The Landscape of Stalinism
The Art and Ideology of Soviet Space
Edited by Evgeny Dobrenko and Eric Naiman
This wide-ranging cultural history explores the expression of Bolshevik Party ideology through the lens of landscape, or, more broadly, space. In painting, architecture, literature, cinema, and song, images of landscape were enlisted to help mold the masses into joyful, hardworking citizens of a state with a radiant, utopian future. From backgrounds in history, art history, literary studies, and philosophy, the contributors show how Soviet space was sanctified, coded, and “sold” as an ideological product.

A History of Ukraine
Paul Robert Magocsi
Although the new state of Ukraine came into being as one of many formed in the wake of the Revolution of 1989, it is hardly a new country. Paul Robert Magocsi tells its story from the first millennium before the common era to the declaration of Ukrainian independence in 1991, with a balanced discussion of political, economic, and cultural affairs. Tracing in detail the experiences of the Ukrainian people, he gives judicious treatment as well to the other peoples and cultures that developed within the borders of Ukraine, including the Greeks of the Bosporan Kingdom, the Crimean Tatars, and the Poles, Russians, Germans, Jews, and Mennonites all of whom form an essential part of Ukrainian history.
