Nature of Organization

The Greenberg lab in the Department of Medicine/Immunology in the School of Medicine. Our research goal is to develop in vivo preclinical models that provide insights for cancer therapies.

Duties and Responsibilities

The main duties: 1) General lab maintenances, including preparing media, buffer, autoclave lab glassware and maintaining laboratory supplies and organization. 2) Help management of mouse colonies and weaning mice. 3) Observation of ongoing animal experiments for anticancer immunotherapy at weekend, sometimes including giving medications to mice by I.P injection. 4) Help genotyping transgenic mice by PCR or Flowcytometry under general supervision of researchers.

Minimum Qualifications

Student who has done general chemistry classes/lab, and who is highly self-motivated and interested biomedical research.

Educational Benefits

The work experiences should help the students built career in the fields of biotechnology, pharmaceuticals and biomedical research in the future.

How to Apply

Send your CV directly to Sasha by email at xxt@u.washington.edu.
