ADVANCED DEGREES

Students who intend to work toward advanced degrees must apply for admission to the Graduate School and meet the requirements outlined in the *Graduate School Bulletin*. No foreign language is required for the master's degrees.

MASTER OF SCIENCE IN MINING ENGINEERING. The requirements for this degree are a minimum of 45 credits, of which 36 must be in formal course work and 9 in thesis. No foreign language is required. Candidates for the degree may elect work in mining or mineral processing in accordance with their special interests. Special study in the fields of labor relations and management is available. The student may select courses in preparation for exploration and development, operation and management, engineering, or mining geology. Graduate studies in mineral processing cover the fields of metallic and nonmetallic minerals and coal, with special work on advanced theory and practice. Graduates of accredited mining engineering curricula and graduates of other accredited engineering curricula who complete the basic undergraduate courses in mining engineering and geology may become candidates.

MASTER OF SCIENCE IN COAL MINING ENGINEERING. Candidates for this degree may undertake research in the laboratories of the United States Bureau of Mines Northwest Experiment Station in cooperation with the staff of the Bureau. Study is available in mine engineering, operation, labor relations, and management. Graduates of other accredited engineering curricula must complete basic undergraduate courses in mining engineering in order to become candidates.

COURSES FOR UNDERGRADUATES

- 221 Explosives and Rock Drilling (2) Anderson**
Principles of rock breaking and excavation. Characteristics of explosives and their selection for specific uses; theory of fragmentation; design of blast and explosive loading patterns; safe practices, and elements of cost. Applications in tunneling and open pit work. Prerequisite, General Engineering 102.
- 306 Mine Excursion (1, maximum 2)**
Five-day trip to a neighboring mining region. Required in junior and senior years during Spring Vacation, or as scheduled.
- 322 Methods of Mining (4) Anderson**
Working of open pit and underground mines. Prospecting and delineation of ore bodies; shafts and developments; level planning and underground stopping methods; support systems; surface mining of placer and ore deposits; introduction to transport, drainage, ventilation, hoisting, and mine organization. Emphasis on productivity and costs. Prerequisite, 221 or permission.
- 325 Mineral Land Valuation (2) Anderson**
Sampling methods in mines and placers; drill hole and coring methods; geological aspects; estimation of deposits and reserves; metallic and nonmetallic depletion and financial calculations; reports. Prerequisite, 322.
- 330 Mine Surveying (3) Anderson**
Practice in underground methods, use of special instruments, stope measurements, underground curves, shaft surveying, solar observations, and carrying of meridian underground. Prerequisite, General Engineering 121.
- 331 Mine Mapping (1) Anderson**
Plotting of underground field notes to complete a mine control map; production of working and geological maps and sections. Prerequisite, 330.
- 425 Rock Mechanics (2) Pifer**
Physical properties of rocks; stress around workings; fragmentation by induced forces; subsidence; extracting pillars and remnants. Prerequisites, 322 and Civil Engineering 292, or permission.
- 426 Exploration and Development of Mineral Deposits (3) Pifer**
Mining geology; procurement of data by geologic mapping and drilling; solution of mine structural and fault problems; physiographic, mineralogical and structural guides to ore applied to mine exploration; exploration and development programs; evaluation of prospects. Prerequisite, Geology 427 or permission.
- 427 Exploration Geophysics: Introduction (2) Anderson**
Elementary principles of seismic, resistivity, electro-magnetic, magnetic, radiometric, and gravitational methods in exploration for ore; applications and limitations of methods. Prerequisite, junior standing.
- 432 Mine Engineering (5) Anderson**
Principles and application; design of transport systems; air compression practice and distribution; pumping plant and mine water handling; electrical equipment and distribution systems in mines; plant design and construction. Prerequisites, 322 and Electrical Engineering 303.
- 433 Mine Ventilation (3) Anderson**
Principles and practices. Physical and chemical aspects of mine atmosphere, gases, and dusts; physiological considerations, and air flow and measurement; mechanical ventilation, equipment, and systems. Prerequisite, 322.
- 463 Mineral Processing: Flotation (3) Brien**
Flotation theory and practice. Applied surface chemistry, adsorption, surface tension, theory of flocculation and dispersion and related fundamentals. Laboratory problems designed to illustrate basic chemical and physical phenomena; practical testing and investigation of flotation variables. Prerequisite, Materials Engineering 351.
- 464 Mineral Processing: Hydrometallurgy (4) Brien**
Physical-chemical principles of solution processes; acid, carbonate, ammonia leaching, cyanidation and related processes. Fundamental theory applied to effects of pressure, temperature, diffusion rates, pyrometallurgical pretreatment, activities, oxidation and reducing conditions, impurities, contact time, interphase areas and associated variables. Principles of ion exchange and solvent extraction; their application to hydrometallurgical processes. Laboratory experiments illustrate application of basic principles and demonstrate testing techniques. Prerequisites, Materials Engineering 250, Chemistry 170.
- 465 Mineral Processing: Microscopy (2) Brien**
Elements of quantitative mineragraphy, microchemistry, and mineral association and liberation studies of polished ore sections and mounted mill products; grain-count studies of mineral processing products. Prerequisites, Materials Engineering 250, 351.
- 466 Mineral Processing Practices (2) Brien**
Methods of laboratory investigation; advanced quantitative mineragraphy and research; plant operations. Prerequisites, 463 and 465.
- 467 Mineral Process Plant Design (2) Brien**
General arrangement planning and design calculations for beneficiation plants on a project basis. Prerequisites, 463, 465.

- 476 Coal Preparation (2)** **Brien**
Dry and wet cleaning processes; washability characteristics; control by float-and-sink methods; characteristics of coal and associated impurities; economics of preparation; market requirements. Prerequisite, Materials Engineering 351.
- 483 Mining Laws (1)** **Anderson**
Mineral land laws of the United States; federal, Washington State, and territorial laws. Oil and gas acts. Federal and state mine safety regulations. Canadian and other foreign laws of importance. Prerequisite, 325.
- 485 Industrial Minerals (3)** **Brien**
Nonmetallic mineral industry; sources of raw materials; processing technology and product specifications; marketing; economics, and utilization. Prerequisite, Materials Engineering 351 or equivalent.
- 499 Special Projects (*, maximum 5)**
Problems in mining or mineral processing; field or laboratory investigations on an independent basis. Total of 5 credits required.

COURSES FOR GRADUATES ONLY

- 520 Seminar (1, maximum 6)**
Lectures and discussions; review of research problems and recent literature. Required for all graduate students.
- 521 Metal Mining (*)** **Anderson, Pifer**
Production methods; mining control; support; applied efficiency methods; administration; equipment and machinery; deep-level mining; health and safety; special problems. Arranged in accordance with student's major interest.
- 522 Mine Shafts (3)** **Pifer**
Location and design, surface plant, collar preparation; sinking, mechanization and organization, support, concrete lining, stations and bottoms, equipment and maintenance, safety and costs; special attention to modern circular shafts.
- 523 Mining Stratified Deposits (*)** **Pifer**
Studies in mining, with particular reference to mechanization. Prerequisite, graduate standing.
- 525 Rock Mechanics (3)** **Pifer**
Physical characteristics and mechanics of response by rocks under stress; theories of stress distribution around underground structures; application of theory and practical application to mine design and operation sequence; rock fragmentation; methods of experimental investigation. Prerequisite, 425.
- 560 Mineral Processing (*)** **Brien**
Special problems and research.
- 561 Advanced Mineral Processing Preparation (*)** **Brien**
Unit process studies in comminution, sizing, classifying, and auxiliary processes.
- 562 Advanced Mineral Processing Laboratory (*)** **Brien**
Experimental study of theoretical principles of preparation and concentration. Arranged concurrently with 561 and 563, or as required.
- 563 Advanced Mineral Processing Theory (*)** **Brien**
Physics and chemistry of beneficiation.
- 564 Advanced Mineral Processing Design (*)** **Brien**
Plant layout studies, economics, and equipment design.
- 571 Cooperative Research with United States Bureau of Mines (6)**
- 600 Research (*)**
Prerequisite, permission of Director.
- 700 Thesis (*)**

PROSPECTOR'S COURSE

MINING ENGINEERING

- 10 Prospecting and Mining (0)** **Anderson**
Equipment for field work; prospecting methods; staking claims and mining law; sampling; mineral identification and mineralogy; map reading; blasting; timbering; prospect shafts and tunnels; mine gases and elementary ventilation. (Offered by Division of Evening Classes only.)

