

National Resources for Parents of Children and Youth with Disabilities

DO-IT

Parents of youth with disabilities have unique opportunities to promote their successful transition to postsecondary education, employment and full adult participation in society. Families can assist in the transition process by providing adolescents direction in their exploration of interests, guidance in career and college planning, and encouragement as they pursue their dreams. Parents can help each other, too. As they develop skills in working with their own children they can:

Provide information,
Answer questions,
Recommend resources,
Empower youth and young
adults with disabilities,
Network,
Train, and
Support one another.

The DO-IT (Disabilities, Opportunities, Internetworking, and Technology) Center serves to increase the successful participation of individuals with disabilities in academics and careers, especially in promising fields where they have been underrepresented, including science, engineering, mathematics, and technology. DO-IT helps individuals with disabilities use technology as an empowering tool.

Parents can provide the foundation for young people to become self-determined, to learn decision-making skills, and to gain access to resources. They can empower their children's personal plans for success.

Parents can be more effective with up-to-date information, communication, and community resources. The following resources may be particularly helpful in assisting parents as their children prepare for college and careers. Compiled with the input from many parents, this list includes printed materials, electronic discussion lists, websites, disability-related conferences and organizations, and agencies that provide services to individuals with disabilities.
