPA/I&S Emphasizes history, language, and culture explored, learned, and analyzed via songs. Considers how song reflects and portrays language and its usage; current and past events; and cultural nuances. Prerequisite: either ARAB 203 or ARAB 205.

ARAB 412 Introduction to Classical Arabic (5) VLPA Reading the Qur'an, Hadith, and poetry in Classical Arabic (CA). Students study selected texts, listen to Qur'anic recitations, and poetry, mastering many advanced grammatical structures and acquiring a working vocabulary in CA. Prerequisite: ARAB 203 or ARAB 205.

ARAB 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: ARAB 423.

ARAB 496 Special Studies in Arabic (3-5, max. 15) VLPA Topics vary. Offered occasionally by visiting or resident faculty.

ARAB 499 Undergraduate Research (1-6, max. 18)

ARAB 511 Elementary Arabic (5) Develops the four communicative language skills: listening, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 515 or ARAB 411, ARAB 412, ARAB 413 taken for credit. First in a sequence of three.

ARAB 512 Elementary Arabic (5) Develops the four communicative language skills: listening, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 515 or ARAB 411, ARAB 412, ARAB 413 taken for credit. Second in a sequence of three. Prerequisite: ARAB 511.

ARAB 513 Elementary Arabic (5) Develops the four communicative language skills: listening, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 515 or ARAB 411, ARAB 412, ARAB 413 taken for credit. Third in a sequence of three. Prerequisite: ARAB 512.

ARAB 515 Intensive Elementary Arabic (15) Develops the four communicative language skills: listening, reading, and writing. Stresses communication skills and emphasizes the links between language and culture, using mainly Modern Standard Arabic, with exposure to Egyptian Colloquial Arabic. Cannot be taken for credit if ARAB 511, ARAB 512, ARAB 513, or ARAB 411, ARAB 412, ARAB 413 taken for credit. Offered: S.

ARAB 521 Intermediate Arabic (5) Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 525 taken for credit. Prerequisite: either ARAB 515 or ARAB 513.

ARAB 522 Intermediate Arabic (5) Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 525 taken for credit. Prerequisite: ARAB 521.

ARAB 523 Intermediate Arabic (5) Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 525 taken for credit. Prerequisite: ARAB 522.

ARAB 525 Intensive Intermediate Arabic (15) Explores aspects of Arab culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Students also learn more about Arab society in general and about features of Arab culture that influence the use of the language in daily life. Focuses on developing communication skills. Cannot be taken for credit if ARAB 521, ARAB 522, ARAB 523 taken for credit. Prerequisite: either ARAB 513 or ARAB 515. Offered: S.

ARAB 541 Current Issues in Arab Media (5) Studies authentic, unedited Arabic language materials from Arabic media. Topics include politics, economics, business, sports, and women's issues. Emphasis on developing fluency in oral and written expression through discussions, debates, presentations, and written work. Taught in Arabic.

ARAB 542 Current Issues in Arab Media (5) Studies authentic, unedited Arabic language materials from Arabic media. Topics include politics, economics, business, sports, and women's issues. Emphasis on developing fluency in oral and written expression through discussions, debates, presentations, and written work. Taught in Arabic.

ARAB 543 Current Issues in Arab Media (5) Studies authentic, unedited Arabic language materials from Arabic media. Topics include politics, economics, business, sports, and women's issues. Emphasis on developing fluency in oral and written expression through discussions, debates, presentations, and written work. Taught in Arabic. Prerequisite: ARAB 542

ARAB 544 Arabic Short Stories (5) VLPA Introduces student to prominent twentieth-century Arab authors via selected examples of their short stories, read in Arabic. Emphasizes use of literature as a popular technique for teaching basic language skills (i.e. listening, speaking, reading, and writing) and language areas (i.e. vocabulary, grammar, and pronunciation). Prerequisite: either ARAB 203 or 205.

ARAB 546 Development of Modern Arabic Prose (5) VLPA Modern essays, fiction, and ideological writings. Prerequisite: ARAB 523.

ARAB 551 Arabic through Song (5) Emphasizes history, language, and culture explored, learned, and analyzed via songs. Considers how song reflects and portrays language and its usage; current and past events; and cultural nuances. Prerequisite: either ARAB 523 or ARAB 525

ARAB 552 Introduction to Classical Arabic (5) Reading the Qur'an, Hadith, and poetry in Classical Arabic (CA). Students study selected texts, listen to Qur'anic recitations, and poetry, mastering many advanced grammatical structures and acquiring a working vocabulary in CA. Prerequisite: Completion of ARAB 523 or ARAB 525.

ARAB 596 Special Studies in Arabic (3-5, max. 15) Topics vary. Offered occasionally by visiting or resident faculty.

ARAB 600 Independent Study or Research (*-)

Aramaic

ARAMIC 201 Biblical Aramaic (5) VLPA Fundamentals of Aramaic grammar and the differences that distinguish Aramaic from Hebrew; includes select Aramaic portions of the Bible. Emphasis on grammar and comprehension. Designed for students with some knowledge of Hebrew. Prerequisite: either BIBHEB 103 or BIBHEB 105.

ARAMIC 423 Readings in Syriac (3) VLPA Readings from selected passages in Biblical and Christian literature with emphasis on writings of late antique and medieval Christian communities of Syria, Iraq, and Iran until the Mongol invasions. Prerequisite: ARAMIC 412. Offered: Sp.

ARAMIC 521 Biblical Aramaic (5) Fundamentals of Aramaic grammar and the differences that distinguish Aramaic from Hebrew; includes select Aramaic portions of the Bible. Emphasizes grammar and comprehension. Designed for students with some knowledge of Hebrew. Prerequisite: either BIBHEB 513 or BIBHEB 515.

Coptic

COPTIC 101 Introduction to Sahidic Coptic (5) *M. Williams* Covers elements of grammar of the Sahidic dialect of the Coptic language. Offered: A.

COPTIC 102 Reading in Coptic (5) *M. Williams* Readings from ancient Coptic literature. Offered: W.

COPTIC 103 Reading in Coptic (5) *M. Williams* Readings from ancient Coptic literature. Offered: Sp.

COPTIC 511 Introduction to Sahidic Coptic (5) *M. WILLIAMS* Covers elements of grammar of the Sahidic dialect of the Coptic language. Offered: A.

COPTIC 512 Reading in Coptic (5) *M. WILLIAMS* Readings from ancient Coptic literature. Offered: W.

COPTIC 513 Reading in Coptic (5) *M. WILLIAMS* Readings from ancient Coptic literature. Offered: Sp.

Egyptian

EGYPT 101 Hieroglyphic Egyptian I (5) Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (circa 2040-1782 BCE). Students learn to read and write basic hieroglyphics so they can read a complete Egyptian text. No prior knowledge required.

EGYPT 102 Hieroglyphic Egyptian II (5) Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (circa 2040-1782 BCE). Students learn to read and write basic hieroglyphics so they can read a complete Egyptian text. Prerequisite: EGYPT 101.

EGYPT 103 Hieroglyphic Egyptian III (5) Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (circa 2040-1782 BCE). Students learn to read and write basic hieroglyphics so they can read a complete Egyptian text. Prerequisite: EGYPT 102.

EGYPT 422 Readings in Coptic (3) VLPA Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: EGYPT 411.

EGYPT 423 Readings in Coptic (3) VLPA Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: EGYPT 411.

EGYPT 511 Hieroglyphic Egyptian I (5) Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (circa 2040-1782 BCE). Students learn to read and write basic hieroglyphics so they can read a complete Egyptian text. No prior knowledge required.

EGYPT 512 Hieroglyphic Egyptian II (5) Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (circa 2040-1782 BCE). Students learn to read and write basic hieroglyphics so they can read a complete Egyptian text. Prerequisite: EGYPT 511.

EGYPT 513 Hieroglyphic Egyptian III (5) Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (circa 2040-1782 BCE). Students learn to read and write basic hieroglyphics so they can read a complete Egyptian text. Prerequisite: EGYPT 512.

Ge'ez

GEEZ 101 Classical Ethiopic (5) One of the most important Semitic languages of the Near East and East Africa, and the classical language of modern day Ethiopia and Eritrea, a region known as the “Horn of Africa”. Introduces the basic alphabet and fundamental grammar of classical Ethiopic, or Ge'ez.

GEEZ 511 Classical Ethiopic (5) One of the most important Semitic languages of the Near East and East Africa, and the classical language of modern day Ethiopia and Eritrea, a region known as the “Horn of Africa”. Introduces the basic alphabet and fundamental grammar of classical Ethiopic, or Ge'ez.

Biblical Hebrew

BIBHEB 101 Elementary Biblical Hebrew (5) Introduction to biblical (classical) Hebrew beginning with the alphabet. Integrates core vocabulary and basic grammar with reading short selections directly from the Hebrew Bible.

BIBHEB 102 Elementary Biblical Hebrew (5) Continues the introduction to the biblical (classical) Hebrew with additional readings from the Hebrew Bible. Prerequisite: BIBHEB 101.

BIBHEB 103 Biblical Hebrew Prose (5) VLPA Explores select prose sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: BIBHEB 102.

BIBHEB 105 Intensive Elementary Biblical Hebrew (15) VLPA Intensive study of grammar with oral and written drills and reading of simple texts. Cannot be taken for credit if BIBHEB 101, BIBHEB 102, BIBHEB 103 previously taken.

BIBHEB 199 Study Abroad (1-15, max. 15) Credit for elementary Hebrew in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements.

BIBHEB 201 Biblical Hebrew Poetry (5) VLPA Explores select poetic sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: either BIBHEB 103 or BIBHEB 105.

BIBHEB 202 Inscriptions from Biblical Times (5) VLPA Surveys Northwest Semitic inscriptions that bear significantly on our understanding of Biblical history and ancient Hebrew including the Moabite stone, Israelite ostraca, Siloam engraving, Gezer calendar, Deir Alla (Gilead) inscriptions, the Asherah texts, Ammonite fragments, and Phoenician monuments. Prerequisite: BIBHEB 201.

BIBHEB 203 Biblical Prophetic Texts (5) VLPA Examines the language, style, and literary sophistication of biblical prophetic texts within the context of ancient Near Eastern prophecies. Prerequisites: Prerequisite: BIBHEB 103, BIBHEB 503, or permission of instructor.

BIBHEB 204 The Book of Job (5) VLPA Examines the language, style, and literary sophistication of the biblical Book of Job within the context of ancient near Eastern dispute poetry and correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: BIBHEB 103.

BIBHEB 205 Readings in Medieval Hebrew Poetry (3) VLPA S. NOEGEL A close examination of Medieval Hebrew poetry. Among the poems we shall study will include works by Yehudah Halevi, Shlomo ibn Gabirol, Moshe ibn Ezra, and Abraham ibn Ezra. Focus will be on the literary sophistication of this poetry. Prerequisite: BIBHEB 103/513 or MODHEB 103/513. Offered: WSp.

BIBHEB 206 Magic and the Bible: Tales of Cult and Wonder (5) VLPA S. Noegel Examines biblical Hebrew texts that raise questions concerning the degree to which ancient Israelites engaged in “magical” practices as found elsewhere in the ancient Near East. Attention is paid also to the texts' language, style, and literary aspects and to comparative materials. Prerequisite: BIBHEB 103 or permission of instructor. Offered: W.

BIBHEB 207 The Book of Proverbs (5) VLPA S. Noegel Examines the language, style, and sophistication of the biblical Book of Proverbs within the context of ancient Near Eastern proverb collections and correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: BIBHEB 103 Offered: Sp.

BIBHEB 399 Study Abroad (1-15, max. 15) Credit for intermediate Hebrew in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements.

BIBHEB 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: BIBHEB 203.

BIBHEB 496 Special Studies in Biblical Hebrew (3-5, max. 15) VLPA Topics vary.

BIBHEB 499 Undergraduate Research (1-6, max. 18)

BIBHEB 511 Elementary Biblical Hebrew (5) Introduction to biblical (classical) Hebrew beginning with the alphabet. Integrates core vocabulary and basic grammar with reading short selections directly from the Hebrew Bible.

BIBHEB 512 Elementary Biblical Hebrew (5) Continues the introduction to the biblical (classical) Hebrew with additional readings from the Hebrew Bible. Prerequisite: BIBHEB 511.

BIBHEB 513 Biblical Hebrew Prose (5) Explores select prose sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasizes close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: BIBHEB 512.

BIBHEB 515 Intensive Elementary Biblical Hebrew (1) Intensive introduction to biblical (classical) Hebrew beginning with the alphabet. Integrates core vocabulary and basic grammar with reading short selections from the Hebrew Bible. Offered: S.

BIBHEB 521 Biblical Hebrew Poetry (5) Explores select poetic sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasizes close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: either BIBHEB 513 or BIBHEB 515.

BIBHEB 522 Inscriptions from Biblical Times (5) Surveys Northwest Semitic inscriptions that bear significantly on our own understanding of Biblical history and ancient Hebrew including the Moabite stone, Israelite ostraca, Siloam engraving, Gezer calendar, Deir Alla (Gilead) inscriptions, the Asherah texts, Ammonite fragments, and Phoenician monuments. Prerequisite: BIBHEB 521.

BIBHEB 523 Biblical Prophetic Texts (5) Examines the language, style, and literary sophistication of biblical prophetic texts within the context of ancient Near Eastern prophecies. Prerequisite: BIBHEB 103, BIBHEB 503, or permission of instructor.

BIBHEB 524 The Book of Job (5) Examines the language, style, and literary sophistication of the biblical Book of Job within the context of ancient near Eastern dispute poetry and correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: BIBHEB 103 or BIBHEB 513.

BIBHEB 525 Readings in Medieval Hebrew Poetry (3) *S. NOEGEL* A close examination of Medieval Hebrew poetry. Among the poems we shall study will include works by Yehudah Halevi, Shlomo ibn Gabirol, Moshe ibn Ezra, and Abraham ibn Ezra. Focus will be on the literary sophistication of this poetry. Prerequisite: BIBHEB 103/513 or MODHEB 103/513. Offered: WSp.

BIBHEB 526 Magic and the Bible: Tales of Cult and Wonder (5) *VLPA S. Noegel* Examines biblical Hebrew texts that raise questions concerning the degree to which ancient Israelites engaged in “magical” practices as found elsewhere in the ancient Near East. Attention is paid

also to the texts' language, style, and literary aspects and to comparative materials. Prerequisite: BIBHEB 513 or permission of instructor Offered: W.

BIBHEB 527 The Book of Proverbs (5) *S. Noegel* Examines the language, style, and sophistication of the biblical Book of Proverbs within the context of ancient Near Eastern proverb collections and correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: BIBHEB 513 or permission of instructor Offered: Sp.

BIBHEB 596 Special Studies in Biblical Hebrew (3-5, max. 15) Topics vary.

BIBHEB 600 Independent Study or Research (*-)

Modern Hebrew

MODHEB 100 Introduction to Hebrew Language and Culture (2) VLPA/I&S Introduces modern Hebrew language and culture, focusing on fundamental structures of the language, the revival of Hebrew in modern times, and connections between contemporary usage and Jewish traditions. Topics include: the alphabet, the verb system, the Hebrew calendar, Jewish and Israeli holidays, names, songs, popular sayings, and more. Credit/no-credit only.

MODHEB 101 Elementary Modern Hebrew (5) Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if MODHEB 105 taken). First in a sequence of three.

MODHEB 102 Elementary Modern Hebrew (5) Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if MODHEB 105 taken). Second in a sequence of three. Prerequisite: MODHEB 101.

MODHEB 103 Elementary Modern Hebrew (5) Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if MODHEB 105 taken). Third in a sequence of three. Prerequisite: MODHEB 102.

MODHEB 105 Intensive Elementary Modern Hebrew (15) Intensive study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if MODHEB 101, MODHEB 102, MODHEB 103 taken.)

MODHEB 199 Study Abroad (1-15, max. 15) Credit for elementary Hebrew in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements.

MODHEB 200 Hebrew Conversation (2) VLPA/I&S Builds upon skills in Modern Hebrew and promotes cultural proficiency as an integrated and essential component of language learning.

Enhances communication through the acquisition and use of vocabulary and structure of the Hebrew language in authentic cultural and social contexts. Prerequisite: either MODHEB 103 or MODHEB 105. Credit/no-credit only.

MODHEB 201 Intermediate Modern Hebrew (5) VLPA Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. First in a sequence of three. Prerequisite: either MODHEB 103 or MODHEB 105.

MODHEB 202 Intermediate Modern Hebrew (5) VLPA Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Second in a sequence of three. Prerequisite: MODHEB 201.

MODHEB 203 Intermediate Modern Hebrew (5) VLPA Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Third in a sequence of three. Prerequisite: MODHEB 202.

MODHEB 399 Study Abroad (1-15, max. 15) Credit for intermediate Hebrew in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements.

MODHEB 401 Introduction to Hebrew Literature (3) VLPA Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts - short poetry, fiction, and essays - with some selections as well from Biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: MODHEB 203.

MODHEB 402 Introduction to Hebrew Literature (5) VLPA Modern Hebrew literary texts and analysis, with continued emphasis on grammar and composition. Review of language skills and dictionary work to reinforce the students' knowledge of Hebrew and to foster improved competence in reading, discussion, and writing. Also covers fundamentals of narrative theory as students practice close readings of texts. Prerequisite: MODHEB 203.

MODHEB 403 Introduction to Hebrew Literature (3) VLPA Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts short poetry, fiction, and essays with some selections as well from Biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: MODHEB 203.

MODHEB 404 Hebrew Poetry (5) VLPA Selections of poetry by prominent twentieth-century Hebrew poets whose texts comment or elaborate on biblical texts. Original source considered side-by-side with modern poetry, to examine ways recent literature models itself on, draws upon, and revises traditional sources. Prerequisite: MODHEB 203.

MODHEB 405 Hebrew Fiction (5) VLPA Selections of fiction by prominent modern Hebrew writers, including S. Y. Agnon, Aharon Appelfeld, David Shahar, Aharon Megged, and others. Prerequisite: MODHEB 203.

MODHEB 406 Hebrew Poems and Prayers (5) VLPA Introduces students to traditional Jewish prayers and examines Modern Hebrew poems that draw on these classical sources and reframe or reimagine the language of faith. Topics to be covered include: blessings, synagogue prayer services, High holiday prayers, the Sabbath, prayers of mourning, and debate over gender and prayer. Prerequisite: MODHEB 203.

MODHEB 407 Hebrew in Song (5) VLPA Selections of Israeli folksong, pop, rock, children's songs, and musika mizrahit. While building vocabulary and improving dictionary and composition skills, students examine the role of popular song in the construction of modern Hebrew culture and Israeli identity. Prerequisite: MODHEB 203.

MODHEB 408 Modern Hebrew Prose (5) VLPA N. SOKOLOFF Modern Hebrew prose texts, including essays, journalism, social media, and fiction. Emphasis on vocabulary, grammar, and composition skills. Prerequisite: MODHEB 203/523 (intermediate Modern Hebrew) or permission of instructor.

MODHEB 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: MODHEB 203.

MODHEB 496 Special Studies in Modern Hebrew (3-5, max. 15) VLPA Topics vary. Prerequisite: MODHEB 203.

MODHEB 499 Undergraduate Research (1-6, max. 18)

MODHEB 511 Elementary Modern Hebrew (5) Modern Israeli Hebrew. Covers core vocabulary, grammar, conversational text, and oral and written communications.

MODHEB 512 Elementary Modern Hebrew (5) Modern Israeli Hebrew. Covers core vocabulary, grammar, conversational text, and oral and written communications. Prerequisite: MODHEB 511.

MODHEB 513 Elementary Modern Hebrew (5) Modern Israeli Hebrew. Covers core vocabulary, grammar, conversational text, and oral and written communications. Prerequisite: MODHEB 512.

MODHEB 515 Intensive Elementary Modern Hebrew (15) Intensive study of modern Israeli Hebrew. Covers core vocabulary, grammar, conversational text, and oral and written communications. Offered: S.

MODHEB 521 Intermediate Modern Hebrew (5) Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: either MODHEB 511 or MODHEB 515.

MODHEB 522 Intermediate Modern Hebrew (5) Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: MODHEB 521.

MODHEB 523 Intermediate Modern Hebrew (5) Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: MODHEB 522.

MODHEB 542 Introduction to Hebrew Literature (5) Modern Hebrew literary texts and analysis, with continued emphasis on grammar and composition. Review of language skills and dictionary work to reinforce the students' knowledge of Hebrew and to foster improved competence in reading, discussion, and writing. Also covers fundamentals of narrative theory as students practice close readings of texts.

MODHEB 545 Hebrew Fiction (5) Selections of fiction by prominent modern Hebrew writers, including S. Y. Agnon, Aharon Appelfeld, David Shahar, Aharon Megged, and others. Prerequisite: MODHEB 523

MODHEB 546 Hebrew Poems and Prayers (5) Introduces students to traditional Jewish prayers and examines Modern Hebrew poems that draw on these classical sources and reframe or reimagine the language of faith. Topics to be converged include: blessings, synagogue prayer services, High holiday prayers, the Sabbath, prayers of mourning, and debate over gender and prayer.

MODHEB 596 Special Studies in Modern Hebrew (3-5, max. 15) Topics vary.

MODHEB 600 Independent Study or Research (*-)

Near Eastern Languages and Civilization

NEAR E 101 Gateway to the Near East (5) VLPA/I&S Provides general introduction to the peoples, cultures, and languages of the Near East, both past and present. No previous knowledge of the Near East required. Offered: W.

NEAR E 196 Introductory Studies in Near Eastern Languages and Civilizations (1-5, max. 15) I&S Offered occasionally by visitors or resident faculty. Content varies.

NEAR E 199 Study Abroad (1-15, max. 15) Credit for lower division NEAR E courses in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: A WS pS.

NEAR E 201 Introduction to the Ancient Near East (5) VLPA/I&S Surveys the peoples, places, and events of the ancient Near East. Examines the cultures of Mesopotamia, Egypt, Canaan, and Israel with an eye to each culture's cultural contributions. Pays special attention to shared cultural elements as well as distinguishing characteristics of the peoples of these regions.

NEAR E 202 Introduction to the Hebrew Bible: Old Testament (5) VLPA/I&S Examines the Hebrew Bible (Old Testament) in translation and its relationship with literatures of ancient Near East. Comparisons drawn between Biblical text and literary works of Canaan, Egypt, Greece, Mesopotamia. Emphasis on the sophisticated literary techniques employed by Biblical

writers. Cannot be taken for credit if credit earned in NEAR E 240. Offered: jointly with RELIG 240.

NEAR E 203 Introduction to the Archaeology of Western Anatolia: Cross Roads of the Ancient World (5) I&S S. SELOVER An introduction to the archaeology the western coast of Anatolia and its often-neglected place in the ancient Near Eastern and Classical worlds. The class will cover the cities of Troy and Ephesus, and the civilizations of the Phrygians, Lydians, Carians, Lycians and the Ionians in Anatolia. Offered: AWSpS.

NEAR E 207 Introduction to the Archaeology of Ancient Iran (5) I&S Introduction to the archaeology of ancient Iran (Persia) from the earliest inhabitants to the end of Sasanian period (circa 10,000 BDE-651 CE). Covers the archaeology from various time periods in chronological order, with an emphasis on the archaeology and culture of the Achaemendid (Persian) period.

NEAR E 208 Introduction To Ancient Near Eastern Archeology (5) I&S/VLPA Archaeological cultures of the ancient Near East, from 10,000 BCE to 332 BCE, including the civilizations of Mesopotamia (modern day Iraq), Egypt, the Levant (modern day Israel, Jordan, Syria and Lebanon), Anatolia (modern day Turkey) and Persia (modern day Iran).

NEAR E 229 Introduction to Islamic Civilization (5) VLPA/I&S Covers major developments in the formative, classical, and modern periods of Islamic civilization from seventh century Arabia to the contemporary Muslim world. Looks at the development of Islamic religious thought and legal practice as well as the Muslim polities, cultures, and intellectual traditions of Asia, Africa, Europe, and America. May not be taken for credit if credit earned in NEAR E 210. Offered: jointly with JSIS A 210.

NEAR E 230 Introduction to Muslim Beliefs and Practices (5) VLPA/I&S Examines the origins and development of central beliefs in various Muslim traditions; such as monotheism, prophecy, divine judgment, and predestination. Looks at ritual and socio-cultural practices in Muslim societies in Asia, Africa, and Europe. Offered: jointly with RELIG 211.

NEAR E 231 Introduction to the Quran (5) VLPA/I&S A literary, historical, and theological introduction to the Quran. Looks at the historical circumstances of the text's compilation; its collection and redaction; its narrative structure; its rhetorical strategies; its major themes; its connections to and departures from the Hebrew Bible and the New Testament; commentary and exegesis; translation; and its impact on political and religious thought. Offered: jointly with RELIG 212.

NEAR E 232 Introduction to the Modern Middle East (5) I&S Major social and political trends in the Middle East during the 18th, 19th, and 20th centuries. Basic principles of Islam and its diversity, changing balance of power during the early modern period; European colonialism and withdrawal; pan-Arabism, nationalism, feminism and religious resurgence. Offered: jointly with JSIS A 215.

NEAR E 243 Iranian Culture and Civilization (5) VLPA/I&S Explores the culture and civilization of this Middle Eastern society through a multi-disciplinary approach that includes such manifestations as architecture, carpet-weaving, story-telling, and the composition of poetry.

NEAR E 244 Voices of the Iranian Revolution (5) VLPA/I&S Includes critical readings of the 1979 Iranian Revolution as represented in essays, fiction, poetry, memoir, speeches, film, and other arts. Examines the ways that writers, artists, politicians, and intellectuals have depicted the origins and development of the Islamic Republic and the legacy of the revolution in Iranian society and culture today.

NEAR E 257 Introduction to Central Asian Turkic Literature in Translation (5) VLPA Provides an overview of the major periods of Central Asian Turkic literature including: the Pre-Islamic Period (eighth-tenth centuries), the Islamic Period (tenth-twentieth centuries), the Modern Period (1905-1991), and the Post-Colonial period (1991-present). Centers on the Turkic peoples who lived under Russia and Soviet colonial rule.

NEAR E 258 Introduction to Kyrgyz Writer Chingiz Aitmatov (5) VLPA/I&S Introduces the form and content of the work of the Kyrgyz writer, Chingiz Aitmatov, while also examining his life and influence on the people of Central Asia.

NEAR E 259 Introduction to the Writers and Intellectuals of Central Asia under Soviet Colonialism (5) VLPA/I&S, DIV Discusses the lives and works of Kazakh, Kyrgyz Turkmen, and Uzbek poets and writers and intellectuals who lived during the Soviet period from 1917-1991.

NEAR E 261 Turkic Peoples of Central Asia (3) I&S History of the Turkic peoples, AD 552 to present. Emphasis on current status of Turkic peoples in Central Asia. Geographical distribution, demographic data, reactions and adaptations to changes resulting from the 1917 revolution. Turkic viewpoint on past and present developments. Offered: jointly with JSIS A 261.

NEAR E 262 Central Asian Country Profiles: Introduction to Kazakhstan (5) VLPA/I&S Examines developments in Kazakhstan after the country gained independence from the Soviet Union in 1991. Part of a series on Central Asia.

NEAR E 264 Central Asian Country Profiles: Introduction to Uzbekistan (5) VLPA/I&S Survey of the Uzbek people and their history. Examines developments in Uzbekistan after the country gained independence from the Soviet Union in 1991. Part of a series on Central Asia.

NEAR E 265 Introduction to Central Asian Turkic Literature in Translation (3) VLPA Introduces the foundations of modern Uzbek literature; the common Turkic literature of the eighth-century and the more recent Chagatay-Uzbek literature. Focuses on post-Soviet literature since 1991. After independence Uzbek writers were able to express themselves without censorship and prosecution.

NEAR E 266 The Modern Middle East and Central Asia (5) I&S Ethnographic overview of Muslim societies in the middle east and central Asia from various anthropological perspectives. Examines the unity and diversity of Muslim communities and acquaints students with the significant linguistic, cultural, and political diversity of Muslim societies. Helps students develop an understanding of Islam as a lived experience.

NEAR E 267 Folktales Along the Silk Road (3) VLPA/I&S Introduces student to the Silk Road connecting China and Europe through the cities of Samarkand, Bukhara, and Constantinople, now Istanbul. Applies comparative-historical and sociological method in folktale research, i.e. compares Western European stories and motifs with tales from the Silk Road while paying attention to the environment of storytelling.

NEAR E 268 Introduction to the Silk Road (5) I&S Introduces students to the Silk Road as a site of cultural exchange between peoples, and of political, economic, and intellectual exchange between regions and continents. Themes include ecology, empire, ethnicity, language, religion, and the arts. Considers the Silk Road as a forerunner and symbol of modern globalization. Offered: jointly with JSIS A 268.

NEAR E 271 Cultural History of Turkey: From Empire to Nation (5) VLPA/I&S Topics include: social, economic, and political structures of Ottoman and Turkish Anatolia; language, literature, and artistic tradition; social status of women, literacy and illiteracy, the secular enterprise of Kemal Ataturk; Islamic fundamentalism, educational institutions, Kurdish nationalism.

NEAR E 285 Religion, Violence, and Peace: Patterns Across Time and Tradition (5) I&S Investigates the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with HUM 205/RELIG 205; W.

NEAR E 286 Themes in Near Eastern Literature (5) VLPA/I&S Significant and interesting aspects of Near Eastern culture and society as represented by literary themes. Aspects of Near Eastern life and art such as women, minority groups, mysticism, and modern literature. Content varies. May not be taken for credit if credit earned in NEAR E 330.

NEAR E 287 The Near East in Song (2, max. 8) VLPA Surveys popular song as it has shaped modern culture and identity in the near East. Topics vary. May be repeated for credit if the student has not previously studied the same topic with the same instructor. All texts in English; no previous knowledge of other languages required. Credit/no-credit only.

NEAR E 296 Special Studies in Near Eastern Languages and Civilization (1-5, max. 15) I&S Offered occasionally by visitors or resident faculty.

NEAR E 301 Art of the Ancient Near East (3) VLPA S. NOEGEL Examines the artistic remains of ancient Egypt and Mesopotamia (3000 BCE-550 BCE), with some attention to

architecture. Topics examined include: art as ritual power, the relationship between text and image, art and cosmology, visual propaganda, and the legacy of ancient Near Eastern art.

NEAR E 305 The Biblical Prophets (3) VLPA/I&S Explores the Biblical prophets (in translation) within their Near Eastern contexts. Historicity, literary and rhetorical sophistication, and ideological agendas. Seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible required. Offered: jointly with RELIG 315.

NEAR E 306 The History of Biblical Interpretation (3) VLPA/I&S Traces Biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a “hands-on” approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with RELIG 306.

NEAR E 307 From Israelites to Jews: the First Six Centuries BCE (3) VLPA/I&S Traces the Israelites, from the Babylonian destruction of the Jerusalemite Temple (586 BCE) to events following the destruction of the second Temple (first century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible required. Offered: jointly with JEW ST 317.

NEAR E 308 Gender and Sexuality in the Ancient Near East (3) I&S/VLPA, DIV Investigates and critically assesses trends and topics in recent studies of gender and sexuality in the ancient Near East, pertaining especially to texts, artifacts, art and images from ancient Mesopotamia, Egypt and the Levant. Explores ancient Near Eastern taxonomies and functions of gender and sexuality, and examines social, political and religious forces that inform and construct gendered categories of gods, humans, and their worlds. Prerequisite: No prerequisites; recommended: NEAR E 201, Introduction to the Ancient Near East Offered: AWSp.

NEAR E 309 Death and Afterlife in the Ancient World (3) VLPA/I&S Explores human yearnings, obsessions, fears, and aspirations associated with death and afterlife by examining major political, military, social, economic, religious, literary, artistic, and architectural phenomena directly connected to the way ancient cultures, such as Egypt, Mesopotamia, Israel, and the Levant, have conceptualized death.

NEAR E 311 The Archaeology of Biblical Israel (5) I&S Archaeology of ancient Israel (southern Levant). Covers the known archaeological material and Biblical and other contemporaneous textual sources to explore this topic, covering the archaeological cultures from the Middle Bronze Age to the end of the Babylonian Exile (2000-300 BCE).

NEAR E 312 Looting and Loss: The Recent Destruction of Cultural Heritage Sites in the Middle East (5) I&S Explores the history and context of recent politicization, looting, and destruction of archaeological and cultural sites in the Middle East, as well as the associated human toll, with primary focus on the current state of modern Syria and Iraq. Covers the politics of archaeology in the Middle East from the First Gulf War to more recent times.

NEAR E 313 Ancient Technologies of the Near East (5) I&S Introduction to ancient pyrotechnic technologies. Covers the laboratory methods used by modern archaeologists to study ancient ceramics, glass and metals, the methodologies behind the creation of these materials, and the invention of these technologies in the Near East, with brief comparisons with China and the New World. Offered: jointly with ARCHY 313.

NEAR E 314 The Archeology of Early Islam (5) I&S Introduction to the archaeology of early Islam, from 632 to 1000 CE with the study of the rise (and occasional fall) of Islam in Arabia, Egypt, and Spain/Portugal through a survey of the local architecture and material culture. Students study key archaeological sites and histories of these regions.

NEAR E 315 Israel: Dynamic Society and Global Flashpoint (5) I&S, DIV Introduces the people, institutions, and culture of Israel in the context of larger global forces. Examines domestic, regional, and international elements, both historically and in the contemporary period, that have shaped Israel's culture, politics, and special role in world affairs. Topics include nationalism, ethnicity, politics, religion, film, literature, and culture. Offered: jointly with JSIS A 314/POL S 314.

NEAR E 316 Israeli Identities (5) VLPA, DIV Examines fiction and film, as well as selected poetry, popular songs, and essays, to explore diverse groups within contemporary Israeli society. Topics include the sabra ideal, holocaust survivors, Sephardic/Mizrahi communities, religious and secular Jews, Israel's Arab minority, and questions of gender.

NEAR E 317 Jewish Life in Literature and Film (5) VLPA/I&S Major themes of Jewish life treated in modern narrative and cinema. Topics include religious tradition and modernity. Jewish immigration to America, responses to the Holocaust and Zionism. Offered: jointly with JEW ST 318.

NEAR E 318 Literature and the Holocaust (5) VLPA, DIV Examines fiction, poetry, memoir, diaries, monuments, film, and pop culture from several languages and cultural milieus, with emphases on English and Hebrew. Topics include survivor testimony, shaping of collective memory, the second generation, Holocaust education and children's literature, gender and the Holocaust, and fantasy and humor as responses to catastrophe. May not be taken for credit if credit earned in NEAR E 441. Offered: jointly with C LIT 318.

NEAR E 320 Prayer and Poetry in the Jewish and Islamic Traditions (5) VLPA/I&S Examines elements of traditional Jewish and Muslim prayers and worship with poems that draw on those classical sources. Introduces students to the language and practice of prayer for both Jews and Muslims. Examines poets from Europe, the Americas, Israel, and the Islamic world. Taught in English.

NEAR E 321 Israel in Film (2) VLPA/I&S Presents films that introduce students to important aspects of Israeli culture. Topics include: Zionism, the Holocaust, immigration, religious and secular communities, mizrachim, Russians, army service, war and trauma, LGBT themes, and Israel's Arab minority.

NEAR E 325 Modern Hebrew Literature in English (3) VLPA Major developments in Hebrew literature from the Enlightenment to the current Israeli literature.

NEAR E 329 Classical Arabic Literature in Translation (5) VLPA Examines development of Arabic literature from its beginnings through the fall of the Abbasid dynasty and the Mongols. Coincided with period when Arabic language and literature were dominant forces in Islamic civilization. Topics include: Pre-Islamic poetry, impact of Islam on the literature, court poetry, and the rise of Arabic prose.

NEAR E 330 Colonialism, Nationalism, and the Modern Arabic Novel (5) VLPA/I&S Examines how representative novels from the modern canon in Arabic have both endorsed and critiqued aspects of nationalism and colonialist ideology.

NEAR E 331 Thousand and One Nights (5) VLPA Examines the major story cycles of the Thousand-and-One-Nights collection in their social and historical contexts.

NEAR E 332 Arab American Writers (5) VLPA/I&S Explores the influences of Arab American writing both in the United States and the Arab world during the nineteenth and twentieth centuries. Discusses issues of emigration to the United States from the Arab world and its impact on the formation of a distinctive Arab American identity.

NEAR E 333 Prophecy in Judaism, Christianity, and Islam (3) I&S Looks at the phenomenon of prophecy in Jewish, Christian, and Muslim thought and writing from antiquity to modernity. Traces the development of prophetic expression in the Hebrew Bible, the New Testament, and the Quran. Surveys major themes and covers various eras, including prophecy in the American context.

NEAR E 334 Culture of the Arab World (5) VLPA/I&S General survey of the linguistic, geographical, historical, social, religious, and cultural aspects of the modern Arab world, including the Arabic language, family, and the Arab experience in the United States. Examines Arab American relations, the role of the past and of social change, and Arab art and music.

NEAR E 335 Language Conflict and Identity in the Middle East and North Africa (5) VLPA/I&S Explores social and linguistic aspects of the languages and cultures of the Middle East and North Africa, focusing on the relationship between language and national/ethnic identity from the perspective of group conflict. Considers language policies in colonial and post-colonial states, and individual strategies of accommodation and resistance to these policies.

NEAR E 336 Islam in Jewish Contexts, Judaism in Muslim Contexts (5) VLPA/I&S An introduction to the Jewish-Muslim encounter: a look at exchange, symbiosis, liminality, and confrontation between these two kindred religio-cultural systems, from the rise of Islam, to the end of its Classical Age - six centuries wherein the majority of the world's Jews lived among Muslim majorities.

NEAR E 337 Egyptian Cinema: Glamour on the Nile (5) VLPA History and development of Egyptian cinema. Examines a range of topics, including: the transition to sound, the

differentiation into film genres, the nationalization of the film industry in the 1960s, the role of the director as auteur, and the recovery of the Egyptian film industry after 2000.

NEAR E 343 Classical Persian Literature in Translation (5) VLPA/I&S Introduces themes, forms, and historical development of Persian literature from the 10th to 19th centuries CE. Topics includes lyric and epic forms, Sufism, premodern poetics, and reception history of English translations. Reading include Rumi, Hafez, Khayyam, Ferdowsi, Sa'di among others. No prior knowledge of Persian language or literature required.

NEAR E 344 Modern Persian Literature in Translation (5) VLPA/I&S Introduces Persian literature from early modernizing projects in the 19th century up to today. Includes poetry, fiction, essays, and film. Examines various ways that Persian writers define modernity in their own works and respond to writers in other languages and traditions. No prior knowledge of Persian language or literature required.

NEAR E 345 Persian Literature in Translation (5) VLPA Designed to familiarize students with an expanding collection of works translated from Persian literature, both classical and modern, into English. Focuses on a few representative texts and offers interpretations of the culture through close readings. Prior acquaintance with Persian culture not required.

NEAR E 350 Archaeology of Ancient Near Eastern Warfare and Empire (5) I&S S. Selover Surveys the archaeological remnants of war, warfare, and empire in the ancient Near East, from the rise of earliest cities to the Roman period (circa 3000 BCE-30 CE), with a focus on the cultural consequences of violence and warfare on various ancient Near Eastern cultures.

NEAR E 357 Peoples and Cultures of Central and Inner Asia (5) I&S Introduces Central and Inner Asia with a multidisciplinary, comparative survey of the cultures and societies of contemporary China's Inner Asia (Mongolia, Xinjiang-Eastern Turkestan, Tibet, and Manchuria), the contemporary Muslim Central Asian republics (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan), and the adjacent areas of Afghanistan and Iran. Offered: jointly with ANTH 357/JSIS A 357.

NEAR E 358 Islam and Muslims in China (5) I&S Introduces the lived experiences of Muslims in contemporary China. Examines Muslims' understanding of their faith; the relationship of Islam to the political, economic, and social lives of Muslims; how Islam shapes people's sense of culture and identity; and unity and diversity of various Chinese Muslim communities.

NEAR E 359 Language and Ethnic Identity in China (5) VLPA/I&S Analysis of the political, social, and linguistic contexts of languages of China's fifty-six nationalities and the ongoing process of Chinese nation-state building efforts from sociolinguistic and ethnographic perspectives. Examines the relationship of linguistic diversity to social and cultural identity and the role of language in the construction of ethnic identities.

NEAR E 360 Oral Literature of the Turkic Peoples of Central Asia I: The Heroic Epos (3) VLPA/I&S Representative heroic poems of Central Asian Turkic peoples now living in the

Central Asian Republics and China. Origin of the heroic epos, its relation to the romantic epos and other oral literary genres. Art of the singer and his role in nomadic Turkic society. Emphasis on Manas, the monumental epos of Kirghiz.

NEAR E 371 Love and Empire: Cultural History of the Ottoman Empire through Literature (3-5) VLPA/I&S Approaches Ottoman literature through translations and scholarly articles in English. Evaluates this particular literary tradition as an imperial production, through an analysis and critical reading of course materials.

NEAR E 372 Modern Turkish Literature in Translation (3) VLPA Covers major theoretical issues concerning Ottoman court literature and Turkish epic and troubadour poetry. Major writers and works of modern Turkish literature read and analyzed in their social, political, and theoretical contexts. Previous study of Turkish literature not required.

NEAR E 385 Modern Near Eastern Literature in English Translation (3) VLPA Contemporary cultures of the Middle East studied through exposure to a representative sample of their literary work. Texts selected address major issues in Middle Eastern societies, e.g., tradition versus modernity, national identity and the challenge of the West, Arab-Israeli conflict.

NEAR E 386 The Middle East through Cinema (5, max. 12) VLPA Analyzes the function of cinema in shaping communal and individual identities in Middle Eastern cultures. Examines topics including religious transformation, violence, identity, gender, immigration, and exile through film screenings, discussions, and supplementary readings. May not be taken for credit if credit earned in NEAR E 410.

NEAR E 391 Writing Seminar for NELC Majors and Graduate Students (3) VLPA S. *NOEGEL* Seminar offers undergraduate majors and graduate students in the department with a close, systematic, and sustained experience with expository writing. All writing and rewriting will focus on subjects that relate to the Near East. Offered: A.

NEAR E 396 Intermediate Studies in Near Eastern Languages and Civilization (1-5, max. 15) Offered occasionally by visitors or resident faculty.

NEAR E 399 Study Abroad (1-15, max. 15) Credit for NEAR E 200-400-level courses in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

NEAR E 429 Islamic Mystical Literature in English (5) VLPA Readings from the works of principal Sufi writers and poets.

NEAR E 430 Muslim Scripture, Historiography, and Exegesis (3) VLPA/I&S Examines the origins and development of early and classical Muslim thought. Provides an in-depth survey of the three key genres of early and classical Muslim writing: scripture (Quran), historiography (Maghazi, Sira, and Tabaqat), and exegesis (Tafsir and Ta'wil). Offered: jointly with RELIG 430.

NEAR E 431 Arabic Linguistics (5) VLPA/I&S Studies Arabic through modern linguistic analysis. Covers Arabic's phonology, morphology, syntax, and semantics, and discusses the history of Arabic as well as the frequently debated issue of diglossia in Arabic-speaking countries. Equal attention given to the linguistic features of both FuS'Ha Arabic and modern Arabic dialects. Prerequisite: ARAB 102.

NEAR E 432 Arabic Sociolinguistics (5) VLPA/I&S Focuses on how Arabic is used by native speakers in various social contexts. Examines diglossia (co-existence of Modern Standard Arabic with the Arabic vernacular), linguistic variation in the Arab world, and the effect of variables such as education, social status, politics, and gender. Prerequisite: ARAB 101.

NEAR E 441 Literature and the Holocaust (5) VLPA Examines fiction, poetry, memoir, diaries, monuments, film, and pop culture from several languages and cultural milieus, with emphases on English and Hebrew. Topics include survivor testimony, shaping of collective memory, the second generation, Holocaust education and children's literature, gender and the Holocaust, and fantasy and humor as responses to catastrophe.

NEAR E 457 Turkic Linguistics (5) VLPA Survey of the nature and structure of the Turkic languages, focusing on phonology, morphology, syntax, lexicon, writing systems, history and cultural context, subgrouping and diversification, and linguistic theoretical principles for their description and analysis.

NEAR E 485 Digital Media: The Middle East and Central Asia (5) VLPA Hands-on, project-based approach to imaging, new media, electronic text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research on the Middle East and Central Asia.

NEAR E 486 Methodologies in Near Eastern Studies (5) Investigates prevalent approaches through a survey of scholarship on Near and Middle Eastern civilizations across time periods, cultures, and communities. Examines discourses developed on polytheistic and monotheistic religions, imperial and nationalist social systems, and ideological frameworks, such as Orientalism. Offered: jointly with JSIS A 491.

NEAR E 490 Supervised Study (1-6, max. 18) Special work in Near Eastern studies for graduates and undergraduates.

NEAR E 491 Senior Seminar in Near Eastern Languages and Civilization (2) Covers issues of methodology as well as linguistic, philosophical, literarily critical, rhetorical critical etc. topics. Focuses on developing academic presentation and communication skills. Includes supervised readings and group discussion. Credit/no-credit only.

NEAR E 496 Advanced Studies in Near Eastern Languages and Civilization (3-5, max. 15) I&S Offered occasionally by visitors or resident faculty. Content varies.

NEAR E 497 Honors Thesis (5) Participants identify a specific thesis topic and conduct individual research under the direction of a thesis adviser, culminating in an Honors thesis. Open only to juniors and seniors in the Departmental Honors Program.

NEAR E 498 Senior Essay (5) VLPA/I&S Supervised individual research and writing of a major paper during the senior year. Offered: AWSp.

NEAR E 499 Undergraduate Research (1-6, max. 18)

NEAR E 501 Art of the Ancient Near East (3) S. NOEGEL Examines the artistic remains of ancient Egypt and Mesopotamia (3000 BCE-550 BCE), with some attention to architecture. Topics examined include: art as ritual power, the relationship between text and image, art and cosmology, visual propaganda, and the legacy of ancient Near Eastern art.

NEAR E 505 The Biblical Prophets (3) Noegel Explores the Biblical prophets (in translation) within their Near Eastern contexts. Historicity, literary and rhetorical sophistication, and ideological agendas. Seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible required.

NEAR E 506 The History of Biblical Interpretation (3) Noegel Traces Biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a 'hands-on' approach to the material and explores various hermeneutics by applying them in class.

NEAR E 507 From Israelites to Jews: the First Six Centuries BCS (3) Noegel Traces the Israelites, from the Babylonian destruction of the Jerusalemite Temple (586 BCE) to events following the destruction of the second Temple (first century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible required.

NEAR E 508 Gender and Sexuality in the Ancient Near East (3) I&S/VLPA, DIV Investigates and critically assesses trends and topics in recent studies of gender and sexuality in the ancient Near East, pertaining especially to texts, artifacts, art and images from ancient Mesopotamia, Egypt and the Levant. Explores ancient Near Eastern taxonomies and functions of gender and sexuality, and examines social, political and religious forces that inform and construct gendered categories of gods, humans, and their worlds. Prerequisite: No prerequisites; recommended: NEAR E 201, Introduction to the Ancient Near East Offered: AWSp.

NEAR E 509 Death and Afterlife in the Ancient World (3) Explores human yearnings, obsessions, fears, and aspirations associated with death and afterlife by examining major political, military, social, economic, religious, literary, artistic, and architectural phenomena directly connected to the way ancient cultures, such as Egypt, Mesopotamia, Israel, and the Levant, have conceptualized death.

NEAR E 511 The Archaeology of Biblical Israel (5) Archaeology of ancient Israel (southern Levant). Covers the known archaeological material and Biblical and other contemporaneous textual sources to explore this topic, covering the archaeological cultures from the Middle Bronze Age to the end of the Babylonian Exile (2000-300 BCE).

NEAR E 513 Ancient Technologies of the Near East (5) Introduction to ancient pyrotechnic technologies. Covers the laboratory methods used by modern archaeologists to study ancient ceramics, glass and metals, the methodologies behind the creation of these materials, and the invention of these technologies in the Near East, with brief comparisons with China and the New World. Offered: jointly with ARCHY 513.

NEAR E 515 Israel: Dynamic Society and Global Flashpoint (5) *Barzilai, Burstein, Migdal, Pianko, Sokoloff* Introduces the people, institutions, and culture of Israel in the context of larger global forces. Examines domestic, regional, and international elements, both historically and in the contemporary period, that have shaped Israel's culture, politics, and special role in world affairs. Topics include nationalism, ethnicity, politics, religion, film, literature, and culture.

NEAR E 520 Prayer and Poetry in the Jewish and Islamic Traditions (5) Examines elements of traditional Jewish and Muslim prayers and worship with poems that draw on those classical sources. Introduces students to the language and practice of prayer for both Jews and Muslims. Examines poets from Europe, the Americas, Israel, and the Islamic world. Taught in English.

NEAR E 529 Classical Arabic Literature in Translation (5) Examines development of Arabic literature from its beginnings through the fall of the Abbasid dynasty and the Mongols. Coincided with period when Arabic language and literature were dominant forces in Islamic civilization. Topics include: Pre-Islamic poetry, impact of Islam on the literature, court poetry, and the rise of Arabic prose.

NEAR E 530 Colonialism, Nationalism, and the Modern Arabic Novel (5) *DeYoung* Examines how representative novels from the modern canon in Arabic have both endorsed and critiqued aspects of nationalism and colonialist ideology.

NEAR E 531 Thousand and One Nights (5) Examines the major story cycles of the Thousand-and-One-Nights collection in their social and historical contexts.

NEAR E 532 Arab American Writers (5) Explores the influences of Arab American writing both in the United States and the Arab world during the nineteenth and twentieth centuries. Discusses issues of emigration to the United States from the Arab world and its impact on the formation of a distinctive Arab American identity.

NEAR E 533 Prophecy in Judaism, Christianity, and Islam (5) Looks at the phenomenon of prophecy in Jewish, Christian, and Muslim thought and writing from antiquity to modernity. Traces the development of prophetic expression in the Hebrew Bible, the New Testament, and the Quran. Surveys major themes and covers various eras, including prophecy in the American context.

NEAR E 534 Culture of the Arab World (5) General survey of the linguistic, geographical, historical, social, religious, and cultural aspects of the modern Arab world, including the Arabic language, family, and the Arab experience in the United States. Examines Arab American relations, the role of the past and of social change, and Arab art and music.

NEAR E 535 Language Conflict and Identity in the Middle East and North Africa (5)
VLPA/I&S Explores social and linguistic aspects of the languages and cultures of the Middle East and North Africa, focusing on the relationship between language and national/ethnic identity from the perspective of group conflict. Considers language policies in colonial and post-colonial states, and individual strategies of accommodation and resistance to these policies.

NEAR E 536 Islamic Law (2-5) Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with LAW B 556.

NEAR E 537 Muslim Scripture, Historiography, and Exegesis (5) Examines the origins and development of early and classical Muslim thought. Provides an in-depth survey of the three key genres of early and classical Muslim writing: scripture (Quran), historiography (Maghazi, Sira, and Tabaqat), and exegesis (Tafsir and Ta'wil).

NEAR E 538 Arabic Linguistics (5) **VLPA/I&S** Studies Arabic through modern linguistic analysis. Covers Arabic's phonology, morphology, syntax, and semantics, and discusses the history of Arabic as well as the frequently debated issue of diglossia in Arabic-speaking countries. Equal attention given to the linguistic features of both FuS'Ha Arabic and modern Arabic dialects. Prerequisite: ARAB 512.

NEAR E 539 Arabic Sociolinguistics (5) Focuses on how Arabic is used by native speakers in various social contexts. Examines diglossia (co-existence of Modern Standard Arabic with the Arabic vernacular), linguistic variation in the Arab world, and the effect of variables such as education, social status, politics, and gender. Prerequisite: NEAR E 534.

NEAR E 540 Islamic Poetry and Poetics (3)

NEAR E 541 Islam in Jewish Contexts, Judaism in Muslim Contexts (3) An introduction to the Jewish-Muslim encounter: a look at exchange, symbiosis, liminality, and confrontation between these two kindred religio-cultural systems, from the rise of Islam, to the end of its Classical Age - six centuries wherein the majority of the world's Jews lived among Muslim majorities.

NEAR E 543 Classical Persian Literature in Translations (5) Introduces themes, forms, and historical development of Persian literature from the 10th to 19th centuries CE. Topics includes lyric and epic forms, Sufism, premodern poetics, and reception history of English translations. Reading include Rumi, Hafez, Khayyam, Ferdowsi, Sa'di among others. No prior knowledge of Persian language or literature required.

NEAR E 544 Modern Persian Literature in Translations (5) Introduces Persian literature from early modernizing projects in the 19th century up to today. Includes poetry, fiction, essays,

and film. Examines various ways that Persian writers define modernity in their own works and respond to writers in other languages and traditions. No prior knowledge of Persian language or literature required.

NEAR E 545 Persian Literature in Translations (5) Designed to familiarize students with an expanding collection of works translated from Persian literature, both classical and modern, into English. Focuses on a few representative texts and offers interpretations of the culture through close readings. Prior acquaintance with Persian culture not required.

NEAR E 557 Turkic Linguistics (5) Survey of the nature and structure of the Turkic languages, focusing on phonology, morphology, syntax, lexicon, writing systems, history and cultural context, subgrouping and diversification, and linguistic theoretical principles for their description and analysis.

NEAR E 558 Peoples and Cultures of Central and Inner Asia (5) Introduces Central and Inner Asia with a multidisciplinary, comparative survey of the cultures and societies of contemporary China's Inner Asia (Mongolia, Xinjiang-Eastern Turkestan, Tibet, and Manchuria), the contemporary Muslim Central Asian republics (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan), and the adjacent areas of Afghanistan and Iran. Offered: jointly with ANTH 522/JSIS D 572.

NEAR E 559 Islam and Muslims in China (5) Introduces the lived experiences of Muslims in contemporary China. Examines Muslims' understanding of their faith; the relationship of Islam to the political, economic, and social lives of Muslims; how Islam shapes people's sense of culture and identity; and unity and diversity of various Chinese Muslim communities.

NEAR E 560 Language and Ethnic Identity in China (5) Analysis of the political, social, and linguistic contexts of languages of China's fifty-six nationalities and the ongoing process of Chinese nation-state building efforts from sociolinguistic and ethnographic perspectives. Examines the relationship of linguistic diversity to social and cultural identity and the role of language in the construction of ethnic identities.

NEAR E 571 Love and Empire: Cultural History of the Ottoman Empire through Literature (3) Survey of the nature and structure of the Turkic languages, focusing on phonology, morphology, syntax, lexicon, writing systems, history and cultural context, subgrouping and diversification, and linguistic theoretical principles for their description and analysis.

NEAR E 572 Modern Turkish Literature in Translation (3) Covers major theoretical issues concerning Ottoman court literature and Turkish epic and troubadour poetry. Major writers and works of modern Turkish literature read and analyzed in their social, political, and theoretical contexts. Previous study of Turkish literature not required.

NEAR E 584 Egyptian Cinema: Glamour on the Nile (5) History and development of Egyptian cinema. Examines a range of topics, including: the transition to sound, the

differentiation into film genres, the nationalization of the film industry in the 1960s, the role of the director as auteur, and the recovery of the Egyptian film industry after 2000.

NEAR E 585 Digital Media: The Middle East and Central Asia (5) Hands-on, project-based approach to imaging, new media, electronic text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research on the Middle East and Central Asia.

NEAR E 586 Middle East through Cinema (5, max. 12) Analyzes the function of cinema in shaping communal and individual identities in Middle Eastern cultures. Examines topics including religious transformation, violence, identity, gender, immigration, and exile through film screenings, discussions, and supplementary readings.

NEAR E 587 Teaching Arabic as a Foreign/Second Language (3) Theory and practice of communicative language teaching; current developments in foreign-language teaching; evaluation of teaching materials; includes participation at the departmental and university-wide fall orientation; required for beginning teaching assistants of Near Eastern Languages. Credit/no-credit only.

NEAR E 588 Methodologies in Near Eastern Studies (5) Investigates prevalent approaches through a survey of scholarship on Near and Middle Eastern civilizations across time periods, cultures, and communities. Examines discourses developed on polytheistic and monotheistic religions, imperial and nationalist social systems, and ideological frameworks, such as Orientalism.

NEAR E 589 Research Methods (3) Introduction to research in Islamic civilization. Research methods, primary sources, evidence and documentation, reference works, transliteration systems, scholarly writing style.

NEAR E 590 Seminar on Near Eastern Civilization and Thought (3-5, max. 30) Content varies.

NEAR E 591 Writing Seminar for NELC Majors and Graduate Students (3) VLPA S. *NOEGEL* Seminar offers undergraduate majors and graduate students in the department with a close, systematic, and sustained experience with expository writing. All writing and rewriting will focus on subjects that relate to the Near East. Offered: A.

NEAR E 596 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) Offered occasionally by visitors or resident faculty. Content varies.

NEAR E 600 Independent Study or Research (*-)

NEAR E 700 Master's Thesis (*)

Persian

PRSAN 101 Elementary Persian (5) Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. First in a sequence of three.

PRSAN 102 Elementary Persian (5) Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Second in a sequence of three. Prerequisite: PRSAN 101.

PRSAN 103 Elementary Persian (5) Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Third in a sequence of three. Prerequisite: PRSAN 102.

PRSAN 105 Intensive Elementary Persian (15) Intensive study of grammar with oral and written drills and reading of simple texts. Cannot be taken for credit if PRSAN 101, PRSAN 102, PRSAN 103 previously taken.

PRSAN 106 Intensive Elementary Tajik (15) Intensive study of grammar with oral and written drill and reading of selected texts in Tajik, the literary language spoken and written in the Central Asian Republic of Tajikistan.

PRSAN 199 Study Abroad (1-15, max. 15) Credit for elementary Persian in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

PRSAN 201 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. First in a sequence of three. Prerequisite: either PRSAN 103 or PRSAN 105.

PRSAN 202 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Second in a sequence of three. Prerequisite: PRSAN 201.

PRSAN 203 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Third in a sequence of three. Prerequisite: PRSAN 202.

PRSAN 399 Study Abroad (1-15, max. 15) Credit for elementary or intermediate Persian in an approved Study Abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

PRSAN 401 Introduction to Persian Literature (5) VLPA Selected texts from modern and classical Persian poetry and prose. Provides insights into Iranian culture and its past and present achievements in literature. Prepares the student for a more comprehensive and critical study of Persian literature. Prerequisite: PRSAN 203. Offered: S.

PRSAN 402 Classical Persian Literature: A Survey (5) VLPA History of Persian literature from Rudaki to Hafiz. Studies epic, lyric, and mystic traditions placed in historical settings. Covers the most important genres such as the Qasida, the Ghazal, the Ruba' i and the Masnavi. Prerequisite: PRSAN 203. Offered: S.

PRSAN 403 Modern Persian Literature: A Survey (5) VLPA Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forugh. Prerequisite: PRSAN 203.

PRSAN 404 Critical Readings in Modern Persian (5) Designed to develop critical reading and writing skills. Heavily focused on literary texts. Prerequisite: PRSAN 203. Offered: S.

PRSAN 405 Media Persian (5) Designed to develop critical readings and writing skills for accessing and interpreting contemporary Persian media, including newspapers, popular press, and broadcast media. Prerequisite: either PRSAN 203 or PRSAN 423.

PRSAN 454 The Epic Tradition in Iran (3) VLPA Focuses on the Shahnameh of Firdawsi: explores the ancient legends that gave rise to it and follows the fortunes of epic poetry after Firdawsi, touching on the rise, development, and decline of romance in classical Persian literature. Prerequisite: PRSAN 423.

PRSAN 455 The Persian Ghazal (3) VLPA The Ghazal as the leading medium for lyrical expression in classical Persian tradition. Follows this genre from conception to culmination in the poetry of Hafiz. Conventions and devices of the Ghazal. Development placed in historical and social context. Prerequisite: PRSAN 433.

PRSAN 456 Sufism: Thought and Expression (3) VLPA/I&S Dynamics of mystical thought and expression as evolved in the writings of the great Sufi masters and reflected in the poetry of Sana' i, Attar, Rumi, and others. The fundamental unity of the mystical vision, with special attention to the peculiarities of individual style and expression. Prerequisite: PRSAN 433.

PRSAN 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: PRSAN 423.

PRSAN 496 Special Studies in Persian (3-5, max. 15) VLPA Topics vary.

PRSAN 499 Undergraduate Research (1-6, max. 18)

PRSAN 511 Elementary Persian (5) Includes conversation, pronunciation, and graded reading. Covers Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words.

PRSAN 512 Elementary Persian (5) Includes conversation, pronunciation, and graded reading. Covers Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 511.

PRSAN 513 Elementary Persian (5) Includes conversation, pronunciation, and graded reading. Covers Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 512.

PRSAN 515 Intensive Elementary Persian (15) Intensive study of grammar with oral and written drills and reading of simple texts. Offered: S.

PRSAN 521 Intermediate Persian (5) Study of simple tests with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: either PRSAN 513 or PRSAN 515.

PRSAN 522 Intermediate Persian (5) Study of simple tests with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 521.

PRSAN 523 Intermediate Persian (5) Study of simple tests with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 522.

PRSAN 541 Introduction to Persian Literature (5) Selected texts from modern to classical Persian poetry and prose. Provides insights into Iranian culture and its past and present achievements in literature. Prepares the student for a more comprehensive and critical study of Persian literature. Prerequisite: PRSAN 523.

PRSAN 542 Classical Persian Literature: A Survey (5) Advanced Persian language. History of Persian literature from Rudaki to Hafiz. Studies epic, lyric, and mystic traditions placed in historical settings. Covers the most important genres such as the Qasida, the Ghazal, the Ruba'i and the Masnavi. Prerequisite: PRSAN 523.

PRSAN 543 Modern Persian Literature: A Survey (5) Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forugh. Prerequisite: PRSAN 523.

PRSAN 544 Critical Readings in Modern Persian (5) Advanced-level Persian study designed to develop critical reading and writing skills. Heavily focused on literary texts. Prerequisite: PRSAN 523.

PRSAN 545 Media Persian (5) Advanced Persian language study designed to develop skills for accessing and interpreting contemporary Persian media, including newspapers, popular press, and broadcast media. Prerequisite: PRSAN 523.

PRSAN 596 Special Studies in Persian (3-5, max. 15) Topics vary.

Kazakh

KAZAKH 101 Elementary Kazakh (5) Emphasizes on the four basic language skills: listening, speaking, reading, and writing in Kazakh. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kazakh language through the cultural contexts. Cannot be taken for credit if KAZAKH 105 taken. First in a sequence of three.

KAZAKH 102 Elementary Kazakh (5) Emphasizes on the four basic language skills: listening, speaking, reading, and writing in Kazakh. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kazakh language through the cultural contexts. Cannot be taken for credit if KAZAKH 105 taken. Second in a sequence of three. Prerequisite: KAZAKH 101.

KAZAKH 103 Elementary Kazakh (5) Emphasizes on the four basic language skills: listening, speaking, reading, and writing in Kazakh. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kazakh language through the cultural contexts. Cannot be taken for credit if KAZAKH 105 taken. Third in a sequence of three. Prerequisite: KAZAKH 102.

KAZAKH 105 Intensive Elementary Kazakh (15) Intensive study of grammar, with oral and written drill and reading of simple texts in Kazak. Covers first-year Kazak. Cannot be taken for credit if KAZAKH 101, KAZAKH 102, KAZAKH 103 taken.

KAZAKH 201 Intermediate Kazakh (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Kazakh. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kazakh. Prerequisite: either KAZAKH 103 or KAZAKH 105.

KAZAKH 202 Intermediate Kazakh (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Kazakh. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kazakh. Prerequisite: KAZAKH 201.

KAZAKH 203 Intermediate Kazakh (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Kazakh. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kazakh. Prerequisite: KAZAKH 202.

KAZAKH 205 Intensive Intermediate Kazakh (15) VLPA Allows students to complete second-year Kazak in one quarter. Reading of selected texts in modern literary Kazak, with emphasis on grammar, syntax, and oral practice. Prerequisite: either KAZAKH 103 or KAZAKH 105.

KAZAKH 401 Kazakh through Culture I (5) VLPA Designed to increase your functional proficiency in speaking, reading, writing, and comprehending the Kazakh language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Kazakh. Prerequisite: KAZAKH 203.

KAZAKH 402 Kazakh through Culture II (5) VLPA Designed to increase your functional proficiency in speaking, reading, writing, and comprehending the Kazakh language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Kazakh. Prerequisite: KAZAKH 401.

KAZAKH 403 Kazakh through Culture III (5) VLPA Designed to increase your functional proficiency in speaking, reading, writing, and comprehending the Kazakh language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Kazakh. Prerequisite: KAZAKH 402.

KAZAKH 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: either KAZAKH 205 or TKIC 405.

KAZAKH 496 Special Studies in Kazakh (3-5, max. 15) VLPA Topics vary.

KAZAKH 499 Undergraduate Research (3-5, max. 15) For Turkic language and literature majors.

KAZAKH 511 Elementary Kazakh (5) Emphasizes on the four basic language skills: listening speaking, and writing. Covers basic Kazakh grammar and introduces some aspect of Kazakh culture.

KAZAKH 512 Elementary Kazakh (5) Emphasizes on the four basic language skills: listening speaking, and writing. Covers basic Kazakh grammar and introduces some aspect of Kazakh culture. Prerequisite: KAZAKH 511.

KAZAKH 513 Elementary Kazakh (5) Emphasizes on the four basic language skills: listening speaking, and writing. Covers basic Kazakh grammar and introduces some aspect of Kazakh culture. Prerequisite: KAZAKH 512.

KAZAKH 521 Intermediate Kazakh (5) Builds on first-year Kazakh. Explores aspects of Kazakh culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Prerequisite: KAZAKH 513.

KAZAKH 522 Intermediate Kazakh (5) Builds on first-year Kazakh. Explores aspects of Kazakh culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Prerequisite: KAZAKH 521.

KAZAKH 523 Intermediate Kazakh (5) Builds on first-year Kazakh. Explores aspects of Kazakh culture and emphasizes all skills of language acquisition: listening, speaking, reading, and writing. Prerequisite: KAZAKH 522.

KAZAKH 541 Kazakh through Culture I (5) Designed to increase functional proficiency in speaking, reading, writing, and comprehending the Kazakh language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Prerequisite: KAZAKH 523.

KAZAKH 542 Kazakh through Culture II (5) Designed to increase functional proficiency in speaking, reading, writing, and comprehending the Kazakh language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Prerequisite: KAZAKH 541.

KAZAKH 543 Kazakh through Culture III (5) Designed to increase functional proficiency in speaking, reading, writing, and comprehending the Kazakh language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Prerequisite: KAZAKH 522.

KAZAKH 596 Special Studies in Kazakh (3-5, max. 15) Topics vary.

Kyrgyz

KYRGYZ 101 Elementary Kyrgyz (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Kyrgyz. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kyrgyz language through the cultural contexts. First in a sequence of three.

KYRGYZ 102 Elementary Kyrgyz (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Kyrgyz. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kyrgyz language through the cultural contexts. Second in a sequence of three. Prerequisite: KYRGYZ 101.

KYRGYZ 103 Elementary Kyrgyz (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Kyrgyz. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kyrgyz language through the cultural contexts. Third in a sequence of three. Prerequisite: KYRGYZ 102.

KYRGYZ 105 Intensive Elementary Kyrgyz (15) Intensive study of grammar with oral and written drill of selected texts.

KYRGYZ 201 Intermediate Kyrgyz (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading, and writing and to deepen an understanding of the cultural context of Kyrgyz. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kyrgyz. First in a sequence of three. Prerequisite: KYRGYZ 103.

KYRGYZ 202 Intermediate Kyrgyz (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading, and writing and to deepen an understanding of the cultural context of Kyrgyz. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kyrgyz. Second in a sequence of three. Prerequisite: KYRGYZ 201.

KYRGYZ 203 Intermediate Kyrgyz (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading, and writing and to deepen an understanding of the cultural context of Kyrgyz. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kyrgyz. Third in a sequence of three. Prerequisite: KYRGYZ 202.

KYRGYZ 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: either KYRGYZ 105 or TKIC 403.

KYRGYZ 496 Special Studies in Kryrgyz (3-5, max. 15) VLPA Topics vary.

KYRGYZ 499 Undergraduate Research (3-5, max. 15) For Turkic language and literature majors.

KYRGYZ 511 Elementary Kyrgyz (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Kyrgyz. Focuses on exchanging real-life information in the

context of the native-speaking environment and understanding Kyrgyz language through the cultural contexts. First in a sequence of three.

KYRGYZ 512 Elementary Kyrgyz (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Kyrgyz. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kyrgyz language through the cultural contexts. Second in a sequence of three. Prerequisite: KYRGYZ 511.

KYRGYZ 513 Elementary Kyrgyz (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Kyrgyz. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Kyrgyz language through the cultural contexts. Third in a sequence of three. Prerequisite: KYRGYZ 512.

KYRGYZ 521 Intermediate Kyrgyz (5) Designed to strengthen and develop further skills in listening, speaking, reading, and writing and to deepen an understanding of the cultural context of Kyrgyz. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kyrgyz. First in a sequence of three. Prerequisite: KYRGYZ 513.

KYRGYZ 522 Intermediate Kyrgyz (5) Designed to strengthen and develop further skills in listening, speaking, reading, and writing and to deepen an understanding of the cultural context of Kyrgyz. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kyrgyz. Second in a sequence of three. Prerequisite: KYRGYZ 521.

KYRGYZ 523 Intermediate Kyrgyz (5) Designed to strengthen and develop further skills in listening, speaking, reading, and writing and to deepen an understanding of the cultural context of Kyrgyz. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Kyrgyz. Third in a sequence of three. Prerequisite: KYRGYZ 523.

KYRGYZ 596 Special Studies in Kyrgyz (3-5, max. 15) Topics vary.

Uyгур

UYGUR 101 Elementary Uyгур (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Uyгур. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Uyгур language through the cultural contexts. Cannot be taken for credit if UYGUR 105 taken. First in a sequence of three.

UYGUR 102 Elementary Uyгур (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Uyгур. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Uyгур language through the cultural contexts. Cannot be taken for credit if UYGUR 105 taken. Second in a sequence of three. Prerequisite: UYGUR 101.

UYGUR 103 Elementary Uygur (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Uygur. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Uygur language through the cultural contexts. Cannot be taken for credit if UYGUR 105 taken. Third in a sequence of three. Prerequisite: UYGUR 102.

UYGUR 105 Intensive Elementary Uygur (15) Covers all four linguistic skills: reading, writing, speaking, and listening. Cannot be taken for credit if UYGUR 101, UYGUR 102, UYGUR 103 taken.

UYGUR 201 Intermediate Uygur (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Uygur. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Uygur. First in a sequence of three. Prerequisite: either UYGUR 103 or UYGUR 105.

UYGUR 202 Intermediate Uygur (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Uygur. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Uygur. Second in a sequence of three. Prerequisite: UYGUR 201.

UYGUR 203 Intermediate Uygur (5) VLPA Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Uygur. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Uygur. Third in a sequence of three. Prerequisite: UYGUR 202.

UYGUR 401 Uygur through Culture I (5) Designed to increase functional proficiency in speaking, reading, writing and comprehending the Uygur language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 203.

UYGUR 402 Uygur through Culture II (5) Designed to increase functional proficiency in speaking, reading, writing and comprehending the Uygur language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 401.

UYGUR 403 Uygur through Culture III (5) Designed to increase functional proficiency in speaking, reading, writing and comprehending the Uygur language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 402.

UYGUR 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: either UYGUR 203 or TKIC 429.

UYGUR 496 Special Studies in Uygur (3-5, max. 15) VLPA Topics vary.

UYGUR 499 Undergraduate Research (3-5, max. 15) For Turkic language and literature majors.

UYGUR 511 Elementary Uygur (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Uygur. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Uygur language through the cultural contexts. First in a sequence of three.

UYGUR 512 Elementary Uygur (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Uygur. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Uygur language through the cultural contexts. Second in a sequence of three. Prerequisite: minimum grade of 2.0 in UYGUR 511.

UYGUR 513 Elementary Uygur (5) Emphasizes the four basic language skills: listening, speaking, reading, and writing in Uygur. Focuses on exchanging real-life information in the context of the native-speaking environment and understanding Uygur language through the cultural contexts. Third in a sequence of three. Prerequisite: minimum grade of 2.0 in UYGUR 512.

UYGUR 521 Intermediate Uygur (5) Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Uygur. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 513.

UYGUR 522 Intermediate Uygur (5) Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Uygur. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 521.

UYGUR 523 Intermediate Uygur (5) Designed to strengthen and develop further skills in listening, speaking, reading and writing and to deepen an understanding of the cultural context of Uygur. Emphasis on the expansion and refinement of linguistic and communicative skills learned in elementary Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 522.

UYGUR 541 Uygur through Culture I (5) Designed to increase functional proficiency in speaking, reading, writing and comprehending the Uygur language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 523.

UYGUR 542 Uygur through Culture II (5) Designed to increase functional proficiency in speaking, reading, writing and comprehending the Uygur language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic

context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 541.

UYGUR 543 Uygur through Culture III (5) Designed to increase functional proficiency in speaking, reading, writing and comprehending the Uygur language through reading and discussion of contemporary sociocultural and sociopolitical topics in a culturally authentic context. Emphasis on the expansion and refinement of linguistic and communicative skills learned in intermediate Uygur. Prerequisite: minimum grade of 2.0 in UYGUR 542.

UGARIT 202 Ugaritic II (5) VLPA Introduction to the Ugaritic (Canaanite) language of ancient Ugarit (modern Ras Shamra, circa fourteenth century BCE). Introduces the cuneiform alphabet and distinctive grammatical features; proceeds to an inductive reading of the Ugaritic

tablets. Texts include the Epic of Aqhat, the Baal Epic, and the Epic of Kret. Second in a three course sequence. Prerequisite: UGARIT 201.

UGARIT 203 Ugaritic III (5) VLPA Introduction to the Ugaritic (Canaanite) language of ancient Ugarit (modern Ras Shamra, circa fourteenth century BCE). Introduces the cuneiform alphabet and distinctive grammatical features; proceeds to an inductive reading of the Ugaritic tablets. Texts include the Epic of Aqhat, the Baal Epic, and the Epic of Kret. Third in a three course sequence. Prerequisite: UGARIT 202.

UGARIT 521 Ugaritic I (5) Introduction to the Ugaritic (Canaanite) language of ancient Ugarit (modern Ras Shamra, circa fourteenth century BCE). Introduces the cuneiform alphabet and distinctive grammatical features; proceeds to an inductive reading of the Ugaritic tablets. Texts include the Epic of Aqhat, the Baal Epic, and the Epic of Kret. First in a three course sequence. Prerequisite: either ARAB 513, ARAB 515, MODHEB 513, or MODHEB 515.

UGARIT 522 Ugaritic II (5) Introduction to the Ugaritic (Canaanite) language of ancient Ugarit (modern Ras Shamra, circa fourteenth century BCE). Introduces the cuneiform alphabet and distinctive grammatical features; proceeds to an inductive reading of the Ugaritic tablets. Texts include the Epic of Aqhat, the Baal Epic, and the Epic of Kret. Second in a three course sequence. Prerequisite: UGARIT 521.

UGARIT 523 Ugaritic III (5) Introduction to the Ugaritic (Canaanite) language of ancient Ugarit (modern Ras Shamra, circa fourteenth century BCE). Introduces the cuneiform alphabet and distinctive grammatical features; proceeds to an inductive reading of the Ugaritic tablets. Texts include the Epic of Aqhat, the Baal Epic, and the Epic of Kret. Third in a three course sequence. Prerequisite: UGARIT 522.

Neurobiology

Program Overview

318 Hitchcock

Neurobiology offers students an intense introduction to the study of nervous systems. Faculty in both the College of Arts and Sciences and the School of Medicine teach courses in the major. Students study the cellular and molecular properties of single nerve cells and the connections among them and learn how these properties determine animal behavior and human disease.

Undergraduate Program

Adviser

318 Hitchcock, Box 355320

206-616-3982

The Neurobiology Program offers the following program of study:

- The Bachelor of Science degree with a major in neurobiology

Bachelor of Science

Program Admission Requirements

Applicants are considered in the following groups: Direct Freshman Admission and Regular Admission. Admission is competitive; meeting minimum standards guarantees consideration but not acceptance. Application deadline is the second Friday in October each year except for Direct Freshman Admission.

Direct Freshman Admissions

The department enrolls up to 15 percent of its incoming class directly from high school. Students accepted to the UW who indicate neurobiology as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school and generally have received a minimum 1400 on the SAT (mathematics and verbal sections) or a minimum 30 on the ACT. Admission is for autumn quarter only.

Regular Admission

1. BIOL 180, BIOL 200, BIOL 220, with minimum 2.0 grade in each
2. Completion of most supporting coursework in physics, math, and chemistry recommended (see specific course lists, below), with minimum 2.50 GPA in any such work completed at time of application

Major Requirements

Minimum 86 credits

1. *Supporting coursework (minimum 48 credits):*
 - a. *Chemistry:* One of the following three sequences: CHEM 120, CHEM 220, CHEM 221; CHEM 142, CHEM 152 (or CHEM 143, CHEM 153), CHEM 223 CHEM 224; CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165), CHEM 237, CHEM 238, CHEM 239 (or CHEM 335, CHEM 336, CHEM 337). Third sequence recommended. Organic chemistry laboratories not required. (15-27 credits)
 - b. *Physics:* Pathway 1 - PHYS 114, PHYS 115; Pathway 2 (recommended) - PHYS 121, PHYS 122. (8 to 10 credits)
 - c. *Mathematics:* Two quarters of calculus (MATH 124, MATH 125, or Q SCI 291, Q SCI 292) (10 credits)
 - d. *Introductory Biology (minimum 15 credits):* BIOL 180, BIOL 200, BIOL 220 (15 credits)
2. *Introduction to Neurobiology (10 credits):* NBIO 301, NBIO 302.
3. *Advanced courses in neurobiology (12 credits):* NBIO 401, NBIO 402, NBIO 403, NBIO 404.
4. *Electives:* Minimum 16 credits from a wide variety of 400-level courses in the biological sciences. See adviser for list of courses. Courses not listed may be allowed with permission of program director. Students may apply up to 7 credits of undergraduate research toward the 16 elective credits.
5. Minimum cumulative 2.00 GPA for courses applied to the major.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Throughout the core sequence of neurobiology, students gain a deep understanding of the basic concepts of nervous system function and learn many of the basic techniques used to study nerve cells. Students also learn how to analyze neurophysiological data, and compose and present results. Graduates pursue careers in medicine, public health, education, pharmaceutical sales, computing, and graduate study.
- *Instructional and Research Facilities:* Laboratories are required with introductory courses. (NBIO 301 and NBIO 302). The program offers state-of-the-art facilities and equipment for each course.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Most neurobiology students participate in undergraduate research with faculty from both the College of Arts and Sciences and the School of Medicine.
- *Program Scholarships:* None offered.
- *Student Organizations/Associations:* Beta Beta Beta, the honor society for biological study; Alpha Epsilon Delta, the national premedical honorary society.

Course Descriptions

NBIO 198 The Biology of Human Consciousness (5) NW W. Moody An overview of the basic physiology and anatomy of the human nervous system, then explore a series of topics where direct experiments have given us a view of the biological mechanisms that explain high-level brain functions - language, memory, object recognition, the attachment of emotion to people we know and the sensation of time. Recommended: Those with an interest in psychology, neurology, general science or the brain Offered: A.

NBIO 301 Introduction to Cellular and Molecular Neurobiology (5) NW Introduces students to the physiological and molecular properties of individual nerve cells and the synaptic connections between them, and to principles of nervous system development. Includes weekly laboratory sessions. Prerequisite: BIOL 220. Instructors: Moody Offered: W.

NBIO 302 Introduction to Systems and Behavioral Neurobiology (3/5) NW M. Bosma, J. Sisneros Introduces neuroethology, i.e., the mechanisms by which neurons and the synaptic connections among them produce sensory perceptions and complex behavioral outputs. Available with or without weekly laboratory sessions. Prerequisite: NBIO 301. Offered: A.

NBIO 401 Systems Neurobiology (3) NW Introduces students to the anatomical and physiological organization of the major sensory, motor, and associative systems of the mammalian brain. Behavioral data used to stress functional integration of systems. Includes gross brain anatomy demonstration and computer tutorials. Prerequisite: NBIO 301. Instructors: Robinson Offered: Sp.

NBIO 402 Diseases of the Nervous System (3) NW Introduces the basic mechanisms of mammalian nervous system function through the study of human neurological diseases that result from specific disruption of neuronal signaling. Prerequisite: NBIO 401. Instructors: Froener, Horwitz Offered: W.

NBIO 403 Systems and Behavioral Neurobiology (3) NW Topics include information processing in sensory and motor systems, sensory-motor integration, learning, and memory. Using examples from the field of neuroethology, encourages students to work independently on problems taken from the recent neurobiological research literature. Prerequisite: NBIO 401. Instructors: Kim Offered: W.

NBIO 404 Neuropharmacology (3) NW Actions of drugs on the brain at clinical, cellular, and molecular levels. Therapeutic use of drugs in treatment of neurological and psychiatric diseases. Abuse of drugs and the mechanisms of addiction, tolerance, and withdrawal. Prerequisite: NBIO 401. Instructors: Stella Offered: Sp.

NBIO 405 Neural Computation and Engineering Laboratory (3) NW *L. Johnson Dyhr* Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods. Prerequisite: Either AMATH 342, BIOL 162, or BIOL 220; and one of the following: MATH 308, AMATH 301, or AMATH 352. Offered: jointly with BIOEN 466.

NBIO 440 Topics in Current Neurobiology Research (2, max. 6) NW Prerequisite: NBIO 302. Credit/no-credit only.

NBIO 450 Current Research Literature in Neurobiology (2, max. 6) NW Weekly journal club in neurobiology. Students read and discuss original research articles in neurobiology, centered around a specific topic each quarter. Prerequisite: BIOL 220. Credit/no-credit only.

NBIO 490 Seminar in Computational Neuroscience (1-3, max. 6) NW Supervised readings and group discussions in computational neuroscience. Credit/no-credit only.

NBIO 496 Peer Teaching Facilitator in Neurobiology (5, max. 10) M. KENNEDY For undergraduates assisting in Neurobiology courses as facilitators. Peer Facilitators assist with laboratories, attend lectures, and attend weekly course meetings, gaining direct course experience. Does not include independent teaching or grading. Credit/no-credit only. Offered: AW.

NBIO 499 Individual Research in Neurobiology (3-6, max. 18) Students carry out projects in laboratories of program faculty. Prerequisite: NBIO 302.

Philosophy

Department Overview

361 Savery

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

Undergraduate Program

Adviser

361 Savery, Box 353350

206-543-5855

philadv@uw.edu

The department offers the following programs of study:

- The Bachelor of Arts degree with a major in philosophy
- The Bachelor of Arts degree with a major in history and philosophy of science, offered jointly with the [Department of History](#)
- A minor in philosophy

The department also administers the interdisciplinary minor in [ethics](#).

Bachelor of Arts

Philosophy

Suggested First- and Second-Year College Courses: Introductory courses in symbolic logic, social philosophy, major problems of philosophy, and history of philosophy. Courses to develop writing, language, and analytic skills.

Department Admission Requirements

Minimum 2.00 cumulative GPA and completion of 10 credits of philosophy coursework

Major Requirements

50 credits, to include:

1. One course from PHIL 115, PHIL 120, or an upper-division course in logic
2. One course from PHIL 320, PHIL 330, PHIL 335, or PHIL 340 (undergraduate adviser must approve substitutions)
3. One course from PHIL 322, PHIL 332, PHIL 342, or 400-level courses in the same areas (undergraduate adviser must approve substitutions)
4. At least four UW philosophy courses at the 400 level, excluding PHIL 484
5. At least 25 credits through the UW
6. Minimum 2.00 cumulative GPA for all philosophy courses taken

History and Philosophy of Science

Suggested First- and Second-Year College Courses: PHIL 120, PHIL 160. Courses that develop writing skills. Introductory science courses and mathematics courses through calculus.

Department Admission Requirements

1. HSTCMP 311, HSTCMP 312; PHIL 160 or PHIL 460; PHIL 120, each with a minimum 2.0 grade
2. Completion of 10 credits toward the Natural World (science) requirement (see below), each course with a minimum 2.0 grade
3. Minimum UW 2.00 GPA
4. Completion of 10 credits of composition/writing courses with a minimum 2.0 grade for each course. This requirement may be met by freshman English composition courses, “W” courses, or any courses in which the student has written a graded paper (to be reviewed by HPS faculty) of at least 10 pages.

Major Requirements

85 credits

1. *Core Courses (25 credits):* HSTCMP 311, HSTCMP 312, HSTCMP 390; PHIL 160 or PHIL 460; PHIL 120. Minimum 2.0 grade in each course and overall minimum 2.50 GPA.
2. *Electives:* 25 credits from the following, of which at least 10 must be PHIL courses and at least 5 must be HIST courses (or others upon petition): ESS 404, HIST 211, HIST 215, HIST 310, HIST 313 (or ASTR 313), HIST 314, HIST 315, HIST 316, HIST 317 (also MHE 422), HIST 318 (also MHE 424), HIST 412; PHIL 243, PHIL 350, PHIL 360, PHIL 406, PHIL 450, PHIL 460 (if PHIL 160 taken), PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, PHIL 483. Minimum 2.0 grade in each class.
3. *Capstone (5 credits):* Completion of HPS 400, with a minimum 2.0 grade
4. *Science Component:* 30 credits Natural World (NW) courses from anthropology, astronomy, atmospheric sciences, biology, chemistry, computer science, earth and space

sciences, economics, environmental studies, mathematics, physics, psychology, and sociology, with a minimum 2.50 GPA in these courses and a minimum 2.0 grade in each course. At least 15 of the credits must be outside mathematics.

Minor

Minor Requirements: 30 credits

1. PHIL 115 or PHIL 120, or an upper-division course in logic
2. At least 15 UW philosophy credits at the 300 level or above, excluding PHIL 484.
3. 10 philosophy elective credits at any level

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduates of the Department of Philosophy acquire considerable skills in abstract thinking, analysis, and critical writing (constructing and critiquing arguments). Because of these skills, philosophical training is invaluable in almost any area of life. Recent graduates have been successful in software development, financial planning, journalism, teaching, and law. A few go on to graduate school and become professional philosophers.

Students' work is subjected to careful critical scrutiny. As a result, students benefit from philosophy courses with an increased competence in expository clarity, logical rigor, and analytical skill.

Philosophy is an excellent undergraduate major for pre-professional students. It is perhaps ideal for those who aspire to work in the legal profession. The history and philosophy of science major is of particular interest to those planning careers in the sciences. Courses in ethics offer students in any field the opportunity to think clearly about the normative dimensions of their career choices. Because the skills of philosophical analysis can be applied widely, philosophy is always a good complementary second degree for any major, whether it is in the physical sciences, social sciences, arts, or humanities.

- *Instructional and Research Facilities:* The Philosophy Writing Center provides a free tutoring service to any student writing a philosophical paper.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department offers internship credits for students participating in the philosophy of children program. Students may also arrange for internship credit with individual faculty. See adviser for details.
- *Department Scholarships:* The Kenneth Clatterbaugh scholarship acknowledges a student with financial need who has outstanding academic merit and commitment to philosophy. The Kenneth R. Parker Award for Excellence in Community Service honors an undergraduate philosophy major or minor who has blended her or his studies in

philosophy with a volunteer-based community project. The recipient receives a \$500 scholarship. A donation of \$250 is made on behalf of the recipient to a community organization of the student's choice. See adviser for details.

- *Student Organizations/Associations:* The undergraduate student club, Lyceum, is dedicated to the informal discussion of philosophical issues.

Of Special Note: The department offers a new majors seminar for those wishing to explore the major.

Graduate Program

Graduate Program Adviser
361 Savery, Box 353350
206-543-5863
philinfo@uw.edu

The department offers programs of study leading to the master of arts and doctor of philosophy degrees, the MA program serving as the initial stage of the PhD program. The department's Program on Values in Society (POV) offers an interdisciplinary Graduate Certificate in Ethics.

Master of Arts

Admission Requirements

Fulfilling requirements below guarantees consideration but not acceptance.

1. Three letters of recommendation written on the recommender's departmental letterhead.
2. Writing sample of academic philosophical work (approximately 8-15 pages; 2500-5000 words) written for a course in philosophy. Applicants are allowed one writing sample only.
3. Official GRE scores (verbal, quantitative, and analytical writing).
4. Personal 300-500 word statement of the applicant's reasons for doing graduate work in philosophy at the UW and his or her professional objectives
5. Complete set of unofficial college transcripts (official transcripts required upon matriculation)
6. Undergraduate major in philosophy recommended although not required.
7. International applicants refer to UW Graduate School policies (including English proficiency required for employment as a teaching assistant).

Degree Requirements

All students, whether or not they have earned an MA at another institution, must complete the MA requirements before entering the PhD program.

A two-year, non-thesis program; no language requirement.

36 credits minimum

1. **Formal Methods Requirement:** Either a minimum 3.0 grade in a graduate-level logic or inductive reasoning course (PHIL 470, PHIL 471, PHIL 472, PHIL 474, PHIL 483, or PHIL 570; or a 400-level course in another department with suitable formal content. Part-time students must satisfy this requirement by the time they submit master's papers.
2. **Distribution Requirement:** At least three courses in each of the following three areas:
 - a. **Area One**
 - i. Greek Philosophy -- PHIL 430, PHIL 431, PHIL 433, PHIL 520
 - ii. Modern Philosophy -- PHIL 422, PHIL 436, PHIL 437, PHIL 438, PHIL 522
 - iii. Recent Philosophy -- PHIL 426, PHIL 526
 - b. **Area Two**
 - i. Logic and Philosophy of Mathematics -- PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 570
 - ii. Philosophy of Science -- PHIL 459, PHIL 460, PHIL 466, PHIL 481, PHIL 482, PHIL 483, PHIL 560, PHIL 564, PHIL 566, PHIL 574
 - iii. Philosophy of Mind -- PHIL 463, PHIL 464, PHIL 563
 - iv. Philosophy of Language -- PHIL 453, PHIL 479
 - v. Epistemology -- PHIL 450, PHIL 490, PHIL 550
 - vi. Metaphysics -- PHIL 456, PHIL 556, PHIL 587
 - c. **Area Three**
 - i. Ethics -- PHIL 412, PHIL 413, PHIL 415, PHIL 416, PHIL 417, PHIL 418, PHIL 440, PHIL 538, PHIL 540
 - ii. Philosophy of Art -- PHIL 445, PHIL 446, PHIL 545
 - iii. Philosophy of History -- PHIL 465, PHIL 565
 - iv. Social and Political Philosophy -- PHIL 406, PHIL 407, PHIL 408, PHIL 409, PHIL 410, PHIL 411, PHIL 414, PHIL 461, PHIL 510, PHIL 514
 - v. Philosophy of Religion-- PHIL 467
3. **Course Requirement:** Students complete 11 courses (numbered 400 or above) in philosophy, with a minimum 3.0 grade in each course. At least four courses must be seminars. (12 courses including 6 seminars are required for the PhD. Students should if possible complete all course requirements during the master's portion of the program.)
4. **Master's Qualifying Papers:** Students submit a qualifying paper at the end of the second year. (Part-time students submit their paper for evaluation upon completion of 11 courses in philosophy.)

5. **Evaluation:** Students completing the above requirements are (a) awarded an MA and admitted to the PhD program; (b) awarded an MA and invited to revise and resubmit a qualifying paper a second time, or prepare a new qualifying paper; (c) awarded a terminal MA; or (d) dropped from the program without a degree.
6. **Satisfactory Progress:** Students not yet admitted to the PhD program must take at least two courses (10 credits) per quarter with a minimum 3.0 grade.
7. **Other Courses:** Students may use up to three approved courses outside philosophy. (Such courses do not automatically satisfy the twelve-course requirement.)

Doctor of Philosophy

Admission Requirements

Based on level of performance with the MA requirements. (See above.)

Degree Requirements

Minimum 90 credits (60 credits minimum beyond the master's degree)

1. General Requirements:

- a. General written examination (dissertation proposal, from master's qualifying papers)
- b. General oral examination (defense of the dissertation proposal)
- c. Dissertation
- d. Final examination

Master's papers constitute the written portion of the general examination.

2. **Course Requirement:** Minimum 12 graduate-level courses in philosophy (six of which are seminars) with a minimum 3.0 grade in each (courses and seminars taken to fulfill MA requirements may count toward this total).
3. **Proseminar and Literature Review:** PHIL500, proseminar, autumn and spring of third year; literature review, autumn quarter
4. **Language Requirement:** Determined by the student's Supervisory Committee. No departmental language requirement. However, in writing a dissertation a student must be able to deal with primary sources in the original language. Also, for particular areas of study, language courses or demonstration of proficiency may be required.
5. **Satisfactory Progress:** Determined by the student's Supervisory Committee.

Financial Aid

Graduate students are admitted only if they can be offered some financial support. Typically students receive teaching assistantships, and the Graduate School makes some research

assistantships available on a competitive basis. Funding packages are typically for five years and require satisfactory academic progress.

Graduate Certificate in Ethics

Facilitates graduate research in ethics. Designed to provide non-philosophy graduate or professional students the knowledge and skills necessary for integrating ethics and ethics scholarship into their chosen field.

Open only to students already enrolled in other graduate degree programs at the University of Washington.

Certificate Requirements

15 credits

1. Selection of a faculty adviser from the Program on Values in Society (POV) core faculty
2. One core course
3. VALUES 511 or VALUES 512 (5 credits)
4. Two other approved graduate level values-laden courses specific to the student's field of study (6-8 credits). Elective courses from the student's home department may be eligible (maximum 6 credits of overlap, but no core courses overlapped).
5. VALUES 513 (2 credits)

Course Descriptions

History and Philosophy of Science

HPS 400 Colloquium in the History and Philosophy of Science (5) I&S/NW L. HANKINSON NELSON, B. HEVLY, A. WOODY Examines issues from the perspectives of both history and philosophy. Prerequisite: either HSTCMP 311, HSTCMP 312, HSTCMP 313, HSTCMP 314, HSTCMP 315, HSTCMP 317, HSTCMP 318, or HSTCMP 412; either PHIL 350, PHIL 360, PHIL 450, PHIL 460, PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, or PHIL 483.

Philosophy

PHIL 100 Introduction to Philosophy (5) I&S C. MARSHALL, M. ROSENTHAL, A. WOODY Major philosophical questions relating to such matters as the existence of God, the foundations of knowledge, the nature of reality, and the nature of morality. Approach may be either historical or topical. Offered: AWSpS.

PHIL 102 Contemporary Moral Problems (5) VLPA/I&S Blake, A. Moore Philosophical consideration of some of the main moral problems of modern society and civilization, such as abortion, euthanasia, war, and capital punishment. Topics vary.

PHIL 110 Introduction to Social and Political Philosophy (5) I&S An introduction to political theories such as conservatism, liberalism, and socialism and their treatment of select social issues.

PHIL 114 Philosophical Issues in the Law (5) I&S R. MOORE Analysis and critical assessment of various philosophical issues in law and legal reasoning. Material drawn from actual law cases, as well as writings by contemporary philosophers of law and lawyers. Topics include criminal responsibility, civil disobedience, abortion, enforcement of morals. Special legal or philosophical training not required.

PHIL 115 Practical Reasoning (5) I&S, QSR C. LEE Introduction to logic emphasizing concepts and methods useful for practical analysis of arguments in everyday contexts; meaning, syllogisms, logical diagrams, inductive and statistical inference, informal fallacies, argument structure, perhaps some beginning symbolic logic. Offered: AWSpS.

PHIL 120 Introduction to Logic (5) I&S/NW, QSR C. MAYO-WILSON, C. WELLER Elementary symbolic logic. The development, application, and theoretical properties of an artificial symbolic language designed to provide a clear representation of the logical structure of deductive arguments. Offered: AWSpS.

PHIL 149 Existentialism and Film (5) VLPA/I&S I. Schnee What makes life worth living? Is morality just a convenient fiction? What is the nature of the human condition? Is God dead, or just playing hard to get? Investigates the works of several existentialist philosophers, including Kierkegaard, Nietzsche, and Beauvoir, and uses their works to interpret and analyze the philosophical content of angst-ridden cinema of the French New Wave and Hollywood film noir. Recommended: None.

PHIL 160 Why Do We Believe in Quarks, Evolution, and Other Crazy Things? Perspectives on Science, Reason, and Reality (5) I&S/NW L. HANKINSON NELSON Study of how scientific theories are justified and why they are accepted, using selected examples from the history of science.

PHIL 200 Topics in Philosophy (3-5, max. 10) I&S A study of philosophical topics at the introductory level. The content of the course is entirely at the discretion of the instructor.

PHIL 205 Philosophy for Children (5) I&S J. LONE Introduction to the methods of “doing” philosophy with young people. Stresses the development of a community of inquiry in which budding philosophers are encouraged to ask their own relevant questions, develop views and articulate reasons for them, and to listen and learn from one another. Credit/no-credit only.

PHIL 206 Philosophy of Feminism (5) I&S, DIV Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with GWSS 206/POL S 212.

PHIL 207 Issues of Global Justice (5) I&S, DIV M. BLAKE, J. MAYERFELD, W. TALBOTT Introduces issues of global justice. Topics include: global poverty and aid, immigration, transnational governance, gender in global relations, climate change, and cultural relativism. Offered: jointly with POL S 207/VALUES 207.

PHIL 240 Introduction to Ethics (5) VLPA/I&S S. GARDINER, J. ROBERTS, W. TALBOTT Critical introduction to various philosophical views of the basis and presuppositions of morality and moral knowledge. Critical introduction to various types of normative ethical theory, including utilitarian, deontological, and virtue theories.

PHIL 241 Topics in Ethics (5, max. 10) VLPA/I&S Introduction to ethics through in-depth study of one or more selected topics (e.g., limits of moral community, animal rights, moral education, and freedom). Topics vary.

PHIL 242 Introduction to Medical Ethics (5) VLPA/I&S S. GOERING Introduction to ethics, primarily for first- and second-year students. Emphasizes philosophical thinking and writing through an in-depth study of philosophical issues arising in the practice of medicine. Examines the issues of medical ethics from a patient's point of view.

PHIL 243 Environmental Ethics (5) VLPA/I&S L. NICHOLS Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with ENVIR 243.

PHIL 267 Introduction to Philosophy of Religion (5) I&S Consideration of the sources of religious ideas and practices, the main kinds of religious views and the problems they raise, and the different forms that spirituality can take. Issues concerning the relations of religion to science and morality also treated.

PHIL 291 Ethics in Science (5) VLPA/I&S Provides an introduction to ethics and research ethics issues in the non-medical sciences. Possible topics include: publication and peer review, intellectual property, and the social responsibilities of scientists. Offered: jointly with VALUES 291.

PHIL 301 Intermediate Topics in Philosophy (3-5, max. 10) I&S Philosophical topics at the intermediate level. Content varies each quarter, depending on instructor.

PHIL 307 Justice Across Disciplinary Boundaries (5) I&S W. TALBOTT What is justice? One of the oldest questions in philosophy and also one of the most current. A multi-disciplinary approach to understanding justice.

PHIL 314 Philosophy of Crime and Punishment (5) I&S R. MOORE Examination of philosophical theories regarding criminal habits and punishment and the philosophical problems connected with specific topics in criminal law. Examines proper subject matter of criminal law

(drug use, pornography, euthanasia); limits of criminal sanctions; crime and privilege (corporate crime, white-collar crime, blackmail); justifications for punishment; mercy; and execution.

PHIL 320 Ancient Philosophy (5) I&S *J. ROBERTS, C. WELLER* Survey of ancient Greek philosophy, beginning with the pre-Socratics and proceeding on through Plato to Aristotle.

PHIL 322 Modern Philosophy (5) I&S *C. MARSHALL, M. ROSENTHAL, C. WELLER* Examination of metaphysical and epistemological problems from the works of Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant.

PHIL 325 Nineteenth-Century Philosophy (5) I&S *C. MARSHALL*

PHIL 330 History of Ancient Political Philosophy (5) I&S *J. ROBERTS* Political philosophy of fourth- and fifth-century Greece, especially the Sophists, Plato, and Aristotle, stressing the connection between the political philosophy and the underlying philosophical system of each philosopher.

PHIL 332 History of Modern Political Philosophy (5) I&S *M. BLAKE, W. TALBOTT* Examination of major political philosophies from the sixteenth century to the nineteenth century, with attention to the underlying philosophical methods and foundations.

PHIL 335 Plato's Republic (5) VLPA/I&S Designed especially for philosophy majors, but open to non-majors. Intensive study of Plato's masterpiece. Prerequisite: one PHIL course.

PHIL 338 Philosophy of Human Rights (5) I&S *W. TALBOTT* Theories of human rights and the bearing of these theories on issues of public policy such as legitimacy of war and terrorism, economic justice, and whether future generations have rights.

PHIL 340 History of Ancient Ethics (5) VLPA/I&S *J. ROBERTS, C. WELLER* Development of moral thought from Socrates through the Stoics. Particular emphasis on the ethical writings of Plato and Aristotle.

PHIL 342 History of Modern Ethics (5) VLPA/I&S *M. ROSENTHAL, C. WELLER* Development of moral thought from Hobbes through Nietzsche, with particular emphasis on the ethical writings of Hume, Kant, and John Stuart Mill.

PHIL 343 Ethics and the Environment (5) I&S *L. Nichols* Advanced introduction to environmental ethics, with an emphasis on nonanthropocentric value theory.

PHIL 344 History of Recent Ethics (5) VLPA/I&S Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition.

PHIL 345 Moral Issues of Life and Death (5) VLPA/I&S *S. GOERING* Examination of such topics as war and murder, famine relief, capital punishment, high-risk technologies, abortion, suicide, and the rights of future generations.

PHIL 346 Personal Values and Human Good (5) I&S *S. GOERING* Examination of the idea of a good human life. Emphases differ from year to year. Typical topics include happiness and prudence, rationality and life plans, personal values and the meaning of life, autonomy and false consciousness, self-respect and self-esteem, honesty and self-deception, faith and “vital lies.”

PHIL 347 Philosophy in Literature (5) VLPA/I&S Study of philosophical ideas expressed in works of literature.

PHIL 350 Introduction to Epistemology (5) I&S *C. MAYO-WILSON, W. TALBOTT* Nature, definition, and possibility of knowledge.

PHIL 356 Introduction to Metaphysics (5) I&S Introductory examination of some of the main problems in metaphysics, such as the nature of truth and reality, the metaphysical status of properties, the existence of free will.

PHIL 360 Introductory Topics in Philosophy of Science (5, max. 10) I&S/NW *L. HANKINSON NELSON, A. WOODY* Study of one or more current topics in philosophy of science such as scientific realism, explanation, confirmation, causation. Prerequisite: one PHIL course.

PHIL 362 Topics in the Philosophy of Science (5) I&S/NW *L. Hankinson Nelson* Critical study of nature of scientific knowledge, emphasizing the role of evidence in several different sciences. Topics include accounts of scientific methods; the relation of theory to observation; how theories change; and the nature of the confirmation and falsification of hypotheses and theories. Offered: Sp.

PHIL 363 Introduction to the Philosophy of Mind (5) I&S *C. LEE* Various theories of the nature of mind, the relationship between mind and body, the self, introspection, and knowledge of other minds.

PHIL 373 Introduction to Philosophy of Mathematics (5) I&S Introduction to some of the main issues in philosophy of mathematics: to what degree are mathematical theorems justified by rational insight, sensory experience, purely symbolic computations; what is the infinite, and how can one reason about infinite sets, spaces, and numbers without becoming entangled in contradictions.

PHIL 398 Philosophy for Children Practicum (2-5, max. 10) *S. Goering, J. Lone* Exploration of various methods for introducing philosophy to K-12 students with a focus on ways in which to establish “communities of philosophical inquiry” in classrooms. Students will develop an understanding of how to inspire philosophical discussions with pre-college students. Emphasis is on learning by doing, with students facilitating philosophy sessions in local public schools. Credit/no-credit only. Offered: WSp.

PHIL 399 Foreign Study (2-5, max. 10) Upper-division philosophy studies with no direct UW equivalents, taken through UW foreign study programs.

PHIL 401 Advanced Topics in Philosophy (3-5, max. 15) I&S A study of philosophical topics at the advanced level. Topics vary.

PHIL 406 Philosophical Topics in Feminism (5) I&S, DIV S. *GOERING, L. HANKINSON NELSON, A. WOODY* Detailed examination of questions raised by recent feminist scholarship in particular areas of philosophy, such as political theory, ethics, epistemology, or philosophy of science. Emphasis varies.

PHIL 407 International Justice (5) M. BLAKE, S. GARDINER Examines issues through investigation of the moral foundations of international politics. Issues include: What moral duties constrain the relationships between states? Is international poverty a matter of moral concern? Are we justified in preferring the interest of our fellow nations? Prerequisite: one course in philosophy.

PHIL 408 Philosophy of Diversity (5) I&S, DIV M. BLAKE Must a liberal political community respect all claims made on behalf of minority cultural groups? Are there moral limits to the forms of diversity compatible with just governance? Examines modern philosophical writings on these topics. Prerequisite: One philosophy course.

PHIL 409 Philosophy of Disability (5) I&S, DIV S. *GOERING* Rethinks the non-disabled assumption at the heart of much of western moral and political philosophy. Explores concepts of autonomy, opportunity, personhood, and dependence in regard to disability. Issues may include prenatal testing and reproduction, special education, requirements of accommodation, and social and legal interpretations of disability. Prerequisite: one philosophy course or LSJ 332/CHID 332, LSJ 433/CHID 433, or LSJ 434/CHID 434.

PHIL 410 Social Philosophy (5) I&S W. *TALBOTT* An examination of topics pertaining to social structures and institutions such as liberty, distributive justice, equality and race, and human rights.

PHIL 411 Justice in Health Care (5) VLPA/I&S N. *JECKER* Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Offered: jointly with B H 474.

PHIL 412 Ethical Theory (5) I&S N. *JECKER* Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: jointly with B H 402.

PHIL 413 Metaethical Theory (5) I&S N. *JECKER* Studies the major metaethical theories, including both cognitivist and noncognitivist approaches. Emphasizes moral philosophy during the twentieth century, as well as contemporary commentary. Offered: jointly with B H 404.

PHIL 414 Philosophy of Law (5) I&S R. *MOORE* Nature and function of law. Relation of law to morality. Legal rights, judicial reasoning.

PHIL 415 Advanced Topics in Animal Welfare (5) I&S *L. NICHOLS* Critical examination of issues in the philosophy of animal welfare and animal rights. Prerequisite: one philosophy course.

PHIL 416 Ethics and Climate Change (5) I&S *S. GARDINER, L. NICHOLS* Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with ENVIR 416.

PHIL 417 Advanced Topics in Environmental Philosophy (5) I&S *S. GARDINER* Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with ENVIR 417.

PHIL 418 Jewish Philosophy (5) I&S *M. ROSENTHAL* Introduces the central concepts and themes of Jewish philosophy. Focuses either on debates within a particular historical period - e.g., medieval or modern; or on a topic - e.g., reactions to the Enlightenment or to the Holocaust. Offered: jointly with JEW ST 418.

PHIL 422 Studies in Continental Rationalism (5, max. 15) I&S *C. MARSHALL, M. ROSENTHAL* Study of one or more of the major continental rationalists: Descartes, Spinoza, Leibniz.

PHIL 426 Twentieth-Century Philosophy (5) I&S *C. WELLER* A study of development of contemporary analytic philosophy, the revolt against idealism, and the linguistic turn in philosophy.

PHIL 430 Hellenistic Philosophy (3) I&S *J. ROBERTS* Survey of the Epicurean, Stoic, and Skeptic philosophy of the Hellenistic period. Emphasis may vary.

PHIL 431 Philosophy of Plato (3, max. 6) I&S *J. ROBERTS, C. WELLER* Study of selected middle and late dialogues.

PHIL 433 Philosophy of Aristotle (3, max. 6) I&S *J. ROBERTS, C. WELLER* Study of several major Aristotelian treatises.

PHIL 436 British Empiricism (3) I&S *C. WELLER* Examination of the metaphysical and epistemological views of Locke and Berkeley, with perhaps some attention also to Hume. Prerequisite: either PHIL 322 or PHIL 350.

PHIL 437 Philosophy of Hume (3) I&S *W. Talbott, C. Weller* Hume's analyses of knowledge, the passions, and morals.

PHIL 438 Philosophy of Kant (5) I&S *C. MARSHALL, C. WELLER* Systematic study of The Critique of Pure Reason.

PHIL 440 Ethics (5) I&S *J. ROBERTS, W. TALBOTT* Critical examination of the concepts and judgments of value, including an analytical treatment of the notions of good and bad, right and wrong, and obligation. Emphasis varies from quarter to quarter.

PHIL 441 Public Health Ethics (5) I&S *C. FOURIE* An in-depth study of the philosophical issues arising in the practice and policy of public health. Material consists mainly of texts from philosophy and ethics, but, due to the course's interdisciplinary nature, also includes papers from epidemiology, newspaper articles, and current public health regulations and campaigns.

PHIL 442 Neuroethics (5) I&S *S. GOERING* Neurotechnological advances offer novel ways to address problems of movement, mood, and communication, but also call into question fundamental philosophical assumptions about the kinds of creatures we are. Explores questions of personal identity, moral and legal responsibility, privacy, security, normality, and justice in the context of neurotechnologies.

PHIL 445 Philosophy of Art (5) VLPA/I&S *R. MOORE* Critical examination of various accounts of the nature of art, artistic activity, the aesthetic experience. Problems in interpretation and evaluation of works of art.

PHIL 446 Development of Aesthetic Theory (5) VLPA/I&S *R. MOORE* Historical development of aesthetics, emphasizing such major figures as Plato, Aristotle, Hume, Kant, Hegel, and Goodman.

PHIL 449 Philosophy of Film (5) VLPA/I&S Examines films and film theory from a philosophical perspective. Topics may include the nature of film, whether films have “authors”, how films engage our emotions, whether films are vehicles of ideology, whether video games are “interactive” cinema, and whether films and video games themselves can do philosophy.

PHIL 450 Epistemology (5) I&S *C. MAYO-WILSON, W. TALBOTT* Systematic study of some of the main problems of the theory of knowledge, such as: the definition of “knowledge”; a priori knowledge; perception and knowledge of the external world; and whether knowledge has or requires a foundation. Emphasis varies from quarter to quarter.

PHIL 453 Philosophy of Language (5) VLPA/I&S Current theories of meaning, reference, predication, and related concepts. Offered: jointly with LING 476.

PHIL 459 Philosophy of Medicine (5) I&S *N. JECKER* Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Offered: jointly with B H 440.

PHIL 460 Philosophy of Science (5) I&S/NW *L. HANKINSON NELSON, A. WOODY* Critical study of the nature of scientific knowledge. Topics include the relation of theory to observation, the use of mathematics, how theories change, the requirements for the meaningfulness of a theory, and nature of confirmation.. Prerequisite: one PHIL course.

PHIL 463 Philosophy of Mind (5) I&S *C. LEE* Examination of current theories of the nature of the mind and mental processes.

PHIL 464 Philosophical Issues in the Cognitive Sciences (5) I&S/NW *C. LEE* Philosophical problems connected with research in psychology, artificial intelligence, and other cognitive sciences. Topics vary. Readings from both philosophical and scientific literature. Accessible to nonphilosophers with suitable interests and backgrounds.

PHIL 465 Philosophy of History (3) I&S *M. WYLIE* Analyses of basic concepts employed in historical interpretation, and study of some of the principal philosophers of history, such as Plato, Saint Augustine, Hegel, Marx, Spengler, Toynbee.

PHIL 466 Philosophy of the Social Sciences (5) I&S *L. HANKINSON NELSON, W. TALBOTT, M. WYLIE* Examination of fundamental issues in the foundations, methodology, and interpretation of the social sciences. Topics include value orientation and objectivity, methodological individualism, functionalism, reductionism, and the status of idealized models, including models involving idealized conceptions of individual rationality. Emphasis varies from quarter to quarter.

PHIL 467 Philosophy of Religion (5) I&S *M. ROSENTHAL* Study of selected topics and problems in the philosophy of religion, such as: arguments for the existence of God; the problem of evil; atheism; faith; religious experience and revelation; the attributes of God; miracles; immortality; and the relation between religion and morality. Readings from historical and contemporary authors.

PHIL 470 Intermediate Logic (5) I&S/NW, QSR An introduction to the concepts and methods of metatheory and their application to the sentential calculus.

PHIL 471 Advanced Logic (5) I&S/NW Study of the first-order predicate calculus with identity and function symbols. Consistency, soundness, completeness, compactness. Skolem-Lowenheim theorem. Formalized theories. Prerequisite: PHIL 470.

PHIL 472 Axiomatic Set Theory (5) I&S/NW Development of axiomatic set theory up to and including the consistency of the Axiom of Choice and Continuum Hypothesis with the Zermelo-Fraenkel Axioms.

PHIL 473 Philosophy of Mathematics (5) I&S/NW Study of the traditional accounts of the nature of mathematical entities and mathematical truth given by logicism, intuitionism, and formalism, and the impact of Godel's incompleteness theorems on these accounts.

PHIL 474 Modal Logic (5) I&S/NW Notions of necessity and possibility, using the classical systems T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems.

PHIL 479 Semantics II (3) VLPA/I&S/NW *T. Ogihara* Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 478 Offered: jointly with LING 479.

PHIL 481 Philosophy of Biology (5) I&S/NW *L. HANKINSON NELSON* Study of several current topics in philosophy of biology, which may include the logical structure of evolutionary theory, fitness, taxonomy, the concept of a living thing, reductionism, the concept of a biological species, evolutionary explanations, and philosophical consequences of sociology. Prerequisite: one PHIL course.

PHIL 482 Philosophy of Physical Science (5, max. 10) I&S/NW *A. WOODY* Study of philosophical issues raised by theories in physics or chemistry, such as whether space (time) is a substance, how causation and locality are treated in quantum mechanics, temporal anisotropy and time travel, the nature of a field of force, the reduction of chemistry to physics. Prerequisite: one PHIL course.

PHIL 483 Induction and Probability (5) NW/I&S Introduction to current accounts of evidence and observation, the confirmation of scientific theories, the logic of inductive reasoning, and the metaphysics and epistemology of chance. High school-level math used. Specific topics vary from year to year. Prerequisite: PHIL 120.

PHIL 484 Reading in Philosophy (1-5, max. 15) Individual study of selected philosophical works.

PHIL 490 Advanced Topics in Epistemology (5, max. 15) I&S *W. TALBOTT* Intensive study of a particular topic or area in epistemology. Prerequisite: either PHIL 350 or PHIL 450.

PHIL 495 Philosophical Inquiry in Schools (5) I&S *Goering, Lone, Shapiro* Explores methods for introducing philosophy to K-12 students, focusing on ways to establish “communities of philosophical inquiry.” Students learn how to inspire philosophical discussions with pre-college students, and work in pairs with the instructor to lead philosophy sessions in the seminar and in local schools. Prerequisite: one PHIL course. Offered: A.

PHIL 498 Undergraduate Internship (1-5, max. 10) Independent fieldwork under the supervision of a faculty member. Individual experiences vary but could include an off-campus practicum or being trained as study group leader or tutor. Credit/no-credit only. Offered: AWSp.

PHIL 500 Proseminar in Philosophy (5) Introduces incoming graduate students to topics representative of the field and the faculty's interest. Each class session is devoted to a separate topic taught by a different member of the faculty. In addition to reading and short written assignments, students prepare a term paper on a topic presented. Offered: A.

PHIL 505 Seminar in Teaching Philosophy (1, max. 10) First quarter: seminar on topics of importance to a graduate student teaching two quiz sections of a large lecture course. Second quarter: focus on helping student prepare to teach own course. Prerequisite: graduate standing in philosophy. Credit/no-credit only. Offered: AW.

PHIL 510 Seminar in Social Philosophy (5, max. 20) *W. TALBOTT*

PHIL 514 Seminar in Legal Philosophy (5, max. 20) *R. MOORE*

PHIL 520 Seminar in Ancient Philosophy (5, max. 20) *J. ROBERTS, C. WELLER*

PHIL 522 Seminar in Modern Philosophy (5, max. 20) *C. MARSHALL, M. ROSENTHAL, C. WELLER*

PHIL 526 Seminar in Recent Philosophy (5, max. 20) *C. WELLER*

PHIL 538 Philosophy of Human Rights (5, max. 20) *W. TALBOTT*

PHIL 540 Seminar in Ethics (5, max. 20) *S. GOERING, J. ROBERTS, W. TALBOTT*

PHIL 545 Seminar in the Philosophy of Art (5, max. 20) *R. MOORE*

PHIL 550 Seminar in Epistemology (5, max. 20) *C. MAYO-WILSON, W. TALBOTT*

PHIL 556 Seminar in Metaphysics (5, max. 20)

PHIL 560 Seminar in the Philosophy of Science (5, max. 20) *L. HANKINSON NELSON, A. WOODY*

PHIL 563 Seminar in the Philosophy of Mind (5, max. 20) *C. LEE*

PHIL 564 Seminar in Philosophy of the Cognitive Sciences (5) Examines philosophical questions raised in and by cognitive sciences, including the nature of explanation, the role of models in explanation, and debates about reductionism versus pluralism in the face of diverse research paradigms.

PHIL 565 Seminar in the Philosophy of History (5, max. 20)

PHIL 566 Seminar in Philosophy of the Social Sciences (5, max. 20) *C. LEE, M. WYLIE*

PHIL 570 Seminar in Logic (5, max. 20) Prerequisite: PHIL 470.

PHIL 574 Meta-archaeology: Philosophy and Archaeology (1-5, max. 5) Examines philosophical issues raised in and by archaeology, including theories of explanation and model building, analyses of evidential reasoning and hermeneutic interpretation, debates about ideals of objectivity and about science and values. Offered: jointly with ARCHY 574.

PHIL 584 Reading in Philosophy (1-5, max. 12) Intensive reading in philosophical literature. Prerequisite: permission of Graduate Program Coordinator.

PHIL 587 Contemporary Analytic Philosophy (5, max. 20)

PHIL 595 Philosophical Inquiry in Schools (5) *S. Goering, J. Lone* Explores methods for introducing philosophy to K-12 students, focusing on ways to establish “communities of philosophical inquiry.” Students learn how to inspire philosophical discussions with pre-college

students, and work in pairs with the instructor to lead philosophy sessions in the seminar and in local schools. Offered: A.

PHIL 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Coordinator.

PHIL 800 Doctoral Dissertation (*-)

Values in Society

VALUES 207 Issues of Global Justice (5) I&S, DIV M. BLAKE, J. MAYERFELD, W. TALBOTT Introduces issues of global justice. Topics include: global poverty and aid, immigration, transnational governance, gender in global relations, climate change, and cultural relativism. Offered: jointly with PHIL 207/POL S 207.

VALUES 291 Ethics in Science (5) VLPA/I&S Provides an introduction to ethics and research ethics issues in the non-medical sciences. Possible topics include: publication and peer review, intellectual property, and the social responsibilities of scientists. Offered: jointly with PHIL 291.

VALUES 495 Ethics in Practice (2) M. BLAKE, S. GARDINER, S. GOERING Culmination of the values-in-society minor. Synthesizes training in ethics with primary discipline. Includes a project of positive social engagement (service learning or research project with fieldwork). Limited to undergraduates completing the minor in values and society. Credit/no-credit only.

VALUES 511 Ethics Matters: An Exploration of Some Moral Qualities (5) S. GOERING Asks what we fundamentally require of ourselves and others if we are to live together in morally acceptable ways by discussing moral qualities as they appear in various arenas. Topics include: autonomy, respect, integrity, and trust.

VALUES 512 Justice Matters: An Exploration of Justice as a Social Ideal (5) S. GARDINER Asks what makes social policies and institutions morally acceptable, primarily through a discussion about justice and injustice. Topics include: relativism, the sources of competing conceptions of justice and equality, cost-benefit analysis, distributive justice, and beneficence.

VALUES 513 Capstone Workshop (2) M. BLAKE, S. GARDINER, S. GOERING Collaborative research workshop. Capstone course for the values-in-society graduate certificate program. Prerequisite: VALUES 511 or VALUES 512. Offered: Sp.

VALUES 591 Ethics Matters in Science: Research Questions as Moral Questions (3) Aims to introduce graduate and professional students from a wide range of primarily non-medical scientific backgrounds to some common moral questions that arise in the course of doing scientific research, and to provide a basic philosophical framework for thinking about related issues that arise within their own disciplines or fields.

Physics

Department Overview

C121 Physics-Astronomy Building

Physics is the study of the fundamental structure of matter and the interaction of its constituents, with the goal of providing a quantitative description of nature based on a limited number of physical principles.

Undergraduate Program

Adviser

C139A Physics-Astronomy, Box 351560
206-543-2772

The Department of Physics offers the following programs of study:

- The Bachelor of Science degree with a major in physics
- A minor in physics

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 308.)

These physics and mathematics courses are required prerequisites for junior-level work in physics, not only at the UW, but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college either need to take more than four years to earn a degree or be limited to a minimal course of study for graduation in four years.

Admission Requirements

Students who meet the requirements for transcript-based admission (see below) may be admitted upon request to the undergraduate adviser. Students who do not meet these criteria, but believe they can successfully complete a physics degree, are encouraged to petition the department. Students must begin the petition process by Friday of the fifth week of the quarter to be guaranteed an admission decision by the end of that quarter.

Transcript-based Admission

1. *Admission Criteria:* During qualifying quarters, present a minimum 2.6 grade in one course from List 1 and at least one additional course from either List 1 or List 2. (See qualifying quarters and lists, below.) Also, either be enrolled in a List 1 course at UW Seattle during the quarter in which the application is submitted, or have completed a List 1 class at UW Seattle during the previous quarter.
2. *Qualifying Quarters:* Admission is based on the two quarters immediately preceding the student's application. If a student was not enrolled during one or two of those quarters (e.g., summer, internship, or study abroad), admission is based on the three immediately preceding quarters.
3. *Qualifying Courses:* Admission is based on performance in courses required for one or more physics degree options, taken during a qualifying quarter. Courses fall into two categories: PHYS/ASTR (List 1) and MATH/AMATH (List 2).
 - a. List 1: PHYS 121, PHYS 122, PHYS 123; PHYS 224, PHYS 225, PHYS 226, PHYS 227, PHYS 228; PHYS 321, PHYS 322, PHYS 323, PHYS 324, PHYS 325, PHYS 328, PHYS 329; ASTR 321, ASTR 322
 - b. List 2: MATH 124, MATH 125, MATH 126, MATH 134, MATH 135, MATH 136; MATH 307, MATH 308, MATH 309, MATH 324; AMATH 301, AMATH 351, AMATH 352, AMATH 353, AMATH 401
4. *Graduation Plan:* Present a quarter-by-quarter, realistic course schedule (in MyPlan) that results in a physics degree and discuss it with an adviser when declaring the major.

Major Requirements

Minimum 89-106 credits, including the following:

1. *Physics core courses (37 credits):* PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 294, PHYS 321, PHYS 322, PHYS 334
2. *Mathematics core courses (18-19 credits from one of the following options):*
 - a. MATH 124, MATH 125, MATH 126, and one course from MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - b. MATH 134, MATH 135, MATH 136 and one course from MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
3. One of the four options shown below (34-56 credits): any course used to satisfy departmental degree requirements can be used only once in any option listed below.
 - a. *Comprehensive Physics Option (38-43 credits):*
 - i. 20-22 credits from PHYS 226; PHYS 228; PHYS 324; minimum three courses from PHYS 323, PHYS 325, PHYS 328, PHYS 329, ASTR 321, or ASTR 322

- ii. One additional mathematics course from the core list (3-4 credits): MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - iii. *Advanced laboratory (6-8 credits)*: two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, and either ASTR 480 or ASTR 481
 - iv. *Upper division lecture electives (6 credits)*: See adviser for approved list of electives.
 - v. *Undergraduate research*: 3 credits from any combination of PHYS 485, PHYS 486, PHYS 487, PHYS 494, PHYS 495, PHYS 496, PHYS 499, ASTR 481 or ASTR 499. (ASTR 481 may count as laboratory or research).
- b. *Applied Physics Option (34-39 credits)*:
- i. PHYS 231; one course from PHYS 226, PHYS 323, PHYS 324, PHYS 329; and AMATH 301 (10-11 credits)
 - ii. Two additional mathematical courses (6-8 credits) from PHYS 228, MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - iii. *Advanced laboratory (6-8 credits)*: two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, and either ASTR 480 or ASTR 481
 - iv. *Electives (9 credits)*: See adviser for approved list of electives.
 - v. *Undergraduate research*: 3 credits from any combination of PHYS 485, PHYS 486, PHYS 487, PHYS 494, PHYS 495, PHYS 496, PHYS 499, ASTR 481 or ASTR 499. (ASTR 481 may count as laboratory or research).
- c. *Biophysics Option (51-56 credits)*:
- i. PHYS 228, PHYS 324, PHYS 328, PHYS 429; one course from PHYS 226, PHYS 323, PHYS 325, PHYS 329 (17-18 credits)
 - ii. *Chemistry (15 credits)*: CHEM 142, CHEM 144, or CHEM 145; CHEM 152, CHEM 154, or CHEM 155; and CHEM 162, CHEM 164, or CHEM 165
 - iii. *Biology (10 credits)*: BIOL 180 and BIOL 200
 - iv. *Additional chemistry and biology (6-10 credits)*: two courses from CHEM 223 or CHEM 237, CHEM 224 or CHEM 238, CHEM 428, CHEM 452 or CHEM 456, CHEM 453 or CHEM 457, BIOL 220, BIOL 340, BIOL 350, BIOL 355, BIOL 401, BIOL 427, BIOL 467, BIOC 405, or BIOC 440
 - v. *Undergraduate research*: 3 credits from any combination of PHYS 499, BIOC 499, BIOL 499, CHEM 499, GENOME 499, MICROM 499, N BIO 499, P BIO 499, or BIOEN 499

- d. *Teacher Preparation Option (38-42 credits)*:
 - i. 14-15 credits from PHYS 226, PHYS 228, PHYS 324; one course from PHYS 323, PHYS 328, PHYS 329
 - ii. *Physics by inquiry (15 credits)*: PHYS 407, PHYS 408, and PHYS 409
 - iii. One additional mathematics course from the core list (3-4 credits): MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - iv. *Advanced laboratory (3-5 credits)*: One course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, and either ASTR 480 or ASTR 481
 - v. *Teaching practicum (3 credits)*: PHYS 499, working on a project that involves teaching

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements: 30-36 physics credits (in addition to 15 credits of MATH 124, MATH 125, and MATH 126) as follows:

1. *Core courses*: PHYS 121, PHYS 122, PHYS 123, PHYS 224, and PHYS 225
2. One of the following options:
 - a. *Physics Education*: PHYS 407, PHYS 408, PHYS 409 (total 36 physics credits)
 - b. *Experimental Physics*: PHYS 231, PHYS 334, and one course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434 (total 30 physics credits)
 - c. *Mathematical Physics*: PHYS 227, PHYS 228 (MATH 308 required), and one course from PHYS 321 or PHYS 324 (MATH 324 required) (total 30 physics credits)
3. Minimum grade of 2.0 required for each physics course counted toward the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The program is one of the largest in the nation, with approximately 80-100 majors graduating every year. Graduates may join the work force in a variety of technical occupations where analytical, computational, and problem-solving skills are highly valued, both in government and the private sector. They may also continue with further studies in physics or in other fields (such as astronomy, medicine, law, business, biology, or engineering).

- *Instructional and Research Facilities:* The Physics and Astronomy Departments share a modern building which contains excellent instructional and research facilities. Undergraduate students are strongly encouraged to participate in ongoing research in the department.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Most undergraduate physics majors participate in a research experience, either on campus or off. Research internships in physics and related departments are available for both pay and course credit. Many students participate in national programs, typically the summer after their junior year. The department also maintains an exchange program with Universitat Justus-Leibig in Geissen, Germany.
- *Department Scholarships:* Select scholarships available every spring upon nomination by an instructor.
- *Student Organizations/Associations:* Society of Physics Students, www.uwsps.org; Career Development Organization for Physicists and Astronomers, students.washington.edu/cdophys/CAREER/

Of Special Note:

- One year of high school physics is strongly recommended before taking PHYS 121.

Graduate Program

Graduate Program Coordinator
C139 B Physics-Astronomy, Box 351560
206-543-2488

The department offers studies leading to the degrees of master of science and doctor of philosophy. The department awards an average of twenty PhD and thirty MS degrees annually.

Research Facilities

Areas of research include atomic physics, astrophysics, condensed-matter physics, biological physics, elementary-particle physics, nuclear physics, and physics education. Students may also do research in physics with appropriate faculty in other departments such as Aeronautics and Astronautics, Applied Mathematics, Astronomy, Biochemistry, Bioengineering, Chemistry, Earth and Space Sciences, Electrical Engineering, Materials Science and Engineering, or Physiology and Biophysics.

Experimental and theoretical research in atomic, biological, statistical, and condensed-matter physics is concentrated on nano-scale systems, topological phenomena, quantum matter, and fundamental symmetries. On-campus laboratories include laser, ion trap, and radio frequency

techniques, low-temperature, scanning-probe microscopy, x-ray and light scattering, and surface-physics equipment. Off-campus facilities include synchrotron x-ray radiation and neutron sources in the United States and abroad. Research in the Center for Experimental Nuclear Physics and Astrophysics (CENPA) is concentrated on the measurement of fundamental physical properties, including experiments on neutrinos, axions, muons, light nuclei, and gravity. Facilities include the on-campus accelerator of CENPA, as well as major facilities in the United States, Canada, and Europe.

High-energy and particle astrophysics groups are engaged in quantum field theory, phenomenology, cosmology, and in experimental research at the European Center for Nuclear Research (CERN) in Geneva, Fermilab in Illinois, and LIGO.

The Institute for Nuclear Theory, a national facility closely associated with the department, offers a unique opportunity for students to pursue research.

Department facilities are housed in the Physics-Astronomy Building and the Center for Experimental Nuclear Physics and Astrophysics (CENPA).

Master of Science (Applications of Physics)

Admission Requirements

Designed for students currently employed and whose background is in physical science, engineering, mathematics, or computer science. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of instruction offered in the physics department. Entering students should have a BS degree in physical science, engineering, mathematics, or computer science. The program is part time and does not support student (F) visa applications. Classes are offered evenings; some classes may be attended online.

Degree Requirements

36 credits

1. Core courses: PHYS 441, PHYS 541, and PHYS 543, and appropriate electives.
2. Independent-study project, which may be carried out at the University or at the student's place of employment. A written report, as well as an oral presentation, is required.
3. PHYS 600 (at least 3 credits) taken while completing the project noted in 2, above.
4. 36 credits at the 400 level or above, with at least 18 credits at the 500 level or above. At least 18 credits must be from numerically graded courses. No thesis required.

Master of Science, Doctor of Philosophy

Admission Requirements

1. Undergraduate preparation to include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an

introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics to include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions.

2. Admission determined by the applicant's undergraduate program, undergraduate grades, GRE aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

Master of Science

Degree Requirements

36 credits

1. Minimum 3 credits of PHYS 600
2. 36 credits of work at the 400 level or above, with at least 18 credits at the 500 level or above. At least 18 credits from numerically graded courses. A qualifying examination is required. No thesis is required.

Doctor of Philosophy

Minimum 90 credits

Degree Requirements

1. Master's degree, with a background in physics equivalent to that contained in the following courses: PHYS 505, PHYS 513, PHYS 514, PHYS 515, PHYS 517, PHYS 518, PHYS 519, PHYS 520, PHYS 525, and PHYS 528
2. Specialized courses appropriate to each student's interests; and two advanced elective Physics Department courses outside the student's area of research.
3. Written qualifying examination (typically completed before or during the second year), oral general examination for admission to candidacy, and oral final examination.
4. Teaching experience. Courses in teaching techniques in physics, PHYS 501 through PHYS 503, are required of students holding teaching assistantships.

Financial Aid

Most graduate students are supported by fellowships and assistantships. Applications for the PhD program are automatically considered for these fellowships and assistantships.

Course Descriptions

PHYS 101 Physical Science By Inquiry I (5-) NW, QSR

PHYS 104 Facilitated Group Inquiry I (2) NW Laboratory-based development of concepts and reasoning skills. Develops problem-solving techniques and scientific method in a large group setting. Co-requisite: PHYS 114. Offered: A.

PHYS 105 Facilitated Group Inquiry II (2) NW Laboratory-based development of concepts and reasoning skills. Develops problem-solving techniques and scientific method in a large group setting. Co-requisite: PHYS 115. Offered: W.

PHYS 106 Facilitated Group Inquiry III (2) NW Laboratory-based development of concepts and reasoning skills. Develops problem-solving techniques and scientific method in a large group setting. Co-requisite: PHYS 116. Offered: Sp.

PHYS 107 Physics Concepts for Non-Scientists (5) NW *Wilkes* Overview of physical science, from subatomic particles to cosmology. Intended to help students understand the importance of scientific research in society with emphasis on basic ideas about how the universe operates. Readings from popular books by leading scientists for non-science majors. For students without high school physics or with limited mathematics background. Offered: W.

PHYS 110 Liberal Arts Physics (5) NW, QSR Physics for students in the arts, humanities and social sciences. Students get a flavor of what physics is about, including scientific procedures. We will focus on the theory of Relativity. This revolutionized physics in 1905 and led to amazing predictions, like the existence of black holes and the production of gravitational waves, confirmed in 2016. Only math at high school level is required. Offered: WSp.

PHYS 114 General Physics (4) NW, QSR Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Mechanics. Credit is not given for both PHYS 114 and PHYS 121. Offered: AWSpS.

PHYS 115 General Physics (4) NW Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Heat and electromagnetism. Credit is not given for both PHYS 115 and PHYS 122. Prerequisite: PHYS 114 or PHYS 121. Offered: AWSpS.

PHYS 116 General Physics (4) NW Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Sound, light, and modern physics. Credit is not given for both PHYS 116 and PHYS 123. Prerequisite: PHYS 115 or PHYS 122. Offered: AWSpS.

PHYS 117 General Physics Laboratory (1) NW Mechanics laboratory. Credit is not given for both PHYS 117 and the PHYS 121 laboratory. Prerequisite: PHYS 114 which may be taken concurrently. Credit/no-credit only. Offered: AWSpS.

PHYS 118 General Physics Laboratory (1) NW Heat and electromagnetism laboratory. Credit is not given for both PHYS 118 and the PHYS 122 laboratory. Prerequisite: PHYS 115 which may be taken concurrently. Credit/no-credit only. Offered: AWSpS.

PHYS 119 General Physics Laboratory (1) NW Sound, light, and modern physics laboratory. Credit is not given for both PHYS 119 and the PHYS 123 laboratory. Prerequisite: PHYS 116 which may be taken concurrently. Credit/no-credit only. Offered: AWSpS.

PHYS 121 Mechanics (5) NW, QSR Basic principles of mechanics and experiments in mechanics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both PHYS 114 and PHYS 121. Prerequisite: either MATH 124 or MATH 134, which may be taken concurrently. Offered: AWSpS.

PHYS 122 Electromagnetism (5) NW Covers the basic principles of electromagnetism and experiments in these topics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both PHYS 115 and PHYS 122. Prerequisite: either MATH 125 or MATH 134, which may be taken concurrently; PHYS 121. Offered: AWSpS.

PHYS 123 Waves (5) NW Explores electromagnetic waves, the mechanics of oscillatory motion, optics, waves in matter, and experiments in these topics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both PHYS 116 and PHYS 123. Prerequisite: either MATH 126 or MATH 134, which may be taken concurrently; PHYS 122. Offered: AWSpS.

PHYS 207 The Physics of Music (3) NW The nature of sound; vibrations; traveling and standing waves; response of the ear to sound; production of musical sounds.

PHYS 210 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Develops perspective of science as a process of inquiry. Prerequisite: minimum 2.0 in either PHYS 116 or PHYS 123. Offered: A.

PHYS 211 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Develops perspective of science as a process of inquiry. Prerequisite: minimum 2.0 in either PHYS 116 or PHYS 123; recommended: PHYS 210. Offered: W.

PHYS 212 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Develops perspective of science as a process of inquiry. Prerequisite: minimum 2.0 in either PHYS 116 or PHYS 123; recommended: PHYS 211. Offered: Sp.

PHYS 214 Light and Color (5) NW, QSR Compares past explanation of certain familiar natural phenomena with present understandings. Lamps and lighting, outdoor light, optical devices, color vision, perspective, paints, and pigments. Quantitative comparison critical to the course, but college-level mathematics background not required. Intended for non-science students.

PHYS 216 Science and Society (5) I&S/NW Chaloupka Investigation of the relationship between science, technology, and society. Nuclear physics and molecular biology serve as concrete examples of fields with significant impact on society. Offered: jointly with JSIS B 216; Sp.

PHYS 217 Energy Future: The Technical and Social Barriers to Large-Scale Sustainable Energy (5) I&S/NW Seidler Surveys the scientific, technological, and social barriers to large-scale renewable energy implementation. Includes discussion of solar, wind, nuclear, and other sustainable modalities; energy efficiency; large-scale energy storage; the greenhouse effect; and numerous domestic and international case studies of sustainable energy efforts. Offered: A.

PHYS 224 Thermal Physics (3) NW Introduces heat, thermodynamics, elementary kinetic theory, and statistical physics. Prerequisite: Either MATH 126 or MATH 136; PHYS 123 Offered: ASpS.

PHYS 225 Introduction to Quantum Mechanics (3) NW Emphasizes two-state systems. Introduces spin and applications in nuclear magnetic resonance. Prerequisite: Either minimum grade of 2.0 in PHYS 227, or minimum grade of 2.0 in PHYS 123; minimum grade of 2.0 in MATH 307 or AMATH 351; and minimum grade of 2.0 in MATH 308 or AMATH 352. Offered: WS.

PHYS 226 Particles and Symmetries (3) NW Introduction to the fundamental constituents of matter and the symmetries which characterize their interactions. Topics include special relativity; strong, weak, and electromagnetic interactions; quarks and leptons; baryons and mesons; and neutrinos and nuclei. Prerequisite: minimum grade of 2.0 in PHYS 225 and PHYS 227 Offered: Sp.

PHYS 227 Elementary Mathematical Physics (4) NW Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Develops and applies computational methods, both analytic and numerical. Prerequisite: minimum 2.0 grade in PHYS 121, PHYS 122, and PHYS 123. Offered: ASp.

PHYS 228 Elementary Mathematical Physics (4) NW Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Develops and applies computational methods, both analytic and numerical. Prerequisite: minimum 2.0 grade in PHYS 227. Offered: WS.

PHYS 231 Introductory Experimental Physics (3) NW Introduction to data acquisition and analysis using experiments which measure fundamental constants or properties of nature (Planck's constant, Boltzmann's constant, speed of light, charge of electron). Prerequisite: minimum 2.0 grade in PHYS 123. Offered: A.

PHYS 232 Introduction to Computational Physics (3) NW Computational techniques applied to physics and data analysis in laboratory setting. Emphasis on numerical solutions of differential equations, least square data fitting, Monte Carlo methods, and Fourier Analysis. A high-level language taught and used; no previous computing experience required. Prerequisite: PHYS 227.

PHYS 248 Introductory Selected Topics (1-5, max. 15) NW

PHYS 294 Introduction to Research: Frontiers of Physics (1) NW Provides a survey of contemporary research in experimental and theoretical physics, with an emphasis on subfields seeing revolutionary changes in understanding. Credit/no-credit only. Offered: W.

PHYS 321 Electromagnetism (4) NW First of a three-quarter sequence. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: minimum grade of 2.0 in PHYS 227; two of PHYS 228, MATH 307 or AMATH 351, MATH 308 or AMATH 352, MATH 309 or AMATH 353, MATH 324, MATH 326, or AMATH 401. Offered: ASp.

PHYS 322 Electromagnetism (4) NW Continuation of PHYS 321. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: minimum 2.0 in PHYS 321. Offered: WS.

PHYS 323 Electromagnetism (4) NW Continuation of PHYS 322. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: minimum 2.0 in PHYS 322. Offered: Sp.

PHYS 324 Quantum Mechanics (4) NW First part of a two-quarter sequence. Introduction to nonrelativistic quantum mechanics: need for quantum theory, Schrodinger equation, operators, angular momentum, the hydrogen atom, identical particles, and the periodic table. Prerequisite: 2.0 in PHYS 225, PHYS 228. Offered: AS.

PHYS 325 Quantum Mechanics (4) NW Continuation of PHYS 324. Introduction to nonrelativistic quantum mechanics: perturbation theory, the variational principle, radiation; application of quantum mechanics to atomic physics, magnetic resonance, scattering, and various special topics. Prerequisite: either PHYS 324 or B PHYS 324. Offered: W.

PHYS 328 Statistical Physics (3) NW Elements of statistical mechanics and their applications. Prerequisite: minimum 2.0 grade in PHYS 224. Offered: A.

PHYS 329 Mathematical Methods and Classical Mechanics (3) NW Mathematical methods applied to classical mechanics, including Lagrangian mechanics. Prerequisite: minimum grade of 2.0 in PHYS 228. Offered: Sp.

PHYS 331 Optics Laboratory (3) NW Measurements of interference and diffraction, optical properties of matter, image processing, interferometry, holography. Prerequisite: PHYS 228. Offered: A.

PHYS 334 Electric Circuits Laboratory (3) NW Basic elements of DC, AC, and transient circuits; electronic devices; electrical measurements. Prerequisite: minimum 2.0 grade in PHYS 123. Offered: WS.

PHYS 335 Electric Circuits Laboratory (3) NW Electrical measurements, data management, digital electronics of microprocessor systems. Building a microprocessor application. Prerequisite: minimum 2.0 in PHYS 334. Offered: Sp.

PHYS 401 Special Problems (*, max. 30) Supervised individual study. Offered: AWSpS.

PHYS 402 Special Problems (*, max. 30) Supervised individual study. Offered: AWSpS.

PHYS 403 Special Problems (*, max. 30) Supervised individual study. Offered: AWSpS.

PHYS 405 Physical Science by Inquiry II (5-) NW Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Prerequisite: 2.0 in either PHYS 116 or PHYS 123. Offered: A.

PHYS 406 Physical Science by Inquiry II (-5) NW Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Prerequisite: 2.0 in either PHYS 116 or PHYS 123. Offered: W.

PHYS 407 Physics by Inquiry II (5) NW Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: minimum grade of 2.0 in PHYS 121, PHYS 122, PHYS 123. Offered: A.

PHYS 408 Physics by Inquiry II (5) NW Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 407. Offered: W.

PHYS 409 Physics by Inquiry II (5) NW Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 408. Offered: Sp.

PHYS 410 Physics by Inquiry for In-Service Teachers (1-2, max. 30) NW A “hands-on” inquiry-oriented approach designed to train in-service teachers in the use of the physical science content for any of several science programs selected by a school or school district. Credit/no-credit only.

PHYS 411 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, or PHYS 409. Credit/no-credit only. Offered: A.

PHYS 412 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, or PHYS 409. Credit/no-credit only. Offered: A.

PHYS 413 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, or PHYS 409. Credit/no-credit only. Offered: A.

PHYS 421 Contemporary Atomic Physics (3) NW Survey of the principal phenomena of atomic and molecular physics. Prerequisite: PHYS 322; PHYS 325. Offered: Sp.

PHYS 422 Contemporary Nuclear and Particle Physics (3) NW Survey of the principal phenomena of nuclear and elementary-particle physics. Prerequisite: PHYS 226; PHYS 322; PHYS 325. Offered: A.

PHYS 423 Contemporary Condensed Matter Physics (3) NW Survey of the principal phenomena of solid-state physics. Prerequisite: a minimum 2.0 grade in either PHYS 324 or B PHYS 324. Offered: W.

PHYS 427 Applications of Physics (1-3, max. 12) NW Current applications of physics to problems in the sciences and technology.

PHYS 428 Selected Topics in Physics (1-5, max. 12) NW

PHYS 429 Biophysics (3) Application of the concepts and methods of physics to biological systems. Prerequisite: PHYS 224; PHYS 225. Offered: W.

PHYS 431 Modern Physics Laboratory (3) NW Measurement in modern atomic, molecular, and solid-state physics. Prerequisite: PHYS 225; PHYS 334. Offered: WS.

PHYS 432 Modern Physics Laboratory (3) NW Measurement in modern atomic, molecular, and solid-state physics. Prerequisite: PHYS 225; PHYS 334. Offered: Sp.

PHYS 433 Modern Physics Laboratory (3) NW Techniques in nuclear and elementary-particle research. Prerequisite: PHYS 225; PHYS 334. Offered: A.

PHYS 434 Application of Computers to Physical Measurement (3) NW Laboratory giving specific instruction and experience in interfacing laboratory equipment to computers. Prerequisite: PHYS 334. Offered: A.

PHYS 436 Nonlinear Dynamics and Chaos (4) NW Variational Principle, Lagrangian and Hamiltonian Mechanics, phase space, nonlinear dynamics, approach to chaos, Lyapunov exponents, applications to physical systems. Numerical exercises to illustrate phenomena. Prerequisite: MATH 309.

PHYS 441 Quantum Physics (4) NW Introduction to concepts and methods of quantum physics: wave mechanics (de Broglie wavelength, uncertainty principle, Schrodinger equation), one-dimensional examples (tunneling, harmonic oscillator), formalism of quantum physics, angular momentum and the hydrogen atom. Offered: A.

PHYS 451 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with GWSS 485.

PHYS 460 Water in the Environment (3) NW Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either ESS 310, MATH 126, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/ESS 424.

PHYS 485 Senior Honors Seminar (1, max. 3) NW Prerequisite: Honors standing; 12 credits of physics. Offered: A.

PHYS 486 Senior Honors Seminar (1, max. 3) NW Prerequisite: Honors standing; 12 credits of physics. Offered: W.

PHYS 487 Senior Honors Seminar (1, max. 3) NW Prerequisite: Honors standing; 12 credits of physics. Offered: Sp.

PHYS 494 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentations summarizing work accomplished are required. Offered: A.

PHYS 495 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentations summarizing work accomplished are required. Offered: W.

PHYS 496 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentations summarizing work accomplished are required. Offered: Sp.

PHYS 499 Undergraduate Research (1-6, max. 18) Research in physics and study of physics literature. Credit/no-credit only. Offered: A/WSpS.

PHYS 501 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no-credit only. Offered: A.

PHYS 502 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no-credit only. Offered: W.

PHYS 503 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no-credit only. Offered: Sp.

PHYS 505 Mechanics (3) Lagrangian and Hamiltonian dynamics, with applications to various topics such as coupled oscillators, parametric resonance, anharmonic oscillations, chaos. Offered: W.

PHYS 506 Numerical Methods (3) Integration, solution of differential equations, Monte Carlo methods, function minimization, data analysis, modern computing techniques, computation in experimental physics. Offered: WSp.

PHYS 507 Physical Applications of Group Theory (3) Applications of finite and continuous groups, representation theory, symmetry, and conservation laws to physical systems. Offered: Sp.

PHYS 511 Topics in Contemporary Physics (3, max. 9) Topics of current experimental, theoretical, or technological interest in modern physics. Offered: Sp.

PHYS 513 Electromagnetism and Relativity (3) First of a three-part sequence. Principles of electrostatics, complex variable techniques, boundary value problems and their associated mathematical techniques, Green's functions. Offered: A.

PHYS 514 Electromagnetism and Relativity (4) Continuation of PHYS 513. Electric and magnetic fields in free space and material media, wave guides and cavity resonators. Offered: W.

PHYS 515 Electromagnetism and Relativity (4) Continuation of PHYS 514. Special relativity, electromagnetic radiation from accelerated charges, synchrotron radiation, Cerenkov radiation, radiation reaction. Offered: Sp.

PHYS 517 Quantum Mechanics (4) First of a three-part sequence. Modern non-relativistic quantum mechanics developed, beginning with its basic principles. Dirac and abstract operator notation introduced, starting with simple examples. Offered: A.

PHYS 518 Quantum Mechanics (4) Continuation of PHYS 517. Modern non-relativistic quantum mechanics. The character of the theory illustrated both with physical examples and with conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: W.

PHYS 519 Quantum Mechanics (4) Continuation of PHYS 518. Modern non-relativistic quantum mechanics. Physical examples and conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: Sp.

PHYS 520 Advanced Quantum Mechanics - Introduction to Quantum Field Theory (4) Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: A.

PHYS 521 Advanced Quantum Mechanics - Introduction to Quantum Field Theory (3) Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: W.

PHYS 522 Advanced Quantum Mechanics: Introduction to Modern Quantum Field Theory (3) Functional integrals, symmetry breaking, critical phenomena and continuum limits, and non-perturbative methods. Credit/no-credit only. Offered: Sp.

PHYS 524 Thermodynamics and Statistical Mechanics (4) Statistical mechanical basis of the fundamental thermodynamical laws and concepts; classical and quantum statistical distribution functions; applications to selected thermodynamic processes and examples of Bose and Fermi statistics. Offered: A.

PHYS 525 Statistical Mechanics (3) Introduction to equilibrium and non-equilibrium aspects of many-body systems; scale invariance and universality at phase transitions and critical phenomena; exactly soluble models; Markov processes, master equations and Langevin equation in non-equilibrium stochastic processes. Prerequisite: PHYS 524. Offered: Sp.

PHYS 527 Current Problems in Physics (1) Introduction to current research topics for beginning graduate students. Credit/no-credit only. Offered: A.

PHYS 528 Current Problems in Physics (1) Introduction to current research topics for beginning graduate students. Credit/no-credit only. Offered: A.

PHYS 530 Laser Physics (4) Physics underlying laser design and operation in the context of common laboratory systems. Topics may include continuous and pulsed lasers; solid, liquid, and gas gain media; Q-switching, mode-locking, resonator theory, nonlinear optics, and others. Prerequisite: basic quantum mechanics, electromagnetism, and optics.

PHYS 532 Liquid Crystal Devices (4) Physics of liquid crystals and applications to practical display devices. Phases, phase transitions, optical and dielectric properties, molecular and device “engineering,” future prospects.

PHYS 536 Introduction to Acoustics and Digital Signal Processing (4) Introduces mathematical and physics principles of acoustics in digital signal processing applications. Complex analysis and Fourier methods, physics of vibrations and waves, solutions of the wave equation, digital convolution and correlation methods, and Maximum Length Sequence method in signal analysis and spread-spectrum applications. Prerequisite: PHYS 123; MATH 120. Instructors: Chaloupka

PHYS 541 Applications of Quantum Physics (4) Techniques of quantum mechanics applied to lasers, quantum electronics, solids, and surfaces. Emphasis on approximation methods and interaction of electromagnetic radiation with matter. Prerequisite: PHYS 421 or PHYS 441 or equivalent. Offered: Sp.

PHYS 542 Numerical Methods in Physics (4) Numerical methods for analysis and computation in physics. Topics may include integration, differential equations, partial differential equations, optimization, data handling, and Monte Carlo techniques. Emphasis is applications in physics. Prerequisite: 30 credits in physical sciences, computer science, or engineering.

PHYS 543 Electromagnetic Theory (4) Principal concepts of electromagnetism. Static electric and magnetic fields. Boundary-value problems. Electric and magnetic properties of materials. Electromagnetic waves and radiation. Prerequisite: 30 credits in physical sciences, computer science, or engineering. Offered: W.

PHYS 544 Applications of Electromagnetic Theory (4) Emphasis may vary from year to year. Topics may include electromagnetic waves, radiation, scattering, wave guides, plasma physics, quantum electronics, and accelerator physics. Prerequisite: PHYS 543 or equivalent.

PHYS 545 Contemporary Optics (4) Coordinated lecture and laboratory treatment of topics in contemporary optics. Subjects include Fourier optics, lens systems, interferometry, laser optics, holography, polarization, crystal optics, birefringence, laser and conventional light sources, optical detectors. Prerequisite: PHYS 543 or equivalent.

PHYS 546 Condensed-Matter Physics (4) Introduction to the theory of solids: crystal structure in real space and reciprocal space, phonons, free electrons, band theory, semiconductor devices. Prerequisite: PHYS 441 or equivalent.

PHYS 547 Electronics for Physics Research (4) Electronic techniques as applied in physics research. Topics include noise, control-system analysis, operational amplifiers, lock-in amplifiers, precision power supplies and metering, data transmission, microprocessors. Several integrated measurement systems are examined in the context of specific research problems. Prerequisite: elementary electronics.

PHYS 549 Low-Temperature Physics and Cryogenics (4) Condensed-matter physics at low and ultralow temperatures. Production of low temperatures; liquefaction of gases, dilution refrigeration, magnetic and compressional cooling. Macroscopic quantum effects: superconductivity, superfluidity. Applications of superconductors. The ultralow temperature frontier.

PHYS 550 Atomic Physics (3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 551 Atomic Physics (3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 552 Introduction to Cosmic Ray Physics (3) The nature and cosmological significance of cosmic ray photons and particles. The motion and confinement of particles in the geophysical, interplanetary, and interstellar medium. Theories of the processes involved in the high-energy interaction of cosmic rays, including shower theory. Methods of measurement and current problems. Prerequisite: introductory quantum mechanics. Credit/no-credit only.

PHYS 554 Nuclear Astrophysics (3) Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae; nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with ASTR 510; A.

PHYS 555 Cosmology and Particle Astrophysics (3) Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter.

PHYS 557 High Energy Physics (3) First quarter of a three-quarter series. Emphasis on the experimental foundations of particle physics. Prerequisite: PHYS 519. Offered: A.

PHYS 558 High Energy Physics (3) Second quarter of a three-quarter series. Phenomenology of the standard model of strong and electro-weak interactions, including an introduction to Feynman diagrams. Prerequisite: PHYS 519. Offered: W.

PHYS 559 High Energy Physics (3) Third quarter of a three-quarter series. Topics of current interest in high-energy particle physics. Prerequisite: PHYS 519. Offered: Sp.

PHYS 560 Theoretical Nuclear Physics (3) First of a two-part sequence. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: A.

PHYS 561 Theoretical Nuclear Physics (3) Continuation of PHYS 560. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: W.

PHYS 564 General Relativity (3) First of a two-part sequence. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 565 General Relativity (3) Continuation of PHYS 564. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 567 Theory of Solids (3) First quarter of a course on modern solid state and condensed matter physics, aimed at bringing student's knowledge up to the level of current literature. Topics include structural, electronic, and vibrational properties; optical response functions and dynamics; transport theory; and cooperative phenomena. Prerequisite: PHYS 519, PHYS 524. Offered: AW.

PHYS 568 Theory of Solids (3) Second quarter of a course on modern solid state and condensed matter physics, aimed at bringing the student's knowledge up to the level of current literature. Additional topics (see PHYS 567) include magnetism, quantum Hall effect, superconductivity. Offered: WSp.

PHYS 570 Quantum Field Theory (3) Emphasizes either relativistic quantum field theory or the many-body problem. Normally offered credit/no-credit only. Prerequisite: PHYS 522.

PHYS 571 Quantum Field Theory (3) Emphasizes either relativistic quantum field theory or the many-body problem. Normally offered credit/no-credit only. Prerequisite: PHYS 522.

PHYS 572 Modern Quantum Field Theory (3) Advanced topics in quantum field theory. Prerequisite: PHYS 570, PHYS 571. Credit/no-credit only.

PHYS 575 Selected Topics in Applications of Physics (*, max. 30)

PHYS 576 Selected Topics in Experimental Physics (*, max. 30)

PHYS 578 Selected Topics in Theoretical Physics (*, max. 30) Credit/no-credit only.

PHYS 580 Physics Colloquium (*, max. 30) Credit/no-credit only. Offered: AWSp.

PHYS 581 Seminar in High-Energy Physics (1-3, max. 20) Credit/no-credit only. Offered: AWSp.

PHYS 582 Seminar in Particle Theory (1-2, max. 20) Credit/no-credit only. Offered: AWSp.

PHYS 583 Seminar in Relativistic Astrophysics (1-3, max. 20) Credit/no-credit only. Offered: AWSp.

PHYS 584 Seminar in Recent Developments in Atomic Physics (1-3, max. 20) Credit/no-credit only. Offered: AWSp.

PHYS 585 Seminar in Experimental Nuclear Physics (1-3, max. 20) Credit/no-credit only. Offered: AWSp.

PHYS 586 Seminar in Condensed Matter Physics (1-3, max. 20) Credit/no-credit only.
Offered: AWSp.

PHYS 587 Seminar in Nuclear Theory (1-3, max. 20) Credit/no-credit only. Offered: AWSp.

PHYS 588 Particle Astrophysics Seminar (1-3, max. 20) Credit/no-credit only. Offered:
AWSp.

PHYS 589 Seminar in Problems of Physics Education (1-3, max. 20) Credit/no-credit only.
Offered: AWSp.

PHYS 590 Seminar in Statistical Physics (1-3, max. 20) Credit/no-credit only. Offered:
AWSp.

PHYS 600 Independent Study or Research (*-) Study or research under the supervision of individual faculty members. Prerequisite: permission of supervisor. Credit/no-credit only.
Offered: AWSpS.

PHYS 800 Doctoral Dissertation (*-) Prerequisite: permission of Supervisory Committee chairperson. Credit/no-credit only. Offered: AWSpS.

Political Science

Department Overview

101 Gowen

Political science, broadly conceived, is the study of governments and other political actors, including their origins and foundations, interactions with groups and individuals, and interactions with nations. Within this larger framework political scientists study power, authority, conflict, economic relationships, culture, laws, policy, values, ethics, justice, equality, rights, legitimacy, and representation, to list only a few. Using these and other concepts, they analyze the political impacts of social issues such as war, peace, poverty, crime, education, the environment, race, gender, and globalization. Modes of inquiry are highly interdisciplinary.

Undergraduate Program

Adviser

215 Smith, Box 353530

206-543-1824

polsadvc@uw.edu

The Department of Political Science offers the following programs of study:

- The Bachelor of Arts degree with a major in political science and options in political economy and in international security
- A minor in political science

Coursework in the discipline covers four major fields of political science: American politics, comparative politics, international relations, and political theory. In addition to major requirements, students may pursue faculty-supervised internships, research, independent study projects and an optional senior thesis.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that develop writing skills and breadth of knowledge. Introductory statistics.

Department Admission Requirements

1. Minimum 2.00 cumulative GPA
2. Three introductory political science courses (15 credits) with a minimum 2.0 grade in each from the following: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205

3. Students are admitted all quarters. Applications are due the second Friday of each quarter. Applications and additional information available from advisers in 215 Smith and on the Political Science Department website.
4. Applicants who meet the stated requirements are admitted in time to register for the following quarter as majors.

Major Requirements

50 credits in political science as follows:

1. *Introductory Requirement (15 credits)*: three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
2. *Field Requirement (15 credits)*: one course numbered POL S 210 or above in three different fields of political science chosen from political theory, comparative politics, international relations, American politics, and research methods, with a minimum grade of 2.0 in each
3. *Electives (20 credits)*: Four courses numbered POL S 210 or above with a minimum 2.0 grade in each
4. *GPA Requirement*: Minimum 2.25 cumulative GPA in political science courses at graduation and minimum 2.0 grade in each political science course taken to fulfill requirements for the major
5. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 political science credits numbered 210 or above through the UW.

Political Economy: This interdisciplinary option is a specialized program that combines study of political science and economics. Students who wish to pursue this option should consult a political science adviser. A list of recommended coursework is available.

International Security: Recommended to students interested in an in-depth study of international security. Concentrates on the relationship between politics and security, and specifically on the causes of war and the use and control of force, threats, promises, and the tactics, techniques, and ethics of violence. Teaches theories to address security issues and provides historical context for understanding contemporary security issues. Option coursework is completed in addition to the requirements of the major, however, up to 25 credits from the option may also fulfill requirements for the political science major. A list of recommended coursework is available.

45 credits as follows:

1. POL S 203, POL S 321, POL S 407 (15 credits)
2. 30 additional credits from an approved list of courses maintained in the department. At least 15 elective credits must be at the 300 or 400 level.

Minor

Minor Requirements: 30 political science credits as follows:

1. One introductory course chosen from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205
2. 25 elective credits numbered POL S 210 and above. (Internship and independent study courses such as POL S 496, POL S 498, POL S 499 do not count toward the minor)
3. Minimum 2.00 cumulative GPA for courses applied to the minor
4. Minimum 15 credits for the minor completed in residence through the UW

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of political science arms students with substantive knowledge of the discipline, including its concepts and theories. It also prepares them to be knowledgeable and active citizens. Through their study, students develop critical thinking, analytical, research, writing, interpersonal, and communication skills.

Graduates of political science pursue careers in many fields, including government (federal, state, and local), business, trade, public service (including non-governmental and international organizations), law, journalism, and teaching.

- *Instructional and Research Facilities:*
 - *Political Science Laboratory:* This facility with 25 computer stations, functions as a computer classroom and also as a general laboratory.
 - *Center for Social Science Computation and Research* maintains an extensive data archive and offers many statistical and software consulting services.
 - *Political Science/Jackson School/Law, Societies, and Justice/Comparative History of Ideas Writing Center:* The Writing Center is staffed by peer tutors and provides free help to students seeking feedback about their writing. The Writing Center director works with instructors to design workshops to help students with assignments.

The Department of Political Science is affiliated with a number of research centers:

- *The Center for American Politics and Public Policy* is a focal point for the study of politics and policy processes in the United States. Research relates to public policy processes, including issues of agenda setting, decision making, implementation, quantitative and qualitative measures of policy change, and the role of ideas and dialogue in policy change. Policy arenas include education reform, health care, environmental regulation, and building code enforcement.

- *The Center for Communication and Civic Engagement* investigates how innovative communication can improve the quality of civic life. The center's primary focus is to understand how new information technologies can supplement more traditional forms of communication to facilitate civic engagement.
- *The University of Washington's Institute for the Study of Ethnicity, Race, and Sexuality* is an interdisciplinary research center dedicated to bringing the tools of contemporary social science inquiry to the careful examination of issues of social, economic, and political exclusion and disadvantage of marginalized minority populations in the United States, and their potential solutions.
- *Harry Bridges Center for Labor Studies* promotes the study of labor as a central concern in higher education and focuses on labor's contribution to society—locally, nationally, and worldwide. The center supports research, teaching, and community outreach.
- *The Comparative Law and Society Studies Center* is committed to promoting interdisciplinary research and teaching as well as community service regarding law, justice, and human rights throughout the world.
- *European Union Center* promotes the study of the European Union and trans-Atlantic relations.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department offers three internship programs that range from part-time to full-time programs. Students may work in local agencies (POL S 496), in the state legislature (POL S 497), and in Washington, D.C. (POL S 498).

Listings of local internships and applications are available in 215 Smith.

[The Washington State Legislative Internship Program](#) is a winter-quarter program in Olympia and is open to students from all majors. Students earn 15 credits for the internship and attend a class taught by a political science faculty member. Applications are available from departmental advisers in 215 Smith and are due by the end of October.

Students in all majors may apply for The [Washington Center](#), a comprehensive internship program that places students in Washington, D.C. Students earn 15 credits for the internship. Additional information is available from departmental advisers in 215 Smith.

- *Department Scholarships:*
 - *Hugh Bone Scholarship:* The endowed Hugh A. Bone Scholarship was established by the Department of Political Science in 1986 to recognize Professor Bone, a former department chair, and to continue his commitment to a “participative citizenry.” Professor Bone founded the Washington State Legislative Internship Program and many students who studied with him continue

active political lives because of his stewardship and interest. The scholarship was established in his name to help students with financial need study and intern away from the UW-Seattle campus.

- *Agnes C. Nelson Memorial Scholarship*: The departments of Political Science and Economics make annual full-tuition awards to students who demonstrate interest in the interrelationship of politics and economics and who meet financial eligibility requirements. To apply for the scholarship, students must have completed a minimum 25 credits in political science and economics with at least 10 credits in each discipline. Deadlines are posted early in spring quarter.
- *Department Awards*
 - *The Robert A. Dahl Award*: The Department of Political Science recognizes an outstanding graduating senior with the Robert A. Dahl Award. To be eligible for consideration, a student must demonstrate scholarship excellence as well as interest in political science as a discipline.
 - *Daniel C. Lev Award*: The Department of Political Science created this award to recognize the contribution of Professor Dan Lev to the department's Honors program. The award recognizes an exceptional senior Honors thesis.
 - *Sharon S. Redeker Award for Public Service*: The Department of Political Science created this award in honor of Sharon Redeker, who served for many years as the department's Director of Academic Services. This award recognizes the exceptional public service of a political science senior while at the UW.
- *Student Organizations/Associations*: Pi Sigma Alpha (Political Science Honor Society), Phi Alpha Delta (pre-law fraternity). See adviser for details.

Graduate Program

Graduate Program Coordinator
215 Smith, Box 353530
206-543-1898
polsgrad@uw.edu

Graduate study integrates traditional education in political science's primary fields with other fields in the social sciences.

Areas of study include comparative politics, international relations, American politics, political theory, political economy, race and ethnic politics, public policy, public law, political communication, and methodology.

Graduate work is primarily preparation for the doctor of philosophy degree. The master of arts requirement serves as the initial stage of the PhD program; the department does not offer a terminal master of arts degree and admits students for the PhD program only.

Doctor of Philosophy

Admission Requirements

1. **Statement of Purpose** academic background, including any research experience and methodological skills; plans and goals for study, including intellectual interests and areas of specialization; and reasons for interest in studying at the UW.
2. **Writing sample:** A paper (not to exceed 20 pages) or excerpts from a larger work (e.g., honors thesis) demonstrating ability to write critically and analytically.
3. **Resume**
4. **Letters of recommendation**
5. **Transcripts**
6. **Test scores:** GRE General Test scores sent directly by the Educational Testing Service (ETS). English proficiency scores for international students, sent directly by the Educational Testing Service (ETS)-

Degree Requirements

Minimum 124 credits

1. *General Fields:* One from American politics, comparative politics, international relations, and political theory. At least one additional core course in another general field. Either a second general field or a specialized field (public law, political communication, political economy, political methodology, public policy processes, or minority and race politics).
2. *Political Research Methods:* Minimum level of competence. (Foreign language is not required for the PhD, unless the student selects a field(s) where competence in a language is beneficial.)
3. *MA Degree (46 credits):* Usually completed within the first two years of study.
4. *Additional Field:* A third field which can be another general field and/or one or more of the specialized fields listed above, and/or at most one non-designated field (from either another academic discipline or individually defined by the student).
5. *PhD Degree:* Normally three years beyond the MA, including written and oral examinations in the three fields; general examination (dissertation prospectus); dissertation (minimum 27 credits).

Research Facilities

Access to computing facilities and extensive data holdings is available. The department is also affiliated with several research centers, including the Center for American Politics and Public Policy, the Center for Communication and Civic Engagement, the Center for Statistics and Social Sciences, the Comparative Law and Society Studies Center, the Harry Bridges Labor Studies Center, the Center for Comparative and Historical Analysis of Organizations and States, and the UW's Institute for the Study of Ethnicity, Race, and Sexuality. The University is also a member of the Inter-University Consortium for Political and Social Research.

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students, including those in their first year of study. Provided they make satisfactory progress, students are eligible for departmental financial assistance for five consecutive years.

Course Descriptions

POL S 101 Introduction to Politics (5) I&S Political problems that affect our lives and shape the world around us.

POL S 110 Political Argumentation (3) VLPA/I&S Skills- and practice-based approach to political argumentation. Suitable for non-majors.

POL S 120 Perspectives on Contemporary Public Policy Issues (3) I&S Lecture series on contemporary domestic and international public policy issues. Credit/no-credit only. Offered: jointly with JSIS B 120.