ENGINEERING MECHANICS

Requests for information concerning Engineering Mechanics should be addressed to Dr. E. H. Dill, Department of Aeronautical Engineering, University of Washington, Seattle 5.

The Engineering Mechanics program consists of graduate work leading to the degrees of Master of Science in Engineering and Doctor of Philosophy. The pro-

gram is a cooperative undertaking of the Departments of Aeronautical, Civil, Mechanical, and Metallurgical Engineering. It is administered by the Graduate School through a committee of members of the faculty from these departments under the chairmanship of Dr. E. H. Dill.

Students entering this program should have completed an undergraduate degree in a field such as aeronautical, civil, or mechanical engineering, physics, engineering physics, or mathematics, or an equivalent.

A student will normally enroll in one of several departments participating in the Engineering Mechanics program. A student must meet certain departmental and University requirements. For the Ph.D. degree he must also present a thesis representing original and independent investigation.

NUCLEAR ENGINEERING

Requests for information concerning the program in Nuclear Engineering should be addressed to Dr. Albert L. Babb, Department of Chemical Engineering, Nuclear Reactor Building, University of Washington, Seattle 5.

The College of Engineering offers a graduate program in Nuclear Engineering leading to the degrees of Master of Science in Engineering and Doctor of Philosophy. The Master of Science degree is designated as Major: Nuclear Engineering.

The program is a cooperative undertaking of the Departments of Chemical, Civil, Electrical, Mechanical, and Metallurgical Engineering and is administered by a faculty committee composed of representatives from these departments under the chairmanship of Dr. Albert L. Babb.

Students entering the Master of Science program should have completed in their undergraduate programs the following courses or their equivalents: Mathematics 221 (Elements of Differential Equations); Physics 320 (Introduction to Modern Physics), Physics 323 (Introduction to Nuclear Physics); Materials Engineering 250 (Fundamentals of Materials Science).

To be admitted as a candidate for the Doctor of Philosophy degree, a student must meet certain departmental and University requirements. A student will normally enroll in one of the several departments participating in the nuclear engineering program and comply with its candidacy requirements. The University requires that the student must present a thesis representing original and independent investigation and successfully pass a final examination.

REQUIREMENTS FOR THE MASTER OF SCIENCE IN ENGINEERING DEGREE (MAJOR: NUCLEAR ENGINEERING)

Nuclear Engineering	18 credits (minimum)
Advanced Mathematics	6 - 9
Physics	6 - 9
Technical Electives	6 - 0
Thesis	9
Total.....	45 credits

It is recommended that candidates for this degree include 484, 500, 501, 502, 510, and 539 among their courses. Attendance at the Graduate Seminar will normally be required for three quarters. Minor electives in a student's program may be chosen in accordance with the candidate's field of specialty. Suggested fields of study might include such courses as: Control Systems and Servomechanisms; Electronics, Chemical Separations Processes; Diffusional Operations; Numerical Analysis; Power Plant Engineering; Physical Metallurgy; Sanitary Engineering.

FACILITIES AND LABORATORIES

The following laboratories have been equipped for training and research in nuclear technology and engineering:

- Heat Transfer Laboratory
- Nuclear Instrumentation Laboratory
- Nuclear Metallurgy Laboratory
- Radioactive Tracer Laboratory
- Radioactive Waste Laboratory
- Radiochemistry Laboratory
- Reactor Theory Laboratory
- Nuclear Reactor Laboratory

At present a natural uranium-graphite subcritical reactor is used in the Reactor Theory Laboratory. An analog computer is also used here and in the Nuclear Instrumentation Laboratory to simulate the time behavior of nuclear reactor systems. An IBM 650 digital computer is used by students in conjunction with buckling, diffusion length, and effective size determinations for the subcritical reactor. In addition, an IBM 709 computer is available to students in Nuclear Engineering 510, 539, and research projects.

The nuclear engineering laboratory features a 10-kw nuclear reactor and supporting facilities housed in a new building.

The heat transfer laboratory is equipped with a complete forced circulating boiling water loop which is capable of simulating many nuclear reactor conditions. A liquid-metal heat transfer loop utilizing NaK is also available to nuclear engineering students.

Experimental programs and facilities are available from which students may select master's thesis projects for the investigation of two-phase flow, boiling heat transfer, ion exchange separations, solvent extraction in pulsed columns, engine wear problems, radiation dosimetry, waste disposal problems, metallurgy of reactor materials, reactor physics, lattice constants, effect of gamma radiation on chemical reactions and materials, and radiochemical separations.

NUCLEAR REACTOR

The University of Washington Nuclear Reactor is similar to the Argonaut reactor developed at Argonne National Laboratory. It has an initial steady-state power rating of 10 kilowatts and a maximum thermal neutron flux level of 3×10^{11} neutrons per sq. cm. per sec. The reactor is housed in a striking glass and concrete structure. The lower part of the construction is embedded in a sloping bank; whereas the upper part is completely framed in aluminum, glass, and reinforced concrete. The main laboratory and the operating console room are completely visible from the outside plaza on the upper level.

CENTER FOR GRADUATE STUDY AT HANFORD

The University of Washington assumed the administration of the school formerly known as the General Electric School of Nuclear Engineering at Richland, Washington, on July 1, 1958. This facility is now operated as the University of Washington Center for Graduate Study at Hanford. This transfer of administration was made to enhance the opportunities for continuing graduate and upper-division study available to employees of the Atomic Energy Commission and other government agencies in the area near the General Electric Company plant at Richland. In addition to the above, this facility provides further opportunities for training and experience to graduate students enrolled on the Seattle campus who desire to take advantage of them.

COURSES

444 Nuclear Materials (4)

Polonis

A lecture course covering the structure, properties, and performance of materials in

nuclear reactor applications; engineering requirements and selection of materials for reactors; technology of materials for reactor fuels, moderators, shields, control elements, and structural components; corrosion and oxidation; effects of radiation on the structure and properties of materials. Prerequisites, Physics 320, and Materials Engineering 250 or equivalent. (Offered Winter Quarter.)

445 Nuclear Materials Laboratory (2) Polonis

This course comprises a series of experiments to supplement the lecture material of 444. The experiments are designed to illustrate fundamental behavior of metals important in nuclear engineering. The principles of melting, casting, and heat treatment are covered, together with the more basic aspects of structural changes and transformation kinetics. The course will require six hours of laboratory work per week. Prerequisite, Materials Engineering 442 or 444 or permission.

484 Introduction to Nuclear Engineering (4) Babb

A survey course in nuclear engineering for seniors, graduate students, and practicing engineers. The course covers elements of reactor nuclear physics; elementary nuclear reactor theory; radiation shielding; materials of construction; chemical processes associated with nuclear reactors; heat transfer and fluid flow problems; mechanical accessories and controls; thermonuclear reactions. Prerequisites, Physics 320 and Mathematics 221. (Offered Autumn Quarter.)

485 Nuclear Instruments (3) Wilson

A lecture and laboratory course devoted to the basic design and operation of the instruments used in nuclear engineering, such as badges, dosimeters, Geiger counters, proportional counters, survey meters, scalars, radiation monitors, scintillation spectrometers, etc. Experiments will demonstrate the characteristics of nuclear instruments and associated circuitry. The operating characteristics of the 10-kw nuclear reactor will also be demonstrated. Safety practices will be emphasized throughout the course. Prerequisite, 484 or permission. (Offered Autumn and Spring Quarters.)

486 Nuclear Power Plants (3) McFeron

Study of the design, construction, operation, and maintenance of different types of nuclear power plants. Characteristics of various kinds of reactors as related to the heat-power cycle. Heat transfer problems. Engineering management of nuclear power plants. Prerequisite, senior standing in engineering or permission. (Offered Winter Quarter.)

