Problem

access to computers
access to electronic resources

Solution

adaptive technology
universal design principles
Computers assist people with:

- low vision
- blindness
- hearing impairments
- speech impairments
- specific learning disabilities
- mobility impairments
- health impairments
Low Vision

- large print signs, handouts, labels
- good lighting
- large print key labels
- large monitors
- software to enlarge screen images
- software to adjust screen colors
Blindness

- Braille & taped materials
- Braille labels
- Computers with voice output
- Braille screen displays
- Scanners & optical character recognition
- Braille printers
- Internet accessible services/resources
Hearing/Speech Impairments

- computers with visual output
- electronic mail
- speech synthesizers
Specific Learning Disabilities

- staff assistance
- quiet work areas
- computers with voice output
- spelling/grammar checkers, thesauruses
- word prediction software
- software to enlarge screen images
- large monitors
Mobility Impairments

- adjustable tables
- keyboard modifications
- keyboard guards & layouts
- alternative keyboards & mice
- Internet services/resources
Health Impairments

- electronic mail
- Internet accessible services/resources
Adaptive Technology

- hardware/software
- easy/difficult to implement
- easy/difficult to use
- inexpensive/expensive
- generic/unique
- stand alone/networked
Getting Started!

- adjustable tables
- large print key labels
- screen enlargement software
- large monitors
- speech output
- Braille conversion software & printer
- trackballs, wristrests, keyguards
