Articles & Research Databases

Literature on your research topic and direct access to articles online, when available at UW.

Journal Search

Search or browse journal titles held at UW.

Encyclopedias & Dictionaries

Resources for looking up quick facts and background information.

E-Newspapers, Media, Maps & More

Recommendations for finding news, audio/video, images, government publications, data sets and other types.

Evaluating Information

Learn how to choose the best and most reliable information that meets your research needs.

Citation Styles & Tools

Quick MLA, APA, and Chicago style guides for bibliographies; tools for storing and organizing sources.

Course Reserves

Library materials reserved for your classes.

Collections & Archives

Unique online and physical collections on specific subjects, in distinct formats, and in special archives.

Mobile Search Tools

Mobile-optimized research databases and library-related mobile apps.

Research Guides

Librarian recommended resources & research tips tailored to your topic.

Undergraduate Researcher Tutorial

Self-paced online tutorial that introduces students to research skills and UW Libraries resources and services.

Help and FAQ

Known Issues and Bugs

Consultations

Off-Campus Access & Technical Support

Many of the Libraries' databases, electronic journals, e-books, and other resources are available online, 24/7! However, most of them can **only be accessed from off-campus by current UW students, faculty, and staff and current Cascadia users.**

- You must log in with your eligible UW NetID
supplemental and shared NetIDs are not eligible; see **Borrowing & Access** for specifics on eligibility
- Connect through **Husky OnNet** OR the **Libraries off-campus proxy service**

HUSKY ONNET

Husky OnNet is a virtual private network (VPN) software application offered by UW IT to provide a secure temporary connection to the UW network from off-campus locations and can be used instead of the Libraries off-campus proxy service for connecting to resources. **You MUST configure it for All Traffic first!**

Configuring Husky OnNet to Access Library Resources ›

Notes about Use

- **China and other countries may have strict laws and policies regarding VPN use - see FAQ**
- Cascadia users cannot use Husky OnNet but can use a browser from **Cascadia's Remote Desktop ("Views") Access**

LIBRARIES OFF-CAMPUS PROXY SERVICE

Libraries Website

If you are starting from the Libraries website, simply click on the resource you want and you should be prompted for your UW NetID when it is needed.

Proxy Bookmarklet

If you often do your research away from campus, you can install the Libraries off-campus proxy bookmarklet on your browser. The bookmarklet is a snippet of code saved in your browser's bookmarks that lets you start at a resource rather than the Libraries website and still route the resource through our proxy service with your eligible NetID so you can access it.

How to Connect

NetID. Husky OnNet. Proxy Bookmarklet. <https://www.lib.washington.edu/help/connect/connect>

Research Data Management

Research Data Management

Get support for finding and accessing data, data management planning, data organization, reuse of data, data sharing and publication, data citation and more.

What support is available for Research Data Management?

We can help you with:

- Data reference and acquisition
- **Data management plans** and funder requirements
 - Guide to **new NIH requirements for data management and sharing**
- How to **manage your data** from project inception to completion (research data management)
- **Data publishing, repositories and archiving**
- **Persistent identifiers: Orcid, DOIs, perma.cc**

SCHEDULE AN APPOINTMENT

Resources

- **Data Management Guide**
- **Reproducibility Guide and Best Practices**
- **eScience Institute** for help with data science questions, including assistance with software, methodology, and other consultations.

Research Data Management Workshop

Do you create or use data in your research? Looking for tips and tools to better help you manage your research data, and preserve it for

Campus data support:

Data Management Guide: Home

Guide of resources related to the many aspects of research data management. Data management encompasses the processes surrounding collecting, organizing, describing, sharing, and preserving data.

What You'll Find in This Guide

- **Organization and Format** - Understand how you can strategically arrange data and information into a user-friendly format. Learn about preservation and **metadata** and why it is important to your research.
- **Storage, Sharing, and Preservation** - Discover reasons and methods for sharing your data.
- **Research Data Management Workshop**, a semi-annual workshop for researchers using data offered by UW Libraries.
- **Frequently Asked Questions**
- **Qualitative data analysis software at UW**

Quick & Dirty Tools

As a resource to help with those responding to the White House mandate on data sharing (see our **blog post**), the National Library of Medicine has put together a table of **NIH-supported data repositories** that accept submissions of appropriate data for reuse.

Try these links for quick solutions to other common data management challenges:

Data Management Planning:

- **DMPTool**
Online tool to assist in writing data management plans for NSF, NIH, NEH, IMLS, or GBMF. UW is a participating institution; login using your NetID.
- **SPARC**
SPARC provides an up-to-date listing of data sharing policies by funding organization.