POL S 195 Study Abroad: Political Science (1-10, max. 15) I&S Lower-division political science courses taken through a UW approved study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements.

POL S 201 Introduction to Political Theory (5) I&S Philosophical bases of politics and political activity. Provides an introduction to the study of politics by the reading of books in political philosophy. Organized around several key political concepts, such as liberty, equality, justice, authority, rights, and citizenship. Offered: AWSpS.

POL S 202 Introduction to American Politics (5) I&S Institutions and politics in the American political system. Ways of thinking about how significant problems, crises, and conflicts of American society are resolved politically. Offered: AWSpS.

POL S 203 Introduction to International Relations (5) I&S The world community, its politics, and government. Offered: AWSpS.

POL S 204 Introduction to Comparative Politics (5) I&S Political systems in a comparative framework. Traditional and contemporary approaches to the study of governments and societies in different countries. Offered: AWSpS.

POL S 205 Political Science as a Social Science (5) I&S, QSR Methodological perspectives of social science disciplines: commonalities and differences in assumptions, values, and paradigms. Current issues from the multiple perspective of social sciences; limits of the social sciences in resolving key social issues.

POL S 207 Issues of Global Justice (5) I&S, DIV *M. BLAKE, J. MAYERFELD, W. TALBOTT* Introduces issues of global justice. Topics include: global poverty and aid, immigration,

transnational governance, gender in global relations, climate change, and cultural relativism. Offered: jointly with PHIL 207/VALUES 207.

POL S 212 Philosophy of Feminism (5) I&S, DIV Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with GWSS 206/PHIL 206.

POL S 213 The Korean Peninsula and World Politics (5) I&S Ha Introduces Korean politics, economics, society, and international relations. Overviews the development in politics, economy, and society since the late nineteenth century. Addresses the evolution of Korea in the international society by comparing Korea experience with that of China and Japan. Offered: jointly with JSIS A 213.

POL S 246 African American Politics (5) I&S, DIV C. PARKER Survey of African Americans within the U.S. socio-political processes. Situates African Americans within a post-civil rights context where there is debate about race's centrality to an African American politics. Offered: jointly with AFRAM 246.

POL S 249 Introduction to Labor Studies (5) I&S Conceptual and theoretical issues in the study of labor and work. Role of labor in national and international politics. Formation of labor movements. Historical and contemporary role of labor in the modern world. Offered: jointly with HSTCMP 249/SOC 266.

POL S 270 Introduction to Political Economy (5) I&S A. GILL Political economy as a tool for understanding and evaluating the political world. Combines theory, methods, and insights derived from economics and political science and applies them to a range of substantive issues.

POL S 273 The Concept of Political Power (5) I&S How to understand and explain relationships of power. Readings from Marxism, Weberian sociology, anarchism, classical political philosophy, and contemporary political science. May also include works of fiction.

POL S 281 Literature and American Political Culture (5) VLPA/I&S Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with ENGL 251.

POL S 295 Study Abroad: Political Science (1-10, max. 15) I&S Political science courses taken through a UW approved study abroad program. Specific content varies and must be individually evaluated.

POL S 299 Special Topics in Political Science (2-5, max. 10) I&S Examines a different subject or problem of current interest within the discipline.

POL S 301 Topics in Political Theory (5, max. 10) I&S Study of topics in political theory.

POL S 302 Free Will, Nature, and Nurture in Politics and Society (5) I&S *M. SMITH*
Examines beliefs and actions in politics and other domains from the standpoint of free will, nature, and nurture. Compares political science to other disciplines in explaining why people think and act as they do.

POL S 303 Public Policy Formation in the United States (5) I&S Policy decision making with emphasis on: how issues arise, the way they become part of the policy agenda of the executive and the legislature, how these institutions organize to handle policy issues, and the roles of the legislature, the executive, and the bureaucracy. Public policy literature and familiarization with key aspects of policy decision making at the national, state, and local levels.

POL S 304 The Press and Politics in the United States (5) I&S Journalists' role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Extensive off-campus experience included. Offered: jointly with COM 304.

POL S 305 The Politics of Mass Communication in America (5) I&S Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics. Offered: jointly with COM 305.

POL S 306 Media, Society, and Political Identity (5) I&S *W. BENNETT* Explores how society and culture are both represented in and shaped by communication technologies and media content. Media include film, advertising, news, entertainment television, talk shows, and the Internet. Explores how media represent and affect individual identity, values, and political engagement. Offered: jointly with COM 306.

POL S 307 Religion and World Politics (5) I&S *A. GILL* Explores the intersection of religion and politics in various regions of the world, including the United States, Europe, Middle East, Latin America, and other regions. Presents an historical perspective on religion alongside contemporary issues in religion, politics, and church-state relations. Offered: jointly with RELIG 307.

POL S 308 The Western Tradition of Political Thought, Ancient and Medieval (5) I&S
Origin and evolution of major political concepts from ancient Greece to the medieval period.

POL S 309 The Western Tradition of Political Thought, Pre-Modern (5) I&S Continuation of POL S 308, treating materials from the fifteenth through eighteenth centuries.

POL S 310 The Western Tradition of Political Thought, Modern (5) I&S Continuation of POL S 308 and POL S 309, focusing on material from the eighteenth through twentieth centuries.

POL S 311 Individual and the State (5) I&S Individualism and communitarian critics. Political and ethical implications of both. Nature of the state, liberty, responsibility, cooperation.

Important individualist and collectivist literature, dealing with market institutions and citizen politics, critically assessed.

POL S 312 Survey of American Political Thought (5) I&S Survey of American political thought from colonial times to the 1980s. Topics include the idea of the self-made man; the intellectual contexts of the Declaration of Independence and the Constitution; slavery, abolition, and the Civil War; progressivism; Cold War liberalism; the Civil Rights Movement and its critics; and modern conservatism. Prerequisite: cannot be taken for credit if POL S 318 or POL S 319 already taken.

POL S 313 Women in Politics (5) I&S, DIV Theoretical, historical, and empirical studies of women's participation in political and social movements. Women's diverse efforts to improve their political, social, and economic status. Policy issues of particular concern to women. Women's political experiences in household, local, regional, national, and international arenas. Offered: jointly with GWSS 313.

POL S 314 Israel: Dynamic Society and Global Flashpoint (5) I&S, DIV Introduces the people, institutions, and culture of Israel in the context of larger global forces. Examines domestic, regional, and international elements, both historically and in the contemporary period, that have shaped Israel's culture, politics, and special role in world affairs. Topics include nationalism, ethnicity, politics, religion, film, literature, and culture. Offered: jointly with JSIS A 314/NEAR E 315.

POL S 315 Black Identities and Political Power (5) I&S Relates the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Instructors: Rivers Offered: jointly with AFRAM 315.

POL S 316 African-American Political and Social Thought (5) I&S, DIV C. PARKER Race relations in U.S. politics as defined by the struggle of African Americans for economic, political, and social equality. Studies of African-American political and social thought; expands and clarifies our understanding of the strengths and weaknesses of American democratic ideals.

POL S 317 The Politics of Race and Ethnicity in the United States (5) I&S, DIV M. FRANCIS Introduction to the history and development of racial hierarchy, focusing on how race and ethnicity shape political institutions (e.g., the Constitution, political parties, voting systems). Examination of political relationships between Whites, African Americans, Latinos, and Asian Americans. Case studies of minority representation and the politics of welfare, crime, immigration, and terrorism. Offered: jointly with LSJ 331.

POL S 318 American Political Thought from the Colonial Era to the Civil War (5) I&S, DIV J. TURNER III Major thinkers in American political thought from Franklin to Madison to Douglass to Jacobs to Lincoln. Emphasis on tensions between freedom, slavery, equality, violence, and "the power of the people." Prerequisite: cannot be taken for credit if POL S 312 already taken.

POL S 319 American Political Thought from Reconstruction to the Present (5) I&S, DIV J. Turner Iii Major thinkers in American political thought from Lincoln to Whitman to Du Bois to Martin Luther King, Jr. to Malcolm X to Audre Lorde to Ronald Reagan. Emphasis on the legacies of slavery in American life and the tension between citizen and corporate power. Prerequisite: cannot be taken for credit if POL S 312 already taken.

POL S 320 State-Society Relations in Third World Countries (5) I&S, DIV Bachman, Callahan Relationships among political, social, and economic changes in Asia, Africa, and Latin America. Problems of economic and political development, revolution and reform, state-society relations, imperialism and dependency. Offered: jointly with JSIS B 310.

POL S 321 American Foreign Policy (5) I&S Constitutional framework; major factors in formulation and execution of policy; policies as modified by recent developments; the principal policymakers - president, Congress, political parties, pressure groups, and public opinion.

POL S 322 International Political Economy of Latin America (5) I&S V. MENALDO Exploration of politics underlying Latin America's economic development. Topics covered include import-substituting industrialization, mercantilism, the debt crisis, neoliberalism, market integration, and poverty. Review of major theoretical perspectives such as modernization theory, dependency, and the new political economy. Offered: jointly with JSIS A 322.

POL S 324 Europe in World Politics (5) I&S Independent and coordinated efforts of Britain, France, and West Germany to adapt to the post-World War II global system. Creation and development of the Atlantic Alliance. Relations with postcommunist states. Decolonization and the evolution of relations with the Third World. The movement for European integration.

POL S 325 The Arab-Israeli Conflict (5) I&S The politics of conflicting ideologies: Zionism and Arab nationalism; formation of the state of Israel; development of Palestinian nationalism; Arab-Israeli wars. Re-emergence of Palestinian activism; domestic sources of foreign policy.

POL S 326 Scandinavia in World Affairs (5) I&S C. INGEBRITSEN Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Includes a survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressures of interdependence. Offered: jointly with SCAND 326.

POL S 327 Women's Rights as Human Rights (5) I&S, DIV R. Cichowski Women's rights in comparative perspective, focusing on varying settings that alter the meaning and practical application. Domestic level: areas including abortion politics to trafficking in women. International level: areas including equality claims before European supranational judicial bodies, rape as war crime in international law. Offered: jointly with LSJ 327.

POL S 328 International Organizations (5) I&S Explores historical, theoretical, and empirical aspects of the United Nations, its specialized agencies, and other international organizations, both governmental and nongovernmental.

POL S 329 Global Communication (5) I&S Introduction to the history, purpose, channels, content, technologies, policy, and regulation of international communications systems. Issues covered include disparities in media development between post-industrial and developing nations, imbalances in international news and information flow, and the emergence of global communications. Offered: jointly with COM 322.

POL S 330 Communications in International Relations (5) I&S Looks at communications in relations between international groups and states. Examines the range of functions and roles communication media play in international affairs, global issues, and intergroup relations. Also examines the strategic use of communications by various groups. Offered: jointly with COM 321.

POL S 331 Government and Politics in the Middle East and North Africa (5) I&S Breakdown of traditional society and the problems of building modern political systems.

POL S 332 Topics in Comparative Politics (5, max. 10)

POL S 333 Topics in International Relations (5, max. 10)

POL S 334 Topics in American Politics (5, max. 10)

POL S 335 Topics in Political Economy (5, max. 10)

POL S 337 Collective Violence and the State (5) I&S, DIV Comparative study of how and why genocides have occurred in modern times. Examines how ethnic, religious, and nationalist conflicts have sometimes led to violent conflict, and how political leaders and governments have mitigated or exacerbated them, sometimes engaging in state sponsored mass killing. Offered: jointly with JSIS B 337.

POL S 338 Topics in Public Policy (5, max. 10)

POL S 340 Politics of India, Pakistan, and South Asia (5) I&S Course promotes a deeper understanding of politics in South Asia. Topics include political regimes, civil conflict, religion and politics, and economic development. Students also sharpen skills in reading social science articles, including picking out arguments, evidence, and logics of presentation. Offered: jointly with JSIS A 340.

POL S 341 Government and Politics of Canada (5) I&S Critical analysis of parliamentary institutions, political parties, and the federal system in Canada. Offered: jointly with JSIS A 321.

POL S 342 Government and Politics of Latin America (5) I&S Analysis of the political dynamics of change in Latin America comparing various national approaches to the political problems of modernization, economic development, and social change. Offered: jointly with JSIS A 342.

POL S 343 Politics and Change in Southeast Asia (5) I&S Government and politics in the countries of Southeast Asia, with attention given to the nature of the social and economic environments that condition them. Offered: jointly with JSIS A 343.

POL S 346 Governments of Western Europe (5) I&S Modern government and politics of Great Britain, France, Germany, and Italy.

POL S 347 Politics of International Law (5) I&S *G. Wallace* Examines the development, design, and consequences of international law. Focuses on how international legal agreements constrain and enable both state and non-state actors across a range of issues, including economic affairs, the environment, human rights, and war. Offered: jointly with LSJ 347.

POL S 348 European Union as Global Actor (5) I&S Surveys the European Union's evolution as a global actor and emergence as a potential superpower with increasingly unified foreign and defense policies. Covers institutions and interests that have driven this process; specific examples of European Union global engagement; and the potential implications for U.S. foreign policy. Offered: jointly with JSIS A 348.

POL S 349 Strategy and War (5) I&S *J. Mercer* Deterrence theory; decision-making and rationality; strategy and psychology; material and ideational structures; insurgencies and counter-insurgencies; ethics; nuclear strategy; terrorism; economic sanctions; chemical, biological, and cyber weapons; non-lethal weapons. Prerequisite: none; recommended: Pol S 203 recommended

POL S 350 Government and Interest Groups in the United States (5) I&S Agrarian, labor, professional, business, and ethnic interest in politics; impact on representative institutions and governmental processes.

POL S 351 The American Democracy (5) I&S Democratic theory; constitutional theory; the presidency; Congress; the Supreme Court; civil rights and civil liberties.

POL S 352 American Political Parties (5) I&S Theories of American parties, campaigns, and voting behavior; party leadership; political socialization and participation.

POL S 353 United States Congress (5) I&S *J. WILKERSON* Organization and procedure of Congress, state legislative politics, lobbying, legislative roles, theory and practice of representative government.

POL S 354 Elections and Voting in the United States (5) I&S Electoral institutions and processes of the United States: the idea and practice of elections, the electoral system, individual voting behavior, collective voting behavior, and the impact of elections on policy.

POL S 355 The American Presidency (5) I&S *R. THORPE* The American presidency; its evolution, its occupants, and its place within the American system. Topics include presidential character, war, elections, impeachment, the economy, and the Constitution.

POL S 356 Society and Politics (5) I&S Causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with SOC 356.

POL S 357 Minority Representation and the Voting Rights Act (5) I&S, DIV Explores whether and how African-Americans and Latinos are able to organize effectively and press their demands on the political system. Focuses on minority political behavior, the effect of these groups at the polls, the responsiveness of elected officials, and legal or constitutional obstacles affecting these phenomena.

POL S 358 American Political Culture (5) Examines the origins and content of Americans' political values and beliefs. Topics include American exceptionalism, the culture war, freedom, civic engagement, the American dream, individualism, and political ideology.

POL S 359 U.S. Latino Politics (5) I&S, DIV M. BARRETO Examines historical and current political incorporation of Latinos in the United States. Topics include Latino voting and voter mobilization, office seeking and representation, Latino public opinion, and public policy formation on "Latino issues." Offered: jointly with CHSTU 359.

POL S 360 Introduction to United States Constitutional Law (5) I&S G. LOVELL Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects. Offered: jointly with LSJ 360.

POL S 361 United States Courts and Civil Liberty (5) I&S G. LOVELL Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1937. Offered: jointly with LSJ 361.

POL S 363 Law in Society (5) I&S Inquiry into how law matters in social practice. Examines general theories of law, the workings of legal institutions, and the character of legally constituted practices and relationships in diverse terrains of social life. Offered: jointly with LSJ 363.

POL S 365 Lawyers in American Politics (5) I&S Influence of lawyers on American politics. Official and unofficial political roles, lawyers as lobbyists, as legislators, in the bureaucracy, politics of the American Bar Association. Includes study of legal education, professional values, and avenues of political access.

POL S 367 Comparative Law and Courts (5) I&S R. CICHOWSKI Introduction to comparative judicial politics, focusing on the relationship between law and politics in cross-national perspective, as well as on the functioning of supranational and international legal entities in the international system. May not be taken for credit if student has taken LSJ/JSIS B 366. Offered: jointly with LSJ 367.

POL S 368 The Politics and Law of International Human Rights (5) I&S, DIV J. Mayerfeld Studies the international human rights movement in its legal and political context. Focuses on institutions which influence, enable, and constrain the international promotion of human rights. Offered: jointly with LSJ 320.

POL S 370 Privacy (5) I&S *S. Pekkanen* Explores how individuals, corporations, and governments respond to privacy challenges in the digital age. Examines evolution of the idea of privacy using case studies of actual privacy policies, legal cases, and real-world situations. Covers legal, political, and social facets of this fundamental human issue. Offered: jointly with JSIS B 370/LSJ 370; Sp.

POL S 371 Global Crime and Corruption (5) I&S *J. Long Iv* We examine sources & outcomes of illicit behavior within firms, governments, and organizations at local, national, & international levels; investigating the psychological, cultural, political, and economic sources of crime/corruption; and explore these dynamics within businesses, bureaucracies, gangs, mafias, cults, and pirates. Case studies include India, US-Mexico drug trade, piracy, doomsday cults, Sicilian mafias, Nazi drug abuse, & Dark Web. Recommended: POL S 203, POL S 204, or POL S 270; or JSIS 123, JSIS 200, JSIS 201, or JSIS 222; or equivalent. Offered: jointly with JSIS B 371.

POL S 381 Urban Politics and Policy in the United States (5) I&S *Fraga* Introduces actors, institutions, processes, and policies of substate governments in the United States. Provides and intensive comparative examination of historical and contemporary politics and policy-making. Promotes understanding of city government and its role within the larger context of state and national governments.

POL S 382 State Government (5) I&S *J. WILKERSON* Focus on the structures, processes, and policy outputs of state governments in the United States.

POL S 383 Environmental Politics and Policy in the United States (5) I&S Interrelation between technological and environmental change and policy formation. Consideration of political behavior related to these phenomena and the capacity of urban public organizations to predict change and to formulate policies that can take future states into account.

POL S 384 Global Environmental Politics (5) I&S *K. LITFIN* Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural, and political processes. Offered: jointly with ENVIR 384.

POL S 385 Political Ecology of the World Food System (5) I&S/NW *K. Litfin* Investigates the intersection of globalization and food politics, the pivotal role of petroleum in the world food system, and the commodity chains for some foods. Includes an optional service learning component. Offered: jointly with ENVIR 385.

POL S 395 Study Abroad: Political Science (1-10, max. 15) I&S Political science courses taken through a UW approved study abroad program. Specific content varies and must be individually evaluated.

POL S 398 Honors Seminar (5, max. 15) I&S Intensive and advanced studies in various aspects of political science. Open only to participants in the departmental Honors program. Offered: AWSp.

POL S 401 Advanced Seminar in Political Theory (5, max. 10) I&S Topics can include, but are not limited to, analytical theory pertaining to justice, exploitation, and freedom; revolution and social changes; collective choice and action; sexuality and politics; critical theory; Marxist theory; post-structuralism. Content varies.

POL S 402 Advanced Seminar in Human Rights (5, max. 10) I&S *J. MAYERFELD* Examines selected human rights topics including questions relating to the meaning, justification, promotion, implementation, suppression, or denial of human rights.

POL S 403 Advanced Seminar in International Relations (5, max. 10) I&S Examination of contemporary developments in the field of international relations. Content varies according to the nature of developments and research interests of the instructor.

POL S 404 Topics in Public Policy (3-5, max. 6) I&S Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with PUBPOL 499.

POL S 405 Advanced Seminar in American Politics (5, max. 10) I&S Intensive reading and research in selected problems or fields of political analysis.

POL S 406 Marxian Political Economy (5) I&S Explores the relationship between social classes, the state, and political power in advanced capitalist societies. Investigates this relationship primarily by means of the tools of Marxian political economy and, in the process, evaluates these tools. Emphasis on theoretical perspectives, although the reading list has a few empirical applications as well.

POL S 407 International Conflict (5) I&S *E. KIER, J. MERCER* Examines different theoretical explanations for the causes of war, including the role of international, state, organizational, and individual factors; additional topics vary with instructor. May include the development of warfare, deterring weapons of mass destruction, terrorism, intelligence, and the ethics of warfare.

POL S 409 Undergraduate Seminar in Political Economy (5, max. 10) I&S Seminar in political economy with focus on Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Offered: jointly with ECON 409.

POL S 410 Technology, Politics, and the State (5) I&S Relationships between politics and technological change. Considers whether the relations between political and economic systems of industrial societies have been fundamentally altered by the increased importance and

interdependence of government, experts, and new technological possibilities for intervention in social life.

POL S 411 Theories of the State (5) I&S Topics may include origins and development of the state; arguments about the necessity, desirability, and proper role of the state; the nature and operation of modern states and the international state system; the legitimacy of modern state power.

POL S 412 Democratic Theory (5) I&S Explores the concept of democracy and theoretical models purporting to describe its central features: majority rule, participation, and deliberation. Themes also include: representative vs. direct democracy; the rights of minorities; the relationship between democracy and other political theories such as liberalism, socialism, and conservatism.

POL S 413 Contemporary Political Theory (5, max. 10) I&S Analysis of political theorists, exploring contemporary theories of humanity and society that form the basis for differing political ideas.

POL S 414 Politics and Culture (5) I&S How people interpret and shape the political world around them through the use of such cultural resources as language, symbolism, myth, and ritual. The various uses of these cultural elements establish the place of the individual in society, influence the perception of political events, and create opportunities for individual and mass political responses.

POL S 415 Women's Rights in an Integrated Europe (5) I&S Examines the transformation in women's rights policy within the European community from the late 1950s through the present. Focuses on the legal rules and bodies that govern not only these policy domains, but also their evolution and impacts. Offered: jointly with LSJ 428.

POL S 416 Economic Theory as Applied to the Political System (5) I&S Explanation and evaluation of the political system, using elementary economics theory. Topics include alternative voting rules, the political effectiveness of various types of groups, causes and consequences of logrolling, and bureaucratic organizations. Prerequisite: ECON 300. Offered: jointly with ECON 452.

POL S 417 Political Economy of India (5) I&S Analysis of relationships among processes of economic change, political institutions, and structures of political power in contemporary India. Includes contrasting approaches to Indian economic development, land reform, radical and agrarian political movements, and role of foreign aid. Offered: jointly with JSIS A 417.

POL S 418 Japanese Trade Politics (5) I&S *R. Pekkanen* Survey of Japan's foreign trade diplomacy. Examines evolution of Japan's trade patterns in exports and foreign direct investment with key partners. Covers institutional and legal frameworks of Japan's trade relations, such as bilateral fora, regional options including free trade agreements, and multilateral venues such as the WTO. Offered: jointly with JSIS A 487.

POL S 419 United States-China Relations (5) I&S *Bachman* Surveys the history of United States-China relations and examines the evolution of bilateral relations, particularly since 1949. Focus on the period since 1972 and the major issues as they have evolved since that time, including trade, human rights, security, and Taiwan. Offered: jointly with JSIS A 459.

POL S 420 Soviet and Russian Foreign Policy (5) I&S Ideological, historical, and strategic components of Soviet foreign policy; Gorbachev's "new thinking" and the collapse of the USSR; redefining post-Soviet "Russia"; Russian military and security policy; Russia and the West; Russian relations with the newly independent states.

POL S 421 Relations Among Communist and Post-Communist States (5) I&S Major disputes and types of relationships among different communist states; international effects of the communist collapse; comparative dynamics of state-building, market reform, and democratic transition; international integration and domestic politics in the former Soviet bloc; ethnic conflict and the problem of state boundaries; redefining security in the post-communist milieu.

POL S 422 International Environmental Politics Seminar (5) I&S Study of the practical and theoretical challenges associated with global ecological interdependence. Examination of international treaties and institutions, state, and nonstate actors with an emphasis on the emerging concept of sustainability.

POL S 424 International Relations of Japan (5) I&S *S. Pekkanen* Comprehensive examination of Japan's international relations. Covers issues such as trade, security, environment, aid, and human rights. Investigates Japan's participation in international organizations, including the UN, World Bank, IMF, and WTO. Examines Japan's relations with the United States, the European Union, Asia, Latin America, Africa, and other regions. Offered: jointly with JSIS A 437.

POL S 425 Political Psychology and War (5) I&S *J. MERCER* Explores how political scientists use psychology to address questions of war and peace.

POL S 426 World Politics (5) I&S The nation-state system and its alternatives, world distributions of preferences and power, structure of international authority, historical world societies and their politics. Offered: jointly with JSIS B 426.

POL S 427 International Political Economy (5) I&S Examines major theoretical problems, substantive issues, and schools of thought in international political economy (IPE), including issues of trade, production, and finance. Preparation for critical analysis of dilemmas entailed in establishing and maintaining an instrumentally effective and ethically acceptable IPE system.

POL S 428 Military Intervention (5) I&S Historical and theoretical analysis of military intervention in the post-World War II era. Considers how and why interventions occur and evaluates intervention as a foreign-policy response.

POL S 429 Political Parties in Japan and East Asia (5) I&S *R. Pekkanen* Focus on political parties in Japan. Combines theoretical readings on political parties with intensive study of Japanese political parties. Offered: jointly with JSIS A 436.

POL S 430 Civil-Military Relations in Democracies (5) I&S *E. Kier* Explores issues of civil-military relations in the United States including debates about the garrison state hypothesis; military advice on the use of force; the civil-military “gap”; and issues of race, gender, and sexual orientation in the military. Offered: jointly with LSJ 431.

POL S 431 International Relations in the Middle East (5) I&S Study of domestic sources of foreign policy in the Middle East; politics of oil; the East-West rivalry in the arena; and conflict and collaboration among the local powers.

POL S 432 Political Islam and Islamic Fundamentalism (5) I&S *Robinson* Study of resurgence, since mid-1970s, of political Islam and what has come to be called Islamic fundamentalism, especially in the Middle East. Topics include the nature and variety of political Islam today, causes and implications of the current resurgence, and comparison with previous resurgences. Offered: jointly with JSIS B 406.

POL S 433 International Relations in Southeast Asia (5) I&S Analysis of the problems affecting relations among the countries of Southeast Asia.

POL S 434 International Relations of South Asia (5) I&S Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with JSIS A 434.

POL S 435 Japanese Government and Politics (5) I&S Government and politics of Japan with emphasis on the period since 1945. Offered: jointly with JSIS A 435.

POL S 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Offered: jointly with JSIS B 436.

POL S 437 Politics in Scandinavia (5) I&S *C. INGEBRITSEN* Twentieth-century politics in Scandinavia. How Scandinavian countries have been governed. Costs and consequences of their governmental style and its uncertain future. Optimal size of polities, problems of mature welfare states, process of leadership and representation in multiparty systems, decline of political parties. Offered: jointly with SCAND 437.

POL S 438 Politics in France (5) I&S Study of contemporary France. Structures of government in the Fifth Republic; nature of French voting behavior and evolution of the bipolarized political party system; behavior of political interest groups; training of France's administrative elite and functioning of the state bureaucracy; dynamics of policy-making.

POL S 439 Politics of Divided Korea (5) I&S Governments, politics, and economy of South and North Korea, the inter-Korea relations, and the two Koreas' relationship with the major powers - especially the United States - with emphasis on the post-cold war period. Offered: jointly with JSIS A 439.

POL S 440 European Fascism (5) I&S Analysis of fascism as revolutionary movement and type of political system in post-World War I Europe: Hitler's Third Reich, Mussolini's Italy, and Vichy France. Consideration of dynamics of resistance, policies that produced Holocaust, and questions raised at trials of fascist leaders in Nuremberg and elsewhere.

POL S 441 Government and Politics of Russia (5) I&S Ideological and historical bases of Soviet politics; Leninism; Stalinism; Gorbachev's perestroika and the collapse of the USSR; the role of Yeltsin; problems of Russian state-building, market reform, and democratic transition; political parties and civil society; the relationship between the center and the regions; the problem of Russian national identity.

POL S 442 Government and Politics of China (5) I&S *S. WHITING* Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with JSIS A 408.

POL S 443 Comparative Political Societies (5) I&S Analyses of modern and premodern types of stable political society; special attention to contemporary representative democracy.

POL S 444 Revolutionary Regimes (5) I&S Analysis of the several types of political regimes concerned with effecting fundamental social change; emphasis on the twentieth century.

POL S 445 Politics and Society in Eastern Europe (5) I&S Political and social issues in lands east of the Elbe, treating some historical problems but focusing particularly on developments since 1945. Includes all communist states of Eastern Europe and their successors. Offered: jointly with JSIS A 490.

POL S 447 Advanced Seminar in Comparative Politics (5, max. 10) I&S Selected comparative political problems, political institutions, processes, and issues in comparative perspective. Strongly

POL S 448 Politics of the European Union (5) I&S Examines the origins, structures, and political dynamics of the European Union. Attention given to theories of integration, to relations between the European Union and member states, and to the role of the European Union in world politics.

POL S 449 Politics of Developing Areas (5) I&S Comparative study of problems of national integration and political development in the new states of Asia and Africa.

POL S 451 Communication Technology and Politics (5) I&S Employs some core concepts of political communication and theories of democracy to examine the emerging role of information and communication technologies in candidate and issue campaigning; online voting; protest and

advocacy movements; law-making and electronic governance in the United States and internationally. Offered: jointly with COM 407.

POL S 452 Mass Media and Public Opinion (5) I&S Examines the foundations of the idea of public opinion in a democratic environment and the role of mass communication in the organization, implementation, and control of that opinion. Considers these relationships from the perspectives of societal elites, media, and citizens. Offered: jointly with COM 414.

POL S 453 The State Legislature (5) I&S Study of American state legislatures, with special reference to Washington State legislature. Student must spend several Fridays in Olympia when the legislature is in session. Those desiring a more extensive involvement with the legislature should enroll in the political internship.

POL S 454 Political Communication Seminar (5, max. 10) I&S Contemporary topics studying how communication affects citizen engagement with public life. Offered: jointly with COM 411.

POL S 455 Political Deliberation (5) I&S Exploration of philosophical and empirical writings on political deliberation in small groups, campaigns, and other public settings. Contemporary deliberative theory. Participation in face-to-face discussions on current issues. Offered: jointly with COM 417.

POL S 456 Institutional Failure (5) I&S R. THORPE Examines why political institutions fail to achieve their goals or operate in a manner they were originally intended to, and the consequences of these failures. Topics include the national security establishment, the drug war, concentrated poverty, mass incarceration, and inner-city schools. Offered: jointly with LSJ 456.

POL S 457 Topics in Labor Research (5, max. 10) I&S Analysis of the post-World War II decline of national labor movements and strategies employed to reverse this trend. Requires a major research project on organizing, bargaining, or another question in labor studies. Prerequisite: either POL S 249, HIST 249, or SOC 266. Offered: jointly with HSTCMP 457.

POL S 460 Political Economy of the European Union (5) I&S J. CAPORASO Historical foundation of the European Economic Community; major phases of its development; theoretical explanations for European integration.

POL S 461 Mass Media Law (5) I&S Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with COM 440.

POL S 462 The Supreme Court in American Politics (5) I&S Explores the US Supreme Court as a political institution. Topics include processes that bring issues before the court, influences on judicial decision making, the impact of the court on democratic processes, the role of the court in constitutional development, and the court's interactions with other branches.

POL S 464 The Politics of American Criminal Justice (5) I&S Political forces and value choices associated with the enforcement of criminal law. Distribution of resources among participants in the criminal justice system (e.g., police, attorneys, defendants, and judges). Understanding and evaluation of the interaction of criminal justice processes with the political system.

POL S 465 Law and Public Policy in the United States (5) I&S Relationship between law and public policy, with particular attention to problems of social, economic, and political change. Considers legal and constitutional processes as they relate to such problems of public policy as race relations, the environment, and the economy.

POL S 467 Comparative Law in Society (5) I&S Legal systems around the world as they actually work in their respective political, social, and economic contexts. Emergence and development of European legal systems, legal customs at variance with those of Europe, problems of legal processes in the modern state.

POL S 468 Comparative Media Systems (5) I&S Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with COM 420/JSIS B 419.

POL S 469 Law and Rights in Authoritarian Regimes (5) I&S S. WHITING Explores role of law and courts and nature of rights in authoritarian regimes. Questions addressed include why authoritarian regimes promote “rule-of-law”, who is empowered by law, and the political consequences of “rule-of-law” promotion. Offered: jointly with JSIS B 469/LSJ 469.

POL S 470 Public Bureaucracies in the American Political Order (5) I&S Growth, power, and roles of governmental bureaucracies in America: conflict and conformity with American political thought, other political institutions, and the public.

POL S 471 Politics of Risk (5) I&S May Examines risks that occur infrequently but have catastrophic impacts, including health and environmental harms, terrorism, and natural disasters. Considers social science theorizing about risks, how risks enter the policy agenda, and political and policy responses to different risks within the United States.

POL S 472 Electoral Systems (5) I&S R. Pekkanen Explores a fundamental link between citizens and political representation: how electoral systems shape party systems, what kinds of people become candidates, how parties work, representation, and policy. Covers effects and mechanics of the various voting systems. Offered: jointly with JSIS B 472.

POL S 473 Decision-Making in Politics (5) I&S Process of decision-making in politics at elite and mass levels, comparison of approaches based on the comprehensive rationality of decision makers with approaches based on limitations on the cognitive capacities of decision makers. Applications to real decision-making situations.

POL S 474 Government and the Economy (5) I&S Interaction between politics and the economy. Impact of policy makers on economic performance. Models of partisan and political business cycles. Concepts of economic voting. Marxist theories of modern capitalist economics.

POL S 475 Public Choice (5) I&S *A. GILL* Problems and prospects for collective action in a political democracy. Designing rules and institutions for effective central authority and effective constraints on governmental power. Social choice theory and game theory.

POL S 476 Strategy in Politics (5) I&S Explores the problem of finding fair methods for making social decisions, and examines alternative methods of social choice. Emphasis on the importance of agenda control for outcomes, and the implications of theories of social choice for common interpretations of concepts such as democracy and the general will.

POL S 477 African Political Development (5) I&S Topics in contemporary African politics related to development of the African state in comparative perspective, including state formation; nationalism and the struggle for independence; civil wars, genocide, and under-development; democratic transition, elections, and voting; economic growth; film and literature; gender and ethnicity; and corruption and terrorism. Prerequisite: POL S 204.

POL S 479 Contemporary Central Asian Politics (5) I&S *Radnitz* Examines the politics of contemporary post-Soviet Central Asia. Analyzes issues relevant to the region in comparative perspective, including democratization, religion, terrorism, civil society, economic reform, ethnic identity, and international influences. Uses theory to shed light on current policy debates. Offered: jointly with JSIS A 479.

POL S 480 Comparative Politics and Korea Studies (5) I&S *Ha* Approaches Korean politics, political economy, and society from a comparative perspective. Examples of major comparative questions based on Korean case include democratization, strong state dynamics, civil society, and impact of globalization. Offered: jointly with JSIS A 466.

POL S 481 Big City Politics (5) I&S Contemporary big city politics, focusing on Seattle and the largest 25 cities. Social, economic, and political trends that have shaped characteristics of large American cities. Distribution and use of economic and political power among parties and groups. Future of large cities and politics of change.

POL S 487 Political Science Honors Seminar (5) I&S Intensive and advanced studies in various aspects of political science. Open only to participants in the Political Science Honors program. Offered: Sp.

POL S 488 Honors Thesis Design (5-) I&S Instruction in Honors Thesis research design and methods. Required for Political Science Honors. Offered: A.

POL S 489 Honors Thesis Writing (-5) Research and writing of thesis under supervision of a faculty member. Required for Political Science Honors. Prerequisite: minimum grade of 3.3 in POL S 488. Offered: W.

POL S 495 Study Abroad: Political Science (1-10, max. 20) I&S Political science courses taken through a UW approved study abroad program for which there are no direct UW equivalents. Specific content varies and must be individually evaluated.

POL S 496 Undergraduate Internship (2-5, max. 15) Students serving in approved internships. Credit/no-credit only.

POL S 497 Political Internship in State Government (5, max. 20) Students serving in approved internship program with state government agencies.

POL S 498 The Washington Center Internship (15) Full-time academic internship with the Washington Center in Washington, DC. Includes internship activities, academic seminar, assemblies, and related activities. Credit/no-credit only.

POL S 499 Undergraduate Readings and Research (1-5, max. 20) Intensive study with faculty supervision.

POL S 500 Political Research Design and Analysis (5) Major quantitative methods of empirical research in political science. Primary emphasis on research design, data collection, data analysis, and use of computers.

POL S 501 Advanced Political Research Design and Analysis (5) Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor. Offered: jointly with CS&SS 501.

POL S 502 Qualitative Research Methods (5) Introduction to qualitative methods in political science, emphasizing practical experience with techniques. Readings and exercises cover research design, multiple methods, varieties of qualitative data, measurement and validation, participant observation, interviewing, and content analysis. Research decision-making issues include analytical strategies, presentation of data, ethics, epistemology, and theory-building.

POL S 503 Advanced Quantitative Political Methodology (5) Theory and practice of likelihood inference. Includes probability modeling, maximum likelihood estimation, models for binary responses, count models, sample selection, and basis time series analysis. Offered: jointly with CS&SS 503.

POL S 504 Multi-Method Field Research (5) *J. LONG IV* Provides training in how to design and implement multi-method field research in American, comparative, and international politics, covering qualitative/ethnographic approaches; survey design, implementation, and analysis; and the design and implementation of field experiments and randomized impact evaluation.

POL S 505 Comparative Politics Core (5) Modern theories, approaches, and methods in the study of comparative politics.

POL S 509 Political Theory Core (5, max. 10) Central themes in political theory and the works of major political theorists, past and present.

POL S 510 Maximum Likelihood Methods for the Social Sciences (5) *C. ADOLPH*
Introduces maximum likelihood, a more general method for modeling social phenomena than linear regression. Topics include discrete, time series, and spatial data, model interpretation, and fitting. Prerequisite: POL S 501/CS&SS 501; POL S 503/CS&SS 503. Offered: jointly with CS&SS 510.

POL S 511 Seminar in Ethical and Political Theory (5) Ethical writings of major political philosophers. Coherent themes arising from these works and assessment of their impact on concepts of politics.

POL S 512 Time Series and Panel Data for the Social Sciences (5) *C. Adolph* Extends the linear model to account for temporal dynamics and cross-sectional variation. Focuses on model selection and real-world interpretation of model results. Topics include autoregressive processes, trends, seasonality, stationarity, lagged dependent variables, ARIMA models, fixed effects, random effects, cointegration and error correction models, panel heteroskedasticity, missing data in panel models, causal inference with panel data. Recommended: Graduate level coursework in linear regression and social science research design. Basic familiarity with or willingness to learn the R statistical language. Offered: jointly with CS&SS 512.

POL S 513 Issues in Feminist Theory (5, max. 10) Contemporary issues in feminist theory as they affect studies of women, politics, and society. Content varies according to recent developments in the field and the research interests of the instructor.

POL S 514 Selected Topics in Political Theory (5, max. 15) Selected topics, historical and conceptual, national, regional, and universal. Prerequisite: permission of instructor.

POL S 515 Political Theory Research Seminar (5) Survey of paradigmatic research approaches in political theory through the exploration of a theme (canonical text, theoretical concept, and specific topic). Methods covered may include rational choice, psychoanalytic, Straussian, Marxian, and feminist approaches. Students carry out substantive theoretical research.

POL S 516 Special Topics in American Political Thought (3/5) Special topics or themes in the development of American political culture.

POL S 517 Marxism and Critical Theory (5) Works of Marx and Engels as well as selected works of twentieth-century Marxist and critical theorists. Themes such as Marx's method, twentieth-century interpretations of Marx, and relationship of twentieth-century theorists to their eighteenth- and nineteenth-century forebears.

POL S 519 Modern Scandinavian Politics (5) Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the

present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with SCAND 519.

POL S 520 Seminar on Russian Foreign Policy (3) Selected topics in the development and objectives of the foreign policy of the Russian Federation.

POL S 521 International Relations Core (5) Key theories, concepts, and debates in the study of world politics and international relations. Provides an overview of the field and prepares students for the IR comprehensive exam.

POL S 522 International Political Economy (5) Theories of international political economy. Focuses on the emergence and development of the modern world system, the transition from feudalism to capitalism, and the institution of the nation-state system. Examines the political economy of trade, investment, and the international division of labor from a variety of theoretical perspectives. Prerequisite: POL S 521.

POL S 524 International Security (5) *E. KIER* Introduces some of the major debates concerning the use of force in international politics. Covers traditional issues in international security such as alliances and the causes of war, as well as some of the new and important questions, such as explaining war outcomes and war termination.

POL S 525 International Law and Institutions (5) *K. LITFIN* Inputs of international law into the decisional process in foreign policy. Effect of policy on law. Relevant roles of individuals and institutions in routine and crisis situations.

POL S 526 The Security of China (5) *Bachman* Examines how the Chinese state conceptualizes its national security interests and how it pursues strategies designed to achieve those interests. Topics include use of force, military modernization, civil-military relations, and defense industrialization. Offered: jointly with JSIS A 526.

POL S 527 Special Topics in International Relations Research (5, max. 15) Examination of current topics in the theory and practice of world politics. Content varies according to recent developments in the field and research interests of the instructor.

POL S 530 Transatlantic Relations: The United States and Europe in World Politics (3) Fulfills required component of “American Module” of Transatlantic Studies program. Addresses political dynamics of relations between United States and Europe from American republic's founding to post-Cold War era. Limited to students in Transatlantic Studies program.

POL S 532 The Chinese Political System (5) *S. WHITING* Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Offered: jointly with JSIS A 532.

POL S 533 Seminar on Contemporary Chinese Politics (5) Research on selected problems in contemporary Chinese politics. Prerequisite: POL S 532, or permission of instructor. Offered: jointly with JSIS D 533.

POL S 535 International Relations of Modern China (5) Foreign policy of the People's Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with JSIS A 535.

POL S 537 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with JSIS A 563.

POL S 538 Government and Politics in the Middle East and North Africa (5) Political change in the area within the context of comparative politics; breakdown of traditional political systems; new range of choice expressed in competing ideologies; governmental and nongovernmental instrumentation of change; and problems of international relations and regional conflict and integration.

POL S 539 International Relations of Northeast Asia (5) Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economics are examined. Prerequisite: permission of instructor. Instructors: Hellmann Offered: jointly with JSIS A 551.

POL S 540 Problems in South Asian Politics (3) Research problems in contemporary Indian politics.

POL S 541 Institutions and Institutional Change in the Soviet Union, Russia, and the Newly Independent States (5) Critical appraisal of the principal theories and research methods dealing with the development of the Soviet state from 1917-1991 and the formation of the newly independent states after the Soviet collapse.

POL S 542 Seminar: State and Society (5) *Migdal* Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states as large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with JSIS B 542.

POL S 543 Latin American Politics (5) Theories of authoritarianism, corporatism, democratization, and revolution in Latin America. Explores role of international and domestic economic factors shaping politics and the effect of politics on economic development. Examines elite behavior and grassroots social movements.

POL S 544 Problems in Comparative Government (5, max. 15) Selected problems in the comparative analysis of political institutions, organizations, and systems.

POL S 547 Politics of Reform (5) Examines cases of reform in democratic political systems, e.g., Roosevelt's New Deal, Allende's Chilean "revolution," Mitterand's socialist experiment in France, and the Thatcher government in Britain.

POL S 548 Comparative Political Parties (5) Role of political parties in the modern state. Similarities and differences in origins and development of political parties and functions they perform, both in established democracies and in developing countries.

POL S 549 Problems of Political Development (5) Concepts of development and modernization, with particular attention to their political dimensions and their application to various historical and contemporary cases.

POL S 550 American Politics Core (5) Systematic survey of the American government and politics literature; focuses on national politics.

POL S 551 Political Communication (5) Surveys classic works and new directions in political communication, including functionalist, structuralist, constructivist, network, and comparative approaches, reflecting a range of methods. Examines political organizing, electoral and legislative processes, civic (dis)engagement, media and politics, public deliberation and opinion formation, political identity and discourse. Offered: jointly with COM 551.

POL S 552 Special Topics in Political Communication (5, max. 10) Examination of current topics in the theory and practice of political communication.

POL S 553 Public Opinion (5) *C. PARKER* Selected problems in opinion formation, characteristics, and role of public opinion in policy-making process.

POL S 554 Legislative Politics (5) Selected problems in legislative processes and leadership, state and national.

POL S 555 American Politics Topics (5, max. 10) Examination of current topics in the theory and practice of American politics. Content varies according to recent developments in the field and research interests of the instructor.

POL S 556 American Political Development (5) Examination of leading works in, and theories of, American political development. Topics include the development approach itself; critical junctures in U.S. political history; key changes in institutions, the American state, the representation of interests and party politics; and the relevance of development studies to current politics.

POL S 557 United States Party System (5) Examines the institutional and behavioral foundations of party politics in the United States, emphasizing key historical patterns of party system development and the major scholarly approaches to the study of the American parties and party politics.

POL S 559 Special Topics in Political Methodology (5, max. 10) Examination of current topics on the theory and practice of political methodology. Course content varies according to recent developments in the field and the research interests of the instructor.

POL S 560 Industrialization and International Relations (5) *Ha* Examines internal-external linkage with a focus on industrialization and international relations. Comparative perspective on the question of how industrialization shapes distinctive international perspectives in terms of perception, strategies, and foreign policy behaviors. Countries covered: South Korea, Japan, Prussia, the Soviet Union, and China. Offered: jointly with JSIS A 552.

POL S 561 Law and Politics (5) *McCann, Lovell.* Points and levels at which law and politics intersect. What is distinctive about legal forms; how these legal forms influence, and are influenced by, politics. Conceptions of law, courts and public policy, law and bureaucracy, civil and criminal justice, and the legal profession.

POL S 562 Law, Politics, and Social Control (5) Explores works of social scientists and lawyers regarding these competing conceptions of social control: as the seamy side of law - reinforcing equitable patterns of domination and disciplining deviants; as law embodying society's basic values, articulating minimum rules for harmonious social interaction.

POL S 563 Supreme Court in American Politics (5) Explores the tendency in the United States to turn to the Supreme Court to provide constitutional solutions for some of our biggest social, economic, and political problems. Focuses on the controversies concerning the legitimacy and capacity of the Supreme Court to intervene in American politics and public policy.

POL S 564 Law and the Politics of Social Change (5) Explores the many ways that law figures into the politics of social struggle and reform activity. Analyzes law in terms of particular state institutions (courts, agencies), professional elites (lawyers, judges), and especially cultural norms ("rights" discourses) that are routinely mobilized by reform-movement activists.

POL S 565 Special Topics in Public Law (5, max. 10) Examination of current topics on the theory and practice of public law. Content varies according to recent developments in the field and the research interests of the instructor.

POL S 566 Comparative Law and Politics (5) *R. CICHOWSKI* Study of the interaction between law and politics, at both the macro and micro levels of politics, and discussion of research drawing from a wide array of geographical settings. Examination in comparative context of whether macro-structures are autonomous from underlying social structures of power and interest in the micro-level.

POL S 569 Law and Rights in Authoritative Regimes (5) Explores role of law and courts and the nature of rights in authoritarian regimes. Questions addressed include why authoritarian regimes promote "rule-of-law", who is empowered by law, and the political consequences of "rule-of-law promotion. Offered: jointly with JSIS B 569.

POL S 570 The American Racial State (5) Explores the mutually constitutive relationship between race and American political institutions, beginning with theories of race and racial constructions, race-making and nation-making, racial triangulation, and intersectionality. Examines various institutions and public policies as manifestations of the American racial state, focusing on the epistemological challenges of identifying race, racism, and racialization.

POL S 571 American National Institutions (5) Answers the question, “Do institutions matter?” Surveys American national institutions from theoretical perspectives, focusing on how they affect the manner in which decisions are made. Employs cross-institutional perspective of American institutions.

POL S 572 Electoral Systems (5) *R. Pekkanen* Explores a fundamental link between citizens and political representation: how electoral systems shape party systems, what kinds of people become candidates, how parties work, representation, and policy. Covers effects and mechanics of the various voting systems. Offered: jointly with JSIS B 572.

POL S 573 Topics in Public Policy (5, max. 10) Specialized research topics with a policy process or related theoretical content.

POL S 574 Environmental Regulation Policy (5) Scholarly and practical aspects of environmental regulation. Examines literature concerning regulatory policy design, policy instruments, federalism, compliance, and enforcement. Studies selected federal, state, and other nations' environmental policies. Participants are expected to have a good understanding of American policy processes.

POL S 575 Public Policy Processes (5) Covers political science research about policy processes. Research seminar addressing frameworks and perspectives on policy processes as they concern issue emergence, agenda dynamics, policy subsystems, policy learning, and implementation.

POL S 576 Political Culture (5) Values, beliefs, and rituals that guide political action in society. Some approaches emphasize symbolic sphere of value and belief over material conditions of power and economic production. Other approaches emphasize material relations. Reconciliation of symbolic and materialist approaches that explain intervention of the modern state in cultural processes.

POL S 577 The Politics of Social Movements (5) Theoretical inquiry directed to questions of collective action and political tactics by social movement groups. Case studies include labor, civil rights, women's, environmental, and other movements in twentieth-century United States.

POL S 578 Health Politics and Policy (5) Introduces central themes of health-policy research: health is not healthcare and politics has much to do with why our healthcare system works as it does. Investigates how social science helps us understand health issues.

POL S 579 Contemporary Central Asian Politics (5) *Radnitz* Examines the politics of contemporary post-Soviet Central Asia. Analyzes issues relevant to the region in comparative perspective, including democratization, religion, terrorism, civil society, economic reform, ethnic identity, and international influences. Uses theory to shed light on current policy debates. Offered: jointly with JSIS A 579.

POL S 580 Comparative Politics and Korea Studies (5) *Ha* Approaches Korean politics, political economy, and society from a comparative perspective. Examples of major comparative

questions based on Korean case include democratization, strong state dynamics, civil society, and impact of globalization. Offered: jointly with JSIS A 566.

POL S 582 Institutional Analysis (3/5) Social change and property rights theory. Exploration of long-term secular change through works whose approaches derive from neoclassical economics and analytical Marxism. Evolution and transformation of property rights over land, labor, and capital and the consequences of the property rights structure for political and economic institutions.

POL S 583 Economic Theories of Politics (5) Problems of public goods provision and collective action. Collective action theories and applications as well as critical review of the concept of rationality.

POL S 584 Comparative Political Economy (5) Overview of current developments in comparative political economy. Topics may include globalization, the welfare state, partisan models of economic policymaking, economic development, and trade.

POL S 586 Topics in International Political Economy (5, max. 10) Examination of current topics in the theory and practice of international political economy. Content varies according to recent developments in the field and research interests of the instructor.

POL S 587 Politics of Urban Reform (5) Interpretations of urban reformers at turn of this century and during 1960s and 1970s. Historical and political science literature on the subject. Prerequisite: permission of instructor.

POL S 588 Special Topics in Comparative Political Economy (5, max. 10) Examination of current topics in the theory and practice of comparative political economy. Content varies according to recent developments in the field and research interests of the instructor.

POL S 589 Special Topics in Political Economy (3-5, max. 10) Evaluating research in political economy as well as developing research problems. Topics vary with instructor and with current problems in the literature.

POL S 590 Seminar in Political Behavior (5, max. 10) Analysis of behavioral research in selected fields of political science.

POL S 593 Theories of Decision Making (5) Explanation of political decisions using models of such theoretical processes as preference formation, learning, heuristics, noncooperative games, collective action, agenda manipulation, and coalition formation. Examination of competing notions of political rationality and irrationality and criteria for their evaluation. Strategies for design of decision research.

POL S 595 College Teaching of Political Science (1)

POL S 597 Directed Readings (1-10, max. 10) Intensive reading in the literatures of political science, directed by the chair of the doctoral Supervisory Committee. Credit/no-credit only.

POL S 598 Independent Writing I (1-5, max. 5) Supervised research and writing for graduate students completing the MA essay of distinction.

POL S 600 Independent Study or Research (*-)

POL S 800 Doctoral Dissertation (*-)

Psychology

Department Overview

119 Guthrie

Psychology involves the scientific study of behavior and its causes and the understanding of human and animal behavior in a variety of settings. Psychology is studied both as a natural science, which stresses physical and biological causes of behavior, and as a social science, which stresses the effects of the social setting on human and animal behavior. Major areas of emphasis are human cognition and perception, animal behavior, behavioral neuroscience, developmental, social and personality, and clinical psychology.

Undergraduate Program

Adviser

119 Guthrie, Box 351525

206-543-2698

psyadvis@uw.edu

The Department of Psychology offers the following programs of study:

- The Bachelor of Science degree with a major in psychology
- The Bachelor of Arts degree with a major in psychology

The Bachelor of Science program prepares students for doctoral programs in psychology, leading to careers in teaching, research, or clinical psychology. The program emphasizes laboratory/research experience and statistics.

The Bachelor of Arts program provides a general background in psychology for students preparing for master's-level graduate programs or professional schools, seeking employment at the baccalaureate level, or wanting to apply the principles of psychology in other disciplines.

The department does not have formal programs in educational, school, or counseling psychology; engineering psychology; or industrial psychology.

Bachelor of Science

Suggested First-Year College Courses: MATH 120 and MATH 124. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and PSYCH 209 should be completed as soon as possible during this year; BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or

BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

Department Admission Requirements

Students apply to the Department of Psychology under the same admission requirements, regardless of the degree they wish to pursue.

1. Minimum 2.00 cumulative UW GPA
2. Completion of one of the following math courses with a minimum 2.0 grade: MATH 111, MATH 112, MATH 120, or MATH 124. (Students may fulfill this requirement with test scores that place them in MATH 112 or MATH 124 or higher.)
3. Completion of the following psychology courses with a minimum 2.0 grade in each course and a cumulative 2.50 GPA in the three courses: PSYCH 101, PSYCH 202, and PSYCH 209.
4. Admission is competitive based on the following criteria:
 - a. Preparation for a major in psychology as indicated by the grades earned in courses required for admission
 - b. GPA, with an emphasis on grades earned in psychology courses
 - c. Other evidence of a commitment to becoming a psychology major
 - d. Personal statement reflecting an interest in and commitment to becoming a psychology major
 - e. Copies of unofficial transcripts from all schools attended (UW and transfer).

Meeting the above criteria does not guarantee admission to the department.

5. The application deadline is the first Friday of autumn, winter, and spring quarters; no applications are accepted summer quarter. Applications and additional information are available in 119A Guthrie.

Major Requirements

84-86 credits as follows:

1. PSYCH 101, PSYCH 202, PSYCH 209 (with a grade of 2.5 or higher), PSYCH 317 and PSYCH 318
2. One laboratory course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
3. One course from PSYCH 300, PSYCH 333, or PSYCH 355
4. One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
5. One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355

6. Three additional graded upper-division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
7. PSYCH 499 (3 credits)
8. PSYCH 496, PSYCH 497, or PSYCH 498 (3 credits) or 3 additional credits of PSYCH 499
9. Up to 6 credits in 200- to 400-level electives to make a minimum total of 66 psychology credits
10. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
11. *Courses in related fields:*
 - a. MATH 120 and MATH 124. Students may satisfy this requirement by testing out of MATH 124 or MATH 144
 - b. One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - c. One of the following philosophy courses: PHIL 120, PHIL 160
 - d. One social science course (3 to 5 credits) from anthropology or sociology
12. Cumulative minimum 2.50 GPA in all PSYCH courses applied toward the degree (UW and transfer), with a minimum 2.0 grade in each course presented for the major. Note that a grade of 2.5 or higher is required in PSYCH 209 in order for students to progress to the PSYCH 317/PSYCH 318 statistics series.
13. Transfer students must meet all of the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level through the UW.

Bachelor of Arts

Suggested First-Year College Courses: MATH 111, MATH 112, MATH 120, or MATH 124. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and 209 should be completed as soon as possible during this year. BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

Major Requirements

66 to 68 credits as follows:

1. PSYCH 101, PSYCH 202, PSYCH 209, PSYCH 315 (or PSYCH 317 and PSYCH 318)

2. One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
3. One course from PSYCH 300, PSYCH 333, or PSYCH 355
4. One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
5. One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355
6. Two additional graded upper division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
7. 3 credits from the following list: PSYCH 494, PSYCH 496, PSYCH 497, PSYCH 498, PSYCH 499; or credit from an approved Study Abroad program
8. Up to 4 credits of PSYCH 200- to 400-level electives to make a minimum total of 53 psychology credits
9. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
10. *Courses in related fields:*
 - a. One MATH course from MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Students may satisfy this requirement by testing out of any of the specified classes.
 - b. One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - c. One social science course (3 to 5 credits) from anthropology or sociology
11. Minimum 2.50 cumulative GPA in all psychology courses applied toward the degree (UW and transfer), with a minimum 2.0 grade in each course presented for the major
12. Transfer students must meet all the above requirements and must to complete at least 15 graded credits in psychology at the 300 and 400 level through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students understand and apply scientific methods and principles, receive an excellent preparation in the theoretical explanations of human and animal behavior, and understand the introductory concepts underlying the biological basis of behavior.
- *Instructional and Research Facilities:* The psychology faculty have extensive research facilities and research laboratories on the UW campus and nearby buildings.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* The Department of Psychology offers academic credit for approved fieldwork experience. The advising office maintains internship listings which are updated regularly.
- *Department Scholarships:* none offered
- *Student Organizations/Associations:* Psi Chi (national honors society for undergraduate psychology students).

Of Special Note: A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Graduate Program

Graduate Program Adviser 127 Guthrie, Box 351525 206-543-8687 psygrad@uw.edu

Graduate work in psychology is organized primarily as preparation for the doctor of philosophy degree. The optional master of science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into eight major areas of study: adult/general clinical, animal behavior, behavioral neuroscience, child clinical, cognition & perception, developmental, quantitative, and social psychology & personality. Specialization groups also exist in the sub-areas of diversity science and quantitative.

The programs in adult clinical and child clinical psychology are accredited by the American Psychological Association and provide scientific and professional training.

Master of Science (Optional)

A master's-degree-only program is not available. Doctoral students have the option of obtaining a master's degree while working toward the PhD.

Doctor of Philosophy

Admission Requirements

1. Undergraduate degree in psychology desirable, but not required
2. Some preparation in biological, social, or quantitative sciences strongly advised
3. Academic and research backgrounds
4. GRE scores
5. Written evaluations submitted by former professors or supervisors
6. Application deadline: December 1, for admission the following autumn quarter.

Degree Requirements

Minimum 90 credits

1. Coursework
 - a. Orientation: PSYCH 500A
 - b. Proseminar in psychology for the first three quarters: PSYCH 500B
 - c. Psychology colloquium for the first three quarters: PSYCH 550
 - d. Statistics and general methodology: PSYCH 522, PSYCH 523, PSYCH 524, PSYCH 525. Minimum 2.7 grade for each course.
 - e. Dissertation: PSYCH 800 (27 minimum)
 - f. Completion of individualized training program (section 2, below) or clinical area requirements (section 3, below)

2. Individualized Training Program in Non-Clinical Areas

- a. One quantitative methods/statistics course beyond those indicated in 1.d., above, or one methodology course directly relevant to the student's research focus
- b. Three core concepts courses
- c. Three advanced or focused courses providing specialized research training
- d. Three quarters of seminars, brown bags, or journal clubs. Requires attendance throughout training.

Courses may be taken outside the Department of Psychology, but students are strongly urged to utilize department-based options when available.

All coursework in these areas should be taken for a numerical grade, unless the course itself is offered on a credit/no-credit only (CR/NC-only) basis. At least half a student's program must be in courses numbered 500 or above.

3. Clinical Area Program Requirements

- a. Courses: PSYCH 517, PSYCH 531, PSYCH 560 (2-30), PSYCH 580, PSYCH 586, PSYCH 587, PSYCH 588, PSYCH 589 (8 - second-year students register A, W, Sp, and S); PSYCH 591 (1 - A, W, first year), PSYCH 593A (1-6 per quarter), PSYCH 593B (1-6 per quarter)
- b. One-year predoctoral internship
- c. Additional requirements for adult track students
 - i. PSYCH 511, PSYCH 518, PSYCH 519
 - ii. APA discipline - specific knowledge; one course each in biological, social, cognitive, developmental, and affective bases of behavior. History and systems satisfied by PSYCH 591

- iii. PSYCH 571 or PSYCH 572
- iv. Two courses in assessment: PSYCH 586 and either PSYCH 576 and PSYCH 590 or PSYCH 577
- v. Minimum one internal (PSYCH 594) and one external (PSYCH 597) practicum
- d. Additional requirements for child track students
 - i. PSYCH 553, PSYCH 571, PSYCH 572, PSYCH 573, PSYCH 576, PSYCH 590
 - ii. PSYCH 594 (internal) or PSYCH 597 (external) - two practica
 - iii. Minimum one treatment seminar
 - iv. One additional quantitative methods course
 - v. APA discipline - specific knowledge: one course each in biological, social, cognitive, developmental, and affective bases of behavior. History and systems satisfied by PSYCH 591

Assistantships, Fellowships, or Traineeship Opportunities

Research and teaching assistantships are generally available. Traineeships and fellowships are also available.

Course Descriptions

Applied Child and Adolescent Psychology

PSYCAP 510 Conceptual Foundations of Developmental Psychopathology: Risk and Protective Factors (3) *L. Katz* Introduces developmental psychopathology focusing on risk factors and vulnerabilities. Uses a developmental psychopathology perspective and bioecological model to consider the child within the context of its environment. At the individual level, examines temperament/personality, emotion, and stress response. At the contextual level, examines various risk and protective factors. Offered: AWSpS.

PSYCAP 512 Social and Emotional Development (3) *L. Katz* Provides a comprehensive understanding of key aspects of social and emotional development during childhood and adolescence. Topics include temperament, attachment, emotional processes, the self, gender, identity and prosocial behavior. Reviews the influence of social contexts such as family and peers. Offered: AWSpS.

PSYCAP 514 Child and Adolescent Psychopathology: Assessment and Diagnosis (3) *L. Katz* Introduces various forms of child and adolescent psychopathology and addresses methods of assessment and diagnosis of psychopathology in children and adolescents. Focuses on major DSM-V diagnostic categories, including disorders of behavior and emotion, disorders of cognition, developmental disorders, and problems related to physical and mental health. Offered: AWSpS.

PSYCAP 516 Approaches to Child and Adolescent Treatment (3) *L. KATZ* Introduces various forms of treatment for child and adolescent psychopathology. Provides students comprehensive information and practical tools related to empirically supported treatment practices for children and adolescents experiencing a range of emotional and/or behavioral problems. Offered: AWSpS.

PSYCAP 518 Ethics and Law in Clinical Settings: Children, Adolescents and Families (1-3) *G. Sedlar* Ethical and legal dilemmas for mental health professionals in their everyday work with children, adolescents, and their families. Ethical issues considered with respect to clinical caseloads. Case consultation provided. Offered: AWSpS.

PSYCAP 520 Critical Thinking about Research and Ethics (3) *L. Katz* Focuses on key concepts in experimental design and ethical conduct of research with children and ethics. Students learn how to evaluate research and how to design experimental and quasi-experimental studies. Offered: AWSpS.

PSYCAP 522 Evidence Based Practices: Extreme and Complex Cases (3) *L. Katz* In-depth review of the range of evidenced-based treatments (EBTs) appropriate for complex cases - e.g., older children and adolescents with behavioral and psychiatric disorders who are involved with multiple service systems (e.g., juvenile justice, chemical dependency, etc.). Offered: AWSpS.

PSYCAP 524 Evidence Based Practices: CBT for Anxiety and Trauma-Focused CBT (3) *L. Katz* In-depth, hands-on introduction to evidence based, cognitive behavioral treatments for children and adolescents with anxiety-related disorders. Specific training provided in Trauma-Focused Cognitive Behavior Therapy. Includes didactics, skills demonstration and practice, and assessment. Offered: AWSpS.

PSYCAP 526 Evidence Based Practice: Parenting Interventions (3) *L. Katz* Provides a solid foundation for implementing a specific evidence-based parent training approach, "Helping the Noncompliant Child." Includes didactics (readings, lecture and in-class discussion), skills demonstration and practice (modeling, role-playing, and out-of-class rehearsal), and assessment (skills check-out, presentation, written assignments). Offered: AWSpS.

PSYCAP 528 Multicultural Issues in Counseling Settings: Children, Adolescents and Families (1) This course will cover key principles, theories and applications of multiculturalism and will examine several aspects of various cultural experiences as they impact the client, therapist/counselor and the therapist/counselor-client relationship. Offered: AWSpS.

PSYCAP 560 Practicum Course in Applied Child and Adolescent Psychology: Prevention and Treatment (1-7, max. 28) *L. Katz* Students integrate didactic and theoretical training with applied clinical experience in a real-world clinical setting. Provides students opportunities to discuss ethical, practical, and professional topics related to their practicum placements and clinical work in general. Offered: AWSpS.

Clinical Psychology

PSYCLN 501 Issues in Clinical Psychology (1, max. 3) Personal and professional issues in clinical psychology. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology. Instructors: Smith Credit/no-credit only. Offered: AW.

PSYCLN 502 Child Clinical Psychology (4) Issues and content of child clinical psychology, promotion of student's beginning work in research. Prerequisite: graduate major or minor standing in child-clinical psychology.

PSYCLN 510 Research Methods in Clinical and Community Psychology (4) *Lengua* Addresses issues concerning the design and implementation of research in clinical and community psychology. Topics include validity; reliability; experimental, quasi-, and non-experimental designs; causal inference; interpretation of data; and research ethics. Provides students with tools to evaluate research, develop hypotheses, and design rigorous empirical studies. Offered: A.

PSYCLN 511 Single Subject Design and Research (3) Single subject designs (reversal, multiple baseline, changing criterion) and their application to clinical cases. Prerequisite: graduate major standing in clinical psychology, or permission of instructor. Instructors: Kohlenberg Offered: W.

PSYCLN 513 Research Strategies in Clinical Psychology (1-2, max. 50) Group discussions of problems and continuing strategies for ongoing and future research projects. Prerequisite: Graduate standing in Psychology, or by permission of instructor. Credit/no-credit only. Offered: AWSpS.

PSYCLN 520 Psychological Assessment (3) Provides a foundation in the theory underlying adult assessment as well as training in specific adult assessment techniques. Focuses on behavioral and cognitive assessment. Prerequisite: permission of instructor.

PSYCLN 521 Assessment of Intelligence (5) Current theory and research on intelligence and intelligence testing; training in administration, scoring, and interpretation of major intelligence tests; ethical issues in assessment. Prerequisite: graduate major standing in child-clinical or clinical psychology, or graduate minor standing in child-clinical psychology. Instructors: King, Lengua Offered: Sp.

PSYCLN 522 Psychological Assessment of Children (5) Assessment techniques appropriate to children, including those for infants, special problems of preschool and school-age children; projective tests, family interviews, and target observational assessment; training in administration of selected techniques. Prerequisite: PSYCLN 521 and permission of instructor.

PSYCLN 523 Approaches to Psychological Assessment (4) Problem-solving approach to psychological assessment; review of psychological tests and procedures and presentation of approaches to their clinical interpretation and use. Required for all graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology. Offered: Sp.

PSYCLN 524 Clinical Personality Assessment (3) Use of objective personality inventories in the description of normal and abnormal personality and use of such information in case conceptualization and treatment planning. Minnesota Multiphasic Personality Inventory, Millon Clinical Multiaxial Inventory. Prerequisite: clinical psychology graduate standing. Instructors: Smith Credit/no-credit only.

PSYCLN 525 Practicum in Psychological Assessment (2) Demonstration and practice of selected psychological test procedures and interviewing skills. Concurrent registration in PSYCH 576 or PSYCH 578 required. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical or child-clinical psychology and permission of instructor.

PSYCLN 530 Behavior Disorders (5) Major types of behavior disorders, with emphasis on clinical manifestations, relevant research, and theoretical perspectives. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Zoellner Offered: W.

PSYCLN 531 Developmental Psychopathology (5) Broad survey of major categories of child and adolescent disorders. Emphasis on scientific, empirical approach to description, classification, and research literature on these disorders. Required for all graduate students majoring in child clinical psychology. Prerequisite: graduate standing in psychology, or permission of instructor.

PSYCLN 532 Anxiety Disorders (3) *Zoellner* General topics related to primary anxiety disorders (panic, OCD, GAD, posttraumatic stress disorder, and specific phobias), including diagnosis, theory, and treatment.

PSYCLN 540 Systems of Psychotherapy (3) Theory and research of major systems of psychotherapy, including the psychodynamic, behavioral, cognitive, and family systems approaches as an introduction to subsequent practice in clinical psychology. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: George Offered: A.

PSYCLN 541 Approaches to Child Treatment (4) Major approaches to child psychotherapy, including specific applications, issues in treatment, and research. Prerequisite: graduate major standing in child-clinical psychology, or permission of instructor. Offered: Sp.

PSYCLN 542 Behavior Change (5) Behavioral theory and behavioral approaches to treatment. Prerequisite: PSYCH 518 and permission of instructor. Instructors: Kohlenberg Offered: Sp.

PSYCLN 543 Evidence-based Treatments for Depression (3) *C. Fagan* Provides an introductory overview of two or more evidence-based treatments for depression (e.g., cognitive-behavioral therapy, behavioral activation, and/or Mindfulness-based Cognitive Therapy). Prerequisite: Graduate standing in Psychology, or by permission of instructor. Credit/no-credit only. Offered: AWSpS.

PSYCLN 544 Behavioral Methods: Clinical Interventions (3) *M. Linehan* Provides students with basic skills required for competent practice of cognitive and behavioral therapies. Topics include behavioral skills training, cognitive restructuring, contingency management, and exposure-based procedures. Prerequisite: minimum second year graduate clinical psychology student.

PSYCLN 545 Introduction to Dialectical Behavioral Therapy (3) *Linehan* Introduces dialectical behavioral therapy, an empirically supported treatment approach for high risk clinical populations. Topics include mindfulness, dialectics, validation, behavioral therapy, and case conceptualization. Credit/no-credit only. Offered: A.

PSYCLN 546 Dialectical Behavior Therapy Skills Group Training (3) *Linehan* In-depth learning of skills training component of dialectical behavior therapy, an empirically supported treatment approach for high risk clinical populations. Topics include skills in mindfulness, emotion regulation, interpersonal effectiveness and distress tolerance. Credit/no-credit only. Offered: A.

PSYCLN 547 Methods in Suicide and Crisis Intervention (3) *Linehan* Provides a foundation for risk assessment and crisis intervention with suicidal individuals. Addresses risk factors for suicide across the age range, and methods for both behavioral interventions and crisis management with suicidal individuals. Also covers ethical issues. Offered: Sp.

PSYCLN 560 Minority Mental Health (3) Surveys topics on mental health and treatment of racial and ethnic minorities. Theory emphases include: models addressing ethnic identity, cross-cultural differences, models of culturally sensitive intervention. Practice emphases include unique psychotherapy strategies for: African-, Asian-, and Latino-Americans, and American Indians. Prerequisite: graduate clinical major standing in psychology, or permission of instructor. Instructors: George, Simoni

PSYCLN 561 Community Psychology (4) Overview of key issues and concepts in the field of community psychology. History of field and overview of different models used to conceptualize system-level mental health issues and delivery systems. Emphasizes theory and research rather than intervention. Prerequisite: psychology graduate student, or permission of instructor.

PSYCLN 562 Cross-Cultural Competency I (2) Focuses on development of multicultural competence in the provision of psychological services to meet APA guidelines for ethnic, linguistic, and culturally diverse populations. Students address personal development, increase their knowledge of diverse groups, and study effective models of intervention in working with clients of diverse backgrounds. Prerequisite: PSYCH 580. Instructors: George

PSYCLN 563 Cross-Cultural Competency II (2) Third in the graduate multicultural-competence sequence. Focuses on American ethnic minorities, multiracial children and families, social action, and organizational development. Prerequisite: PSYCH 581. Instructors: George

PSYCLN 570 Advances in Clinical Psychology (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in clinical psychology. Student

presentations and discussion. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: George, Kohlenberg, Linehan, Smith, Zoellner

PSYCLN 571 Advances in Child Clinical Psychology (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in child clinical psychology. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: King, Lengua

PSYCLN 572 Seminar in Clinical Psychology (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission instructor. Instructors: George, Kohlenberg, Linehan, Simoni, Smith, Zoellner

PSYCLN 573 Seminar in Child Clinical Psychology (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: King, Lengua

PSYCLN 574 Independant Study in Affective Science (5) Designed to provide a broad overview of the field of affective science. The goal is to increase knowledge base and to facilitate the integration of concepts, methods, and scientific findings in affective science into scientific and clinical activities. Offered: AWSpS.

PSYCLN 575 Independent Study in Behavioral Neurosciences (5) Provide students with a broad overview of the field of behavioral neurosciences. Satisfies the requirement of the APA for graduate level training in biological aspects of behavior. Increases knowledge base and facilitates the integration of concepts, methods and scientific findings in behavioral neurosciences into scientific and clinical activities. Offered: AWSpS.

PSYCLN 576 Independent Study in Cognitive Science (5) Provides students with a broad overview of the field of cognitive science. Designed to increase student knowledge base and to facilitate the integration of concepts, methods, and scientific findings in cognitive science into their scientific and clinical activities. Offered: AWSpS.

PSYCLN 577 Independent Study in Lifespan Development (5) Designed to provide students with a broad overview of developmental aspects of behavior, with a focus on lifespan development. The goal is to increase student knowledge base and to facilitate the integration of concepts, methods, and scientific findings in lifespan development into their scientific and clinical activities. Offered: AWSpS.

PSYCLN 580 Clinical Practica and Colloquium (1-3) *C. Fagan* Required of all clinical psychology graduate students seeing clients in the clinic. Clinical colloquium required of all second-year students, optional for others. Credit/no-credit only. Offered: AWS.

PSYCLN 581 Clinical Methods: Interviewing (2) *Fagan* Provides the foundation for developing good clinical skills. Enables students to conduct an initial clinical interview and generate a diagnostic formulation, problem list, and treatment plan after taking a complete

history. Limited to and required of all second-year clinical psychology graduate students. Credit/no-credit only. Offered: A.

PSYCLN 582 Clinical Methods: Ethics (3) *Fagan* Enables students to acquire a thorough working knowledge of the American Psychological Association's Ethical Standards for Psychologists; an awareness of Washington state law as it affects psychologists and a knowledge of how to identify and solve ethical dilemmas. Limited to and required of all second-year clinical psychology graduate students. Credit/no-credit only. Offered: W.

PSYCLN 583 Clinical Supervision (4, max. 100) Supervised psychotherapy involving several individual clients. Separate consultations with instructor for intensive supervision of each case. Occasional meetings in small groups of instructors and students to discuss case material. Assigned readings appropriate to each case with opportunities to discuss these with instructor. Prerequisite: clinical psychology graduate standing and permission of instructor. Instructors: George, King, Kohlenberg, Lengua, Linehan, Simoni, Smith, Zoellner Credit/no-credit only. Offered: AWSpS.

PSYCLN 585 Fieldwork in Clinical Psychology (1-5, max. 36) Prerequisite: second-year graduate major standing and permission of departmental faculty. Instructors: George, King, Kohlenberg, Lengua, Linehan, Simoni, Smith, Zoellner

PSYCLN 586 Dialectical Behavior Therapy Practicum (1-5, max. 60) This practicum class is a weekly DBT therapist consultation team meeting. Students are required to deliver individual and group DBT to high risk clients and to discuss cases and receive and provide feedback during team meetings. This class is one component of a larger 2-year practicum in which students are required to complete DBT Intensive Training and take a series of six graduate seminars to learn about DBT and its behavioral foundations. Credit/no-credit only. Offered: AWSpS.

PSYCLN 588 Anxiety and Traumatic-stressor Related Disorders Practicum (1-3, max. 30) *M. Bedard-Gilligan, L. Zoellner* Practicum offers supervised experience for advanced clinical psychology graduate students in standardized assessment and empirically-supported treatment for anxiety and traumatic stressor-related disorders. Recommended: This is one of our advanced specialty practica that follows the 2nd year sequence. It is preferred that PSYCLN 532 is taken before this class but not mandatory. Credit/no-credit only. Offered: AWSpS.

PSYCLN 589 LEARN Clinic Practicum (1/3, max. 20) *J. Quamma* Provides students training and practical experience in the evaluation of learning disabilities and Attention Deficit Hyperactivity Disorder (ADHD) in children, adolescents, and adults. Prerequisite: 3rd year clinical psychology graduate students and above who have completed graduate-level courses in assessment (including assessment of intelligence) and/or have significant experience in administration of cognitive tests (e.g., tests of intelligence such as the WISC or WAIS). Credit/no-credit only. Offered: AWSpS.

PSYCLN 590 Parent-Child Practicum (1/3, max. 30) Students deliver Behavioral Parent Training and other evidence based treatments. Includes didactics, live observation of instructor, group and individual supervision. Students use a sliding scale fee structure to increase

socioeconomic diversity among clients served, and receive supervision on how to individualize treatment for each client, given his/her clinical presentation. Prerequisite: 3rd year clinical psychology graduate students and above who have completed graduate-level courses Credit/no-credit only. Offered: AWSpS.

PSYCLN 591 Consultation and Supervision (2) C. Fagan Introduces students to the competencies essential to providing consultation and supervision. Prepares students to take on roles of both consultants and supervisors-in-training as a step toward developing the necessary competence to eventually consult or supervise effectively as licensed psychologists. Prerequisite: 3rd year clinical grad and above students who have completed the Clinical Methods sequence. Credit/no-credit only. Offered: AWSpS.

PSYCLN 596 Advanced Clinical Practicum (1-6, max. 55) Advanced supervised training in specific empirically supported treatment approaches. Each practicum provides intensive training in a specific treatment, such as dialectical behavior therapy, functional analytic psychotherapy, acceptance and commitment therapy, mindfulness-based relapse prevention, and exposure treatment for anxiety disorders. Prerequisite: graduate standing in clinical psychology; PSYCH 593; permission of instructor. Instructors: Kohlenberg, Linehan, Smith, Zoellner Credit/no-credit only. Offered: AWSpS.

Psychology

PSYCH 101 Introduction to Psychology (5) I&S Surveys major areas of psychological science. Core topics include human social behavior, personality, psychological disorders and treatment, learning, memory, human development, biological influences, and research methods. Related topics may include sensation, perception, states of consciousness, thinking, intelligence, language, motivation, emotion, stress and health, cross-cultural psychology, and applied psychology. Offered: AWSpS.

PSYCH 200 Comparative Animal Behavior (3-5) NW Barash, Beecher Research methods and findings of comparative animal behavior, their importance to an understanding of human behavior; rationale for study of behavioral differences/similarities between animal species, behavior viewed as part of adaptation of each species to its natural habitat. Not open for credit to students who have taken PSYCH 300.

PSYCH 201 Psychology of Performance Enhancement (4) I&S Applications of psychological theories, research, and intervention strategies to performance enhancement in variety of life settings. Self-regulation models and techniques; stress and emotional control; attention control and concentration; mental rehearsal; time management; goal-setting; memory enhancement; communication and interpersonal conflict resolution. Participation in various psychological training procedures. Prerequisite: PSYCH 101. Instructors: Smith, Smoll

PSYCH 202 Biopsychology (5) NW Examines the biological basis of behavior, the nervous system, how it works to control behavior and sense the world, and what happens when it malfunctions. Topics include learning and memory, development, sex, drugs, sleep, the senses,

emotions, and mental disorders. Prerequisite: PSYCH 101. Instructors: Kim, Olavarria Offered: AWSpS.

PSYCH 203 Introduction to Personality and Individual Differences (4) I&S Overview of the major theories, research findings, and applications in the scientific study of personality. Covers research methods and approaches to measuring personality variables. Not open for credit to students who have taken PSYCH 303. Prerequisite: PSYCH 101. Instructors: Smith

PSYCH 205 Behavior Disorders (5) I&S Examines the bio-psycho-social origins of behavioral disorders. Topics include theories of etiology, developmental perspectives of behavior disorders, and assessment and diagnosis of the most common behavioral disorders. Note: not open for credit for students who have taken PSYCH 305. Prerequisite: minimum 2.0 grade in PSYCH 101.

PSYCH 206 Human Development (5) I&S Theoretical perspectives and research methods in child development with an overview of historical and current works. Includes prenatal and biological development, the development of cognitive, linguistic, and social and emotional abilities. Not open for credit to students who have taken PSYCH 306. Prerequisite: PSYCH 101.

PSYCH 209 Fundamentals of Psychological Research (5) Psychological research methodology and techniques. Topics include the logic of hypothesis testing, experimental design, research strategies and techniques, fundamentals of scientific writing, search and evaluation of research literature in psychology, and ethical issues in psychological research. Required for all psychology majors. Prerequisite: minimum 2.0 grade in PSYCH 101. Instructors: Little, Passer Offered: AWSpS.

PSYCH 210 The Diversity of Human Sexuality (5) I&S, DIV Considers biological, psychological, and socio-cultural determinants of human sexuality and sexual behavior, and how their interaction leads to diverse expressions of sexuality, sexual bonding, gender orientation, reproductive strategies, and physical and psychological sexual development. Topics include cultural appraisal of sexuality, sexual health and reproduction (pregnancy, contraception, abortion), and sexual abuse and assault.

PSYCH 222 Current Topics in Psychology (3-5, max. 10) I&S Topics of current interest, such as the psychology of happiness, psychology of friendship, technology and relationships, and developments in brain and behavior science. Choice of topics depends on instructor and class interest. Prerequisite: PSYCH 101 Offered: AWSpS.

PSYCH 245 Introduction to Social Psychology (5) I&S Overview of major findings of social psychology, emphasizing the relevance for understanding the social behaviors of individuals and groups of individuals and their relationship to social context. Not open for credit to students who have taken PSYCH 345. Prerequisite: PSYCH 101. Instructors: Brown

PSYCH 250 Racism and Minority Groups (5) I&S, DIV Overview of the causes, contexts, and consequences of racism and its effects upon minority groups and society. Emphasis on cultural history, political and socioeconomic structures that contribute to racism. Examination of

current issues in race relations and cultural pluralism in the United States and selected international topics.

PSYCH 257 Psychology of Gender (5) I&S, DIV Kenney Major psychological theories of gender-role development; biological and environmental influences that determine and maintain gender differences in behavior; roles in children and adults; topics include aggression, cognitive abilities, achievement motivation, affiliation. Offered: jointly with GWSS 257.

PSYCH 291 Principles of Applied Animal Behavior (3-5) NW Further explores the basic principles of animal behavior, and related disciplines, with particular emphasis on application to human-animal interaction and issues. Introduces the primary literature in applied animal behavior.

PSYCH 292 Applied Animal Behavior in Practice (3-5) NW Integrates animal behavior theory with real-world practice to resolve practical problem in human-animal interactions, including companion animals, captive animals, and livestock. Introduces the primary clinical literature in applied animal behavior.

PSYCH 298 Graduate School Exploration for Psychology Majors (2) Provides an overview of graduate school options available in psychology, counseling, and research. Topics include researching programs, writing statements of purpose and resumes, standardized testing, letters of recommendation, and interviewing techniques. Credit/no-credit only.

PSYCH 299 Psychology Transfer Academic Community (2) Provides opportunity for transfer students new to or contemplating the psychology major to experience an in- depth orientation to the department, curriculum, and resources available to undergraduates. Students meet weekly to explore ways to effectively engage in the major and expand their understanding of the academic discipline. Credit/no-credit only.

PSYCH 300 Animal Behavior (5) NW Introduces important concepts and empirical findings in animal behavior. Emphasizes evolutionary and mechanistic approaches to understanding diversity and complexity of behavior. Topics include communication, mating, migration, and sociality. Prerequisite: either BIOL 118, BIOL 161, or BIOL 180. Instructors: Beecher, Sisneros

PSYCH 303 Personality (5) I&S Overview of major perspectives, scientific issues, applications, and research findings in the area of personality. Direct exposure to scientific literature, writing assignments, and research-based class experiences prepare students for advanced work in personality, social, abnormal, and developmental psychology. Prerequisite: minimum 2.0 grade in each of PSYCH 101; PSYCH 202; and PSYCH 209. Instructors: Brown

PSYCH 305 Abnormal Psychology (5) I&S An overview of major categories of psychopathology, including description and classification, theoretical models, and recent research on etiology and treatment. Prerequisite: minimum 2.0 grade in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 306 Developmental Psychology (5) I&S Overview of past and present theoretical and research-based approaches to biological, cognitive, and social development from the prenatal period to early adolescence. Prerequisite: minimum 2.0 grade in PSYCH 202; 2.0 in PSYCH 209. Instructors: Repacholi, Sommerville

PSYCH 315 Understanding Statistics in Psychology (5) QSR Statistics for psychological research. Elementary probability theory, hypothesis testing, and estimation. Satisfies the statistics requirement for majors registered in the psychology Bachelor of Arts degree program. Prerequisite: minimum 2.0 grade in PSYCH 209; 2.0 in either MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Instructors: Boynton, Flaherty, Little Offered: AWSpS.

PSYCH 317 Introduction to Probability and Statistics for Psychology (5) QSR Probability theory as a model for scientific inference. Probabilistic variables and experimental outcomes, conditional probability, binomial and related distributions, experiments as samples, statistics and sampling distributions, the normal distribution, confidence intervals, problems of estimation from experiments. Prerequisite: minimum 2.5 grade in PSYCH 209; 2.0 in either MATH 124, MATH 134, or MATH 144. Instructors: Little, Loftus Offered: AW.

PSYCH 318 Statistical Inference in Psychological Research (5) QSR Hypothesis testing: probabilistic and statistical basis. Development and application of statistical inference techniques employed in psychological research: confidence intervals, t-test, ANOVA, and correlation and regression. Nature and control of experimental and inferential error in research. Required for majors for psychology BS degree. Prerequisite: minimum 2.0 grade in PSYCH 317. Instructors: Little, Loftus Offered: WSp.

PSYCH 322 Introduction to Drugs and Behavior (3) NW Basic concepts of drug action emphasizing the behavioral consequences of the intake of a variety of drugs. Prerequisite: PSYCH 202. Instructors: Diaz

PSYCH 330 Laboratory in Animal Behavior (5) NW Experience with a variety of animal species and experimental procedures and instrumentation. Prerequisite: either minimum 2.0 grade in PSYCH 315, or 2.0 in PSYCH 317; 2.0 in PSYCH 209. Instructors: Brenowitz

PSYCH 331 Laboratory in Human Cognition (5) I&S Selected aspects of human cognition, perception, and performance. Prerequisite: minimum 2.0 grade in PSYCH 209; either 2.0 in PSYCH 315, or 2.0 in PSYCH 317. Instructors: Joslyn

PSYCH 332 Neurobehavioral Lab (5) NW Explores the neural mechanisms of behavior via neuropharmacological and neuroanatomical approaches. Includes the ethics and regulation of animal experimentation. Prerequisite: either minimum 2.0 grade in PSYCH 315, or 2.0 in PSYCH 317. Instructors: Diaz

PSYCH 333 Sensory and Perceptual Processes (5) NW An overview of each of the major senses with emphasis on the structure and function of sensory systems and the relation of the underlying biology to perceptual processes and behavior. Prerequisite: minimum 2.0 grade in PSYCH 202; 2.0 in PSYCH 209. Instructors: Boynton, Buck, Covey, Fine

PSYCH 334 Laboratory in Social Psychology (5) I&S Methodology of laboratory and field research on social behavior; data analysis and report writing; research projects. Prerequisite: minimum 2.0 grade in PSYCH 209; minimum 2.0 grade in either PSYCH 315 or PSYCH 317; minimum 2.0 grade in either PSYCH 245 or PSYCH 345. Instructors: Cheryan

PSYCH 345 Social Psychology (5) I&S The scientific study of how people's thoughts, feelings, and actions influence, and are influenced by, other people. Prerequisite: minimum 2.0 grade in PSYCH 202; 2.0 in PSYCH 209. Instructors: Brown, Kaiser

PSYCH 350 Honors Research Seminar in Psychology (2-, max. 4) Bassok Presentations by professors and advanced students concerning the rationale, methodology, and progress of their research projects; assistance with research projects; preparation of junior paper. Four credits of PSYCH 350 required for all junior Honors candidates in conjunction with PSYCH 498 and PSYCH 499. Offered: AWSp.

PSYCH 355 Cognitive Psychology (5) I&S Current theory and research in perception, attention, memory and learning, attitudes, thinking and decision making, and language. For the student who wishes a survey or who intends additional work in any of the above content areas. Prerequisite: minimum 2.0 grade in PSYCH 202; 2.0 in PSYCH 209. Instructors: Joslyn, Miyamoto

PSYCH 357 Psychobiology of Women (5) NW, DIV Kenney Physiological and psychological aspects of women's lives; determinants of biological sex; physiological and psychological events of puberty; menopause; sexuality; contraception, pregnancy, childbirth, and lactation; role of culture in determining psychological response to physiological events. Offered: jointly with GWSS 357.

PSYCH 399 Foreign Study (3-5, max. 10) Upper division psychology courses for which there are no direct University of Washington equivalents taken through the UW Study Abroad program.

PSYCH 400 Learning (5) I&S/NW Experimental research and basic theories primarily in animal learning. Prerequisite: minimum 2.0 grade in PSYCH 202.

PSYCH 402 Infant Behavior and Development (3/5) I&S Psychological development in the first two years of life. Basic and advanced techniques for assessing psychological development in infancy. Classic theories of human infancy and examination of a wide range of new experiments about infant behavior and development. Prerequisite: minimum 2.0 grade in either PSYCH 206, PSYCH 306 or PSYCH 414. Instructors: Meltzoff

PSYCH 403 Motivation (5) I&S/NW Theory and research on reinforcement, punishment, frustration, preference, instinctual mechanisms, and other factors controlling animal behavior. Prerequisite: minimum 2.0 grade in PSYCH 202.

PSYCH 405 Advanced Personality: Theory and Research (5) I&S Intensive survey of theoretical concepts and detailed review of experimental methods and experiments in the field of personality. Prerequisite: PSYCH 303.

PSYCH 407 History of Psychology (5) I&S Historical and theoretical background of the basic assumptions and research methodologies of modern psychology and the scientists who developed them. Prerequisite: minimum 2.0 grade in PSYCH 209.

PSYCH 408 Neuroethology (4) NW Comparative exploration of the neural, hormonal, and genetic mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, spatial orientation, homing and migration, and biological rhythms. Students are expected to understand fundamental concepts of neuroscience from any of the following prerequisite courses. Prerequisite: either PSYCH 333 OR BIOL 220. Offered: jointly with BIOL 408.

PSYCH 410 Child and Adolescent Behavior Disorders (5) I&S Introduction to psychopathology in children and adolescents, and an overview of principal modes of intervention. Particularly for students interested in advanced work in clinical psychology, social work, or special education. Prerequisite: minimum 2.0 grade in PSYCH 305; either 2.0 in PSYCH 306 or 2.0 in PSYCH 202, 2.0 in PSYCH 206, and 2.0 in PSYCH 209.

PSYCH 411 Perceptual Development (5) I&S/NW Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch, vision, audition. Prerequisite: minimum 2.0 grade in either PSYCH 206, PSYCH 306, or PSYCH 414. Instructors: Meltzoff Offered: jointly with SPHSC 411.

PSYCH 413 Adolescent Development (5) I&S Provides an overview of physical, cognitive, psychosocial, and emotional development of adolescents with an emphasis on understanding the context in which young people grow up. Explores cultural, environmental, and social influences on development. Prerequisite: minimum 2.0 grade in PSYCH 209; 2.0 in either PSYCH 206 or PSYCH 306.

PSYCH 414 Cognitive Development (5) I&S Key theoretical and research approaches to cognitive development from infancy through adolescence. Sensorimotor development, language development, imitation, number concepts, logical reasoning, memory, cognition in adolescents, intelligence, and the role of biology, environment, and experience. Prerequisite: either minimum 2.0 grade in PSYCH 306, or 2.0 in both PSYCH 206 and PSYCH 209. Instructors: Sommerville

PSYCH 415 Personality Development of the Child (5) I&S Socialization theory and research, infant attachment and social relationships, development of aggressive and altruistic behaviors, sex-role development, moral development, parent and adult influences. Applied issues in social development and policy. Prerequisite: minimum 2.0 grade in either PSYCH 206 or PSYCH 306. Instructors: Repacholi

PSYCH 416 Animal Communication (4) NW Evolution and mechanisms of animal communication and related processes of perception, thinking, and social behavior. Prerequisite:

either minimum 2.0 grade in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Instructors: Beecher, Brenowitz, Sisneros

PSYCH 418 Primate Social Behavior (5) NW Social behavior, ecology, and group structure of monkeys and apes from an evolutionary, sociobiological, and anthropological perspective. Prerequisite: either minimum 3.5 grade in PSYCH 200, 2.0 in PSYCH 300, 2.0 in BIO A 201, or 2.0 in BIOL 180.

PSYCH 419 Behavioral Studies of Zoo Animals (5, max. 10) NW Observational studies of behavior of zoo animals to expand basic knowledge of animal behavior, conservation of endangered species, and research methodology with discussions and tours focusing on zoo philosophy and operations. Offered in cooperation with Woodland Park Zoo. Prerequisite: either minimum 2.0 grade in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

PSYCH 420 Drugs and Behavior (3) NW Animal and clinical research on the behavioral consequences of drug intake. Prerequisite: PSYCH 322. Instructors: Diaz

PSYCH 421 Neural Basis of Behavior (5) NW Anatomical and physiological principles and resultant behavior involved in the integrative action of the nervous system. Prerequisite: minimum 2.0 grade in PSYCH 202. Instructors: Diaz

PSYCH 425 Surgical and Histological Techniques (5) NW Practicum in basic and advanced surgical and histological techniques used in psychophysiological experimentation. Prerequisite: PSYCH 421.

PSYCH 426 Neurobiology of Learning and Memory (4) NW Theory and research on how animals learn and remember, including basic concepts of brain plasticity, how brain areas and neurons adapt to changes in experiences throughout the lifespan, and cellular and structural substrates of a “memory.” Prerequisite: minimum 2.0 grade in either PSYCH 202, PSYCH 322, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423. Instructors: Mizumori

PSYCH 427 Behavioral Endocrinology (5) NW The endocrine system and how its secretions influence and are influenced by behavior; relationships between the nervous and endocrine systems. Prerequisite: PSYCH 421.

PSYCH 428 Human Motor Control and Learning (5) I&S/NW Current theory and research in human motor performance and skill acquisition. Prerequisite: minimum 2.0 grade in PSYCH 209; 2.0 in PSYCH 202.

PSYCH 429 Brain Anatomy for the Behavioral Scientist (1) NW Detailed review of the neuroanatomical features of the sheep brain with laboratory demonstrations. Prerequisite: PSYCH 421 which may be taken concurrently. Instructors: Diaz

PSYCH 430 Development of Brain Connections (4) NW Analysis of innate and environmental factors that play a role in the development of brain connections. Critical review of current literature on the various strategies used by neurons to find their appropriate targets. Prerequisite:

minimum 2.0 grade in either PSYCH 202, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423. Instructors: Olavarria

PSYCH 431 Ecopsychology (5) I&S P. KAHN Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ENVIR 431/ESRM 431; W.

PSYCH 432 Visual Neuroscience (4) I&S/NW Surveys current facts/theories about how our brains interpret the images formed by our eyes to create a presentation of the visual environment. Topics include retinal processing, 3-D vision; color, form, motion, and object perception; and visual illusions. Prerequisite: minimum 2.0 grade in either PSYCH 333 or PSYCH 355.

PSYCH 433 Regulatory Behavior (4) NW Neural and endocrine mechanisms in the control of food and water intake and the regulation of body weight and fluid balance. Prerequisite: either PSYCH 421 or PSYCH 427. Instructors: Kenney

PSYCH 435 Human Color Vision (5) I&S/NW Discusses how color does not exist in the physical environment but is instead a creation of our brains. Explores perceptual, physiological, developmental, evolutionary, genetic, and cultural aspects of human color vision, including its role in language, culture, and art. Prerequisite: PSYCH 202; PSYCH 209. Instructors: Buck

PSYCH 436 Developmental Aspects of Sport Competition (4) I&S Biophysical and psychosocial influences of sport participation on growth and development of children and youth. Competition readiness, injuries, stress, aggression, roles and responsibilities of parents and coaches. Prerequisite: minimum 2.0 grade in PSYCH 209. Instructors: Smoll

PSYCH 437 Motor Development (4) NW Analysis of motor development from prenatal origins through adolescence with emphasis on relations between biophysical and psychosocial development of children and youth. Prerequisite: minimum 2.0 grade in PSYCH 209. Instructors: Smoll

PSYCH 438 Social Psychology of Sport (4) I&S Reciprocal effects of interpersonal and group influence processes, e.g., social facilitation, behavior modification, observational learning, individual versus group performance, group cohesion, leadership, aggression. Prerequisite: minimum 2.0 grade in PSYCH 101; 2.0 in PSYCH 202; 2.0 in PSYCH 209. Instructors: Smith, Smoll

PSYCH 440 Psychology of Emotion (5) I&S T. Turowski Overview of psychological research and theory on emotion, including biological, developmental, cognitive, social, and cultural perspectives. Topics include: why we have emotions; how emotions influence thoughts, actions, and interactions; facial expressions; controlling emotions; morality; gender differences; and the function of specific emotions such as joy, anger, and sadness. Prerequisite: PSYCH 209 Offered: A.

PSYCH 441 Perceptual Processes (5) I&S/NW Theory and findings in perception with a focus on visual perception in humans. Discrimination and constancy for simple judgments, segregation and identification of visual objects, and specific areas of investigation such as reading and computer vision. Prerequisite: minimum 2.0 grade in PSYCH 333.

PSYCH 443 Motivational Theories in Social Psychology (5) I&S Theories of motivation in social psychology. Emphasis on how motivation and cognition mutually influence each other to produce behavior. Explores such topics as persuasion, goal pursuit, self-regulation, achievement, and social comparison. Prerequisite: minimum 2.0 grade in PSYCH 345.

PSYCH 445 Theories of Social Psychology (5) I&S Evaluation of the major theories of human social behavior supported by the empirical literature; theories of social cognition and thought; major theories of social interaction, group processes, and social learning. Prerequisite: PSYCH 345. Instructors: Brown

PSYCH 446 Personality Assessment (3) I&S Measurement of personality variables in personality research, social psychology, and clinical psychology. Theoretical conceptions underlying various clinical and experimental scales and an assessment of their construct validity and behavioral correlates. Prerequisite: minimum 2.0 grade in PSYCH 303; 2.0 in PSYCH 315; 2.0 in PSYCH 317. Instructors: Smith

PSYCH 447 Psychology of Language (4) VLPA/I&S Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying comprehension and production of language, the relation between brain and language, and the question of the species-specificity of human language. Prerequisite: either minimum 2.0 grade in PSYCH 209, minimum 2.0 grade in LING 200, or LING 201.

PSYCH 448 Seminar in Psychology (1-15, max. 15) Selected research topics of contemporary interest. Quarterly listings of specific offerings are available at departmental advising office.

PSYCH 449 Organizational and Industrial Psychology (5) I&S Examines research on human behavior in industrial and organizational environments. Topics include research methods, job analysis, the prediction of workplace performance, personnel selection and training, performance appraisal, group influences, job satisfaction, job motivation, leadership, and human factors. Prerequisite: PSYCH 1011 PSYCH 209.

PSYCH 450 Honors Research Seminar in Psychology (2-, max. 4) Bassok Senior thesis research; preparation of senior thesis; oral presentation of research. Four credits of PSYCH 450 required for all senior Honors candidates in conjunction with PSYCH 498 and PSYCH 499. Offered: AWSp.

PSYCH 451 Health Psychology (5) I&S/NW Overview of the psychological and behavioral factors in health and disease. Includes research on both psychological causes and treatments. Topics include stress, risky behaviors, patient-provider interactions, pain, behavioral/medical treatments, and lifestyle interventions. Prerequisite: minimum 2.0 grade in PSYCH 202; 2.0 in PSYCH 209; 2.0 in either PSYCH 303, or PSYCH 345.

PSYCH 452 Psychology of the Self-Concept (4) I&S Examines psychological theory and research on the role of the self-concept in regulating behavior. Topics include the development of the self-concept; self-awareness; and self-esteem maintenance. Prerequisite: minimum 2.0 grade in either PSYCH 245 or PSYCH 345. Instructors: Brown

PSYCH 454 Personality and Social Influence (4) I&S Survey of various theories and research for analyzing person-situation interactions - how the qualities of persons and situations combine to generate thoughts, feelings, and behaviors of a person in a given social situation. Prerequisite: PSYCH 209; either PSYCH 203, PSYCH 245, PSYCH 303, or PSYCH 345. Instructors: Shoda

PSYCH 456 Social and Moral Development (5) I&S Theoretical approaches toward explaining children's social and moral development, including those that are nativistic, sociobiological, behavioristic, psychoanalytic, and constructivist. Use of theory to investigate applied problems related to parenting, education, peer relationships, authority, sexuality, culture, ecology, and technology. Prerequisite: either PSYCH 206 or PSYCH 306. Instructors: Kahn

PSYCH 457 Language Development (5) VLPA/I&S First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: minimum 2.0 grade in either PSYCH 206, PSYCH 306, LING 200, or LING 400.

PSYCH 458 Behavioral Genetics (4) NW Role of genetics in determining variation in human and animal behavior and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects, and gene expression. Prerequisite: either minimum 3.5 grade in PSYCH 200, 2.0 in PSYCH 300, or 2.0 in BIOL 180. Offered: jointly with BIOL 458.

PSYCH 459 Evolutionary Psychology (4) I&S/NW Explores human behavior from the perspective of biological evolution. Covers core issues such as cooperation, communication, aggression, mating, reproduction, and parental and family interactions, as well as specialized applications within psychology such as psychopathology. Encourages a critical, skeptical examination of this new field. Prerequisite: either minimum 3.5 grade in PSYCH 200 or minimum 2.0 grade in PSYCH 300. Instructors: Barash, Beecher

PSYCH 460 Cognitive Neuroscience (4) NW Discussion of neural systems underlying cognitive behavior with particular focus on breakdown of cognition following brain damage. Topics include object and space perception, language, voluntary movement, attention, and memory. Examination of contributions from related areas of neuroimaging, visual perception, linguistics, physiology, and neuroscience. Prerequisite: minimum 2.0 grade in either PSYCH 333, PSYCH 355, or PSYCH 421. Instructors: Murray, Osterhout

PSYCH 461 Asian American Psychology (5) I&S Psychological research on Asian American individuals and the community, with emphasis on social psychological research. Topics include the model minority myth, stereotypes of unassimilation, gender and sexuality, and relationships with other groups. Prerequisite: minimum 2.0 grade in either PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 345, or PSYCH 355. Instructors: Cheryan

PSYCH 462 Human Memory (5) I&S Research and theory in key areas of memory. Issues covered include information processing theory, the link between memory processes and their biological underpinnings, autobiographical memory, implicit memory, and the effect of emotion on memory. Prerequisite: minimum 2.0 grade in PSYCH 209. Instructors: Joslyn

PSYCH 463 Implicit and Unconscious Cognition (3) I&S/NW Overview of method, theory, and findings concerning cognitive processes operating outside attentional focus or without introspective awareness. Considers relevance to basic phenomena of social, cognitive, and clinical psychology. Prerequisite: minimum 2.0 grade in either PSYCH 315 or PSYCH 317; minimum 2.0 grade in either PSYCH 303, PSYCH 305, PSYCH 333, PSYCH 345, or PSYCH 355. Instructors: Greenwald

PSYCH 465 Intelligence (5) I&S Analysis of individual differences in cognition. Includes description/use of psychometric ("intelligence test") models, test scores' relationship to academic and non-academic performance, information processing and biological models of intelligence (including genetic models). Discussion of male-female and demographic group differences in cognition. Prerequisite: either PSYCH 315 or PSYCH 317; PSYCH 355.

PSYCH 466 Psychology of Judgment and Decision Making (5) I&S Human information processing in judgment and decision making, especially the interface between cognitive theories and normative and prescriptive theories of decision making. Prerequisite: minimum 2.0 grade in either PSYCH 315 or PSYCH 317; either PSYCH 331, PSYCH 355, or PSYCH 361. Instructors: Miyamoto

PSYCH 469 Psychology of Reasoning (4) I&S Cognitive processes in human learning, problem solving, deductive and inductive reasoning.

PSYCH 470 Psychology and Music (5) VLPA/I&S Introduction to the scientific study of musical behavior. An overview of current topics in the psychology of music from the areas of musical perception and cognition, musical development, music therapy, musical performance, and composition. Includes psychoacoustical and neuropsychological foundations, research methods, and some basic material in music theory. Prerequisite: minimum 2.0 grade in either PSYCH 202 or NBIO 302. Instructors: Covey

PSYCH 471 Cognition In the Real World (4-5, max. 10) I&S Examines cognitive issues in applied settings, such as the workplace and education. Topics include such issues as attention, expertise, problem solving, decision-making, human error, automation, navigation, and individual differences. Prerequisite: minimum 2.0 grade in PSYCH 209. Instructors: Joslyn

PSYCH 478 Cultural Psychology (4) I&S Surveys cultural influences on cognitive, emotion, morality, self-concept, and mental health, from a multicultural perspective. Prerequisite: minimum 2.0 grade in PSYCH 202; minimum 2.0 grade in PSYCH 209. Offered: A.

PSYCH 479 Advanced Human Sexuality (5) I&S Intensive reading on current issues relevant to the physiological, psychological, cultural aspects of human sexuality. Prerequisite: minimum 2.0 grade in PSYCH 210. Instructors: McDermott

PSYCH 481 Seminar in Advanced Quantitative Methods (3) Examines the role of statistical methods in psychological research. Issues and controversies surrounding null hypothesis significance testing. Review of selected alternative statistical methods in psychology. Prerequisite: minimum 2.0 grade in either PSYCH 315 or PSYCH 318. Instructors: Little

PSYCH 482 Advanced Research Methods for Behavioral Psychology (4) QSR Develops skills of collecting and analyzing behavioral research data, communicating the results orally and in writing, and expressing perspectives on issues of scientific method and practice. Prerequisite: either PSYCH 315 or PSYCH 317; either PSYCH 330, PSYCH 331, PSYCH 332, or PSYCH 350. Instructors: Greenwald, Shoda Offered: Sp.

PSYCH 483 Writing in Psychology (5) Helps students refine scientific writing skills. Students practice conducting focused literature searches and writing literature reviews, preparing empirical data for presentations, organizing and writing research reports, and writing about psychology for a lay audience. Prerequisite: minimum 2.0 grade in PSYCH 202; minimum 2.0 grade in PSYCH 209; minimum 2.0 grade in either PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355. Instructors: Covey, Joslyn

PSYCH 485 Primate Conservation Biology and Behavior (5) NW Examines the principles and concepts of conservation biology as they apply to the nonhuman primates with special attention to theoretical advances, conservation strategies, and management practices central to primate conservation. Prerequisite: either minimum 3.5 grade in PSYCH 200 or 2.0 in PSYCH 300 or 2.0 in BIO A 201. Instructors: Kyes

PSYCH 486 Animal Mind (4) NW Explores the cognitive capacities of animals. Focuses on the classical question, first clearly posed by Darwin, of how similar are the cognitive processes underlying behavior in humans and animals. Encourages a critical, skeptical examination of this new field. Prerequisite: minimum 3.5 grade in PSYCH 200 or 2.0 in PSYCH 300. Instructors: Beecher

PSYCH 487 Advanced Psychobiology of Women (5) I&S/NW Intensive reading on current issues relevant to women's psychology and physiology. Prerequisite: minimum 2.0 grade in PSYCH 357/ GWSS 357. Instructors: Kenney Offered: jointly with GWSS 487; W.

PSYCH 488 Stress and Coping (4) I&S/NW Reviews theories and research concerning stress and its roles in behavior, personality, development, health, and interpersonal relationships. Coping analyzed as a factor in the way people respond to stressful circumstances. Prerequisite: minimum 2.0 grade in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 489 Clinical Psychology (3) I&S Basic issues, methods, and research: professional issues, psychological assessment, and approaches to psychotherapy and behavioral change. Prerequisite: minimum 2.0 grade in PSYCH 305.

PSYCH 490 Stress Management (3) I&S/NW Nature of stress. Physiological responses to stress and relaxation. Techniques of stress management with training in relaxation, biofeedback,

meditation, cognitive restructuring, exercise, nutrition, interpersonal communication skills, and time management. Prerequisite: PSYCH 101.

PSYCH 491 Special Topics in Child Development, Learning, and Mental Health (1-5, max. 30) I&S Selected topics of contemporary interest in child development, learning, and mental health.

PSYCH 494 Field Study in Animal Behavior (2-3, max. 9) *Kyes* Field experience in areas relating to animal behavior through participation in seminar discussion and field exercises and training at foreign and domestic field study sites.

PSYCH 496 Undergraduate Teaching Experience in Psychology (2-3, max. 6) Students are trained as assistants in quiz sections or as supplemental tutors for undergraduate psychology courses. Designed especially for students planning graduate work or education certification. An overall maximum of 18 credits in PSYCH 496, PSYCH 497, PSYCH 498, and PSYCH 499 may apply toward a baccalaureate degree. Credit/no-credit only.

PSYCH 497 Undergraduate Fieldwork (2-5, max. 10) Individual consultation with faculty member and supervised practicum experience in a broad range of community settings and agencies dealing with psychological problems. An overall maximum of 18 credits in PSYCH 496, PSYCH 497, PSYCH 498, and PSYCH 499 may apply toward a baccalaureate degree.

PSYCH 498 Directed Reading in Psychology (1-3, max. 18) Readings in special interest areas under supervision of departmental faculty. Discussion of reading in conference with the instructor. An overall maximum of 18 credits in PSYCH 496, PSYCH 497, PSYCH 498, and PSYCH 499 may apply toward a baccalaureate degree.

PSYCH 499 Undergraduate Research (1-3, max. 18) Design and completion of individual research projects. An overall maximum of 18 credits in PSYCH 496, PSYCH 497, PSYCH 498, and PSYCH 499 may apply toward a baccalaureate degree.

PSYCH 500 Proseminar in Psychology (1, max. 10) Presentations on professionally and practically useful topics by guest faculty presenters designed for first-year and second-year graduate students. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Greenwald Credit/no-credit only.

PSYCH 502 Core Concepts in Animal Behavior (3) Reading, reports, and discussion on animal behavior, with a focus on topics that lie at the interface of animal behavior, evolutionary science, neurobiology, and psychology. Includes social organization, mating systems, foraging, learning, communication, and agonistic behavior. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Barash, Beecher, Sisneros

PSYCH 503 Core Concepts in Behavior Genetics (4) Overview of current approaches to genetic analysis in psychology. Role of genetics in behavioral variation, and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects of

genes, and patterns of gene expression. Genetic effects on major behavioral differences. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Shoda

PSYCH 504 Core Concepts in Behavioral Neuroscience (3) Historical and contemporary perspectives in behavioral neuroscience. Current methodologies and research strategies. May include sensory processing, genetics, behavioral neuroendocrinology, developmental neural plasticity, neurobiology of learning and memory, lifespan perspectives on behavioral neurobiology, and psychopharmacology. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Buck, Covey, Diaz, Kim, Mizumori, Olavarria

PSYCH 505 Core Concepts in Neuroethology (3) *Sisneros* Reviews the current topics and approaches to the study of the neurobiological basis of natural behaviors or “neurothology.” Explores core concepts in the field of neuroethology and examines the role of the nervous system and the underlying neural circuits adapted for species-typical behaviors. Offered: AWSp.

PSYCH 506 Core Concepts in Cognitive Neuroscience (3) Combines psychological models of information processing with research techniques in the biomedical sciences. Topics in vision, attention, memory, motor behavior, and language illustrate this integrative approach. Research methods include behavioral, single unit, lesion, and neuro-imaging techniques. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Murray, Osterhout

PSYCH 507 Core Concepts in Cognitive Psychology (3) Survey of the major topics in human cognition. Discussion of memory, concepts and categories, language, decision-making, and problem solving. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Bassok, Miyamoto

PSYCH 508 Core Concepts in Perception (3) Current topics in perception, psychophysics, sensory memory, pattern recognition, letter and word perception, and visual masking. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Loftus
Offered: Sp.

PSYCH 509 Core Concepts in Computational Cognitive and Neural Modeling (5) Introduction to the basics of computational modeling techniques for psychologists and neuroscientists. Covers two common modeling approaches (production system models and neural network models) and describes the principles of their application to semantic memory, working memory, perception, reinforcement learning, skill acquisition, and transfer.

PSYCH 510 Core Concepts in Social Psychology (4) An overview of contemporary theories and research in social psychology, focusing on introducing graduate students to the field as practitioners of social psychological research. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Cheryan, Kaiser, Shoda

PSYCH 511 Core Concepts in Personality (3) Review of personality research. Roles of cognitive, affective, motivational, and psychodynamic processes. Critical evaluation of current personality, its antecedents, and its influences over behavior. Attention to role of personality

variables in social relationships. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Shoda, Smith

PSYCH 512 Development of Prejudice (3) *S. CHERYAN, K. OLSON* Explores how prejudice emerges and develops across the lifespan. Each week focuses a big question (e.g., “What are the earliest signs of prejudice? Can the disadvantaged be prejudiced?”) with supporting readings from the developmental, social, cultural, and evolutionary psychology literatures.

PSYCH 513 Core Concepts in Biological Basis of Development (4) Embryological, genetic, physiological, and evolutionary perspectives of human development; biological development in infancy; sensory development and its influence on the development of perception; primate models for human development. Prerequisite: graduate standing in psychology, or permission of instructor.

PSYCH 514 Core Concepts in Early Cognitive and Linguistic Development (4) Origins and early development of thought and language. Piagetian theory and modern-day revisions. In-depth examination of historical and philosophical bases for current empirical research. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Meltzoff, Sommerville

PSYCH 515 Core Concepts in Personality and Social Development (4) Theories and empirical literature in personality and social development throughout infancy, childhood. Prerequisite: graduate standing in psychology, or permission of instructor.

PSYCH 516 Core Concepts: Early Social Cognition in Typical Development and Autism (3) Describes current theoretical and empirical approaches to understand social cognitive processes underlying infants' ability and motivation to attend to, interpret, and act on social information. Research findings from typical infants and those at elevated risk for autism identify the implications of divergent developmental trajectories.

PSYCH 520 Core Concepts in Affective Science (3) Provides an overview of the major theories, research findings, and applications in the scientific study of emotion. Topics include the function of emotion; physiological and behavioral expression of emotion; emotion regulation; emotions and health; and how emotions influence intimate relationships.

PSYCH 521 Core Concepts in Decision Making (3) *S. Joslyn* Overview of theories and behavioral research on the cognitive processes involved in individual human decision-making including bounded rationality, prospect theory, dual systems, adaptive strategies and the nature of expertise. Offered: A WSpS.

PSYCH 522 Laboratory in Statistical Computation I (2) Techniques of computation using statistical software on personal computers. Organization of data files, transformations of variables, graphical representations of data, descriptive statistics, elementary inferential statistical analyses. Prerequisite: concurrent enrollment in PSYCH 524, or permission of instructor. Offered: A.

PSYCH 523 Laboratory in Statistical Computation II (2) Techniques of statistical computation using statistical software on personal computers and mainframe computers. Multiple regression, analysis of variance and covariance. Planned and post hoc comparisons and confidence intervals. Data analytic diagnostics for violations of regression assumptions. Prerequisite: PSYCH 522 and PSYCH 524, concurrent enrollment in PSYCH 525, or permission of instructor. Offered: W.

PSYCH 524 Introduction to Statistics and Data Analysis (4) Basic concepts of statistical theory and methods of data analysis. Emphasis on the integration of statistical theory, statistical computation, and psychological research methods. Required of all first-year graduate students in psychology. Prerequisite: concurrent enrollment in PSYCH 522, or permission of instructor. Offered: A.

PSYCH 525 Linear Models and Data Analysis (4) Analysis of data in the behavioral sciences. Required of all first-year graduate majors. Prerequisite: PSYCH 522, PSYCH 524; concurrent registration in PSYCH 523, or permission of instructor. Offered: W.

PSYCH 526 Multivariate Statistics (4) An introduction to statistical modeling; interactive data analyses; use of regression, ANOVA, logistic regression, and log-linear models in explanatory studies. Prerequisite: PSYCH 525.

PSYCH 527 Core Concepts in Cognitive Approach to Human Memory (3) *S. Joslyn* Topics in human memory focusing primarily on long-term memory. Begins with an overview of the cognitive perspective. Specific topics may include implicit and explicit memory, autobiographical memory, emotion and memory, memory for mental events, mechanisms for forgetting, source monitoring and factors that enhance memory. Offered: AWSpS.

PSYCH 528 Practical Methods for Behavioral Research (4, max. 8) *Greenwald, Shoda* Examination of methodological, practical, and communication problems associated with research on human behavior. Topics include: selecting research problems, use of theory, types of validity, common sense about statistics, when to replicate, dealing with unpredicted results, strategies for presentation and publication. Offered: Sp.

PSYCH 529 Advanced Research Methods (5) Surveys advanced clinical research methods not covered in the required statistics sequence. Examples include structural equation modeling, hierarchical linear modeling, growth curve modeling, and taxometric analyses. Hands-on experience gained through weekly assignments using each method. Prerequisite: PSYCH 525.

PSYCH 530 Introduction to Latent Variables (4) Analyses techniques to assess effects of latent variables in presence of error in observed data. Provides experience with statistical tools for confirmatory structural equation modeling and testing of hypotheses concerning causal and other relations among latent variable. Prerequisite: PSYCH 525, or permission of instructor. Instructors: Greenwald

PSYCH 535 Scientific Writing in Psychology (5, max. 10) Addresses issues in scientific writing and publishing; laboratories assist with writing, and provide feedback on drafts of articles

throughout the writing process. Students write a journal article to submit for publication. Other writing projects are also possible with instructor's permission. Credit/no-credit only.

PSYCH 536 Grant Preparation in Psychology (3, max. 6) Prepare and submit an application for a major national fellowship. Joint registration in PSYCH 598 with faculty adviser is required. Prerequisite: graduate standing in psychology and permission of instructor. Instructors: Mizumori Credit/no-credit only.

PSYCH 537 Teaching of Psychology (3) Examines issues concerning the teaching of psychology, including educational goals, course development, instructional methods, TA-student and TA-faculty relations, grading, student diversity, and problem situations. Assignments designed to enhance students' organizational, presentational, and problem-solving skills. Prerequisite: graduate standing in the Department of Psychology. Instructors: Passer Credit/no-credit only.

PSYCH 538 Interactive Software for Psychological Research (4) *G. Boynton, I. Fine* Introduction to programming skills with the goal of teaching how to design, program, and analyze experiments. Topics include principles of programming, the programming environment, presentation software, and data collection, management, and analysis. Prerequisite: graduate standing in psychology, or permission of instructor.

PSYCH 540 Advances in Psychology (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in psychology. Student presentations and discussion. Prerequisite: graduate standing in psychology, or permission of instructor.

PSYCH 541 Advances in Animal Behavior (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in animal behavior. Student presentations and discussion. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Barash, Beecher, Brenowitz, Kyes, Sisnersos

PSYCH 542 Advances in Behavioral Neuroscience (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in behavioral neuroscience. Student presentations and discussion. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Buck, Covey, Diaz , Kim, Mizumori, Olavarria

PSYCH 543 Advances in Working Memory (3) *S. Joslyn* Provides an overview of theories in working memory, roughly synonymous with consciousness. Introduces the Baddeley model as well as alternative models and focus on recent research on a variety of topics including verbal and spatial memory, executive control, individual differences and training working memory. Offered: AWSpS.

PSYCH 545 Advances in Cognition/Perception (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in cognition/perception. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Loftus

PSYCH 546 Advances in Developmental Psychology (1-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in developmental psychology. Student presentations and discussion. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Kahn, Meltzoff, Repacholi, Smoll, Sommerville

PSYCH 547 Advances in Social/Personality (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in social psychology/personality. Student presentations and discussion. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Cheryan, Greenwald, Kaiser, Shoda

PSYCH 548 Advances in Quantitative Psychology (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in quantitative psychology. Student presentations and discussion. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Flaherty

PSYCH 549 Seminar in Physiological Psychology (2) Prerequisite: permission of instructor. Instructors: Diaz

PSYCH 550 Seminar in Psychology (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor.

PSYCH 551 Seminar in Animal Behavior (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Barash, Beecher, Brenowitz, Sisneros

PSYCH 552 Seminar in Behavioral Neuroscience (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Buck, Covey, Diaz, Kenney, Mizumori, Olavarria

PSYCH 555 Seminar in Cognition/Perception (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Bassok, Boynton, Buck, Fine, Kerr, Loftus, Murray

PSYCH 556 Seminar in Developmental Psychology (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Meltzoff, Repacholi, Smoll

PSYCH 557 Seminar in Social/Personality (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Brown, Cheryan, Greenwald, Kaiser, Leu, Shoda

PSYCH 558 Seminar in Quantitative Psychology (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in psychology, or permission of instructor. Instructors: Flaherty, Little, Miyamoto

PSYCH 560 Research Strategies (1-2, max. 30) Group discussions of problems and continuing strategies for ongoing and future research projects. Prerequisite: graduate standing in psychology; others by permission of department.

PSYCH 561 Current Trends in Psychology (*, max. 30) Prerequisite: permission of instructor. Offered: AWSpS.

PSYCH 562 Evolutionary Psychology of Gender, Mating, and Reproduction (3) *Barash, Beecher, Sisneros* Reviews evidence for biological factors influencing human mating and reproductive behavior, through application of concepts and theory from animal behavior, behavioral genetics, and evolutionary biology. Offered: W.

PSYCH 563 Developmental Psychology and the Human Relationship with Nature (4) *Kahn* Theories of development used to investigate the ontogenesis of the human relationship with nature. An emphasis on social cognition, children's environmental moral reasoning, the effects of technology in children's lives, and evolutionary theory. Offered: W.

PSYCH 564 Advanced Attitude Theory (5) Theoretical, methodological, and empirical work on the concept of attitude and its practical applications. Topics include: definition of attitude, measurement of attitudes, information-processing theories, functional theories, cognitive structure theories, the self as attitude object, unconscious attitudinal processes. Prerequisite: PSYCH 445; PSYCH 525 or equivalent; or permission of instructor. Instructors: Greenwald

PSYCH 565 Quantifying Brain Analysis (3) Covers concepts and applications of statistically unbiased methods for quantifying brain structure. Hands-on learning and application of concepts, sampling strategies and calculations for unbiased stereological measure of the size and number of various brain components.

PSYCH 566 Neural Correlates of Perceptual Cognition (3) *Olavarria* Contribution of sensory systems to perceptual capabilities. Critical review of literature on the neural correlates of abilities such as sensory discrimination, subjective perception, attention, imagery, object and face recognition, and spatial behavior. Some sensory disabilities reviewed. Offered: W.

PSYCH 567 Higher Order Cognition (3) *Bassok* Survey of research on higher-order cognition with an emphasis on theoretical accounts of knowledge representation. Topics include problem solving, inductive and deductive reasoning, hypothesis testing, causal inferences, similarity judgments, and categorization.

PSYCH 568 Cognitive Approaches to Human Memory (3) Examination of current topics in human memory from the perspective of cognitive psychology. Offered: Sp.

PSYCH 596 Advanced Teaching Practicum (2, max. 6) Supervised participation in graduate teaching. Prerequisite: graduate student in psychology and permission of instructor. Offered: AWSpS.

PSYCH 598 Directed Reading in Psychology (*, max. 30) Selected topics. Prerequisite: permission of a supervising psychology faculty member.

PSYCH 599 Directed Research in Psychology (1-3, max. 24) Supervised participation in research. Prerequisite: permission of a supervising psychology faculty member.

PSYCH 600 Independent Study or Research (*-) Offered: AWSpS.

PSYCH 700 Master's Thesis (*-) Offered: AWSpS.

PSYCH 800 Doctoral Dissertation (*-) Offered: AWSpS.

Scandinavian Studies

Department Overview

318 Raitt

Scandinavian studies is concerned with the study of languages, literature, history, politics, and cultures of Denmark, Finland, Iceland, Norway, Sweden, and the Baltic States of Estonia, Latvia, and Lithuania. Emphasis is placed both on contemporary literature and culture and on historical development. Although most courses designed for majors are taught in the original languages, a broad spectrum of courses designed primarily for nonmajors is offered in English.

Undergraduate Program

Adviser

305X Raitt, Box 353420

206-543-6099

The Department of Scandinavian Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies.
- Minors in Danish, Finnish, Norwegian, Swedish, Baltic studies, and Scandinavian area studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Danish, Estonian, Finnish, Latvian, Lithuanian, Norwegian, or Swedish.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Danish, Finnish, Norwegian, or Swedish: 65 credits, of which 35 are in upper-division courses. The 65 credits include 30 credits in first- and second-year language training, 15 credits in literature courses in the chosen language, one course in Scandinavian area studies, a course in the history of Scandinavian languages, a course in Scandinavian literature in translation, and a senior essay (SCAND 498).

Scandinavian Area Studies: 65 credits, of which 30 are in upper-division courses. The 65 credits include 30 credits in the chosen Scandinavian or Baltic language (normally first and second

year), a minimum of one course from each of four area-studies fields (Scandinavian folklore and film; literature in translation; history and mythology; society and politics), and a senior essay (SCAND 498).

Minor

Minor Requirements:

Baltic Studies: 35 credits

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 20 credits of upper-division Scandinavian coursework, including at least one Baltic studies course from the following: SCAND 344, SCAND 345, SCAND 454, SCAND 455
3. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework

Danish, Finnish, Norwegian, or Swedish: 35 credits

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 15 credits of second year Danish, Finnish, Norwegian, or Swedish
3. 5 credits of upper-division Scandinavian coursework or 5 credits of an upper-division language course
4. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Estonian, Latvian, Lithuanian: 35 credits

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 15 credits of second year Estonian, Latvian, or Lithuanian
3. 5 credits of Baltic studies coursework (SCAND 344, SCAND 345, SCAND 454, or SCAND 455), or 5 credits of an upper-division language course.
4. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Scandinavian Area Studies: 35 credits

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 20 credits of upper-division Scandinavian coursework
3. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduates of the Department of Scandinavian Studies have an advanced level of proficiency in a Scandinavian, Fenno-Ugric, or Baltic language. They can talk about a wide range of concrete topics in a sustained conversation and have the ability to interpret and write about literary texts, non-fiction, and other media. Graduates also have knowledge of major figures, ideas, and institutions in Baltic or Nordic culture, history, literature, and politics that enriches a global perspective. They have the ability to research and synthesize source material in the target language and can produce a scholarly essay in English on a topic within their area of concentration.

Graduates of the Scandinavian studies program have the qualifications to embark on careers that require skills in the interpretation of information in various media, critical analysis, and effective communication and to continue in graduate programs and professional schools that value an international perspective.

- *Instructional and Research Facilities:* None
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships at museums or with Scandinavian businesses are possible. Exchange program opportunities with Aarhus, Copenhagen, Linköping, Stockholm, Uppsala, Bergen, Oslo, Åbo/Turkku, and Helsinki also exist.
- *Department Scholarships:* The department offers several scholarships for students of Danish, Finnish, Norwegian, and Swedish.
- *Student Organizations/Associations:* the Danish Club, the Norwegian Club, the Swedish Club, and the Finnish Club.

Graduate Program

Graduate Program Coordinator
318 Raitt, Box 353420
206-543-0645
uwscand@uw.edu

The department offers graduate programs of study leading to the master of arts and doctor of philosophy degrees. For the MA degree, the emphasis may be on Old Icelandic (Old Norse), Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies. PhD degree aspirants must complete one quarter's study of Old Icelandic and concentrate their studies primarily within one of five areas: Danish language and literature, Finnish language and literature, Norwegian language and literature, Swedish language and literature, or Scandinavian area studies.

Programs in Scandinavian studies open several areas of inquiry: medieval, particularly Old Icelandic; modern, including the eighteenth century; Romanticism; the Modern Breakthrough; and the twentieth century. Attention is paid to the history of Scandinavian languages, prose, drama, and poetry. Opportunities for supervised study and specialization also exist in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies, as well as in comparative-literature study.

Master of Arts

Two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

1. Emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of literary history, critical theory and text analysis, plus study of one secondary area.
2. Emphasis on Scandinavian area studies includes the study of Scandinavian folklore, mythology, history, politics, society, and Baltic studies, with an emphasis in one of these areas.

Admission Requirements

Bachelor of Arts degree with major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background, including advanced language proficiency in one Nordic language.

Degree Requirements

Minimum 40 credits

1. 40 credits in Scandinavian and related subjects approved by the department, including a minimum 20 credits in courses numbered 500 and above
2. Reading knowledge of French or German (or other non-Scandinavian language with faculty approval)
3. Written and oral examination
4. Thesis or non-thesis option
5. Candidates in Scandinavian languages and literature satisfy the department requirement in Old Icelandic

Doctor of Philosophy

Concentration primarily on one of two areas: Scandinavian languages and literature, or Scandinavian area studies, with emphasis on the student's target language. Major attention given to the history of Scandinavian languages, literary history and theory, and genre study. Opportunities for graduate work in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies exist.

Admission Requirements

Master of Arts degree with major in Scandinavian languages and literature or equivalent background.

Degree Requirements

Minimum 90 credits

1. 40 credits beyond the master's degree in Scandinavian languages and literature and related subjects approved by the department.
2. One quarter's study of Old Icelandic
3. Reading knowledge of French and German (other non-Scandinavian languages may be substituted with faculty approval)
4. General examination for admission to candidacy
5. 27 credits of SCAND 800 (dissertation) taken over at least three quarters
6. Final examination on the dissertation.

Financial Aid

Teaching assistantships in Danish, Finnish, Norwegian, Swedish, and Scandinavian area studies are usually available, as well as occasional research assistantships. If funding allows, a Baltic-language teaching assistantship may be available.

Course Descriptions

Danish

DANISH 101 First Year Danish 1 (5) VLPA Fundamentals of oral and written Danish. First in a sequence of three.

DANISH 102 First Year Danish 2 (5) VLPA Fundamentals of oral and written Danish, including introductory study of literature, film, and other authentic texts. Second in a sequence of three. Prerequisite: DANISH 101. Offered: W.

DANISH 103 First Year Danish 3 (5) VLPA Fundamentals of oral and written Danish, including introductory study of literature, film, and other authentic texts. Third in a sequence of three. Prerequisite: DANISH 102. Offered: Sp.

DANISH 199 Foreign Study: Elementary Danish (1-15, max. 15) Fundamentals of oral and written Danish.

DANISH 201 Second-Year Danish (5) VLPA Intensive practice in speaking, reading, and writing. Review of grammar. Introduction of modern literary texts. Discussion of culture and current events in Denmark. First in a sequence of three.

DANISH 202 Second-Year Danish (5) VLPA Intensive practice in speaking, reading, and writing. Review of grammar. Introduction of modern literary texts. Discussion of culture and current events in Denmark. Second in a sequence of three. Prerequisite: DANISH 201.

DANISH 203 Second-Year Danish (5) VLPA Intensive practice in speaking, reading, and writing. Review of grammar. Introduction of modern literary texts. Discussion of culture and current events in Denmark. Third in a sequence of three. Prerequisite: DANISH 202.

DANISH 299 Foreign Study: Intermediate Danish (1-15, max. 15) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Discussion of culture and current events in Denmark.

DANISH 310 Topics in Danish Short Prose (5, max. 15) VLPA Focuses on the fairy tale and story, with selections by Blicher, H.C. Andersen, Bang, Blixen, and others.

DANISH 311 Topics in Danish Literature and Culture (5, max. 15) VLPA Selected topics in modern Danish literature and culture, such as women's literature, Danish identity and the European Union, contemporary drama and film, or children's literature.

DANISH 312 Topics in the Danish Novel (5, max. 15) VLPA Focuses on selected novels from the nineteenth and twentieth centuries by figures such as J.P. Jacobsen, Herman Bang, J.V. Jensen, Hans Kirk, Scherfig and Ditlevsen.

DANISH 395 Foreign Study: Danish Area Studies (1-5, max. 10) I&S Courses in Danish history, society, and/or politics.

DANISH 399 Foreign Study: Topics in Danish Literature and Culture (1-5, max. 15) VLPA Topics in Danish literature, life, and civilization.

DANISH 411 Danish for Professionals (3) VLPA Combines intensive beginning Danish language for professionals with a substantive introduction to Danish culture and society. This course is geared to upper-division undergraduates and graduate students preparing to hold internships in professional offices in Denmark or study at Danish universities via UW study Abroad. Does not meet foreign language requirement. Offered: Sp.

DANISH 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Danish language, literature, or related fields.

Estonian

ESTO 101 First Year Estonian 1 (5) VLPA Fundamentals of oral and written Estonian, including introductory study of literature, film, and other authentic texts. First in a sequence of three. Offered: A.

ESTO 102 First Year Estonian 2 (5) VLPA Fundamentals of oral and written Estonian, including introductory study of literature, film, and other authentic texts. Second in a sequence of three. Prerequisite: ESTO 101. Offered: W.

ESTO 103 First Year Estonian 3 (5) VLPA Fundamentals of oral and written Estonian, including introductory study of literature, film, and other authentic texts. Third in a sequence of three. Prerequisite: ESTO 102. Offered: Sp.

ESTO 111 Basic Estonian (3) L. ROOS, G. SMIDCHENS Fundamentals of Estonian language to develop reading and comprehension proficiency. Completion of all three quarters does not meet the foreign language requirement. Offered: A.

ESTO 112 Basic Estonian (3) L. ROOS, G. SMIDCHENS Fundamentals of Estonian language to develop reading and comprehension Prerequisite: ESTO 111 Offered: W.

ESTO 113 Basic Estonian (3) L. ROOS, G. SMIDCHENS Fundamentals of Estonian language to develop reading comprehension Prerequisite: ESTO 112 Offered: Sp.

ESTO 150 Intensive Estonian (15) Fundamentals of oral and written Estonian. Intensive practice in speaking, reading, and writing Estonian. Interactive classroom, computer-assisted learning, language, and reading laboratories. Emphasis on contemporary Estonian culture and society. If Estonian is the student's language of admission, only 10 credits count towards graduation.

ESTO 201 Second-Year Estonian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. First in a sequence of three. Prerequisite: either ESTO 103 or ESTO 150.

ESTO 202 Second-Year Estonian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Second in a sequence of three. Prerequisite: ESTO 201.

ESTO 203 Second-Year Estonian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Third in a sequence of three. Prerequisite: ESTO 202.

ESTO 250 Intensive Intermediate Estonian (15) VLPA Accelerated second-year Estonian. Systematic review of Estonian grammar. Intensive practice in conversation, reading, and writing. Prerequisite: either ESTO 103 or ESTO 150. Offered: S.

ESTO 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Estonian language, culture, or society.

Finnish

FINN 101 First Year Finnish 1 (5) VLPA Fundamentals of oral and written Finnish, including introductory study of literature, film, and other authentic texts. First in a sequence of three. Offered: A.

FINN 102 First Year Finnish 2 (5) VLPA Fundamentals of oral and written Finnish, including introductory study of literature, film, and other authentic texts. Second in a sequence of three. Prerequisite: FINN 101. Offered: W.

FINN 103 First Year Finnish 3 (5) VLPA Fundamentals of oral and written Finnish, including introductory study of literature, film, and other authentic texts. Third in a sequence of three. Prerequisite: FINN 102. Offered: Sp.

FINN 150 Intensive First-Year Finnish (15) Fundamentals of oral and written Finnish. Intensive practice in speaking, reading, and writing. Interactive classroom, computer-assisted learning, and language and reading laboratories. Emphasis on contemporary Finnish culture and society. If Finnish is the student's language of admission, only 10 credits count towards graduation.

FINN 199 Foreign Study: Elementary Finnish (1-15, max. 15) Fundamentals of oral and written Finnish.

FINN 201 Second-Year Finnish (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. First in a sequence of three. Prerequisite: either FINN 103 or FINN 150.

FINN 202 Second-Year Finnish (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Second in a sequence of three. Prerequisite: FINN 201.

FINN 203 Second-Year Finnish (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Third in a sequence of three. Prerequisite: FINN 202.

FINN 250 Intensive Second-Year Finnish (15) VLPA Intensive study of second-year Finnish. Prerequisite: either FINN 103 or FINN 150.

FINN 299 Foreign Study: Intermediate Finnish (1-15, max. 15) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Discussion of culture and current events in Finland.

FINN 310 Topics in Finnish Language and Culture (5, max. 15) VLPA Topics related to Finnish literature, life, and civilization.

FINN 395 Foreign Study: Finnish Area Studies (1-5, max. 10) I&S Courses in Finnish history, society, and/or politics.

FINN 399 Foreign Study: Topics in Finnish Literature and Culture (1-5, max. 15) VLPA Topics in Finnish literature, life, and civilization.

FINN 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Finnish language, culture, or society.

Latvian

LATV 101 First Year Latvian 1 (5) VLPA Fundamentals of oral and written Latvian, including introductory study of literature, film, and other authentic texts. First in a sequence of three. Offered: A.

LATV 102 First Year Latvian 2 (5) VLPA Fundamentals of oral and written Latvian, including introductory study of literature, film, and other authentic texts. Second in a sequence of three. Prerequisite: LATV 101. Offered: W.

LATV 103 First Year Latvian 3 (5) VLPA Fundamentals of oral and written Latvian, including introductory study of literature, film, and other authentic texts. Third in a sequence of three. Prerequisite: LATV 102. Offered: Sp.

LATV 111 Basic Latvian (3) I. GRINBERGA Fundamentals of Latvian language in order to develop reading and comprehension proficiency. Completion of all three quarters does not meet the foreign language requirement. Offered: A.

LATV 112 Basic Latvian (3) I. GRINBERGA Fundamentals of Latvian language in order to develop reading and comprehension proficiency. Completion of all three quarters does not meet the foreign language requirement. Prerequisite: LATV 111. Offered: W.

LATV 113 Basic Latvian (3) I. GRINBERGA Fundamentals of Latvian language in order to develop reading and comprehension proficiency. Completion of all three quarters does not meet the foreign language requirement. Prerequisite: LATV 112. Offered: Sp.

LATV 150 Intensive Latvian (15) Fundamentals of oral and written Latvian. Intensive practice in speaking, reading, and writing Latvian. Interactive classroom, computer-assisted learning, language, and reading laboratories. Emphasis on contemporary Latvian culture and society. If Latvian is the student's language of admission, only 10 credits count towards graduation.

LATV 201 Second-Year Latvian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. First in a sequence of three. Prerequisite: either LATV 103 or LATV 150.

LATV 202 Second-Year Latvian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Second in a sequence of three. Prerequisite: LATV 201.

LATV 203 Second-Year Latvian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Third in a sequence of three. Prerequisite: LATV 202.

LATV 250 Intensive Intermediate Latvian (15) VLPA Accelerated second-year Latvian. Systematic review of Latvian grammar. Intensive practice in conversation, reading, and writing. Prerequisite: either LATV 103 or LATV 150. Offered: S.

LATV 310 Topics in Latvian Literature (5, max. 15) VLPA Topics in Latvian literature, life, and civilization.

LATV 490 Supervised Reading (1-5, max. 10) VLPA Readings in a selected area of Latvian language, culture, or society.

Lithuanian

LITH 101 First Year Lithuanian 1 (5) VLPA Fundamentals of oral and written Lithuanian, including introductory study of literature, film, and other authentic texts. First in a sequence of three. Offered: A.

LITH 102 First Year Lithuanian 2 (5) VLPA Fundamentals of oral and written Lithuanian, including introductory study of literature, film, and other authentic texts. Second in a sequence of three. Prerequisite: LITH 101. Offered: W.

LITH 103 First Year Lithuanian 3 (5) VLPA Fundamentals of oral and written Lithuanian, including introductory study of literature, film, and other authentic texts. Third in a sequence of three. Prerequisite: LITH 102. Offered: Sp.

LITH 111 Basic Lithuanian (3) Covers the fundamentals of conversational Lithuanian language. Completion of all three quarters does not meet the foreign language requirement.

LITH 112 Basic Lithuanian (3) Covers the fundamentals of conversational Lithuanian language. Completion of all three quarters does not meet the foreign language requirement. Prerequisite: LITH 111.

LITH 113 Basic Lithuanian (3) Covers the fundamentals of conversational Lithuanian language. Completion of all three quarters does not meet the foreign language requirement. Prerequisite: LITH 112.

LITH 150 Intensive Lithuanian (15) Fundamentals of oral and written Lithuanian. Intensive practice in speaking, reading, and writing Lithuanian. Interactive classroom, computer-assisted learning, language, and reading laboratories. Emphasis on contemporary Lithuanian culture and society. If Lithuanian is the student's language of admission, only 10 credits count towards graduation.

LITH 201 Second-Year Lithuanian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. First in a sequence of three. Prerequisite: either LITH 103 or LITH 150.

LITH 202 Second-Year Lithuanian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Second in a sequence of three. Prerequisite: LITH 201.

LITH 203 Second-Year Lithuanian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Third in a sequence of three. Prerequisite: LITH 202.

LITH 250 Intensive Intermediate Lithuanian (15) VLPA Accelerated second-year Lithuanian. Systematic review of Lithuanian grammar. Intensive practice in conversation, reading, and writing. Prerequisite: either LITH 103 or LITH 150. Offered: S.

LITH 310 Topics in Lithuanian Literature and Culture (5, max. 15) VLPA Explores topics in Lithuanian literature, life, civilization. Recommended: LITH 203 Offered: AWSp.

LITH 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Lithuanian language, culture, or society.

Norwegian

NORW 101 First Year Norwegian 1 (5) VLPA Fundamentals of oral and written Norwegian, including introductory study of literature, film, and other authentic texts. First in a sequence of three. Offered: A.

NORW 102 First Year Norwegian 2 (5) VLPA Fundamentals of oral and written Norwegian, including introductory study of literature, film, and other authentic texts. Second in a sequence of three. Offered: W.

NORW 103 First Year Norwegian 3 (5) VLPA Fundamentals of oral and written Norwegian, including introductory study of literature, film, and other authentic texts. Third in a sequence of three. Offered: Sp.

NORW 150 Intensive First-Year Norwegian (15) Fundamentals of oral and written Norwegian. Intensive practice in speaking, reading, and writing. Interactive classroom, computer-assisted learning, language and reading laboratories. Emphasis on contemporary Norwegian culture and society. If Norwegian is the student's language of admission, only 10 credits count towards graduation.

NORW 199 Foreign Study: Elementary Norwegian (1-15, max. 15) Fundamentals of oral and written Norwegian.

NORW 201 Second-Year Norwegian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. First in a sequence of three.

NORW 202 Second-Year Norwegian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Second in a sequence of three.

NORW 203 Second-Year Norwegian (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Third in a sequence of three.

NORW 299 Foreign Study: Intermediate Norwegian (1-15, max. 15) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Discussion of culture and current events in Norway.

NORW 310 The Norwegian Short Story (5) VLPA Generic study of the Norwegian short story.

NORW 311 Drama after Ibsen (5) VLPA

NORW 312 Topics in Norwegian Literature and Culture (5, max. 15) VLPA Topics related to Norwegian literature, life, and civilization.

NORW 321 The Plays of Henrik Ibsen (5) VLPA Study of selected plays of Ibsen.

NORW 395 Foreign Study: Norwegian Area Studies (1-5, max. 10) I&S Courses in Norwegian history, society, and/or politics.

NORW 399 Foreign Study: Topics in Norwegian Literature and Culture VLPA (1-5, max. 15) VLPA Topics in Norwegian literature, life, and civilization.

NORW 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Norwegian language, literature, or related fields.

Scandinavian

SCAND 100 Introduction to Scandinavian Culture (5) VLPA/I&S The Scandinavian experience from the Viking Age to the present day; the background for contemporary Scandinavian democracy, with major emphasis on the cultural, political, and religious development of the Scandinavian countries.

SCAND 150 Norwegian Literary and Cultural History (5) VLPA A survey of Norwegian literary and cultural history from the Vikings to the present. Authors read include Bjornson, Ibsen, Hamsun, and Roolvaag.

SCAND 151 Finnish Literary and Cultural History (5) VLPA A survey of Finnish literature and cultural history during the nineteenth and twentieth centuries. Authors studied include Lonrot, Snellmann, Kivi, Sodergran, Linna, Haavikko, and Kaurismaki.

SCAND 152 Latvian Literary and Cultural History (5) VLPA *Grinberga* Survey of Latvian literary and cultural history from the nineteenth century to the present. Authors include Pumpurs, Rainis, Aspazija, Blaumanis, Nesaule, Bels, and Zalite.

SCAND 153 Introduction to Lithuanian Literary and Cultural History (5) VLPA *Valanciauskiene* Surveys Lithuanian literary and cultural history from the Medieval period to the present. Authors include Dauksa, Maironis, Biliunas, Ciurlionis, Boruta, Granauskas, Aputis, Vilimaite, Milosz, and others.

SCAND 154 Estonian Literary and Cultural History (5) VLPA *G. Smidchens* Surveys Estonian literary and cultural history from the prehistoric period to the present. Authors, musicians, artists, and filmmakers include Kaplinski, Koidula, Kreutzwald, Vilde, Part, Tormis, Meri, Parn, Pollu, and others. Offered: jointly with JSIS A 154; AWSpS.

SCAND 155 Danish Literary and Cultural History (5) VLPA *Hansen* Introduces the literary and cultural history of Denmark. Focuses on several major literary works and cultural moments from the Viking Age, the Enlightenment, nineteenth-century Romanticism, twentieth-century Modernism, and current Danish literature, journalism, and film.

SCAND 156 Introduction to Swedish Literary and Cultural History (5) VLPA *I. DUBOIS, A. GAVEL ADAMS* Introduction to modern Swedish literature, culture, and contemporary discourses on race, multiculturalism, gender equality, and LGBTI. Offered: WSp.

SCAND 200 Scandinavia Today (5) VLPA/I&S *C. INGEBRITSEN* Examines the distinctive policies, institutions, and social norms, and cultures of contemporary Scandinavian societies. Topics include: the development of a “middle way” between capitalism and socialism, the welfare state, social policy, Scandinavia in the international system, and contemporary debates about market deregulation and immigration. Course uses examples from policy debate and culture as objects of study.

SCAND 230 Introduction to Folklore Studies (5) VLPA/I&S *G. Smidchens* Folkloristics combines the methods and ideas of Literature Studies and Anthropology. Folktales (fairy tales), legends, jokes, songs, proverbs, customs and other forms of traditional culture are studied together with the living people and communities who perform and adapt them. Students learn the folklorist's methods of fieldwork (participant observation), ethnography, comparative analysis, and interpretation. Offered: jointly with C LIT 230; AWSpS.

SCAND 232 Hans Christian Andersen and the Fairy Tale Tradition (5) VLPA Influence of Hans Christian Andersen and the fairy tale on modern Scandinavian tales and stories. Investigates the significance of the fairy tale in the modern world, with attention to writers such as Isak Dinesen, Knut Hamsun, Villy Sorensen, William Heinesen.

SCAND 251 Holberg and His Comedies in English (2) VLPA Holberg and his major dramas, with attention to the comic tradition in the Scandinavian theatre.

SCAND 270 Sagas of the Vikings (5) VLPA Icelandic sagas and poetry about Vikings in the context of thirteenth-century society.

SCAND 275 Crime Scenes: Investigating the Cinema and Its Cultures (5) VLPA Teaches how to analyze film by closely studying crime scenes from historical and contemporary German and Scandinavian cinema. Directors studied include Fritz Lang, Carl Th. Dreyer, Billy Wilder, and Lars von Trier. Offered: jointly with GERMAN 275.

SCAND 280 Ibsen and His Major Plays in English (5) VLPA Reading and discussion of Ibsen's major plays.

SCAND 312 Masterpieces of Scandinavian Literature (5) VLPA Major works of Scandinavian literature by selected authors.

SCAND 315 Scandinavian Crime Fiction (5) VLPA *Nestingen* Studies Scandinavian crime-fiction literature and cinema since 1965, approaching crime fiction as a changing cultural artifact. Analyzes major issues and texts in the genre and its public status, while also training students in critical approaches to study of popular literature and culture. Offered: jointly with JSIS D 317; Sp.

SCAND 316 Child and School in Scandinavia (5) VLPA/I&S A. NESTINGEN The child and school in Scandinavia as constructed and represented in film and literature. Approaches child and school through key cultural examples and scholarly studies of these topics. Focal areas include changing historical notions of childhood and youth, schooling, the welfare state, and Finnish schools. Offered: Sp.

SCAND 326 Scandinavia in World Affairs (5) I&S C. INGEBRITSEN Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Includes a survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressures of interdependence. Offered: jointly with POL S 326.

SCAND 327 Women in Scandinavian Society (5) VLPA/I&S Examines the changing position of women in Norway, Denmark, Finland, and Sweden from the 1880s to the contemporary period. Readings in literature and political science.

SCAND 330 Scandinavian Mythology (5) VLPA Integrative study of religious life in the pre-Christian North. Emphasis on source materials, including the Prose Edda and Poetic Edda. Discussion of historical, archeological, and folkloric evidence.

SCAND 331 Folk Narrative (5) VLPA Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieux. Theory and history of folk narrative study, taxonomy, genre classification, and interpretative approaches. Offered: jointly with C LIT 331.

SCAND 334 Immigrant and Ethnic Folklore (5) VLPA/I&S Survey of verbal, customary, and material folk traditions in ethnic context. Theories of ethnic folklore research applied to the traditions of American communities of Scandinavian, Baltic, or other European ancestry. Offered: jointly with C LIT 334.

SCAND 335 Scandinavian Children's Literature (5) VLPA The history, forms, and themes of Scandinavian children's literature from H. C. Andersen to the present. Exploration of the dominant concerns of authors, adult and non-adult audiences, and the uses to which juvenile and adolescent literature are put. Film adaptations and Scandinavian-American materials included.

SCAND 340 Kalevala and the Epic Tradition (5) VLPA An interdisciplinary approach to the Finnish national epic Kalevala, Estonian Kalevipoeg, and Saami Peivebarnen suongah jehtanasan maajisn. Discussion of traditional worldview, cultural revitalization, and emergent nationalism in nineteenth- and twentieth-century Finland, Estonia, and Saamiland.

SCAND 341 Sami Culture and History (5) VLPA/I&S An interdisciplinary look at the culture of Sami (Lapp) people in Scandinavia from the earliest archeological and textual evidence to the present day. Focus on indigenous modes of expression and worldview, as well as contemporary cultural and political activism.

SCAND 344 The Baltic States and Scandinavia (5) I&S Survey of the cultures and history of Estonia, Latvia, and Lithuania from the Viking Age to the present, with particular attention to Baltic-Scandinavian contacts. Offered: jointly with JSIS A 344.

SCAND 345 Baltic Cultures (5) VLPA/I&S Cultures and peoples of Estonia, Latvia, and Lithuania. Baltic literature, music, art, and film in social and historical context. Traditional contacts with Scandinavia and Central and East Europe. Offered: jointly with JSIS A 345.

SCAND 350 Environmental Norms in International Politics (5) I&S *Ingebritsen* Surveys development of international environmental consciousness from 1960s to present. Models of "green development"; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with ENVIR 360/JSIS B 350.

SCAND 351 Scandinavia, the European Union, and Global Climate Change (5) I&S Reviews the history of climate change, the role of Swedish scientist Svante Arrhenius in defining greenhouse effects, Scandinavian policy response, and the role of the European Union in global climate change. Offered: jointly with JSIS A 351; WSp.

SCAND 360 Scandinavian Cinema (3/5) VLPA Major Scandinavian films and film directors from the 1920s to the present.

SCAND 361 Danish Cinema (5) VLPA Studies Danish Cinema from its first major director Carl Th. Dreyer to contemporary directors, such as Lars von Trier and Susanne Bier, as well as trends and forms, such as Art House, Popular Cinema, and TV-Series. Offered: AWSp.

SCAND 367 Sexuality in Scandinavia: Myth and Reality (5) VLPA/I&S Examines selected Scandinavian literary and socio-political texts, films, and art to manifest the reality behind the myths of sexual freedom in Scandinavia.

SCAND 370 The Vikings (5) VLPA/I&S Vikings at home in Scandinavia and abroad, with particular emphasis on their activities as revealed in archaeological finds and in historical and literary sources. Offered: jointly with HSTAM 370.

SCAND 380 History of Scandinavia to 1720 (5) I&S Scandinavian history from the Viking Age to 1720, with an emphasis on the political, social, and economic development of Denmark, Norway, Sweden, Finland, and Iceland from the Middle Ages to the Enlightenment. Offered: jointly with HSTEU 380.

SCAND 381 History of Scandinavia Since 1720 (5) I&S Scandinavian history from the Enlightenment to the Welfare State with emphasis on the political, social, and economic development of the modern Scandinavian nations of Denmark, Norway, Sweden, Finland, and Iceland. Offered: jointly with HSTEU 381.

SCAND 399 Foreign Study in Scandinavia (1-5, max. 20) Pan-Scandinavian coursework in Scandinavia, including courses in English.

SCAND 402 International Political Economy and Scandinavia (5) I&S Overview of the most prominent theoretical approaches to the study of international political economy. Evaluates competing theories and applies these to explain contemporary problems in international political economy. Readings include examples from Scandinavia's experience.

SCAND 427 Scandinavian Women Writers in English Translation (5) VLPA, DIV Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present with focus on feminist issues in literary criticism. Offered: jointly with GWSS 429.

SCAND 430 Readings in Folklore (5) VLPA Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Offered: jointly with C LIT 430.

SCAND 431 The Northern European Ballad (5) VLPA Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, theory, genre classification, and interpretive approaches. Offered: jointly with C LIT 431.

SCAND 437 Politics in Scandinavia (5) I&S C. INGEBRITSEN Twentieth-century politics in Scandinavia. How Scandinavian countries have been governed. Costs and consequences of their governmental style and its uncertain future. Optimal size of polities, problems of mature welfare states, process of leadership and representation in multiparty systems, decline of political parties. Offered: jointly with POL S 437.

SCAND 445 War and Occupation in Northern Europe: History, Fiction, and Memoir (5) VLPA/I&S, DIV The study of literary representations (fiction, memoirs, and personal

narratives) dealing with World War II and the occupation of the Nordic and Baltic countries. Offered: jointly with JSIS A 442.

SCAND 450 Scandinavian Literary History (3) VLPA Survey of Scandinavian literary history.

SCAND 454 Baltic History (5) I&S Overview of the history of the area occupied by the Baltic countries of Latvia, Lithuania, and Estonia. Emphasizes their emergence as modern European nation-states. Era from World War I to present treated in depth, including the historical role and present situation of non-Baltic peoples, particularly Russians. Offered: jointly with HSTEU 454.

SCAND 455 Baltic Politics and Society Today (5) I&S *G. Smidchens* Intensive interdisciplinary survey of current social, political, and economic developments in Estonia, Latvia, and Lithuania. Offered: jointly with JSIS A 455; AWSp.

SCAND 460 History of the Scandinavian Languages (5) VLPA Development of languages from common Scandinavian to contemporary Danish, Norwegian, Swedish, Faroese, and Icelandic.

SCAND 462 Isak Dinesen and Karen Blixen (5) VLPA The fiction of Isak Dinesen (pseudonym for Karen Blixen) reevaluated in light of current issues in literary criticism, particularly feminist criticism. Close readings of selected tales, essays, and criticism. Offered: jointly with GWSS 462.

SCAND 465 Translation Workshop in Nordic and Baltic Languages (5) VLPA Examines translation theories and good practices within the field of translation. Introduces the most common translation tasks within pragmatic text translation and literary translation. Provides students opportunities to strengthen their professional skill set and get feedback from professional translators. Language of instruction and target language for translations is English.

SCAND 470 Scandinavian Auteurs (5, max. 10) VLPA *Nestingen* Studies the body of work of Scandinavia's auteur filmmakers. Introduces the theory and history of auteur cinema, with special attention to Scandinavian filmmakers' contribution. Offered: jointly with C LIT 474; AWSp.

SCAND 479 Eco-Capitalism (5) I&S *Ingebritsen* Explores the idea of environmentalism and sustainability across societies. Compares and contrasts how prominent authors in the field assess the risks and opportunities of human effects on climate and ecology. Questions explored include: will ecological solutions be critical to the revival of the global economy? Why do place such as Europe adapt more readily to environmental challenges? Offered: jointly with JSIS A 429.

SCAND 480 Kierkegaard and Decadence in European Literature (5) VLPA Reading and discussion of core texts by Søren Kierkegaard, as well as a consideration of the relationship between Kierkegaardian thought and the literary practice of various writers of Scandinavian and European decadence. Offered: jointly with JSIS A 480.

SCAND 481 August Strindberg and European Cultural History (5) VLPA/I&S Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and history of ideas from 1880 to 1912, and Strindberg's influence on twentieth-century drama and film. Offered: jointly with JSIS A 481.

SCAND 482 Knut Hamsun and Early European Modernism (5) VLPA Reading and discussion of significant novels by Knut Hamsun, whose oeuvre is considered in the context of works by other European modernist writers. Offered: jointly with JSIS A 482.

SCAND 490 Special Topics (1-5, max. 15) Special topics in Scandinavian art, literature, culture, and history. Course offerings based on instructor's specialty and student demand.

SCAND 495 Foreign Study: Research Project (1-5, max. 10) Research on approved topic.

SCAND 498 Senior Essay (5) VLPA Undergraduate research and the writing of a senior essay in Scandinavian area studies.

SCAND 499 Independent Study or Research (1-5, max. 10) Independent study or research in Scandinavian area studies. May be done in a Scandinavian language or in English.

SCAND 500 Introductory Readings in Old Icelandic (5) Systematic study of the grammatical structure of Old Icelandic and the reading of several short prose works.

SCAND 501 Old Icelandic Language and Literature (5) Reading of a major work in Old Icelandic literature as a vehicle for discussions about literary history and genre, narrative, and rhetorical strategies.

SCAND 503 Methods of Scandinavian Studies (5) Introduction to Scandinavian studies on the graduate level with emphasis on Scandinavian literature, folklore, history, and politics.

SCAND 504 Contemporary Literary Theory (5) Contemporary literary theory and its application to Scandinavian texts. Prerequisite: graduate student standing or permission of instructor.

SCAND 505 Topics in Scandinavian Drama and Film (5, max. 15) Seminar on a selected topic in Scandinavian drama or film, such as an author (Holberg, Ibsen, Strindberg, Bergman), a period, a genre, or a movement.

SCAND 508 Topics in Scandinavian Prose (5, max. 15) Seminar on various topics in Scandinavian prose, including shorter prose texts, as well as a selection of the significant novels of the nineteenth and twentieth centuries.

SCAND 515 Pre-Nineteenth-Century Scandinavian Literature (5) Seminar on Scandinavian literature of the sixteenth, seventeenth, and eighteenth centuries.

SCAND 518 Foreign Language Teaching Methodology (2) *Brandl* Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with GERMAN 518/SLAVIC 518; A.

SCAND 519 Modern Scandinavian Politics (5) Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with POL S 519.

SCAND 520 Topics in Scandinavian Poetry (5, max. 15) Seminar on selected periods of Scandinavian poetry: romanticism, symbolism, modernism, and contemporary poetry. Poetry examined in relation to the literary canon of each country and to Scandinavian literature as a whole. International influences also discussed.

SCAND 525 Topics in Scandinavian History (5, max. 15) Seminar on selected topics in Scandinavian history.

SCAND 530 Old Norse Literature (3) Studies in the poetry and prose tradition of medieval Iceland and Norway.

SCAND 533 Interdisciplinary Approaches to Community in Scandinavia (5) Humanistic examination of community creation, maintenance, and change in the Nordic region. Examples drawn from folklore, literature, activism, popular culture, history. Focus on issues of gender, belief, and art in relation to community. Coursework includes both individual and collaborative assignments.

SCAND 543 Folk Literature (5) *G. Smidchens* This course surveys theories and methods for interpreting folk literature (folk tales and legends) in a variety of contexts, from oral performance through modern literary and film adaptations.

SCAND 565 Translation Workshop in Nordic and Baltic Languages (5) Examines translation theories and good practices within the field of translation. Introduces the most common translation tasks within pragmatic text translation and literary translation. Provides students opportunities to strengthen their professional skill set and get feedback from professional translators. Language of instruction and target language for translations is English.

SCAND 570 Scandinavian Auteurs (5, max. 10) *VLPA Nestingen* Seminar on auteur filmmakers in Scandinavian cinema, studying specific auteurs' bodies of work, theories of auteur cinema, and the history of auteurism in Scandinavian cinema. Offered: jointly with C LIT 574; AWSp.

SCAND 579 Eco-Capitalism (5) *Ingebritsen* Explores the idea of environmentalism and sustainability across societies. Compares and contrasts how prominent authors in the field assess the risks and opportunities of human effects on climate and ecology. Questions explored include:

will ecological solutions be critical to the revival of the global economy? Why do place such as Europe adapt more readily to environmental challenges? Offered: jointly with JSIS A 529.

SCAND 580 Kierkegaard and Decadence in European Literature (5) *Sjavik* Examines Kierkegaardian thought and the literary practice of various writers of Scandinavian and European decadence. Offered: Sp.

SCAND 581 August Strindberg and European Cultural History (5) *Adams* Seminar on Swedish dramatist, novelist, scientist, and painter August Strindberg (1849-1912), on of Europe's most influential artists, and on of the most important innovators of modern drama. Offered: Sp.

SCAND 582 Knut Hamsun and Early European Modernism (5) *Sjavik* Examines Knut Hamsun's early works and their relationship to early European modernist literature. Offered: W.

SCAND 590 Special Topics in Scandinavian Literature (1-5, max. 15)

SCAND 594 Modern Methods and Materials in Teaching Scandinavian and Baltic Languages (3) Theory and practice of communicative language teaching; current developments in foreign-language teaching; evaluation of teaching materials; includes attendance at the departmental and university-wide fall orientation; required for beginning teaching assistants of Scandinavian and the Baltic languages. May not be taken for credit if GRDSCH 615 already taken. Prerequisite: SCAND 518. Credit/no-credit only.

SCAND 595 Teaching Assistant Workshop (1) Focuses on topics in language pedagogy. Required for continuing teaching assistants in Scandinavian studies. Includes participation in the departmental and University-wide fall orientation teaching workshops. Prerequisite: SCAND 518; SCAND 594. Instructors: Brandl Credit/no-credit only. Offered: A.

SCAND 600 Independent Study or Research (*-) Prerequisite: permission of instructor.

SCAND 700 Master's Thesis (*-)

SCAND 800 Doctoral Dissertation (*-)

Swedish

SWED 101 First Year Swedish 1 (5) VLPA Fundamentals of oral and written Swedish, including introductory study of literature, film, and other authentic texts. First in a sequence of three. Offered: A.

SWED 102 First Year Swedish 2 (5) VLPA Fundamentals of oral and written Swedish, including introductory study of literature, film, and other authentic texts. Second in a sequence of three. Prerequisite: SWED 101 Offered: W.

SWED 103 First Year Swedish 3 (5) VLPA Fundamentals of oral and written Swedish, including introductory study of literature, film, and other authentic texts. Third in a sequence of three. Prerequisite: SWED 102 Offered: Sp.

SWED 150 Intensive First-year Swedish (15) Fundamentals of oral and written Swedish. Intensive practice in speaking, reading, and writing. Interactive classroom, computer-assisted learning, language and reading laboratories. Emphasis on contemporary Swedish culture and society. If Swedish is the student's language of admission, only 10 credits count towards graduation.

SWED 199 Foreign Study: Elementary Swedish (1-15, max. 15) Fundamentals of oral and written Swedish.

SWED 201 Second-year Swedish (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. First in a sequence of three.

SWED 202 Second-year Swedish (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Second in a sequence of three.

SWED 203 Second-year Swedish (5) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Third in a sequence of three.

SWED 299 Foreign Study: Intermediate Swedish (1-15, max. 15) VLPA Intensive practice in speaking, reading, and writing. Functional review of grammar. Discussion of culture and current events in Sweden.

SWED 300 Swedish Women Writers (5) VLPA Readings from works by Swedish women writers.

SWED 301 Topics in Swedish Literature and Culture (5, max. 15) VLPA Topics in Swedish literature, life, and civilization.

SWED 302 The Swedish Novel (5) VLPA Selected works by novelists of the nineteenth and twentieth centuries.

SWED 352 Strindberg and His Works (5) VLPA Representative short stories, dramas, autobiographical works, poems, and one novel.

SWED 395 Foreign Study: Swedish Area Studies (1-5, max. 10) I&S Courses in Swedish history, society, and/or politics.

SWED 399 Foreign Study: Topics in Swedish Literature and Culture (1-5, max. 15) VLPA Topics in Swedish literature, life, and civilization.

SWED 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Swedish language, literature, or related fields.

SWED 510 Graduate Level Proficiency in Swedish (2-5, max. 15) Advanced training in graduate level proficiency in Swedish. Prerequisite: 15 credits of 300-400 level SWED courses. Instructors: Adams, Dubois Offered: AWSpS.

Slavic Languages and Literatures

Department Overview

Padelford A210

Slavic languages and literatures include the principal East European languages and literatures as well as Slavic linguistics. Languages include Bosnian/Croatian/Serbian, Bulgarian, Czech, Georgian, Polish, Romanian, Russian, Slovene, and Ukrainian.

Undergraduate Program

Adviser

A210H Padelford, Box 354335

206-543-6848

slavicadv@uw.edu

The Department of Slavic Languages and Literatures offers the following programs of study

- The Bachelor of Arts degree with a major in Slavic languages and literatures with options in Russian language, literature, and culture; and Eastern European languages, literatures, and culture
- Minors in Russian language, Russian literature/Slavic literatures, and Slavic languages

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Russian. Courses that develop writing skills.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Russian Language, Literature, and Culture Option (Minimum 50 credits):

1. RUSS 322, RUSS 323
2. RUSS 403
3. RUSS 451
4. Courses from an approved list of electives to reach 50 credits. See adviser for approved list. No more than 15 credits from the following may apply: RUSS 303, RUSS 350 (only

5 credits of RUSS 350 may apply), RUSS 401, RUSS 402. Maximum 5 credits at the 100 level.

5. Minimum 50% of credits applied to the major taken at the 300 or 400 level
6. Minimum 2.0 grade for each course and minimum 2.50 GPA for all UW and transfer courses presented for this option
7. Minimum 15 graded credits presented for this option must be completed through the UW

Eastern European Languages, Literature, and Culture Option (Minimum 50 credits):

1. Principal Eastern European language to include one of the following: BCS 406, BCS 410, BULGR 406, CZECH 406, POLSH 406, ROMN 406, SLVN 406, UKR 406
2. SLAVIC 351 (5 credits)
3. Courses selected from preceding principal Eastern European language courses or from an approved list of electives to reach 50 credits. See adviser for approved list. Maximum 5 credits at the 100 level.
4. Minimum 50% of credits applied to the major taken at the 300 or 400 level
5. Minimum 2.0 grade in each course and minimum 2.50 cumulative GPA for all UW and transfer courses presented for this option.
6. Minimum 15 graded credits presented for this option must be completed through the UW.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements:

Russian Language:

1. Minimum 25 credits to include one of the following: RUSS 303, RUSS 350, RUSS 401, RUSS 402, RUSS 403, RUSS 450.
2. Courses selected from preceding Russian language courses or from an approved list of electives to reach 25 credits. See adviser for approved list. Maximum 5 credits allowed at the 100-level.
3. Minimum 2.0 grade in each course presented for the minor.
4. Minimum 15 graded credits presented for the minor must be completed through the UW.

