Nature of Organization

DCI was founded by longtime friends, colleagues, aeronautical engineers, and avid pilots John Mercer and Peter Hambling in 1990 to create the most advanced HDD locating and tracking system in the market.

Duties and Responsibilities

The product support administrator plays a pivotal role in ensuring the product support group continues to provide excellent customer service related to warranty registration, RMA support and loaner management. This includes processing paper warranty registrations that are mailed/faxed in. It also includes supporting the RMA process by following up on quote approvals and managing associated paperwork. In addition, this individual will be responsible for loaner management including tracking the distribution and collection of loaner equipment. In addition, the customer service administrator is responsible for providing office support to those in the field. This includes managing requests from the field for equipment & supplies.

Minimum Qualifications

Attention to detail
Great follow through
Excellent customer service skills / ability to delight internal and external customers
Excellent communication skills (written and phone)
Troubleshooting and problem solving aptitude
Solid computer skills (Outlook, Power Point, SharePoint) / comfortable learning proprietary software
Project coordination or project management experience preferred

Educational Benefits

project management, business administration