Research Data Management: Research Data Management Workshop from UW Libraries

Guide of resources related to the many aspects of research data management. Data management encompasses the processes surrounding collecting, organizing, describing, sharing, and preserving data.

Recurring Workshop on Research Data Management @ UW Libraries

Do you create or use data in your research? Looking for tips and tools to better help you manage your research data, and preserve it for long-term use?

Twice a year, the UW Libraries offers Research Data Management Planning, an asynchronous online workshop for UW community members engaged in research with data. Topics include getting started with data management planning, funder requirements for data sharing, metadata, tips to help keep you organized, sharing, archiving and preservation, and an introduction to tools and on-campus support to aid researchers. The primary audience is graduate students and new staff and faculty, but anyone with a UW NetID can register.

More information and any upcoming dates are listed below. If you have questions about upcoming dates or discipline-oriented versions of the class, please contact Jennifer Muilenburg, in the box on the right.

Research Data Management Planning Workshop: A free, tutor-supported online learning workshop

The workshop is offered 2-3 times a year, and runs Monday - Thursday. Details and any upcoming dates are below; if no dates are shown, the class is not yet scheduled.

Details:

- **Duration:** Monday, August 15 - Thursday, August 18, 2022 (4 days)
- **Time Commitment:** Approximately 30 minutes to 1 hour per day, for 4 straight days
- **Target audience:** UW community members engaged in research with data.
- **Prerequisites:** Access to the internet for each of the 4 days identified. A valid UW NetID is also required.
- **Register:** At [this registration link](#) prior to August 12, 2022. **Sign in to Google with your UW NetID to ensure access to the form.**

Research Data Management: Dryad Data Repository for UW Researchers

Guide of resources related to the many aspects of research data management. Data management encompasses the processes surrounding collecting, organizing, describing, sharing, and preserving data.

Introduction to Dryad

What Is Dryad?

Dryad is a nonprofit data repository offering researchers a secure location for research data storage. UW is now a Dryad member and UW researchers can deposit their data in Dryad at no additional cost to them -- deposit costs are covered by the Libraries' membership fee. This is especially important for researchers with data sets that do not fit in any of the federal or subject repositories.

Benefits of Submitting Your Data to Dryad

- Complies with funders' data access and sharing mandates (for example, **NIH's new DMSP**)
- Partners with major journal publishers, making manuscript submission easy
- Provides metrics to track how individual data is viewed, shared, cited, and downloaded
- Provides option to upload code, scripts, and software that can be automatically sent to **Zenodo**
- Curates data submitted for data and metadata integrity
- Preserves your data in a **Core Trust Seal-Certified** repository

Uploading Your Data to Dryad

Dryad makes it easy for researchers to upload and share their data.

1. Login with your ORCID ID

- The first time you use Dryad you need to **login with your ORCID ID**. Don't have one? You can create one straight from the Dryad login page (see this guide for more information).

Questions?

More information:

- **Dryad submission process**
- **Dryad Terms of Service**
- **Data Publishing Ethics** from Dryad

About Us

UW Libraries Investments in Open Access

SUBSCRIBE TO OPEN AND DIAMOND OA

Subscribe to Open (S2O) and **Diamond Open Access** are open access models where annual fees support the costs of the open access journal and there are no publishing fees charged to authors. The UW Libraries was an early supporter of **Annual Reviews – Subscribe to Open**, one of the first S2O agreements. This year we are expanding our S2O and Diamond OA commitments with the following journals:

- **Berghahn Open Anthro** – 14 journals in anthropology from Berghahn
- ***Journal of City Climate Policy and Economy*** – University of Toronto Press
- ***American Indian Culture and Research Journal*** – UCLA American Indian Studies Center (AISC)
- ***Cultural Anthropology*** – Society for Cultural Anthropology (SCA), a section of the American Anthropological Association (AAA)
- ***Engaging Science, Technology, and Society*** – Society for the Social Studies of Science (4S)
- ***International Journal of Strength and Conditioning*** – International Universities Strength and Conditioning Association (IUSCA)
- ***Language, Literature and Interdisciplinary Studies*** – E.L.A. Project (Education and Liberal Arts Project)
- ***Liquid Blackness: Journal of Aesthetics and Black Studies*** – Duke University Press

SCOAP³ (Sponsoring Consortium for Open Access Publishing in Particle Physics): UW Libraries' support for SCOAP3 ensures that authors pay no fees to publish in open access SCOAP3 journals, which include 10 key journals in particle physics.

Stanford Encyclopedia of Philosophy: UW Libraries is a full member of the Stanford Encyclopedia of Philosophy International Association, which helps fund open access to the Encyclopedia.