Russian Literature/Slavic Literatures:

1. Minimum 25 credits to include RUSS 322, RUSS 323, and 15 credits from an approved list of electives. See adviser for approved list. Maximum 5 credits allowed at the 100-level.
2. Minimum 2.0 grade in each course presented for the minor.
3. Minimum 15 graded credits presented for the minor must be completed through the UW.

Slavic Languages:

1. Minimum 25 credits to include one of the following as a principal Eastern European language: BCS 406, BCS 410 (10 credits), BULGR 406, CZECH 406, POLSH 406, ROMN 406, SLVN 406, UKR 406.
2. SLAVIC 351.
3. Courses selected from the preceding principal Eastern European language courses or from an approved list of electives to reach 25 credits. See adviser for approved list. Maximum 5 credits allowed at the 100-level.
4. Minimum 2.0 grade in each course presented for the minor.
5. Minimum 15 graded credits presented for the minor must be completed through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduating majors in Slavic languages and literatures have a solid command of the Slavic language of focus, with speaking, listening, reading, writing, and translation skills at the intermediate high or advanced level. They have a broad knowledge of the history of the relevant country, and of its modern culture. Students have a general knowledge of major periods and literature and detailed knowledge of two or three particular authors or genres. Students have a good understanding of Slavic languages in general and the language of their specialization in particular, as well as knowledge of major issues in contemporary phonology, morphology, and syntax. All students develop good general analytical skills and the ability to explore and understand another culture through mastery of its language.
- *Instructional and Research Facilities:* UW Language Learning Center
- *Honors Options Available:* Dobro Slovo membership is available to qualifying students (see adviser for requirements). With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Undergraduates may present their current research at the annual Slavic Student Symposium each spring. Suzzallo Library holdings include some 400,000 titles in Slavic languages and in other languages on Slavic subjects. The library subscribes to all important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles on microfilm and microfiche.

- *Department Scholarships:* Vadim Pahn Scholarship for continued study of Russian in an intensive summer language program; Asante Outstanding Paper Prize for the best undergraduate paper written in a Slavic Department course; Polish Studies Scholarship awarded for study in Poland of the Polish language and culture.
- *Student Organizations/Associations:* Rodnoi Ugolok, the Russian student society; Ukrainian Students United, the Ukrainian student society.

Graduate Program

Graduate Program Coordinator
A210C Padelford, Box 354335
206-543-6848
slavicadv@uw.edu

The department offers the master of arts and doctor of philosophy degrees in Russian and East European languages, literatures, and cultures. Languages include Czech, Old Church Slavonic, Polish, Russian, and Bosnian/Croatian/Serbian.

The master's degree takes four to six quarters and the doctoral degree three additional years. Duration of each program, however, depends on the student's preparation upon entrance to the program.

Master of Arts

Admission Requirements

1. Bachelor's degree in Russian or Slavic studies, to include four years of Slavic language.
2. Conditional admission may be granted to those with equivalent experience and basic coursework. Students with three years of language who enroll in fourth-year summer intensive Russian are considered.
3. Diagnostic language test to establish level of proficiency.

Degree Requirements

Minimum 45 credits

1. Slavic core courses: 10 credits from the following: RUSS 501, RUSS 502, SLAVIC 501, SLAVIC 519
2. Slavic linguistics courses: 10 credits from the following: SLAVIC 550, SLAVIC 551, SLAVIC 570
3. Slavic literature courses (10 credits): RUSS 542, RUSS 543
4. Second Slavic language, (5 credits): one of the following: BCS 403, BULGR 403, CZECH 403 or POLSH 403 (implies completion of 401 and 402 in the relevant language)
5. Elective courses, 10 credits from above or from the following: BCS 406, BCS 420, CZECH 406, CZECH 420, POLSH 406, POLSH 420, RUSS 420, RUSS 421, RUSS 422,

RUSS 423, RUSS 425, RUSS 426, RUSS 430, RUSS 512, RUSS 520, RUSS 521, RUSS 522, RUSS 523, RUSS 526, RUSS 570, RUSS 577, SLAVIC 420, SLAVIC 423, SLAVIC 425, SLAVIC 426, SLAVIC 470, SLAVIC 490, SLAVIC 520, SLAVIC 561, SLAVIC 562, SLAVIC 563, SLAVIC 565, SLAVIC 566, UKR 420

Examinations

- *Russian Language*
- *Other Slavic Languages*
- *MA Comprehensive Examinations*

Doctor of Philosophy

Admission Requirements

MA or equivalent degree. Students are admitted on the basis of language skills (Slavic and English), general background in Slavic cultures, and a comprehensive statement of purpose.

Degree Requirements

Minimum 90 credits

1. Minimum 90 credits, including graduate credits taken toward the MA degree. See Supervisory Committee chair for course planning.
2. Minimum one full year residence through the UW
3. Comprehensive examinations to include language reading ability, written field examinations, and a general oral examination
4. Dissertation: three quarters of SLAVIC 800, followed by dissertation defense

Research Facilities

Suzzallo Library holdings include some 400,000 titles in Slavic languages and other languages on Slavic subjects. The library subscribes to important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles.

Assistantship Opportunities

The department offers teaching assistantships and several other types of fellowships.

Course Descriptions

Bosnian/Croatian/Montenegrin/Serbian

BCMS 401 First Year Bosnian/Croatian/Montenegrin/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, Montenegrin, and Serbian. First in a sequence of three. Offered: A.

BCMS 402 First Year Bosnian/Croatian/Montenegrin/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, Montenegrin, and Serbian. Second in a sequence of three. Prerequisite: BCMS 401, which may be taken concurrently during summer quarter. Offered: W.

BCMS 403 First Year Bosnian/Croatian/Montenegrin/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, Montenegrin, and Serbian. Third in a sequence of three. Prerequisite: BCMS 402 Offered: Sp.

BCMS 404 Second-Year Bosnian/Croatian/Montenegrin/Serbian (5) VLPA Continuation of BCMS 401, BCMS 402, BCMS 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories in Bosnian, Croatian, Montenegrin, and Serbian. First in a sequence of three. Prerequisite: minimum grade of 2.0 in BCMS 403. Offered: A.

BCMS 405 Second-Year Bosnian/Croatian/Montenegrin/Serbian (5) VLPA Continuation of BCMS 401, BCMS 402, BCMS 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories in Bosnian, Croatian, Montenegrin, and Serbian. Second in a sequence of three. Prerequisite: minimum grade of 2.0 in BCMS 404. Offered: W.

BCMS 406 Second-Year Bosnian/Croatian/Montenegrin/Serbian (5) VLPA Continuation of BCMS 401, BCMS 402, BCMS 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories in Bosnian, Croatian, Montenegrin, and Serbian. Third in a sequence of three. Prerequisite: minimum grade of 2.0 in BCMS 405. Offered: Sp.

BCMS 410 Intensive Third Year Bosnian/Croatian/Montenegrin/Serbian (10) VLPA B. *Belic* Advanced grammatical exercises and listening, reading, and writing skills development. Emphasis on strengthening of conversational and presentational competence. Prerequisite: BCMS 406 Offered: A.

RUSS 523 Russian Literature of the Twentieth Century (5) Survey of twentieth-century Russian poetry and prose. Pre-revolutionary, Soviet, and emigre authors, trends, and genres. Includes survey of twentieth-century literary criticism as well, in particular Russian formalists and Mikhail Bakhtin.

RUSS 526 Modern Russian Literary, Cultural, and Film Studies (5, max. 15) Modern literature and film. Topics include post-colonialism, gender, reflections of social upheavals, artistic experimentation, issues of commercialism in art, search for new cultural expressions and identity. Readings in both Russian and English. Offered: Sp.

RUSS 542 Seminar in Russian Poetry (5, max. 20) One specific problem or theme in Russian poetry, seen in its widest possible dimensions. Students read, in Russian, the literary works involved and become familiar with the social, historical, and philosophical backgrounds that inspire them.

RUSS 543 Seminar in Contemporary Russian Prose (5, max. 20) Analysis of Russian prose fiction. Selected authors and topics.

RUSS 554 History of the Russian Literary Language (5) Russian literary language from the eleventh through the twentieth centuries, with special attention to syntax and lexicon and to the development of notions of literary styles. Offered in Russian. Prerequisite: SLAV 565, or permission of instructor.

RUSS 570 Research Seminar in Russian Literature (5, max. 40) Working in consultation with a faculty adviser, students formulate a topic and prepare a 30-minute oral presentation to be delivered at the seminar and submit a written paper to be read and critiqued by all participants.

RUSS 577 Russian Folk Literature (5) Examines the artistic forms, varieties, and themes of the Russian folktale, its roots in pre-Christian Slavic religion, connections with myth and legend, adaptation for Soviet and modern Russian literature, film, and music.

RUSS 600 Independent Study or Research (*-)

Slavic Languages and Literatures

SLAVIC 101 Slavic Lands and Peoples (5) I&S Introduces students to basic concepts regarding the whole body of present-day Slavs as well as the area inhabited by or under the influence of present-day Slavs. Uses latest achievements in technology and in social media advancements to retrieve relevant information from present-day Slavs themselves. Taught in English.

SLAVIC 110 The Slavic Languages (5) VLPA Introduces the basic concepts of Slavic linguistics. Addresses the origin of the Slavs and major stages of their linguistic history. Considers Slavic languages and their peculiarities in detail. Taught in English.

SLAVIC 130 Introduction to Slavic Culture and Civilization (5) VLPA Examines the culture of the Slavs, an ethno-linguistic group of peoples living primarily in Central/Eastern Europe. Among nations investigated: the Czech Republic, Russia, Poland, and Ukraine. Students gain a fundamental grasp of major issues and historical events of this region, expressed through culture. Offered: jointly with JSIS A 130.

SLAVIC 175 The Slavic Text and Its Context (2) VLPA A contextual study of a significant work or intellectual movement from a Slavic culture. Study includes literature, film, music, or art. Credit/no-credit only.

SLAVIC 200 Introduction to Slavic Literature (5) VLPA *G. CRNKOVIC* Introduces major Slavic literary works of different types (stories, novels, poetry), mostly from the 20th and 21st century, focusing on the intense “close reading” of these texts that identifies their main literary features. Excellent beginning training for the informed reading of any kind of literature. Taught in English.

SLAVIC 210 Introduction to Bilingualism (5) VLPA/I&S *K. DZIWIWIREK* A multidisciplinary examination of bilingualism as a societal and individual phenomenon. Considers language versus dialect, diglossia, state language policies, language rights, indigenous languages, and linguistic minorities. Explores bilingualism and biculturalism as human experience and as indexes of identity and diversity. Includes a fieldwork project focused on linguistic diversity in the Pacific Northwest. Offered: W.

SLAVIC 223 East European Cinema (5, max. 20) VLPA Emphasizes international cultural, artistic, and historical diversity by introducing select contemporary Eastern European film directors. Focuses on a single filmmaker and studies his/her opus in depth, both in his/her Eastern European country of origin and abroad. Special attention paid to Eastern European filmmakers in Hollywood.

SLAVIC 320 The Other Europe: Post-World War II East European Fiction (5) VLPA *Crnkovic* Introduces post-WWII Eastern European fiction created during and after the communist era, both in Eastern European countries and in exile. Includes works by Polish, Czech, Yugoslav, post-Yugoslav, Hungarian, and Baltic writers. Taught in English.

SLAVIC 323 Masterpieces of East European Cinema (5) VLPA *Crnkovic* Studies aesthetically most interesting films from Eastern Europe from the 1950s to present. Includes select films by Polish film icon Andrzej Wajda, the Czech 1960s New Wave, the Zagreb School of Animated Film, works by Eastern European women directors, as well as more recent internationally awarded and acclaimed films.

SLAVIC 351 Introduction to the History of Slavic Languages (5) VLPA History of Slavic languages from Indo-European to present time, including development of writing systems and

national languages. Principles of historical linguistics: sound change, analogy, semantic change, as well as relevance of historical linguistics to our knowledge of human development, ancestral culture, etc. Prerequisite: either SLAVIC 110, LING 200, or LING 400. Offered: Sp.

SLAVIC 370 What is in a Language Name? The Case of Bosnian, Croatian, Montenegrin, and Serbian (5) VLPA Examines diverse phenomena related to the language known as Serbo-Croatian, and to the Bosnian, Croatian, Montenegrin, and Serbian languages. Explores concepts such as language death, birth, politics, standardization, and codification. The relation between dialect and language is observed in an ecology exhibiting ethnic and religious diversity.

SLAVIC 401 Research Methods and Writing (2) Introduces writing and research in Slavic studies. Students review secondary literature in their chosen fields, rewrite and revise their own work to bring it up to discipline standard, and work collaboratively to evaluate their own work and that of their peers.

SLAVIC 423 East European Film (5, max. 15) VLPA *Crnkovic* Studies major East European film makers who left their countries at some point in their careers. Compares East European and Western production of those directors who worked partially in the West. Offered: jointly with CMS 423.

SLAVIC 425 Ways of Meaning: Universal and Culture Specific Aspects of Language (5) VLPA/I&S, DIV K. *Dziwirek* Focuses on the diversity of human experience and the social and cultural conditioning of language use. Language as a mirror of culture and national character. Universal and culture/language specific components in linguistic expression of emotions, courtesy/politeness and rudeness, prejudice and (in)sensitivities, linguistic expression of gender differences in different cultures. Offered: Sp.

SLAVIC 426 Ways of Feeling: Expressions of Emotions Across Languages and Cultures (5) I&S/VLPA K. *DZIWIWREK* Investigate the diversity of human experience by focusing on culture specific aspects of linguistic expression of emotion. Examination of the meaning and form of emotion words in different languages, facial expressions, cultural attitudes to emotion and emotional behavior, and gender-specific emotional expressions.

SLAVIC 470 Special Topics in Slavic Linguistics (3-5, max. 15) VLPA *Augerot, Belic, Dziwirek* Special topics in Slavic linguistics. Course offerings based on instructor's specialty and student demand. Offered: AWSp.

SLAVIC 481 East European Language in Eastern Europe (1-5, max. 45) VLPA Daily work in phonetic, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAVIC 482 Research Project in Eastern Europe (3, max. 15) VLPA Supervised research in student's selected area of concentration, combined with language instruction tailored to the student's field. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAVIC 483 East European Literature in Eastern Europe (3, max. 15) VLPA Selection of courses on specialized topics in East European literature; specific authors or periods. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAVIC 486 East European Culture in Eastern Europe (3, max. 15) VLPA Lectures on various aspects of Eastern European culture, complemented by visits to places of cultural historical interest. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAVIC 490 Studies in Slavic Literatures (3-5, max. 15) VLPA Topics vary.

SLAVIC 498 Senior Honors Thesis ([3-9]-, max. 9) VLPA Directed research on a topic approved by department for a thesis presented in partial fulfillment of requirement for degrees “With College Honors” or “With Distinction.” Offered: AWSpS.

SLAVIC 499 Directed Study or Research (1-5, max. 15) Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literatures office. Prerequisite: permission of instructor and undergraduate adviser. Offered: AWSpS.

SLAVIC 501 Using Slavic Resources (2) Introduction to graduate studies in Slavic languages, literatures, and cultures. Discusses field of study and research materials and techniques employed.

SLAVIC 518 Foreign Language Teaching Methodology (2) *Brandl* Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with GERMAN 518/SCAND 518; A.

SLAVIC 519 Slavic Language Pedagogy (3, max. 6) *Augerot, Belic* Introduction to current issues of foreign language pedagogy. Concentrates on the practical classroom application of methodological theory through lectures and micro-teaching presentation. Topics discussed and practiced include testing, proficiency teaching, teaching listening and reading skills, writing, teaching grammar, and computers. Offered: A.

SLAVIC 520 New Trends in Literary Theory (5) *Crnkovic* Explores recent theoretical trends which no longer search for a unified theoretical meta-narrative (i.e., post-structuralism or new historicism), but instead explore various literary genres (such as diary or fictional book reviews) and texts as the primary terrain of theory. Bakhtin, Lem, Bruns, Corradi-Fiumara, Crnkovic, and others.

SLAVIC 550 Synchronic Slavic Linguistics (5) Linguistic analysis of the phonology, morphology, and syntax of Russian and other Slavic languages. Investigation of current theoretical work in these areas.

SLAVIC 551 Introduction to the History of Slavic Languages (5) History of Slavic languages from Indo-European to present time, including development of writing systems and national languages. Principles of historical linguistics: sound change, analogy, semantic change, as well as relevance of historical linguistics to our knowledge of human development, ancestral culture, etc. Prerequisite: either SLAVIC 110, LING 200, or LING 400. Offered: Sp.

SLAVIC 561 History of the East Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the Ukrainian and Byelorussian literary languages.

SLAVIC 562 History of the West Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of literary Polish, Czech, Slovak, and Upper and Lower Sorbian languages.

SLAVIC 563 History of the South Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the South Slavic languages.

SLAVIC 565 Old Church Slavic (5) Rise and development of earliest Slavic literary language and a descriptive study of its orthography, phonology, morphology, and syntax. Readings from normalized texts.

SLAVIC 566 Readings in Old Church Slavic (4) Reading and grammatical interpretation of a selected group of canonical texts, as well as some examples of the various later recensions of Old Church Slavonic. Prerequisite: SLAVIC 565.

SLAVIC 570 Special Topics in Slavic Linguistics (3-5, max. 15) Investigation and discussion of special topics in Slavic linguistics.

SLAVIC 600 Independent Study or Research (*-)

SLAVIC 800 Doctoral Dissertation (*-)

Slovenian

SLVN 401 Introductory Slovene Language (3/5) Introduction to spoken and written Slovene language. First in a two course sequence. Prerequisite: either BCS 403, BULGR 403, CZECH 403, GERMAN 103, ITAL 103, POLISH 403, ROMN 403, RUSS 103, RUSS 150, UKR 403, or status as a heritage speaker of Slovene. Instructors: Biggins

SLVN 402 Introductory Slovene Language (3/5) Introduction to spoken and written Slovene language. Second in a two course sequence. Prerequisite: SLVN 401. Instructors: Biggins

SLVN 404 Second-Year Slovene Language (3/5) Reinforces and expands foundational knowledge of Slovene language through grammatical topics and exercises, reading of authentic

texts, composition, listening, oral presentations, and conversation. Prerequisite: SLVN 402. Instructors: Biggins

SLVN 406 Second-Year Slovene Language II (3-5) VLPA Consolidates knowledge of Slovene language through advanced grammatical topics, exercises, reading, composition, listening, and conversation. Prerequisite: SLVN 404. Instructors: Biggins

SLVN 499 Directed Study in Slovene (1-5, max. 15) Biggins Individual study of topics in Slovene culture, linguistics, or current affairs to meet specific needs, based primarily on readings of undapated Slovene texts. Offered: A WS p.

Ukrainian

UKR 320 Introduction to Ukrainian Literature and Culture (5) VLPA Provides an overview of Ukrainian culture: literature, film, music, theatre, art, and architecture, as well as an introduction to Ukrainian cultural life. Taught in English.

UKR 401 First-Year Ukrainian (5) Introduction to spoken and written Ukrainian. First in a sequence of three.

UKR 402 First-Year Ukrainian (5) Introduction to spoken and written Ukrainian. Second in a sequence of three. Prerequisite: UKR 401, which may be taken concurrently.

UKR 403 First-Year Ukrainian (5) Introduction to spoken and written Ukrainian. Third in a sequence of three. Prerequisite: UKR 402, which may be taken concurrently.

UKR 404 Second-Year-Ukrainian (5) VLPA Continuation of UKR 401, UKR 402, UKR 403. Reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns. Prerequisite: Minimum grade of 2.0 in UKR 403 Offered: A.

UKR 405 Second-Year-Ukrainian (5) VLPA Continuation of UKR 404. Reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns. Prerequisite: minimum grade of 2.0 in UKR 404 Offered: W.

UKR 406 Second-Year-Ukrainian (5) VLPA Continuation of UKR 405. Reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns. Prerequisite: minimum grade of 2.0 in UKR 405 Offered: Sp.

UKR 420 Literature, Film, and Culture of Ukraine (5) VLPA Representative prose works by leading Ukrainian authors. Shows originality of Ukrainian literature through acquaintance with the peculiar historical and political situation of Ukraine. Offered in English.

Sociology

Department Overview

211 Savery

The Department of Sociology has a strong commitment to research, publication, and training and is dedicated to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

Undergraduate Program

Adviser

203 Savery Hall, Box 353340

206-543-5396

asksoc@uw.edu

The Department of Sociology offers the following program of study

- The Bachelor of Arts degree with a major in sociology

Bachelor of Arts

Suggested First- and Second-Year College Courses: SOC 110, SOC 212, SOC 240, SOC 270, or any 200-level sociology courses. General coursework developing critical thinking or analytical skills.

Department Admission Requirements

1. Introductory courses (10 credits): SOC 300 (may be in progress at time of application). Any additional 5 credit sociology course.
2. Minimum 2.0 grade for completed course(s) required for admission. Minimum 2.00 cumulative UW GPA.
3. Application: See department website for information required as part of application packet. Exceptions based on special circumstances are reviewed on a case-by-case basis. Application deadlines are the first Friday of each quarter. All applicants who meet the qualifications stated above are admitted in time to register as sociology majors for the following quarter.

Major Requirements

50 credits as follows:

1. Introductory courses (10 credits): SOC 300 and any additional 5 credit sociology course

2. Statistics and theory (10 credits): 5 credits from STAT 220, STAT 311, SOC 221/STAT 221/CS&SS 221, or SOC 321/STAT 321/CS&SS 321; and 5 credits for SOC 316
3. Upper-division sociology electives (20 credits): Any 300-level or 400-level sociology courses, excluding SOC 316, SOC 395, SOC 399, SOC 499
4. Sociology electives (10 credits): Any additional sociology courses, with a maximum 5 credits of either SOC 399 or SOC 499
5. Maximum 10 credits from sociology practicum coursework (SOC 402, SOC 403, SOC 404, or SOC 494) may apply to elective major requirements. Maximum 5 credits from sociology practicum coursework may apply toward the upper-division elective requirement.
6. Academic standards: Minimum 2.0 grade in any course applied to major requirements. Minimum cumulative 2.50 GPA for courses applied to major requirements. 25 of 50 required sociology credits completed in residence through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The Department of Sociology's undergraduate degree is designed to teach majors to think systematically about the relationships among individuals, groups, organizations, and societies. Sociology majors engage current research in political sociology, social stratification, race and ethnicity, deviance and social control, demography and other areas, and develop quantitative and analytical skills in research methods and social theory courses.
- *Instructional and Research Facilities:* The Center for Social Science Computing and Research (CSSCR) maintains an extensive data archive, and offers consulting support and computer lab access to students in sociology courses. The Center for Studies in Demography and Ecology (CSDE) and the Center for Statistics and the Social Sciences (CSSS) provide interdisciplinary courses, seminars, and research opportunities for sociology students.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Sociology majors participate in a variety of internships each quarter. Students can receive academic credit under the supervision of a Sociology faculty member. See adviser for details.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* A chapter of the Alpha Kappa Delta International Sociology Honor Society organizes events involving undergraduates with faculty and graduate students.

Graduate Program

Graduate Program Coordinator
211 Savery, Box 353340
206-221-3280
socadvis@uw.edu

Sociology seeks to explain social structure, social institutions, and social interaction. There are three emphases in the graduate training program: understanding and critically evaluating social theory and empirical research; doing theoretically guided research that explores, assesses, and further develops explanatory theories; and developing communication skills (with emphasis on teaching and scholarly writing) that are useful in transmitting sociological knowledge. The department has particular strengths in social and formal demography, deviance and social control, stratification and inequality, health, comparative and historical sociology, family and gender studies, and quantitative methods.

Emphasis is on empirical research aimed at developing explanatory theories. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered on various methods: statistical, survey, demographic and ecological, field research, and historical. Students learn social research by participating in faculty projects or developing their own studies.

Master of Arts

Admission Requirements

1. Applicants are evaluated on undergraduate performance, Graduate Record Examination scores, statement of educational plans, recommendations, and samples of written work.
2. *Application Deadline:* December 15. Admission is for autumn quarter only. International applicants should submit required application materials by November 1.
3. *Application Materials:* All applicants use the web-based application. See departmental website (<http://www.soc.washington.edu>) for more information.

Degree Requirements

Minimum 45 credits

The master's program, primarily preparation for PhD work, is not a terminal degree, although it may serve as good training for non-academic research. The MA program consists of three elements:

- *Substantive training:* coursework in substantive areas and social theory
- *Methodological training:* work in social statistics, general social science methodologies, and a data analysis practicum

- *The master's thesis:* independent empirical research conducted under the supervision of the MA committee
1. Sociological Theory - SOC 510
 2. Statistics - SOC 504, SOC 505, SOC 506
 3. Logic of Social Inquiry - SOC 508
 4. Proseminar - SOC 501
 5. MA Thesis - SOC 700
 6. Electives - 18 credits.

Minimum 12 graded elective credits in courses offered by the Sociology Department. All courses should be at the 500 level or above, although a student may petition for inclusion of a 400-level course. No more than 3 elective credits may be assigned a letter grade (e.g., S or CR) in place of a numerical grade. Minimum 3.30 cumulative GPA.

Doctor of Philosophy

Admission Requirements

Completion of an MA degree in sociology. Occasionally MA degrees in other fields are accepted.

See above Master of Arts section for admission requirements.

Degree Requirements

Minimum 90 credits, to include:

45 credits beyond the Master of Arts requirements (above) as follows:

1. Eight graded Sociology courses beyond the required first-year required courses. Electives taken while completing the MA can be counted. Minimum 24 credits overall.
2. PhD training plan – four methods/skills/knowledge courses focusing on particular advanced methodological skills (broadly defined) or knowledge necessary to undertake dissertation research. Up to two of these courses may also count as part of the required eight graded sociology courses.
3. Comprehensive examination
4. General examination
5. Final examination
6. Dissertation (27 credits)
7. Minimum 3.30 cumulative GPA

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

Course Descriptions

SOC 110 Survey of Sociology (5) I&S Human interaction, social institutions, social stratification, socialization, deviance, social control, social and cultural change. Course content may vary, depending upon instructor.

SOC 111 American Society (5) I&S Explores the power of social structures using examples drawn primarily from the American culture. The impact of social institutions, the emergence of concrete patterns of social relations which organize and regulate social life and the inequality inherent in most social structures.

SOC 195 Study Abroad: Sociology (2-5, max. 10) I&S Lower-division sociology courses for which there are no direct University of Washington equivalents, taken through a University of Washington study abroad program.

SOC 201 Special Topics in Sociology (3-5, max. 10) I&S Topics of contemporary interest taught at an introductory level. Topics will vary.

SOC 211 Stability and Change in American Society (5) I&S Examines two views of American life that dominate public discourse: one, that the United States is the best country in the world, the other that it is in decline. Addresses questions like: what is the United States really like; what values do Americans share; how do their values affect success and hope for a better society?

SOC 212 Evolution and Revolution: An Introduction to the Study of Comparative Social Change (5) I&S, DIV Examines the major aspects of human societies, including political and economic systems, family structure, social stratification, and demographic patterns as influenced by environmental conditions, technology, cultural traditions, and legacies of prior history and relationships to other societies.

SOC 215 Introduction to Urban Sociology (5) I&S Introduces the field of urban sociology. Focuses primarily on urban dynamics in the United States with attention to the global context in which they operate.

SOC 220 Introduction to Sociological Methods (5) I&S, QSR Familiarizes students with the logic of analysis in social sciences. Students learn to recognize good research design, understand and interpret main arguments employing different methods, and evaluate whether research findings support stated conclusions.

SOC 221 Statistical Concepts and Methods for the Social Sciences (5) NW, QSR Develops statistical literacy. Examines objectives and pitfalls of statistical studies; study designs, data

analysis, inference; graphical and numerical summaries of numerical and categorical data; correlation and regression; and estimation, confidence intervals, and significance tests. Emphasizes social science examples and cases. (Students may receive credit for only one of STAT 220, STAT 221, STAT 311, STAT 221/CS&SS 221/SOC 221, ECON 311.) Offered: jointly with CS&SS 221/STAT 221; AWSp.

SOC 222 Sociology of Sport (5) I&S *Weis* Introduction to the sociological analysis of sport. Issues discussed include the history, definition, and functions of sport; role of sport in the socialization of children; the relationship between sport and values; athletics within the social organization of education; deviance, crime, and violence in sport; the business and economics of sport.

SOC 223 Sociology of Rock and Roll (5) I&S Sociological analysis of a very influential and popular musical art form, from its origins in the first half of the twentieth century to more contemporary social contexts. Examines the roles of race relations, social class, gender, inequalities, region, genre, commercial exploitation, and technology in the evolution of rock and roll.

SOC 225 Data and Society (3/5) I&S Social implications of the digital revolution, including ethical issues associated with algorithmic design and privacy. Discusses data science as a new occupation that uses data to understand or influence people's behavior. Students will use a sociological lens to explore how our increasingly digital lifestyle changes institutions and social relations.

SOC 230 Introduction to Racial and Ethnic Health Disparities in the United States (5) I&S, DIV Examines health status and healthcare disparities among racial/ethnic minority groups in the United States. Utilize sociological, demographic, (social) epidemiological, and (social) psychological concepts to introduce students to racial/ethnic health disparities research.

SOC 240 Introduction to Social Psychology (5) I&S Introduction to social psychology with an emphasis on sociological perspectives and problems.

SOC 247 Contemporary Social Movements (5) I&S Introduction to theory and research on national-level collective mobilizations organized for political change. Emphasis on how political, organizational, and cultural factors shape social movement emergence and development, and individual participation.

SOC 260 African American Family (5) I&S, DIV Explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with AFRAM 260.

SOC 261 The African American Experience through Literature (5) VLPA/I&S Instructs students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with AFRAM 261.

SOC 266 Introduction to Labor Studies (5) I&S Conceptual and theoretical issues in the study of labor and work. Role of labor in national and international politics. Formation of labor movements. Historical and contemporary role of labor in the modern world. Offered: jointly with HSTCMP 249/POL S 249.

SOC 270 Social Problems (5) I&S, DIV Processes of social and personal disorganization and reorganization in relation to poverty, crime, suicide, family disorganization, mental disorders, and similar social problems.

SOC 271 Introduction to the Sociology of Deviance and Social Control (5) I&S Examination of deviance, deviant behavior, and social control. Deviance as a social process; types of deviant behavior (e.g., suicide, mental illness, drug use, crime, “sexual deviance,” delinquency); theories of deviance and deviant behavior; nature and social organization of societal reactions; and social and legal policy issues.

SOC 275 Murder (5) I&S Introduces topics related to the crime of murder, including: laws of homicide; research on the characteristics of victims, killers, and murders; theories of murder and related violence; investigation strategies; and crime and control policies.

SOC 287 Introduction of the Sociology of Sexuality (5) I&S, DIV Investigates sexuality on the basis of social construction of norms and values, within the context of gender, race, class, and sub-cultures and in the social control of sexuality and why it is so highly regulated. Looks for social rather than biological or personal explanations for why human sexuality is conceptualized or practiced in a certain way.

SOC 292 Who Gets Ahead? Public Schooling in America (5) I&S, DIV Addresses fundamental questions about the relationship between education and society. Examines why some students learn more and advance further than others; what factors shape how schools are run/organized and which materials are taught; how race/class/gender affect students within schools; how schools maintain our economic system and can become more effective.

SOC 299 Sociology Interest Group (2) I&S Provides opportunity for students new to the major, or contemplating the major, to meet twice weekly in a small group to discuss issues relating to two designated five-credit sociology courses. Concurrent enrollment in the two five-credit designated courses required. See department adviser.

SOC 300 Foundations of Social Inquiry (5) I&S Covers what makes social science a science, the components of good research design, and what counts as valid evidence for sociological claims. Pays special attention to links between theory, research questions, and data. Offered: AWPSS.

SOC 301 Special Topics in Sociology (3-5, max. 10) I&S Topics of contemporary interest taught at an intermediate level. Topics will vary.

SOC 306 War (5) I&S Origins and conduct of war; readings from anthropology, political science, economics, and history, as well as novels and some recent works on the arms-control

controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Offered: jointly with JSIS B 301.

SOC 316 Introduction to Sociological Theory (5) I&S Introduction to sociological theory. Includes classical theorists Adam Smith, Karl Marx, Emile Durkheim, and Max Weber and their influence on contemporary theoretical debate.

SOC 320 Evaluating Social Science Evidence (5) I&S, QSR A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates “facts and findings” by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS&SS 320/STAT 320.

SOC 321 Case-Based Social Statistics I (5) I&S, QSR Introduction to statistical reasoning for social scientists. Built around cases representing in-depth investigations into the nature and content of statistical and social-science principles and practice. Hands-on approach: weekly data-analysis laboratory. Fundamental statistical topics: measurement, exploratory data analysis, probabilistic concepts, distributions, assessment of statistical evidence. Offered: jointly with CS&SS 321/STAT 321.

SOC 322 Case-Based Social Statistics II (5) I&S, QSR Continuation of CS&SS 321/SOC 321/STAT 321. Progresses to questions of assessing the weight of evidence and more sophisticated models including regression-based methods. Built around cases investigating the nature and content of statistical principles and practice. Hands-on approach: weekly data analysis laboratory. Prerequisite: CS&SS 321/SOC 321/STAT 321, or permission of instructor. Offered: jointly with CS&SS 322/STAT 322.

SOC 328 Methodology of Sociological Research (5-) I&S, QSR Logic of formulating, testing, and modifying hypotheses. Methods of producing social data (survey research, evaluation research, field observation) and utilizing stored data (census tapes, historical materials). Methods of quantitative data analysis techniques commonly used in contemporary sociological analysis. Not open for credit to students who have taken SOC 320.

SOC 329 Methodology of Sociological Research (-5) I&S, QSR Logic of formulating, testing, and modifying hypotheses. Methods of producing social data (survey research, evaluation research, field observation) and utilizing stored data (census tapes, historical materials). Methods of quantitative data analysis techniques commonly used in contemporary sociological analysis. Not open for credit to students who have taken SOC 320 or SOC 323.

SOC 330 Human Ecology (5) I&S Factors and forces that determine the distribution of people and institutions.

SOC 331 Population and Society (5) I&S Population growth and distribution, population composition, population theory, urbanization. Determinants and consequences of fertility and mortality trends and migration in economically developed and underdeveloped areas.

SOC 340 Symbolic Interaction (5) I&S Examines the role of language, culture, and the symbolic environment in shaping interpersonal processes.

SOC 341 Tutoring Sociology (2-4, max. 4) Trains students to serve as tutors in designated courses. Teaches how to assist with writing assignments, explain course material, and lead group discussions. Credit/no-credit only.

SOC 344 Cognitive Social Psychology (5) I&S Cognitive structures and processes and their antecedents and consequences, both societal and individual. Reciprocal influences of social roles, social institutions, and social cognition.

SOC 345 Sects and Violence: Cults, Religious Innovation, and Social Conflict (5) I&S Examines controversial religious groups often called cults. Uses sociological lenses to examine cults' occasionally catastrophic conflicts with government authorities, established religious organizations, and anti-cult movements.

SOC 346 Group Processes (5) I&S Systematic analysis of social processes in small groups, including conformity, deviance, cooperation, competition, coalition formation, status and role differentiation, inequity, communication, and authority and power. A variety of methods of research are considered: field studies, field experiments, laboratory studies, and the simulation of social processes.

SOC 347 National Social Movements: Current Trends and Explanations (5) I&S Introduction to theory and research on a specific form of social movement: national-level collective mobilizations organized for political change. Emphasizes how political, organizational, and cultural factors shape social movement emergence and development. Focuses on American activism, New Left, women's movements, the abortion conflict, gay/lesbian activism, and Central American Peace movement.

SOC 351 Intimate Relationships (5) I&S Explores the nature of love, desire, and commitment between heterosexual and homosexual couples, as well as parenting as a dyadic act. Evaluates political and social pressures and preferences on these topics within our society in a comparative context.

SOC 352 The Family (5) I&S The family as a social institution. Historical changes and societal variation in family patterns. Changes over the life cycle. Alternative family forms.

SOC 353 The Family in Cross-Cultural Perspective (5) I&S Form, content, and functions of families through case studies of different countries. Family organization, including family structure, inheritance, sexual division of labor, and socialization with attention given to life-cycle stages.

SOC 355 Social Change in Latin America (5) I&S Explores cultures, identities, political economy, and popular mobilization in Latin America. Examines relations of power and production between social classes and ethnic groups, as well as ideologies and intellectual movements. Offered: jointly with JSIS A 355.

SOC 356 Society and Politics (5) I&S Causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with POL S 356.

SOC 357 Sociology of Religion (5) I&S The relations between religion, polity, economy, and social structure; in particular, the political, economic, and social impact of religious beliefs and organizations, as well as the social determination of these beliefs and organizations; the rise of secularism, the rationalization of modern life, and the emergence of political quasi-religions.

SOC 360 Introduction to Social Stratification (5) I&S, DIV Social class and social inequality in American society. Status, power, authority, and unequal opportunity are examined in depth, using material from other societies to provide a comparative and historical perspective. Sociological origins of recurrent conflicts involving race, sex, poverty, and political ideology.

SOC 362 Race Relations (5) I&S, DIV Reviews social science perspectives on race and ethnicity. Explores sociological definitions and understandings associated with race and ethnicity and the construction of identities. Examines different issues that impact individuals' and groups' life chances.

SOC 363 Ethnicity, Business, Unions, and Society (5) I&S Interrelationships of ethnicity, business, unions, and the larger society. Examines financial and sociological structure of business and manufacturing sector, how this sector performs, and consequences of performance for selected ethnic groups in United States. Offered: jointly with AES 361.

SOC 364 Women in the Social Structure (5) I&S Gender and social institutions; the family, politics, education, medicine, law, the labor force. Intersection of gender with other minority statuses such as race, age, socioeconomic status, and sexual orientation. Structural, ideological, and historical determinants of gender relations.

SOC 365 Urban Community (5) I&S Comparative and analytic study of organization and activities of urban groups.

SOC 366 Sociology of Organizations (5) I&S Introduction to the sociological study of organizations including what organizations are, where they come from, and how they relate to individuals, other organizations, and other institutions of society.

SOC 368 Sociology of Black Americans (5) I&S Socio-cultural context of the Black person's environment and consequences of interaction with that environment.

SOC 371 Criminology (5) I&S Survey of legal definitions, types of criminal behavior, trends and patterns, recidivism, characteristics of offenders, environmental influences, diagnostic methods, prediction, theories of crime and delinquency prevention, social policy.

SOC 372 Crime, Politics, and Justice (5) I&S Examines role of police, courts, and corrections in criminal justice; investigates critical legal and sociological factors and perspectives that shape

criminal procedure; considers the relationship between criminal procedure and wider concerns of justice and equality in society. Offered: jointly with LSJ 375.

SOC 374 Law and Society (5) I&S Introduces major issues of the sociological foundations and implications of legal institutions; examines social life within legal institutions, the individual and collective justice, the malleability of precedent, and truth and the effects of inequality on legal outcomes. Encompasses legal practice and social science.

SOC 375 Sociology of Juvenile Justice (5) I&S Harris Overviews the United States juvenile justice system and related societal issues, including racial and ethnic disproportionality, the criminalization of delinquent offenders, and the future of the juvenile justice system.

SOC 376 Drugs and Society (5) I&S Explores the questions of drug use and abuse, social and political factors that shape response to their use, and the social conditions under which drug use is likely to have adverse consequences. Also covers U.S. drug control policy, the political economy of legal and illegal drugs, and political aspects of drug use. Offered: jointly with LSJ 376.

SOC 377 The American Jewish Community (5) I&S, DIV Examines how American Jews adapt to a changing world. Explores impact of diverse immigration, acculturation, social mobility, social justice movements, and changing relations between Jews and non-Jews. Encompasses concerns that all communities have adapting to change, when they are also agents of change. Offered: jointly with JEW ST 377.

SOC 378 Contemporary Jewish American Identities (5) I&S, DIV Introduction to the debates about post-Holocaust Jewish identities in multicultural America. Explores whether a distinctive Jewish community is headed toward assimilation, experiencing revival, or merely transforming the multiple ways Jewish experience is lived. Topics include new Jewish immigrants, the new Orthodox, Black Jews, Jewish feminism, children of Holocaust survivors. Offered: jointly with JEW ST 378.

SOC 379 Environmental Sociology (5) I&S/NW S. ASAH Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ENVIR 379/ESRM 371; A.

SOC 395 Study Abroad: Sociology (2-5, max. 15) I&S Upper-division sociology courses for which there are no direct University of Washington equivalents, taken through a University of Washington study abroad program.

SOC 399 Undergraduate Internship (2-5, max. 10) Students serve in approved internships. Credit/no-credit only.

SOC 401 Special Topics in Sociology (5, max. 15) I&S Selected topics taught at an advanced level. Topics vary and may be substantive, theoretical, or methodological. Designed for Sociology majors and others with permission.

SOC 402 Sociology in Practice: Education Service Program (5) I&S Combines an experience in tutoring with critical reflection on practical and theoretical issues in education. Gives practical classroom experience as well as insight into the complexity of public schools and issues in education policy. Students may receive a maximum of 10 credits from SOC 402, SOC 403, SOC 404, and SOC 494.

SOC 403 Sociology in Practice: Applied Community Research Program (5) I&S Participation in a project-based research group for a real-world client, addressing complex and enduring problems of urban life. Students may receive a maximum of 10 credits from SOC 402, SOC 403, SOC 404, and SOC 494.

SOC 404 Sociology in Practice: Community/Civic Internship Program (5) I&S Combines real-world benefits of internships with critical reflections provided in a seminar. Students intern as local agencies and organizations, and may either come with their own internship or apply for specialized internships through the Sociology Department. Students may receive a maximum of 10 credits from SOC 402, SOC 403, SOC 404, and SOC 494.

SOC 410 History of Sociological Thought (5) I&S Contributions of individual theorists (from Comte to the present); emphasis on cumulative development of concepts and principles, emergence of sociology as a science, probable future developments.

SOC 415 The City and Neighborhood Dynamics (5) I&S Focuses on a diverse set of topics including the changing social meaning of community, the effects of the urban setting on social interactions and attitudes, urban poverty, residential segregation, and the neighborhood dynamics of crime. Students have the opportunity to contribute directly to research- and policy-related projects.

SOC 416 Sociological Theory (5) I&S Theories of individual action, social order, and institutional change. Cumulative development of solutions rather than on works of given theorists. Theories of social order. How sociological treatments of these issues compare with those offered by economists and other social scientists.

SOC 420 Sociology of Food (5) I&S Provides a historical and comparative overview of what people eat and how this relates to other types of social differentiation.

SOC 430 Social Determinants of Health and Health Disparities (5) I&S, DIV Examines the social conditions related to the health of populations. How patterns of health vary by social class, race/ethnicity, and gender and some mechanisms that produce and maintain these differences.

SOC 432 Population and Modernization (3) I&S *Hirschman, Lavelly* Examines role of demographic factors in the process of social modernization and economic growth. The approach is both historical, focusing on populations of developed countries since 1700, and analytic,

stressing the attempts made by different disciplines to model demographic relationships, with attention to less-developed regions. Offered: jointly with JSIS D 435.

SOC 434 Demographic Issues in Asia (3-5) I&S *Hirschman, Lively* Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. Addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with JSIS A 431.

SOC 440 Comparative Social Problems (5) I&S Examines a variety of social problems from a comparative perspective. Issues such as epidemics, slavery, and genocide within and beyond U.S. borders analyzed with historical and contemporary examples.

SOC 445 Religious Movements: The Sociology of Cults and Sects (5) I&S Investigates the organizational dynamics of new religious movements. Seeks to understand why 'cults' emerge and how they proliferate or decay. Examines conflicts within established churches, counter-movements, and the state.

SOC 447 Social Movements (5) I&S Social movements as collective attempts to change society: why people join; characteristics of successful and unsuccessful movements; consequences of social movement activities.

SOC 450 Political Economy of Women and Family in the Third World (5) I&S Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with JSIS D 450.

SOC 451 Theory and Process of Social Change (5) I&S Basic trends in economic and social development; comparative and historical analysis of social and economic changes; the rise of capitalist societies.

SOC 456 Political Sociology (5) I&S Relationships between social change and political change. Focus on selected issues, including social bases of democracy, political organization, elections, and consequences of public policy.

SOC 459 The New Inequality (5) I&S, DIV Examines "who gets what" in contemporary societies. Students will learn not only how income, wealth, housing, and health are unequally distributed, but how individuals or groups differ in access to "public goods" or the protection of legal rights and liberties. Examines some of the leading explanations for these inequalities, and applies these theories to specific social problems in the U.S. and around the world.

SOC 460 Social Differentiation (5) I&S Analysis of societal organization based on sex, age, residence, occupation, community, class, caste, and race.

SOC 461 Comparative Ethnic Race Relations in the Americas (5) I&S Sketches the ethnoracial systems operating in American society. Studies these systems as systems and

examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with AES 461.

SOC 462 Comparative Race and Ethnic Relations (5) I&S, DIV Race and ethnicity as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with AES 462.

SOC 463 African-American Political Thought (5) I&S Examines the historical and sociological experiences of African-Americans from slavery, emancipation, mobilization, and organization, to present socioeconomic situation. Reviews the political philosophy of black leaders from the early black conventions to today, the black experience in the American education system, and origins and evolution of the black middle class.

SOC 464 Contemporary Society in the People's Republic of China (5) I&S *Lately* Separate development of rural and urban social institutions in the People's Republic of China since 1949 from a sociological perspective. Family and marriage, social control, educational institutions. Dilemmas of contemporary China and reasons for institutional change. Offered: jointly with JSIS A 464.

SOC 465 Complex Organizations (5) I&S Examination of the structure of complex organizations. Attention to developing generalizations applicable to industrial organizations, businesses, hospitals, prisons, labor unions, governments, universities, armies, and similar formally instituted organizations. The major focus is on empirical research, with some attention to methodological problems in studying such organizations.

SOC 466 Economic Sociology (5) I&S Changing focus of field; cultural variation, work, and the worker; technology, society, and the evolution of industrial forms; types and forms of industrial organizations; industrial organizations as social and technical systems; issues of control, process, and change; the individual in social and technical systems.

SOC 467 Immigration and Ethnicity (5) I&S, DIV Focus on contemporary American diversity - the multiethnic, multicultural society created by recent immigrants from Latin America, Asia, and by people of European, African, and American Indian origins; its issues and debates, including ethnic conflict, integration, multiculturalism, and assimilation, as viewed through comparisons with the past and with other societies.

SOC 468 Sociology of Occupations and Professions (5) I&S Frameworks for study of occupations and professions; occupational structure and mobility in American society in relation to adult socialization and career development; occupational and professional associations and society.

SOC 469 Balkan Societies (5) I&S Examination of the roots of Balkan social problems (economic backwardness, minority-group conflicts, peasant problem), the failure of pre-1945 attempts to solve these problems, the post-1945 communist failures, the causes of the upheavals of 1989, and the prospects for success in the 1990s.

SOC 470 Contemporary Southeast Asia (5) I&S Sociological survey of Southeast Asia, including development, demographic changes, family structure, and ethnic relations.

SOC 472 Juvenile Delinquency (5) I&S Factors in delinquency, juvenile courts. Programs of treatment and prevention.

SOC 476 Miscarriages of Justice (5) I&S Examines legal and social factors that shape criminal case outcomes, analyzing how one type of miscarriage of justice - wrongful conviction - occurs. How can cases of wrongful conviction be explained? Why are some people, against whom there is only weak evidence, convicted-and sometimes even executed? Offered: jointly with LSJ 476.

SOC 481 Issues in Analytic Sociology (5, max. 15) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 482 Issues in Analytic Sociology (3, max. 9) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 483 Issues in Analytic Sociology (1-3, max. 9) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 487 Sociology of Gender and Sexuality (5) I&S Addresses the intersection of gender and sexuality in U.S. society, social institutions and movements, families, and the individual. Topics include the history of sexuality as practiced and politicized since colonial times, major theoretical approaches to sexuality, and how gender and other social status characteristics influence the meanings of sexuality.

SOC 490 The Urban Underclass (5) I&S Examines underlying issues which have led to the emergence and perpetuation of an underclass within an affluent society. Explores some of the consequences for these people and for this society. Considers policies that might be used to address problems of the urban underclass.

SOC 492 Sociology of Education (5) I&S Emphasizes the ways in which schools and colleges reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Examines the structures, practices, content, and outcomes of schooling and its relationship to the wider society as well as the rise and dynamics of the modern education system.

SOC 494 Practicum (5, max. 10) I&S Exploration of selected sociological concepts or problems through advanced practical experience in research, internships, or other applications. Topics vary.

SOC 495 Honors Thesis (1-5, max. 5) I&S Preparation of Honors thesis. Sociology majors only. Credit/no-credit only.

SOC 496 Honors Seminar ([3/5]-) I&S Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for Honors students. Offered: A.

SOC 497 Honors Seminar (-[3/5]-) I&S Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for Honors students. Offered: W.

SOC 499 Undergraduate Independent Study or Research (2-5, max. 10) Credit/no-credit only.

SOC 500 Teaching Sociology as a Teaching Assistant (1) Techniques of quiz section administration, advising of students, and student evaluation important to successful teaching as a Teaching Assistant. Students develop presentations and classroom materials and develop and grade student examinations. Prerequisite: admission to graduate program in sociology. Credit/no-credit only.

SOC 501 Proseminar (1-3, max. 3) Introduction for first-year graduate students to substantive areas of sociology, research and information resources, and issues in graduate education and professional socialization. Credit/no-credit only. Offered: AWSp.

SOC 502 Seminar on Teaching Sociology (3) Techniques of lecturing, leading discussion, evaluating student performance, and other pedagogical skills ancillary to successful teaching. Students develop a course and obtain videotaped feedback of presentations. Prerequisite: completion of MA.

SOC 503 Seminar on Writing Social Science (3) Techniques, skills, and strategies helpful for publishing in the social sciences. Includes writing and revision of own work and evaluation of the writing of other students. Also includes social scientific analysis of writing and other forms of academic communication. Prerequisite: completion of MA.

SOC 504 Applied Social Statistics (3-) Applications of statistics in sociology and related social sciences. Emphasis on problems of analysis with imperfect data. Probability in statistical inference. Analysis of variance; contingency table analysis, nonparametric procedures; regression analysis in social research.

SOC 505 Applied Social Statistics (-3) Applications of statistics in sociology and related social sciences. Emphasis on problems of analysis with imperfect data. Probability in statistical inference. Analysis of variance; contingency table analysis, nonparametric procedures; regression analysis in social research.

SOC 506 Methodology: Quantitative Techniques in Sociology (3) Applied regression analysis with emphasis on interactive computer graphics techniques and interpretation. Application to typical sociological problems. Offered: jointly with CS&SS 507.

SOC 507 Statistical Classification and Measurement (3) Application of statistical principles and methods to problems of classification and measurement in social research.

SOC 508 Logic of Social Inquiry (3) Study design from problem formulation to the analysis and interpretation of data.

SOC 509 Practicum in Data Analysis (3) Introduction to selected programs for data analysis and practice in their application. Practice in coordination of research problem, data, and mode of analysis into a coherent, interrelated set. Interpretation of results. Offered: A.

SOC 510 Seminar in Sociological Theory (3) Macrosociological theories; functionalism and neoevolutionism; conflict and consensus approach; comparative strategies; models and long-range theories; ideology and sociology. From Marx and de Tocqueville to contemporary literature.

SOC 511 Classical Social Theory (3) Study of classical masters of social theory: Marx, Durkheim, and Weber, their precursors, and their immediate successors.

SOC 512 Review of Mathematics for Social Scientists (1) Reviews basic mathematical skills needed for a meaningful understanding of elementary statistics, data analysis, and social science methodology. Overview of core knowledge required for graduate courses in quantitative methods in social sciences. Topics include discrete mathematics, differential and integral calculus, review of matrix algebra, and basic probabilistic and statistical concepts. Credit/no-credit only. Offered: jointly with CS&SS 505.

SOC 513 Demography and Ecology (3) *Hirschman* Theories and research on human fertility, mortality, mobility, migration, and urbanization in social/economic context. Comparative and historical materials on Europe, the United States, and the Third World. Offered: jointly with CSDE 513.

SOC 514 Current Theories in Social Psychology (3) Broad graduate-level introduction to the theories in the field of social psychology.

SOC 515 Current Research in Social Psychology (3) *Howard* Broad graduate-level introduction to the research in the field of social psychology.

SOC 516 Organizations (3) Broad graduate-level introduction to the theory and research on complex organizations.

SOC 517 Deviance and Social Control (3) Survey of current research on deviant behavior and mechanisms of social control; definitions and forms of deviant behavior, causal analysis, and legal or other methods of social control.

SOC 518 Social Stratification (3) Intensive preparation in theoretical, methodological, and substantive topics in social stratification.

SOC 519 Fieldwork: Observation and Interviewing (3-) Perspective, logic, and techniques of qualitative social research and analysis. Nature and uses of intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies.

SOC 520 Fieldwork: Observation and Interviewing (-3) Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, qualitative data analysis (including applications of data base technology, problem reformulation, and techniques of visual documentation). Results of student work reported and discussed in class.

SOC 524 Master's Thesis Research Seminar (1, max. 3) Facilitates the development of a thesis and its execution. Forum for refining research questions, presenting work in progress, and receiving feedback from instructor and other students on ideas and written work. Credit/no-credit only.

SOC 526 Causal Approach to Theory Building and Data Analysis (3) Theory construction and testing from a causal models perspective. Path analysis, standardized versus unstandardized measures, feedback models, identification problems, estimation in overidentified models, difference equations, differential equations, stability conditions. Multiplicative models as alternatives to additive ones. Causal approach to measurement error.

SOC 527 Measurement of Basic Sociological Concepts (3) Conceptualization and measurement problems in sociology, using major concepts as illustrations of basic issues. Causal approach to measurement to deal with problems of indirect measurement, cross-level measurement problems, aggregation and disaggregation. Consequences of crude measurement for data analyses. Prerequisite: SOC 504.

SOC 528 Seminar on Selected Statistical Problems in Social Research (3) Prerequisite: SOC 506. Instructors: Raftery

SOC 529 Structural Equation Models for the Social Sciences (3) Structural equation models for the social sciences, including specification, estimation, and testing. Topics include path analysis, confirmatory factor analysis, linear models with latent variables, MIMIC models, non-recursive models, models for nested data. Emphasizes applications to substantive problems in the social sciences. Prerequisite: SOC 504, SOC 505, SOC 506 or equivalent. Offered: jointly with CS&SS 526.

SOC 530 Urbanism and Urbanization (3) I&S Human population distribution and migration patterns. Causes and consequences of world urbanization. Spatial and social patterns in the metropolis. Aggregate population movements and selectivity of migrants.

SOC 531 Fertility and Mortality (3) I&S Theories of fertility and mortality, demographic transitions, individual variations. Specific analytic approaches. Familiarity with basic fertility and mortality measures, and with the life table, is assumed.

SOC 533 Research Methods in Demography (3) I&S Basic measures and models used in demographic research. Sources and quality of demographic data. Rate construction, standardization, the life table, stable population models, migration models, population estimation and projection, measures of concentration and dispersion, measures of family formation and dissolution.

SOC 534 Statistical Methods for Spatial Data (3) Motivates the need for, and describes methods for, the analysis of spatial data. Topics: Clustering, cluster detection, spatial regression, modeling neighborhood effects, geographical information systems. Point and aggregated data considered and data from complex surveys. Offered: jointly with CS&SS 554/STAT 554; W.

SOC 535 Foundations of Population Health and Health Disparities (3) Provides an overview of the nature and social determinants of the health of human populations, investigates disparities in health within and between populations, and examines the ways in which population health may be improved by the translation of scientific knowledge into interventions and public policy.

SOC 536 Analysis of Categorical and Count Data (3) Analysis of categorical data in the social sciences. Binary, ordered, and multinomial outcomes, event counts, and contingency tables. Focuses on maximum likelihood estimations and interpretations of results. Prerequisite: SOC 504, SOC 505, SOC 506, or equivalent. Offered: jointly with CS&SS 536/STAT 536.

SOC 537 Modeling Emergence: Social Simulation (3) Seminar and practicum in computational modeling of social processes with emphasis on using agent-based simulation models to investigate and refine theory.

SOC 538 Data Science and Population Processes (3) Today's large and complex data sets ("big data") allow social scientists to address core social questions in new ways. Examines how traditional social science and demographic methods can be used to make sense of new data sources, and how these new data sources may require new approaches and research design.

SOC 539 Selected Topics in Demography and Ecology (3, max. 9) Specialized problems in demography or ecology are covered; for example, migration, fertility, mortality, language, race and ethnic relations, metropolitan community. See quarterly announcement for specific problem to be covered.

SOC 542 Selected Topics in Group Processes (3) Theories, methodology, and studies in the area of small-group research. Prerequisite: permission of instructor for nonmajors.

SOC 543 Seminar on Group Solidarity (3) Interdisciplinary perspectives on solidarity, focusing on member commitment, group structure, and contributions to collective goals.

SOC 547 Social Cognition and Attribution (3) Theories and research on social cognition and attribution. Theoretical and methodological debates on cognition. Sociological aspects of attribution. Prerequisite: SOC 514 or equivalent.

SOC 551 Family and Gender Relations (3) Overview of major research findings on marriage, the family, and gender, including demographic trends, the place of children in society, courtship, the internal management of intimate relationships, divorce, and social policy.

SOC 553 Seminar on Gender and Sexuality (3) Research seminar considering theoretical and empirical approaches to sexuality, with particular attention to the importance of gender. Examines the social control of sexuality by the state and by families, as well as social meanings of sexuality within social movements related to various aspects of sexuality.

SOC 554 Seminar in the Sociology of Religion (3) Survey of significant and active areas of theory and research in contemporary social scientific studies of religion.

SOC 555 Methods in Macro, Comparative, and Historical Sociology (3) Systems of conducting research with qualitative methods brought to bear on broad questions.

SOC 559 Seminar on Gender Roles (3) Broad graduate-level introduction to theoretical issues concerning gender and society. Current state of empirical knowledge on the sociology of gender and strategies for research. Cross-cultural variations in conception of gender roles and how gender intersects with social institutions and social interactions.

SOC 560 Hierarchical Modeling for the Social Sciences (4) Explores ways in which data are hierarchically organized, such as voters nested within electoral districts that are in turn nested within states. Provides a basic theoretical understanding and practical knowledge of models for clustered data and a set of tools to help make accurate inferences. Prerequisite: SOC 504, SOC 505, SOC 506 or equivalent. Offered: jointly with CS&SS 560/STAT 560.

SOC 562 Seminar in Comparative Race Relations (3) Cross-cultural approach to race and ethnic relations, including case studies from Africa and Latin America. Prerequisite: graduate standing in social sciences.

SOC 563 Statistical Demography (4) *A. Raftery* Statistical methods and models for estimating and forecasting population quantities. Topic: Demographic rates; Population projection; Leslie matrix; modeling age-specific patterns; probabilistic population projections and Bayesian hierarchical models; estimating past and present fertility, mortality, migration and population; big data in demography. Prerequisite: Either STAT 509/CS&SS 509/ECON 509, STAT 513, or permission from the instructor. Offered: jointly with CS&SS 563/STAT 563; Sp.

SOC 565 Inequality: Current Trends and Explanations (3) Discussion of recent growth in economic inequality in the United States and competing explanations for these new trends through examination of labor market demographics, industrial composition and restructuring, and the broader political context that impacts policies like minimum wage, strength of unions, and foreign trade. Prerequisite: SOC 504, SOC 505, SOC 506, or equivalent. Offered: jointly with CS&SS 565.

SOC 566 Seminar in Complex Organizations (3) Special topic seminars in the field of complex organizations or industrial sociology.

SOC 567 Seminar in Complex Organizations (3) Special topic seminars in the field of complex organizations or industrial sociology.

SOC 568 Social Mobility (3) Description and measurement of social mobility. Determinants of mobility and cross-national comparisons. Consequences of mobility for social behaviors. Emphasizes movement from the socioeconomic position of family of origin to adult position. Prerequisite: SOC 518.

SOC 569 Demographic Studies of Stratification (3) Overview of development of models of socioeconomic achievement ("status attainment" paradigm) in the field of stratification. Begins with work of Blau and Duncan. Covers elaboration of basic models to include race and ethnicity, social psychological variables, class, school and labor market effects, and other structural variables. Prerequisite: SOC 513, SOC 518.

SOC 570 Seminar in Environmental Sociology (3) Offered: jointly with SEFS 570.

SOC 574 Seminar in Methods of Criminological Research (3) Provides training in the technical analysis of published research in criminology; designs and processes studies in parole prediction, prediction of prison adjustment, and prediction of treatment effect.

SOC 575 Social Movements: Politics and Organization (3) Theoretical perspectives and research on the dynamics of national social movements from a macrosociological perspective. Introduces dominant models that stress organizational and political processes, with some examination of approaches that consider the intersection of politics, organization, and culture. Emphasis on the United States.

SOC 581 Special Topics in Theory and the History of Sociological Thought (3, max. 9) Examination of current topics in theory and the history of sociological thought. Content varies according to recent developments in the field and the interests of the instructor.

SOC 582 Special Topics in Research Methods and Statistical Analysis in Sociology (3, max. 9) Examination of current topics in research methods and statistical analysis in sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 583 Special Topics in Demography and Ecology (3, max. 9) Examination of current topics in demography and ecology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 584 Special Topics in Social Psychology (3, max. 9) Examination of current substantive topics in social psychology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 585 Special Topics in Marriage and Family (3, max. 9) Examination of current substantive topics in marriage and the family. Content varies according to recent developments in the field and the interests of the instructor.

SOC 586 Special Topics in Organization and Industrial Sociology (3, max. 9) Examination of current substantive topics in organizational and industrial sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 587 Special Topics in Deviance and Social Control (1-3, max. 9) Examination of current substantive topics in deviance and social control. Content varies according to recent developments in the field and the interests of the instructor.

SOC 588 Special Topics in Stratification and Race Relations (3, max. 9) Examination of current substantive topics in stratification and race relations. Content varies according to recent developments in the field and the interests of the instructor.

SOC 589 Special Topics in Macrosociology (3, max. 9) Examination of current substantive topics in macrosociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 590 Special Topics in Sociology (1-3, max. 21) Examination of current substantive topics in sociology. Content varies according to recent developments in the field and the interests of the instructor. Topics covered in courses with this number lie outside those covered by other special topics courses numbered SOC 581 through SOC 589.

SOC 591 Political Sociology (3) Introduction to political sociology, considering the rise of the modern state, power, political organization, social movements, and other related topics.

SOC 597 Field Seminar in States, Markets, and Societies (5) Exposes students to theoretical and empirical debates about engagement of states with their societies and with transnational actors in their historical, political, and social settings. Topics include state formation, social change, development, state-market relations, globalization, identities, ethnicities, gender, revolutions, democratization, corruption, clientalism, civil societies, NGOs, and social movements. Offered: jointly with JSIS 597.

SOC 600 Independent Study or Research (*-) Credit/no-credit only.

SOC 700 Master's Thesis (*-) Credit/no-credit only.

SOC 800 Doctoral Dissertation (*-) Credit/no-credit only.

Spanish and Portuguese Studies

Department Overview

C104 Padelford

Undergraduate Program

C104 Padelford

The educational philosophy of Spanish and Portuguese studies is that knowledge and understanding of other cultures is fundamental in an increasingly global world, and that competence in the languages of those cultures is an indispensable gateway to them. Spanish studies provides students with the four basic language skills (listening, speaking, reading, and writing) in increasing levels of sophistication so that they may read and analyze works of literature written in Spanish as well as understand complex cultural structures and artifacts from Spain, Latin America, and the Latino populations of the United States. The UW offers beginning and intermediate Portuguese and all levels of Spanish.

Adviser

C104F Padelford, Box 354360

206-543-2075

spsadv@uw.edu

The Department of Spanish and Portuguese Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in Spanish
- A minor in Spanish

Bachelor of Arts

Suggested First- and Second-Year College Courses: SPAN 101, SPAN 102, SPAN 103, or SPAN 121, SPAN 122, SPAN 123, or SPAN 134; SPAN 201, SPAN 202 (or SPAN 210), SPAN 203. Spanish, Latin American, and Chicano literature. Courses related to history and culture. Courses in English literature and comparative literature

Department Admission Requirements

1. Completion of SPAN 203, with a minimum cumulative 2.70 GPA for all Spanish coursework completed and a minimum 2.5 grade in each Spanish course
2. Completion of at least 5 credits of English composition with a minimum 2.5 grade
3. Change-of-major forms, available online and outside C-104F Padelford Hall, are processed autumn, winter, and spring quarters only. Forms and unofficial transcripts must be turned in by the end of the third week of the quarter to assure registration priority for

the following quarter. Paperwork turned in after the third week of the quarter is processed during the following admission cycle.

Major Requirements

58 credits beyond SPAN 203 as follows:

1. SPAN 301, SPAN 302, SPAN 303 (or equivalents, SPAN 314, SPAN 315, SPAN 316; SPAN 310; SPAN 330)
2. SPAN 321, SPAN 322, SPAN 323
3. One 300-level literature elective: See department website for list of eligible courses.
4. Five 400-level courses
5. Participation in an approved Study Abroad program (one quarter minimum, any level) or one or more experiential learning projects (minimum 2 credits of SPAN 392) which involve significant engagement with the Spanish-speaking community. Students are strongly encouraged to do both.
6. Other than SPAN 400 through SPAN 406, only one course whose instructional materials are primarily in English may apply to the major.

Minor

Minor Requirements: Minimum 27 credits above SPAN 203 level to include the following:

1. One of the following sequences: SPAN 301, SPAN 302, and either SPAN 303 or SPAN 330; SPAN 314, SPAN 315, and either SPAN 316 or SPAN 330; SPAN 310 and either SPAN 303, SPAN 316, or SPAN 330
2. Four 300- or 400-level electives
3. Only one course in which instructional materials are primarily in English may apply to the minor. SPAN 327 may not apply to the minor and is not open to heritage/native speakers.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of Spanish and Portuguese is both skills- and content-based, i.e., it has practical and cognitive elements. Students learn to communicate in Spanish or Portuguese, refining their language skills as they acquire a body of knowledge about the literary and cultural history of Spain, Latin America, and the Spanish-speaking populations of the United States. Graduates have found these skills extremely useful as they pursue careers in teaching, business, NGOs and human rights organizations, law, and politics.
- *Instructional and Research Facilities:* Departmental facilities include a Writing Center for students registered in third-year Spanish. The Center for Spanish Studies, housed in the department, is a joint initiative of the University of Washington, the Education Office of the Embassy of Spain, and the Office of Superintendent of Public Instruction. This center provides services that include workshops for K-12 teachers of Spanish,

sponsorship of cultural events, and a lending library of books as well as audio and visual materials. A branch of the Spanish government sponsored Cervantes Institute, also housed in the department, offers linguistic and cultural resources to the university and the general community as well.

The department directs three study abroad programs, in León (Spain), Oaxaca (Mexico) and Cádiz (Spain). These programs are “living laboratories.” Approximately 100 students participate each year.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Experiential Learning:* Internship opportunities are posted on the department website as they become available. Also, students may participate in experiential learning (which may include service learning), in which they combine study with service to the community. Students must volunteer two-to-five hours per week (a minimum of 30 hours per quarter) in organizations that provide services primarily, although not exclusively, to Spanish speakers. Alternatively, they may volunteer in public schools as tutors of different academic themes. Some of the organizations and schools involved include CASA Latina, The Mexican Consulate, El Centro de la Raza, Our Lady of Mt. Carmel, Northwest Immigrant Rights Project, Cascade People's Center, Center for Spanish Studies, John Stanford International School, Bryant Elementary School, John Hay Elementary School, Hamilton Middle School, Nathan Hale High School, the Pipeline Project, and the East Side Literacy program. Students apply and increase their knowledge of the Spanish language in a real context. They are exposed to Hispanic multiculturalism and become active agents of social change in the community.
- *Department Scholarships:* An annual scholarship, the Susan B. Johnson Memorial Endowment Fund, is awarded to a student of Spanish for foreign study in Spain.
- *Student Organizations/Associations:* None.

Of Special Note: 100- and 200-level Spanish courses do not count toward major/minor requirements.

spsadv@uw.edu

The Department of Spanish and Portuguese Studies offers a program of graduate study leading to the Master of Arts degree.

The Master of Arts degree program in Hispanic Literary and Cultural Studies was reformed and updated in 2001 to foster study of Hispanic culture, literature, and language together. The program calls attention to the rich diversity of Hispanic cultural texts and to their interdisciplinary study while also promoting broad understanding of Spanish and Latin American literature. The program gives careful attention to acquainting students with the traditions of scholarship in the field as well as a range of current textual theory, criticism, and research methods.

Study of Portuguese and other Romance literatures and cultures, comparative literature, Romance and Spanish linguistics, and other related disciplines may be included in the master's degree program. The degree is earned normally in six academic quarters.

Students who wish to pursue advanced study in Spanish and Portuguese in a post-master's degree program may do so by entering the doctoral studies programs in Hispanic Studies of Comparative Literature or other departments of the University.

Master of Arts

Admission Requirements

1. Application for admission to the Graduate School
2. Three letters of recommendation
3. Unofficial transcripts. International applicants must also submit official transcripts to the Graduate School.
4. Academic autobiographical statement composed by the applicant in Spanish
5. A sample of the applicant's written work in Spanish in some area of Hispanic literature and culture. This may be a copy of a paper written for a course in the area of the applicant's major. An analytical or critical writing sample is preferred.
6. Graduate Record Examination (GRE) scores are required from applicants whose first language is English, and from applicants whose first language is not English who hold a bachelor's, master's, or doctoral degree from a regionally accredited university in one of the countries noted in Memo 8 from the Graduate School Memoranda. The GRE requirement is waived for applicants whose first language is not English, if they do not hold a bachelor's, master's, or doctoral degree from a regionally accredited university in one of the countries noted in Memo 8 from the Graduate School Memoranda.
7. Foreign students: Applicants whose native language is not English should note that the Graduate School requires proof of proficiency in the English language in one of the ways described in detail in Memo 8 of the Graduate School Memoranda. TOEFL (Test of English as a Foreign Language) or its computerized version (TOEFLC) or the Michigan Test and also the TSE (Test of Spoken English). A TOEFL score of 500 (or a TOEFLC score of 173) is required for admission, and a score of 580 (or 237 on the computerized form) is required for teaching assistant eligibility. Alternatively a Michigan Test score of 80 is required for admission and 90 for teaching assistantship eligibility. A minimum score of 55 is required on the TSE.8. Complete and upload Assistantship and Fellowship Application regardless of whether or not applicant is applying for a TA position.

8. Complete and upload Assistantship and Fellowship Application regardless of whether or not applicant is applying for a TA position. If applying for a Teaching Assistant position, the following is also required.
 - A digital voice recording (mp3 file format preferred) in which the applicant summarizes his/her reasons for applying to the graduate program and explains his/her interest in the TA position. Only spontaneous speech is considered. The recording must be in English for native Spanish speakers, and in Spanish for all other applicants.
 - Resume or Curriculum Vitae

Degree Requirements

1. A total of 60 applicable credits (500 level and above). To remain in good standing the student must maintain a 3.00 cumulative GPA. The minimum acceptable grade for any given course is 2.7.
2. Either SPAN 577, or an alternate graduate-level literary theory course which must be pre-approved by the Graduate Program Coordinator
3. SPAN 510 is required of all teaching assistants and is taken during or before a student's first quarter of teaching.
4. *Distribution requirement:* Minimum 5 credits (normally one course) must be earned in five of the six: Medieval Spain, "Golden Age" Spain; Spain of the eighteenth and nineteenth centuries; twentieth-century Spain; colonial and nineteenth-century Latin America; and twentieth-century Latin America.
5. MA candidates must pass an MA examination: During the first quarter of graduate study, students must select one area in which to be examined from the six areas of study specified above. They then have a year to prepare that field. Students may not write their MA thesis in the field they have chosen for their examination. The MA examination is written at the beginning of the fourth quarter of study (ordinarily fall quarter). The examination consists of one question, and the student has five hours to answer his/her question, with only a dictionary available for consultation. The examination in the chosen area is based on the MA reading list, available on this website: depts.washington.edu/spanport/programs/grad_readingList.html.
6. MA candidates must complete an MA Thesis: Students must take ten credits of MA thesis (SPAN 700) in their second year of study (5 credits in the fall quarter and 5 credits in the winter quarter). The MA thesis (minimum 45 pages of text, plus bibliography) is directed by a graduate faculty member and submitted to the Graduate Studies Committee for its approval by the end of the fifth quarter of study.
7. Admission to the Graduate School allows students to continue graduate study and research at University of Washington only as long as they maintain satisfactory performance and progress toward completion of their degree program. Details can be found here: depts.washington.edu/spanport/programs/grad_academicRequirement.html.

Financial Aid

The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the ten weeks of the quarter.

Applicants whose native language is not English must demonstrate English proficiency in one of the ways described in the Graduate School's Memorandum 15 to be considered for a TA position. For more information

see: www.grad.washington.edu/policies/memoranda/memo08.shtml;
www.grad.washington.edu/policies/memoranda/memo15.shtml.

Course Descriptions

Portuguese

PORT 103 Elementary Portuguese (5) Methods and objectives are primarily oral-aural. Covers all major elements of Portuguese grammar. Third in a sequence of three. Prerequisite: PORT 102.

PORT 105 Intensive Portuguese for Spanish Speakers (6) VLPA Covers the verbal system and major grammatical points. Does not satisfy foreign language requirement. Prerequisite: either SPAN 203 or SPAN 216, or either SPAN 301, SPAN 302, SPAN 303, SPAN 314, SPAN 315, or SPAN 316 any of which may be taken concurrently.

PORT 110 Accelerated Elementary Portuguese (5) Covers the equivalent of PORT 101 and PORT 102 to prepare for PORT 103. May not be taken in addition to PORT 101 or PORT 102.

PORT 199 Foreign Study: Elementary (2-16, max. 16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through PORT 103.

PORT 201 Intermediate Portuguese (5) VLPA Modern texts, compositions, conversation, and a systematic review of grammar. First in a sequence of three. Prerequisite: either PORT 103 or PORT 105.

PORT 202 Intermediate Portuguese (5) VLPA Modern texts, compositions, conversation, and a systematic review of grammar. Second in a sequence of three. Prerequisite: PORT 201.

PORT 203 Intermediate Portuguese (5) VLPA Modern texts, compositions, conversation, and a systematic review of grammar. Third in a sequence of three. Prerequisite: PORT 202.

PORT 299 Foreign Study: Intermediate (2-16, max. 16) VLPA Intermediate instruction in approved foreign study program. Further study at 200-level subject to department evaluation.

PORT 301 Advanced Portuguese (5) VLPA Emphasizes oral skills while continuing to refine reading comprehension and written expression. Aims to develop abilities to successfully deal with comprehension and production of oral texts of an academic and professional nature. Not a conversation course. Prerequisite: PORT 203.

PORT 310 Introduction to Lusophone Literature (3) VLPA Introduction to the studies of Lusophone literature and culture.

PORT 335 Twentieth Century Brazilian Fiction in English (5, max. 10) VLPA Reading texts in connection with cultural and theoretical issues.

PORT 365 Mapping Luso-Brazilian Cultures (5) I&S/VLPA Explores cultures of Brazil, Portuguese-speaking Africa, Asia, and Europe within the framework of cultural studies theory. Follows an interdisciplinary approach, drawing from readings, audio files (radio), films and documentaries in history, literature, arts and performances, anthropology, among others. Focuses on selected cultural aspects and countries. Taught in ENGLISH. Offered: jointly with JSIS A 365; Sp.

PORT 366 Port-Language Track for Mapping Luso-Brazilian Cultures (2) Language track option in Portuguese for intermediate or higher level students, in conjunction with PORT 365/JSIS A 365. Must be registered in PORT 365/JSIS A 365, to take this class. Explores readings and films/documentaries in the cultures of Brazil and the Portuguese-speaking world. Prerequisite: PORT 201 or permission of instructor. Offered: Sp.

Spanish

SPAN 101 Elementary Spanish (5) Methods and objectives are primarily oral-aural. Language laboratory is required. First in a sequence of three. Prerequisite: score of 0-15 on SP100A placement test if Spanish is language of admission. No credit if Spanish is the language of admission. Cannot be taken for credit if SPAN 121 already taken.

SPAN 102 Elementary Spanish (5) Methods and objectives are primarily oral-aural. Second in a sequence of three. Prerequisite: either SPAN 101, or score of 16-44 on SP100A placement test. Cannot be taken for credit if SPAN 122 already taken.

SPAN 103 Elementary Spanish (5) Methods and objectives are primarily oral-aural. Third in a sequence of three. Prerequisite: either SPAN 102, SPAN 110 or score of 45-69 on SP100A placement test. Cannot be taken for credit if SPAN 123 already taken.

SPAN 110 Basic Spanish Review (5) Covers the equivalent of SPAN 101 and SPAN 102 to prepare for SPAN 103. May not be taken in addition to SPAN 101 or SPAN 102. Prerequisite: score of 10-44 on SP100A placement test. Offered: AWSp.

SPAN 121 Spanish Immersion (5) Covers the equivalent of elementary Spanish (SPAN 101). Uses an alternative “planned immersion” method with video as the central medium of presentation. First in a sequence of three. Prerequisite: no previous Spanish study, or score of 0-

15 on SP100A placement test if Spanish is language of admission. Cannot be taken for credit if SPAN 101 already taken.

SPAN 122 Spanish Immersion (5) Covers the equivalent of elementary Spanish (SPAN 102). Uses an alternative “planned immersion” method with video as the central medium of presentation. Second in a sequence of three. Prerequisite: SPAN 121. Cannot be taken for credit if SPAN 102 already taken.

SPAN 123 Spanish Immersion (5) Covers the equivalent of elementary Spanish (SPAN 103). Uses an alternative “planned immersion” method with video as the central medium of presentation. Third in a sequence of three. Prerequisite: SPAN 122. Cannot be taken for credit if SPAN 103 already taken.

SPAN 134 Intensive First-Year Spanish (15) Intensive course. Covers the equivalent of SPAN 101, SPAN 102 and SPAN 103, the three courses of the first-year Spanish Language Program. Total credit will be reduced for students who have taken SPAN 101, SPAN 102, SPAN 103, SPAN 110, SPAN 121, SPAN 122, or SPAN 123. No prerequisites. Offered: S.

SPAN 199 Foreign Study - Elementary (1-16, max. 16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through SPAN 103.

SPAN 201 Intermediate Spanish (5) VLPA Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. First in a sequence of three. Prerequisite: either SPAN 103, SPAN 123, SPAN 134, score of 70-80 on SP100A placement test, or score of 0-75 on SP200A placement test.

SPAN 202 Intermediate Spanish (5) VLPA Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Second in a sequence of three. Prerequisite: either SPAN 201 or score of 76-145 on SP200A placement test.

SPAN 203 Intermediate Spanish (5) VLPA Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Third in a sequence of three. Prerequisite: either SPAN 202, SPAN 210, or score of 146-165 on SP200A placement test.

SPAN 207 Culture and Civilization in Spain (5) I&S/VLPA M. RANEDA CUARTERO Multi-disciplinary course that explores and examines particular aspects of the history, literature, art, society, and geography of Spain through a series of original readings and content-based activities that are specifically designed to encourage critical thinking and enhance linguistic proficiency in Spanish. Prerequisite: SPAN 203, may be taken simultaneously. Offered: W.

SPAN 216 Spanish for Heritage Learners (5) VLPA First of a four-course sequence designed for Heritage Spanish Speakers. Develops competence in students' reading and writing skills.

Helps heritage speakers master grammar points, improve presentational skills, and take into account the experience and influences of bilingual and bicultural upbringing.

SPAN 224 Spanish for Health Professionals I (3) Exposes students to a variety of medical terminology, providing opportunities for practicing medical-focused communication, and reading and analyzing written texts, as they would in a clinical setting. Not equivalent to any other Spanish language course. Prerequisite: either SPAN 201, or score of 76-145 on SP200A test.

SPAN 225 Spanish for Health Professionals II (3) Understand and use more complex structures of Spanish; with precision and fluency in the healthcare field. Starts with review of conducting a simple physical exam and follow-up on tests. Includes concepts such as learning to create a medical history, and discussing hospitalization/discharge of patients. Prerequisite: SPAN 224.

SPAN 226 Spanish for Health Professionals III (3) Helps students understand and use more complex structures of Spanish, with precision and fluency in the healthcare field. Includes independent research into topics of professional relevance and personal interest to students and topics of importance to Spanish-speaking populations in the United States and the Puget Sound region. Prerequisite: SPAN 225.

SPAN 227 Intermediate Conversation (2, max. 6) VLPA Focuses on developing intermediate conversation skills - listening and speaking - and increasing vocabulary in varying situations. Discussions are based on contemporary Spanish films, current articles, fiction, and essays. Not open to students whose native language is Spanish. Prerequisite: either SPAN 103, SPAN 123, or SPAN 134.

SPAN 237 Foreign Study - Intermediate Conversation (2-6, max. 6) VLPA For participants in approved foreign study programs. Prerequisite: either SPAN 103, SPAN 123, or SPAN 134.

SPAN 292 Experiential Learning in Spanish - Intermediate (1-3, max. 3) I&S An experiential learning project in an NGO or non-profit organization in the Spanish-speaking community that engages students in ways that supplement their formal in-class trainings. Prerequisite: SPAN 103.

SPAN 294 Special Topics in Spanish Literary/Cultural Studies (5, max. 10) VLPA Focuses on a special topic related to Spanish literary or cultural studies. Taught in English.

SPAN 299 Foreign Study - Intermediate (1-16, max. 16) VLPA Intermediate instruction in approved foreign study program. Further study at 200 level subject to placement test score.

SPAN 301 Advanced Spanish (5) VLPA Emphasizes oral skills while continuing to refine reading comprehension and written expression. It aims to develop the abilities to successfully deal with comprehension and production of oral texts of an academic and professional nature. Not a conversation course. Prerequisite: either SPAN 203 or score of 166-175 on SP200A placement test.

SPAN 302 Advanced Spanish (5) VLPA Develops writing techniques and strategies for the production of Spanish texts of an academic and professional nature. Prerequisite: SPAN 301 or SPAN 310, either of which may be taken concurrently.

SPAN 303 Advanced Spanish (5) VLPA Develops writing techniques and strategies for the creation of essays on literary criticism and cultural analysis. Prepares students to deal successfully with academic writing in Hispanic literature and culture courses. Prerequisite: either SPAN 302 or SPAN 310.

SPAN 304 Survey of Spanish Literature: 1140-1498 (3) VLPA Masterpieces of Spanish literature from origins to 1498. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330.

SPAN 305 Survey of Spanish Literature: 1498-1681 (3/5) VLPA Prerequisite: either SPAN 301, SPAN 302, SPAN 303, 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Gilbert

SPAN 306 Survey of Spanish Literature: 1681 to the Present (3/5) VLPA Prerequisite: either SPAN 301, SPAN 302, SPAN 303, 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Mercer

SPAN 307 Introduction to Latin American Literature: Colonial Era through Early Independence (3/5) VLPA *J. ROBLES RIVERA* Study of selected works from the sixteenth through the nineteenth century, with special emphasis on their historical and cultural relevance. Development of reading and writing skills. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330.

SPAN 308 Introduction to Latin American Literature: Independence to the Present (3/5) VLPA Study of selected works of twentieth-century Latin American literature and their sociohistorical context. Development of reading and writing skills. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330.

SPAN 309 Salamanders and Graffiti: Julio Cortazar's Fantastic Nightmares (3/5) VLPA *S. JAFFEE* Explores short fiction and theoretical readings by Argentine writer Julio Cortazar (1914-1984), studied in the context of the Latin American new-narrative “boom” and fantastical literature. Key concepts include: urbanization, visibility, otherness, international modernity, and Argentine history. Additional topics of study include: classical mythology, Renaissance art, American jazz, and French “new wave” cinema. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330.

SPAN 313 Business Communication in Spanish (5) VLPA *M. MEDIAVILLA* This intermediate level course offers students the opportunity to develop their Spanish language skills (reading, writing, speaking, and listening) within the context of the Spanish-speaking business world. Business-specific culture emphasized. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently.

SPAN 314 Spanish for Bilingual/Heritage Students (5) VLPA *Gillman* Provides bilingual students whose formal education has primarily been in English with the skills necessary to succeed in upper-division Spanish classes. Intensive review of grammar, readings of literary and journalistic texts, Web-based exercises, writing review, and a play to enhance their verbal skills. Offered: AW.

SPAN 315 Spanish for Bilingual/Heritage Students (5) VLPA Emphasizes reading, with attention to problems particular to Spanish-heritage students. Emphasis on critical reading, vocabulary expansion, and grammar review. Prerequisite: SPAN 314. Instructors: Gillman Offered: WSp.

SPAN 316 Stylistics and Composition for Heritage Students (5) VLPA *M. GILLMAN, A. WITTE* Emphasis on the process of writing essays to help students develop a notion of style in Spanish, with attention to problems particular to Spanish heritage students. Prerequisite: SPAN 315. Offered: ASp.

SPAN 317 Spanish and Latin American Literature in English Translation (5, max. 10) VLPA Spanish and Latin American literature in English translation, with consideration of their background and influence. Does not fulfill any major or minor requirement.

SPAN 318 Cervantes' Don Quixote in English (5) VLPA *Gilbert* Cervantes' Don Quixote de la Mancha: close study of this comic masterpiece, and the life, times, and works of its author. Consideration of the work's enduring influence and vitality. Does not fulfill any major or minor requirement.

SPAN 319 Mexican Literature (3) VLPA, DIV Analysis of selected works of Mexican literature from the second half of the twentieth century: short stories, poetry, essay, and theatre. Focus on issues such as nationalism and national identity, gender, ethnicity, dependent development, and globalization. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Witte

SPAN 321 Introduction to Hispanic Literary Studies (5) VLPA *A. WITTE* Acquaints the third-year student with elementary techniques of literary analysis, as applied to examples of narrative, poetry, and theater, within the context of the Spanish and Latin American literary traditions. Prerequisite: either SPAN 301 or SPAN 314, or SPAN 302, SPAN 303, SPAN 310, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently. Offered: W.

SPAN 322 Introduction to Hispanic Cultural Studies (5) VLPA/I&S Introduces students to elite, mass, and folk cultures of Latin America, Spain, and Latinos in the United States. Sample topics include transculturation, globalization, border culture, and relations between culture, democratization, and human rights. Prerequisite: either SPAN 301 or SPAN 314, or SPAN 302, SPAN 303, SPAN 310, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently. Instructors: Gomez-Bravo. Offered: Sp.

SPAN 323 Introduction to Spanish Linguistics (5) VLPA Synchronic and diachronic linguistic analysis of Spanish, including Spanish phonetics and phonology, morphology, syntax,

and evolution of the language. Prerequisite: either SPAN 301 or SPAN 314, or SPAN 302, SPAN 303, SPAN 310, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently. Offered: Sp.

SPAN 327 Advanced Conversation (2-6, max. 6) VLPA Focuses on developing advanced conversational skills - listening and speaking - to fluency and increasing vocabulary in varying situations. Discussions are based on contemporary Spanish films, current articles, fiction, and essays. Does not fulfill any major or minor requirement. Not open to students whose native language is Spanish. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently.

SPAN 328 Spanish Cultural Studies (5, max. 10) VLPA/I&S Focusing on historical, social, and ideological aspects of modern Spanish culture. Lectures, readings, discussions, and written work in Spanish. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314.

SPAN 329 Latin American Cultural Studies (5, max. 10) VLPA/I&S Focuses on historical, social, and ideological aspects of modern Latin American culture. Lectures, readings, discussions, and written work in Spanish. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314.

SPAN 331 Themes in Mexican-American Studies (5) VLPA/I&S Examination of significant historical and cultural themes of the Mexican-American experience. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently.

SPAN 332 Chicano Film and Narrative (5) VLPA/I&S Provides an historical overview of the evolution of Chicano culture through film. Critically examines the portrayal and self-portrayal of Chicanos in film and selected works of narrative. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently. Instructors: Flores

SPAN 333 Hispanic Film Studies (5) VLPA/I&S Introduction to major issues in the study of Hispanic cinema from various national contexts. The relationship of film to other types of narrative, and of film to society, specifically relations between class, gender, ethnicity, and artistic production, as well as between cinema and social change. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently. Instructors: Mercer

SPAN 334 Latin American Film (5) VLPA/I&S Overview of the history of Latin American cinema, including the new Latin American cinema of the 1960s; the development of strong film industries in Mexico, Cuba, and Brazil; and recent developments in the context of globalization and democratization. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently.

SPAN 335 Spanish and Latin American Film (5) VLPA/I&S Introduction to major issues in the study Hispanic Cinema from various national contexts as well as to film theory and the basics

of cinematic techniques. Relationship between film and class, gender and ethnicity. Taught in English. Prerequisite: SPAN 301 or SPAN 314.

SPAN 336 Creative Storytelling in Spanish (5) VLPA/I&S Introduction to the theory and practice of storytelling in Spanish. Helps prepare the Spanish language teacher for the classroom. Focuses on the improvement of presentation skills, creativity, and the integration of story in the (second) language classroom.

SPAN 337 Foreign Study Advanced Conversation (2-6, max. 6) VLPA For participants in foreign study program. Does not fulfill any major requirement. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently.

SPAN 339 Women Writers (3) VLPA Critical analysis of Chicana/Latina writers in the United States; or by Spanish-American, Luso-Brazilian, and Spanish women writers in their specific socio-historical context. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Diaz

SPAN 340 Introduction to Latin American Poetry (3) VLPA Traces the oral, musical, and written traditions of Latin American poetry. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330.

SPAN 350 Drama (3) VLPA Generic study of Spanish drama. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Gilbert

SPAN 351 Poetry (3) VLPA Generic study of Spanish poetry. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: O' Hara

SPAN 352 Fiction (3) VLPA Generic study of Spanish fiction. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Petersen

SPAN 360 Contemporary Spain (5) VLPA/I&S Social, political, and cultural developments in Spain since the end of the Franco dictatorship in 1975. Extensive use of Spanish Web sites. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Raneda Offered: jointly with JSIS A 360.

SPAN 390 Supervised Study (2-6, max. 20)

SPAN 392 Experiential Learning in Spanish (1-3, max. 3) Experiential learning project in the local Spanish-speaking community. Engages students in ways that supplement/enhance formal in-class language training. Prerequisite: SPAN 203. Credit/no-credit only.

SPAN 393 Foreign Study (1-10, max. 20) VLPA Study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330, any of which may be taken concurrently.

SPAN 394 Special Topics in Spanish Literature (3/5, max. 10) VLPA Focuses on an individual Spanish author or a special topic in Spanish literature. May be repeated once. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330. Instructors: Gomez-Bravo

SPAN 395 Special Topics in Latin American Literature (3/5, max. 10) VLPA *J. ROBLES RIVERA* Focuses on an individual Latin American author or a special topic in Latin American literature. May be repeated once. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330.

SPAN 396 Special Topics in Spanish Cultural Studies (3/5, max. 10) VLPA/I&S Focuses on a special topic related to Spanish cultural studies. Taught in English. Prerequisite: either SPAN 301, SPAN 302, SPAN 303, SPAN 310, SPAN 314, SPAN 315, SPAN 316, or SPAN 330.

SPAN 398 Special Topics in Spanish Linguistics (3-5, max. 10) VLPA Focuses on a special topics related to Spanish linguistic studies. May be repeated once. Prerequisite: either SPAN 301 or SPAN 314.

SPAN 400 The Syntactic Structure of Spanish (5) VLPA Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPLING 400.

SPAN 401 The Morphological Structure of Spanish (5) VLPA Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPLING 401.

SPAN 402 The Phonological Structure of Spanish (5) VLPA Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPLING 402.

SPAN 403 The Evolution of the Spanish Language (5) VLPA Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPLING 403.

SPAN 404 Dialects of World Spanish (5) VLPA *A. FERNANDEZ DOBAO* Introduction to dialectal variants of Spanish. Considers standardization and the real academia; variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar

variation. Taught in Spanish. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPLING 404.

SPAN 405 Hispanic Sociolinguistics (5) I&S/VLPA, DIV Theoretical and methodological foundations of Hispanic Sociolinguistics, and main advances in recent years. Examines the correlations between language and social factors such as gender, age, and socioeconomic status. Addresses issues like attitudes toward language, bilingualism in the United States, Spanish as a heritage language, and Spanish in contact with other languages. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPLING 405.

SPAN 406 Advanced Spanish Grammar (5) VLPA Problems of Spanish grammar. Differences from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Instructors: Fernandez-Mallat Offered: jointly with SPLING 406; A.

SPAN 407 Bilinguismo: Made in USA (5) VLPA/I&S Introduces students to the study of bilingualism, focusing on Spanish/English bilingualism in the United States. Explores bilingualism as both an individual and social phenomenon, and aims to raise students' awareness about its benefits as well as complexities. Taught in Spanish. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Instructors: Fernandez Dobao Offered: jointly with SPLING 407.

SPAN 408 Spanish Translation Workshop (5) VLPA Intensive practice in translation to and from Spanish. Texts include literary prose, poetry, expository writing, newspaper and magazine articles. Problems of standard versus colloquial language, transposition of cultural references, concept of fidelity in translation. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Instructors: Witte

SPAN 409 Translation For Performance (5) VLPA Focuses on the translation of a selection of one full length or several short plays from English into Spanish with special attention given both to translation methodology and to the particular challenges encountered when translating/adapting a play for performance. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400.

SPAN 410 Creative Writing in Spanish (5) VLPA Creative writing in poetry for students undertaking fourth year advanced coursework in Spanish literature. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: O' Hara

SPAN 414 Spanish Literature: Eighteenth Century (5) VLPA Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Mercer

SPAN 415 Spanish Literature: Nineteenth Century (5) VLPA Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Mercer

SPAN 416 Spanish Literature: 1900 to the Present (5) VLPA Spanish literature of the twentieth century prior to the Civil War to the present. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Geist, Mercer

SPAN 420 Spanish Poetry: Origins through the Fifteenth Century (5) VLPA Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Petersen

SPAN 423 Spanish Poetry: The Golden Age, Sixteenth through Seventeenth Centuries (5) VLPA Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Gilbert

SPAN 424 Hispanic Poetry: 1870 - 1936 (5) VLPA Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Geist

SPAN 433 Golden Age Prose (5) VLPA Representative, and outstanding, prose works of sixteenth- and seventeenth-century Spain. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Gilbert

SPAN 436 Spanish Novel of the Nineteenth Century (5) VLPA Representative works of Galdos, Clarin, Pereda, Valera, and Blasco Ibanez. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Mercer

SPAN 438 Spanish Novel: 1900 - Present (5) VLPA Spanish novel from the generation of 1898 to the present. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Geist

SPAN 439 Women Writers (5) VLPA/I&S, DIV Feminist analysis of selected texts by Chicana/Latina writers in the United States as well as by Spanish-American, Luso-Brazilian and/or Spanish women writers in their specific socio-historical contexts. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Diaz

SPAN 440 Spanish Drama: 1150-1600 (5) VLPA From the beginning to Lope de Vega. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Gilbert

SPAN 441 Spanish Drama: 1600-1635 (5) VLPA Spanish theatre of the seventeenth century, with emphasis on Lope de Vega. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Gilbert

SPAN 442 Latin American Colonial Theatre and Performance (5) VLPA *J. ROBLES RIVERA* Study of formal Spanish American theatre, performance, and theatricalization of power in political, religious, and social life. Emphasizing how indigenous and European forms combined to create unique forms of spectacle in the Americas. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 445 The Modern Theatre in Spain, 1700-1900 (5) VLPA Literature and historical context of Spain's theatre in the eighteenth and nineteenth centuries. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Mercer

SPAN 446 Modern Spanish Theatre: 1900 to Present (5) VLPA Examines works of Spain's major dramatists since 1900 and their relationship to Spain's changing social and political context. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Mercer

SPAN 447 Modern Latin American Theater (5) VLPA Study of the origin, development, and achievements of Latin American theater with an overview of its history prior to the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Witte

SPAN 449 Spanish Drama and Play Production (5, max. 10) VLPA Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Witte Credit/no-credit only.

SPAN 453 Cervantes and His Times (5) VLPA Study of Cervantes and his moment in Spanish history, with special attention to his cultural and artistic environment. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Gilbert

SPAN 457 Food, Ethnicity, and Identity in Hispanic Culture (5) I&S/VLPA A. RAFTERY Explores food, ethnicity, and identity in the Hispanic World, including Sephardic, Muslim, Native American, Basque, and Catalan groups. Taught in English. Prerequisite: Either SPAN 303 or SPAN 316; SPAN 322. Offered: jointly with JSIS B 457; Sp.

SPAN 458 Sexuality and Gender in Pre-Modern Spanish Culture (5) VLPA/I&S A. RAFTERY Offer an overview of the cultural, social, linguistic, and ideological constructions of gender and sexuality in the context of Spanish pre-modernities. Prerequisite: Either SPAN 303 or SPAN 316; SPAN 322 Offered: A.

SPAN 459 Hispanic Food and Culture (5) I&S/VLPA A. RAFTERY Introduction to food culture in the Hispanic world, with an overview of different periods and regions, and an emphasis on material culture, cultural practices, gender, ethnicity, and identity. Prerequisite: SPAN 303 or SPAN 316; SPAN 322. Offered: Sp.

SPAN 460 Sephardic Culture before 1492 (5) I&S/VLPA A. RAFTERY Explores Sephardic art. Music, food, film, literature, citizenship and nationhood, identity, and the origins of ladino, among other topics. Taught in English. Prerequisite: SPAN 303 or SPAN 316; SPAN 322. Offered: jointly with JEW ST 460; W.

SPAN 461 Topics in Latin American Cultural Studies (5, max. 10) VLPA/I&S J. ROBLES RIVERA Examines Latin American society and its cultural production. Major movements in the development of Latin American society and intellectual life as reflected in music, the visual arts, literature, etc. Specific topics vary. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322.

SPAN 462 Topics in Spanish Cultural Studies (5, max. 10) VLPA/I&S Examines Spanish society and its cultural production. Major movements in the development of Spanish society and intellectual life as reflected in music, the visual arts, literature, etc. Specific topics vary. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322. Instructors: Gomez-Bravo, Gilbert, Petersen

SPAN 464 Chicana Expressive Culture (5) VLPA/I&S Expressive culture of Mexican women in United States. Cultural and artistic practices in home, film, literary (print, oral), performing, and visual arts. Focuses on ways Chicana visual artists re-vision traditional iconography. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322.

SPAN 465 Contemporary Chicano Literature (5) VLPA Examines one or more problems, themes, and/or figures in the developing body of Chicano literature. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Flores

SPAN 466 Chicano Literature: Fiction (5) VLPA Examines nineteenth- and early twentieth-century fiction, as well as contemporary works in attempts to trace the development of Chicano fiction in the proper historical trajectory. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Flores

SPAN 467 Spanish Women (5) VLPA/I&S, DIV Women's culture in Spain, focusing on women's experience during Civil War; persecution and censorship of women activists, artists, intellectuals during Franco years; changes in women's culture brought about by reintroduction of democracy; major issues addressed by contemporary Spanish feminists. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322.

SPAN 468 Latin American Women (5) VLPA/I&S, DIV J. ROBLES RIVERA The elaboration of discourses of identity in relation to gender, ethnicity, social class, and nationality, by women writers from South America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women's experimental fiction. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Offered: jointly with GWSS 468.

SPAN 469 The Probable Improbability of Gabriel Garcia Marquez's Cien anos de soledad (5) VLPA S. JAFFEE Creative-Critical close reading of Garcia Marquez's novel *Cien anos de soledad* (1967) in the context of Latin American new-narrative "boom" and aesthetic philosophies of the marvelous real, magical realism, and Impressionism. Key concepts: myth, archive, chronology, storytelling, family, generation, invisibility, visibility, otherness/outside, and Colombian, Latin American, and world history Prerequisite: either SPAN 303, or SPAN 316 and SPAN 321

SPAN 472 Colonial Prose (5) VLPA J. ROBLES RIVERA Study of major genres of prose writing in Spanish America during the sixteenth through eighteenth centuries, including history writing, travel writing, historiography, and nascent forms of fictional writing. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 473 Latin American Fiction: Nineteenth Century (5, max. 15) VLPA J. ROBLES RIVERA Study of prose fiction in Latin America in the nineteenth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 474 Latin American Fiction: Twentieth Century (5) VLPA Study of prose fiction in Latin America in the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: O' Hara

SPAN 475 Latin American Poetry: Colonial through Nineteenth Century (5) VLPA J. ROBLES RIVERA Poetic movements of the seventeenth, eighteenth, and nineteenth centuries in Spanish American, Renaissance, baroque, neoclassicism, romanticism, and modernism. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 476 Contemporary Latin American Poetry (5) VLPA Evolution of Latin American poetry, from postmodernism and vanguardism to the most recent poetic expression: Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: O' Hara

SPAN 477 Latin American Essay (5) VLPA Literary expression of ideas in Latin American countries, nineteenth and twentieth centuries. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: O' Hara

SPAN 479 The City and Latin American Literature: Points of Departure (5) VLPA/I&S Representations of Latin American, United States, and European cities by Latin American authors, and of Latin American and Latino cities by authors from other literary traditions. The literary relation of urbanization to modernization, globalization, exile, and alienation. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: O' Hara

SPAN 480 Spanish Medieval Literature (5) VLPA Principal literary works of the Spanish Middle Ages in the context of evolving intellectual, spiritual, and artistic climates of the period. Covers the evolution of narrative and lyric prose and verse in both their traditional and learned manifestations. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Petersen

SPAN 481 Sixteenth- and Seventeenth-Century Spanish Literature (5) VLPA Spanish literature of the sixteenth and seventeenth centuries. Close study of key texts from all genres as well as their socio-historical contexts. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Gilbert

SPAN 482 Eighteenth- through Twentieth-Century Spanish Literature (5) VLPA Survey of Spanish literature since 1700, and its historical context. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Mercer

SPAN 483 Latin American Literature: Origins to Independence (5) VLPA J. ROBLES RIVERA The elaboration of discourses of legitimization by the Spanish conquistadores, and of resistance and accommodation by native and mestizo peoples; the development of a New World Baroque aesthetic; literatures of independence from Spain and of nation-building. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 484 Latin American Literature: Modernismo to the Present (5) VLPA Principal literary movements of Latin America, late nineteenth century to the present, with particular emphasis on poetry and narrative: modernismo, postmodernismo, the vanguard, nueva and novísima narrativa. Includes essays and autobiographical writings to help place the literary works in socio-historical perspective. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: O' Hara

SPAN 485 Desmadre patria: Latin American Myth in Film and Literature (5) VLPA S. *JAFFEE* Reviews films from Mexico, Cuba, Peru, Colombia, Argentina, and Brazil (1960's to the 2000's), and literary, theoretical, historical, and critical readings on ongoing preoccupations in national consciousness. Topics of study include: civilization and barbarism; religion and revolution; urban migration; the idea of a shared identity as patria; and racial fetish and stereotype. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 486 Photography and Cultural Studies in Latin America (5) VLPA/I&S Interdisciplinary exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322. Instructors: Steele Offered: jointly with JSIS A 486.

SPAN 487 Mexican Cinema (5) VLPA/I&S Analysis of representative films about post-revolutionary Mexico by directors from both the Golden Age of Mexican Cinema (1940-1960) and the Mexican New Film movement (1975-the present). Revolutionary nationalism, modernization and its discontents; construction of gender, class, and ethnicity; migration and globalization. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Steele

SPAN 488 The Fantastic in Latin American Literature (5) VLPA Introduction to the Fantastic in literature, in contrast to realism, and how the concept has been adapted by Latin American authors. May focus on a particular writer: Augusto Monterroso (Guatemala) or Julio Cortazar (Argentina), or survey various authors. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: O' Hara

SPAN 489 The Mexico-U.S. Border in Literature and Film (5) VLPA/I&S, DIV Analysis of the Mexico-U.S. Border region in literature and film of the 1990s and early 2000s. Includes migration, tourism, NGOs, globalization, transnational commerce, multiculturalism, and politics of gender, sexuality, and race. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321. Instructors: Steele Offered: jointly with JSIS A 489.

SPAN 490 Honors Seminar (2-5, max. 10) VLPA Special studies in Spanish literature. Required of candidates for Honors and Distinction in Spanish.

SPAN 491 Individual Authors and Special Topics in Spanish Literature (5, max. 10) VLPA Focus on an individual Spanish author or a special problem in Spanish literature. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 492 Individual Authors and Special Topics in Latin American Literature (5, max. 10) VLPA Focuses on an individual Latin American author or a special problem in Latin American literature. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321.

SPAN 493 Foreign Study (2-10, max. 20) VLPA Advanced study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; either SPAN 304, SPAN 305,

SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, SPAN 394, or SPAN 395.

SPAN 495 Study in Spain (2-10, max. 20) VLPA Advanced study in Spain in approved foreign study programs. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, SPAN 394, or SPAN 395.

SPAN 498 Special Topics in Spanish Linguistics (5, max. 10) VLPA Focuses on a special topic related to Spanish linguistic studies. May be repeated once. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400.

SPAN 499 Special Topics (1-5, max. 10) Topics to meet special needs.

SPAN 510 Methodology of Spanish Language Teaching (5) *Fernandez Dobao* Theoretical and practical foundations of current trends in second/foreign language teaching. Emphasis on communicative and task-based approaches to Spanish language teaching. Required for beginning Spanish teaching assistants. Credit/no-credit only.

SPAN 521 The Renaissance in Spain (5, max. 20) *Gilbert* Literary creation and the cultural, social, historical context of Spanish literature from *La Celestina* through the sixteenth century. Extensive study of secondary materials, intensive analysis of representative literary texts.

SPAN 522 The Renaissance in Spain (5, max. 20) *Gilbert* Literary creation and the cultural, social, historical context of Spanish literature from *La Celestina* through the sixteenth century. Extensive study of secondary materials, intensive analysis of representative literary texts.

SPAN 541 Topics in Spanish Applied Linguistics (5) *A. FERNANDEZ DOBAO* Selected topics in Applied Linguistics. Discusses current theoretical approaches to the study of Applied Linguistics problems, with a special focus on Spanish. Examines empirical research from these different approaches and their main contributions to the field. Introduces Applied Linguistics research methods.

SPAN 542 Topics in Spanish Second Language Acquisition (5) *A. FERNANDEZ DOBAO* Selected topics in Second language Acquisition. Discusses current theoretical approaches to the study of Second Language Acquisition problems, with special emphasis on Spanish Second Language Acquisition. Examines empirical research from these different approaches and their main contributions to the field. Introduces Second Language Acquisition research methods.

SPAN 561 Spanish-American Novel From 1940 to the Present (5, max. 20)

SPAN 571 The Modern Essay in Spanish America (5, max. 20)

SPAN 572 Twentieth-Century Spanish Poetry (5, max. 20)

SPAN 573 Twentieth-Century Spanish-American Poetry (5, max. 20)

SPAN 575 Literary Criticism (5)

SPAN 577 Contemporary Literary Theory (5) *D. GILBERT* Introduction to various structuralist and poststructuralist theories of literary analysis, including those developed by Hispanic theorists, and their application to the study of texts from the Spanish and Latin American traditions.

SPAN 590 Special Seminar and Conference (1-10, max. 30) Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of the Graduate Program Coordinator.

SPAN 591 Literary Problems: Middle Ages (5, max. 20) *Gomez-Bravo, Petersen*

SPAN 592 Literary Problems: Renaissance (5, max. 20) *Gomez-Bravo*

SPAN 593 Literary Problems: Golden Age (5, max. 20) *D. GILBERT*

SPAN 594 Literary Problems: Eighteenth Century (5, max. 20)

SPAN 595 Literary Problems: Nineteenth Century (5, max. 20)

SPAN 596 Literary Problems: Twentieth Century (5, max. 20)

SPAN 597 Literary Problems: Spanish-American Colonial Literature (5, max. 20) *J. ROBLES RIVERA*

SPAN 598 Literary Problems: Latin America (5, max. 20) *E. O'HARA*

SPAN 600 Independent Study or Research (*-)

SPAN 610 Reading Credit for Graduate Exams (5) Reading preparation for MA and PhD exams.

SPAN 700 Master's Thesis (*-) Credit/no-credit only.

SPAN 800 Doctoral Dissertation (*-) Credit/no-credit only.

Spanish Linguistics

SPLING 400 The Syntactic Structure of Spanish (5) VLPA Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 400.

SPLING 401 The Morphological Structure of Spanish (5) VLPA Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 401.

SPLING 402 The Phonological Structure of Spanish (5) VLPA Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 402.

SPLING 403 The Evolution of the Spanish Language (5) VLPA Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 403.

SPLING 404 Dialects of World Spanish (5) VLPA A. FERNANDEZ DOBAO Introduction to dialectal variants of Spanish. Considers standardization and the real academia; variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar variation. Taught in Spanish. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 404.

SPLING 405 Hispanic Sociolinguistics (5) I&S/VLPA, DIV Theoretical and methodological foundations of Hispanic Sociolinguistics, and main advances in recent years. Examines the correlations between language and social factors such as gender, age, and socioeconomic status. Addresses issues like attitudes toward language, bilingualism in the United States, Spanish as a heritage language, and Spanish in contact with other languages. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 405.

SPLING 406 Advanced Spanish Grammar (5) VLPA Problems of Spanish grammar. Differences from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Instructors: Fernandez-Mallat Offered: jointly with SPAN 406; A.

SPLING 407 Bilinguismo: Made in USA (5) VLPA/I&S Introduces students to the study of bilingualism, focusing on Spanish/English bilingualism in the United States. Explores bilingualism as both an individual and social phenomenon, and aims to raise students' awareness about its benefits as well as complexities. Taught in Spanish. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 323, LING 200, or LING 400. Instructors: Fernandez Dobao Offered: jointly with SPAN 407.

Speech and Hearing Sciences

Department Overview

210 Eagleson Hall

Speech and hearing sciences concern the processes and disorders of human communication and swallowing across the life span. This includes the study of typical hearing, speech, and language, cognitive-communication, and swallowing development; anatomy and physiology of speech, hearing, and swallowing; speech acoustics and perception; the nature of language, speech, cognitive-communication, swallowing, and hearing disorders in children and adults; social and cultural aspects of communication disorders; and the clinical processes involved in identification, prevention, and remediation of those disorders.

Undergraduate Program

Adviser

210 Eagleson, Box 354875

206-685-7403

shugadv@uw.edu

The Department of Speech and Hearing Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in speech and hearing sciences
- An accelerated, fee-based, Bachelor of Science degree with a major in speech and hearing sciences for candidates with an existing bachelor's degree.

Bachelor of Science

Suggested First and Second-Year College Courses: Introductory course in anthropology, public health, psychology, or sociology; introductory biological science course – BIOL 118 recommended; introductory course in physics or chemistry – PHYS 107, PHYS 110, or CHEM 110 recommended; statistics course – STAT 220 or EDPSY 490 recommended.

Department Admission Requirements

Admission is competitive. The admissions committee reviews all applicants based on the following criteria: GPA (minimum 2.50 overall GPA guarantees consideration but not admission); personal statement reflecting an interest in and commitment to speech and hearing sciences; other evidence of a commitment to becoming a speech and hearing sciences major. Students may apply any time after they have earned 75 credits. The application deadline for current UW students is Monday of the third week of the quarter for admission the next quarter; transfer students may apply to the department (if they are at or near junior standing) and to the University concurrently. Admission is for autumn, winter, or spring quarter. Only students

admitted to the UW are eligible for admission to the major. Applicants are notified of the department's decision within four weeks. Applications and additional information are available outside 210 Eagleson and on the department's website.

Students who meet admission requirements are eligible for one of two options:

- Option 1, General Academic, is intended to provide broad perspectives of the discipline, but not to prepare students specifically for careers in clinical speech-language pathology and audiology. It is appropriate for students with interests in education, healthcare, and communication.
- Option 2, Speech and Hearing Sciences and Disorders, is intended for students interested in graduate study in speech and hearing sciences and clinical speech-language pathology and audiology. (Note that graduate study is required for the professional practice as a speech-language pathologist and audiologist.)

Major Requirements

62-75 credits as follows:

1. *Core Requirements (28 credits)*: SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 320, SPHSC 371, SPHSC 461
2. Approved 3-5 credit college-level human- or animal-based biological science, anatomy and physiology, neuroanatomy and neurophysiology, human genetics, or veterinary science course. Laboratory component not required. See adviser for approved list.
3. Approved 3-5 credit college-level psychology, sociology, anthropology, or public health course. See adviser for approved list.
4. Approved 3-5 credit college-level chemistry or physics course. Laboratory component not required. See adviser for approved list.
5. Approved 3-5 credit college-level statistics course. See adviser for approved list.
6. 22-27 credits from an approved option:
 - a. Option 1, General Academic: 22 credits as follows:
 - i. Minimum 2.00 cumulative GPA in core requirements
 - ii. 22 credits from the following: SPHSC 305, SPHSC 308, SPHSC 405, SPHYSC 406, SPHSC 425, SPHSC 462, SPHSC 471, SPHSC 481, SPHSC 499 (6 credits maximum)
 - b. Option 2, Speech and Hearing Sciences and Disorders: 27 credits as follows:
 - i. Minimum 3.00 cumulative GPA in core requirements
 - ii. SPHSC 305, SPHSC 308, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 471, SPHSC 481
7. Minimum 2.00 cumulative GPA for all courses applied to the major

Post-baccalaureate Program

The fee-based postbaccalaureate program is designed for individuals who already have a bachelor's degree or an advanced degree in a discipline other than speech and hearing sciences and wish to obtain the necessary academic background to apply directly to a graduate program. This is an intensive program designed to take five quarters with a mandatory summer start. Postbaccalaureate students have matriculated status as they are working toward a second bachelor's degree in preparation for graduate school.

Admissions Requirements

Postbaccalaureate program admission is based on multiple factors: the overall academic record from the first bachelor's or advanced degree, the personal statement, the letters of recommendation and the perceived commitment to speech, language, and hearing sciences.

Applying is a two-part process. The applicant is responsible for ensuring both the UW Office of Admissions and the Speech and Hearing Sciences Department receive the application materials by the February 15 deadline. Incomplete applications are not processed. Admission to SPHSC is contingent upon admission to UW. See the [program website](#) for details on the two-part admission process.

1. Bachelor's degree or advanced degree outside the area of speech and hearing sciences
2. Statement of purpose
3. All college-level transcripts
4. Three letters of recommendation sent to the department. The SPHSC recommendation form is available on the department website, depts.washington.edu/sphsc/. However, a letter is acceptable in lieu of the recommendation form. Students should read and fill out the top section of the recommendation form before giving it to the evaluator.

Degree Requirements

Minimum 64 credits as follows:

SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 305, SPHSC 308, SPHSC 320, SPHSC 371, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 449, SPHSC 461, SPHSC 471, SPHSC 481

In addition, the American Speech-Language-Hearing Association (ASHA) requires the following four course requirements for anyone seeking certification in speech-language pathology and audiology. Courses are taken outside the Speech and Hearing Sciences Department, can be any number of credits, and can be taken for a grade or satisfactory/not-satisfactory. If students need to complete these courses prior to graduate school, they can be added to the postbaccalaureate program.

- Statistics course

- Biological science course (biology, anatomy & physiology, neuroanatomy & neurophysiology, human genetics, or veterinary science)
- Physical science course (physics or chemistry)
- Social or behavioral science course (psychology, sociology, anthropology, or public health)

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the department adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The graduate (1) has knowledge of the following: mechanisms involved in speech, language, and hearing; societal implications of language differences and of disorders of speech, language, and hearing; opportunities in, and requirements for, careers available to those in the speech and hearing sciences; (2) understands the following: normal acquisition of speech and language; the etiology and nature of communication disorders across the lifespan; principles and procedures for diagnosis and treatment of speech, language, and hearing disorders; the manner in which context (specifically, situation, social/interpersonal, and culture context) influences communication and disorders; social-cultural aspects of communication development and disorders; (3) has the following abilities: to analyze language in terms of its auditory, phonetic, phonological, morphological, and syntactic properties; to utilize strategies for solving scientific problems; to read and understand relevant literature; (4) has experience with a research project
- *Instructional and Research Facilities:* classrooms, research laboratories, computer laboratory, and clinic located in the department and in nearby campus buildings
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Faculty welcome undergraduate students into their research labs, offering independent study research opportunities (SPHSC 499), in addition to mentored, year-long honors research projects (SPHSC 498). No formal internship programs offered. See adviser for community-based service learning and internship opportunities.
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* The National Student Speech Language Hearing Association (NSSLHA) UW chapter, 153 Eagleson Hall.

Graduate Program

Graduate Student Services
Eagleson Hall, Box 354875
206-685-7402
shgrad@uw.edu

The department offers four graduate degree programs that equip students to do research, teach at the college and university level, and provide clinical services to the communicatively impaired.

- The Master of Science in Speech-Language Pathology (MS SLP)
- The Master of Science in Medical Speech-Language Pathology (MS MedSLP)
- The Doctor of Audiology (AuD)
- The Doctor of Philosophy (PhD)

At the MS and AuD level, specific focus is on evidence-based clinical procedures involved in the identification, prevention, and remediation of communication disorders. Students meet all requirements of the Certificate of Clinical Competence (CCC) granted by the American Speech-Language-Hearing Association (ASHA), the professional, scientific, and credentialing organization for speech-language pathology and audiology professionals.

At the PhD level, the program provides opportunities for development of scholarly and professional competence in various areas of specialization: speech and language acquisition, phonetics, speech production, hearing, hearing development, psychoacoustics, physiological acoustics, speech perception, and assessment and treatment of human communication disorders related to language, speech, and hearing.

Master of Science in Speech-Language Pathology (MS SLP)

Entrance is for autumn quarter only. The department does not accept transfer students, Graduate Non-Matriculated (GNM) applicants, or applicants interested in a non-clinical master's degree.

Admission Requirements

1. Complete UW Graduate School application between September 15 and January 15, to include the following:
 - a. Department's supplemental application
 - b. Unofficial transcripts for all schools attended
 - c. Official GRE scores earned within the last five years
 - d. Three letters of recommendation
 - e. Personal statement
 - f. Resume

2. Minimum 3.00 GPA for the last 90 quarter credit hours of study (60 semester)
3. English language proficiency
4. Bachelor's degree from a regionally accredited institution with a major in speech and hearing sciences (communication disorders, communication sciences and disorders, or a similarly named major) or in another major with sufficient undergraduate coursework in speech and hearing sciences (communication disorders, communication sciences and disorders, or a similarly named program)
5. Prerequisite undergraduate coursework as required by the American Speech-Language-Hearing Association's (ASHA) accreditation standards and guidelines.
 - a. Speech and hearing sciences coursework across these areas of knowledge:
 - i. Linguistics
 - ii. Phonetics/language science
 - iii. Anatomy and physiology of the speech mechanism
 - iv. Speech and language acquisition/development
 - v. Speech and language disorders
 - vi. Hearing science/nature of sound
 - vii. The hearing mechanism
 - viii. Hearing disorders
 - ix. Audiometry
 - x. Aural rehabilitation/management of hearing loss
 - xi. Social cultural aspects of communication
 - xii. Principles of assessment
 - xiii. Principles of treatment
 - b. Basic science and statistics coursework: one course in each of the following areas:
 - i. Biological science (biology, anatomy & physiology, neuroanatomy & neurophysiology, human genetics, or veterinary science)
 - ii. Social or behavioral science (psychology, sociology, anthropology, or public health)
 - iii. Physical science (physics or chemistry)
 - iv. Statistics
6. Minimum 25 documented, clinical observation hours within the scope of practice of speech-language pathology, under direction of an ASHA-certified speech-language pathologist.

Degree Requirements

Minimum 108 credits

1. *Didactic (57 credits)*: SPHSC 500, SPHSC 501, SPHSC 506, SPHSC 529, SPHSC 531, SPHSC 532, SPHSC 533, SPHSC 534, SPHSC 535, SPHSC 536, SPHSC 537, SPHSC 538, SPHSC 539, SPHSC 540, SPHSC 565
2. *Clinical (43 credits)*
 - a. Minimum 43 credits from SPHSC 591, SPHSC 551, SPHSC 552, SPHSC 555, either SPHSC 601 or SPHSC 602. Includes completion of a pre-internship and a full-time internship in a community-based clinical facility.
 - b. Minimum 375 clock hours of supervised clinical experience in the practice of speech-language pathology.
3. *Electives*: Either adult-emphasis path or pediatric-emphasis path (8 credits)
 - a. *Adult-emphasis path*: one from SPHSC 541, SPHSC 545, SPHSC 546, or SPHSC 548, and two out-of-department elective courses
 - b. *Pediatric-emphasis path*: SPHSC 526, SPHSC 543, SPHSC 550
4. *Thesis (optional)*: SPHSC 700 (minimum 9 credits)
5. *Additional Requirements*: 36 credits of non-clinical practicum work at the 400 level or above. Minimum 18 of these 36 credits in courses numbered 500 and above. Maximum 9 thesis credits at 500 level or above. Completion of requirements for the Certificate of Clinical Competence (CCC) of the American Speech-Language-Hearing Association.

Master of Science in Medical Speech-Language Pathology (MS MedSLP)

Entrance is for autumn quarter only. The department does not accept transfer students, Graduate Non-Matriculated (GNM) applicants, or applicants interested in a non-clinical MS degree.

Admission Requirements

1. Complete UW Graduate School Application between September 15 and January 15, to include the following:
 - a. Department's supplemental application
 - b. Unofficial transcripts for all schools attended
 - c. Official GRE scores earned within the last five years
 - d. Three letters of recommendation
 - e. Personal statement
2. Minimum 3.00 GPA for the last 90 quarter credit hours of study (60 semester)
3. Demonstrated English language proficiency
4. Bachelor's degree from a regionally accredited institution with a major in speech and hearing sciences (communication disorders, communication sciences and disorders, or a

similarly named major) or in another major with sufficient undergraduate coursework in speech and hearing sciences (communication disorders, communication sciences and disorders, or a similarly named program).

5. Completed prerequisite undergraduate coursework as required by the American Speech-Language-Hearing Association's (ASHA) accreditation standards and guidelines.
 - a. Speech and hearing sciences coursework across these areas of knowledge:
 - i. Linguistics
 - ii. Phonetics/language science
 - iii. Anatomy and physiology of the speech mechanism
 - iv. Speech and language acquisition/development
 - v. Speech and language disorders
 - vi. Hearing science/nature of sound
 - vii. The hearing mechanism
 - viii. Hearing disorders
 - ix. Audiometry
 - x. Aural rehabilitation/management of hearing loss
 - xi. Social cultural aspects of communication
 - xii. Principles of assessment
 - xiii. Principles of treatment
 - b. Basic science and mathematics coursework. Minimum one course in each of the following areas:
 - i. Biological science (biology, anatomy & physiology, neuroanatomy & neurophysiology, human genetics, or veterinary science)
 - ii. Social or behavioral science (psychology, sociology, anthropology, or public health)
 - iii. Physical science (physics or chemistry)
 - iv. Statistics
6. Minimum 25 documented, clinical observation hours within the scope of practice of speech-language pathology, under direction of an ASHA certified speech-language pathologist.

Degree Requirements

Minimum 114 credits

1. *Didactic (72 credits)*: SPHSC 500, SPHSC 501, SPHSC 506, SPHSC 507, SPHSC 529, SPHSC 531, SPHSC 532, SPHSC 533, SPHSC 534, SPHSC 535, SPHSC 536, SPHSC

537, SPHSC 538, SPHSC 539, SPHSC 540, SPSHC 541, SPSHC 543, SPSHC 545, SPHSC 546, SPHSC 548, SPHSC 549, SPHSC 565

2. *Clinical (42 credits)*

- a. 42 credits of SPHSC 553 and SPHSC 554. Includes a full-time internship in a community-based clinical facility.
- b. Minimum 375 clock hours of supervised clinical experience in the practice of speech-language pathology. Includes completion of a pre-internship and a full-time internship in a community-based clinical facility.

3. *Thesis (optional):* SPHSC 700 (minimum 9 credits)

4. *Additional Requirement:* 36 credits of non-clinical graduate work at the 400 level or above. Minimum 18 of these 36 quarter credits in courses numbered 500 and above. Maximum 9 thesis credits at the 500 level and above. Satisfactory completion of all didactic and practicum requirements detailed above. Completion of requirements for the Certificate of Clinical Competence (CCC) of the American Speech-Language-Hearing Association.

Doctor of Audiology

Entrance is for autumn quarter only. The department does not accept transfer students, Graduate Non-Matriculated (GNM) applicants, or applicants interested in a non-clinical AuD degree.

Admission Requirements

1. Complete UW Graduate School Application between September 15 and January 15, to include the following:
 - a. Departmental's supplemental application
 - b. Unofficial Transcripts for all schools attended
 - c. Official GRE scores earned within the last five years
 - d. Three letters of recommendation
 - e. Personal statement
 - f. Resume
2. Minimum 3.00 GPA for last 90 quarter credit hours of study (60 semester)
3. Demonstrated English language proficiency
4. Bachelor's degree from a regionally accredited institution

Undergraduate Coursework: Foundational coursework is required for the graduate degree and clinical certification in audiology. The department encourages, but does not require, students to complete foundational coursework prior to starting graduate study.

1. Basic science and mathematics: Minimum one undergraduate course in each of the following areas to be eligible for ASHA certification: biological science; social or behavioral science; physical science; statistics. See adviser for list of acceptable courses.

2. Speech and hearing sciences coursework. Undergraduate coursework in normal development of speech and language; and in language and speech disorders across the life span, to be eligible for ASHA certification.
3. If undergraduate coursework is not completed prior to graduate study, students take one or more of the following speech and language courses during their graduate program: SPHSC 250, SPHSC 304, SPHSC 305, SPHSC 425.

Degree Requirements

Minimum 186 credits

1. *Didactic (minimum 82 credits)*: SPHSC 462, SPHSC 503, SPHSC 504, SPHSC 509, SPHSC 521, SPHSC 522, SPHSC 523, SPHSC 542, SPHSC 570, SPHSC 571, SPHSC 572, SPHSC 574, SPHSC 575, SPHSC 576, SPHSC 577, SPHSC 579, SPHSC 580, SPHSC 581, SPHSC 582, SPHSC 583, SPHSC 584, SPHSC 585, SPHSC 586, SPHSC 588, SPHSC 592, SPHSC 593
2. *Clinical (minimum 92 credits)*
 - a. 2 credits of SPHSC 552
 - b. 50 credits of SPHSC 591
 - c. 40 credits of SPHSC 601
3. *Practice Doctorate/Capstone Research Coursework (minimum 12 credits)*
 - a. Minimum 12 credits of SPHSC 801
 - b. Statistics at the 400 level or above (e.g., EDPSY 490)
 - c. Written document and oral defense of research
4. *Additional Degree Requirement*: 36 credits of non-clinical graduate work at the 400 level or above. Minimum 18 of these 36 quarter credits in courses numbered 500 and above. No more than 12 credits of courses 500 level and above in 801 capstone research credits. Completion of requirements for the Certificate of Clinical Competence (CCC) of the American Speech-Language-Hearing Association

Doctor of Philosophy

Entrance is for summer or autumn quarter only. The department does not accept Graduate Non-Matriculated (GNM) applicants.

Admission Requirements

1. An identified faculty mentor from within the department who officially agrees to support the application.
2. UW Graduate School Application completed between September 15 and February 15. Submit the following to the department by February 15:
 - a. Unofficial transcripts for all schools attended

- b. Official GRE scores earned within the last 5 years
 - c. Three letters of recommendation
 - d. Statement of Purpose
 - e. Writing sample or paper
 - f. Department's supplemental application
3. Minimum 3.00 GPA for the last 90 quarter credit hours of study (60 semester)
 4. Demonstrated English language proficiency
 5. Bachelor's or master's degree from a regionally accredited institution, depending upon area of interest

Degree Requirements

Minimum 90 credits

Includes 36 credits of graduate work at the 400 level or above and a minimum 18 of the 36 quarter credits in courses numbered 500 and above.

1. *Academic Coursework*: For students with a prior undergraduate or graduate degree in speech and hearing sciences (minimum 41 credits as follows):
 - a. SPHSC 560, SPHSC 561, and SPHSC 562 (minimum 9 credits)
 - b. SPHSC 504, SPHSC 506, or approved alternative (minimum 3 credits)
 - c. Four statistics courses (chosen in consultation with advisory committee). (minimum 14 credits)
 - d. SPHSC 568 (minimum 3 credits)
 - e. SPHSC 567; research seminar series (minimum 12 credits) Required autumn, winter, and spring quarters throughout the program
 - f. *Other Coursework*: Students with a degree in a field other than speech and hearing sciences complete the following: SPHSC 303; SPHSC 320; SPHSC 461; plus one of the following: SPHSC 250; SPHSC 305; SPHSC 371
2. *Research Coursework*: (minimum 43 credits). Pre-dissertation (16 credits) and dissertation (27 credits). All students conduct supervised research by the end of their first year.
3. *Teaching Experience*: (minimum 6 credits)
 - a. Instructional Development Forum (minimum 2 credits)
 - b. Teaching Practicum (minimum 1 credit) For students pursuing an academic career
 - c. Other Coursework: (3 credits)

Financial Aid

PhD students are guaranteed financial support as teaching or research assistants as long as they make adequate progress in the program.. In addition, the department has traineeships/fellowships supported by the National Institutes of Health on a competitive basis. Students are strongly encouraged to apply to the National Institutes of Health or other funding agencies for individual fellowships to support dissertation work. Summer support, although not guaranteed, can also generally be arranged.

Research Facilities

The department's research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, the Institute for Learning and Brain Sciences, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Center on Human Development and Disability also provide laboratories to support basic and applied research in speech, language and hearing development and disorders, across the life span.

Course Descriptions

SPHSC 100 Voice and Articulation Improvement (3) VLPA For native speakers of English only. Voice production and the sound system of standard American speech. Speech standards, regional and social dialects, voice quality and basic language-oriented characteristics. Practice for improving speech style. May not be repeated. Offered: AWSpS.

SPHSC 111 The American English Sound System (2, max. 4) For non-native speakers of English only. Speech sounds of American English. Practice in listening and using American speech sounds and intonation patterns. Credit/no-credit only. Offered: AWSpS.

SPHSC 250 Human Communication and Its Disorders (5) I&S/NW Overview of normal and impaired human communication, including speech, language, and hearing disorders. Required for majors; open to nonmajors. Offered: S.

SPHSC 261 The Nature of Sound (4) NW Fundamental principles of sound and vibration with emphasis on examples relevant to the speech and hearing systems. Required for majors; open to nonmajors. Offered: WS.

SPHSC 302 Phonetics (3) VLPA *M. Kapsner-Smith* Introduction to the description and classification of speech sounds with a focus on American English. Phonetic analysis of segmental and suprasegmental properties of speech. Practice using the International Phonetic Alphabet to transcribe normal and disordered speech patterns. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, LING 200, or LING 400. Offered: W.

SPHSC 303 Language Science (3) VLPA *J. Thorne* Introduction to techniques of linguistic analysis used in the study of phonology, morphology, syntax, semantics, and pragmatics. Required for majors; open to nonmajors. Offered: A.

SPHSC 304 Developmental Aspects of Communication (5) I&S *T. Coggins* Patterns of communicative development in English speaking children and adolescents. Introduction to the study of language and communication from a developmental perspective. Application to children with various types of communication impairments. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, ANTH 203, LING 200, or LING 400. Offered: Sp.

SPHSC 305 Speech and Language Disorders (5) NW Etiology and nature of developmental and acquired communication disorders across the lifespan. Behavioral characteristics of language delay and disorders, developmental apraxia of speech, phonological disorders, stuttering, acquired aphasia, apraxia of speech and dysarthria, craniofacial anomalies, and voice disorders. Required for majors; open to nonmajors. Prerequisite: SPHSC 302; SPHSC 304; SPHSC 320. Offered: A.

SPHSC 306 Acquired Communication and Swallowing Disorders (3) NW *C. Baylor* Etiology and nature of acquired speech, language, cognitive-communication and swallowing disorders in adult and geriatric populations. Behavioral characteristics and common treatment approaches related to neurological and other conditions such as stroke, traumatic brain injury, dementia, degenerative diseases, and head and neck cancer. Prerequisite: SPHSC 250; SPHSC 302; SPHSC 303; SPHSC 304; and SPHSC 320 Offered: W.

SPHSC 308 Social-Cultural Aspects of Communication (3) I&S *P. DOWDEN* Introduction to human communication in context. Exploration of ways communication is influenced by context, including situational, social/interpersonal, and cultural variables. Studies systems and cultural practices as they influence communication. Required for majors; open to nonmajors. Offered: WS.

SPHSC 320 Anatomy and Physiology of Speech (5) NW *M. Burns* Anatomy and physiology of the speech and swallowing mechanism, including the respiratory, phonatory, and resonatory systems and the neural control. Examples and laboratory work are directed toward clinical issues in speech-language pathology. Required for majors; open to nonmajors. Offered: Sp.

SPHSC 371 Hearing Disorders (3) I&S/NW *K. Tremblay* Introduction to abnormal hearing. Pathologies of the ear and their treatments. Audiometric correlates, communicative and social consequences of hearing loss. Overview of management of children and adults. Required for majors; open to nonmajors. Offered: AS.

SPHSC 405 Diagnosis of Speech and Language Disorders (3) NW *J. Thorne* Principles and procedures for the diagnosis of speech and language disorders. Required for majors. Prerequisite: SPHSC 305. Offered: W.

SPHSC 406 Treatment of Speech and Language Disorders (4) NW *C. BAYLOR* Principles and procedures for planning, implementing, and evaluating treatment for speech and language disorders. Required for majors. Prerequisite: SPHSC 405. Offered: SpS.

SPHSC 411 Perceptual Development (5) I&S/NW Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch,

vision, audition. Prerequisite: minimum 2.0 grade in either PSYCH 206, PSYCH 306, or PSYCH 414. Instructors: Meltzoff Offered: jointly with PSYCH 411.

SPHSC 425 Speech, Language, Hearing, and the Brain (4) I&S/NW Addresses the neural bases of topics in speech, language, and hearing with an emphasis on the normal aspects of central nervous system anatomy, physiology, and function. Gives attention to issues relevant to understanding disordered systems and to points of contemporary debate among neuroscientists. May not be repeated. Offered: W.

SPHSC 445 Models of Speech Processing (3) NW Examines models and basic issues concerning how spoken language is processed. Presents current issues, theories, and research relative to the levels of processing entailed in producing and comprehending speech. Required for majors; open to nonmajors.

SPHSC 449 Special Studies in Speech Pathology and Audiology (*, max. 30) M. BURNS Selected special problems in speech pathology and audiology. Offered: S.

SPHSC 461 Introduction to Hearing Science (5) NW L. Werner Basic aspects of hearing and the ear and auditory nervous system. How the auditory system constructs an image of the acoustic environment. How attention and memory influence hearing. Effects of damage to the auditory system. Prerequisite: either SPHSC 261 or PSYCH 333. Offered: Sp.

SPHSC 462 Hearing Development (3) NW L. WERNER Description of the changes that occur in human hearing during development. Consideration of the possible explanations for early immaturity. Prerequisite: SPHSC 461; may not be repeated. Offered: A, odd years.

SPHSC 471 Basic Audiometry (4) NW R. FOLSOM Theory and practice of the assessment of hearing function, including standard pure-tone audiometry, speech audiometry, and basic impedance audiometry. Required for majors. Prerequisite: SPHSC 371; SPHSC 461; may not be repeated. Offered: A.

SPHSC 481 Management of Hearing Loss (4) NW J. Sullivan Introduction to methods of communicative rehabilitation of person with hearing loss. Remediation principles of auditory and visual perception, amplification, communication strategies, and information counseling. Required for majors. Prerequisite: SPHSC 471; may not be repeated. Offered: W.

SPHSC 491 Audiology Practicum in Schools (2) R. FOLSOM Special projects in clinical audiology practicum, offered only in the school setting. Provides an opportunity for students to extend audiology practicum experiences into the school environment. Prerequisite: SPHSC 371. Credit/no-credit only. Offered: AS.

SPHSC 498 Undergraduate Honors Research ([1-5]-, max. 15) Faculty supervised, undergraduate Honors research project. Includes design and implementation, culminating in written thesis and oral presentation. SPHSC Honors Program students only. Offered: AWSpS.

SPHSC 499 Undergraduate Research ([1-5]-, max. 15) Offered: AWSpS.

SPHSC 500 Clinical Methodology for Documenting Change (4) *P. DOWDEN* Introduction to clinical methodology for conducting efficacious assessment and treatment of individuals with communication problems. Students consider nature of intervention designed to alter communication disorders and types of accountability questions that need to be raised. They learn methodology for collecting and analyzing data for making informed clinical decisions. Offered: A.

SPHSC 501 Neural Bases of Speech, Language, and Hearing (4) *Burns, Miller* Neuroanatomical and neurophysiological bases of language, hearing, sensory, and motor function. Special emphasis given to brain behavior correlates and behavioral consequences to speech, language, and hearing as a result of neurologic injury or disease. Offered: A.

SPHSC 503 Current Issues in Speech and Hearing Sciences (3) Application of experimental methods to research in speech and hearing sciences. Offered: S.

SPHSC 504 Research Methods in Speech and Hearing Sciences (3) *S. KOVER* Introduction to empirical methods in the speech and hearing sciences. Offered: W.

SPHSC 506 Research Methods in Speech-Language Pathology (3) *S. KOVER* Examines empirical methods in speech-language pathology research. Includes evaluation and design of different types of research such as descriptive (e.g., case study, developmental, qualitative, surveys), exploratory (e.g., correlational, differential), and experimental (e.g., single-subject designs, randomized control trials, treatment efficacy studies). Offered: W.

SPHSC 507 Evidence Based Practice (3) *P. DOWDEN* Prepares students to conduct evaluation and treatment in speech-language pathology according to Evidence-Based Practice (EBP) principles. Examines integration of “internal” and “external” evidence in the context of clinical practice. Prerequisite: graduate status in SPHSC or permission of instructor. Offered: Sp.

SPHSC 509 Advanced Hearing Science (3) Consideration of physiological acoustics and psychoacoustics, the pertinent literature, and the experimental techniques related to study in these areas. Offered: A.

SPHSC 510 Physiological Acoustics (3) Study of pertinent literature and experimental techniques incident to the physiology of the normal and abnormal auditory system. Prerequisite: SPHSC 461 or permission of instructor.

SPHSC 511 Psychoacoustics (3) Review of significant literature and theory pertinent to normal auditory sensitivity, pitch, loudness, and other attributes of auditory sensation. Prerequisite: SPHSC 461; permission of instructor.

SPHSC 514 Speech Physiology (3) Study of the physiological parameters of acoustic speech production. Prerequisite: SPHSC 560.

SPHSC 518 Seminar in Speech and Hearing Sciences (1, max. 50) *L. MAX* Reviews selected research area and methods in the speech and hearing sciences. Discusses topics related to developing a career in research or academics. Credit/no-credit only. Offered: AWSp.

SPHSC 519 Seminar in Speech Science (2, max. 50)

SPHSC 520 Advanced Instrumentation for Speech and Hearing Sciences (3) Design and use of electronic and electroacoustic devices in the speech and hearing sciences. Four hours of laboratory required each week.

SPHSC 521 Instrumentation for Audiology (4) Introduction to basic instrumentation used in audiology and hearing science; detailed instruction in audiometer calibration including a review of current national and international standards pertinent to audiology; emphasis on use rather than theory. Prerequisite: permission of instructor. Offered: A.

SPHSC 522 Hearing Instrument Modification/Repair (1) *M. HARNEY* Minor repair and modification of hearing aids, earmolds and associated accessories. Includes operation of hand tools and small power tools used in repair and earmold modification. Familiarity with different materials used to make or repair hearing aids/accessories. Troubleshooting damaged, malfunctioning, or inoperative instruments. Interpreting acoustic and electroacoustic test results to aid in troubleshooting or repair. Credit/no-credit only. Offered: W.

SPHSC 523 Special Topics in Audiology (3, max. 12) *K. TREMBLAY* Applied and theoretical issues related to audiology. Weekly seminar includes guest speakers discussing current and future trends in science that relate to hearing and the practice of audiology. Offered: W, even years.

SPHSC 525 Speech Signal Processing (3) Theory, evaluation, and use of speech signal processing algorithms such as sampling, filtering, spectral analysis, autocorrelation, and speech synthesis. Laboratory assignments develop skills in using signal analysis and synthesis software applied to normal and pathological speech.

SPHSC 526 Assessment and Treatment of Literacy Disorders (3) *L. SNOW* Examines the principles and procedures used in the assessment and treatment of literacy disorders with an emphasis on childhood literacy disorders as well as the relationship between verbal language impairment and literacy skills. Prerequisite: SPHSC 536. Offered: S.

SPHSC 529 Assessment and Treatment of Birth-to-4 Communication Disorders (4) *T. COGGINS* Examination of measurement concepts, standardized reference measures, and non-standardized assessment tools for communication and related skills in young children. Presents theoretical and empirical bases of prelinguistics and early language interventions. Offered: W.

SPHSC 531 Neurogenic Motor Speech Disorders (4) *K. SPENCER* Examines the nature, assessment, and management of the dysarthrias, acquired apraxia of speech, and childhood apraxia of speech. Prerequisite: SPHSC 501 or permission of instructor. Offered: Sp.

SPHSC 532 Assessment and Treatment of Neurogenic Language Disorders (3) D. KENDALL Provides an overview of the nature, evaluation, and management of acquired disorders of language in adults. Specifically, students learn about language assessment principles and procedures; the nature and treatment of aphasia, alexia, and agraphia; and the systems that support language (e.g. attention, verbal working memory). Prerequisite: SPHSC 501 or permission of instructor. Offered: W.

SPHSC 533 Medical Speech Pathology (3) Nature of speech pathology practiced in medical settings. Prerequisite: SPHSC 501, SPHSC 531, and SPHSC 532, or permission of instructor. Offered: S.

SPHSC 534 Assessment and Treatment of Dysphagia (4) Anatomophysiologic bases of function and dysfunction associated with speech-language disorders. Mastication and swallowing problems, their causes, assessments, and management. Prerequisite: SPHSC 501 or permission of instructor. Offered: Sp.

SPHSC 535 Assessment and Treatment of Voice Disorders (4) T. EADIE Physiology, acoustics, and perception of voice quality and speech resonance. Etiology, evaluation, and treatment of voice and resonance disorders. Offered: W.

SPHSC 536 Assessment and Treatment of School-Age Communication Disorders (4) S. KOVER Examines the principles and procedures used in the assessment and treatment of school-aged speech-and-language disorders. Offered: Sp.

SPHSC 537 Fluency Disorders (4) L. MAX Characteristics of fluent speech and the nature and treatment of stuttering in children and adults are studied in relation to normal speech production processes, human learning, principal explanations of stuttering, and treatment systems. Offered: A.

SPHSC 538 Assessment and Treatment of Cognitive-Communication Disorders (3) K. SPENCER Studies right brain injury, dementia, and traumatic brain injury for understanding of the underlying neuropathologies, techniques for assessment, and evidence-based interventions. Offered: A.

SPHSC 539 Childhood Speech and Phonological Disorders (4) Examines patterns of normal speech and phonological development and the nature, assessment, and treatment of speech and phonological disorders of childhood. Offered: A.

SPHSC 540 Augmentative and Alternative Communication Foundations (4) P. DOWDEN Overview of evaluation and intervention for children and adults with severe congenital speech and language impairments, with primary emphasis on individuals with congenital impairments. Overview of the features of multi-modal strategies, including output, selection set, access, and rate enhancement. Prerequisite: graduate SPHSC, REHAB, or EDSPE students, or permission of instructor. Offered: S.

SPHSC 541 Augmentative and Alternative Communication in the Medical Setting (2) *P. DOWDEN* Evaluation and intervention for severe acquired speech/language impairments. Covers decision-making and treatment for individuals who sustained a CVI, traumatic brain injury, or have degenerative diseases. Solutions include multi-modal strategies, from books to voice output systems. Prerequisite: SPHSC 540 or permission of instructor. Offered: Sp.

SPHSC 542 Counseling and Interactive Skills for Speech-Language Pathologists and Audiologists (3) *L. ILLICH* Introduction to counseling theory and practice in speech-language pathology, audiology, and related fields. Provides opportunities for learning and practicing counseling skills. Addresses key counseling issues, including professional boundaries, intense emotions, and counselor's feelings and reactions. Prerequisite: graduate standing in SPHSC or permission of instructor. Offered: S.

SPHSC 543 Assessment and Treatment of Pediatric Dysphagia (2) *J. DUNLAP* Examines principles and procedure used in the assessment and treatment of pediatric swallowing and feeding disorders. Covers clinical and instrumental assessment techniques and evidenced-based intervention strategies applicable to the infant/child across different pediatric practice settings. Prerequisite: SPHSC 501; SPHSC 534; or permission of instructor. Offered: W.

SPHSC 545 Assessment and Treatment of Voice Disorders in Medical Settings (2) *T. EADIE, M. NEVDAHL* Examines the principles and procedures used in assessment and treatment of voice disorders typically seen in medical settings, with a focus on instrumentation such as use of interpretation of laryngeal imaging, acoustics, and perceptual measures. Prerequisite: SPHSC 535. Offered: A.

SPHSC 546 Advanced Neurological Language Disorders (2) *D. KENDALL* Advanced study in the nature, assessment, and treatment of acquired language and cognitive-communication disorders. Prerequisite: SPHSC 501; SPHSC 532; or permission of instructor. Offered: W.

SPHSC 548 Traumatic Brain Injury Seminar (2) *K. SPENCER* Advanced study in the nature, assessment, and management of individuals with traumatic brain injury across the lifespan. Prerequisite: SPHSC 501; SPHSC 538, or permission of instructor. Offered: Sp.

SPHSC 549 Clinical Forum in Speech-Language Pathology (2, max. 50) Study and application of pertinent clinical issues and trends related to the practice of speech-language pathology. Prerequisite: successful completion of all required didactic and clinical practica coursework in the first two years of the medical speech-language pathology graduate program. Credit/no-credit only. Offered: Sp.

SPHSC 550 Public School Speech-Language Pathology and Audiology (3) *K. KRINGS* Explores administrative, legal, ethical, and clinical issues encountered in implementing programs to remediate communication disorders in the school-aged population in the public school setting. Open to non-matriculated students with permission of instructor. Prerequisite: graduate student status in speech and hearing sciences or permission of instructor. Offered: W.

SPHSC 551 Advanced Practicum in Speech Pathology Evaluation (1-10, max. 50)

Laboratory experience in the evaluation of speech and language disorders. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

SPHSC 552 Advanced Practicum in Speech Pathology Management (1-10, max. 50)

Laboratory experience in the management of speech and language disorders. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

SPHSC 553 Advanced Practicum in Speech-Language Pathology (2-4, max. 50)

Clinical practicum experience, completed under the supervision of UW Speech and Hearing Clinic professionals, focused on the evaluation and treatment of speech, language, cognitive-communication, and swallowing disorders. Offered: AWSpS.

SPHSC 554 Advanced Offsite Practicum in Speech-Language Pathology (2-12, max. 50)

Offsite clinical practicum experience, completed under the supervision of community-based clinical professionals, focused on the evaluation and treatment of speech, language, cognitive-communication, and swallowing disorders. Prerequisite: SPHSC 553. Offered: AWSpS.

SPHSC 555 Pre-Internship in Speech and Hearing Sciences (1-10, max. 50)

Practicum in speech pathology or audiology designed to teach the clinical regimen of a participating professional center prior to assuming a full internship assignment. Credit/no-credit only. Offered: AWSpS.

SPHSC 556 Advanced Aural Rehabilitation (4, max. 8)

K. TREMBLAY Advanced study of auditory rehabilitation and training, including psychosocial issues of individuals with hearing loss. Merges research theories with clinical practice and provides experience with applied auditory training in a community setting. Credit/no-credit only. Offered: A.

SPHSC 559 Special Topics in Speech, Language, and Hearing (1-5, max. 30)

Guided opportunity for study and advanced discussions in specific areas of speech, language, and hearing science research, theory, and clinical practice. Offered: AWSpS.

SPHSC 560 Speech Science (3)

Examines contemporary models and research paradigms in speech science and disorders. Topics include respiratory physiology, laryngeal physiology, aerodynamics of speech production, articulatory dynamics, speech acoustics, and speech perception. Offered: W, odd years.

SPHSC 561 Studies in Hearing Sciences and Disorders (3)

Examines contemporary models and research paradigms in the area of hearing science and disorders. Topics include psychoacoustics; amplification; electrophysiological evaluation; physiological acoustics; and perceptual consequences of hearing loss. Offered: A, even years.

SPHSC 562 Studies in Language Science and Disorders (3)

Examines research in the area of language science and disorders including word recognition and production; storage of retrieval of word form and meaning; comprehension and production of sentences and discourse; and

language in social context. Topics examined relative to development, language impairments, and normal language processing. Offered: Sp, odd years.

SPHSC 563 Instructional Development Forum (1, max. 50) Emphasizes instructional techniques and issues as they relate to teaching in the discipline of communication sciences and its disorders. Topics include course development, grading, student-faculty relations, teaching methods, and diversity. Prerequisite: graduate standing in Speech and Hearing Sciences. Credit/no-credit only. Offered: AW.

SPHSC 564 Teaching Practicum (1-5, max. 50) Provides experience in preparing and giving lectures, leading discussions, preparing and grading assignments and tests, and working directly with undergraduate and graduate students. Prerequisite: doctoral student standing in SPHSC and permission of instructor. Credit/no-credit only. Offered: AWSpS.

SPHSC 565 Speech and Language Pathology Proseminar (1-3, max. 50) Consideration of professional issues and student and faculty research. Credit/no-credit only. Offered: AWSpS.

SPHSC 567 Research Seminar in Speech and Hearing Sciences (1, max. 50) A platform for the presentation and exchange of scientific information (research data, new hardware and hardware development, scientific papers) resulting from ongoing research projects by graduate students and faculty within the Speech and Hearing Sciences Department. Credit/no-credit only. Offered: AWSpS.

SPHSC 568 Grant Writing in Hearing, Language, and Speech Science (3) L. WERNER Design and writing of grant proposals in speech, language, and hearing sciences and disorders. Explanation of the funding process at various agencies, particularly the National Institutes of Health. Students prepare a proposal and review the proposals of their peers. Prerequisite: Enrollment in PhD degree program and permission of instructor. Credit/no-credit only. Offered: W.

SPHSC 570 Assessment of Auditory Dysfunction I (4-) Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471 or equivalent. Offered: A.

SPHSC 571 Assessment of Auditory Dysfunction II (-4) Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 570. Offered: W.

SPHSC 572 Pediatric Audiology (4) L. MANCL Assessment of auditory disorders in infants and young children. Emphasis on behavioral and electrophysiologic techniques and on the role of the audiologist in the clinical management of the young hearing-impaired child. Prerequisite: SPHSC 570 or equivalent. Offered: W.

SPHSC 574 Assessment of Balance Function (4) Examines normal anatomy and physiology of the peripheral and central vestibular system. Reviews peripheral and central vestibular disorders and treatment protocols. Major focus of assessment on electronystagmography with associated

lab. Provides overview of rotational and posturography measures of balance function. Prerequisite: SPHSC 571 or permission of instructor. Offered: S.

SPHSC 575 Medical Backgrounds in Audiology (3) Diseases and injuries of the ear resulting in reduced audition. Prerequisite: SPHSC 571 or permission of instructor. Offered: S.

SPHSC 576 Otoacoustic Emissions (2) *R. FOLSOM* Consideration of otoacoustic emissions and the physiologic techniques used to record them. Includes interpretation of responses in both the normal and disordered auditory system as well as clinical application of emissions in both adult and infant populations. Laboratory required. Prerequisite: SPHSC 571, SPHSC 572, and SPHSC 592, or permission of instructor. Offered: A.

SPHSC 577 Industrial and Community Hearing Conservation (2) Psychophysiological effects of environmental noise on man. Techniques of noise measurement and attenuation, including the planning of hearing conservation programs in industry and in the community. Prerequisite: SPHSC 571 or permission of instructor. Offered: S, odd years.

SPHSC 578 Hearing Screening (2) Consideration of hearing screening programs and the statistical techniques used to evaluate them. Includes history, rationale, and technical aspects of hearing screening as well as current models for developing neonatal, school-age, and adult hearing screening programs. Prerequisite: SPHSC 572, SPHSC 576, and SPHSC 592, or permission of instructor. Offered: S, even years.

SPHSC 579 Geriatric Audiology (2) *S. ANDERSON* Examines the biological, psychological, and social aspects of the aging process. Emphasizes the identification and diagnosis of hearing problems associated with the aging process and its rehabilitation. Prerequisite: SPHSC 571. Offered: Sp.

SPHSC 580 Rehabilitative Audiology (3) *L. ILLICH* Explores technology to enhance communication effectiveness of hearing impaired persons. Selection and training in the use of assistive systems and cochlear implants. Advanced perception assessment and training methodology. Discussion and application of aural rehabilitation in different settings. Explores the Americans with Disabilities Act and assistive listening devices. Prerequisite: SPHSC 571 and SPHSC 583. Offered: W.

SPHSC 581 Management of Hearing-Impaired Children (3) *J. SULLIVAN* Studies pediatric habilitation available for children with hearing impairment and the impact of new technologies on therapy, education, and audiological treatment. Offered: Sp.

SPHSC 582 Hearing Aid Amplification (4) *C. MILLER* Acoustic amplification and methods of determining electroacoustic characteristics. Includes earmold technology. Prerequisite: SPHSC 471 and SPHSC 570 or permission of instructor. Offered: W.

SPHSC 583 Hearing Aid Selection (4) *C. MILLER* Consideration of strategies utilized in selecting and fitting acoustic amplification for the hearing impaired, including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor. Offered: Sp.

SPHSC 584 Advanced Amplification (3) *C. MILLER* Current topics in hearing aids and amplification technology; review of pertinent research articles. Prerequisite: SPHSC 582; SPHSC 583. Offered: A, even years.

SPHSC 585 Pediatric Hearing Technology and Habilitation (4) *L. MANCL* Examines the selection, verification, and validation of hearing technology for infants and children. Studies habilitation available to children with hearing loss, including factors that influence outcomes. Prerequisite: SPHSC 582 or permission of instructor. Offered: A.

SPHSC 586 Cochlear Implants (5) *J. BIERER* Covers the history, function, and application of cochlear implants as a clinical tool to enhance or restore human hearing, including fitting procedures, outcomes, and rehabilitation for children and adults. Prerequisite: permission of instructor. Offered: Sp.

SPHSC 587 Ethics (3) Analysis and discussion of ethical considerations in the clinic, and in research, for speech and hearing professionals. Covers codes of professional organizations.

SPHSC 588 Audiology Proseminar (1-3, max. 9) *M. HARNEY* Consideration of professional issues, practice management, and externship preparation. Credit/no-credit only. Offered: AWSp.

SPHSC 591 Advanced Practicum in Audiology (1-10, max. 75) Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

SPHSC 592 Electrophysiologic Assessment I (4) *R. FOLSOM, K. TREMBLAY* Consideration of physiologic techniques that may be used to evaluate the normal and disordered auditory system. Outside laboratory required. Prerequisite: SPHSC 461 or equivalent, SPHSC 571. Offered: Sp.

SPHSC 593 Electrophysiologic Assessment II (3) *R. FOLSOM, K. TREMBLAY* Examines event-related potentials including recording techniques, neurophysiological mechanisms, and applications to clinical populations. Prerequisite: SPHSC 592. Offered: W, odd years.

SPHSC 594 Capturing Brain Dynamics: A Combined Neuroscience and Engineering Approach (4) *A. LEE* Introduces methods for capturing brain dynamics using an emerging neuroimaging technique known as magnetoencephalography (MEG). Uses techniques to examine perception and cognitive processes and their implications for future brain-computer-interface (BCI) design. Prepare students for interdisciplinary research in neuroscience and engineering. Offered: jointly with LING 582; W.

SPHSC 596 Clinical Education in Audiology (1-10, max. 50) *M. HARNEY* Laboratory experience in audiology. Credit/no-credit only. Offered: AWSpS.

SPHSC 599 Research Practicum (*, max. 50) Supervised laboratory experience in experimental approach to problems in speech and hearing sciences. Prerequisite: permission of instructor. Offered: AWSpS.

SPHSC 600 Independent Study or Research (*-) Prerequisite: permission of instructor.
Offered: AWSpS.

SPHSC 601 Internship ([1-10]-, max. 50) Supervised field experiences in settings other than public schools. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

SPHSC 602 Internship in the Schools ([3-10]-, max. 50) Supervised field experience in a public school setting. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

SPHSC 700 Master's Thesis (*-) Offered: AWSpS.

SPHSC 800 Doctoral Dissertation (*-) Offered: AWSpS.

SPHSC 801 Practice Doctorate Project/Capstone ([1-12]-, max. 50) Supervised research experience in the field of audiology that culminates in a final research paper and oral defense. Offered: AWSpS.

Statistics

Department Overview

B309 Padelford

Probability provides the conceptual foundation and mathematical language for the logic of uncertainty and induction. Statistics is concerned with procedures for the acquisition, management, exploration, and use of information in order to learn from experience in situations of uncertainty and to make decisions under risk. Statistical practice includes design of experiments and of sampling surveys; exploration, summarization, and display of observational data; drawing inferences, and assessing their uncertainty; and building mathematical models for systems with stochastic components.

Instruction is enriched through academic contacts with the Foster School of Business; the College of Engineering; the departments of Applied Mathematics, Atmospheric Sciences, Biology, Cardiology, Computer Science, Earth and Space Sciences, Economics, Genetics, Mathematics, Psychology, Radiology, and Sociology; the Quantitative Ecology and Resource Management program; the Center for Statistics and the Social Sciences; the Applied Physics Laboratory; the Applied Statistics Division of the Boeing Company; Microsoft Research; and Insightful Corporation. The department has an especially close relationship with the Department of Biostatistics; for example, the two departments are jointly developing new curricula in statistical genetics.

Undergraduate Program

Adviser

B309 Padelford, Box 354322
206-543-8296

The Department of Statistics offers the following programs of study:

- The Bachelor of Science degree with a major in statistics. Provides training in theoretical foundations of statistics, statistical modeling and methodology, and applied data analysis. Also offered is a Data Science option that in addition emphasizes computation and data management.
- In conjunction with the departments of Applied Mathematics, Computer Science and Engineering, and Mathematics, the Bachelor of Science degree with a major in applied and computational mathematical sciences (ACMS).
- A minor in statistics

Bachelor of Science

Suggested First-and Second-Year College Courses: CSE 142; MATH 307, MATH 308, STAT 302 (recommended) or CSE 143, STAT 311. Additional courses in the sciences and quantitative methods add strength to this major.

Department Admission Requirements

Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered once each academic year and are due on the first Friday of September.

Minimum course requirements for admission applications as follows:

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
2. One of STAT 311 (highly recommended), STAT 390, or an approved substitute. See website for approved list.
3. At least two additional courses from CSE 142, either STAT 302 (recommended) or CSE 143, MATH 307, MATH 308
4. Factors in the admission decision include but are not limited to academic performance as measured by GPA in courses listed above and any additional advanced quantitative courses presented for application consideration.
5. Admission is competitive. Successful applicants typically have a cumulative GPA higher than 3.00 in courses listed above under course requirements, with no individual course grade lower than 2.5.

Major Requirements

Minimum 70 credits

1. *Mathematics (30 credits):* either MATH 124, MATH 125, MATH 126, MATH 300, MATH 307, MATH 308, MATH 327, and MATH 328; or the Honors sequence MATH 134, MATH 135, MATH 136, MATH 334, MATH 335, and MATH 336.
2. *Computing (7-9 credits):* For the major in statistics: CSE 142; either STAT 302 (recommended), CSE 143, or an approved substitute. For the data science option: 9 credits from the following: CSE 142, CSE 143, STAT 302, CSE 160, CSE 163
3. *Statistics (24-27 credits):* STAT 311 (highly recommended), or STAT 390, or an approved substitute (STAT 220, STAT 221, or STAT 301 which is seldom allowed); either STAT 340 (highly recommended) or both STAT 394/MATH 394 and STAT 395/MATH 395. (Note that both STAT 394/MATH 394 and STAT 395/MATH 395 are required to replace STAT 340 as a prerequisite for STAT 341.) STAT 341, STAT 342, STAT 421, STAT 423. (STAT 342 is required for enrollment in STAT 421 or STAT 423 by a statistics major; STAT 390 is not sufficient for a statistics major.)

4. *Electives:* For the major in statistics: at least three courses for a minimum total of 9 credits. Elective choices require prior approval of the Statistics undergraduate adviser. For the data science option: two courses from STAT 435, STAT 403, STAT 425; CSE 491, SOC 225, or another 1-credit seminar covering privacy, security, ethics, and societal implications of data science; CSE 414 or INFO 340; one of the following: HCDE 411, INFO 474, CSE 412, CSE 442
5. Minimum 2.0 grade in all courses used to satisfy major requirements.
6. Minimum 2.50 cumulative GPA for all courses used to satisfy major requirements.

A “Majors Factsheet” is available from the Statistics department.

Minor

Minor Requirements: 26 credits, as follows:

1. MATH 126 or MATH 136 (5 credits)
2. STAT 302, STAT 390/MATH 390, STAT 394/MATH 394, STAT 395/MATH 395 (13 credits)
3. either STAT 425/BIOST 425 or STAT 396/MATH 396 (3 credits)
4. Minimum 5 credits of approved electives. See adviser for approved list.
5. Minimum grade of 2.0 in each course used to satisfy minor requirements
6. Maximum 5 credits may be applied to a student’s major.
7. At least 20 credits must be taken through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Statistics emphasizes decision making in the face of uncertainty. Tools developed by the major include probability theory, mathematical statistics, experience with data analysis, and use of statistical tools via the computer. Graduates have pursued careers in actuarial science, financial planning, drug development, statistical consulting, teaching, public health, military science, aerospace, computer technology, and forest resources.
- *Instructional and Research Facilities:* Computer workstations are available on a drop-in basis through the College of Arts & Sciences Instructional Computing Laboratory. Tutoring in a set of introductory statistics courses is currently available at the Statistics Tutor and Study Center.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* A special seminar series for undergraduates is offered in conjunction with the ACMS program.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* The Actuary Club at the University of Washington

Graduate Programs

Graduate Program Coordinator
B309 Padelford, Box 354322
206-685-7306

The graduate programs emphasize both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. Computing facilities in the department reflect the department's expertise in the field of statistical computing. An ongoing statistical consulting program provides students practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers master of science and doctor of philosophy degrees.

Admission Requirements

1. Background in mathematics, statistics, or a quantitative field, with 30 or more quarter credits in mathematics and statistics, to include a year of advanced (second-year) calculus, one course in linear algebra, and one course in probability theory
2. Graduate Record Examination scores (the Advanced Mathematics subject test is encouraged but not required)
3. Three letters of recommendation from appropriate former or current faculty

Master of Science

Degree Requirements (36-49 credits)

Part-time/Concurrent Track (minimum 36 credits)

At least twelve approved courses numbered 400 or above (minimum 36 credits); of these, at least six courses numbered in the 500 series (exclusive of STAT 512, STAT 513) – minimum 18 credits or more, representing a coherent theme. Approved proficiency in statistical computing. Satisfactory participation in statistical consulting and the departmental seminar. Passage of an appropriate final master's examination or successful completion of a master's thesis which can count as up to three courses worth 9 credits but cannot replace any of the six courses in the 500 series mentioned above. All programs must be approved by the departmental Graduate Program Coordinator.

Advanced Methods and Data Analysis Track (minimum 49 credits)

1. Core Courses: STAT 502, STAT 504, STAT 512, STAT 513, STAT 534, STAT 536, STAT 570, STAT 571
2. Statistics capstone data analysis: STAT 528
3. Satisfactory participation in at least one quarter of the departmental seminar
4. Passage of the first year MS theory examination

Doctor of Philosophy

Degree Requirements

Minimum 90 credits, to include:

1. Training in statistics and related sciences
2. General examinations of basic graduate-level knowledge in statistics and probability (including two preliminary examinations)
3. MATH 574, MATH 575, MATH 576
4. Three approved core-course sequences chosen from STAT 570, STAT 571, STAT 572; STAT 581, STAT 582, STAT 583; STAT 521, STAT 522, STAT 523; STAT 534, STAT 535, STAT 538; and STAT 516, STAT 517, STAT 518. (In some circumstances, other graduate-level mathematical science courses may be used as a substitute.)
5. Statistical consulting (typically STAT 598 and STAT 599)
6. Proficiency in computing
7. STAT 590 (1 credit per quarter)
8. Final examination

Graduation requirements for PhD tracks in statistical genetics and statistics in the social sciences may replace or be in addition to some of the requirements listed above.

Financial Aid

The department annually awards a limited number of teaching and research assistantships and fellowships for the support of new and continuing graduate students on the basis of academic promise.

Course Descriptions

STAT 100 Numbers and Reason (5) QSR *Bookstein* Surveys the standard ways in which “arithmetic turns into understanding” across examples from the natural and the social sciences. Main concepts include abduction (inference to the best explanation), consilience (numerical agreement across multiple measurement levels), bell curves, linear models, and the likelihood of hypothesis. Offered: A.

STAT 111 Lectures in Applied Statistics (1) NW Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Credit/no-credit only. Offered: jointly with BIOS 111; Sp.

STAT 180 Introduction to Data Science (4) QSR Survey course introducing the essential elements of data science: data collection, management, curation, and cleaning; summarizing and visualizing data; basic ideas of statistical inference, machine learning. Students will gain hands-

on experience through computing labs. Prerequisite: Either a minimum grade of 2.5 in MATH 098, a minimum grade of 3.0 in MATH 103, a score of 151-169 on the MPT-GS placement test, or score of 145-153 on the MPT-AS placement test. Offered: AWSp.

STAT 220 Principles of Statistical Reasoning (5) NW, QSR Introduces statistical reasoning. Focuses primarily on the what and why rather than the how. Helps students gain an understanding of the rationale behind many statistical methods, as well as an appreciation of the use and misuse of statistics. Encourages and requires critical thinking. (Students may receive credit for only one of STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, and ECON 311.) Offered: AWSpS.

STAT 221 Statistical Concepts and Methods for the Social Sciences (5) NW, QSR Develops statistical literacy. Examines objectives and pitfalls of statistical studies; study designs, data analysis, inference; graphical and numerical summaries of numerical and categorical data; correlation and regression; and estimation, confidence intervals, and significance tests. Emphasizes social science examples and cases. (Students may receive credit for only one of STAT 220, STAT 221, STAT 311, STAT 221/CS&SS 221/SOC 221, ECON 311.) Offered: jointly with CS&SS 221/SOC 221; AWSp.

STAT 302 Statistical Software and Its Applications (3) Introduction to data structures and basics of implementing procedures in statistical computing packages, selected from but not limited to R, SAS, STATA, MATLAB, SPSS, and Minitab. Provides a foundation in computation components of data analysis. Prerequisite: either STAT 311/ECON 311 or STAT 390/MATH 390. Offered: W.

STAT 311 Elements of Statistical Methods (5) NW, QSR Elementary concepts of probability and sampling; binomial and normal distributions. Basic concepts of hypothesis testing, estimation, and confidence intervals; t-tests and chi-square tests. Linear regression theory and the analysis of variance. (Students may receive credit for only one of STAT 220, STAT 221, STAT 311, and ECON 311.) Prerequisite: either MATH 111, MATH 120, MATH 124, MATH 127, or MATH 144. Offered: AWSpS.

STAT 316 Design of Experiments and Regression Analysis (4) NW L. BOYLE Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with IND E 316; W.

