### Nature of Organization

Very advanced busy Toxicology Lab.  
Specialized in early developmental neurotoxicology, teratology, and reproductive toxicology.

### Duties and Responsibilities

Duties range from basic support of lab to more advanced work. This includes dish washing, media prep, plate pouring, solution prep and library work, to eventually, assisting ongoing experiments. Currently these experiments involve animal dissections and molecular biology work. We are open to students doing independent projects and have had several do so. This is an excellent job for someone new to the lab techniques and we offer a chance to do more advanced work over time.

### Minimum Qualifications

Biology 201 preferred. We also prefer people who are interested in Lab Research as a career. We are looking for someone who is motivated to learn new techniques and has the time to devote to this.

### Educational Benefits

Learn basic cellular and biochemical techniques in addition to primary cell culture. Will also learn basic molecular biology techniques, and very advanced molecular biotechnology if you are interested in.

### How to Apply

Send the cover letter and resume to [sungwooh@uw.edu](mailto:sungwooh@uw.edu)