Knowledge Unlatched: UW Libraries and over 380 other libraries have joined together to support Knowledge Unlatched, an organization that works with its members to crowdfund the publication of scholarly open access scholarly monographs and journals.

Open Access Journal Hosting: UW Libraries offers journal hosting services free of charge. Information is available for those interested in starting a new journal or migrating an existing journal to a new publishing platform and/or model.

Open Access and Transformative Agreements

Research Impact

RESEARCH IMPACT CHECKLIST

10 suggestions for establishing your online identity, expanding your reach, and monitoring & describing your research impact.

Help Establish Your Scholarly Identity:

- 1) Set up and maintain your scholarly profiles using [ORCID](#) and [Google Scholar](#).
- 2) Clean up and merge your author profiles on sites such as [Web of Science](#), [Dimensions](#), [Scopus Preview \(free version\)](#), and [Semantic Scholar](#).

Decide What Information, Activities, and Publications You Want to Track:

- 3) Scan the [Becker model](#), [Resume for Researchers](#), or [Research Impact Framework](#). Identify indicators of the types of impact you'd like your work to have. Plan to track/document those things on an ongoing basis.
- 4) Set up automated searches to capture new articles. Plan to use information from alerts and ongoing searches to update your CV/scholarly profiles, identify potential collaborators, and stay current with your field.

Research Impact Checklist

Suggestions and resources for expanding and describing your research impact.

Increase the Visibility and Accessibility of Your Work:

- 5) Share preprints, publications, data, and protocols [as openly as possible](#) while complying with license agreements and funder policies. [Use DOIs](#) when citing these research products.
- 6) Use your [ORCID iD](#) when you publish.

Gather Evidence of How Your Work is Being Used:

- 7) Track citations of your articles using tools like Google Scholar or [Web of Science](#).
- 8) Download and use the [Altmetric bookmarklet](#) to find news, tweets, & policy documents citing your articles. Set up Altmetric alerts for key articles.

Describe the Impact of Your Work:

- 9) Borrow ideas from other people for describing your impact in [your CV](#) or [biosketch](#).
- 10) Provide context for all numerical data.

Making It Easy for People to Find You & Your Work

- [ORCID](#) Profile
New position; new lab/academic website
Can log into ORCID via UW NetID
- [Google Scholar](#) Profile
Edit profile: add affiliation; verify UW email
- [Web of Science](#) Researcher Profile
Log into Web of Science via UW Libraries.
If necessary, merge and correct profiles.
Can link to ORCID profile

I've moved!

ORCID Profile

The screenshot shows the ORCID iD profile for Diana Louden. The header includes the ORCID logo, the tagline "Connecting research and researchers", the user's name "Diana Louden", the language "English", and a search bar. The profile is divided into several sections: a top section with the ORCID iD "0000-0002-6161-5557" and a link to "Preview public record"; an "Emails" section with "dknl@uw.edu"; a "Websites & social links" section with "https://guides.lib.uw.edu/research/diana"; an "Other IDs" section with "Scopus Author ID: 57194161942" and "ResearcherID: AAY-5053-2020"; a "Names" section with "Name: Diana Louden" and "Also known as: Diana Nelson Louden, Diana K. N. Louden"; a "Biography" section with a privacy setting of "Everyone"; an "Activities" section with a "Collapse all" button; and an "Employment" section with a "Show more detail" link. The "Employment" section shows "University of Washington: Seattle, WA, US" from "2020 to present" as a "Life Sciences Librarian (UW Libraries)".

Thinking About the Impact You Want Your Work to Have

LEGISLATION AND POLICY	Legislation and Policy represents codification of research outputs and/or activities into public law, guidelines, standards or policy.
Indicators	Evidence
Committee Participation	Research study members invited to serve on advisory boards. Research study members invited to serve on committees for policy development.
Guidelines	Research study cited in development of guidelines issued by organizations.
Legislation/Regulations	Research study cited in enactment of federal, state or local legislation or regulation.
Policy	Research study cited in enactment of federal, state or local policy. Research study cited in enactment of non-governmental policy. Policy-making organizations report that research findings resulted in change in policy.
Standards	Research study cited in enactment of standards such as American National Standards Institute (ANSI) or the International Standard Organization (ISO).
Testimony/Witness	Testimony based on research outputs and/or activity is presented before a legislative body.

To recap:

- There are many libraries at the UW
- Those libraries contain a lot of resources, tools, services and people
- Library staff are connected to experts and other collections all over campus / PNW / USA / the world
- Library staff really want to help you find and use those resources