STAT 320 Evaluating Social Science Evidence (5) I&S, QSR A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates “facts and findings” by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS&SS 320/SOC 320.

STAT 321 Case-Based Social Statistics I (5) I&S, QSR Introduction to statistical reasoning for social scientists. Built around cases representing in-depth investigations into the nature and

content of statistical and social-science principles and practice. Hands-on approach: weekly data-analysis laboratory. Fundamental statistical topics: measurement, exploratory data analysis, probabilistic concepts, distributions, assessment of statistical evidence. Offered: jointly with CS&SS 321/SOC 321.

STAT 322 Case-Based Social Statistics II (5) I&S, QSR Continuation of CS&SS 321/SOC 321/STAT 321. Progresses to questions of assessing the weight of evidence and more sophisticated models including regression-based methods. Built around cases investigating the nature and content of statistical principles and practice. Hands-on approach: weekly data analysis laboratory. Prerequisite: CS&SS 321/SOC 321/STAT 321, or permission of instructor. Offered: jointly with CS&SS 322/SOC 322.

STAT 340 Introduction to Probability and Mathematical Statistics I (4) QSR Covers the fundamentals of probability and mathematical statistics; axioms of probability, conditional and joint probability, random variables, univariate and multivariate distributions and densities, and moments; binomial, negative binomial, geometric, Poisson, normal, exponential distributions, and central limit theorem; and basic estimation and hypothesis testing theory. Prerequisite: either STAT 311/ECON 311 or STAT 390/MATH 390; either a minimum grade of 2.5 in MATH 327 or MATH 136. Offered: A.

STAT 341 Introduction to Probability and Mathematical Statistics II (4) NW Brief review of: sample spaces, random variables, probability. Distribution: binomial, normal, Poisson, geometric. Followed by: expectation, variance, central limit theorem. Basic concepts of estimation, testing, and confidence intervals. Maximum likelihood estimators and likelihood ratio tests, efficiency. Introduction to regression. Prerequisite: either STAT 340 or STAT/MATH 394 and STAT/MATH 395; either STAT/ECON 311 or STAT/MATH 390; either a minimum grade of 2.5 in MATH 136 or MATH 327. Offered: W.

STAT 342 Introduction to Probability and Mathematical Statistics III (4) NW Brief review of: sample spaces, random variables, probability. Distribution: binomial, normal, Poisson, geometric. Followed by: expectation, variance, central limit theorem. Basic concepts of estimation, testing, and confidence intervals. Maximum likelihood estimators and likelihood ratio tests, efficiency. Introduction to regression. Prerequisite: STAT 341. Offered: Sp.

STAT 390 Statistical Methods in Engineering and Science (4) NW Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Cannot be taken for credit if credit received for STAT509/CS&SS 509/ECON 580. Prerequisite: either MATH 126 or MATH 136. Offered: AWSpS.

STAT 391 Quantitative Introductory Statistics for Data Science (4) The basic concepts of statistics, machine learning and data science, as well as their computational aspects. Statistical models, likelihood, maximum likelihood and Bayesian estimation, regression, classification, clustering, principal component analysis, model validation, statistical testing. Practical implementation and visualization in data analysis. Assumes knowledge of basic probability,

mathematical maturity, and ability to program. Prerequisite: either CSE 312, or STAT 394/MATH 394 and STAT 395/MATH 395. Offered: Sp.

STAT 394 Probability I (3) NW Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson, and normal distributions. Prerequisite: minimum grade of 2.0 in either MATH 126 or MATH 136. Offered: jointly with MATH 394; AWS.

STAT 395 Probability II (3) NW Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Prerequisite: minimum grade of 2.0 in STAT/MATH 394. Offered: jointly with MATH 395; WSpS.

STAT 396 Probability III (3) NW Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Prerequisite: minimum grade of 2.0 in either MATH 395 or STAT 395, or minimum grade of 2.0 in STAT 340 and in STAT 341. Offered: jointly with MATH 396; Sp.

STAT 403 Introduction to Resampling Inference (4) NW V. MININ Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Experience programming in R is beneficial. Credit allowed for STAT 403 or STAT 503 but not both. Prerequisite: either STAT 311/ECON 311, STAT 341, STAT 390/MATH 390, STAT 481/ECON 481, or Q SCI 381 and Q SCI 482. Offered: jointly with Q SCI 403; Sp.

STAT 406 Research Design and Statistics for HIHIM (3) Explores healthcare and research statistics. Addresses hospital statistics, used to calculate usage levels of healthcare resources and outcomes of clinical operations, and research statistics, used to summarize and describe significant characteristics of a data set, and to make inferences about a population based on data collected from a sample. In addition, principles of research are described, including the Institutional Review Board process. Offered: jointly with BIOST 406/HIHIM 425.

STAT 416 Introduction to Machine Learning (4) NW Provides practical introduction to machines learning. Modules include regression, classification, clustering, retrieval, recommender systems, and deep learning, with a focus on an intuitive understanding grounded in real-world applications. Intelligent applications are designed and used to make predictions on large, complex datasets. Prerequisite: CSE 143 or CSE 160; and STAT 311, STAT 390/MATH 390, or STAT 391 Offered: jointly with CSE 416.

STAT 421 Applied Statistics and Experimental Design (4) NW Experimental designs, including completely randomized, blocked, Latin Square, factorial, 2 to the k, fractional, nested, and split-plot; fixed effects and random effects models; confounding and aliasing. Analyses of real data, to illustrate concepts. Prerequisite: either STAT 342 or STAT 481/ECON 481. Offered: A.

STAT 423 Applied Regression and Analysis of Variance (4) NW Least squares; Simple/multiple linear regression including interpretation; Variable selection; Analysis of covariance; Assumptions and diagnostics/remedies; Weighting and generalized least squares; Hypothesis testing. Analyses of real data to illustrate concepts. Prerequisite: either STAT 342, STAT 421, or STAT 481/ECON 481. Offered: W.

STAT 425 Introduction to Nonparametric Statistics (3) NW Overview of nonparametric methods, such as rank tests, goodness of fit tests, 2 x 2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: STAT 390/MATH 390. Offered: jointly with BIOS 425.

STAT 427 Introduction to Analysis of Categorical Data (4) NW Techniques for analysis of count data. Log-linear models, logistic regression, and analysis of ordered response categories. Illustrations from the behavioral and biological sciences. Computational procedures. Prerequisite: either STAT 342, STAT 362, or STAT 421.

STAT 428 Multivariate Analysis for the Social Sciences (4) NW Multivariate techniques commonly used in the social and behavioral sciences. Linear models for dependence analysis (multivariate regression, MANOVA, and discriminant analysis) and for interdependence analysis (principal components and factor analysis). Techniques applied to social science data using computer statistical packages. Prerequisite: either STAT 342, STAT 362, or STAT 421.

STAT 435 Introduction to Statistical Machine Learning (4) D. WITTEN Introduces the theory and application of statistical machine learning. Topics may include supervised versus unsupervised learning; cross-validation; the bias-variance trade-off; regression and classification; regularization and shrinkage approaches; non-linear approaches; tree-based methods; and support vector machines. Includes applications in R. Prerequisite: either STAT 341, STAT 390/MATH 390, or STAT 391; recommended: MATH 308. Offered: Sp.

STAT 441 Multivariate Statistical Methods (4) QSR P. HOFF Introduces statistical methods for analysis of multidimensional data. Methods include tools for exploratory analysis of high-dimensional data, statistical modeling approaches to parameter estimation and hypothesis testing, and nonparametric methods for classification and clustering. Includes applications in R. Prerequisite: MATH 308 and one of STAT 341, STAT/MATH 390, or STAT 391. Offered: W.

STAT 480 Sampling Theory for Biologists (3) NW J. SKALSKI Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482. Offered: jointly with Q SCI 480; W, odd years.

STAT 486 Experimental Design (4) NW Emphasizes data modeling using structured means resulting from choice of experimental and treatment design. Examines experimental designs, including crossed, nested designs; block; split-plot designs; and covariance analysis. Also covers

multiple comparisons, efficiency, power, sample size, and pseudo-replication. Prerequisite: Q SCI 482. Offered: jointly with Q SCI 486; W, even years.

STAT 491 Introduction to Stochastic Processes (3) NW Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Prerequisite: minimum grade of 2.0 in MATH 394/STAT 394 and MATH 395/STAT 395, or minimum grade of 2.0 in STAT 340 and STAT 341 and MATH 396/STAT 396. Offered: jointly with MATH 491; A.

STAT 492 Stochastic Calculus for Option Pricing (3) NW Introductory stochastic calculus mathematical foundation for pricing options and derivatives. Basic stochastic analysis tools, including stochastic integrals, stochastic differential equations, Ito's formula, theorems of Girsanov and Feynman-Kac, Black-Scholes option pricing, American and exotic options, bond options. Prerequisite: minimum grade of 2.0 in either STAT 395/MATH 395, or a minimum grade of 2.0 in STAT 340 and STAT 341. Offered: jointly with MATH 492; W.

STAT 495 Service Learning: K-12 Tutoring Experience (1-5, max. 5) Morita Tutoring mathematics in local K-12 schools. Offered: AWSp.

STAT 498 Special Topics (1-5, max. 15) NW Reading and lecture course intended for special needs of students.

STAT 499 Undergraduate Research (1-5, max. 15) Offered: AWSpS.

STAT 502 Design and Analysis of Experiments (4) Design of experiments covering concepts such as randomization, blocking, and confounding. Analysis of experiments using randomization tests, analysis of variance, and analysis of covariance. Prerequisite: either STAT 342, MATH 390/STAT 390, ECON 481/STAT 481, STAT 509/CS&SS 509/ECON 580 or equivalent; MATH 308 or equivalent. Offered: A.

STAT 503 Practical Methods for Data Analysis (4) Basic exploratory data analysis with business examples. Data summaries, multivariate data, time series, multiway tables. Techniques include graphical display, transformation, outlier identification, cluster analysis, smoothing, regression, robustness. Departmental credit allowed for only one of 403 and 503. Prerequisite: B A 500 or QMETH 500 or equivalent or permission of instructor. Offered: jointly with QMETH 503.

STAT 504 Applied Regression (4) Least squares estimation. Hypothesis testing. Interpretation of regression coefficients. Categorical independent variables. Interactions. Assumption violations: outliers, residuals, robust regression; nonlinearity, transformations, ACE, CART; nonconstant variance. Variable selection and model averaging. Prerequisite: either STAT 342, STAT 390/MATH 390, STAT 421, STAT 481/ECON 481, STAT 509/CS&SS 509/ECON 580, or SOC 425. Offered: jointly with CS&SS 504.

STAT 506 Applied Probability and Statistics (4) Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation

and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with AMATH 506.

STAT 509 Econometrics I: Introduction to Mathematical Statistics (4) Examines methods, tools, and theory of mathematical statistics. Covers, probability densities, transformations, moment generating functions, conditional expectation. Bayesian analysis with conjugate priors, hypothesis tests, the Neyman-Pearson Lemma. Likelihood ratio tests, confidence intervals, maximum likelihood estimation, Central limit theorem, Slutsky Theorems, and the delta-method. Prerequisite: STAT 311/ECON 311; either MATH 136 or MATH 126 with either MATH 308 or MATH 309. (Credit allowed for only one of STAT 390, STAT 481, and ECON 580.) Offered: jointly with CS&SS 509/ECON 580.

STAT 512 Statistical Inference (4) Review of random variables; transformations, conditional expectation, moment generating functions, convergence, limit theorems, estimation; Cramer-Rao lower bound, maximum likelihood estimation, sufficiency, ancillarity, completeness. Rao-Blackwell theorem. Hypothesis testing: Neyman-Pearson lemma, monotone likelihood ratio, likelihood-ratio tests, large-sample theory. Contingency tables, confidence intervals, invariance. Decision theory. Prerequisite: STAT 395 and STAT 421, STAT 423, STAT 504, or BIOST 512 (concurrent registration permitted for these three). Offered: A.

STAT 513 Statistical Inference (4) Review of random variables; transformations, conditional expectation, moment generating functions, convergence, limit theorems, estimation; Cramer-Rao lower bound, maximum likelihood estimation, sufficiency, ancillarity, completeness. Rao-Blackwell theorem. Hypothesis testing: Neyman-Pearson lemma, monotone likelihood ratio, likelihood-ratio tests, large-sample theory. Contingency tables, confidence intervals, invariance. Decision theory. Prerequisite: STAT 512. Offered: W.

STAT 516 Stochastic Modeling of Scientific Data (3-) Covers discrete-time Markov chain theory; inference for discrete-time Markov chains; Monte Carlo methods; missing data; hidden Markov models; and Gaussian Markov random fields. Prerequisite: either STAT 342 or STAT 396. Offered: A.

STAT 517 Stochastic Modeling of Scientific Data (-3) Covers Markov random fields; continuous-time Markov chains; birth-death and branching processes; and point processes and cluster models. Procedures for inference for these stochastic processes, including Likelihood methods and estimating equations. Prerequisite: STAT 516. Offered: W.

STAT 518 Stochastic Modeling Project (3) Student in-depth analyses, oral presentations, and discussion of selected research articles focusing on stochastic modeling of, and inference for, scientific data. Prerequisite: STAT 517 and permission of instructor. Offered: Sp.

STAT 519 Time Series Analysis (3) Descriptive techniques. Stationary and nonstationary processes, including ARIMA processes. Estimation of process mean and autocovariance function. Fitting ARIMA models to data. Statistical tests for white noise. Forecasting. State space models and the Kalman filter. Robust time series analysis. Regression analysis with correlated errors. Statistical properties of long memory processes. Prerequisite: STAT 513.

STAT 520 Spectral Analysis of Time Series (4) Estimation of spectral densities for single and multiple time series. Nonparametric estimation of spectral density, cross-spectral density, and coherency for stationary time series, real and complex spectrum techniques. Bispectrum. Digital filtering techniques. Aliasing, prewhitening. Choice of lag windows and data windows. Use of the fast Fourier transform. Prerequisite: one of STAT 342, STAT 390, STAT 481, STAT 509/CS&SS 509/ECON 580, or IND E 315. Offered: jointly with E E 520.

STAT 521 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 521; A.

STAT 522 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 522; W.

STAT 523 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 523; Sp.

STAT 524 Design of Medical Studies (3) Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOS T 511 or equivalent, and one of BIOS T 513, BIOS T 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with BIOS T 524; Sp.

STAT 527 Nonparametric Regression and Classification (3) Covers techniques for smoothing and classification including spline models, kernel methods, generalized additive models, and the averaging of multiple models. Describes measures of predictive performance, along with methods for balancing bias and variance. Prerequisite: either STAT 502 and STAT 504 or BIOS T 514 and BIOS T 515. Instructors: Minin, Raftery, Richardson, Wakefield Offered: jointly with BIOS T 527; Sp.

STAT 528 Applied Statistics Capstone (3) Covers technical and non-technical aspects of applied statistics work, building on methods taught in prerequisite courses. Key elements include: study design, determining the aim of the analysis, choosing an appropriate method, and report writing. Prerequisite: STAT 502; STAT 504; STAT 536; STAT 570. Instructors: McCormick, Sampson, Wakefield Offered: W.

STAT 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory;

replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with BIOST 529/CS&SS 529.

STAT 530 Wavelets: Data Analysis, Algorithms, and Theory (3) Review of spectral analysis. Theory of continuous and discrete wavelets. Multiresolution analysis. Computation of discrete wavelet transform. Time-scale analysis. Wavelet packets. Statistical properties of wavelet signal extraction and smoothers. Estimation of wavelet variance. Prerequisite: some Fourier theory and linear algebra; MATH 390/STAT 390, ECON 481 or STAT 481, STAT 509/CS&SS 509/ECON 580, STAT 513, or IND E 315. Offered: jointly with E E 530; Sp.

STAT 533 Theory of Linear Models (3) Examines model structure; least squares estimation; Gauss-Markov theorem; central limit theorems for linear regression; weighted and generalized least squares; fixed and random effects; analysis of variance; blocking and stratification; and applications in experimental design. Prerequisite: STAT 421 or STAT 423 or BIOST 515; and STAT 513; and a course in matrix algebra. Offered: jointly with BIOST 533; Sp.

STAT 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 534; Sp.

STAT 535 Statistical Learning: Modeling, Prediction, and Computing (3) Covers statistical learning over discrete multivariate domains, exemplified by graphical probability models. Emphasizes the algorithmic and computational aspects of these models. Includes additional topics in probability and statistics of discrete structures, general purpose discrete optimization algorithms like dynamic programming and minimum spanning tree, and applications to data analysis. Prerequisite: experience with programming in a high level language. Offered: A.

STAT 536 Analysis of Categorical and Count Data (3) Analysis of categorical data in the social sciences. Binary, ordered, and multinomial outcomes, event counts, and contingency tables. Focuses on maximum likelihood estimations and interpretations of results. Prerequisite: SOC 504, SOC 505, SOC 506, or equivalent. Offered: jointly with CS&SS 536/SOC 536.

STAT 538 Statistical Learning: Modeling, Prediction, and Computing (3) Reviews optimization and convex optimization in its relation to statistics. Covers the basics of unconstrained and constrained convex optimization, basics of clustering and classification, entropy, KL divergence and exponential family models, duality, modern learning algorithms like boosting, support vector machines, and variational approximations in inference. Prerequisite: experience with programming in a high level language. Offered: W.

STAT 539 Statistical Learning: Modeling, Prediction and Computing (3) Supervised, applied project in statistical modeling, prediction, and computing. Prerequisite: STAT 535; STAT 538; computer programming at intermediate level. Instructors: Meila Offered: Sp.

STAT 542 Multivariate Analysis (3) Multivariate normal distribution; partial and multiple correlation; Hotelling's T^2 ; Bartlett's decomposition; various likelihood ratio tests; discriminant analysis; principal components; graphical Markov models. Prerequisite: STAT 582 or permission of instructor.

STAT 544 Bayesian Statistical Methods (3) Statistical methods based on the idea of a probability distribution over the parameter space. Coherence and utility. Subjective probability. Likelihood principle. Conjugate families. Structure of Bayesian inference. Limit theory for posterior distributions. Sequential experiments. Exchangeability. Bayesian nonparametrics. Empirical Bayes methods. Prerequisite: STAT 513 or permission of instructor.

STAT 547 Options and Derivatives (4) Covers theory, computation, and statistics of options and derivatives pricing, including options on stocks, stock indices, futures, currencies, and interest rate derivatives. Prerequisite: STAT 506 or permission of instructor.

STAT 548 Machine Learning for Big Data (4) Covers machine learning and statistical techniques for analyzing datasets of massive size and dimensionality. Representations include regularized linear models, graphical models, matrix factorization, sparsity, clustering, and latent factor models. Algorithms include sketching, random projections, hashing, fast nearest-neighbors, large-scale online learning, and parallel learning (Map-Reduce, GraphLab). Prerequisite: either STAT 535 or CSE 546. Instructors: Fox, Guestrin Offered: jointly with CSE 547; W.

STAT 549 Statistical Methods for Portfolios (4) Covers the fundamentals of modern statistical portfolio construction and risk measurement, including theoretical foundations, statistical methodology, and computational methods using modern object-oriented software for data analysis, statistical modeling, and numerical portfolio optimization. Prerequisite: ECON 424 or equivalent, or permission of instructor.

STAT 550 Statistical Genetics I: Mendelian Traits (3) Mendelian genetic traits. Population genetics; Hardy-Weinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with BOST 550; Sp.

STAT 551 Statistical Genetics II: Quantitative Traits (3) Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BOST 550; STAT 423 or BOST 515; or permission of instructor. Offered: jointly with BOST 551; A.

STAT 552 Statistical Genetics III: Design and Analysis (3) Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BOST 551; GENOME 371; or permission of instructor. Offered: jointly with BOST 552; W.

STAT 554 Statistical Methods for Spatial Data (3) Motivates the need for, and describes methods for, the analysis of spatial data. Topics: Clustering, cluster detection, spatial regression, modeling neighborhood effects, geographical information systems. Point and aggregated data considered and data from complex surveys. Offered: jointly with CS&SS 554/SOC 534; W.

STAT 556 Introduction to Statistics and Probability (5) Overview of probability; conditional probability and independence; Bayes Theorem; discrete and continuous random variables including jointly distributed; key distributions including the normal and its spin offs; properties of expectation and variance; conditional expectation; covariance and correlation; Central Limit Theorem; law of large numbers; Parameter Estimation. Offered: jointly with BOST 556/DATA 556; A.

STAT 557 Applied Statistics and Experimental Design (5) Inferential statistical methods for discrete and continuous random variables including tests for difference in means and proportions; linear and logistic regression; causation versus correlation; confounding; resampling methods; study design. Prerequisite: STAT/BOST/DATA 556 or instructor's permission. Offered: jointly with BOST 557/DATA 557; W.

STAT 558 Statistical Machine Learning for Data Scientists (5) Bias-variance trade-off; training versus test error; overfitting; cross-validation; subset selection methods; regularized approaches for linear/logistic regression: ridge and lasso; non-parametric regression: trees, bagging, random forests; local regression and splines; generalized additive models; support vector machines; k-means and hierarchical clustering; principal components analysis. Prerequisite: STAT/BOST/DATA 557, or permission of instructor. Offered: jointly with BOST 558/DATA 558; Sp.

STAT 559 Measure Theory (3) *M. DRTON* Measures: Caratheodory Extension Theorem. Measurable functions: Riesz Theorem, Slutsky Theorem. Integration: Fatou's lemma, MCT, DCT; Helly-Bray, Mann-Wald and Skorokhod theorems. Derivatives via signed measures. Measures and processes on products. Distribution and quantile functions. Independence and conditional distributions. Prerequisite: either MATH 424 and MATH 425, or MATH 574 and MATH 575. Offered: Sp.

STAT 560 Hierarchical Modeling for the Social Sciences (4) Explores ways in which data are hierarchically organized, such as voters nested within electoral districts that are in turn nested within states. Provides a basic theoretical understanding and practical knowledge of models for clustered data and a set of tools to help make accurate inferences. Prerequisite: SOC 504, SOC 505, SOC 506 or equivalent. Offered: jointly with CS&SS 560/SOC 560.

STAT 561 Special Topics in Applied Statistics (1-5, max. 15) Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 562 Special Topics in Applied Statistics (1-5, max. 15) Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 563 Statistical Demography (4) *A. Raftery* Statistical methods and models for estimating and forecasting population quantities. Topic: Demographic rates; Population projection; Leslie matrix; modeling age-specific patterns; probabilistic population projections and Bayesian hierarchical models; estimating past and present fertility, mortality, migration and population; big data in demography. Prerequisite: Either STAT 509/CS&SS 509/ECON 509, STAT 513, or permission from the instructor. Offered: jointly with CS&SS 563/SOC 563; Sp.

STAT 564 Bayesian Statistics for the Social Sciences (4) Statistical methods based on the idea of probability as a measure of uncertainty. Topics covered include subjective notion of probability, Bayes' Theorem, prior and posterior distributions, and data analysis techniques for statistical models. Prerequisite: SOC 504, SOC 505, SOC 506 or equivalent. Offered: jointly with CS&SS 564.

STAT 566 Causal Modeling (4) Construction of causal hypotheses. Theories of causation, counterfactuals, intervention vs. passive observation. Contexts for causal inference: randomized experiments; sequential randomization; partial compliance; natural experiments, passive observation. Path diagrams, conditional independence, and d-separation. Model equivalence and causal under-determination. Prerequisite: course in statistics, SOC 504, SOC 505, SOC 506, or equivalent. Offered: jointly with CS&SS 566.

STAT 567 Statistical Analysis of Social Networks (4) Statistical and mathematical descriptions of social networks. Topics include graphical and matrix representations of social networks, sampling methods, statistical analysis of network data, and applications. Prerequisite: SOC 504, SOC 505, SOC 506, or equivalent. Offered: jointly with CS&SS 567.

STAT 570 Advanced Regression Methods for Independent Data (3) Covers linear models, generalized linear and non-linear regression, and models. Includes interpretation of parameters, including collapsibility and non-collapsibility, estimating equations; likelihood; sandwich estimations; the bootstrap; Bayesian inference: prior specification, hypothesis testing, and computation; comparison of approaches; and diagnostics. Prerequisite: STAT 512 and STAT 513;BIOST/STAT 533 or STAT 421/STAT 502 and STAT 423/STAT 504; a course in matrix algebra. Offered: jointly with BIOST 570; A.

STAT 571 Advanced Regression Methods for Dependent Data (3) Covers longitudinal data models, generalized linear and non-linear mixed models; marginal versus conditional models; generalized estimating equations, likelihood-based inference, REML, BLUP, and computation of integrals; Bayesian inference: Markov chain Monte Carlo; covariance models, including models for split plot designs; comparison of approaches; and diagnostics. Prerequisite: BIOST570/STAT 570. Offered: jointly with BIOST 571; W.

STAT 572 Advanced Regression Methods: Project (3) Student presentations and discussion on selected methodological research articles focusing on regression modeling. Prerequisite: STAT 571. Offered: jointly with BIOST 572; Sp.

STAT 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and

nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BOST 515, STAT 473, or equivalent. Offered: jointly with BOST 576.

STAT 578 Special Topics in Advanced Biostatistics (*, max. 30) Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with BOST 578; AWSpS.

STAT 579 Data Analysis and Reporting (2, max. 8) Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics. Offered: jointly with BOST 579; SpS.

STAT 581 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 513; either MATH 426 or MATH 576. Offered: A.

STAT 582 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 581. Offered: W.

STAT 583 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 582. Offered: Sp.

STAT 590 Statistics Seminar (*, max. 15) Prerequisite: permission of graduate program coordinator. Credit/no-credit only. Offered: AWSp.

STAT 591 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: A.

STAT 592 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: W.

STAT 593 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: Sp.

STAT 598 Techniques of Statistical Consulting (1) Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with BIOS 598; ASp.

STAT 599 Statistical Consulting (*, max. 12) Consulting experience in data analysis, applied statistics. Student required to provide consulting services to students and faculty three hours per week. Prerequisite: permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSpS.

STAT 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Coordinator. Offered: AWSpS.

STAT 700 Master's Thesis (*-) Prerequisite: permission of Graduate Program Coordinator. Offered: AWSpS.

STAT 800 Doctoral Dissertation (*-) Prerequisite: permission of Graduate Program Coordinator. Offered: AWSpS.

College of Built Environments

College Overview

224 Gould

Dean John Schaufelberger

Associate Dean Jeffrey Ochsner

www.be.washington.edu

The College of Built Environments (CBE) devotes its resources to the tangible improvement of built and natural environments. Four departments comprise the college: architecture, construction management, landscape architecture, and urban design and planning. Each prepares students for professional careers involving the design, planning, production, and sustainability of physical and natural environments, as well as addressing policies and programs that engage problems of urban growth and livable communities.

The College offers a variety of programs and degrees focusing on the environmental design and construction disciplines within a liberal arts education. The undergraduate programs of the Departments of Construction Management and Landscape Architecture lead to professional degrees that serve as the educational credentials for careers in their respective fields. Undergraduate programs in the Departments of Architecture and Urban Design and Planning offer students pre-professional undergraduate majors-in Architectural Studies and in Community, Environment, and Planning respectively-that prepares students for professional programs in the design and planning disciplines, as well as related leadership roles in society.

The College offers a variety of professional and post-professional Master's degrees: Master of Architecture; Master of Science in Architecture; Master of Science in Construction Management (evening degree); Master of Urban Planning; Master of Landscape Architecture; and Master of Science in Real Estate. Master's students may elect also to work toward the interdisciplinary Certificates in Urban Design and in Historic Preservation. The College offers two interdisciplinary doctoral degrees: the Ph.D. in the Built Environment and the Ph.D. in Urban Design and Planning. All program curricula encompass an appropriate level of design and technical understanding, and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

As a part of a major university and metropolis in the Pacific Northwest, the College directly engages this extraordinary setting as a laboratory for study. Faculty members in CBE departments and programs work closely with various professional communities to build curricula and offer experience attuned to the understanding and creation of appropriate built environments.

Facilities

Computing Facilities

Mark Baratta, Director

The College provides an extensive computing infrastructure to support student work. Students have easy access to high-speed wired and wireless networking in the College's buildings, computers in labs and studios, a comprehensive collection of software used in our disciplines, specialized hardware (large-format scanning and plotting, laser cutters, 3D printer), an equipment loaner program (laptops, digital cameras (fixed-lens and SLR), camcorders, digital audio recorders, projectors), and consulting. Most classrooms and seminar rooms are equipped with projectors; several have interactive whiteboard displays.

Built Environments Library

Alan Michelson, Librarian

The Built Environments Library, 334 Gould, is the primary location for materials on architecture, landscape architecture, construction management, and urban design and planning. The collection contains 46,745 volumes, 7,500 microforms, and 163 currently-received serial subscriptions and 243 serial titles in total. Access to its collection is provided through the UW Libraries Information Gateway, a single World Wide Web location which encompasses all the library's print and electronic resources as well as tools, services, and the ability to search the library's catalog and a wide range of Internet resources. The Gateway is available in all UW libraries and on the Web at www.lib.washington.edu.

Photography Lab

John Stamets, Lecturer

A large photography laboratory is provided with studio and film darkroom facilities for use by photography classes, design-studio classes, special instruction, and independent activity.

Shop

Penny Maulden, Director

Fully staffed and well-equipped workshops provide students opportunities to design and make projects using wood, metals, concrete, plaster, plastics and other materials. A wide and deep selection of hand-tools, machine-tools and digital fabrication tools support the instructional use of the workshops and adjacent classroom. Coursework and research supported by the workshops include building design, design/build, furniture studios, structures, materials, and digital fabrication courses. Individual projects including thesis and research can also be accommodated.

Visual Resources Collection

Joshua Polansky, Director

The Visual Resources Collection consists of over 80,000 digital images covering architectural, landscape, design and planning, and construction subject matter, supporting the curricular and research needs of the College. They are accessible to students and faculty through an online image database. New materials for lectures and projects are continually added.

Undergraduate Degree Programs

The College of Built Environments offers the following professional and pre-professional undergraduate degree options and opportunities:

College Bachelor Degree Programs

- [Bachelor of Arts in Architectural Studies](#)
- [Bachelor of Arts in Community, Environment, and Planning](#)
- [Bachelor of Landscape Architecture](#)
- [Bachelor of Science in Construction Management](#)

Minors and Dual Degree Options

- [Minor in Architecture](#)
- [Minor in Landscape Architecture](#)
- [Minor in Urban Design and Planning](#)
- Dual Degree option combining the Bachelor of Arts in Architectural Studies with the Bachelor of Science in Construction Management

Graduate Program

The College of Built Environments offers the following professional, post-professional graduate degrees, and doctoral options and opportunities:

College Graduate Degree Programs

- [Master of Architecture](#)
- [Master of Science in Construction Management](#)
- [Master of Landscape Architecture](#)
- [Master of Science in Real Estate](#)
- [Master of Urban Planning](#)
- [Distance Learning Master Program in Construction Engineering](#)
- [Distance Learning Master in Infrastructure Planning Management](#)

Interdisciplinary Ph.D Degree Programs

- [Ph.D. in the Built Environment](#)
- [Ph.D in Urban Design and Planning](#)

College-wide Certificate Programs

Historic Preservation Certificate Program

The College of Built Environments offers education in historic preservation. This approach reflects a conscious choice to emphasize preservation within the context of the individual design professions. Thus, the curriculum offers an awareness and familiarity with issues involved in the identification, designation, interpretation, and preservation of historic places, as well as the restoration, adaptive reuse, and design of sympathetic new construction in historic contexts.

Program Coordinator Box 355740 206-543-5996 hispres@uw.edu
www.be.washington.edu/certificates/hp.html

Admission Requirements

Open to students accepted into a professional or graduate program in the College of Built Environments, including the M.Arch., M.S. (Arch. History/Theory), B.L.A., M.L.A., M.U.P., and Ph.D. programs. Application is made first for admission to a degree program within the college. Once accepted, a separate "Statement of Interest" form is required. Application is made within the first two weeks of classes for two-year degree programs, and by the end of the first year for three-year programs.

Certificate Requirements

The certificate consists of courses required for the student's degree and an additional, complementary 12-15 credits of preservation study which may not overlap with courses required for students' degrees but which may fall into elective requirements and be part of the total credits required for the degree. We recommend students meet with the program coordinator and Preservation faculty to choose the courses that will best complement their degree program and academic interests in preservation.

1. Track I: Requirements for Students in the M.Arch. Degree Program

- Courses Required from the M.Arch. curriculum:* ARCH 500 (6), ARCH 590 (3), an advanced studio on preservation design or design in an historic context
- Core Certificate Courses:* ARCH 582 (3) if available; Case Studies, either ARCH 498 (3) or URBDP 587 (3); Preservation Planning, either URBDP 585 (3) or URBDP 586 (4)
- Elective Course(s):* Additional electives in areas related to preservation in architecture, landscape architecture, planning, or related design.
- Thesis:* Thesis topic with content in the area of preservation design or related issues in historic preservation. Thesis committee chaired by a member of the Historic Preservation faculty.

2. **Track II:** Requirements for Students in the B.L.A., M.L.A., M.S. (Arch), M.U.P., and Ph.D. Degree Programs
- a. *Courses Required from Degree Curriculum:* Any required or "selective" courses with preservation/historical content, and if the degree requires studio work (B.L.A., M.L.A., M.U.P), choose a studio with preservation content.
 - b. *Core Certificate Courses:* URBDP 585 (3), URBDP 586 (4), one graduate seminar in preservation planning (3).
 - c. *Elective Course(s):* Additional electives in areas related to preservation in architecture, landscape architecture, planning, or related design.
 - d. *Thesis:* Thesis, professional paper, or dissertation topic with content in the area of preservation planning and design or related issues in historic preservation. Thesis must be chaired by a member of the Historic Preservation faculty.

Urban Design Certificate Program

The College of Built Environments offers an interdisciplinary program which leads to the Certificate of Achievement in Urban Design for students in the B.L.A., M.L.A., M.Arch., and M.U.P. professional degrees and to students in the Interdisciplinary Ph.D. in Urban Design and Planning or the Ph.D. in the Built Environment. It is designed to give students in these programs a broad and strong understanding of urban design that they may incorporate into their later professional and scholarly careers.

Program Coordinator Box 355740 206-543-5996 ud@uw.edu
www.be.washington.edu/certificates/ud.html

Admission Requirements

Any student accepted into the degree programs listed above is eligible and may begin participate in the program by returning a Statement of Interest (this form may be obtained from the program office or the program website). We recommend that students in two-year programs apply at the beginning of their programs and that those in longer programs apply at the beginning of their second year. However, students must possess the necessary design abilities prior to enrollment in advanced studios. Such enrollment is determined by the studio in question (for example, advanced studios may require a prerequisite studio preparatory class and/or previous studios and/or the equivalent as evaluated by the studio instructor).

Certificate Requirements

The certificate consists of courses required for the student's degree and an additional, complementary 12-15 credits of urban design courses, which may not overlap with courses required for students' degrees but which may fall into elective requirements and be part of the total credits required for the degree.

These requirements vary with the students' degree requirements (for example, if a course listed below is required for the students' degree requirements, the student must meet the 12-15 credit

requirement by choosing an additional course). We recommend students meet with the program coordinator and Urban Design Program faculty to choose the courses that will best complement their degree program and academic interests in urban design.

1. *Core Curriculum:*

- a. *Introductory Course:* ARCH 590 (M.Arch. and M.L.A. students); L ARCH 362 (B.L.A. students); URBDP 470 (any program); URBDP 500 (M.U.P. students)
- b. URBDP 479
- c. URBDP 580
- d. Thesis prep as appropriate for students' degree programs

2. *Urban Design Studios:* Three required from ARCH 500-505, L ARCH 402-403, L ARCH 503-505, or URBDP 507-508 as designated by the program each quarter; students must take at least one studio either outside their home department or with a clear interdisciplinary focus)

3. *Mandatory Course Areas*

- a. Urban Form and History: one course from L ARCH 450, L ARCH 451, L ARCH 498 (when history of urban design), URBDP 564, URBDP 565, or others as appropriate
- b. Urban Design Methods: two courses from L ARCH 341, L ARCH 571, URBDP 474, URBDP 576, URBDP 598, or others as appropriate
- c. Urban Studies: one course from PB AF 527, URBDP 422, URBDP 466, URBDP 500, URBDP 510, URBDP 520, URBDP 530, URBDP 560, URBDP 562, or others as appropriate
- d. Urban Development: one course from URBDP 561, URBDP 552, URBDP 553, URBDP 554, URBDP 555, or others as appropriate

4. *Thesis:* Students' theses, professional projects, or dissertations must have an urban design component and a member of the Urban Design Program faculty member as their committee chair.

Architecture

Department Overview

208 Gould

Architecture includes the study of building design, representation, computing, structures, construction materials, environmental control systems, history, theory, and professional practice. In its teaching, research, practice, and community engagement, the department addresses the traditions of architecture within the context of social and technological change, a legacy of craft in the making of architecture, an activist and community-based design process, and the principles of ethical action to address human and environmental concerns.

Undergraduate Program

Adviser

208 Gould Hall, Box 355720

206-543-3043

bainfo@uw.edu

Advising for the first two years of the program is done through the Undergraduate Gateway Center, 141 Mary Gates Hall.

The Department of Architecture offers the following programs of study:

- Bachelor of Arts degree with a major in architecture
- Bachelor of Arts degree with a major in architectural design
- A dual-degree program leading to the Bachelor of Arts degree with a major in architectural design and the Bachelor of Science degree in construction management
- A minor in architecture

The Bachelor of Arts (with a major in architecture) is a four-year, undergraduate degree program in architecture in which students explore the factors that shape our built environment. The program provides a liberal arts foundation in the discipline of architecture, which covers spatial reasoning, aesthetics, political and economic structures, socio-cultural influences, urbanism, landscape, and ecology, and gives students the opportunity to concentrate their studies through a sequence of courses investigating history and theory, materials and making, or sustainable technologies. Students in the Bachelor of Arts (with a major in architecture) program can prepare for graduate study in architecture and related fields such as construction management, landscape architecture, real estate, and urban planning, as well as careers in other fields.

The Bachelor of Arts (with a major in architecture) consists of two, two-year sequences. Years one and two include 14 credits of preparatory architectural coursework in addition to at least 76

credits devoted to satisfying the UW's general education requirements. These include coursework in the Visual, Literary, and Performing Arts (VLPA), Individuals and Societies (I&S), mathematics, science, and other areas of knowledge. The intent of these first two years is to help students build their skills in communication and critical thinking; gain broad exposure to other disciplines in order to make more informed academic and career decisions; and provide the broad academic foundation essential to successful study in architecture. All interested UW students are welcome to participate in this first two-year sequence.

The second two-year sequence begins in the junior year. Upper-division admission to the program requires the completion of architecture prerequisites and a minimum of 90 credits, and occurs through a selection process at the beginning of spring quarter of the sophomore year. Years three and four include 29 credits of required courses, including the capstone, 38 credits of discipline-specific selectives and electives, and 23 credits of upper-division electives. Students can focus their studies by choosing a concentration of history and theory, materials and making, or sustainable technologies, or a combination of these.

The Bachelor of Arts (with a major in architectural design) is a pre-professional degree that prepares candidates for admission with advanced standing to professional architectural programs. It is also good preparation for other roles in society that benefit from an understanding of and exposure to architectural design and problem solving such as government, development, management, planning, art, graphic design, and digital arts. Students develop visual literacy and complex problem solving through the design process, including researching historical precedents, analyzing theoretical texts, and on-site understanding of the physical built and natural environment. International study programs (Rome, Scandinavia, India, Mexico, Japan) provide further opportunities for students to engage built environments within global/local and contemporary/historical cultural contexts. A focus on sustainable technologies and the craft and making of architecture play an important role throughout the program.

The Bachelor of Arts (with a major in architectural design) is for students who are interested in the architecture profession and who may continue their studies by earning a graduate professional degree in architecture. The master's degree in architecture is a professional degree and generally takes two or more years to complete if the student enters with the pre-professional Bachelor of Arts (with a major in architectural design).

The college also offers a design and construction concurrent degree (Bachelor of Arts with a major in architectural design, BS in construction management), awarded after completion of 225 credits. Students interested in this double degree must complete the prerequisites for the architectural design major, be admitted to architectural design, and then apply to construction management while completing the architectural design major. This is a five-year program. In addition, the College of Built Environments offers three other bachelor degrees: the BLA in landscape architecture, a five-year professional degree; the BS in construction management, a four-year professional degree; and the BA in community, environment, and planning, a four-year interdisciplinary degree.

Bachelor of Arts (with a major in architecture)

Suggested First- and Second-Year College Courses: See Department Admission Requirements below.

Department Admission Requirements

Applicants are considered for autumn admission only. Admission is competitive. Admission groups are freshmen/sophomore admission (F/S A) and upper-division admission (UA). Consult department website for more information and application form.

Freshman Admission

The department enrolls freshman-year students directly out of high school, prior to their completion of any university-level prerequisites. All freshmen indicating architecture on their UW application are considered for freshman admission to the BA (with a major in architecture) program; no additional application materials are required. Students admitted as freshmen must complete all preparatory and general education requirements listed under upper-division admission as well as all major requirements in order to earn a degree.

Sophomore Admission

Application deadline is the first Monday of spring quarter. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and personal motivation. Completion of prerequisite requirements does not guarantee admission. Students admitted as sophomores must complete all preparatory and general education requirements listed under upper-division admission as well as all major requirements in order to earn a degree.

Transfer Admission

Transfer students may apply for admission at the beginning of the sophomore year or the beginning of the junior year. Application deadlines are the same as for sophomore or upper-division admission. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and personal motivation. Transfer students must also submit a separate application to the UW.

1. Sophomore-year transfer students must complete all preparatory architectural coursework and general education requirements listed under upper-division admission requirements, as well as all major requirements, in order to earn a degree.
2. Junior-year transfer students must complete all general education requirements and are strongly encouraged to complete all preparatory architectural coursework before entry into the program. These courses can be taken through UW Educational Outreach, on a non-matriculated basis, prior to admission to the UW. These, as well as all major requirements, must be completed in order for a student to earn a degree.

Upper-Division Admission Requirements (UA)

1. Junior Standing (90 or more credits completed by the quarter of admission), to include the following:
 - a. Preparatory Architectural Coursework (19 credits): ARCH 200, ARCH 231, ARCH 350, ARCH 351, ARCH 352
 - b. General Education Requirements: minimum of 71 credits selected from Visual, Literary, and Performing Arts (VLPA) (20 credits); Individuals and Societies (I&S) (20 credits); Natural World (NW) (20 credits), including 5 credits of mathematics (MATH 112 or MATH 124); additional Areas of Knowledge (6 credits); electives (3 credits). Composition/writing (10 credits total) may be met by freshman English composition courses and/or other general education courses designated “W,” with a minimum 2.0 grade for each course; diversity (3 credits) may be satisfied by general education courses designated DIV.
2. Minimum 2.80 college/university GPA
3. Department Application (See department website)
4. Transcripts of all college-level work. Unofficial transcripts are accepted.
5. Application Deadline: First Monday of spring quarter. For enrolled UW students, all prerequisite requirements must be completed or under way by the application deadline, and all prerequisite requirements must be completed by the time the student enters the program in autumn quarter. Admission decisions are based on an applicant’s academic performance and potential, extent and quality of relevant experience, and personal motivation. Completion of prerequisite requirements does not guarantee admission.

Major Requirements

1. Coursework (91 or more credits completed during years three and four): ARCH 331, ARCH 332, ARCH 361, ARCH 362, ARCH 468, ARCH 469. One history and theory selective course (3 credits), one craft and fabrication selective (3 credits), and one sustainable technologies selective (3 credits). Three Department of Architecture areas of concentration courses (at least 9 credits), two approved electives offered with College of Built Environment programs (at least 6 credits), five approved Department of Architecture electives (at least 15 credits), and at least 23 credits of approved upper-division electives. Selective and concentration courses are chosen from approved lists maintained by the department.
2. Capstone (ARCH 469) completed in residence through the UW
3. Minimum 2.00 cumulative GPA for all courses presented for the major

Bachelor of Arts (with a major in architectural design)

Department Admission Requirements

1. 90 credits to include the following:
 - a. *Preparatory Architectural Coursework (19 credits):* ARCH 350, ARCH 351, ARCH 352 (9 credits); ARCH 200, ARCH 201 (10 credits). *Note:* These courses

can be taken through UW Extension on a nonmatriculated basis, prior to admission to the UW, or they can be taken in the sophomore year on campus.

- b. *General Education Requirements (70 credits)*: English composition (5 credits); Visual, Literary, and Performing Arts (VLPA) (20 credits); Individuals and Societies (I&S) (20 credits); Natural World (NW) (20 credits, including MATH 112, MATH 124, or MATH 145); additional Areas of Knowledge (5 credits).
 - c. *Electives (1 credits)*
2. While the cumulative GPA is an important factor in the admission evaluation, the committee places emphasis on the evaluation of performance in the preparatory architectural coursework the student has completed. It is to the student's advantage to take as many of these courses as possible before applying.
 3. *Application deadline*: May 15 for autumn quarter only. Prerequisite courses must be completed by the time the student enters the program in autumn quarter.

Major Requirements

90 credits as follows:

1. *Preprofessional Coursework (69 credits)*: ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 362, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431, CM 313. One selective course in each of the following areas: (1) graphics/media; (2) history/theory; (3) building science/materials. Selective courses to be chosen from approved lists maintained by the department.
2. 21 credits of approved upper-division electives.
3. The final 45 credits must be completed as a matriculated student in residence through the UW.
4. Minimum 2.50 cumulative GPA for all work done in residence.

Dual-Degree Program

Admission Requirements

Dual-degree majors first apply to the architectural design program and must meet architectural design admission requirements. Admitted architectural design students apply to the construction management program during spring quarter of their junior year (first year in the architecture program). For architectural design students, construction management prerequisites are waived, but such students must take CM 313 and CM 323 prior to the construction management application deadline, April 1.

Dual Degree Program Requirements

142 credits

1. *Architecture Foundation Courses (60 credits)*: ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 362, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431
2. *Architecture Selectives (6 credits)*: 3 credits of graphic/media selective chosen from among the following BIM-recommended courses: ARCH 316, ARCH 410, ARCH 412, ARCH 413, ARCH 415, ARCH 418, ARCH 478, ARCH 481, ARCH 482, ARCH 484, ARCH 485, ARCH 486, ARCH 498. 3 credits of history/theory selective from among the following courses: ARCH 441, ARCH 442, ARCH 450, ARCH 452, ARCH 455, ARCH 457
3. *Construction Management Courses (76 credits)*: CM 301; CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 330, CM 331, CM 332, CM 333, CM 334, CM 335, CM 410, CM 411, CM 412, CM 414, CM 421, CM 422, CM 423, CM 426, CM 431 (capstone experience), CM 432, and CM 434
4. *Additional Major Requirement*: Minimum 2.50 cumulative GPA in upper-division college courses completed in the College of Built Environments. Minimum 2.0 in CM 431

Note: A minimum of 225 credits is required to complete a dual degree.

Minor

Minor Requirements: 25 credits to include a minimum of 20 credits in ARCH courses (at least 9 credits at the upper-division level) and 5 additional upper-division credits from courses in the College of Built Environments.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 - - The architecture program emphasizes a broad liberal arts foundation followed by a focus on architectural history and theory, materials and making, and sustainable technologies. Specific goals for student learning include an understanding of the sequences and history of human building activities; social, political, legal, and economic influences on design and construction; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; relationships of buildings to their sites and ecological contexts; sustainable technologies used in building construction.
 - The architectural design program emphasizes a broad liberal arts foundation followed by a focus on entry-level courses in architectural design, theory, the technology of building, and materials. Specific goals for student learning include an understanding of the organization of three-dimensional space in response to

specific human needs; the sequences and history of human building activities; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; building systems and their integration for human comfort; structural principles, relationships of buildings to their sites; social, political, legal, and economic influences of design and construction. Specific goals in the area of personal development include an ability to visualize three dimensions and think spatially; graphic, verbal, and written communication skills for design development and presentation; an ability to think critically and exercise self-criticism.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are available and vary according to individual interests within the program. See adviser for details.
- *Department Scholarships:* A limited number of department scholarships are available to eligible students entering their final year of the major.
- *Student Organizations/Associations:* AIAS (American Institute of Architectural Students)

Of Special Note:

Most states require that an individual intending to become an architect hold an architecture degree accredited by the National Architectural Accrediting Board (NAAB). The NAAB accredits three types of degrees: (1) the Bachelor of Architecture (BArch), which requires a minimum of five years of architectural study (this degree is not offered at the University of Washington), (2) the Master of Architecture (MArch), which requires a minimum of three years of study following an unrelated bachelor's degree or two years following a related pre-professional bachelor's degree, and (3) the Doctor of Architecture (this degree is not offered at the University of Washington). These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects.

The UW's four-year, Bachelor of Arts degree in architectural design is a pre-professional degree and is not accredited by NAAB. The pre-professional degree is useful to those desiring a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment options in fields related to architecture.

Architectural education at the University of Washington requires a minimum of six or seven years of higher education to attain the first professional degree, the Master of Architecture. The curriculum is divided into three two-year segments of coursework with a pre-professional Bachelor of Arts degree (with a major in architectural design) awarded at the completion of the second two-year segment. The professional degree, Master of Architecture, is awarded only upon completion of the third segment. (Students with the Bachelor of Arts in Architecture or bachelor's degrees in unrelated fields take an additional year of coursework).

Graduate Program

Graduate Program Coordinator
208 Gould, Box 355720
206-543-4180
archinfo@uw.edu

The department offers the Master of Architecture (MArch) and the Master of Science in architecture (MS Arch).

The MArch is a National Architectural Accrediting Board (NAAB)-accredited program for students already grounded in the sciences or liberal arts. Applicants interested in entering the profession of architecture should apply to the MArch program, which has three accredited tracks:

- 2+year accredited MArch for candidates holding a BA or BS in architectural design
- 3+year accredited MArch for candidates holding a bachelor's degree in a discipline other than architecture
- accredited dual degree, MArch/MLA, for candidates with or without prior architecture or landscape architecture degrees
- MArch in high performance building, a 1-year non-accredited post-professional program for candidates holding an accredited BArch or MArch

The MS Arch is a non-accredited advanced research-oriented degree for candidates who hold a bachelor's degree from a wide range of disciplinary backgrounds. The MS in architecture has two distinct degree streams:

- MS Arch in design computing
- MS Arch in architectural history and theory

Master of Architecture

The MArch degree, accredited by the National Architectural Accrediting Board (NAAB), is the only professional degree offered by the University of Washington. Completion of the department's 2+year or 3+year MArch degree program satisfies the educational requirement for licensing (and registration) as an architect.

1. 2+year MArch degree: design studio (30 credits); core courses (31 credits); electives (21 credits); thesis preparation (4 credits); thesis (9 credits). Students pursue one of three transcribed degree options: history, theory, and criticism; materials and fabrication; sustainable systems and design.
2. 3+year MArch degree: preparatory coursework and optional summer internship (51 credits); remaining 95 credits as described in 1, above.
3. MArch/MLA dual degree

4. Post-professional MArch degree in high-performance building: studio (6 credits); core courses (15 credits); electives (12 credits); thesis preparation (4 credits); thesis (9 credits)

Admission Requirements

1. Completed MArch application form
2. Transcripts from baccalaureate (or higher) degree(s). Primary emphasis on more recent and architecturally related coursework; minimum 3.00 (B) (or higher) GPA in the last 90 graded quarter hours or last 60 semester hours.
3. GRE test scores from within the last five years
4. Portfolio of work in visual arts and/or design. Of primary significance for all candidates.
5. Statement of purpose describing the candidate's professional aspirations and the extent to which the program can prepare the student for those objectives
6. Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the program

Degree Requirements

95 credits for 2+year degree; 146 credits for 3+year degree

1. *Preparatory-year requirements (for students in the 3+year MArch program only):* ARCH 303, ARCH 304, ARCH 305, ARCH 310, ARCH 311, ARCH 312, ARCH 323, ARCH 324, ARCH 331, ARCH 332, ARCH 350, ARCH 351, ARCH 352, ARCH 360
2. *First-year requirements* ARCH 500, ARCH 501, ARCH 502, ARCH 521, ARCH 531, ARCH 533, ARCH 570, ARCH 590, ARCH 591, one architectural history and theory selective, elective.
3. *Second-year requirements:* ARCH 503, ARCH 504, ARCH 571, ARCH 595 or ARCH 599, one professional practice selective, electives.
4. *Final year requirement:* ARCH 700, and one elective

1-Year MArch in High Performance Building Degree Requirements

46 credits

1. *Core Curriculum:* ARCH 503, ARCH 526, ARCH 530, ARCH 533
2. *Selectives:* 6 credits of building technology courses
3. *Electives:* 12 credits of electives
4. *Thesis:* 4 credits of ARCH 599; 9 credits of ARCH 700

Master of Science

45 credits

The MS Arch offers advanced, specialized study in two areas: design computing and architectural history and theory.

Design computing includes design methods, augmented and virtual environments, building simulation and analysis, digital fabrication, human computer interfaces for design, collaboration and community in design, and other related topics. Students work in the Design Machine Group (DMG), a collaborative research studio that fosters innovation and actively seeks ideas that shape the future of design and information technology. Coursework: 11 core credits, 21 credits of design computing electives, 4 credits of thesis preparation, and 9 credits of thesis.

Architectural history and theory encompasses the architectural, cultural, and political forces that have shaped modernity in architecture, including all its contemporary manifestations. Coursework: 11 core credits, 21 credits of history and theory electives, 4 credits of thesis preparation, and 9 credits of thesis.

Admission Requirements

1. Completed MS in Architecture application form
2. Transcripts from baccalaureate (or higher) degree(s) with a minimum 3.00 (B) (or higher) GPA in the last 90 graded quarter hours or last 60 semester hours of coursework
3. GRE test scores taken within the last five years
4. Portfolio of work showing evidence of the applicant's preparation for study in design computing, or a writing sample that shows evidence of applicant's preparation for study in the history and theory of architecture.
5. Statement of purpose that clearly articulates the applicant's goals and the extent to which the program can be expected to prepare him or her for those objectives. The statement should also describe the applicant's background and experience appropriate to the program and must also include a proposed research focus.
6. Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the MS in Architecture program

Design Computing Stream Degree Requirements

45 credits, as follows:

1. *Core Curriculum:* ARCH 587, ARCH 588, ARCH 597
2. *Electives:* 21 credits chosen from design computing courses, or other approved courses.
3. *Thesis:* 4 credits of ARCH 599; 9 credits of ARCH 700

History and Theory Stream Degree Requirements

45 credits, as follows:

1. *Core Curriculum*: ARCH 560, ARCH 597, B E 552
2. *Electives*: 21 credits of architectural history and theory courses, or other approved courses.
3. *Thesis*: 4 credits of ARCH 599; 9 credits of ARCH 700

Certificate Programs

Two interdisciplinary certificate programs offered by the College of Built Environments are available to MArch students in the areas of historic preservation and urban design.

The department also offers certificates in design computing and lighting design.

International Studies

The department offers architecture in Rome, Italy, at the UW Rome Center; architecture in Mexico City, Mexico; and architecture in Chandigarh, India. Other programs include travel to Scandinavia, Germany, Japan, and Australia.

Financial Aid

Scholarships and assistantships are more typically available to students already enrolled in the architecture program at the time of awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School's Fellowships, Assistantships, and Awards and the Office of Student Financial Aid.

Course Descriptions

ARCH 100 Introduction to Architecture Study (8) VLPA Introduces design studio instruction to students contemplating architecture as a field of study or career. Studio projects, informed by workshops, lectures, readings, field trips, and in-studio critiques introduce the history, theory, and practice of architecture. Includes instruction in basic design drawing and model making. Offered: S.

ARCH 101 Introduction to Architectural Studies (1) Provides an exposure to topics and methods of architectural education; explores educational and career opportunities; and outlines available student support resources. Credit/no-credit only.

ARCH 150 Appreciation of Architecture I (2/3) VLPA Historical survey of the architecture of Western civilization. For nonmajors.

ARCH 151 Appreciation of Architecture II (2/3) VLPA Historical survey of the architecture of Western civilization. For nonmajors.

ARCH 200 Architectural Design and Representation I (5) VLPA Introduces architectural representation as fundamental medium for investigation, analysis, and documentation of objects, processes, and architectural space. Consists of a series of investigative projects that introduce orthographic projection, axonometric, and perspective drawing, through which students develop comprehensive skills in hand-drawing and digital media. Offered: A.

ARCH 201 Architectural Design and Representation II (5) VLPA Introduces the fundamentals of architectural design. Consists of a series of investigative projects that introduce principles of architectural design as well as concepts and skills in architectural and digital representation. Prerequisite: ARCH 200. Offered: W.

ARCH 231 Making and Craft (5) VLPA Introduces the cultures and practical realities of "making" through study of the nature of tools, techniques, and the development of built culture over time. Examines the relationships of "making" to available materials, sources of energy and the development of infrastructure. Also covers qualities and characteristics of materials.

ARCH 251 World Architecture Non-Western Cultures (5) VLPA/I&S Prakash Introduction to historical and contemporary built environments of non-Judeo-Christian civilizations, primarily Hindu, Buddhist, Islamic, and Meso-American, as manifestations of cultural history and as responses to environmental determinants.

ARCH 300 Introduction to Architectural Design I (6) Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 201. Offered: A.

ARCH 301 Introduction to Architectural Design II (6) Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 300. Offered: W.

ARCH 302 Introduction to Architectural Design III (6) Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 301. Offered: Sp.

ARCH 303 Introduction to Design Studio I (6) Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields. Offered: A.

ARCH 304 Introduction to Design Studio II (6) Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields. Prerequisite: ARCH 303. Offered: W.

ARCH 305 Introduction to Design Studio III (6) Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields. Prerequisite: ARCH 304. Offered: Sp.

ARCH 310 Architectural Design Drawing I (3) Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with ARCH 303 studio to integrate drawing in all phases of the design process. Offered: A.

ARCH 311 Architectural Design Drawing II (3) Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with ARCH 304 studio to integrate drawing in all phases of the design process. Offered: W.

ARCH 312 Architectural Design Drawing III (3) Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with ARCH 305 studio to integrate drawing in all phases of the design process. Offered: Sp.

ARCH 315 Design Drawing (2) Projects, lectures, demonstrations, and exercises coordinated with studio projects to integrate drawing in all phases of the design process. Lessons in diagramming of design concepts and planning and presenting design solutions. Prerequisite: ARCH 200; corequisite: ARCH 300.

ARCH 320 Introduction to Structures I (3) Static - Force analysis; the study of external forces and force systems and their analytical solutions as applied to bodies at rest (equilibrium). Topic areas include beams, trusses, determinate frames, and load tracing. Offered: A.

ARCH 321 Introduction to Structures II (3) Strength of materials; the study of the properties of materials and cross-sectional shapes of structural elements with respect to their effectiveness in resisting stresses. Topic areas include stress and strain, section properties, analysis and design of beams and columns. Prerequisite: ARCH 320. Offered: W.

ARCH 322 Introduction to Structures III (3) Elementary structural design; synthesis of the previous structures coursework with applications to design of determinate timber and steel structures. Examination of forces on buildings: snow, live loads, wind, and earthquake. An introduction to concept of continuity. Prerequisite: ARCH 321. Offered: Sp.

ARCH 323 Structures I (3) *K. SIMONEN* Covers the design of building structures utilizing the fundamental principles of statics and mechanics of materials. Includes the behavior of beams,

trusses, arches, and frames; the structural performance of wood, steel, and concrete; and designing for gravity and lateral loads. First of a two-course sequence. Offered: W.

ARCH 324 Structures II (3) K. SIMONEN Covers the design of building structures utilizing the fundamental principles of statics and mechanics of materials. Includes the behavior of beams, trusses, arches, and frames; the structural performance of wood, steel, and concrete; and designing for gravity and lateral loads. Second of a two-course sequence. Prerequisite: ARCH 323. Offered: Sp.

ARCH 331 Energy and Building (3-5) NW Describes principles and applications of climate, energy use, and comfort as determinants of architectural form; architectural methods for climate adaptation using non-mechanical means of ventilating, cooling, heating, and lighting; and design and performance predictions for passive approaches to solar heating, heat transfer mechanisms, and strategies for climate-responsive design. Offered: Sp.

ARCH 332 Making and Materials (3-5) VLPA Introduces the cultures and realities of making and materials through the study of how tools, materials, and cultures interact to produce our built environment at all scales. Includes substantial hands-on physical interactions with real tools and materials.

ARCH 350 Architecture of the Ancient World (3/5) VLPA Architectural history in the Western world from beginnings to AD 550. Offered: A.

ARCH 351 Romanesque, Gothic, and Renaissance Architecture (3/5) VLPA Architectural history in the Western world from AD 550 to 1750. Offered: W.

ARCH 352 History of Modern Architecture (3/5) VLPA Ochsner Architectural history in the Western world from 1750 to the present. Offered: Sp.

ARCH 360 Introduction to Architectural Theory (3) Function of architectural theory in comprehending and ordering various human purposes in architecture, types of architectural purpose, and types of theories. Current concerns. Offered: W.

ARCH 361 Architecture Colloquium (5) Introduces a wide range of perspectives on architecture, with an emphasis on history and theory, making and materials, and sustainable technologies. Emphasizes the skills of reading, analysis, communication, and writing in the discipline of architecture. Offered: A.

ARCH 362 Architecture and Theory (3-5) Introduces a wide range of modern and contemporary theoretical movements in architecture. Emphasizes the basic skills of reading, critical inquiry, and communication. Offered: W.

ARCH 380 Computers in Architecture (3) Laboratories, lecture, and demonstrations to introduce computing in environmental design and planning. Offered: ASp.

ARCH 400 Architectural Design IV (6) Offers studio problems in non-residential building design to advance the student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 302. Offered: A.

ARCH 401 Architectural Design V (6) Offers studio problems in non-residential building design to advance the student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 400. Offered: W.

ARCH 402 Architectural Design VI (6) Offers studio problems in non-residential building design to advance the student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 401. Offered: Sp.

ARCH 403 Architectural Problems (6) Offered: S.

ARCH 404 Integrated Design/Build Studio (6) *C. DOSSICK* Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with CM 404; W.

ARCH 410 Introduction to Architectural Photography (3/5) *VLPA* Basic elements and processes of architectural photography to include camera controls, exposure technique, photo processing, and fundamental principles of photographing architecture. Student must provide own 35 mm (or larger) camera with manual operating controls.

ARCH 413 Architectural Photography Projects (3) Students develop in-depth photo essays relating to architecture, the urban movement, or landscape design. Lectures, seminar, and discussion. Prerequisite: ARCH 410.

ARCH 415 Architectural Sketching (3) Exercises in freehand representational drawing using charcoal, graphite, and conte crayon with emphasis on line, proportion, values, and composition. Studies progress from geometric to nongeometric forms.

ARCH 418 Watercolor Drawing (3) Introduction to the principles and practice of using transparent watercolor for the naturalistic representation of objects, people, and interior and exterior space.

ARCH 425 Life Cycle Assessment and Architecture (3) Explores use of life cycle assessment data and methods within design and construction practices to understand and reduce the environmental impact of buildings.

ARCH 426 Structural Unit Masonry (3) Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CEE 377. Instructors: Tawresey Offered: jointly with CEE 455.

ARCH 430 Materials and Processes (3) Lectures, field trips, and laboratory sessions directed toward the nature, potentials, and limitations of a variety of materials (wood, metal, plastics,

inorganic cementing materials, minerals, rocks, and clay) and the processes involved with their production, fabrication, and system compatibility.

ARCH 431 Environmental Control Principles (3) Daylighting of buildings, reducing noise and enhancing sound for communication, and regulating heat transfer for occupant thermal comfort; description of passive means for environmental control, including presentation of scientific explanations and design guidelines for utilizing these means; design guidelines are intended for use in the preliminary schematic design phase. Offered: AW.

ARCH 434 Color and Light (3) Lectures, demonstrations, exercises, and projects focusing on the use of color applied to the three-dimensional architectural context. Explores color theory with the multiple effects of changing light.

ARCH 435 Principles and Practices of Environmental Lighting (3) Perception-based approach to principles of natural and artificial lighting. Practical considerations of lighting involving environmental evaluations, calculations, and the use of lamps and fixtures. Sketch and model studies for applications. Impact of lighting design on energy conservation. Relation of lighting design process to architectural design concepts. Prerequisite: either ARCH 331 or ARCH 431.

ARCH 436 Building Acoustics (3) NW Description of principles and practices for manipulating and enhancing sound in buildings. Information about sound behavior and the organization of architectural elements (deployment of design features, including various geometries and materials) for the control of sound in enclosed spaces and between adjacent spaces.

ARCH 439 Architectural Lighting Design (3) Concentrates on the use of electric lighting and its effective integration in architecture and the built environment. Includes site visits, demonstrations, lectures, and projects. Prerequisite: ARCH 435.

ARCH 441 Visions of the Japanese House (3) Oshima Explores the origins, derivations, and permutations of the "Japanese house." Outlines underlying principles and paradigms of Japanese domesticity through history and traces its evolution through aspects ranging from the house's expression in media to its constructional materiality. Offered: A.

ARCH 442 Africa and Middle East Seminar (3) VLPA McLaren Advanced introduction to colonial and postcolonial architecture in Africa and the Middle East, beginning with the initial European colonization in the mid-nineteenth century. Provides a historical understanding of the formation of distinctive regional and/or national identities in the architecture of these regions. Offered: Sp.

ARCH 445 South Asian Architecture I (3) VLPA Prakash Advanced introduction to precolonial architecture and urbanism of South Asia. Using methodologies of culture studies, examines select Hindu, Buddhist, and Islamic case studies on a comparative genealogy.

ARCH 446 South Asian Architecture II (3) VLPA Prakash Advanced introduction to colonial and postcolonial architecture and urbanism of South Asia. Using methodologies of culture studies, covers 1800 to present, emphasizing the years since India's independence in 1947.

ARCH 452 History of Architecture in Seattle and Environs (3) I&S Ochsner Historical development of architecture in Seattle and surrounding areas from the nineteenth century to the present, also touching on issues of urban design and historic preservation.

ARCH 453 Japanese Architecture (3) VLPA Survey of Japanese architecture from its origins to modern times. Although Shinto architecture, tea houses, gardens, and modern developments are discussed, the primary focus is on the development of Japanese Buddhist architecture. Offered: jointly with ART H 419.

ARCH 455 American Architecture (3) American architecture from indigenous Native American traditions to the present. Offered: jointly with ART H 488.

ARCH 457 Twentieth-Century Architecture (3) VLPA Architecture in the twentieth century, mainly in Europe and the United States. Traces roots of Modernism in Europe in the 1920s, its demise (largely in the United States) in the 1960s, and recent trends such as Post-Modernism and Deconstructivism. Offered: jointly with ART H 491.

ARCH 458 Paris: Architecture and Urbanism (3/5) VLPA/I&S Spans the architectural history of Paris, from its Gallic, pre-Roman origins in the second century BCE through the work of twenty-first century architects. Focuses on changing patterns of the physical fabric of the city and its buildings, as seen within the context of the broader political, social, economic, and cultural history. Offered: jointly with ART H 494/JSIS A 433.

ARCH 459 Architecture Since 1945 (3) VLPA Theories and forms in architecture from the end of World War II to present. Includes new wave Japanese architects, recent Native American developments, and non-Western as well as Western trends. Offered: jointly with ART H 493.

ARCH 460 Design Theory and Analysis (3) VLPA/I&S Problematical nature of philosophies of architecture; interaction of philosophical concepts and architectural form and expression. Fundamentals of architectural criticism.

ARCH 462 Spatial Composition in Architecture (3) Advanced introduction to compositional strategies in architecture. Drawing on a historical survey of the development of Western architecture, the seminar investigates different compositional strategies and their relationship to cultural values and systems of meaning. Intended as complement to the design studio.

ARCH 466 Gender and Architecture (3) VLPA/I&S Examines gender in the experience, practice, and theory of architecture and urban space with a focus on modern typologies: skyscraper, home, convent, bachelor pad, street, and closet. Draws from architectural and art history, social studies, design practice and theory, comparative literature, film studies, and queer theory. Offered: jointly with GWSS 466.

ARCH 468 Architecture Capstone Preparation (3) Preparation for the Architecture major capstone project. Offered: W.

ARCH 469 Architecture Capstone (6) Development of the capstone project for the Architecture major. Offered: Sp.

ARCH 475 Residential Architectural Practice (3) Lectures and exercises focused on the operation of a professional architectural practice specializing in residential and smaller-scale projects. Topics include: clients and program development, design strategies and space planning, site considerations, regulatory constraints, consultants, contractors, specialized construction methodology, and issues, ethics, and liability specific to residential project delivery.

ARCH 478 CAD and Working Drawings (4) Intensive introduction to computer-aided design systems for developing construction documentation (working drawings). Lectures and exercises focus on learning the methodology for using CAD to efficiently prepare working drawings, as well as discussions regarding industry-recognized standards and current technology used in the preparation of documentation. Prerequisite: ARCH 380; CM 313. Offered: ASpS.

ARCH 481 3D Modeling and Rendering (3) Lectures and weekly exercises focus on understanding and applying the underlying principles of 3D computer graphics and rendering software. Topics include user-interface, data creation and modeling, lighting models, smoothing, texture mapping, ray tracing, radiosity, animation, and solid modeling. Prerequisite: ARCH 380.

ARCH 482 Web Weaving (3) *VLPA B. Johnson* Examines the function, limitations, and uses of primary web technologies and fundamental website design and implementation. Participants develop hands-on design/build expertise for website design, implementation, and maintenance, using readily available tools and techniques. Looks beyond today and explores emerging Internet technologies. Offered: A.

ARCH 483 Design of Virtual Environments (3) Explores through a blend of technical exercises constructing computational artifacts, readings, and discussions of relevant literature, the possibilities of online virtual environments. Incorporates a term project or paper based on exercises and readings. Offered: W.

ARCH 484 Design Computing Seminar (3) Weekly colloquium and discussion forum. Discusses design computing research and report on ongoing project progress, with demonstrations and guest speakers. Explores design computing, design thinking and design process, and inventing new computer-aided tools for design. Offered: W.

ARCH 486 Algorithmic Geometry in Architectural Design (3) Introduction to design and implementation of parametric modeling of algorithmically generated geometries using computational elements and real-time computation. Introduces concepts related to computer programming, computational geometry, and 3D modeling with weekly exercises using 2D and 3D computer modeling frameworks, plus a term project. Requires significant amount of hands-on work.

ARCH 487 Fundamentals of Building Information Modeling (3) Introduces students to building information modeling and associated software tools. Students learn the fundamentals of working with BIM software by developing a project using both 3D parametric modeling and the 2D documentation skills essential to communicating ideas effectively in professional practice.

ARCH 489 Simulation Based Design (3) Focuses on computational simulation tools and techniques to evaluate the performance of a design or design alternatives, starting at earliest conceptual design phases to help architects make informed design decisions. Topics include solar, lighting, thermal, and acoustical analysis techniques and their applications.

ARCH 490 Architectural Studies Abroad - Special Topics (*, max. 24) Department-approved, systematic study offered as part of architectural study abroad programs.

ARCH 491 Architectural Studies Abroad - Representation (1-6, max. 12)

VLPA Architectural sketching, drawing, modeling, and other presentation techniques in contexts outside the United States.

ARCH 494 Architectural Studies Abroad - Culture (1-6, max. 12) VLPA Studies of language, art, food, music, and other activities that influence architectural and urban form in contexts outside the United States.

ARCH 495 Architectural Studies Abroad - History and Theory (1-6, max. 12) VLPA/I&S Examines history and theory of architecture in study abroad programs.

ARCH 496 Architectural Studies Abroad - Urban Fieldwork (1-6, max. 12) Analysis and interpretation of urban form and architectural contexts through direct observation in locations outside the United States.

ARCH 497 Architectural Studies Abroad - International Practice (1-6, max. 12)

Observation and evaluation of architectural practices in contexts outside the United States through firm visits and guest presentations.

ARCH 498 Special Projects (1-12, max. 12) Instructor-initiated and department-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter.

ARCH 499 Undergraduate Research (1-6, max. 6)

ARCH 500 Architectural Foundation Studio I (6) The first of a two-quarter sequence structured as a series of design exercises that will expose students to a diversity of methods, scales and program types. Studio problems will balance the acquisition of basic design and representation skills with the exploration of broad themes of space, dwelling, site and place. The studio work is closely coordinated with parallel Representation, Design Technology and History and Theory classes. Credit/no-credit only. Offered: A.

ARCH 501 Architectural Design Studio II (6) Architectural design, with emphasis on development of professional skills in design synthesis, specifically the unique qualities of materials, construction technology, and assembly details in the expression of architectural ideas. Analysis includes the influence of regulatory measures on building form. Concurrent with ARCH 570. Offered: W.

ARCH 502 Architectural Design Studio III (6) Architectural design, with emphasis on development of professional skills in design synthesis, specifically the comprehensive integration of building systems within an ordered design concept. Analysis includes the planning and integration of structural systems, building service systems, and building envelope design as an appropriate architectural expression. Concurrent with ARCH 591. Offered: Sp.

ARCH 503 Architectural Integration Studio II (6) The first of a two-quarter sequence structured for the development of integrative design skills. Studio problems explore the relationship between building, the public realm and place-making in an urban context and develop a building design as part of larger urban systems related to energy, ecology and mobility. The fall studio work is closely coordinated with parallel Design Technology, Urban Issues and Contemporary Theory classes. Prerequisite: ARCH 502 Credit/no-credit only. Offered: A.

ARCH 504 Architectural Design Studio Options (6) Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502. Offered: AWSp.

ARCH 506 Advanced Architectural Studies (6) Advanced experimental studies dealing with significant architectural relationships that involve scholarly investigation, development, and presentation of results. Offered: S.

ARCH 510 Representation I (3) *A. Anderson* The first of a two-quarter sequence introduces representation techniques used in architectural design with an emphasis on hand-drawing fundamentals, two- and three-dimensional digital techniques, and architectural presentation strategies. It examines architectural representation as a medium for the investigation, documentation analysis and communication of architectural space. Assignments closely coordinated with parallel Foundation Studio. Offered: A.

ARCH 511 Representation II (3) The second of a two-quarter sequence introduces representation techniques used in architectural design with an emphasis on hand-drawing fundamentals, two- and three-dimensional digital techniques, and architectural presentation strategies. It examines architectural representation as a medium for the investigation, documentation analysis and communication of architectural space. Assignments closely coordinated with parallel Foundation Studio. Prerequisite: ARCH 510 Offered: W.

ARCH 521 Structural System Design (3) *Simonen* Studies structural configuration and system selection for building design. Focuses on developing an understanding of structural material,

element and system performance, and an ability to integrate structure and architecture to create efficient and elegant design solutions. Offered: A.

ARCH 525 Life Cycle Assessment and Architecture (3) Explores use of life cycle assessment data and methods within design and construction practices to understand and reduce the environmental impact of buildings.

ARCH 526 Topics in High Performance Buildings (3) Addresses key dimensions to the design of high performance buildings including: energy efficiency; health and comfort; structures and materials; economic performance; and renewable energy systems. Includes faculty-led discussions and presentations by experts in the field. Students explore and refine research topics in high performance buildings.

ARCH 527 Introduction to Digital Design and Fabrication (3) Offers an introduction to digital design and manufacturing technologies, with an emphasis on developing appropriate strategies for their use in design and architecture. Students learn to use digital design software and digitally enhanced fabrication tools to support their design strategies. Offered: AW.

ARCH 528 Digital Design for Fabrication and Construction (3) Explores the rapid integration of fabrication, construction, and performance criteria early in the architectural design process, through the use of powerful digital tools. Students test advanced digital tools in architectural production and develop awareness and skills in integrated digital design, analysis, and prototyping. Offered: W.

ARCH 529 Advanced Digital Projects (3) Advanced topics for students who have completed one or more design computing courses and wish to develop a project further. Prerequisite: either ARCH 527 or ARCH 528.

ARCH 530 Integrated Building Systems (3) *Miller* Discusses strategies for ordering separate and discreet building systems into integrated architectural schemes. Focuses on systems that affect architectural expression and resolution in buildings including: structural, environmental control, materials, and assembly with an emphasis on sustainable building design. Concurrent with ARCH 502. Offered: Sp.

ARCH 531 Active Control Systems for Building Operation (3) NW Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings. Descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and short cuts for anticipating system design and use. Prerequisite: either ARCH 331 or ARCH 431. Instructors: Heerwagen Offered: WSp.

ARCH 532 Construction Materials and Assemblies II (3) Lectures and readings pertaining to a survey of materials, assemblies, and techniques of assembly of concrete and steel frame, commercial exterior envelope, and interior partitioning building construction systems. Prerequisite: either ARCH 332 or CM 313. Offered: A.

ARCH 533 Advanced Environmental Systems (3) Focuses on computational simulation tools and techniques to evaluate the performance of a design or design alternatives, starting at earliest conceptual design phases to help architects make informed design decisions. Topics include solar, lighting, thermal, and acoustical analysis techniques and their applications. Offered: WSp.

ARCH 534 Green Technology (3) *Heerwagen* Examination and application of various resource-conserving building technologies, particularly within the context of the LEED Rating System. Principles and practices associated with the inclusion of these technologies in buildings.

ARCH 535 Daylighting Design Seminar (3) Focuses on theoretical and applied daylighting principles in conjunction with physical and digital analytical tools. Includes field assessment of constructed buildings and individual projects involving research and design for lighting and daylighting.

ARCH 536 Designing with Living Systems (3) Investigates an integrated approach to urban agriculture and building systems; looks at cyclical ecosystems intrinsically interconnected with buildings, urban infrastructure, and the constructed environment; establishes a thorough understanding of these productive, living systems, which are indispensable for architects and landscape architects in their pursuit of more sustainable design practices.

ARCH 537 Traditional Building Methods: New Adaptations (3) Explores recent developments in traditional building techniques, a resurgence of interest in handmade buildings, and the use of local materials in building construction. Also examines why these materials and methods are becoming critical to communities around the world, and how they can be optimized to meet twenty-first century requirements.

ARCH 538 Building Reuse Seminar: Investigating the Value of Existing Buildings (3) Investigates the repurposing of buildings as a resource and energy conservation strategy and as an alternative to demolition of existing buildings; discusses case study strategies for sustainable retrofits. Students critically observe, record, and analyze structures and discuss building reuse design in the context of sustainable environments.

ARCH 541 Visions of the Japanese House (3) Explores the origins, derivations, and permutations of the "Japanese House." Outlines underlying principles and paradigms of Japanese domesticity through history and traces its evolution through aspects ranging from the house's expression in media to its constructional materiality.

ARCH 550 History and Theory of Architecture I (3) First half of a two course sequence that introduces architectural history and theory in coordination with design studio and design technology courses. This course explores geographically and chronologically diverse cultures and their built works in terms of social, technological, and environmental factors while linking aspects of human making and meaning. Offered: A.

ARCH 551 History and Theory of Architecture II (3) *L. Iarocci* Second half of a two course sequence that introduces architectural history and theory in coordination with design studio and design technology courses. Starting from the Age of Discovery and continuing to the present

day, this course intends to gain a deeper understanding of architecture as a product and producer of the environment, society and technology. Prerequisite: ARCH 550 Offered: W.

ARCH 556 The Arts and Crafts Movement and Its Legacies (3) *Ochsner* Historical development of the arts and crafts movement focusing primarily on its influence on American architecture from 1870 to the present.

ARCH 558 Seminar in Twentieth-Century Architecture (3/5) Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in art history, architecture, architectural history, or permission of instructor. Offered: jointly with ART H 591.

ARCH 559 American Utilitarian Architecture (3) Significant American environmental design efforts arising from utilitarian needs, e.g., factories, bridges, skyscrapers, and associated technical building innovations.

ARCH 560 Seminar on Architectural Theories (3) Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism.

ARCH 561 Urban Design Theory (3) Study of development of nineteenth- and twentieth-century urban design theories and parallel developments in architecture and urban planning. Theoretical premises are related to current practices of urban design in various sociopolitical contexts, European as well as American. Evolutionary nature of theory emphasized. Prerequisite: URBDP 479 or permission of instructor.

ARCH 562 Contemporary Architectural Theory (3) The course is structured as an advanced introduction to contemporary architectural theory, engaging topics that will prepare students for the challenges of today's global built environment. The intention is to foster a critical understanding of design practice through examining areas of contemporary theoretical focus in architecture and the built environment. It also prepares students for the subsequent Research Methods class. Offered: A.

ARCH 563 Seminar in Architecture and Cultural Theory (3) Study of contemporary cultural studies and postcolonial writings in terms of their impact on architectural theory and practice. Topical seminar based on reading and individual research.

ARCH 564 Environmental Design and Well-Being (3) Analyzes how environmental design can promote well-being in natural systems and human life worlds. Explores current knowledge about climate change and organism-environment dynamics, theories of health and complexity, ideological barriers and the power of images, new materials, and "high-tech"/"low-tech" alternatives for ecological design and planning.

ARCH 567 Qualitative Research Methods (3) Qualitative research methods covering both the theoretical foundations and practical methodologies of traditional and innovative approaches, including cognitive mapping, open-ended interviews, ethnographic observation, hermeneutics, phenomenology, critical theory, communicative action, grass-roots empowerment, post-structuralism, and self organization. Offered: jointly with URBDP 519.

ARCH 570 Design Development (3) *Miller* Lectures and case studies emphasizing the design development phase of architectural practice. Concurrent with ARCH 501.

ARCH 571 Professional Practice (3-4) Introduces the business and ethics of architectural design and building construction, while helping students explore their professional identities and make intentional choices about their career paths. Compares fundamentals of architectural practice against historical evolution of the field and speculation about its future.

ARCH 574 Design and Construction Law (3) Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington State law. Offered: jointly with CM 500; A.

ARCH 578 Case Studies in Contemporary Architectural Practice (3) Presentations and discussions by local architectural firms examining the issues that influence building design and project delivery in contemporary architectural practice. Focuses on understanding the issues as opportunities rather than impediments to good design. Class visits a different architectural firm each week for an in-depth review of current projects.

ARCH 579 Technical Issues in Preservation Design (3) Issues, practices, and procedures involved in preservation and reuse of old and historic buildings. Technical and esthetic means by which practicing professionals approach the analysis, interpretation, and resolution of problems such work raises. Emphasis on recent and local projects and related experiences.

ARCH 581 Advanced Rendering (3) Provides an in-depth discussion and hands-on experience with technical and qualitative features of computer rendering. Students learn to generate digital images that can mimic the physical world and predict the final appearance of a design.

ARCH 582 Computational Lighting Design (3) Addresses the recent developments in lighting simulation, visualization, and per-pixel measurement techniques. Provides an understanding of the theoretical aspects of computer applications in lighting design; and the practical knowledge of tools that enhance the integration of the lighting analysis into architectural design processes.

ARCH 587 Theory of Design Computing (3) Examines the relationship between theory of design and computational tools for practice. Explores how the emergence of computers as a mainstream tool in design has already changed architectural practice. Discusses how, as with other technologies that revolutionized the practice of architecture, information technologies carry hidden implications about design process and products. Offered: A.

ARCH 588 Research Practice (3) Provides the opportunity for a guided preliminary exploration and refinement of a research topic, prior to thesis proposal. Weekly seminar meetings focus on student work with regular presentations and discussions. Offered: W.

ARCH 590 Urban and Preservation Issues in Design (3) Introduction to recent theory and practice in the fields of urban design and historic preservation primarily in North American

urban contexts, including examples of recent projects presented by practicing professionals. Concurrent with ARCH 500.

ARCH 591 Architecture and Landscape (3) Advanced introduction to the relationships between buildings and places in the landscape with an emphasis on Western concepts of nature. A taxonomy of place as nature is developed. Explores ways in which the architect can design places that landscape taxonomy. Concurrent with ARCH 502.

ARCH 595 Thesis Research and Preparation (4) Develops skills for conducting master's thesis research, including writing a major portion of the thesis document. Engages students as a community of peers sharing ideas and resources for completing thesis work. Required for admission to the master's thesis design studio. Credit/no-credit only. Offered: Sp.

ARCH 596 Fieldwork in Professional Practice (*, max. 9) On-location study under the supervision of a practicing professional involved in an aspect of environmental design.

ARCH 597 Research Practicum (5) *Johnson, McLaren* Provides a mentored research opportunity where students apply their research and writing skills and knowledge of methods and theory to an advanced research topic. Offered: Sp.

ARCH 598 Special Topics for Graduate Students (1-6, max. 6) Systematic study and offering of specialized subject matter. Topics vary and are announced in the preceding quarter.

ARCH 599 Independent Thesis Research and Preparation (4) Participants identify a master's thesis research area, articulate a specific question within the research area, find relevant literature and prepare an annotated bibliography, establish a research method and timetable, pursue preparatory research and analysis for the thesis project, and write, present, and defend a thesis proposal. Credit/no-credit only.

ARCH 600 Independent Study or Research (*-)

ARCH 700 Master's Thesis (*-)

Built Environment

Program Overview

410 Gould Hall

The PhD in built environment a College-wide, interdisciplinary degree program housed within the College of Built Environments. Provides students a common core of substantial, integrated knowledge concerning the multi-faceted built environment and then offers areas of specialization in three discrete fields of knowledge and practice:

- Sustainable Systems and Prototypes (across a range of scales, from building elements and assemblages, to buildings, site, and neighborhood context, city, and region)
- Technology and Project Design/Delivery (focusing on design of computing tools for planning and design and other built-environment fields)
- History, Theory, and Representation studies (focusing on issues of regional-global modernity)

Graduate Program

Graduate Program Coordinator
410 Gould Hall, Box 355740
206-543-5996
bephd@uw.edu

Doctor of Philosophy

Admission Requirements

1. Program application form
2. Three letters of recommendation
3. Curriculum vitae
4. An exhibit of work which best illustrates applicant's interests and abilities related to the built environment. May be an essay, a paper, a publication, a report, or a project for which the applicant has had major responsibility.
5. Statement of purpose
6. Graduate Record Exam (GRE) scores
7. Prospective international, immigrant, and permanent resident students whose native language is other than English and who have not received a bachelor's or master's degree from an accredited institution where the native language is English: TOEFL, with a minimum score of 92 on the Internet-based test.

Program Requirements

90 credits minimum

1. *Core courses (21 credits):*
 - a. B E 551, B E 552, B E 553
 - b. Colloquium/Practicum (2 quarters at 3 credits each)
 - c. Research methods and design: 6 credits from list, including both qualitative and quantitative coursework
2. *Specialization (minimum 30 credits):* One of three fundamental areas (sustainable systems and prototypes; technology and project design/delivery; history, theory, and representation), within which the student takes advanced and specialized coursework and conducts the dissertation research project. Courses within the College of Built Environments and in other UW units are available.
3. *General Examination:* Written and oral.
4. *Dissertation (30 credits):* Concludes with a final oral defense.

Course Descriptions

B E 200 Introduction to Built Environments (3) VLPA/I&S Introduction to critical issues related to the planning, design, construction, and use of our built environments and the roles of the various disciplines contained within the College of Built Environments. Offered: A.

B E 210 A Global History of the Built Environment I (5) VLPA/I&S V. PRAKASH This course critically examines built environments over time using a global perspective beginning with First Societies through 1st millennium CE. The global perspective encourages thinking about history in a transnational and transgeographical manner. The course is broadly structured around the concept of "time cuts" that allow for comparisons across regions and cultural formations. Prerequisite: There are no prerequisites; recommended: None are required. Offered: W.

B E 211 A Global History of the Built Environments II (5) VLPA/I&S V. PRAKASH This course critically examines built environments over time using a global perspective beginning 1st millennium CE to the present. The global perspective encourages thinking about history in a transnational and transgeographical manner. The course is broadly structured around the concept of "time cuts" that allow for comparisons and connections across regions and cultural formations. Prerequisite: There are no prerequisites; recommended: None are required. Offered: Sp.

B E 220 Cities, Health, and Well-being (3) I&S This course analyzes the ways urban built environments bear on physical and mental health and well-being (material-economic resources, security, social relations, open choices). It focuses on how the practices and knowledge of built environment professions and disciplines interact with public health, engineering, and the sciences to understand and change cities. Offered: W.

B E 230 Living with Disasters: Design for Resilience (5) NW/I&S *D. Abramson* Studies types of environmental hazards (e.g., earthquakes, flooding, climate change) and the ways people can build more resilient communities. Pre-major introduction to BE disciplines: architecture, landscape architecture, urban planning, construction management. Students apply concepts in a Seattle-based scenario project. Offered: Sp.

B E 405 Built Environments Studio (6) An intense learning experience in which students are assigned to interdisciplinary, collaborative teams to develop specific approaches to addressing complex issues related to built environments. Focus and format vary with the interdisciplinary team of instructors.

B E 498 Special Projects (1-12, max. 12)

B E 505 Built Environments Studio (6) Provides an intense learning experience in which students are assigned to interdisciplinary, collaborative teams to develop specific approaches to addressing complex issues related to built environments. Focus and format vary with the interdisciplinary team of instructors.

B E 550 Colloquium-Practicum on Research-Practice and Teaching-Learning (1, max. 6) A synthetic and interdisciplinary forum for the presentation and peer critique of faculty and student research and practice projects, and a venue for pedagogical issues and skills for effective teaching and learning.

B E 551 The Contemporary Built Environment (3) Covers major or landmark cases of complex built environment projects, emphasizing the multiple dimensions involved and their interconnections.

B E 552 Theories of Knowledge and the Built Environment (3) Systematic examination of alternative epistemological frameworks applicable to studying the built environment; examinations of their differences and similarities and of the possibility of a comprehensive, pluralistic approach.

B E 553 Ethics in Practice, Research, and Teaching (3) Preparation for ethical challenges facing professional practice, research, and teaching in the built environment. Coverage of general and professional ethics, and examination of principles and rules and application through case studies.

B E 597 Directed Readings (*, max. 30) Intensive reading in the literature of the built environment, directed by members of doctoral Supervisory Committee. Credit/no-credit only. Offered: AWSpS.

B E 598 Special Topics (1-6, max. 15) Systematic study of specialized subject matter. Topics vary depending on current interest and needs, and are announced in the preceding quarter.

B E 600 Independent Study or Research (*) Offered: AWSpS.

B E 800 Doctoral Dissertation (*-) Offered: A WSpS.

Construction Management

Department Overview

120 Architecture

Construction management is a diverse discipline focused on the delivery of projects that compose the world's built environment. Included are the determination of project requirements, management of design, procurement of materials, and management of the construction of the project within cost, time, and design parameters. In terms of dollar value output, the construction industry is the largest single production activity in the U. S. economy - accounting for almost 10 percent of the gross national product. The construction industry is heterogeneous and enormously complex. The major classifications of construction differ markedly from one another: residential, commercial, industrial, and infrastructure, as well as specialties such as electrical, mechanical, framing, excavation, and roofing. Construction management is the study of how projects are conceived, designed, and built; the types of materials and methods used; techniques for estimating the cost of construction; design and contract law; construction accounting; oral and written communications; safety requirements; project planning and project management.

Undergraduate Program

Adviser

120 Architecture, Box 351610

206-543-6377

uwcm@uw.edu

The department offers the following programs of study:

- Bachelor of Science in Construction Management degree
- A dual-degree program leading to the Bachelor of Arts degree with a major in architectural design and the Bachelor of Science degree in construction management
- A minor in Construction Management

Students take the first two years of study as an undeclared major in the College of Arts and Sciences or a community college, completing program prerequisite requirements. Upon admission to the major, students take the prescribed curriculum shown below.

Bachelor of Science

Suggested First- and Second-Year Courses: M E 123; PHYS 114, PHYS 115, PHYS 117, and PHYS 118; 5 credits of economics; ENGL 131, ENGL 281; ESS 101; MATH 112 or MATH

124; ACCTG 215 and ACCTG 225, CM 250, COM 220, MGMT 200, QMETH 201; chemistry or environmental-science courses.

Department Admission Requirements

Admission is for autumn only, is capacity constrained, and is divided into three groups: Freshmen Direct (FA), Early Admission (EA), and Upper-Division Admission (UA). Consult department website for more information.

- ***Freshman Direct Admission (FA)***

The department enrolls a small number of students each year directly out of high school, prior to their completion of any university-level prerequisites. Freshman applicants to the University listing construction management as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores. Freshman Direct students work with the construction management adviser to plan their first two years of coursework before beginning the standard curriculum. Such students are eligible to join the construction management student organizations, apply for scholarships, and participate in student competitions.

Students admitted under the Freshman Direct Admission program must complete all prerequisite course requirements listed under Upper-Division Admission as well as all major requirements to earn their degrees.

- ***Early Admission (EA)***

Students may also apply to the department in spring of their freshman year to enter as part of the Early Admission (EA) group in their sophomore year. This admission path is open to students who began their studies through UW as freshmen, have been enrolled no more than three quarters, and have completed at least 27 credits through UW (25 of the 27 UW credits must be numerically graded). Courses completed prior to applying must include: MATH 112 (or MATH 124 or Q SCI 291), PHYS 114 and PHYS 117 (or PHYS 121), and ECON 200. Other courses from the list of upper-division prerequisites may be taken to complete the minimum 27 credits.

Application deadline for Early Admission is April 1. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission and all prerequisite requirements must be completed by the April 1 deadline.

Students admitted under the Early Admission program must complete all prerequisite course requirements listed under Upper-Division Admission as well as all major requirements in order to earn their degrees.

- *Upper-Division Admission (UA)*
 1. *Prerequisite Courses:* Minimum 88 credits in the following categories (courses must be completed by the beginning of autumn quarter for admission that quarter):
 - a. *Construction:* CM 260
 - b. *Business and Management:* ACCTG 215 and ACCTG 225; MGMT 200
 - c. *Individuals & Societies (I & S):* 5 credits of economics; 5 additional I & S credits from UW Areas of Knowledge list (CM 250 recommended)
 - d. *Natural World (NW):* PHYS 114 and PHYS 117 (or PHYS 121), and PHYS 115 and PHYS 118 (or PHYS 122); MATH 112 (or MATH 124 or Q SCI 291); ESS 101; QMETH 201 (or STAT 220 or STAT 311); 10 additional NW credits from UW Areas of Knowledge list (chemistry or environmental studies recommended)
 - e. *Language Skills:* 5 credits from English composition list; 5 credits from "W" courses or English composition list (ENGL 131 and ENGL 281 recommended)
 - f. *Visual, Literary & Performing Arts (VLPA):* COM 220; 5 additional VLPA credits (from UW Areas of Knowledge list)
 - g. *Diversity (DIV):* 5 credits that meet UW's diversity requirement.
 2. Admission to the major is capacity constrained. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission. Completion of prerequisite requirements is not required to apply, but is required prior to being admitted in autumn quarter.
 3. Departmental application deadline: April 1, for the following autumn quarter. Selection for acceptance is made by early May, and all applicants are notified shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year.

Major Requirements

92 credits:

1. *Foundation Courses (78 credits):* ARCH 320, ARCH 321; MGMT 300; CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 330, CM 331, CM 332, CM 333, CM 334, CM 335, CM 410, CM 411, CM 412, CM 414, CM 420, CM 421, CM 422, CM 423, CM 432, and CM 434
2. *Construction Electives (minimum 6 credits):* Two of the following: CM 415, CM 416, CM 425, CM 426, CM 428, CM 429, CM 430, or CM 433

3. *Capstone Experience (5 credits)*: Minimum 2.0 in CM 431
4. *Additional Writing Requirement (3 credits)*: CM 301
5. *Additional Major Requirement*: Minimum 2.50 cumulative GPA in upper-division courses completed in the College of Built Environments

Dual-Degree Program

For requirements of the dual-degree program in architectural design and construction management, see the Architecture section.

Minor

Construction Management: Minimum 27 credits

1. Required courses (15 credits): CM 310, and CM 311 or CEE 307; CM 331; CM 333; CM 411
2. Electives (12 credits): four courses from the following: CM 321, CM 322, CM 332, CM 335, CM 414, CM 415, CM 421, CM 423, CM 428
3. Minimum 2.0 GPA in courses counted toward the minor

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of construction management involves an interdisciplinary curriculum that contains a mix of technical, managerial, and business courses to provide graduates the essential skills needed to be successful in the construction industry. Oral and written communication skills are strengthened through written requirements and oral presentations. Construction management skill sets include the ability to read and interpret construction contract documents; the ability to determine appropriate methods for project construction and the proper sequence for each associated construction task; the ability to estimate project costs and time requirements; the ability to evaluate project site safety hazards and take action to minimize the potential for accidents occurring; an understanding of the legal framework associated with contract construction; and the ability to manage the myriad activities associated with constructing a project. Graduates pursue careers with construction companies, design firms, public agencies, homebuilders, consulting firms, real estate developers, and construction material suppliers.
- *Instructional and Research Facilities*: The Built Environments Library (located on the third floor of Gould Hall) houses construction management books and periodicals. Additional materials are located in the Engineering Library and the Foster Library

(Business School). College resources include a 30-work-station computer laboratory in the basement of Gould Hall.

- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* An internship is required for completion of the degree program. Every student is encouraged to seek summer employment in the construction industry, to provide a taste of real-world experience and an opportunity to work for a construction firm. While the department seeks to identify opportunities for internship positions, the responsibility for securing a position rests with each student.
- *Department Scholarships:* A limited number of scholarships are available to eligible students.
- *Student Organizations/Associations:*
 - *Sigma Lambda Chi* is a national student honor society for recognition of outstanding students majoring in construction management. Membership is offered only to those students in the top twentieth percentile of their class. Each year the student chapter conducts community service activities.
 - *Associated Students in Construction (ASIC)* is an umbrella organization for several student chapters of national organizations: Associated General Contractors of America, National Association of Home Builders, Mechanical Contractors Association of America, and the National Electrical Contractors Association. Activities include professional guest lectures, field trips, attendance at professional meetings and seminars, and community service.

Graduate Program

Graduate Program Coordinator
120 Architecture Hall, Box 351610
206-616-1917

Master of Science in Construction Management

Admission Requirements

1. BS or BA in civil engineering, construction management, building technology, architecture, or similar field from an accredited college or university in the United States, or its equivalent from a foreign institution. Students with undergraduate degrees in an area other than construction management or building technology must demonstrate an understanding of estimating, project planning and control, and project management either by transcript, validation examination, or successful completion of the following courses: CM 410; CM 411; CM 421.
2. Minimum 3.00 GPA, based on last 60 graded semester hours or last 90 graded quarter hours of undergraduate and graduate study
3. GRE scores
4. Statement of goals and objectives

5. Letters of recommendation
6. International applicants whose first language is not English must submit a valid Test of English as a Foreign Language (TOEFL) or Michigan Language Test (MLT) score. Minimum score of 580 (TOEFL) or 237 (TOEFLC) or 90 (MLT)

Degree Requirements

45 credits

1. *Core Courses (9 credits):* CM 500, CM 535, CM 575
2. *Construction Management Elective Courses (15-21 credits):* 15 to 21 credits of the following: CM 505, CM 510, CM 515, CM 520, CM 525, CM 530, CM 540, CM 545, CM 550, CM 555, CM 565, CM 570, CM 580, CM 582, CM 584, CM 586, CM 588, CM 590, CM 598, B E 551, B E 552, B E 553. Thesis option requires 15 credits of CM electives; non-thesis option 21 credits of CM electives.
3. *General Elective Courses (12 credits):* Other graduate-level courses approved by adviser.
4. *Thesis or Research Paper (3 or 9 credits):* research paper - CM 600 (3); thesis - CM 700 (9)

Graduate Program in Construction Engineering

Students who complete this program earn a Master of Science in Construction Management.

Admission Requirements

1. BS or BA in civil engineering, construction management, building technology, architecture, or similar field from an accredited college or university in the United States, or its equivalent from a foreign institution. Students with undergraduate degrees in an area other than construction management or building technology must demonstrate an understanding of estimating, project planning and control, and project management either by transcript, validation examination, or successful completion of the following courses: CM 410; CM 411; CM 421.
2. Minimum 3.00 GPA, based on last 60 graded semester or 90 graded quarter credits of undergraduate and graduate study
3. GRE scores
4. Statement of goals and objectives
5. Letters of recommendation
6. International applicants must demonstrate English language proficiency

Degree Requirements

45 credits

1. *Heavy Construction Project Management (12 credits)*: CM 520, CM 580, CM 582, CM 588
2. *Infrastructure Construction (12 credits)*: CM 584, CM 586, CEE 595, CM 596
3. *Other Required Courses (17 credits)*: CM 500, CM 525, CM 590, CEE 552, CEE 592, CEE 594
4. *Graduate Research Report (4 credits)*

Course Descriptions

CM 250 Construction and Culture (5) I&S A. HOLM Evolution of modern building construction with emphasis on the relationship between the projects built over time and the people who built them. Focuses on the development of building technology, equipment, and materials used by Western civilizations. Offered: W.

CM 260 Digital Tools (3) W. Bender Use construction and design related software to perform project administration. Students will be able to apply Excel to organize construction costs, Revit to visualize construction in 3-D, Computer Aided Design to draw construction plans, SketchUp to visualize construction activities, and Bluebeam for plan reading and collaboration. Offered: AWSp.

CM 301 Construction Communications (3) Applies business writing to the construction industry. Focuses on planning, writing, and editing documents most critical to a construction manager's professional success. Offered: AW.

CM 310 Introduction to the Construction Industry (3) G. MIGLIACCIO Introduction to the construction process, including general overview of organization, relationships, practices, terminology, project types, procurement methods, industry standards, contract documents, and career opportunities. Offered: A.

CM 311 Construction Documents (2) Introduction to construction plans and specifications with emphasis on reading and interpreting them. Focuses on architectural/engineering drawings and associated specifications used in building construction. Offered: A.

CM 312 Construction Accounting (3) Introduction to accounting for the contractor, placing emphasis on the analysis and use of financial statements and a job cost accounting system. Offered: A.

CM 313 Construction Methods and Materials I (4) Introduction to basic building materials, with emphasis on techniques for assembly and utilization in residential and light construction, including materials such as concrete, brick, and wood. Offered: AS.

CM 320 Construction Contract Documents (3) Introduction to working drawings, specifications, and other documents designed to enable the student to read and interpret complete set of contract documents for residential and light commercial projects. Emphasis on the organization and uses of architectural/engineering drawings and specifications in the construction process. Offered: S.

CM 321 Mechanical Systems in Buildings (3) Introduction to building heating, cooling, plumbing, and fire protection systems including aspects of design, construction, estimating, and problem solving. Offered: W.

CM 322 Electrical Systems in Buildings (3) Introduction to electrical construction including electrical distribution from generation to consumption, terminology, equipment and applications, electrical contract documents and estimating, and electrical project management theory and practice. Offered: W.

CM 323 Construction Methods and Materials II (5) Analysis of building methods for structural, non-structural, and design and use of temporary structures including method selection, sequencing, and coordination of specialty trades in commercial and industrial construction. Offered: W.

CM 330 Construction Estimating Lab (1) Apply software to perform material take off and apply cost when estimating construction projects.

CM 331 Construction Estimating I (3) Introduction to the principles and techniques of estimating construction costs, with emphasis on quantity take-off and pricing elements of work. Offered: Sp.

CM 332 Construction Equipment Management (3) *G. MIGLIACCIO* Study of the basic principles, practices, and techniques used in the construction industry for selecting and managing construction equipment. Focuses on understanding the time value of money, estimating equipment ownership and operating costs, selecting the proper equipment for specific construction tasks, and estimating equipment production. Offered: Sp.

CM 333 Construction Safety (3) *K. LIN* Explanation of requirements of the Occupational Safety and Health Act and other related federal and state legislation as applied to the building construction industry. Standards for accident prevention, hazard identification, and responsibility for compliance emphasized. Offered: A.

CM 334 Construction Surveying (2) *D. JACOBSON* Introduction to construction surveying including layout of construction features, distance and elevation measurement, and use and care of surveying equipment. Offered: Sp.

CM 335 Sustainable Construction (3) *K. NEMATI* Studies issues associated with planning and constructing sustainable projects including development of LEED documentation and evaluation of financial, social, and environmental impacts of construction operations. Offered: Sp.

CM 340 Sustainable Building Design and Construction Practices (3) Examines sustainable standards for design and construction of commercial and institutional buildings focusing on environmental, economic, and social benefits of sustainable buildings. Offered: W.

CM 404 Integrated Design/Build Studio (6) *C. DOSSICK* Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with ARCH 404; W.

CM 410 Construction Estimating II (4) Principles and techniques for estimating commercial construction projects including a mock bid day exercise on a commercial construction project. Prerequisite: CM 331; CM 332. Offered: A.

CM 411 Project Planning and Control (4) *A. Abdel Aziz* Introduction to the basic principles, techniques, and practices used as tools by contractors to plan, schedule, and control costs on building construction projects. Prerequisite: CM 331. Offered: A.

CM 412 Construction Practice (2) *J. SHAIMAN* Introduction to challenges of managing a construction organization. Focuses on ethical behavior, organizational behavior, human resources management, marketing, financial management, and risk management. Prerequisite: CM 417 or CM 421. Offered: Sp.

CM 413 Competitive Business Presentations (1) *C. DOSSICK* Study and development of skills needed to develop and deliver professional construction management presentations. Includes a series of workshops and practical exercises in construction presentation skills, teamwork, and leadership. Offered: A.

CM 414 Virtual Construction (3) *C. DOSSICK* Examines the use of building information models for managing the construction process and facilitating collaboration among project participants. Offered: A.

CM 415 Heavy Construction Practices (3) *J. SCHAUFELBERGER* Introduction to heavy construction with emphasis on highway and bridge construction. Topics include: contract analysis, work breakdown, equipment selection, unit-price cost estimating, site logistics planning, and project scheduling. Prerequisite: CM 332. Offered: A.

CM 416 Residential Project Development (3) Studies the financial, technical, and managerial activities as well as the environmental impact regulations and studies associated with the development of residential projects, including the business and construction practices and marketing strategies needed for a successful project. Offered: A.

CM 417 Residential Project Management (3) *J. SHAIMAN* Introduction to the organization, management, control and administrative functions on residential construction projects. A residential case study will be utilized to provide hands on learning opportunities. Introduction to Cost control, Value Engineering, and Site Logistics. Prerequisite: CM 410; CM 411. Offered: W.

CM 420 Temporary Structures (3) *S. DANIALI* Study of temporary structures used to support construction operations such as concrete formwork, scaffolding systems, shoring systems, cofferdams, underpinning, slurry walls, and construction dewatering systems. Prerequisite: ARCH 321. Offered: Sp.

CM 421 Project Management I (3) Introduction to the organization, management, and administrative functions on construction projects including a hands-on and extensive case study of a commercial construction project, cost control, and introduction to the concepts of Value Engineering, partnering, and Total Quality Management. Prerequisite: CM 410; CM 411. Offered: W.

CM 422 Computer Applications in Construction (2) *A. ABDEL AZIZ* Introduction to the use of automated programs for planning, scheduling, and controlling construction projects. Focuses on the use of Primavera Project Planner software. Prerequisite: CM 411. Offered: W.

CM 423 Construction Law (3) *A. TRAMOUNTANAS* Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasizes Washington state law. Prerequisite: CM 417 or CM 421. Offered: Sp.

CM 425 Concrete Technology (3) *K. NEMATI* Introduction to the properties and behavior of concrete. Focuses on uses of concrete as a building material and new techniques for concrete construction. Offered: W.

CM 426 Preconstruction Techniques (3) *C. Dossick* Studies the preconstruction phase of a building construction project by focusing on conceptual cost estimating, schedule analysis, and constructability reviews during the development of the design for the project. Offered: W.

CM 428 Heavy Construction Techniques (3) *K. NEMATI* Studies the materials, methods, and techniques used in site work, highway, utility, and other heavy construction projects. Addresses concrete as a construction material, foundations, rigid and flexible pavements, bridges, dams, and tunnels. Offered: A.

CM 429 Construction Superintendent (3) *T. CHAMBERS* Study of the role and responsibilities of the Project Superintendent, analytical and technical skill sets used in managing field operations. Special emphasis on logistics, work flow planning, productivity tracking and development and management of a project schedule's critical path. Prerequisite: Offered: W.

CM 430 Building Code and Environmental Regulations (3) Introduction to the permit process, life-safety requirements, and environmental regulations for designs and construction of buildings as established by the national and local jurisdictions. Prerequisite: ARCH 322. Offered: Sp.

CM 431 Project Management II (5) Capstone project using case studies to apply skills, knowledge, techniques, and concepts developed in prior courses. Emphasis on the concept of

integrated project management, including cost estimating and bidding, scheduling, cost control, safety, project organization, and documentation. Prerequisite: CM 417 or CM 421. Offered: Sp.

CM 432 Soils and Foundations (3) *S. DANIALI* Origin, classification, and physical properties of soil as used in engineering and construction applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Prerequisite: CM 323. Offered: W.

CM 433 Construction Labor Relations (2) *E. KOMMERS* Introduction to construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Offered: W.

CM 434 Lean Project Planning (3) *Y. KIM* Studies lean construction principles and examines how those principles can be applied in a construction context to improve project quality and shorten duration while reducing cost. Offered: Sp.

CM 450 Construction Project Management (5) *A. ABDEL AZIZ* Examines management of construction projects focusing on construction contracting, cost estimating, project scheduling, and resource management. Offered: S.

CM 481 Facility Life Cycle 1: Planning (3) Introduction to facility management. First in sequence of three built around the principle of the facility life cycle. Defines key terms. Examines topics such as ethics, business context, budgets, cost analysis, and strategic planning. Students work in online teams to develop a course-final project.

CM 482 Facility Life Cycle 2: Design and Construction (5) Second in sequence of three built around the principle of the facility life cycle. Covers design basics, cost estimates, building materials, project management, and construction administration. Students establish a mentor relationship with a professional facility manager and interview three guest speakers, experts in their fields. Offered: A.

CM 483 Facility Life Cycle 3: Relocation and Operational Issues (4) Final in sequence of three built around the principle of the facility life cycle. Provides an overview of issues related to facility operations and maintenance, including occupancy and start up, inventory and staff management, relocation, disaster planning, emergency preparedness, and security. Offered: W.

CM 498 Special Topics (1-10, max. 20)

CM 499 Undergraduate Research (*, max. 12) Individual or small-group studies. Students may select topics with approval of faculty sponsor and department.

CM 500 Design and Construction Law (3) Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington State law. Offered: jointly with ARCH 574; A.

CM 510 Advanced Construction Techniques (3) *K. NEMATI* Study of techniques and practices used in complex construction projects, including industrial and high-rise structures, building renovation, and tenant improvements. Offered: A.

CM 512 Preconstruction Facilitation (3) *C. Dossick* Studies the preconstruction phase of a building construction project by facilitating the work of a multi-disciplinary team focusing on developing the conceptual design for a construction project. Offered: W.

CM 515 Innovative Project Management Concepts (3) *C. DOSSICK* Examination of innovative techniques for planning and managing construction projects including use of time-phased, three-dimensional Building Information Models; sustainable construction techniques; and web-based project management tools. Offered: W.

CM 518 Lean Construction (3) *Y. KIM* Examines the application of lean production management concepts to the management of construction projects. Offered: Sp.

CM 520 Construction Procurement Systems (3) Study of the different methods used in the procurement and delivery of projects in the construction industry including lump sum, unit price, cost-plus, design-build, and construction management contracts. Offered: A.

CM 525 Cost Analysis and Management (3) *Y. KIM* Study of cost management procedures applicable to the building process from the conceptual phase through owner operations, including conceptual estimating, project cost analysis and control, and value engineering and life-cycle costing. Offered: W.

CM 527 Management of Scope and Risks for Construction Projects (3) *G. MIGLIACCIO* This course introduces students to the process of evaluating scope definition and risks in a project's life cycle. Using industry literature and reviewing case studies, students will learn project scoping and risk management best practices and apply them to a team project. Offered: W.

CM 528 Advanced Cost Management in Construction (3) *Y. KIM* Studies the three primary aspects of project cost control: overhead cost control, direct construction cost control, and life-cycle cost analysis. Addresses techniques in activity-based costing, earned value analysis, and life-cycle cost analysis. Offered: S.

CM 530 Project Economics and Risk Analysis (3) *A. ABDEL AZIZ* Studies the process for delivery of public-private infrastructure projects and risk analysis techniques used in economic/financial project studies. Focuses on understanding public-private project delivery systems, feasibility studies, project financial and economic modeling, and quantitative risk analysis techniques. Offered: Sp.

CM 535 Research Methods in Construction (3) *K. LIN* Examination of research methods used in construction studies. Includes an overview of the research process, planning of a successful research endeavor, literature review, qualitative and quantitative research, ethics in research and publishing, and various research methodologies. Offered: W.

CM 540 Sustainable Construction (3) *W. BENDER* Study of sustainable construction techniques and best practices. Focuses on use of U.S. Green Building Council's Leadership in Energy and Environmental Design standards to evaluate alternatives and select techniques for constructing sustainable projects. Offered: W.

CM 545 Real Estate Development (3) *A. HOLM* A study of the technical issues involved in developing real-estate projects. Tracks project development from initial conception through closing of the sale. Emphasizes the steps and processes involved in pursuing, analyzing, and closing a real-estate purchase. Offered: S.

CM 550 Residential Project Development (3) Study of the financial, technical, and management activities and environmental impact regulations and studies associated with the development of residential projects, including business and construction practices and marketing strategies for continued profitable operation of a residential construction firm. Offered: S.

CM 555 Construction Firm Management (3) Management of construction company including organization, corporate structure, operation procedures, marketing, and human resources management. Emphasis on safety and loss prevention management, insurance and risk management, financing, accounting, marketing construction services, and bonding requirements for construction company. Other topics include individual and corporate planning and process of strategic planning. Offered: W.

CM 560 Design-Build Project Management (3) Examines the design-build process used for the delivery of construction projects. Involves analysis of project owner requirements and development of a written proposal for design and construction. Offered: Sp.

CM 565 Managing International Projects (3) *K. LIN* Study of processes involved in the selection, acquisition, and management of international construction projects. Emphasis is placed on examining common problems associated with managing construction projects outside the United States, identifying risks involved, and discussing possible solutions. Offered: S.

CM 570 Facilities Management (3) Major issues involved in facilities management: facilities planning, financial planning, real estate management, interior space planning and management, facilities operation and maintenance, and emergency preparedness. Offered: Sp.

CM 575 Leadership in Construction (3) *A. HOLM* Studies leadership principles applicable to the construction industry. Addresses both organizational leadership and leadership of construction processes. Offered: A.

CM 580 Temporary Structures (3) *K. NEMATI* Study of materials, methods, and techniques associated with temporary structures used in various construction operations, such as concrete formwork, scaffolding, underpinning, cofferdams, slurry trenches, earth-retaining structures, and dewatering systems. Offered: Sp.

CM 582 Heavy Construction Estimating (3) *A. ABDEL AZIZ* Study of the principles used in developing cost estimates for heavy construction projects. Includes interpretation of contract

documents, quantity take-off, pricing, and preparation of unit-price bid documents. Emphasizes developing cost estimates for highway projects. Offered: S.

CM 584 Marine Construction (3) *S. DANIALI* Study of the materials, methods and techniques associated with construction of projects in marine environments, including the impact of site conditions on the selection of appropriate construction techniques. Emphasizes equipment and crew selection, productivity and cost estimation, and construction sequencing. Offered: A.

CM 586 Utility Systems Construction (3) *W. BENDER* Study of the materials, methods, and techniques associated with construction of major utility systems, such as water, sewer, communications, electrical or natural gas. Includes construction of central utility plants as well as major distribution and collection systems. Offered: Sp.

CM 588 Construction Operations and Productivity (3) Study of heavy construction operations with emphasis on productivity enhancement focusing on an integrated approach to planning, modeling, analysis, and design of construction operations, and the use of simulation models and other analytical tools. Offered: W.

CM 590 Research Methods in Construction Engineering (2) *J. SCHAUFELBERGER* Study of the academic research process. Includes development of a research proposal, review of relevant literature, selection of research methodology, collection of data, data analysis, and preparation of research report. Offered: W.

CM 598 Special Topics (1-6, max. 6) Systematic study and offering of specialized subject matter. Offered: AWSpS.

CM 600 Independent Study or Research (*-) An in-depth independent investigation of some facet of construction management. Offered: AWSpS.

CM 700 Master's Thesis (*-) Offered: AWSpS.

Landscape Architecture

Department Overview

348 Gould

Landscape architecture is a professional design discipline that addresses both the built and natural environments. It focuses on the design, analysis, and planning of outdoor spaces across a wide range of scales, with the intent of creating places that are both meaningful and functional. Landscape architects design everything from infrastructure elements, such as roadways, drainage systems, and parks, to prominent cultural monuments and gardens for public and private housing units. The education of a landscape architect includes aesthetic design skills, the development of social and environmental ethics, technical design skills, knowledge of a wide range of natural processes, an awareness of design history, and skills for working with other people. At the University of Washington, the focus is on urban ecological design education, which allows students to make a difference in the future of cities and urban regions all over the world.

Undergraduate Program

206-543-9240, 206-685-4486

belarc@uw.edu

The Department of Landscape Architecture offers the following programs of study:

- The Bachelor of Landscape Architecture (BLA) degree
- A minor in urban ecological design
- Certificates in Urban Design and Historic Preservation (see College of Built Environments)

Bachelor of Landscape Architecture

Department Admission Requirements

Core courses within the department form a seven-quarter curriculum designed to start autumn quarter of the junior year. Students take a sequence of seven studios, other sequential skills-based courses, theory courses, and directed electives. Admission is competitive. Completion of the requirements listed below does not guarantee admission. Admission is based on academic record, a portfolio of creative work, three letters of recommendation, and other application materials. Refer to the department's website, <http://larchwp.be.washington.edu/> to select "undergraduate program" link from the "admissions" bar for application materials and detailed information on admission, prerequisites, and required coursework.

1. Minimum 70 credits to include:

- a. *Departmental Pre-professional Requirements (16 credits):* L ARCH 300* (usually offered autumn and summer quarters); L ARCH 352 (autumn quarter); and L ARCH 353 (winter quarter)

*Transfer students: These three courses are available and may be taken through the University's Professional and Continuing Education unit prior to admission to the UW.

- b. *General Education Coursework:* minimum 60 credits to include 5 credits of English composition; 4-5 credits of Quantitative and Symbolic Reasoning; and 50-51 credits selected within the following Areas of Knowledge: Visual, Literary, & Performing Arts (20 credits); Individuals & Societies (20 credits); Natural World (20 credits), of which one course must fulfill prerequisite requirement for ESS 315/ENVIR 313 or ESS 301; plant biology class recommended.

*L ARCH 300 can be counted toward general education requirements. Other L ARCH courses which are not required within the BLA program, or as admission requirements, may be counted for general education requirements. Students planning to complete the degree in seven quarters should complete all departmental general education requirements prior to starting the degree.

2. *Application Deadline:* Complete applications are due by 5 p.m. on the first day of spring quarter for the following autumn quarter. Students are not admitted at other times. Applications must include the BLA application materials. Students should apply during their second year to make satisfactory progress toward the degree.

Program Requirements

Minimum 182-183 credits, to include:

General Education Requirements (69-70 credits): L ARCH 300 and other L ARCH courses which are not requirements, either within the BLA program or as prerequisites, may count toward I&S/NW/VLPA requirements.

1. *Written and Oral Communication (5 credits):* one 5-credit English composition course from the University list. 10 additional writing credits are required, but can be met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA) (20 credits):* L ARCH 300; 14 additional VLPA credits; drawing class recommended
3. *Individuals & Societies (I&S) (20 credits)*
4. *Natural World (20 credits):* One course listed as prerequisite requirement for either ESS 315/ENVIR 313 or ESS 301; additional NW credits to total 20 credits; plant biology class recommended

5. Quantitative and Symbolic Reasoning (4-5 credits)

Major Requirements (minimum 113 credits)

1. *Studio Classes*: L ARCH 301, L ARCH 302, L ARCH 303, L ARCH 402, L ARCH 403, L ARCH 474, L ARCH 475
2. *Planting Design*: L ARCH 424
3. *History*: L ARCH 352 and L ARCH 353
4. *Theory*: L ARCH 341, L ARCH 361, L ARCH 363
5. *Graphics*: L ARCH 411, L ARCH 440, L ARCH 441
6. *Professional Practice*: L ARCH 473
7. *Construction*: L ARCH 331, L ARCH 332, L ARCH 433
8. *Soils*: L ARCH 432 or other course chosen from approved list maintained by department
9. *Plant Identification*: either BIOL 331/ESRM 331, BIOL 317, or equivalent course approved by department
10. *Managing Plants*: either ESRM 473, ESRM 474, ESRM 479, or ESRM 480
11. *Geology*: Either ESS 301 or ESS 315/ENVIR 313
12. *Directed Electives* to bring major total to 113 credits, chosen from approved lists maintained by the department in the following areas: 3-5 credit course in environmental history; two 3-5 credit courses in ecology and forestry; 3-5 credit course in legislation; 3-5 credit course in soils; 3-5 credit course in urban design and planning

Minor

Urban Ecological Design

Minor Requirements: Minimum 25 credits, consisting of 20 credits of L ARCH courses open to non-majors; 5 credits of courses 200 level and above from within the College of Built Environments or from ESRM or GEOG courses; 2.0 minimum grade in all courses counted toward the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The BLA program provides a professional, accredited degree which enables graduates to practice successfully in design firms, nonprofit organizations, and public agencies. Building from a liberal arts foundation, the program focuses on developing design knowledge, skills, and abilities through a sequence of nine environmental- and community-based design studios.

The goals of the program are to provide students with a broad academic and professional exposure to landscape architecture and design so their creative potential and professional growth are realized, and so they may become leaders in the field. The education includes learning to conceptualize and design through practice on studio projects; fostering creativity; developing graphic, written, and verbal communication skills; facilitating

cognitive abilities; and developing applicable computer skills in the design process. Studios use individual, team-oriented, and interdisciplinary projects to develop strong interactive and evaluative skills. Studio education applies knowledge gained in lecture courses which include historic and contemporary concepts in landscape architecture, design theory, site planning, construction, and communications, as well as elective courses in allied disciplines. The studio sequence addresses projects from detailed to neighborhood scales, varied contexts, and with diverse cultures. Overall, the program focuses on the application of ecological design strategies to urban and urbanizing areas, which characterizes the department's focus on urban ecological design.

- *Instructional and Research Facilities:* The Bachelor of Landscape Architecture degree is structured around studio classes augmented by lecture and skills-oriented courses. The program affords some opportunities for independent studies and work in professional settings, beyond the minimum requirements for the major. Departmental courses are complemented by elective courses from other areas, including urban horticulture, soils, geology, urban design and planning, botany, and ecology.

Landscape architecture studio classes are led by departmental faculty or members of the professional community. Studio classes may be taught jointly with faculty from other disciplines. Studio classes address specific areas of inquiry including basic design principles and processes, planting design, materials and craftsmanship, landscape planning for parks or natural areas, neighborhood and civic-space design, urban landscape design, ecological restoration, and culturally-based design. A capstone studio requires students to integrate their knowledge of design theory, practice, and construction in a design-build project for a local community. The department regularly offers study abroad programs as well as opportunities to work with local communities and public agencies.

- *Honors Options Available:* Students may apply for admission to the Bachelor of Landscape Architecture Honors option. See departmental program coordinator.
- *Research, Internships, and Service Learning:* Departmental lecture courses address the functioning of natural systems, site planning issues, computer applications, and cultural and sociological forces that influence the profession's work. Advanced studio courses, including the capstone studio, typically provide service learning experiences in a particular community context. In addition to required coursework, the program encourages students to pursue personal interests through directed and independent study within and beyond the department. Students are encouraged to gain real-world experience through a practicum with professional firms, organizations, or agencies.
- *Department Scholarships:* Limited availability.
- *Student Organizations/Associations:* Student chapter, Washington Chapter of the American Society of Landscape Architects

cauplarc@uw.edu

Master of Landscape Architecture

The MLA program offers training in design and inquiry. Design studios form the core, supported by independent investigation in seminars and a thesis project. Students develop a specialty within the discipline. The curriculum emphasizes the following:

Urban Ecological Design. Exploring connections between culture and nature and testing ideas on how social and spatial conflicts between development and conservation might be addressed. Faculty focus increasingly on areas expected to function as part of an ecological infrastructure. Diverse human cultural communities have developed with differing perceptions of and values for changing landscapes. Students study cultural resources of human communities as they develop relationships to their environments, and participate in this overlap between natural and cultural processes. The department currently offers Study Abroad programs in Canada, Mexico, Guatemala, Europe, and East Asia as well as opportunities to work with local communities and public agencies.

Design Leadership. Designing outdoor educational environments. Students develop leadership abilities in definition and practice of design as a basis for interdisciplinary work; environmental education and application of ecological concepts to urban design; use of communication technology to develop creative solutions to cultural and environmental conflicts; and international design-build projects in which students confront the global nature of contemporary development issues.

The program encourages applicants from diverse academic and professional backgrounds. Students may add elective courses in other disciplines to their core curriculum and may participate in College-wide certificate programs in Urban Design, and Preservation Planning and Design. See program descriptions in the College of Built Environments section.

Admission Requirements

1. Application deadline is January 15, for admission the following autumn quarter.
2. Baccalaureate degree from an accredited U.S. college or university, or the equivalent from a foreign institution
3. 3.00 or higher GPA in the last 90 graded quarter hours or the last 60 graded semester hours
4. Graduate Record Examination (GRE) score taken within the past three years.
International students with degrees from non-English speaking universities, must also submit TOEFL scores.

5. Admission is competitive. Contact the department for additional information.

Degree Requirements

Minimum 72 credits, to include:

1. Seminar and field courses to develop a specialty (12 credits), depending on individual interests. Students with a previous degree in landscape architecture begin coursework with required graduate curriculum studios, while students from other educational backgrounds begin with basic core design studios.
2. Thesis or capstone project – either a written and graphic product or a purely written product for the thesis. Four models are available: the professional project thesis, the design critique thesis, the research thesis, and the design thesis. Students choosing a capstone project work either on a Group Project Option or a two-quarter Studio Option.

Course Descriptions

L ARCH 200 Landscape Architecture Field Trips (2) VLPA/I&S Five field trips introduce typical landscape architecture projects and demonstrate scope of the landscape architecture field. Visits to major projects in the Puget Sound region include city and county parks, river parks, harbors, downtown redevelopments, streetscapes, campus headquarters, and others. Open to nonmajors.

L ARCH 212 Designing the Future (5) VLPA/I&S *I. Robertson* Ecological/environmental instability and resulting social/cultural disruptions make the world in which spatial designers work increasingly uncertain. Lectures and guest speakers explore diverse ways in which design may create more sustainable futures. Course activities, including in-class design exercises, internet research, group discussions, take home projects, etc. encourage synthetic/integrative thinking. Offered: A.

L ARCH 300 Introductory Landscape Architecture Design Studio (6) VLPA Introduction to history and environmental influences in field while developing design and graphic skills. Site analyses and drawing to convey design concepts. Relationship of visual perception to drawing, role of values in design, verbal communication, and behavioral analysis of design process. Required for admission to Bachelor of Landscape Architecture program.

L ARCH 301 Design Foundations Studio (6) Introduces site planning and design process, principles, and skills through experiential learning. Examines and applies landscape elements used to design, including plants. Activities foster skill in design process, shaping landscape form and space, creativity, communication, group dynamics, and organization. Includes required fieldtrips. Majors only.

L ARCH 302 Urban Sites Studio (6) Explores application of design ideas and principles to urban sites. Applies theory and research informing the design of human environments and lessons from urban and ecological design precedents to the design of urban places. Includes

design across scales to detailed site design studies, including planting design. Majors only. Offered: W.

L ARCH 303 Ecological Systems Studio (6) Project design studies related to ecological systems. Emphasizes the innovative use of ecological processes and patterns in design development to improve designed landscape's performance. Both biophysical and social criteria are used to define performance. Introduces computer-mapping applications. Majors only.

L ARCH 310 Landscape Architecture Field Sketching (2) Introductory level sketching of landscape subjects: natural and urban sites, plants, animals, architectural elements. Emphasis on perspective. Various media, including pencil, charcoal, markers, ink wash, water color.

L ARCH 311 Introduction to Design Graphics (2) Introduction to communication techniques for various phases of the design process. Many techniques are introduced and their suitability and appropriateness for different purposes explored.

L ARCH 322 Introduction to Planting Design (3) VLPA Traditional ways plants are used in landscape design. Composition and design characteristics of plant materials. Technical considerations for selection, climate, cultural suitability, availability, costs, and maintenance. Open to nonmajors.

L ARCH 323 Topics in Planting Design I (1) Explores planting design topics that relate specifically to site, program, and design issues addressed in concurrent studio projects. Identifies and describes native and ornamental trees and shrubs on the UW campus and vicinity. Utilizes tree canopy layers, shrub masses, and ground plane layers as space forms in studio project designs. Concurrent with L ARCH 301.

L ARCH 324 Topics in Planting Design II (1) Explores planting design topics that relate specifically to site, program, and design issues addressed in concurrent studio projects. Utilizes trees, shrubs, and herbaceous plants as space forms in urban contexts. Utilizes plant characteristics of color, texture, and form in studio project design. Considers design principles of unity/diversity, complexity/simplicity, and pattern in studio project design. Concurrent with L ARCH 302.

L ARCH 325 Topics in Planting Design III (1) Explores planting design topics that relate specifically to site, program, and design issues addressed in concurrent studio projects. Considers trees, shrubs, and herbaceous plants of natural and ecosystems human-made plant communities. Considers plant community dynamics and changes over time. Concurrent with L ARCH 303.

L ARCH 331 Landform Grading and Drainage (3) Introduces the concepts and methods behind grading and drainage and how they are used as design and problem-solving tools. Covers the relationship between grading and drainage plan graphics and their actual three-dimensional applications. Presents basic design principles. Considers the ecological and artistic approaches to grading and drainage. Majors only. Offered: Sp.

L ARCH 332 Materials, Craft, and Construction (3) Materials and structures in landscape construction. Design criteria and construction techniques for detail elements of landscape architecture. Working drawings, specifications, cost estimates, and procedures.

L ARCH 341 Site Design and Planning (3) Introduces urban ecological design issues for good site-planning processes, principles, and methods. Linked with L ARCH 301. Addresses planning for people, natural systems in place-making, design for movement with carried land uses. Includes readings, discussions, presentations, campus walks, case studies, graphic and written assignments.

L ARCH 352 History of Landscape Architecture (5) VLPA/I&S Survey of the development of landscape architecture as an art form from Mesopotamia to the present. Relationships to physical landscape, climate, culture, religion, and other arts. Open to non-majors. Offered: A.

L ARCH 353 History of Modern Landscape Architecture (5) VLPA/I&S Development of profession and art of landscape architecture in the United States, Europe, South America, and Japan in relation to prevailing social, economic, political, and cultural factors. Relationships with other professions, especially architecture and urban planning, and other arts, such as painting and sculpture. Open to non-majors. Offered: W.

L ARCH 361 The Human Experience of Place (3) I&S/VLPA Interdisciplinary approaches to exploring the reciprocal relationship between people and the landscapes of everyday life. Through readings, discussion, in-class activities and mini-projects, students study place attachment, relationships to nature, environmental attitudes and perception, personal space, territoriality, urban public space, diversity, participation, and the politics of space. Open to nonmajors.

L ARCH 362 Design of Cities (3) VLPA/I&S Introduction to the discourses and debates in the contemporary design of cities. Provides an overview of design theories and examples of historic and contemporary work. Includes discussion of the contesting urban processes: visions and paradigms of city; discourses of nature and the city; contemporary urban changes; public and community process; and everyday place making.

L ARCH 363 Ecological Design and Planning (3) NW Introduction to landscape ecological theory applied to urban environments. Comparison of different vocabularies used to describe landscape structure and function, from the fields of landscape design, urban design, and biology. Discussion of design theories that have sought to re-center landscape planning and design around the goal of achieving ecological sustainability.

L ARCH 401 Urban Recreation Design (1-6, max. 6) VLPA/I&S Special studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARCH 402 Neighborhood Design Studio (1-6, max. 6) Studio at neighborhood and site scales, mixed use. Incorporates urban design theory, precedents, neighborhood/project issues,

and community clients. Skills in neighborhood and site analysis, programming. Designs are developed in groups and individually. Methods include readings, research, critiques, field studies, and graphic, written, and verbal presentations.

L ARCH 403 Cultural Landscape Studio (1-6, max. 6) Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer's capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

L ARCH 406 Individual Design Studio (6) Senior projects in landscape architecture; projects vary according to the student's particular emphasis and needs.

L ARCH 411 Landscape Representation I (3) Introduces fundamental graphic and representation conventions, hand-drawing techniques, and media used in landscape architecture and environmental design. Emphasizes drawing and media skills that support design ability development. Includes lectures, demonstrations, display of examples, drawing from slides, and in-class workshops. Credit/no-credit only.

L ARCH 412 Landscape Representation II (2) Development of advanced skills of visual representation to communicate students' visions for urban ecological design including techniques used during the design process and for presentation.

L ARCH 423 Planting Design Studio (3) Utilization of plants as design elements to manipulate space and modify the landscape for various activities and resolutions of site problems. Factors that determine the appropriate use and arrangement of plant materials in an urban context. Composition, plant selection, planting techniques, and maintenance requirements are major components of this class.

L ARCH 424 Advanced Planting Design Seminar (3) Introduces and investigates the ecological and social functions behind planting design. Introduces conceptual methods to planting design using various 'lenses'. Discusses the relationship between planting plan graphics and their actual three-dimensional applications. Focuses on combining plants into a cohesive, artistic, and ecologically responsible design that responds appropriately to site conditions.

L ARCH 425 Advanced Planting Design Studio (1-6, max. 6) Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and esthetic principles for selecting plants to meet specific site conditions. Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites.

L ARCH 432 Urban Soils and Hydrology (3) Develops basic understanding and skills related to soil properties and their specification for use in horticulture and hydrological performance, and knowledge and skills needed by landscape architects to implement design solutions that manipulate urban hydrological conditions. Majors only. Prerequisite: L ARCH 331. Offered: W.

L ARCH 433 Design Implementation (3) Provides an understanding of essential considerations of design implementation and construction documentation in landscape architecture. Emphasizes

the landscape architect's skill in preparing drawings and specifications and their role during bidding and construction. Includes production of a construction drawing set.

L ARCH 440 Digital Media I in Landscape (1-3, max. 3) *Spencer* Introduces digital applications and methodologies useful in landscape architectures' interpretive, iterative design, production, and presentation processes. Focuses on skills in 2D CAD, 3D visualization, graphic representation, and the integration of manual and digital techniques. Credit/no-credit only.

L ARCH 441 Digital Media II in Landscape (3) Explores Computer Aided Design as a powerful tool in landscape design, analysis, and visualization. Consists of four core units: 2D CAD drafting; digital terrain modeling; 3D solids and surface modeling; and visualization. Prerequisite: L ARCH 440

L ARCH 450 History of Environmental Design in the Pacific Northwest (3) VLPA Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from nineteenth century to the present, with major emphasis on twentieth century. Open to nonmajors.

L ARCH 451 History of Environmental Design on the West Coast (3) VLPA Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

L ARCH 454 History of Urban Landscapes and Environments (5) Explores the history and historiography of urban landscapes and the design of cities with an emphasis on North America in the context of the broader study of cities in China, Japan, and in the Western world from the pre-classical through twentieth centuries in Europe. Offered: S.

L ARCH 463 Urban Recreational Design (3) VLPA/I&S Special recreational studies in metropolitan, urban, and neighborhood areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARCH 470 Landscape Architecture Tutorial (2, max. 6) Various aspects of project organization, programming, scheduling of workloads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planting and design.

L ARCH 473 Professional Practice (3) Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

L ARCH 474 Advanced Design Studio (1-6, max. 6) Detailed design studies of small-to-medium-scale projects. General focus on public landscape areas and social/psychological uses of site. Specific focus on design development and professional office presentation. Offered: W.

L ARCH 475 Community Design/Build Studio (1-6, max. 6) *Winterbottom* Students design and construct a community based project, synthesizing prior course instruction by going through the design process from concept to schematic design, creating construction documents, and implementing what they have designed. Offered: Sp.

L ARCH 476 Professional Operations (3-6, max. 6) Practicum course for landscape architecture majors for internship and exposure to the profession with working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Credit/no-credit only.

L ARCH 477 Landscape Architecture Consultancy Studio (3-6, max. 6) Simulation of the professional relationship of the landscape architect as a consultant to University students in other design planning and management disciplines. Focus on site analysis, master planning, schematic designs and detailed design, working drawings, and planting plans associated with student projects.

L ARCH 481 Planning Urban Green Infrastructure Networks for Healthy Cities (5) Explores the planning of green infrastructures to maximize ecosystems services and support more compact and livable communities. Credit/no-credit only.

L ARCH 482 Designing High Performance Landscapes (5) Looks at ways to design 'high performance landscapes' that integrate ecological realities and urban infrastructural needs while expressing an aesthetic of performance. From site analysis to final design, provides hands-on experience in creating green infrastructure assets in the urban environment. Credit/no-credit only.

L ARCH 495 Landscape Architectural Studies Abroad (1-10, max. 30) Studies conducted under faculty supervision in various locations outside the United States.

L ARCH 498 Special Projects (1-10, max. 30) Special projects as arranged. Open to nonmajors.

L ARCH 499 Undergraduate Research (1-9, max. 9) Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues.

L ARCH 501 Advanced Studio (1-6, max. 18) The advanced studio series employ a design as research approach to examine contemporary issues in landscape architecture that are culturally diverse, multi-scalar, and collaborative. Each studio is geared toward advancing student's skills in design thinking, critical assessment, analysis, collaboration and communication. Credit/no-credit only.

L ARCH 503 Community Design Studio (1-6, max. 6) Methods and techniques for developing physical design solutions and implementation strategies in neighborhoods and small communities. Social, economic, political, and individual forces affecting community development and growth. Comparison of several communities, identifying pertinent landscape

issues, potential design solutions, and methods for achieving design goals through the political process.

L ARCH 504 Regional Landscape Planning (1-6, max. 6) Application of landscape ecological theory to the design of urban environments. Focuses on the strategic design of urban infrastructure, including underground drainage systems, roads, parks, transit systems, and on understanding the cumulative performance of urban sites.

L ARCH 505 Landscape Planning Studio (1-6, max. 6) *Yocom* Examines the theory and techniques of landscape planning across a wide range of spatial scales and contexts in the design process. Explores the application of planning techniques and technologies by a specific design or planning project. Offered: A.

L ARCH 506 Landscape Visual Resources (1-6, max. 6) Survey of existing theory/techniques and the generation of new methods to analyze, evaluate, plan, design, and manage the visual resources of the landscape.

L ARCH 507 Art and Landscape Studio (1-6, max. 6) Public art placed in, or developed for, specific landscape settings. Various aspects and benefits of public art, including materials, technologies, philosophies of landscape imagery and meaning. General planning criteria for location for maximum public benefit and identification of objectives for a specific site and artwork.

L ARCH 511 Visual Learning (3) Seminar/laboratory to develop visual learning processes and skills for applying these processes to landscape architecture. Related visualization concepts.

L ARCH 523 Landscape Technology (1-6, max. 6) Studio on rehabilitation of stressed urban landscapes. Focus varies but often deals with an analysis of the potentials in urban watershed and the study of alternative site designs for enhancing a range of landscape functions related to water quality. Taught by an interdisciplinary team.

L ARCH 552 History of Landscape Architecture (5) Surveys the development of landscape architecture as an art form and a practice across diverse cultures and places in the context of developing historiographical approaches and frameworks.

L ARCH 553 History of Modern Landscape Architecture (5) Focuses on building an historic and critical overview of modernism and modernist designs in the practice and discipline of landscape architecture. Focuses on critical readings of historical narratives to explore the emergence of theory in practice.

L ARCH 561 The Human Experience of Place (3) *Manzo* Uses interdisciplinary approaches to explore the reciprocal relationship between people and the landscapes of everyday life. Studies place attachment, relationships to nature, environmental attitudes and perception, personal space, territoriality, urban public space, diversity, participation, and the politics of space. Offered: A.

L ARCH 562 Landscape Art (2) Process of developing and placing artwork in specific landscape settings. Types of artwork and landscape settings; ways for artist and site designer to interpret, alter, and incorporate factors of landscape; viewer's perception and experience; examples of public and private support.

L ARCH 563 Ecological Design and Planning (3) *Yocom* Explores the contemporary theory supporting the practice of ecological design and planning. Examines the potential relationships between ecological theory and design applications, particularly in urban environments. Topics are supported by a diverse collection of examples and case studies. Offered: Sp.

L ARCH 564 Sustainable Urban Landscapes (2) *Rottle* Introduces contemporary literature on urban sustainability and provides a forum for discussion about theories, applications, and practices towards the planning and design of sustainable and ecological urban environments. Offered: A.

L ARCH 570 Landscape Architecture Theory and Scholarship (3) Covers the nature of scholarship and theory building in landscape architecture. Investigates scholarship related to the design process, design critique, research, and practice. Includes consideration of capstone project topics. Offered: W.

L ARCH 571 Landscape Architecture Research Methods (3) Introduction to and exploration of selected research methods employed in landscape architecture research. Emphasizes how to apply research methods to a research question or problem. Includes exploration of data analysis and interpretation of research results.

L ARCH 590 Seminar in Landscape Architecture (1-3, max. 12) Advanced topics in landscape architecture with focus on unpublished areas of research.

L ARCH 598 Special Topics (1-6, max. 9) Systematic study of specialized regional landscape subject matter, including history, technology, implementation, and other topics depending on current interest/needs. Topics vary and are announced in the preceding quarter.

L ARCH 600 Independent Study or Research (*-)

L ARCH 601 Internship (1-6, max. 9)

L ARCH 700 Master's Thesis (*-)

L ARCH 701 Thesis Studio (1-6, max. 12) Studio designed to support students' independent thesis research and design process by providing a structured framework for regular meetings, studio reviews, peer/committee/guest critiques, and process reflections. Credit/no-credit only.

L ARCH 702 Capstone Project Studio (1-6, max. 12) *Way* Capstone group project studio. Credit/no-credit only.

Real Estate

Department Overview

The minor provides comprehensive exposure to the field, covering areas such as market analysis, development, appraisal, finance, and management. The program examines both residential and commercial real estate, as well as the development process. It also provides coverage of issues from a public policy perspective, such as housing affordability and supply. Students develop a range of technical, statistical, and analytical skills and tools which enable them to analyze and interpret data across a wide range of topics and areas.

Undergraduate Program

Adviser
425 Gould Hall, Box 355727
206-685-9989
ss243@uw.edu

The department offers the following programs of study:

- A minor in real estate

Minor

Minor Requirements: 30 credits

1. R E 350, R E 360, R E 361, R E 362, R E 363 (or FIN 490), R E 364, R E 365 (or FIN 425), R E 370, R E 400 (or any one of ACCTG 215, ACCTG 219, ACCTG 225), R E 401
2. Minimum 2.0 cumulative GPA for courses applied to the minor

Course Descriptions

R E 350 Introduction to Real Estate (3) Introduction to the real estate profession focusing on the participants and processes as well as real estate decision making by buyers and sellers. Offered: W.

R E 360 Real Estate Market Analysis (3) The course is designed to introduce students to basic elements of real estate markets studies for different uses. It begins with an overview of the basic steps regardless of real estate use followed by the analysis of data sources, public policy issues affecting cities and their economy and software available to analyze different market patterns. Prerequisite: RE350 Offered: Sp.

R E 361 Property Transactions and Brokerage (3) I&S Fundamental legal principles and issues affecting the real estate professional will be considered including contract law, form contracts (including leasing, sale, and valuation), land ownership and professional liability. Offered: Sp.

R E 362 Real Estate Valuation and Appraisal (3) I&S Every property is unique, therefore the appraisal of real estate presents many challenges and has a strong influence on the financial viability of both existing buildings and the development process. General models for valuing commercial property, industrial property, and land will be introduced. The role of appraisals and different concepts of value will be examined. Prerequisite: R E 350 Offered: Sp.

R E 363 Real Estate Development Process (3) I&S Real estate development sits at the heart of the built environment, interacting with urban planners, landscape architects, architects, financiers, construction managers and end users. An understanding of the key decision making that underpins development is a vital part in understanding what is developed, where and when. Prerequisite: R E 350 or R E 360 Offered: A.

R E 364 Real Estate Asset and Portfolio Management (3) I&S The management of real estate portfolios is made up of two key elements; The individual properties and the overall portfolio. Due to how real estate differs from other assets an in-depth understanding of both is required. The course explores practical and strategic aspects of real estate management for commercial property, including investment strategy and portfolio selection. Prerequisite: R E 350 Offered: Sp.

R E 365 Introduction to Real Estate Finance (3) QSR Introductory class to real estate finance. Considers the financing of developments, investment in commercial properties as well as the residential mortgage market. Considers how real estate differs from other assets and how to analyze the attractiveness of investment opportunities. Prerequisite: R E 350 Offered: W.

R E 370 Real Estate Data Modeling (3) I&S Data issues in real estate differ considerably from other assets. This class will cover a variety of different issues that arise when analyzing and modelling land, residential and commercial real estate markets. The course will cover hedonic models, GIS and spatial modeling, forecasting. Generally the class will consider how to manage datasets of varying quality and size and how to effectively model them. Prerequisite: R E 350 or R E 360 Offered: Sp.

R E 400 Accounting for Real Estate (3) The course is tailored towards non-business majors and covers basic accounting concepts while emphasizing tax and accounting methodologies in relation to the development and management of real estate assets. Students will understand and practice the accounting fundamentals and their application to real estate. Offered: Sp.

R E 401 Housing Markets and Policy (3) I&S Aims to provide students with the tools to assess housing problems. Studies housing markets in a dynamic context, with emphasis placed on demand and supply drivers. Examines the justifications for and the basis of public sector involvement in the housing market and describe and evaluate the main policy mechanisms used such as regulation of private renting or the provision of affordable housing. Offered: A.

R E 507 Accounting for Real Estate (3) Provides an overview of basic accounting concepts and emphasizes tax and accounting methodologies in relation to the development and management of real estate assets. Topics include: understanding balance sheets; income statements; annual reports; GAAP accounting and standards; and federal and real estate property taxation. Offered: A.

R E 508 Financial Modeling for Real Estate I - Excel (2) *G. Colburn* Introduces students to commercial real estate modeling, use of Excel and handheld financial calculators. Allows students to gain mastery and confidence in setting up and using pro-formas and models to analyze real estate investment, asset management, and development. Offered: A.

R E 509 Financial Modeling for Real Estate II (2) *C. Tu* Introduces students to commercial real estate modeling, using advanced and sophisticated software utilized by real estate professionals. The students gain mastery and confidence in setting up and using pro-formas and models to analyze real estate investment, asset management, and development. Offered: W.

R E 510 Introduction to Real Estate (3) *S. DERMISI* Provides a basic overview of the participants, processes, workings of different components of the real estate industry (including a variety of uses spanning from residential, office, retail and industrial to specialized) as well as the quantitative components of the real estate decision-making. Additionally, students are introduced to an overview of construction management, sustainability, corporate services, property law and ethics. Offered: jointly with URBDP 552; A.

R E 511 Real Estate Appraisal (3) *T. Overland* Discusses valuation theory and the mechanics underlying real estate appraisal practices. Explores the unique market within which property interests are created, allocated or transferred, the dynamic nature of real estate values, and the valuation impacts of various external factors. Offered: jointly with URBDP 555; A.

R E 512 Leadership in the Built Environment (3) Focuses on leadership principles applicable to the real estate and the built environment and helps students conduct self-assessments to understand their strengths and ways they can apply them. Addresses both organizational leadership and leadership of construction processes. Offered: A.

R E 513 Real Estate Finance and Investment (4) *S. Stevenson* Introduces students to basic real estate finance and institutional analysis allowing them to quantify the financial implications of real estate decisions. Topics include: basic time value of money, financial leverage, discounted cash flow analysis (properties and institutional portfolios), assessment of various real estate investment classes and distribution of proceeds to investors. Prerequisite: R E 552/URBDP 552. Offered: jointly with URBDP 554; W.

R E 514 Negotiations and Conflict Resolution in the Built Environment (3) *P. McCabe* Overview of negotiation theories, approaches and tactics. Application of deal making procedures for various aspects of real estate decision making processes and audiences (e.g. government, community groups, real estate organizations and partners). Analysis of conflict resolution techniques, mediation, arbitration, etc. Offered: W.

R E 515 Real Estate Law (3) *J. Fandel, S. Osborne* Focuses on the legal principles and issues essential to understanding the workings of the real estate industry, including the fundamentals of real estate transactions and development projects. Offered: jointly with URBDP 557; W.

R E 516 Introduction to Real Estate Economics/Market Analysis (4) *A. Acolin* Introduces students to the urban land market in which sites and properties are embedded Covers five areas: basic economic concepts critical in the understanding of real estate markets; urban economy; land rent theory; locational analysis and decision making; and market analysis. Offered: jointly with URBDP 516; Sp.

R E 517 Real Estate Asset Management (3) *P. Stone* Focuses on the fundamentals and structure of asset management from a value improvement perspective. Students are educated on the proactive manner asset managers need to respond to changing tenant needs and competitive market condition, while focusing on the asset appreciation throughout the ownership cycle (acquisition, leasing and disposition). Offered: jointly with URBDP 551; Sp.

R E 518 Best Practices in Sustainable Real Estate (3) *S. DERMISI* Analyzes, at a macro level, the importance of sustainability in urban areas introducing best practices for various environmentally friendly and financially feasible interventions in the US and abroad. At a micro level focuses on adoption of environmentally friendly improvements at building level with various pay-back periods but long-lasting economic benefits. Offered: W.

R E 530 Corporate Real Estate (3) *K. Leith* Emphasizes the understanding of ways real estate footprint can be a factor in attaining the vision/mission of a corporation. Analyzes principles of corporate real estate, key activities and internal relationships, customer motivation, drivers, client based strategic approaches as well as the industry evaluation process including reporting and client deliverables. Offered: A.

R E 531 Risk and Portfolio Management (3) Focuses on the development and implementation of active and passive portfolio management strategies for institutional quality real estate investment portfolios. Modern portfolio theory and other tools are used to establish real estate allocation in a mixed-asset context; and to manage real estate portfolios among investment and financial structures spanning private/public, equity/debt, property type and geographic/economic regions. Offered: A.

R E 532 Real Estate Project Management (3) *S. DERMISI* Focuses on the on real estate and construction project management. Topics include: types of project managers, sources of conflicts, organizational structures, delivery methods, construction scheduling, SWOT analysis, ways to mitigate threats to their project. Includes hands on exercises and an introduction of MS Project software. Offered: A.

R E 540 Advanced Real Estate Finance and Investments (3) *A. Acolin* Covers both private and public forms of investment, along with debt and equity positions. Introduces students to real estate investments and the risk/reward trade-offs associated with various deal structures and relationships with financial institutions. Also covers real estate indices and tools to assess transaction risks. Offered: Sp.

R E 541 Real Estate Capital Markets (3) *S. Stevenson* Analyses capital flows (global and national) and emerging capital market trends that affect the industry. Pays special attention to securitized real estate, including Real Estate Investment Trusts, and Commercial Mortgage-Backed Securities. Offered: jointly with URBDP 579; A.

R E 542 Private - Public Project Finance (3) *H. Oliver* Explores creative ways of project financing through public and private partnerships in the form of incentives (e.g. TIF, LIHTC, Brownfield development incentives, etc.) currently offered by different government levels throughout the USA. Prepares to identify the incentives for a project and structure a deal package based on a project's parameters. Offered: A.

R E 550 Real Estate Development (4) *H. Oliver* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Prerequisite: R E 552/URBDP 552. Offered: jointly with URBDP 578.

R E 551 Real Estate Development Studio (5) *G. Colburn* Offered: jointly with URBDP 513.

R E 553 Urban Land Economics (4) Introduces urban economics, land markets, and locational decision making; and examines urban spatial structure and the economic, political, social, technological, and historical forces that shape land values and uses. Uses applied spatial analytical tools including geographic information systems and geodemographic software. Offered: jointly with URBDP 553; A.

R E 556 Real Estate Investment (4) Focuses on direct real estate investment based on the productive capacity of the total property, debt, and equity components and their impact on the cash returns in the form of positive returns to the property, tax savings potential, alternative leverage effects, and the gains at sale. Offered: jointly with URBDP 556; W.

R E 558 Real Estate Market Analysis (4) Prepares students to conduct and interpret market studies to cover a range of real estate decisions. Exposes students to the market analysis process and various tools and techniques that can be used to analyze and forecast supply, demand, and rental rates. Offered: jointly with URBDP 558; W.

R E 559 Risk and Reward in Sustainable Development (3) *N. Denamur* Focuses on the intersection of green, high performing buildings and the law. Students learn to identify and understand the risks and challenges presented by high-performing buildings, and analyze frameworks and strategies to manage and overcome these challenges. Offered: jointly with LAW E 534; Sp.

R E 560 Real Estate Feasibility (4) Applies critical thinking needed to understand the drivers of value of the major property types which covers the "user in search of a site" and "investor in search of involvement" feasibility questions. Applies a combination of qualitative and quantitative analysis to target markets. Offered: jointly with URBDP 568; Sp.

R E 569 Real Estate Portfolio Management (5) Students develop formal portfolio management strategies that draw on their in-depth understanding of real estate fundamentals, strategic planning and portfolio theory. Working in teams, students prepare cutting-edge portfolio strategies including the policies and procedures for implementation and portfolio management. Offered: jointly with URBDP 559; Sp.

R E 570 Real Estate Project Finance (3) *Rolfe* Introduces financing real property projects developed by public, community, and private entities with a primary emphasis on interim (acquisition/development/construction) and take-out lending for new real estate projects. Offered: jointly with URBDP 577; Sp.

R E 590 Real Estate Forum I (1) Provides an opportunity for students to learn about the interdisciplinary nature of real estate from industry leaders. Discusses current issues and opportunities in the industry as well as what it takes to develop a sustainable career path. Offered: jointly with URBDP 590; A.

R E 597 Advanced Real Estate Economics/Market Analysis (3) Focuses on techniques used to analyze real estate market fundamentals. Topics include productivity analysis; local economic analysis; market delineation; and supply, demand, and rent forecasting. Introduces statistical models used in real estate analysis including time-series analysis and hedonic models. Offered: WS.

R E 598 Real Estate Special Topics (1-4, max. 12) *A. Hurd* Systematic study of specialized subject matter. Prerequisite: permission of instructor. Offered: AWSpS.

R E 600 Independent Study or Research (1-3, max. 3) Arranged between the student and a real estate faculty member of their choosing with a mutually agreed real estate topic. Offered: AWSp.

Urban Design and Planning

Department Overview

410 Gould

Urban design and planning deals with critical issues of human settlement and urban development, providing communities an informed basis for coordinated public- and private-sector action. Urban design and planning constitutes a professional field of growing complexity, responding to the urban challenges of this century. The department fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built and natural environment; the financial, administrative, political, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas and regions, bringing analysis together with vision.

Departmental faculty participate in interdisciplinary research units, including the Institute for Hazard Mitigation Planning and Research, the Urban Form Laboratory, the Urban Ecology Research Laboratory, the Northwest Center for Livable Communities, and the Urban Infrastructure Laboratory.

The department, committed to public service, has strong connections to the region and beyond. The approach to urban development is driven by the values of sustainability, livability, economic vitality, and social justice. The department is also committed to developing a leading edge urban planning practice with a strong participatory ethos.

Undergraduate Program

Urban Design and Planning offers the following programs of study:

- The Bachelor of Arts degree with a major in community, environment, and planning
- A minor in urban design and planning

Community, Environment, and Planning

208Q Gould

Community, Environment, and Planning (CEP) is an interdisciplinary bachelor of arts degree program offered through the College of Built Environments as one of the University's interdisciplinary undergraduate programs. CEP has gained distinction as a model for a highly personalized, collaborative, and active educational experience within a large research institution. CEP students draw liberally from the entire range of courses, faculty, and programs at the UW.

Bachelor of Arts

Suggested First- and Second-Year College Courses: CEP 200.

Department Admission Requirements

1. Minimum 90 credits completed when student begins the program and at least 80 percent of general education requirements fulfilled
2. Minimum 2.50 GPA with additional emphasis on a written essay, demonstration of relevant extracurricular activities, and a final interview
3. Admission is once a year, for autumn quarter. Early admission deadline is February 15. Additional application dates vary each year. See CEP's website for specific dates.

Graduation Requirements

General Education Requirements

1. *Written Communication (15 credits)*: 5 credits English composition; 10 credits additional composition or W courses. W courses, if applicable, may also be counted toward Areas of Knowledge or major requirements.
2. *Quantitative or Symbolic Reasoning (4-5 credits)*: The QSR course, if applicable, may also be counted toward an Area of Knowledge or major requirement.
3. *Areas of Knowledge (60 credits)*: 20 credits Visual, Literary, & Performing Arts (VLPA); 20 credits Individuals & Societies (I & S); 20 credits Natural World (NW). Required CEP courses and other non-CEP courses used to satisfy major requirements may also be counted toward Areas of Knowledge requirements, if applicable.

Major Requirements

Minimum 77 credits

1. Core Seminars (30 credits): CEP 301, CEP 302, CEP 303, CEP 460, CEP 461, CEP 462.
2. Methods Courses (25 credits): Upper-division courses within the University, with no more than 15 credits from one department; chosen with guidance and approved by CEP staff and faculty.
3. Diversity Course (5 credits): One course that critically analyzes and addresses social constructs and/or issues from a different perspective than that of our dominant culture. Must be approved by the program adviser
4. Leadership Retreats (4 credits): CEP 300, autumn and spring
5. Governance Practicum (6 credits): CEP 400, quarterly
6. Internship (5 credits): CEP 446, 120- to 150-hour internship
7. Senior Project Capstone (2-6 credits): CEP 490 and CEP 491, autumn and winter

Electives to complete minimum 180 credits for degree; varies, depending on how many general education courses apply to more than one requirement.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A CEP education is founded on the following: students start where they are; articulate and embrace a vision of how they intend to make a difference in the world; construct a plan (with guidance from faculty and peers) of CEP seminars, cross-disciplinary courses, and field experiences; move deliberately with this plan in the final two years of undergraduate education; through first-hand experience and in the context of the CEP community of learners, become acquainted with effective ways for working constructively together to anticipate and address critical issues facing the complex communities and world we inhabit.

A CEP education is fully lived, not passively taken. CEP students actively make their education in community with others. CEP class cohorts range from 25-30 students. This group comprises a community of mutual learning that requires commitment, personal investment, and strong teamwork strategies for two years. Through six interconnected, quarterly seminars students engage the core content of the major: community, environment, and planning. These contemporary academic fields and areas of research include the study of community as subject and practice, exploration of the ecological context of all societal life, and an investigation of the potentials of planning for developing strategies for positive change.

CEP students have gone on to careers in a variety of interdisciplinary fields such as community planning and organization, urban development, communications, work in for-profit and nonprofit sectors, public administration, education, community and environmental activism, ecology, and government/community relations.

- *Instructional and Research Facilities:* See College of Built Environments section.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* See College of Built Environments section.
- *Department Scholarships:* Department and program offer specific scholarships. Contact program adviser for details.
- *Student Organizations/Associations:* See College of Built Environments section.

Minor

Minor Requirements: 30 credits to include URBDP 300; minimum 13 additional credits in URBDP-prefix courses; and 12 additional credits in planning-related courses with Urban Design

and Planning adviser approval. Minimum 2.0 grade required for each course counted toward the minor. See departmental adviser for recommended courses.

Graduate Program

Graduate Program Coordinator
410 Gould, Box 355740
206-543-4190
udp@uw.edu

The department offers the Master of Urban Planning (MUP) and the Master of Science in Real Estate (MSRE) degrees and its faculty participate in the interdisciplinary Doctor of Philosophy (PhD) in Urban Design and Planning. The MUP is the professional degree for urban planners, and the MSRE is a two-year professional degree that provides students the core and advanced training necessary for successful careers and leadership positions in the real estate industry. The PhD is for persons who desire careers in urban design and planning, primarily in academic research and teaching or advanced professional work.

Master of Urban Planning

Focuses on planning the physical environment and its socioeconomic and political determinants. Advanced students are encouraged to conduct research and studies in one of the following specializations:

- urban design dealing with physical form, character, and quality issues
- real estate, designed to provide students a deep foundation and specialized skills to help launch or enhance professional careers in real estate
- historic preservation, focusing on the specialized skills needed actively to protect historic districts, buildings, and landscapes
- land-use and infrastructure planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects
- environmental planning, addressing the interactions between urban systems and natural processes

This degree, a two-year (or six-quarter) program, is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms.

Admission Requirements

1. Bachelor's degree in a discipline such as urban planning and environmental design or in other fields such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Applicants should have completed at least one college-level course in each

of the following areas: micro-economics, mathematics, statistics, and cultural diversity. Students without sufficient background must take these prerequisite courses concurrently with their graduate studies.

2. GRE general test scores
3. Three letters of recommendation
4. Official transcripts for all previous college courses or programs attended
5. Resume
6. Supplemental information form and statement of purpose
7. Work sample (optional)
8. TOEFL for applicants whose native language is not English
9. Application deadline: January 15 (November 15 for international students) for admission the following autumn quarter

Degree Requirements

Minimum 72 credits

1. 33 core-course credits covering the history and theory of planning and urban design, urban form, communication methods, quantitative methods, processes and methods of land use planning, comprehensive planning, planning law, research methods, and a planning studio.
2. 14 credits of restricted electives, including courses in advanced methods and advanced studio (both may be in an area of specialization); and courses in urban development economics, and in history/theory of planning.
3. 9-credit thesis or professional project following completion of all other degree coursework
4. 16 credits in open electives

An internship is encouraged for those without previous professional experience. A specialization in one area of planning is required. Specialized areas include land-use and infrastructure planning, real estate, urban design, historic preservation, and environmental planning.

For specific courses, see program website at urbdp.be.washington.edu/mup.html.

Master in Infrastructure Planning and Management (MIPM)

A two-year, eight-quarter, online degree. Teaches professionals to master the methods and core knowledge required to sustain and ensure resiliency of major infrastructures against both man-made and natural disasters. For further information, see program website at <http://www.infrastructure-management.uw.edu/mipm/>.

Admission Requirements

1. Bachelor's degree in a discipline such as urban planning and environmental design, or other fields such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or law or criminal justice.
2. At least one college-level course in mathematics.
3. GIS introductory course (recommended).
4. TOEFL for applicants whose native language is not English
5. Application deadline: July 15 for autumn quarter

Degree Requirements

45 credits

Students take two courses per quarter for a total of 15 of the 16 courses outlined below.

1. Four required core courses: introduces key concepts about infrastructure, systems thinking, financial planning, and the fundamentals of policy making. In addition, students explore the impacts of climate change on infrastructures.
2. Four required methods courses: focuses on processes related to planning and monitoring infrastructures, general management, and leadership. Processes include advanced geospatial analysis, epidemiology, emergency management, and business continuity planning.
3. Five systems courses: focuses on infrastructure systems for food, energy, communications, transportation, and more. (Students select five of the six courses offered).
4. Two capstone courses: helps students synthesize knowledge learned across the program and then apply it to a real-world project, conduct research, and develop a case study.

Master of Science in Real Estate

Provides students basic knowledge, core skills, and advanced understanding necessary to assume leadership positions in the real estate industry. An emphasis on interdisciplinary study allows graduates to engage in collaborative efforts and to address the complex problem of achieving sustainable cities.

Admission Requirements

The Runstad Center admits students whose objectives align with those of the program, which are to apply broad business leadership skills to solve real-world problems; understand how spatial and capital markets affect creation of value; examine the effects of place-bound, three dimensional built forms on cities; explore how behavior of decision makers impacts sustainable real estate.

1. Undergraduate or graduate degree in a discipline such as architecture, business, construction, engineering, geography, public policy, law, or urban planning. Experience in real estate or related field highly valued.
2. Application form to include resume, statement of purpose, personal history
3. Official transcripts from each college or university attended
4. Three letters of reference
5. GRE or GMAT scores
6. TOEFL scores for international students
7. Application deadline: February 1 for autumn quarter (November 1 for international applicants)

Degree Requirements

Minimum 72 credits

The Master of Science in Real Estate degree, a demanding, interdisciplinary program, combines business management skills with an understanding of how real estate markets work and how the three-dimensional, place-bound attributes of real estate products affect their performance. Overarching these three interdisciplinary areas of study is a focus on how behaviors of those involved in making decisions about real estate investment and development affect desired outcomes.

The curriculum provides basic knowledge, core skills, and advanced understanding necessary for graduates to assume positions of leadership in the real estate industry of tomorrow. Learning leadership skills is integral to everything a student does throughout the two years in the program. Interdisciplinary study provides understanding of techniques and tools used in a broad range of fields essential to real estate, enabling graduates to lead collaborative efforts to solve complex problems of creating sustainable urban environments. The limits imposed by the physical characteristics of real estate have put a premium on understanding behaviors of people involved in creating and managing real estate projects. People make the decisions that drive values of property types. Students explore ethical behaviors leading toward emphasis on using technology to support classroom and case learning and in applying the knowledge and leadership skills learned throughout the program. For curriculum details, see the program website at <http://runstad.be.washington.edu>.

Doctor of Philosophy

Many departmental faculty are part of an interdisciplinary faculty group which offers doctoral study in urban design and planning. The program is located administratively within the Graduate School. See Interdisciplinary Graduate Degree Programs.

Certificate Programs

Graduate students may elect to participate in the College-wide certificate programs in urban design and historic preservation. (See program descriptions in the College of Architecture and Urban Planning section).

Course Descriptions

Community, Environment, and Planning

CEP 200 Introduction to Community and Environmental Planning (5) I&S Campbell

Introduction to central themes of major. Opportunities to engage in community action and planning process, while developing ecological literacy. Lectures, discussions, and critical writing exercises combine to increase knowledge and interest in these fields. Emphasis on developing community of learners in and out of classroom setting. Offered: AW.

CEP 300 CEP Retreat (1, max. 4) Focuses on planning analysis assessment and development of the major. Opportunities for community building and all-major policy deliberation and decisions. Workshops for skill building in consensus, facilitation, and for major-specific activities such as developing individual study plans and study abroad experiences. Prerequisite: Majors only. Credit/no-credit only. Offered: ASp.

CEP 301 The Idea of Community (5) I&S Campbell Theories of community and communal rights and responsibilities. Experience building a learning community within major. Explores struggles for community in every sector of life. Offered: A.

CEP 302 Environmental Response (5) I&S/NW Miller Explores issues of environmental crisis and societal responses. Readings and reflective analysis from broad selection of authoritative sources to develop grounded perspective in ecological literacy and consciousness. Concurrently, experiential education in challenges and practical responses to building sustainable society through participation in community-based environmental effort. Offered: W.

CEP 303 Social Structures and Processes (5) I&S Abramson, Born, Curry Investigates use of formal and informal social structures and processes within context of community and environment. Looks at patterns and institutions of social organization and relationships among different sectors. Issues of interrelatedness, citizenship, knowledge, and communication. Offered: Sp.

CEP 400 Governance Practicum (1, max. 6) Campbell Emphasizes personal and collective leadership, democratic decision making, and learning through direct action and reflection. Explores and develops students' personal skills as doers and leaders, while also learning how to form and function as effective groups. Credit/no-credit only. Offered: AWSp.

CEP 446 Internship (5, max. 10) Ryan Connects core and individual courses with field work. Group and individual readings develop understanding of how students' internships and field placements constitute particular element of community and environmental planning. Explores how what we do for a living is part of our lives as citizens and public service. Credit/no-credit only. Offered: AWSpS.