487 Tracer Techniques in Engineering Measurements (3) Firey

A combined lecture and laboratory course demonstrating the use of radioactive materials for various engineering measurements, including mechanical wear, fluid flow, and thickness. Particular laboratory experiments will measure engine wear, engine deposits, and engine oil consumption. Prerequisite, senior standing in engineering or permission. (Offered Spring Quarter.)

500 Nuclear Reactor Theory I (5) Garlid

A lecture course in nuclear reactor physics covering nuclear reactions; production of neutrons; diffusion of neutrons, slowing down of neutrons; Fermi Age theory and applications; general theory of homogeneous multiplying systems and heterogeneous reactors. Prerequisites, Physics 323 and Mathematics 221, or permission. Equivalent of 484 and Mathematics 428 recommended. (Offered Autumn Quarter.)

501 Nuclear Reactor Theory II and Laboratory (4) Albrecht, Babb, Garlid

A continuation of 500, covering time behavior of nuclear reactors; fundamentals of reactor control; elements of perturbation and transport theory. The laboratory work will center around the natural uranium-graphite subcritical assembly. Experiments will include measurements of the scattering and absorption of neutrons, flux distributions in the subcritical assembly, lattice parameters, and studies with a reactor simulator and reactor control circuits. Diffusion length measurements will be made in the graphite thermal column and water shield tank of the 10-kw nuclear reactor. Prerequisite, 500. (Offered Winter Quarter.)

502 Nuclear Engineering Laboratory (5) Babb, Wilson

An advanced laboratory course centered around a 10-kw nuclear reactor of the Argonaut type. The first part of the laboratory course will be devoted to experiments utilizing the steady and unsteady state characteristics of the reactor, while the second part will be devoted to experiments utilizing the reactor as a source of radiation. Prerequisite, 501. (Offered Spring Quarter.)

510 Nuclear Reactor Engineering (3) Babb

An advanced course in engineering analysis of nuclear reactor systems. The course covers core design methods; heat generation and distribution in nuclear reactor systems; the removal and utilization of heat for power production; fuel cycles and processing of irradiated reactor fuels; shielding of nuclear radiations. Prerequisite, 500. (Offered Winter Quarter.)

N521, N522, 523 Graduate Seminar (0,0,1)
(Offered Autumn, Winter, and Spring Quarters.)

539 Nuclear Reactor Design (3) McFeron

A design laboratory course involving the synthesis of reactor theory, engineering analysis, material specifications, and economics to meet the design specifications for a complete nuclear reactor facility. Emphasis upon cycle analysis, hazards, arrangements, and requirements peculiar to nuclear reactor plants. Prerequisite, 510. (Offered Spring Quarter.)

550 Neutron Transport Theory (3) Garlid

A lecture course in which detailed consideration is given to neutron migration and slowing down in a variety of media and the validity of and basis for approximations currently in use. Prerequisite, 501. (Offered Autumn Quarter.)

- 559 Control of Radioactive Wastes (3)** **Bogan**
Environmental problems resulting from utilization of nuclear reactions; radioactive waste disposal practice; decontamination of water supplies; reactor site location, and control of stream and atmosphere pollution. Prerequisite, Physics 320 or permission. (Offered Winter Quarter.)
- 560 Nuclear Reactor Dynamics I (3)** **Albrecht**
Nuclear reactor dynamic equations, delayed neutron representations, response of reactors to various perturbations, operational techniques of system analysis, feedback mechanisms, stability criteria, power coefficients. Prerequisites, 501, Mathematics 427, 428. (Offered Winter Quarter.)
- 561 Nuclear Reactor Dynamics II (3)** **Albrecht**
Experimental nuclear reactor dynamics, oscillators, pulsed neutrons, stochastic processes; dynamics of heat removal system components, analysis of closed loop system, space dependent dynamics. Prerequisite, 560. (Offered Spring Quarter.)
- 588J Nuclear Chemical Separations Processes (3)** **Babb**
Application of chemical engineering principles to processing of nuclear reactor materials and irradiated fuels. Fuel cycles; properties of irradiated fuel; theory of molecular separations processes; analysis of steady state and transient characteristics of chemical processing operations. Offered jointly with Chemical Engineering. Prerequisites, 484, Chemical Engineering 570, 572, or permission. (Offered Autumn Quarter.)
- 599 Special Topics in Nuclear Engineering (*)**
Discussions and readings of topics of current interest in the field of nuclear engineering research. Subject matter may include reactor fuels and materials, reactor dynamics and control, instrumentation, thermonuclear processes, direct conversion problems. Prerequisite, permission—Dr. Albert L. Babb.
- 700 Thesis (*)**
Prerequisite, permission—Dr. Albert L. Babb.

ADDITIONAL COURSES

The following additional complementary courses are offered.

AERONAUTICAL ENGINEERING

- 567, 568 Analysis in Engineering (3,3)**
Mathematical methods for solving problems arising in engineering. 567: vector analysis, matrices, tensors, complex variables; 568: calculus of variations, Sturm-Liouville problems, series solutions and special functions for ordinary differential equations, orthogonal functions.

CHEMISTRY

- 418 Radiochemistry (3)** **Fairhall**
Natural radioactivity, nuclear systematics and reactions, radioactive decay processes, decay laws, statistical considerations, applications of radioactivity. Prerequisites, 170 and 356 or permission.
- 419 Radiochemistry Laboratory (2)** **Fairhall**
Safe handling and quantitative measurement of radioactivity, radiochemical separations, preparation of radioactive tracers, nuclear fission. Prerequisites, 395, 418 (which may be taken concurrently) or permission.

MATHEMATICS

- 427, 428, 429 Topics in Applied Analysis (3,3,3)**
427: Elementary complex variable. Prerequisite, 225 or 136.
428, 429: Orthogonal functions and boundary value problems, calculus of variations. Prerequisites, 332 or 236 for 428; 428 for 429.

MECHANICAL ENGINEERING

- 530 Radiative Heat Transfer (3)** **Dopew, McFeron**
Fundamentals of thermal radiation for black, gray, nongray, diffuse, and specular surfaces. Gaseous radiation and special applications of thermal radiation. Prerequisites, a course in differential equations and 430 or permission.
- 531 Heat Transfer (3)** **Costello, McFeron, Waibler**
Fundamentals of the conduction process and measurements. The analysis of steady-state and transient heat conduction in single and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Solutions for transient systems with unsteady boundary conditions and with moving or fixed heat sources. Prerequisites, a course in differential equations and 430.
- 532 Convective Heat Transfer (3)** **Childs, Waibler**
An introduction to fluid flow and boundary layer theory as applicable to forced- and natural-convection heat transfer. Dimensional analysis. Condensation and boiling heat transfer. The design of heat exchangers. Prerequisites, a course in differential equations and 430.

534 Experimental Heat Transfer (3)**Costello, Depew, McFeron, Waibler**

Study of instrumentation and techniques used in heat transfer measurements; investigation of conduction, radiation, and convection phenomena. Liquid metal and water heat-transfer loops will be used for experiments to determine heat flux, film coefficients, boiling pressure drops, and other phenomena of current interest. Prerequisites, 530, 531, or 532, or permission.

PHYSICS**461, 462, 463 Introduction to Atomic and Nuclear Physics (3,3,3)**

Foundations of modern atomic and nuclear physics; elementary quantum theory, elementary particles; high energy physics; solid state. Prerequisites, 327 and Mathematics 322.

RADIOLOGY**485 Radiation Dosimetry (4)****Roesch**

The measurement of radiation energy loss relationships in gases and solids; detection; techniques and circuits; units; consideration of human exposure limits. Prerequisite, permission.

