

ANNUAL REPORT

AWARDS & EXPENDITURES RELATED TO RESEARCH,
TRAINING, FELLOWSHIPS & OTHER SPONSORED PROGRAMS

FY 2019

UNIVERSITY of WASHINGTON

Dear Colleagues,

The University of Washington is one of the world's preeminent public universities in impact and funding, a testament to our culture of collaboration and the quality of our faculty, students, and staff. The UW research funding profile has grown greatly over the last twenty years with grant and contract totals of an astounding \$1.58B for fiscal year 2019. We are one of the few universities in the U.S. with total research funding over one billion. Since 1972, the UW has continued to receive more externally sponsored research funding than any other U.S. public university. Since 1969, we consistently place among the top five for total sponsored research funding for all public and private universities in the country.

The UW has a proud culture of innovation, collaboration, and discovery that has wide-ranging transformational impact as evidenced by our rankings. Jiao Tong University's Academic Ranking of World Universities placed the UW at 14th among the world's top universities. The National Taiwan University ranked the UW 7th overall and 1st in public universities worldwide for the quality and impact of its research endeavors. The UW is ranked 10th in the U.S. News & World Report's Global University Rankings (ranked 2nd among public universities).

Research is foundational to the future of the UW, and the Office of Research takes pride in creating an outstanding climate of support for UW researchers that help researchers compete and succeed.

The Office of Research, along with our partners in Grant and Contract Accounting, are pleased to present the Annual Report of Awards and Expenditures for fiscal year 2019.

Sincerely,

A handwritten signature in black ink, appearing to read "Mary Lidstrom". The signature is fluid and cursive, with a long horizontal line extending to the right.

Mary Lidstrom
Vice Provost for Research

ENHANCEMENTS TO THE ANNUAL REPORT

Over the last few years the Annual Report Team (Office of Research, Office of Sponsored Programs, Grant & Contract Accounting, and Office of Research Information Services) has made a number of changes to the Annual Report; these changes include the elimination and/or consolidation of some schedules, as well as changes to the reporting methodology. Changes to the Annual Report are listed below and the general reporting methodology can be found on Appendix 4.

Annual Report FY2019 Changes

Item	Reason
No changes	Focused on developing and delivering tools (reports, visualizations, and the RAD cube) on UW's Business Intelligence Portal with data sourced entirely from UW's Enterprise Data Warehouse (EDW).

Annual Report FY2018 Changes

Item	Reason
Reimagined Highlights section	New Highlights section matches visualization on UW's BI Portal website.
Schedule 16, figure 1 data change to count FTE by job category instead of 20 most common job titles.	New Workday payroll data allows for this type of aggregation.

Annual Report FY2017 Changes

Item	Reason
Addition of headers on all pages.	To allow for easier navigation of the Annual Report.
Regrouping of data sets.	To group data sets in a more logical manner.
Highlights, reimagined.	Effort to bring forward additional relevant summary data and analysis.
Minor changes to graphs.	To better visualize the data.
Dynamic PDF for the online Annual Report.	To allow for easier navigation of the Annual Report.
Sourcing expenditure sponsor data from electronic proposal (SAGE) dataset.	To align all sponsor data sets (proposals, awards, expenditures) and to better track originating sponsor sources.

- "Total Amount" describes award amounts in the fiscal year in which award letters were received and processed. "Total CPI Adjusted" award amounts after adjusting for inflation using the average Consumer Price Index (CPI).
- From FY2010 – 2011, additional federal funding under ARRA accounts for the higher levels of funding.
- The timing of the federal sequestration impacted award levels in FY2013 and FY2014. Federal sponsors delayed funding awards until the end of the federal FY2013, which is the beginning of UW's FY2014. This artificially decreased awards in FY2013 and artificially increased awards in FY2014.
- A ten-year, \$280M foundation award accounts for the higher level of funding in FY2017.

- A. Expenditures for Bioengineering are shared equally between the College of Engineering and the School of Medicine.
- B. Some of the expenditures for Global Health are shared equally between the School of Medicine and the School of Public Health.
- C. The School of Medicine's Dean's Office expenditures include \$8M for the Institute of Translational Health Sciences.

- A. Expenditures for Bioengineering are shared equally between the College of Engineering and the School of Medicine.
- B. Some of the expenditures for Global Health are shared equally between the School of Medicine and the School of Public Health.
- C. The School of Medicine's Dean's Office expenditures include \$8M for the Institute of Translational Health Sciences.

- These provisos are technically not sponsored projects. However, these funds are restricted funds from Washington State that are designated for research

APPENDICES

APPENDIX 1

BREAKDOWN OF FACILITIES AND ADMINISTRATIVE (F&A) COSTS BY MAJOR CATEGORY

F&A cost reimbursements are related to University expenditures. In a typical year, roughly half of the University's overhead for sponsored research maintains UW facilities supporting sponsored activity, and the other half supports central and departmental sponsored activity administration. About one third of the total F&A represents administration of sponsored activity managed within Departments, Schools, and Colleges. These funds are used by Deans and Chairs to support fiscal specialists, administrators, and other staff who assist faculty with sponsored activity - including grant proposal preparation and budget management, as well as other research-related activities.