CEP 460 Planning in Context (5) I&S *D. ABRAMSON, B. BORN, M. CURRY, J. STERRETT* Examines theory against backdrop of practice for broad historical understanding of social, political, environmental planning. Critique from viewpoints, e.g., planning history, ethics, ecofeminism, environmental justice, class and capitalism, planning and global economy. Develop personalized history reflecting individual experience, professional experience, and philosophical heritage of planning profession. Offered: A.

CEP 461 Ethics and Identity (5) VLPA/I&S *Purcell* Examination of personal, societal, vocational, environmental, planning ethics. Readings and discourse on ethical foundations for public life. Individual and group readings on values, human potential. Develops understanding of ecological context, moral responsibility, self-awareness. Constructs positive, diverse view of humanity, environment regardless of race, gender, ethnicity, beliefs. Offered: W.

CEP 462 Community and Environment (5) I&S *Campbell, Ryan* Capstone quarter merges core seminars, disciplinary courses in major, community field experiences for mastery of personal knowledge and skills. Reflection and synthesis of themes in major; engagement with contemporary issues. Compares theoretical definitions of community and environment with individual philosophies and knowledge within thoughtful, applied context. Offered: Sp.

CEP 470 Tools for Sustainable Cities (4) Examines specific tools used for planning sustainable cities, including hands-on learning, speakers, case studies, and site tours to enrich students' knowledge and experience. Prerequisite: CEP 200 or URBDP 300. Instructors: Sterrett Offered: SpS.

CEP 473 Digital Design Practicum (5) I&S/VLPA Uses digital technologies for mapping, drafting, modeling, and communication. Includes real-world case study projects that focus on urban design and planning issues.

CEP 490 Senior Project Prep Seminar I: Research and Project Scoping (1-3) Supports the conceptualization and planning of senior project/capstone work. Focuses on selecting a project, beginning a literature review, finding a mentor, and developing a plan. Credit/no-credit only.

CEP 491 Senior Project Prep Seminar II: Methods and Actualization (1-3) Focuses on implementing the senior project/capstone, including revisions and updates as seen fit. Credit/no-credit only.

CEP 498 Special Topics (1-9, max. 15) I&S Systematic study of specialized subject matter.

CEP 499 Undergraduate Independent Study or Research (1-5, max. 10) Individual reading, research, fieldwork, other special project approved and supervised by faculty adviser most appropriate for the project proposed. Credit/no-credit only. Offered: AWSpS.

Infrastructure Planning and Management

IPM 500 Strategic Planning and Policy Analysis (3) Provides a suite of analytic and group process tools for harnessing the energy and potential of an organization to implement selected

policies. Provides a framework for examining vexing societal issues, developing alternative policies to address them, and analyzing their effects and costs.

IPM 501 Comprehensive Emergency Management (3) *Freitag* Covers the principles and practices of risk reduction, presenting disasters as realized risk and benefits as realized opportunities. Provides the ability to use emergency management approaches and tools, along with insights into intergovernmental programs and relationship and their broader social context. Offered: S.

IPM 502 Introduction to Infrastructure Systems (3) Introduces infrastructures; systems thinking; the history, basic concepts, legal frameworks, politics, processes, and techniques used in infrastructure systems courses; and climate change as emerging yet lasting phenomenon. Includes overview of IPM online learning environment.

IPM 503 Infrastructure Finance (3) Covers how to pay for infrastructure, including planning, budgeting, and public/private partnerships. Examines the relationships between infrastructure finance, urban form, and sustainability; local government finance, budget accountability, and equity issues; and infrastructure investments in changing economic climates, forms of finance available for infrastructure, collective decision-making, and alternative forms of project delivery. Offered: S.

IPM 504 Applied Geo Spatial Analysis (3) Provides the theoretical and practical skills needed to use a Geographic Information System (GIS) for analyzing spatial phenomena on the urban and regional scale. Focuses on principles and methods of spatial analysis and their application to strategic planning, risk management, and hazard mitigation.

IPM 505 Climate Change and Infrastructure (3) *Sterrett* Takes an in-depth look at climate change and examines each of the six major infrastructure systems in relationship to climate change phenomena. Includes climate change causes and effects; global, national, state, and local mitigation and adaptation strategies; and mitigation and adaptation strategies for infrastructure systems. Offered: Sp.

IPM 506 Energy Systems (3) *Markos, Swayne* Explores energy systems as infrastructure critical to the national and global economies; provides an overview of energy resources, production, and delivery. Examines elements of energy infrastructure, how energy systems function, global energy consumption and environmental considerations, and the history and influence of energy sector regulation and adaptation to changing markets. Offered: A.

IPM 507 Epidemiology for Health Hazards (3) *Baseman* Introduces epidemiology including instruction in surveillance for the detection of outbreaks, and outbreak investigation, and control of health conditions potentially affected by climate change. Offered: Sp.

IPM 508 Risk Assessment and Business Continuity (3) Provides an introduction into how organizations ensure they will survive disasters. Covers the concepts and tools organizations use to survive, and applies them to government and private systems, including energy, water, food, transportation, public health, and communications.

IPM 510 Water Systems (3) *Roderick* Water and water supply as a system element. Water and especially freshwater, as an essential and limited resource. Looks at aging water infrastructure; user conflicts; changes in water distribution tied to climate changes; intergovernmental policy, programs, and relationship; management strategies and tools; and their effect on water and water supply. Offered: W.

IPM 511 Food Systems (3) *Born* Food systems as a part of infrastructure. Why they matter for planners and policy makers; current production models; global trade and localization responses, policy approaches to hunger alleviation and food access; emerging concerns around food and climate change; land use issues, food justice, and governmental responses to food system concerns. Offered: W.

IPM 512 Public Health Systems (3) Survey of issues surrounding private and public health-care systems in relation to emergency health-care services. Includes health-care cultures, critical communication, government funding, emergency preparedness, and psychological recovery from major traumatic events.

IPM 513 Capstone A: Research Design (3) *Whittington* First of two culminating courses to support students in the development of a capstone project that demonstrates the combination of skills and knowledge accrued in the MIPM program. Students select a topic, develop a research design, and begin conducting the research for their project. Offered: Sp.

IPM 514 Transportation Systems (3) Explores transportation systems that move both people and freight on land, water, and in the air and that are critical to keeping the economy of the United States functioning as infrastructure that will be notably impacted by global climate change. Discusses the relationship between the public and private sectors.

IPM 515 Capstone B: Implementation (3) Second of two culminating courses to support students in the development of a capstone project that demonstrates the combination of skills and knowledge accrued in the MIPM program. Students complete their research and the project, and present to faculty and peers. Prerequisite: IPM 513. Instructors: Whittington Offered: S.

IPM 517 Specialized Planning Laboratory (6) Studio and field projects related to a specialized planning problem associated with floodplain management. Offered: S.

IPM 518 Legal and Administrative Framework for Planning (3) Reviews political, legal, and administrative institutions closely related to the floodplain planning process. Examines issues related to devolution of authority and public representation and participation. Covers the legal basis for planning and associated regulation relevant to floodplain management. Offered: S.

IPM 520 Floodplain Management Seminar I (2) Focuses on floodplain management issues, providing context for those new to the field and offering experienced practitioners an opportunity to engage professional experts on emerging concerns. Addresses opportunities to use social media in managing floodplains as well as fundamental science/tools relevant to the field. Offered: S.

IPM 521 Floodplain Management Seminar II (2) Focuses on current floodplain management issues and examines the application of new approaches to the field. Offers experienced practitioners an opportunity to engage professional experts while also relating leadership and conflict resolution skills to the application of floodplain management approaches. Prerequisite: IPM 520. Offered: S.

IPM 522 Geomorphology in Floodplain Management and Landscape Design (3) Covers geologic and geomorphological processes of rivers, floodplains, and coastal areas in context of landscape planning. Lectures, laboratory exercises, and field trips emphasize understanding fundamental physical landscape process and its application to landscape planning with an emphasis on management of flood-prone areas. Offered: S.

IPM 523 Ecological Processes in Coastal and Floodplain Management (2) Examines hydrologic, biologic, and ecological concepts of rivers, floodplains, and coastal areas in the context of floodplain management and landscape planning. Lectures, laboratory exercises, and field trips emphasize understanding fundamental processes and methods and their application to planning and management. Offered: S.

IPM 528 Floodplain Management and Planning for River Population (3) Focuses on the systematic study of floodplain management processes and strategies for near river communities. Offered: S.

IPM 598 Special Topics (1-6, max. 12) Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs. Prerequisite: permission of instructor. Offered: AWSpS.

IPM 600 Independent Study or Research (*) Directed Study. Topics determined according to program needs. Offered: AWSpS.

Strategic Planning for Critical Infrastructure

SPCI 505 Epidemiology of Biological and Chemical Hazards Mitigation I: Principles (3) Introduction to epidemiology: surveillance for detection of outbreaks, outbreak investigation, and control for infectious agents, toxins, and chemicals. Case studies are drawn from actual outbreaks illustrating these essential epidemiological methods. Examines problem-solving techniques. Credit/no-credit only.

SPCI 506 Strategic Planning Practicum I (3) Uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures.

SPCI 510 Strategic Planning Practicum II (3) Second in a three-course sequence that uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures. Credit/no-credit only.

SPCI 511 Business Continuity Planning (3) Introduces safeguards that organizations can employ to ensure they survive a disaster, using examples from government services, banking and finance. Presents specifics of disaster/crisis management, business impact analysis, contingency planning, continuity of operations, and risk reduction tools. Examines lessons learned from 9/11.

SPCI 513 Strategic Planning Practicum III (3) *Whittington* Uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures. Third in a three-course sequence. Offered: WS.

SPCI 515 Capstone (4) *Whittington* Culminating course where students select one of several problem-solving methods (problem-based case, tabletop exercise, research paper) and complete a final project focusing on a real-world problem. Requires mastery of the methodological skills and infrastructure knowledge taught in the program.

SPCI 598 Special Topics (1-4, max. 12) Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter.

Urban Design and Planning

URBDP 200 Introduction to Urbanization: Planning and Designing Alternative Urban Futures (5) I&S Introduces how cities work and explores alternative ways of planning and designing urban futures. Explores the economic, cultural, political, and social aspects of cities and how we might change them for the better. Also examines numerous case studies from the Global North and South.

URBDP 300 Introduction to Urban Planning (5) I&S Principles and theories of urban structure and institutions. Concepts and logic of planning as a community process and a professional activity. Evolution of planning ideas in response to changing social, economic, and environmental conditions within the American political framework. Complementary nature of public and private responsibilities. Major procedures used by planners.

URBDP 301 Database Management Fundamentals (3) Introduces the tasks and roles that contribute to the management of the design and security of database systems in an organizational context. Students gain a basic understanding of database management systems and administrative practices, as well as hands-on database experience. Credit/no-credit only.

URBDP 370 Reading the City (5) VLPA/I&S Comprehending cities as reflection of individual reader and social/cultural context. Skills for analyzing everyday, visible evidence of the city. Topics include self-identity with place, city, image and perception, visual design analysis; and place as representation of culture. Extensive writing, multiple texts, collaborative work in groups and fieldwork.

URBDP 404 Introduction to Geographic Information Systems (3) Provides students with introductory practical knowledge of Geographical Information Systems and Science for current and future coursework in urban planning.

URBDP 405 The Urban Form (3) VLPA Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

URBDP 422 Urban and Regional Geospatial Analysis (5) Principles of GIS applied to problems in urban design and planning, landscape architecture, and environmental and resource studies. Practical problem-solving approaches using contemporary desktop mapping packages and vector and raster GIS systems. Siting, environmental evaluation and inventories, and modeling. Prerequisite: either GEOG 317, GEOG 360, GEOG 461, GEOG 462, GEOG 465, FISH 452, or OCEAN 452. Offered: W.

URBDP 423 Introduction to Urban Design (3) VLPA/I&S Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning. Offered: Sp.

URBDP 424 Site Planning: Issues and Techniques (3) Introduction to site planning; how it is regulated; why it is important to know; and how to carry out its key tasks, including residential subdivision and mixed-use development layout; basic topographical and hydrological analysis and manipulation; roadways, parking and hierarchies of circulation, and site design detail. Offered: Sp.

URBDP 429 Computer-Aided Planning of Urban Systems (3) Survey of online planning applications; use of various on-line systems to solve urban systems design problems; investigations of hardware/software tradeoffs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with CEE 418.

URBDP 446 Practical Experience (4, max. 8) Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects.

URBDP 450 Introduction to Land Use, Growth Management, and Environmental Planning (3) Provides an understanding of contemporary land use issues (including sprawl, smart growth, new urbanism, transit-oriented development, and Washington's Growth Management Act) and examines their environmental impact and social welfare implications. Analyzes best-practice techniques of growth management.

URBDP 451 Housing (3) I&S Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 3.0 in URBDP 300.

URBDP 457 Housing in Developing Countries (3) Emphasis on role of the design and planning professional in housing delivery in developing countries. Exploration of issues of culture, political environment, social context, economic circumstances, and other factors which define and limit the manner in which the professional planner and designer can and should function.

URBDP 466 Infrastructure and Community Facilities (4) Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste, and transportation. Covers their relationship to comprehensive plans, project permitting, and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

URBDP 467 Urban Planning Uses of Remote Sensing (3) Using aerial photographs and satellite image data in urban planning. Urban change analysis, land-use and land cover classification, and environmental planning applications. Scale and resolution considerations. Development of proficiency through laboratory exercises and use of image-processing software.

URBDP 480 Planning as a Profession (1) Provides students interested in the planning profession an opportunity to understand the different pathways and career choices within the profession. Introduces students to guest professionals in various planning careers and highlight key issues, skills used, and tips to entering the field. Focuses on professional practice rather than analytical methods or theory. Credit/no-credit only.

URBDP 481 Metropolitan Planning and Development in Developing Countries (3) I&S Examination of the nature and causes of urban planning and management problems in developing countries and exploration of alternative approaches to solve some of these problems.

URBDP 498 Special Topics (1-9, max. 15) Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and needs, and are announced in the preceding quarter.

URBDP 499 Special Projects (1-12, max. 12) Independent/tutorial study for undergraduates. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty adviser most appropriate for the project proposed.

URBDP 500 Survey of Urban Planning (4) Concepts and logic of planning as a professional activity. Evolution of guiding ideas in relation to changing social, economic, and environmental conditions within the American political framework. Major procedures used by planners. Critical appraisal. Open to graduate students in urban design and planning and to graduate students in architecture seeking the urban design certificate.

URBDP 501 Comprehensive Planning and Implementation (3) *Whittington* Reviews the comprehensive planning process as a part of managing metropolitan growth. Examines federal/state statutes affecting local government comprehensive plans. Includes local government land use regulations and reviews development process. Concentrates on tools to shape land use and development patterns and their effectiveness in creating outcomes specified in comprehensive plans. Offered: W.

URBDP 502 Tools for Sustainable Cities (4) Examines specific tools used for planning sustainable cities, including hands-on learning, speakers, case studies, and site tours to enrich students' knowledge and experience. Prerequisite: CEP 200 or URBDP 300. Instructors: Sterrett
Offered: SpS.

URBDP 503 Communication and Analysis (3) Development of communication skills understanding within the planning and design process. Presentation of communications as a design process with mental, visual, oral, written, and kinesthetic cognitive actions combined to form communications thinking. Offered: W.

URBDP 504 Introduction to Geographic Information Systems (3) Provides students with introductory practical knowledge of Geographical Information Systems and Science for current and future coursework in urban planning.

URBDP 505 The Urban Form (3) Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

URBDP 506 Planning Studio Prep (3) Introduces plan-making process, provides time for background research, issue identification, public involvement, and preliminary analysis.

URBDP 507 General Urban Planning Laboratory (5) Studio/field project in applied professional planning of a comprehensive nature, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process.

URBDP 508 Specialized Planning Laboratory (5, max. 10) Studio/field project on a specialized planning problem. Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisite: ARCH 500 and ARCH 507. Additional prerequisite for some sections: urban planning seminar or lecture courses.

URBDP 509 Resources for Urban Planning (1) Provides an opportunity for students to explore and discuss issues of professional practice with practicing planners in an informal context. Questions posed by the participants usually emphasize practical aspects of working as planners. Credit/no-credit only.

URBDP 510 Theories and Methodologies of Planning I (4) Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate students in urban design and planning and to graduate students seeking the urban design certificate. Prerequisite: URBDP 500.

URBDP 512 Research Seminar (3) Planning, designing, and undertaking applied research in an urban setting. Framing, critically assessing, managing, and presenting research used in urban planning and design. Conceptual modeling of causal relationships, choice among experimental and quasi-experimental designs, and ethical and political implications of research undertakings. Exercises leading to a complete research design.

URBDP 513 Real Estate Development Studio (5) *G. Colburn* Offered: jointly with R E 551.

URBDP 514 Race and Social Justice Seminar (1) This course will explore concepts of race, racism, class, social justice, and make explicit their connections between design and planning. It does so to build student understanding about how, and the degree to which, these disciplines have historically addressed these topics, and where they stand currently. This exploration will include progress made, challenges, and overt actions that have and may continue to work in racist and unjust ways. Credit/no-credit only. Offered: AWSp.

URBDP 516 Introduction to Real Estate Economics/Market Analysis (4) *A. Acolin*
Introduces students to the urban land market in which sites and properties are embedded. Covers five areas: basic economic concepts critical in the understanding of real estate markets; urban economy; land rent theory; locational analysis and decision making; and market analysis. Offered: jointly with R E 516; Sp.

URBDP 519 Qualitative Research Methods (3) Qualitative research methods covering both the theoretical foundations and practical methodologies of traditional and innovative approaches, including cognitive mapping, open-ended interviews, ethnographic observation, hermeneutics, phenomenology, critical theory, communicative action, grass-roots empowerment, post-structuralism, and self organization. Offered: jointly with ARCH 567.

URBDP 520 Quantitative Methods in Urban Design and Planning (4) Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival populations models with examples solved on microcomputers. Prerequisite: college mathematics and basic course in probability and statistics. Instructors: Born

URBDP 522 Urban and Regional Geospatial Analysis (5) Provides theoretical and practical skills for analyzing spatial patterns and phenomena in metropolitan areas. Students explore the functionality of GIS as an effective tool for analyzing and modeling complex spatial relationships within urban environments. Emphasis is given to data integration and modeling through both raster and vector systems.

URBDP 523 Introduction to Urban Design (3) *I&S/VLPA* Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

URBDP 524 Site Planning: Issues and Techniques (3) Introduction to site planning; how it is regulated; why it is important to know; and how to carry out its key tasks, including residential subdivision and mixed-use development layout; basic topographical and hydrological analysis and manipulation; roadways, parking and hierarchies of circulation, and site design detail. Offered: W.

URBDP 525 Evaluation in Urban Planning (3) Methods and techniques for a priori assessment of physical improvement plans, program designs, public policies. Includes cost effectiveness and matrix or goal achievement, as well as more conventional cost-benefit and cost-revenue forms of analysis. Emphasis on understanding the reasoning and issues in evaluation, and gaining a working competence in at least one of the methods treated.

URBDP 526 Floodplain Management and Planning for Coastal and River Communities (3)

R. FREITAG Focuses on ways to live with and cope with flooding. Examines coastal and riverine floodplain services, values and assets within the context of ecosystem services; determine risks and opportunities associated with flooding and floodplains; advance identified strategies and explore benefits and adverse impacts resulting from these strategies; and gain a better appreciation for coastal and riverine floodplains. Offered: A.

URBDP 532 Current Topics in Transportation Planning and Policy (4) Provides an opportunity to advance the student's knowledge by examining selected topics in depth and gaining critical insights about the interconnectivity of various planning and policy approaches. Gives a broad exposure to urban transportation problems and introduces different ideas and practices aimed at addressing these problems, along with important concepts and analytical frameworks. Offered: W.

URBDP 536 Health Impact Assessment (2) Examines the use of Health Impact Assessment as a public health tool for informing decision-makers about the potential health impacts of proposed projects and policies. Students learn the steps for conducting HIAs, review case studies, and conduct an HIA of a current local proposed project. Offered: jointly with ENV H 536.

URBDP 538 Public Health and the Built Environment (2) Examines how the design of communities and land use and transportation decision have positive and adverse effects on health. Considers built environment impacts on physical activity, obesity, air quality, injuries, mental health, social capital, and environmental justice; and explores interventions to promote healthy community design. Offered: jointly with ENV H 538.

URBDP 547 Professional Project (1-9, max. 9) Credit/no-credit only.

URBDP 549 Hazard Mitigation Planning (3) A survey of the field of planning for managing risks of natural hazards-earthquakes, floods, coastal/meteorological hazards, and human-caused technological hazards/terrorism. Covers pre-event mitigation through building and land-use controls; disaster preparedness; post-event response, recovery, and mitigation of future hazards. Emphasizes hazard mitigation as a long-term strategy for achieving sustainability of communities.

URBDP 550 Land Use, Growth Management and Environmental Planning (3) Provides an understanding of contemporary land use issues (including sprawl, smart growth, new urbanism, transit-oriented development, and Washington's Growth Management Act) and examines their environmental and social welfare implications. Analyzes best practice techniques of growth management. Offered: A.

URBDP 551 Real Estate Asset Management (3) *P. Stone* Focuses on the fundamentals and structure of asset management from a value improvement perspective. Students are educated on the proactive manner asset managers need to respond to changing tenant needs and competitive market condition, while focusing on the asset appreciation throughout the ownership cycle (acquisition, leasing and disposition). Offered: jointly with R E 517; Sp.

URBDP 552 Introduction to Real Estate (3) *S. DERMISI* Provides a basic overview of the participants, processes, workings of different components of the real estate industry (including a variety of uses spanning from residential, office, retail and industrial to specialized) as well as the quantitative components of the real estate decision-making. Additionally, students are introduced to an overview of construction management, sustainability, corporate services, property law and ethics. Offered: jointly with R E 510; A.

URBDP 553 Urban Land Economics (4) Introduces urban economics, land markets, and locational decision making; and examines urban spatial structure and the economic, political, social, technological, and historical forces that shape land values and uses. Uses applied spatial analytical tools including geographic information systems and geogemographic software. Offered: jointly with R E 553; A.

URBDP 554 Real Estate Finance and Investment (4) *S. Stevenson* Introduces students to basic real estate finance and institutional analysis allowing them to quantify the financial implications of real estate decisions. Topics include: basic time value of money, financial leverage, discounted cash flow analysis (properties and institutional portfolios), assessment of various real estate investment classes and distribution of proceeds to investors. Prerequisite: R E 552/URBDP 552. Offered: jointly with R E 513; W.

URBDP 555 Real Estate Appraisal (3) *T. Overland* Discusses valuation theory and the mechanics underlying real estate appraisal practices. Explores the unique market within which property interests are created, allocated or transferred, the dynamic nature of real estate values, and the valuation impacts of various external factors. Offered: jointly with R E 511; A.

URBDP 556 Real Estate Investment (4) Focuses on direct real estate investment based on the productive capacity of the total property, debt, and equity components and their impact on the cash returns in the form of positive returns to the property, tax savings potential, alternative leverage effects, and the gains at sale. Offered: jointly with R E 556; W.

URBDP 557 Real Estate Law (3) *J. Fandel, S. Osborne* Focuses on the legal principles and issues essential to understanding the workings of the real estate industry, including the fundamentals of real estate transactions and development projects. Offered: jointly with R E 515; W.

URBDP 558 Real Estate Market Analysis (4) Prepares students to conduct and interpret market studies to cover a range of real estate decisions. Exposes students to the market analysis process and various tools and techniques that can be used to analyze and forecast supply, demand, and rental rates. Offered: jointly with R E 558; W.

URBDP 559 Real Estate Portfolio Management (5) Students develop formal portfolio management strategies that draw on their in-depth understanding of real estate fundamentals, strategic planning and portfolio theory. Working in teams, students prepare cutting-edge portfolio strategies including the policies and procedures for implementation and portfolio management. Offered: jointly with R E 569; Sp.

URBDP 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4) Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with PUBPOL 560.

URBDP 561 Urban Economics and Public Policy (4) Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and growth management, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: successful completion of an introductory microeconomics course or permission of the instructor. Offered: jointly with PUBPOL 561.

URBDP 562 Introduction to Neighborhood Planning and Community Development (3) Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, etc.

URBDP 564 Planning History, Theory, and Ethics (3) Examines major historical landmarks since the Civil War (urban, suburban, and rural, physical and social-economic); theoretical alternatives (rationalism, pluralism-advocacy, critical theory, bio-regionalism, dissipative models); and ethical issues (such as distributive justice and principles of professional conduct).

URBDP 565 American Urban History (3) Intensive lecture/seminar designed to provide students the opportunity for immersion in historical scholarship that addresses social, economic, political, technological, and cultural forces that have shaped the development of American cities.

URBDP 566 Infrastructure and Community Facilities (4) Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste, and transportation. Covers their relationship to comprehensive plans, project permitting, and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

URBDP 567 Democracy, Citizenship, and Participation in the City (3) Graduate seminar on democracy in cities. Focuses on contemporary ideas, debates, and initiatives.

URBDP 568 Real Estate Feasibility (4) Applies critical thinking needed to understand the drivers of value of the major property types which covers the "user in search of a site" and "investor in search of involvement" feasibility questions. Applies a combination of qualitative and quantitative analysis to target markets. Offered: jointly with R E 560; Sp.

URBDP 573 Digital Design (4) Uses digital technologies for mapping, drafting, modeling, and communication. Includes real-world case study projects that focus on urban design and planning issues.

URBDP 576 Pedestrian Travel, Land Use, and Urban Form (3) Seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: jointly with CET 586.

URBDP 577 Real Estate Project Finance (3) *Rolfe* Introduces financing real property projects developed by public, community, and private entities with a primary emphasis on interim (acquisition/development/construction) and take-out lending for new real estate projects. Offered: jointly with R E 570; Sp.

URBDP 578 Real Estate Development (4) *H. Oliver* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Prerequisite: R E 552/URBDP 552. Offered: jointly with R E 550.

URBDP 579 Real Estate Capital Markets (3) *S. Stevenson* Analyses capital flows (global and national) and emerging capital market trends that affect the industry. Pays special attention to securitized real estate, including Real Estate Investment Trusts, and Commercial Mortgage-Backed Securities. Offered: jointly with R E 541; A.

URBDP 580 Legal and Administrative Framework for Planning (3) Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

URBDP 585 Introduction to Historic Preservation Planning (3) Theories, methods, and practices associated with historic preservation planning. Overview of preservation planning programs at federal, state, and local levels. Introduction to tools and methods needed to identify, document, evaluate, and plan for protection of historic properties. Provides opportunity to learn fundamentals of preservation planning through practical experience.

URBDP 586 Implementation in Preservation Planning (4) Practical experience in identifying, documenting, evaluating and developing strategies for protection of historic resources, building on introductory theories, methods, and practices. Develops skills critical to preservation planning via research, fieldwork, and writing. Prerequisite: introductory course in preservation.

URBDP 587 Preservation and the Vernacular Environment (3) Exploration of theoretical, methodological, and practical issues related to the preservation of vernacular architecture and cultural landscapes in the United States.

URBDP 590 Real Estate Forum I (1) Provides an opportunity for students to learn about the interdisciplinary nature of real estate from industry leaders. Discusses current issues and opportunities in the industry as well as what it takes to develop a sustainable career path. Offered: jointly with R E 590; A.

URBDP 591 Doctoral Seminar I (4-) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

URBDP 592 Doctoral Seminar II (-4) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

URBDP 593 Doctoral Seminar III (-4) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

URBDP 598 Special Topics (1-6, max. 15) Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

URBDP 600 Independent Study or Research (*-)

URBDP 700 Master's Thesis (*-)

URBDP 800 Doctoral Dissertation (*-)

Michael G. Foster School of Business

School Overview

Dean Jim Jiambalvo 303a Dempsey

Associate Dean for Academic Affairs Thomas Lee 303d Dempsey

busadmin@uw.edu

Men and women embarking on business careers have the opportunity to influence many of the social, political, and economic forces in today's world. The Foster School prepares students for professional careers in management and related disciplines in both the private and public sectors.

The Foster School offers an undergraduate program leading to the degree of Bachelor of Arts in Business Administration (BABA) and graduate programs leading to the degrees of Master of Business Administration (MBA), Executive Master of Business Administration (EMBA), Technology Management Master of Business Administration (TMMBA), Master of Professional Accounting (MPAcc), and Doctor of Philosophy (PhD). An evening MBA program is also offered. Additionally, the Foster School offers a Master of Science degree in Information Systems (MSIS) and a Global Executive Master of Business Administration (GEMBA).

Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business (now known as the International Association for Management Education) since 1921.

Facilities and Services

Most Foster School classes and activities are in four buildings. Dempsey Hall, named for Neal and Jan Dempsey, contains the dean's office, MBA and undergraduate offices, the Arthur W. Buerk Center for Entrepreneurship, MBA and undergraduate career centers as well as classrooms and an executive forum. PACCAR Hall offers a combination of U-shaped tiered classrooms, meeting spaces, a 250-seat auditorium, student breakout rooms, faculty offices, and a soaring atrium with a café and a boardroom. It is equipped with a wide range of technology enhancements including web-linked digital monitors and distance conferencing capabilities. Mackenzie Hall, named in memory of Professor Donald Mackenzie, Chair of the Department of Accounting from 1949 to 1955, contains the offices of the Foster School's Consulting and Business Development Center, the Global Business Center, the Center for Leadership and Strategic Thinking, and the Foster School Advancement and Alumni teams. A fourth building, on the northwest side of Dempsey, has three distinct components: the Bank of America Executive Education Center (which includes the James B. Douglas Executive Forum), the Boeing Auditorium, and the Albert O. and Evelyn Foster Business Library.

To serve the continuing education needs of middle- and senior-level managers, the Foster School offers a number of certificate programs, either University-initiated or co-sponsored with various

community and industry organizations. The Executive Development Program, a nine-month, one night per week program, strengthens understanding and skills in all areas of management and provides an opportunity for successful managers to learn from a distinguished faculty and each other. Short courses and seminars are offered throughout the year, focusing on topics such as leadership, finance and accounting for non-financial executives, and negotiation skills. In addition, the School develops and runs custom programs under contract with individual companies and organizations. Information on continuing education programs may be obtained from the Office of Executive Education, 206-543-8560, fax 206-685-9236, execed@uw.edu.

International Business Programs

International business programs are coordinated and developed by the Foster School's Global Business Center. These activities include special graduate and undergraduate certificate programs, the Global Business Program, seminars, internships, business foreign-language programs, special guest-speaker programs, and study tours. Although the Marketing and International Business Department offers a general curriculum in international business, each of the five academic departments within the Foster School maintains faculty with special international teaching and research expertise. Internationally oriented courses are offered by each department.

At the undergraduate level, the Foster School offers the Certificate of International Studies in Business (CISB) program. Students in the program complete the same demanding business curriculum as other students and enhance this training with foreign language study, area studies, and an international experience. The program requires that students have a solid foundation in one of five language tracks: Chinese, French, German, Japanese, and Spanish; a sixth custom track for other languages is also an option. In addition, there is a U.S. track for international students.

At the MBA level, the Foster School offers opportunities for MBA students to build on the international business foundation that every MBA develops through the first year of the program. In addition to international business electives, the program offers overseas travel through study tours, quarter-long exchange programs, and international internships. MBA students may also participate in the weekly Global Business Forum, which brings top international business leaders to campus to discuss important issues facing their companies and industries.

Questions regarding these programs may be directed to 206-685-3432 or goabroad@uw.edu.

Entrepreneurship Programs

The focus of the Foster School's entrepreneurship programs is on nurturing skills that generate creative ideas, innovative processes, and new business growth. These skills are developed through special academic certificate programs, internships, a business plan competition, club activities, and consulting opportunities with area businesses.

The Center for Innovation and Entrepreneurship (CIE) is open to both undergraduate and graduate students from the Foster School as well as other University schools and colleges.

Through its workshops, events (Entrepreneur Week), and annual competitions (Business Plan Competition, Environmental Innovation Challenge, and Venture Capital Investment Competition), CIE encourages a cross-discipline and collaborative approach to business creation, and nurtures overall entrepreneurial thinking in students. The CIE's Lavin Program is a curriculum for entrepreneurially minded undergraduates that provides the core foundational experience, skills, and know how for developing future business ventures. Graduate students may take the Entrepreneurship Certificate program, which offers real-world experience, technology internships with the UW Center for Commercialization, and mentoring from the Seattle entrepreneurial community. For more information visit www.startup.washington.edu, or contact CIE at 206-685-9868, or uwcie@uw.edu.

The Business and Economic Development Center (BEDC) matches undergraduate and graduate student consulting teams with small-business owners in Seattle's inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the Business and Economic Development Center can be directed to the program office at 206-543-9327.

Consulting Programs

The Business and Economic Development Center (BEDC) matches undergraduate and graduate student consulting teams with small-business owners in Seattle's inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the Business and Economic Development Center can be directed to the program office at 206-616-1216 or wtutol@uw.edu.

Business Career Center

The Business Connections Center coordinates all MBA and MPAcc career services. These include career counseling and career management workshops, the administration of special career events such as career fairs, company presentations, on-campus MBA and MPAcc recruitment, and a job-listing service. The Business Connections Center also administers alumni and executive mentoring programs. Questions regarding these programs and services may be directed to the center's office, 202 Lewis, 206-685-2410.

Undergraduate business-career counseling and on-campus recruitment is provided by the UW Center for Career Services, 134 Mary Gates Hall, 206-543-0535.

Instructional Resources Office

The Instructional Resources Office promotes excellence in teaching by providing resources in current practice and research in teaching and learning. The office serves faculty and teaching assistants with individual consultations, coordinates a teaching preparation program for doctoral

students, and offers assistance with instructional innovations. Questions can be directed to the Instructional Resources Office, 317 Lewis, 206-685-9608.

The Business Writing Center

The mission of the Business Writing Center is to help undergraduates develop the writing skills essential to professional success. The center offers one-on-one tutoring, workshops and peer feedback for special class projects, and opportunities for advanced students to be peer tutors. Questions can be directed to the center's office, 337 Lewis, bwrite@uw.edu.

Honor Societies

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based on outstanding scholastic achievement.

Beta Alpha Psi is the accounting honor society. Membership is based primarily on scholastic achievement, but some community service is also required. Beta Alpha Psi provides a mechanism for students, professionals, and educators to meet on both formal and informal bases.

The goals and interests of graduate students are served by the MBA Association, Business Consulting Network, Challenge for Charity, Entrepreneurship and Innovation Club, Graduate Consulting Club, MBA Finance Club, Global Business Association, Graduate and Professional Student Senate, MBA Marketing Club, Net Impact, High-Tech Club, MBA Speakeasy, Women in Business, and the Doctoral Association.

bizinfo@uw.edu

The Foster School offers the following programs of study:

- The Bachelor of Arts in Business Administration degree with options in accounting, entrepreneurship, finance, human resources management, information systems, and marketing.

- A minor in entrepreneurship

Bachelor of Arts in Business Administration

Suggested First- and Second-Year College Courses: English composition, calculus, ECON 200, ECON 201. In addition, classes to fulfill general education requirements which develop strong writing and analytic skills. ACCTG 215, ACCTG 225, MGMT 200, and Q METH 201 are suggested second-year college work.

Department Admission Requirements

The Foster School offers admission to upper division applicants for autumn and winter quarters. Those UW students who are prepared, as freshmen, to apply for early admission, may do so only for autumn quarter. Students admitted for autumn may elect to take classes during the prior summer quarter.

Applicants are considered in two admission groups: the Freshman Direct Admission Program and the Upper-Division Admission Group (UAG), described below. The following requirements apply to the Upper-Division Admission Group:

1. A minimum cumulative 2.50 GPA for all college coursework
2. A minimum cumulative 2.50 GPA for all required business courses
3. A student who has previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business courses.
4. Since eligible applicants exceed the space available, acceptance is competitive. Admission is based on evaluation of four factors:
 - a. overall scholastic record
 - b. grades in pre-application courses, described below
 - c. written communication skills
 - d. evidence of leadership skills, community activities, and the promise of achievement in a business or professional career.

Consideration is also given to such factors as economic and educational disadvantage, significantly higher recent grades, and exceptional extracurricular activities or work experience.

Admission for UAG is offered twice a year, for autumn and winter quarters. A Foster School application, together with all supporting materials, must be on file by April 5 for autumn quarter admission or October 5 for winter quarter admission. Records of all coursework completed by the deadline must be submitted at the time of application. Admission for Freshman Direct is offered once a year, for autumn quarter only.

Freshman Direct Admission Program

The Foster School enrolls a small number of students each year directly out of high school, prior to completion of any university-level prerequisites. Freshmen applicants to the University listing Business Administration as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores.

Upper-Division Admission Group (UAG)

Students must present a minimum of 60 academic credits at the time of application including the following graded credits: ACCTG 215; ECON 200 or ECON 201; MATH 112, MATH 124, or MATH 134; an approved English composition course, chosen from C LIT 240, ENGL 104-ENGL 105, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281, ENGL 297, ENGL 298, or ENGL 299. In addition, the following courses must be completed prior to admission in autumn quarter: ACCTG 225; ECON 200 and ECON 201; MGMT 200; QMETH 201. Applicants should take general education or elective courses to complete the minimum 60 graded credits.

Students admitted to the UW as freshmen are expected to take ACCTG 215, ACCTG 225; MGMT 200; and QMETH 201 in residence.

Qualified applicants with at least 45 credits and a minimum 2.85 GPA who meet University admission requirements, but not Foster School requirements, are eligible to be placed in the College of Arts and Sciences as pre-business majors.

The University of Washington provides equal opportunity in education without regard to race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam veteran in accordance with UW policy and applicable federal and state statutes and regulations.

Graduation Requirements

180 credits as follows:

General Education Requirements: The following must be selected from the University Areas of Knowledge courses: 20 credits in Visual, Literary, & Performing Arts; 20 credits in Individuals & Societies, including 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201); 20 credits in the Natural World, including 5 credits in calculus (MATH 112, MATH 124, or MATH 134); most students need precalculus before taking college calculus (some precalculus courses qualify for the Natural World requirement); 5 credits in English composition.

Students from community colleges in Washington should check the Transfer Guide or consult with their community college adviser for equivalent courses. Students from other four-year schools should see an adviser at their school. Students entering the Foster School under the terms

of the Associate Degree Agreement may apply courses selected from the community college's breadth list toward the general education requirements.

Foster School Requirements: ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300; MGMT 320; MGMT 430; and 300- or 400-level business electives (or area of concentration) to bring the total number of business credits to 72; two writing-intensive courses, one from B CMU 301, B CMU 410, ENGL 281, ENGL 381; one from English composition, or from the remaining three courses listed immediately above, or from any W course. No more than 6 lower-division business elective credits; a minimum of 90 non-business credits, which may include up to 14 credits of economics and up to 9 credits of statistics but not GEN ST 350; a minimum 2.50 cumulative GPA in all business credits earned at the UW; and a cumulative 2.50 GPA for all UW credits. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.

Accounting Option: The notation "Accounting" is indicated on the permanent record, or transcript, of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative 2.50 GPA: ACCTG 301, ACCTG 302, ACCTG 303, ACCTG 311, ACCTG 320, ACCTG 321, ACCTG 411, ACCTG 440, and at least one 400-level accounting elective, excluding ACCTG 490, ACCTG 495, and ACCTG 499. Students who have completed ACCTG 505 may not apply to the accounting option. The accounting option requires 186 credits for graduation.

Entrepreneurship Option: The notation "Entrepreneurship" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: ENTRE 370, FIN 457/ENTRE 457, MKTG 455/ENTRE 455; 8 credits from an approved list of electives. See advisor for approved list.

Finance Option: The notation "Finance" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: one course from FIN 450, FIN 453, FIN 454, or FIN 457; either FIN 460 or FIN 461; four additional courses chosen from the 400-level FIN courses, B ECON 301 or ECON 301, or the 400-level B ECON courses, excluding FIN 490, FIN 495, FIN 499, B ECON 490, and B ECON 499.

Human Resources Management Option: The notation "Human Resources Management" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative

2.50 GPA: MGMT 311, MGMT 411, MGMT 412, and two of the following courses: MGMT 323, MGMT 401, MGMT 402, MGMT 403, MGMT 404, or MGMT 413.

Information Systems Option: The notation "Information Systems" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: I S 320, I S 410, I S 445, I S 451, and I S 460.

Marketing Option: The notation "Marketing" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: MKTG 450, MKTG 460, and three additional MKTG electives, excluding MKTG 490, MKTG 495, and MKTG 499. It is recommended that students take MKTG 450 and MKTG 460 before they take the other electives.

Operations and Supply Chain Management Option: The notation "Operations and Supply Chain Management" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: QMETH 450, OPMGT 443, OPMGT 450, I S 451.

Admission to the options: Students can apply to one option at the same time they apply to the Foster School. Continuing Foster School students can apply during publicized application periods. If demand for the option exceeds the number of spaces available, students are considered based on the factors identified for admission to the Foster School and on their GPA in all previous option-specific courses.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [School website](#).

Minor

Entrepreneurship

Admission is competitive, based on evaluation of three factors: (1) overall scholastic record; (2) grades in lower division prerequisite coursework; (3) evidence of entrepreneurial activities or the promise of achievement in an entrepreneurial business career. Application deadlines and requirements are available in the Foster School Undergraduate Programs Office or at foster.washington.edu/undergrad.

Minor requirements – 29 or more credits as follows: (1) ACCTG 219, or ACCTG 215 and ACCTG 225, or equivalent; (2) ECON 200, or equivalent; (3) ENTRE 370; (4) ENTRE 472 and ENTRE 473; (5) additional ENTRE electives at 300 level or above, selected from a list maintained in the Foster Undergraduate Programs Office to achieve a minimum of 29 credits; (6) Minimum 2.00 cumulative GPA in courses applied to the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A business education develops important communication and interpersonal skills. The ability to express an idea, negotiate a settlement, motivate others, manage time, and build collaborative networks distinguishes the most successful business people. UW Foster School students learn to recognize and define problems, examine data, and persuasively communicate their ideas to achieve results in organizations and people's lives. Regardless of post-graduation path - be it climbing up the corporate ladder, starting a company, joining the Peace Corps, entering law school, or becoming a doctor - a business education helps immeasurably.
- *Instructional and Research Facilities:* Paccar and Dempsey Halls boast a wide range of technology enhancements including web-linked digital monitors and distance conference capabilities as well as 25 team rooms for student use, and direct access to the library. The Foster Business Library houses an extensive collection of books, reference tools, and journals necessary to the study of business. The Buerk Center Innovation Laboratory represents a new paradigm for integrating entrepreneurial education with technology development and hands-on experience.
- *Honors Options Available:* Honors students benefit from a sense of community generated by Honors seminars, as well as from the academic challenge associated with more rigorous study. The program requirements are flexible, challenging students to explore business topics in greater depth. Students entering the Honors program become candidates for the degree "With College Honors" or "With Honors."
- *Research, Internships, and Service Learning:* The Foster School encourages student participation in internships to supplement in-class learning experiences. For more information about internship guidelines and a list of undergraduate internship opportunities, visit www.foster.washington.edu/academic/undergrad/Pages/Internships.aspx.
- *Department Scholarships:* The Foster School awards approximately 90 undergraduate scholarships. Some are general scholarships while others are specific to options or areas of concentration. Only students admitted to both the UW and the Foster School are eligible to receive awards. Applicants are considered for all scholarships for which they meet the minimum qualifications and specific criteria. Although financial need is not a requirement for all business scholarships, most are awarded on the basis of need. (The FAFSA must be filed with the Office of Student Financial Aid.) The Foster School scholarship application is due April 5.
- *Student Organizations/Associations:* Chapters of Alpha Kappa Psi, Association of Black Business Students, Beta Alpha Psi, Business Ethics Association, Delta Sigma Pi, International Association of Students in Economics and Business (AIESEC), American Marketing Association, Business Information Technology Society, Hispanic Business Association, Husky Sales Club, Husky Traders, Latino Professional in Finance and Accounting, National Association of Black Accountants, Society for Human Resources Management, Startup UW, Undergraduate Management Consulting Association, University Sales Club, and Undergraduate Women in Business provide opportunities for undergraduate students to meet informally and to participate in a variety of projects and events.

Double Baccalaureate and Second Baccalaureate

Students who wish to earn more than one baccalaureate degree should consult an academic adviser in the Foster School Undergraduate Program Office, either during or before their junior year. Persons seeking a second baccalaureate should apply at the University's Office of Undergraduate Admissions. To be considered, applicants must complete by quarter of entry the same prerequisites for admission as applicants for the first baccalaureate degree. Since the number of eligible applicants exceeds available space, acceptance is competitive, based on the criteria listed above for selection of first baccalaureate degree applicants. The Foster School uses the GPA for the last 90 credits earned.

Undergraduate Diversity Services

Recruitment, admission counseling, advising, and support services are available for minority students underrepresented at the University, and students from educationally and economically disadvantaged backgrounds. Special scholarships are also available for underrepresented minority students. Academic advisers have information on this program.

Graduate Programs

Associate Dean for Master's Degree Programs

David Burgstahler

Admission

GPA, Graduate Management Admission Test score, work experience, educational and professional objectives, and other factors are considered. Applicants to graduate business programs submit scores on the Graduate Management Admission Test. Those admitted must demonstrate understanding of the fundamental concepts of calculus. Inquiries concerning details of admission should be made to the specific degree program of interest, University of Washington, Foster School of Business, Mackenzie Hall, Box 353200, Seattle, WA 98195.

Application Procedure

Admission to the MBA, EMBA, and PhD programs is for autumn quarter only. Admission to the Technology Management MBA and Master of Science in Information Systems program is for winter quarter only. Candidates for the full-time MBA program may apply by any of the following deadlines: October 15, November 15, January 15, or March 15. Preference is not given to applicants who choose an earlier deadline. Applicants receive a decision about two months after the deadline they have chosen. (January 15 is the final deadline for international applicants.) Deadlines for application to other graduate programs are February 1 for the PhD program; April 1 for Evening MBA; and April 15 for the Executive MBA and MPAcc programs. Students are encouraged to apply as early as possible.

The Foster School of Business offers programs of study leading to the advanced degrees of Master of Business Administration, Master of Professional Accounting, Master of Science in

Information Systems, and Doctor of Philosophy. Four programs can lead to an MBA degree: the full-time program, the evening program, the Technology Management (TMMBA) program, and the Executive MBA program.

Master of Business Administration

Executive Director

Dan Poston
110 Mackenzie Hall, Box 353200
206-543-4661
mba@uw.edu

Degree Requirements

96 credits (80 credits for evening MBA)

The full-time MBA program is designed for students preparing for a professional career in management. Two academic years are required to complete the program. The first year consists of 48 credits of required courses: B A 500, B A 501, B A 502; three of the following bridge elective options: EBIZ 509 (required for EBIZ certificate), ENTRE 509 (required for CIE certificate), FIN 509 (prerequisite for most finance electives), I BUS 509, MGMT 579, or MKTG 509. The second year is 48 credits of elective courses. Students take no more than 24 credits in any one elective area.

The evening MBA program is for fully employed college graduates seeking a management degree that can be earned outside regular working hours. Instruction is two evenings per week; students typically take two courses per quarter. The program consists of 80 academic credits, with normal completion in ten quarters. Course requirements are as follows: ACCTG 500, ACCTG 501, B ECON 500, B ECON 501, FIN 502, I S 504, MGMT 500, MGMT 502, MGMT 505, MKTG 501, OPMGT 502, QMETH 500, QMETH 501, 34 credits of electives.

Special Programs

Options for special study: global business program; e-business program, and the program in entrepreneurship and innovation. Concurrent degree programs are also available: MBA/JD with the School of Law, MBA/MAIS with the Henry M. Jackson School of International Studies, MBA/MSE with the College of Engineering's Program in Engineering and Manufacturing Management, and MBA/MHA with the School of Public Health.

Executive Master of Business Administration

Director

Louise Kapustka
206-685-1333
emba@uw.edu

The EMBA provides an intensive executive-development experience to a select group of midcareer managers who continue to work full-time while pursuing the degree. Candidates for this two-year program should have seven or more years of increasingly successful work experience including three to four years in management, and currently hold mid- or top-level management positions. They are typically sponsored by their organizations and have been identified as employees with high potential to advance as general managers. Students are selected to ensure diversity of industry, functional areas, and organizational size.

The Executive MBA program offers two scheduling options. Both run for two academic years, September through June. (1) The Regional Program meets for a full day once a week, on alternating Fridays and Saturdays. In addition, students attend spring and fall residence sessions each year. (2) The North America Program meets once a month, generally for three consecutive days, Thursday through Saturday. Between monthly sessions, students interact with faculty and classmates online via the Internet and interactive groupware. This format is designed for individuals from the greater Northwest as well as those from the Puget Sound area whose schedules preclude weekly attendance.

While the scope of the curriculum is comparable to that of the regular MBA program, the pace is more intense and the perspective is that of a general manager. There are 21 required courses and no electives.

Admission Requirements

1. Letter of Endorsement: Candidates must be sponsored by their employing organizations and endorsed by senior management as potential general managers. In sponsoring EMBA candidates, organizations agree to release them on class days and, in some cases, to cover the program fee. Individuals not sponsored by a company need to submit an additional letter of recommendation in place of the letter of endorsement.
2. Three letters of recommendation
3. Graduate Management Admission Test (GMAT) scores
4. Two sealed copies of official transcripts from all degree-granting institutions attended

Applications are accepted throughout the year, with an application deadline of April 15 for the class beginning each autumn. Late applications are handled on a space-available basis.

Degree Requirements

68 credits

Required courses: EMBA 502, EMBA 503, EMBA 504, EMBA 505, EMBA 506, EMBA 510, EMBA 511, EMBA 512, EMBA 520, EMBA 521, EMBA 529, EMBA 530, EMBA 531, EMBA 532, EMBA 533, EMBA 534, EMBA 540, EMBA 551, EMBA 552, EMBA 558.

Technology Management Master of Business Administration

Director

206-221-6995

tmmba@uw.edu

Designed for professionals employed in technology companies or work in technology jobs in more traditional businesses. The curriculum, combining the essential components of management education with a specialized focus on high-tech industries, is structured for individuals who want to play a broader role in management and are seeking the necessary management skills and business knowledge. The program focuses on real-world projects and analyses, collaborative learning in study groups, and extensive participant interaction in the classroom. Candidates for this 18-month program have technology experience and upward career progression.

The program, which provides an intensive educational experience to professionals who continue to work full-time while pursuing their degree, runs six consecutive quarters, beginning every January and ending the next year in June. Three-hour sessions are held once a week on a mid-week evening and six-hour sessions are scheduled two Saturdays per month. Two residential sessions are offered. Candidates may be sponsored by their organizations or apply on their own.

Admission Requirements

1. Professional position with a minimum five years of work experience. Career trend of increased responsibilities or promotions. Supervisory or management experience not required, but applicants should demonstrate leadership potential. Candidates' work accomplishments and letters of recommendation should provide evidence of their potential for senior management.
2. Baccalaureate degree from an accredited college or university.
3. Personal statement
4. Three letters of recommendation and evaluations
5. Resume
6. Interview
7. GMAT scores
8. Two sealed copies of official transcripts
9. International applicants: Graduate Admissions Application, Proof of Financial Ability form, photocopy of current visa (if applicable), notice of action (if applicable), proof of English language proficiency (if applicable)
10. Permanent residents: proof of English language proficiency (if applicable)

Each year approximately 50 students are accepted into the TMMBA Program. Applications are accepted throughout the year. Contact the TMMBA office for application deadlines.

Degree Requirements

68 credits, as follows:

TMMBA 500, TMMBA 501, TMMBA 502, TMMBA 503, TMMBA 505, TMMBA 507, TMMBA 510, TMMBA 512, TMMBA 515, TMMBA 516, TMMBA 517, TMMBA 520, TMMBA 521, TMMBA 522, TMMBA 528, TMMBA 530, TMMBA 551, 6 credits of electives

Master of Professional Accounting

Managing Director

Francine Shafer
231 Mackenzie
206-616-4964

The MPAcc prepares students for high-level careers with major accounting and consulting firms, governmental agencies, and industry. Students with undergraduate degrees in accounting may complete the program in three quarters. Students with no prior business background take an expanded version of the program. Enrollment is limited to 25 to 30 students in each of two tracks - Accounting and Assurance (A&A) and Taxation. MBA students with a strong interest in accounting and taxation may earn a joint MBA/MPAcc degree.

Admission Requirements

1. Satisfactory completion of prerequisite courses (see website)
2. Scores from the GMAT exam
3. International TOEFL scores
4. Well written essays
5. Work experience
6. Volunteer and student activities

Degree Requirements, Auditing and Assurance Pathway

48 credits, as follows:

1. ACCTG 521, ACCTG 523, ACCTG 527, ACCTG 566, ACCTG 576, ACCTG 577, ACCTG 579
2. *Internship*: ACCTG 575. If no internship, complete four approved elective classes: ACCTG 420, ACCTG 524, ACCTG 525, ACCTG 562 ACCTG 564

Degree Requirements, Taxation Pathway

48 credits, as follows:

ACCTG 530, ACCTG 531, ACCTG 533, ACCTG 534, ACCTG 535, ACCTG 536, ACCTG 537, ACCTG 538, ACCTG 539, ACCTG 541, ACCTG 541, ACCTG 543, ACCTG 547

Master of Science in Information Systems

Program Director

568 PACCAR

206-543-4587

msis@uw.edu

Provides professionals the tools needed to bridge the gap between business and technology. The four-quarter program trains IS students to identify the appropriate technology solution – to either solve an existing business problem or create a new business opportunity. Students learn how to critically analyze business situations and use innovative approaches that suit those situations in a manner consistent with overall organizational strategy.

This full-time, 12-month program holds classes on two weeknights and on some Saturdays, allowing professionals to earn their MSIS degree while working. The program starts in summer quarter (June). Candidates should have an information systems background.

Admissions Requirements

Applicants are evaluated using the following criteria:

1. Past academic experience
2. General intellectual ability
3. Managerial potential
4. Ability to communicate clearly, succinctly, and persuasively

For a detailed list of admission requirements, visit the MSIS website.

Degree Requirements

44 credits, as follows:

1. MSIS 501, MSIS 502, MSIS 503, MSIS 504, MSIS 510, MSIS 511, MSIS 512, MSIS 521, MSIS 522, MSIS 523, MSIS 524, MSIS 526, MSIS 547, MSIS 550
2. 4 credits of electives from: MSIS 541, MSIS 542, MSIS 543, MSIS 544, MSIS 545, MSIS 546

Doctor of Philosophy

Program Coordinator

Jaime Banaag
102 Mackenzie
206-543-4111
baphd@uw.edu

The PhD program is research-based and designed to train scholars interested in academic careers, although this training is also useful for individuals seeking research positions in business and government, as well as in consulting firms.

PhD students complete a program of formal coursework (minimum of 18 courses) and participate in doctoral seminars, independent study, and research. Students select one major area of specialization and complete requirements in two or three additional minor areas (including areas outside the Business School, such as economics, psychology, and mathematics).

Major areas of concentration include accounting, finance, human resource management and organizational behavior, marketing, information systems, operations management, operations research, and strategic management. Students must have research methods as one of the minor areas.

Students are admitted autumn quarter only. Most candidates require four to five years to complete the program. Financial aid is available, in the form of research and teaching assistantships, to all doctoral students. Also, fellowships are available on a competitive basis to support students engaged in their dissertation research.

Departments

Accounting

Accounting involves development and communication of financial and operational information for business and nonprofit economic entities. The curriculum includes understanding accounting information systems, using accounting information in managerial decision making, preparing and auditing financial statements under generally accepted accounting and auditing standards, and understanding the fundamental aspects of personal and corporate taxation. Elective courses provide in-depth instruction in managerial and financial accounting, not-for-profit accounting, and taxation. Courses provide a foundation for careers in accounting (public, industrial, private, or governmental), for a general business career, or for other professions such as law.

For more information, see the [Department of Accounting](#) website.

Finance and Business Economics

Finance and Business Economics address the financial and economic aspects of business decision making. The finance curriculum focuses on financial management and the financial

markets within which firms and individual investors operate. Business economics courses concern the economic behavior of firms, including factors that determine costs and prices, and real and monetary forces (such as government policies) that affect the national and international economic environment.

For more information, see the [Department of Finance and Business Economics](#) website.

Management and Organization

Management and Organization provides an understanding of the processes and structures of organizations through three distinct programs. The Human Resource Management and Organizational Behavior (HRMOB) courses address personnel and industrial-relations topics such as selection, performance appraisal, compensation, and negotiations, as well as behavioral topics such as leadership, motivation, and group dynamics. They prepare students for managing an organization's human resources effectively. The Organization and Environment (O E) courses examine organization theory, organization design, and management of technology and innovation, as well as the social, political, legal, and ethical environments in which organizations operate. They give students the knowledge, perspective, and analytical tools to deal effectively with organization-environment interactions. The Business Policy (B POL) courses focus on organizational effectiveness from the viewpoint of top management. Emphasis is placed on an integrated view through strategic management and control, planning, decision making, and entrepreneurship.

For more information, see the [Department of Management and Organization](#) website.

Information Systems and Operations Management

The Department of Information Systems and Operations Management consists of three sub-areas: Information Systems (I S), Operations Management (OPMGT), and Quantitative Methods (QMETH). The information systems area focuses on the management of computer-based information systems. The I S curriculum is designed to give students a basic understanding of I S technology and its impact on all phases of an organization. Specific areas of study include telecommunications and network design, systems analysis and design, database management, expert systems, and applications programming. The operations management area of study refers to the functional area of management which produces goods or services in an organization. Specifically, the OPMGT curriculum focuses on the many changes which have occurred in the past ten years in the way that managers think, plan, and operate manufacturing and service facilities. The area includes courses in logistics, quality, inventory and supply-chain management, project management, and waiting lines, among others. The quantitative methods area focuses on the theory and application of mathematical and statistical tools in the modeling and analysis of business problems. The QMETH curriculum includes courses in statistics and data analysis as well as courses in operations research (e.g., linear programming, forecasting, and using spread-sheets to construct decision support models).

For more information, see the [Information Systems and Operations Management](#) website.

Marketing and International Business

Marketing (MKTG) provides knowledge of concepts and relationships in the areas of consumer behavior, channels of distribution, measurement and analysis of markets, pricing, physical movement of goods, product development, promotion, and sales administration. Marketing careers may involve specialization in Internet marketing, product or brand management, advertising, selling, sales management, marketing research, retailing, wholesaling, and international marketing for a wide spectrum of firms and industries. International Business (I BUS) includes trade, payments, and multinational corporate systems and activities. The area prepares students for international responsibilities in domestic business firms, governmental agencies, and overseas business. Courses in Business Communications (B CMU) stress writing in organizations to accomplish goals, oral reporting, business plan presentation, and the use of computer graphics in communication.

For more information, see the [Department of Marketing and International Business](#) website.

Course Descriptions

Accounting

ACCTG 199 Accounting for Problem Solving (2, max. 4) Supplementary lectures, discussions, and problem-solving sessions in introductory accounting. Enrollment priority to EOP students and others by permission. Credit may not be applied to fulfill specific program requirements. Corequisite: ACCTG 215. Credit/no-credit only. Offered: AWSp.

ACCTG 215 Introduction to Accounting and Financial Reporting (5) Nature and social setting of accounting; uses of accounting information; introduction of basic accounting concepts and procedures; interpretation of financial statements. May not be repeated. Offered: AWSpS.

ACCTG 219 Essentials of Accounting (4) Provides an introduction to basic accounting principles and procedures; use of accounting information to make decisions from the perspective of both external investors and internal managers. Cannot be taken for credit if ACCTG 225 has been completed for credit.

ACCTG 225 Fundamentals of Managerial Accounting (5) Analyses and evaluation of accounting information as part of the managerial process of planning, decision making, and control. Concentrates on information useful to enterprise managers. Prerequisite: ACCTG 215; ECON 200; may not be repeated. Offered: AWSpS.

ACCTG 275 Accounting and Finance Essentials (3) QSR Paperman Explores the economic foundations of accounting systems. Discusses the short-term and long-term implications of using accounting information to evaluate performance, create budgets, and analyze financial statements. Not open for credit to students pursuing a business degree. Offered: Sp.

ACCTG 301 Intermediate Accounting I (4) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and

asset and liability valuation. Prerequisite: minimum grade of 2.0 in ACCTG 225; may not be repeated. Offered: AWSpS.

ACCTG 302 Intermediate Accounting II (4) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: minimum grade of 2.0 in ACCTG 301; minimum grade of 2.0 in B CMU 301; may not be repeated. Offered: AWSpS.

ACCTG 303 Intermediate Accounting III (4) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: minimum grade of 2.0 in ACCTG 302; may not be repeated. Offered: AWSpS.

ACCTG 311 Cost Accounting (4) Introduction to the theory of cost accounting; job order, process, and standard cost systems; overhead accounting; problems in accumulation and allocation of costs; decision making with cost data. Prerequisite: minimum grade of 2.0 in ACCTG 225; may not be repeated. Offered: AWSpS.

ACCTG 320 Introduction to Accounting Information Systems (4) Concepts of accounting information systems in organizations. Processes of analyzing and designing accounting information systems, with emphasis on those using computer facilities. Internal controls and auditing considerations. Prerequisite: minimum grade of 2.0 in ACCTG 225; I S 300 which may be taken concurrently; may not be repeated. Offered: AWSpS.

ACCTG 321 Tax Effects of Business Decisions (4) Issues in taxation, including tax considerations in business decision making, tax effects of business transactions, taxation of compensation, fringe benefits, capital gains, fixed asset transactions, disposition of business distribution from corporations. Prerequisite: minimum grade of 2.0 in ACCTG 301; may not be repeated. Offered: AWSpS.

ACCTG 411 Auditing Standards and Principles (4) Intensive introduction to the attest function in society today. The environment, the process, and the report of the public auditor are analyzed. Potential extensions of the attest function are examined. Prerequisite: minimum grade of 2.0 in ACCTG 303; 2.0 in ACCTG 320; may not be repeated. Offered: AWSpS.

ACCTG 440 Accounting and Financial Management Decisions (4) Business financial planning with an emphasis of the role of accounting information in financial decisions. Topics include the accounting and finance aspects of business valuation, short and long term financing, short and long term investments, alternative types of debt and equity financing, and related topics. Prerequisite: minimum grade of 2.0 in ACCTG 303; 2.0 in ACCTG 311; 2.0 in ACCTG 321; FIN 350; may not be repeated. Offered: AWSpS.

ACCTG 450 Business Taxation (4) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes corporate distributions, liquidations, and reorganizations. Prerequisite: minimum grade of 2.0 in ACCTG 321; may not be repeated. Offered: WSpS.

ACCTG 471 Forensics and Ethical Decision Making in Accounting (4) Provides a comprehensive introduction to the concepts and techniques of forensic accounting and ethical decision making in accounting. Prerequisite: ACCTG 225; MGMT 200; either QMETH 201, IND E 315, MATH 390/STAT 390, Q SCI 381, PSYCH 315, PSYCH 318, SOC/STAT/CS&SS 221, STAT 220, or STAT 311.

ACCTG 480 Accounting for Not-for-Profit Organizations (4) Fund and budgetary accounting as applied to public sector organizations, such as governments, foundations, hospitals, and colleges. Prerequisite: minimum grade of 2.0 in ACCTG 302; may not be repeated. Offered: WSp.

ACCTG 485 Advanced Financial Accounting (4) Accounting for partnerships, accounting for business combinations, parent-subsidiary and branch relationships, foreign exchange. Prerequisite: minimum grade of 2.0 in ACCTG 303; may not be repeated. Offered: A.

ACCTG 490 Special Topics in Accounting (1-6, max. 12) Special topics of current concern to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

ACCTG 495 Accounting Internship (1-4, max. 8) One quarter's internship with a certified public accounting firm, industrial organization, or government agency. Prerequisite: ACCTG 301. Credit/no-credit only. Offered: AWSpS.

ACCTG 499 Undergraduate Research (1-6, max. 9) Arranged and supervised by individual members of the faculty.

ACCTG 500 Financial Accounting (4) Introduction to concepts and procedures underlying determination and presentation of information for financial decisions by investors and other decision makers outside the business enterprise. Study of problems of valuation, income determination, and financial reporting.

ACCTG 501 Managerial Accounting (4) Study of the generation and the use of accounting information within the firm for purposes of planning and controlling operations. Topics covered include cost concepts, responsibility accounting systems, cost control, and the use of accounting information in short- and long-term management decision problems. Prerequisite: ACCTG 500.

ACCTG 502 Financial Reporting and Analysis (4) *F. Hodge* Provides students with an understanding of the numbers side of business. Students will learn how to use financial information in real-life management situations to impact business decisions. Offered: A.

ACCTG 503 Introduction to Accounting for Managers (4) Provides potential managers with a basic knowledge of financial and managerial accounting. Focuses on the use, not the preparation, of accounting information. Examples presented for a variety of for-profit and nonprofit organizations.

ACCTG 505 Intensive Analysis of Accounting Principles and Practices (26) Covers the subjects in the required core for undergraduate accounting majors: intermediate accounting, advanced accounting, cost accounting, auditing, and tax accounting. Credits do not count toward MBA degree. Prerequisite: ACCTG 215 and ACCTG 225 or equivalent, or permission of instructor.

ACCTG 506 Intensive Analysis of Accounting Principles and Practices I (10) First of an intensive three-course program. Emphasizes the practical application of accounting concepts in a business setting. Credits do not count toward MBA degree. Prerequisite: ACCTG 215; ACCTG 225 or equivalent, or permission of instructor. Offered: A.

ACCTG 507 Intensive Analysis of Accounting Principles and Practices II (8) Second of an intensive three-course program. Covers the third part of financial accounting, accrual-based financial statements, and cost accounting for decision-making. Credits do not count toward MBA degree. Prerequisite: ACCTG 506. Offered: W.

ACCTG 508 Intensive Analysis of Accounting Principles and Practices III (8)

ACCTG 510 Introduction to Financial Statement Analysis (4) Extension of the core financial accounting material, focusing on the use of financial statements to assess the financial position and prospects of companies. Examines the critical financial reporting issues that influence interpretation of financial statements. Prerequisite: either B A 500, ACCTG 500, or permission of instructor.

ACCTG 511 Advanced Financial Statement Analysis (4) Covers accounting issues related to firm valuation and use of financial statement information to assess the risks and rewards of various firm strategies. Prerequisite: ACCTG 510 or permission of instructor.

ACCTG 513 Tax Effects of Business Decisions (4) Importance of tax considerations in making business decisions. Covers regulatory and economic impacts of the U. S. tax system. Prerequisite: either B A 500, ACCTG 500, or permission of instructor.

ACCTG 515 Problems in Managerial and Cost Accounting (4) Extension of the core management accounting material. Uses cases and discussion to analyze costing techniques, use of accounting data in planning and evaluation of managerial performance, and use of accounting data in short-run and long-run decisions. Prerequisite: either B A 502, ACCTG 501, or permission of instructor.

ACCTG 520 Accounting, Audit and Assurance Regulation (4) Examines important regulatory issues in accounting, auditing, and assurance. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office. Offered: A.

ACCTG 521 Advanced Cases in Assurance Services (4) Advanced case studies for professional accountants focusing on current issues and the use of analytical tools with real-world applications in audit and assurance settings. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 522 Data Analytics for Professional Accountants (4) Application of data analytics concepts and techniques for professional accountants, with real-world applications in audit, assurance, and advisory settings. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 523 Advanced Financial Analysis (4) Explores the use of published financial reports by decision makers external to the firm (e.g. investors and creditors). Emphasis is on traditional and statistical analyses of financial statements for the purposes of making economic decisions.

ACCTG 524 Individual Taxation (4) Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees.

ACCTG 525 Business and International Taxation (4) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes corporate distributions, liquidations, and reorganizations. International dimensions of business taxation introduced. Prerequisite: ACCTG 524.

ACCTG 526 Principles of Taxation for Auditors (4) Raises level of understanding of the tax law and enables intelligent conversation about business income tax topics. Covers flow-through entities (partnerships, S. Corps & LLCs), corporate taxation, non-taxable exchanges, and planning techniques.

ACCTG 527 Communications in Professional Accounting (4) Introduction to the communications practices of professional accountants. Development of effective written and oral skills employed in accounting presentations such as audit reports. Study of results of organizational communications research applicable to accounting firms and units within firms.

ACCTG 528 Communications, Marketing, and Interpersonal Skills for Auditors (4) Emphasizes improving interpersonal skills and students' abilities to market their firm.

ACCTG 529 Business Ethics and Law for Accountants (4) Explores basic legal and ethical principles underlying the practice of accounting. Special attention devoted to spotting legal and ethical issues as they arise in a commercial and professional context.

ACCTG 530 Tax Issues in Property Ownership (4) Analysis of gain and loss realization, recognition, and characterization of such. Detailed exploration of statutory and case law regarding acquisition, ownership, and disposition of assets. Treatment of capital and ordinary gains and losses. Timing issues regarding deferral transactions and installment reporting are analyzed. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 531 Timing and Periods of Taxation (3) Analysis of the cash and accrual methods of accounting, choice of taxable period and multi-period transaction analysis. Consideration of statute of limitations and mitigation thereof. Details of passive activity losses. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 532 Data Analytics for Tax Accountants (2) *H. Mamani* Introduction to data analytics concepts and techniques for tax accountants. Emphasis on data visualization. Offered: A.

ACCTG 533 Procedural and Policy Issues (3) Analysis of the procedures of federal taxation: assessment, collection, and refund claims. Detailed exploration of the rules governing the statute of limitations and the mitigation thereof. An introduction to tax policy considerations is given. Tax penalties are explored. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 534 Fundamentals of Corporate Taxation (3) Detailed analysis of contribution of assets to corporations. Calculation of recognized gains and basic effects of asset contributions. Treatment of income and deduction items of corporate operations. Analysis of distribution of assets to shareholders with respect to their stock. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 535 Advanced Issues in Corporate Taxation (3) A continuation of ACCTG 534. Fundamentals of moving assets out of and within corporate solution. Basics of corporate reorganizations: acquisitive and divisive. The details of the election to obtain (or avoid) the Section 338 election are explored in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 534 or permission of instructor.

ACCTG 536 Tax Provisions (3) Examines the components of corporate income tax provisions. Topics include the current and deferred provision, balance sheet and income statement impacts, rate reconciliations, and audit documentation and standards. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 535 or permission of instructor.

ACCTG 537 Income Taxation of Conduits I (3) Tax consequences to owners and entity from formation, operation, distributions from, and liquidation of partnerships and S corporations. Study of taxable and tax-free formations, nature of "bottom line" income and separately stated items, changes to owners' tax basis, basics of non-liquidating and liquidating distributions. Prerequisite: undergraduate accounting concentration or equivalent. Offered: W.

ACCTG 538 Income Taxation of Conduits II (3) A continuation of ACCTG 537. Study of complex issues in partnership and S corporation taxation. Substantial portion involves resolving case studies to improve analytic skills and interrelate partnership and S corporation planning issues. Sections 751(b) and 736 examined in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 537 or permission of instructor.

ACCTG 539 Tax Research and Decision Making (4) Decision-making processes in relation to problems of taxation. Tools of tax analysis and research and the communication of conclusions flowing from professional tax work. Role of the professional accountant in client business transactions and in negotiations with taxing authorities is highlighted and simulated on the basis of actual case histories. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 540 Ethics and Communications for Taxation Professionals (4) Focuses on ethics and internal communications in accounting settings. Evaluation of the ethics of difficult tax

questions and practice communicating explanations and recommendations to colleagues and managers.

ACCTG 541 Communications for Taxation Professionals II (4) Introduction to the communications forms and to practices of professional accountants and accounting managers. Development of effective written and oral skills employed in accounting presentations, such as audit reports and consultants' reports. Study of results of organizational communications research applicable to accounting firms and/or units within firms. Prerequisite: undergraduate accounting concentration or permission of instructor.

ACCTG 542 Communications for Taxation Professionals III (4) Development of oral and written skills associated with the tax accountant's role as a client advocate. Develop communication production related to the various stages of a tax case. Prerequisite: ACCTG 541.

ACCTG 543 Income Taxation of Trusts and Estates (3) Development of fundamental skills regarding income taxation of trusts and estates. Calculation of distributable net income and the distribution deduction for the fiduciary entity. Basic analysis of the throwback rules. Case studies. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 545 State and Local Tax Issues (4) Focuses on state and local tax issues such as multi-state tax treaties, sales taxes, nexus, taxes on gross receipts, and apportionment. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 547 Estate and Gift Taxation (3) Development of fundamental knowledge of the unified transfer tax on the transfer of property from one person to another. Calculation of gross estate, adjusted gross estate, and taxable estate. Calculation of gift and estate taxes owing. Discussion of estate planning concepts. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 548 Speaker Forum-Tax (3) Covers topics such as state and local taxation, international taxation, interperiod tax allocation, qualified and nonqualified stock options, the R&D credit, and IRS audit issues presented by practicing professionals in the industry.

ACCTG 549 International and State Tax Issues (4) Covers international tax concepts including the foreign tax credit, international tax ownership structures, permanent establishments, income sourcing rules, and international tax treaties. Studies state and local tax issues such as multistate tax treaties, sales taxes, nexus, taxes on gross receipts, and appointment.

ACCTG 564 Governmental Accounting (4) Budgetary and financial accounting/reporting as applied at the state, local, and special-purpose governments; financial accounting and reporting for not-for-profit organizations.

ACCTG 566 Issues in International Accounting (4) Insights into the conceptual, managerial, professional, and institutional issues of international accounting. Focus on current topics in international accounting and on the cultural, managerial, and governmental forces that shape both internal and external accounting in specific countries.

ACCTG 575 Internship (14) Professional internship in graduate accounting program. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 576 Independent Research Project Proposal (2-) Topic identification and development for research project to be completed in ACCTG 577. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 577 Independent Research Project Proposal (-4) Development and completion of independent research project. Topic identification and proposal approval completed in ACCTG 576. Prerequisite: enrollment in MPAcc program, accounting and assurances track; ACCTG 576.

ACCTG 579 Special Topics in Accounting (2/4, max. 12) Accounting topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

ACCTG 580 Doctoral Seminar: Introduction to Accounting Research (4) Examination of research problems and techniques in accounting. Interdisciplinary nature of accounting research emphasized. Work in finance, economics, and psychology used to develop current trends in accounting research. Prerequisite: doctoral student status.

ACCTG 581 Doctoral Seminar in Managerial Accounting (4) Critical examination of conceptual and practical issues of cost and managerial accounting. Specific topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: ACCTG 511 or permission of instructor.

ACCTG 582 PhD Research Seminar: Introduction to Selected Research Topics (4) Introduces first-year and second-year accounting PhD students to the research areas and methodologies of the current account faculty. Research areas include financial, managerial, audit, and tax. Research methodologies include analytical, archival, experiments, and surveys.

ACCTG 596 Doctoral Seminar in Financial Accounting Research (4) Review and critical analysis of research strategies and methods applied to problems in financial reporting practice and financial accounting standard setting. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

ACCTG 597 Doctoral Seminar in Managerial Accounting Research (4) Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and ACCTG 581 or equivalent or permission of graduate office.

ACCTG 599 Doctoral Seminar in Accounting (1, max. 12) Study and research in advanced topics of accounting. Generally concerned with unpublished areas of research as well as research methodology and philosophy. Conducted by departmental faculty and occasional distinguished visiting faculty. Prerequisite: doctoral student status.

ACCTG 600 Independent Study or Research (*-)

Administration

ADMIN 510 Fundamentals of Business Administration ([1-15]-, max. 15) Includes materials basic to study and application of business theories and practice; accounting; business economies and financial control; and business strategy; commercial law; human resources and negotiations; marketing; operations management. Faculty team-teaching approach. Not open to master of business administration majors. Credit/no-credit only.

ADMIN 511 Fundamentals of Business Administration (4) Develops student's ability to think as practicing executive; providing practice in analyzing, evaluating, and modifying organizations' strategies in light of changing conditions for profit and non-profits. Develops marketing skills in understanding targeted customer's needs and the specific marketing steps to create demand. Not open to MBA students. Credit/no-credit only.

ADMIN 512 Fundamentals of Business Administration - People Management, Leadership, and Teams (4) Introduces theories and practices relating to the management of people and teams, organizational behavior, human resources and leadership. Helps distinguish management factors that create a sustaining culture that attracts, motivates and retains the right people for the right jobs. Not open to MBA students. Credit/no-credit only. Offered: W.

ADMIN 513 Fundamentals of Business Administration: Accounting and Finance (4) Introduces financial and managerial accounting and finance. Topics include financial statements, capital structure decisions, cost of debt and equity, ratio analysis, classifying costs, breakeven analysis, budgeting, and capital budgeting. The goal is to understand external reports and to use financial information internally for decision-making. Not open to MBA students. Credit/no-credit only. Offered: Sp.

ADMIN 514 Fundamentals of Business Administration: Business Plan Practicum I (2) Students develop a business plan on a team based on their interests. Applies the information from the ADMIN 511 and ADMIN 512 to the development of the plan. Prerequisite: ADMIN 511; ADMIN 512, which may be taken concurrently. Credit/no-credit only. Offered: W.

ADMIN 515 Fundamentals of Business Administration: Business Plan Practicum II (1) Students complete the business plan on a team that was developed in ADMIN 514. Applies the information from ADMIN 511, ADMIN 512, and ADMIN 513 to the development of the plan. Prerequisite: ADMIN 514. Credit/no-credit only. Offered: Sp.

Business Administration

B A 300 Foreign Study-Business Administration (1-5, max. 15) For participants in approved foreign-study programs where equivalent UW business administration courses are not available.

B A 390 Business Honors Seminar (2-5, max. 5) Special topics in business. Required for Honors students in Business Administration.

B A 391 Learning Leadership in Theory and Practice (2-4) Explores leadership techniques and principle using readings, case, lectures, and large group discussions designed to increase knowledge of leadership theory and practice as well as develop leadership potential. Uses small group sessions incorporating experiential exercises, self-reflection, and leadership conversations. Credit/no-credit only. Offered: jointly with GEN ST 301.

B A 490 Special Topics in Business (1-6, max. 12)

B A 495 Business Internship (1-4, max. 8) Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of business concepts learned in the classroom. Prerequisite: ACCTG 225. Credit/no-credit only. Offered: AWSpS.

B A 500 Business Administration I (16) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the Foster School of Business.

B A 501 Business Administration II (14) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the Foster School of Business.

B A 502 Business Administration III (8) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the Foster School of Business.

B A 505 Global Business Fundamentals (16) An intensive overview of the fundamental core business topics: financial accounting, managerial accounting, business economics, statistics, management, macroeconomics, finance, marketing, operations management, quantitative methods, and strategy. Prerequisite: permission. Offered: S.

B A 541 Environmental Management I (4) Survey of environmental ethics, environmental laws and regulation, the economics of environmental decisions, and the relationship of business to public policy and the environment. Must be taken concurrently with B A 544. Prerequisite: permission of instructor.

B A 542 Environmental Management II (4) Applications of the functional areas of business to environmental concerns. Major federal legislation affecting these concerns applied to business problems in the areas of accounting, finance, marketing, management information systems, and organizational behavior. Must be taken concurrently with B A 544. Prerequisite: B A 541 or permission of instructor.

B A 543 Environmental Management III (4) Case studies that integrate the fundamentals of business and environmental management to address such issues as plant siting, regulatory compliance, production line changes, and innovative, proactive responses to environmental issues. Case studies include results of student consulting projects and a capstone case in environmental management. Must be taken concurrently with B A 544. Prerequisite: B A 542 or permission of instructor.

B A 544 Environmental Management Seminar (1, max. 3) Guest lecturers from academia, business, government, and advocacy groups discuss environmental science, ethics, law, regulation, economics, finance, accounting, and policy issues. Seminar topics supplement course material in B A 541, B A 542, B A 543, which are to be taken concurrently.

B A 545 The Global Business Forum: Current Issues in Global Business (1, max. 3) Discussion of current trends in the global business environment and of international issues facing companies. Leaders from international businesses and other organizations, as well as faculty members from various departments and specializations, invited to share their perspectives with seminar participants. Topics change each quarter.

B A 560 Cooperative Education in Business (1) Business practicum: internship with approved business or governmental agency. Open only to students who meet requirements of internship program. Internship credit may not be applied to fulfill specific course requirements or to credits required for graduation. Credit/no-credit only. Offered: S.

B A 571 Research Reports (4-) Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: instructor's approval of preliminary research topic outline.

B A 572 Research Reports (-4) Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: B A 571.

B A 578 Strategic Management Practicum (2/4, max. 8) Students apply skills learned in the MBA classroom to real world challenges and opportunities facing contemporary enterprises. Under faculty oversight, students partner with host firms on applied learning, consulting-style projects that offer additional development opportunities not available in traditional classrooms. Credit/no-credit only.

B A 580 Problems in Microeconomics (4) Study of microeconomic intuition, directed toward Business School Ph.D. students, showing the interconnections between formal, mathematical analysis and the unstructured economic questions posed by the world. Emphasis on setting up problems and examining the intuition behind the analysis of them. Many applications to specific business issues.

B A 599 Teaching Effectiveness Seminar (2, max. 4) Prepares doctoral students to serve as a teaching assistant and course instructor. Discusses how to design a syllabus, present material, grade, handle difficult classroom situations, and other activities associated with undergraduate and graduate education. Builds long-term skills for a lifetime of teaching as part of an academic career. Credit/no-credit only.

B A 700 Master's Thesis (*-)

B A 800 Doctoral Dissertation (*-)

Business Administration Research Methods

BA RM 580 Applied Econometrics I (4) Emphasizes the application of econometric methods rather than the mathematical proofs of statistical procedures. Introduction to the linear regression model, interpretation of summary statistics, bias and precision of regression estimates, analysis of the residuals, and hypothesis testing. Prerequisite: STAT 342 or STAT 395 or STAT 481, or permission of instructor.

BA RM 581 Applied Econometrics II (4) Continuation of BA RM 580. Measurement errors, distributed lags, and simultaneous equation models. Prerequisite: BA RM 580.

BA RM 590 Behavioral Research Methods - Theory and Design (4) Philosophy of science, development of scientific method, and meaning of behavioral research. Historical perspective of scientific investigation and the evaluation of research. The development of theory and its relationship to research. Various strategies and designs in behavioral research. Prerequisite: coursework in statistics or permission of instructor.

BA RM 591 Behavioral Research Methods - Approaches and Applications (4) Considers alternative research approaches, such as laboratory and field experimentation, simulation, and surveys, with data-gathering techniques appropriate for each approach. Primarily concerned with developing alternative approaches to research problems and with discussing specific applications. Builds upon a background of specific statistical tools and techniques and an understanding of theory development and research design. Prerequisite: coursework in statistics or permission of instructor.

Business Communication

B CMU 301 Strategic Business Communication (4) Strategic approach to communications as a management tool. Analysis of the psychology, semantics, planning, and principles of effective business writing, presenting, and interpersonal and team communication. Practical applications include written and oral messages, inform and persuade, individual and team presentations, and tools and processes to increase collaboration among members of a team. Prerequisite: Cannot be taken for credit if credit earned in B CMU 302.

B CMU 410 Business Reports and Other Specialized Communications (4) Covers internal and external, written and oral business reporting. Considers communications strategies within the

context of rapidly changing technologies. Students learn to apply primary and secondary research to quarter-long, individual projects resulting in a variety of reports: proposals, progress reports, feasibility studies, business plans, etc. Prerequisite: B CMU 301 or B CMU 302.

B CMU 490 Special Topics in Business Communications (1-6, max. 12) Students and faculty focus on current topics of concern. Prerequisite: either B CMU 301 or B CMU 302.

B CMU 499 Research in Business Communications (1-6, max. 9)

B CMU 509 Finding your Voice (2) Develop a leadership communication style by discovering core values and learning how to translate those values into effective messages. Students give speeches as well as critique speeches of classmates, produce written evaluation of speeches given in class and receive instructor feedback. Prerequisite: B A 501.

B CMU 510 Business Communications for Managers (4) Develops understanding of communication theories, describes strategies for planning managerial communications, and builds skills in oral and written reporting and persuading. Looks at how new technologies are changing the way people in business communicate, and the implications those changes have for organizations. Prerequisite: B A 501.

B CMU 579 Special Topics in Business Communication (2/4, max. 12) Business and managerial communication topics of current interest to faculty and students.

B CMU 600 Independent Study or Research (*) Offered: AWSp.

Business Economics

B ECON 300 Managerial Economics (4) Analysis of economic factors affecting decisions made by business firms. Demand and cost analysis, and alternative policies from the firm's point of view. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 125, MATH 127, MATH 134, or Q SCI 291; either IND E 315, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390; may not be repeated.

B ECON 301 Intermediate Macroeconomics (4) Analysis of economy with attention to the business cycle, output of goods and services (GNP), inflation, unemployment, and government's fiscal and monetary policies. How the economy affects individuals and firms and how to deal effectively with the economic environment. Prerequisite: ECON 201; may not be repeated.

B ECON 420 Financial Markets (4) Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: either B ECON 300 or ECON 300; may not be repeated.

B ECON 426 Competing in the Global Economy (4) Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think global - act local." Prerequisite: either B ECON 300 or ECON 300.

B ECON 427 International Finance (4) Asset choice and institutional operations in international finance, foreign exchange problems, the impact of international financial problems and operations on business, short- and long-term international financing. Prerequisite: either B ECON 300 or ECON 300; may not be repeated.

B ECON 490 Special Topics in Business Economics (1-6, max. 12) Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

B ECON 499 Undergraduate Research (1-6, max. 9) Research in selected areas of business economics.

B ECON 500 Introduction to Business Economics (4) Factors underlying the determination of cost and prices for the industry and the firm, demand and supply analysis and firm behavior. The relation of the economic environment to the microeconomic decisions of the firm.

B ECON 501 Analysis of Global Economic Conditions (4) Analysis of real and monetary factors affecting national and international economics, supply and demand for money, interest rates and stabilization problems and policies, in relation to government policy effects on business and individual affairs. Focuses on global macroeconomic issues. Prerequisite: MBA core microeconomics.

B ECON 510 Microeconomics for Managers (4) *A. Leon Dimas* In this course, students gain an understanding of how markets work, and learn optimal (profit-maximizing) strategies for managers. Offered: W.

B ECON 520 Financial Markets (4) Analysis of the structures and functions of financial markets and institutions; the behavior of interest rates through time; the cross-sectional structure of interest rates; and the roles of the Federal Reserve and Treasury in financial markets. Prerequisite: MBA Core Finance.

B ECON 526 Competing in the Global Economy (4) Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think globally - act locally." Offered: WSp.

B ECON 527 International Finance (4) Study of selected problems in financing, international trade, investment, and foreign business operations; international aspects of money markets; problems of evaluation of foreign investments. Prerequisite: MBA core finance.

B ECON 560 Student Investment Fund (1-2, max. 4) Student directed course that requires students to analyze companies and to select stocks to manage a portfolio of public domestic equity under the guidance of the faculty advisor and the UW Investment Office.

B ECON 579 Special Topics in Business Economics (2/4, max. 12) Business economics topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering.

Prerequisite: permission of instructor.

B ECON 600 Independent Study or Research (*-)

Entrepreneurship and Innovation

ENTRE 370 Introduction to Entrepreneurship (4) Introduction to entrepreneurial practices with an emphasis on learning how to find business ideas, how to evaluate their potential, and how to recognize the barriers to success. Exposure to the stresses of a start-up business, the uncertainties that exist, and the behavior of entrepreneurs. Prerequisite: either ACCTG 219 or ACCTG 225; ECON 200.

ENTRE 372 Grand Challenges for Entrepreneurship (4) Explores big problems and opportunities facing society ranging from healthcare, education, big data, and poverty. Examines how solutions to these challenges can be researched, validated, and implemented using entrepreneurial skills such as creativity, business models, pivoting, and execution.

ENTRE 422 Innovation Strategy (4) Focuses on starting a hardware or software company. Includes guest entrepreneurs, lawyers, and financiers discussing market identification and analysis; planning the business; financing; and typical operating and administrative problems.

ENTRE 432 Software Entrepreneurship (4) Explores the opportunities and challenges of launching a software company. Issues include an overview of the industry, trends and emerging opportunities, funding, technology transfer, industry challenges, and cutting-edge software practices.

ENTRE 440 Business Plan Practicum (2) Enables students interested in new venture creation to explore their entrepreneurial aptitude, formulate their ideas, validate the opportunity, develop a business plan, and demonstrate the depth of their knowledge by preparing an executive summary and competing in the UW Business Plan Competition. Credit/no-credit only.

ENTRE 443 Environmental Innovation Practicum (2) Focuses on developing innovative solutions to real-world environmental problems and creating new business opportunities. Speakers include experts from the clean-tech community, environmental start-ups, the public sector, as well as corporate environmental strategists. Themes include water, energy, green building, and transportation. Includes the opportunity to participate in the UW Environmental Innovation Challenge.

ENTRE 445 Health Innovation Challenge Practicum (2) Explores the biggest challenges in the health field, domestic and global, and how various actors are creating solutions for them through innovation. Students form cross-disciplinary teams around project concepts chosen by the class and present the team's solutions to classmates and a panel of experts.

ENTRE 455 Entrepreneurial Marketing (4) Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: MKTG 301; may not be repeated. Offered: jointly with MKTG 455.

ENTRE 457 Entrepreneurial Finance (4) Explores financial issues that face entrepreneurs, including the stages of financing, business cash flow models, and strategic positioning of the early-stage company. Examines the role of business angels, venture capital funds, institutional investors, strategic alliances, licensing agreements, and exit strategies. Prerequisite: FIN 350; either B ECON 300 or ECON 300. Offered: jointly with FIN 457.

ENTRE 459 Venture Investing (4) Analyzes and makes recommendations on investment opportunities through learning the fundamentals of venture investing and performing due diligence on real companies. Explores the venture investing process from the entrepreneur's and the investor's point of view. Students present their recommendations to the Investment Committee of the W Fund. Offered: jointly with FIN 459.

ENTRE 472 Creating a Company I (4-) Two-course sequence with ENTRE 473. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 370.

ENTRE 473 Creating a Company II (-4) Two-course sequence with ENTRE 472. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 472.

ENTRE 490 Special Topics in Entrepreneurship (1-6, max. 12)

ENTRE 499 Undergraduate Research (1-6, max. 9) Independent research in selected areas of entrepreneurship; new venture strategy and investment; market analysis and financial forecasts; and corporate issues under faculty supervision. Prerequisite: ENTRE 370.

ENTRE 509 Foundations of Entrepreneurship (2) Evaluation of new market opportunities and starting a new venture; focuses on identifying and evaluating new venture opportunities, developing and testing market strategies, evaluating test market performance, and evaluating business plans. Emphasizes the interplay between marketing, manufacturing, finance, accounting, and team management. Prerequisite: Permission of Foster School of Business. Offered: Sp.

ENTRE 510 Entrepreneurial Strategy (4) Uses the tools of competitive strategy to analyze the success and failure of entrepreneurial ventures, identifying general strategic principles that might increase the probability that an entrepreneurial venture will succeed. Draws heavily on the principles of microeconomics and strategy. Prerequisite: B A 500; B A 502.

ENTRE 521 Corporate Entrepreneurship (4) Focuses on entrepreneurial activities in large, established corporation. Introduces the theory and best practices on the process of converting new ideas to commercial products and new businesses. Prerequisite: B A 500; B A 501; B A 502.

ENTRE 522 Innovation Strategy (4) Explores how firms tap into external sources of innovation, focusing on user communities, universities, and entrepreneurial ventures. Demonstrates how open, collaborative, community-based models of innovation create successful business options. Offered: jointly with MGMT 522.

ENTRE 530 Entrepreneurial Decision Making (4) Provides an overview of the major decisions entrepreneurs face when creating a business. Covers the startup lifecycle from idea generation and opportunity recognition to entry strategy, growth, and exit. Prerequisite: B POL 509; B A 501. Instructors: Song Offered: W.

ENTRE 531 Developing Business Models for Emerging Technologies (4) Focuses on the commercialization of emerging technologies. Topics include conducting feasibility assessments of intellectual property landscape, evaluating business opportunities, analyzing competition, developing business models and strategies, constructing a professional quality business plan, and presenting business plan, transforming a new technology into a market-ready technology-based business. Offered: W.

ENTRE 532 Software Entrepreneurship (4) A case- and project-based course, focusing on starting a software or hardware company. Guest entrepreneurs, lawyers, and financiers discuss market identification and analysis, planning the business, financing, and typical operating and administrative problems.

ENTRE 535 Business Models in Global Health (4) Explores many of the models used to tackle these issues in global health, using public-private partnership, corporate, and entrepreneurial cases. Examines and debates the efficacy of efforts in combating the biggest killers: non-communicable diseases (NCDs) such as AIDS, malaria, and Tuberculosis. Includes the economics of eradication efforts, funding architecture, issues around neglected diseases, and pricing models for the developing world.

ENTRE 540 Business Plan Practicum (2, max. 4) Gives student entrepreneurs the opportunity to network with the founders/CEOs of companies, explore their entrepreneurial aptitude, and work through the details of their own start-ups. Provides structure, tools, and resources to start of company, and compete in the UW Business Plan Competition. Credit/no-credit only.

ENTRE 541 Technology Commercialization Practicum (4) Provides the experience of researching and creating a commercialization plan for a promising technology. Designed to

apply the skills and perspectives of students in cross-disciplinary teams so they learn how to work effectively with peers in assessing complex and potentially ambiguous situations. Offered: S.

ENTRE 542 Venture Capital Investment Practicum (2) Provides overview and teaches the mechanics of the venture capital industry and culminates in intramural venture capital competition. Students assume the role of investors in a venture capital firm and real entrepreneurs pitch to them for investment dollars. Teams defend their allocation decisions before a judging panel of venture capitalists. Credit/no-credit only. Offered: A.

ENTRE 543 Environmental Innovation Practicum (2) Focuses on developing innovation solutions to real-world environmental problems and creating new business opportunities. Speakers include experts from the clean-tech community, environmental start-ups, the public sector, as well as corporate environmental strategists. Themes include water, energy, green building, and transportation. Students have the opportunity to participate in the UW Environmental Innovation Challenge. Offered: A.

ENTRE 545 Health Innovation Challenge Practicum (2) Explores the biggest challenges in the health field, domestic and global, and how various actors are creating solutions for them through innovation. Students form cross-disciplinary teams around project concepts chosen by the class and present the team's solutions to classmates and a panel of experts.

ENTRE 555 Entrepreneurial Marketing (4) Examines the skills and tools entrepreneurs need for bootstrap or guerilla early-stage companies. Covers how to target market segments, position products, estimate demand, set prices, gain access to channels, and manage issues of rapid growth. Prerequisite: B A 501, MKGT 501 or equivalent. Offered: jointly with MKTG 555.

ENTRE 557 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with FIN 557.

ENTRE 560 Accounting Fundamentals for Entrepreneurs (2) Familiarizes prospective entrepreneurs with the fundamentals of financial and managerial accounting. Covers the principles of accounting decision-making from the perspective of both external investors and internal managers.

ENTRE 561 Essentials of Finance for Entrepreneurs (2) Studies the essentials of finance, how individuals make consumption and savings decisions, and how firms make investment and financing decisions, necessary for entrepreneurs to develop a competitive advantage over their peers.

ENTRE 562 Legal Essentials for Entrepreneurs (1) Provides an overview of critical and fundamental aspects of United States contract law, types of business structures, and intellectual property law that are essential for entrepreneurs to make informed business decisions.

ENTRE 563 Opportunity Recognition and Validation (2-4) Covers the range, scope, and complexity of issues involved in entrepreneurial startups. Explores how entrepreneurs conceive, adapt, and execute strategies to create new enterprises.

ENTRE 564 Competitive Strategy (2-4) Introduces different aspects of the strategic decision-making process. Pays particular attention to the context within which the decision maker operates; the pressures of performance; and both the personal and professional limitations of the individual executive as they try to manage effectively. Also highlights the interplay between competitive strategy and entrepreneurship related topics.

ENTRE 565 Entrepreneurial Marketing I (2) Focuses on marketing strategy. Assesses market opportunities by analyzing customers, competitors, collaborators, context, and the strengths and weaknesses of a company. Examines how to design focus marketing strategies to maximize a company's chance of winning in these markets, and better evaluate different potential growth trajectories. First in a two-course entrepreneurial marketing sequence.

ENTRE 566 Entrepreneurial Marketing II (2) Focuses on the decisions that entrepreneurs make and the tools that they use to implement an effective marketing strategy. Covers how to communicate and defend marketing recommendations as well as critically examine and build upon the recommendations of others. Second in a two-course entrepreneurial marketing sequence.

ENTRE 567 Entrepreneurial Strategy and Decision Making (4) Uses the tools of competitive strategy to analyze the success and failure of entrepreneurial ventures, identifying general strategic principles that might increase the probability that an entrepreneurial venture will succeed. Provides an overview of the major decisions entrepreneurs face when creating a business. Covers the startup lifecycle from idea generation and opportunity recognition to entry strategy, growth, and exit.

ENTRE 568 Digital Media Marketing (1-2) Examines the principles and tools related to internet marketing, mobile marketing, and social media. Compares marketing communications in the new media landscape compared to traditional marketing communications. Analyzes business models in new media landscape such as the value proposition and the revenue model of a firm. Covers new media marketing tactics. Offered: W.

ENTRE 569 Strategies for Funding Ventures (4) Provides an in-depth view of the fundraising process including the elements of deal making and working with investors, and sensitizes prospective entrepreneurs to the strategic and people issues around venture finance.

ENTRE 570 Persuasion: Pitching, Public Relations, and Public Speaking (2) Examines the role verbal communication, influence, and persuasion play in shaping an entrepreneur's success in starting, growing, managing, leading, and exiting a venture. Follows the progression of different forms of pitching that an entrepreneur needs to be able to deliver.

ENTRE 575 Entrepreneurial Leadership Seminar (1, max. 4) Covers common issues associated with leading and coordinating people in entrepreneurial ventures. Topics vary by

quarter and include individual level of leadership, managing projects, managing teams, and scaling ventures. Credit/no-credit only.

ENTRE 579 Special Topics in Entrepreneurship (2-4, max. 12) Topics vary. Offered only when faculty members are available and there is sufficient student interest.

ENTRE 581 Theoretical Foundations of Entrepreneurship (4) Focuses on theoretical overview, entrepreneurs, environment and organizational founding, entrepreneurship's links with other disciplines, venture capital and venture capitalists, new venture strategy and performance, growth processes and challenges, and entrepreneurial networks and alliances. Offered: A.

ENTRE 582 Technology, Innovation, and Entrepreneurship (4) Explores issues of how a knowledge-based economy competes and performs using technological innovations and entrepreneurship. Explores research on capabilities of broader entities; processes of learning at the firm, industry, technology, economy-level; development of know-how as evolutionary process; and explorations by firms, sectors and economies exploring new technologies and techniques. Offered: W.

ENTRE 590 New Venture Research Practicum (4) Exposes students to new venture creation phenomena. Teaches how to think about and understand empirical research methods such as case studies, participant-observation, and other field methods while contributing to on-going cumulative data collection process.

ENTRE 595 Venture Planning and Execution Independent Study (1-3, max. 10) Independent study focused on venture planning and execution of an entrepreneurial venture of the students' design. Credit/no-credit only.

ENTRE 600 Independent Study or Research (*-)

Finance

FIN 350 Business Finance (4) Evaluating and funding projects within the firm. Time value of money, inflation, capital budgeting; risk and return in the financial markets, stocks, bonds, portfolios and diversifiable risk, market efficiency and the balance between debt and equity to fund the firm. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 125, MATH 134, or Q SCI 291; either IND E 315, MATH 390, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390.

FIN 423 Banking and the Financial System (4) Role of banks and nonbank financial institutions in the financial system; asset choices of banks and nonbank financial institutions; problems in the management of financial institutions with emphasis on commercial banks. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 425 Introduction to Real Estate Finance and Investment (4) *T. Seslen* Introduction to valuing, financing, and investing in real estate with emphasis on those topics that distinguish real

estate from other investments, including valuation techniques, lease structures, loan options, equity partnerships, risk management, and taxation. Prerequisite: FIN 350.

FIN 428 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities. Financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: FIN 350; either one 400-level FIN course, B ECON 301 or ECON 301.

FIN 435 Introduction to Real Estate Capital Markets (4) *T. SESLEN* Examines who the real estate capital providers are, how that capital is priced, and why the markets operate as they do. Provides a toolbox for sound decision-making, either as an investor seeking funding or as a note-holder in the secondary market. Prerequisite: FIN 350.

FIN 450 Problems in Corporate Finance (4) Case problems in corporate financial management. Includes cases on management of current assets, obtaining short-term loans, raising long-term capital, capital budgeting, and dividend policy. The management point of view is stressed. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

FIN 453 Financial Theory and Analysis (4) Business financial strategic planning. Topics include business valuation and financing, performance evaluation, risk analysis, capital budgeting, and inflation and taxes. Emphasizes tools with real-world applications while incorporating modern finance concepts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 454 Business Valuation, Investment, and Financing (4) Key issues in financial management using both analytical and case study illustrations. Valuation of public and private companies; cost of capital estimation; investment complications, such as taxes, inflation, risk, project interdependencies, and financing-investment interactions; leasing; mergers; spin-offs and carve-outs. Prerequisite: FIN 350; either B. ECON 300 or ECON 300.

FIN 457 Entrepreneurial Finance (4) Explores financial issues that face entrepreneurs, including the stages of financing, business cash flow models, and strategic positioning of the early-stage company. Examines the role of business angels, venture capital funds, institutional investors, strategic alliances, licensing agreements, and exit strategies. Prerequisite: FIN 350; either B ECON 300 or ECON 300. Offered: jointly with ENTRE 457.

FIN 459 Venture Investing (4) Analyzes and makes recommendations on investment opportunities through learning the fundamentals of venture investing and performing due diligence on real companies. Explores the venture investing process from the entrepreneur's and the investor's point of view. Students present their recommendations to the Investment Committee of the W Fund. Offered: jointly with ENTRE 459.

FIN 460 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to

the risk and rate-of-return aspects of particular securities portfolios, and total wealth.
Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 461 Financial Futures and Options Markets (4) Introduction to financial futures and options markets. Institutional aspects and social functions of these markets, pricing of options and futures, and risk shifting by hedging. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 462 Management of Financial Risk (4) Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards swaps, and option contracts. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

FIN 466 Alternative Investments: Hedge Funds and Private Equity (4) Examination of the market for alternative investments including the investment strategies employed by hedge funds and private equity firms, the risk-return tradeoffs of those strategies, and the legal and economic environments in which alternative investment firms operate. Prerequisite: FIN 350; either B ECON 300 or ECON 300. Instructors: Brogaard

FIN 490 Special Topics in Finance (1-6, max. 12) Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

FIN 495 Finance Internship (1-4, max. 8) Internship with a private firm, nonprofit organization or government agency, where work experience involves substantial application of finance concepts learned in classroom. Prerequisite: FIN 350. Credit/no-credit only.

FIN 499 Undergraduate Research (1-6, max. 9) Research in selected areas of business finance, money and banking, or investments, with permission of instructor.

FIN 502 Business Finance (4) Financial management of the firm, including capital budgets, working capital analysis, and financing policy. Prerequisite: ACCTG 500, B ECON 500, QMETH 500.

FIN 505 Corporate Finance (4) *L. Young* This course elucidates the theory of corporate finance, and explores how it's applied in the financial decision making of a firm. The study of these decisions will involve understanding how capital markets function and learning to use and evaluate performance of a company, business, or department based on financial models. Offered: Sp.

FIN 528 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities: financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: B A 502 or FIN 509.

FIN 530 Financial Management of Banks (4) Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B ECON 520 or permission of graduate office.

FIN 550 Advanced Business Finance (4) Systematic coverage of key theoretical issues in financial management. Application of quantitative analysis to financial problems of the firm that are important in practice, including issues related to financing and investment. Prerequisite: MBA Core Finance.

FIN 551 Problems in Business Finance (4) Uses case studies to examine a broad range of financial management topics, including forecasting financial statements, use of bank credit, working capital management, public and private securities issues, capital budgeting, and business valuation. Credit allowed for only one of FIN 551 and FIN 552. Prerequisite: B A 502.

FIN 552 Problems in Corporate Planning and Financing (4) Uses case studies to examine business financing. Topics include financial statement analysis, financial planning and forecasting, banking relationships, and financing sources, including the use of derivative securities, venture capital, and private equity. Credit allowed for only one of FIN 551 and FIN 552. Prerequisite: either B A 501 or FIN 502.

FIN 553 Problems in Capital Investment Planning (4) Case discussions used to examine corporate resource allocation decisions. Topics include capital budgeting techniques, estimation of capital costs, capital budgeting systems, strategic investment decisions, and financial restructurings. Prerequisite: either B A 501 or FIN 502.

FIN 555 Financing Decisions, Payout Policy, and Corporate Control (4) Analysis of business financing methods, payout policy, management compensation, ownership structure, and the distribution of control rights. Covers the major issues critical to structuring contracts within the corporation. Prerequisite: MBA Core Finance.

FIN 556 Business Valuation and Investment Analysis (4) Valuation of business enterprises, evaluation of financial performance, analysis of complex investment opportunities, business taxation, leasing, and business acquisitions. Emphasis on complications encountered in practice. Prerequisite: MBA Core Finance.

FIN 557 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with ENTRE 557.

FIN 558 Mergers and Acquisitions (4) Advanced finance topics focusing on providing the necessary training to value, structure, and close acquisitions. Additional topics include antitrust issues, the legal environment governing mergers, and antitakeover defense.

FIN 560 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate of return aspects of particular securities, securities portfolios, and total wealth. Prerequisite: MBA Core Finance.

FIN 561 Financial Futures and Options Markets (4) Overview of futures markets and options markets. Analysis of pricing of futures contracts and options; comparison of futures, forward, and options contracts; risk management with hedging; alternative investment strategies; and review of empirical evidence. Prerequisite: MBA Core Finance.

FIN 562 Management of Financial Risk (4) Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards, swaps, and option contracts. Prerequisite: MBA Core Finance.

FIN 563 Real Options (2) Short overview of option pricing theory, followed by applications of option analysis in evaluating complex investment projects by business firms. Prerequisite: B A 502.

FIN 566 Alternative Investments: Hedge Funds and Private Equity (4) *Brogaard*
Examination of the market for alternative investments including the investment strategies employed by hedge funds and private equity firms, the risk-return tradeoffs of those strategies, and the legal and economic environments in which alternative investment firms operate.

FIN 579 Special Topics in Finance (2/4, max. 12) Finance topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offerings. Prerequisite: permission of instructor.

FIN 580 Doctoral Seminar in Financial Economics (4) Study of the financing of the corporation, including recent theoretical and institutional developments. Extensive reading and discussion in designated areas covering problems relating to financial management and to the social and economic implications of the financial process. Prerequisite: ECON 500 or permission of instructor.

FIN 590 Doctoral Seminar in Capital Market Theory (4) Decision making under uncertainty, information and capital market efficiency, portfolio theory, capital asset pricing model, arbitrage pricing model, and options pricing model. Prerequisite: ECON 500 or permission of instructor.

FIN 591 Doctoral Seminar in Corporate Finance (4) Principles of intertemporal choice, alternative valuation models, theory of investment under uncertainty, impact of dividend and financing decisions on firm valuation in perfect and imperfect markets, and theory of firm organization and agency costs. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 592 Doctoral Seminar in Financial Research (4) Empirical research in finance with emphasis on methodology and scientific method. Empirical research in market efficiency, capital asset pricing model, options pricing model, and impact of firm's dividend and financing decisions on firm value. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 599 Doctoral Seminar in Finance (1, max. 12) Study and research in advanced topics of finance. Generally concerned with unpublished areas of research, conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

FIN 600 Independent Study or Research (*-)

Information Systems

I S 300 Introduction to Information Systems (5) Fundamentals of information systems, what they are, how they affect organizations. Technical and organizational foundations of information systems, building information systems, managing information system resources. Laboratory emphasizes using computer to analyze, coordinate, solve organizational decision-making problems. Prerequisite: ACCTG 225; ECON 200; either MATH 112, MATH 124, MATH 125, MATH 134, MATH 135, or Q SCI 291; either ECON 311, IND E 315, QMETH 201, Q SCI 291, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390; may not be repeated. Offered: AWSpS.

I S 310 Fundamentals of Business Information Technologies (4) Exposure to fundamental programming and scripting concepts, conceptual data modeling, database management, and XML Applying data types and control structures. Continues the concepts of I S 300 of entity-relationship diagrams and record structure diagrams. Database management component includes relational databases, basic SQL, data architecture issues. Prerequisite: I S 300. Offered: AWSp.

I S 320 Fundamentals of Application Programming (4) Fundamental programming concepts including data types, control structures, modularization, and structure programming. Developing solutions for problems in interactive business applications. Introduction to data and file structures. Extensive use of an event-driven programming language. Prerequisite: I S 300, which may be taken concurrently; may not be repeated. Offered: AWSp.

I S 410 Business Data Communications (5) Technology and applications of business data communications including characteristics of data, fundamentals of transmission, communications hardware and software, network configurations (LAN, MAN, WAN), management, and security. Laboratory provides hands-on experience with these applications. Prerequisite: I S 300, which may be taken concurrently; may not be repeated. Offered: AWSp.

I S 445 Database Management (4) Examines the business need for database processing. Discusses database design, development, and administration. Students practice real-world database design and implementation using SQL. Discusses issues related to transaction management, data warehouse, etc. Prerequisite: I S 320, which may be taken concurrently; may not be repeated. Offered: AWSp.

I S 451 Business Data Analytics (4) *Y. TAN* Introduction to business data analytics concepts and techniques, including association rules, classification, cluster analysis, decision trees, logistic regression, text mining, and web analytics. Real-world applications in information systems, supply chain management, and others. Prerequisite: I S 300, OPMGT301 Offered: AWSp.

I S 460 Systems Analysis and Design (4) Analysis and design of business information systems. Concentrates on the analysis phase of systems development. Covers systems development life cycle, feasibility studies, analysis of user requirements, and development of logical system models. Prerequisite: I S 410; I S 445; both of which may be taken concurrently; may not be repeated. Offered: WSp.

I S 461 Systems Implementation (4) Develops business information systems integrating knowledge gained in previous 400-level I S courses. Topics include software project management, system/database design, GUI, software testing, systems implementation/support/maintenance, user training, integrating web, and business environments. Prerequisite: I S 445; I S 460; may not be repeated.

I S 490 Selected Topics in Information Systems (1-6, max. 12) Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: I S 320.

I S 495 Practical Experience in Information Systems (1-4, max. 8) Undergraduate substantive I S internship and mentorship. Internships can be repeated up to two quarters for maximum of 4 credits; grades based on weekly status reports, paper, demonstration of knowledge. Mentorship program (maximum 1 credit/quarter) allows student to be matched with I S executive; grade based on status reports, other participatory events. Offered: AWSpS.

I S 499 Undergraduate Research (1-6, max. 12) Selected problems in information systems and computer applications.

I S 504 Computer-Based Information Systems for Management (3) Introduction to information systems and computer technology. Covers concepts of information use in decision making. Use of decision-support problem-solving tools (e.g., spreadsheet, database software). Management's responsibility in defining, developing, using information systems is focal point.

I S 530 Management of Information Systems Resources (4) Topics include general control problem in organizations; performance evaluation of data processing managers; technology and cost trends; software cost estimation; capacity planning; short term utilization; queuing and associated externalities; issues in centralization and decentralization of the information system facilities. Prerequisite: B A 501 or I S 504 or equivalent.

I S 545 Database Systems and Applications (4) Logical data models, relational database systems, structured query language (SQL), conceptual modeling, database design, Web-connected databases, transaction management, distributed and heterogeneous systems, data

warehousing, data mining, database administration issues. Focuses on the use/management of business data in areas such as finance. Prerequisite: B A 502 or I S 504.

I S 560 Information Systems Development (4) Offers comprehensive look at information systems development. Covers user requirements analysis, logical and physical system models, system implementation and maintenance, project valuation and management. Additional topics include object-oriented approach, systems development in online environments, and financial information systems. Prerequisite: B A 501 or permission of instructor.

I S 570 Business Data Communications and Networking (4) Networking basics, Internet/web-based services, client-server architecture, fundamentals of transmission, networking protocols, physical layer, data-link layer, local-area networks, backbone networks, internetworking devices, metropolitan and wide-area networks, wireless networking, network security, network analysis and management. Combines technical, operational, and management issues in data communications. Prerequisite: B A 502 or I S 504.

I S 579 Selected Topics in Information Systems (2/4, max. 12) Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: B A 501 or I S 504 or permission of instructor.

I S 580 Advanced Research Topics in Information Systems I (4, max. 12) Overview of research problems and techniques in information systems. Focuses on application of microeconomic theories, mathematical, statistical, and operations research methods. Extensive reading and discussion in current and emerging research topics. Prerequisite: doctoral student or permission of instructor.

I S 581 Advanced Research Topics in Information Systems II (4, max. 12) Advanced topics of current interest of faculty in heterogeneous database, temporal database, data warehousing, data uncertainty, active and deductive database systems, database design, and formal database languages. Prerequisite: doctoral student or permission of instructor.

I S 582 Advanced Research Topics in Information Systems III (4, max. 12) Potential topics include information systems design, software engineering, decision support and expert systems, empirical methods, optimal control theory. Prerequisite: I S 580 or doctoral student or permission of instructor.

I S 599 Doctoral Seminar (1, max. 12) Advanced topics of information systems. Generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

I S 600 Independent Study or Research (*-)

International Business

I BUS 300 Introduction to Global Business (4) Prepares students to understand the most important aspects of the international political economy. Emphasis on the important relationships among nations and business and economic institutions that influence students' performances as managers, consumers, and citizens. Prerequisite: ECON 200.

I BUS 330 Global Business Strategy in Emerging Markets (4) Explores challenges and opportunities involved in doing business in emerging and developing markets. Topics include: analysis of foreign economic, cultural and political environments; market entry decisions; competitive strategies; management of risks; roles of technology, trade policy, macroeconomic and exchange rates. Prerequisite: I BUS 300 or JSIS 222; may not be repeated.

I BUS 340 Global Business Strategy in Developed Markets (4) Addresses strategic approaches to challenges and opportunities in developed markets, especially those in Europe and Asia. Topics include: analysis of competition; leveraging competitiveness advantages; analysis of political and regulatory environment; responses to technological change. Prerequisite: I BUS 300 or JSIS 222; may not be repeated.

I BUS 440 Business in Asia (4) Major aspects of the Asian business environment and how Asian enterprises are managed. Problems and opportunities of foreign corporations in Asia. Prerequisite: I BUS 300; may not be repeated.

I BUS 461 Science, Technology, and Innovation Policies in East Asia (5) *I&S Anchor doguy* Role of state and technological change in economic development. Analyzes state and corporate technology policies historically. Basic technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia's rise in world of technology and explores whether conditions for its success will continue. Offered: jointly with JSIS A 472.

I BUS 462 Japanese Business and Technology (5) *I&S Anchor doguy* Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with JSIS A 478.

I BUS 490 Special Topics in International Business (1-6, max. 12) Students and faculty focus on current topics of concern. Offered when faculty, student interest, and availability allow. Prerequisite: I BUS 300.

I BUS 491 CISB Track Seminar (1, max. 9) Students meet with business community leaders to discuss international aspects of their companies. Allows for networking and sharing experiences with other students as well as practicing foreign languages. Credit/no-credit only.

I BUS 495 International Business Internship (1-4, max. 8) An internship with a company, not-for-profit organization, or government agency in an international business capacity. Prerequisite: I BUS 300. Credit/no-credit only.

I BUS 496 Global Business Consulting (4) Offers students opportunity to apply principles, concepts and skills learned previously to a real-life business situation. Projects illustrate issues and choices facing managers operating in a global business environment, such as identification of target markets, choice of market entry strategy, building and managing a global supply chain, importing and exporting processes; working with global partners; and local laws and regulations. Prerequisite: I BUS 300 or JSIS 222; may not be repeated

I BUS 499 Undergraduate Research (1-6, max. 9) Prerequisite: I BUS 300.

I BUS 520 International Trade Policy (4) Examines issues important to trade policy. Topics include trade policy basics, tariffs and non-tariff barriers, safeguards, voluntary restraints, dumping, subsidies and strategic trade theory, agricultural trade, developing country rules, regionalism, and services. Prerequisite: B A 500 or course in international economics, trade, or international finance, or permission of graduate office.

I BUS 530 International Business in Less Developed Countries (4) Understanding the economic, sociocultural, and political environment in the less developed countries. Problems of international trade and investment, north-south relations, commodities, technology transfer, foreign aid, and capital flows. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 540 International Business in Industrialized Countries (4) Understanding the economic, sociocultural, and political environment in developed, industrialized countries. Problems of international trade and payments relations, economic integration, national policies, and supranational organizations' impact on managerial environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 545 Cases in Sustainability (4) *Stearns* Examines components of corporate sustainability- financial, social, and environmental - in cases and articles format. Tackles rigorous global cases using triple bottom line framework. All topics are augmented by executive experts. Students research and critique strategic and executional and intent actions of companies as they face twenty-first century challenges and shareholder demands.

I BUS 550 International Business Consulting (4) Research, analysis, and report on a specific international business project with an existing organization involved with international trade. Possible tasks include identifying most viable foreign target markets, developing best market entry strategies, establishing international terms and conditions of sale, and completing a preliminary marketing or business plan for clients.

I BUS 560 Multinational Business Management (4) Managerial responses to problems of international business organizations and operations. Strategy formulation in an international context; design and control of multinational organization; adaptation of management systems and policies to different economic, sociocultural, and political environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 561 Science, Technology, and Innovation Policies in East Asia (5) *Anchordoguy* Role of state and technological change in economic development. Analyzes state and corporate policies historically. Technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia's rise in world of technology and explores conditions for its successful continuation. Offered: jointly with JSIS A 581.

I BUS 562 Japanese Business and Technology (5) *Anchordoguy* Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with JSIS A 578.

I BUS 570 International Study Tour (2) Educational international study tour. Includes pre-tour and post-tour activities. Prerequisite: B A 502 and permission of Foster School of Business.

I BUS 572 Cross-Cultural Conversations on Contemporary Issues (1, max. 4) Creates opportunities for students from across the globe to share information and perspectives on contemporary issues important to international business. In weekly, facilitated, small-group conversations, students improve their ability to formulate and express ideas and opinions, and practice persuasion and facilitation skills. Credit/no-credit only.

I BUS 575 Business Studies Abroad (*, max. 24) Research and study of foreign business problems in the country or countries where the firms are located. Limited to students who have the approval of their major adviser and a faculty member who has agreed to direct their work in accordance with a definite program of studies. Credit/no-credit only.

I BUS 579 Seminar: Special Topics in International Business (2/4, max. 12) Application of international business principles to the analysis of a specific issue in trade or resource transfer, or to the business conditions in a particular country. Japan and other Pacific Rim countries are frequent topics. Prerequisite: B A 500 or permission of instructor.

I BUS 600 Independent Study or Research (*-)

Management

MGMT 200 Introduction to Law (5) I&S Legal institutions and processes; law as a system of social thought and behavior and a frame of order within which rival claims are resolved and compromised; legal reasoning; law as a process of protecting and facilitating voluntary arrangements in a business society.

MGMT 275 Management Essentials (3) I&S McPherson Explores management and leadership through understanding individuals, teams, and organizations. Discusses relevant concepts and applications of strategic planning, problem solving, conflict management, negotiation, change management, and control systems. Also covers current issues regarding ethical behavior, social responsibility, and diversity. Not open for credit to students pursuing a business degree.

MGMT 300 Leadership and Organizational Behavior (4) Focuses on how managers become effective leaders. Examines basic principles of managing people, making use of theories that transcend the workplace, including the psychology of individual and group behavior. Emphasizes leadership, strategic thinking, team building, and performance.

MGMT 311 Introduction to Strategic Human Resources Management (4) Introduces core human resources management concepts that form the foundation for advanced human resources coursework. Surveys major human resources topics including selection, compensation, performance management/appraisal, and employee governance. Develop skills to design and build human resources management systems that align with organizational strategies and goals.

MGMT 312 Career Development Workshop (2) Develops career goals in business administration and guides students toward the academic training that achieves their goals. Emphasizes development of the personal skills necessary to market oneself in a competitive marketplace and present oneself to potential employers.

MGMT 320 Business, Government, and Society (4) Political, social, and legal environment of business. Critical managerial issues from historical, theoretical, ethical perspectives; their impact on organization. Corporate political power, boards of directors, capitalism, industrial policy, business ethics and social responsibility, alternative corporate roles in society.

MGMT 401 Leadership Development (4) Develops student's unique and effective leadership style/model and provides a framework/plan for leadership development. Covers relevant leadership models and helps create a toolbox of leadership techniques to foster individual development. Topics include: effectively engaging others to enhance motivation and performance, understanding what constitutes an individual model for leading others, providing feedback to develop others, etc.

MGMT 402 Negotiations (4) Develops effective negotiators across a variety of contexts including salary negotiations, price discounts, interpersonal norms, and contracts using experiential exercises and analytic frameworks.

MGMT 403 Developing High Performing Individuals, Teams, and Organizations (4) Introduces evidence-based models for enhancing motivation and performance in organizations. Covers various strategies and methods to facilitate high performing individuals, teams, and organizations. Topics include how to design an effective goal setting program and plan for individuals and teams; designing work and jobs that optimizes individual and team motivation; and issues of current interest.

MGMT 404 Organization Development and Change (4) Using a systems framework and contemporary methods, explores strategies for executing common change initiatives in organizations. Topics may include talent development initiatives, employee engagement interventions, compensation changes, and leadership development, as well as contemporary shifts towards using different types of communication technology initiatives or appreciate inquiry.

MGMT 411 Recruiting, Hiring, and Retaining Talent (4) Addresses strategies to identify, attract, select, and retain employees who contribute to having a competitive advantage in one's team or organization, to help achieve tactical and strategic organizational goals. Explores workforce forecasting, employee sourcing, legal issues, recruiting, and selection. Helps develop critical thinking and analytical skills to evaluate the effectiveness of an organization's selection and evaluation systems. Prerequisite: MGMT 311.

MGMT 412 Performance Management and Compensation (4) Explores major compensation tools (e.g., salary, incentives, and benefits) to solicit desirable employee behaviors, which lead to organization success. Covers how to design a pay and reward system that is both internally fair and externally competitive. Prerequisite: MGMT 311.

MGMT 430 Strategic Management (4) Develops strategic thinking skills for balancing opportunities and risks of business competition to generate superior value for stakeholders. Performs in-depth analyses of industries and competitors, predicts competitive behavior, and explores how firms develop and sustain competitive advantage over time. Prerequisite: FIN 350; MKTG 301; either HRMOB 300 or MGMT 300.

MGMT 440 Business Consulting (4) Integrates knowledge and tools from the undergraduate business core curriculum with a focus on consulting. Students learn theoretical frameworks and develop proficiencies in a wide range of skills. Students gain practical experiences working in teams and assisting local organizations to solving immediate business issues.

MGMT 445 Multicultural Marketing and Business Development (4) DIV Integrates tools from marketing, consulting, and multi-cultural business management to provide consulting services to small business in economically-distressed communities. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301. Offered: jointly with MKTG 445.

MGMT 490 Special Topics in Management (1-6, max. 12) Topics of current interest to faculty and students. Offered when allowed by faculty availability and sufficient student interest. Content announced in advance of scheduled offerings.

MGMT 495 Management Internship (1-4, max. 8) Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of management concepts learned in classroom. Prerequisite: MGMT 300. Credit/no-credit only. Offered: AWSpS.

MGMT 499 Undergraduate Research (1-6, max. 9) Independent research in selected areas of human resource management, organizational behavior, and business strategy under faculty supervision. Prerequisite: MGMT 300; MGMT 320.

MGMT 500 Management and Leadership (4) Behavioral aspects of management with emphasis on leadership, motivation, and decision making. May include communication, conflict management, group dynamics, and organizational change.

MGMT 501 Leading Teams and Organizations (4) Offers a practical framework and empirically validated models and methods that can be used in innovative ways to enhance human capital and its impact, including of course your own capital. Offered: A.

MGMT 502 Business Strategy (4) Policy decisions and strategic leadership from the general management point of view. Determination of corporate product-service objectives, development of a network of internal operating policies and methods to achieve objectives at a cost satisfactory to the consumer and to society. Prerequisite: all first-year required courses in MBA curriculum.

MGMT 504 Ethical Leadership (4) Examines the ethical aspects of conducting business. Topics include ethical decision-making, the ethical aspects of leadership and culture, stakeholder management, corporate social responsibility, sustainability, and corporate governance. Prerequisite: first-year MBA required courses. Offered: W.

MGMT 509 Global Strategy (2) Develops a broad overview of many of the issues that global managers face including government-MNE relations, global strategy, entry modes, country analysis, national culture, and the social responsibility of a global enterprise. Prerequisite: permission of School of Business Administration.

MGMT 510 Developing Leadership Skills ([0-2]-, max. 2) Assessment, instruction, and coaching to develop leadership abilities. Emphasizes team building and collaboration, written, oral, and interpersonal communication, and applied leadership activities.

MGMT 511 Leadership and Coaching Practicum (2, max. 4) Gives Leadership Fellows a venue to analyze and assess their coaching activities with first-year MBA student teams, receive feedback from the instructor and their fellow coaches, discuss readings on leadership, coaching, collaboration, and communication, and hear guest speakers on related topics. Credit/no-credit only.

MGMT 520 Designing a Corporate Strategy (4) Addresses the broad question: what business(es) should we compete in? Focuses on decisions related to an appropriate level of diversification and the means by which that diversification is implemented. Includes the following issues: mergers and acquisitions, strategic alliances, joint ventures, LBOs, and spin-offs.

MGMT 521 Strategic Management of Technology and Innovation (4) Examines how innovative firms often experience rapid and disruptive levels of growth and change and how without effective management of new technologies, the boom can quickly turn to bust. Investigates the micro-economic drivers of competition in technology industries, explores how technological change affects competition, and examines the implications for competitive strategy.

MGMT 522 Innovation Strategy (4) Explores how firms tap into external sources of innovation, focusing on user communities, universities, and entrepreneurial ventures.

Demonstrates how open, collaborative, community-based models of innovation create successful business options. Offered: jointly with ENTRE 522.

MGMT 530 Global Strategy (2) *H. Steensma* Provides a broad overview of many of the issues that managers face including globalization trends, government-multinational firm relations, country risk, entry modes, cross-border collaborative challenges, and various strategies and organizational structures. Offered: W.

MGMT 545 Leading and Managing High-Performance Organizations (4) Focuses on the nature and function of effective leadership in high-performance systems. Includes visionary and transformational leadership, decision-making and empowerment, power and influence in organizations desiring flexibility and innovation, and leading organizational change. Places emphasis on leadership of emerging forms of organization such as learning organizations, virtual organizations, and networks.

MGMT 546 High Involvement Employees (4) Focuses on two domains: (1) how managers can lead and motivate their people; and (2) how actual organizations, particularly high technology and entrepreneurial firms, employ these strategies. Specific topics include commitment, involvement, enthusiasm, effort, participation, citizenship, and performance. Student teams investigate how local companies utilize these ideas.

MGMT 547 Successful Negotiations (2) Focuses on a broad array of conflict resolution skills needed for effective management in a constantly changing business environment. Examines methods of conflict resolution - bargaining, distributive and integrative negotiation, mediation, and arbitration. Applies these tools to managerial challenges such as employment contracts, buyer-seller agreements, and mediated and arbitrated agreements.

MGMT 548 Dealmaking in High Velocity Ventures (2) Focuses on negotiations in ventures that lack conventional customers, suppliers, employees, joint-venture partners, strategic allies, and money. Analyzes negotiations with early potential customers and essential suppliers, sources of funding (e.g., "angels" and venture capitalists), critical partners and/or strategic allies (including established firms), and key employees.

MGMT 549 Dealmaking in the Global Arena (2) For students who expect to engage in significant international business negotiations. Includes deal-structuring skills needed in a range of cross-border transactions and relationships. Individual segments develop broad analytical themes, cross-cultural dimensions, and distinctive national approaches to corporate governance and their impact on negotiating strategy. Prerequisite: MGMT 547.

MGMT 550 CEO and Board Governance (4) Prepares students both to be effective board members and to work productively with board members as executives. Focuses on board effectiveness in creating value in oversight and strategic leadership within organizations regardless of size and form of business.

MGMT 555 Nonprofit Board Fellows Leadership Seminar ([1-2]-, max. 4) Assists students participating in the Board Fellows Program to maximize their service to their assigned

organizations by examining the fundamental responsibilities of board members and the challenges faced by board members; ways boards shape the organization's strategic direction; ways board members can strengthen their organizations' financial management and stability; and the strengths and limitations of various board governance structures.

MGMT 579 Special Topics in Management (2/4, max. 12) In-depth study and research on topics of special interest to faculty members and students in the fields of human resources management, organizational behavior, and strategic management. Offered on an ad hoc basis. Content announced before scheduled offering.

MGMT 580 Psychological Foundations of Organizational Behavior (4) Focuses on attributes the individual brings to the organization. Covers important performance-related processes such as learning, motivation, and decision-making as well as an understanding of personal attitudes and personality traits.

MGMT 581 Social Processes in Organizations (4) Focuses on ways in which the individual and the organization get things done through working with others. Includes leadership, social influence, and the use and abuse of power, with attention given to positive organizational activities such as citizenship behavior and extra role activities.

MGMT 582 Contemporary Organizational Behavior Research (4) Facilitates understanding of empirical foundations of theory development and testing in contemporary organizational behavior research. Focuses on assessing ways in which the empirical tradition has evolved in organizational behavior with special attention paid to emerging research areas and research methodologies.

MGMT 583 Special Topics in Organizational Behavior Research I (4) Focuses on the psychological, social psychological, and sociological factors that shape organizations and their members. Covers concepts such as cognition, emotions, identity, communication, group dynamics, team development, organizational culture, global culture, behavioral ethics, etc.

MGMT 584 Special Topics in Organizational Behavior Research II (4) Focuses on the psychological, social psychological, and sociological factors that shape organizations and their members. Covers concepts such as cognition, emotions, identity, communication, group dynamics, team development, organizational culture, global culture, behavioral ethics, etc. in more depth.

MGMT 590 Economic Foundations of Strategic Management (4) Reviews the economic theories that support strategies pursued by firms and explores the links between market processes, firm strategy, and firm performance. Topics include agency theory, transaction cost economics, resource dependence, population ecology, and neo-Austrian economics.

MGMT 591 Sociological Foundations of Strategic Management (4) Explores the sociology of organizations from multiple perspectives while introducing fundamental sociological questions and preparing students for conducting research in organizations. Emphasis on structural contingencies, institutions, resource dependence, population ecology, negotiated order and

culture, organizational learning and decision making, organizational power and politics, networks, and inter-organizational relations.

MGMT 592 Contemporary Strategic Management Research (4) Facilitates understanding of empirical foundations of theory development and testing in contemporary strategic management research. Focuses on evaluation of ways in which the empirical tradition has evolved in the strategic management area. Attention to evaluating research methodologies used in the field.

MGMT 593 Special Topics in Strategic Management I (4)

MGMT 594 Special Topics in Strategic Management II (4) Focuses on the social and political factors that help shape corporate strategy using stakeholder management as an integrating concept. Topics include corporate governance, corporate political activity, governmental regulation, comparative political economy, and normative aspects of strategic management, including ethics and corporate social responsibility.

MGMT 599 Doctoral Seminar in Management (1, max. 12) Advanced topics in the fields of human resources management and organizational behavior. May be used by visiting faculty members to present topics of interest to students.

MGMT 600 Independent Study or Research (*-)

Marketing

MKTG 275 Marketing Essentials (3) I&S Beard Explores marketing principles and their usefulness in diverse business and organizational settings. Discusses controllable and uncontrollable factors in making marketing decisions, and the implications of product life cycle for decision-making. Develops working knowledge of marketing strategy. Not open for credit to students pursuing a Business degree.

MKTG 301 Marketing Concepts (4) Tools, factors, and concepts used by management in planning, establishing policies, and solving marketing problems. Marketing concepts, consumer demand and behavior, location analysis, marketing, functions, institutions, channels, prices, and public policy. Prerequisite: ECON 200.

MKTG 335 Principles of Selling (4) Focuses on selling from salesperson's perspective, role of persuasion in professional selling and other organizational settings. In addition to coursework in such areas as consumer behavior, negotiation, and communication, students practice sales skills in role plays, presentations, and other exercises requiring practical application of selling theory. Prerequisite: MKTG 301.

MKTG 370 Retailing (4) Profit planning and business control; buying, stock control, pricing, promotion; store location, layout, organization, policies, systems; coordination of store activities. Prerequisite: MKTG 301; may not be repeated.

MKTG 411 Business to Business Marketing (4) Covers the integrated marketing approach that enables a supplier firm to understand, create, and deliver value to other businesses, governments, and institutional customers. Case-based and project-oriented approach to studying marketing management in the business-to-business market that brings the fundamental concepts to life with practical example. Prerequisite: MKTG 301. Instructors: Caldieraro

MKTG 415 Pricing Strategy and Value Management (4) Examines theoretical and applied perspectives in pricing strategy and tactics. Explores how firms optimally create, communicate, and capture value to achieve organizational objectives. Provides students with a rigorous foundation for pricing decisions and profitable customer solutions. Prerequisite: MKTG 301.

MKTG 430 Sales Force Management (4) Focuses on the role of the sales manager within the organization. Includes distribution planning, sales organization, management of the sales force, methods of sales, cost and financial analysis, and performance analysis. Prerequisite: MKTG 301; may not be repeated.

MKTG 445 Multicultural Marketing and Business Development (4) DIV Integrates tools from marketing, consulting, and multi-cultural business management to provide consulting services to small business in economically-distressed communities. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301. Offered: jointly with MGMT 445.

MKTG 450 Consumer Behavior (4) Theory and practice pertinent to marketing decisions; utilization of theories from behavioral sciences in marketing research; theories of fashion, characteristics of goods, shopping behavior, product differentiation, market segmentation, and opinion leadership; application of concepts to management of advertising, personal selling, pricing, and channels of distribution. Prerequisite: MKTG 301; may not be repeated.

MKTG 452 Consumer Marketing and Brand Strategy (4) Presents a consumer psychology inspired framework for cultivating and maximizing brand equity. Specific emphasis on brand positioning, visual identity design, brand association creation, and brand portfolio management. Greater attention to consumer-facing brands, but B2B brands will also be discussed. Prerequisite: MKTG 301. Instructors: Forehand

MKTG 454 Strategic Product Management (4) Focuses on best practices in new product development including customer-centric innovation, market identification, prototype development, value proposition communication, testing tactics and launch strategy. Prerequisite: MKTG 301; may not be repeated.

MKTG 455 Entrepreneurial Marketing (4) Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: MKTG 301; may not be repeated. Offered: jointly with ENTRE 455.

MKTG 456 Advertising (4) Management of the advertising function and its integration with other forms of promotion. Planning the program, determining the most effective approach, evaluation of media and budget, advertising research, advertising institutions, economic and social aspects. Prerequisite: MKTG 301; may not be repeated.

MKTG 460 Marketing Research (4) Examines marketing research process; steps of research design, questionnaire construction, sampling, data analysis, evaluation/presentation of findings, online research, and web surveys. Class project provides practical application. Prerequisite: MKTG 301; either ECON 311, QMETH 201, STAT 220, CS&SS 221/SOC 221/STAT 221, STAT 301, STAT 311, or MATH 390/STAT 390; may not be repeated.

MKTG 462 Customer Analytics (4) Focuses on how to use existing customer data to develop marketing strategies that improve customer response. The featured analytics translate customer data into inferred customer needs that can guide marketing decisions on pricing, advertising, and product recommendations. Prerequisite: MKTG 301.

MKTG 464 Analytics for Marketing Decisions (4) *H. YOGANARASIMHAN* Focuses on how firms can use real large scale databases and analytics to improve and automate firm-level marketing decisions. Consists of five modules - product design analytics, analytics for large-scale field experiments, advertising analytics, digital analytics, and mobile analytics. Prerequisite: MKTG 301.

MKTG 466 Digital Marketing (4) *S. SAYEDI ROSH KHAR* Provides a quantitative analysis of the digital marketing landscape on topics such as online advertising, social media, growth strategies and search engine optimization. Explores data-driven methods to evaluate digital opportunities, marketing strategies, and online business models. Prerequisite: MKTG 301.

MKTG 470 International Marketing (4) Focuses on assessing international marketing opportunities, formulating and implementing international marketing strategies. Examines how to use marketing analyses and deductive decision modeling in assessing international marketing opportunities. Uses marketing tools and concepts in the planning, preparation, and presentation and discussion of cases and class project. Prerequisite: MKTG 301; may not be repeated.

MKTG 485 Strategic Market Management (4) Strategically analyzes important marketing issues by combining basic models of marketing with powerful spreadsheet analysis. Case discussions and projects provide valuable application exercises. Prerequisite: MKTG 301.

MKTG 490 Special Topics and Issues in Marketing (1-6, max. 12) Contemporary topics and issues in marketing: marketing in nonprofit organizations, marketing of services, marketing in the public sector, and marketing in an economy of scarcity. Ordinarily only one topic area is addressed in any one quarter. Course content reflects contemporary developments and the current interests of instructors and students. Prerequisite: MKTG 301.

MKTG 495 Marketing Internship (1-4, max. 8) An internship with a company, not for profit organization, or government agency in a marketing capacity. Prerequisite: MKTG 301. Credit/no-credit only.

MKTG 496 Marketing Practicum (4) Offers opportunities to apply principles, concepts, and skills learned previously to actual business situations. Participation in class part-time and in an internship with a business employer part-time. Prerequisite: MKTG 301. Instructors: Rhodes

MKTG 499 Undergraduate Research (1-6, max. 9) Prerequisite: MKTG 301.

MKTG 501 Marketing Management (4) Analysis and management of customer satisfaction in goods and services markets by profit and nonprofit organizations. Buyer behavior, market segmentation and product positioning, product policy, pricing, distribution, sales force and advertising management, and market research in the contexts of strategy development, decision making, implementation, and control.

MKTG 505 Marketing Strategy (4) Focuses on the role of analytical marketing tools and competitive dynamics in strategy formation. Accentuates the integrative nature of marketing strategy through development of a strategic marketing plan and use of simulation software. Prerequisite: MBA core marketing.

MKTG 511 Business-to-Business Marketing (4) Integrated approach to product marketing management in the business-to-business marketplace. Analysis of core competencies, competitive environment, positioning and segmentation strategies, cost structure, and customer satisfaction. Case-based and project-oriented approach to studying marketing management in the business-to-business market. Prerequisite: MBA core marketing or permission of instructor.

MKTG 515 Strategic Pricing and Value Management (4) *J. SHULMAN* Examines theoretical and applied perspectives in pricing strategy and tactics. Explores how firms optimally create, communicate, and capture value to achieve organizational objectives. Provides students with a rigorous foundation for pricing decisions and profitable customer solutions. Prerequisite: B A 500 or MKTG 501.

MKTG 518 Strategic Marketing Management (4) *D. Turner* Designed to enable students to become better marketing decision makers, i.e., one who can recommend specific marketing actions that have a higher probability of achieving organizational goals by using a decision process that consumes fewer organizational resources. Offered: W.

MKTG 520 Marketing Channels (4) Channels of distribution decisions for goods and services in profit and nonprofit organizations. Considers methods of optimizing the number, quality of institutions and activities employed in dealing with exchange, and space and time aspects of channel management. Relates management of marketing channels to marketing mix, organizational objectives. Prerequisite: MBA core marketing.

MKTG 530 Managing the Sales System (4) Examines the revenue generation function of a firm from a system-wide perspective. Topics include strategic and tactical considerations related to customer acquisition and retention, end-to-end sales and support operations, strategic partnerships, and continuous performance monitoring. Emphasis on case studies and team projects. Prerequisite: MBA core marketing.

MKTG 550 Managing Customer Relationships through Direct Marketing (4) Management of customer relationships through the lens of direct marketing. Topics include direct marketing creative activity, strategy, and execution; media and segmentation; direct marketing budgeting and financials; targeting, database, and predictive modeling; catalogue marketing; relationship marketing; business-to-business complex sales; privacy. Prerequisite: MBA core marketing.

MKTG 552 Consumer Marketing and Brand Strategy (4) *M. FOREHAND* Presents a consumer psychology inspired framework for cultivating and maximizing brand equity. Specific emphasis on brand positioning, visual identity design, brand association creation, and brand portfolio management. Greater attention to consumer-facing brands, but B2B brands will also be discussed. Prerequisite: B A 500 or MKTG 501.

MKTG 554 Strategic Product Management (4) *A. BORAH* Focuses on best practices in new product development including customer-centric innovation, market identification, prototype development, value proposition communication, testing tactics and launch strategy. Prerequisite: B A 500 or MKTG 501.

MKTG 555 Entrepreneurial Marketing (4) Examines the skills and tools entrepreneurs need for bootstrap or guerilla early-stage companies. Covers how to target market segments, position products, estimate demand, set prices, gain access to channels, and manage issues of rapid growth. Prerequisite: B A 501, MKGT 501 or equivalent. Offered: jointly with ENTRE 555.

MKTG 556 Advertising and Promotion Management (4) Management of advertising and promotional activities and their integration with other elements of the marketing mix. Topics include: understanding the communication process, analyzing markets, working with suppliers, establishing objectives, determining budgets, selecting media, measuring and evaluating effectiveness, using publicity and promotions. Legal, social, and economic consequences are considered. Prerequisite: MBA core marketing.

MKTG 560 Research for Marketing Decisions (4) Methods and applications of marketing research to solve marketing problems. Deals with: problem definition, research design, questionnaire construction, sampling, and data analysis using SPSS. Introduces promising new developments in online research, web surveys, and data analysis. Class research project provides practical application. Prerequisite: MBA core marketing.

MKTG 562 Customer Analytics (4) *O. RUTZ* Focuses on how to use existing customer data to develop marketing strategies that improve customer response. The featured analytics translate customer data into inferred customer needs that can guide marketing decisions on pricing, advertising, and product recommendations. Prerequisite: B A 500 or MKTG 501.

MKTG 564 Analytics for Marketing Decisions (4) *H. Yoganarasimhan* Focuses on how firms can use real large scale databases and analytics to improve and automate firm-level marketing decisions. Consists of four key modules - Product design analytics, Pricing analytics, Promotion and advertising analytics, Placement analytics (with focus on digital and mobile channels). Prerequisite: B A 500 or MKTG 501

MKTG 566 Digital Marketing (4) *S. FASSER, S. SAYEDI ROSH KHAR* Provides a quantitative analytics of the digital marketing landscape on topics such as online advertising, social media, growth strategies and search engine optimization. Explores data-driven methods to evaluate digital opportunities, marketing strategies, and online business models. Prerequisite: B A 500 or MKTG 501.

MKTG 570 International Marketing (4) Analysis of the marketing strategies and tactics of multinational corporations. Choice of entry strategies for foreign markets, analyzing international competition at home and abroad, and developing global marketing strategies. Prerequisite: MBA core marketing.

MKTG 575 Marketing High-Technology Products (4) Management of the marketing requirements of high-technology products. Examines how markets for high-tech products involve shortened product life cycles, demand for continual product updates, perceived risk of adoption by customers, requirements for intensive customer service and relationships, and growing reliance on business partners. Prerequisite: MBA core marketing.

MKTG 579 Special Topics in Marketing (2/4, max. 12) Marketing topics of current concern to faculty and students. Offered only when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings. Prerequisite: MBA core marketing.

MKTG 581 Doctoral Seminar in Consumer Behavior (4) Survey of the field of consumer behavior introduces fundamental topics in consumer behavior including cognitive processes, emotion, and consumer satisfaction. Provides exposure to a variety of research methods including experiments, surveys, and phenomenological research.

MKTG 582 Doctoral Seminar in Multivariate Analysis for Marketing Research (4) Survey of methods useful for empirical evaluation of multivariate marketing phenomena and relationships. Includes an overview of measurement theory and practice; multidimensional scaling; conjoint analysis; cluster, factor, and discriminant analyses; multivariate analysis of variance; structural equation modeling; and other methods commonly encountered in academic marketing research.

MKTG 583 Doctoral Seminar in Marketing Strategy (4) Study of factors influencing business performance and role of marketing in achieving competitive advantage. Analysis of prevailing, and emerging, theories underlying strategic thinking and competitive process. Examination of empirical research regarding measurement, level, and persistence of business success and implications of findings for theory and strategy development. Prerequisite: BA RM 580.

MKTG 584 Doctoral Seminar in Research Issues in Marketing (2/4, max. 12) Examination of research problems and issues in marketing. Specific topics vary depending on the interest of faculty and students.

MKTG 591 Doctoral Seminar in Consumer Behavior Research Topics (4) Investigates research topics of current interest in consumer behavior. Considers the processes used by

consumers to acquire and evaluate marketing information including advertising, publicity, word of mouth, packaging, product description, price, and retail outlets, and examines ways the principles in social perception influence consumers' individual responses to marketing-related activities.

MKTG 593 Doctoral Seminar in Marketing Models (4) Focuses on modeling research efforts in various areas of marketing. Discussion of mathematical and statistical modeling approaches which contribute to scientific development in the marketing area and ways in which modeling is used to characterize and summarize the nature of general marketing situations in complex environments.

MKTG 599 Doctoral Seminar in Marketing (1, max. 12) Study and research in advanced topics of marketing. The seminar is generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

MKTG 600 Independent Study or Research (*-)

Operations Management

OPMGT 301 Principles of Operations Management (4) Examines problems encountered in planning, operating, and controlling production of goods and services. Topics include: waiting-line management, quality assurance, production systems, project management, and inventory management. Computer and quantitative models used in formulating managerial problems. Prerequisite: ACCTG 225; ECON 200; either MATH 112, MATH 124, MATH125, MATH 134, or Q SCI 291; either ECON 311, IND E 315, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 301, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390.

OPMGT 402 Introduction to Logistics (4) Logistics studies of the efficient delivery of goods and services. A total-cost approach recognizes this involves not only the obvious vehicle-routing issues but also shipment size and mix, warehouse location, product design, and customer services. Includes study of real companies' logistics problems. Prerequisite: OPMGT 301.

OPMGT 443 Inventory and Supply Chain Management (4) Examines modeling and analysis of global supply chains in order to improve service and decrease cost. Covers tools and methods for managing inventory of items with different demand and supply characteristics. Topics include forecasting, Just-in-Time production, deterministic and stochastic inventory models, Materials Requirements Planning; and supplier management. Prerequisite: OPMGT 301.

OPMGT 450 Introduction to Project Management (4) Focuses on management principles, methods, and tools to effectively plan and implement complex projects. Includes project selection, preparation, planning, and monitoring. Covers classical techniques and new methodologies; spreadsheet-based tools; and probabilistic project simulation from strategic, tactical, and operational perspectives. Prerequisite: OPMGT 301.

OPMGT 490 Special Topics in Operations Management (1-6, max. 12) Operations management topics of current concern to faculty and students. Potential topics: logistics

management, project scheduling, manufacturing strategy, site and location analysis, management of service operations. Prerequisite: OPMGT 301.

OPMGT 495 Operations Management Internship (1-4, max. 8) Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of analysis techniques and management concepts learned in classroom. Prerequisite: OPMGT 301. Credit/no-credit only.

OPMGT 499 Undergraduate Research (1-6, max. 9)

OPMGT 502 Introduction to Operations Management (3) Managerial decision making in operations problems, including application of quantitative analysis and use of computers. Production of goods or services in any type of organization. Inventory management, scheduling, facility location, management of service systems, and quality assurance. Prerequisite: QMETH 500.

OPMGT 520 Operations Management (4) *H. Mamani* In this course, important concepts and the state of the art analytical techniques essential for managing the operations of any organization, especially hi-tech companies, are covered. In particular, topics such as process management, capacity and waiting lines management and inventory and supply chain management are introduced. Offered: Sp.

OPMGT 550 Project Management (4) Management of complex projects, and tools and techniques (e.g., CPM and PERT) developed to aid the planning, scheduling, and control of projects. Includes work breakdown structures, precedence networks, Gantt charts, resource leveling and allocation, and the use of microcomputer programs. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 560 Supply Chain Management (4) This course focuses on efficient integration of suppliers, factories, warehouses and stores so that merchandise is produced and distributed in the right quantities, to the right locations and at the right time. The course objectives are to develop modeling skills and provide concepts applicable to the design, planning of supply chains. Offered: W.

OPMGT 565 Business Analytics-Tools for Big Data (4) *H. Mamani, M. Wagner* Introduces data analytic techniques via quantitative tools and sophisticated software (R and Tableau). These techniques are drawn from machine learning, data mining, and optimization. Note that this is not a technical or theoretical course. Offered: A.

OPMGT 570 Operations Strategy (4) Strategic management of operations and manufacturing in domestic and international companies. Developing and implementing a coherent strategy based on continuous improvement of quality, productivity, products, processes, and customer services. Facilities, capacity, process/work-force planning, organization, people, systems integration, coordination between operations, marketing, engineering, and R&D. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 579 Special Topics in Operations Management (2/4, max. 12) Major topics in operations management and systems analysis. Emphasis on research and, where appropriate, application of quantitative analysis and computers. Topics vary, including workforce planning, project management, research and development management, quality assurance, technology planning and forecasting, systems analysis of complex organizations, and urban systems analysis. Prerequisite: B A 502, OPGMT 502, or equivalent.

OPMGT 581 Advanced Research Topics in Operations Management I (4) Overview of research problems and techniques in operations management. Focuses on emerging and ongoing research relating to current issues in the field, including readings and discussions of literature dealing with subjects of special interest to participants. Prerequisite: doctoral student or permission of instructor. Instructors: Wagner Offered: A.

OPMGT 582 Advanced Research Topics in Operations Management II (4) Overview of research problems and techniques in operations management. Focuses on emerging and ongoing research (beyond those discussed in OPGMT 581) relating to current issues in the field, including readings and discussions of literature dealing with subjects of special interest to participants. Prerequisite: doctoral student or permission of instructor. Instructors: Moinszadeh Offered: W.

OPMGT 583 Advanced Research Topics in Operations Management III (4) Examine interdisciplinary research in operations and supply chain management. Focuses on one specific application area of interest each quarter including: healthcare, sustainability, marketing, game theory, economics, etc. Prerequisite: doctoral student or permission of instructor. Instructors: Mamani Offered: Sp.

OPMGT 584 Fundamentals of Operations Management Research (4) Surveys basic areas that form the foundations for much of the research in operations management today. Topic areas include facility location, scheduling, project management, and supply chain management. Prerequisite: QMETH 580. Instructors: Klastorin Offered: W.

OPMGT 587 Advanced Topics in Inventory Management (4) Survey of literature in inventory/production control with emphasis on current research. Topics include single-echelon deterministic and probabilistic models and multi-echelon stochastic models. Prerequisite: QMETH 592 and course in probability theory and in stochastic processes.

OPMGT 590 Stochastic Models for Research in Business Management (4) *F. IRAVANI* Covers the foundation and applications of stochastic models used in business and management research. Prerequisite: doctoral student or permission of instructor. Offered: A.

OPMGT 599 Doctoral Seminar in Operations Management (1, max. 12) Study and research in advanced topics of operations management. Concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

OPMGT 600 Independent Study or Research (*-)

Quantitative Methods

QMETH 201 Introduction to Statistical Methods (4) NW, QSR Survey of principles of data analysis and their applications for management problems. Elementary techniques of classification, summarization, and visual display of data. Applications of probability models for inference and decision making are illustrated through examples. Prerequisite: either MATH 112, MATH 124, MATH 125, MATH 134, or MATH 145.

QMETH 450 Spreadsheet Models for Managerial Decision Making (4) Formulation and solution of business problems using operations research techniques in a spreadsheet environment. Techniques of linear and integer programming, decision analysis, network optimization, queuing, and simulation. Applications from marketing, finance, and operations. Prerequisite: I S 300.

QMETH 490 Special Problems in Quantitative Analysis (1-6, max. 12) Specialized quantitative techniques useful for solving business problems. Topics from operation research, statistics, computer methods. Emphasis on application. Prerequisite: either ECON 311, QMETH 201, PSYCH 213, PSYCH 218, STAT 220, STAT 301, STAT 311, or STAT 390.

QMETH 499 Undergraduate Research (1-6, max. 9) Research in selected problems in business statistics, operations research, decision theory, and computer applications.

QMETH 500 Statistical Data Analysis for Management (4) Statistical models, techniques, and tools for aiding management decisions. Use of spreadsheets in basic business problems. Probability distributions, random sampling and standard errors, hypothesis testing, multiple regression, ANOVA, chi-square tests. Prerequisite: preparation in elementary calculus and successful completion of University-administered proficiency exam.

QMETH 501 Decision Support Models (2) Introduction to computer-based modeling techniques for management decision making. Linear programming, decision analysis, and simulation. Formulation and interpretation. Prerequisite: QMETH 500, B A 500, or equivalent.

QMETH 503 Practical Methods for Data Analysis (4) Basic exploratory data analysis with business examples. Data summaries, multivariate data, time series, multiway tables. Techniques include graphical display, transformation, outlier identification, cluster analysis, smoothing, regression, robustness. Departmental credit allowed for only one of 403 and 503. Prerequisite: B A 500 or QMETH 500 or equivalent or permission of instructor. Offered: jointly with STAT 503.

QMETH 505 Decision Modeling (2) I. Sirichakwal Introduces students to the concepts and methods of management science, which applies to mathematical modeling and analysis to management problems. Offered: Sp.

QMETH 510 Data Analysis (2) Covers statistics and probability relevant to the collection, analysis, and interpretation of data, and deals with uncertainty in the decision-making process. Offered: A.

QMETH 520 Managerial Applications of Regression Models (4) Data exploration and inference using regression models for business forecasting and management. Models include simple, multiple, logistic, and nonlinear regression, use of dummy variables, transformations, variable selection, and diagnostics. Prerequisite: QMETH 500 or B A 500.

QMETH 528 Survey Sampling Applications (4) Introduction to design and implementation of sample surveys with emphasis on business applications. Simple random, stratified, cluster, multistage sample methods. Probability sampling, optimal allocation of sampling units. Mail, telephone, interview methods. Estimation methods, Questionnaire design. Non-response. Prerequisite: QMETH 500 or B A 500 or equivalent or permission of instructor.

QMETH 530 Forecasting Models in Business (4) Introduction to time series analysis and forecasting. Topics include seasonal adjustment, decomposition, exponential smoothing, moving average, and autoregression as well as model identification, estimation, diagnostics, and adaptive forecasting illustrations using real data. Prerequisite: QMETH 500 or B A 500.

QMETH 551 Modeling with Spreadsheets (4) Advanced formulation and modeling of business problems in a spreadsheet environment. Techniques of linear, integer, and nonlinear programming, multi-objective goal programming, and simulation. Applications from finance, marketing, and operations. Prerequisite: B A 502 or QMETH 501 or equivalent.

QMETH 579 Special Topics in Quantitative Methods (2-4, max. 12) Presentation of topics of current concern to students and faculty in operations research and applied business statistics. Potential topics include applications and extensions of mathematical programming, stochastic processes, discrete programming, networks models, and the application of statistical techniques.

QMETH 580 Mathematical Programming (4) Advanced survey of mathematical programming with applications to business problems. Includes linear, integer, stochastic, nonlinear, and dynamic programming and network optimization. Treatment includes formulation, optimality conditions, duality theory, solution algorithms. Applications to production, scheduling, marketing, finance, and equipment replacement. Prerequisite: B A 501 or equivalent and doctoral student or permission of instructor.

QMETH 592 Stochastic Models: Queuing and Simulation (4) Application of stochastic processes to business problems. Focuses on development and application of queuing theory and discrete event simulation. Prerequisite: OPMGT 590 or permission of instructor.

QMETH 599 Doctoral Seminar in Operations Research (1, max. 12) Study and research in advanced topics of operations research. Concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status. Credit/no-credit only.

QMETH 600 Independent Study or Research (*-)

Supply Chain Management

SCM 500 Finance and Accounting for Supply Chain Management (3) Covers concepts and tools needed to understand, apply, and explain finance and accounting information for managerial decisions and performance evaluation. Offered: S.

SCM 501 Probability and Statistics (3) Covers statistical tools, techniques, and models for aiding management decisions. Use of spreadsheets in basic business problems. Frequency and probability distributions, random sampling and standard errors, testing hypotheses, ANOVA, multiple regression models, and logistic regression models. Offered: S.

SCM 502 Negotiations for Supply Chain Management (2) Develops negotiation techniques and skills applicable to solving supply chain problems. Offered: S.

SCM 503 Leadership for Supply Chain Managers (2) Assesses and develops written and oral communication, interpersonal and leadership skills needed to succeed in the cross-functional and cross-cultural team environment common in a global supply chain environment. Offered: S.

SCM 510 Marketing Strategy and Channel Management (3) Covers analysis and decision-making in management of exchange processes with customers. Analysis of market forces and choice of marketing strategy, objectives, and marketing mix variables. Offered: A.

SCM 511 Strategic Sourcing and Procurement (2) Discusses strategic sourcing and procurement in supply chains. Covers topics such as total cost of ownership, outsourcing, E-Sourcing/auctions, spend analytics, supply contracts and supplier scorecard. Offered: A.

SCM 512 Spreadsheet Modeling for Business Enterprise (2) *M. HILLIER* Introduces formulation and modeling of business problems in a spreadsheet environment. Includes linear programming, integer programming, sensitivity analysis, decision analysis, and Monte Carlo simulation. Prerequisite: SCM 501 or equivalent. Offered: A.

SCM 513 Operations Management and Process Analysis (2) Introduces operations management, which focuses on efficient operations and on time delivery of goods and services. Covers topics such as process management and analysis, process flow charting, bottleneck identification, flow balancing, push vs. pull systems, theory of constraints, queue psychology and queue layout and queue analysis. Prerequisite: SCM 501. Offered: A.

SCM 520 Forecasting, Inventory Management, and Supply Chain Analytics (3) Introduces forecasting methods, deterministic and stochastic inventory models, lot-sizing and MRP, JIT, design for logistics, bull-whip effect and other contemporary topics in supply chain. Prerequisite: SCM 511; SFM 512; SCM 513. Offered: W.

SCM 521 Managing Supply Chain Projects (3) Examines the management of complex projects. Specific topics include project teams, project selection, scheduling and budgeting, risk management, and monitoring and control. Also discusses PM software products, and

relationships between these products and the requirements of managing risky projects in today's economic environment. Offered: W.

SCM 522 Lean Management, Total Quality, and Six Sigma (2) Describes the basic principles, tools, and methods of Lean and Six Sigma. Discusses their implementation in variety of settings and shows how to apply them in real supply chains. Topics include seven wastes, value stream mapping, DMAIC, and reengineering. Offered: W.

SCM 523 Competitive Strategy (2) Develops student's ability to think as practicing executives; and provides practice in analyzing, evaluating, and modifying organizations' strategies in light of changing macro-economic conditions. Emphasizes highlighting the interplay between competitive strategy and supply chain management concepts. Offered: W.

SCM 530 Managing and Mining Big Data (3) Explores issues related to managing and mining business big data. Topics include data storage, visualization, clustering analysis, supervised learning techniques, text and web mining, and mining networked data. Real-world applications in supply chain management. Offered: Sp.

SCM 531 Enterprise Systems and Integration (2) Provides an overall understanding of the complex role of information systems in transforming organizational processes and integrating them as part of an enterprise system. Topics include the concept of process-enabling information technologies and enterprise resource planning systems that support chain management processes. Offered: Sp.

SCM 532 Global Supply Chain Logistics (3) Examines the designing and managing complex global supply chains. Specific topics include global SC design, logistics and sourcing, supply chain inventory models, postponement, supply integration, and contracts. Discusses the interrelation between supply chain management and product design. Offered: Sp.

SCM 533 Special Topics in Supply Chain Management (2) Reviews current topics of supply chain management such as forming teams (selecting team members and developing shared mental models), revenue management, new product design and development, and shaping organizational cultures. Offered: Sp.

SCM 599 Supply Chain Leaders Series and Practicum (1-2, max. 5) Provides the capstone learning experience. Includes seminars given by supply chain leaders, a final quarter student report and student presentations. Provides students the opportunity to complement their in-class learning experience with related practical experience by working on a project. Credit/no-credit only. Offered: AWSpS.

School of Dentistry

School Overview

Dean

Joel Berg D322 Health Sciences

Established in 1945, the University of Washington School of Dentistry offers courses leading to a Doctor of Dental Surgery (DDS) degree, and advanced education leading to a Master of Science in Dentistry degree and/or a certificate of proficiency in endodontics, oral medicine, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Residency training is available in oral and maxillofacial surgery and general practice. The Department of Oral Biology offers a Master of Science (MS), an MS non-thesis degree for dental hygiene educators, and a doctoral degree (PhD). Postdoctoral study is available in various disciplines.

Opportunities to earn other degrees concurrently (MS or PhD in the School of Dentistry's Department of Oral Biology and other schools) may be arranged on an individual basis.

These educational programs are enriched by the School's strong commitment to Research and the presence of a Regional Clinical Dental Research Center, the Northwest Center to Reduce Oral Health Disparities, Northwest PRECEDENT, an affiliation with the Institute of Translational Health Sciences (ITHS,) and a fellowship Research training program for predoctoral and postdoctoral students. The mission of the Regional Clinical Dental Research Center is to foster clinically relevant Research that advances dentistry's knowledge base, improves patient care, and promotes oral health. The Disparities Center performs Research aimed at reducing oral health disparities in the Pacific Northwest. Northwest PRECEDENT is the Practice-based Research Collaborative in Evidence-based DENTistry. Founded in 2005, this network of dental practices has established the infrastructure to perform a wide variety of oral health Research studies across a five-state region covering Idaho, Montana, Oregon, Utah, and Washington. The mission of the ITHS is to create, enable, and sustain innovative translational Research and Research collaborations across disciplines and professions which accelerates the development of concepts and tangible products that improve human health. State-of-the-art clinical Research facilities are available for faculty and student use.

School of Dentistry Mission Statement: "The School of Dentistry shares the University's overall mission to generate, disseminate, and preserve knowledge and serve the community. The School is an integral part of the Warren G. Magnuson Health Sciences Center and is an oral health-care center of excellence serving the people of the state of Washington and the Pacific Northwest. The primary mission, through educational, Research, and service programs, is to prepare students to be competent oral health-care professionals. The School's Research programs contribute to the fundamental understanding of biologic processes and to the behavioral, biomedical, and clinical aspects of oral health. The service mission is to improve the health and well-being of the people of the community and the region through outreach programs that are especially attentive to minority and underserved populations. The School values diversity in its students, staff, faculty,

and patient populations. It seeks to foster an environment of mutual respect where objectivity, imaginative inquiry, and the free exchange of ideas can flourish to facilitate personal development, professionalism, and a strong sense of self-worth." (August 2002)

The following departments participate in the curriculum for the School's programs:

- Dental Public Health Sciences is concerned with the social, legal, political, economic, and psychological aspects of dental healthcare delivery as well as the epidemiology of oral diseases and the application of biostatistical methods in studying them.
- Endodontics offers training in the diagnosis and treatment of diseases and injuries of the tooth pulp and periradicular tissues.
- Oral and Maxillofacial Surgery trains students in the procedures used for all types of operations in the oral cavity and all phases of dental pain control.
- Oral Biology encompasses the study of basic biological mechanisms in normal and diseased oral tissues and structures.
- Oral Medicine provides training in diagnostic techniques and nonsurgical treatments of oral disease.
- Orthodontics provides training in the prevention and correction of malocclusion of the teeth.
- Pediatric Dentistry provides students with a broad understanding of prevention, diagnosis, and treatment of most dental needs from infancy through adolescence with emphasis on the psychological and educational requirements of the patient and parent.
- Periodontics offers training relative to the periodontium and dental implants, with emphasis placed on diagnosis, prevention, treatment, and maintenance.
- Restorative Dentistry offers training in the restoration or replacement of tooth structure and study of the form and function of the masticatory structures, and fabrication and maintenance of removable, complete, immediate, and partial dentures and dental implants.

Undergraduate Program

Dental hygiene seeks to understand why some people get preventable oral diseases and why others do not. Risk factors, such as poverty, ethnicity, and education, as well as environment, contribute to perpetuation of these diseases. The dental hygienist observes and defines dental diseases, assesses potential outcomes of interventions, and manages conditions that compromise oral health. As an applied discipline, dental hygiene links its theoretical foundation to behavioral and natural sciences. Using evidence-based science, the discipline seeks to facilitate holistic assessments of individuals and communities and to find solutions to oral health problems. Students in the discipline learn to transfer learning from clinical to community contexts as a means of improving the oral health status among people.

Adviser
D583 Health Sciences, Box 357475
206-543-5820
dhyg@uw.edu

The Dental hygiene degree completion program offers the following program of study:

- Bachelor of Science degree with a major in dental hygiene.

The UW has no pre-licensure program in dental hygiene.

Bachelor of Science

Suggested First- and Second-Year Courses: Students desiring entry into the dental hygiene profession may take their first-year general education courses in chemistry, psychology, sociology, public speaking, English composition, mathematics, nutrition, microbiology, and liberal studies at the UW, or another community, technical, or four-year institution. Having successfully completed a pre-licensure dental hygiene program and obtained a license to practice dental hygiene, students are eligible to return to the UW to complete the Bachelor of Science degree with a major in dental hygiene.

Department Admission Requirements

The dental hygiene program is not accepting new applicants. Please contact the program for further information.

Major Requirements

Following completion of a pre-licensure dental hygiene program and being licensed to practice dental hygiene, students must complete UW general education requirements as well as dental hygiene major requirements to obtain the BS degree. UW requirements include a 45-credit senior residency; English, writing, and quantitative reasoning proficiencies; and Areas of Knowledge courses. The dental hygiene major requirements include a sequence of three dental-hygiene core courses and a minimum of one path.

Completion of the required major and UW requirements takes one to two years. Students planning to graduate in one year must have a faculty-approved plan of study within the first quarter of enrollment. Students planning a two-year program must have a faculty-approved plan of study within the first two quarters of enrollment. All students must meet with a program adviser yearly and are encouraged to meet with one quarterly.

Core Requirement

Students complete a year-long core requirement founded on significant oral health problems and probable solutions within the context of specific communities. Behavioral change, community development, health education models, and scientific literature provide a theoretical foundation

for study in the core courses. The core curriculum focuses on real problems in real places. Using a people-places-problems approach, students use Internet and library resources to Research, analyze, discuss, and make evidence-based decisions relevant to oral health promotion and dental disease prevention. Further, they explore core values, ethics, laws, and issues related to care access, health promotion/disease prevention approaches, and healthcare delivery models. Included are field activities linked to education, government, business, and health resources. Additionally, dental hygiene majors complete requirements in at least one path and may take electives of their choice to complete the senior residency requirement. All students must complete the three core courses, D HYG 465, D HYG 492, and D HYG 493 (3 credits each, total 9) in the prescribed order.

Path Requirement

Students must select at least one of two pathways to fulfill the path requirement. The options are as follows:

Dental Hygiene Care. This path is for dental hygienists who desire to work as clinicians in hospitals, clinics, long-term care facilities, or other healthcare services that require advanced clinical and management skills. Students take courses in interdisciplinary health sciences, along with courses that focus on dental hygiene care and management of persons with physical, mental, developmental, and complex medical disabilities. Required courses in oral medicine augment this path. Major requirements include a minimum of 11 or 12 credits beyond the core: 10 credits in ORALM 460, or approved alternatives that focus on care of special clients; 3 credits of approved interdisciplinary health science courses; and 2 credits of approved Research.