FACULTY

R. W. Albrecht, *Assistant Professor; Ph.D., Michigan*

A. L. Babb, *Professor; Ph.D., Illinois*

R. H. Bogan, *Associate Professor; Sc.D., Massachusetts Institute of Technology*

M. E. Childs, *Professor; Ph.D., Illinois*

C. P. Costello, *Associate Professor; Ph.D., Stanford*

C. A. Depew, *Assistant Professor; Ph.D., California*

A. W. Fairhall, *Associate Professor; Ph.D., Massachusetts Institute of Technology*

J. C. Firey, *Professor; M.S., Wisconsin*

K. L. Garlid, *Assistant Professor; Ph.D., Minnesota*

D. E. McFeron, *Professor; Ph.D., Illinois*

R. W. Moulton, *Professor; Ph.D., Washington*

D. H. Polonis, *Associate Professor; Ph.D., British Columbia*

W. C. Roesch, *Clinical Instructor; Ph.D., California Institute of Technology*

P. J. Waibler, *Professor; Ph.D., Illinois*

W. E. Wilson, Jr., *Associate Nuclear Reactor Engineer, M.S., Washington*

COURSES INCLUDED IN ENGINEERING PROGRAMS**COLLEGE OF ARTS AND SCIENCES****CHEMISTRY****100 Chemical Science (5)**

Atoms, molecules, and chemical reactions. A survey of fundamental principles. Designed both as a terminal course for nonscience majors and as an introductory course for those who wish to continue with 101 or 140. (Note Mathematics prerequisite for 140). No credit to those who have had one unit or more of high school chemistry.

140 General Chemistry (3)

For science, engineering, and other majors who plan to take a year or more of chemistry courses. The structure of matter, atomic and molecular theory, the elements, valence and quantitative relationships. (Formerly 110.) Prerequisites, high school chemistry or 100, Mathematics 101 or passing score on algebra qualifying test.

150 General Chemistry (3)

Stoichiometry, aqueous solutions, kinetics, acid and base equilibria, electrochemistry, oxidation and reduction. Prerequisite, 140.

151 General Chemistry Laboratory (2)

Experiments illustrating the quantitative relationships in chemistry. Prerequisites, 140 and concurrent registration in 150.

160 General Chemistry (3)

Periodic System, phase equilibria, metals and nonmetals, metallurgy, and nuclear reactions. Prerequisite, 150.

170 Qualitative Analysis (3)

Semi-microqualitative analysis for common cations and anions; separation and identification procedures. Prerequisite, 160, which may be taken concurrently.

221 Quantitative Analysis (5)

Volumetric and gravimetric. Prerequisite, 170.

231 Organic Chemistry (3)

For students planning only two quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of the main types of organic compounds. Prerequisite, 101 or 150.

- 232 Organic Chemistry (3)**
Continuation of 231. Prerequisite, 231.
- 241 Organic Chemistry Laboratory (2)**
Usually to accompany 231. Preparation of representative compounds. Prerequisite, 231, which may be taken concurrently.
- 242 Organic Chemistry Laboratory (2)**
Usually to accompany 232. Preparations and qualitative organic analysis. Prerequisites, 232 (which may be taken concurrently) and 241.
- 335 Organic Chemistry (3)**
For chemistry and chemical engineering majors and other qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Prerequisite, 170, which may be taken concurrently.
- 336 Organic Chemistry (3)**
Continuation of 335. Prerequisite, 335.
- 337 Organic Chemistry (3)**
Continuation of 336. Prerequisite, 336.
- 345 Organic Chemistry Laboratory (1)**
Usually to accompany 335. Organic synthesis. Prerequisite, 335 (which may be taken concurrently).
- 346 Organic Chemistry Laboratory (1)**
Continuation of 345. Usually to accompany 336. Prerequisites, 336 (which may be taken concurrently) and 345.
- 347 Organic Chemistry Laboratory (2)**
Continuation of 346. Usually to accompany 337. Prerequisites, 337 (which may be taken concurrently) and 346.
- 355 Physical Chemistry (4)**
Introduction to quantum chemistry, statistical mechanics, kinetic theory of gases, thermodynamics. Prerequisites, 160, Mathematics 125, and college physics.
- 356 Physical Chemistry (3)**
Phase equilibria, colligative properties of solutions, chemical thermodynamics, electrolytes and electrochemistry. Prerequisites, 355 and Mathematics 126.
- 357 Physical Chemistry (3)**
Chemical kinetics, transport properties, molecular structure, the solid state, surfaces, and macromolecules. Prerequisite, 356.
- 358 Physical Chemistry Laboratory (4)**
Prerequisite, 357, or taken concurrently.
- 415 The Chemical Bond (3)**
The nature of the chemical bond, complex compounds. Prerequisite, 357.
- 416 Inorganic Chemistry (3)**
Study of the elements in relation to the periodic system. Prerequisite, 357.
- 550, 551, 552 Advanced Physical Chemistry (3,3,3)**
Thermodynamics and statistical mechanics, atomic and molecular structure, kinetic theory, and chemical kinetics. Prerequisite, 357, 415 for 551, 550 for 552, or permission.

ECONOMICS

- 211 General Economics (3)**
Condensation of 200. Primarily for engineering and forestry students; other students by permission. No credit is allowed if 200 has been taken.

GEOLOGY

- 205 Physical Geology (5)** Ellis
Prerequisite, high school chemistry.
- 206 Elements of Physiography (5)** Mackin
Processes and agencies affecting the earth's surface; relationship of topography to structure. Prerequisite, 101 or 205.
- 207 Historical Geology (5)** Wheeler
Origin and evolution of the earth, with emphasis on general geological history of North America. Prerequisites, 205 or permission.
- 221 Crystallography and Sulfide Mineralogy (3)** Ellis
Study of crystal morphology, the relation of crystal form to the space lattice, and introduction of mineralogy of the sulfides. Prerequisite, 205.
- 222 Mineralogy (3)** Ellis
Descriptive mineralogy of more than one hundred common minerals (excluding sulfides). Prerequisite, 221.
- 310 Geology for Engineers (5)** Barksdale
Elements for civil engineers. Prerequisite, civil engineering major or permission.
- 340 Structural Geology (5)** McKee
Interpretation of rock structures and their genesis. Prerequisites, 205, 206, 207, and General Engineering 103. (Formerly 308.)

- 361 Stratigraphy (5)** **Wheeler**
Systematic study of spatial relations of surface-accumulated rocks and their space-time implications. Prerequisites, 205, 206, 207, and 320.
- 423 Optical Mineralogy (5)** **Vance**
Petrographic microscope and recognition of common minerals in thin section. Prerequisites, 205 and 221.
- 424 Petrography and Petrology of Igneous Rocks (5)** **Vance**
Systematic study of rocks with the petrographic microscope. Prerequisite, 423.
- 425 Petrography and Petrology of Metamorphic Rocks (5)** **Vance**
Systematic study of metamorphic rocks and their origin. Prerequisite, 424.
- 487 Ore Deposits (5)** **Ellis**
Form, structure, mineralogy, petrology, and mode of origin. Prerequisites, 222 and 424. (Formerly 427.)