The UW received approximately \$270 million in F&A cost reimbursements in FY2019. The pie chart represents the proportion of actual overhead costs during the University's last F&A base year (FY2013). 16.5% percent of the F&A funds represented central administrative costs used to help defray the costs of centralized research administration and compliance services, such as Research Accounting and Analysis, Human Resources, Payroll, Purchasing, Office of Research, Office of Sponsored Programs, Human Subjects Division, Environmental Health and Safety, and Office of Animal Welfare. Of the 50% spent on Facilities, a little more than half was spent on operations and maintenance of existing sponsored activity space, including paying for such costs as utilities, hazardous materials disposal, and janitorial services. The remainder paid for repairs and renovation of buildings, 'debt service' (interest) on new buildings, major equipment repair and replacement, and support for the libraries.

The PI's School or College generally receives about one-third of F&A costs through the Research Cost Recovery (RCR) allocation, as indicated above. These funds are used at the discretion of the Dean and Chairs to support research in their units.

For more information about F&A costs, see:

<https://www.uw.edu/research/policies/gim-13-facilities-and-administrative-fa-rates>

APPENDIX 2

NOTES AND DEFINITIONS

1. **Proposals:** Proposals for research projects are submitted by UW on behalf of principal investigators or program directors in response to sponsors' requests for proposals. They are the official requests for support, are generally competitive, and do not guarantee funding. Proposals may be submitted to federal, state and other governmental agencies, not-for-profit foundations, private industry and business, and other academic institutions. The number of research projects proposed will significantly exceed the number of awards received in any given year.
2. **Awards:** Awards are received by the University in response to submitted proposals. Rarely are projects funded without a formal request in the form of a proposal. Generally, awards are received either as grants or contracts and represent financial resources that have become available for covering the cost of research, service, or education and training. The award numbers do not include student loans, gifts to the UW or to the UW Foundation, or student financial aid data. Awards can be received in single or multiyear increments.
3. **Expenditures:** These represent completed financial transactions against awarded funds. The term direct expenditures as used in this report covers only those costs incurred in direct support of the specific project. Indirect Costs or Facilities and Administrative (F&A) costs are those incurred centrally by the University as reimbursement for centrally expended funds in support of the externally sponsored project. F&A costs in no way include any profit or revenue over expenses but are the real costs of supporting the research effort that are not specifically identified for each project (for example: heat, electricity and water). Our standard rates are negotiated with DHHS.
4. **Direct vs. Originating Sponsor:** A direct sponsor can refer to a sponsor who is subcontracting funds to the UW from an originating sponsor. The originating sponsor is the original source of funds. All schedules in this report display originating sponsors.
5. **Special State Provisos:** funds from the Washington State Legislature that are

restricted for project specific research purposes.

GRAPHS AND SCHEDULES

The Schedules in this report include data on 1) Proposals submitted, 2) Awards received, and 3) Expenditures made against the awards. The Office of Research and the Grant and Contract Accounting Office track and report on the data relating to proposal submission and awards.

It is important to note that schedules reporting the award data represent only funds received by the UW through the sponsored projects office. Unless otherwise noted, sponsored project awards and expenditures are independent of funds received by the University through legislative appropriations for its core educational mission and independent of philanthropic gifts received from donors.

APPENDIX 4

RECREATING ANNUAL REPORT INFORMATION USING DATA CUBES

GENERAL NOTES ABOUT DATA IN UWS SYSTEMS

Proposal, Award and Expenditure data may change over time. Proposal counts may change due to timestamps in SAGE (the System to Administer Grants Electronically). Award changes are due to funding actions being modified/cancelled. Expenditure data changes are due to budgets moving to different organization codes, reclassification of budget types/classes and changes to sponsor classifications.

The figures in this report come from the University of Washington’s Enterprise Data Warehouse (EDW). These figures can be recreated in the Research Administration Data Cube using the data methodologies listed below.

DATA METHODOLOGIES

PROPOSAL DATA

The proposal data set is generated with the following facts and filters:

Proposal Facts

- Proposal Amount
- Proposal Count

Proposal Filters

- Originating Sponsor
- Fiscal Year
- Proposal Status - include only:
 - Approved
 - Awarded
 - Denied by Sponsor
- Proposal Type - exclude:
 - Non-Competing proposals
 - Pre-Applications

AWARDS DATA

The awards data set is generated with the following facts and filters:

Award Facts

- Award Count
- Award Count

Award Filters

- Originating Sponsor
- Fiscal Year
- Department Research Reporting Name
- College Research Reporting Name

EXPENDITURE DATA

The Expenditure data set is generated with the following facts and filters:

Budget Facts

- Direct Amount
- Indirect Amount
- Total Amount

Expenditure Filters

- Originating Sponsor
- Fiscal Year
- Department Research Reporting Name – excluded “General Accounting” when looking at total UW expenditures (i.e. not required when looking at school/college expenditures)
- College Research Reporting Name
- Program Type Description

NOTE: Split Rules: The School of Medicine has agreements with the College of Engineering (for Bioengineering) and the School of Public Health (for Global Health) to split expenditures in certain organization codes. Those split rules are incorporated into the Annual Report, but are not reflected in the Research Administration Data Cube. Therefore, the totals for those units will be different in the Research Administration Data Cube.
