Nature of Organization

Adaptive is a fast-paced biotech firm developing high throughput methods for in-depth analysis of the human immune system used to assess and improve cancer and auto-immune diagnosis and treatment.

Duties and Responsibilities

Clean and sterilize laboratory glassware and equipment such as pipettes, test tubes, scales, centrifuge, pipettes, water bath, robots, refrigerators, and freezers; operate and clean autoclave; label bottles. Make up specimen sets for a variety of laboratory examinations according to specified procedures. Prepare the routine chemical solutions such as TE, 70% EtOH, 1N NaOH, etc. for use in assigned laboratories.

Check inventories and restock laboratory and office supplies when received.

Assist, as needed, in the more routine and limited laboratory experiments under close supervision of technical superiors.

MUST HAVE Ability to clean, wrap, sterilize, and store laboratory glassware and fragile apparatus; learn and use autoclaves, sterilizers

Minimum Qualifications

Must have more than 1 year of college education, have some lab experience and be familiar with operating pipettes.

Must also have a major in biological sciences or related field and have some coursework experience in biological sciences/chemistry.

This position requires a student with excellent organizational, record keeping and communication skills. Preference will be given to a student who can work through the entire academic year and potentially during the summer.

Educational Benefits

Scientific knowledge gained while working in this fast paced biotech company may include: immunology, genomics, high throughput sequencing and PCR, hem/onc immunology, and laboratory methods.