MATHEMATICS

- 103 Intermediate Algebra and Trigonometry (3)**
Meets five hours per week. First four weeks, review of intermediate algebra. Last six weeks, plane trigonometry, equivalent to 104. Not open for credit to students who have taken trigonometry in high school. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, and one year of plane geometry.
- 104 Plane Trigonometry (3)**
Trigonometric functions, identities, equations, inverse functions, graphs, logarithms, and solution of triangles. Not open for credit to students who have taken trigonometry in high school. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, and one year of plane geometry.
- 105 College Algebra (5)**
Real and complex number systems; sets and equations; simultaneous equations and matrices; inequalities; functions and relations; algebraic, exponential and logarithmic functions. Not open to students who have taken 155, 156. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, or 103.
- 114 Elementary Computer Programming (2)**
Programming and coding of problems for automatic digital computers. Flow charts, loops, subroutines. Codes written will be executed by machine. Prerequisite, 101 or equivalent.
- 124, 125, 126 Calculus with Analytic Geometry (5,5,5)**
Plane analytic geometry, differentiation of algebraic and transcendental functions, anti-derivatives, definite integrals, technique of integration, vector algebra, solid analytic geometry, multiple integrals, partial derivatives, simple differential equations. Applications. Prerequisites, four years of high school mathematics and qualifying test, or 104 (or 103 or exemption by qualifying test) and 105 (or 156) for 124; 124 or 134 for 125; 125 or 135 for 126.
- 134, 135, 136 Calculus with Analytic Geometry (5,5,5)**
Honors sections of 124, 125, 126 Prerequisites, four years of high school mathematics and permission.
- 221 Elements of Differential Equations (3)**
Elementary methods of solution, linear differential equations of second and higher order. Students planning to take 224 and 225 are advised to skip this course and to take 322 after the completion of 225. Prerequisite, 126 or 136.
- 224, 225 Intermediate Analysis (3,3)**
Real numbers, induction, functions, sequences, limits, continuity, infinite series, power series, Taylor series, series of functions, Rolle's theorem, mean value theorem, inverse functions, l'Hospital's rule, fundamental theorem of calculus, improper integrals. Prerequisites, 126 or 136 for 224; 224 for 225.
- 322 Principles of Differential Equations (3)**
Linear systems, existence of solutions, solution by series, special functions. Prerequisite, 225 or 136.
- 324 Advanced Calculus I (3)**
Functions of several variables, transformations and mappings, implicit function theorem. Prerequisite, 225 or 136.
- 325 Advanced Calculus II (3)**
Vector analysis, theorems of Stokes, Gauss, and Green. Prerequisite, 225 or 136; (324 desirable).
- 374 Principles of Digital Computers and Coding (5)**
High-speed digital computation, number systems, machine components, programming, operation. Three hours lecture, four hours laboratory per week with problems run on a high-speed machine. Prerequisites, 114 and 124 (or 134), and permission of instructor.
- 391 Elementary Probability (3)**
Sample space, random variables, laws of probability. Combinatorial probabilities. Distributions: binomial, normal; expectation, variance. Prerequisite, 126 or 136.
- 401 Matrices (3)**
Determinants; the algebra of matrices; groups of transformations. Prerequisite, 126, or 136, or 130

427, 428, 429 Topics in Applied Analysis (3,3,3)

427: Elementary complex variable. Prerequisite, 225 or 136. 428, 429: Orthogonal functions and boundary value problems, calculus of variations. Prerequisites, 322 or 236 for 428; 428 for 429.

464 Numerical Analysis I (3)

Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Laboratory work on desk calculators. Prerequisite or corequisite, 221 or 322.

465 Numerical Analysis II (5)

Numerical methods in algebra. Systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Three hours lecture and four hours laboratory per week on a high-speed machine. Prerequisites, 374, 401, 404, and 464.

466 Numerical Analysis III (5)

Numerical differentiation and integration. Solution of differential equations and systems of such equations. Three hours lecture and four hours laboratory per week on a high-speed machine. Prerequisites, 374 and 464.

481 Calculus of Probabilities (5)

Fundamental concepts; discrete and continuous random variables; mathematical expectations; law of large numbers; important types of distributions; characteristic functions; central limit theorem. Prerequisites, 225 and 391, or permission.

PHYSICAL AND HEALTH EDUCATION**Health Education****110 Health Education (Women) (2)****Gaines, Horne**

Current health information, with emphasis on women's responsibilities in application of health knowledge to attitudes and practices in modern and future life. Required of all freshman women; exemption without credit by examination.

175 Personal Health (Men) (2)

Health information that affords a basis for intelligent guidance in the formation of health habits and attitudes. Required of all freshman men; exemption without credit by examination.

Physical Education Activities**101 through 255 Physical Education Activities (Men) (1 each)**

101, adapted activities; 106, handball; 107, basketball; 108, tennis; 109, softball; 110, golf (\$1.50 per quarter); 111, track; 112, crew (class), prerequisite, swimming; 114, boxing; 115, gymnastics; 117, wrestling; 118, volleyball; 119, swimming; 121, touch football; 122, badminton; 123, archery; 124, calisthenics (body conditioning); 125, skiing; 126, aerial ball; 127, bowling (\$5.00 per quarter); 128, weight-training; 129, sailing; 131, beginning, 134 intermediate, folk and square dancing; 151, modern dance; 154, social dance; 157, canoeing (\$3.00 per quarter); 141, freshman, 241, varsity, basketball; 142, freshman, 242, varsity, crew; prerequisite, swimming; 143, freshman, 243, varsity, football; 144, freshman, 244, varsity, track; 145, freshman, 245, varsity, swimming; 146, freshman, 246, varsity baseball; 147, freshman, 247, varsity, tennis; 148, freshman, 248, varsity, golf; 149, freshman, 249, varsity, skiing; 150, freshman, 250, varsity, volleyball; 152, freshman, 252, varsity, gymnastics; 155, freshman, 255, varsity, wrestling.

111 through 162; 211 through 267 Physical Education Activities (Women) (1 each)

111, adapted activities (restricted); 112, basic activities (general); 114, basic activities (applied); 115, archery; 118, badminton; 119, body conditioning; 121, bowling (\$5.00 per quarter); 124, fencing; 126, golf (\$1.50 per quarter); 128, riding; 129, sailing; 131, ski conditioning; 132, elementary skiing; 133, tumbling and apparatus; 134, rebound tumbling; 135, tennis; 141, basketball; 142, field sports; 143, hockey; 144, softball; 145, volleyball; 148, folk and square dance; 149, international folk dance; 151, contemporary dance; 154, social dance; 155, tap dance; 157, canoeing (\$3.00 per quarter); 160, adapted swimming; 161, beginning swimming; 162, elementary swimming; 215, intermediate archery; 218, intermediate badminton; 221, intermediate bowling (\$5.00 per quarter); 222, advanced bowling (\$5.00 per quarter); 224, intermediate fencing; 228, intermediate riding; 230, ski racing; 231, intermediate skiing; 232, advanced skiing; 235, intermediate tennis; 248, intermediate folk and square dance; 251, intermediate contemporary dance; 252, advanced contemporary dance; 257, intermediate canoeing (\$3.00 per quarter); 263, intermediate swimming; 264, advanced swimming; 265, aquatic art; 266, diving; 267, lifesaving.

PHYSICS**217, 218, 219 Physics for Engineers (4,4,4)****Lord**

217: mechanics. Principles of statics are assumed. Dynamics of both point masses and rigid bodies is developed by calculus methods. Elasticity and simple harmonic motion. Elementary hydrodynamics. Many illustrative problems are used. Prerequisites, high school physics. General Engineering 112, introductory calculus, and a concurrent calculus course. 218: electricity and magnetism. Alternating currents. Prerequisites, 217 and a concurrent calculus course. 219: heat, sound, and light. Geometrical and physical optics. Prerequisites, 217 and calculus.

320 Introduction to Modern Physics (3)

Discoveries in modern physics particularly basic to engineering and physics, including the electrical nature of matter, elementary particles, interaction of radiation with matter, nuclear disintegrations. Solid state, semiconductors, and nuclear reactors are especially treated. Prerequisites, 123, 219, or permission.

323 Introduction to Nuclear Physics (3)

A study of nuclear reactions, including fission, particle accelerators, and nuclear instrumentation; cosmic rays; astrophysics; applications of nuclear phenomena in atomic energy; use of tracers, etc. Prerequisite, 320 or permission.

461, 462, 463 Introduction to Atomic and Nuclear Physics (3,3,3)

Foundations of modern atomic and nuclear physics; elementary quantum theory; elementary particles; high energy physics; solid state. Prerequisites, 327 and Mathematics 322.

SPEECH**327 Extempore Speaking (3)****Franzke**

A course in public speaking primarily for students in engineering and industrial design. Audience analysis, choice and organization of material, oral style, and delivery. Frequent speeches before the class, followed by conferences with instructor.

COLLEGE OF BUSINESS ADMINISTRATION**ACCOUNTING****210 Fundamentals of Accounting (3)**

Basic principles and procedures including recording of business transactions and preparation of financial statements. (Formerly 150.) Prerequisite, sophomore standing.

220 Fundamentals of Accounting (3)

Elements of manufacturing, partnership, and corporation accounting. (Formerly 151.) Prerequisite, 210.

230 Basic Accounting Analysis (3)

Financial and cost analysis and interpretation. (Formerly 255.) Prerequisite, 220.

311 Cost Accounting (3)

Theory of cost accounting; accumulation and allocation of costs; managerial control through cost data. (Formerly 330.) Prerequisite, 230.

