From science to humanities, ethics to medicine, we are partners in a world where collaboration is imperative to solve the world’s issues and meet the needs of a diverse and multi-faceted student population. Our aim is to prepare leaders of change and promoters of ideas, and foster a culture of collaboration. We do this by providing resources to our researchers and administrators. The UW’s supportive climate for researchers benefits academic units by attracting top faculty and students who themselves are increasingly collaborative.

FUNDING OPPORTUNITIES

Royalty Research Fund (RRF)
uw.edu/research/or/?page=rrf

Matching Funds
uw.edu/research/or/?page=matching

Bridge Funding