Oral Health Promotion. This path is for dental hygienists who desire to work in multicultural and multidisciplinary settings at the local, state, national, or international levels and who require skills beyond clinical expertise. Students learn about the framework within which societies organize and manage their healthcare services and learn to link health with the environment, people's beliefs, ways of life, and kinship. They learn about differences between Western, Eastern and Shamanistic philosophies of health as prerequisites to developing educational strategies for oral health promotion and dental disease prevention. As students build skills essential for working with health agencies, they participate in community health projects as educators, advocates, or Researchers. Activities focus on the health of children and families in rural and remote areas of Washington state. Major requirements for this path include a minimum of 15 credits beyond the core, to include 3 credits in approved interdisciplinary health sciences courses, 3 credits in healthcare delivery systems, D HYG 402 or substitute; 3 credits in health promotion strategies (D HYG 403) or approved substitute; and a minimum of 4 credits in at least two sections of D HYG 404 or approved substitutes.

Academic Standards

Minimum 2.5 grade in each dental hygiene course counted toward satisfaction of graduation requirements. Minimum 2.00 cumulative GPA for all work done in residence at the University. A student whose cumulative GPA falls below 2.00 in any quarter is placed on academic probation.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The UW dental hygiene completion program emphasizes the health of populations rather than of individuals. Dental hygienists conduct community assessments; develop networks that engage community partners; set priorities; obtain baseline measures; set targets; and measure progress toward solutions to community oral health problems. Dental hygiene core skills include the ability to search and retrieve information from the Internet; use census, geographic, and demographic data; critically assess scientific literature; analyze and interpret data; and apply new scientific knowledge to solutions of health problems. In addition to the core knowledge set, dental hygienists select from two paths of study: care of special populations and oral health promotion. Depending upon area of interest, graduates pursue careers as business managers, marketing specialists, clinic administrators, hospital and nursing home dental hygienists, public health planners, program managers, Research assistants, and teachers of dental hygiene.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:*

Students in the undergraduate program take off-campus service-learning courses related to their path of study. Generally, sites are located in rural and underserved health provider shortage areas of Washington state, but may include regional, national, or international locations.

Students are eligible for international programs and exchanges following completion of their core course requirements. An applicant who is a dental hygienist from an affiliated international institution may be eligible for a tuition waiver during one or more quarters of the regular academic year (autumn, winter, spring). Students interested in these opportunities must contact the program's academic adviser at least six months in advance.

Majors may be eligible, following the completion of prerequisite courses, to participate in study-abroad programs that focus on health care delivery, oral health promotion, or dental disease prevention. The University and its affiliated sites provide the settings for fieldwork, service, and Research activities, and interdisciplinary learning experiences.

- *Department Scholarships:* Students may apply for scholarships offered by the Dental Hygiene Education fund.
- *Student Organizations/Associations:* The Washington Rural Health Organization, Washington State Public Health Association, Washington State Dental Hygienists' Association, American Dental Education Association, and International Association of Dental Research are among many from which to select.

Of Special Note: The 90-credit community college transfer limit does not apply to students admitted to this program. The last 45 credits for the degree, however, must be earned in residence through the UW.

Graduate Programs

Through their respective departments, the graduate faculty members of the School offer programs leading to the degrees of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs.

Master of Science in Dentistry/Postgraduate Certificates

Fields of study for the MSD programs include endodontics, oral pathology, oral medicine and orofacial pain, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Although students may enroll in a graduate certificate program only, they may elect to pursue an MSD. Programs are planned to prepare students to think independently, to evaluate their own services and the literature of the programs, and to develop clinical skills to a level to permit successful clinical practice, teaching, or Research in their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment. The purpose of the programs is not only to train students in their respective specialties but also to encourage preparation for academic careers or for Research. Research may be undertaken in basic or applied science. Opportunities for collaborative Research are available with the cooperation of other colleges, schools, or departments of the University.

Postgraduate certificate programs are not administered by the Graduate School, and no thesis is required. The course content may vary somewhat from the MSD program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

Master of Science in Dentistry

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school.
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of Research interest and academic goals. Optional: a personal statement that addresses the relationship between personal background and aspirations
5. A brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the department
7. GRE General Test scores
8. TOEFL -- required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

50 credits, to include:

1. *Required courses*(Approximately 35 credits from this list): ORALB 564, ORALB 565, ORALB 566, ORALB 569, PERIO 575, ORALB 570, ORALB 575, ORALB 579; either ORALB 591, ORALB 592, or DPHS 568; for foreign-trained dentists and non-dentists: ORALB 572, PATH 544
2. *Recommended electives* (Approximately 15 credits from this list): DPHS 569, MEBI 520, ORALB 562, ORALB 574, PATH 501, PATH 552
3. *Research*: Fulfilled by either a report on experimentation carried out by the student in one of the laboratories, or a case report with review of the literature. Students interested in a more Research-intensive experience should consider enrolling in the MS in Oral Biology (thesis) program.
4. *Teaching*: Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.
5. *Note*: At present, this program is not certified by the American Board of Oral Pathology.

Master of Science in Dentistry, Endodontics

Admission Requirements

1. Professional degree from a dental school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. A personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the Department of Endodontics (international applicants must also send official transcripts to the Graduate School)
7. GRE General Test - required only from applicants who graduated from a non-ADA-accredited dental school
8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

Minimum 148 credits, to include:

1. Students who have adequate backgrounds in required courses may, on presentation of appropriate documentation, be excused from required courses at the discretion of the program director.
2. *Required core courses*: ENDO 561, ENDO 580 through ENDO 587, ENDO 590, ENDO 593, ENDO 594, ENDO 600, ENDO 658, ENDO 660, DENT 565, DENT 568, DPHS 568, DPHS 569, ORALB 569, ORALB 574, ORALB 579, ORALB 591, ORALB 592, ORALM 580, ORTHO 580, PERIO 567, PERIO 582, PERIO 585, PERIO 586

3. *Non-thesis Research:* A non-thesis Research study is required. During the first year, each student is encouraged to gain familiarity with Research in progress and to help identify an area of special interest. Then, a preceptor and Research advisory committee is appointed and the student begins Research work. The master's defense is concerned with the Research subject matter and is conducted as an open seminar followed by examination by the advisory committee.
4. *Teaching:* Students audit predoctoral lecture courses in endodontics, assist with teaching in the predoctoral endodontics laboratory course, and supervise predoctoral dental students working in the endodontic clinic.

Master of Science, Oral Biology

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of Research interest and academic goals. Optional: a personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the Department of Oral Biology
7. GRE General Test
8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections)

Degree Requirements

Minimum 70 credits, to include:

1. Minimum 70 credit hours (including at least nine credits of thesis), of which at least 7 credits must be from science courses outside the Department of Oral Biology. Students who have adequate backgrounds in required courses may, on presentation of appropriate documentation, be excused from required courses; up to six hours of transfer credit may be granted at the discretion of the Graduate School.
2. *Required core courses:* ORALB 569, ORALB 575, ORALB 578, ORALB 579, ORALB 581, ORALB 591, ORALB 592, ORALB 600, ORALB 700, DPHS 568
3. *Electives:* 7 credits from science courses outside oral biology
4. *Recommended:* One class on educational methods
5. *Thesis Research:* A Research thesis is required. During the first year, each student is encouraged to spend time in several laboratories to gain familiarity with Research in progress and to help identify an area of special interest. Then, a preceptor and thesis advisory committee is appointed and the student begins thesis work. The final

examination is concerned with the subject matter of the thesis and is conducted as an open seminar followed by examination by the advisory committee.

6. *Teaching*: Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.

Master of Science in Dentistry, Prosthodontics

Admission Requirements

1. Professional degree from a dental school
2. Complete electronic application to the Graduate School, including \$65 application fee
3. Complete the Questionnaire to Applicants for Postdoctoral Training (available for download at the School's website, www.dental.washington.edu)
4. Class Standing form (available for download at the School's website, www.dental.washington.edu)
5. Waiver form
6. Three letters of recommendation or Evaluation of Applicant forms (available for download at the School's Website, www.dental.washington.edu)
7. A personal statement explaining why the student wishes to pursue an education in prosthodontics
8. A CV or Resume
9. Official transcripts, sent directly to the Department of Prosthodontics (all applicants must also send official transcripts to the Graduate School)
10. GRE General Test (required only for applicants who graduated from a non-ADA-accredited dental school outside the US or Canada)
11. TOEFL required for international students; the minimum TOEFL score required is 237 computer, 580 paper, iBT 70, (based only on listening, reading, and writing sections).

Degree Requirements

Minimum 108 credits, to include:

1. *Required Core Courses*: PROS 560, PROS 562, PROS 563, PROS 564, PROS 572, PROS 660 (minimum 16), PROS 665, RES D 570, RES D 580, RES D 585, RES D 588, RES D 589, RES D 590, RES D 600 (minimum 14), RES D 660 (minimum 24), DENT 565, DPHS 568, DPHS 569, ORALM 570, ORALM 580, ORALB 574, ORTHO 580, ORTHO 582, PERIO 561, PERIO 580, PERIO 582, PERIO 585, PERIO 586
2. *Non-thesis Research*: A non-thesis Research study is required for the MSD. During the first year, each student is encouraged to gain familiarity with Research in progress and to help identify an area of special interest. After the student identifies an area of interest, a Research committee is established. The master's defense is concerned with the Research subject matter and is conducted as an open seminar followed by examination by the committee.

3. *Teaching:* Second- and third-year students supervise predoctoral dental students working in the prosthodontics and restorative clinics.

Master of Science, Dental Hygiene

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of Research interest and academic goals. Optional - a personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the Department of Oral Biology
7. GRE General Test
8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

70 credits, to include:

1. *Coursework:* 48 credits, as follows: CONJ 401, CONJ 402, CONJ 403, PATH 544, PERIO 575, ORALB 520, ORALB 561, ORALB 572, ORALB 575; at least one of the following: PERIO 517, DPHS 568, DPHS 569, or O S 532; at least two of the following: MEBI 520, MEBI 521, GRDSCH 630, ORALB 562, D HYG 595.
2. *Electives:* 22 credits of electives. Recommended electives: ORALB 569, ORALB 574, ORALB 578, ORALB 579, ORALB 600, DENT 534, DPHS 550, DPHS 569, ORTHO 580, O S 520, PHCOL 434, PHCOL 435, ORALM 520
3. Clinical opportunities may be available in the DECOD (Dental Education in Care of Persons with Disabilities) and the Dental Fears Clinics.

Doctor of Philosophy

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional: a personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format

6. Official transcripts, sent directly to the Department of Oral Biology
7. GRE General Test
8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

Minimum 90 credits, to include:

Through coursework, students are expected to gain proficiency in one or more basic biologic sciences and to master modern biological approaches in addition to gaining expertise in the subject area of oral and craniofacial sciences. At least 15 credit hours must come from science courses in departments other than oral biology. These include courses offered through the School of Medicine and courses selected to match the basic science interests of the student. Cross-disciplinary training in bioengineering is also available. All graduate students attend and participate in departmental seminars (ORALB 575).

1. *Required core courses:* ORALB 569, ORALB575, ORALB 578, ORALB 579, ORALB 581, ORALB 591, ORALB 592, ORALB 600, ORALB 800, DPHS 568
2. At least 6 credits from the following School of Medicine courses: CONJ 524 through CONJ 558 and PABIO 537
3. Strongly recommended: at least one class on educational methods

Residency Training

Residency training programs are available in oral and maxillofacial surgery and the general practice of dentistry. Both programs provide for rotation through several of the University-affiliated hospitals. Each is a fully accredited program that grants a certificate upon successful completion of the training. Stipends are provided.

The oral and maxillofacial surgery program is four years in duration and provides broad exposure to all aspects of the practice of oral and maxillofacial surgery. Application, selection, and administration of this training program is provided through the Department of Oral and Maxillofacial Surgery. Applicants to the program must be graduates of an accredited U.S. or Canadian Dental School, demonstrate proficiency in the English language, submit National Dental Board Examination scores for Part 1, and register and participate in the Postdoctoral Dental Matching Program. Further information can be obtained by contacting the Residency Program Coordinator, Department of Oral and Maxillofacial Surgery, Box 357134, University of Washington, Seattle, WA 98195-7134, 206-543-7722.

The General Practice Residency (GPR) is a one-year training program with a second optional year that emphasizes the general dentist's role in a hospital setting and the management of medically, physically, and mentally compromised patients. It also provides multiple resources for enhancement of dental clinical skills in the dental setting, applying management techniques through minimal, moderate sedation and general anesthesia in the operating room. Applicants to

the program must be graduates of an ADA-accredited dental school, submit National Dental Board Examination scores for Part 1, and register and participate in the Postdoctoral Application Support Service (PASS) and Postdoctoral Dental Matching Program (MATCH). Further information can be obtained by visiting the website at dental.washington.edu/departments/gpr/general-practice-residency.html.

Postdoctoral Fellowships

Postdoctoral training fellowships are available in behavioral or public-health Research in dentistry in addition to those in oral biology. Programs vary in duration and many accommodate degree-seeking or Research fellows pursuing an academic career. NIH-sponsored partial tuition and a stipend for up to three years are provided for U.S. citizens, noncitizen nationals, and those foreign nationals with permanent-residency status in the United States. Members of ethnic minorities and women are especially invited to apply. Application, selection, and administration of the program are provided through the Departments of Dental Public Health Sciences and Oral Biology.

Graduate Training in Dental Public Health

Opportunities exist for pursuing graduate degrees in public health which emphasize applications to Research in dentistry. Master of Public Health (MPH) programs in the Departments of Epidemiology and Health Services of the School of Public Health can be pursued in conjunction with postdoctoral training in the School of Dentistry's Department of Dental Public Health Sciences. Didactic coursework is taken in the School of Public Health and Community Medicine, augmented with independent study and thesis Research on selected topics in the School of Dentistry. Similar opportunities exist for pursuing the PhD in epidemiology or biostatistics with an emphasis on Research in dentistry. Further information may be obtained from the Office of Academic Affairs, Box 357480, School of Dentistry, University of Washington, Seattle, WA 98195-7480, 206-221-6887.

The Office of Continuing Dental Education, School of Dentistry, offers programs and courses throughout the year to provide dentists, auxiliary personnel, and others involved in healthcare with current scientific knowledge and methodology of patient treatment. Utilizing local, national, and international experts, these programs provide a broad spectrum of information relevant to the needs of dental-health professionals. The instructional program consists of lectures, clinical courses, study clubs, extended clinical training, correspondence, and participation courses, some of which are offered in the simulated-patient laboratory. Various programs are presented throughout the year in the Pacific Northwest, Alaska, and Hawaii.

A list of courses offered may be obtained from the Office of Continuing Dental Education, Box 357137, University of Washington, School of Dentistry, Seattle, WA 98195-7137, 206-543-5444, dental.washington.edu/cde/current-course-listings.html.

Professional Program

Doctor of Dental Surgery

The Doctor of Dental Surgery (DDS) curriculum provides students opportunities to learn the fundamental principles significant to the entire body of oral health. Students (approximately 63 per class) learn the basic health sciences, attain proficiency in clinical skills, develop an understanding of professional and ethical principles, and develop reasoning and critical decision-making skills that enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory, and preclinical activities in basic sciences, dental anatomy, occlusion, and dental materials. There are also early clinical experiences in preventive dentistry and periodontics. In the second year, students develop additional preclinical skills, learn how basic science principles are applied to the clinical setting, and begin clinical patient treatment. In the third and fourth years, students primarily concentrate on providing clinical treatment and attend lectures that refine diagnostic and technical skills. Additionally, students are required to participate in elective clinical and didactic courses. Students choose elective courses offered by all departments, including opportunities in independent study, Research, seminars on various topics, and specialty clinical topics.

The DDS curriculum extends for 42 months or 14 quarters, including two summer quarters. Twelve of the academic year quarters are ten weeks of instruction and one week of examination, while the two required summer quarters following years two and three are each nine weeks long. If needed, students may be allowed additional time to complete required coursework beyond 42 months.

Admission

Requirements include all undergraduate courses listed below; Dental Admission Test; personal interview. The Admissions Committee encourages diversity in majors. Courses in the social sciences and the humanities are included in the committee evaluation. Dental experience, community service, and non-cognitive factors are given consideration as part of the whole file review.

The School of Dentistry is a state-supported institution and participates in the student exchange program provided by the Western Interstate Commission for Higher Education (WICHE) which supports students from western states without dental schools. Although all applications are carefully reviewed, preference in admission is given to residents of Washington and WICHE states, followed by residents of other states.

Required courses: general chemistry - two quarters or one semester; organic chemistry - two quarters or one semester; general biochemistry - two quarters or one semester; general physics - three quarters or two semesters; general biology or zoology - three quarters or two semesters; general microbiology - two quarters or one semester. Recommended: medical microbiology.

Transfer Applicants: The school rarely, and only under exceptional circumstances, admits transfer students from other dental schools.

Foreign Applicants: The school does not provide a special program for foreign-trained dentists.

Health Sciences Minority Student Programs: To increase diversity of students, the school participates in the Health Sciences Minority Student Program. In addition to advising and career counseling, this office works with Health Sciences schools to provide student development and support programs, networking opportunities, and summer Research programs. The HSMSP office activities include participation on several health sciences and campus-wide committees for purposes of collaborating and exchanging strategies on effective methods for recruiting and retaining a diverse student body, as well as promoting and celebrating diversity.

Regional Initiatives in Dental Education (RIDE) is a strategic expansion of the University of Washington School of Dentistry in conjunction with Eastern Washington University, designed to help meet the oral health needs of rural and underserved communities in the Northwest. RIDE creates regional training sites in areas lacking dental schools by partnering with regional universities, dentists and dental associations, community health centers, and others. Student admission to the RIDE program in Spokane is limited to residents of Washington State.

The School belongs to the American Association of Dental Schools Application Service (AADSAS). November 1 of the year prior to matriculation is the AADSAS priority filing deadline. Only applications received in the AADSAS Washington, D.C. office by the priority filing date are forwarded to the UW for consideration by the Admissions Committee. There are no exceptions. AADSAS applications are available online at www.adea.org. The UW Dental School's DAT deadline is October 31 of the year prior to matriculation. Information regarding the Dental Admission Test may be found at www.ada.org.

For information on admission to the UW School of Dentistry, contact the Office of Student Life and Admissions, School of Dentistry, University of Washington, Box 356365, Seattle, WA 98195-6365, 206-543-5840, askuwsod@uw.edu, or www.dental.washington.edu (click on the "prospective student" link). University of Washington undergraduates may contact the Predental Advising Office, University of Washington, 141 Mary Gates Hall, Box 353760, Seattle, WA 98195-3760.

Once the AADSAS application has been received, a preliminary screening determines if an applicant meets the Admissions Committee's criteria to receive a supplemental application and request for the following materials:

1. A supplementary application which includes a short personal statement
2. A non-refundable application fee of \$35
3. Three letters of recommendation are required: one from a science instructor who can evaluate the applicant's academic and intellectual qualifications, a second from a dentist who is familiar with the applicant's knowledge of and motivation toward the dental profession, and a character reference from someone who can indicate the applicant's contribution to the community, etc.
4. If a predental committee exists on the applicant's campus, a combined recommendation from that committee may be used to replace all three recommendations. The School of

Dentistry accepts letters of recommendation processed by AADSAS, or directly from recommenders.

5. Dental Admission Test scores. **Test must be taken by October 31 of the year prior to entry.**
6. Transcripts from all higher education institutions attended
7. A list of current and future courses
8. Acknowledgment of having read, understood, and being able to meet, with or without reasonable accommodation, the Essential Requirements of Dental Education at the University of Washington School of Dentistry (to be sent with the supplemental application form)
9. Conviction/criminal history information. Washington state law requires that all faculty, students, and staff disclose background information concerning crimes and offenses against vulnerable populations. A complete copy of the law is available from the School's Office of Student Life and Admissions and is forwarded upon request. Applications are not considered until completed disclosure forms have been returned to student admissions.

The application is considered complete once all materials noted above (1-9) are returned. Upon receipt of the completed application, invitations for an interview are sent to applicants based on an additional screening of the whole file. The interview is an opportunity for an open, friendly discussion of the applicant's interests, background, and reasons for selecting dentistry as a profession. During the interview day, applicants have numerous opportunities to learn about UW programs, faculty, and student life. In addition to the interview, the School provides the applicant with financial aid and cost information. During the lunch hour, applicants meet with enrolled students and tour the School. Applicants also meet with the deans to learn about programs, Research, and cultural opportunities.

The admissions committee, composed of faculty and community dentists, determines admission status after considering the following:

1. *Grades.* Overall GPA and GPA in required predental science courses. Committee members look for a strong, consistent GPA without withdrawals, incompletes, repeated courses, or non-graded options. Grade trends are reviewed.
2. *DAT (Dental Admission Test).* The test, sponsored by the American Dental Association, covers several areas: reading comprehension, quantitative reasoning, survey of natural sciences (including biology, general, and organic chemistry), and perceptual ability (including form development, apertures, angles, cubes, and orthographic projections). At the UW, scores are reviewed to identify an applicant's areas of strength. The test must be taken no later than October 31, one year prior to admission.
3. *Level of Pre-professional Education.* The majority of applicants have completed a baccalaureate degree by the time of entry. Consideration is given to applicants who have not or do not expect to complete a baccalaureate degree, but who have completed all

predental requirements, have a highly competitive academic record, and a minimum of three years' full-time coursework.

4. *Dental Knowledge.* Includes knowledge of the field of dentistry through volunteer experience in a dental setting (dentist's office, clinic, etc.), introductory dental coursework, and exploration of the dental literature. A qualified applicant has a clear understanding of the profession, a demonstrated interest in the field, and a minimum of 100 volunteer hours in a dental setting.
5. *Contribution to Diversity.*
6. *Unique Life Experiences.* Among other things, Research and teaching efforts, travel, and work experience are some of the life experiences considered.
7. *Personal Attributes.* In addition to motivation, the applicant's poise and communication skills are examined. Personal attributes such as integrity, responsibility, leadership, initiative, community service, perseverance, and diversity of interests are important.
8. *Demonstrated Community Service.*

Interviews begin in October and typically end in February. The American Dental Association Traffic Rules allow dental schools to begin making offers of acceptance on December 1. The School uses a "rolling admission" format, so interviews and committee decisions continue to be made between December and March.

The Admissions Committee makes one of three decisions:

1. *Offer of Acceptance.* Admission application has been accepted. The applicant has a specified time to reply to reserve enrollment in the entering first-year class. In addition, enrollment is contingent on timely submission of the following: registration deposit, transcripts showing completion of all required predental courses, registration for autumn quarter of the upcoming academic year, and completion of required immunizations.
2. *Alternate Status.* Applicant is offered a position on the alternate list. The applicant has a specified time to reserve a position on this list, maintained until the beginning of the school year.
3. *Denial of Admission.* The Committee has considered the application but cannot offer a position or alternate status.

Accepted applicants receive follow-up information about registration procedures, financial aid, and the orientation program throughout the spring and summer. Attendance at orientation is mandatory and provides an opportunity for newly enrolled students to learn about the upcoming curriculum, student rights and responsibilities, financial aid information, student organizations, challenge examinations, and the start of academic coursework. Orientation begins in late August. New students attend an off-campus student retreat to interact with peer advisers and meet classmates in an informal setting.

Western Interstate Commission for Higher Education (WICHE): The school participates in a program administered by WICHE for students who reside in western states not served by a

dental school (Alaska, Arizona, Hawaii, Montana, New Mexico, North Dakota, and Wyoming). Such students should seek requests for certification and information about benefits of the program from the WICHE commission office in their state of residence.

Projected costs can be found at dental.washington.edu/prospective-students/projected-costs.html.

Information on loans and scholarships may be obtained from the Director of Financial Aid, D323 Health Sciences, Box 356365. Information relating to student life, including the Academic Regulations Manual and Professional Ethics Code may be obtained from the Associate Dean for Student Life and Admissions, D323 Health Sciences, Box 356365.

Degree Requirements

285-333 credits minimum, as follows:

1. *Year 1 (71 credits, plus electives)*: B STR 431, B STR 530, B STR 541; DENT 610; DPHS 510; ORALB 510 (3, 3), ORALB 520; ORALB 521; ORALM 513, ORALM 514, ORALM 515; ORALM 516, ORALM 517; P BIO 505; P BIO 506 (4, 4); PATH 544 (3, 2); PERIO 517; RES D 510 (1, 2), RES D 511, RES D 515, RES D 516, RES D 517, RES D 519
2. *Year 2 (86 credits, plus electives)*: DENT 520; DENT 521, DENT 522; DENT 523; ENDO 521; O S 520; ORALM 520 (2, 2, 2), ORALM 525, ORALM 526, ORALM 527, ORALM 528, ORALM 529; ORTHO 520, ORTHO 521, ORTHO 522; PEDO 520, PEDO 525; PERIO 525, PERIO 526 (2, 2); PERIO 620; PHCOL 434, PHCOL 435; PROS 520, PROS 523, PROS 525; RES D 520, RES D 521, RES D 522 (3, 3, 3); RES D 525, RES D 526, RES D 527 (3, 3, 3); RES D 620
3. *Year 3 (74 credits, plus electives)*: DENT 533, DENT 534 (1, 1), DENT 537, DENT 543; DENT 551, DENT 552, DENT 553, DENT 554; DPHS 535, ENDO 534, ENDO 535, ENDO 630 (1, 1, 1, 1); O S 530 (1, 1, 1), O S 532, O S 630 (2, 2); ORALM 531, ORALM 532, ORALM 533; ORALM 630 (1, 1, 1, 2); ORTHO 630; ORTHO 631; PEDO 630 (1, 1, 1, 1); PERIO 530, PERIO 531; PERIO 630, PERIO 631, PERIO 632; PERIO 639; PROS 630 (1, 1, 1, 2); RES D 530, RES D 531, RES D 532; RES D 535, RES D 630 (2, 3, 3), RES D 635
4. *Year 4 (55 credits, plus electives)*: DENT 547, DENT 548, DENT 549 (2, 2, 2); DENT 555, DENT 556, DENT 557 (1, 1, 1); DENT 640, DENT 645; DPHS 541, DPHS 640; ENDO 630 (1, 1, 1); O S 630; ORALB 540; ORALM 540 (2, 2), ORALM 545 (1, 1), ORALM 640 (1, 1, 1); PEDO 630 (1, 1, 1); PERIO 540; PERIO 640, PERIO 641, PERIO 642 (1, 1, 1); PROS 640 (1, 1, 1); RES D 540, RES D 541, RES D 542, RES D 640 (3, 3, 3)
5. *Electives*: A minimum of two elective courses must be taken during the course of the program. Elective credits may not exceed a total of 50 credits.

Facilities

School clinics, teaching laboratories, and lecture halls are up-to-date, well maintained, and periodically renovated. Clinical modules are assigned to students for use in patient treatment. The D-1 Simulation Clinic is a state-of-the-art teaching facility used for preclinical and laboratory courses.

School Accreditation and Licensure

The school is fully accredited by the Commission on Dental Accreditation, the recognized accrediting body for dentistry and the related dental fields. For information, write to the Commission on Dental Accreditation, 211 East Chicago Ave., Chicago, IL 60611-2678. Admission to the practice of dentistry in any state is conditional upon meeting the requirements of the individual state dental licensure requirement. In order to practice in the State of Washington, the candidate for licensure must have a dental degree from a U.S. or Canadian dental school, and have successfully completed the American Dental Association National Board Examinations and the Western Regional Examining Board Examination. Additional information about licensure requirements should be requested from the Washington State Department of Health, Dental Quality Assurance Commission, PO Box 1099, Olympia WA 98504-1099, 360-586-6898.

Health Care and Immunization Policy

Enrolled students at the UW School of Dentistry are eligible for healthcare services provided by the Hall Health Primary Care Center. In addition, the University has arranged for an Accident and Sickness Insurance Plan specifically designed for students, their dependents, and their domestic partners for which the Hall Health Primary Care Center is the preferred provider. The UW Health Sciences Center requires that its students, staff, and faculty show documentation of protection against a number of vaccine-preventable diseases. Additional information is available via the Hall Health Primary Care Center website at depts.washington.edu/hhpccweb/

Course Descriptions

Dental Clerkship

DENTCL 603 Patient Advocacy - Third Year (1-, max. 3) Teaches third year dental students the practice of comprehensive patient care. Students required to monitor the care of 30 to 50 patients and make recommendations with regard to treatment sequence and recall strategies. Offered: AWP.

DENTCL 605 Foundations of Interprofessional Education ([0/1]-) IPE prepares students to collaborate with other health professions in interprofessional patient care practice (IPP), to improve patient care and health outcomes. Students will experience co-learning, working in teams with faculty and students from other health professions, to understand the roles of members of the healthcare team, and have clinical experiences that involve working with other healthcare professional students and practitioners. Credit/no-credit only. Offered: AWP.

DENTCL 631 Prosthodontics Clerkship (9) Teaches students to understand prosthodontics needs of patients and to design and deliver treatment. The clinical experience is supported with the didactic training during the clerkship. At the end of the clerkship, student dentists are prepared to practice in the Comprehensive Care 4th year. Offered: AWSpS.

DENTCL 632 Periodontics Clerkship (9) Covers general principles in clinical periodontics both in class and in the clinical clerkship setting. Students develop an overall understanding of the scope of periodontal treatment and clinical decision-making by active participation, integrating periodontal therapy in a comprehensive plan of care. Offered: AWSpS.

DENTCL 633 Endodontics Clerkship (9) Prepares dental students to provide endodontic therapy within the scope of general dentistry. In the seminar component, students expand their didactic knowledge in preparation for clinical experiences. In the clinical component, student treat patients, including diagnosis, treatment planning, and endodontic therapy of minimal-moderate difficulty level. Offered: AWSpS.

DENTCL 634 Operative Dentistry Clerkship (9) Operative dentistry plays a key role in disease control and the integration of comprehensive care of our patients. Emphasizes preventive therapies for caries. Students diagnose and treat conditions of the human dentition that fall within the scope of operative dentistry and utilizes the patient assessment and treatment planning process in order to deliver appropriate preventive and restorative procedures. Offered: AWSpS.

DENTCL 635 Diagnosis and Treatment Planning Clerkship (9) Familiarizes students with the procedure of a comprehensive, thorough, oral and head and neck examination, taking medical and dental history and ethically justified decision making in patient individual treatment planning. Offered: AWSpS.

DENTCL 636 Oral Medicine Clerkship (9) Provides clinical experience and develops competency in the diagnosis and management of acute and chronic orofacial pain, diseases of the oral mucosa, salivary dysfunction, oral manifestations of systemic diseases, dental management of patients with developmental or other disabilities, and taking interpretation of radiographs. Offered: AWSpS.

DENTCL 637 Oral and Maxillofacial Surgery Clerkship (9) Introduces students to the specialty of oral and maxillofacial surgery. An equally important goal is to supply students with the knowledge base and clinical skills necessary to practice general dentistry in our communities. Offered: AWSpS.

DENTCL 638 Pediatric Dentistry and Orthodontic Clerkship (9) Didactic and clinical educational experiences in comprehensive care of pediatric dental patients in the areas of prevention, diagnosis, treatment planning, and restorative dentistry. In addition, recognition, analysis and treatment planning of malocclusions as well as introduction to limited tooth movement. Offered: AWSpS.

Dental Elective

DENTEL 510 Careers in Dentistry (1) Provides students with knowledge in a wide array of topics relating to a successful career in dentistry. Seminars featuring experienced dentists and experts from different fields will inform students regarding the business side of dentistry and will serve as resources as students face challenges in the dental field. Credit/no-credit only. Offered: AWSp.

DENTEL 512 Ethics Journal Club (1) This course will expose students to the impact of recent developments in biomedical research, which they discuss in an interactive journal club atmosphere. It is open to 1st, 2nd, 3rd, 4th year Predoctoral students and Graduate students in the UW School of Dentistry. Credit/no-credit only. Offered: AWSp.

DENTEL 513 Ethics Publication Review (1) Students will develop, write, and submit a peer reviewed journal submission. Prerequisite: DENTEL 512 Ethics Journal Club or Advance Permission of the Course Director Credit/no-credit only. Offered: AWSp.

DENTEL 520 Global Oral Health (1, max. 6) Provides an overview of global health inequalities and the burden of oral disease worldwide. Students will be introduced to international health care systems and the social, political, cultural, behavioral and economic factors influencing them. The course will use case studies with interactive student participation to analyze the impact of oral health on the public health system at a country level. Credit/no-credit only. Offered: WSp.

DENTEL 530 Research Methods Seminar (1) Provides terminology and concepts related to different aspects of dental research. Credit/no-credit only. Offered: Sp.

DENTEL 602 Advanced Dentistry in Interprofessional Practice (1) Dental students deepen their understanding of the roles of members of the healthcare team, by communicating and collaborating with other healthcare professional students and practitioners in the provision of patient care and education. Credit/no-credit only. Offered: WSp.

Dental Foundations

DENTFN 500 Early Clinical Immersion (3) Provides introduction to clinical dentistry and each of the pre-doctoral curriculum threads. Students participate in classroom lectures with multidisciplinary faculty. Also includes small group activities, large group activities and offsite experiences. Credit/no-credit only. Offered: S.

DENTFN 501 Head and Neck Anatomy for Dental Students (3) An overview of Head and Neck Anatomy geared toward dental students. Through lectures and hands-on dissection, students learn the gross anatomical structures of the oro-facial complex and their interrelationship the organization of the nervous system, (vasculature, lymphatics etc.), of the rest of the body. Credit/no-credit only. Offered: S.

DENTFN 510 Molecular and Cellular Basis of Disease - Foundations (6) Teaches the principles of cell and molecular biology, physiology, biochemistry and genetics. Aspects include the organization of the genome, properties of macromolecules, and cytoarchitecture. Students gain an understanding of intracellular communication, cell-cell interactions, properties of differentiated cells, and the diversity of their physiological properties and functions. Offered: A.

DENTFN 511 Invaders and Defenders - Foundations (5) Covers and integrates the immune system, microbial biology, infectious diseases (including treatment), inflammation and repair, and skin and connective tissue. Topics include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, the basis of immunologic diagnostics. Offered: A.

DENTFN 512 Foundations of Dental Medicine (2) Familiarizes students with the elements of patient interviewing, including developing a problem-focused, medical, social, and dental history. Covers how to physically assess the dental patient. Teaches how to apply principles of cultural competence and ethics throughout this process. Offered: A.

DENTFN 513 Oral Microbiology (2) Applies basic sciences to an understanding of the molecular bases of the interactions between microorganisms and oral tissues that lead to plaque formation and dental diseases. Covers principles of clinical asepsis and diagnosis of caries and periodontal diseases. Offered: A.

DENTFN 520 Cardiac, Pulmonary, and Renal Diseases - Foundations (8) Covers the structure, function, and diseases of the cardiac, pulmonary, and renal systems, with special emphasis on the management of these diseases in the practice of dental medicine and surgery. Offered: W.

DENTFN 521 Introduction to Dental Public Health (2) Students analyze a real-world public health case, and develop feasible solutions. Each small group present their solutions at the end of the course. Credit/no-credit only. Offered: W.

DENTFN 522 Foundations of Dental Medicine (2) Students increase expertise with patient interviewing and developing a problem-focused medical, social, and dental history. Improves student skills in physical assessment, including diagnostic tests. Covers how to develop a differential diagnosis. Students learn and apply principles of cultural competence and ethics throughout this process. Offered: W.

DENTFN 523 Oral Histology and Embryology I (3) Development of orofacial and neck structures; tooth/pulp histology, development, eruption and exfoliation; innervation of teeth and oral structures; craniofacial and dental anomalies; cranioskeletal development; temporomandibular joint; masticatory muscle structure and function; oral mucosa and epithelial differentiation; periodontium and epithelial attachment; specialized mucosa; gustation; and salivary gland structure and physiology. Offered: W.

DENTFN 530 Blood and Cancer - Foundations (3) Provides an overview of hematology and oncology. Students learn the biology of bone marrow and blood, with an introduction to the field

of cancer medicine. Specific cancer subtypes are discussed, providing illustrative examples of the impact of molecular biology and environmental risk factors in the development/treatment of malignancy. Offered: Sp.

DENTFN 531 Energetics and Homeostasis - Foundations (5) Covers energy metabolism, nutrition, obesity, diabetes, gastrointestinal/liver physiology, and endocrinology. Topics include physiology and pathology of digestion and hepatic function; principles and practice of clinical nutrition; endocrine integration of metabolism; and endocrine pathophysiology. Also covers relevant anatomy, histology, and pharmacology of the endocrine and GI systems. Offered: Sp.

DENTFN 533 Oral Histology and Embryology 2 (3) Examines the development of orofacial and neck structures; tooth/pulp histology, development, eruption and exfoliation; innervation of teeth and oral structures; craniofacial and dental anomalies; cranioskeletal development; temporomandibular joint; masticatory muscle structure/function; oral mucosa and epithelial differentiation; periodontium and epithelial attachment; specialized mucosa; gustation; and salivary gland structure and physiology. Offered: Sp.

DENTFN 560 Mind, Brain, and Behavior - Foundations (7) Covers the macro- and microscopic structure and function of the human nervous and musculoskeletal systems in terms of students' contribution to observable behavior, ranging from reflexes through cognitive and social behavior. Offered: A.

DENTFN 561 Lifecycle and Reproduction - Foundations (4) Covers the physiology, anatomy/imaging, and pathology of the human lifecycle from conception to death and gives the dental student the necessary medical background to facilitate dental treatment of patients experiencing these diseases and disorders. Offered: A.

DENTFN 562 Foundations of Dental Medicine 3 (2) Reviews the medical, legal, social, and historical contexts affecting the oral and overall health of people with disabilities, patients in all stages of life, and patients from diverse backgrounds. Discusses communication techniques, delivery of care, and health promotion for diverse populations. Offered: A.

Dental General Practice

DENTGP 650 Advanced Topics in General Dentistry (3) Faculty members from multiple departments participate with senior dental students in this course, which includes clinical practice management; ethics and jurisprudence; and coordinated multidisciplinary care; incorporating diagnosis and treatment planning; medical and surgical management; restorative dentistry; prosthodontics; implant dentistry; periodontics; endodontics; and orthodontics. Offered: S.

DENTGP 652 Comprehensive General Dentistry 1 (7) Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: S.

DENTGP 653 Treatments of Patients with Special Needs 1 (2) Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: S.

DENTGP 654 Dental Urgent and Emergent Care 1 (2) Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: S.

DENTGP 655 Service Learning Rotation (6) P. HOWELL Students practice clinical dentistry for 4 weeks at a designate rural and/or underscored community health center. The student further develops an understanding of cultural competence by analyzing and reflecting on the social and cultural factors that contribute to the oral health needs of these diverse populations. Offered: AWSpS.

DENTGP 660 Advanced Topics in General Dentistry 2 (3) Includes clinical practice management; ethics and jurisprudence; and coordinated multidisciplinary care. Incorporates diagnosis and treatment planning; medical and surgical management; restorative dentistry; prosthodontics; implant dentistry; periodontics; endodontics; and orthodontics. Offered: A.

DENTGP 662 Comprehensive General Dentistry 2 (7) Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in the UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: A.

DENTGP 663 Treatments of Patients with Special Needs 2 (2) K. ESPINOZA Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: A.

DENTGP 664 Dental Urgent and Emergent Care 2 (2) Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: A.

DENTGP 665 4th Year Clinical Competencies Part I (1) Includes critical thinking; ethics, and professionalism; practice management; dental emergencies; pediatric and geriatric dentistry, orthodontics; and dental/medical emergencies. Credit/no-credit only. Offered: A.

DENTGP 670 Advanced Topics in General Dentistry 3 (3) Faculty members from multiple departments will participate with senior dental students in this active learning course, which will inch clinical practice management, ethics and jurisprudence, and coordinated multidisciplinary

care, incorporating diagnosis and treatment planning, medical and surgical management, restorative dentistry, prosthodontics, implant dentistry, periodontics, endodontics, and orthodontics. Online content emphasized. Offered: W.

DENTGP 672 Comprehensive General Dentistry 3 (7) Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in the UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: W.

DENTGP 673 Treatments of Patients with Special Needs 3 (2) Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: W.

DENTGP 674 Dental Urgent and Emergent Care 3 (2) Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: W.

DENTGP 676 RIDE Comprehensive General Dentistry 3 (13-) Students work in a clinical setting, serving a diverse population in rural and/or underserved areas. The RIDE Regional Director and Clinical Site Preceptors (UW affiliate faculty) supervise senior dental students in: practice management, ethics and jurisprudence, evidence-based multidisciplinary care, dx and tx planning, medical & surgical management, restorative, prosthodontic, and implant dentistry, periodontics, endodontics, and orthodontics. Offered: W.

DENTGP 680 Advanced Topics in General Dentistry 4 (3) Faculty members from multiple departments will participate with senior dental students in this active learning course, which will include clinical practice management, ethics and jurisprudence, and coordinated multidisciplinary care, incorporating diagnosis and treatment planning, medical and surgical management, restorative dentistry, prosthodontics, implant dentistry, periodontics, endodontics, and orthodontics. Online content emphasized. Offered: Sp.

DENTGP 682 Comprehensive General Dentistry 4 (7) Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in the UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: Sp.

DENTGP 683 Treatments of Patients with Special Needs 4 (2) Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: Sp.

DENTGP 684 Dental Urgent and Emergent Care 4 (2) Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: Sp.

DENTGP 685 4th Year Clinical Competencies Part 2 (1) In part 2 of this course, students will demonstrate competency as defined by UWSOD and CODA (Standards 2.9, 2.14, 2.16, 2.17, 2.18, 2.19, 2.20, 2.21, 2.22, 2.23 A through O, and 2.24). Students will also demonstrate global competency to practice dentistry. Offered: Sp.

DENTGP 686 RIDE Comprehensive General Dentistry 4 (-13) Students work in a clinical setting, serving a diverse population in rural and/or underserved areas. The RIDE Regional Director and Clinical Site Preceptors (UW affiliate faculty) supervise senior dental students in: practice management, ethics and jurisprudence, evidence-based multidisciplinary care, dx and tx planning, medical & surgical management, restorative, prosthodontic, and implant dentistry, periodontics, endodontics, and orthodontics. Offered: Sp.

Dental Hygiene

D HYG 500 Dental Hygiene Program Seminar (1-3, max. 15) Credit/no-credit only.

D HYG 501 Dental Hygiene Capstone I ([2-8]-, max. 8)

D HYG 502 Dental Hygiene Capstone II (-[2-8]-, max. 8)

D HYG 503 Dental Hygiene Capstone III (-[2-8], max. 8)

D HYG 594 Principles of Teaching for Oral Health Professionals (3) Application of principles of learning to teaching methods and techniques used in education, with opportunity for course planning, demonstration, and practice teaching. Prerequisite: graduate program admission.

D HYG 595 Internship (*, max. 12) Clinical and/or didactic teaching experience or program administration. Teaching and administration responsibilities assigned according to student's previous experience, education needs, and interest. Seminar required. Prerequisite: D HYG 494 or D HYG 594 and permission of instructor. Offered: AWSpS.

Dental Pre-Clinical

DENTPC 510 Dental Anatomy (3) Includes lecture and laboratory content on the morphology and nomenclature of individual teeth of the adult dentition; introduction to tooth histology and function; and the influence of tooth anatomy on clinical dental procedures. Offered: A.

DENTPC 511 Introduction to Periodontics (2) Explores the clinical, histopathologic, and radiographic features of periodontal diseases, principles of preventive periodontics and initial examination of the periodontium. Topics include normal structure, classification and

epidemiology of periodontal diseases, etiologic factors, host response, and pathogenic lesions and periodontal disease. Offered: A.

DENTPC 520 Dental Occlusion (3) Topics include: fabrication of master case models; articulator use and function; contacts in MIP and CO, temporomandibular joint function; mandibular excursive movements; mandibular envelopes of movement; and how anatomical determinants influence occlusal function in all anatomical planes. Offered: W.

DENTPC 523 Dental Materials Science 1 (1) Explores basic concepts of dental materials science, specifically the physical, mechanical, chemical and biological properties, as well as clinical applications of the dental materials commonly used in the fabrication and placement of direct and indirect restorations. Offered: W.

DENTPC 530 Introduction to Operative Dentistry (2) Students become familiar with and obtain expertise in applied dental materials, elementary concepts of tooth restoration, understanding of etiology and preventive aspects of caries, understanding of caries management by risk assessment. Student learn and develop the surgical skills for the restoration of one surface pathologic lesions. Offered: Sp.

DENTPC 531 Introduction to Evidence-Based Dentistry (1) Evidence-based dental decision-making considers patient needs and desires, clinician strengths and weaknesses, and up-to-date research evidence. Students learn about why evidence-based patient care is safer and more effective. They learn how to evaluation scientific evidence on oral health, and apply it in clinical decision making. Offered: Sp.

DENTPC 532 Oral and Maxillofacial Radiology Theory 1 (2) This course prepares students for all courses where radiographs are needed for diagnosis, treatment planning or follow-up. Recognizing normal and aberrant anatomy on intraoral and extraoral radiographs will be covered as well as radiation protection. This will prepare the student for part 2 of the Radiology series (DENTPC 552) on radiographic pathology. Offered: Sp.

DENTPC 533 Dental Materials Science 2 (1) Explores basic concepts of dental materials science, specifically the physical, mechanical, chemical and biological properties, as well as clinical applications of the dental materials commonly used in the fabrication and placement of direct and indirect restorations. Offered: Sp.

DENTPC 534 Introduction to Oral Pathology (3) This is the first course in a three-part series designed to introduce students to oral diseases bridging the field of dentistry to medicine. This course covers oral soft tissue diseases, etiology, pathogenesis, clinical signs and symptoms, histology, laboratory findings (when applicable), and prognosis. Offered: Sp.

DENTPC 535 Removable Partial Denture Design (2) Develops proficiency in basic principles of the designs of removable partial dentures. Offered: Sp.

DENTPC 550 Operative Dentistry 2 (5) Students obtain proficiency in applied dental materials, advanced concepts of tooth restoration, understanding of etiology and preventive

aspect of caries, understanding of caries management by risk assessment. Students learn and develop the surgical skills for the restoration of multi-surface pathologic lesions. Emphasizes ergonomics and ethics. Offered: S.

DENTPC 551 Immediate Dentures (3) Covers the basic principles of immediate denture and the procedures for the fabrication of an immediate denture. Topics include treatment planning; record maintenance; and laboratory steps for the fabrication of the ICD; surgical procedures; and post insertion care and complications. Offered: S.

DENTPC 552 Oral and Maxillofacial Radiology Theory 2 (1) This course covers dental anomalies and pathology of bone and how they present on radiographs of the head and neck region. The students will be taught how to interpret radiographs and how to formulate a differential diagnosis based on the characteristics of the radiographic appearance. Offered: S.

DENTPC 553 Local Anesthesia (3) Covers the pharmacology, anatomy, techniques and clinical practice of local anesthesia. The safe and effective administration of local anesthesia is integral to general dentistry and most specialties. Offered: S.

DENTPC 554 Oral Pathology 1 (2) This course covers common diseases of jaw bones. Each disease will be discussed to include: etiology and pathogenesis, clinical signs and symptoms, histological features, laboratory findings (when applicable), pitfalls in diagnosis and prognosis. Offered: S.

DENTPC 560 Operative Dentistry 3 (3) Students become familiar with very small amalgam and composite class 2 slot restorations and learn the replacement of large cuspal fractures, utilizing pins, slots, grooves, potholes, and endo posts for retention. Also teaches Class 2 intracoronal cast restorations and the restoration of teeth with Class 4 lesions. Offered: A.

DENTPC 561 Fixed Prosthodontics I (2) Students gain knowledge in the principles of fixed prosthodontics for the restoration of damaged tooth surfaces with metal and/or esthetic veneer single tooth restorations as well as become familiar with the material science and use of the various dental materials used in this discipline. Offered: A.

DENTPC 562 Complete Dentures I (3) Deals with the basic principles of conventional complete denture fabrication, as well as the diagnosis and treatment of a completely edentulous patient. Offered: A.

DENTPC 565 Conversations on Dental Practice (1) Provides the specific core content within each of the approximately 30 filaments within the practice management thread. Credit/no-credit only. Offered: A/WSp.

DENTPC 570 Operative Dentistry 4 (2) Explores applied dental materials, advanced concepts of tooth restoration, understanding of etiology and preventive aspects of caries, understanding of caries management by risk assessment. Students learn and develop the surgical skills for the restoration of multi-surface pathologic lesions. Offered: W.

DENTPC 571 Fixed Prosthodontics 2 (4) Explores the planning, restoration and replacement of missing teeth with fixed prostheses, planning and designing for the restoration of endodontically treated teeth as well as become familiar with the material science and use of the various dental materials used in this discipline. Offered: W.

DENTPC 572 Complete Dentures 2 (2) Second of two courses dealing with the basic principles of conventional complete denture fabrication, as well as the diagnosis and treatment of a completely edentulous patient. The instructional material will be presented prior to each laboratory session. Affiliate instructors will supervise the laboratory application of the lecture instruction. Offered: W.

DENTPC 573 Orthodontics 1: Growth and Development of the Face and Dentition (2) Explores principles of facial growth, occlusal development, and diagnosis of the different types of malocclusion. The overall goal is for the student to gain knowledge and skills necessary for the analysis and treatment of malocclusion. Offered: W.

DENTPC 574 Oral Pathology 2 (4) Taught in a clinical-pathological conference (CPC) format, with cases directly building on and supplementing the lecture material covered in DENTPC 534 and DENTPC 554. Each class will start with a short lecture/review of the specific topic, followed by an in-depth discussion of ten clinical cases. Students participate in formulating a differential diagnosis, rendering a final diagnosis based on histology, and offering treatment and prognosis. Offered: W.

DENTPC 575 Removable Partial Denture Technique (2) Prepares the pre-doctoral dental students to evaluate, design, prepare, fabricate and provide maintenance for a removable partial denture, when treating partially edentulous patients during their clinical training. Offered: W.

DENTPC 576 Clinical Oral Radiology (3) Students will train with a virtual reality radiology program, and will be taking X-rays on a dry skull and a DXTTR phantom, which are then evaluated and discussed. Students will learn how to position patients for panoramic radiography and cone beam CT. Students will shadow in the oral radiology clinic. Offered: W.

DENTPC 577 Periodontics 2: Prevention/Periodontics (2) Introduction to prevention in dentistry. Topics covered include examination of the dentition and periodontium, dental disease indices, scaling and root planning instruments and instrumentation, sharpening, and oral hygiene chemotherapeutics. Students prepare for providing patient care in the next course, DENTPC 587-Periodontics 3. Offered: W.

DENTPC 580 Operative Dentistry 5 (3) Explores applied dental materials, advanced concepts of tooth restoration, understanding of etiology and preventive aspects of caries, understanding of caries management by risk assessment. Students learn and develop the surgical skills for the restoration of multi-surface pathologic lesions. Offered: Sp.

DENTPC 581 Fixed Prosthodontics 3 (2) Explores indications, materials selection, fabrication of esthetic veneer restorations for fixed prostheses and the science of color application to esthetic restorations. The rationale is learned for resin-bonded ultraconservative fixed prostheses and

resin or ceramic veneered prostheses. The student will plan and wax an anterior esthetics case. Offered: Sp.

DENTPC 582 Implant Dentistry (2) Explores the basic science of osseointegration, and be able to manage the restorative phase of the partially and completely edentulous patient. Students will learn to use implant components, computer software for the planning and placement of the implants and to restore a single tooth implant in the laboratory. Offered: Sp.

DENTPC 583 Orthodontics 2 (2) Explores the development of the occlusion, diagnosis of different types of malocclusion, and basic principles of biomechanics during orthodontic treatment. The goal is for the student to be able to analyze malocclusions and make appropriate treatment decisions. Offered: Sp.

DENTPC 584 Introduction to Endodontics (4) This introductory course in Endodontics includes both didactic and laboratory components. The didactic component covers the biology, pathology, diagnosis, and treatment of pulpal and periapical pathosis. The preclinical laboratory component covers endodontic treatment techniques using extracted and artificial teeth. The course prepares students for the third-year Endodontic Clerkship. Offered: Sp.

DENTPC 585 Removable Partial Denture Technique 2 (2) Prepares the pre-doctoral dental students to evaluate, design, prepare, fabricate and provide maintenance for a removable partial denture, when treating partially edentulous patients during their clinical training. Whether or not the objective has been met will be determined with written and practical examinations. Offered: Sp.

DENTPC 586 Introduction to Pediatric Dentistry (2) Introduction to clinical pediatric dentistry, including behavior management, oral diagnosis, preventive dentistry, dental anomalies, radiography, anesthesia, restorative procedures, pulpal therapy, space maintenance and traumatic dental injuries in the primary and permanent dentitions. Offered: Sp.

DENTPC 587 Periodontics 3: Prevention/Periodontics II (2) This course is the clinical application of topics covered the prior quarter. Students will see patients for preventive maintenance appointments and will apply knowledge in caries detection and treatment planning, identification of periodontal predisposing factors, dentinal hypersensitivity, and advanced instrumentation. Students will provide patient care in the weekly clinical sessions. Offered: Sp.

DENTPC 588 Patient Advocacy (1-) Introduces clinical patient management and patient-doctor communications. Students gain experience managing a pool of patients, contacting them periodically and monitoring their care throughout their treatment. Students learn how to effectively review the patient EHR, while identifying and facilitating resolution of issues that may present during treatment. Offered: AWSpS.

Dental Public Health Sciences

DPHS 449 P-Directed Studies in Dental Public Health Sciences (*) Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no-credit only. Offered: AWSpS.

Dental Selective

DENTSL 550 Rural/Underserved Opportunities Program Community Rotations (6)

Students gain an early clinical patient care experience with oversight from School of Dentistry affiliate faculty at calibrated community health clinics in Washington and Montana. They work with dentists and dental hygienists, along with dental assistants and staff who perform the support functions necessary to operating a dental clinic. Offered: S.

DENTSL 552 Patient Care Experience Selective (6) Exposes students to an early clinical patient care experience working side-by-side with advanced dental students, and along with staff who perform the support functions necessary to operating a dental practice. Credit/no-credit only. Offered: S.

DENTSL 651 Directed Studies in General Dentistry 1 (2) Additional summer quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general dental practice for the student who wishes or requires an individualized augmentation to the 4th year curriculum. Offered: S.

DENTSL 655 Peer Mentor Interdisciplinary - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Interdisciplinary courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

DENTSL 661 Directed Studies in General Dentistry 2 (2) Provides additional autumn quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general dental practice to the student who wishes or requires an individualized augmentation to the 4th year curriculum. Credit/no-credit only. Offered: A.

DENTSL 662 Advanced Implant Dentistry 2 (1) Offers opportunities for predoctoral students to gain additional knowledge to manage more advanced and complex implant cases. Includes treatment planning and managing the surgical and restorative part of the treatment under supervision of faculty from the three departments. Credit/no-credit only. Offered: A.

DENTSL 665 Dental Photography - Selective (1) Provides students with sufficient knowledge and experience to select and use correct photographic equipment for photographing patients (facial and intraoral views), casts, instruments, x-rays, charts, and objects. Credit/no-credit only. Offered: AS.

DENTSL 671 Directed Studies in General Dentistry 3 (2) Provides additional winter quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general

dental practice to the student who wishes or requires an individualized augmentation to the 4th year curriculum. Credit/no-credit only. Offered: W.

DENTSL 672 Advanced Implant Dentistry 3 (1) Offers opportunities for predoctoral students to gain additional knowledge to manage more advanced and complex implant cases. Includes treatment planning and managing the surgical and restorative part of the treatment under supervision of faculty from the three departments. Credit/no-credit only. Offered: W.

DENTSL 681 Directed Studies in General Dentistry 4 (2) Provides additional spring quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general dental practice for the student who wishes or requires an individualized augmentation to the 4th year curriculum. Offered: Sp.

DENTSL 682 Advanced Implant Dentistry 4 (1) Offers opportunities for predoctoral students to gain additional knowledge to manage more advanced and complex implant cases. Includes treatment planning and managing the surgical and restorative part of the treatment under supervision of faculty from the three departments. Credit/no-credit only. Offered: Sp.

Dentistry

DENT 550 P-Special Studies in Dentistry (*, max. 12) Offered by the various departments from which students may elect study in areas of special interest to them. Includes subject matter applicable to all phases of dentistry. Credit/no-credit only. Offered: AWSpS.

DENT 563 Elements of Conscious Sedation (1-2) Details theory and techniques for rendering oral, inhalation, transmucosal, intramuscular, and intravenous forms of conscious sedation. Focuses on pharmacology and pharmacokinetics of nitrous oxide, benzodiazepines, narcotics, and barbiturates. Addresses usual applications, special considerations, legal issues, and proper record keeping. Emphasizes prevention and management of emergencies. Credit/no-credit only. Offered: A.

DENT 568 Internal Medicine for Dentistry ([1-3]-, max. 6) Review of major organ systems, including normal anatomy and physiology, common pathophysiologies, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Credit/no-credit only. Offered: S.

DENT 663 Treatments of Patients with Special Needs 2 (2) *K. ESPINOZA* Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: A.

DENT 690 P-Extended Clinical Dentistry (1) Educational experiences in clinical dentistry. Available to students who have successfully completed the University of Washington Doctor of Dental Surgery curriculum and seek additional supervised experience in the delivery of oral

health care services within three quarters of graduation and prior to licensure. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A WS pS.

DENT 700 Master's Thesis (*-) Offered: A WS pS.

Endodontics

ENDO 550 P-Directed Studies in Endodontics (*, max. 6) See DPHS 449 for course description. Credit/no-credit only.

ENDO 560 Advanced Endodontic Diagnosis and Treatment (2) Current concepts are presented and discussed relating to the diagnosis and treatment of pulpal and periapical pathosis. Criteria for evaluation of success or failure of root canal therapy are presented.

ENDO 561 Anatomical Basis for Clinical Endodontics (2) Root canal anatomy of significance in clinical endodontics is discussed in a seminar format. Offered: S.

ENDO 562 Anatomical Bases for Surgical Endodontics (2) Diagnosis and treatment of acute symptoms of dental origin, surgical endodontic therapy, traumatic dental injuries, and the relationship between periodontal and pulpal pathosis, including differential diagnosis and appropriate treatment planning.

ENDO 563 Radiographic Interpretation (2) Various aspects of radiographic interpretation of particular relevance to endodontics, including interpretation of normal structures, acquired and developmental abnormalities, infections, sialoliths, dysplasias, cysts, malignant lesions, benign tumors, and various diseases other than tumors.

ENDO 566 Advanced Radiographic Interpretation (2) Various aspects of radiographic interpretation of particular relevance to endodontics, including malignant lesions, benign tumors, various diseases other than tumors, soft-tissue calcifications, and radiographic technique.

ENDO 568 Endodontic Practice Management (1) Essential elements for establishing and managing a successful specialty practice in Endodontics. Prerequisite: ENDO 562.

ENDO 580 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: S.

ENDO 581 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: A.

ENDO 582 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: W.

ENDO 583 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: Sp.

ENDO 584 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: S.

ENDO 585 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: A.

ENDO 586 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: W.

ENDO 587 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: Sp.

ENDO 590 Treatment Planning Seminar (2, max. 16) Weekly seminar to discuss controversial treatment problems, difficult diagnostic cases, and presentation of endodontic treatment cases. Offered: AWSpS.

ENDO 593 Clinical Practice Teaching (1, max. 3) Closely supervised experience in teaching clinical endodontics to the undergraduate dental student. Offered: SpS.

ENDO 594 Current Endodontic Literature (1) A review and critical evaluation of the current literature relative to endodontics. Credit/no-credit only. Offered: AWSpS.

ENDO 595 Endodontic Surgery (2) Reviews biological and technical aspects of endodontic surgery with emphasis on both the classic and current scientific surgical literature. Lectures and topic seminar discussion along with surgical case presentations.

ENDO 597 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching.

ENDO 598 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching.

ENDO 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Adviser. Offered: AWSpS.

ENDO 651 Honors Endodontics - Classical Literature Seminar - Selective (3) This course is one quarter within a series of seminars (ENDO 580, 581, 582, 583, 584, 585, 586, and 587). The literature covered in these seminars review endodontic topics at the graduate level for students in the Advanced Program in Endodontics. In Honors Endodontics, fourth year predoctoral students are given the opportunity to join graduate students and participate in these seminars. Offered: AWSpS.

ENDO 655 Peer Mentor Endodontics - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Interdisciplinary courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

ENDO 658 Endodontic Emergency Rotation (1) Clinical experience in managing and treating patients in pain. Credit/no-credit only. Offered: AWSpS.

ENDO 659 P-Endodontics Extended Learning (*, max. 4) Supplemental work in endodontics to correct an area of student deficiency. Credit/no-credit only.

ENDO 660 Clinical Endodontics (4, max. 32) Clinical diagnosis and treatment of pulpal pathosis and related sequelae. Offered: AWSpS.

ENDO 671 Endodontic Treatment - Selective (1) Several of the different products and techniques available for performing root canal therapy will be introduced to students. The selective is similar to an endodontic continuing education course. Students will use extracted teeth to gain introductory level practical experience with various instrumentation and obturation systems available on the market. Credit/no-credit only. Offered: W.

Oral Biology

ORALB 550 P-Directed Studies in Oral Biology (*, max. 12) Selected readings and seminars on a topic chosen by individual arrangement in collaboration with a faculty member. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

ORALB 574 Clinical Stomatology (3) *Y. RAWAL* Diseases of the oral cavity and jaw are presented as the practitioner encounters them - detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: jointly with O S 574; Sp.

Oral Health Sciences

OHS 201 Planning a Career in Dentistry for the Future (2) *S. Coldwell* Future-oriented overview of important concepts in dental science, contemporary modes of patient treatment, and dental-care delivery systems. Provides exposure to dentistry as a career and prerequisite materials in oral anatomy, epidemiology, and other basic sciences subjects. Open to all second-, third, and fourth-year undergraduate students. Offered: Sp.

OHS 449 Undergraduate Research Topics in Oral Biology (*, max. 30) Individual research on topics selected in collaboration with a faculty member. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

OHS 550 P-Directed Studies in Dental Public Health Sciences (*, max. 17) Students and faculty members who have common academic interests can pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no-credit only. Offered: AWSpS.

OHS 561 Oral Tissue Development, Structure, and Function (3, max. 6) Selected readings and discussions explore recent advances in cellular and molecular biology relevant to oral biology and medicine. Special emphasis on craniofacial and dental development, oral mucosa

and periodontal tissues, salivary gland function, and olfaction and gustation. Prerequisite: permission of instructor. Instructors: Popowics Offered: WSp.

OHS 562 Supervised Teaching in Oral Health Sciences (1-5, max. 10) Directed and guided experience in selected topics in teaching techniques, teaching philosophy, and design of courses given by the Department of Oral Health Sciences. Students are required to participate in lecture and laboratory teaching under the supervision of the course director. Prerequisite: permission of instructor. Offered: AWSpS.

OHS 568 Biostatistics in Dentistry (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Instructors: Spiekerman Offered: jointly with BIOST 510; S.

OHS 569 Advanced Oral Microbiology (2) *Darveau* Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: W, even years.

OHS 571 Clinical Epidemiology and Study Design in Dentistry (2) *Hujoel* An introduction to epidemiological methods as they relate to dental research. Topics covered include the estimation of dental disease occurrence at patient level and site level and the design and analysis of clinical trials with special emphasis on designs unique to dentistry, such as split-mouth designs. Offered: S.

OHS 575 Oral Health Sciences Seminar (1-3, max. 30) Presentation and discussion of current research problems by members of the staff, investigators from other departments in the University, visiting scientists, and trainees. Prerequisite: permission of instructor. Instructors: Presland Offered: AWSp.

OHS 578 Research Techniques in Oral Health Sciences (2-4, max. 15) Introduction to biochemical, analytical, or morphological techniques employed in biochemical cytology or molecular pathology as well as in vitro techniques of tissue and organ culture. Prerequisite: permission of instructor. Offered: AWSpS.

OHS 579 Molecular Biology (2) Applications of molecular biology and recombinant DNA methodologies to oral health science topics of interest in dental sciences. Prerequisite: BIOC 405 or BIOC 406 or equivalent, and permission of instructor. Instructors: Presland Offered: S.

OHS 580 Introduction to Molecular Biology Laboratory (4) Includes laboratory experiences involving use of restriction enzymes, cloning of DNA into plasmid vectors and plasmid DNA isolation, RNA isolation from cells and tissues, PCR, DNA sequence analysis, and web-based DNA, and protein sequence analysis. Prerequisite: either BIOC 405, BIOC 406, or permission of instructor. Instructors: Presland Offered: A, even years.

OHS 581 Secretory Process in Exocrine Glands (1-3, max. 3) *Jeffrey* Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: Sp.

OHS 584 Craniofacial Research Seminar (1) *C. McKinney* This survey course presents a framework for basic and clinical craniofacial research and an overview of the translation spectrum of craniofacial research from basic science and clinical research to product development. Recommended: A background in the conduct of biomedical research would be helpful. Credit/no-credit only. Offered: S.

OHS 591 Advanced Topics in Oral Biology I - Teeth and Bones (1-2, max. 2) *Herring* Covers aspects of biology basic to the dental sciences. Focuses on developmental biology of the craniofacial region, structure and function of teeth, bone, and the periodontium, and dental/oral sensation and pain. Offered: jointly with ORTHO 591; W.

OHS 600 Independent Study or Research (*-) Prerequisite: permission of instructor. Offered: AWSpS.

OHS 650 P-Community Dentistry Clinical Electives (*, max. 12) Credit/no-credit only.

OHS 700 Master's Thesis (*-) Offered: AWSpS.

OHS 800 Doctoral Dissertation (*-) Offered: AWSpS.

Oral Medicine

ORALM 404 Considerations in Care of the Patient with a Disability (*, max. 6) Role of auxiliaries in dental treatment of the special patient, including psychosocial issues, communication techniques, wheelchair transfers; dental prevention, medical and dental management of specific disabilities; drug therapy, sedation, and anesthesia. Offered: AWSpS.

ORALM 460 Clinical Management of Patients with Disabilities (*, max. 10) Participation in chair/bedside dental treatment of a broad range of disabled populations, including homebound and institutionalized patients. Offered: AWSpS.

ORALM 550 P-Directed Studies in Oral Diagnosis (*, max. 12) See DPHS 449 for course description. Credit/no-credit only. Offered: AWSpS.

ORALM 565 Oral Medicine Clinical Conference (*, max. 16) Clinical conference in which diagnostic data concerning patients seen in the oral medicine clinic are presented for evaluation. When possible, the patient is present with laboratory findings, radiographs, and the results of special tests. Offered: AWSpS.

ORALM 570 Oral Medicine and Therapy (2-, max. 6) Lecture directed toward the presentation and discussion of oral diseases and oral manifestations of systemic disease.

Primarily the clinical manifestations' relationship to generalized disease processes and patient management with in-depth discussions of therapy. Offered: AWSpS.

ORALM 576 Oral Medicine Literature Review (1) Seminar analyzes the recent literature concerning the area of oral medicine, diagnosis, and therapy for oral disease. Offered: AWSpS.

ORALM 580 Current Concepts in Oral Radiology (2) Lecture/seminar covering current concepts in oral radiology including technical factors, radiation risks, observer characteristics and variation, radiographic localization, interpretation, and overview of current extraoral techniques. Offered: AWSpS.

ORALM 581 Advanced Seminars in Oral Radiology (2, max. 8) Explores aspects of oral and maxillofacial radiology and related fields. Offered: AWSpS.

ORALM 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

ORALM 601 Oral Medicine Research Seminar (1, max. 10) Presentation and discussion of current research problems by graduate students, faculty, and investigators from other departments in the university. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

ORALM 650 P-Oral Medicine Clinical Elective (1-6, max. 6) Opportunities for students to work in various clinical activities at local hospitals or other sites outside the school. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

ORALM 651 Health and Homelessness - Elective (1-, max. 12) Addresses oral and systemic health issues in the homeless in Seattle. Service based learning and includes presentations, readings, reflections, health education, and dental care delivery with the goal of preparing dental students to work in an interprofessional environment with other healthcare providers. Credit/no-credit only. Offered: AWSp.

ORALM 652 Health Issues in the Homeless and Underserved-Selective (1) Students learn about the causes and challenges of homelessness and lack of access to care and how it affects systemic and oral health. The course includes a minimum of 12 clinical service learning hours in the community (clinical opportunities are provided) as well as online learning. Offered: Sp.

ORALM 653 Advanced Cone Beam CT Imaging and Interpretation - Selective (1) Explores CBCT: plan/follow-up implant placement (with or without surgical guide), assess pathology, assess dento-alveol trauma and explore anatomical variations, in combination with: radiation protection, choice of field of view, resolution, exposure parameters, patient positioning, and interpretation of the acquired images. Offered: AWSpS.

ORALM 654 DECOD Advanced Clinical - Selective (1) Students will engage in clinical activities in special care dentistry, treating patients with developmental and/or acquired disabilities in the DECOD Clinic. Offered: AWSpS.

ORALM 655 Peer Mentor - ORALM - Selective (1) This course allows 4th year dental students to mentor 3rd year dental students during their clinical experiences in Dental Education in the Care of Persons with Disabilities (DECOD). Offered: AWSpS.

ORALM 656 Clinical Oral Medicine Rotation at SCCA - Selective (1) Through clinical experiences, this course provides an overview of medical oncology. Students learn the basic of medical oncology, especially hematopoietic stem cell transplantation. Students will be given the opportunity to participate in the examination and the direction of care in the Oral Medicine Service at the Seattle Cancer Care Alliance. Credit/no-credit only. Offered: AWSpS.

ORALM 657 Botulinum Toxin Therapies in Dentistry (1) Focus on both aesthetic and therapeutic procedures that the dentist uses to treat patients. Administration of BTX-A will be demonstrated for and performed by dental students or graduate students for both treatment of orofacial pain and movement disorders as well as facial aesthetics, including the oral, glabellar, forehead and lateral canthal regions. Credit/no-credit only. Offered: WS.

ORALM 660 Rotations in Medical Disciplines (1-4, max. 24) Clinic, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no-credit only. Offered: AWSpS.

ORALM 664 Dental Care of the Disabled II (*, max. 10) Practicum in chair/bedside delivery of dental care to different disabled populations. Includes rotations to institutions, long-term care facilities, and homebound service, using mobile equipment. Prerequisite: ORALM 564 and permission of instructor. Offered: AWSpS.

ORALM 665 Clinical Oral Medicine (*, max. 33) Clinic involving the diagnostic evaluation of patients with difficult and unusual oral diseases. The student diagnoses and treats the patient. Types of therapy include medications and chemical agents, functional physical therapy, and counseling. Offered: AWSpS.

ORALM 670 Clinical Oral Medicine Teaching (1-4, max. 16) Clinic designed to give the student experience and instruction in the teaching of clinical oral diagnosis. Treatment of emergency dental problems as well as routine and special diagnostic procedures is emphasized. Offered: AWSpS.

Oral Surgery

O S 550 P-Directed Studies in Oral Surgery (*, max. 16) See DPHS 449 for course description. Credit/no-credit only.

O S 574 Clinical Stomatology (3) *Y. RAWAL* Diseases of the oral cavity and jaw are presented as the practitioner encounters them - detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: jointly with ORALB 574; Sp.

O S 654 Clinical Oral Surgery - Selective (1) This course provides students with 40 extra hours of surgical experience above and beyond that which is required for entry into General Practice Dental Clinic. Credit/no-credit only. Offered: AWSpS.

O S 655 Peer Mentor Oral and Maxillofacial Surgery - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Oral Surgery courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

O S 656 Internal Medicine for Dentistry - Selective (2) Intensive review of major human medical diseases including common pathophysiology of diseases, medical interventions including detailed reviews of pharmacologic agents and current therapeutic procedures. Modifications necessary for dental treatment and medical emergency management are also detailed. Diseases of the respiratory, cardiovascular, and endocrine will be emphasized. Credit/no-credit only. Offered: AS.

O S 661 Elements of Moderate Sedation - Selective (1) Theory, techniques for rendering moderate and IV moderate sedation. Airway management, pharmacology, physiology, pharmacokinetics of common sedative agents, their usual applications, special considerations, emergency prevention, recognition and management. Emphasis on monitoring, proper record keeping, legal issues. Credit/no-credit only. Offered: A.

O S 662 Fifty Oral Lesions - Selective (1) This course covers the most important fifty oral diseases focusing on the detection of oral diseases in their early stages. It will cover common diseases, uncommon but important diseases, and, most importantly, problem cases that can be avoided by careful examination and interpretation of the clinical data. Credit/no-credit only. Offered: AS.

O S 672 Intravenous Sedation - Selective (1-2, max. 4) Students will attend clinic and under the supervision of Oral and Maxillofacial Surgery faculty or residents complete preoperative/sedation checklists, start and stabilize intravenous catheters, administer sedative medications, monitor patients during and following sedation, complete recovery evaluation of patients, and discharge patients to the care of their escorts. Prerequisite: Successful completion of O S 656 and O S 661. Offered: WSp.

Orthodontics

ORTHO 449 Directed Studies in Orthodontics (*) Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no-credit only. Offered: AWSpS.

ORTHO 550 P-Directed Studies in Orthodontics (*, max. 6) See DPHS 449 for course description. Credit/no-credit only. Offered: AWSpS.

ORTHO 551 Review of Selected Literature in Orthodontics (1) Students select a topic for review, review appropriate literature, and prepare written critique. Credit/no-credit only. Offered: WSp.

ORTHO 552 Journal Club (1, max. 6) Graduate students review the current orthodontic literature. Credit/no-credit only. Offered: AWSp.

ORTHO 560 Orthodontics Seminar (1-5, max. 25) Methods of diagnosis, analysis, and treatment planning of malocclusion; analysis of methods and theoretical principles used in the treatment of malocclusion. The student presents a detailed case analysis and plan of treatment for each clinical patient supervised. Offered: AWSpS.

ORTHO 562 Orthodontic Theory (1) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 563 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 564 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 565 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 566 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 568 Practice Management (1, max. 3) *S. LAKE, D. TURPIN* Provides intensive instruction in everything necessary to establish and manage successful practice in critical first year post-graduation and beyond. Spring and fall quarters encompass seminars and guest lectures and winter quarter encompasses office visits to practices. Offered: AWSp.

ORTHO 570 Roentgenographic Cephalometry (2) Basic principles, history, and techniques of roentgenographic cephalometry. Offered: AS.

ORTHO 575 Interceptive and Preventive Orthodontics (1, max. 10) Seminar for clinicians in limited-goal treatment of children. Emphasizes public health implications of interceptive orthodontics in reducing disparities and improving compromising malocclusions. Teaches rationale and mechanics of orthodontics in the mixed dentition; and insight to treatment of child. Topics include professional responsibility, cultural competence, nutrition, government aid, and child development. Offered: AWSpS.

ORTHO 580 Functional Cranial Anatomy (2) *Herring* Lecture and laboratory dissection concentrating on clinical and functional anatomy of the head and neck. Offered: S.

ORTHO 582 Interdisciplinary Seminar (1) Orthodontic Diagnosis and Treatment Planning for Interdisciplinary Patients: Four quarters seminar and six clinic courses prepare graduate students in orthodontics, periodontics, and restorative dentistry to care for patients with complex orthodontic needs involving periodontal and/or restorative interaction. Clinical supervision under direction of three instructors who approve treatment plans and direct treatment. Offered: AWSpS.

ORTHO 584 Clinical Management of Cleft Lip and Palate and Craniofacial Anomalies (1) Management of these complex patients involves members of a dedicated, highly specialized multidisciplinary team. Insight gained into specific evaluation and treatment modalities of each discipline through lectures, seminars, assigned readings. Integrated approach to management is illustrated by attendance at craniofacial staffing and clinics. Prerequisite: enrollment in graduate orthodontics program. Credit/no-credit only. Offered: AW.

ORTHO 585 Surgical Orthodontic Diagnosis and Treatment Planning (1) Seminar for orthodontic graduate students and oral surgery residents in comprehensive, integrated diagnosis, and treatment planning for patients with major facial deformities. Offered: AWSpS.

ORTHO 587 Management of Debilitated Dentitions (1-, max. 2) Integrated diagnosis and treatment planning for patients with edentulous spaces, emphasizing use of osseointegrated implants and temporary anchorate devices. Offered: SpS.

ORTHO 589 Applied Psychology in Orthodontics and Pediatric Dentistry (1) Application of psychological theories, research, and intervention strategies to orthodontics and pediatric dentistry. Topics include the principles of behavior change, patient compliance with therapeutic regimens, and motivations for orthodontic treatment. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: A.

ORTHO 590 Scientific Methodology in Dental Research (2) Formulates and discusses hypothetical research projects related to orthodontics. Includes review of the scientific method, evaluation of the dental literature, and discussion of proposed master's degree research projects.

ORTHO 591 Advanced Topics in Oral Biology I - Teeth and Bones (1-2, max. 2) *Herring* Covers aspects of biology basic to the dental sciences. Focuses on developmental biology of the craniofacial region, structure and function of teeth, bone, and the periodontium, and dental/oral sensation and pain. Offered: jointly with OHS 591; W.

ORTHO 597 Preclinical Technique (2) Techniques of construction and manipulation of appliances used in orthodontic therapy for graduate students. Offered: S.

ORTHO 598 Archwire Formation (1) Principles of wire bending and the use of orthodontic pliers. Offered: ASpS.

ORTHO 599 Biomechanics (1) Principles of biologic reactions to application of orthodontic forces. Credit/no-credit only. Offered: W.

ORTHO 600 Independent Study or Research (*-) Managing the experimental protocol; data collection and analysis; and preparation and writing of a thesis or publishable manuscript. Prerequisite: permission of instructor. Offered: SpS.

ORTHO 631 Minor Orthodontic Treatment (1) Clinical treatment of minor orthodontic problems suitable for the general dentist, i.e., direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative or periodontal therapy. Offered: AWSpS.

ORTHO 660 P-Clinical Orthodontics (1-6, max. 24) Clinical application of the techniques in the treatment of malocclusion. Prerequisite: students enrolled in the graduate orthodontics program. Offered: AWSpS.

ORTHO 682 Interdisciplinary Clinic (1) Orthodontic Diagnosis and Treatment Planning for Interdisciplinary Patients: Four quarters seminar and six clinic courses prepare graduate students in orthodontics, periodontics, and restorative dentistry to care for patients with complex orthodontic needs involving periodontal and/or restorative interaction. Clinical supervision under direction of three instructors who approve treatment plans and direct treatment. Offered: AWSpS.

Pediatric Dentistry

PEDO 550 P-Directed Studies in Pediatric Dentistry (*, max. 6) See DPHS 449 for course description. Credit/no-credit only. Offered: S.

PEDO 560 Fundamentals of Pediatric Dentistry (1) Preclinical laboratory, lecture course covering fundamentals of primary care in pediatric dentistry, including behavior management, dental emergencies, prevention, diagnosis and treatment planning, and infection control. Offered: S.

PEDO 570 Pediatric Dentistry Seminar I (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 571 Pediatric Dentistry Seminar II (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 572 Pediatric Dentistry Seminar III (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

PEDO 573 Pediatric Dentistry Seminar IV (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: Sp.

PEDO 574 Pediatric Dentistry Seminar V (2) Principles and theory of child development and behavior management for pediatric patient. Sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 575 Pediatric Dentistry Seminar VI (2) Principles and theory of child development and behavior management for pediatric patient. Sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 576 Pediatric Dentistry Seminar VII (2) Principles and theory of child development and behavior management for pediatric patient. Sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

PEDO 577 Pediatric Dentistry Seminar VIII (2) Principles and theory of child development and behavior management for pediatric patient. Sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: Sp.

PEDO 580 Developmental Disabilities Seminar (1) Multidisciplinary approach to managing children with developmental disabilities. Offered: S.

PEDO 581 Developmental Disabilities Seminar (1) Multidisciplinary approach to managing children with developmental disabilities. Offered: A.

PEDO 582 Developmental Disabilities Seminar (1) Multidisciplinary approach to managing children with developmental disabilities. Offered: W.

PEDO 583 Developmental Disabilities Seminar (1) Multidisciplinary approach to managing children with developmental disabilities. Offered: Sp.

PEDO 584 Pediatric Dentistry Seminar (2) In-depth knowledge and understanding of the topics related to, and supportive, of, the clinical practice of pediatric dentistry.

PEDO 600 Independent Study or Research (*-) Prerequisite: permission of instructor. Offered: AW.

PEDO 650 P-Pediatric Dentistry Extramurals (1-6, max. 6) Clinical extramurals in the field of children's dentistry. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PEDO 660 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

PEDO 661 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: A.

PEDO 662 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

PEDO 663 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

PEDO 664 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

PEDO 665 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: A.

PEDO 666 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

PEDO 667 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

PEDO 668 Clinical Clerkship in Pediatric Dentistry: Yakima Valley (*, max. 5) Comprehensive dental care for economically-disadvantaged children in a rural community health center. Offered: AWSpS.

PEDO 669 Supervised Clinical Teaching (1-3, max. 4) Graduate pediatric dental students provide clinical instruction for predoctoral dental students by supervising clinical sessions. Offered: AWSpS.

PEDO 670 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: S.

PEDO 671 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: A.

PEDO 672 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: W.

PEDO 673 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: Sp.

PEDO 674 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: S.

PEDO 675 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: A.

PEDO 676 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: W.

PEDO 677 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: Sp.

PEDO 679 Care of the Disabled Pediatric Patient (1) Clinical experiences in the management of disabled patients. Offered: S.

PEDO 680 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 681 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

PEDO 682 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 683 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

PEDO 699 Pediatric Orthodontic Clinic (1-4, max. 4) Clinical orthodontic care for pediatric patients. Offered: AWSpS.

Periodontics

PERIO 449 Directed Studies in Periodontics (*) See DPHS 449 for course description. Credit/no-credit only.

PERIO 550 P-Directed Studies in Periodontics (*, max. 6) See DPHS 449 for course description. Credit/no-credit only.

PERIO 561 Periodontal Case Management (2-, max. 8) Didactic presentation of clinical periodontics to provide a comprehensive view of the field and a grasp of modern therapeutics. Offered: AWSp.

PERIO 566 Practice Management (1) Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: PERIO 561. Credit/no-credit only. Offered: S.

PERIO 574 Periodontal Microbiology (2) Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: A.

PERIO 575 Immunologic Aspects of Oral Diseases (2) Acquaints students with basic concepts of immunology and immunopathology. Topics include elements of innate and acquired immunity, genetic bases of antibody structure and function, immunopathologic mechanisms, transplantation immunology, immunologic manifestations in mucocutaneous oral lesions, caries and periodontal disease, principles of vaccination, and critical evaluation of the dental stem cells potential for oral tissue engineering. Offered: A.

PERIO 576 The Molecular and Cellular Biology of the Periodontium (2) Nucleic acid, protein, and carbohydrate biochemistry reviewed. Roles of collagens and proteoglycans in gingival tissues and the organization of oral epithelia discussed. Structures of human and animal periodontal lesions compared. Cellular and molecular inflammatory and immunological mechanisms in periodontal disease discussed. History, classification, and epidemiology of periodontal diseases described. Offered: Sp.

PERIO 577 Review of Literature (2, max. 16) Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures. Offered: AWSpS.

PERIO 578 Implant Literature Review (1) *Verardi* Reviews several topics related to dental implantology such as: history of dental implants, osseointegration, properties of materials, bone

healing, bone augmentation procedures, success rates, pathogenesis of implant failures, and aesthetics in implantology. Discusses the relationship between surgical and restorative treatment phases. Credit/no-credit only. Offered: AWSp.

PERIO 580 Foundations in Implant Dentistry (1) *London, Raigrodski* Details the core surgical and prosthetic considerations in dental implant patient care. Topics include case planning, anatomy, radiography, surgery, componentry, occlusion, and applications for implant dentistry. Offered: S.

PERIO 582 Periodontic Treatment Planning Seminar (1-, max. 12) Weekly seminar involved with the presentation, discussion, and tentative solution of moderate to complex problems in diagnosis and treatment. Offered: AWSpS.

PERIO 585 Periodontal Therapy Seminar (1-, max. 12) Weekly seminar utilizing the case review method and dealing with the treatment of moderate to advanced periodontal disease. Offered: AWSpS.

PERIO 586 Longitudinal Evaluation of Periodontal Therapy (1-, max. 9) Helps to develop in-depth knowledge and analytical skills in estimating prognosis, assessing comprehensive treatment plans, evaluating long-term treatment outcomes, and evidence-based clinical decision making. Offered: AWSp.

PERIO 592 Prescription Surgery (1-, max. 3) Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and simulates an environment in which the student can encounter the problems in communication and patient management that occur in the private sector.

PERIO 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Adviser.

PERIO 651 Surgical Periodontics - Selective (2) This course gives students a greater exposure to comprehensive periodontal diagnosis and treatment planning with an evidence-based rationale, increased exposure to periodontal surgical procedures, and an overview of the specialty as a whole. Pre-approval from the Periodontics Department is required for this course. Credit/no-credit only. Offered: AWSpS.

PERIO 655 Peer Mentor Periodontics - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Periodontics courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

PERIO 659 P-Periodontics Extended Learning (*, max. 4) Supplemental work in periodontics to correct an area of student deficiency. Credit/no-credit only.

PERIO 660 Clinical Periodontics ([2-6]-, max. 60) Clinical experience in diagnosis and treatment of periodontal disease.

PERIO 661 Advanced Root Preparation (1) *Daubert* Advanced skill development in the use of the periodontal probe, gracey curettes, files and instrument sharpening. Includes laboratory sessions on dentofoms leading up to treatment of initial therapy patients. Offered: S.

PERIO 662 Stomatology Clinic (1, max. 4) The diagnosis and treatment of oral and perioral lesions including history taking, biopsies, hematological laboratory tests and chemotherapy. Periodontal therapy in medically compromised patients in the hospital setting. Microscopic review of biopsy specimens. Offered: AWSpS.

PERIO 663 Pre-Prosthodontics Clinical Periodontics (*) Clinical diagnosis and treatment of periodontal disease for nonperiodontics student. Prerequisite: permission of department chairperson. Credit/no-credit only.

PERIO 665 Clinical Practice Teaching (*, max. 9) Supervised experience in teaching clinical periodontics to undergraduate dental students.

PERIO 685 Hospital Periodontics (1) Preparation in periodontics to practice in hospital situations, including experience in operation of nitrous oxide analgesia, general anesthesia, intravenous premedication, treating of out- and inpatients.

Prosthodontics

PROS 560 Complete and Immediate Dentures (2) Lecture/seminar devoted to the diagnosis and treatment of the completely edentulous patient and the immediate denture patient, with emphasis on management of patients with difficulties in treatment. Offered: S.

PROS 563 Maxillofacial Prosthetics I (1) Introductory lecture/seminar series with emphasis on diagnosis and prosthodontic rehabilitative treatment of patients who have experienced trauma or have congenital or acquired defects in the oral region. Offered: S.

PROS 564 Maxillofacial Prosthetics II (1) Introductory lecture series focusing on the prosthodontic rehabilitation of patients with loss and compromise of facial anatomy, i.e., ocular, orbital, nasal, auricular, combination intraoral/extraoral, and other related facial deformities. Offered: A.

PROS 571 Review of Literature Seminar (1, max. 12) Weekly seminar devoted to the review of prosthodontic and related literature. Offered: AWSp.

PROS 572 Special Topics Related to Prosthodontics (1) Lecture-seminar series focusing on relating principles of basic science to clinical application in prosthodontics. A wide and varied range of topics including surgery, psychology, speech, pharmacology, practice management, physiology, temporomandibular/myofascial joint dysfunction. Offered: S.

PROS 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Adviser. Offered: AWSpS.

PROS 651 Intra-Oral Maxillofacial Prosthodontics - Selective (1) This course's focus is oral rehabilitation of oral compromise resulting from congenital anomalies/head and neck syndromes, oral cancer, or trauma. The student is presented with material on oral compromise resulting from radiotherapy, chemotherapy. Implant supported or retained prostheses along with surgical innovations related to micro-vascular graft reconstructions are also presented. Credit/no-credit only. Offered: S.

Restorative Dentistry

RES D 550 P-Directed Studies in Restorative Dentistry (*, max. 6) See DPHS 449 for course description. Credit/no-credit only. Offered: AWSpS.

RES D 570 Review of Literature Seminar (1, max. 6) Continuous weekly seminar devoted to a review of restorative and related literature, and discussion of teaching methods, philosophy of teaching, and treatment. Offered: AWSp.

RES D 580 Restorative Treatment Planning Seminar (1-, max. 8) Continuous weekly seminar to discuss controversial treatment problems and difficult diagnostic cases selected for graduate students. Offered: AWSp.

RES D 582 Prosthodontics Current Literature Review (1) This course satisfies the educational requirement for the resident to have an in-depth knowledge of current literature. Graduate Prosthodontics students will be assigned one article per week from a list of peer-reviewed journals. Each student will present a short (less than 10 min) discussion of the paper along with a written abstract. Offered: AWSpS.

RES D 585 Advanced Dental Materials Science (2) Advanced concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Emphasis also on research design, testing methods, and proper selection of dental materials for clinical practice. Offered: W.

RES D 588 Masticatory Functional Analysis and Occlusal Adjustment (2) Lecture/seminar and clinical sessions in the study of the physiology of occlusion. Pertinent literature reviewed and discussed from the multidisciplinary viewpoint. The clinical sessions include training in masticatory functional analysis and treatment of occlusally related diseases. Offered: A.

RES D 589 Review of Literature in Occlusion (2) Seminar to review pertinent literature in occlusion. Offered: S.

RES D 590 Fundamentals of Fixed Prosthodontics (2-, max. 4) Lecture/laboratory/clinical sessions in the study of gnathological principles and procedures as they pertain to the treatment of comprehensive cases assigned to the students. Use and application of several articulators. Offered: A.

RES D 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Adviser. Offered: AWSpS.

RES D 620 P-Comprehensive Treatment Planning in Restorative Dentistry (3) Orientation to restorative clinical operations, administrative procedures associated with patient management, and formulation of treatment plans. Emphasizes problem-based learning, treatment outcomes, the sequence of clinical treatment, and the diagnosis and management of dental disease. Offered: S.

RES D 650 Restorative Dentistry Clinical Elective (1-6, max. 12) Elective offering in clinical areas related to discipline. Credit/no-credit only. Offered: AWSpS.

RES D 653 Clinical Magnification - Selective (1) Faculty and affiliate members from the Department of Restorative Dentistry and Endodontics will participate with senior dental students in this active learning course, which will include didactic and clinical experiences in the provision of oral health care using high level magnification. Offered: AWSpS.

RES D 655 Peer Mentor Restorative Dentistry - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various per-clinical Restorative Dentistry courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

RES D 660 Oral Rehabilitation ([1-6]-, max. 32) Clinical course to provide experience in diagnosis and treatment of patients requiring restorative procedures from single restorations to complex oral rehabilitative methods. Special emphasis is directed toward the integration of periodontics and occlusion as they relate to restorative dentistry. Offered: AWSpS.

RES D 662 Introduction to CAD/CAM in Restorative Dentistry (1, max. 4) Provides a systematic approach to learn about incorporating digital impression systems and CAD/CAM technology. Discuss ideal tooth preparation for all CAD/CAM restorations, digital impression, virtually design, sintering and staining technique, and selecting the proper ceramic materials and luting agents. Discuss the benefits and drawbacks of these digital technologies and how digital dentistry can be brought into our future practice. Credit/no-credit only. Offered: AW.

RES D 663 Advanced Operative Dentistry through Conservative Cast Gold - Selective (1) This course builds upon, enhances and refines the students Operative Dentistry skill sets via the design, preparation and seating of indirect, conservative cast gold restorations. Credit/no-credit only. Offered: AW.

RES D 672 Direct Gold Restorations - Selective (2) Lectures cover historical information and the technical requirements for commonly used direct gold restorations. Emphasis on the special requirements in cavity detail and insertion methods for successful accomplishment of direct gold restorations. Students will gain experience in the Class 1, Class 5, and Class 6 restorations. Additionally, didactic information will be presented in the Class 6, Class 2, and Class 3 restorations. Credit/no-credit only. Offered: W.

College of Education

College Overview

Dean

Mia Tuan
222 Miller

Associate Deans

Deborah E. McCutchen
Ann O'Doherty
Joy Williamson-Lott

Assistant Deans

Martin Howell
Patrick Sexton

The College of Education is dedicated to equity and excellence in education through the preparation and renewal of education professionals, the promotion of social justice, the advancement of knowledge through research, and the connection of research to inform policy and improve practice. In its graduate programs the College has four broad curricular areas: Curriculum and Instruction, Educational Leadership and Policy Studies, Educational Psychology, and Special Education. Graduate degrees conferred include the MIT, MEd, EdS, EdD, and PhD. Certification can be earned in teaching (elementary, secondary, and special education), school administration (principals, program administrators, and superintendents), and school psychology.

In addition, the College offers three BA degrees: (1) education, communities, and organizations; (2) early childhood and family studies, offered in both the traditional classroom format and through an online degree completion program; (3) early care and education (online option). In collaboration with the College of Arts and Sciences, the College also offers an undergraduate minor in education, learning, and society.

The College of Education at the UW believes that an effective public education system for a diverse citizenry is the cornerstone of a democratic society. To that end, the College dedicates its resources to helping make an excellent education an everyday reality for every student in every community across the state and country. As part of a major university located in a metropolitan area, the College is able to work in collaboration with a number of school districts in the area to provide teaching, research, and field experiences for its students.

Special Offices and Services

The College of Education maintains a number of specialized offices. Among these are the Office of Teacher Education, the Office of Student Services, the Office of Student Diversity and Inclusion, and a Writing Support Center. In addition, the College maintains formal relationships

with a number of school districts in the area to provide research and field experience opportunities for students. Individuals interested in teacher certification, in graduate degree programs, or in the early childhood and family studies major, may visit the College's website, education.uw.edu, or e-mail edinfo@uw.edu, for additional information.

Undergraduate Program

Adviser

206 Miller Hall

edinfo@uw.edu

The College of Education offers the following programs of study:

- Bachelor of Arts degree with a major in education, communities, and organizations
- Bachelor of Arts degree with a major in early childhood and family studies
- Bachelor of Arts degree with a major in Early Care and Education (online option)
- A minor in education, learning, and society (with the College of Arts & Sciences)

Bachelor of Arts

Education, Communities, and Organizations

Department Admission Requirements

1. Satisfactory progress toward completion of general education requirements; minimum 60 credits
2. Completion of one English composition course (minimum 2.5 grade), EDUC 280 (minimum 2.0 grade), and minimum 2.50 overall GPA
3. Application deadlines: April 15 for autumn admission; October 15 for winter admission. Depending on program capacity, applications may be considered after the deadlines.

Information sessions are offered to learn more about the major and how to apply. See schedule at education.uw.edu/programs/undergraduate/eco/admissions

For further information, see: education.uw.edu/programs/undergraduate/eco

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Foreign Language (0-15 credits, depending on placement; foreign language required through third quarter if student did not complete three years in high school)
 - c. Quantitative/Symbolic Reasoning (5 credits)

- d. Writing Courses (10 credits)
 - e. Diversity Course (3 credits)
2. Areas of Knowledge
- a. Visual, Literary, and Performing Arts (VLPA) (15 credits)
 - b. Individuals & Societies (I&S) (15 credits)
 - c. Natural World (NW) (15 credits)
 - d. Areas of Knowledge (15 additional credits from any area)

Courses taken to satisfy admission requirements and language and reasoning skills requirements may also fulfill Areas of Knowledge requirements. Courses used to fulfill major requirements may also fulfill these requirements, including up to 15 credits of EDUC-prefix courses.

Major Requirements

67 credits

- 1. EDUC 280 (2 credits)
- 2. Core Courses (25 credits): EDUC 251, EDUC 370, EDPSY 302/EDPSY 380/EDPSY 404 (one course, depending on life-span emphasis – child, adolescent, or adult development), EDUC 472, EDUC 473
- 3. Concentration Electives (25 credits): See adviser for current list
- 4. Major Capstone Courses (15 credits minimum): EDUC 481, EDUC 482, EDUC 483
- 5. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
- 6. Minimum 45 credits applied to the major taken through the UW

Student Learning Objectives

- 1. Understand social and cultural influences on individuals, communities, and organizations.
- 2. Understand the process of learning disciplinary knowledge and practices, recognizing the relationship between kinds of learning that happen within and across settings, both inside and outside schools.
- 3. Identify community assets and needs for informing research, policy, and practice.
- 4. Critically evaluate research on education, human development, and learning across settings.
- 5. Understand processes for partnering with the community to transform public policy and institutional practices.
- 6. Apply research findings to address problems of practice in schools and organizations.
- 7. Understand protective and risk factors influencing learning and development at different stages in life.

8. Engage in ongoing reflection of identities and biases that affect personal and professional growth, in order effectively to partner with communities.
9. Develop an active understanding of the complex cultural and institutional dynamics shaping educational settings in order to dismantle systemic barriers impacting youth and communities.
10. Demonstrate knowledge and effective practice in community and organizational settings.

Early Childhood and Family Studies

Students participate in fieldwork and/or research throughout their junior and senior years. Alumni pursue careers in social services/mental health, education, childcare, or research. They may also pursue graduate studies in education, speech and hearing sciences, physical therapy, occupational therapy, nursing, psychology, nutrition, and social work.

Department Admission Requirements

1. Satisfactory progress toward completion of general education requirements
2. Admission is capacity constrained, based on the following criteria. Completion of requirements does not guarantee admission.
 - a. Two-to-three page personal statement reflecting an interest in the early childhood and family studies major and a commitment to learning about the field
 - b. Overall academic performance reflected in copies of unofficial transcripts
 - c. Other evidence of interest in and commitment to the field (e.g., work experience, volunteer experience, or internships)
 - d. Grades in any completed recommended courses and courses applied to major requirements
3. Applications due October 15 for winter quarter start and April 15 for autumn quarter start. For current UW students, notification is sent two weeks later; for transfer students, notification is sent after applicants are admitted to the UW. Applications may be considered after the dates above on a case-by-case basis, depending on program capacity.

Students accepted typically have a minimum cumulative 2.50 GPA and a minimum grade of 2.0 for any prior college coursework that can be applied toward the major.

Information Sessions: Information sessions are offered to learn more about the major and how to apply. See schedule at education.uw.edu/programs/undergraduate/ecfs.

For further information see education.uw.edu/programs/undergraduate/ecfs/, or inquire at 206 Miller.

General Education Requirements

See College of Arts and Sciences requirements. A maximum 15 credits in ECFS-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirements.

Major Requirements

80-87 credits

1. *Early Childhood and Family Studies Core Courses (47 credits)*: ECFS 200, NSG 432, ECFS 303, ECFS 311, ECFS 401, ECFS 402, ECFS 419, EDPSY 302, EDPSY 406, EDSPE 304, and either EDUC 305 or EDUC 310
2. *Area of Study (30-46 credits)*: one of the areas below
 - a. Option in core: Minimum 30 credits, 20 taken within the College of Education, to include ECFS 403 and courses from teaching and learning; young exceptional children; cross cultural/multicultural education; human development and learning sciences; family and community engagement/policy; and child and family health. See website for approved list of electives.
 - b. Option in teaching and learning
 - i. ECFS 301, ECFS 312, ECFS 321, ECFS 400, ECFS 410, ECFS 411, ECFS 454, ECFS 455, and ECFS 456
 - ii. At least one from the following: ECFS 480 or EDUC 170
3. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
4. Minimum 40 credits applied to the major taken through the UW

Early Care and Education (Online Option)

Department Admission Requirements

1. Satisfactory progress toward completion of general education requirements
2. Admission is capacity constrained, based on the following criteria. Completion of requirements does not guarantee admission.
 - a. Two-to-three page personal statement reflecting an interest in the early childhood and family studies major and a commitment to learning about the field
 - b. Overall academic performance reflected in copies of unofficial transcripts
 - c. Other evidence of interest in and commitment to the field (e.g., work experience, volunteer experience, or internships)
 - d. Grades in any completed recommended courses and courses applied to major requirements
 - e. Completion of at least 70 transferable credits

3. Application deadlines are posted on the website. Applications may be considered after the deadline on a case-by-case basis, depending on program capacity.
4. This is a limited admission program. Students admitted to the ECFS online program are not allowed to transfer to another onsite or online major/degree program or complete a minor without reapplying to the UW through the normal admission review process.

Students accepted into the major typically have a minimum cumulative 2.50 GPA and a minimum grade of 2.0 for any prior college coursework that may be applied toward the major.

Information Sessions: Offered to learn more about the major and how to apply. See schedule at <http://www.onlinedegreecompletion.uw.edu/events/>.

For further information, see <http://education.uw.edu/programs/undergraduate/online-degree-completion-program/ecfs>, or inquire at 206 Miller.

General Education Requirements

See College of Arts and Sciences requirements. Maximum of 15 credits in ECFS-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirements.

Major Requirements

83-90 credits

1. *Early Childhood and Family Studies Core Courses (49 credits):* ECFS 200, ECFS 201, NSG 432, ECFS 303, ECFS 310, ECFS 311, ECFS 401, ECFS 402, ECFS 419, EDPSY 302, EDPSY 406, EDSPE 304
2. *Area of Study (34-41 credits):* one of the areas below
 - a. Minimum 30 credits to include ECFS 403 and courses from teaching and learning; young exceptional children; cross cultural/multicultural education; human development and learning sciences; family and community engagement/policy; and child and family health. See website for approved list of electives.
 - b. Option in teaching and learning
 - i. ECFS 301, ECFS 312, ECFS 321, ECFS 400, ECFS 410, ECFS 411, ECFS 454, ECFS 455, ECFS 456, ECFS 480
3. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
4. Minimum 64 credits applied to the major taken through the UW Seattle campus

Student Outcomes and Opportunities

- *Learning Objectives:* The early childhood and family studies major immerses students in the study of child and family development and education. Students learn about child development, early learning, and family studies from a variety of perspectives. They

receive a strong grounding in reading and understanding the theory and evidence that provide the foundation for the field and drive current research and policy efforts.

- *Expected Outcomes:* Students apply their knowledge and skill as they work alongside community-based teachers, community leaders, and care providers. The degree provides excellent preparation for a wide variety of careers in early learning, childcare, parent and family support and education, child and community advocacy and organization, and social/mental health services. It also serves as a pathway for graduate studies in education, child and family studies, educational policy, special education, and other areas. This interdisciplinary major is offered at the sophomore, junior, and senior level.
- *Service Learning and Research:* Two sequences of field-based experiences provide students with real life-learning opportunities in community-based early childhood or family support/education settings. Students participate in both an introductory seminar experience as well as a sequenced field experience during their first year in service learning. During the second phase, students participate in a three-quarter senior service learning, research, and senior project that provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs, and/or research settings. The seminar ties together research and practice, demonstrating how research informs evidence-based decision-making in programs and services. Students also receive guidance in career options and current events in the field, tying in major experiences with their own developmental and career goals. Learning objectives are outlined in class.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Department Scholarships:* See [departmental website](#) for undergraduate scholarship information.
- *Student Organizations/Associations:* Associated Students of the College of Education (ASCE) and International Educators of the College of Education (IECE).

Graduate Degree Programs

Graduate Program Coordinator 2
06 Miller, Box 353600
206-543-7834
edinfo@uw.edu

The College of Education currently offers five advanced degrees: Master in Teaching (MIT), Master of Education (MEd), Educational Specialist (EdS), Doctor of Education (EdD), and doctor of philosophy (PhD). The MIT degree is awarded to elementary and secondary certification students. The EdS degree is awarded to school psychology certification students. Graduate students working toward other degrees may specialize in curriculum and instruction, educational psychology, educational leadership and policy studies, or special education.. Questions should be directed to edinfo@uw.edu, or to the [College's website](#)

Master in Teaching

The Master in Teaching (MIT) degree results in a Washington residency teaching certificate for elementary or secondary (specific subjects) school teaching. The program is an integrated sequence of full-time, daytime coursework and field experiences spanning four quarters. Field experiences are in partner schools in the Seattle/Puget Sound area chosen to provide experience working with children from racially and culturally diverse communities.

Admission Requirements

1. Bachelor's degree from an accredited institution with a minimum 3.00 GPA for the last 90 quarter (60 semester) credits
2. Goal statement
3. 40 or more hours in a classroom that most closely matches the subject and grade level the applicant wishes to teach
4. Two letters of recommendation from faculty or professional references
5. Passing scores from all three subtests of the WEST-B examination. Passing scores on the ACT and/or the SAT may be submitted in lieu of the WEST-B.
6. Official transcripts from all community colleges and universities attended
7. Secondary applicants: complete required content courses in the endorsement subject they wish to teach.
8. Elementary applicants: complete prerequisite courses in child development and mathematics for elementary teachers.
9. Secondary and Elementary applicants: complete one prerequisite course in education of an ethnic group.

Degree Requirements

60-101 credits

1. Elementary Education Focus

- a. Courses: EDC&I 324; EDC&I 494; EDC&I 586; EDLPS 496; EDSPE 526; EDTEP 501, EDTEP 502, EDTEP 503; EDTEP 505; EDTEP 511; EDTEP 521, EDTEP 522; EDTEP 523; EDTEP 531, EDTEP 532, EDTEP 533; EDTEP 541; EDTEP 542; EDTEP 543; EDTEP 551; EDTEP 552; EDTEP 601; UCONJ 510.
- b. The current Washington state endorsement for elementary teachers is "elementary education." Graduates may be hired to teach specific or multiple subjects in middle or junior high school through grade 8. Those interested in teaching in the middle schools are encouraged to discuss this option with advisers in the Office of Student Services.

2. Elementary Special Education Focus: EDC&I 324; EDC&I 494; EDC&I 586; EDLPS 496; EDSPE 404; EDSPE 414; EDSPE 496; EDSPE 496; EDSPE 500; EDSPE 513;

EDSPE 514; EDSPE 526; EDSPE 545; EDSPE 601; EDTEP 501, EDTEP 502, EDTEP 503; EDTEP 505; EDTEP 511; EDTEP 521, EDTEP 522; EDTEP 523; EDTEP 531, EDTEP 532, EDTEP 533; EDTEP 541; EDTEP 542; EDTEP 543; EDTEP 551; EDTEP 552; EDTEP 601; UCONJ 510.

3. **Secondary Education Focus:** EDC&I 494; EDC&I 586; EDTEP 551; EDTEP 561; EDTEP 562, EDTEP 563; EDTEP 564; EDTEP 565; EDTEP 571; EDTEP 573; either EDTEP 580, EDTEP 582, EDTEP 584, EDTEP 586, or EDTEP 588; either EDTEP 581, EDTEP 583, EDTEP 585, EDTEP 587, EDTEP 589; EDTEP 591; EDTEP 592; EDTEP 593; EDTEP 595; EDTEP 601; elective outside education

Master of Education

Minimum 45 credits, including minimum 15 credits in a specialized area in education; 9 credits related to, but outside the area of specialization, some coursework outside education; 9 thesis credits or, for the non-thesis option, 9 credits in a field study or other approved project; final examination.

Admission Requirements

1. Baccalaureate degree from an accredited institution
2. Minimum 3.00 GPA for the last 90 graded quarter credits (or 60 semester credits)
3. Transcripts from each college or university attended
4. GRE scores
5. Personal goal statement
6. At least two letters of recommendation
7. Prerequisites stipulated by the area of specialization within the College

Degree Requirements, Curriculum and Instruction Programs

Credits vary, depending on option

1. **Common Area Requirements (18 credits)**
 - a. *Foundations of education (9 credits):* Courses such as history of education, education as a moral endeavor, human learning, curriculum design, special topics in curriculum and instruction.
 - b. *Thesis, non-thesis, or project option (9 credits):* May be satisfied by a 9-credit culminating project or 9 credits at the 500 level or above related to the student's teaching and research interests.
 - c. *Colloquium presentation:* Visual representation of the student's work (usually a poster). Students attend one other colloquium prior to presenting.
2. **Language, Literacy, and Culture Study Option (27 credits)**
 - a. *Core studies (9 credits):* Selected from the following: EDC&I 453, EDC&I 455, EDC&I 460, EDC&I 462

- b. *Assessment and inquiry (3 credits)*
 - c. *Concentrations (15 credits)*: Minimum three courses in the literacy strand and minimum one course in each of the other strands. ESL specialists select minimum three courses in ESL and minimum one course in each of the other strands.
- 3. **Mathematics Education Study Option (27 credits)**
 - a. Minimum 27 credits in mathematics and mathematics education. Courses must be appropriate for future career goals. Of the 27 credits, 9 are chosen from mathematics education courses (below).
 - b. *Mathematics education courses*: EDC&I 478, EDC&I 479; EDC&I 575, EDC&I 576, EDC&I 577
- 4. **Multicultural Education Study Option (30 credits)**
 - a. *Ethnic diversity outside the College of Education (15 credits)*: Courses may be taken from various departments in the College of Arts and Sciences.
 - b. *Multicultural education (15 credits)*: EDC&I 424, EDC&I 569; remainder to be chosen from the following: EDC&I 464; EDC&I 469; EDC&I 474; EDPSY 536; EDLPS 566; EDC&I 573; EDC&I 574
- 5. **Science Education Study Option (Minimum 21 credits)**: Includes courses in fields such as biology, chemistry, physics, earth science, oceanography, or other science-related fields.
- 6. **Social Studies Education Study Option (27-36 credits)**: 12-15 credits of core social studies courses. 15-21 credits of history/social science courses related to teaching interests, or additional educational courses.
- 7. **Teaching and Curriculum Study Option (27 credits)**: Includes 9-18 credits of required study in teaching and curriculum.

Degree Requirements, Educational Psychology Programs

Minimum 45 or 50 credits, to include:

- 1. **Measurement, Statistics, and Research Design Study Option (Minimum 50 credits)**
 - a. *Required courses*: One or more from each of the following content fields with options to consist of courses listed below or alternative courses (including courses outside education) approved by the faculty adviser.
 - i. *Measurement and evaluation*: EDPSY 495, EDPSY 512, EDPSY 584, EDPSY 592, EDPSY 595, EDPSY 596, EDPSY 597
 - ii. *Human development*: EDPSY 502, EDPSY 531, EDPSY 532, EDPSY 582
 - iii. *Cognition and learning*: EDPSY 510, EDPSY 524, EDPSY 525, EDPSY 583, PSYCH 414
 - iv. *Language processes*: EDPSY 520, EDPSY 521

- b. *Research (9 credits):*
 - i. *Thesis option:* Report of a research investigation that requires the student to design and execute an empirical study.
 - ii. *Non-thesis option:* Preparation of a scholarly review of the research literature; should be of publishable quality.
- 2. Learning Sciences and Human Development Option (Minimum 45 credits)**
- a. *Required courses (17 credits):* One or more from each of the following areas
 - i. *Foundations (11 credits):* EDPSY 501; EDPSY 581; EDPSY 502 or EDPSY 503; EDLPS 540, EDLPS 530, or EDLPS 521
 - ii. *Research Methods (6 credits):* EDPSY 490; EDPSY 591; other recommended courses include EDPSY 491, EDPSY 495, EDLPS 588, and EDC&I 581.
 - b. *Strands or Specializations (17 credits):* minimum one course in at least two different strands. Courses for each strand shown on College website.
 - i. *Learning Within and Across Disciplines - Literacy*
 - ii. *Learning Within and Across Disciplines - STEM*
 - iii. *Human Development, Families, and Communities*
 - iv. *Contexts, Culture, and Equity*
 - c. *Research (9 credits)*
 - i. **Thesis option:** Report of a research investigation that requires student to design and execute an empirical study.
 - ii. **Non-thesis option:** Preparation of a scholarly paper of publishable quality.

Degree Requirements, Education Leadership and Policy Studies Programs

48 credits, as follows:

- 1. Common Area and Distribution Requirements (Minimum 18 credits)**
 - a. Social and cultural foundations (6 credits minimum)
 - b. Organizations and policy (6 credits)
 - c. Additional EDLPS courses (6 credits)
- 2. Specialization Requirement (Minimum 9 credits)**
- 3. Breadth Requirement (Minimum 6 credits)**
 - a. Minimum 3 credits in one or more other areas in the College of Education (EDC&I, EDPSY and/or EDSPE)
 - b. Minimum 3 credits outside the College of Education

4. **Research/Inquiry Requirement (Minimum 6 credits)**
 - a. Minimum 3 credits in basic statistics (EDPSY 490 or the equivalent)
 - b. Minimum 3 credits in research/inquiry methods (e.g., EDPSY 588, EDPSY 591, EDLPS 524, EDLPS 535, EDLPS 543, EDLPS 568, or the equivalent)
5. **Completion of Thesis or Non-Thesis Option (Minimum 9 credits)**
6. **Specific courses determined in consultation with adviser**

Degree Requirements, Special Education

48 credits, as follows:

1. **Foundations of Education (6 credits):** Minimum 6 credits of courses in or out of the College of Education, or equivalent
2. **Special Education Major Field (21 credits):** Specific sequence of courses, depending on student's background, educational goals, and type of disabled individual the student wishes to teach
3. **Assessment and Research Methodology (9 credits):** Courses to develop competency in assessment of learners with disabilities and familiarity with research tools
4. **Special Assignments in Special Education (Minimum 12 credits):** From at least two of the following options: EDSPE 500 (1-6, max. 6), EDSPE 600, EDSPE 601 (3-9, max. 9), EDSPE 700 (max. 9). Students entering an EdD or PhD program should select a thesis option.

Education Specialist

Minimum 118 credits

The Educational Specialist (EdS) degree is more advanced than a master's degree but does not constitute doctoral-level study. Generally taken by those who intend to pursue advanced practice in a specialized field such as school administration or curriculum design. In the UW College of Education, only students studying school psychology can pursue the Educational Specialist degree. The school psychology program prepares students to work with the social emotional needs of children and adolescents. School psychologists frequently work in school settings providing assessment, intervention, and consultation services to students, teachers, or parents. The three-year full-time program is comprised of two years of coursework and practicum and a third year 1200-hour internship. The program, approved by National Association of School Psychologists (NASP), also meets the requirements for initial certification (Educational Staff Associate) as a school psychologist in the state of Washington.

Admission Requirements

1. Personal goal statement
2. Three recent letters of recommendation from professors or first-line supervisors
3. Bachelor's degree from an accredited institution

4. Transcripts from each college or university attended
5. Graduate Record Examination (GRE) scores
6. Minimum 3.50 GPA for the most recent 90 graded quarter credits (or 60 semester credits)
7. Employment or volunteer experience in pre-K through 12 schools
8. Interview

Degree Requirements

1. Statistics and Research (6 credits): EDPSY 490, EDPSY 591
2. Cognition and Learning (3 credits minimum): EDPSY 501; EDPSY 502
3. Social and Developmental Bases of Behavior (6 credits minimum): EDPSY 531, EDPSY 581
4. Exceptionality (6 credits minimum): EDSPE 525; one additional EDSPE course in exceptionality, e.g. EDSPE 504 or EDSPE 526
5. Biologic Bases of Behavior (5 credits): EDPSY 577
6. Specialization Seminars (2 credits minimum): EDPSY 570
7. Individual Differences (8 credits minimum): EDPSY 548, EDPSY 552, EDPSY 553
8. Ethics and School Law (3 credits): EDPSY 568
9. Assessment (23 credits minimum): EDPSY 507, EDPSY 564, EDPSY 540, EDPSY 572, EDPSY 573
10. Intervention (13 credits minimum): EDPSY 544, EDPSY 546, PSYCH 543
11. Courses with Practicum Requirements (2 credits minimum): EDPSY 500
12. Consultation (5 credits minimum): EDPSY 551
13. Internship (30 credits minimum): EDPSY 601
14. Case Study Seminar (6 credits minimum): EDUC 750

The EdS degree is awarded upon successful completion of the above course requirements, a 1200-hour internship, and a portfolio examination of applied and clinical work.

Certification: The Washington State approved internship program at the University of Washington is open only to third-year students in the EdS program. Washington State Certification is awarded by passing the Praxis Examination and by completing a 9-month internship of 1200 hours or more (half of which must be in a school setting); 6 credit hours of university case study supervision; 30 hours of internship credit. Students who successfully complete the internship may apply for National Certification as a school psychologist.

Doctor of Education

Prepares professionals whose primary interest is dealing directly with problems of educational practice. The EdD, as a professional degree, focuses on utilization of research and practitioners' knowledge, rather than on production of research knowledge.

This degree requires specialized study with credit in education and related fields, sufficient preparation in research methodology to interpret research findings for use in practice, an internship and leadership training, a general examination, a dissertation on a problem of educational practice, and a final examination. In addition to the traditional professional degree, the College also offers another option for the Doctor of Education that requires a capstone experience (12 credits) rather than a dissertation. See details in NOTE, below.

Admission Requirements

1. Graduate Record Exam (GRE) scores
2. Master's degree or equivalent from an accredited institution
3. Minimum 3.00 GPA for the most recent 90 (60 semester) credits
4. Transcripts (sealed) from each college or university attended
5. Goal statement
6. Three letters of recommendation
7. Resume/curriculum vita
8. Writing sample(s)
9. Interviews
10. Specific programs may have additional admission requirements. Visit the website or contact the program for further information.

Degree Requirements

102 credits, as follows:

1. **Educational Specialization (24 credits):**
 - a. Area of specialization, designed to provide knowledge of the field (9 credits)
 - b. General area or special interests within the area of specialization other than those selected to fulfill the 9 credits above (15 credits)
2. **Related Field(s) (24 credits):** Minimum 12 credits from within education. Credits outside education to complement educational specialization and to include multidisciplinary learning experiences
3. **Research/Evaluation Preparation (9 credits):** To enhance a student's ability to conduct field-based research/evaluation studies
4. **Leadership Training (9 credits):** EDLPS 520, EDLPS 550, EDLPS 560

5. **Supervised Internships and Field Experiences (9 credits):** Internships and field experiences designed to work in education and related field(s), and to conduct field-based research and evaluation studies.
6. **Dissertation (27 credits)**

NOTE: The Doctor of Education degree, offered through the leadership for learning program, focuses primarily on practical application rather than pure research and is a practice doctorate. A dissertation is not required; 12 credit hours of capstone experience are required instead. A corresponding increase in other areas (educational specialization, research preparation, etc.) is required in order to meet the 102-credit-hour requirement for the Doctor of Education.

Doctor of Philosophy

A degree offering preparation for a research career on issues fundamental to education - issues that range from fairly narrow questions about human learning to macro-questions regarding the form of societies' educational institutions. The scope is broad. The degree may be organized around traditional study areas such as educational psychology, curriculum and instruction, special education, or educational leadership and policy. A student may develop a course of study that integrates various elements of more than one study area (e.g., multiethnic education and literacy). One study option is school psychology, which prepares students for the professional practice of psychology with school-age children, as well as for research.

Admission Requirements

1. Graduate Record Exam (GRE) scores
2. Master's degree or equivalent from an accredited institution
3. Minimum GPA of 3.00 for the most recent 90 (60 semester) credits
4. Transcripts (sealed) from each college or university attended
5. Goal statement
6. Three letters of recommendation
7. Resume/curriculum vita
8. Writing sample(s)
9. Interviews

Degree Requirements

Minimum 90 credits

Six academic areas and the dissertation. Although the department prescribes a limited number of required courses, it does require students to demonstrate in-depth knowledge of education and selected related fields. For most students, this means study in a broad area, a specialization within that area, two cognates, and a specialization outside the department.

Degree requirements include a program of specialized study with credits both in education and in other academic units, preparation in research methodology adequate to design and assess research in the field of specialization, sufficient study in cognate fields inside and outside education to ensure that the candidate can place the specialized research in a broader context, a general examination, a research dissertation, and a final examination.

Accreditation

Within the College of Education, a number of degree programs have formal accreditation. The school psychology EdS program is accredited by the American Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). The school psychology EdS program is also accredited by NASP and the Washington State Board of Education for initial residency and continuing/professional teaching certificates and initial/residency certification. Graduates qualify for certification in all states party to the Interstate Certification Compact.

Financial Aid

The College of Education offers a limited number of awards with varying stipends for graduate students in education. Primary consideration is given to doctoral students with a background of successful teaching or administrative experience. Specific information on various types of remunerative appointments for graduate students, amounts of stipends, and application procedures is available at education.uw.edu/admissions/funding-and-financial-aid.

Professional Programs

Professional Certification

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Program-design specialists are available to help with pre-program counseling, long-range planning, applications, registration, referrals to other campus resources, general program advising, and continuing/professional certificate requirements.

Administrator Certificates

Administrator certificate preparation programs for superintendents, principals, and program administrators are offered. The following websites contain specific information about admissions, curriculum, faculty, and general advising:

For principals and program administrators, the Danforth Educational Leadership program, education.uw.edu/programs/leadership/danforth.

For superintendents, the Leadership for Learning program, education.uw.edu/l4l/.

Educational Staff Associate Certificates

Offered for the school psychologist. Information concerning requirements and admission may be obtained from the Office of Student Services, 206 Miller Hall, edinfo@uw.edu.

The College of Education, authorized by the State Board of Education to prepare and recommend individuals for Residency Teaching Certificates, publishes an annual Higher Education Opportunity Act report based on Title II data and available on the College's website: education.uw.edu/my-coe/oir/heoa. The full Title II report may be requested from coeir@uw.edu.

Residency Teaching Certification Program

For individuals desiring careers as elementary or middle/secondary school teachers, or as special education teachers working with students with moderate and severe disabilities or emotional and behavioral disorders, and with infants, toddlers, and preschool children with disabilities. All programs are offered at the master's level. For additional information, e-mail edinfo@uw.edu, or at education.uw.edu/programs/teacher.

An undergraduate or postbaccalaureate program leading to certification in music education, grades K-12, is offered through the School of Music. For additional information contact the School of Music Advising Office, 116 Music, Box 353450, University of Washington, Seattle, WA 98195-3450.

Professional Teaching Certificates

For information on the Professional Certificate Assessment (ProTeach), visit the Office of the Superintendent of Public Instruction (OSPI): www.k12.wa.us/certification/Teacher/Residency3.aspx#Professional.

Endorsements on Teaching Certificates

Teachers holding an initial/residency or continuing/professional teaching certificate may add endorsements to their certificates which qualify them to teach additional subjects. Information is available at education.uw.edu/programs/teacher/endorsements, or the Office of Student Services, 206 Miller Hall, or e-mail at edinfo@uw.edu.

Special Research and Service Facilities

Opportunities exist for students to gain research and service experience through research centers affiliated with the College. Below is a partial list of those centers; visit education.uw.edu/faculty-and-research/centers for a current and complete list.

The Center for Multicultural Education focuses on research projects and activities designed to improve practices related to equity issues, intergroup relations, and the achievement of students of color. Visit education.uw.edu/cme/.

The Clinical Training Laboratory, operating under the aegis of Educational Psychology, offers observation rooms equipped with video recorders where counseling and psychology trainees and clients can be observed and taped through one-way mirrors.

The **Experimental Education Unit (EEU)** offers an interdisciplinary approach to research, training, and service, providing integrated classes for 150-200 young children, toddlers, and infants with disabilities and their typically developing peers, and services for their families. Learn more by visiting education.uw.edu/faculty-and-research/centers/haring.

The National Center for the Study of Teaching and Policy, a consortium of five universities headed by the University of Washington, conducts studies aimed at local, state, and national policy strategies to promote teacher excellence. Visit depts.washington.edu/ctpmail, or e-mail ctpmail@uw.edu.

The Learning Informal and Formal Environments (LIFE) Center is a collaborative effort among three primary partners — the University of Washington, Stanford University, and Stanford Research Institute — as well as other institutions. Purpose of the LIFE Center is to understand and advance human learning through simultaneous focus on implicit, informal, and formal learning, thus cultivating interdisciplinary theories that guide design of effective new technologies and learning environments. Visit education.uw.edu/research/center/life.

Course Descriptions

Curriculum and Instruction

EDC&I 324 Physical Education and Health in the Schools (2) Techniques and procedures for teaching physical education and health in elementary and secondary schools. For students in Teacher Education Program. Credit/no-credit only.

EDC&I 351 Teaching as a Profession (5) I&S, DIV Zeichner Helps students assess the profession of teaching. Explores what becoming a teacher means, assesses the organizational structure of teaching as a career and profession, examines social attitudes about education and the work of teachers, and thinks about teaching as social justice work.

EDC&I 352 Teaching to Change the World (5) I&S, DIV F. Barajas Examines how value structures and political decisions affect systems of education. Considers particular inequalities based on race, class, and gender. Encourages students to see the course as both an academic exercise, and a vantage point for considering their own past and possible future experiences in education.

EDC&I 353 Teaching in the Elementary School (3) Emphasizes selected teaching modes; lesson planning; classroom management procedures; grouping to accommodate pupils with special needs; utilization of learning resources; evaluation of teaching. Attention also given to school culture.

EDC&I 359 Second-Language Learning in Schools and Communities (5) DIV M.

VARGHESE What are the major theories of how languages are learned? How do people, especially children and adolescents, learn a second or third language? What are the major factors (individual, social, racial, cultural, political) affecting this process? Course explores how answers to these assist teachers and community educators. Offered: W.

EDC&I 424 Multiethnic Curriculum and Instruction (3) I&S, DIV Primarily for preservice and in-service teachers who have little or no previous exposure to issues related to ethnicity and schooling. Designed to help teachers better understand the school's role in the ethnic education of students and acquire the insights, understandings, and skills needed to design and implement curricular and instructional strategies that reflect ethnic diversity.

EDC&I 438 Improvement of Teaching: Latin (5) VLPA Offered: jointly with LATIN 475.

EDC&I 453 Immigration and Schooling (5) I&S, DIV A broad framework for understanding the historical, political, legal, policy, and cultural dimensions of schooling for immigrant students in the United States. A general introduction to the issues experienced by culturally and linguistically diverse students.

EDC&I 458 Content Area ESL Instruction (3) Exposes students and engages them in how to support their English Language Learners in their content areas through sheltered instruction, specifically through the framework, Sheltered Instruction Observation Protocol (SIOP). Focuses specifically on the academic language needs of these students.

EDC&I 459 Workshop in Instructional Improvement: Literacy (1-6, max. 18) Study of special topics in literacy with a focus on practical, classroom topics, and application.

EDC&I 460 Early Literacy Instruction (3) Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, comprehension, invented spelling, and writing. Emphasis on classroom instruction strategies for first and second language learners. Offered: A.

EDC&I 461 Materials for Teaching Reading: Children's and Young Adults' Literature (3) Designed to provide acquaintance with materials used in the teaching of reading. Trade books and materials from content areas are examined.

EDC&I 462 Reading Comprehension Instruction in Elementary and Secondary School (3) I&S Research-based practices for explicit teaching of reading comprehension of both fiction and content-area texts including issues of reading strategies, text difficulty, teacher modeling, guided reading, discussion, assessment, and adaptations for struggling students. Offered: W.

EDC&I 464 Educating Native-American Youth (3) Assists students in understanding the North American Indian child from cultural, socioeconomic, and psychological points of view. Provides opportunities for the student to apply knowledge and skills gained in other courses to prepare programs and learning aids relevant to the educational situation of the Indian child.

EDC&I 465 Social Studies Education: Elementary School Programs and Practices (3)

Stresses curriculum patterns, instructional procedures, resource materials, and the selection of content in social studies. For elementary and middle school teachers and students in Teacher Education Program.

EDC&I 468 Workshop in Instructional Improvement: Social Studies (1-6, max. 15)

Individual or group study projects on the improvement of instruction in social studies.

EDC&I 469 Teaching African American Students and Culture (3) I&S

Examination of sociocultural and pedagogical factors that influence African American students' learning styles, opportunities, and outcomes; exploration of ways to reform teaching techniques to better accommodate cultural styles and experiences to improve the educational achievement of African American students. Offered: A.

EDC&I 471 Science Education: Secondary School Programs and Practices (3)

Survey of the status and potential role of science in education; trends and their implications for the teaching of both biological and physical sciences in the junior and senior high schools; representative curricula and related teaching procedures; the psychology of concept formation and problem solving; and organization of science programs.

EDC&I 472 Environmental Education for Teachers (3)

Status, selected problems, and role of environmental education in program of elementary, middle, and junior high schools. Opportunity to examine and receive instruction in use of existing environmental education instructional materials. Instruction is in the spirit of inquiry/discovery.

EDC&I 473 Workshop in Instructional Improvement: Science (1-6, max. 20)

Individual or group study projects on the improvement of instruction in science.

EDC&I 474 Multi-Ethnic Studies: Methods, Content, and Materials (3) I&S, DIV

Designed to help preservice and in-service teachers identify content and materials and devise methods for implementing ethnic studies programs and for incorporating ethnic content into regular K-12 social studies, language arts, and humanities curricula. Special attention is given to teaching about American Indians, Mexican Americans, African Americans, Asian Americans, Puerto Rican Americans, and white ethnic groups.

EDC&I 478 Special Topics in Mathematics for Teachers (2-9, max. 9) NW

Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with MATH 497.

EDC&I 479 Workshop in Instructional Improvement: Mathematics (1-6, max. 20)

Individual or group study projects for the improvement of instruction in mathematics.

EDC&I 482 Educational Technology in Schooling (3)

Introduction to the application of technologies (computers, telecommunications, interactive video) in schools. Designed primarily for pre- and in-service teachers, but of interest to anyone involved in technology in education.

EDC&I 485 Workshop in Instructional Improvement: Educational Communication and Technology (2-6, max. 20) Individual or group study projects on the improvement of instruction through use of educational communication and technology.

EDC&I 488 Educational Technology and Learning in Alternative Settings (3) How educational technology can be used to encourage learning in nonschool environments, such as museums, radio and television broadcasts, parks and recreation centers, and distance education programs. Students investigate one of these areas and prepare a project.

EDC&I 494 Workshop in Improvement of Curriculum (1-6, max. 20) Stresses the application of procedures for curriculum development, maintenance, and evaluation. Opportunities furnished to develop and perfect strategies for program development with occasions given to utilize the strategies in master plan and materials preparation for simulated or real school situations. Specific focus of workshop is determined by instructor or by arrangement with district.

EDC&I 495 Workshop in Improvement of Teaching: Selected Topics, Issues, or Problems (1-6, max. 20) Individual or group projects to help teachers adapt instruction to selected topics, issues, or problems and to identify the approaches and instructional resources that provide the soundest learning experiences.

EDC&I 496 Workshop in Instructional Improvement (2-6, max. 20) Individual or group study projects on the improvement of instruction with attention to designing instructional plans.

EDC&I 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDC&I 500 Field Study (1-10, max. 20) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Curriculum and Instruction in the College of Education.

EDC&I 503 Foundations of Curriculum and Instruction (4) Explores three critical elements of curriculum and instruction: the role of schooling in shaping students' opportunities to learn; content selection and structuring; and instruction.

EDC&I 505 Seminar in Curriculum and Instruction (1-5, max. 20) Seminar on advanced topics in curriculum and instruction. Critical examination of current research and practice. Content varies.

EDC&I 506 Special Topics in Research Methods (1-6, max. 20) Features a special topic in research design and execution such as a particular method of data collection, data analysis, data interpretation, honing a conceptual framework, or reviewing a literature.

EDC&I 507 Methods for Teaching Culturally and Linguistically Diverse Exceptional Learners (3) Focuses on understanding and enacting instructional methods for teaching culturally and linguistically diverse exceptional learners. Prepares educators to teach students who are commonly known as English learners (Els) with exceptional learning/behavior needs and how to integrate intervention, instruction, and service within general and special education classrooms. Offered: A.

EDC&I 508 Integrating the Arts in Teaching and Learning (2) Identify basic elements, principles, related concepts, and vocabulary of the creative arts. Islandwood students will be introduced to various media, lesson planning, and ways of integrating the arts into planning academic and multicultural curricula for K-8 classrooms. Serves as a foundation for integrating arts across the curriculum. Offered: W.

EDC&I 509 Advanced Instructional Strategies (3) Provides opportunities for action research among graduate instructors seeking to apply and refine their practice across a wide variety of educational settings. Students are refining their behavior management; assessment of prior knowledge and new learning; and engagement of students in their learning activities. Recommended: Two quarters of IslandWood's Education for Environment and Community program Offered: Sp.

EDC&I 510 Collaborative Projects in Educational Leadership (4) *J. Haskin* Challenges IslandWood graduate students to develop their leadership potential, either in educational organization leadership or in curriculum and teaching leadership. Emphasis in both strands is placed on collaborative skills and working for social and environmental justice. One strand emphasizes educational leadership and integrated curriculum design. The other emphasizes leadership within a nonprofit educational organization. Recommended: Seven months in IslandWood's Education for Environment and Community graduate certificate program. Offered: Sp.

EDC&I 517 Early Literacy Development and Instruction (3) *R. HUDSON* Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, spelling, and writing. The focus of this class is on typical and atypical development of literacy and instructional methods appropriate to preschool and early elementary. Offered: A.

EDC&I 518 Critical Theories and Approaches in Educational Research (3) Explore range of ideas and tensions in critical theories in educational research and how they have been applied. Examine the work of theorists such as Bourdieu, Hall and theories such as Critical Race Theory and their applications in current educational studies.

EDC&I 519 Second Language Teacher Education and Identity (3) Focus on understanding the landscape of second language teacher education and identity. Chart the research and practice around the professional lives of their teachers and connect it to the academic and social experiences of bilingual/multilingual children and adults in the United States and globally.

EDC&I 520 Current Models in Early Childhood Education (3)

EDC&I 521 Problems and Issues in Early Childhood Education (3)

EDC&I 522 Practicum in the Training of Early Childhood Instruction Personnel (3)

EDC&I 523 Conceptions of Race, Equity, and Social Justice in Mathematics Education (4)

Explores the most current theories shaping the teaching, learning, and schooling of mathematics education. Issues examined include race, equity, social justice, language, class, gender, culture, and power and their intersections with mathematics education.

EDC&I 524 Seminar in Teacher Education (3, max. 6) Focus on recent research, issues, and proposals for future development in teacher education, certification, and continuing professional growth. Alternate year offering focuses on either preservice or in-service issues.

EDC&I 525 Teacher Learning and School Change (3-4) Synthetic study of how researchers understand what enables teachers and schools to transform themselves. Examines how the fields of teacher learning and school change can inform each other in order to enrich research and development in professional and school learning.

EDC&I 526 Inside Teacher Communities (3-4) Examines different perspectives on professional communities, the roles of communities in teachers' learning, the challenges these communities face, and the possible ramifications of professional communities for students. Participants explore practical tools for studying, engaging in, and building professional learning communities in schools.

EDC&I 527 Pedagogies of Professional Education (3) Investigates the theories of learning, models of teaching, and contextual features that impact the design and enactment of a variety of pedagogies used in various professional education programs. Considers what particular pedagogies demand on the part of the professional educator.

EDC&I 528 Foundations of Language, Literacy, and Culture (4) Explores the nature of literacy by examining language acquisition and its impact on literacy; historical theories and research on reading and writing processes; and how recognition and appreciation of cultural variation has changed literacy instruction and curricula over the past decades. Draws on seminal historical and current research. Offered: A.

EDC&I 529 Reading and Writing Connections: Theories and Practices for Instruction (3)

Explores the reciprocity of the reading and writing relationship. considers the connections to language development for young children and English language Learners (ELLs), as well as how reading and writing develop for older students.

EDC&I 530 Approaches to Literacy Instruction (4) Designed to aid experienced teachers who possess background in the teaching of literacy, and presents a variety of approaches and actual analysis of approaches. Prerequisite: teaching experience and a basic course in the teaching of reading.

EDC&I 531 Seminar: Critical Review of Literacy Materials (4) Students formulate and apply criteria for assessing materials, with emphasis on linguistic, cultural, and psychological factors; instruction effectiveness, interest level; and educational objectives. Prerequisite: teaching experience and one basic course in the teaching of reading.

EDC&I 532 Seminar in Literacy Research (4, max. 12) Focuses on understanding scholarly research including various research methodologies (e.g. descriptive, correlational, experimental, quasi-experimental, qualitative) and the research questions they are designed to address. Prerequisite: permission of instructor.

EDC&I 533 Seminar: Conducting Research in Reading (3, max. 6) Students design and conduct original research studies in the field of reading. Emphasis on research rationale, choice of productive research types, and reporting of research results and implications. Prerequisite: EDC&I 532.

EDC&I 534 Reading Comprehension Instruction K-12 (4) Focuses on research-based comprehension strategy instruction and text-based discussion of different types in K-12 classrooms. Examines various comprehension models, strategies for instruction, and assessments of comprehension. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults.

EDC&I 535 Doctoral Seminar in Literacy Research (1-2, max. 18) *H. HEBARD, R. HUDSON, D. MCCUTCHEN, S. VALENCIA* Discusses a literary topic of interest. Instruction and discussion focus on close reading of research from a variety of theoretical and research traditions. Prerequisite: EDC&I 534. Offered: AWSp.

EDC&I 536 Writing Instruction: Research, Theory, and Practice (4) *H. HEBARD* Provides a foundation in writing instruction theory, research, and practice that is relevant for teachers, specialists, curriculum developers, and researchers in literacy. Offered: WSpS.

EDC&I 537 Classroom Discourse (4) *H. HEBARD* Introduction to theoretical and empirical works on the study of classroom discourse. Exploration of the ways in which classroom discourse can support or constrain opportunities to learn. Offered: A.

EDC&I 538 Discourse in the Mathematics Classroom (4) Examines ways of looking at discourse in mathematics classrooms as it relates to teaching practice and student learning. Includes reading both seminal and cutting-edge works in the study of discourse in the mathematics classroom, looking at multiple school contexts and across grade levels.

EDC&I 539 Students' Mathematical Thinking, Curriculum, and Pedagogy (4) Examines ways of understanding the development of students' mathematical thinking. Intensive study of classroom videos, mathematical curricula, and fieldwork enable students to study the relationship among students' mathematical thinking, curriculum, and pedagogy.

EDC&I 540 Immigrant Schooling (3) Educational needs of bilingual students: research findings, special programs, materials, and methodologies that bilingual-bicultural education can provide to meet those needs. Cultural combinations of bilingual populations in American culture; historical, social, and linguistic factors affecting their K-12 education.

EDC&I 542 Approaches to Assessing Second Language Students in K-12 Schools (3) Examines the multiple ways of assessing linguistically diverse students in K-12 schools, including standardized and alternative assessments of these students. Prerequisite: a course in ESL methods.

EDC&I 544 Immigration and Education: Immigrant Student Perspectives (3) Examines the multitude of factors that shape the immigrant student experience in U.S. schools. Takes an interdisciplinary perspective drawing on research from sociology, anthropology, and education, to understand teaching and learning from the perspective of immigrant students. Prerequisite: EDC&I 540 or equivalent.

EDC&I 545 Multilingual Socialization and Development (3) Explores the research base examining second language acquisition, in and out of school contexts. Focuses on the home language practices of linguistically diverse students with the purpose of understanding how these processes influence school learning.

EDC&I 547 Sociolinguistics (3) The study of language in its social context and the study of social life through language. Explores issues in the field of sociolinguistics and sharpens tools to explore educational issues related to linguistic and cultural diversity. Prerequisite: EDC&I 540 or equivalent.

EDC&I 548 Methods in Teaching English as a Second Language (4) Prepares teachers to teach English as a second language to students who are acquiring English in K-12 settings. Emphasizes the scaffolding of the development of the four language domains; listening, speaking, reading, and writing. Prerequisite: EDC&I 540 and EDC&I 545 or permission of instructor.

EDC&I 549 Practicum in Teaching English Learners in Context (3) Provides experiences in the field observing and working with an experienced ELL-endorsed teacher. Consists of observation; planning, teaching, and reflecting on at least two weeks worth of ELL-focused instruction lessons; and continued development of the methodological competencies needed to teach ELL students through seminar sessions at the practicum site.

EDC&I 550 Educational Technology Research (3) Analysis, critique, and practical experience with research studies of all types (experimental, ethnographic, evaluation) concerning questions of interest to educational technologists. Prerequisite: EDC&I 480, a research methods course, or permission of instructor.

EDC&I 551 Introduction to Instructional Design (3) An experimental course in analyzing, designing, developing, and formatively evaluating instructional products using the Instructional Systems Design (ISD) Mode. Also, discussion of how to successfully implement an instructional

product/program within an organization using change management principles. Business and industry training focus.

EDC&I 552 Coaching and Mentoring Adult Learners (3) *S. Bagley* Provides a foundation in coaching, mentoring, and other forms of peer-driven professional development in educational settings, grounded within research on adult professional learning and socio-cultural theories.

EDC&I 553 Collecting, Interpreting and Using Data for School Improvement (3) *S. Bagley* Examines current trends in data use for school improvement. Explores the role of data in supporting and constraining equity in schools; current research on how teachers interact with data; essentials of data literacy; opportunities for teacher learning through data use; and organizational structures found to support or constrain data use in schools. Recommended: Designed for current and emerging teacher leaders who have previous classroom teaching experience or other instructionally-related experience in schools or school districts. Also appropriate for graduate students who are studying teacher learning. Offered: Sp.

EDC&I 554 Bilingual Teaching Methods and Assessment (3) Examines methods and materials in primary language instruction and assessment. Candidates will learn methods for supporting language and content development in students home language. The course uses a target language as a medium of instruction and support in biliteracy development and language instruction in content areas.

EDC&I 556 Elementary School Curriculum (4) Study of elementary school curriculum, its design, rationale, and delivery. Current trends and issues affecting elementary school curriculum analyzed.

EDC&I 558 Secondary School Curriculum (4) Systematic analysis of current curriculum practices, with particular emphasis on the social and historical forces affecting secondary-school curriculum.

EDC&I 559 Principles and Procedures of Curriculum Development (3) Intensive study of basic principles and procedures utilized in development of curricula. Participants have opportunities to apply such procedures in class activities. Attention given to curriculum foundations.

EDC&I 560 Social Studies Education Programs and Practices (3) Stresses powerful instructional strategies, materials, and a selection of content in social studies education. For experienced teachers and non-social studies students in the Teacher Education Program.

EDC&I 561 Instruction for Under-Achieving Readers (2-10, max. 20) Covers instructional techniques addressing the comprehension, decoding, vocabulary, and fluency needs for under-achieving readers as well as strategies for assessing students' reading abilities and planning for instruction.

EDC&I 562 Literacy in the Content Areas (4) *H. HEBARD* Study of reading, writing, listening, and speaking in content area instruction. Offered: WS.

EDC&I 563 Topics in Adolescent Literacies (4, max. 8) *H. HEBARD* Provides an introduction to several important topics in adolescent literacies. Topics covered may change from year to year.

EDC&I 565 Seminar in Social Studies Education: Elementary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 465 or equivalent.

EDC&I 566 Seminar in Social Studies Education: Secondary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research.

EDC&I 567 Current Issues in Social Studies Education (1-3, max. 20) Discussion of problems and issues of current interest and importance in social studies education.

EDC&I 568 Youth Multiliteracies: Multimodality, Culture, and Identity (4) *H. HEBARD* Focuses on the role of multimodal literacies in the lives of diverse youth. Considers the implications of a rapidly changing communication landscape for teaching and learning literacies in schools.

EDC&I 569 Educating Ethnic Minority Youths (4) Intensive analysis and review of the research and curricular programs related to the social, psychological, and political factors that influence the school experiences of ethnic minority youths. Special attention given to instructional and curricular programs for African American, American Indian, Mexican American, Puerto Rican American, and Asian American students. Prerequisite: graduate standing or permission of instructor.

EDC&I 570 Seminar in Science Education: Elementary Emphasis (3) Investigation of curriculum and instruction in science at elementary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 470 or equivalent.

EDC&I 571 Ambitious Learning by Design in Science Classrooms (4) Explores the frontiers of research in science learning environments that are both rigorous and equitable. Allows individuals to wrestle with the current problems of teaching and learning, including how to design opportunities for all students to participate in the discourses and practice of science. Prerequisite: EDC&I 471 or equivalent.

EDC&I 572 Current Issues in Science Education (1-5, max. 6) Discussion of topics and problems of current interest and importance in science education.

EDC&I 573 School Reform and Multicultural Education (3) Similarities and differences among the visions, goals, and strategies of proposals for school reform and multicultural education are analyzed; implications for practice in curriculum and instruction are deduced from these analyses. Prerequisite: one course in multicultural education or permission of instructor.

EDC&I 574 Race, Gender, and Knowledge Construction: Curriculum Considerations (3) Using historical and contemporary perspectives, considers ways in which knowledge related to

race and gender has been and is constructed and the implications of ways in which knowledge is constructed for curriculum reform and teaching. Prerequisite: one course in ethnic studies, multicultural education, or women studies or permission of instructor.

EDC&I 575 Seminar in Mathematics Education: Elementary Emphasis (3) Investigation of curriculum and instruction in mathematics at the elementary-school level; review of research and preparation of proposals.

EDC&I 576 Seminar in Mathematics Education: Secondary Emphasis (3) Investigation of curriculum and instruction in mathematics at the secondary-school level; review of research and preparation of proposals.

EDC&I 577 Current Issues in Mathematics Education (1, max. 20) Discussion of problems and issues of current interest and importance in mathematics education.

EDC&I 578 Multicultural Education Across Nations: Policy and Curriculum Issues (3) *J. BANKS* Acquaints students with concepts, theories, research, and practices in multicultural education, diversity, and citizenship education in nations around the world. Emphasis on how nations educate students for citizenship and balance unity and diversity. Completion of a major paper that examines diversity and citizenship within a nation outside of the United States. Offered: W.

EDC&I 580 Technology in Context (3) Focuses on development of appropriate methods and concepts for research on technology in schools, workplaces, and other naturalistic settings. Fieldwork exercises and reading exemplary studies from multiple disciplinary perspectives. Prerequisite: EDC&I 510, EDC&I 511.

EDC&I 581 Cognitive Systems Design (3) Covers the design of applied technology-based learning systems, informed by current views of learning, technology, and cognition. Emphasizes synthesizing students' knowledge of technology, learning and research in collaborative settings. Prerequisite: EDPSY 501 or permission of Instructor.

EDC&I 582 Design Experimentation and Implementation in Context (3) Introduces theoretical, methodological, and practical issues involved with studying the designed use of learning technologies in real world settings. Focuses on engaging in empirical study of the designed system through partnerships involving education researchers, educators, and technologists. Prerequisite: EDPSY 501 and a quarter of qualitative methods, or permission of Instructor.

EDC&I 585 Technology and the Culture of Education (3) Social impact of technology on education in the United States and elsewhere: social, political, and cultural factors affecting educational communication and technology; roles and relationships among instructors and learners; appropriate technology in developing countries; technology's long-term influence on thought and values.

EDC&I 587 Design and Application of Interactive and Immersive Instructional Systems (3)

Theoretical and empirical questions involved in design of interactive instructional systems using such technologies as virtual reality and CAI. Specific problems inherent in design of complex learning environments: immersion, control, structure, sequence of experiences, navigation, learner guidance. Educational uses of systems. Prerequisite: either EDC&I 583 or permission of instructor.

EDC&I 590 Seminar in Elementary Education (3) Exploration of the philosophy, history, purposes, curriculum, methods, and school organization of elementary education. Prerequisite: elementary-school teaching experience, EDC&I 556.

EDC&I 591 Seminar in Curriculum Research (3) Analysis of past and current empirical, historical, ethnographic research, and philosophical analysis of the curriculum field. Studies considered include research in curriculum development, the curriculum plan, contextual characteristics, and factors related to curriculum participants. Group and individual analyses focus on theory generation and practical applications of research. Prerequisite: EDC&I 559 or permission of instructor.

EDC&I 592 Seminar in Secondary Education (3) Research and study of secondary education. Primary focus on factors involving change in secondary-school curriculum and organization. Prerequisite: EDC&I 558.

EDC&I 593 Seminar in Curriculum: Theory and Practice (3) Investigation of curriculum theory and practice. Consideration is given to theoretical writings that address the relationships between various curricular variables. Theoretical positions are related to curricular practices and innovations. Prerequisite: EDC&I 559.

EDC&I 594 Seminar in Curriculum: Issues, Systems, Models (3) Emphasis on the current approaches to curriculum and curriculum innovation. Attention is given to major educational issues as they affect curricular activity. Prerequisite: EDC&I 559.

EDC&I 595 Seminar in Analysis of Teaching (3) Investigation of the ways in which classroom teaching has been analyzed from a variety of disciplinary perspectives. Focus on methods, findings, and implications of research on teaching. Prerequisite: teaching experience.

EDC&I 596 Seminar in Strategies of Instruction (3) Various instructional models applicable to all levels of schooling. Theoretical and philosophical bases for these instructional models are considered.

EDC&I 597 Curriculum Evaluation Seminar (3, max. 6) Focuses on the evaluators' roles, evaluation theory and models, and selected curricular evaluations. Examples are drawn from the several disciplines commonly offered in the elementary and secondary schools. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisite: EDC&I 559 and permission of instructor.

EDC&I 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Prerequisite: permission of instructor.

EDC&I 600 Independent Study or Research (*-) Prerequisite: permission of instructor.

EDC&I 601 Internship ([1-10]-, max. 20) Prerequisite: permission based on approval of proposal submitted during quarter preceding the internship. Credit/no-credit only.

Early Childhood and Family Studies

ECFS 200 Introduction to Early Childhood and Family Studies (3) I&S Explores current practices, programs, and research in the field of early childhood and family studies. Topics include: child development, early childhood education, parenting and family support, mental health, poverty, and other risk factors. Offered: AW.

ECFS 201 Introduction to Online Learning (2) Introduction to the use of a variety of technologies necessary for completion of the ECFS online undergraduate degree, including video technologies, peer collaboration, and portfolio development. Prerequisite: ECFS 200.

ECFS 301 Early Childhood Curriculum (5) I&S Focuses on developmental foundations and theoretical and researched-based models of early childhood curriculum. Studies approaches to designing, organizing, and implementing early learning programs. Studies curricular content for supporting children's learning and development in physical development; social and emotional development; approaches to learning; cognition; and language and early literacy. Offered: W.

ECFS 303 Service Learning and Research I (1-6, max. 6) Provides students with opportunities in community-based early childhood or family support settings. Includes a field experience and a once-a-week seminar. The seminar ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Prerequisite: ECFS 200 Offered: AWSp.

ECFS 304 Service Learning and Research II (1-6, max. 6) Provides students with opportunities in community-based early childhood or family support settings. Includes a field experience and a once-a-week seminar. Ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Credit/no-credit only. Offered: WSp.

ECFS 305 Service Learning and Research III (1-6, max. 6) Provides students with opportunities in community-based early childhood or family support settings. Includes a field experience and a once-a-week seminar. The seminar ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Credit/no-credit only.

ECFS 311 Teaching from the Inside Out: Being a Resilient Educator (3) I&S Equips students with skills and strategies to optimize their effectiveness as early childhood educators.

Students learn how to be as healthy as possible; possess the confidence to manage stressful situations; connect effectively with others; and focus on the positive aspects of life.

ECFS 312 Positive Behavioral Support in Early Childhood (3-5) *Joseph* Addresses the significance of social and emotional development in the early years. Discusses the adoption of models and evidence-based practice strategies that focus on promoting social-emotional development, providing support for children's appropriate behavior and preventing challenging behavior. Examines how adult resiliency and wellness relates to improved early care and teaching. Offered: AWSp.

ECFS 315 Parenting and Child Development: Influences of Poverty, Immigration, and Culture in the Earliest Years of Life (5) *DIV* Examines how complex social systems, including income inequalities, race/ethnicity, and immigration status contribute to parenting practices and family investment in child development, with a focus on young children from birth through age 8. Offered: W.

ECFS 320 Childhood in Cultural Context: Theory and Practice (5) *I&S, DIV* Focuses on preparing students to work and form reciprocal and meaningful relationships with children and families from diverse cultural backgrounds in the US and abroad by increasing understanding of how environmental factors can impact child development across cultures and increasing cultural responsiveness, including its application in evidence-based practices. Recommended: None Offered: A.

ECFS 321 Engaging Interactions and Environments (3) *I&S* Increases participants' knowledge about the importance of high quality early childhood education, and the specific types of environments and interactions that support the development of children's social-emotional, cognitive, and early academic skills. Offered: AWSp.

ECFS 330 Creative Thinking and Expression in Early Childhood Development and Learning (3) *VLPA L. Dietrich* We examine the critical role of creativity and creative expression in the social, emotional, and cognitive development of young children, discuss processes that encourage creative thinking, and consider the cultural context in which children learn and develop. Issues of equity regarding access to the arts are considered as we explore ways to engage young children in creative thinking and as creators and consumers of the creative arts. Offered: Sp.

ECFS 399 Current Issues and Trends in Early Childhood and Family Studies (3-5, max. 10) *I&S* Explores current theory, research, policy, and practice in early childhood and family studies. Offered: AWSpS.

ECFS 400 Child Observation and Assessment (5) *I&S* Focuses on observation and methods used to study and understand young children in the context of families and society. Develops skills to understand children's behavior in learning environments. Examines approaches to and purposes for assessment and documentation of children's development and learning. Explores approaches to assessing early learning environments. Offered: A.

ECFS 401 Understanding Early Childhood and Family Studies Research (5) I&S, QSR

Focuses on the kinds of knowledge, ways of knowing, and modes of inquiry relevant to early childhood and family studies. Through identifying and reviewing substantive research in their areas of interest, students locate ideas for inquiry within the research literature in early childhood and family studies. Prerequisite: EDPSY 302 and ECFS 303. Offered: A.

ECFS 402 Social Policy and Young Children and Families (5) I&S

Seeks to deepen understanding of contemporary social issues and problems that impact families and young children. Discusses legislation and other policies from a local, national, and global perspective. Explores the complex web of social, private, and governmental organization that impact families and young children. Prerequisite: ECFS 401. Offered: W.

ECFS 403 Senior Capstone (3-5) Students in the Core pathway complete and present a senior project during the final quarter in the major. Provides advanced opportunity to synthesize research and policy perspectives about a topic of relevance to the field of early childhood education and present findings to a panel of peers and colleagues. Prerequisite: ECFS 401. Offered: WSp.

ECFS 410 Laying the Foundation for Reading: Supporting Language and Literacy Development in Preschool (5) VLPA

Increases knowledge about language and literacy developments between ages 3 to 5 and the ways in which these developments are critical precursors to the emergence of and success with formal reading skills, and to build participants' use of evidence-based language and literacy practices within the preschool classroom.

ECFS 411 Fostering the Development of Young Children's Mathematics and Science Knowledge and Skills (5) I&S/NW

Increases knowledge about cognitive developments between ages 3 to 5 and ways in which these developments are critical precursors to emergence and success with later content and skills in mathematics and science. Learn to design and implement effective instructional practices and interactions with children that support their learning and development.

ECFS 412 Learning with Digital Media in Early Childhood (3) Addresses how young children learn basic literacy and mathematics skills, and develop an interest in science from engaging with digital media. Examines how teachers of young children need to be prepared in instructional practices that can enhance learning from media in a developmentally appropriate way.

ECFS 419 Family and Community Influences on the Young Child (5) I&S, DIV Develops an understanding of families of young children from different socio-cultural backgrounds, child socialization and development in family and community contexts (immigrant, refugee, indigenous, special-needs and vulnerable children), parenting across cultures, family processes, family systems theories, socio-cultural theories, and family-child collaborative partnerships using family and community strengths and resources. Prerequisite: EDSPE 304 or EDSPE 404 Offered: ASp.

ECFS 454 Senior Project I (3) First of a three-quarter sequence leading to the completion and presentation of the senior project during spring quarter. Provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs and research settings. Includes a weekly seminar to reflect on and expand on applied experiences. Offered: A.

ECFS 455 Senior Project II (3) Second of a three-quarter sequence leading to the completion and presentation of the senior project during spring quarter. Provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs and research settings. Includes a weekly seminar to reflect on and expand on applied experiences. Prerequisite: ECFS 454. Offered: W.

ECFS 456 Senior Project III (3-5) Third of a three-quarter sequence leading to the completion and presentation of the senior project during the final quarter in the major. Provides advanced opportunities to integrate theory and practice in community-based learning and research experience continues during the quarter. Prerequisite: ECFS 454 Offered: WSp.

ECFS 480 Individualizing Teaching and Learning (5) I&S Introduction to effective practices that support the development of young children. Focuses on evidence-based, individualized instructional methods and strategies used in teaching and facilitation the development of young children in response to both their strengths and needs. Offered: AWSp.

ECFS 495 Advanced Seminar in Early Childhood and Family Studies (3, max. 9) Addresses current topics and critical issues in the field of early childhood and family studies in an advanced seminar format. Offered: AWSp.

ECFS 499 Undergraduate Research (*) Students conducting this research produce a report or a paper setting forth the results of their investigation which should be regarded as a basic part of the independent study plan. Credit/no-credit only. Offered: AWSpS.

Education

EDUC 170 Mathematics for Elementary School Teachers (5) NW Covers basic concepts of numbers and operations. Emphasizes problem solving, communication of mathematical ideas, and analysis of sources of difficulty in learning/teaching these concepts. Offered: WSp.

EDUC 171 Math for Upper Elementary and Middle Grades Teachers (5) NW Covers concepts of numbers and operations, measurement, geometry, and statistics and probability typically taught in the upper elementary and middle grades. Emphasizes problem solving, modeling, communication of mathematical ideas, and analysis of sources of difficulty in learning these concepts.

EDUC 200 Special Topics in Education, Learning, and Society (3-5, max. 15) I&S C. *DAVIS, J. WILLIAMSON-LOTT* Critical examination of current research and practice in education, learning, and society. Offered: AWSpS.

EDUC 205 Selected Readings - An Introduction to Education in the United States (3-5, max. 15) I&S *C. DAVIS, J. WILLIAMSON-LOTT* Introduction to the United States education system, including the theoretical concepts of learning and historical framework that guide practice, policy, and teacher preparation. Explores issues and questions pertaining to United States schools through directed readings, dialogue, individual projects, and group projects. Offered: AWSpS.

EDUC 210 Current Issues in Education (5, max. 15) I&S Covers a current issue and provides the opportunity to read and discuss educational issues with other students and faculty and to learn of opportunities in the College of Education programs. Issues vary by term and faculty. Offered: AWSp.

EDUC 221 Education and the Playfield (3) I&S Examines the intersection of education and sport from early childhood to college experiences. Explores educational themes related to physical development, sport's influence on individual and community development, access to physical activities, equity and inclusion within the sports environment, and the role of sports in social change.

EDUC 231 Developing Youth through Sport and Physical Activity (5) Exploration of the influence of sport and physical activity to positively impact the lives of young people. The concept of 'Sports-Based Youth Development' will be introduced and how educators and leaders can proactively utilize athletics and activities to effectively build social-emotional and bio-physical skills in participants.

EDUC 251 Seeking Educational Equity and Diversity (5) I&S, DIV *J. CHEN* Introduces the need for and challenges in establishing educational equity and diversity. Discussions explore theories, historical trends, and ongoing debates. Readings draw from academic and popular sources, and class sessions include use of multimedia resources and experiential activities. Offered: S.

EDUC 260 The Dream Project: Introduction to Mentoring Strategies (1, max. 8) I&S Introduces equity, access and social mobility, in relation to educational access and post-secondary planning. Frames communication techniques and identity reflection in the context of building skills for mentoring youth from diverse backgrounds. Students will learn about post-secondary planning basics including topics such as the financial aid process, editing personal statements, and writing resumes. Corequisite: EDUC 369. Credit/no-credit only. Offered: AWSp.

EDUC 280 Introduction to Education, Communities, and Organizations: Re-envisioning Education (2) Introduction to the disciplinary fields that constitute the Education, Communities, and Organizations (ECO) major: Human development, learning theory, equity studies, organizational studies, and community engagement. Provides an overview of the ECO major, including core courses, learning objectives, faculty, and community partners. Offered: AWSpS.

EDUC 299 Education, Learning, and Society Colloquium (1) Provides a common learning experience where students learn from researchers and practicing educators about current

pedagogical projects and theories. Fosters self-reflexive projects to build understanding of learning pathways. Credit/no-credit only. Offered: AWSp.

EDUC 300 Special Topics in Education, Learning, and Society (1-5, max. 20) Critical examination of current research and practice in education, learning, and society.

EDUC 301 Introductory Practice in Community Service Activity (1-10, max. 10) Observation and participation in a variety of activities in a K-12 classroom. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDUC 303 BI Leadership Academy II (1-2, max. 6) Second year leadership seminar for Brotherhood Initiative students. This course will serve as a critical examination of leadership theory and practice for civically engaged student leaders. Offered: AWSp.

EDUC 305 The Purpose of Public Schools in a Democracy (5) I&S Explores issues and questions pertaining to public schools in a democratic society through directed readings, dialogue, individual and group projects designed to engage students with a series of crucial issues in public schools. Offered: AWSp.

EDUC 310 Current Issues in Education (5, max. 20) I&S Covers a current issue and provides the opportunity to read and discuss educational issues with other students and faculty and to learn of opportunities in the College of Education programs. Offered: AWSp.

EDUC 315 Issues and Trends of Educational Theory, Research, and Practice (3-5, max. 15) I&S C. DAVIS, J. WILLIAMSON-LOTT Examines issues and trends in the past and present that have influenced or may have the potential to influence the field of education. Research, discussion, and reading assignments enable students to analyze and understand topics such as charter schools, accountability, privatization, national standards, and other topics. Offered: AWSpS.

EDUC 351 Wellness and Education Achievement in Men of Color (5) I&S, DIV J. LOTT Provides an overview of various factors that shape the lives of men of color along the educational pipeline. Includes discussions on the tensions, contradictions, and possibilities. Offered: AWSp.

EDUC 360 The Dream Project: Mentoring and Education Policy (1, max. 8) I&S Discusses social justice topics in relation to mentoring high school students in the US public education system. Expands upon mentoring skills gained in EDUC 260 through focusing on other systems of oppression and guest speakers. Includes diverse perspectives from educators, community partners, and relevant research. Supports students' mentorship on college readiness and other postsecondary pathways. Corequisite: EDUC 369. Prerequisite: EDUC 260 Credit/no-credit only. Offered: AWSp.

EDUC 361 The Dream Project: Special Topics (1, max. 8) I&S Taylor, Twitchell Provides discussion and exploration of a single topic related to social mobility and access to higher

education. Designed for students who have already completed EDUC or EDUC 360 who wish to examine a topic more closely. Corequisite: EDUC 369. Credit/no-credit only. Offered: AWSpS.

EDUC 369 The Dream Project: High School Visits - Field Experience (1, max. 8) Involves weekly travel to local high schools, mentoring students from diverse backgrounds on college readiness and other postsecondary pathways. Corequisite: either EDUC 260 or EDUC 360. Credit/no-credit only. Offered: AWSpS.

EDUC 370 Learning Within and Across Settings (5) Examines learning of disciplinary knowledge and practices, with attention to relations between the kinds of learning that happen within and across settings (outside of schools).

EDUC 401 Practicum in Community Service Activity (1-18, max. 20) I&S Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Maximum of 20 credits from EDUC 401, EDUC 411, and EDUC 421 may apply towards graduation. Offered: AWSp.

EDUC 402 Practicum in Classroom Teaching and Management: Primary (1-18, max. 20) Tutoring and teaching experiences in a primary school setting (grades K-3). Placements made according to participant's interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 403 Practicum in Classroom Teaching and Management: Intermediate (1-18, max. 20) Tutoring and teaching experiences in an intermediate school setting (grades 4-8). Placements made according to participant's interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 404 Practicum in Classroom Teaching and Management: Secondary (1-18, max. 20) Tutoring and teaching experiences in an intermediate school setting (grades 6-12). Placements made according to participant's interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 411 Practicum in Community Service Activity (1-18, max. 20) VLPA Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Maximum of 20 credits from EDUC 401, EDUC 411, and EDUC 421 may apply towards graduation.

EDUC 421 Practicum in Community Service Activity (1-18, max. 20) VLPA/I&S Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required.

EDUC 451 The Role of Sport in Social Justice and Change (5) Examination of diversity themes (race, class, gender, sexuality and physical ability) together with historical sport events

through a social justice framework. The role and influence of sport in our society will be examined, with a focus on influences of power, institutions, and systems. Offered: W.

EDUC 472 Individuals, Groups, Organizations, and Institutions (5) I&S Examination of current research and practice in the field of individual, group, and organizational theory, with special focus on application to educational and community-based organizations.

EDUC 473 Community Based Research and Practice (5) Focuses on understanding the principles and practices required for effective and equitable community-based research and practices in education. Prerequisite: EDUC 251; EDUC 472.

EDUC 481 Community-Based Capstone I (5) Prepares students for intensive community-based internship in EDUC 482 through creation of literature review and capstone project proposal. Prerequisite: EDUC 473.

EDUC 482 Community-Based Capstone II (5-12) Intensive community-based internship experience, including the completion of a substantial product that contribute to the organization's mission and current initiatives. Prerequisite: EDUC 481. Credit/no-credit only.

EDUC 483 Community-Based Capstone III (5) Culminating seminar to present community-based project, situate community work within course of study and prepare for graduate study and/or job market. Prerequisite: EDUC 482.

EDUC 502 Advanced Practicum in Classroom Teaching and Management (1-18, max. 20) In-depth classroom practicum experiences to certificated teachers working on additional endorsements. Arrangements must be made prior to enrolling with an adviser in the Teacher Education Office. Offered: AWSpS.

EDUC 700 Master's Thesis (*-) Prerequisite: permission of faculty adviser and Graduate Program Coordinator. Offered: AWSpS.

EDUC 750 Capstone Experience (2-10, max. 30) Provides advanced opportunities to integrate theory and practice through a capstone learning and research experience. Prerequisite: permission of faculty adviser and Graduate Program Coordinator. Credit/no-credit only. Offered: AWSpS.

EDUC 800 Doctoral Dissertation (*-) Prerequisite: permission of Supervisory Committee Chairperson and Graduate Program Coordinator. Offered: AWSpS.

EDUC 801 Practice Doctorate Project/Capstone (*-) Prerequisite: permission of Supervisory Committee Chairperson and Graduate Program Coordinator. Offered: AWSpS.

Educational Leadership and Policy Studies

EDLPS 302 Introduction to Education Policy: Research, Theory, and Practice (5) M. Sun Introduces students to basic research, theory, and practice about educational policy and its

influence on student educational outcomes, as well as longer-term outcomes such as future earnings. Discusses the ways in which educational inequalities seen in settings from early-childhood through university contribute to broad social and economic inequality. No prior knowledge or experience is required. Offered: Sp.

EDLPS 444 Constitution and American Public Education (3-6, max. 6) I&S Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with LAW 444.

EDLPS 458 Education in the Forming of American Society (5) I&S *Beadie* Covers the development of American education in cultural context; history of schools and non-school learning from colonial period to the twentieth-century; apprenticeship and learning societies; community and market-based schooling; liberal learning and the rise of the university; and schools as agencies of economic and political integration and mediators of culture and social status. Offered: jointly with HSTAA 458.

EDLPS 459 History of American Education Since 1865 (3) I&S Development of American education in cultural context: progressive education, recent criticism, continuing issues and trends. Offered: jointly with HSTAA 459.

EDLPS 479 Crucial Issues in Education (3) Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns.

EDLPS 496 Workshop: Education Programs and Problems (1-6, max. 10) Study of such topics as planning, development, supervision, organization, operation, or evaluation of current or emerging programs or problems in education.

EDLPS 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDLPS 501 Introduction: Leadership Beyond the Classroom (3-6, max. 6) First course in principal certification program; explores Washington state laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to the Danforth Principal/Program Administrator Preparation Program.)

EDLPS 502 Leadership Core ([3-6]-, max. 6) Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and

seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 503 Leadership Core (-[3-6]-, max. 6) Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Danforth Principal/Program Administrator Preparation Program.

EDLPS 504 Leadership Core (-[3-6], max. 6) Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Danforth Principal/Program Administrator Preparation Program.