BUSINESS LAW**307 Business Law (3)**

A survey for non-Business Administration students who are unable to take more than 3 credits in business law. Not open for credit to Business Administration students. Prerequisite, permission.

FINANCE**320 Money, Financial Institutions, and Income (4)**

Nature and functions of money, debt and credit, and liquidity; financial institutions and the flow of funds in the economy; income and monetary theory; and introduction to money market analysis. (Formerly 201.) Prerequisites, Economics 200, Accounting 230.

350 Business Finance (4)

Sources, uses, cost, and control of funds in business enterprises; financial importance of the enterprise (especially the corporation) in the economy; internal management of working capital and income; sources and cost of long-term funds; financing of growth and expansion of business enterprises; government regulation of the financial process. (Formerly 301.) Prerequisite, 320.

HUMAN RELATIONS IN BUSINESS AND INDUSTRY**365 Human Behavior in Organizations (3)**

Contents and instructional approach similar to 460 with emphasis on human aspects of labor relations and on administrative behavior. Not open to Business Administration students.

RESERVE OFFICERS TRAINING PROGRAMS

RESERVE OFFICERS TRAINING PROGRAMS

THE DEPARTMENTS of Military Science, Naval Science, and Air Science conduct the ROTC programs under agreements between the University and the United States Army, Navy, and Air Force. At the University these programs are coordinated by the Dean of the College of Engineering.

The University requires male students to take at least two years of ROTC training. (For exemptions, see page 112.) The two-year basic programs offered by the Departments of Military Science and Air Science, and the four-year course offered by the Department of Naval Science, satisfy this requirement. In addition to the basic courses, the Department of Military Science and the Department of Air Science each offers for selected students, an advanced course which leads to commissioning in the Army or Air Force. The four-year course of the Department of Naval Science, also for selected students, leads to commissioning in the Navy or Marine Corps.

Students enrolling in Naval ROTC, and those who take the advanced course of Army or Air Force ROTC must agree in writing to complete the course of training and accept a commission in the service for which they are trained. *The honoring of this commitment is a condition of graduation from the University.*

MILITARY SCIENCE

Professor of Military Science COL. GUINN B. GOODRICH, 318 Miller Hall

The basic program (freshmen and sophomores) of the Military Science Department requires drill one hour each week. Classroom military studies for freshmen are not required Autumn Quarter. One hour per week is required Winter Quarter, and two hours of classroom work are required Spring Quarter. As a substitute for these classroom hours in Autumn Quarter of the freshman year, registration is required in a selected 3-credit or 5-credit course in another department. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*. Sophomores are required to attend two hours per week of classroom military studies. The advanced course requires classroom attendance four hours each week, drill one hour each week, and a summer camp of six weeks in the Summer Quarter following the junior year. In addition to the regular courses of instruction, light aircraft flight instruction is offered to a limited number of senior cadets, when federal funds are available.

When a cadet completes the advanced course, and is graduated from the University, he receives a commission as second lieutenant in the United States Army Reserve. A cadet graduating with a high academic rating and an outstanding ROTC record may be designated a Distinguished Military Graduate and may, thereby, be qualified for commissioning in the Regular Army.

Cadets for the advanced course are selected from applicants who show special aptitude during the basic course. In certain cases, previous active service in the army may be substituted for the basic course in qualifying for enrollment in the advanced course. To enroll in the advanced course, a cadet must meet requirements as to scholarship, physical fitness, and leadership potential, and must be of such an age that he may qualify for graduation and completion of ROTC training before his twenty-eighth birthday. The advanced ROTC cadet receives an allowance of approximately \$27.00 per month throughout the two years in which he is under contract and is paid approximately \$106 for summer-camp training.

Cadets are issued the regulation U.S. Army uniform, with distinctive ROTC insignia, and are required to wear the uniform on drill day each week. Upon registration a deposit of \$25.00 is required for the uniform and other government equipment issued. Upon return of the uniform and other equipment, a refund is made. The Army furnishes textbooks and equipment needed for military science instruction.

Inquiries about the Army ROTC should be addressed to the Professor of Military Science.

COURSES FOR UNDERGRADUATES

- 101, 102, 103 Military Science I—Basic (0,1,2)**
Organization of the Army and ROTC; United States Army and National Security; individual weapons and marksmanship; leadership training.
- 201, 202, 203 Military Science II—Basic (2,2,2)**
American military history; map and aerial photograph reading; introduction to basic tactics and techniques; leadership training and exercise of command.
- 301, 302, 303 Military Science III—Advanced (3,3,3)**
Small unit tactics and communication; organization, function, and mission of the arms and services; military teaching principles; leadership; exercise of command.
- 360 Military Science III—Advanced Camp (3)**
Six-weeks training at an army installation. Emphasis is placed on field training and the practical application of subjects taught during the academic year. (Offered Summer Quarter only.)
- 401, 402, 403 Military Science IV—Advanced (3,3,3)**
Supply and evacuation; troop movements; motor transportation, command and staff; estimate of the situation and combat orders; military intelligence; the military team; training management; military administration; military justice; role of the United States in world affairs and the present situation; leadership; officer indoctrination; and exercise of command.

NAVAL SCIENCE

Professor of Naval Science: CAPT. HAROLD P. GERDON, USN, 309 Clark Hall

The Department of Naval Science offers to selected students a four-year program, taken concurrently with their work toward a baccalaureate or higher degree, which prepares them for commissions in the regular or reserve components of the United States Navy or Marine Corps.

NAVAL ROTC STUDENTS (CONTRACT PROGRAM)

At the beginning of Autumn Quarter each year the Professor of Naval Science selects approximately fifty students to enter the Naval ROTC contract program. These students must have the following general qualifications:

1. Be eligible for admission to the University.
2. Be male citizens of the United States between the ages of seventeen and twenty-one on July 1 of the year of entrance.

3. Meet physical requirements, which include vision of 20/20, no cavities in teeth, and height between 64 and 78 inches.

4. Be unmarried and agree to remain unmarried until commissioned.

In addition, with the consent of their parents, they must agree to complete the four-year course unless released by the Secretary of the Navy, and to make one summer cruise of approximately three weeks. This cruise is normally scheduled during the summer between the junior and senior years.

Students who attain junior or senior standing in the Naval ROTC must complete the program as a condition of graduation from the University unless excused or dismissed from this requirement by authority of the Secretary of the Navy.

Entrance to the Naval ROTC program entitles students to deferment from the draft under the Selective Service Act of 1948 as amended. The Naval ROTC student, upon completion of program requirements, is required to accept a commission in the United States Naval Reserve or Marine Corps Reserve, if offered. Active duty of reserve officers commissioned from the Naval ROTC contract program is contingent upon the needs of the service at the time of graduation.

Naval ROTC students have the status of civilians entering into a mutual agreement with the Navy, and are in training for commissions in the Naval Reserve or Marine Corps Reserve. They pay their own college expenses but receive a subsistence allowance of 90 cents a day during their junior and senior years, including the intervening summer. The Navy furnishes the uniforms and books used in naval science courses.

Students in the Naval ROTC program may enter any University curriculum that can normally be completed in four years. Students working toward a bachelor's degree in certain fields which may require more than four years for completion, such as engineering, architecture, and education are eligible for entrance to the program. The Navy Class A swimming test must be passed and basic psychology and mathematics through trigonometry satisfactorily completed (unless previously completed in high school) by the end of the second year.

All Naval ROTC students take the same naval science courses for the first two years. Students who plan to be commissioned in the Marine Corps or Marine Corps Reserve take Marine Corps subjects during their third year and the first two quarters of their fourth year; those who plan to be commissioned in the Supply Corps of the Navy or the Naval Reserve take Supply Corps subjects during this period.

High school graduates interested in entering the Naval ROTC program should write to the Professor of Naval Science during the summer before University entrance.

MIDSHIPMEN, USNR (REGULAR PROGRAM)

Each year, at the beginning of Autumn Quarter, the Navy assigns a limited number of students to the Naval ROTC Unit, University of Washington, for appointment as midshipmen in the Naval Reserve. Qualifications are, in general, the same as those listed above for contract students. Midshipmen are appointed after a nation-wide competitive examination held in December of each year and selection by state selection committees. They are deferred from induction until graduation and receive tuition, all textbooks, uniforms, and \$50.00 per month for four years. Application to take the annual examination must reach the appropriate Naval Examining Section before a deadline date set in November of each year for entrance to college the following year.

