Box Number	356410

Nature of Organization

The UW Medicine Patient Safety Innovations Program research team is seeking highly motivated undergraduate students to assist on a literature review project. The topic of our research program is conflict at healthcare workplace.

Duties and Responsibilities

The main tasks include the following:

1. Work with a team of researchers in identifying articles, collecting, and categorizing articles
2. Read and code articles based on a formal coding scheme that the team will develop
3. Assist with analyzing synthesized information from article reviews
4. Assist the team with manuscript writing
5. Attend regular team meetings

Minimum Qualifications

An ideal candidate would have the following qualifications:

1. Excellent interpersonal and communication (both written and oral) skills
2. Excellent organizational and follow through skills
3. Ability to read scientific studies and extract targeted information
4. Attention to detail is an absolute must
5. Ability to work as a team member

Educational Benefits

Selected students will be working with an interdisciplinary/inter-professional group of researchers and acquire foundational skills in conducting a large-scale literature review. Students will benefit from the process of study conception to manuscript preparation.

How to Apply

Please send a cover letter and resume to: Sara Kim, PhD, Research Professor, sarakim@uw.edu
