Open Classrooms and Conversations  
Pilot Program, Spring 2013

Faculty: Dr. Jasmine Bryant  
Title: Lecturer  
Department: Chemistry

What You’ll See in My Classroom:
- PowerPoint lecture slides
- Chemical demonstrations
- Problems worked on the document camera
- Questions encouraged
- Corny jokes

Course: Chem 162 A or B  
Description: Third-quarter general chemistry  
Population: 288 students, mostly freshman and some sophomores  
Days: M, W, F  
Time: 10:30 – 11:20am and 12:30 – 1:20 pm  
Room: BAG 131

Observation: Any days from 4/29 - 5/31 except 5/15 and 5/17 (midterm and review)  
Follow up: A Thursday before 2:30pm is best for me.

Teaching philosophy: Chemistry is exciting and relevant to my student’s lives and my enthusiasm for the subject shows. I like to treat my students as adults who can make informed choices about their education – their degree of involvement is their choice. They can attend lecture or not, but if they do I try to make it engaging and informative. Exams are a mixture of basic skills and applied knowledge – there will be questions that require a more in-depth knowledge of the material than explicitly covered in class.