Applications and further information about the regular program may be obtained from the University Naval ROTC headquarters.

COURSES FOR UNDERGRADUATES

111, 112, 113 Naval Orientation (3,3,3)

Naval courtesy and customs; leadership; naval history; naval regulations; ship construction and characteristics; standard ship organization; orientation in underseas, amphibious, logistics, communications, security, intelligence, seamanship, and rules-of-the-road phases of the naval service.

- 211 Naval Weapons (3)**
Gun ammunition; principles of gun construction; semi-automatic and rapid fire guns; introduction to fire control; theory and operation of fire control systems; general concept of anti-submarine warfare.
- 212 Naval Weapons (1)**
Practical work on naval weapons and fire control computers.
- 213 Naval Weapons (3)**
Guided missiles; nuclear weapons; concept and organization of the attack carrier striking force; mine warfare; concept and organization of amphibious warfare; space technology.

LINE

- 311 Naval Engineering (3)**
Principles of ship propulsion, marine steam power plants and auxiliary systems; elements of stability and damage control.
- 312 Naval Engineering and Navigation (3)**
Engineering department organization and administration plus marine internal combustion and nuclear power plants; terrestrial navigation including dead reckoning, piloting and electronic developments.
- 313 Navigation (3)**
Celestial navigation; theory and practical work required in the daily work of the navigator at sea.
- 411 Naval Operations (3)**
Tactical communications; rules of the nautical road; maneuvering board; screening instructions.
- 412 Naval Operations and Administration (3)**
Combination of fleet communications, weather, and management.
- 413 Naval Administration (3)**
Leadership, management, and the naval judicial system.

MARINE CORPS

- 321 Evolution of the Art of War (3)**
Introduction to the art of war; broad resumé of the evolution and history of warfare from the earliest recorded battles through the Mexican War.
- 322 Evolution of the Art of War (3)**
A continuation of the resumé of the history of warfare with emphasis on the Civil War; brief coverage of the Spanish American War, World War I, and World War II.
- 323 The Study of Modern Basic Strategy and Tactics (3)**
An introduction to the theoretical principles of modern strategy and tactics; brief resumé of U.S. foreign and military policy; extensive discussion of marine division organization.
- 421 Amphibious Warfare (3)**
Introduction to the development of amphibious warfare; detailed study of the amphibious campaigns of World War II; resumé of the Korean conflict.
- 422 Amphibious Warfare (3)**
A study of the detailed planning for an amphibious operation including Marine Corps Staff organizations, command relationship and task organizations.
- 423 Military Justice and Leadership (3)**
Introduction to the basic principles of the Uniform Code of Military Justice; a study of the principles of military leadership.

SUPPLY CORPS

- 331 Organization and Logistics Navy Accounting and Finance (3)**
Introduction to supply corps; national security organization; Navy Bureau system; supply demand control point concepts; naval finance, appropriation, property, and cost accounting.
- 332 Advanced Navy Accounting and Basic Supply Afloat (3)**
Navy accounting, balance sheet reconciliation; reports and returns; organization and administration of supply afloat; afloat requirements determination and stock control.
- 333 Advanced Supply Afloat (3)**
Afloat custody and stowage and security of material; surveys, issues, transfers, and financial management of afloat inventories; special supply system.
- 431 Ship's Store Afloat; Clothing and Small Stores (3)**
Operating procedure, records, reports, and returns for ship's store afloat; operating procedures, records, reports, and returns for clothing and small stores afloat.

AIR SCIENCE

Professor of Air Science: COL. ROY W. GUSTAFSON, Physics Annex 3

The basic program of the Department of Air Science consists of three quarters of military classroom instruction on the Foundations of Air Power. These are offered in the Spring Quarter of the first year and the Autumn and Winter Quarters of the second year. During each of the other three quarters, the student must

substitute an approved University course in lieu of Air Science. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*. Leadership laboratory is required each of the six quarters of the basic program and is conducted one hour each week.

After completing the basic program, students may apply for entrance to the Advanced Air Force ROTC, which is designed to select and train college men as future Air Force officers. A limited number of outstanding students, including veterans are selected for the advanced program, and each student selected must:

1. Successfully complete the two-year Basic Air Force ROTC program or, if a veteran, complete as much of the basic program as determined by the Professor of Air Science.
2. Execute a written agreement with the government to complete the advanced program, contingent upon remaining at the University, and to attend a summer training camp at the time specified.
3. Request immediate discharge from any reserve or National Guard organization other than the Air Force Reserve (according to law, discharge from any reserve unit must be granted).
4. Agree to complete all requirements for appointment as a second lieutenant before his twenty-eighth birthday. This age requirement is reduced to twenty-six and one-half years for flying personnel.
5. Successfully complete general survey and screening tests as prescribed.
6. Be selected by the Professor of Air Science and the President of the University.
7. Complete the advanced program as a prerequisite for graduation from the University.

The two-year advanced course requires classroom attendance four hours a week, plus one hour of practice in the leadership laboratory. In the first year of the advanced course, cadets study the knowledge and skills required of a junior officer in the Air Force with special emphasis on staff duties and leadership. This includes Air Force leadership doctrine, staff organization and functions, communicating, instructing, problem solving techniques, leadership principles and practices, and the military justice system. Between the junior and senior years, advanced-course cadets are required to attend a four-week summer camp. During the senior year, cadets participate in a study of global relations of special concern to the Air Force officer with attention to such aspects as weather, navigation, geography, international relations and their service as commissioned officers.

Advanced Air Force ROTC students are paid subsistence allowances of approximately \$27.00 a month. While attending summer camp they are paid at the rate of \$75.00 a month and are furnished travel to and from the camp, subsistence, housing, uniforms, and medical attention.

Students in the basic program are furnished complete uniforms of the type worn by Air Force personnel. Students in the advanced program are furnished officers' uniforms which become their personal property when commissioned. They are normally required to wear the uniform on drill days; wearing it to ROTC classes other than drill is optional. The Air Force furnishes all textbooks used in air science courses. At the time of registration each student must make a \$25.00 deposit, which, except for a \$2.50 laundry and cleaning charge to students in the basic program, is refunded when the uniform and textbooks are returned undamaged.

Inquiries about enrollment or other information should be addressed to the Professor of Air Science, Physics Annex 3, University of Washington.

COURSES FOR UNDERGRADUATES

FOUNDATIONS OF AIR POWER AND FUNDAMENTALS OF AEROSPACE WEAPON SYSTEMS

133 Air Science 1—Basic (2)

A general survey of air power designed to provide an understanding of the elements and potentials of aerospace power. An introduction to elements of aircraft, aerodynamics, and space vehicles. Leadership laboratory.

231 Air Science 2—Basic (2)

An outline of professional opportunities in the USAF. Also included are the background of the military policy of the United States and the current national organization for defense. Aerospace missiles and aircraft, their propulsion systems, and the types of warheads used with aerospace weapon systems are also introduced. Cadet noncommissioned officer training.

232 Air Science 2—Basic (2)

An introduction to the principles, mechanics, and implications of chemical, biological, and nuclear weapons and warfare; and the defensive, strategic, and tactical organizations and operations of the USAF, including modern targeting and electronic warfare. Also introduces problems, mechanics, and military implications of future space operations, and contemporary aerospace military thought. Cadet noncommissioned officer training.

AIR FORCE OFFICER DEVELOPMENT**301 Air Science 3—Advanced (3)**

Staff organization and functions and the skills required for effective staff work, with emphasis on communication. The course includes both principles and practice. Cadet junior officer training.

302 Air Science 3—Advanced (3)

Continuation of the study of staff work with emphasis on report writing and group problem solving. The course includes an introduction to military justice. Cadet junior officer training.

303 Air Science 3—Advanced (3)

Basic psychological and sociological principles of leadership and their application to leadership practice and problems. Cadet junior officer training.

304 Air Science 3—Advanced Camp (3)

Four weeks training at an Air Force base; familiarization with the duties and problems encountered by the Air Force junior officer.