EDLPS 505 Transition to Leadership (1-, max. 3) Designed for students in the Danforth Educational Leadership Program. Introduces students to applied educational research concepts; how to conduct inquiry project(s) within schools, with a focus on equity; and to write a research paper around the inquiry project. Prerequisite: admission to Danforth Principal/Program Administrator Program.

EDLPS 506 Intercollegiate Athletic Leadership: Foundations of Leadership (3) S. LOPEZ Focuses on theoretical frameworks and research used to explore athletic leadership within higher education and issues driving athletic department policies and practices. Students develop skills and strategies for leadership and decision-making that enhance student-athlete opportunities and enrich the role of athletics within the educational experience. Offered: S.

EDLPS 507 Intercollegiate Athletic Leadership: Coaching Philosophy and Pedagogy (3) S. LOPEZ Helps athletics coaches develop skills and strategies for decision-making that enhance student-athlete opportunities and enriches the role of athletics within the educational experience. In addition to examining coaching philosophy and mission, students learn and practice basic instructional techniques and coaching pedagogy. Offered: S.

EDLPS 508 Intercollegiate Athletic Leadership: Development and Fundraising in Higher Education (3) Covers the importance of a comprehensive development plan for the university and intercollegiate athletic department, along with the basic components of development including research, solicitation, stewardship, annual campaigns, and major gifts. Also explores marketing, promotions, sponsorships and communications departments. Offered: S.

EDLPS 509 Intercollegiate Athletic Leadership: Leadership and Management Capstone (2) Explores the breadth of athletic management through leadership lens. Explores organization mission and culture, while examining their own leadership styles and practices. Participation in

case studies, leadership training, crisis management exercises, and other activities designed to analyze and respond to real-world situations. Offered: S.

EDLPS 510 School Finance (3) *M. PLECKI* Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

EDLPS 511 School-Community Relations (3) Examines the dynamics of the interface between the public schools and the community. Special attention is given to the findings of research in relation to school-community power, types, and organizational influences.

EDLPS 512 Intercollegiate Athletic Leadership: Events and Facilities Planning and Management (3) *H. OLSON* Athletic departments must plan and manage a variety of events including team practices, competitions, alumni activities, hosted tournaments, and outreach activities. Engages students in understanding the planning process and operations around event production, facilities management, staffing, scheduling, and other event services. Also examines capital planning. Offered: A.

EDLPS 513 Intercollegiate Athletic Leadership: Marketing and Communications in Intercollegiate Athletics (3) *G. GREENE* Participants learn the inner workings of a sports organization, gaining broad insight into the areas such as: media relations, public relations, sales, recruiting, branding, sponsorship, ticket sales, event promotions, the use of social media. Students strategize and practice communication an effective message delivery through a variety of mediums. Offered: A.

EDLPS 514 Intercollegiate Athletic Leadership: Informing Policy and Decision-Making with Data (3) *J. HOFFMAN* Focuses on methods of assessment and evaluation with a focus on strategic planning and decision-making, accountability systems and assessment-driven decision-making. Students learn to use practical statistical skills, with an emphasis on the use and interpretation of data to guide decision-making. Offered: W.

EDLPS 515 Intercollegiate Athletic Leadership: Ethical Leadership in Collegiate Athletics (3) Examination of procedures and techniques pertinent to the management of organizational conflict. Among the areas covered are collective bargaining, grievance procedures, mediation, fact finding, and arbitration.

EDLPS 516 Special Education and the Law (3) *Brown* Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered: jointly with EDSPE 504.

EDLPS 517 Intercollegiate Athletic Leadership: Physical Training and Preparation (3) Athletics coaches work to develop a student-centered training program that maximizes athlete performance and wellness. Students explore leadership, policy, and program planning and implementation based on human development theory and current issues with sport performance. Offered: A.

EDLPS 519 Special Topics in Educational Leadership ([0-10]-, max. 20) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Topics vary.

EDLPS 520 Education as a Moral Endeavor (3) *J. WILLIAMSON-LOTT* An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions.

EDLPS 521 Philosophy of Education (3) *D. KERDEMAN* Philosophy of education considered as a study of the conceptual basis for educational policy and practice. Emphasis on relationships between enduring educational problems and fundamental philosophic issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

EDLPS 522 Social Science, Social Justice, and Qualitative Research (3) *D. KERDEMAN* Intensive study of the writings of selected contemporary philosophers of education. Offered: WS.

EDLPS 524 Seminar in Philosophy of Education (3, max. 6) *D. KERDEMAN* Philosophical examination of ways in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives. Offered: WS.

EDLPS 525 Educational Inquiry (3) *D. KERDEMAN* General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Prerequisite: doctoral status in education. Credit/no-credit only. Offered: A.

EDLPS 526 Educational Inquiry (3) *D. KERDEMAN* General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Prerequisite: doctoral status in education. Credit/no-credit only. Offered: W.

EDLPS 528 Current Issues in Graduate Education (3) *M. NERAD* Examines recurrent forces impacting U.S. graduate education including but not limited to research funding, intra-institutional pressure, student unions, and accountability. Analyzes the current literature from different perspectives: historical, psychological, sociological, economic, and educational to illuminate the complexities of graduate education.

EDLPS 530 History of Education (3) *N. BEADIE* Historical survey of education. Emphasis on relationship between idea and practice. Topics include education and colonialism, formation of

state school systems, progressive education, equal educational opportunity, changes in textbooks and curricula, education and social structure, and education in the history of cultures.

EDLPS 531 History of American Higher Education (3) Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

EDLPS 535 Historical Inquiry in Education Research (3, max. 6) *N. BEADIE* Methods and critique of historical research in education. Examination of landmark works in education history and historiography. Hands-on experience framing historical questions, finding historical sources, using historical evidence, substantiating historical claims, and addressing issues in the history of education.

EDLPS 536 Historical Problems in the Transfer of Culture (4) *N. BEADIE* Provides an analysis and interpretation of the history of education in its broadest sense: the transfer of culture across generations. Pays special attention to issues of cultural conflict, cultural change, and curricula as representations of culture. Examines problems of evidence and interpretation in exemplary historical works.

EDLPS 537 Perennial Debates in the History of Education (3) *J. WILLIAMSON-LOTT* Analysis of the historical underpinnings of debates about educational issues.

EDLPS 538 Education for Liberation (3) *J. WILLIAMSON-LOTT* Analyses of the different educational histories of American ethnic, social, gender, and religious groups and how they relate their own definitions of "education for liberation."

EDLPS 539 History of Urban Education (4) *Beadie* Examines the complex ways that race, class, real estate interests, the quest for social mobility, and a range of government policies have interacted to structure the social and spatial distribution of educational opportunity in cities historically. Includes a comparative historical analysis of urban case studies, including Seattle.

EDLPS 540 Sociology of Education (3) Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.

EDLPS 542 Seminar in Educational Sociology (3) Application of sociological principles to school problems; individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees.

EDLPS 544 Comparative Education: Introduction to Concepts and Methods (3) Introduction to research methods used in comparative education studies. Considers ways to study familiar and unfamiliar contexts, identifies the common pitfalls of international comparisons. Reviews ethnomethodological tools of interview construction, cross-cultural observation

strategies, documentary analysis. Education policy and practice is primary focus; useful for comparing other public policy issues internationally.

EDLPS 545 Knowledge and Data in Relation to Action ([0/3]-, max. 3) Introduces Leadership for Learning (L4L) students to systematic inquiry - to fundamental ideas about knowing and knowledge, data and evidence, and to the applications of these ideas in settings that invite leadership action to address educational issues. Prerequisite: admission to the Leadership Learning program.

EDLPS 546 Leadership Inquiry I: The Design of Research on Local Problems of Practice ([0/3]-, max. 3) Examines evaluation design, action research, critical inquiry, and mixed method research. Equips L4L students to recognize and create viable, rigorous designs for action-oriented research into local problems of practice. Prerequisite: admission to the Leadership Learning program.

EDLPS 547 Inquiry and Data-Informed Leadership I ([0/3]-, max. 9) Deepens students' understanding of a cycle of inquiry approach to strengthen their leadership, with a particular emphasis on working with evidence from a systemic, equity, and excellence stance. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 548 Inquiry and Data-Informed Leadership II ([0/3]-, max. 9) Strengthens students' engagement with and application of cycle of inquiry approach to their leadership practice. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 549 Special Topics in Educational Studies (1-6, max. 20) Readings, lectures, and discussions pertaining to significant and enduring ideas in the philosophy, history and sociology of education. Specific topics are critically examined in light of contemporary problems in education. Topics vary.

EDLPS 550 The Dynamics of Educational Organizations (4) Exploration of the literature in organizational theory and leadership, the assumptions that underlie the development of various approaches to organizational theory and how these approaches are applied, and an acquaintance with different conceptual frames that can be used to determine how to improve and change organizations.

EDLPS 551 Organizational Theory and Educational Change (4) Introduces students to the interdisciplinary research literature on organizations and its applicability to the research and practice of educational organizations. Engages students in understanding and critiquing organizational research and using it to develop conceptual frameworks to guide educational research and practice.

EDLPS 552 Organizational Change in Education (3) Change and innovation in educational organizations. Theoretical approaches include sociopsychological, rational planning, political perspectives, and those associated with notion of organized anarchies. Specific topics related to change and innovation (e.g., roles of beliefs, symbols and norms, diffusion of innovations, and research issues).

EDLPS 553 Human Resources in Educational Organizations (3) Analysis of factors involved in human resource problems related to operation of educational organizations. Motivation, perception, communication, role analysis, and dynamics of groups are studied through use of cases and seminal literature.

EDLPS 554 Professional Growth Planning I (5) Supports students' professional growth and development, as simultaneously builds a professional culture and network among cohort members to maximize student success in the program. Prerequisite: Leadership for Learning EdD students only. Credit/no-credit only. Offered: S.

EDLPS 555 Professional Growth Planning II (5) Supports students' professional growth and development, and scaffolds the internship and capstone portfolio processes within a professional culture and network that maximized student success in the program. Prerequisite: Leadership for Learning EdD students only. Credit/no-credit only.

EDLPS 556 Leadership for Equitable Systems I ([2-6]-, max. 9) Supports students in taking a systemic approach to their leadership, regardless of their formal position. Major topics include resource allocation and an introduction to policy design and implementation. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 557 Leadership for Equitable Systems II ([2-5]-, max. 9) Supports students in taking a systemic approach to their leadership, regardless of their formal position. Major topics include governance, collaborative decision-making, and the design and redesign of organizations. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 558 Introduction to Qualitative Research Methods in Education (3) *A. ELFERS* Provides a basic overview of qualitative research methods. Covers the purpose, design, and conduct of qualitative research.

EDLPS 560 Educational Policy Studies and Practice (3) *M. Sun* An introduction to key policies, reforms, and issues in education, with a central focus on policy actors, instruments, and actions in promoting excellence and equity in education. We discuss theoretical frameworks and analytical models to examine research studies and practice in U.S. schools and beyond Offered: A.

EDLPS 561 Education Policies and Leadership in Political Context (3) Systematic consideration of the structure and function of educational policies and problems of research in political context.

EDLPS 562 American School Law (3) Examination of persistent legal issues, including an analysis of how these issues are manifest in public policy debates.

EDLPS 563 Education, The Workforce, and Public Policy (4) Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, and among the various levels of

the education system, underutilized workers, race and gender issues, and the role of education and training in economic development. Offered: jointly with PUBPOL 571.

EDLPS 564 Seminar in Economics of Education (3) *M. PLECKI* Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The economics of public education. Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

EDLPS 565 Race, Equity, and Leading Educational Change (3) An introduction to key leadership theories, research, and practice, with a central focus on issues of race, class, power and privilege in addressing educational inequities. Applies a leadership lens to examine research and problems of practice in organizational transformation in U.S. schools and educational organizations.

EDLPS 566 Education Policy Serving Disenfranchised Groups (3) Examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminar members critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

EDLPS 567 Education Policy and the Improvement of Teaching and Learning (3) Examines connections between policies and classroom practice, in P-12 and higher education settings. Of particular concern is the capacity of policy to improve the quality of curriculum and instruction. Students design and critique policies, drawing on research and feedback from policymakers.

EDLPS 568 Policy Evaluation in Education (3) Examination of methods for evaluating educational policies across the educational continuum. Students design and conduct a policy evaluation which draws on the policy evaluation literature. Examination of the uses of policy evaluation information in shaping organization-decision making is also included.

EDLPS 569 Issues in P-12 School Reform (3-5, max. 20) *Copland, Knapp* Offers rigorous ways to explore the meaning and action implications of contemporary reform movements in the P-12 public school system. Examines a different topic each quarter concerning reform at school, district, state, or federal levels through readings, discussion, projects, and analytical writing assignments. Offered: AWP.

EDLPS 571 Instructional Leadership I ([0/3]-, max. 9) Strengthens students' ability to exercise instructional leadership across various roles inside and outside school systems. Prerequisite: Leadership for Learning EdD students only. Offered: AWP.

EDLPS 572 Instructional Leadership II ([2-5]-, max. 9) Strengthens students' ability to exercise instructional leadership across various roles inside and outside school systems with emphasis on bringing instructional leadership to scale at the district level. Prerequisite: Leadership for Learning EdD students only. Offered: AWP.

EDLPS 573 Professional Learning and Instructional Renewal (2-4, max. 4) Investigates professional learning and how to support it, based on cognitive research, sociocultural theory, and scholarship on teacher education (preservice and inservice). Offers system-level leaders ways to address the quality of teaching and learning in classrooms. Prerequisite: admission to the Leadership Learning program.

EDLPS 574 Mixed Methods in Educational Research (3) *M. PLECKI* Introduces the principles of mixed methods research design, whereby qualitative and quantitative components inform each other in sampling, data collection, and data analysis. Explores design issues and solutions primarily in the context of education policy research. Offered: W.

EDLPS 575 Education Policy Implementation (4) *M. HONIG* Analyzes influences on implementation outcomes. Focuses on how skilled use of theoretical frameworks can help reveal relationships between policy and practice and evidence-based decisions that may improve implementation. Credit/no-credit only. Offered: Sp.

EDLPS 579 Special Topics in Organizational and Policy Analysis ([0-6]-, max. 20) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to the analysis of educational organizations, policies, and policy making. Topics vary.

EDLPS 580 The American College and University (4) Introduction to contemporary United States higher education, with special emphasis on emerging trends, roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

EDLPS 581 Principles and Practices of Adult and Continuing Education (3) History and development of adult and continuing education in the United States: component parts of the field; issues, theory, and research; program planning for adults; professionalization of the field.

EDLPS 582 Seminar in the History and the Organization of Higher Education (3) Advanced seminar in the history and organization of higher education.

EDLPS 583 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 584 Academic Governance and Collective Bargaining in Higher Education (3) Explores the concept and operation of collective bargaining in higher education: its origin; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subsumed under its operation; and its relationship to the traditional form of faculty governance mechanisms.

EDLPS 585 Resource Allocation in Higher Education (3) After attention to the basic tools of economic analysis, focus is on application of those tools to specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).

EDLPS 586 Navigating the P-20 Pipeline (3) *J. MYERS TWITCHELL* Introduction to programs, policies, and challenges related to supporting students as they transition from K-12 schools to institutions of higher education. Exploration of localized/region-based efforts to decrease the post-secondary opportunity gap, including funding models, collaborations and networks, and data and measurement strategies to increase rates of post-secondary attainment. Offered: A.

EDLPS 587 Seminar in Teaching and Learning in Higher Education (3, max. 9) Theory and practice of instruction and learning in higher education.

EDLPS 588 Leadership and Management in Higher Education (4) *J. LOTT* Introduction to enduring and emerging philosophical and theoretical perspectives on leading and managing in college and university settings. Provides tools to be more explicit with the ways in which leaders and managers go about their work in higher education. Offered: W.

EDLPS 589 The Community College (3) Intensive study of the community college-its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

EDLPS 590 Student Populations and Experiences in Higher Education (3-4) Examines foundational literature on students in United States higher education. Focuses on student diversity, similarities and differences in their experiences, and the role of societal values, campus climate and structure, family, work, and peers on student access, engagement, well-being, and success. Offered: Sp.

EDLPS 591 Higher Education and Public Policy (3) Covers public policy processes affecting higher education. Issues examined vary, but typically include fiscal context of higher education policy, access, equity, distance learning, and accountability policies.

EDLPS 592 Higher Education Equity, Reform, and Policy (3) Develops the critical and analytical lens that students apply to public policy issues as they directly relate to higher education in the United States.

EDLPS 593 Assessment and Evaluation in Higher Education (3) Covers the key components of evaluation design and implementation, particularly what researchers and practitioners define as good assessment and evaluation approaches. Develops competencies in planning assessment and evaluation strategies using these approaches.

EDLPS 594 Globalization and Internationalization of Higher Education (4) *M. NERAD* Impact of globalization on higher education and strategies used by higher-ed institutions to achieve internationalization. Conceptual frameworks linking higher education institutions to economic competitiveness in the global economy. Critically analyzes recent local (UW,

community colleges), national, and international initiatives and activities to achieve internationalization of the institutions and global awareness of students, faculty, staff. Offered: AS.

EDLPS 596 Secondary Data Analysis (3-5) *J. LOTT* Introduces the conceptual and practical issues involved in conducting educational research using existing sources of data, commonly known as secondary data analysis. Covers several fundamental concepts in order to become an informed and competent researcher who uses secondary data. Prerequisite: basic understanding of educational statistics.

EDLPS 597 Advanced Secondary Data Analysis (3) *J. LOTT* Applied methods. Introduces the conceptual and practical issues involved in conducting educational research using existing sources of data, commonly known as secondary data analysis. Covers several fundamental concepts in order to become an informed and competent researcher who uses secondary data. Prerequisite: EDLPS 596.

EDLPS 598 Special Topics in Higher Education (1-6, max. 20) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to education in community colleges, four-year colleges, and universities. Topics vary.

EDLPS 599 Independent Studies in Education (1-10, max. 20) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor.

EDLPS 600 Independent Study or Research (*-) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor. Credit/no-credit only.

EDLPS 601 Internship ([1-4]-, max. 20) Name of faculty member responsible for supervising the student should be indicated on program of studies. Prerequisite: permission of Supervisory Committee Chairperson or Graduate Program Adviser. Credit/no-credit only.

Educational Psychology

EDPSY 302 Child Development and Learning (5) *I&S* Uses readings, discussions, naturalistic observations, and "virtual" children to understand the different ways children develop - physically, cognitively, social-emotionally, in language and literacy, and in approaches to learning - during early childhood, the interplay between each of these domains and the environmental context, and the theories about the developmental mechanisms underlying these changes.

EDPSY 380 Adult Learning and Development (5) I&S C. GLASS HASTINGS Examination of current research and practice in the field of adult education, learning, and development. Offered: AWSpS.

EDPSY 404 Adolescent Development (5) J. LOTT Students use readings, discussion, and interview data to understand adolescent development. Discusses multiple domains of development, as well as the contextually situated nature of adolescence. Highlights implications for educators, policy makers, and others who serve the needs of adolescents throughout the course. Offered: W.

EDPSY 405 Adolescents and Media: Challenges in the 21st Century Classroom (3) I&S Encourages students to consider classrooms of the future while reflecting on their own classroom experiences. Examines adolescents' informal use of media today, some of the ways media can affect young people, and the implications of these effects in a classroom setting.

EDPSY 406 Learning and Teaching in our Changing World: Insights from Experience and Research (5) I&S Human learning in the educational setting. Cognition, development, learning, motivation, affective processes, and socialization. Emphasis on skills in influencing classroom learning and discipline.

EDPSY 420 Bullying, Revenge, and Belonging: Cultural Perspectives on Social Power (4) I&S, DIV Examines theories and research on bullying, revenge, and bystander behavior with a particular focus on cultural norms. Identifies the institutional, social, emotional, and ethical characteristics and processes that support exploitive relationships, revenge and their inclusive alternatives. Practical interventions are presented and evaluated.

EDPSY 425 Bullies, Victims, and Bystanders: Social Power In (4) I&S

EDPSY 431 Strategies for Classroom Research and Evaluation (5) Techniques and strategies for the design and implementation of studies of classroom instruction. Directed toward classroom teachers as consumers of instructional research and as evaluators in their own classrooms. Credit/no-credit only.

EDPSY 447 Principles of Guidance (3) Study of guidance programs in elementary and secondary schools. Attention is given to the roles of specialists with emphasis on the role of the classroom teacher in school guidance programs. Designed for teachers, administrators, and prospective teachers.

EDPSY 449 Laboratory in Educational Psychology (2-6, max. 6) Special studies for counselors, teachers, administrators, and others concerned with student personnel and psychological services in schools and colleges. Focuses on special topics that have either local or contemporary significance.

EDPSY 471 Educational Neuropsychology (5) NW Berninger Covers brain systems underlying normal development and academic learning: sensory and motor, language, cognitive,

social emotional, and executive-functions for self-regulation alone and interaction with the physical and social worlds in and out of school.

EDPSY 472 Teaching Reading, Writing, and Math with Brain in Mind (5) I&S Students learn evidence-based guiding principles for designing and implementing instruction with brain in mind (developing mental worlds through other -regulated and self-regulated interactions with external physical and social environments that are multi-culturally sensitive and support learning that creates reading, writing, and math brains). Prerequisite: EDPSY 471. Instructors: Berninger
Offered: Sp.

EDPSY 490 Basic Educational Statistics (3) NW, QSR Measures of central tendency and variability, point and interval estimation, linear correlation, hypothesis testing. Offered: AWSpS.

EDPSY 491 Intermediate Educational Statistics (3) QSR Covers intermediate-level concepts in analysis of variance and regression methods. Emphasizes understanding appropriate use of methods, conducting analyses using software, and correctly interpreting statistical results. Includes SPSS/PASW software instruction. Prerequisite: EDPSY 490. Instructors: Abbott, Sanders
Offered: W.

EDPSY 495 Introduction to Educational Measurement (3) QSR Practical understanding of test reliability, validity, and derived scores as they apply to external educational assessments; concepts of criterion and norm-referenced testing; review of group administered norm-referenced and criterion-referenced tests and/or testing programs; test interpretation; issues and ethics in large scale assessment. Prerequisite: EDPSY 490. Offered: Sp.

EDPSY 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

EDPSY 500 Field Study I: Academic Consultation (1-3, max. 6) K. MISSALL Includes study and practice in methods of Tier II academic consultation within an MTSS framework. Prepares students to effectively work with other professionals to better meet the social-emotional and behavioral needs of students and improve the learning environment for students identified as behaviorally and academically 'at-risk'. Prerequisite: EDSPY 554. Offered: WSp.

EDPSY 501 Human Learning and Educational Practice (3) Systematic examination of current research about human learning in educational settings, including the study of behavioral, information processing, social construction, and the developmental perspectives on learning. Offered: AWSpS.

EDPSY 502 Developmental Foundations of Early Learning (3) Perceptual-motor, language, and overall cognitive development in children from birth through primary-school age. Emphasis on Piagetian and Vygotskian approaches to development with a special focus on the connections between learning and development. Field-based course projects may be required. Prerequisite: EDPSY 501 or permission. Offered: Sp.

EDPSY 503 Culture Learning and Development (4) *M. BANG* Explores influential contemporary research and theory they view culture as foundational to learning and development. Considers these issues in a range of settings (classrooms, informal environments, families, early childhood to adult learners, etc.) and within specific domains (e.g. science, literacy, mathematics. Prerequisite: EDPSY 501 and graduate status in education or psychology. Credit/no-credit only. Offered: A.

EDPSY 504 Intercollegiate Athletic Leadership: Athlete and Team Wellness (3) *P. Decano* Explores the responsibility of athletics coaches to develop a team culture oriented toward the welfare of student-athletes. Discusses how psychological and physiological factors affect athlete performance and overall wellness. Explores strategies for team motivation, group cohesion, and resiliency. Offered: Sp.

EDPSY 505 Field Study II: Tier III Interventions (1-2, max. 3) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: EDPSY 557 Credit/no-credit only. Offered: A/Sp.

EDPSY 506 Instructional Theory (3) Sources, current state, and utility of prescriptive instructional theories with emphasis upon theories having a potential for guiding the design of instruction. Prerequisite: EDPSY 501 or equivalent.

EDPSY 507 Reading, Writing, and Arithmetic: Educational Assessment and Consultation (5) Students administer and interpret tests of reading, writing, arithmetic, and related developmental skills; integrate test, observational, interview, and portfolio information in staffings and written reports; and consult with teachers regarding educational interventions. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Instructors: Cook Offered: A.

EDPSY 508 Advanced Practicum in Supervision and School Mental Health (2-6, max. 20) *S. KING* Advanced practicum in providing in counseling, consultation, and behavioral interventions in schools while also supervising field study students in providing basic interventions. Offered: A.

EDPSY 509 Educational Issues in Human Development (5) Human development theories and models. Educational implications of theory, methodology, and application. Current research complements the historical antecedents of current practice. Age range covered varies as function of current issues in professional literature. Prerequisite: 15 credits in educational psychology or psychology.

EDPSY 510 Cognition in the Context of the School Curriculum (3) Contemporary issues and trends in human learning, with a focus on reasoning within subject-matter areas such as mathematics, history, and science. Prerequisite: EDPSY 501 or equivalent. Instructors: Bell, McCutchen

EDPSY 511 Seminar in Applied Educational Psychology (1, max. 6) Designed for graduate students in educational psychology. Applications of theoretical constructs to particular problems encountered in school counseling, practice.

EDPSY 512 Classroom Assessment Strategies (3) Development and evaluation of traditional, observational, essay, performance-based, portfolio assessments and grading models as they are used in classroom assessment; some review of current research on classroom-based assessment; classroom assessment ethics. Prerequisite: EDPSY 490 or equivalent.

EDPSY 513 Instrument Development (3) Instrument development techniques including construct development, test and item specifications, item writing, planning for reliability and validity studies; ethics in test administration and interpretation. Intended for doctoral or master's students to develop instruments for their own research. Prerequisite: EDPSY 490 or equivalent.

EDPSY 514 History of Educational Technology (3) Examines the role of technology in education through history. Early systems of instruction, advent of textbooks, models for school architecture, instructional devices and teaching machines, mediated and distance learning. Focuses on the interplay between designed educational approaches and contexts in which they were implemented, and consequent success for failure.

EDPSY 515 Current Issues in Technology and Education (3) Examines current genres of learning technology, novel approaches for integrating technology into curriculum and instruction, and recent theoretical perspectives that inform future work in educational technology.

EDPSY 516 Survey of Educational Technology Research (2-, max. 4) Critically examines active research projects in educational technology. Critiques of research practice.

EDPSY 518 Assessment and Diagnosis of Reading Disabilities (3) Techniques for individual assessment of students with reading difficulties (K-12) including formal assessment using standard assessment tools and informal diagnostic teaching. Appropriate for classroom teachers, reading specialists, and school psychologists. Includes conducting and analyzing case studies. Prerequisite: EDC&I 460, EDC&I 462, other reading courses, or permission of instructor. Instructors: Valencia

EDPSY 519 Vulnerable Children and Families in Comparative Perspective: Psychosocial Development Processes (3) *Jegatheesan* Research and theory examining the effects of disability, poverty, trauma, and immigration and its impact on child development across cultures, effective interventions in educational and non-educational settings, and the consequences of critical issues in the context of psycho-social and development processes in different cultural and international contexts. Offered: Sp.

EDPSY 520 Psychology of Reading (3) Reviews current empirical research on cognitive processes in reading, including word and sub-word processes, syntax and comprehension, reading and perception, word recognition, concept development, and meaning in reading,

psychology of reading interests, and skills. Prerequisite: EDPSY 501 or equivalent. Instructors: McCutchen Credit/no-credit only. Offered: WS.

EDPSY 521 Psychology of Writing (3) Examines writing as a cognitive process and reviews current empirical research on writing, emphasizing primarily studies from a psychological perspective. Explores both developmental differences and individual differences in writing skills, together with instructional implications. Prerequisite: EDPSY 501 or equivalent. Instructors: McCutchen Credit/no-credit only. Offered: WS.

EDPSY 522 Teaching Reading, Writing, and Math with Brain in Mind (5) Students learn evidence-based guiding principles for designing and implementing instruction with brain in mind (developing mental worlds through other -regulated and self-regulated interactions with external physical and social environments that are multi-culturally sensitive and support learning that creates reading, writing, and math brains). Prerequisite: EDPSY 471, EDPSY 577, or permission of instructor. Instructors: Berninger Offered: Sp.

EDPSY 523 Foundations of Ethnographic Research (3) *Jegatheesan* Exploration of the main components of ethnographic endeavor. Students conduct ethnographic research including field entry, observing, listening, data analysis, and writing; typical issues and quandaries encountered in carrying fieldwork in a variety of settings, ethical issues, comprehension, intrusion, and access, experience and empathy, and power dynamics, and predicament.

EDPSY 524 Problem Solving and Critical Thinking in Education (3) Study of the classic and contemporary research literature concerned with human problem solving and critical thinking with emphasis upon applications to educational practice and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 525 Creativity and Education (3) Study of the classic and contemporary research literature about creativity with emphasis upon applications to educational practice, evaluation of strategies to promote creativity in the schools, and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 526 Seminar on Metacognition (3) Students read and discuss theoretical and research papers from the extensive literature on metacognition. Focuses on defining the concept of metacognition, establishing its range of applicability to educational matters, and becoming familiar with excellent examples of metacognitive research. Prerequisite: graduate status in education or psychology and permission of instructor. Instructors: Nolan

EDPSY 527 Transfer of Teaching (3) Students read and discuss a representative sample of theoretical and research papers from extensive literature on teaching to promote transfer of what students learn to non-teaching environments. Historical approach to the topic is followed by analysis of current writings on transfer. Prerequisite: EDPSY 501 and graduate status in education or psychology. Instructors: Bell, Shouse Credit/no-credit only.

EDPSY 528 Achievement Motivation in Education (3) Critical review of current research and major theories of achievement motivation in schools and other educational settings. Emphasis on

the relationship of theories to the contexts and practice of education. Prerequisite: EDPSY 501 or permission of instructor. Instructors: Nolan Offered: WS.

EDPSY 529 Developmental Psychopathology and the DSM (2) *W. LAU* Provides an opportunity for advanced doctoral students to learn the basics of using the Diagnostic and Statistical Manual for Mental Disorders (DSM) for assessment and diagnosis in clinical practice; and learn about childhood disorders across the lifespan. Offered: A.

EDPSY 530 Vygotsky's Socio-Cultural Approach to Mind (5) Critical reading and discussion of the work of L.S. Vygotsky as well as contemporary psychologists and educators who have investigated cognition in social context. Discusses the implications of these approaches for the design of learning environments. Prerequisite: EDPSY 501. Instructors: Herrenkohl Credit/no-credit only. Offered: W.

EDPSY 531 Socialization of School-Age Children (3) Study of personal social development and behavior from preschool ages through adolescence. Developmental theory and research are reviewed on the socialization influences of parents and peers and on such topics as aggression, emotional regulation, and social cognition. Prerequisite: EDPSY 501 or equivalent.

EDPSY 532 Adolescence and Youth (3) Developmental processes and patterns examined with major theoretical and current research themes from behavioral sciences as applied to middle school and senior high students. Educational issues, social problems associated with adolescence in Western culture. Prerequisite: EDPSY 501 or equivalent.

EDPSY 533 Current Research in Adolescence (3) Contemporary trends and patterns of adolescent research are examined with emphasis upon theoretical foundations, contrasting methodologies, and implications for further research. Exemplary studies and integrative reviews of research on adolescence are featured. Prerequisite: EDPSY 532 and EDPSY 591 or equivalents.

EDPSY 534 School Problems of Adolescence (3) Study of the classic, contemporary, and emerging school problems of school age youth with emphasis upon problem solving strategies for educators and associated youth service personnel. Includes problems of academic achievement, interpersonal relations, and social deviancy in the schools. Prerequisite: EDPSY 532 or equivalent.

EDPSY 535 Education and the Highly Capable Learner (3) *N. HERTZOG* Examination of major issues and problems in study and nurturance of highly capable children and youth in the educational setting. Emphasis placed on contributions of theory and research to educational problem solving for multiple aspects of advanced human capacity. Prerequisite: EDPSY 501 or equivalent.

EDPSY 536 Immigrant and Indigenous Children: Social Context of Learning (3) *Jegatheesan* Focuses on the broad context of family, school, and society of immigrant and indigenous young children in the United States. Introduces the complex interplay of socio-cultural and psychological factors that impact these children's learning. Offered: WS.

EDPSY 537 Teaching and Learning Science with Indigenous Students (3) *M. Bang* Provides an overview of the opportunities and challenges in teaching science to Indigenous learners. Students develop relevant pedagogical frameworks to approach problems of practice and develop high-leverage instructional practices for Indigenous students. Focused on Indigenous students however is relevant to other under-achieving populations. Offered: Sp.

EDPSY 540 School Psychological Assessment (5) Study of assessment of human intelligence with supervised training in the administration, scoring, and interpretation of individual intelligence tests. Prerequisite: admission to School Psychology program. Instructors: Jones Offered: A.

EDPSY 544 Counseling (4) *J. MAZZA* Competency-based skills training for beginning counseling and school psychology students. Covers attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: admission to School Psychology program. Offered: W.

EDPSY 545 Prepracticum (3) Competency-based skills training for beginning counseling and school psychology students. Attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 546 Counseling Practicum (3-5, max. 20) *J. MAZZA* Supervised practice in counseling. Prerequisite: admission to School Psychology program; EDPSY 544. Offered: Sp.

EDPSY 548 Educational Implications of Personality Theory (5) *J. MAZZA* Study of personality development and personality theories with continuous attention to the meaning of these in educational practice, testing, and counseling. Prerequisite: admission to the School Psychology program. Offered: A.

EDPSY 549 Seminar in Consultation Methods (3) Theory and practice of process consultation in educational settings. Field practice in teams with clients. Prerequisite: admission to the School Psychology program. Instructors: Cook Offered: W.

EDPSY 550 Family Counseling (3) Introduction to family counseling theory and practice, emphasizing family dynamics and communication analysis. Prerequisite: graduate standing in school psychology or permission of instructor. Instructors: Jones Offered: W.

EDPSY 551 Group and Behavioral Intervention (3) Introduction to competency-based skills for beginning school psychology students. Includes basic processes of group management skills with children including group process in social skills training, problem-solving techniques, behavioral principles, and parent training. Prerequisite: admission to School Psychology program. Instructors: Cook Offered: Sp.

EDPSY 552 Multicultural Issues in School Counseling and School Psychology (3) Examination of multicultural issues as they relate to the delivery of services provided by school

counselors and school psychologists. Theoretical and applied aspects emphasized and case study format utilized. Prerequisite: admission to School Psychology program. Offered: Sp.

EDPSY 553 School Psychology Services with Special Populations (3) Examines current issues in working with youth in special populations, as well as intervention strategies to help these students within the mainstream school environment. Prerequisite: admission to School Psychology program. Instructors: Murphy Credit/no-credit only. Offered: W.

EDPSY 554 Introduction to Multi-Tiered Systems of Support (3) *K. MISSALL* Teaches the Multi-Tiered Systems of Support framework and provides instruction on how to conduct assessment, consultation, and evaluation intervention program effectiveness using both a direct service delivery as well as an indirect model (consultation). Offered: A.

EDPSY 556 Applied Social Psychology: Implications for Education (3) Provides students with the knowledge and understanding of how social psychology is applied within school settings and how it can be used to help develop effective strategies for psychological services. Prerequisite: admission to School Psychology program. Instructors: Cunningham, Mazza Credit/no-credit only. Offered: W.

EDPSY 557 Tier III Interventions for School Psychologists (3) Provides school psychology students with a multi-tier framework in working with challenging students in schools. Provides explicit instruction on functional behavioral assessment, including content and training in how to work with youth who are at-risk or have engaged in self-harming and/or suicidal behavior. Prerequisite: admission to School Psychology program. Instructors: Cook, Mazza Offered: Sp.

EDPSY 558 Generalizability Theory (3) *M. Li* Focuses on various designs and applications used with the Generalizability theory framework to estimate the amount of score variation associated with a measurement procedure, approach the reliability and validity issues, and optimize the measurement procedure. Prerequisite: EDPSY 490; EDPSY 592; EDPSY 593 or equivalent; recommended: Introduction to educational statistics and measurement so that students are familiar with the basic concepts and procedures that we will continue working on in this course. Offered: W, odd years.

EDPSY 559 Validity Theory (3) *M. Li* Introduces students to different perspectives and theories of test validity and to the process of accumulating validity evidence for measures used in educational field. As an advanced measurement course, we will address the argument-based validation approach proposed by Kane, and analyze important technical and philosophical aspects of test validity and validation. Prerequisite: EDPSY 490 and EDPSY 592; recommended: Understand the concepts of reliability and validity as well as the statistical procedures used to evaluate different types of validity claims under the classical test theory framework Offered: W, even years.

EDPSY 560 Advanced Practicum in Personality Assessment (3) Designed for doctoral-level school psychologists to learn advanced personality assessment for diagnosis of emotional and behavior disorders. Prerequisite: admission to School Psychology program; EDPSY 540; EDPSY 564. Open to doctoral students only. Instructors: Jones

EDPSY 562 Group Counseling in Schools (3) Provides students with the opportunity to co-facilitate groups in elementary, middle, and secondary schools, supplemented by weekly didactic presentations of counseling and guidance models. Prerequisite: EDPSY 561 or permission of instructor. Offered: W.

EDPSY 564 Practicum in School Psychology (1-6, max. 20) Practicum in assessment and consultation, emphasizing diagnosis of behavior and learning disabilities, and focusing on techniques acquired in EDPSY 507 and EDPSY 540. Prerequisite: admission to School Psychology program; EDPSY 507; EDPSY 540. Instructors: Jones, Lau Offered: W.

EDPSY 565 Advanced Practicum in Clinical Practice for Children and Adolescents with Psychopathology (4, max. 24) *J. Jones* Designed for doctoral level school psychologists to learn advanced skills in clinical practice for working with children and adolescents with a range of childhood psychopathologies, under the supervision of a licensed psychologist. Prerequisite: EDPSY 544 and EDPSY 546, or equivalent and advanced graduate standing in the school psychology program. Offered: AWSp.

EDPSY 566 Case Study Seminar (1-6, max. 20) Integrating theoretical concepts with practice/service issues. Cases selected for discussion represent a wide range of problems found in schools. Activities include group supervision and peer review. Prerequisite: graduate standing in school psychology. Instructors: Grady Offered: AWSp.

EDPSY 567 Applied Quasi-experimental Research in Education and other Social Sciences (3) *M. SUN* Introduces research designs and statistical models that are often applied to large-scale longitudinal data. These models include, but not limited to , instrumental variables, difference-indifferences, propensity score matching, regression discontinuity, and fixed-effect estimates. Offered: A.

EDPSY 568 Seminar in Professional Issues and Ethics (3) Professional ethics codes and cases, history of counseling or school psychology, legal problems, credentialing issues, conditions of practice, continuing education, publishing, and presenting research papers. Prerequisite: graduate standing in College of Education or permission of instructor. Instructors: Provenzano Credit/no-credit only. Offered: W.

EDPSY 569 Learning and the Interaction Order (3) *K. TAYLOR* Covers research methods course for students using video and/or audio recordings as data in studies of learning and teaching. Students learn how to make evidence-based inferences about people's learning or teaching as captured by video/audio recordings by content logging, selecting, transcribing, and analyzing moments of interaction. Offered: S.

EDPSY 570 Introduction to School Psychology (2, max. 20) *J. MAZZA* Current issues in professional psychology practice and research. Prerequisite: admission to School Psychology program. Offered: A.

EDPSY 571 Educating Individuals with Biologically Based Disabilities (5) Reviews the history of neural science and its interdisciplinary roots, brain imaging methods and web

resources, basic terminology and concepts for microscopic and larger neurological structures, functions, organizing principles and chemical bases, with focus on application to diagnosing and teaching students with developmental, learning, psychiatric, neurological, and medical disorders. Prerequisite: graduate standing in school psychology or inst Offered: W.

EDPSY 572 Social-Emotional Assessment (3) Techniques in social-emotional assessment of school-aged children. Diagnostic systems presented in conjunction with assessment techniques. Emphasis on an integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: admission to School Psychology program. Instructors: Cunningham Offered: A.

EDPSY 573 Psychological Assessment of Preschool Children (5) Students learn to give and interpret tests of intellectual development to assess language, play, and social/emotional functioning, and to write psychological assessment reports for infants, toddlers, and preschoolers. Prerequisite: graduate standing in school psychology and permission of instructor. Instructors: Olson Offered: Sp.

EDPSY 575 Structural Equation Modeling (3) Theory and data analysis using linear structural equation models. Application to data in educational research. Prerequisite: EDPSY 594 or equivalent. Instructors: Abbott Offered: WS.

EDPSY 576 Hierarchical Linear Models (3) Theory and data analysis for research models where random factors are nested, such as multi-level data, growth curve analysis, and meta-analysis. Prerequisite: EDPSY 593 or equivalent. Instructors: Abbott Offered: WS.

EDPSY 577 Neuropsychology of Learning and Behavior Problems (5) Brings together our understanding of neuropsychology and specific behavioral and learning problems to provide a foundation for practitioners to consider neuropsychological contributors to problems observed in clinical and educational settings. Credit/no-credit only. Offered: Sp.

EDPSY 578 Educational Applications of Neuropsychology: Assessment and Intervention (5) Students observe and administer neuropsychological tests and plan and carry out educational interventions for children with neuropsychological disorders. Content focuses on various neuropsychological disorders for which school psychologists can provide assessment and consultation. Prerequisite: EDPSY 540 or equivalent course in individual testing, and EDSPY 577 or permission of the instructor. Instructors: Berninger

EDPSY 579 Advanced Practicum in Neuropsychological Assessment and Neurodevelopmental Intervention (2, max. 12) *R. Bernier, E. Olson* Provides advanced clinical training in neuropsychological assessment and evidence-based interventions for children with neurodevelopmental and/or mental health disorders. Training includes supervised administration of neuropsychological assessments and delivery of interventions with individuals and/or groups in clinic settings that provide services to children with suspected neurocognitive disabilities. Offered: A WSp.

EDPSY 580 Seminar: The Emergence of Educational Psychology (3) Examination of documents by selected contributors to the field of educational psychology. Special focus on period from mid-nineteenth century to the later twentieth century.

EDPSY 581 Seminar in Educational Psychology (1-5, max. 20) Advanced seminar on selected topics in educational psychology. A critical appraisal of current research. Offered: AWSpS.

EDPSY 582 Seminar in Development and Socialization (3, max. 15) Advanced seminar on selected topics concerned with human development and socialization processes. Emphasis placed upon empirical research and its theoretical underpinnings in such areas as cognitive development, moral development and education, self-concept development, and related concerns. Prerequisite: graduate standing in College of Education or instructor permission. Instructors: Herrenkohl, Jegatheesan, Nolen, Kazemi

EDPSY 583 Seminar in Learning and Thinking (3, max. 15) Seminar in the psychology of learning language and language learning. Each seminar is offered with predesignated emphasis in one of the following topics: linguistics, phonology, pragmatics, psycholinguistics, semantics. Prerequisite: graduate standing in College of Education or instructor permission.

EDPSY 584 Seminar in Quantitative Methods (3, max. 15) Seminar on such topics as measurement techniques, research design, psychometrics, and statistics. Prerequisite: EDPSY 490 and instructor permission. Instructors: Li, Taylor

EDPSY 585 History, Systems, and Contemporary Issues in School Psychology (3) Covers the history, systems, and research relating to the contemporary issues relevant to research and practice of school psychology. Meets APA and Washington state requirements for course in history and systems of psychology. Prerequisite: admission to School Psychology program. Instructors: Jones, Mazza Credit/no-credit only. Offered: Sp.

EDPSY 586 Qualitative Methods of Educational Research I (4) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics, and permission of instructor. Offered: A.

EDPSY 587 Qualitative Methods of Educational Research III (5)

EDPSY 588 Survey Research Methodology and Theory (3) Survey research, research, theory, and methodology. Probability theory, sampling, human subjects considerations, instrumentation, and analysis techniques. Review and critique by students of theoretical issues in survey research and development of a survey instrument. Prerequisite: EDPSY 490 or equivalent. Offered: W.

EDPSY 589 Scholarly Writing in Education and Psychology (3) Introduction to the demands and expectations for technical writing in education and psychology, including aspects of the culture of scholarship. Designed for competent writers. Does not address basic grammar and composition. Prerequisite: doctoral standing, and permission of instructor. Credit/no-credit only.

EDPSY 590 Computer Utilization in Educational Research (3) Computer utilization in solution of research problems, data reduction to forms amenable to computer solution, appropriate framing of problems for solutions by computer. Using an interactive system, editors, and program packages. Prerequisite: EDPSY 490.

EDPSY 591 Methods of Educational Research (3) Introduction to educational research. Primary focus on hypothesis development, experimental design, use of controls, data analysis, and interpretation. Prerequisite: EDPSY 490. Offered: WSp.

EDPSY 592 Advanced Educational Measurements (3) Theory of measurement; an examination of assumptions involved in test theory, errors of measurement, factors affecting reliability and validity, and item analysis and standards for educational and psychological tests. Prerequisite: EDPSY 490. Instructors: Li Offered: Sp.

EDPSY 593 Experimental Design and Analysis (5) Experimental design with emphasis on the analysis of variance. Prerequisite: EDPSY 490 or equivalent. Offered: W.

EDPSY 594 Advanced Correlational Techniques (5) Multivariate analysis, including regression and multiple correlation; matrix algebra; factor analysis. Prerequisite: EDPSY 490 or equivalent. Instructors: Abbott Offered: Sp.

EDPSY 595 Item Response Theory Models of Testing (3) In depth exploration of IRT models and their roles in the development of large scale educational and psychological tests. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 594.

EDPSY 596 Program Evaluation (3) Advanced course in evaluation research emphasizing nontraditional designs, especially those that impose severe ecological constraints on the evaluators. Prerequisite: EDPSY 593, EDPSY 594, EDC&I 597, or permission of instructor. Instructors: Mazza

EDPSY 597 Technical Requirements of Large Scale Tests (3) Theoretical and practical understanding of the quantitative aspects of large-scale tests, including: scaling, norms development, and the development of derived and interpretive scores, evidence for validity and reliability. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 595.

EDPSY 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Offered: AWSpS.

EDPSY 600 Independent Study or Research (*-) Prerequisite: permission of instructor. Offered: AWSpS.

EDPSY 601 Internship (3-10, max. 30) Offered: AWSpS.

Special Education

EDSPE 304 Exceptional Children (3) I&S, DIV Covers the knowledge of the field of special education including laws, practices, procedures, and controversies. Focuses on information about children with disabilities studied from the point of view of education. Offered: WSp.

EDSPE 414 Introduction to Early Childhood Special Education (3) I&S Provides students with a comprehensive overview of major aspects of the field of early childhood special education. Theoretical foundations and program development and implementation are presented in an approach that integrates theory, research, and practice. Offered: WSp.

EDSPE 422 (dis) Ability, Education, and the Arts (5) VLPA, DIV Cultural perspectives on disability and education, as interpreted through arts-based inquiry.

EDSPE 427 Introduction to Applied Behavior Analysis (5) I&S/NW I. SCHWARTZ Presents an introduction to the science of behavior known as applied behavior analysis. Focuses on basic behavioral principles (e.g., reinforcement), defining behaviors, measuring behaviors, effective strategies to teach new skills, and the ethics involved in behavior change programs. Offered: WSp.

EDSPE 435 Introduction to Autism Spectrum Disorders (5) I&S, DIV Provides an overview of the characteristics, causes, treatments, and controversies about autism spectrum disorder (ASD). Addresses information about the history of the disorder, assessment strategies, and types of interventions. Offered: Sp.

EDSPE 460 Early Literary Instruction (3) Covers the theory and educational practices in early literacy including emergent literacy development, risk factors for poor literacy outcomes, methods to promote language needed for literacy, phonemic awareness, word identification. Emphasizes instructional strategies useful in childcare settings, preschools, early intervention, and programs for students with developmental disabilities.

EDSPE 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

EDSPE 500 Practicum ([1-6]-, max. 20) Practicum in the field under the direction of a faculty member. Prerequisite: enrollment in a special education program, approved plan of study, and permission of the instructor. Offered: AWSpS.

EDSPE 501 Foundations in Special Education (3) Comprehensive review of the field of special education, including historical perspectives, current best practices, legal issues, and current controversies. Offered: A.

EDSPE 502 Collaboration: Working with Parents and Professionals (3) Provides students with knowledge and skills for working collaboratively with other professionals, family members,

and paraeducators. Focus is on the role of the special educator in forming and sustaining school, family, and community partnerships.

EDSPE 503 Classroom Management for Elementary School Educators ([1-3]-, max. 4)

Examines how to set up effective classrooms to facilitate learning and the development of social behaviors. Focuses on strategies for effectively managing whole group (classroom) and individual behavior of students in the context of public schools.

EDSPE 504 Special Education and the Law (3) *Brown* Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered: jointly with EDLPS 516.

EDSPE 505 Curriculum Development of Students with Moderate to Severe Disabilities (4)

Addresses issues and practices in the development of appropriate curriculum, accessing the general education curriculum, and meaningful assessment for students with moderate to severe disabilities in educational settings. Topics include: assessing general education curriculum, inclusion, and development of Individualized Educational Plans (IEPs), assessment using environmental strategies, and identifying students' needs for assistive technology.

EDSPE 507 Instructional Methods for Students with Moderate to Severe Disabilities (4)

Davis Details a systematic instructional process for the education of students with moderate to severe or profound disabilities. Includes instructional methods and materials designed to promote the development of skills that are required in school, home, and community settings, and to reduce challenging behaviors.

EDSPE 510 Behavioral Measurement and Management in the Classroom (3) Response measurement in the classroom; use of data analysis for instructional decisions and behavior management for children with disabilities.

EDSPE 511 Methods of Applied Behavior Analysis Research (3) Characteristics of applied behavior analysis are presented: direct, daily measurement, and the systematic investigation of important variables. Representative studies from various applied situations are discussed in terms of dependent and independent variables, research design, reliability, validity, and data analysis. Prerequisite: EDSPE 510 or equivalent preparation. Instructors: Schwartz

EDSPE 513 Principles of Assessment (3) Focuses on the principles, administration, and interpretation of a variety of assessments. Includes opportunities to choose appropriate assessments; administer formal and informal assessments accurately; and interpret assessment results to inform instructional decisions. Offered: A.

EDSPE 514 Fundamentals of Reading and Writing for Students with Disabilities (4) *R. HUDSON* Emphasis on fundamentals of reading and writing processes, assessment, and instruction for students with disabilities. Helps students apply what is learned to their work with students with disabilities in classrooms. Prerequisite: EDC&I 460. Offered: W.

EDSPE 515 Problems and Issues in Special Education (3, max. 9) Intensive examination of the issues pertinent to special education, such as legislation, interdisciplinary functions, and the role of special education in general education and placement practices.

EDSPE 517 Practicum in Research Design and Analysis in Special Education (1-4, max. 24) Critical analysis of current research in special education and related fields serves as background for designing applied research projects. Projects are examined, evaluated, and revised in seminar discussion. Prerequisite: EDPSY 490 and EDSPE 591 or equivalent and permission of instructor. Offered: AWSpS.

EDSPE 518 Seminar in Special Education Research (1-4, max. 20) Designed for doctoral students in special education during their first year of residency. Each candidate selects a dissertation problem and submits a proposal. Topics such as the procurement of subjects, the reporting and communication of research findings, and the evaluation of research are stressed. The seminar leads to the evolution of a viable dissertation proposal. Credit/no-credit only. Offered: AWSp.

EDSPE 519 Strategies for Supporting Learners with Extensive Support Needs (3) Provides knowledge and skills necessary to manage extensive support needs for learners with moderate to severe cognitive, physical, or multiple disabilities. Emphasis on various strategies to develop, adapt, implement, and monitor student needs as they relate to communication, daily living, medical management, and positioning and handling. Offered: W.

EDSPE 520 Seminar in Applied Special Education (1-12, max. 20) Designed for graduate students in special education. Focus on contemporary topics relating to the application of the theoretical constructs to special education. Offered: AWSp.

EDSPE 522 Seminar on the Education of Students with Severe Disabilities (3) Advanced graduate seminar arranged to study and discuss the essential components of providing a comprehensive approach to the identification and education of infants, children, adolescents, and young adults with severe disabilities.

EDSPE 523 Fundamentals of Math for Children with Disabilities (3) Provides educators with basic elementary math content and techniques for teaching elementary students with disabilities in inclusive settings. Prerequisite: either EDTEP 522 or equivalent. Offered: Sp.

EDSPE 524 Functional Behavioral Assessment (3) Provides a solid foundation in the theory and practice of functional behavioral assessment (FBA). FBA is a required practice under special education law and considered a best practice for students with challenging behavior.

EDSPE 525 Autism and Other Social, Communication, and Developmental Disabilities (3) Focuses on the identification, etiology, education, and outcomes of individuals with Autism Spectrum Disorder and related social, communication, and developmental disorders. Offered: SpS.

EDSPE 526 Techniques for Instructing Social Behaviors for Elementary Students with Mild Disabilities (3) Provides prospective and practicing teachers with foundational theory and knowledge to select specific techniques to promote social competency in elementary children with mild disabilities. Discusses research related to use of these techniques and interventions. Develops schoolwide, classroom, and individual plans for teaching social skills. Offered: Sp.

EDSPE 527 Application of Behavioral Principles (3) Presents principles of applied behavior analysis. Focuses on the use of principles in classroom, home, and community settings to influence learning. Emphasis on the use of data collection and progress monitoring the use of principles and outcomes for learning. Offered: A.

EDSPE 528 Inquiry and Methods in Writing Instruction (3) Covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: Sp.

EDSPE 529 Ethics in Applied Behavior Analysis (5) Examines ethical issues and responsibilities in regard to service provision to people with disabilities in education. Informed consent, protection of confidentiality, legal requirements to demonstrate changes in student learning, and selection of least intrusive, least restrictive behavior procedures presented and discussed within the context of readings and discussion of cases.

EDSPE 530 Advanced Readings in Applied Behavior Analysis (1, max. 20) *Schwartz* Provides opportunities to read and discuss core texts from applied behavior analysis (ABA). Covers the conceptual underpinnings of ABA and discusses examples of application of the principles. Offered: AWSp.

EDSPE 531 Planning Comprehensive Behavioral Interventions (3) Gives special educators the knowledge and skills they need to develop comprehensive behavior plans to address challenging behavior in children with disabilities in their classrooms. Offered: W.

EDSPE 532 A Tiered Approach to Inclusive Education (3) Prepares educators to work in inclusive educational environments. Explores evidence based instructional strategies, discusses ways to use behavior analytic strategies to promote inclusion, and explores strategies to collaborate with general education teachers. Students also learn how to write high-quality Individualized Education Plans.

EDSPE 540 Fieldwork Seminar (1-2, max. 16) Provides an opportunity for self-evaluation and reflection on practice as well as assist students with working with children with disabilities and their families in the field. Linked to a required fieldwork experience in a special education setting. Offered: AWSp.

EDSPE 541 Education of Children with Behavior Disorders (3) Introductory course covering characteristics of and educational practices for children with emotional/behavioral disabilities. Reviews theory, definitional issues, models, assessment, and instructional methods for educating

children with emotional and behavioral disorders. Students develop a working knowledge of educational approaches for teaching students with emotional/behavioral disabilities. Offered: A.

EDSPE 545 Instructional Modifications for the Education of Children with Mild Disabilities (3) In-depth analysis and application of several modifications of instructional techniques necessary for the education of students with mild disabilities.

EDSPE 546 Seminar in Educating Children with Behavior Disorders (3, max. 9) Advanced-level seminars focus on contemporary research topics relating to the effective education of children with serious behavior disorders. Students analyze and review research pertinent to the chosen topics and prepare a scholarly manuscript for dissemination.

EDSPE 548 Special Topics in the Education of the Learning Disabled (3, max. 12) In-depth analysis of empirical findings in the specialty of learning disabilities with focus on the synthesis of research findings and their application to the educational environment. A paper suitable for publication required. Prerequisite: course in learning theory, introductory course in learning disabilities, or equivalent preparation.

EDSPE 561 Educational Assessment of Young Children with Special Needs (3) Special standardized and educational measurement and evaluation procedures for use with young children with a variety of disabling conditions. Observation, ecological assessment, and programming strategies are discussed in combination with practical application of the skills within an educational framework.

EDSPE 562 Curriculum and Assessment for Young Children with Disabilities (3) Examines recommended practices and meaningful curricula for young children with disabilities. Covers theoretical models and approaches to curricula for preschoolers with disabilities. Includes discussion of definitional issues, theoretical frameworks, curriculum models, and application of recommended instructional and assessment practices within an early childhood educational framework. Offered: W.

EDSPE 563 Collaborating with Families and Educational Teams (4) *Meeker* Explores issues, theories, models, research, and recommended practices related to family-professional partnerships and collaborative teaming in education. Explores the dynamics of interactions with families and other team members including roles and responsibilities, decision-making, communication, and collaboration. Focuses on families and teaming in special education. Offered: AW.

EDSPE 564 Infants and Toddlers with Disabilities and Other Special needs (3) *Sandall* Examines early intervention policies, programs, and practices for infants and toddlers with disabilities and other special needs. Topics include theoretical, philosophical, and learning and research base for early intervention. Offered: W.

EDSPE 565 Approaches to Early Childhood Education (3, max. 9) Provides an overview of basic early childhood content in math, science, social studies, physical education, and the arts.

Includes active exploration and demonstration of ways to adapt and embed these concepts into thematic units and early childhood classroom routines. Offered: Sp.

EDSPE 566 Current Research in Early Childhood Special Education (2, max. 6) Explores theory, research, and practice in early intervention with infants, toddlers, and their families. Topics include typical and atypical development, assessment, curriculum, and intervention strategies.

EDSPE 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

EDSPE 600 Independent Study or Research (*-) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

EDSPE 601 Internship (1-10, max. 20) Prerequisite: graduate standing and permission based on prearrangement of internship placement and approval by adviser. Offered: AWSpS.

Teacher Education Program

EDTEP 501 Community-Based Field Experience (1-10, max. 15) Field experience and group discussions accompanying the first quarter of study in an Elementary Teacher Education Program. Field experience in community based organizations or school settings. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 502 Second Quarter Field Experience - Elementary (2-10, max. 15) Field experience accompanying the second quarter of study in an Elementary Teacher Education Program. Observe school-year opening full-time in late August through September; field experiences during the quarter in supervised school placements. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 503 Third Quarter Field Experience - Elementary (4) Field experience and use of reflective process in small group discussions accompanying third quarter of study in an Elementary Teacher Education Program. Field experiences during the quarter in supervised school placements. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 505 Capstone Project: Tools for Reflection - Elementary ([1-3]-, max. 3) Group discussions fostering integration of coursework, field experience, and teaching experiences through documentation and reflection on first year teaching experiences. Using certification standards for teachers, students illustrate their learning through multiple forms of evidence. Final capstone project is presented to an audience. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 511 School and Society (3) Exploration of issues regarding schooling and society, such as matters of value and value tension in American schools. Consideration of social values such as equality, opportunity, pluralism, and community; historical and contemporary evidence of values

in schooling; and how values can conflict in policy and practice. Prerequisite: elementary TEP student.

EDTEP 515 Instructional Practice and Performance I (4) Focuses on supporting teacher candidates to plan for, enact, and reflect on productive learning experiences for K-12 students where discussion is a central component and learning experience. First in a three-course series.

EDTEP 516 Instructional Practice and Performance II (4) Supports candidates to plan for, enact, and reflect on a variety of assessment opportunities presented to K-12 students. Candidates analyze K-12 students' learning through investigation of a variety of assessment data points as evidence. Second in a three-course series.

EDTEP 517 Instructional Practice and Performance III (4) Supports teacher candidates to plan for, enact, and reflect on productive learning experiences for K-12 students where engaging in rigorous content instruction is a central component and learning experience. Third in a three-course series.

EDTEP 521 Teaching and Learning in Numeracy I (4) Focus on mathematics from the perspective of the learner and on the meaning of understanding a mathematics concept. Examination of cultural aspects of the development of these concepts. Prerequisite: elementary TEP student.

EDTEP 522 Teaching and Learning in Numeracy II (3) Focus on pedagogy of mathematics. In conjunction with field experience, students extend understanding of mathematics and successfully integrate mathematics as a tool for learning science and art. Prerequisite: elementary TEP student.

EDTEP 523 Teaching and Learning in Science (3) Science teaching in a manner consistent with how young children learn science concepts and skills. Opportunities are provided for work on science activities similar to those used with elementary school children and to experience many of the problems and successes of preadolescents. Prerequisite: elementary TEP student.

EDTEP 531 Teaching and Learning in Literacy I (3) Investigation of the multiple natures of literacy development. Students study the impact of culture and family on literacy development by reading and discussing a variety of texts while also experiencing the development of their own learning through literature study, the writing process, and oral presentations. Prerequisite: elementary TEP student.

EDTEP 532 Teaching and Learning in Literacy II (4) Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 533 Teaching and Learning in Literacy III (3) Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective

literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 541 Dilemmas of Teaching and Learning in Elementary School ([2-4]-, max. 4)

Covers human learning in the elementary school setting with emphasis on discipline-specific cognition and cognitive development. Prerequisite: elementary TEP student.

EDTEP 543 Teaching and Learning in Social Studies. (4) Strategies for teaching social studies and the arts through integrated thematic units of curriculum and instruction. Prerequisite: elementary TEP student.

EDTEP 544 Differentiated Instruction (1-4, max. 20) Introduction to the concepts and practice of differentiated instruction for children with diverse developmental, linguistic, and cultural characteristics. Prerequisite: elementary TEP student.

EDTEP 551 Multicultural Teaching (3) Concepts, theories, and strategies that constitute major dimensions of multicultural education. Focus on racial and ethnic groups, social class, and gender. Dimensions of multicultural education examined include content integration, knowledge construction process, prejudice reduction, equity pedagogy, and empowering school culture and social structure. Prerequisite: TEP student.

EDTEP 552 Assessment in Elementary Education ([1-2]-, max. 3) Emphasis on methods of assessment that reinforce understanding of the various disciplines. Includes performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: elementary TEP student.

EDTEP 555 Understanding Indigenous Perspectives: Implications for Teaching and Learning (1) *M. Bang, D. Stevens* Provides participants a pedagogical approach in working with Native learners, families, and communities. It's designed to enhance and engage students in understanding contemporary Native American history emphasizing local Pacific Northwest tribes and fulfilling HB 5433. Content focuses on incorporating Native knowledge and building beneficial relationships in curriculum development. Credit/no-credit only. Offered: WS.

EDTEP 560 Teaching for Learning in Secondary School (3) Studies human learning in an educational setting, with an emphasis on learning of school subjects. Topics include nature of learning, knowledge and teaching, motivation, culture, and cognition. First in a two-course sequence. Prerequisite: secondary TEP student.

EDTEP 561 Teaching and Learning for Secondary Schools II (2) Study of human learning in an educational setting, with an emphasis on learning of school subjects. Topics include nature of learning, knowledge and teaching, motivation, culture, and cognition. Second of a two-course sequence. Prerequisite: secondary TEP student.

EDTEP 562 Adolescent Development and Education I (2-) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Examines psychological perspectives on adolescent identity, interpersonal relationships,

academic engagement, and social deviancy in schools. First in a two-course sequence.
Prerequisite: secondary TEP student.

EDTEP 563 Adolescent Development and Education II (-2) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Examines psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools. Second in a two-course sequence.
Prerequisite: secondary TEP student.

EDTEP 564 Working in Schools (1-2, max. 20) Explores the organizational, personal, and interpersonal aspects of working as a teacher in schools. Preparation for membership and leadership in a professional learning community and for continuing professional growth.
Prerequisite: TEP student Credit/no-credit only.

EDTEP 566 Creating Classrooms for All Students (2-4, max. 4) Provides middle and high school teachers with an understanding of how to organize their classrooms so as to encourage and teach civility and be familiar with the needs of special education students.

EDTEP 571 Topics and Tensions in School and Society (4) Exploration of issues of value and value tension in American schools. Consideration of social values of equality, opportunity, pluralism, and community, historical and contemporary evidence of values in schooling, and how values can conflict in policy and practice. Prerequisite: secondary TEP student.

EDTEP 573 Assessment in Secondary Education (4) Strong emphasis on methods of assessment that reinforce understanding of the various disciplines, including performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: secondary TEP student.

EDTEP 575 Working with English Language Learners and Literacy Across the Curriculum (4) Prepares pre-service secondary teachers to meet the needs of culturally and linguistically diverse students in the mainstream secondary classroom. Emphasis on second language acquisition, critical literacy issues, and integration of language and literacy into academic content areas for adolescent learners.

EDTEP 580 Teaching English and Language Arts in Secondary School I (5-) Teaching of English and language arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 581 Teaching English and Language Arts in Secondary School II (-3) Teaching of English and language arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 582 Teaching Mathematics in the Secondary School I (5-) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 583 Teaching Mathematics in the Secondary School II (-3) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 584 Teaching Social Studies in the Secondary School I (5-) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 585 Teaching Social Studies in the Secondary School II (-3) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 586 Teaching Science in the Secondary School I (5-) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 587 Teaching Science in the Secondary School II (-3) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 588 Teaching World Languages I (5-) Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills - reading, writing, speaking, listening - and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 589 Teaching World Languages II (-3) Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills - reading, writing, speaking, listening - and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 591 First Quarter Field Experience - Secondary (2-5, max. 10) Field experience accompanying the first quarter of study in the Secondary Teacher Education Program. Observe and assist weekly during the quarter in supervised school placements. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 592 Second Quarter Field Experience - Secondary (2-5, max. 10) Field experience accompanying the second quarter of study in the Secondary Teacher Education Program. Supervised placements in summer school program. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 593 Third Quarter Field Experience - Secondary (2-5, max. 10) Field experience accompanying third quarter of study in Secondary Teacher Education Program. Four weeks full-time plus daily part-time in supervised school placements. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 595 Capstone Project: Tool for Reflection - Secondary ([1-3]-, max. 3) Group discussions fostering integration of coursework, field experience, and teaching experiences through documentation and reflection on student teaching experiences. Using certification standards for teachers, students illustrate their learning through multiple forms of evidence. Final

capstone project is presented to an audience. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 600 Independent Study or Research (*-) Registration must be accompanied by a study prospectus endorsed by a Director of Teacher Education and the faculty adviser for the work proposed. Credit/no-credit only.

EDTEP 601 Fourth Quarter Field Experience (2-10, max. 15) Field experience during the fourth quarter of study in a Teacher Education Program. Full-time student teaching in supervised school placements. Prerequisite: TEP student. Credit/no-credit only.

College of Engineering

College Overview

Dean

Michael B. Bragg
371 Loew

Associate Deans

Eve Riskin, Academic Affairs
Dawn Lehman, Infrastructure
Santosh Devasia, Research and Graduate Studies

Engineering is the science and art of applying scientific and mathematical principles, experience, judgment, and common sense to design devices and systems that benefit society. Engineers are fascinated by questions of how and why things work. They use their training in mathematics, physics, and chemistry to understand the physical world and develop creative solutions to society's complex needs. Engineers may be designers, planners, managers, analysts, researchers, consultants, sales specialists, and more. Engineering graduates have many career possibilities open to them.

The primary goal of College of Engineering educational programs is to prepare students for a professional career in engineering by providing the technical foundation required for success in industry, government, or academia. Other goals of the College are to instill within its students the highest ethical standards, the capability for lifelong learning, and a curiosity about the world. Excellence in undergraduate and graduate academic programs remains the College's highest priority.

For undergraduates, the College of Engineering offers a flexible curriculum that not only accommodates varied student needs, both in established departmental programs and interdisciplinary studies, but also culminates in a major and meaningful design experience. (See [Interdisciplinary Engineering Studies Program](#) for interdisciplinary undergraduate programs.)

For graduate students, the College of Engineering offers master's and doctoral programs in aeronautics and astronautics, bioengineering, chemical, civil and environmental, computer, electrical, human centered design and engineering, industrial and systems engineering, materials science, and mechanical engineering.

The College offers active educational and research programs, both departmental and interdisciplinary, at the graduate levels. (See [Interengineering Graduate Program](#) for interdisciplinary graduate programs.)

The College of Engineering has been a major unit of the University since 1899. The first engineering degrees were authorized in mining engineering and metallurgical engineering in 1898. Degrees were added for civil engineering (1901), electrical engineering (1902),

mechanical engineering (1906), chemical engineering (1907), ceramic engineering (1919), aeronautical engineering (1929), bioengineering (1983), industrial engineering (1986), and computer engineering (1987). A degree program in technical communication was implemented in 1989. The new human centered design and engineering degree title replaced technical communication in 2009. In 2011, 2,229 upper-division undergraduate majors and 1,787 graduate students were enrolled in engineering programs taught by a faculty of 228 tenure track and 184 other engineering faculty members.

College Facilities

Teaching and research activities of the College are conducted in fourteen major campus buildings (and portions of others), which contain the College's offices, classrooms, and research and teaching laboratories. The Engineering Library, a branch of the University Libraries, provides outstanding collections of books, periodicals, technical reports, and patents of interest to engineers. Computers and terminals are available in all departments and through the Student Access and Computing Group (SACG).

Student Organizations and Activities

All major professional engineering societies have student chapters on campus, and all engineering students are encouraged to join the chapter that represents their field of interest. The UW Chapter of Engineers Without Borders (EWB) students.washington.edu/ewbuw is a registered student-run organization of the University of Washington with members from many engineering as well as non-engineering backgrounds.

The College also has student chapters of the Society of Women Engineers, American Indian Science and Engineering Society, National Society of Black Engineers, the Society of Hispanic Professional Engineers, and the Phi Sigma Rho engineering sorority. Students are encouraged to join the University-wide Science and Engineering Business Association (SEBA).

The honor society open to engineering students is Tau Beta Pi.

Students serve with faculty members on engineering policy committees which make recommendations concerning instructor evaluation, curriculum revisions, advising, grading systems, and other matters of interest to students and faculty.

Special Programs and Resources

Engineering Co-op and Internship Program

014 Loew, Box 352180

engrcoop@uw.edu

The Engineering Co-op and Internship Program provides an opportunity for pre-engineering and engineering students to combine practical, full-time, on-the-job engineering experience with academic study before graduation. Students typically work full-time for three months or more and then return to full-time academic status upon completion of the co-op assignment. Some

students work part-time while continuing coursework. In addition, students receive academic credit for the co-op experience. In several engineering departments, the credit earned can be applied toward degree requirements in the major. Advantages of participation include: assistance in deciding which field of engineering to follow, early experience in the industrial sector and industrial exposure that can help guide a student's remaining studies; additional income to help defray college expenses, relevance and motivation for study based on real engineering work, and work experience and employment contacts that may result in regular employment after graduation.

Information may be obtained from the Engineering Co-op and Internship Program office, College of Engineering, Box 352180 (014 Loew), or by visiting the [Engineering Co-op and Internship program](#) website.

Engineering Undergraduate Research Program

014 Loew, Box 352180

Educational Outreach

Fulfilling a commitment to lifelong learning, the College of Engineering is partnered with UW Professional and Continuing Education (UWPCE) to offer master's degree programs, certificate programs, courses, workshops, and conferences to respond to the professional development needs of practicing engineers and related technical professionals worldwide. Thousands of practicing engineers update their technical knowledge or pursue advanced degrees each year through UWPCE. The College of Engineering works with UW Educational Outreach's Education at a Distance for Growth and Excellence (EDGE) to provide multimedia and class capture services either in an EDGE classroom or at a remote location. Go to [UWPCE website](#) or go to [EDGE website](#) for more information.

Office of Research and Graduate Studies

376 Loew, Box 352180

The Office of Research and Graduate Studies promotes, stimulates, and coordinates faculty and graduate research in all fields of engineering. Its primary role is to encourage and develop interdisciplinary research programs and national research initiatives. The Office of Research and Graduate Studies also reviews grant and contract proposals, tracks awards, and provides information on funding opportunities. This office allocates limited matching funds to College units to increase the quality of research in the College of Engineering. The College currently has the following research programs or centers:

- **Bio-Sciences**
 - **Center for Sensorimotor Neural Engineering (CSNE)** - An NSF-funded Engineering Research Center launched in July 2011 to advance the integration of technologies with human neural systems. The center brings together leaders in robotics, neuroscience, computer science, and other disciplines.

- **Genetically Engineered Materials Science and Engineering Center (GEMSEC)** - Adapts techniques in molecular biology and genomics for developing new materials and systems.
- **Molecular Engineering & Sciences Institute (MoES)** - Catalyzes translational research in the clean tech and biotech areas. The institute serves both as an intellectual accelerator to bring fresh approaches and ideas to societal grand challenges in sustainable energy and materials, and in medical therapeutics and diagnostics, and as a physical incubator where new interdisciplinary teams can come together in a shared space. Creates and coordinates new interdisciplinary education programs for undergraduate and graduate students in the College of Arts and Sciences and the College of Engineering. The institute is located in the new Molecular Engineering and Sciences Building, a facility specially designed to promote collaborative molecular-scale research.
- **National ESCA Surface Analysis Center for Biomedical Problems (NESAC/BIO)** - Develops and applies new surface analysis technologies for biomedical research.
- **Education and Learning**
 - **Center for Engineering Learning and Teaching (CELT)** - Combines two missions: to conduct internationally recognized research in engineering learning and to promote teaching effectiveness in UW engineering classrooms.
- **Electronics and Computing**
 - **Center for Collaborative Technologies (CCT)** - An effort funded by Microsoft Research to develop the ConferenceXP platform and apply the technologies to a wide range of educational and collaborative scenarios.
 - **Center for Design of Analog-Digital Integrated Circuits (CDADIC)** - One of the few research consortiums in the country that addresses problems associated with analog and mixed-signal research.
 - **Intel Research Seattle** - A collaboration among Intel and university researchers to explore new technologies (such as personal robotics and "Trustworthy Wireless") to support the ubiquitous computing environments of the future.
 - **Turing Center** - Investigates problems at the crossroads of natural language processing, data mining, web search, and the Semantic Web.
- **Energy**
 - **Bioenergy Program** - Researches how to balance the technological, environmental, and social dimensions of a sustainable energy economy. (The full program name is Bioresource-Based Energy for Sustainable Societies.)
 - **Northwest National Marine Renewable Energy Center (NNMREC)** - A DOE-funded partnership between OSU and UW. UW is responsible for tidal energy issues. The role of the center is to close key gaps in understanding of marine energy and to inform the public, regulators, research institutions, and device and site developers.

- **Plasma Science and Innovation Center (PSI)** - Develops predictive capability for emerging concept experiments, allowing new experiments in fusion science and in other areas of plasma science without actual construction.
- **Materials and Structures**
 - **Center for Intelligent Materials and Systems (CIMS)** - A collaboration of botanists and engineers to advance the bio-inspired design of intelligent materials and systems.
 - **Center of Excellence for Advanced Materials in Transport Aircraft Structures (AMTAS)** - Seeks solutions to problems associated with existing, near- and long-term applications of composites and advanced materials for large transport commercial aircraft.
 - **Institute of Advanced Materials and Technology (i-AMT)** - Facilitates interdisciplinary research in photonics, electronics, and magnetic materials; materials for energy generation and storage; biomaterials for the bio-nano interface; and multifunctional composites.
- **Transportation**
 - **Pacific Northwest Transportation Consortium (PacTrans)** - A multi-university, regional transportation center led by the University of Washington and funded by the US Department of Transportation. PacTrans focuses on safe and sustainable transportation in environments ranging from busy urban centers to remote mountainous terrain.
 - **Washington State Transportation Center (TRAC)** - A collaboration among Washington State University, the University of Washington, and the Washington State Department of Transportation to coordinate both state and commercial transportation research efforts and to develop research opportunities nationally and locally.
- **Other Centers Involving Engineering Faculty**
 - **Center for Materials and Devices for Information Technology Research (CMDITR)** - Established by the National Science Foundation in 1987 to fund interdisciplinary research and education activities and encourage technology transfer.
 - **Center for Process Analytical Chemistry (CPAC)** - A consortium established at the UW in 1984 to develop and foster collaboration on new measurement approaches, including the miniaturization of traditional instrumentation and the development of new sensors and non-traditional instruments.
 - **Microfabrication Laboratory (MFF)** - Provides a wide range of fabrication and characterization capabilities in a user facility that is open to academic as well as industrial researchers and engineers, including advanced electron beam lithography, thin film processing, and wet and dry etching in a 15,000 square foot cleanroom.

For more information, see the Office of Research and Graduate Studies web page, www.engr.washington.edu/facresearch/researchcenters.html.

Interdisciplinary Engineering Studies Program

The College of Engineering directly administers non-departmental undergraduate and graduate degree programs.

The Interdisciplinary Engineering Studies (IES) Program is intended for students whose desired course of study does not fall within one of the traditional engineering departments. An interdisciplinary program combines coursework from at least one engineering department as well as other department(s) on campus (engineering or other) to allow students to create a program of study not available through the existing undergraduate degree programs. Although coursework may involve departments outside the College of Engineering, the major thrust must be in engineering.

Undergraduate Programs

Bachelor of Science in Engineering and Bachelor of Science

The IES Program offers a nonprofessional degree program leading to the Bachelor of Science (BS) and a professional degree program for the Bachelor of Science in Engineering (BSE).

Due to the uniqueness of each interdisciplinary student's program of studies, the BS and BSE degrees are not accredited by the Engineering Accreditation Commission of ABET. The experience requirement to obtain a professional engineering license is two years longer for a BSE graduate, except in surveying, than for a graduate of an accredited program. A BS graduate is not eligible for a professional engineering license.

Interdisciplinary students develop personal programs of study approved by a faculty adviser with similar interests. Contact Student Academic Services, email: engradv@uw.edu or phone: 206-543-1770, for information on established procedures and applications for entry into the BSE and BS programs. Entrance requirements and the continuation policy for participation in these programs are consistent with those of other departments in the College.

Bachelor of Science in Engineering

Admission to this program (usually after completion of 90 credits) is competitive with a minimum 2.80 GPA in technical courses required for entry. A minimum of 75 credits must be completed after entering the program before a BSE degree is awarded. Detailed information regarding the BSE degree can be obtained from an adviser in Student Academic Services (301 Loew).

Bachelor of Science

The nonprofessional Bachelor of Science degree provides greater flexibility than does the Bachelor of Science in Engineering degree. It can be an excellent base for subsequent professional studies in law, medicine, or business. It may also be the primary educational objective in such fields as technical writing, engineering sales, or environmental studies. Detailed requirements are available from the adviser in Student Academic Services (301 Loew).

Undergraduate Program

Engineering Adviser
301 Loew, Box 352180
206-543-1770
engradv@uw.edu

The College of Engineering provides curricula that offer a variety of educational experiences to its students. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

Student Academic Services

301 Loew

Students are encouraged to contact Student Academic Services for program, course, or career information and discussion. The Student Academic Services advising office assists any student interested in planning the initial portion of an engineering degree program, and distributes information about prerequisites for application to all departments in the College.

For more information, visit the [Student Academic Services](#) website.

Financial Aid

The College offers financial assistance to undergraduates through industrial scholarships and loan funds. Scholarship information is available at the College of Engineering Student Academic Services office (301 Loew), and at the Office of Student Financial Aid (105 Schmitz). Most scholarships are given after a year or more in residence by the student.

Honors Program

The University Honors Program provides a special learning context for high-achieving students looking for a rigorous and enhanced educational experience. All departments in the College of Engineering participate in the UW Honors Program.

There are two types of Honors degrees available within the College of Engineering: College Honors and Departmental Honors. Students in either program are part of the University Honors Program.

College Honors

To be eligible for College Honors, students must be accepted to the University Honors Program in their freshman year. Additionally, students must be accepted into the departmental honors program (see information below on Departmental Honors) for their major, which usually occurs during the junior year. Students who complete both the Honors Core Curriculum (see the University Honors Program for more information) and the departmental honors requirements graduate "With College Honors in Name of Major".

Departmental Honors

Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete departmental honors requirements receive a degree "With Honors in Name of Major".

Admission Requirements: All engineering departments require students to have at least a 3.30 cumulative UW GPA to be eligible for departmental honors. Also, most departments require students to complete a specified number of departmental courses with a minimum departmental GPA.

Departmental honors requirements vary by major and are established by the individual departments. Most departments in the College of Engineering require 9 to 10 credits of Honors courses in the major and an Honors senior project or thesis.

International Study

Given the increased likelihood that engineering students will have overseas work experiences or do business with international clients and competitors, the College encourages students to study foreign languages in addition to their engineering coursework and to take advantage of opportunities for study at foreign universities either at the undergraduate or graduate level. The College has exchange agreements with approximately thirty universities in seventeen countries. Foreign-language courses at the third-quarter level or above (e.g., GERMAN 103) may be applied toward the VLPA general education requirement. For more information about international study, visit the College of Engineering International Studies website at www.engr.washington.edu/curr_students/international.html. Engineering students can also participate in the Global Engineering Education Exchange program (through the Center for Workforce Development, located in 101 Wilson Annex) for opportunities to study abroad. Through the UW Chapter of Engineers Without Borders (EWB) students.washington.edu/ewbuw, students work with disadvantaged communities worldwide in order to improve their quality of life through the implementation of environmentally sustainable, equitable, and economical engineering projects.

Admission

Students follow one of three pathways to gain admission:

1. **Direct-to-College:** Freshman applicants indicate an engineering major as their first-choice on the University application. Students admitted through this pathway enter the UW with Engineering Undeclared status and usually place into an engineering major after completing freshman-level requirements. A majority of engineering students enter majors through this pathway.
2. **Transfer Students:** Apply to the UW by the published deadline. Submit an application to an engineering major. Quarters of admission vary by department. Admission is capacity constrained. See department websites for course requirements.
3. **Other Enrolled UW Students:** Those not admitted through the Direct-to-College pathway may also apply for admission to engineering majors. Admission through this pathway is limited and is capacity constrained. See department websites for course requirements.

Direct-to College Admission

Freshman admitted to the UW who indicate an engineering major as their preferred choice enter the UW with Engineering Undeclared status and must complete requirements prior to requesting placement into a specific engineering major. This is the standard admission pathway for engineering students entering the UW as freshmen. Admission to an engineering major occurs twice a year; application deadlines are July 1 for autumn quarter and January 15 for spring quarter.

Students submit a ranked list of majors along with supporting materials. Since some majors are not able to take all students who request admission, students must identify alternative majors to ensure placement.

Capacity-constrained departments review students' academic records and supporting materials to determine priority for admission. Department priority and student department ranking are both used to determine final placement.

Engineering Undeclared Placement Requirements

Engineering Undeclared students may request placement into an engineering major after completion of minimum requirements specified by the department. Placement requirements for all majors include the following:

1. MATH 124, MATH 125, MATH 126
2. English composition
3. Minimum three science, programming, and/or advanced mathematics courses. While requirements vary, most engineering majors require three or more courses from CHEM 142, CHEM 152, CHEM 162, PHYS 121, PHYS 122, and PHYS 123. Computer Engineering also includes CSE 142 and CSE 143. Human Centered Design and Engineering also includes a statistics course. See department websites for details.

4. Minimum 2.0 grade in MATH 126 and in the course used to satisfy the English composition requirement.
5. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.
6. Minimum 2.50 GPA in prerequisite courses. Prerequisite GPA is determined from required mathematics, science, programming, and English composition courses.

Continuation Policy for Engineering Undeclared Students

While the University has general regulations governing scholastic eligibility for continuation, the College of Engineering and the engineering departments have additional requirements in order to make the best use of limited facilities and resources. Criteria and procedures applied to Engineering Undeclared students for continuation in the College include:

1. Complete at least one required mathematics, science, computer programming, or engineering course each quarter.
2. Maintain minimum 2.50 GPA in mathematics, science, English composition, computer programming, and engineering courses.
3. Normally declare into a major after completion of three or four quarters at the UW. Students unable to place into a major after completion of six quarters are dropped from Engineering Undeclared status.

Review and Notification of Progress

Student progress is reviewed each quarter. Students whose performance fails to meet the standards outlined above receive a warning letter recommending they meet with an engineering adviser. Students on warning status who fail to meet satisfactory progress requirements after one quarter are placed on probation; a hold is placed on their registration, and they must meet with a College of Engineering adviser. Students on probation who fail to meet satisfactory progress requirements after one quarter are dropped from Engineering Undeclared status. Such students may appeal for continuation as Engineering Undeclared students by writing the Associate Dean for Academic Affairs, the letter to describe any extenuating circumstances and to include any additional relevant information.

Types of Programs

The College offers three basic programs leading to Bachelor of Science degrees:

Departmental Major: This program leads to a Bachelor of Science degree in a designated field of engineering (e.g., Bachelor of Science in Civil Engineering). It is designed for students who intend to practice as professional engineers in a standard branch of engineering or who plan to undertake graduate study in that field. The curricula for these degrees are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: 410-347-7700. Accreditation requirements stipulate certain course-distribution requirements for the undergraduate degree. A description of how each of the

accredited baccalaureate programs meets the ABET requirements is available from the department office and from the College office. Accredited four-year curricula leading to baccalaureate degrees are offered in aeronautics and astronautics, bioengineering, chemical, civil and environmental, computer, electrical, industrial and systems, mechanical, materials science and engineering, and bioresource science and engineering (formerly paper science and engineering). (The bioresource science and engineering major is offered in the School of Environmental and Forest Sciences and is a joint program with the School of Environmental and Forest Sciences and the College of Engineering.)

The following programs in the College of Engineering are accredited by the Engineering Accreditation Commission of ABET:

- Aeronautical and Astronautical Engineering
- Bioengineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computer Engineering
- Electrical Engineering
- Industrial and Systems Engineering
- Materials Science and Engineering
- Mechanical Engineering

A curriculum leading to a baccalaureate degree is also offered by Human Centered Design and Engineering.

Application to a department or program at the upper-division level is made at the time lower-division requirements are satisfied. Currently enrollment limits imposed by faculty size and available laboratory/classroom space are such that entry into a specific department or program is usually competitive. In general, a student applicant must demonstrate scholastic aptitude, as evidenced by the attainment of grades averaging a minimum 2.50 or above (depending upon the program) in mathematics, the natural sciences, English composition, and other courses. A 2.50 GPA is a minimum only. In reality, the GPA of those offered admission is higher. The student is urged to plan ahead by learning the intended department or program requirements and particularly noting which requirements must be fulfilled by the time application is made.

Non-departmental Professional Program: This program leads to a Bachelor of Science in Engineering degree and is designed for students who have well defined, special educational objectives that departmental programs do not satisfy. Graduates can practice as professional engineers in newly developing fields, or they may embark on graduate study in these or allied fields (see [Interdisciplinary Engineering Studies Program](#)).

Nonprofessional Program: Leading to a Bachelor of Science degree, this program is intended for students who wish to have significant exposure to science and engineering courses, but do not

plan to engage in professional engineering practice (see [Interdisciplinary Engineering Studies Program](#)).

Graduation Requirements

To graduate, students must meet or exceed the requirements of the University and their particular program or department. All program or departmental requirements are given in the specific section that describes that program or department.

All departments of the College have continuation policies that specify a minimum rate of progress as well as minimum academic-performance levels. These policies may be more restrictive than those generally applied by the University and may change with time. Information on current policy is available at the departmental offices.

Selecting courses that fulfill graduation requirements is the responsibility of each student. Students are urged to check carefully the course and credit requirements of the program in which they are enrolled.

Inter-engineering Graduate Programs

Master of Science in Engineering and Master of Science

The College offers graduate programs leading to the Master of Science in Engineering and Master of Science degrees, without designation of a specific major. For graduate degrees within specific majors, see the individual departmental listings.

The civil, mechanical, and chemical departments, and inter-engineering offer approved programs that lead to the Master of Science in Engineering degree. The civil department, inter-engineering, and the materials science and engineering department offer approved programs that lead to the Master of Science degree.

The Inter-engineering Master of Science in Engineering (MSE) and Master of Science (MS) program is intended for students whose desired course of study does not fall within one of the traditional engineering graduate programs. An inter-engineering program combines coursework from at least one graduate engineering department as well as other graduate department(s) on campus (engineering or other) to allow students to create a program of study not available through existing graduate degree programs. Applications and files of students entering the MS or MSE option are handled by the designated engineering department. Admission requires a statement describing the applicant's objectives. This statement should state why the student wants to enter the MS/MSE program rather than one of the traditional engineering graduate programs. Applicants to the MS/MSE program must have well-defined educational objectives which cannot be satisfied by established engineering programs.

Admission Requirements

MSE/MS applicants must have a bachelor's degree in engineering, mathematics, or science with a minimum 3.00 GPA in courses taken in the junior and senior years. Students entering without an accredited engineering undergraduate degree and seeking an MSE degree satisfy the minimum general requirements of the College of Engineering baccalaureate degree. Students complete the degree within two years; situations requiring longer must be approved by the student's faculty adviser.

Development of the Plan of Study: Before applying, the student consults a faculty member from each department in which the student intends to work, and identifies one to serve as the faculty adviser. Each student develops a plan of study and research that meets the general degree requirements (below) and satisfies the student's own program objectives. The program must include in-depth coursework from two or more departments and be approved by the faculty adviser(s). The proposed program becomes part of the student's application to the inter-engineering MSE/MS program.

Development of the Statement of Objectives: Students submit a one-page statement of study and career objectives for seeking this degree, explaining why the student wants to enter the MSE/MS program rather than a traditional engineering graduate program. Also, students should include any additional information, such as work experience, outside interests, and unusual circumstances, that may contribute to a better understanding of the student's record.

Degree Requirements

48 credits

Minimum 39 credits of coursework, with no more than 9 credits of engineering courses at the 400 level and at least 21 credits of engineering courses at the 500 level; also, at least 9 credits of thesis study/preparation.

Course Descriptions

ENGR 100 Introduction to Engineering Design (5) I&S Introduction to design and communication principles through engineering project approach, stressing teamwork, design process, specialties and tools of engineering, creative and analytical thinking, professionalism and ethics, social, economic and political context, open-ended problems. Grading based on quality of engineering projects and presentation of design through written, oral, and graphical communication. Offered: AWSp.

ENGR 101 Engineering Exploration (1-2, max. 3) Presentations and discussions on topics of current interest in engineering. Explores various areas of engineering research, engineering disciplines, and the relevance to today's students. Topics vary by quarter.

ENGR 102 Studying Engineering (1-3, max. 6) Intensive seminar focusing on topics relating to the successful study of engineering. Topics include an introduction to the university culture,

learning skills development, engagement with critical resources, and an introduction to engineering disciplines and professions. Topics vary by quarter. Credit/no-credit only.

ENGR 120 STARS Mathematics Problem Solving (4) Lectures and intensive problem solving in mathematics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

ENGR 121 STARS Chemistry Problem Solving (3) NW Lectures and intensive problem solving in mathematics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

ENGR 122 STARS Physics Problem Solving (3) Lectures and intensive problem solving in physics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

ENGR 197 Engineering Problem Solving (1, max. 12) Lectures and problem sessions in mathematics, chemistry, and physics with engineering applications. Enrollment restricted to Minority Science, Engineering Program (MSEP), and Women in Science and Engineering (WiSE) students. Credit/no-credit only. Offered: AWP.

ENGR 199 Special Projects (1-3, max. 3) Students propose problems to solve to an engineering faculty member. Problems selected from the student's own experiences and interests, from the interest of faculty members, or from other sources such as faculty or graduate students doing research projects, or from personnel in physical medicine, occupational therapy, hospital, industry, or government. Required corroboration by an engineering faculty member. Project suggestions available. Offered: AWP.

ENGR 202 Special Topics (1-5, max. 10) Topics of current interest to engineering students. Offered: AWP.

ENGR 231 Introduction to Technical Communication (3) Examines basics of researching and presenting technical information for different audiences and purposes. Individually and in teams, students learn to construct document and presentations, following conventions of oral, written, and visual communication. Assignments are grounded in ethical and sustainable engineering practices. Prerequisite: Either both ENGL 109 and ENGL 110, or any one of the following: C LIT 240, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, ENGL 281, ENGL 282, ENGL 297, ENGL 298, ENGL 299, ENGL 381, ENGL 382, HONORS 205, HONORS 345 Offered: AWP.

ENGR 296 Engineering Study Abroad (1-6, max. 18) Lower-division engineering course taken abroad for which there are no direct UW equivalents. May apply toward UW faculty-led programs or to courses taught approved study abroad programs. Credit does not apply to major requirements without approval.

ENGR 297 Vertically Integrated Projects ([1-2]-, max. 8) Project-based, design and exploration experiences for lower division students. Through this class, students will take on

entry level roles on faculty-led project/research teams while being mentored by upper division students, faculty, and graduate students.

ENGR 320 Engineering Cooperative Education (1-10, max. 12) Engineering practicum; includes integration of classroom theory with on-the-job training. Open only to students who have been admitted to the Engineering Cooperative Education Program. Credits are deducted from student record. Credit/no-credit only. Offered: AWSpS.

ENGR 321 Engineering Cooperative Education ([1-2]-, max. 16) Engineering practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to the Engineering Cooperative Education Program. Requires subsequent completion of ENGR 322 to obtain credit. Credit/no-credit only. Offered: AWSpS.

ENGR 322 Engineering Cooperative Education Postwork Seminar (-0) Reporting and evaluation of co-op work experience, and discussion of current topics in engineering. To be taken during the first quarter in school following each work session. Offered: AWSpS.

ENGR 360 Introductory Acoustics (3) NW Introduction to propagation of acoustical waves; emphasis on propagation of sound waves in air, but material is applicable to propagation of sound waves in liquids, including underwater acoustics, and to propagation of stress waves in solids. Includes a historical development of acoustics, terminology, and units employed. Prerequisite: either MATH 136 or MATH 307; PHYS 123. Offered: Sp.

ENGR 380 Design for Sustainability in the Developing World (2, max. 8) I&S Bolton Introduction to issues in international sustainable development from an engineering perspective. Combines lectures on current approaches and potential pitfalls with work on group projects related to sustainable development efforts of Engineers Without Borders. Develops research and design skills using real life projects. Intended for students from all backgrounds. Credit/no-credit only. Offered: AW.

ENGR 401 Leadership Development to Promote Equity in Engineering Relationships (3) I&S, DIV Engages engineering students' energy, creativity, social conscience, and on-the-ground perspectives in advancing diversity and inclusion in engineering. Students explore topics such as diversity in science and engineering, impact of unconscious bias, the role of allies, community engagement, and leadership in supporting all current and potential engineers. Credit/no-credit only.

ENGR 496 Engineering Study Abroad (1-6, max. 18) Upper-division engineering course taken abroad for which there are no direct UW equivalents. May apply toward UW faculty-led programs or to courses taught approved study abroad programs. Credit does not apply to major requirements without approval.

ENGR 497 Vertically Integrated Projects ([1-2]-, max. 10) Advanced project based, design and exploration experiences for upper division students. Students will take on leadership roles

and faculty-led research teams while mentoring participating lower division students and engaging with faculty and graduate students.

ENGR 498 Special Topics in Engineering (1-5, max. 6) Offered: AWSpS.

ENGR 499 Special Projects in Engineering (1-3, max. 6) Offered: AWSpS.

ENGR 598 Seminar Series in Engineering (1, max. 12) Graduate seminar series on topics of interest to all engineering students.

ENGR 601 Internship ([1-2]-, max. 24) Engineering practicum; includes integration of classroom theory with on-the-job training for graduate students. Open only to students who have been admitted to the Engineering Cooperative Education Program. Offered: AWSpS.

Aeronautics and Astronautics

Department Overview

211 Guggenheim Hall

Aeronautics and astronautics deals with the design, analysis, and performance of air and space vehicles and a broad spectrum of related engineering science, such as aerodynamics, structural mechanics, automatic controls, flight mechanics, space dynamics, propulsion, plasma dynamics, and related topics.

Undergraduate Program

Adviser

211C Guggenheim Hall, Box 352400

206-616-1115

ugadvising@aa.washington.edu

The department offers the following program of study:

- The Bachelor of Science in Aeronautical and Astronautical Engineering degree
- A minor in aeronautics and astronautics

Bachelor of Science in Aeronautical and Astronautical Engineering

Suggested First- and Second-Year College Courses: During the first year, students should take the required calculus, chemistry, English composition, and computer programming. If possible, begin taking the physics sequence. It is recommended that some VLPA and I&S courses be taken to balance the course load.

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students.

1. Deadlines for requesting placement into the major: July 1 and January 15
2. Course requirements to request placement: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, and either PHYS 123 or CHEM 142; 5 credits English composition.
3. Grade requirements: Minimum 2.0 grade in each course required for placement and minimum 2.50 cumulative GPA in courses required for placement

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students and Transfer Students

Current UW students who do not have Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126, CHEM 142, PHYS 121, PHYS 122, A A 210, 5 credits English composition completed prior to application deadline. MATH 307, MATH 308, MATH 324, PHYS 123, A A 260, CEE 220, ME 230, and AMATH 301 completed with a minimum 2.0 grade prior to autumn quarter
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application.

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

180 credits, as follows:

1. **General Education Requirements (78 credits)**
 - a. *Areas of Knowledge (49 credits):*
 - i. *Visual, Literary, and Performing Arts (VLPA) and Individuals & Societies (I&S):* 24 credits, to include a minimum 10 credits in VLPA and a minimum 10 credits of I&S, plus 4 additional credits in either area.
 - ii. *Natural World:* 25 credits to include CHEM 142, PHYS 121, PHYS 122, PHYS 123, and an additional 5 credits of Natural World courses (consult department for list of approved courses.)
 - b. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 324.
 - c. *Written and Oral Communication:* One 5-credit English composition course from the University list. Additional writing credits are built into the major core courses.

2. Major Requirements (89 credits)

- a. *Engineering Fundamentals (16 credits)*: A A 210, A A 260, CEE 220, and M E 230.
- b. *Departmental Core (73 credits)*: A A 301, A A 302, A A 310, A A 311, A A 312, A A 320, A A 321, A A 322, A A 331, A A 332, A A 360; either A A 410 and A A 411 or A A 420 and A A 421; A A 447, A A 496, AMATH 301; 15 credits of senior technical electives. With approval, 3 credits of the latter may be chosen from another area of engineering.
- c. Minimum 1.7 grade in each 300- and 400-level A A course applied to major requirements
- d. Minimum 2.00 cumulative GPA for courses applied to major requirements

3. Free Electives (13 credits)

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, please contact the departmental adviser or see [departmental web page](#) for more details.

Minor

Minor Requirements

Minimum 32 credits to include:

1. *Core (24 credits)*: A A 210; A A 260; A A 310; A A 311; CEE 220; M E 230
2. *Electives (minimum 8 credits)*: Selected from an approved list of upper-division electives. Minimum one course taken at the 400 level. See adviser for approved list.
3. Minimum 16 credits taken in residence through the UW
4. Minimum 16 credits taken within the Aeronautics and Astronautics Department
5. Minimum 2.00 cumulative GPA in courses applied to the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The goals and objectives of the undergraduate program are to provide a challenging and comprehensive education, to develop necessary functional skills and an understanding of the societal context in which engineering is practiced, to provide a solid foundation in the engineering sciences related to aerospace engineering, to provide a systems perspective, to develop engineering creativity through design experience, and to prepare graduates to succeed in engineering careers and lifelong learning.

Graduates of aeronautics and astronautics are skilled in engineering fundamentals, engineering design, laboratory skills, synthesis of various engineering disciplines, and working in a team environment. Graduates are highly regarded by employers in

aeronautics, astronautics, energy systems, and related fields. They develop interpersonal skills and a desire for life-long learning that helps them succeed in their chosen careers. Graduates have been successful and valued at local, national, and international industries, as well as at government organizations and institutions of higher learning.

- *Instructional and Research Facilities:* Visit the department web page to view current research activities. Undergraduates are encouraged to participate in research activities.
- *Honors Options Available:* With College Honors (completion of Honors core curriculum and Departmental Honors requirements). With Honors (completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are arranged individually. See adviser for details.
- *Department Scholarships:* Scholarships are limited and are usually reserved for students who have junior and senior standing in the department. Deadline for scholarship applications is April 1.
- *Student Organizations/Associations:* American Institute of Aeronautics and Astronautics (AIAA) student chapter. Sigma Gamma Tau

Graduate Program

Graduate Program Coordinator
211B Guggenheim Hall, Box 352400
206-616-1113
gradadvising@aa.washington.edu

The department offers programs that provide a foundation in the aerospace engineering sciences and expertise in various specialized application areas. Three graduate degree options are offered: Master of Science in Aeronautics and Astronautics, Master of Aerospace Engineering, and Doctor of Philosophy.

Master of Science in Aeronautics and Astronautics (MSAA)

Admission Requirements

1. *Grade Point Average:* Minimum 3.30 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants with less than a 3.30 GPA may still be considered if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* The department recognizes that some academic institutions are capacity constrained and high grades are more difficult to obtain.
3. *GRE General Test:* Although no minimum GRE score is required, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, scores should be received before February 15.

4. *Two Letters of Recommendation:* Confidential letters submitted electronically by recommenders, or placed in sealed envelopes and included with application materials, or sent directly to the department by recommenders. Writers should rank the applicant's performance as a student and/or researcher. Recommendations are sent in letter format; no special form is used.
5. *Statement of Objectives:* Information not found in transcripts and other official documents. May include personal histories, professional and academic goals, and specific research interests if applicable.
6. *English Requirements for International Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for international students whose native language is not English.
7. *Prior Degrees:* Undergraduate degree in aerospace or mechanical engineering. Applicants with grades (3.50 and above) in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

39-45 credits, as follows:

1. Program of study plan approved by the department's graduate committee and submitted before 12 credits are completed.
2. Minimum MSAA program: either 10 courses plus 9 thesis credits, or 13 courses. No more than three courses at the 400 level (none in a student's depth area). All courses must be graded. Students enroll in the graduate seminar (A A 520) every quarter of full-time study.

Each program includes depth in a field of specialization, breadth to include at least one course in each of two different subject areas outside the field of specialization, and analytical strength to include three mathematical courses. Senior sequences in engineering, science, or other appropriate professional fields may make up part of the individualized graduate program. Only three undergraduate courses may be counted toward minimum requirements (and none in the student's depth area).

Normally one-and-a-half to two years of full-time study are needed to complete an MSAA degree.

Master of Aerospace Engineering (MAE)

Intended for recent graduates or engineers who wish to expand their knowledge in multidisciplinary areas while also learning other aspects of aerospace engineering, such as business, management, manufacturing, or technical communication.

Admission Requirements

1. *Grade Point Average:* Minimum 3.30 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* The department recognizes that some academic institutions are capacity constrained and high grades are more difficult to obtain.
3. *GRE General Test:* Although the department does not specify minimum GRE scores, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15.
4. *Two Letters of Recommendation:* Confidential letters submitted electronically by recommenders, or placed in sealed envelopes and included with application materials, or sent directly to the department by recommenders. Writers should rank an applicant's performance as a student and/or researcher. Recommendations are sent in letter format; no special forms are used.
5. *Statement of Objectives:* Information not found in transcripts and other official documents. May include personal histories, professional and academic goals, and specific research interests if applicable.
6. *English Requirements for International Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for international students whose native language is not English.
7. *Prior Degrees:* Undergraduate degree in aerospace or mechanical engineering. Applicants with grades (3.50 and above) in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

45-54 credits

Students create their own programs of study based on departmental distribution requirements and subject to departmental approval, to include courses in a specialty area, technical and non-technical electives, analytical courses, and a group or independent project. The MAE program includes twelve courses plus 8 credits for the project, or ten courses and one of three business certificate programs.

Doctor of Philosophy (PhD)

Admission Requirements

1. *Grade Point Average:* Minimum 3.40 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants with less than a 3.40 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.

2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* The department recognizes that some academic institutions are capacity constrained and high grades are more difficult to obtain.
3. *GRE General Test:* Although the department does not specify minimum GRE scores, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, scores should be received before February 15.
4. *Two Letters of Recommendation:* Confidential letters submitted electronically by recommenders, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should rank the applicant's performance as a student and/or researcher. Recommendations are sent in letter format; no special forms are used.
5. *Statement of Objectives:* Information about the applicant not found in transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests.
6. *English Requirements for International Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for international students whose native language is not English.
7. *Prior Degrees:* Undergraduate and graduate degrees in aerospace or mechanical engineering with a 3.40 minimum GPA. Applicants with strong grades in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

Minimum 90 credits

1. *Departmental Qualifying Examination:* Minimum 3.40 GPA in technical coursework at the graduate level and an MSAA degree or its equivalent.
2. *General Examination:* Taken within a year after the qualifying examination, but no sooner than two years after the beginning of graduate study.
3. *Completion of Coursework:* At least 18 credits of coursework in addition to that for the MSAA degree.
4. *Preparation of the Dissertation:* Normally requires the equivalent of at least one year of full-time study.
5. *Final Examination*

Research Activities

Current areas of research in the Department of Aeronautics and Astronautics include guidance and control systems, aerodynamics and fluid mechanics, propulsion and energy systems, advanced composite materials and structures, and plasma dynamics and fusion reactors. Research in controls includes autonomous systems involving spacecraft, aircraft, and underwater vehicles, flight systems integration, and development of unmanned aerial vehicles. Among fluid

dynamics research topics are turbulent mixing, vortex dynamics and flow control, compressible flow, fluids in microgravity, and advanced fluid flow diagnostics development. Research programs in the areas of propulsion and energy include hypervelocity mass launchers, advanced technologies for generating space and terrestrial energy, combustion, and studies of planetary resources utilization. Structural mechanics research involves damage-tolerant composite structures, structural dynamics, fatigue, and fracture, and multidisciplinary design optimization. Experimental and computational research in plasma science has an emphasis on advanced, alternative concepts for achieving controlled fusion, as well as plasma propulsion for space applications.

Facilities

Facilities that support research activities in controls include unmanned aerial vehicle (UAV) and autonomous flight systems laboratories, and laboratories for underwater vehicle and distributed space systems research. Fluids, propulsion, and energy facilities include the Kirsten 8 x 12 foot low-speed wind tunnel, two water tunnels, a Mach 5, enthalpy blow-down wind tunnel, the Ram Accelerator hypervelocity launcher, a combustion laboratory, and a Mars environment simulation facility. Research in structures is conducted in a composite-material laboratory with material and structural test machines. Various plasma and fusion-research and engineering physics laboratories, including the Redmond Plasma Physics Laboratory (RPPL), exist to support research in plasmas. A variety of computer facilities is available, including a single 20-processor and two 8-processor servers, and a 16-computer heterogeneous cluster, as well as several stereographic visualization systems.

Financial Support

Most students are financially supported by the department as teaching or research assistants, or by their employers. For further information, contact the Graduate Program Coordinator, 211B Guggenheim Hall, Box 352400, or visit the department's [website](#).

Course Descriptions

Aeronautics and Astronautics

A A 101 Air and Space Vehicles (5) NW

A A 198 Special Topics in Aeronautics and Astronautics (1-5, max. 10) NW *Knowlen*

Introduces the field of Aeronautics and Astronautics. Topics include aircraft flight, rocket propulsion, space travel, and contemporary space missions. May include hands-on activities. For non-majors.

A A 210 Engineering Statics (4) NW Applies vector analysis to equilibrium of rigid body systems and subsystems. Includes force and moment resultants, free body diagrams, internal forces, and friction. Analyzes basic structural and machine systems and components.

Prerequisite: minimum grade of 2.0 in either MATH 126 or MATH 136; minimum grade of 2.0 in PHYS 121. Offered: AWS.

A A 260 Thermodynamics (4) NW Introduction to the basic principles of thermodynamics from a macroscopic point of view. Emphasis on the First and Second Laws and the State Principle, problem solving methodology. Prerequisite: minimum grade of 2.0 in either CHEM 140, CHEM 142, CHEM 144, or CHEM 145; minimum grade of 2.0 in either MATH 126, MATH 129, or MATH 136; minimum grade of 2.0 in PHYS 121. Offered: SpS.

A A 299 Undergraduate Research (1-5, max. 10) Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. Credit/no-credit only. Offered: AWSpS.

A A 301 Compressible Aerodynamics (4) Covers aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere; kinematics and dynamics of flow fields; thin airfoil theory; compressible fluids; one-dimensional compressible flow; and two-dimensional supersonic flow. Prerequisite: either A A 260 or M E 323. Offered: W.

A A 302 Incompressible Aerodynamics (4) Aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields; incompressible flow about bodies. Thin airfoil theory; finite wing theory. Prerequisite: minimum grade of 1.7 in A A 301; PHYS 123; either AMATH 351, MATH 136, or MATH 307. Offered: Sp.

A A 310 Orbital and Space Flight Mechanics (4) Newton's law of gravitation. Two-body problem, central force motion, Kepler's laws. Trajectories and conic sections. Position and velocity as functions of time. Orbit determination and coordinate transformations. Rocket dynamics, orbital maneuvers, Hohmann transfer. Interplanetary trajectories, patched conics. Planetary escape and capture. Gravity assist maneuvers. Prerequisite: M E 230. Offered: A.

A A 311 Atmospheric Flight Mechanics (4) Applied aerodynamics, aircraft flight "envelope," minimum and maximum speeds, climb and glide performance. Range and endurance, take-off and landing performance, using both jet and propeller power plants. Longitudinal and dynamic stability and control, wing downwash, stabilizer and elevator effectiveness, power effects. Lateral and directional stability and control. Prerequisite: M E 230 Offered: A.

A A 312 Structural Vibrations (4) Vibration theory. Characteristics of single and multi degree-of-freedom linear systems with forced inputs. Approximate methods for determining principal frequencies and mode shapes. Application to simple aeroelastic problems. Prerequisite: M E 230. Offered: W.

A A 320 Aerospace Instrumentation (3) Hands-on laboratory experience for understanding the design and function of electronic circuits and instrumentation utilized in aerospace engineering. Topics include Ohm's law, Kirchoff's laws, DC and AC circuits, passive and active components, op-amps and comparators, sensors, signal conditioning, electromechanical systems and actuators, digital systems, and data acquisition. Prerequisite: PHYS 123. Offered: A.

A A 321 Aerospace Laboratory I (3) The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on supersonic flow, structures,

vibrations, material properties, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Prerequisite: A A 311; and A A 320
Offered: W.

A A 322 Aerospace Laboratory II (3) Design and conduct of experimental inquiry in the field of aeronautics and astronautics. Student groups propose, design, build, and conduct laboratory experiments in one of the following broad topic areas: aerodynamics, structures, propulsion, or energetics. Results are presented in written and oral reports. Prerequisite: minimum grade of 1.7 in A A 321. Offered: Sp.

A A 331 Aerospace Structures I (4) Analysis and design of aerospace structures. Reviews concepts of stress, strain, and equations of elasticity. Plane stress and plane strain. Application to aerospace structural elements including general bending and torsion of rods and beams, and open and closed thin-walled structures and box beams. Prerequisite: CEE 220. Offered: W.

A A 332 Aerospace Structures II (4) Shear flow in multi-cell thin walled sections. Bending of rectangular and circular plates. Buckling analysis of beams and plates. Energy principles in elasticity. Introduction to the finite element method. Elements of fracture mechanics and fatigue. Prerequisite: minimum grade of 1.7 in A A 331. Offered: Sp.

A A 360 Propulsion (4) Study of the aero- and thermodynamics of jet and rocket engines. Air-breathing engines as propulsion systems. Turbojets, turbofans, turboprops, ramjets. Aerodynamics of gas-turbine engine components. Rocket vehicle performance. Introduction to space propulsion. Prerequisite: minimum grade of 1.7 in A A 301. Offered: A.

A A 395 Undergraduate Seminar (1, max. 4) Lectures and discussions on topics of current interest in aviation and space technology by guest speakers. Topics vary. Credit/no-credit only. Offered: A.

A A 400 Gas Dynamics (3) Introduction to kinetic theory and free molecule flow. Review of thermodynamics. One-dimensional gas dynamics: one-dimensional wave motion, combustion waves. Ideal and real gas application. Prerequisite: PHYS 123; either A A 260 or CHEM E 260.

A A 402 Viscous Fluid Mechanics (3) Introduction to fluid mechanics, dimensional analysis, effects of gravity on pressure, kinematics, conservation of mass and momentum, control-volume method, conservation of energy, vorticity and viscosity, viscous effects, Navier-Stokes solutions, and boundary layers. Prerequisite: MATH 324; A A 301. Offered: A.

A A 405 Introduction to Aerospace Plasmas (3) Development of introductory electromagnetic theory including Lorentz force and Maxwell's equations. Plasma description. Single particle motions and drifts in magnetic and electric fields. Derivation of plasma fluid model. Introduction to plasma waves. Applications to electric propulsion, magnetic confinement, and plasmas in space and Earth's outer atmosphere. Prerequisite: PHYS 123; MATH 324. Offered: A.

A A 410 Aircraft Design I (4-) Conceptual design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and

performance. Satisfaction of stability, control, and handling qualities requirements. Prerequisite: A A 320; A A 311; A A 332; and A A 360 Offered: W.

A A 411 Aircraft Design II (-4) Preliminary design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Prerequisite: A A 410. Offered: Sp.

A A 419 Aerospace Heat Transfer (3) Fundamentals of conductive, convective, and radiative heat transfer with emphasis on applications to atmospheric and space flight. Prerequisite: PHYS 123; MATH 307. Offered: W.

A A 420 Spacecraft and Space Systems Design I (4-) Design of space systems and spacecraft for advanced near-Earth and interplanetary missions. Astrodynamics, space environment, space systems engineering. Mission design and analysis, space vehicle propulsion, flight mechanics, atmospheric entry, aerobraking, configuration, structural design, power systems. thermal management, systems integration. Oral presentations and report writing. Design topics vary. Prerequisite: A A 301; A A 310; A A 332; and A A 360. Offered: W.

A A 421 Spacecraft and Space System Design II (-4) A continuation of A A 420. Course content varies from year to year and is dependent on the design topic chosen for A A 420. Prerequisite: A A 420. Offered: Sp.

A A 440 Flight Mechanics I (3) Calculation of aerodynamic characteristics of aircraft and components including stability derivatives. Relation to wind tunnel and flight data. Vehicle equations of motion within the atmosphere, characteristics of propulsion systems and components including propellers. Prediction of performance, stability, and control characteristics for a specific aircraft. Prerequisite: A A 311; A A 312; and A A 447. Offered: W.

A A 441 Flight Test Engineering (3) Determination in flight of performance, stability, and control characteristics of aircraft; and comparison with predicted and wind tunnel results. Ad hoc scheduled flight test experiments. Prerequisite: A A 311; A A 440.

A A 447 Control in Aerospace Systems (4) Overview of feedback control. Dynamic models for control systems design including ODE, transfer function, and state-space. Linearization of nonlinear models. Analysis of stability, controllability, observability, time/frequency domain techniques. Frequency of response design techniques. Design of control systems via case studies. Prerequisite: minimum grade of 1.7 in A A 312; M E 230; MATH 308. Offered: Sp.

A A 448 Control Systems Sensors and Actuators (3) Overview of feedback control. Study of control systems components and formulation of their mathematical models. Discussion and analysis of amplifiers, DC servomotors, magnetic-actuators, accelerometers, potentiometers, shaft encoders and resolvers, proximity sensors, and force transducers. Experimental determination of component models and model parameters. Includes hands-on laboratory component. Prerequisite: A A 447. Offered: A.

A A 449 Special Topics in Controls (3-5) Topics of current interest in controls. Offered: Sp.

A A 461 Air Breathing Propulsion (3) Examines gas turbine engine design methodology. Covers aerodynamics or gas dynamics of air breathing engine components: inlets, compressors, turbines, and nozzles. Studies the on-design and off-design performance of gas turbine engines. Includes combustion, emissions, noise, and advanced air breathing propulsion systems. Prerequisite: A A 360. Offered: A.

A A 462 Rocket Propulsion (3) Covers the physical and performance characteristics of chemical rocket propulsion systems. Includes combustion chamber thermochemistry, propellant properties and handling, and rocket system component interactions. Prerequisite: A A 260. Offered: W.

A A 470 Systems Engineering (4) Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with IND E 470; Sp.

A A 498 Special Topics (1-5, max. 15) Topics of current interest in the Department of Aeronautics and Astronautics.

A A 499 Undergraduate Research (1-5, max. 10) Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. A maximum of 6 credits may be applied toward senior technical electives. Offered: AWSpS.

A A 501 Advanced Gas Dynamics (3) Equilibrium kinetic theory; chemical thermodynamics; thermodynamic properties derived from quantum statistical mechanics; reacting gas mixtures; applications to real gas flows and gas dynamics. Offered: Sp, odd years.

A A 503 Continuum Mechanics (3) Reviews concepts of motion, stress, energy for a general continuum; conservation of mass, momentum, and energy; and the second law; constitutive equations for linear/nonlinear elastic, viscous/inviscid fluids, and general materials; and examples/solutions for solid/fluid materials. Offered: jointly with M E 503; A.

A A 504 Compressible Fluid Mechanics (3) Reviews the fundamentals with application to external and internal flows; supersonic flow, 1D and Quasi-1D, steady and unsteady flow, oblique shocks and expansion waves, linearized flow, 2D flow, method of characteristics; and transonic and hypersonic flow. Offered: A.

A A 506 Vortex-Dominated Flows (3) Examines the vorticity equation, baroclinic torque, solenoidality, Biot-Savart's formula, diffusion of vorticity, Burger vortex, system of vortices, Kelvin-Helmholtz instability, effects of density, shear, and surface tension on instability, swirling flows, and other special topics. Offered: Sp, even years.

A A 507 Incompressible Fluid Mechanics (3) Covers inviscid and viscous incompressible flows, exact solutions of laminar flows, creeping flows, boundary layers, free-shear flows, vorticity equation, and introduction to vortex dynamics. Offered: jointly with M E 507; W.

A A 508 Turbulence (3) The phenomena of turbulence; transition prediction; Reynolds stresses; turbulent boundary-layer equations. Approximate methods for turbulent boundary layers. Prerequisite: A A/M E 507 or permission of instructor. Offered: Sp, odd years.

A A 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with CHEM E 510/E E 510/M E 510.

A A 516 Stability and Control of Flight Vehicles (3) Static and dynamic stability and control of flight vehicles in the atmosphere. Determination of stability derivatives. Effects of stability derivatives on flight characteristics. Flight dynamic model. Responses to control inputs and external disturbances. Handling qualities. Control system components, sensor characteristics. Stability augmentation systems. Prerequisite: A A 440 or permission of instructor Offered: Sp.

A A 523 Special Topics in Fluid Physics (3) Offered: AWSp.

A A 524 Aeroacoustics (3) Reviews the fundamental concepts of acoustics which include sound measurements, reflection, resonance, transmission, radiation, scattering, diffraction, ray acoustics, wave guide, turbo-machinery noise, sound suppression, jet noise, and airframe noise and acoustic problems in rockets and other propulsion systems. Offered: A, odd years.

A A 525 Advanced Airbreathing Propulsion (3) Reviews the fundamental concepts of advanced airbreathing engines including advanced gas turbines, ramjets, scramjets and variants, detonations engines, flow with chemical energy release, shock dynamics, Chapman-Jouguet, ZND model, and multi-cellular and spinning detonation. Offered: A, even years.

A A 527 Space Power Systems (3) Explores the theoretical background and technology of power systems for satellites, space science missions, and planetary and lunar outposts. Focuses on photovoltaic, solar-thermal, and nuclear systems, as well as chemical systems for storage. Addresses thermal management. Offered: A, even years.

A A 528 Spacecraft Dynamics and Control (3) Examines spacecraft dynamics and control. Includes basic orbital mechanics - the restricted three body problem, Hill's theory, perturbation theory, orbit determination, rigid body kinematics and dynamics, attitude control, and spacecraft formation flying. Prerequisite: MATH 307; MATH 308. Offered: W, odd years.

A A 529 Space Propulsion (3) Nucleonics, and heat transfer of nuclear-heated rockets. Electrothermal, electromagnetic, and electrostatic thrusters. Power/propulsion systems. Prerequisite: permission. Offered: Sp, odd years.

A A 530 Mechanics of Solids (3) General concepts and theory of solid mechanics. Large deformations. Behavior of elastic, viscoelastic, and plastic solids. Linear theory of elasticity and thermoelasticity. Wave propagation in solids. Offered: A.

A A 532 Mechanics of Composite Materials (3) Analysis and design of composite materials for aerospace structures. Micromechanics. Anisotropic elasticity. Laminated plate theory. Thermo-viscoelastic behavior and fracture of composites. Prerequisite: coursework in mechanics of materials or permission of instructor. Offered: A.

A A 535 Advanced Composite Structural Analysis (3) Covers advanced stress analysis methods for composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A A 532. Offered: jointly with M E 500; Sp, odd years.

A A 538 Introduction to Structural Optimization (3) Includes the formulation of engineering design problems as optimization problems, gradient based numerical optimization methods, design oriented structural analysis, structural sensitivity analysis, approximation concepts, and introduction to multidisciplinary design optimization. Prerequisite: coursework in structural analysis; finite elements; and computer programming; or permission of instructor. Offered: A, odd years.

A A 540 Finite Element Analysis I (3) Formulation of the finite element method using variational and weighted residual methods. Element types and interpolation functions. Application to elasticity problems, thermal conduction, and other problems of engineering and physics. Offered: W.

A A 541 Finite Element Analysis II (3) Advanced concepts of the finite element method. Hybrid and boundary element methods. Nonlinear, eigenvalue, and time-dependent problems. Prerequisite: A A 540 or permission of instructor. Offered: Sp, even years.

A A 543 Computational Fluid Dynamics (3) Examines numerical discretization of the inviscid compressible equations of fluid dynamics; finite-difference and finite-volume methods; time integration, iterative methods, and explicit and implicit algorithms; consistency, stability, error analysis, and properties of numerical schemes, grid generation; and applications to the numerical solution of model equations and the 2D Euler equations. Offered: W.

A A 544 Turbulence Modeling and Simulation (3) Examines numerical discretization of the incompressible Navier-Stokes equation; projection method, introduction to turbulence; Reynolds Averaged Navier-Stokes equations; algebraic, one-equation, and two-equation turbulence models; large-eddy simulation; direct numerical simulation; and applications to the numerical solution of laminar and turbulent flows in simple geometries. Offered: Sp, even years.

A A 545 Computational Methods for Plasmas (3) Develops the governing equations for plasma models - particle, kinetics, and MHD. Applies the governing equation to plasma dynamics through the PIC method and integration of fluid evaluation equations. Examines

numerical solution to equilibrium configurations, and linear stability by energy principle and variational method. Prerequisite: A A 405 or A A 557. Offered: Sp, odd years.

A A 546 Advanced Topics in Control System Theory (3) Topics of current interest for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor.

A A 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Offered: jointly with E E 547/M E 547.

A A 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 548/M E 548.

A A 549 Estimation and System Identification (3) Fundamentals of state estimation for linear and nonlinear systems. Discrete and continuous systems. Probability and stochastic systems theory. Models with noise. Kalman-Bucy filters, extended Kalman filters, recursive estimation. Numerical issues in filter design and implementation. Prerequisite: either A A 547, E E 547, or M E 547. Offered: jointly with E E 549/M E 549.

A A 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with E E 550/M E 550.

A A 553 Vibrations of Aerospace Systems (3) Continuous and discrete systems, natural frequencies, and modal analysis; forced vibrations and motion-dependent forces. Structural damping; control augmented structures. Measurements for structural dynamic testing. Prerequisite: A A 571 or equivalent. Offered: Sp, odd years.

A A 554 Aeroelasticity (3) Static and dynamic aeroelasticity, unsteady aerodynamics, aeroservoelastic modeling, and active control. Offered: A, even years.

A A 556 Space and Laboratory Plasma Physics (3) Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with ESS 576; W, odd years.

A A 557 Physics of Fusion Plasmas (3) Review and comparison of single particle and fluid descriptions of plasmas. MDH equilibrium, flux surfaces, and basic toroidal description.

Collisional processes including physical and velocity space diffusion. Introduction to island formation, stochasticity, and various plasma instabilities. Prerequisite: A A 405 or GPHYS 505. Offered: W, even years.

A A 558 Plasma Theory (3) Equilibrium, stability, and confinement. Classical transport, collisionless and resistive skin depths. Ideal MHD equations formally derived and properties of plasmas in the ideal limit are studied. Straight and toroidal equilibrium. Linear stability analysis with examples. Taylor minimum energy principle. Prerequisite: either A A 405, A A 556, A A 557, ESS 576, or GPHYS 537. Offered: Sp, even years.

A A 559 Plasma Science Seminar (1, max. 30) Current topics in plasma science and controlled fusion with presentations by invited speakers, on-campus speakers, and students. Students expected to give a seminar once or twice a year with instructor reviewing the method of presentation and material used for the presentation. Credit/no-credit only. Offered: A WSp.

A A 560 Plasma Diagnostics (3) Discusses plasma measurement methods including material probes and optical methods. Covers techniques for making measurement in a high electrical noise environment. Presents methods for measuring electron and ion temperatures, density, impurities, magnetic fields, fluctuations, and neutrals. Prerequisite: A A 405 or equivalent. Offered: A, even years.

A A 564 Kinetic Theory/Radiative Transfer (3) Boltzmann and Collisionless Boltzmann (Vlasov) equations. Instabilities in homogeneous and inhomogeneous plasma, quasi-linear diffusion, wave-particle interaction, collisional (Fokker-Plank) equation. Introduction to radiative non-equilibrium, scattering and absorption processes. Integral equation of radiative transfer. Prerequisite: A A 501 or permission of instructor. Offered: Sp, even years.

A A 565 Fusion Reactor Fundamentals (3) Introduction to basic engineering features of fusion power plants. Brief description of basic fusion physics and discussion of power plants for leading thermonuclear concepts. Engineering problems; blanket, shield neutronics; materials, thermal hydraulics; tritium, superconducting systems. Prerequisite: completion of or concurrent enrollment in A A 405 or permission of instructor. Offered: W, odd years.

A A 570 Manifolds and Geometry for Systems and Control (3) Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate vs. coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with E E 570/M E 570; W, even years.

A A 571 Principles of Dynamics I (3) Systems of particles, rotating axes, rigid-body dynamics; calculus of variations. Lagrangian mechanics. Hamilton's principle. Kane's equations. Periodic and quasiperiodic motion. Stability of dynamical systems. Offered: A.

A A 578 Convex Optimization (4) Basics of convex analysis: Convex sets, functions, and optimization problems. Optimization theory: Least-squares, linear, quadratic, geometric and semidefinite programming. Convex modeling. Duality theory. Optimality and KKT conditions.

Applications in signal processing, statistics, machine learning, control communications, and design of engineering systems. Prerequisite: A A 510, CHEM E 510, E E 510, or M E 510. Offered: jointly with CSE 578/E E 578/M E 578; W.

A A 580 Geometric Methods for Non-Linear Control Systems (3) Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with E E 580/M E 580; Sp, even years.

A A 581 Digital Control System Design (4) *M. BERG* Digital control system design by classical methods. Discrete-time systems and the z-transform. Modeling sampled-data systems. Frequency response of discrete time systems and aliasing. Nyquist stability criterion and gain and phase margins. Discrete-time control law determination by direct z-plane root locus and loop shaping methods. Includes hands-on-with-hardware projects. Prerequisite: AA/EE 447 or ME 471. Offered: jointly with E E 581/M E 581; W.

A A 582 Introduction to Discrete Event Systems (3) Modeling DES with automata and Petri nets. Languages. State estimation and diagnostics. Control specifications. Feedback control. Dealing with uncontrollability and unobservability. Dealing with blocking. Timed automata and Petri nets. Prerequisite: A A 447/E E 447/ M E 471. Instructors: Berg Offered: jointly with E E 582/M E 582; Sp, even years.

A A 583 Nonlinear Control Systems (3) Analysis of nonlinear systems and nonlinear control system design. Phase plane analysis. Lyapunov stability analysis. Describing functions. Feedback linearization. Introduction to variable structure control. Prerequisite: A A 447/E E 447/M E 471. Offered: jointly with E E 583/M E 583.

A A 585 System Identification and Adaptive Control (3) Theory and methods of system identification and adaptive control. Identification of linear-in-parameter systems, using recursive LS and extended LS methods; model order selection. Indirect and direct adaptive control. Controller synthesis, transient and stability properties. Offered: jointly with E E 585/M E 585.

A A 589 Special Topics in Solid Mechanics (4) Offered: A WSp.

A A 591 Robotics and Control Systems Colloquium (1, max. 30) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with CHEM E 591/E E 591/M E 591.

A A 593 Feedforward Control (3) Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with E E 593/M E 593; Sp, even years.

A A 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 594/M E 594; Sp, odd years.

A A 595 Global Integrated Systems Engineering ([4/5]-, max. 9) *C. MASTRANGELO* Covers systems engineering, project management, finance and economics in a global environment. Offered: jointly with IND E 595; AW.

A A 596 Global Integrated Systems Engineering Project (3) Project-based systems design course. Prerequisite: A A/INDE 595. Instructors: Mastrangelo Offered: jointly with IND E 596; Sp.

A A 597 Networked Dynamics Systems (3) Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 597/M E 597.

A A 598 Special Topics in Aeronautics and Astronautics (1-5, max. 30) Introduction of special topics in the field of aeronautics and astronautics. Topics introduced by regular and guest speakers and includes a variety of information that is of current interest in aeronautics and astronautics. Offered: AWSp.

A A 599 Special Projects (1-5, max. 30) Investigation on a special project by the student under the supervision of a faculty member. Offered: AWSpS.

A A 600 Independent Study or Research (*-) Offered: AWSpS.

A A 700 Master's Thesis (*-) Offered: AWSpS.

A A 800 Doctoral Dissertation (*-) Offered: AWSpS.

Aerospace Engineering

A E 501 Analytical Methods for Aerospace Engineering (4) Applications of analytical and mathematical methods for aerospace engineering, including: ordinary differential equations, partial differential equations, linear algebra, vector calculus, integral theorems, complex analysis, optimization, and probability. Prerequisite: permission of instructor. Offered: A.

A E 510 Linear Systems Theory (4) Covers theoretic methods for state-space linear systems including linearization of nonlinear systems, time-varying and time-invariant linear systems, discrete time and continuous time representations, canonical state space representations, linear

system stability, time evolution of systems, controllability, and observability. Prerequisite: A E 501. Offered: W.

A E 511 Classical Control Theory (4) Covers theoretic methods for linear systems in the frequency domain including nonlinear and linear systems; linearization of nonlinear systems; stability, controllability, and observability of linear systems; linear system representations in frequency and time domains; dynamic system response in time and frequency domain; and frequency domain control design. Prerequisite: A E 501. Offered: Sp, odd years.

A E 512 Dynamics, Stability, and Control of Vehicles (4) Covers stability derivatives; effects of stability derivatives on flight characteristics; dynamics of rigid bodies in air, space and underwater applications; responses to control inputs and external disturbances; handling qualities; control system components; sensor characteristics; stability augmentation systems; guidance and navigation; human factors; effects of limited communication; and multivehicle systems. Prerequisite: A E 501. Offered: Sp, even years.

A E 513 Multivariable Control (4) An introduction to control of systems with multiple inputs and multiple outputs. Topics to be addressed include: successive single loop design comparison; Lyapunov stability theory; full state feedback controller design; linear quadratic regulator (LQR) and linear quadratic Gaussian (LQG) methods (development, incorporation of noise, design, analysis); separation principle; stability robustness; introduction to H-infinity control. Prerequisite: A E 510 Offered: A, odd years.

A E 514 Estimation Theory (4) Development of computational tools for estimation and filtering of state variables from sensor measurements. Methods are presented for both linear and nonlinear systems. Topics include discrete and continuous system structures for both linear and nonlinear dynamical systems with notice; rigid body dynamics; least squares; Bayesian estimation; Kalman filtering; extended Kalman filtering; unscented Kalman filtering; particle filtering; smoothing. Prerequisite: A E 510 Offered: A, even years.

A E 519 Special Topics in Aerospace Engineering: Controls (4, max. 8) Current research and advanced special topics in the area of aerospace engineering - controls. Prerequisite: A E 501.

A E 520 Fundamentals of Fluid Dynamics (4) Flow kinematics and dynamics, inviscid and viscous flows, incompressible and compressible flows, shock-waves, boundary layers, vorticity, and turbulence. Prerequisite: A E 501. Offered: Sp.

A E 521 Aircraft Propulsions (4) Aircraft propulsion (propellers, turboprop, turbojet, turbofan, ramjets). Aerodynamics of gas-turbine/air breathing engine components (inlets, compressors, turbines, afterburners, nozzles). Engine design methodology and measurement (ground vs flight, thrust/drag accounting). Prerequisite: A E 520 Offered: A, odd years.

A E 522 Rocket Propulsion (4) Covers rocket propulsion (nozzle gas dynamics, non-ideal flow effects); rocket vehicle performance; chemical rockets (solid, liquid propulsion, components and design); physical; and performance characteristics of rockets; and mission requirements; Introduction to electric thrusters. Prerequisite: A E 520. Offered: W, even years.

A E 523 Aircraft Noise (4) Covers noise characterization; federal aircraft noise regulation; interrelationship between the engine types and noise; aircraft noise generation, propagation, and radiation; noise measurements; and methods for noise reduction. Prerequisite: A E 520. Offered: A, even years.

A E 524 Computational Aerodynamics (4) Panel methods, finite volume method, grid generation, CFD and its applications to aerodynamics. Prerequisite: A E 520 Offered: W, odd years.

A E 529 Special Topics in Aerospace Engineering: Fluids (4, max. 8) Current research and advanced topics in the area of aerospace engineering - fluids. Prerequisite: A E 501.

A E 540 Mechanics of Solids (4) Covers general concepts, theory, and application of solid mechanics; mechanical behavior of elastic, plastic and viscoelastic solids; fracture of aerospace structural materials. Prerequisite: A E 501. Offered: Sp.

A E 541 Finite Element Analysis (4) Covers theory and application of the finite element methods; element types, stiffness matrix and solution procedures; and solution of elasticity, thermal conduction, and other practical problems in aerospace engineering. Prerequisite: A E 540. Offered: W, odd years.

A E 542 Fatigue and Fracture in Aerospace Structures (4) Covers theory of failure for metallic aerospace structures; fatigue properties, fatigue load spectrum, fatigue crack propagation, fracture mechanics, damage tolerance, fretting and corrosion fatigue, design applications, and case studies. Prerequisite: A E 540. Offered: A, even years.

A E 543 Structural Vibrations (4) Foundations of linear structural dynamics and vibrations of continuous and discrete systems: Physical phenomena, equations of motion, analytical and numerical solution methods, test methods. Prerequisite: A E 540 Offered: A, odd years.

A E 544 Additive Manufacturing (4) Introduction to Additive manufacturing (AM), development of AM technology, generalized AM process chain, designing for AM vat photopolymerization process, powder bed fusion, extrusion-based systems, sheet lamination process, composite laminates, automatics tape laying, designing laminated composites. Project-based examination of model parameters and designing and building an aerospace structure. Prerequisite: A E 540 Offered: W, even years.

A E 549 Special Topics in Aerospace Engineering: Structures (4, max. 8) Current research and advanced special topics in the area of aerospace engineering - structures. Prerequisite: A E 501.

A E 550 Mechanics of Composite Materials (4) Covers the analysis and design of advanced composite materials for aerospace structures including material properties, micromechanics, anisotropic elasticity, theory of laminated plates, bending and buckling, and fracture of composites. Prerequisite: A E 501. Offered: W.

A E 551 Aerospace Composite Design I (4) Introduction to advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A E 550 Offered: A, even years.

A E 552 Aerospace Composite Design II (4) Introduction to concepts of certification by analysis supported by test evidence in aircraft structures, emphasizing regulatory agency requirements and industry approaches. Subjects include allowable approach, bolted and bonded joints, damage resistance and tolerance, specialized test methods, and inspection techniques. Prerequisite: A E 550 Offered: Sp, odd years.

A E 553 Advanced Composite Structural Analysis (4) Covers advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A E 550. Offered: A, odd years.

A E 554 Manufacture of Aerospace Composites (4) Fundamentals of composite materials manufacturing and processing, emphasizing modern aviation industry practices. Discussions of auto and out-of-the-autoclave processing of carbon fiber composites, test methods, tooling, secondary processing, commercial processes, and several other topics related to manufacturing of composites. Emphasis on aircraft structures, but applicable to all high-performance lightweight structures. Prerequisite: A E 550 Offered: Sp, even years.

A E 559 Special Topics in Aerospace Engineering: Composites (4, max. 8) Current research and advanced special topics in the area of aerospace engineering - composites. Prerequisite: A E 501

A E 598 Aerospace Engineering Colloquium (1, max. 30) Covers the latest research in aerospace engineering. Includes current trends in professional aerospace engineering (e.g., manufacturing, systems, etc.) and professional development for aerospace engineers (e.g., project management, job searches, etc.). Lectures and discussions led by guest speakers. Credit/no-credit only. Offered: A WSp.

Bioengineering

See the Bioengineering entry in the Interschool or Intercollege Programs section of this catalog.

Chemical Engineering

Department Overview

105 Benson

The chemical engineering profession is a close-knit group with a common background in chemical processes, systems analysis, and systems economics. Chemical engineering training occurs through course and laboratory work addressing mathematical, scientific, and engineering fundamentals. With a strong background in mathematics, chemistry, and physics, chemical engineering students study transport phenomena (the description of momentum, heat, and mass transfer in chemical processes); chemical kinetics and reaction engineering; process control and design; and optimization of chemical processes. These subjects are common throughout the traditional chemical industry, applying as well to other industries such as electronics manufacture and biological and biochemical engineering. Chemical engineers find industrial employment in areas of electronics, petroleum, consulting, chemical, automotive, forest products, biotechnology, and energy. Chemical engineers also find careers in academia and government and military service.

Undergraduate Program

Adviser

105 Benson, Box 351750

206-543-2252

advising@cheme.washington.edu

The Department of Chemical Engineering offers the following programs of study:

- Bachelor of Science in Chemical Engineering (BSChE) degree
- Bachelor of Science in Chemical Engineering (BSChE) degree, with an option in nanoscience and molecular engineering

Bachelor of Science in Chemical Engineering

Suggested College Courses for First Five Quarters: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, PHYS 121, PHYS 122, PHYS 123, ENGL 131 (or equivalent), AMATH 301 (or CSE 142)

Department Admission Requirements

Core courses within the department form a seven-quarter curriculum designed to start spring quarter of the sophomore year. Because the curriculum is cohort-based and all students start and proceed at the same pace, placement and admission to the major is designed to facilitate students starting the curriculum spring quarter.

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and the placement process for Engineering Undeclared students.

Deadlines for Engineering Undeclared students to request placement into Chemical Engineering: July 1 and January 15.

Requirements to request placement for July 1 deadline

1. Course requirements: MATH 124, MATH 125, MATH 126; PHYS 121; CHEM 142, CHEM 152, CHEM 162; 5 credits English composition
2. Grade requirements: Minimum 2.0 grade in each course required for placement; minimum 2.50 cumulative GPA in courses required for placement
3. Credit requirements: Completion of at least one quarter as a full-time UW student

Requirements to request placement for the January 15 deadline

1. Course requirements: MATH 124, MATH 125, MATH 126, MATH 307; CHEM 142, CHEM 152, CHEM 162; PHYS 121, PHYS 122; 5 credits English composition. Two of the required courses may be in progress during winter quarter. CHEM 237 strongly recommended.
2. Grade requirements: Minimum 2.0 grade in each course required for placement; minimum 2.50 cumulative GPA in courses required for placement.
3. Credit requirements: Completion of at least one quarter as a full-time UW student

If the number of Engineering Undeclared students requesting placement into the major exceeds the department capacity for Engineering Undeclared students, a competitive matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for spring quarter only. Application deadline: January 15
2. Minimum course requirements: MATH 124, MATH 125, MATH 126, MATH 307; CHEM 142, CHEM 152, CHEM 162; PHYS 121, PHYS 122; 5 credits of English composition. Two required courses may be in progress during winter quarter. CHEM 237 strongly recommended.

3. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

General Expectations of Academic Progress: Completion of all admission requirements listed for “Other Current UW Students and Transfer Students” as well as the following courses by the start of autumn quarter of the junior year: organic chemistry I and II (CHEM 237 and CHEM 238; or CHEM 223, CHEM 224; or CHEM 335 and CHEM 336), PHYS 123, AMATH 301 (or CSE 142), MATH 308, CHEM 310.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option is competitive, and normally occurs upon completion of NME 220. Admission is based on grades, including NME 220 and any CHEM E courses already taken. A small number of students may be admitted. Admission is based on the student's academic record and prior experience/work in the field of nanoscience and/or molecular engineering. Students applying for the NME option should so indicate on their chemical engineering application and discuss their interests and background in the essay.

Graduation Requirements

180 credits, as follows:

General Education Requirements (97 credits)

1. *Written and Oral Communications (8 credits)*: one 5-credit English composition course from the University list; ENGR 231, HCDE 231. University required 4 additional writing credits are met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits)*: Minimum of 10 credits required in each area
3. *Natural World (65 credits)*
 - a. *Physics (15 credits)*: PHYS 121, PHYS 122, PHYS 123
 - b. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 309 (or MATH 390 or IND E 315)
 - c. *Chemistry (26 credits)*: CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 455

Major Requirements (74 credits)

1. *Engineering Fundamentals (4 credits)*: AMATH 301 or CSE 142

2. *Chemical Engineering Core Courses (51 credits)*: CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Molecular and Nanoscience Engineering (3 credits)*: CHEM E 455 or CHEM E 460
4. *Engineering Elective Courses (16 credits)*: Only one, 1-credit seminar allowed toward engineering electives. Maximum 9 credits undergraduate research (CHEM E 299, CHEM E 499, of which no more than 3 credits may be CHEM 299) may count toward engineering electives.

Unspecified Electives (9 credits): to reach 180 credits

Nanoscience and Molecular Engineering Option Major Requirements (77 credits)

1. *Engineering Fundamentals (4 credits)*: AMATH 301 or CSE 142
2. *Chemical Engineering Core Courses (51 credits)*: CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Nanoscience and Molecular Engineering Courses (22 credits)*: CHEM E 299, CHEM E 455, CHEM E 499 (3-6 credits, maximum 3 credits from CHEM E 299), NME 220, NME 221, NME 321, NME 421; minimum two additional approved nanoscience and molecular engineering electives. See adviser for list of approved electives.

Unspecified Electives (6 credits): to reach 180 credits.

A minimum 2.00 GPA in core chemical engineering courses, based on the first time each course is taken, is required for graduation.

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and CHEM E 486 or CHEM E 497) which involve the design of an integrated chemical system. An optional 9-credit specialty area allows each student to develop special competence in a selected subject by taking a minimum of three courses in that area. Engineering and free electives may be used for this purpose. The areas are biotechnology; fuel cells and energy; polymers, composites, colloids, and interfaces; computers applied to chemical engineering; environmental engineering; and nuclear engineering.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design. They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- *Instructional and Research Facilities:* The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Laboratory holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support experiments on process automation). All have fast connections to the Internet and to larger UW computers.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students are encouraged to participate in internships, which are generally facilitated through the [Engineering Co-op Office](#).
- *Department Scholarships:* The department awards 20-25 full-tuition scholarships per year. See departmental website for application procedures.
- *Student Organizations/Associations:* The undergraduates in the department run a dynamic chapter of the American Institute of Chemical Engineers.

Of Special Note:

Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering and bioresource science and engineering. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and CHEM E 486, which are open to majors only).

Graduate Program

Graduate Program Coordinator 105 Benson, Box 351750 206-543-2250

grad.admissions@cheme.washington.edu

The department offers studies leading to the degrees of doctor of philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree, centered on the dissertation with a foundation in coursework, is generally completed in four to five years beyond the baccalaureate degree. The master's program primary emphasis is placed on coursework, and the degree generally requires 21 months of study. Thesis and non-thesis options are available.

The program includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more-specialized courses in chemical engineering or in other departments. Students usually take three courses the first quarter. In subsequent quarters, less time is spent on coursework, and more on research and independent study.

The department has about seventy full-time graduate students, most of whom are working toward a doctorate.

Master of Science in Chemical Engineering

Admission Requirements

Most students have a Bachelor of Science in Chemical Engineering. A student with an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

Competitive applicants

1. Highly ranked (top 10 percent) in a respected chemical engineering program
2. Minimum 750 score on the quantitative portion of the GRE
3. Minimum 600 score (paper-based), 250 (computer-based), or 70 (Internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

Thesis Option

39 credits

1. Minimum 18 credits in courses numbered 500-599 (or approved 400-level courses; see item 2 for acceptable 400-level course options) of which at most 3 may be seminar credits, such as CHEM E 523. Five courses from at least four of the following five

categories. (Courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)

- a. *Math/Computer/Statistics*: CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, STAT 421
 - b. *Thermodynamics*: CHEM E 525, CHEM 552
 - c. *Transport Phenomena*: CHEM E 530, CHEM E 531, M E 534
 - d. *Reaction Phenomena*: CHEM E 461, CHEM E 560, CHEM E 565
 - e. *Materials and Biotech*: CHEM E 467, CHEM E 554, CHEM E 590
2. Numerical grades for at least 18 credits of coursework. Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the BS degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator. Some approved 400-level courses are listed above.
 3. Minimum 3.00 cumulative GPA
 4. Minimum 30 credits taken through the UW
 5. Minimum 9 credits of independent research under CHEM E 600 during the first year of study
 6. A thesis describing original research. At least 12 credits of thesis (CHEM E 700).
 7. Final examination

Non-Thesis Option

Degree requirements may be completed in four quarters (completion in three is possible).

39 credits, and other requirements

1. Minimum 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Five courses from at least four of the following five categories. (Courses listed are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
 - a. *Math/Computer/Statistics*: CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
 - b. *Thermodynamics*: CHEM E 455, CHEM E 525, CHEM E 526, CHEM 552
 - c. *Transport Phenomena*: CHEM E 530, CHEM E 531, M E 533, M E 534
 - d. *Reaction Phenomena*: CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
 - e. *Materials and Biotech*: CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590
2. Numerical grades for at least 18 credits (500-599 or approved 400-level courses). Approved 400-level courses include 400-level CHEM E courses not required for the BS

degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.

3. Minimum 6 CHEM E 600 credits (minimum 2.7 numerical grade or S grade). Written report required.
4. Thesis research (i.e., CHEM E 700 or CHEM E 800) does not count toward the 39 credits.
5. Minimum 3.00 cumulative GPA
6. Minimum 30 credits taken through the UW
7. Final examination: oral presentation of the CHEM E 600 project

Master of Science in Engineering

Admission Requirements

Most students applying for graduate admission have a Bachelor of Science in Chemical Engineering. A student with an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

Competitive applicants

1. Highly ranked (top 10 percent) in a respected chemical engineering program
2. Minimum 750 score on the quantitative portion of the GRE
3. Minimum 600 score (paper-based), 250 (computer-based), or 70 (Internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

39 credits

Requirements are the same as for the MSChE thesis option, except that the research adviser tailors course requirements to the student's background and research objectives (subject to Graduate Program Coordinator approval). Relative to the MSChE options, usually less emphasis is on chemical engineering, more on engineering science and related subjects.

Doctor of Philosophy

Admission Requirements

Most applicants have a Bachelor of Science in Chemical Engineering. A student with an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

Competitive applicants

1. Highly ranked (top 10 percent) in a respected chemical engineering program
2. Minimum 750 score on the quantitative portion of the GRE
3. Minimum 600 score (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

90-108 credits

1. *Minimum Graduate School Requirements:*
 - a. Minimum 18 credits of courses numbered 500-600, taken through the UW.
 - b. Minimum 18 numerically graded credits of UW 400- and 500-level courses. Any 400-level courses require departmental approval.
 - c. Minimum 90 credits, including at least 60 through the UW
 - d. Minimum 27 dissertation credits (CHEM E 800) over a period of at least three quarters
 - e. Minimum cumulative 3.00 GPA
 - f. General examination
 - g. Final examination
2. *Students with a Chemical Engineering Undergraduate Degree:* In addition to requirements listed above
 - a. Complete non-thesis MSChE degree prior to the general examination. (Students with an MS in chemical engineering from another university may petition the Graduate Program Coordinator for an exemption.)
 - b. TA for at least three quarters.
 - c. Minimum six graded courses numbered 500-599 or approved 400-level courses.
 - d. Five courses from at least four of the following five categories. (Courses listed are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
 1. *Math/Computer/Statistics:* CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
 2. *Thermodynamics:* CHEM E 455, CHEM E 525, CHEM E 526, CHEM 552
 3. *Transport Phenomena:* CHEM E 530, CHEM E 531, M E 533, M E 534
 4. *Reaction Phenomena:* CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
 5. *Materials and Biotech:* CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590

- e. One CHEM E course in a topic outside the student's main research area.
- 3. *Non-Chemical Engineering Undergraduates:* Students whose undergraduate degree is in engineering or science (e.g., BS in chemistry or materials science but not chemical engineering) must pass or serve as a TA in the following courses: CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 465, CHEM E 485
- 4. Students lacking a strong background in thermodynamics are advised (but not required) to take CHEM E 326 prior to attempting CHEM E 525.

Research Facilities

Benson Hall contains classrooms, offices, stockrooms, a machine shop, laboratories, and a variety of specialized research equipment. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computer Center, instrument-making shops, research centers (e.g., biomaterials, nanotechnology, chemical analysis), and the Chemistry and Engineering Libraries.

Financial Aid

Students interested in applying for admission and support should visit the department's website: www.cheme.washington.edu, which provides details on application procedures. Offers of admission with financial support are usually made from January through March.

Course Descriptions

Chemical Engineering

CHEM E 299 Undergraduate Research (1-3, max. 9) Research or special topics under the supervision of a faculty member. Offered: AWSpS.

CHEM E 301 Leadership Seminar (1) *Schwartz* Forum for industrial, academic, and government leaders to share their experiences and insights with students. Includes topics related to leadership in the chemical engineering profession including career planning, management skills, interpersonal skills, effective planning, entrepreneurship, ethics, and strategic decisions. Credit/no-credit only. Offered: A.

CHEM E 309 Creativity and Innovation (2) *VLPA G. ALLAN* Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with BSE 309; Sp.

CHEM E 310 Material and Energy Balances (4) Chemical and physical process calculations: steady- and unsteady-state material and energy balances with specific examples in vapor-liquid

contact operations and multiphase extraction, and introductory thermochemistry. Prerequisite: PHYS 122 and MATH 307. Offered: Sp.

CHEM E 325 Energy and Entropy (4) Introduction to the basic principles of thermodynamics from both microscopic and macroscopic points of view. Emphasis on equilibrium phenomena, and the trade-off of energy and disorder in determining structure and properties. Applications of thermodynamics in process design and analysis. Prerequisite: CHEM E 310. Offered: A.

CHEM E 326 Chemical Engineering Thermodynamics (4) Phase equilibria and chemical equilibria in multicomponent systems; theories of solution; chemical reaction analysis. Prerequisite: CHEM E 325. Offered: W.

CHEM E 330 Transport Processes I (5) Diffusive transport of momentum, heat, and mass; general aspects of fluid flow; the Navier-Stokes equations; one-dimensional flow with engineering applications. Prerequisite: CHEM E 310; either MATH 136 or MATH 307. Offered: A.

CHEM E 340 Transport Processes II (4) Heat transfer, basic principles, and applications. Conduction, convection, and radiation. Prerequisite: CHEM E 330. Offered: W.

CHEM E 341 Energy and Environment (3) NW Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with ENVIR 341/M E 341; A.

CHEM E 355 Biological Frameworks for Engineers (3) For engineers with no prior experience in the biological sciences. Hands-on, project-based course covers fundamental concepts and language of biology, from an engineering perspective. Topics include functions of life, information processing, proteins, DNA, genetic variability, control loops, energetics, tissues, organisms, ecosystems. Prerequisite: either CHEM 142 or CHEM 145; PHYS 123; either MATH 307 or AMATH 351. Instructors: Shen Offered: W.

CHEM E 375 Chemical Engineering Computer Skills (2) *Pfaendtner* Use Excell, Matlab, and AspenPlus to solve typical chemical engineering problems. Solve realistic problems and explore alternatives that would be inaccessible for hand calculations. Includes equations of state, chemical equilibrium of simultaneous reactions, phase equilibria, plug flow reactors, heat transfer in 1-D, and time-dependent heat transfer. Offered: W.

CHEM E 435 Transport Processes III (4) Mass transfer, basic principles, and applications to equipment design. Physical separation processes. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

CHEM E 436 Chemical Engineering Laboratory I (3) Lectures on statistics, experimental design, instrumentation, laboratory safety, and report writing; laboratory experiments on fluid mechanics and heat transfer. Emphasis on teaming, experimental planning, procedures, report

writing, and oral presentations. Prerequisite: CHEM E 326; CHEM E 340 which may be taken concurrently; HCDE 231. Offered: ASp.

CHEM E 437 Chemical Engineering Laboratory II (3) Continuation of CHEM E 436. Laboratory investigation of chemical engineering principles applied to equipment design with emphasis on mass transfer operations and chemical reactors. Prerequisite: CHEM E 435; CHEM E 436; CHEM E 465. Offered: W.

CHEM E 440 Energy Materials, Devices, and Systems (3) *D. Ginger Jr* Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Prerequisite: CHEM 455 or CHEM 475 which may be taken concurrently Offered: jointly with CHEM 466/MSE 466; A.

CHEM E 442 Renewable Energy (4) NW *P. MALTE* Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either M E 323, CHEM E 325, A A 260, or E E 351. Offered: jointly with M E 442; W.

CHEM E 445 Fuel Cell Engineering (3) Introduction to electrochemical fuel cells for use in transportation and stationary power applications. Topics covered include types of fuel cells, single cell operation, stack engineering, overall system design, and safety, with emphasis on proton exchange membrane and solid oxide fuel cells. Prerequisite: CHEM E 330. Instructors: Stuve

CHEM E 455 Surface and Colloid Science Laboratory (3) *Berg, Pozzo* Laboratory techniques, equipment, and underlying fundamentals in surface and colloid science. Experiments in the measurement of surface tension, adsorption, wetting and spreading, colloid properties, emulsion preparation and stability, electrophoresis, and interfacial hydrodynamics. Offered: ASp.

CHEM E 457 Principles of Molecular Engineering (3) Covers the basic aspects of statistical mechanics, focusing primarily on the canonical ensemble. Develops and applies a set of tools to regular liquid solutions, phase formation, spinodal decomposition, adsorption, polymer thermodynamics, chemical kinetics, and physical kinetics. Prerequisite: CHEM E 310; CHEM E 325; CHEM 455. Instructors: Hillhouse Offered: Sp.

CHEM E 458 Surface Analysis (3) *D. Castner* Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger): ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 492; Sp.

CHEM E 460 Polymer chemistry Laboratory (3) *C. DEFOREST* Laboratory techniques, equipment, and underlying fundamentals in polymer chemistry, synthesis, and design.

Quantitative understanding of polymerization reaction engineering will be developed through careful examination of kinetics and structure-property relationships. Selection of laboratory polymerization and characterization techniques, as well as recent innovations in polymer research, will be highlighted. Prerequisite: CHEM 238. Offered: Sp.

CHEM E 461 Electrochemical Engineering (3) *Schwartz* Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Applications to chemical sensors, batteries, corrosion, thin film deposition. In-class demonstrations to illustrate concepts.

CHEM E 465 Reactor Design (4) Application of chemical kinetics and transport phenomena to the design of chemical reactors; characterization of batch and continuous-flow reactors in homogeneous and heterogeneous systems. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

CHEM E 467 Biochemical Engineering (3) *F. BANEYX* Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with BIOEN 467; W.

CHEM E 468 Air-Pollution Control Equipment Design (3) Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CEE 494/M E 468.

CHEM E 480 Process Dynamics and Control (4) Dynamics of process units and systems; instrumentation and control system design and analysis. Includes weekly laboratory. Prerequisite: CHEM E 435; CHEM E 465. Offered: W.

CHEM E 481 Process Optimization (3) *Holt* Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods of search, linear and nonlinear programming, dynamic programming, statistical experimental design, and evolutionary operation. Offered: A.

CHEM E 482 Advanced Topics in Process Control (3) Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: CHEM E 480. Instructors: Holt, Ricker

CHEM E 484 Electronic and Optoelectronic Polymers (3) Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties

of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe Offered: A.

CHEM E 485 Process Design I (4) Applied economics in chemical engineering design and operations; measures of profitability; capital and operating cost estimates; introduction to design and design strategies. Prerequisite: CHEM E 480 which may be taken concurrently. Offered: W.

CHEM E 486 Process Design II (5) Comprehensive design of a specific process or product, including economic feasibility studies, utilization of market survey and plant location studies, process equipment design and optimization, and overall plant integration and layout. Prerequisite: CHEM E 485. Offered: Sp.

CHEM E 490 Engineering Materials for Biomedical Applications (3) *J. Bryers* Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with BIOEN 490; A.

CHEM E 491 Controlled-Release Systems (3) *S. PUN* Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with BIOEN 491; W.

CHEM E 493 Advanced Surface Analysis (3) Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with BIOEN 493; W.

CHEM E 497 Special Projects in Chemical Engineering Design ([1-6]-, max. 12) Chemical engineering design instruction and experience in special projects, such as industrially motivated, timely, or interdisciplinary projects. Project subject and content varies. Majors only. Prerequisite: CHEM E 340.

CHEM E 498 Special Topics in Chemical Engineering (1-4, max. 12) Topics of current interest in the field. Subject matter changes from quarter to quarter.

CHEM E 499 Undergraduate Research ([1-6]-, max. 12) Independent research projects in chemical engineering. Offered: AWSpS.

CHEM E 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite

dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/E E 510/M E 510.

CHEM E 511 Biomaterials Seminar (1, max. 18) *D. CASTNER, L. GAMBLE* Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with BIOEN 511.

CHEM E 512 Methods of Engineering Analysis (3) Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisite: MATH 308, MATH 307 or AMATH 351, MATH 324, or permission of instructor. Offered: A.

CHEM E 514 Advanced Chemical Engineering Laboratory (3) *Q. YU* Instrumentation and laboratory techniques for chemical, biological, clean energy, and nano technologies. Experiments include surface modification, thin film formation, nanoparticle synthesis, micro/nanoscale fabrication, protein adsorption, microorganism identification, and photovoltaic device fabrication/evaluation using advanced instrumentation. Offered: W.

CHEM E 515 Experimental Methods in Chemical Engineering Research (3) *Baneyx, Berg, Jiang* Lecture and laboratory studies in current research methods of chemical engineering. Includes surface science, biochemical engineering, colloidal chemistry, light scattering, and nanoscience techniques. Offered: A.

CHEM E 523 Seminar in Chemical Engineering (0-1, max. 30) Topics of current interest in chemical engineering. Credit/no-credit only. Offered: AWSp.

CHEM E 525 Chemical Engineering Thermodynamics (4) Review of principles of thermodynamics. Applications to problems in multiphase and multicomponent systems; theories of solutions. Prerequisite: undergraduate thermodynamics. Offered: A.

CHEM E 530 Momentum, Heat, and Mass Transfer I (4) Derivation of the differential equations for mass, energy, and momentum transport. Principles of fluid mechanics; creeping flow, turbulence, boundary-layer theory. Offered: A.

CHEM E 531 Momentum, Heat, and Mass Transfer II (3) Continuation of CHEM E 530. Flows of fluid-particle systems; convective heat transfer, natural convection. Prerequisite: CHEM E 530.

CHEM E 535 Nanomaterials Chemistry and Engineering (3) *V. Holmberg* Rigorous overview of fundamental chemical and physical concepts important to nanomaterials science and engineering. Focus on luminescent, plasmonic, magnetic nanomaterials. Students will learn basic concepts prevalent in the nanomaterials literature, and develop rigorous mathematical understanding of fundamental principles that govern many of the advanced materials that are currently under development in the field. Prerequisite: CHEM 455, MATH 307, CHEM E 326;

recommended: Classical physics, quantum mechanics, thermodynamics, and ordinary and partial differential equations Offered: jointly with CHEM 587; Sp.

CHEM E 540 Energy Materials, Devices, and Systems (3) *D. Ginger Jr* Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Offered: jointly with CHEM 566/MSE 566; A.

CHEM E 545 Data Science Methods for Clean Energy Research (3) *W. Pfaendtner* Survey of modern data science methods taught in the context of materials for clean energy (e.g., batteries and solar energy). Covers data visualization, statistics, machine learning and data management. Instruction, homework and term project are implemented using Python. Offered: jointly with CHEM 545; W.

CHEM E 546 Software Engineering for Molecular Data Scientists (3) *W. Pfaendtner* Introduces basic principles of scientific software development in the Python in the context of Molecular Data Science. The course covers command line tools, Python from the perspective of molecular data science methods, software development and collaboration principles, e.g. version control. Grades are based on homework and group projects. Offered: jointly with CHEM 546; W.

CHEM E 554 Nanoscale Science I: Contact Mechanics and Rheology on the Nanoscale (3) *Overney* Introductory nanoscale science with emphasis on contact mechanics, principle and concept of forces, scanning force microscopy, tribology (friction, wear, lubrication), rheology, ultrathin organic films, physical properties of polymers, and computer simulation. Offered: W.

CHEM E 556 Colloidal Systems (3) *Berg, Pozzo* Examines the unique properties and application of colloidal materials, i.e., dispersions of micro- or nano-sized particles in various media are described. Explores their inherent instability, and their kinetic, phoretic, electric, optical, and rheological properties. Offered: W.

CHEM E 558 Surface Analysis (3) *D. Castner* Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 592.

CHEM E 560 Reactions at Solid Surfaces (3) Fundamental studies of adsorption and reactions on metallic and non-metallic surfaces with emphasis on heterogeneous catalysis and electrochemistry, including fuel cells. Topics include gas phase and liquid phase surface reactions, analyzed both experimentally and computationally. Prerequisite: undergraduate level course in kinetics or catalysis. Instructors: Stuve

CHEM E 565 Kinetics and Catalysis (3) Homogeneous and heterogeneous systems with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisite: CHEM E 525. Instructors: Stuve

CHEM E 580 Topics in Chemical Engineering Design (3, max. 9) Lectures and seminars on current design methods in chemical engineering, including technical and economic feasibility of processes, design and optimization of process equipment, and environmental and social constraints. Prerequisite: undergraduate chemical engineering design, admission to chemical engineering master's program, or permission of instructor.

CHEM E 584 Electronic and Optoelectronic Polymers (3) Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe Offered: A.

CHEM E 588 Research in Applied Microbiology (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Instructors: Lidstrom Credit/no-credit only. Offered: jointly with MICROM 588; AWSpS.

CHEM E 590 Advanced Topics in Biomaterials (3) Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with BIOEN 590.

CHEM E 591 Robotics and Control Systems Colloquium (1, max. 30) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/E E 591/M E 591.

CHEM E 593 Advanced Surface Analysis (3) *D. CASTNER* Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with BIOEN 593; W.

CHEM E 599 Current Topics in Chemical Engineering (1-5, max. 12) Readings or lectures and discussions of topics of current interest in the field of chemical engineering. Subject matter changes from year to year. Prerequisite: permission of instructor.

CHEM E 600 Independent Study or Research (*-) Offered: AWSpS.

CHEM E 700 Master's Thesis (*-) Offered: AWSpS.

CHEM E 800 Doctoral Dissertation (*-) Offered: AWSpS.

Nanoscience and Molecular Engineering

NME 220 Introduction to Molecular and Nanoscale Principles (4) NW Introduction to theories and concepts of molecular and nanoscale systems to raise awareness of technological and societal transformations anticipated through progress in nanotechnology. Prerequisite: either CHEM 142, CHEM 144, or CHEM 145; either MATH 126 or MATH 136; PHYS 121.

NME 221 Nanoscience and Molecular Engineering Seminar I (1) Introduces nanoscience and molecular engineering, and offers the opportunity of a first intellectual and interdisciplinary forum with interactions with members of research groups in the field. First in a series of three. Prerequisite: NME 220, which may be taken concurrently. Instructors: Overney Credit/no-credit only.

NME 321 Nanoscience and Molecular Engineering Seminar II (1) *Overney* Demonstrates how to tackle research challenges, put results into the framework of the open literature, and present and interpret data. Discusses contemporary societal and ethical aspects in nanoscience and molecular engineering. Second in a series of three. Credit/no-credit only.

NME 421 Nanoscience and Molecular Engineering Seminar III (1) Provides students with the opportunity to present their research results obtained during undergraduate research studies. Assessing the work of their peers and receiving feedback on their work, students further refine their ability in conducting and presenting research. Third in a series of three. Prerequisite: NME 321. Instructors: Overney Credit/no-credit only.

NME 498 Special Topics in Nanoscience and Molecular Engineering (1-4, max. 12) *Overney* Topics of current interest in the field.

Civil and Environmental Engineering

Department Overview

201 More

Civil and environmental engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities focus on: transportation infrastructure and construction; heavy construction; hydrology and hydrodynamics; structures, mechanics, and geotechnical engineering; drinking water and wastewater treatment, and water quality management ; solid- and hazardous-waste disposal; and air quality management.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and system analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints. Civil and environmental engineers create and maintain infrastructure in a heavily human-influenced ecosystem.

To accommodate these wide interests, the department is organized into six academic areas: construction engineering; transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

Undergraduate Program

Adviser
201 More, Box 352700
206-543-5092
ceadvice@uw.edu

The Department of Civil and Environmental Engineering offers the following program of study:

- [The Bachelor of Science in Civil Engineering \(BSCE\) degree](#)
- [The Bachelor of Science in Environmental Engineering \(BSENE\) degree](#)

The BSCE degree is appropriate for students interested in gaining a broad perspective of civil and environmental engineering. Students take introductory courses in six areas (construction, transportation, geotechnical, structural, water and environmental engineering), gain expertise in at least four areas, and may focus their senior-year studies on a single area. The BSCE program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The BSENVE degree offers a specialized focus in environmental engineering. Students gain expertise in the fundamentals of environmental engineering, with specialization in areas including water and wastewater engineering, water resources management, hydrology, environmental fluid mechanics, climate science, sustainable design, resource recovery, environmental chemistry, and environmental microbiology. The BSENVE will become eligible for ABET accreditation beginning in 2019.

Bachelor of Science in Civil Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; AMATH 301 (preferred) or CSE 142; A A 210; CEE 220; M E 230; English composition.

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students.

1. Deadlines for requesting placement into the major: July 1 and January 15
2. Course requirements to request placement: MATH 124, MATH 125, MATH 126; PHYS 121; two additional courses from CHEM 142, CHEM 152, PHYS 122, PHYS 123; 5 credits English composition. All courses completed prior to the application deadline.
3. Grade requirements: Minimum 2.0 grade in each course required for placement; minimum 2.50 GPA in courses required for placement

If the number of Engineering Undeclared students requesting placement into the major exceeds the department capacity for Engineering Undeclared students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity constrained.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126; CHEM 142; PHYS 121, PHYS 122; A A 210; 5 credits English composition. All courses completed prior to application deadline. In addition, AMATH 301 or CSE 142; MATH 308; CEE 220; and ME 230 completed with minimum 2.0 grades prior to autumn quarter.
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application.

Students are encouraged to complete the following courses prior to autumn quarter - MATH 307; CHEM 152; PHYS 123

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

Minimum 180 credits

General Education Requirements (89-91 credits)

1. *Written and Oral Communication (12 credits)*: English composition; ENGR 231; additional W-credit courses to bring total to 12 credits
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (24 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV, plus additional credits in either VLPA or I&S to bring total to 24 credits.
3. *Economics (4-5 credits)*: ECON 200 or IND E 250. ECON 200 may also be applied toward the I&S requirement. IND E 250 may also be applied toward the requirement for an additional Engineering Fundamentals course.
4. *Natural World (49-50 credits)*

- a. *Mathematics (21 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352)
- b. *Statistics (3-4 credits)*: IND 315 (preferred) or STAT 390
- c. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (94-97 credits)

1. *Engineering Fundamentals (20 credits)*: AMATH 301 or CSE 142, A A 210, CEE 220, and ME 230. Students who complete STAT 390 must complete an additional engineering fundamentals course from A A 260, IND E 250, IND E 280, M E 123, E E 215, or MSE 170. Students who complete IND E 315 must complete either an additional Engineering Fundamentals course from the above list, or an additional 300-level mathematics course other than statistics.
2. *Civil Engineering Core (40 credits)*: CEE 307, CEE 317, CEE 327, CEE 337, CEE 347, CEE 357, CEE 367, and CEE 377.
3. *Professional Practice and Capstone Design (7 credits)*: CEE 440 and one course from CEE 441, CEE 442, CEE 444, or CEE 445. Minimum 2.0 grade required for both courses in this two-course sequence.
4. *Civil Engineering Technical Electives (15 credits)*: CEE 400-level coursework selected from an approved list (see adviser or department website for list), with at least one core course from three separate areas of concentration within the department. Minimum 2.0 grade required for each of the three courses used to fulfill the core-courses requirement.
5. *Upper-Division Engineering and Science (12 credits)*: Choice of additional CEE 400-level courses or courses from an approved list from outside the department. Maximum 6 credits of CEE 498 and 3 credits of CEE 499 allowed toward upper-division engineering and science.
6. *Grade Requirements*: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the department adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving civil and environmental engineering problems; demonstrate sufficient mastery of core civil and environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in civil and environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.
- *Instructional and Research Facilities:* The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental engineering and water program research laboratory facilities include more than 20,000 square feet of laboratory space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. A dedicated environmental engineering teaching laboratory comprising roughly 1200 square feet of space is equipped with a variety of standard lab equipment and analytical tools, in addition to modern PCs and a teaching bench with whiteboard and overhead projector for demonstrations and general instructional purposes. In addition, the department has a 4000 square foot fluid mechanics teaching laboratory (in the Harris Hydraulics Laboratory), which houses seven dedicated teaching facilities including three large flumes, a wind tunnel, desk space and state-of-the-art laser imaging and measurement capabilities. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million pound capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a computer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the

academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.

- *Department Scholarships:* The department offers numerous annual scholarships. For more information, see department website. Scholarships are also available through the College of Engineering, the UW Scholarship Office, and external sources, including professional associations and industry.
- *Student Organizations/Associations:* The department has over 20 active student organizations/associations, including American Society of Civil Engineers, Chi Epsilon, Engineers Without Borders, and many more.

Bachelor of Science in Environmental Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; AMATH 301, AMATH 351, AMATH 352; CHEM 142, CHEM 152, CHEM 162; PHYS 121, PHYS 122, PHYS 123; A A 210, A A 260; CEE 220; BIOL 180; English composition.

Department Admission Requirements

Engineering Undeclared Students

Refer to College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students.

1. Deadlines for requesting placement into the major: July 1 and January 15
2. Course requirements: MATH 124, MATH 125, MATH 126; three courses from CHEM 142, CHEM 152, CHEM 162, PHYS 121, PHYS 122, PHYS 123, or BIOL 180; 5 credits English composition. All courses completed prior to the deadline
3. Grade requirements: Minimum 2.0 grade for each required course; minimum 2.50 cumulative GPA in required courses

If the number of Engineering Undeclared students requesting placement exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students from other colleges or universities may apply. Admission is capacity constrained.

1. Application deadline: April 5. Admission is for autumn quarter only.
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122; AA 210; 5 credits English composition. All courses completed prior to April 5 application deadline. Following courses completed with minimum 2.0 grade prior to autumn quarter: AMATH 301, AMATH 351 (or MATH 307); BIOL 180; CHEM 162; PHYS 123; AA 260; CEE 220
3. Minimum 60 credits completed by April 5 application deadline.
4. Grade requirements: Minimum 2.0 grade for each required course; minimum 2.50 cumulative GPA in required courses.

Students are also encouraged to complete AMATH 352 (or MATH 308) prior to autumn quarter.

Factors considered for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

Minimum 180 credits

General Education Requirements (99-101 credits)

1. *Written and Oral Communication (12 credits)*: English composition; ENGR 231; additional W-credit courses to bring total to 12 credits
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (24 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV, plus additional credits in either VLPA or I&S to bring total to 24 credits.
3. *Economics (4-5 credits)*: IND E 250 (preferred) or ECON 200 (also counts as a major requirement)
4. *Natural World (59-60 credits)*

- a. *Mathematics (21 credits)*: MATH 124, MATH 125, MATH 126, AMATH 351 (or MATH 307) AMATH 352 (or MATH 308)
- b. *Statistics (3-4 credits)*: IND E 315 (recommended) or STAT 390
- c. *Science (35 credits)*: CHEM 142, CHEM 152, CHEM 162, BIOL 180, PHYS 121, PHYS 122, PHYS 123

Major Requirements (81-82 credits)

1. *Engineering Fundamentals (16-17 credits)*: Students take all courses on this list - AMATH 301 (preferred, or CSE 142 or CSE 160), A A 210, CEE 220, A A 260 (preferred, or ME 323).
2. *Economics (4-5 credits)*: one course from IND E 250 (preferred) or ECON 200 (also counts as a General Education requirement).
3. *Environmental Engineering Core (30 credits)*: Students take all courses on this list - CEE 347, CEE 348, CEE 349, CEE 350, CEE 352, CEE 354, CEE 356.
4. *Professional Practice (7 credits)*: CEE 440, and either CEE 444 or CEE 445. Minimum 2.0 grade for each professional practice course.
5. *Technical Electives (15 credits)*: CEE 400-level coursework selected from an approved list (see department website for list).
6. *Upper-Division Electives (13 credits)*: CEE 400-level courses or courses from an approved list from outside the department. Maximum 6 credits CEE 498 and 3 credits CEE 499 allowed toward upper-division engineering and science.
7. *Grade Requirements*: Minimum 2.00 GPA in courses applied to the major.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the department adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving environmental engineering problems; demonstrate sufficient mastery of core environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data

collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.

- *Instructional and Research Facilities:* The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental engineering and water program research laboratory facilities include more than 20,000 square feet of laboratory space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. A dedicated environmental engineering teaching laboratory comprising roughly 1200 square feet of space is equipped with a variety of standard lab equipment and analytical tools, in addition to modern PCs and a teaching bench with whiteboard and overhead projector for demonstrations and general instructional purposes. - *Student Organizations/Associations:* The department has over 20 active student organizations/associations, including American Society of Civil Engineers, Engineers without Borders, American Water Works Association-Water Environment Federation, American Water Resources Association, American Public Works Association. See adviser for details.

Graduate Program

Graduate Program Coordinator
201 More, Box 352700
(206) 543-2574
ceginfo@uw.edu

The department offers programs of study leading to the degrees of Master of Science in Civil Engineering (MSCE), Master of Sustainable Transportation (MST), Master of Supply Chain Transportation and Logistics (MSCTL), and doctor of philosophy.

Graduate work is offered in most fields of civil and environmental engineering, including transportation and construction engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

Graduate Online Programs:

Construction Engineering Master's Program: In collaboration with the Department of Construction Management in the College of Built Environments, the department offers an online Master of Science in Civil Engineering degree in construction engineering. Designed for working professionals, this program is completed at the student's own pace. Areas covered include heavy construction project management, infrastructure construction, and qualitative construction management. For more information, see the Construction Engineering [website](#).

Master in Sustainable Transportation Program: In partnership with UW Professional and Continuing Education, the department offers an online Master of Sustainable Transportation degree (MST). The program provides transportation engineers and planners the latest knowledge, skills, and tools needed to become leaders in developing and maintaining sustainable transportation practices. Students develop an awareness of green transportation strategies and gain a solid background with practical applications. In a part-time online format, the MST program covers three areas of concentration: planning and livable communities; environmental issues and impacts; and policy development, health, and economics. For more information, see the Master of Sustainable Transportation [website](#).

Supply Chain Transportation and Logistics Master's Program: In partnership with UW Professional and Continuing Education, the department offers an online Master of Supply Chain Transportation and Logistics degree. Combining engineering and business principles with industry best practices, this program provides students the knowledge needed to successfully design, implement, and manage complex supply

chain transportation and logistics strategies. Students study cross-functional areas, such as operations, inventory management, and IT systems, to develop skills in the end-to-end management of transportation in a global supply chain. For more information, see the Master of Supply Chain Transportation and Logistics [website](#).

Master of Science in Civil Engineering

Admission Requirements

Priority for admission is based on an applicant's scholastic record; usually at least a B or 3.00 GPA in the junior and senior years. Consideration is also given to Graduate Record Examination scores and other information

Degree Requirements

42 credits, as follows:

Two options are available -- thesis and non-thesis.

- *Thesis option:*
 - 30 credits of coursework with at least 18 credits at the 500 level
 - 3 credits (maximum) of CEE 500
 - 9 credits of master's thesis, CEE 700
- *Non-thesis option:*
 - 39 credits of coursework with at least 18 credits at the 500 level
 - 3 credits (maximum) of CEE 500

Doctor of Philosophy

Admission Requirements

Priority for admission is based on an applicant's scholastic record; usually, at least a B or 3.00 GPA in the junior and senior years. Consideration is also given to Graduate Record Examination scores and other information.

Degree Requirements

90 credits, as follows:

- 60 coursework credits
- 27+ dissertation credits

- 3 seminar credits (for those without a master's degree from CEE at UW)

An appropriate master's degree from an accredited institution may be applied towards 30 of the 60 coursework credits.

Course requirements are individualized depending on student's background and PhD topic area.

Financial Aid

Research and teaching assistantships are available on a competitive basis. The number of positions depends on the current level of funding. Additionally there are a limited number of fellowships, scholarships, and traineeships.

Research Facilities

More Hall has structural, concrete, bituminous materials, soil mechanics, computer, water-quality, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydrology and hydrodynamics are located in the Harris Hydraulics Laboratory.

Course Descriptions

Civil and Environmental Engineering

CEE 100 Twenty-First Century Civil and Environmental Engineering (1) Introduction to the modern discipline of civil and environmental engineering including major sub-disciplines, professional careers, projects, and departmental faculty. Explores the different disciplines and their relevance to today's students. Credit/no-credit only. Offered: W.

CEE 101 Amazing Infrastructure, its Impacts and the Roles of Civil and Environmental Engineers (1) This seminar course will cover an overview of world infrastructure and the roles for civil and environmental engineers perform in planning, design and construction. Offered: A.

CEE 102 Civil and Environmental Engineering and Careers--Companies and Agencies (1) This seminar course will cover an overview of companies and agencies that employ civil and environmental engineers including specific examples of roles. A different type of company or agency will be covered each week. Offered: W.

CEE 103 Engineering for Natural and Human Caused Disasters (1) This seminar course will cover natural and human caused disasters: why they occur and how they can be prevented or mitigated. The role of prevention or mitigation played by civil and environmental engineers will be featured. Offered: Sp.

CEE 220 Introduction to Mechanics of Materials (4) NW Introduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships among loads, stresses, and deflections of structural and machine elements such as rods, shafts, and beams. Load-carrying capacity of these elements under tension, compression, torsion, bending, and shear forces. Prerequisite: minimum grade of 2.0 in A A 210. Instructors: Berman, Reed
Offered: AWSp.

CEE 250 Environmental Processes and flows (3) NW Introduces the concepts of environmental materials and energy balance within the context of Pacific Northwest case studies, in particular nutrient loading, eutrophication, hypoxia/fish kills, water treatment, and global climate change and its regional impacts on water resources and hydrologic cycles. Prerequisite: either MATH 120, or MATH 124. Instructors: Brett
Offered: Sp.

CEE 291 Introduction to AutoCAD for Civil Engineers (2) NW Provides an introduction to engineering drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in 2D and 3D drafting in AutoCAD. Introduces reading plan sets and creating portions of plan sets applied to civil and environmental engineering fields. Prerequisite: MATH 124 or MATH 112. Offered: AWSp.

CEE 297 Foreign Study (3-5, max. 15) For participants in approved foreign-study programs. May not be used to satisfy upper-division major requirements.

CEE 298 Special Topics in Civil and Environmental Engineering (1-5, max. 10) Explores special topics in civil and environmental engineering.

CEE 299 Independent Project (1-5, max. 10) Research on special topics under supervision of a faculty member. May not be used to satisfy upper-division major requirements. Offered: AWSpS.

CEE 307 Construction Engineering (5) Introduces construction engineering including construction methods, engineering economics, contracts, project delivery methods, plan and specifications, scheduling, estimating, productivity, environmental regulations, safety and green construction. Uses scheduling and estimating software tools and emphasizes communication engineering information. Offered: AW.

CEE 317 GeoSurveying (5) Measurement and digital mapping techniques; integration of surveying methods and techniques, monitoring of structures; spatial data collection and integration with surveying data; adjustment of measurements, concepts of error; surveying control; coordinate systems, transformation; highway vertical curves; Earthwork, leveling and datum consideration, photogrammetry, GPS, GIS, remote sensing, cadastral and construction surveys, digital mapping. Prerequisite: either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: A.

CEE 327 Transportation Engineering (5) Studies vehicular transportation fundamentals including vehicle dynamics, geometric design, pavement design, traffic flow concepts, level of service analysis, intelligent transportation systems, travel demand prediction methods, freight

logistics, and management of transportation systems. Includes a review of relevant vehicle operating characteristics. Prerequisite: PHYS 121; either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: WSp.

CEE 337 Construction Materials (5) General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, aggregates, portland cement concrete, bituminous materials, asphalt concrete, wood. Laboratory testing, instrumentation, and investigation into macro-behavior. Sustainability issues including recycling, energy requirements, and greenhouse gas production associated with the materials. Prerequisite: CEE 220. Offered: ASp.

CEE 347 Introduction to Fluid Mechanics (5) Introduces the mechanics of incompressible fluids and their applications. Hydrostatic pressure forces. Kinematics, potential flows, and the Bernoulli equation. Conservation of mass, momentum, and energy. Laminar and turbulent flows. Flow in pipes, pipe networks, and open channel flows. Prerequisite: CEE 220; M E 230; PHYS 122. Instructors: Horner-Devine, Lundquist, Thomson Offered: AW.

CEE 348 Hydrology and Environmental Fluid Mechanics (4) *A. HORNER-DEVINE, E. ISTANBULLUOGLU, J. LUNDQUIST* Introduction to the physical processes that govern transport and mixing in the environment. The course uses fluid mechanical principles to understand flow in the atmosphere, river basins, groundwater, lakes and estuaries with implications for the movement of water, contaminant and other tracers through the environment. Prerequisite: CEE 347 and PHYS 123. Offered: Sp.

CEE 349 Case Studies in Environmental Engineering (3) Case studies are used to introduce fundamental environmental engineering concepts with a focus on engineering approaches that consider the interconnectedness of human and environmental systems. Prerequisite: CHEM 162. Offered: A.

CEE 350 Mass and Energy Balances in Environmental Engineering (4) Introduces concepts of mass balance, energy balance, and mass transport, and movement of water, chemicals, and energy through natural and engineered environmental systems, with application to water treatment, global elemental cycles, the earth's energy balance. Credit cannot be applied toward graduation for both CEE 350 and CHEM E 310 Prerequisite: CHEM 162, PHYS 122, AMATH 351, or MATH 307. .

CEE 352 Introduction to Microbial Principles in Environmental Engineering (5) Introduction to microbiological processes occurring within natural and engineered systems. Fundamentals of microbial classifications/processes and their impacts on ecological and human health, and roles in engineered applications and global cycling of such elements as carbon, oxygen, and nitrogen. Prerequisite: BIOL 180

CEE 354 Introduction to Chemical Principles in Environmental Engineering (5) Introduction to chemical processes occurring within soil, water, and air in natural and engineered environmental systems. Includes identification of inorganic and organic chemicals; fundamental thermodynamics and kinetics of chemical processes; examination of chemical processes in

environmental and engineered systems; and impacts of chemicals and chemical processes on ecological and human health. Prerequisite: CHEM 162

CEE 356 Quantitative and Conceptual Tools for Sustainability (4) Conceptual and quantitative tools are introduced that incorporate sustainability principles into environmental engineering. It uses a systems analysis perspective to address critical issues in environmental engineering. Topics include life cycle analysis and long-term system mass balances that facilitate decision making and process optimization at generational time scales. Offered: Sp.

CEE 357 Environmental Engineering (5) Describes water and air resources, parameters that characterize their quality, and how their use alters their properties. Elements of hydrology. Mass and energy balances as applied to environmental systems. Global environmental change. Basics of aquatic chemistry and microbiology applied to municipal water and wastewater treatment operation. Groundwater contamination and treatment. Prerequisite: CHEM 142, CHEM 143, or CHEM 145 Offered: WSp.

CEE 367 Geotechnical Engineering (5) Fundamental engineering properties of soil and rock; depositional processes and physical characteristics, hydro-conductive properties and advective flow; volume change characteristics including short- and long- term deformation; shear strength properties; and applications of basic concepts to practical problems such as foundation design and slope stability. Prerequisite: CEE 347. Instructors: Arduino, Kramer, Wartman Offered: WSp.

CEE 377 Introduction to Structural Design (5) *Berman, Eberhard, Reed, Roeder* Introduces the concepts, approaches, procedures, and codes for the structural design. Characterization of structural loads. Structural systems and system behavior. Analysis of statically determinate structures and introduction to analysis of statically indeterminate structures including approximate methods. Introduction to the behavior and design of fundamental structural member. Prerequisite CEE 220. Offered: AW.

CEE 404 Infrastructure Construction (4) *S. MUENCH* Basic concepts of large transportation infrastructure construction projects including planning, scheduling, life-cycle cost analysis (LCCA), construction cost, logistics, productivity and, where applicable, traffic impacts. Term project is designed around a large-scale I-5 pavement reconstruction project involving construction, traffic, and the interaction between the two. Involves presentations on local transportation infrastructure projects. Prerequisite: CEE 307. Offered: W.

CEE 405 Traffic Simulation (3) In-depth discussion of microscopic traffic simulation models. Will provide engineering and planning students the information on how to develop and operate traffic simulation models and evaluate and present results from simulation models. Hands-on course projects and labs will be used for this course. Prerequisite: CEE 327

CEE 409 Engineering Rome: Study Abroad (5) *Muench* Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day. Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and

historical perspective on engineering and the contributions of engineers to infrastructure and society.

CEE 410 Traffic Engineering Fundamentals (3) General review of the fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with emphasis on calculations and procedures in the Highway Capacity Manual; field surveys and data analysis. Prerequisite: CEE 327. Offered: W.

CEE 412 Transportation Data Management (3) Introduction to modern concepts, theories, and tools for transportation data management and analysis. Applications of software tools for transportation data storage, information retrieval, knowledge discovery, data exchange, online information sharing, statistical analysis, system optimization, and decision support. Prerequisite: CEE 327. Instructors: Wang Offered: W.

CEE 416 Urban Transportation Planning and Design (3) Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. Uses a systems framework, including goals and objectives, evaluation, implementation, and monitoring. A design term project, individual or small groups, utilizes material presented on a contemporary problem. Prerequisite: CEE 327. Offered: A.

CEE 418 Computer-Aided Planning of Urban Systems (3) Survey of online planning applications; use of various on-line systems to solve urban systems design problems; investigations of hardware/software tradeoffs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with URBDP 429.

CEE 420 Engineering with Developing Communities (3) DIV Introduces key technologies, theories, and challenges of infrastructure design for development. Covers technologies for energy, water, sanitation, and disaster response in low-resource contexts. Explores development theory and cross-cultural communication as they pertain to global infrastructure design.

CEE 421 Pavement Design and Construction (4) *J. Mahoney, S. Muench, J. Yamaura* Structural design and construction processes associated with bituminous and concrete pavements. Covers theory, practice, and software tools for structural thickness design and layered elastic analysis; as well as construction methods, materials, and logistics. Includes small group case-study work on actual paving projects and state-of-the-art mobile project inspection software use. Prerequisite: CEE 337. Offered: Sp.

CEE 422 Energy and Transportation (3) *T. LARSON, J. MAHONEY* Introduces climate change; vehicles, energy requirements and pollution; transportation fuels; energy and power plant terminology; traditional fossil fuel, nuclear, and renewable energy plants; permitting power plants and projects. Prerequisite: CEE 327. Offered: Sp.

CEE 424 GIS for Civil Engineers (3) GIS in civil engineering applications. Geographic and spatial data types and acquiring considerations. Data models and structures. Projections and transformations. Attribute-based operation, spatial operations. Surfaces and near neighbors. Training on Arc GIS software. Prerequisite: CEE 317. Offered: AS.

CEE 425 Reinforced Concrete Construction (3) *D. JANSSEN* Processes in constructing reinforced concrete structures. Identification and development of solutions to potential constructability problems. Lectures augmented with industry speakers and a field trip to a building under construction. Requires senior or graduate standing in Civil Engineering or Construction Management and familiarity with reinforced concrete design/construction. Prerequisite: either CEE 291 or AutoCAD experience; a minimum grade of 2.5 in either CEE 428 or CEE 452. Offered: Sp.

CEE 428 Lightweight Cementitious Composites ([0-2]-, max. 2) *Janssen* Introduces the process of designing within constraints and introductory experimental design. Covers the importance of proper laboratory documentation. Examines the characteristics of cementitious binders and elementary composite behavior. Considers constructability. Interprets pre- and post-cracking elastic behavior. Includes organization and production of technical report the documents work performed. Offered: A.

CEE 429 Sustainability in Building Infrastructure (3) Provides an overview of how to plan, design, construct, and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, green building design codes and energy standards, measurement and verification of building performance, and retrofitting existing building through building energy audit. Prerequisite: CEE 307. Offered: A.

CEE 436 Foundation Design (3) Design considerations for foundations and retaining structures. Subsurface investigations and determination of soil properties for design. Design of shallow and deep foundations and retaining structures. Foundations and soil considerations for waterfront structures. Prerequisite: CEE 367. Offered: AW.

CEE 437 Engineering Geology I (3) General overview of engineering geology and its importance to civil engineers. Topics include geologic processes, hazards, subsurface investigations, classification of geologic materials, data synthesis, and natural construction materials.

CEE 440 Professional Practice Studio (2) Fundamentals of integrated civil engineering design, professional services marketing, project management, team dynamics, total quality management, value engineering, professional liability, and applied ethics in engineering practice. Emphasis on written and oral communications and on ethical, social, and economic factors. Offered: W.

CEE 441 Transportation and Construction Capstone Design Project (5) Comprehensive design project focusing on planning, design, and construction of a transportation project such as highways, transit, and airports. Prerequisite: CEE 327; CEE 440; either CEE 404, CEE 410, CEE 412, CEE 416, CEE 421, CEE 424, or CEE 425. Offered: Sp.

CEE 442 Structural Geotechnical Capstone Design Project (5) Comprehensive team design project focusing on structural and geotechnical engineering. Requires design drawings, written reports, and oral presentations interfacing with related fields such as aesthetics and architecture, mechanical systems, traffic, environmental planning. Prerequisite: CEE 440; either CEE 451 or

CEE 452; one additional course from CEE 436, CEE 451, CEE 452, CEE 453, CEE 454, CEE 456, or CEE 457. Offered: Sp.

CEE 444 Water Resources and Hydraulic Engineering Capstone Design Project (5)

Opportunity to effect design solutions for projects or major project components in such representative areas as reservoirs and associated systems for flood control, water supply, irrigation, and hydroelectric power, surface water control systems, fisheries related projects, small harbors, and coastal engineering problems. Prerequisite: either CEE 345 or CEE 347; CEE 440; either CEE 475, CEE 476, CEE 482, CEE 483, or CEE 484. Offered: Sp.

CEE 445 Environmental Engineering Capstone Design Project (5) Individual and group design studies addressing environmental engineering problems such as stormwater management, water and wastewater treatment facilities, and residual processing. Prepare proposals, engineering reports, and alternative evaluations; process equipment design, present reports on selected design problems. Prerequisite: either CEE 345 or CEE 347; CEE 440; either CEE 473, CEE 475 CEE 476, CEE 481, CEE 482, CEE 483, or CEE 484. Offered: Sp.

CEE 451 Design of Metal Structures (3) *J. BERMAN, C. ROEDER* Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: CEE 377. Offered: A.

CEE 452 Design of Reinforced Concrete Structures (3) *D. LEHMAN, D. REED, J. STANTON* Fundamentals of design of buildings in reinforced concrete in accordance with current codes and practices. Prerequisite: CEE 377. Offered: AS.

CEE 453 Prestressed Concrete Design (3) Analysis, design, and construction of prestressed concrete structures. Prerequisite: CEE 452. Instructors: Eberhard, Stanton Offered: W.

CEE 454 Design of Timber Structures (3) Includes the design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and manufactured wood products. Prerequisite: CEE 377. Instructors: Berman, Reed Offered: W.

CEE 455 Structural Unit Masonry (3) Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CEE 377. Instructors: Tawresey Offered: jointly with ARCH 426.

CEE 456 Structural Analysis (5) Fundamental analysis and modeling of civil structural systems. Equilibrium, kinematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving real structures; introduction to finite element analysis of 2D continua. Prerequisite: CEE 377. Instructors: Berman, Eberhard, Lowes Offered: Sp.

CEE 457 Advanced Structures I (3) *L. LOWES* Introduction to the finite element method for modeling civil structures. Formulation of line and continuum elements using virtual work and the

principal of minimum potential energy. MATLAB programming of the finite element method. Use of commercial software to model real structures. Prerequisite: CEE 456. Offered: W.

CEE 458 Advanced Structures II (3) Introduction to stability, including a consideration of elastic and inelastic buckling with applications to beam-columns and plates. Introduction to plastic analysis. Prerequisite: CEE 456. Instructors: Miller, Stanton

CEE 459 Advanced Structural Mechanics (3) Formulation and solution of the basic equations of elasticity. Applications in 2-D stress analysis, torsion, thermal stresses, and beams on elastic foundation. Plate theory optional. Prerequisite: CEE 377.

CEE 462 Applied Limnology and Pollutant Effects on Freshwater (3) NW Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Offered: W.

CEE 463 Limnology Laboratory (2) NW Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CEE 462, which may be taken concurrently. Offered: jointly with BIOL 474/FISH 474; A.

CEE 465 Data Analysis in Water Sciences (4) *J. Lundquist* Covers fundamental topics related to data analysis, including statistical inference testing and error estimation, linear and quantile-based regression models, Monte Carlo simulation, time series analysis, Bayes theorem, and data visualization using modern computer techniques. Applications to water sciences, but techniques are applicable to any area. Prerequisite: IND E 315; either AMATH 301 or CSE 142; recommended: Basic stats and computer programming (or matlab) Offered: A.

CEE 472 Introduction to Hydraulics in Water Resources (3) Hydraulics related to environmental issues. Global hydrology; stratified flows; two-phase (bubble) flows; pollutant transport and mixing in reservoirs, lakes, coastal waters, and oceans; diffuser design and related case studies. Prerequisite: CEE 347.

CEE 473 Coastal Engineering I (3) Linear theory of water waves, wave transformations near shore, sediment motion, and elementary tidal theory; shoreline protection methods; and applications illustrated by selected case histories. Prerequisite: CEE 347. Instructors: Thomson

CEE 474 Hydraulics of Sediment Transport (3) *A. HORNER-DEVINE* Introduction to sediment transport in steady flows with emphasis on physical principles governing the motion of sediment particles. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, streambed roughness analysis, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. Prerequisite: CEE 347. Offered: Sp.

CEE 475 Analysis Techniques for Groundwater Flow (3) *R. NEUMANN* Presents the fundamentals of subsurface flow and transport, emphasizing the role of groundwater in hydrologic cycle, the relation of groundwater flow to geologic structure, and the management of

contaminated groundwater. Concepts are applied to well-known hydrogeologic sites. Prerequisite: CEE 347. Offered: W.

CEE 476 Physical Hydrology (3) Global water picture, data sources and data homogeneity, precipitation and streamflow hydrography analysis; calculation of surface runoff, evapotranspiration, and groundwater recharge. Hydrologic data frequency analysis and probability theory. Hydrologic design: flood mitigation, drainage. Introduction to deterministic and stochastic models. Prerequisite: CEE 347. Instructors: Istanbuluoglu Offered: A.

CEE 477 Open-Channel Flow (3) Water flow in natural and engineered channels, rivers, and streams. Analysis and design of channels (lined, vegetated), flow controls (weirs, spillways), and structures affecting fish passage (culverts). Prediction of water surface profiles. Introduction to river mechanics. Design-oriented problems. Prerequisite: CEE 347. Instructors: Jessup. Offered: W.

CEE 478 Water Systems Management and Operations (3) *J. Lundquist* Overview of past and future water management and policy issues related to current water resources projects. Through readings, writing, guest speakers, and class discussion, considers both technical and social aspects of water resource system management and operations. Topics include federal water policy, regional water planning, expansion of existing water supplies, stream flow forecasting, planning with climate change, and more. Offered: Sp.

CEE 480 Air-Quality Modeling (3) NW Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Emphasis on models used for air pollution permits. Emphasizes current problems. Prerequisite: MATH 125. Offered: jointly with ATM S 480; W.

CEE 481 Hydraulic Design for Environmental Engineering (3) *E. ISTANBULLUOGLU* Introduction to the theory and the practice of planning and design of urban water supply distribution, pump stations, sewage and storm-water collection systems, and green stormwater infrastructure. Engineering methods and computer programs are applied for designing basic system elements. Prerequisite: CEE 347; CEE 357. Offered: W.

CEE 482 Wastewater Reuse and Resource Recovery (3) Introduces wastewater treatment and systems, emphasizing fundamental biological, chemical, and physical processes related to protection of public health environmental quality and water reuse. Process analysis of the configuration and sizing of major types of treatment processes for various sizes of plants and effluent requirements. Prerequisite: CEE 357. Offered: A.

CEE 483 Drinking Water Treatment (3) Studies scientific, engineering, and regulatory principles underlying drinking water treatment; development of conceptual models for how and why treatment processes work and mathematical models describing their performance under various design and operating scenarios; field trips to water treatment systems. Prerequisite: CEE 357. Offered: A.

CEE 484 Decentralized and On-Site Wastewater Management and Reuse (3) Design and performance of on-site and decentralized wastewater treatment. Determination of appropriate

alternatives based on endpoints of water reuse, economics, policy, management, water quality, and ecological considerations. Meeting sanitation and water reuse for situations including, individual homes, rural areas, developing countries, and high density urban dwellings.

Prerequisite: CEE 357.

CEE 487 Solid-Waste Disposal (3) Describes sources and handling of municipal and industrial solid waste, with examination of collection, processing, recycling and resource recovery, and disposal alternatives. Public policy issues, local agencies and solid waste facilities, the legal and regulatory framework are all addressed in context of solid waste engineering.

CEE 488 Hazardous Waste Engineering (3) Classification of hazardous wastes; resource conservation, Recovery Act regulations; characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling; landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: CEE 357. Offered: Sp.

CEE 489 Water and Air Quality Sampling (2) Samples collected from lakes, streams, precipitation, and air. Resulting (and supplemental) data interpreted for cause-effect and statistical inference. Design for water and air quality monitoring programs. Prerequisite: CEE 462.

CEE 490 Air-Pollution Control (4) Fundamental concepts of air pollution Control including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions. Offered: jointly with ENV H 461; ASp.

CEE 491 Deterministic Systems (3) Development of quantitative methods for mathematical problem solving with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Offered: A.

CEE 492 Stochastic Systems (3) Introduction to probability distributions and statistics useful in systems analysis, conditional distributions, queuing theory and applications, Monte Carlo simulation, chance-constrained mathematical programming, and stochastic dynamic programming. Emphasis on application of the techniques to civil engineering systems problems, including transportation, water resources, and structures. Prerequisite: CEE 491.

CEE 493 Air-Pollution Source Testing and Equipment Evaluation (3) Engineering evaluation of air pollutant sources and air control equipment. Fundamentals of source testing and stack sampling, including laboratory exercises.

CEE 494 Air-Pollution Control Equipment Design (3) Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CHEM E 468/M E 468.

CEE 495 Sustainability and Design for Environment (3) *Cooper* Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/M E 415.

CEE 496 Fate and Transport of Chemicals in the Environment (3) *Neumann* Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A.

CEE 497 Engineering Jordan: Water in an Arid Land Study Abroad (5) *DIV H. Gough* Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering. Offered: S, even years.

CEE 498 Special Topics (1-5, max. 12) Special topics in civil engineering offered as course with lecture or laboratory.

CEE 499 Independent Study/Research (1-5, max. 12) Individual undergraduate research project.

CEE 500 Civil and Environmental Engineering Seminars (1, max. 3) Prerequisite: graduate standing in Civil and Environmental Engineering. Credit/no-credit only.

CEE 521 Seepage and Consolidation (3) Confined and unconfined seepage through porous media, flow net solutions, consolidation, settlement, numerical solution of seepage, and consolidation problems. Prerequisite: CEE 367 or equivalent.

CEE 522 Shear Strength and Slope Stability (3) Shear strength of cohesive and granular soils and slope stability analysis of natural and man-made slopes. Prerequisite: CEE 367 or equivalent.

CEE 523 Advanced Foundation Engineering (3) Design of shallow and deep foundations for bearing capacity and settlement. Construction considerations. Prerequisite: CEE 522 and CEE 527.

CEE 524 Lateral Earth Pressures and Retaining Structures (3) Lateral earth pressure theory. Design of temporary and permanent retaining structures including in situ reinforcement. Prerequisite: CEE 523; CEE 527.

CEE 528 Geosynthetic Engineering (3) Identification and testing of geosynthetics. Design of geosynthetic filters, roadway stabilization, earth reinforcement, and waste containment systems. Prerequisite: CEE 522 and CEE 523.

CEE 529 Foundation Soil Improvement (3) Analysis and design of physical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structure. Prerequisite: CEE 523.

CEE 530 Engineering Geology II (3) Application of engineering geology fundamentals to: location, design, and maintenance of engineered structures; policy decisions related to potential geological hazards. Case histories, governmental policy discussions, interpretation of geological maps for engineering purposes. Prerequisite: CEE 437 or permission of instructor.

CEE 531 Rock Engineering (3) Engineering classification, physical and mechanical properties of rocks, failure modes and initial stresses in rocks, laboratory and field testing of rocks, rock slope engineering, underground openings, foundations on rocks. Prerequisite: CEE 437 or permission of instructor.

CEE 576 Water Resources Planning (3) Engineering, social, and economic factors involved in water resource development and management; water policies, programs, and administration; use relationships and conflicts; considerations for regional water resource systems.

CEE 599 Special Topics in Civil and Environmental Engineering (1-5, max. 20) Special topics in civil and environmental engineering offered occasionally by permanent or visiting faculty members.

CEE 600 Independent Study or Research ([1-5]-) Topics covered depend on faculty and student interest. Prerequisite: permission of instructor.

CEE 601 Internship (2, max. 6) Internship in an established program between industry, government, and the University. Prerequisite: permission of Graduate Program Coordinator and committee chair.

CEE 700 Master's Thesis (*-) Prerequisite: permission of adviser.

CEE 800 Doctoral Dissertation (*-) Prerequisite: permission of adviser.

Construction, Energy, and Sustainable Infrastructure

CESI 501 Distributed Renewable Power Systems (3) Electrical distributed renewable generation. The depth of coverage is suitable for civil engineers and their role as project managers. Topics covered include: (1) microgrids, (2) renewable generation fundamentals, (3) utility economics, and (4) energy planning and simulation. Prerequisite: Graduate Standing Offered: Sp.

CESI 502 Geomatics in Energy Infrastructure (3) Overview of basic techniques for location measurements in energy construction projects using traditional surveying techniques, recently developed technologies for surface creation, and data management and analysis using GIS. Prerequisite: Graduate Standing Offered: A.

CESI 503 Operation of a Power Plant (3) Explores power plant operations. Topics include plant operating principles, regulatory permitting, maintenance requirements, and plant design and upgrades. Prerequisite: Graduate Standing Offered: Sp.

CESI 504 Buildings, LEED, and Energy Use (3) Overview on how to plan, design, construct and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, building energy modeling, indoor environmental qualities, and green building economics. Prerequisite: Graduate Standing Offered: SpS.

CESI 505 Air Pollution Control and Occupational Safety and Health (3) Overview on the fundamental air pollution issues involved in construction and operation of energy facilities and the management of large vehicle fleets. Topics include emission estimation, control technology assessment, ambient air impacts, and technology specific issues of worker safety and health. Prerequisite: Graduate Standing Offered: WSp.

CESI 506 Management of Site Remediation, Hazardous Waste, and On-Site Treatment (3) Covers the project management practices to ensure protection of human health and the environment when handling sites contaminated with hazardous waste generated by traditional and renewable energy sources. It includes identification of hazards, communication of risks and introduces alternatives for hazardous waste clean-up. Prerequisite: Graduate Standing Offered: Sp.

CESI 508 Accounting and Finance for Construction (3) Introduction to construction oriented financial management. Explains why construction financial management is different than financial management in other industries. Describes how to account for a company's financial resources and how to build a company's accounting system. Prerequisite: Graduate Standing Offered: W.

CESI 509 Engineering Rome: Study Abroad (5) *Muench* Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day. Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and historical perspective on engineering and the contributions of engineers to infrastructure and society.

CESI 510 Electric Grids (1) Overview of utility design, operation and construction including an electrical grid's system components and functions. This includes generation, transmission, sub-transmission and distribution. These grid components will be explained as to how they are operated by a utility. Credit/no-credit only. Offered: A.

CESI 511 Grid Integration of Variable Sources of Generation (1) Overview of the advantages and challenges associated with the integration of variable sources of generation into the electric grid and distribution systems. It will focus on weather-driven renewables such as wind, solar, and hydropower. Credit/no-credit only. Offered: W.

CESI 512 Regulating Electric Utilities (1) Overview on how state utility commissions function including how they regulate utilities, influence permitting and participate in risk management and regional electric markets. Credit/no-credit only. Offered: Sp.

CESI 513 Operation and Maintenance of a Wind Farm (1) Operation and maintenance associated with a wind and solar project owned and operated by a major utility in Washington State. Included is an overview of the project including construction aspects, how it is managed and the major maintenance issues. Credit/no-credit only. Offered: W.

CESI 514 Hydroelectric Project Relicensing (1) Relicensing of a hydroelectric project in Washington State and includes an overview of the project and the issues faced by the owner in applying for an extension to its federal operating license. This includes the design and construction of a floating fish enhancement structure. Credit/no-credit only. Offered: Sp.

CESI 519 Trends and Applications in E-Construction (1) Developments in eConstruction. The focus will be heavy construction such as bridges, pavements and energy infrastructure. Specific content will be on eConstruction inspector tools and related construction applications. Emphasis will be placed on the use of mobile multi-platform tools and devices. Credit/no-credit only. Offered: Sp.

CESI 520 Electricity Fundamentals (1) Refresher for engineers as to the basics associated with electricity as it relates to power production and distribution. Credit/no-credit only. Offered: A.

CESI 521 Introduction to AutoCAD and Bluebeam (1) Introduction to engineering drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in AutoCAD and Bluebeam software. It should only be taken by those without prior knowledge of this topic area. Credit/no-credit only. Offered: W.

CESI 522 Introduction to AutoTURN (1) Focus on AutoTURN which is used to analyze road and site design projects including vertical and horizontal curves, intersections, haul roads and vehicle clearances and turning maneuvers. The software is commonly used in energy infrastructure design and construction activities. Credit/no-credit only. Offered: Sp.

CESI 524 Statistical Methods for Construction (1) Overview of basic statistical measures used in construction and materials decision-making including data distributions, hypothesis testing, regression analysis, sampling and quality control/assurance. Credit/no-credit only. Offered: A.

CESI 525 Wind Turbine Analysis (1) Introduces wind turbine assessments and includes hardware and software for performing such assessments. These include load testing, power performance and blade and tower bending. Prerequisite: Graduate enrollment Credit/no-credit only. Offered: S.

CESI 527 Energy Infrastructure Fundamentals (1) This course will cover an overview of energy infrastructure fundamentals and focuses on basic principles associated with power plant steam and combined cycles, heat transfer and economics. This results in an overview of a

selection of power plant operating principles and costs. Prerequisite: Graduate enrollment; recommended: Graduate status in CEE. Credit/no-credit only.

CESI 528 Pavement Design for Project Roads (1) This course will cover an overview on methods used to design and construct pavement structures. The types of pavements will range from gravel surfaced to bituminous surface roads and parking lots and focus on energy infrastructure applications. Prerequisite: Graduate enrollment; recommended: Graduate status in CEE. Credit/no-credit only. Offered: S.

CESI 552 Environmental Regulations (3) I&S Principal emphasis on regulations pertaining to construction site stormwater runoff, including regulatory background and requirements, how to analyze potential site problems and prepare plans to solve them, and specifying practices to avoid or reduce water pollutant releases. Briefer coverage of regulations concerning air pollutions, wetlands, hazardous wastes, and endangered species.

CESI 588 Energy Infrastructure and the Environment (3) Larson, Mahoney Focuses on energy infrastructure, including site selection, permitting, design, construction, and maintenance. Includes electrical production facilities as well as transmission, focusing on permitting and construction of renewable energy facilities. Covers renewable energy infrastructure, emphasizing wind, solar, and geothermal. Offered: A.

CESI 592 Statistical Fundamentals for Construction and Materials Applications (3) S. Muench Overview of statistical measures used in various construction and materials decision-making processes. Subjects include data distributions, hypothesis tests (making decisions with statistics), regression analysis, sampling, quality control and assurance, and experimental design. Uses construction data to illustrate these measures. Offered: Sp.

CESI 594 Computer-Aided Construction (3) Application of information technology to construction management and cost estimating. Topics include, but not limited to, computerized construction, fundamentals of computer hardware, construction management software tools, web publishing, GPS application, and construction data management. Offered: S.

CESI 595 Construction Materials (3) Mahoney Examines the use of aggregates, bituminous mixtures, Portland cement concrete, roller compacted concrete, soil and site stabilization, utility cuts, and flowable backfill in construction projects. Emphasis on behavior of materials in various construction applications. Offered: W.

CESI 596 Pavement Construction (3) Muench Examines pavement construction, including pavement contracts and specifications, quality control and assurance programs, and plant and laydown operations. Reviews both national and international pavement construction practices. Offered: Sp.

CESI 599 Special Topics in Construction, Energy and Sustainable Infrastructure (1-5, max. 20) Special topics in construction, energy and sustainable infrastructure offered occasionally by permanent or visiting faculty members. Offered: AWSpS.

Environmental Engineering

CEWA 540 Microbiological Process Fundamentals (3) Fundamental concepts for microbial processes including organic chemical structure, nomenclature and environmental properties, principles of microbial metabolism, study of specific types of bacteria important to environmental engineering and their metabolism, development of microbial kinetic equations, including substrate utilization, energetics, and stoichiometry. Prerequisite: permission of instructor. Instructors: Stahl Offered: A.

CEWA 541 Biological Treatment Systems (3) Basic reactions, design principles, current design models, and operational considerations for biological treatment systems used in environmental engineering. Applications include activated sludge design and optimization, fixed film reactors, nitrification, nitrogen removal, phosphorus removal, anaerobic treatment, biomethane production, resource recovery, and toxic organics removal. Prerequisite: either both CEE 540 and CEE 482 or equivalent. Offered: W.

CEWA 543 Aquatic Chemistry (4) Principles of chemical equilibrium applicable to natural water systems and water and waste treatment processes. Chemical thermodynamics. Characteristics of acid/base, gas/liquid, solid/liquid, and oxidation/reduction equilibria. Computer models for chemical speciation. Offered: A.

CEWA 544 Physical-Chemical Treatment Processes (4) Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment. Topics include chemical kinetics, reactor design and analysis, ion exchange, adsorption, and gas transfer. Development of mathematical models and evaluation of current design practice. Offered: W.

CEWA 545 Environmental Organic Chemistry (3) Covers characterization and modeling of properties and processes governing the distribution, fate, and transformation of organic pollutants in environmental systems. Explores linear free energy relationships and their application to examining the water/soil/air partitioning, bioaccumulation, substitution and redox reaction kinetics, and abiotic transformations of organic pollutants. Prerequisite: CEE 543 or permission of instructor. Offered: W.

CEWA 546 Topics in Ecological Effects of Wastewater (3) Application of ecological concepts for analysis and interpretation of bioenvironmental problems and data (eutrophication, acid rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: CEE 462 or BIOL 473 or permission of instructor.

CEWA 547 Lake and Watershed Management (3) Application of current techniques for lake and watershed analysis and modeling using fundamentals of limnology. Approaches to restoring eutrophic lakes, land use impacts on water quality. Practical exercises using data from real lake systems. Prerequisite: CEE 462/FISH 434, BIOL 473, or permission of instructor. Offered: Sp.

CEWA 549 Advanced Topics in Environmental Engineering, Chemistry, and Biology (3) Special topics of current importance in environmental engineering. Application of fundamental

chemical and biological principles to the study of such phenomena as the behavior of aqueous colloids, corrosion processes, and bacterial metabolism in chemically complex solutions.

Prerequisite: CEE 540, CEE 541. Offered: Sp.

CEWA 550 Environmental Chemical Modeling (3) Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications focus on groundwater systems. Prerequisite: CEE 551. Offered: Sp.

CEWA 553 Seminar - Topics in Atmospheric Chemistry (1-3, max. 6) Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with ATM S 525.

CEWA 554 Acoustics of Environmental Noise (4) Offered: jointly with M E 528.

CEWA 555 Topics in Environmental Health (3) Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.

CEWA 557 Air Resources Management (3) Technical, administrative, and legal aspects of air conservation. Topics include urban and regional scale air quality measurement and modeling systems, receptor modeling based on chemical fingerprinting of sources and current case studies involving engineering analysis, air-quality modeling, and regulatory aspects at local, state, and federal governmental levels. Offered: A.

CEWA 560 Risk Assessment for Environmental Health Hazards (4) Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with ENV H 577/PUBPOL 589; A.

CEWA 564 Advanced Hydrology (3) *E. Istanbuluoglu* Detailed treatment of statistical methods used in hydrology: trend analysis, hypothesis testing, flood frequency, and elements of stochastic hydrology and data generation. Detailed examination of hydrologic models with emphasis on evapotranspiration and water budget, use of a watershed model (e.g., Stanford Watershed Model) in catchment. Offered: Sp.

CEWA 565 Data Analysis in Water Sciences (4) *J. LUNDQUIST* Covers fundamental topics related to data analysis, including statistical inference testing and error estimation, linear and quantile-based regression models, Monte Carlo simulation, time series analysis, Bayes theorem, and data visualization using modern computer techniques. Applications to water sciences, but techniques are applicable to any area. Offered: A.

CEWA 566 Satellite Remote Sensing for Water Resources (3) *F. HOSSAIN* Basic principles of satellite remote sensing of earth's water. Practical aspects of remote sensing in the context of conventional water management. Data uncertainty, modeling and assimilation for advancing water management. Offered: A.

CEWA 568 Snow Hydrology (3) *Lundquist* Introduces snow hydrology research, emphasizing current research methods and results in both measurements and modeling. Explores the impact of snow on hydrology and water resources. Offered: W.

CEWA 570 Hydrodynamics (4) *A. Horner-Devine* Applications of the equations of motion to ideal and real fluid flow, with topics in Environmental Fluid Mechanics. Kinematics, Navier-Stokes equations, viscous flows, Coriolis, density driven flows, free surface flows, and introduction to turbulence. Applications include: tidal flushing, lakes, estuaries, gravity currents and river plumes. Prerequisite: CEE 357 or equivalent. Offered: Sp.

CEWA 571 Hydrodynamics in Water Quality (3) Theoretical, field study, and laboratory model approaches to diffusion in transport problems of concern to water resources engineers. Prerequisite: CEE 342 or permission of instructor.

CEWA 572 Numerical Modeling of Hydrodynamics (3) *U. Nirnimesh Kumar* Develops finite-difference, finite-volume and spectral numerical methods to solve ordinary and partial differential equations relevant to hydrodynamics and hydrology, and ocean sciences. The course framework will provide insight into working in a UNIX system, writing numerical models, hands-on training with numerical models. Prerequisite: Working knowledge of MATLAB/Python

CEWA 573 Water Wave Mechanics for Coastal Engineers (4) *J. Thomson* Covers theory and numerical modeling of water waves; classical water wave problem and approximate solution techniques; evolution equations and their solutions for wave systems; viscous damping effects and mass transport; nonlinear shallow-water waves and the Korteweg-deVries equation; and waves on beaches and structures. Prerequisite: CEE 347. Offered: Sp.

CEWA 574 Hydraulics of Sediment Transport (4) *A. Horner-Devine* Introduction to sediment transport in steady flows with emphasis on physical principles and their extension to modeling of sediment transport. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. HECRAS modeling of transport in channels. Prerequisite: CEE 347; recommended: Fluid Mechanics comparable to CEE 347 course or equivalent Offered: Sp.

CEWA 576 Physical Hydrology (4) *E. Istanbuluoglu* Engages familiarity with physical hydrologic processes, interactions, and their representations over multiple timeframe references and scales. Project and report based exercises extend furthering analytical skills using existing theories and observations in Physical Hydrology. Offered: A.

CEWA 577 Open Channel Flow with Modeling (4) *A. Jessup* Water flow in natural and engineered channels, rivers, and streams. Analysis and design of channels (lined, vegetated),

flow controls (weirs, spillways), and structures affecting fish passage (culverts). Prediction of water surface profiles. Introduction to river mechanics. Design-oriented problems. Introduction to the HEC-RAS modeling software. Prerequisite: CEE 347. Offered: W.

CEWA 578 Water Resource System Management and Operations (3) Readings in recent literature related to the modeling and management of water resources. Topics include drought management, expansion of existing water supplies, hydropower production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Offered: Sp.

CEWA 579 Quantitative Water Management (3) *F. Hossain* Delivers an understanding of quantitative methods used in practice to manage the earth's water using a systems approach. It also introduces emerging water management ideas in the context of emerging water management challenges.

CEWA 580 Water-Quality Management (3) Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Offered: Sp.

CEWA 582 Wastewater Reuse and Resource Recovery (3) *M. Winkler* Designed to provide students with fundamentals of wastewater and biosolids treatment and will focus on technologies utilized to recover resources from waste products. Covers experience with real-world applications both in the United States and abroad. Topics include: bioplastic and biogas production, recovery of water, fertilizer, sulfur and metals. Offered: W.

CEWA 596 Fate and Transport of Chemicals in the Environment (3) *Neumann* Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A.

CEWA 597 Engineering Jordan: Water in an Arid Land Study Abroad (5) *Gough* Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering.

CEWA 599 Special Topics in Environmental Engineering (1-5, max. 20) Special topics in environmental engineering offered occasionally by permanent or visiting faculty members. Offered: AWSpS.

Structural and Geotechnical Engineering

CESG 501 Structural Mechanics (6) *Mackenzie, Miller* Equations of a continuum for small displacements, applications to linear elasticity. Kirchhoff plate theory, problems in advanced strength of materials. Virtual work, minimum potential energy, force and displacement methods of structural analysis. Direct stiffness method. Approximate solutions, geometric stiffness matrix. Linearized buckling. Offered: A.

CESG 502 Structural Dynamics (3) Lagrange's equations. Free vibrations of linear, single, and multiple degree of freedom systems. Damping. Mode superposition. Forced vibrations by time history and by response spectrum methods. Free and forced vibrations of continuous systems. Wave propagation in rods and beams. Prerequisite: CEE 501. Instructors: Eberhard, Stanton Offered: W.

CESG 503 Advanced Structures I (3) *L. Lowes, M. Motley* Introduction to the finite element method for modeling civil structures at the graduate level. Formulation of line and continuum elements using virtual work and the principal of minimum potential energy. MATLAB programming of the finite element method. Use of commercial software to model real structures. Prerequisite: CEE 456 or CEE 501 Offered: W.

CESG 504 Finite Element Methods in Structural Mechanics (3) Extension of the matrix methods of structural analysis to the solution of elasticity, plate, and shell problems by use of finite element approximations. Discussion of convergence and bounding and extension to investigation of stability and finite deformations. Prerequisite: CEE 501 or permission of instructor. Instructors: Mackenzie, Lowes, Miller Offered: W.

CESG 505 Engineering Computing (3) *Lowes, Mackenzie, Miller* Applied computing in civil and environmental engineering contexts, including physical systems modeling, graphics and visualization, and data management. Program development using contemporary tools and strategies. Computer architecture fundamentals, theoretical and practical issues affecting memory use and performance. Offered: A.

CESG 506 Nonlinear Analysis of Structural Systems (3) Formulation, solution, and interpretation of nonlinear numerical models of structural systems. Material and geometric nonlinearities for truss, beam, and frame systems. Resultant-based material laws. Large deformations. Solutions procedures, arc-length methods. Introduction to parameter identification. Prerequisite: CEE 501. Instructors: Lowes, Miller, Mackenzie Offered: Sp.

CESG 507 Structural Stability (3) *M. Motley, R. Wiebe* Covers concepts and fundamental principles of mechanics of equilibrium states and their stability properties; analysis of the stability and critical loads of columns; beams, and frames with various boundary conditions and loads; application of design formulas; and approximate method to calculate elastic and inelastic buckling loads. Prerequisite: CEE 501. Offered: W.

CESG 508 Materials Modeling (3) Behavior of materials used in civil engineering structures. Yield and failure surfaces. Physical and phenomenological models of plastic and viscoelastic

behavior. Fracture mechanics. Fatigue models and predictions. Damping and friction. Behavior of anisotropic and composite materials. Offered: S.

CESG 509 Reliability and Design (3) *Reed* Introduction to theory of structural reliability and its application to design procedures in civil engineering, including probability theory; assessment of uncertainties; code specification and the related concept of risk and the influence of socioeconomic factors; loads, load combinations, and probabilities of damage. Offered: AS.

CESG 521 Advanced Reinforced Concrete (3) Behavior and design of reinforced concrete members and structures. Members subject to torsion and torsion combined with flexure and shear; members with small shear span/depth ratios, slabs. Prerequisite: CEE 452 or equivalent. Instructors: Eberhard, Stanton Offered: A.

CESG 522 Analysis and Design of Prestressed Concrete (3) *J. Stanton* Provides an introduction to prestressed concrete. It will focus primarily on flexural members, but will also include axially loaded members. First, the concept of prestressing will be discussed, followed by analysis and design under service loads, then analysis for strength. The discussion will be restricted to statically determinate members.. A design project may also be included as part of the course. Prerequisite: CEE 452 or equivalent senior course on Reinforced Concrete; recommended: A course in statics and one in mechanics of materials. Offered: W.

CESG 523 Advanced Structural Systems (3) Examines structural design of floor systems for buildings, including one-way and two-way slabs, strip method, yield line theory, prestressed concrete slabs. Lateral load resisting systems for buildings. Prerequisite: CEE 453; CEE 502. Instructors: Eberhard, Stanton Offered: Sp.

CESG 524 Advanced Steel I (3) Factors influencing strength and serviceability of steel structures; LRFD limit state design procedures. Use of theories of plasticity and stability in development of design methods and specifications, bolted and welded connections, temperature effects, and affect of different fabrication methods on behavior of structure. Prerequisite: CEE 501. Instructors: Berman, Roeder Offered: W.

CESG 526 Earthquake Engineering I (3) Earthquake mechanism and ground shaking, response spectra, linear elastic methods for prediction of behavior, displacement prediction methods for inelastically behaving structures, modeling and solution schemes, earthquake design philosophy, capacity design. Reinforced concrete, steel, and base-isolated structures. Prerequisite: CEE 501, CEE 502. Instructors: Roeder Offered: Sp.

CESG 527 Earthquake Engineering II (3) Performance-based design, development of fragility curves, characteristics and effects of ground-shaking records, design methods, passive and active control, dynamic inelastic time history analysis, design of parts, system detailing, soil-structure interaction, repair and retrofit of structures. Prerequisite: CEE 515. Instructors: Roeder Offered: A.

CESG 528 Wind Engineering Design (3) *Reed* Wind effects on structures, including atmospheric boundary layer flow; bluff body aerodynamics; structural dynamics and

aeroelasticity; development and use of the ASCE Standards; estimation of along-wind, across-wind, and torsional response of tall buildings; design strategies for avoiding wind-induced discomfort. Fundamentals of wind tunnel testing. Offered: A.

CESG 529 Bridge Engineering (3) *M. Eberhard* Design of bridges. Includes the design of decks, joints, girders, columns and foundations to resist gravity loads and earthquakes. Prerequisite: CEE 452, CEE 453 (or equivalents) Offered: S.

CESG 561 Soil Dynamics (3) Dynamics of discrete systems; dynamics of continuous systems, wave propagation; dynamic soil properties; linear, nonlinear, and equivalent linear ground response analysis; vibrations of footings; construction vibrations; vibration isolation.

CESG 562 Advanced Geotechnical Laboratory (4) Soil and site investigation, classification and engineering properties of soils and rock as determined by standard and advanced test procedures and equipment. Evaluation of test data. Report writing. Prerequisite: CEE 367 or equivalent. Offered: A.

CESG 563 Advanced Foundation Engineering (4) Design and analysis of shallow and deep foundation systems and earth retention structures. Seismic effects, pile interactions, and other related topics. Site investigation, quality control, and construction methods. Offered: W.

CESG 564 Computational Geomechanics (4) *P. Arduino* Introduction to geotechnical modeling, applied finite elements and soil constitutive modeling. Basic introduction to finite elements as applied to geotechnical problems. Development, implementation and calibration of constitutive models for soils including Von Mises, Drucker Prager, Mohr-Coulomb and Cam-Clay. Offered: W.

CESG 566 Geotechnical Earthquake Engineering (3) Plate tectonics and elastic rebound theory of earthquakes and faults; characterization of ground motions; seismicity; seismic risk analysis; effect of local soil conditions on ground response; development of design ground motions; liquefaction; dynamic lateral earth pressures; seismic slope stability. Prerequisite: CEE 525 or permission of instructor.

CESG 576 Advanced Soil Mechanics (4) *S. KRAMER* Consolidation behavior of soils; computation of magnitude and rate of settlement; shear strength of coarse and fine-grained soils under different groundwater and loading conditions; time and rate effects on shear strength; analysis of slope stability. Offered: A.

CESG 599 Special Topics in Structural and Geotechnical Engineering (1-5, max. 20) Special topics in structural and geotechnical engineering offered occasionally by permanent or visiting faculty members. Offered: AWSpS.

Transportation Engineering

CET 512 Transportation Data Management (3) *Y. Wang* Modern concepts, theories, and tools for transportation data management and analysis at the graduate level. Applications of software

tools for transportation data storage, information retrieval, knowledge discovery, data exchange, online information sharing, statistical analysis, system optimization, and decision support. Offered: W.

CET 561 Transportation Planning and Design (5) *Avery* Provides an overview of transportation planning and how sustainability fits into this field. Topics include institutional frameworks, legal/legislative issues, land use, capacity analysis, supply management and Intelligent Transportation Systems (ITS). Covers tasks/tools of transportation planning at the site, city, region, and state levels. Offered: A.

CET 562 Livable Communities and Design (4) *Bassok* Explores the positives and negatives affecting livability. Covers sprawl and compact cities, energy issues and environmental quality, transit-oriented and traditional neighborhood development, and mixed-use and mixed income developments. Includes context-sensitive solutions to transportation projects. Offered: A.

CET 563 Transportation Choices and Technology (4) *Rutherford* Explores the range of sustainable transportation choices for both people and goods. Studies passenger modes of transportation including bicycles, single-occupancy vehicles, care and van pools, shared autos, bus, rail, ferries, trolleys, and foot travel in the context of sustainability. Offered: A.

CET 564 Sustainable Transportation from a Systems Perspective (5) *McCormack* Covers tools to evaluate and develop sustainable transportation systems. Emphasizes design approaches that support sustainable transportation, methods to evaluate the full life cycle impacts of transportation systems, and tools to assess transportation networks as resilient systems. Offered: A.

CET 565 Climate Change and Energy (5) *Larson, Mahoney* Covers the nature of global climate systems, global warming, ozone depletion, and human influences. Introduces tools to evaluate current and alternative energy production and conversion options for transportation. Explores the nexus between transportation and energy in the context of climate change adaptation and mitigation. Offered: W.

CET 566 Environmental Analysis and Assessment (5) *Watkins* Reviews statistical methods necessary to analyze environmental issues. Uses environmental data to demonstrate how significant impacts are measured and reported. Discusses transportation data sources, sustainable transportation indicators, and related statistical analysis. Includes travel demand forecasting and a review of engineering economy. Offered: Sp.

CET 567 Health and Sustainable Transportation (5) *Rowangould* Examines how transportation policy is driven by human health impacts. Highlights water and air impacts on health along with the health benefit of human powered transportation. Presents legal and regulatory issues. Case studies provide examples of application of these principles to real world transportation issues. Offered: A.

CET 568 Transportation Economics (5) *Niemeier* Economics applied to transportation planning, operations, maintenance, and management problems; microeconomic and

macroeconomic theories; benefit-cost analysis; and the effect of uncertainty. Presents the effect of tolls, parking pricing, transit subsidies, and other pricing and incentive policies. Offered: W.

CET 569 Policy Development, Finance, and Sustainable Transportation (5) *Rutherford* Covers the development and implementation of transportation policies to support sustainable transportation systems. Reviews regulations and finance opportunities at the local, state, and federal level highlighting those that promote sustainable transportation. Offered: Sp.

CET 579 Advanced Traffic Detection Systems (3) *Wang* Introduction to advanced tracking and detection technologies in transportation engineering, including Global Positioning Systems (GPS), inductance loop detection systems, remote traffic microwave radar, computer-vision based technologies, and other emerging detection technologies with cutting-edge research in these areas.

CET 580 Urban Transportation Planning (4) *Rutherford* Introduction to transportation planning, including trends and issues, land use and transportation interaction, surveys, public involvement, demand management, technology, forecasting, impacts, and policy strategies. Offered: A.

CET 581 Travel Demand Forecasting (4) Application of mathematical models to forecast urban travel behavior. Introduces emerging methods, land use models, travel demand models, including trip generation, trip distribution, mode choice, and network assignment. Discusses validation and ethics. Offered: A.

CET 582 Intelligent Transportation Systems (3) Application of modern computer and communication technologies to transportation systems. Benefits to public agencies, commercial companies, and travelers. Coordination between private and public sectors. Intelligent Transportation System's (ITS) social, organizational, and operational changes. Offered: A.

CET 583 Transportation Energy and Sustainability (3) *D. Mackenzie* Addresses technical and policy options for making transportation more sustainable, considering economic, environmental, and equity impacts. Topics include transportation demand management; vehicle technologies; alternative fuels; dynamics of technology change; and roles of state, federal, and international policy. Prepares students to think broadly, analyze systematically, and communicate effectively in this area. Offered: Sp.

CET 584 Analytical Methods in Transportation I (3) Application of analytical and statistical methods to issues in transportation and driving. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: either IND E 315, MATH 390/STAT 390, or equivalent. Instructors: Boyle Offered: jointly with IND E 546; W.

CET 585 Analytical Methods in Transportation II (3) Applications of advanced econometric methods to transportation issues. Topics include, but not limited to, systems of equations, duration models, limited dependent variable approaches, and count models. Hands-on modeling,

with numerous data sets, available for application. Collaborative projects. Prerequisite: CEE 584 or permission of instructor.

CET 586 Pedestrian Travel, Land Use, and Urban Form (3) Seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: jointly with URBDP 576.

CET 587 Global Trade, Transportation, and Logistics Management (4) Provides an overview of trade, transportation, and logistics activities. Develops an understanding of the physical and information flows in supply chains, and the economic drivers of supply chain choices. Includes methods to analyze and improve logistics and transportation systems, including applications of policy, technology, and infrastructure. Offered: Sp.

CET 589 Transit Systems Planning (3) Planning, operational methods for urban public transportation. Review of technological, operating characteristics of vehicles and systems; financing, management, institutional aspects. Paratransit. Short-range planning, operational strategies, revenue-fare structures. Service monitoring. Mode choice, transit demand relating to service. Computer-aided methods for planning, design of transit systems. Offered: Sp.

CET 590 Traffic Systems Operations (3) *Goodchild, McCormack* Operational planning, management of arterial and freeway traffic systems. Review of transportation system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages. Prerequisite: CEE 327. Offered: A.

CET 591 Freight Transportation (3) Overview of the technical and institutional aspects of transporting freight. Topics include the different modes of moving freight, the technology of transferring freight between modes at ports and terminals, issues that impact freight movement such as congestion and government regulation, and the future of freight mobility. Also covers regional freight demand modeling techniques. Offered: A.

CET 593 Transportation System Analysis (3) *X. Ban* Applications of mathematical models to model traffic flow on transportation system. Introduces graph theories of transportation networks, basic network flow methods, network equilibrium and pricing concepts. Discusses impact of emerging techniques (e.g., shared mobility) on transportation. Prepares students on transportation system analysis fundamentals for them to conduct more advanced research. Offered: Sp.

CET 594 Travel Survey Methods (3) *Q. Chen* Covers the entire process of data collection in transportation planning, including sampling, survey administration, questionnaire design, and post-survey processing. Both quantitative and qualitative data collection will be collected. Additionally, use of new technologies for data collection will also be included.

CET 599 Special Topics in Transportation Engineering (1-5, max. 20) Special topics in transportation engineering offered occasionally by permanent or visiting faculty members. Offered: AWSpS.

Computer Science and Engineering

Department Overview

AC101 Paul G. Allen Center for Computer Science and Engineering

UW Computer Science & Engineering (CSE) educates students to become leaders in the design and implementation of the computing systems that touch every aspect of modern society. CSE is widely recognized as one of the top programs in the world, with passionate faculty bringing the latest advances into the classroom and the lab.

CSE offers two undergraduate degrees: Computer Science (through the College of Arts & Sciences) and Computer Engineering (through the College of Engineering). While the degree requirements differ in some details, undergraduate majors working toward either degree have the same broad opportunities to take the wide array of courses that CSE offers. Many of our graduates go on to careers at the world's great technology companies, from the largest industry titans to the smallest start-ups. Others join innovative companies and non-profit organizations outside the traditional computing industry to use software, hardware, and data to solve the world's greatest challenges. Still others go on to challenging graduate programs in a variety of fields.

At the graduate level, CSE offers (1) an integrated Master's program for some of our undergraduate majors seeking a deeper education before leaving campus, (2) an evening Master's program for currently employed software professionals, and (3) a PhD program for students seeking a research career.

The field of computing is broad and growing, and CSE's course catalog reflects this breadth. Beyond the popular introductory programming courses taken by thousands of students from every major on campus, our courses cover everything from the mathematical foundations of what computers can and cannot do; to hands-on experiences building software and hardware artifacts with a range of programming languages and tools; to advanced courses in software engineering, human-computer interaction, computer graphics and animation, artificial intelligence, machine learning, large-scale data management, natural language processing, computer networking, computational biology, robotics, computer security and privacy, and much more.

Computers are the most flexible and powerful machines ever created. While the applications of computing continue to grow and change, the core magic of CSE is timeless: computer scientists and engineers combine creative problem-solving, rigorous design, and the creation of algorithms, software, and hardware systems to build solutions that change the world.

Undergraduate Program

Adviser

101 Paul G. Allen Center for Computer Science and Engineering, Box 352350

206-543-1695

ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:

- The Bachelor of Science in Computer Engineering degree
- The Bachelor of Science degree with a major in computer science (see [Computer Science](#) in the Arts and Sciences section of this catalog)
- Minor in Neural Computation and Engineering

The core requirements of the two undergraduate majors are similar. The computer engineering major includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole. It may be more appropriate for students who are interested in building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints.

The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the design of software systems and applications.

Bachelor of Science in Computer Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CSE 142, CSE 143; English composition.

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students.

1. Deadlines for requesting placement: July 1 and January 15
2. Course requirements to request placement: MATH 124, MATH 125, MATH 126; PHYS 121; CSE 142, CSE 143; 5 credits English composition
3. 30 credits graded college coursework

4. Grade requirements: Minimum 2.0 grade in each course required for placement; minimum 2.50 cumulative GPA in courses required for placement

If the number of Engineering Undeclared students requesting placement into the major exceeds the department capacity for Engineering Undeclared students, a matching process is implemented. Factors considered include performance in courses required for placement, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students

Current UW students without Engineering Undeclared status may apply. Admission is competitive.

1. Department application deadlines: July 1 and January 15
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; PHYS 121; CSE 142, CSE 143; 5 credits English composition. All courses completed prior to application deadline
3. Minimum 30 graded college credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Transfer Students

Transfer student admission is for autumn quarter only and is competitive.

Transfer applicants are considered based on their University application. No additional departmental application required. Applicants must identify Computer Engineering as their first-choice intended major, and indicate they will begin the major immediately upon transferring. Applicants must meet the following requirements:

1. Minimum 30 graded college credits completed by the University transfer application deadline.
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; PHYS 121; CSE 142, CSE 143; 5 credits of English composition all completed with minimum 2.0 grade prior to autumn quarter

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

180 credits as follows:

General Education Requirements (83 credits)

1. *Written and Oral Communication (12 credits)*: 5-credit course in English composition from the University-approved list; HCDE 231; 4 credits of UW approved writing (W) or additional UW approved composition (C) courses.
2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (30 credits)*: Minimum 10 credits required in each area.
3. *Natural World (41 credits)*:
 - a. *Mathematics (15-18 credits)*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken)
 - b. *Science (20 credits)*: PHYS 121, PHYS 122, and 10 additional credits from the list of approved natural science courses in the CS&E handbook
 - c. *Mathematics or Science (3-6 credits)*: 3 to 6 additional credits of math/science (to bring total to 41) chosen from approved natural science courses in the CS&E handbook: STAT 390, STAT 391, STAT 394, MATH 307, MATH 309, MATH 334, MATH 335, AMATH 351, or AMATH 353 (STAT 391 recommended)

Major Requirements (72 credits)

1. *Required Courses (36 credits)*: CSE 142, CSE 143, CSE 311, CSE 312, CSE 332, CSE 351, CSE 369, CSE 371/E E 371, E E 215 or E E 205
2. *CSE Electives (36 credits)*:
 - a. One course chosen from: CSE 403, CSE 474/E E 474, or CSE 484
 - b. Three additional courses chosen from the computer engineering systems electives list in the online CSE handbook
 - c. Two additional courses chosen from the CSE core course list in the online CSE handbook
 - d. A design capstone course from the approved list in the CSE handbook.
 - e. 4 credits of College of Engineering courses from the CSE elective list
 - f. Additional (0-5 credits) CSE electives to bring total CSE electives to 36 credits
3. Minimum 2.0 grade for any course applied to the major, Natural World, or Written and Oral Communications requirements. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.
4. Free Electives (20-25 credits, to bring total for the degree to 180)

Minor

Neural Computation and Engineering

Minor Requirements (30 credits)

1. Either NBIO 405/BIOEN 466, or both NBIO 301 and NBIO 302
2. BIOEN 460
3. Either AMATH 342 or NBIO 303
4. One course from PHIL 442 (preferred), PHIL 242, or PHIL 409
5. Capstone: BIOEN 461
6. Electives At least 12 additional graded credits from the Neural Computation and Engineering elective list, available on the program website
7. Minimum cumulative 2.00 GPA for courses counted toward the minor
8. Minimum 18 credits outside the student's major
9. Students make a presentation during the Mary Gates Undergraduate Research Symposium or Computational Neuroscience Connection Program. With approval, other presentations may satisfy this requirement.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*

Engineering Quality: Graduates engage in the productive practice of computer engineering to identify and solve significant problems across a broad range of application areas.

Leadership: Graduates engage in successful careers in industry, academia, and public service, providing technical leadership for their business, profession, and community.

Economic Impact: Graduates enhance the economic well-being of Washington State through a combination of technical expertise, leadership, and entrepreneurship.

Lifelong Learning: Graduates adapt to new technologies, tools, and methodologies to remain at the leading edge of computer engineering practice with the ability to respond to the challenges of a changing environment.

The computer engineering undergraduate degree is housed in the College of Engineering and is thereby accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, phone: 410-347-7700. The department has adopted the following student outcomes. Upon graduation from the computer engineering program, students have:

- a. An ability to apply knowledge of mathematics, science, and engineering
- b. An ability to design and conduct experiments, as well as to analyze and interpret data
- c. An ability to design a computing system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

- d. An ability to function on multi-disciplinary teams
 - e. An ability to identify, formulate, and solve computer engineering problems
 - f. An understanding of professional and ethical responsibility
 - g. An ability to communicate effectively
 - h. The broad education necessary to understand the impact of computer engineering solutions in a global, economic, environmental, and societal context
 - i. A recognition of the need for, and an ability to engage in life-long learning
 - j. Knowledge of contemporary issues
 - k. An ability to use the techniques, skills, and modern computer engineering tools necessary for engineering practice.
- *Instructional and Research Facilities:* The department is housed in the state-of-the-art [Paul G. Allen Center for Computer Science and Engineering](#). The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

- *Honors Options Available:* With College Honors (Completion of Honors Core and Departmental Honors requirements). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. See www.engr.washington.edu/coop and careers.washington.edu for information.
- *Departmental Scholarships:* CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html.
- *Student Organizations/Associations:* A student chapter of the Association for Computing Machinery (ACM) operates within CSE. The ACM helps to coordinate new student orientations, research nights, technical talks, and various tutorials.

Graduate Program

Graduate Program Coordinator

AC101 Paul G. Allen Center for Computer Science and Engineering, Box 352350

206-543-1695

grad-admissions@cs.washington.edu

The department offers master of science and doctor of philosophy degrees. Students can pursue full-time graduate study leading to a PhD with an integrated MS. Students can also pursue part-time graduate study in the evening, leading to an MS. Current undergraduate computer science and computer engineering majors can apply to a full-time MS program integrated with the bachelor's degree. Programs provide breadth of knowledge as well as depth in an area of specialization.

CSE has a large faculty, with expertise across the range of modern computing topics and with considerable focus on several interdisciplinary topics. Topics in graduate-level courses and opportunities for independent research reflect this breadth.

Combined Bachelor of Science/Master of Science - 5th year Program

Admission Requirements

Open only to students currently enrolled as computer science or computer engineering majors at the UW. Applicants must complete all required 300-level CSE courses for their computer science or computer engineering degree. Applications accepted once a year in spring.

Degree Requirements

40 credits

Approved coursework from the PhD-track master's courses, the Professional Master's Program courses, and 400-level courses

1. Minimum 36 credits of approved graded 400-level and 500-level courses except as substituted by research credit:
 - a. Minimum 32 credits in CSE courses. Students may petition to substitute courses in other fields
 - b. Minimum 20 credits from 500-level CSE 4-credit graded courses or other approved CSE graded coursework at the 500-level.
2. 4 credits of research colloquia (CSE 519 or CSE 520) or single-credit research seminars (CSE 590).
3. Students may substitute up to 12 credits of CSE 600 in place of graded CSE courses in 1.a., above. Of these, 4 credits of research may be substituted for graded credits in 1.b., above.

4. Either an approved internship/co-op or at least 3 credits of CSE research.
5. Minimum one approved course from the CSE integrated project (capstone) course list. Includes 500-level capstone-style courses as well as CSE 428, CSE 441, CSE 454, CSE 460, CSE 468, CSE 477, and CSE 481.
6. Courses taken prior to completion of the bachelor's degree may apply to master's requirements if all the following points are met:
 - a. Numbered 500-level or higher
 - b. Fulfill master's requirements as outlined above.
 - c. Taken after a student is admitted to the BS/MS program
 - d. Credits do not satisfy any undergraduate requirements, such as departmental requirements or general elective credits.
 - e. Maximum 12 graduate credits taken as an undergraduate may apply to the master's degree.

Integrated Master of Science

Admission Requirements

See PhD admission requirements, below.

Degree Requirements

40 credits

Non-Thesis Option

1. 20 credits in courses numbered 500 or above; 30 credits in CSE courses. 10 credits may be in one or more supporting fields
2. MS qualifying evaluation.
3. Breadth requirement: One course in four of five CSE areas below plus two additional courses in any area (18 credits total) for graded credit. A waiver is possible for graduate courses taken elsewhere.
 - a. Theory: CSE 521, CSE 525, or CSE 531
 - b. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
 - c. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
 - d. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
 - e. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
 - f. Non-CSE: GENOME 540; HCDE 544 or INSC 570. Non-CSE courses do not belong in any of the five areas above.
4. Independent project completed under supervision of a primary and secondary faculty adviser.

Thesis Option

1. CSE 700, master's thesis (9 credits)
2. 31 additional credits
 - a. 24 credits in CSE courses
 - b. At least 16 credits numbered 500 or above
 - c. 7 credits may be in one or more supporting fields such as engineering, mathematics, natural sciences, business administration, linguistics, philosophy, psychology, or medicine.

Professional Master's Program

Admission Requirements

1. Bachelor's degree in computer science, computer engineering, or related field
2. 3.50 is the average GPA for accepted students.
3. GRE (general examination) except applicants with a PhD from a U.S. institution
4. Two years of post-degree professional experience
5. Significant computing background, to include the following undergraduate courses: data structures, algorithms, computer systems, and programming languages; or professional experience in these areas. Substantial hands-on professional programming experience
6. International students: work visas (or H4 visas)

Degree Requirements

40 credits

Eight 4-credit PMP (Professional Master's Program) courses (determined in consultation with an adviser) and other courses for 8 additional credits. The additional credits may be earned through participation in the department's colloquium series. Students who take one course per quarter, plus 1 credit of colloquium, complete the program in two-and-a-half years.

Doctor of Philosophy

Admission Requirements

1. Solid background in computer science, including programming, machine organization, data structures, discrete mathematics, automata theory, and programming systems (i.e., the equivalent of CSE 321, CSE 322, CSE 326, and CSE 378, and either CSE 401 or CSE 451). Some exceptions are made for otherwise promising students.
2. GRE scores, earned within the preceding five years.
3. Application deadline: December 15 for both U.S. and international students for autumn quarter admission.

Degree Requirements

90 credits

1. PhD qualifying evaluation, to include:
 - a. Breadth requirement, satisfied through coursework.
 - b. One course in four of five CSE areas below plus two additional courses in any area (18 credits total) for graded credit. A waiver is possible for graduate courses taken elsewhere.
 - i. Theory: CSE 521, CSE 525, or CSE 531
 - ii. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
 - iii. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
 - iv. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
 - v. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
 - vi. Non-CSE: GENOME 540; HCDE 544 or INSC 570. Non-CSE courses do not belong in any of the five areas above.
 - c. Independent project completed under supervision of a primary and a secondary faculty adviser – written summary and oral presentation
2. General examination
3. Minimum 40 credits of coursework numbered 500 or above. 45 credits in courses chosen from the computer science course list. At least two CSE courses numbered 500 or above (or approved courses in related disciplines) taken for graded credit in addition to courses taken to satisfy the breadth component of the qualifying evaluation. Coursework taken toward the MS degree is applicable toward the PhD degree.
4. Two quarters of teaching assistantship within the department
5. Dissertation: at least 27 credits of CSE 800. Oral examination

Assistantships

Research and teaching assistantships are based on scholastic excellence and potential. All students accepted are awarded three years of funding. Students applying for assistantships starting in autumn quarter should complete applications to the Graduate School and the department by December 15.

Course Descriptions

Computer Science and Engineering

CSE 120 Computer Science Principles (5) NW, QSR Introduces fundamental concepts of computer science and computational thinking. Includes logical reasoning, problem solving, data representation, abstraction, the creation of digital artifacts such as web pages and programs, managing complexity, operation of computers and networks, effective web searching, ethical, legal and social aspects of information technology. May not be taken for credit if credit earned in CSE 100/INFO 100.

CSE 131 Science and Art of Digital Photography (4) VLPA *Hemingway* Covers the fundamentals of digital photography, including computational imaging; the elements of photographic composition and design; and the future of internet-enabled photography.

CSE 142 Computer Programming I (4) NW, QSR Basic programming-in-the-small abilities and concepts including procedural programming (methods, parameters, return, values), basic control structures (sequence, if/else, for loop, while loop), file processing, arrays, and an introduction to defining objects. Intended for students without prior programming experience. Offered: AWSpS.

CSE 143 Computer Programming II (5) NW, QSR Continuation of CSE 142. Concepts of data abstraction and encapsulation including stacks, queues, linked lists, binary trees, recursion, instruction to complexity and use of predefined collection classes. Prerequisite: CSE 142. Offered: AWSpS.

CSE 154 Web Programming (5) QSR Covers languages, tools, and techniques for developing interactive and dynamic web pages. Topics include page styling, design, and layout; client and server side scripting; web security; and interacting with data sources such as databases. Prerequisite: minimum grade of 2.0 in either CSE 142, CSE 143, or CSE 160.

CSE 160 Data Programming (4) NW, QSR Introduction to computer programming. Assignments solve real data manipulation tasks from science, engineering, business, and the humanities. Concepts of computational thinking, problem-solving, data analysis, Python programming, control and data abstraction, file processing, and data visualization. Intended for students without prior programming experience. No credit if CSE 143 has been taken.

CSE 163 Intermediate Data Programming (4) Intermediate data programming. Topics include writing programs that manipulate different types of data; leveraging the growing ecosystem of tools and libraries for data programming; writing programs that are both efficient and elegant; and writing medium-scale programs (100 to 200 lines). Prerequisite: CSE 142 or CSE 160.

CSE 180 Introduction to Data Science (4) QSR Survey course introducing the essential elements of data science: data collection, management, curation, and cleaning; summarizing and visualizing data; basic ideas of statistical inference, machine learning. Students will gain hands-on experience through computing labs. Prerequisite: Either a minimum grade of 2.5 in MATH

098, a minimum grade of 3.0 in MATH 103, a score of 151-169 on the MPT-GS placement test, or score of 145-153 on the MPT-AS placement test.

CSE 190 Current Topics in Computer Science and Engineering (1-5, max. 15)

CSE 301 CSE Internship Education (1-2, max. 12) CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to CSE Internship Program or by special permission of the Department. Offered credit/no credit only. Credit/no-credit only. Offered: AWSpS.

CSE 311 Foundations of Computing I (4) QSR Examines fundamentals of logic, set theory, induction, and algebraic structures with applications to computing; finite state machines; and limits of computability. Prerequisite: CSE 143; either MATH 126 or MATH 136.

CSE 312 Foundations of Computing II (4) QSR Examines fundamentals of enumeration and discrete probability; applications of randomness to computing; polynomial-time versus NP; and NP-completeness. Prerequisite: CSE 311.

CSE 331 Software Design and Implementation (4) Explores concepts and techniques for design and construction of reliable and maintainable software systems in modern high-level languages: specifications; program structure and design; program-correctness approaches, including testing; and event-driven programming (e.g., graphical user interface). Prerequisite: CSE 143

CSE 332 Data Structures and Parallelism (4) Covers abstract data types and structures including dictionaries, balanced trees, hash tables, priority queues, and graphs; sorting; asymptotic analysis; fundamental graph algorithms including graph search, shortest path, and minimum spanning trees; multithreading and parallel algorithms; P and NP complexity classes. No credit if CSE 373 has been taken. Prerequisite: CSE 311.

CSE 333 Systems Programming (4) Includes substantial programming experience in languages that expose machine characteristics and low-level data representation (e.g., C and C++); explicit memory management; modern libraries and language features; interacting with operating-system services; introduction to concurrent programming. Prerequisite: CSE 351.

CSE 341 Programming Languages (4) Basic concepts of programming languages, including abstraction mechanisms, static and dynamic typing, scope, syntax vs. semantics, first-class function closures, and algebraic datatypes. Detailed study of functional programming and other paradigms. No credit if CSE 413 has been taken. Prerequisite: CSE 143.

CSE 344 Introduction to Data Management (4) Introduces database management systems and writing applications that use such systems; data models (e.g., relational, semi-structured), query languages (e.g., SQL, XQuery), language bindings, conceptual modeling, transactions, security, database tuning, data warehousing, parallelism, and web-data management. Prerequisite: CSE 311.

CSE 351 The Hardware/Software Interface (4) Examines key computational abstraction levels below modern high-level languages; number representation, assembly language, introduction to C, memory management, the operating-system process model, high-level machine architecture including the memory hierarchy, and how high-level languages are implemented. Prerequisite: CSE 143.

CSE 352 Hardware Design and Implementation (4) Covers digital circuit design, processor design, and systems integration and embedded-systems issues. Includes substantial hardware laboratory. Prerequisite: CSE 311; CSE 351.

CSE 369 Introduction to Digital Design (2) Introduces the implementation, specification, and simulation of digital logic. Boolean algebra; combinational circuits including arithmetic circuits and regular structures; sequential circuits including finite-state-machines; and use of field-programmable gate arrays (FPGAs). Emphasizes simulation, high-level specification, and automatic synthesis techniques. No credit if EE 271 has been taken. Prerequisite: CSE 311.

CSE 371 Design of Digital Circuits and Systems (5) Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with E E 371.

CSE 373 Data Structures and Algorithms (4) Fundamental algorithms and data structures for implementation. Techniques for solving problems by programming. Linked lists, stacks, queues, directed graphs. Trees: representations, traversals. Searching (hashing, binary search trees, multiway trees). Garbage collection, memory management. Internal and external sorting. Intended for non-majors. Not open for credit to students who have completed CSE 332. Prerequisite: CSE 143.

CSE 374 Intermediate Programming Concepts and Tools (3) Covers key software development concepts and tools not in introductory courses. Concepts of lower-level programming (C/C++) and explicit memory management; techniques and tools for individual and group software development; design, implementation, and testing strategies. Intended for non-majors. Cannot be taken for credit if credit received for CSE 333. Prerequisite: CSE 143.

CSE 390 Special Topics in Computer Science and Engineering (1-5, max. 10) Covers topics of current interest in computer science and engineering.

CSE 391 System and Software Tools (1) Introduction to tools commonly used in software development. Topics include using a command-line interface, writing scripts for file and string manipulation, managing user permissions, manipulating text with regular expressions, using build-management tools, and using version-control systems. Prerequisite: CSE 143. Credit/no-credit only.

CSE 399 CSE Foreign Study (*) Upper-division computer science or computer engineering course, taken through an approved study abroad program, for which there is no direct University of Washington equivalent. Credit/no-credit only.

CSE 401 Introduction to Compiler Construction (4) Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation, and optimizations for general purpose programming languages. No credit to students who have taken CSE 413. Prerequisite: CSE 332; CSE 351.

CSE 403 Software Engineering (4) Fundamentals of software engineering using a group project as the basic vehicle. Topics covered include the software crisis, managing complexity, requirements specification, architectural and detailed design, testing and analysis, software process, and tools and environments. Prerequisite: CSE 331; CSE 332.

CSE 410 Computer Systems (3) Structure and components of hardware and software systems. Machine organization, including central processor and input-output architectures; assembly language programming; operating systems, including process, storage, and file management. Intended for non-majors. No credit to students who have completed CSE 351 or CSE 451. Prerequisite: CSE 373.

CSE 412 Introduction to Data Visualization (4) Introduction to data visualization design and use for both data exploration and explanation. Methods for creating effective visualizations using principles from graphic design, psychology, and statistics. Topics include data models, visual encoding methods, data preparation, exploratory analysis, uncertainty, cartography, interaction techniques, visual perception, and evaluation methods. No credit if CSE 442 taken. Prerequisite: CSE 143 or CSE 163

CSE 413 Programming Languages and Their Implementation (3) Basic concepts and implementation strategies for modern functional and object-oriented programming languages such as Scheme and Java. Intended for non-majors. No credit to students who have completed CSE 341 or CSE 401. Prerequisite: CSE 373.

CSE 414 Introduction to Database Systems (4) Introduces database management systems and writing applications that use such systems; data models, query languages, transactions, database tuning, data warehousing, and parallelism. Intended for non-majors. Not open for credit to students who have completed CSE 344. Prerequisite: minimum grade of 2.5 in CSE 143.

CSE 415 Introduction to Artificial Intelligence (3) NW Principles and programming techniques of artificial intelligence: LISP, symbol manipulation, knowledge representation, logical and probabilistic reasoning, learning, language understanding, vision, expert systems, and social issues. Intended for non-majors. Not open for credit to students who have completed CSE 473. Prerequisite: CSE 373.

CSE 416 Introduction to Machine Learning (4) NW Provides practical introduction to machines learning. Modules include regression, classification, clustering, retrieval, recommender systems, and deep learning, with a focus on an intuitive understanding grounded in real-world

applications. Intelligent applications are designed and used to make predictions on large, complex datasets. Prerequisite: CSE 143 or CSE 160; and STAT 311, STAT 390/MATH 390, or STAT 391 Offered: jointly with STAT 416.

CSE 417 Algorithms and Computational Complexity (3) Design and analysis of algorithms and data structures. Efficient algorithms for manipulating graphs and strings. Fast Fourier Transform. Models of computation, including Turing machines. Time and space complexity. NP-complete problems and undecidable problems. Intended for non-majors. Prerequisite: CSE 373.

CSE 421 Introduction to Algorithms (3) Techniques for design of efficient algorithms. Methods for showing lower bounds on computational complexity. Particular algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Prerequisite: CSE 312; CSE 332.

CSE 427 Computational Biology (3) Algorithmic and analytic techniques underlying analysis of large-scale biological data sets such as DNA, RNA, and protein sequences or structures, expression and proteomic profiling. Hands-on experience with databases, analysis tools, and genome markers. Applications such as sequence alignment, BLAST, phylogenetics, and Markov models. Prerequisite: CSE 312; CSE 332.

CSE 428 Computational Biology Capstone (5) Designs and implements a software tool or software analysis for an important problem in computational molecular biology. Prerequisite: CSE 312; CSE 331; CSE 332.

CSE 431 Introduction to Theory of Computation (3) Models of computation, computable and noncomputable functions, space and time complexity, tractable and intractable functions. Prerequisite: CSE 312.

CSE 440 Introduction to HCI: User Interface Design, Prototyping, and Evaluation (5) Human-Computer Interaction (HCI) theory and techniques. Methods for designing, prototyping, and evaluating user interfaces to computing applications. Human capabilities, interface technology, interface design methods, and interface evaluation tools and techniques. Prerequisite: CSE 332.

CSE 441 Advanced HCI: Advanced User Interface Design, Prototyping, and Evaluation (5) Human-Computer Interaction (HCI) theory and techniques. Advanced methods for designing, prototyping, and evaluating user interfaces to computing applications. Novel interface technology, advanced interface design methods, and prototyping tools. Prerequisite: CSE 440.

CSE 442 Data Visualization (4) Techniques for creating effective visualizations of data based on principles from graphic design, perceptual psychology, and statistics. Topics include visual encoding models, exploratory data analysis, visualization software, interaction techniques, graphical perception, color, animation, high-dimensional data, cartography, network visualization, and text visualization. Prerequisite: CSE 332.

CSE 444 Database Systems Internals (4) The relational data model and the SQL query language. Conceptual modeling: entity/relationships, normal forms. XML, XPath, and XQuery. Transactions: recovery and concurrency control. Implementation of a database system. A medium sized project using a rational database backend. Prerequisite: CSE 332; CSE 344.

CSE 446 Machine Learning (4) Methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling: decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: CSE 332; either STAT 390, STAT 391, or CSE 312.

CSE 447 Natural Language Processing (4) Methods for designing systems that usefully and/or intelligently process natural language text data. Language models, text categorization, syntactic and semantic analysis, machine translation. This course emphasizes algorithms and data-driven methods. Prerequisite: CSE 312 and CSE 332; recommended: MATH 308 ; CSE 446 is recommended before or concurrently.

CSE 450 Animation Production Seminar (1) Open to all students who have an interest in digital animation. Reviews and analyzes films, animated feature films, and television commercials. Emphasizes the technical and aesthetic basics of animation production in industry studio environments.

CSE 451 Introduction to Operating Systems (4) Principles of operating systems. Process management, memory management, auxiliary storage management, resource allocation. No credit to students who have completed CSE 410. Prerequisite: CSE 351; CSE 332; CSE 333.

CSE 452 Introduction to Distributed Systems (4) Covers abstractions and implementation techniques in the construction of distributed systems, including cloud computing, distributed storage systems, and distributed caches. Prerequisite: CSE 451.

CSE 454 Advanced Internet and Web Services (5) Design of Internet search engines, including spider architecture, inverted indices, frequency rankings, latent semantic indexing, hyperlink analysis, and refinement interfaces. Construction of scalable and secure web services. Datamining webserver logs to provide personalized and user-targeted services. Large project. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

CSE 455 Computer Vision (4) Introduction to image analysis and interpreting the 3D world from image data. Topics may include segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: CSE 333; CSE 332.

CSE 456 Story Design for Computer Animation (4) Animation principles and production for story development and design. Design, development, and production of several storyreels, which are a tool for the pre-production of animated features and shorts. Student use authoring tools to present finished work.

CSE 457 Computer Graphics (4) Introduction to computer image synthesis, modeling, and animation. Topics may include visual perception, displays and framebuffers, image processing, affine and projective transformations, hierarchical modeling, hidden surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, character animation, and animation principles. Prerequisite: CSE 333; CSE 332.

CSE 458 Computer Animation (5) Introduction to basic principles of computer generated animation. Focus on the modeling and lighting of animated characters. Students from art, CSE, and music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: CSE 457.

CSE 459 Pre-Production for Collaborative Animation (5) Pre-production of collaboratively designed animated shorts. In-depth analysis of classical and computer generated works. Character design and pre-planning, model sheets, character rigging, storyreel and animatics, character motion, design for multiple characters, and principles of animation as applied to character motion and effects. Prerequisite: CSE 458.

CSE 460 Animation Capstone (5) Apply the knowledge gained in previous animation courses to produce a short animated film. Topics include scene planning, digital cinematography, creature and hard surface modeling, animatics and basics of character animation, and rendering techniques. Prerequisite: CSE 458, CSE 459.

CSE 461 Introduction to Computer-Communication Networks (4) Computer network architectures, protocol layers, network programming. Transmission media, encoding systems, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: either CSE 326 or CSE 332; either CSE 303 or CSE 333.

CSE 464 Advanced Topics in Digital Animation (1-5, max. 10) Students design individual animated works for professional quality demo reels. 2- and 3-D animatics, special effects design, advanced character animation techniques, 3-D paint techniques and integration, short design, sequence planning, non-photorealistic rendering options, interactive animation for pre-planning, and advanced production techniques and strategies.

CSE 467 Advanced Digital Design (4) Advanced techniques in the design of digital systems. Hardware description languages, combinational and sequential logic synthesis and optimization methods, partitioning, mapping to regular structures. Emphasis on reconfigurable logic as an implementation medium. Memory system design. Digital communication including serial/parallel and synchronous/asynchronous methods. Prerequisite: CSE 352; CSE 332.

CSE 469 Computer Architecture I (5) Introduction to computer architecture. Assembly and machine language, microprocessor organization including control and datapath. Computer arithmetic. Memory systems and caching. Performance modeling of microprocessors. Prerequisite: either E E 271 or CSE 369; CSE 143 Offered: jointly with E E 469; AWSp.

CSE 470 Computer Architecture II (4) Advanced computer architecture. Performance evaluation and energy efficiency. Instruction set architectures. Instruction-level parallelism. Modern microprocessor micro-architecture. Thread-level parallelism. Cache coherency and memory consistency in shared-memory multiprocessors. Memory hierarchy. GPU architecture. Warehouse-scale computing. Trends in computer design. Prerequisite: CSE 351; either CSE 469, E E 469, or E E 471. Offered: jointly with E E 470.

CSE 472 Introduction to Computational Linguistics (5) VLPA/NW E. BENDER Introduction to computational approaches to modeling language, for linguistic research and practical applications, including analyses at different levels of linguistic structure and symbolic as well as statistical approaches. Prerequisite: either LING 200 or LING 400; either LING 461 or CSE 311. Offered: jointly with LING 472.

CSE 473 Introduction to Artificial Intelligence (3) Principal ideas and developments in artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Not open for credit to students who have completed CSE 415. Prerequisite: CSE 332.

CSE 474 Introduction to Embedded Systems (4) Introduces the specification, design, development, and test of real time embedded system software. Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with E E 474; AWSpS.

CSE 475 Embedded Systems Capstone (5) Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with E E 475; AWSp.

CSE 481 Capstone Software Design (5, max. 15) Student teams design and implement a software project involving multiple areas of the CSE curriculum. Course emphasizes the development process, rather than the product. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

CSE 482 Capstone Software Design to Empower Underserved Populations (5, max. 15) DIV Students work in teams to design and implement a software project involving multiple areas of the CSE curriculum, for the purpose of empowering marginalized or underserved populations. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

CSE 484 Computer Security (4) Foundations of modern computer security, including software security, operating system security, network security, applied cryptography, human factors, authentication, anonymity, and web security. Prerequisite: CSE 332; CSE 351.

CSE 486 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for

synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136, MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 423/E E 423; A.

CSE 487 Advanced Systems and Synthetic Biology (3) *H. Kueh* Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/E E 424; Sp.

CSE 488 Laboratory Methods in Synthetic Biology (4) Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/E E 425; W.

CSE 490 Special Topics in Computer Science and Engineering (1-5, max. 15) Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses.

CSE 491 Data Science and Society Seminar (1) Current topics related to the societal implications of data science. Topic selection will vary from quarter to quarter and may include data privacy and security, data anonymization, hypothesis-testing on a shared database, impact of data science-based decisions on society. Includes both guest speakers and case-study or article-based discussions. Credit/no-credit only. Credit/no-credit only.

CSE 495 Project Practicum ([1-5]-, max. 5) Available in special situations for computer science majors to compete, under instructor guidance, a substantial computing project that deepens one's knowledge and experience in the field. Projects may involve a group of students.

CSE 497 Undergraduate Research Seminar (1) Students prepare and give a public talk on their faculty-sponsored research projects.

CSE 498 Senior Project ([1-9]-, max. 9) A report (and perhaps demonstration) describing a development, survey, or small research project in computer science or an application to another field. Objectives: (1) integrating material from several courses, (2) introducing the professional literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work.

CSE 499 Reading and Research (1-24, max. 24) Available in special situations for advanced computer science majors to do reading and research in field, subject to approval of undergraduate adviser and CSE faculty member. Free elective, but does not replace core course or computer science elective. Credit/no-credit only.

CSE 501 Programming Language Analysis and Implementation (4) Design and implementation of compilers and run-time systems for imperative, object-oriented, and functional languages. Intra- and interprocedural analyses and optimizations. Prerequisite: CSE 341.

CSE 503 Software Engineering (4) Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications.

CSE 504 Advanced Topics in Software Engineering (4) Topics vary but may include software design and evolution, formal methods, requirements specifications, software and system safety, reverse engineering, real-time software, metrics and measurement, programming environments, and verification and validation.

CSE 505 Principles of Programming Languages (4) Design and formal semantics of modern programming languages, includes functional and object-oriented languages. Prerequisite: CSE 341.

CSE 506 Advanced Topics in Programming Languages (4) May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combinators, parallelism, various optimization techniques. Implementation project required. Prerequisite: CSE 501 which may be taken concurrently, and CSE 505.

CSE 507 Computer-Aided Reasoning for Software (4) Covers theory, implementation, and applications of automated reasoning techniques, such as satisfiability solving, theorem proving, model checking, and abstract interpretation. Topics include concepts from mathematical logic and applications of automated reasoning to the design, construction, and analysis of software.

CSE 510 Advanced Topics in Human-Computer Interaction (4) Content varies, including interface issues for networks, embedded systems, education applications, safety and critical systems, graphics and virtual reality, databases, and computer-supported cooperative work.

CSE 512 Data Visualization (4) Covers techniques and algorithms for creating effective visualizations based on principles from graphic design, visual art, perceptual psychology, and cognitive science. Topics include data and image models; visual encoding; graphical perception; color; animation; interaction techniques; graph layout; and automated design. Lectures, reading, and project.

CSE 515 Statistical Methods in Computer Science (4) Introduction to the probabilistic and statistical techniques used in modern computer systems. Graphical models, probabilistic inference, statistical learning, sequential models, decision theory. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.

CSE 517 Natural Language Processing (4) Overview of modern approaches for natural language processing. Topics include language models, text, classification, tagging, parsing, machine translation, semantic, and discourse analysis.

CSE 519 Current Research in Computer Science (1, max. 18) Weekly presentations on current research activities by members of the department. Only computer science graduate students may register, although others are encouraged to attend. Credit/no-credit only.

CSE 520 Computer Science Colloquium (1, max. 18) Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no-credit only.

CSE 521 Design and Analysis of Algorithms I (4) Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, network flow, linear programming. Correctness and analysis of algorithms. NP-completeness. Prerequisite: either CSE 332 or equivalent.

CSE 522 Design and Analysis of Algorithms II (4) Analysis of algorithms more sophisticated than those treated in CSE 521. Content varies and may include such topics as algebraic algorithms, combinatorial algorithms, techniques for proving lower bounds on complexity, and algorithms for special computing devices such as networks or formulas. Prerequisite: CSE 521.

CSE 523 Computational Geometry (4) Algorithms for discrete computational geometry. Geometric computation, range searching, convex hulls, proximity, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisite: CSE 521.

CSE 524 Parallel Algorithms (4) Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems, and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and on limitations to their efficacy. Prerequisite: CSE 521.

CSE 525 Randomized Algorithms and Probabilistic Analysis (4) Examines algorithmic techniques: random selection, random sampling, backwards analysis, algebraic methods, Monte Carlo methods, and randomized rounding; random graphs; the probabilistic method; Markov chains and random walks; and analysis tools: random variables, moments and deviations, Chernoff bounds, martingales, and balls in bins. Prerequisite: either CSE 521 or equivalent.

CSE 527 Computational Biology (4) Introduces computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, regulatory analysis. Techniques such as dynamic programming, Markov models, expectation-maximization, local search.

CSE 528 Computational Neuroscience (3) Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with NEURO 528.

CSE 529 Neural Control of Movement: A Computational Perspective (3) Systematic overview of sensorimotor function on multiple levels of analysis, with emphasis on the phenomenology amenable to computational modeling. Topics include musculoskeletal mechanics, neural networks, optimal control and Bayesian inference, learning and adaptation, internal models, and neural coding and decoding. Prerequisite: vector calculus, linear algebra, MATLAB, or permission of instructor. Offered: jointly with AMATH 533.

CSE 531 Computational Complexity I (4) Deterministic and nondeterministic time and space complexity, complexity classes, and complete problems. Time and space hierarchies. Alternation and the polynomial-time hierarchy. Circuit complexity. Probabilistic computation. Exponential complexity lower bounds. Interactive proofs. Prerequisite: either CSE 311 or equivalent.

CSE 532 Computational Complexity II (4) Advanced computational complexity including several of the following: circuit complexity lower bounds, $\#P$ and counting classes, probabilistically-checkable proofs, de-randomization, logical characteristics of complexity, communication complexity, time-space tradeoffs, complexity of data structures.

CSE 533 Advanced Topics in Complexity Theory (4) An in-depth study of advanced topics in computational complexity.

CSE 544 Principles of Database Systems (4) Data models and query languages (SQL, datalog, OQL). Relational databases, enforcement of integrity constraints. Object-oriented databases and object-relational databases. Principles of data storage and indexing. Query-execution methods and query optimization algorithms. Static analysis of queries and rewriting of queries using views. Data integration. Data mining. Principles of transaction processing.

CSE 546 Machine Learning (4) Explores methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling; decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.

CSE 547 Machine Learning for Big Data (4) Covers machine learning and statistical techniques for analyzing datasets of massive size and dimensionality. Representations include regularized linear models, graphical models, matrix factorization, sparsity, clustering, and latent factor models. Algorithms include sketching, random projections, hashing, fast nearest-neighbors, large-scale online learning, and parallel learning (Map-Reduce, GraphLab). Prerequisite: either STAT 535 or CSE 546. Instructors: Fox, Guestrin Offered: jointly with STAT 548; W.

CSE 548 Computer Systems Architecture (4) Notations for computer systems. Processor design (single chip, look-ahead, pipelined, data flow). Memory hierarchy organization and management (virtual memory and caches). Microprogramming. I/O processing. Multiprocessors (SIMD and MIMD). Prerequisite: CSE 451.

CSE 549 High-Performance Computer Architectures (4) Algorithm design, software techniques, computer organizations for high-performance computing systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, interconnection networks, reconfigurable systems, memory hierarchies in multiprocessors, algorithmically specialized processors, data flow architectures. Prerequisite: CSE 548 or permission of instructor.

CSE 550 Computer Systems (4) Explores computer system design, implementation, and evaluation. Covers principles, techniques, and examples related to the construction of computer systems, including concepts that span network systems, operating systems, web servers, parallel computing, and databases. Prerequisite: CSE 451.

CSE 551 Operating Systems (4) Operating system design and construction techniques. Concurrent programming, operating system kernels, correctness, deadlock, protection, transaction processing, design methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisite: CSE 451.

CSE 552 Distributed and Parallel Systems (4) Principles, techniques, and examples related to the design, implementation, and analysis of distributed and parallel computer systems. Prerequisite: CSE 551.

CSE 553 Real-Time Systems (4) Design and construction of software for real-time computer systems. Software architectures. Requirements and specification methods. Scheduling algorithms and timing analysis. Real-time operating systems. Real-time programming languages. Selected case studies. Prerequisite: CSE 451.

CSE 557 Computer Graphics (4) Introduction to image synthesis and computer modeling, emphasizing the underlying theory required for undertaking computer graphics research. Topics include color theory, image processing, affine and projective geometry, hidden-surface determination, photorealistic image synthesis, advanced curve and surface design, dynamics, realistic character animation. Prerequisite: solid knowledge of linear algebra.

CSE 558 Special Topics in Computer Graphics (4) Advanced topics in computer graphics not treated in CSE 557. Topics vary from year to year but typically include advanced aspects of image synthesis, animation, and 3D photography. Prerequisite: CSE 557 or permission of instructor.

CSE 561 Computer Communication and Networks (4) Fundamentals of data transmission: coding, message formats, and protocols. Organization of computer networks. Examples of network implementations. Prerequisite: either CSE 451 or equivalent.

CSE 564 Computer Security and Privacy (4) Examines the fundamentals of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.

CSE 567 Principles of Digital Systems Design (4) Principles of logic design, combinational and sequential circuits, minimization techniques, structured design methods, CMOS technology, complementary and ratioed gates, delay estimation and performance analysis, arithmetic circuits, memories, clocking methodologies, synthesis and simulation tools, VLSI processor architecture. Prerequisite: basic knowledge of logic design.

CSE 568 Introduction to VLSI Systems (4) Introduction to CMOS technology and circuit design; combinational logic-design alternatives; register-design and system-clocking methodologies; datapath and subsystem design; VLSI system-design methodologies; CAD tools for synthesis, layout, simulation, and validation; design of a complex VLSI chip. Prerequisite: either CSE 567 or permission of instructor.

CSE 571 AI-based Mobile Robotics (4) Overview of mobile robot control and sensing. Behavior-based control, world modeling, localization, navigation, and planning Probabilistic sensor interpretation, Bayes filters, particle filters. Projects: Program real robots to perform navigation tasks. Prerequisite: either CSE 473 or permission of instructor.

CSE 573 Artificial Intelligence I (4) Intensive introduction to artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Prerequisite: either CSE 421 or equivalent; exposure to logic, probability, and statistics.

CSE 574 Artificial Intelligence II (4) Advanced topics in artificial intelligence. Subjects include planning, natural language understanding, qualitative physics, machine learning, and formal models of time and action. Students are required to do projects. Prerequisite: CSE 573.

CSE 576 Computer Vision (3) Principles and methods for interpreting the three-dimensional world from images. Topics include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: solid knowledge of linear algebra; good programming skills. Offered: jointly with E E 576.

CSE 577 Special Topics in Computer Vision (3) Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/E E 576. Offered: jointly with E E 577.

CSE 578 Convex Optimization (4) Basics of convex analysis: Convex sets, functions, and optimization problems. Optimization theory: Least-squares, linear, quadratic, geometric and semidefinite programming. Convex modeling. Duality theory. Optimality and KKT conditions. Applications in signal processing, statistics, machine learning, control communications, and design of engineering systems. Prerequisite: A A 510, CHEM E 510, E E 510, or M E 510. Offered: jointly with A A 578/E E 578/M E 578; W.

CSE 579 Intelligent Control through Learning and Optimization (3) Design or near-optimal controllers for complex dynamical systems, using analytical techniques, machine learning, and optimization. Topics from deterministic and stochastic optimal control, reinforcement learning

and dynamic programming, numerical optimization in the context of control, and robotics. Prerequisite: vector calculus; linear algebra; MATLAB. Offered: jointly with AMATH 571.

CSE 583 Software Development for Data Scientists (4) Provides students outside of CSE with a practical knowledge of software development that is sufficient to do graduate work in their discipline. Modules include Python basics, software version control, software design, and using Python for machine learning and visualization.

CSE 586 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/E E 523/MOLENG 525.

CSE 587 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with BIOEN 524/E E 524; Sp.

CSE 590 Research Seminar (*, max. 50) Several offerings each quarter, on topics of current interest.

CSE 591 Group Projects in Computer Science (1-3, max. 25) Focuses on specialized topics and research activities in computer science.

CSE 599 Special Topics in Computer Science (1-5, max. 30) Studies of emerging areas and specialized topics in computer science.

CSE 600 Independent Study or Research (*-) Credit/no-credit only.

CSE 601 Internship (1-2, max. 12) CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to CSE Internship Program or by special permission of the Department. Credit/no-credit only. Offered: AWSpS.

CSE 700 Master's Thesis (*-) Credit/no-credit only.

CSE 800 Doctoral Dissertation (*-) Credit/no-credit only.

Accelerated Masters Program

CSE M 501 Introduction to Compiler Construction (4) Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation,

and optimizations for general purpose programming languages. Cannot be taken for credit if credit received for CSE 401. Prerequisite: CSE 332; CSE 351.

CSE M 544 Database Systems (4) Relational data model and SQL query language. Conceptual modeling; normal forms; XML. Transactions: recovery and concurrency control. Implementation of a database system. Application project using a relational database system. Study of database research papers. May not be taken for credit if student has taken CSE 444. Prerequisite: CSE 332; CSE 344.

CSE M 547 Natural Language Processing (4) Methods for designing systems that usefully and/or intelligently process natural language text data. Language models, text categorization, syntactic and semantic analysis, machine translation. Emphasizes algorithms and data-driven methods. Prerequisite: CSE 312 and CSE 332. Cannot be taken for credit if credit received for CSE 447; recommended: MATH 308 ; CSE 446 is recommended before or concurrently.

CSE M 552 Introduction to Distributed Systems (4) Covers abstractions and implementation techniques in the construction of distributed systems, including cloud computing, distributed storage systems, and distributed caches. Prerequisite: CSE 451

CSE M 584 Computer Security (4) Explores foundations and new directions in computer security and privacy, including: risk analysis, system security, applied cryptography, human-computer interaction, design and implementation issues, anonymity, web security, and side channels. Studies security and privacy research papers. Prerequisite: CSE 351; either CSE 451 or CSE 461.

Data Science

CSE D 514 Data Management for Data Science (5) Introduces database management systems and techniques that use such systems; data models, query languages, database tuning and optimization, data warehousing, and parallel processing. Intended for professional students and non-CSE-majors. Offered: jointly with DATA 514.

CSE D 515 Software Design for Data Science (5) Introduces software design and engineering practices and concepts, including version control, testing, and automatic build management. Intended for professional students and non-CSE-majors. Prerequisite: CSE D/DATA 514 or permission of instructor. Offered: jointly with DATA 515; Sp.

CSE D 516 Scalable Data Systems and Algorithms (5) Principles and algorithms for data management and analysis at scale. Designs of traditional and modern big data systems and how to use those systems. Basics of cloud computing. Prerequisite: CSE D/DATA 514 and CSE D/DATA 515 or permission of instructor. Offered: jointly with DATA 516; A.

Professional Masters Program

CSE P 501 Compiler Construction (4) Principles and practice of building efficient implementations of modern programming languages. Lexical, syntactic, and semantic analysis of

programs. Intermediate program representations. Intra- and interprocedural analysis and optimization. Run-time system techniques. Related programming environment facilities such as source-level debuggers and profilers.

CSE P 503 Principles of Software Engineering (4) Study of major developments in software engineering over the past three decades. Topics may include design (information hiding, layering, open implementations), requirements specification (informal and formal approaches), quality assurance (testing, verification and analysis, inspections), reverse and re-engineering (tools, models, approaches).

CSE P 504 Advanced Topics in Software Systems (4) Topics include software architecture, software tools, programming language analysis, type systems, formal reasoning, and other pertinent topics in software engineering and programming languages research.

CSE P 505 Programming Languages (4) A study of non-imperative programming paradigms such as functional, object-oriented, logic, and constraint programming. Programming language semantics and type theory.

CSE P 510 Human Computer Interaction (4) Topics in human-computer interaction, including tools and skills for user interface design, user interface software architecture, rapid prototyping and iterative design, safety and critical systems, evaluation techniques, and computer supported cooperative work.

CSE P 517 Natural Language Processing (4) Provides an overview of modern approaches for natural language processing. Topics include language models, text classification, tagging, parsing, machine translation, semantics, and discourse analysis.

CSE P 521 Applied Algorithms (4) Principles of design of efficient algorithms with emphasis on algorithms with real world applications. Examples drawn from computational geometry, biology, scientific computation, image processing, combinatorial optimization, cryptography, and operations research.

CSE P 524 Parallel Computation (4) Survey of parallel computing including the processing modes of pipelining, data parallelism, thread parallelism, and task parallelism; algorithmic implications of memory models; shared memory and message passing; hardware implementations; bandwidth and latency; synchronization, consistency, interprocessor communication; programming issues including implicit and explicit parallelism, locality, portability.

CSE P 527 Computational Biology (4) Introduction to the use of computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenic inference, motif discovery, expression analysis, and regulatory analysis. Techniques such as dynamic programming, Markov models, MCMC, expectation-maximization, and local search.

CSE P 531 Computability and Complexity Theory (4) Survey of the theory of computation including Turing Machines, Church's Thesis, computability, incompleteness, undecidability, complexity classes, problem reductions, Cook's theorem, NP-completeness, randomized computation, cryptography, parallel computation, and space complexity. Some emphasis placed on historical and philosophical aspects of the theory of computation.

CSE P 544 Database Management System (4) Introduction to the principles of database management systems. Topics include database system architecture, data models, theory of database design, query optimization, concurrency control, crash recovery, and storage strategies.

CSE P 545 Transaction Processing (4) Technology supporting reliable large-scale distributed computing, including transaction programming models, TP monitors, transactional communications, persistent queuing, software fault tolerance, concurrency control and recovery algorithms, distributed transactions, two-phase commit, data replication.

CSE P 546 Machine Learning (4) Methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling; decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering.

CSE P 548 Computer Architecture (4) Architecture of the single-chip microprocessor: instruction set design and processor implementation (pipelining, multiple issue, speculative execution). Memory hierarchy: on-chip and off-chip caches, TLBs and their management, virtual memory from the hardware viewpoint. I/O devices and control: buses, disks, and RAID's.

CSE P 551 Computer Operating Systems (4) A study of developments in operating systems from the 1960s to the present. Topics include operating system structure, protection, virtual memory, communication mechanisms, concurrency, lightweight threads, object-oriented systems, distributed systems, and transaction support in operating systems.

CSE P 552 Distributed Systems (4) Principles, techniques, and examples related to the design, implementation, and analysis of distributed computer systems.

CSE P 557 Current Trends in Computer Graphics (4) Introduction to computer image synthesis, modeling, and animation emphasizing the state-of-the-art algorithm applications. Topics may include visual perception, image processing, geometric transformations, hierarchical modeling, hidden-surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, realistic character animation, and traditional animation principles.

CSE P 561 Network Systems (4) Current choices and challenges in network systems. Fundamental concepts combined with emphasis on evaluation of design/operations alternatives. Topics include alternative link, network, and transport-layer technologies, topologies, routing, congestion control multimedia, IPv6, ATM v. IP, network management and policy issues.

CSE P 564 Computer Security and Privacy (4) Examines the fundamental of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.

CSE P 567 Design and Implementation of Digital Systems (4) Overview of current implementation technologies for digital systems including custom integrated circuits, field-programmable logic, and embedded processors. Systems components such as buses and communications structures, interfaces, memory architectures, embedded systems, and application-specific devices. Focus on the design of large systems using modern CAD tools.

CSE P 573 Applications of Artificial Intelligence (4) Introduction to the use of Artificial Intelligence tools and techniques in industrial and company settings. Topics include foundations (search, knowledge representation) and tools such as expert systems, natural language interfaces, and machine learning techniques.

CSE P 576 Computer Vision (4) Provides an overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, pre-attentive image processing, boundary and region representations, and case studies of vision architectures.

CSE P 590 Special Topics in Computer Science (1-4, max. 20)

CSE P 595 Software Entrepreneurship (4) Provides an overview of the major elements of entrepreneurial activity in software, including market identification and analysis, evaluation and planning of the business, financing, typical operating and administrative problems, and alternatives for growth or sale.

CSE P 596 Business Basics Computer Science Professionals (4) Business principles relevant to the software industry in four areas: competitive strategy, finance, accounting, and human resources. Organized as a series of case studies and lectures. Progresses from an emphasis on tools to a more high-level look at competitive dynamics in high-tech industries.

CSE P 600 Independent Study or Research ([1-4]-)

Electrical Engineering

Department Overview

AE100R Paul Allen Center

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Dramatic advances in personal communication services, digital imaging, and network hardware and software are changing the texture of everyday life for an increasing portion of the world's population.

Undergraduate Program

Adviser AE 100R Paul Allen Center

206-543-2142

undergrad@ee.washington.edu

The Department of Electrical Engineering offers the following programs of study:

- The Bachelor of Science in Electrical Engineering degree
- The Bachelor of Science in Electrical Engineering degree with an option in nanoscience and molecular engineering

Bachelor of Science in Electrical Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; CHEM 142; English composition; PHYS 121 (and beyond if possible). Students should start in mathematics courses right away and follow with physics, chemistry, computer programming, etc., as soon as possible. The department publishes a sample four-year plan of study for fulfilling all degree requirements, including those to be taken during the first year, online at www.engr.washington.edu/files/curr_students/docs/EE_2014.pdf.

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students.

1. Deadlines for requesting placement: July 1 and January 15
2. Course requirements: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CHEM 142; 5 credits English composition
3. Grade requirements: Minimum 2.0 grade in each course required for placement; minimum 2.50 cumulative GPA in courses required for placement

If the number of Engineering Undeclared students requesting placement into the major exceeds the department capacity for Engineering Undeclared students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; CHEM 142; PHYS 121, PHYS 122; 5 credits English composition. All courses completed prior to application deadline. In addition, MATH 307 and PHYS 123 completed with minimum grades of 2.0 prior to autumn quarter
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Nanoscience and Molecular Engineering Option (NME): Admission is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all electrical engineering prerequisites and formal admission to the BS electrical engineering major. Students who complete NME 220 with a minimum 2.0 grade are eligible. Such students indicate an interest in the NME option on their electrical engineering major application and discuss their

interests/background in the application personal statement. To declare, they see an EE undergraduate adviser.

Graduation Requirements

General Education Requirements (81 credits)

1. *Written and Oral Communication*: 12 credits, to include one 5-credit English composition course from the University list; ENGR 231; E E 393 (or department-approved alternative)
2. *Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S)* (25 credits): Minimum 10 credits required in each area.
3. *Natural World (44 credits)*:
 - a. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), and MATH 324.
 - b. *Science (20 credits)*: CHEM 142; PHYS 121, PHYS 122, PHYS 123

Major Requirements (80-81 credits)

1. *Computer Programming (9 credits)*: CSE 142, CSE 143
2. *Electrical Engineering Core (14 credits)*: E E 215, E E 233, E E 235
3. *Electrical Engineering Major Concentration Area (24 credits minimum)*
4. *Electrical Engineering Electives (up to 20 credits)*: See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
5. *Professional Issues*: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
6. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.
7. *Statistics (3-4 credits)*: Either STAT 390/MATH 390, STAT 391, MATH 394/STAT 394, or IND E 315
8. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Nanoscience and Molecular Engineering Option Requirements (80-81 credits)

1. *Computer Programming (9 credits)*: CSE 142, CSE 143
2. *Electrical Engineering Core (14 credits)*: E E 215, E E 233, E E 235
3. *Nanoscience and Molecular Engineering Courses (6 credits)*: NME 220, NME 221, NME 421

4. *Electrical Engineering Major Concentration Area (24 credits minimum)* See adviser for list of acceptable courses.
5. *Electrical Engineering Electives (up to 20 credits)*: See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
6. *Professional Issues*: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
7. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.
8. *Statistics (3-4 credits)*: Either STAT 390/MATH 390, STAT 391, MATH 394/STAT 394, or IND E 315
9. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Electives (18-19 credits)

1. *Approved Non-Electrical Engineering Electives (10 credits)*: Selected from courses listed in the departmental handbook.
2. *Free Electives (8-9 credits)*

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Graduates with a degree in electrical engineering find employment in industries such as aerospace, communications, computer manufacturing, power distribution, consumer electronics, and biomedical engineering. Positions can be found focusing on the research, design, and testing of new products; in technical sales and marketing; business consulting; and even growing areas such as intellectual property. Students who pursue graduate studies are quite successful in highly competitive national and international programs.

The BSEE program is accredited by the Accrediting Board for Engineering and Technology (ABET) and the department has adopted the following student outcomes:

- a. ability to apply knowledge of mathematics, science, and engineering
- b. ability to apply knowledge of probability and statistics, including applications appropriate to the program name and objectives
- c. ability to apply knowledge of mathematics through differential and integral calculus, basic science, and engineering sciences necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components
- d. ability to apply knowledge of advanced mathematics, typically involving differential equations, linear algebra, complex variables, and discrete mathematics
- e. ability to design and conduct experiments, as well as to analyze and interpret data
- f. ability to design a system, component, or process to meet desired needs

- g. ability to function on multi-disciplinary teams
 - h. ability to identify, formulate, and solve engineering problems
 - i. understanding of professional and ethical responsibility
 - j. ability to communicate effectively
 - k. the broad education necessary to understand the impact of engineering solutions in a global and societal context
- *Instructional and Research Facilities:* The department maintains a number of instructional and research laboratories to support courses and independent study activities. There are three general-purpose computing laboratories. Instructional laboratories include a large instrumentation laboratory supporting numerous electronics courses; individual laboratories for digital design courses; a power laboratory to support the power/energy systems classes; and laboratories that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research laboratories of their supervising faculty member.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Many electrical engineering students participate every year in internship and co-op (cooperative education) programs. [The Engineering Co-op Office](#) is one source for companies recruiting for internship and co-op students. [The Center for Career Services](#) also lists a variety of internship opportunities.
 - *Department Scholarships:* Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may obtain information from the Department of Electrical Engineering Scholarship Award Committee Chair.
 - *Student Organizations/Associations:* [The Institute of Electrical and Electronics Engineers \(IEEE\)](#), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. [Eta Kappa Nu \(HKN\)](#) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

Graduate Program

Graduate Program Coordinator
 AE100R Paul Allen Center, Box 352500

grad@ee.washington.edu

The department offers Master of Science in Electrical Engineering (MSEE) and Doctor of Philosophy (PhD). Graduate courses and research programs are offered in biosystems, circuits and network theory, computational intelligence, computer networks and distributed systems,

computer architecture, digital systems, software engineering, operating systems, microprocessors, VLSI design, control systems, electromagnetics (including optics and radio science), electronic materials (including devices and micro-electronics), energy systems (including power electronics and electric drives), signal and image processing, telecommunications, and virtual reality. Numerous interdisciplinary research opportunities exist, including projects relating to bioengineering, computer engineering, and marine acoustics. The department does extensive research in coordination with the UW's Applied Physics laboratory and Washington Technology Center.

The MSEE degree may be earned in three ways, each requiring 45 credits. (1) perform research and write a thesis; (2) pursue a one-quarter project as part of the program; (3) accumulate a suitable distribution of 45 credits of coursework.

For the PhD degree, students pass the departmental qualifying examination, pass an advanced general examination, pursue an original research problem, and report the results of that research in a dissertation that must be a contribution to knowledge. At least one year of coursework beyond the MSEE degree is usually desirable.

Master of Science in Electrical Engineering

Admission Requirements

1. GRE
2. Formal application, statement of purpose, and minimum two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often pursue graduate study in electrical engineering following some additional preparation.

For more information, visit the department's website at www.ee.washington.edu/admissions/graduate/index.html.

Degree Requirements

Two pathways

1. *Thesis option:* Best for students who wish to pursue an in-depth research experience with intended preparation for pursuing a PhD
2. *Coursework option:* For students whose main goal is to work in industry immediately upon graduation.

Requirements for both options

1. Plan of study by completed second quarter of study
2. Minimum 45 credits

3. Full time registration (10 credits) each quarter(less in summer)
4. Maximum 3 credits E E 500. (1 credit required)
5. Maximum 5 credits E E 599
6. 1 credit of E E 592 (offered autumn quarter)

Thesis Option

1. E E 700 (9-12 credits)
2. E E courses numbered 500 and above (minimum 20 credits)
3. E E 400-level courses (maximum 12 credits)
4. Non E E courses (maximum 9 credits)

Students pursue an individual problem in depth. Typical problems involve basic research or application of classroom principles to a professional problem beyond the routine practice of electrical engineering.

Coursework Option

1. E E courses numbered 500 and above (minimum 25 credits)
2. E E 400-level courses (maximum 12 credits)
3. Non E E courses (maximum 9 credits)

Students take a prearranged course load specific to each of the seven curriculum areas. A generic coursework option is also available.

Doctor of Philosophy

Admission Requirements

1. GRE
2. Formal application, statement of purpose, and minimum two reference letters.

Most applicants have baccalaureate degrees in electrical engineering, although applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics may often pursue graduate study in electrical engineering following additional preparation.

For more information, visit the department's Website at www.ee.washington.edu/admissions/graduate/index.html.

Degree Requirements

Minimum 90 credits

1. Department qualifying examination
2. Individualized course of study approved by the student's PhD Supervisory Committee
3. General examination
4. Dissertation based on original research. EE 800 (30 credits)
5. Minimum 90 credits of coursework, independent study, and dissertation (60 of which must be completed through the UW), 18 of which must be graded credits
6. Minimum 3.00 cumulative GPA

Research Groups

Facilities include research laboratories for advanced digital systems, advanced power technology, applied electromagnetics, optics, remote sensing, applied signal and image processing, mechatronics and intelligent control, modern sensors, and semiconductor technology

Financial Aid

Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.

Course Descriptions

E E 135 The Digital World of Multimedia (4) NW Introduces signal processing concepts behind multimedia creation, storage, and communication. Includes digitizing, decomposing, and modifying sounds and images; coding information for compression, errors, and security; and basics of network communication. Team-oriented labwork involves creating digital sounds and images using MATLAB, and experiments with streaming media technology.

E E 205 Introduction to Signal Conditioning (4) QSR Introduces analog circuits interfacing sensors to digital systems. /includes connection, attenuation, amplification, sampling, filtering, termination, controls, Kirchhoff's Laws, sources, resistors, op amps, capacitors, inductors, PSice, and MATLAB. Intended for non-EE majors. Prerequisite: either MATH 126 or MATH 136; PHYS 122. Offered: W.

E E 215 Fundamentals of Electrical Engineering (4) NW Introduction to electrical engineering. Basic circuit and systems concepts. Mathematical models of components. Kirchhoff's laws. Resistors, sources, capacitors, inductors, and operational amplifiers. Solution of first and second order linear differential equations associated with basic circuit forms. Prerequisite: either MATH 136, or MATH 126 and either MATH 307 or AMATH 351, either of which may be taken concurrently; PHYS 122. Offered: AWSpS.

E E 233 Circuit Theory (5) Electric circuit theory. Analysis of circuits with sinusoidal signals. Phasors, system functions, and complex frequency. Frequency response. Computer analysis of

electrical circuits. Power and energy. Two port network theory. Laboratory in basic electrical engineering topics. Prerequisite: E E 215. Offered: AWSpS.

E E 235 Continuous Time Linear Systems (5) Introduction to continuous time signal analysis. Basic signals including impulses, pulses, and unit steps. Periodic signals. Convolution of signals. Fourier series and transforms in discrete and continuous time. Computer laboratory. Prerequisite: either MATH 136, MATH 307, or AMATH 351, any of which may be taken concurrently; PHYS 122; either CSE 142 or CSE 143, either of which may be taken concurrently. Offered: AWSp.

E E 271 Digital Circuits and Systems (5) Overview of digital computer systems. Covers logic, Boolean algebra, combinational and sequential circuits and logic design; programmable logic devices; and the design and operation of digital computers, including ALU, memory, and I/O. Weekly laboratories. No credit if CSE 369 has been taken. Prerequisite: either CSE 142 or CSE 143. Offered: AWSpS.

E E 299 Introductory Topics in Electrical Engineering (1-5, max. 10) NW New and experimental approaches to basic electrical engineering. May include design and construction projects.

E E 331 Devices and Circuits I (5) Physics, characteristics, applications, analysis, and design of circuits using semiconductor diodes and field-effect transistors with an emphasis on large-signal behavior and digital logic circuits. Classroom concepts are reinforced through laboratory experiments and design exercises. Prerequisite: 1.0 in E E 233. Offered: AWSpS.

E E 332 Devices and Circuits II (5) Characteristics of bipolar transistors, large- and small-signal models for bipolar and field effect transistors, linear circuit applications, including low and high frequency analysis of differential amplifiers, current sources, gain stages and output stages, internal circuitry of op-amps, op-amp configurations, op-amp stability and compensation. Weekly laboratory. Prerequisite: 1.0 in E E 331. Offered: ASp.

E E 341 Discrete Time Linear Systems (5) Discrete time signals and systems, impulse response, convolution, Z-transforms, discrete time Fourier analysis. Computer laboratory. Prerequisite: 1.0 in E E 235. Offered: WSpS.

E E 351 Energy Systems (5) Develops understanding of modern energy systems through theory and analysis of the system and its components. Discussions of generation, transmission, and utilization are complemented by environmental and energy resources topics as well as electromechanical conversion, power electronics, electric safety, renewable energy, and electricity blackouts. Prerequisite: 1.0 in E E 233. Offered: ASp.

E E 361 Applied Electromagnetics (5) Introductory electromagnetic field theory and Maxwell's equations in integral and differential forms; uniform plane waves in linear media; boundary conditions and reflection and transmission of waves; guided waves; transmission lines and Smith chart; electrostatics. Prerequisite: 1.0 in E E 233; MATH 324; PHYS 123. Offered: AW.

E E 371 Design of Digital Circuits and Systems (5) Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with CSE 371.

E E 393 Advanced Technical Writing in Electrical Engineering (4) Develops formal technical writing skills for engineering students. Includes organization and structure of papers and reports, clear and concise technical language, choice of appropriate terminology, and an overview of common grammatical errors. Covers implementation of figures, equations, and literature citations, with specific recommendations for electrical engineers. Prerequisite: either ENGR 231 or HCDE 231. Offered: AWSp.

E E 398 Introduction to Professional Issues (1) Covers topics of interest to students planning their educational and professional path, including salaries, the value of advanced degrees, societal expectations of engineering professionals, the corporate enterprise, ethical dilemmas, patents and trade secrets, outsourcing, and the global market. Offered: AWSp.

E E 399 Special Topics in Electrical Engineering (1-5, max. 10) New and experimental approaches to current electrical engineering problems. May include design and construction projects.

E E 400 Advanced Topics in Electrical Engineering (1-5, max. 10) Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.

E E 406 Engineering Design for K-12 Outreach (3) Design process targeted toward development of relevant activities for K-12 audiences in such areas of science and engineering. Instruction in basic design process, design specification combined with an overview of relevant cognitive/social development in K-12. Prerequisite: either E E 271, E E 331, E E 341, E E 351 or E E 361.

E E 415 Computer-Aided System Analysis and Design (3) Concepts, principles, and techniques concerned with the design, testing, and application of general-purpose problem-oriented computer programs for analyzing large-scale systems.

E E 416 Random Signals for Communications and Signal Processing (4) Probability and random processes in communications. Random variables, distributions, and expectation. Statistical filter design for detection and estimation. Prerequisite: E E 341; either STAT 390 or IND E 315. Offered: A.

E E 417 Modern Wireless Communications (4) Introduction to wireless networks as an application of basic communication theorems. Examines modulation techniques for digital communications, signal space, optimum receiver design, error performance, error control coding for high reliability, multipath fading and its effects, RF link budget analysis, WiFi and Wimax systems. Prerequisite: E E 416 Offered: W.

E E 418 Network Security and Cryptography (3) Fundamental principles of cryptography and its application to network and communication security. An introduction to the fundamental tools in cryptography and the protocols that enable its application to network and communication security. Prerequisite: MATH 308; either MATH 390, STAT 390, or IND E 315. Offered: A.

E E 419 Introduction to Computer-Communication Networks (4) *S. Roy* Computer network architectures and protocols. OSI Layers and performance analysis. Transmission media, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: CSE 143; either STAT 390, STAT 391, or IND E 315. Offered: Sp.

E E 420 Design in Communications (4) Design projects in communications. Frequent projects solved by student teams. Reports and presentations. Prerequisite: 1.0 in E E 417 which may be taken concurrently. Offered: Sp.

E E 421 Quantum Mechanics for Engineers (3) *M. Anantram* Covers the basic theory of quantum mechanics in the context of modern examples of technological importance involving 1D, 2D, and 3D nanomaterials. Develops a qualitative and quantitative understanding of the principles of quantization, band structure, density of states, and Fermi's golden rule (optical absorption, electron-impurity/phonon scattering). Prerequisite: MATH 307 or AMATH 351; recommended: Calculus through differential equations. Offered: W.

E E 423 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136, MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 423/CSE 486; A.

E E 424 Advanced Systems and Synthetic Biology (3) *H. Kueh* Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/CSE 487; Sp.

E E 425 Laboratory Methods in Synthetic Biology (4) Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/CSE 488; W.

E E 426 Capstone Project in Synthetic Biology (4) *E. KLAVINS* Capstone design experience in synthetic biology. Provides students with skills in handling open-ended design problems in synthetic biology. Students participate on a team that designs, builds and tests a new transgenic

microorganism with potential applications ranging from advanced materials, bio-sensing and/or remediation, or human health. Prerequisite: either BIOEN 425, E E 425, or CSE 488; CSE 142
Offered: Sp.

E E 433 Analog Circuit Design (5) Design of analog circuits and systems applying modern integrated circuit technology: operational amplifiers, differential amplifiers, active filters, voltage references and regulators. Prerequisite: 1.0 in E E 332. Offered: A.

E E 436 Medical Instrumentation (4) Introductory course in the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For upper-division and first-year graduate students preparing for careers in bioengineering - both research and industrial. Prerequisite: E E 332. Offered: Sp.

E E 437 Integrated Systems Capstone (5) *J. Rudell* Team-based design experience to develop integrated electronic systems by constructing and validating, prototype integrated circuits (IC) and sensors using modern Computer Aided Design (CAD) tools. Systems are simulated using modern semiconductor, MEMs and nanophotonic technologies. Teams define requirements; investigate tradeoffs in performance, cost, power and size; design for both reliability and testability. Prerequisite: E E 331; E E 433; E E 473 Offered: Sp.

E E 438 Instrumentation Design Project Capstone (5) *R. DARLING* Team-based design for developing an electronic instrumentation system and constructing and validating a prototype using modern printed circuit board technology. Teams develop design requirements; investigate tradeoffs for miniaturization, integration, performance, and cost; and consider use cases, failure modes, manufacturability, and testability. Includes extensive laboratory. Prerequisite: either E E 433 or E E 436. Offered: Sp.

E E 440 Introduction to Digital Imaging Systems (4) Image representation and standards, visual perception and color spaces, spatial domain image filtering and enhancement, image restoration, image transforms, image and video coding, image geometrical transformation and camera modeling. Prerequisite: E E 341. Offered: A.

E E 442 Digital Signals and Filtering (3) Methods and techniques for digital signal processing. Review of sampling theorems, A/D and D/A converters. Demodulation by quadrature sampling. Z-transform methods, system functions, linear shift-invariant systems, difference equations. Signal flow graphs for digital networks, canonical forms. Design of digital filters, practical considerations, IIR and FIR filters. Digital Fourier transforms and FFT techniques. Prerequisite: 1.0 in E E 341. Offered: W.

E E 443 Design and Application of Digital Signal Processing (5) Application of learned theories/algorithms and available computer technologies to modern image and speech processing problems. Two-dimensional signals and systems. Image transform, enhancement, restoration, coding. Characteristics of speech signals, linear predictive coding (LPC) of speech, pitch detection, and LPC speech synthesis, speech recognition, hardware designs for signal processing. Prerequisite: 1.0 in E E 442. Offered: Sp.

E E 447 Control System Analysis I (4) Linear Servomechanism theory and design principles. Pole-zero analysis, stability of feedback systems by root locus and real-frequency response methods. Design methods of Bode and Nichols. Introduction to advanced topics in automatic control theory, state variable methods. Prerequisite: E E 233; E E 235; MATH 308. Offered: A.

E E 448 Systems, Controls, and Robotics Capstone (4-) In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results, Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 447. Offered: W.

E E 449 Systems, Controls, and Robotics Capstone (-4) In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results, Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 448. Offered: Sp.

E E 451 Wind Energy (4) Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: E E 351. Offered: Sp, odd years.

E E 452 Power Electronics Design (5) Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, design of magnetics, and control of power converters. Also ac/ac, ac/dc, and dc/dc power converters; circuit simulation; extensive laboratory work; a four-week power converter design project. Prerequisite: 1.0 in E E 331; 1.0 in E E 351. Offered: A.

E E 453 Electric Drives (5) Elements of drive systems, speed-torque characteristics of electric motors and industrial loads, solid-state converter. Starting and braking methods of loaded motors. Speed control of electric motors. Solid-state drives. Transient analysis of loaded motors. Special forms of individual- and multimotor drives. Prerequisite: 1.0 in E E 452. Offered: W.

E E 454 Power System Analysis (4) Introduction to methods of analyzing power systems. Includes symmetrical components, calculation of line parameters, representation of transmission lines and power components, and power flow control. Prerequisite: 1.0 in E E 351. Offered: A.

E E 455 Power System Dynamics and Protection (4) Analysis of symmetrical and unsymmetrical power systems' networks, fault analysis, and stability studies. Prerequisite: 1.0 in E E 351. Offered: W.

E E 456 Computer-Aided Design in Power Systems (4) Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, or distribution systems. Each involves formulation of design criteria, development of approach, application of existing software. Prerequisite: either 1.0 in E E 454 or 1.0 in E E 455. Offered: Sp.

E E 457 Electric Energy Distribution Systems (4) Introduction to electric utility distribution systems. Primary and secondary network analysis and design, distribution substation problems, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 1.0 in E E 351. Offered: W.

E E 461 Introduction to Computer-Communication Networks (4) Computer network architectures and protocols. OSI Layers and performance analysis. Transmission media, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: CSE 143; either MATH 390/STAT 390, STAT 391, or IND E 315. Offered: Sp.

E E 462 Electromagnetics I: Microwave Engineering (4) Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions. Prerequisite: minimum grade of 1.0 in E E 361. Offered: A.

E E 463 Microwave Electronic Design (4) Design of microwave circuits using S-parameter techniques. Measurement techniques, CAD of microwave systems. Includes design, fabrication, and evaluation of a microwave amplifier. Prerequisite: E E 361; E E 332, which may be taken concurrently. Offered: W.

E E 464 Antennas: Analysis and Design (4) Fundamentals of antennas, analysis, synthesis, and computer-aided design, and applications in communications, remote sensing, and radars. Radiation pattern, directivity, impedance, wire antennas, arrays, numerical methods for analysis, horn antennas, microstrip antennas, and reflector antennas. Prerequisite: 1.0 in E E 361. Offered: Sp.

E E 465 Fiber Optics, Devices, and Applications (4) Wave propagation in optical waveguiding structures, signal distortion, coupling of modes, modulation, sources and detectors, fabrication and measurement methods, communication and sensor systems. Prerequisite: E E 331; E E 361.

E E 469 Computer Architecture I (5) Introduction to computer architecture. Assembly and machine language, microprocessor organization including control and datapath. Computer arithmetic. Memory systems and caching. Performance modeling of microprocessors. Prerequisite: either E E 271 or CSE 369; CSE 143 Offered: jointly with CSE 469; AWSp.

E E 470 Computer Architecture II (4) Advanced computer architecture. Performance evaluation and energy efficiency. Instruction set architectures. Instruction-level parallelism. Modern microprocessor micro-architecture. Thread-level parallelism. Cache coherency and memory consistency in shared-memory multiprocessors. Memory hierarchy. GPU architecture. Warehouse-scale computing. Trends in computer design. Prerequisite: CSE 351; either CSE 469, E E 469, or E E 471. Offered: jointly with CSE 470.

E E 473 Linear Integrated Circuits (5) Design of linear integrated circuits applying modern MOS and BJT integrated circuit technologies: single-stage amplifiers; current-mirror DC bias and active load circuits; stability and frequency compensation of single-stage and two-stage

operational amplifiers; output stages; current and voltage reference circuits. Prerequisite: 1.0 in E E 332. Offered: W.

E E 474 Introduction to Embedded Systems (4) Introduces the specification, design, development, and test of real time embedded system software. Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with CSE 474; AWSpS.

E E 475 Embedded Systems Capstone (5) Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with CSE 475; AWSp.

E E 476 Digital Integrated Circuit Design (5) Comprehensive view of digital integrated circuit design. Topics to be covered include the design of inverters, static logic circuits, switch logic, and synchronous logic. Students design, simulate, and layout a complete digital IC using modern computer-aided design tools. Prerequisite: either E E 205 or E E 215; E E 271. Offered: A.

E E 477 VLSI II (5) Provides a fairly deep understanding of how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 331; E E 476. Offered: W.

E E 482 Semiconductor Devices (4) Fundamentals of semiconductor theory: carrier diffusion and drift; concept of direct and indirect energy materials, effective mass of mobile carriers; device physics: homo- and heterojunctions, operating principles of bipolar, junction, and MOS field-effect transistors. Prerequisite: E E 331; E E 361. Offered: A.

E E 483 Nanotechnology Design (4) *S. DUNHAM* Open-ended design of a nanoscale solid state device using advanced technology computer-aided design (TCAD) tools. Prerequisite: EE 482. Offered: W.

E E 484 Sensors and Sensor Systems (4) Introduction to optical and solid-state chemical and physical sensors. Topics include transduction mechanisms, design parameters, fabrication methods and applications. Prerequisite: E E 331. Offered: Sp.

E E 485 Introduction to Photonics (4) Introduction to optical principles and phenomena. Topics include electromagnetic theory of light, interference, diffraction, polarization, photon optics, laser principles, Gaussian beam optics, semiconductor optics, semiconductor photonic devices. Prerequisite: E E 361 or PHYS 123. Offered: W.

E E 486 Fundamentals of Integrated Circuit Technology (3) Processing physics, chemistry, and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation,

laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: EE 331 or MSE 351. Offered: jointly with MSE 486; AW.

E E 488 Photonics Design Capstone (4) Design of optical and optoelectronic devices using fundamental principles of photonics. Recent advances in contemporary research. Construction of microscopes or spectrometers. Involves a major design experience. Prerequisite: E E 485.

E E 490 Reading and Research (1-5, max. 25) Reading and research in the field under supervision of an E E faculty member. Credit/no-credit only.

E E 491 Undergraduate Seminar (1, max. 2) Weekly seminars on current topics in electrical engineering. Credit/no-credit only.

E E 492 Electrical Engineering Leadership Seminar (1) Weekly seminar with program alumni presenting their workforce experience, demonstrating the depth and breadth possible in the field and best practices. Credit/no-credit only. Offered: W.

E E 496 Engineering Entrepreneurial Systems and Design (2) *P. ARABSHAHI, J. SAHR*
Fundamentals of systems engineering methods, system life cycle, project management and scheduling, trade studies, risk mitigation, configuration management, budgeting, procurement, prototyping, technical reviews, and associated tools; startup life cycle, intellectual property, trade secrets, patents, startup financing, incorporation, business plan, market research, roles of officers. Offered: A.

E E 497 Engineering Entrepreneurial Capstone (4-) Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes cross-disciplinary teamwork. Offered: W.

E E 498 Engineering Entrepreneurial Capstone (-4) Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes cross-disciplinary teamwork. Prerequisite: E E 497. Offered: Sp.

E E 499 Undergraduate Research and Special Projects (1-5, max. 10) Undergraduate research or design project carried out under the supervision of a faculty sponsor.

E E 500 Graduate Seminar (1, max. 9) Weekly seminars on current topics in electrical engineering. More than one section may be offered in a given quarter. Credit/no-credit only.

E E 503 Modeling of MEMS (4) Microelectro mechanical systems (MEMS) including lumped modeling, conjugate power variables, electrostatic and magnetic actuators, linear transducers, linear system dynamics, design optimization, and thermal analysis. Numerical modeling topics include electro (quasi) static, mechanical, electro mechanical, magneto (quasi) static, and fluidic

phenomena; parametric analysis, visualization of multi-dimensional solutions; and verification of results.

E E 504 Introduction to Microelectro Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with M E 504/MSE 504.

E E 505 Probability and Random Processes (4) Foundations for the engineering analysis of random processes: set theoretic fundamentals, basic axioms of probability models, conditional probabilities and independence, discrete and continuous random variables, multiple random variables, sequences of random variables, limit theorems, models of stochastic processes, noise, stationarity and ergodicity, Gaussian processes, power spectral densities. Prerequisite: graduate standing and understanding of probability at the level of E E 416.

E E 506 Fundamentals of Wireless Communication (4) Fundamentals of wireless communications: signals, modulation, coding, channel estimation, fading channels; performance metrics. Prerequisite: E E 505.

E E 507 Advanced Wireless Systems (4) MIMO (Rate Multiplexing, Diversity, Beamforming), Space-Time-Frequency Coding; Advanced Modulation, Equalization, Channel Estimation and Synchronization for 5G; Spread Spectrum. Prerequisite: E E 506. Offered: Sp, odd years.

E E 508 Stochastic Processes in Engineering (3) A. GHATE Non-measure theoretic introduction to stochastic processes. Topics include Poisson processes, renewal processes, Markov and semi-Markov processes, Brownian motion, and martingales, with applications to problems in queuing, supply chain management, signal processing, control, and communications. Prerequisite: E E 505. Offered: jointly with IND E 508; W.

E E 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/CHEM E 510/M E 510.

E E 511 Introduction to Statistical Learning (4) Covers classification and estimation of vector observations, including both parametric and nonparametric approaches. Includes classification with likelihood functions and general discriminant functions, density estimation, supervised and unsupervised learning, feature reduction, model selection, and performance estimation. Prerequisite: either E E 505 or CSE 515.

E E 512 Graphical Models in Pattern Recognition (4) Bayesian networks, Markov random fields, factor graphs, Markov properties, standard models as graphical models, graph theory (e.g., moralization and triangulation), probabilistic inference (including pearl's belief propagation,

Hugin, and Shafer-Shenoy), junction threes, dynamic Bayesian networks (including hidden Markov models), learning new models, models in practice. Prerequisite: E E 508; E E 511.

E E 514 Information Theory I (4) Includes entropy, mutual information, Shannon's source coding theorem, data compression to entropy limit, method of types, Huffman coding, Kraft inequality, arithmetic coding, Kolmogorov complexity, communication at channel capacity (channel coding), coding theory, introduction to modern statistical coding techniques, differential entropy, and Gaussian channels. Prerequisite: E E 505.

E E 515 Information Theory II (4) Includes advanced modern statistical coding techniques (statistical coding), advanced codes and graphs, source coding with errors (rate distortion), alternating minimization principles, channel coding with errors, network information theory, multiple description coding, and information theory in other areas including pattern recognition, bio-informatics, natural language processing, and computer science. Prerequisite: E E 514.

E E 516 Computer Speech Processing (4) Introduction to automatic speech processing. Overview of human speech production and perception. Fundamental theory in speech coding, synthesis and reproduction, as well as system design methodologies. Advanced topics include speaker and language identification and adaptation. Prerequisite: E E 505; E E 518.

E E 517 Continuous-Space Language Processing (4) Introduction to human language technology, with in-depth coverage of continuous-space statistical models of language and application to natural language processing tasks. Methods covered include low rank distributional representations, neural networks, and log bilinear statistical models, which are leveraged for language modeling, similarity scoring, classification, and translation/generation. Prerequisite: E E 505.

E E 518 Digital Signal Processing (4) Covers discrete-time processing of continuous-time signals; sampling rate conversion; frequency magnitude, phase delay, and group delay; design techniques for non-recursive (FIR) filters; multirate signal processing; all-pass/minimum phase decompositions; discrete Fourier transforms, fast Fourier transforms; overlap-add; short-time Fourier analysis; and filter banks. Includes applications such as machine learning. Prerequisite: E E 442.

E E 519 Stochastic Analysis of Data From Physical Systems (4) Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, probability densities. Interpretation of statistical measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: E E 505.

E E 520 Spectral Analysis of Time Series (4) Estimation of spectral densities for single and multiple time series. Nonparametric estimation of spectral density, cross-spectral density, and coherency for stationary time series, real and complex spectrum techniques. Bispectrum. Digital filtering techniques. Aliasing, prewhitening. Choice of lag windows and data windows. Use of the fast Fourier transform. Prerequisite: one of STAT 342, STAT 390, STAT 481, STAT 509/CS&SS 509/ECON 580, or IND E 315. Offered: jointly with STAT 520.

E E 521 Quantum Mechanics for Engineers (4) Covers the basic theory of quantum mechanics in the context of modern examples of technological importance involving 1D, 2D, and 3D nanomaterials. Develops a qualitative and quantitative understanding of the principles of quantization, band structure, density of states, and Fermi's golden rule (optical absorption, electron-impurity/phonon scattering). Prerequisite: MATH 307 or AMATH 351.

E E 523 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/CSE 586/MOLENG 525.

E E 524 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with BIOEN 524/CSE 587; Sp.

E E 525 VLSI II (5) Analyzes how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 526 VLSI III (4) Ultra-high speed digital logical families based on output prediction logic; high-speed division; input and output pad design; state-of-the-art latch and flip-flop design; clock distribution, including PLLs and DLLs; noise considerations in high-speed digital IC design. Prerequisite: E E 477 or E E 525.

E E 527 Microfabrication (4) Principles and techniques for the fabrication of microelectronics devices and integrated circuits. Includes clean room laboratory practices and chemical safety, photolithography, wet and dry etching, oxidation and diffusion, metallization and dielectric deposition, compressed gas systems, vacuum systems, thermal processing systems, plasma systems, and metrology. Extensive laboratory with limited enrollment.

E E 528 Physics and Modeling of VLSI Fabrication (4) Physics of VLSI fabrication, emphasizing processing modeling and simulation. CMOS process, sequences, point defects and diffusion, ion implantation and annealing, film growth kinetics, deposition and etching, advanced photolithography. Process interactions and process integration. Extensive use of process simulation software. Prerequisite: either E E 486/MSE 467, E E 502/M E 504/MSE 504, or E E 527. Offered: jointly with MSE 528.

E E 529 Semiconductor Optoelectronics (4) Covers optical processes in semiconductors; optical waveguide theory; junction theory; LEDs; lasers photodetectors; photovoltaics; and optical modulators and switches. Prerequisite: E E 485. Offered: jointly with MSE 529.

E E 530 Wavelets: Data Analysis, Algorithms, and Theory (3) Review of spectral analysis. Theory of continuous and discrete wavelets. Multiresolution analysis. Computation of discrete wavelet transform. Time-scale analysis. Wavelet packets. Statistical properties of wavelet signal extraction and smoothers. Estimation of wavelet variance. Prerequisite: some Fourier theory and linear algebra; MATH 390/STAT 390, ECON 481 or STAT 481, STAT 509/CS&SS 509/ECON 580, STAT 513, or IND E 315. Offered: jointly with STAT 530; Sp.

E E 531 Semiconductor Devices and Device Simulation (4) Physical principles in semiconductor devices. Generation, recombination, p-n junctions, MOS, metal-semiconductor and other interface structures. Carrier transport at low and high level injection levels. Device simulation used to demonstrate physical principles and basic device operation. Project using device simulation. Prerequisite: E E 482.

E E 533 Photodetectors and Photodetection (4) Includes both the device physics and signal processing aspects of photodetection. Photodiodes, photoconductors, photomultipliers, and solar cells. Noise, signal-to-noise ratios, and imaging considerations. Prerequisite: E E 482.

E E 534 Power Electronics (4) Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control.

E E 536 Design of Analog Integrated Circuits and Systems (4) Design of analog VLSI: specifications, design, simulation, layout. Covering CMOS and Bi CMOS technologies. Prerequisite: E E 433.

E E 537 Computation Methods for Circuit Analysis and Simulation (3) Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical aspects of important analyses: large-signal nonlinear DC, small-signal AC, nonlinear transient, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices.

E E 538 Topics in Electronic Circuit Design (1-5, max. 16) Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge.

E E 539 Advanced Topics in Solid-State Electronics (1-5, max. 16) Lectures or discussions of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty.

E E 541 Automatic Layout of Integrated Circuits (4) Examines the algorithms behind the following commonly used physical design automation tools: floorplanning, partitioning, placement, routing, compaction, and verification. Prerequisite: either E E 271 or CSE 370; CSE 143.

E E 542 Advanced Embedded Systems Design (5) Studies advanced embedded system design principles and practices. Emphasizes formal design methodologies such as hardware-software co-design, investigates techniques for performance optimization, and examines distributed embedded systems. Prerequisite: E E 478.

E E 543 Models of Robot Manipulation (4) Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra.

E E 546 Advanced Topics in Control System Theory (1-5, max. 16) Topics of current interest in control system theory for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor. Offered when adequate enrollment develops prior to close of advance registration.

E E 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Offered: jointly with A A 547/M E 547.

E E 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/M E 548.

E E 549 Estimation and System Identification (3) Fundamentals of state estimation for linear and nonlinear systems. Discrete and continuous systems. Probability and stochastic systems theory. Models with noise. Kalman-Bucy filters, extended Kalman filters, recursive estimation. Numerical issues in filter design and implementation. Prerequisite: either A A 547, E E 547, or M E 547. Offered: jointly with A A 549/M E 549.

E E 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with A A 550/M E 550.

E E 551 Wind Energy (4) Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: E E 351.

E E 552 Power Systems Dynamics and Control (4) Advanced computer modeling and analysis of power systems. Application of modern systems and control theories. Prerequisite: E E 351 and E E 455.

E E 553 Power System Economics (4) Economic structure of power systems. Problem formulation, optimization methods and programming for economic analysis of power system operation and planning. Economic dispatch, load forecasting, unit commitment, interchange, planning and reliability analysis. Provides background to pursue advanced work in planning and operation.

E E 554 Large Electric Energy Systems Analysis (4) Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: E E 456.

E E 556 Analyzing the Power Grid (4) Discusses the models of the various components of an electricity grid and how they are combined into a set of equations that can be used to analyze the grid under normal, steady state conditions, as well as to calculate fault currents and assess its transient stability.

E E 557 Dynamics of Controlled Systems (4) Explores control techniques for high precision motion control. Covers state variable feedback of linear and nonlinear, multivariable systems in depth. Uses physical system modeling, graphical analysis, and numerical analysis to describe system performance. Uses simulation mini-projects to emphasize the dynamics of controlled systems and their performance.

E E 558 Substation and Distribution Automation (4) Examines how smart grid technologies affect substation and distribution operations and how history, customer expectations, and state and federal policies have shaped the existing infrastructure. Studies the capabilities of various emerging technologies to assess how they are able to solve existing issues.

E E 559 Special Topics in Electrical Energy Systems (1-5, max. 16) Topics of current interest in electrical power and energy devices and systems. Content varies from year to year, based on current professional interests of faculty member in charge.

E E 560 Advanced Electric Machines and Drives (4) Fundamentals of electric machines and drives, including brush DC, brushless DC, PM synchronous, induction machines, inverter topologies, and control techniques. Evaluation of torque production and control in machines with electronic drives (motor controllers).

E E 562 Artificial Intelligence for Engineers (3) Covers main areas of artificial intelligence (AI) without need for extensive prerequisites. Programming languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus; rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisite: CSE 373.

E E 563 Submodular Functions, Optimization, and Applications (4) *J. Bilmes* Submodularity and supermodularity. Definitions, properties, operations that preserve submodularity, variants, certain special submodular functions, computational properties, matroids and lattices, polyhedral properties, semidifferentials, convex/concave extensions, constrained and unconstrained minimization and maximization, and generalizations of submodularity and uses in machine learning. Prerequisite: E E 510/A A 510/CHEM E 510/M E 510. Offered: Sp, even years.

E E 565 Computer-Communication Networks I (4) Network architectures and protocols; layered model; reliable transmission protocols at the data control layer; Transmission Control Protocols (TCP); routing algorithms; performance modeling, and analysis of packet-switched networks. Multi-access. Projects involving routing and multi-access principles. Prerequisite: E E 505.

E E 566 Computer-Communication Networks II (3) Local area, metropolitan area, satellite, and packet radio networks; routing algorithms for wide area networks; optimal design of packet-switched networks; congestion and flow control; fast packet switching; gigabit networks. Prerequisite: E E 565.

E E 567 Mobile Networks (4) Wireless communication networks: wireless channel abstractions, Multiple Access Methods in Cellular networks, Applications of queueing models to wireless MAC analysis: IEEE 802.11 WLANs, LTE (CSMA/CA and Scheduling). Co-Existence and Spectrum Sharing. Prerequisite: E E 506; E E 565.

E E 568 Digital Image Processing (4) Digital image processing techniques and various special topics such as image restoration, image segmentation, multi-resolution imaging with wavelet transform, and image registration. Prerequisite: permission of instructor.

E E 570 Manifolds and Geometry for Systems and Control (3) Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate vs. coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with A A 570/M E 570; W, even years.

E E 571 High Frequency Circuits and Antennas: Computation of Fields and Waves (4) Planar microstrip structures are high frequency circuits and antennas used in communication, aerospace and computer industries. Examines the computation of fields and waves in such structures. How to calculate circuit parameters and radiation characteristics. Structures studied include microstrip lines, coupled lines, antennas, resonators, and discontinuities. Prerequisite: either E E 482 or E E 572.

E E 572 Electromagnetics I: Microwave Engineering (4) Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions. Prerequisite: E E 361. Offered: A.

E E 573 Electromagnetics II (4) Covers Green's functions; radiation from apertures and beam waves; periodic structures and coupled-mode theory; dispersion and anisotropic media; antennas, apertures, and arrays; and scattering of waves by conducting and dielectric objects. Prerequisite: E E 572.

E E 574 Antennas: Analysis and Design (4) Covers fundamentals of antennas, analysis, synthesis, and computer-aided design; applications in communications, remote sensing, and radars; radiation pattern; directivity; impedance; wire antennas; arrays; numerical methods for analysis; horn antennas; microstrip antennas; and reflector antennas. Offered: Sp.

E E 575 Radar Remote Sensing (4) Introduces radar remote sensing. Covers the fundamentals of radar systems, monostatic and bistatic topologies, radar equation, range-time diagram; ambiguity function, pulse compression, elementary estimation and detection theory, spectrum estimation for underspread and overspread targets; interferometry, source imaging; and Time Difference of Arrival, Aperture Synthesis (SAR and ISAR).

E E 576 Computer Vision (3) Principles and methods for interpreting the three-dimensional world from images. Topics include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: solid knowledge of linear algebra; good programming skills. Offered: jointly with CSE 576.

E E 577 Special Topics in Computer Vision (3) Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/E E 576. Offered: jointly with CSE 577.

E E 578 Convex Optimization (4) Basics of convex analysis: Convex sets, functions, and optimization problems. Optimization theory: Least-squares, linear, quadratic, geometric and semidefinite programming. Convex modeling. Duality theory. Optimality and KKT conditions. Applications in signal processing, statistics, machine learning, control communications, and design of engineering systems. Prerequisite: A A 510, CHEM E 510, E E 510, or M E 510. Offered: jointly with A A 578/CSE 578/M E 578; W.

E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5, max. 16) Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge.

E E 580 Geometric Methods for Non-Linear Control Systems (3) Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with A A 580/M E 580; Sp, even years.

E E 581 Digital Control System Design (4) *M. BERG* Digital control system design by classical methods. Discrete-time systems and the z-transform. Modeling sampled-data systems. Frequency response of discrete time systems and aliasing. Nyquist stability criterion and gain and phase

margins. Discrete-time control law determination by direct z-plane root locus and loop shaping methods. Includes hands-on-with-hardware projects. Prerequisite: AA/EE 447 or ME 471. Offered: jointly with A A 581/M E 581; W.

E E 582 Introduction to Discrete Event Systems (3) Modeling DES with automata and Petri nets. Languages. State estimation and diagnostics. Control specifications. Feedback control. Dealing with uncontrollability and unobservability. Dealing with blocking. Timed automata and Petri nets. Prerequisite: A A 447/E E 447/ M E 471. Instructors: Berg Offered: jointly with A A 582/M E 582; Sp, even years.

E E 583 Nonlinear Control Systems (3) Analysis of nonlinear systems and nonlinear control system design. Phase plane analysis. Lyapunov stability analysis. Describing functions. Feedback linearization. Introduction to variable structure control. Prerequisite: A A 447/E E 447/M E 471. Offered: jointly with A A 583/M E 583.

E E 585 System Identification and Adaptive Control (3) Theory and methods of system identification and adaptive control. Identification of linear-in-parameter systems, using recursive LS and extended LS methods; model order selection. Indirect and direct adaptive control. Controller synthesis, transient and stability properties. Offered: jointly with A A 585/M E 585.

E E 586 Digital Video Coding Systems (4) Introduction to digital video coding algorithms and systems. Theoretical and practical aspects of important topics on digital video coding algorithms, motion estimation, video coding standards, systems issues, and visual communications.

E E 587 Multimedia Compression and Networking (4) Addresses four major components of multimedia: 1) data compression of multimedia (e.g., speech, audio, image, and video); 2) quality of service (QoS) issues for data transmission over IP; 3) multimedia streaming and conferencing applications; and 4) intellectual property management and protection (IPMP) of multimedia contents. Co-requisite: E E 518.

E E 589 Advanced Topics in Sensors and Sensor Systems (3) Topics of current interest in sensors and sensor systems.

E E 590 Advanced Topics in Digital Computers (2-5, max. 16) Lectures or discussions of topics of current interest in the field of digital systems. Subject matter may vary from year to year.

E E 591 Robotics and Control Systems Colloquium (1, max. 30) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/CHEM E 591/M E 591.

E E 593 Feedforward Control (3) Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off

and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with A A 593/M E 593; Sp, even years.

E E 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 594/M E 594; Sp, odd years.

E E 595 Advanced Topics in Communication Theory (1-5, max. 16) Extension of E E 507, E E 508, E E 518, E E 519, E E 520. Material differs each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes.

E E 596 Advanced Topics in Signal and Image Processing (2-5, max. 16) Topics of current interest in signal and image processing. Content may vary from offering to offering.

E E 597 Networked Dynamics Systems (3) Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/M E 597.

E E 598 Special topics in Electrical Engineering (1-5, max. 16) Topics of current interest in non-traditional areas of electrical engineering. Offered: AWSpS.

E E 599 Special Projects in Electrical Engineering (1-5, max. 15) Prerequisite: permission of instructor.

E E 600 Independent Study or Research (*-)

E E 700 Master's Thesis (*-)

E E 800 Doctoral Dissertation (*-)

Human Centered Design and Engineering

Department Overview

423 Sieg

In the Department of Human Centered Design and Engineering (HCDE), students are designing the future by building innovative technologies and systems. Putting people first, HCDE students and faculty research, design, and engineer interactions between humans and technology. HCDE students and faculty focus on understanding human needs and interests as they design and build engineering solutions to the world's problems.

HCDE faculty are award-winning and interdisciplinary, with graduate degrees in fields such as computer science, information studies, industrial engineering, design, education, English, linguistics, public policy, and technology and society studies.

HCDE prepares students for leadership roles in user interface design, user experience research and design, human-computer interaction, information and communication systems, computer-supported cooperative work, and related specializations, all from a human-centered perspective, internationally and globally. Whatever their professional direction, classes, directed research groups, and capstone projects, students develop portfolio quality products. HCDE graduates obtain jobs, primarily in the high-tech industry (e.g., Microsoft, Intel, Amazon, Facebook, T-Mobile, Google, Boeing), researching and designing user interfaces, websites, and other form factors to improve the user experience.

HCDE emphasizes student-centered, hands-on learning. Beyond taking traditional classroom courses, students join research groups and work side-by-side with top-ranked professors and graduate students to enhance the knowledge base of this dynamic field. The educational mission is supported by up-to-date facilities.

HCDE prepares students to assume positions of intellectual leadership in industry, government, non-profit organizations, and academia, HCDE students learn the research skills appropriate to their interests, the most effective design strategies, and the most current technologies and practices. They also learn enduring theory and principles so they can dynamically respond to the evolving field of human centered design and engineering.

Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. Human centered design and engineering prepares students to design, create, edit, and evaluate technical and scientific discourse. The department provides coursework in the development of online help systems and in the design of general-audience content for delivery by means of advanced communication technologies such as the web.

The complexities of modern life have greatly increased the number of people who need to communicate about technical and other specialized topics. Scientific journal articles, manuals, proposals, and other genres are important for a vast array of readers. With the Information Age, gaining and sharing technological understanding and capability has become a crucial human activity. People communicate in more genres, address broader (often global) audiences, and face more complex rhetorical problems than ever before.

To achieve success in their communication activities, progressive organizations are employing sophisticated planning and development methods, including user-centered design and evaluation, content management, and systems-based analyses. In addition, they undertake research projects and apply existing research to their own needs. Contemporary research in technical communication ranges from controlled empirical research on the processing of text, graphics, and multimedia content to observational research on how meaning is created and negotiated in business environments and virtual communities.

Other major interests include the human-computer interface, hypermedia, communications technology, rhetoric of technical discourse, international communication, visual communication, publications and communications management, policy analysis of technological systems, and research and testing.

www.hcde.washington.edu

The Department of Human Centered Design and Engineering (HCDE) offers the following programs of study:

- Bachelor of Science in Human Centered Design and Engineering degree
- A minor in technical Japanese

Bachelor of Science in Human Centered Design and Engineering

Suggested First-Year College Courses: See regular admission requirements

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students.

1. Deadlines for requesting placement into the major: July 1 and January 15

2. Course requirements to request placement: MATH 124, MATH 125, MATH 126; CSE 142 or CSE 160; one from STAT 220, STAT 221, STAT 311, IND E 315; one from CHEM 142, PHYS 121, BIOL 180; 5 credits English composition; all courses completed prior to the deadline
3. Grade requirements: minimum 2.50 cumulative GPA in courses required for placement
4. HCDE 210 strongly recommended

If the number of Engineering Undeclared students requesting placement into the major exceeds the department capacity for Engineering Undeclared students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students from another college or university may apply. Admission is competitive.

1. Admission is for autumn and spring quarters. Application deadlines: April 5 for autumn quarter and January 15 for spring quarter.
2. Minimum course requirements for application: 10 credits from MATH 120, MATH 124, MATH 125, MATH 126; CSE 142 or CSE 160; one from STAT 220, STAT 221, STAT 311, IND E 315; three from CHEM 142, CHEM 152, CHEM 162, PHYS 114, PHYS 115, PHYS 116, PHYS 121, PHYS 122, PHYS 123, BIOL 118, BIOL 180, BIOL 200, PSYCH 202; 5 credits English composition; all courses completed prior to application deadline.
3. Grade requirements: minimum 2.50 cumulative GPA in courses required for application