491, 492, 493, Air Science 4—Advanced (3,3,3)

Military application of weather and aerial navigation; military aspects of the geography of climate, political geography, and international relations; flight training for pilot candidates; preparation for commissioned service; and cadet senior officer training.

**FACULTY OF THE
COLLEGE OF ENGINEERING**

FACULTY OF THE COLLEGE OF ENGINEERING

COLLEGE OF ENGINEERING FACULTY

A single date following the name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present rank.

AERONAUTICAL ENGINEERING

- Bagnall, Leslie M., 1961, *Instructor in Aeronautical Engineering*
B.S. in A.E., 1951, Michigan; M.S. in Engr., 1957, Southern Methodist
- Bollard, Richard John H. 1961, *Professor of Aeronautical Engineering*;
Chairman of the Department of Aeronautical Engineering
B.E. in C.E., 1948, M.E. in Struct. E., 1949, University of New Zealand; Ph.D. 1954, Purdue
- Dill, Ellis Harold, 1956 (1959), *Associate Professor of Aeronautical Engineering*
B.S. in C.E., 1954, California; M.S. in C.E., California; Ph.D. in C.E., 1956, California
- Dusto, Arthur R., 1961, *Instructor in Aeronautical Engineering*
B.S. in Eng. Mech., 1952, Purdue; M.S. in A.E., 1961, Washington
- Eastman, Fred Scoville, 1927 (1943), *Professor of Aeronautical Engineering*
B.S. in E.E., 1925, Washington; M.S. 1929, Massachusetts Institute of Technology.
- Fyfe, Ian Millar, 1959, *Assistant Professor of Aeronautical Engineering*
A.R.T.C. in M.E., 1950, The Royal College of Science and Technology, Scotland; M.M.E. in M.E., 1954, Delaware; Ph.D. in Engineering Mechanics, 1958, Stanford University
- Ganzer, Victor Martin, 1947 (1953), *Professor of Aeronautical Engineering*
B.A. in Math., 1933, Augustana College (Illinois); B.S. in A.E., 1941, Washington
- Joppa, Robert Glenn, 1945 (1957), *Associate Professor of Aeronautical Engineering*
B.S. in A.E., 1945, M.S. in A.E., 1951, Washington
- Martin, Harold Clifford, 1948 (1952), *Professor of Aeronautical Engineering*
B.S. in M.E., 1934, M.S., 1937, New York; Ph.D., 1950, California Institute of Technology
- Miele, Angelo, 1962, *Visiting Professor of Aeronautical Engineering*
Dr. C.E., 1944, Dr. Ae.E., 1946, University of Rome, Italy
- O'Brien, Timothy Frederick, 1956 (1958), *Associate Professor of Aeronautical Engineering*
B.S. in A.E., 1947, M.S. in A.E., 1951 Massachusetts Institute of Technology
- Rae, William Howard, Jr., 1956 (1959), *Assistant Professor of Aeronautical Engineering*
B.S. in A.E., 1953, M.S. in A.E., 1959, Washington
- Street, Robert Elliott, 1948 (1955) *Professor of Aeronautical Engineering*
B.S. in Physics, 1933, Rensselaer Polytechnic Institute; A.M., 1934, Ph.D. 1939, Harvard

CHEMICAL ENGINEERING

- Atwood, Glenn Arthur, 1959, *Instructor in Chemical Engineering*
B.S. in Ch.E., 1957, M.S. in Chem.E., 1959, Iowa State College
- Babb, Albert Leslie, 1952 (1960), *Professor of Chemical Engineering;*
Director of the Nuclear Reactor Laboratories
B.A.Sc., 1948, British Columbia; M.S., 1949, Ph.D., 1951, Illinois
- David, Morton Morris, 1953 (1957), *Associate Professor of Chemical Engineering*
B.S., 1942, Colorado; D.Eng. in Ch.E., 1950, Yale
- Fosberg, Theodore Michael, 1960, *Instructor in Chemical Engineering*
B.S. in Chem.E., 1959, Washington
- Carlid, Kermit L., 1960, *Assistant Professor of Chemical Engineering*
B.S. in Chem.E., 1956, Ph.D., 1961, Minnesota
- Heideger, William Joseph, 1957, *Assistant Professor of Chemical Engineering*
B.S., 1954, Carnegie Institute of Technology; M.S.E., 1955, Princeton; Ph.D., 1959, Princeton
- Johanson, Lennart Nobel, 1951 (1956), *Associate Professor of Chemical Engineering*
B.S., 1942, Utah; M.S., 1943, Ph.D. 1948, Wisconsin
- McCarthy, Joseph Le Page, 1941 (1952), *Professor of Chemical Engineering;*
Dean of the Graduate School
B.S. in Ch.E., 1934, Washington; M.S., 1936, Idaho; Ph.D., 1938, McGill
- Moulton, Ralph Wells, 1941 (1950), *Professor of Chemical Engineering;*
Chairman of the Department of Chemical Engineering
B.S. in Ch.E., 1932, M.S. in Ch.E., 1934, Ph.D., 1938, Washington
- Sarkanen, Kyosti Vilho, 1961, *Lecturer in Chemical Engineering*
B.Sc., 1947, Helsinki, M.Sc., 1952, Ph.D. 1956, State University College of Forestry (New York)
- Sleicher, Charles A., Jr., 1960 (1961), *Associate Professor of Chemical Engineering*
Sc.B., 1944, Brown; S.M., 1949, Massachusetts Institute of Technology; Ph.D., 1955, Michigan

CIVIL ENGINEERING

- Bogan, Richard Herbert, 1954 (1957), *Associate Professor of Civil Engineering*
B.S. in C.E., 1949, Washington; S.M., 1952, Sc.D., 1954, Massachusetts Institute of Technology
- Campbell, Thomas Herbert, 1945 (1955), *Professor of Civil Engineering*
B.S. in C.E., 1934, Washington; M.S. in C.E., 1938, Massachusetts Institute of Technology
- Carlson, Dale Arvid, 1955 (1961), *Associate Professor of Civil Engineering*
B.S. in C.E., 1950, M.S. in C.E., 1951, Washington; Ph.D. 1960, Wisconsin
- Chenoweth Harry Holt, 1946 (1957), *Associate Professor of Civil Engineering*
B.S. in C.E., 1937, M.S. in C.E., 1957, Washington
- Chittenden, Hiram Martin, 1923 (1949), *Associate Professor of Topographic Surveying*
B.S. in C.E., 1920, C.E., 1935, Washington
- Clanton, Jack Reed, 1947 (1958), *Professor of Civil Engineering*
B.S. in C.E., 1936, Missouri School of Mines; M.S. in C.E., 1939, Pittsburgh
- Colcord, Josiah Edward, Jr., 1949 (1957), *Associate Professor of Civil Engineering*
B.S., 1947, Maine; M.S. in C.E., 1949, Minnesota
- Ekse, Martin Ingvald, 1948 (1957), *Professor of Civil Engineering*
B.S., 1932, South Dakota State; M.S., 1948, Wisconsin
- Farquharson, Frederick Burt, 1925 (1940), *Professor of Civil Engineering;*
Director of the Engineering Experiment Station
B.S. in M.E., 1923, M.E., 1927, Washington
- Harris, Charles William, 1906 (1951), *Professor Emeritus of Hydraulic Engineering;*
Research Consultant
B.S. in C.E., 1903, Washington; C.E., 1905, Cornell
- Hartz, Billy J., 1955 (1957), *Associate Professor of Civil Engineering*
B.S. (C.E.), 1952, M.S. (C.E.), 1954, Ph.D., 1955, California
- Hennes, Robert Graham, 1934 (1947), *Professor of Civil Engineering*
B.S. in C.E., 1927, Notre Dame; M.S., 1928, Massachusetts Institute of Technology

- Horwood, Edgar Miller, 1946 (1957), *Associate Professor of Civil Engineering*
B.S. in M.E., 1942, Georgia Institute of Technology; M.S. in Regional Planning, 1951, Washington; Ph.D., 1959, Pennsylvania
- Kent, Joseph Chan, 1952 (1961), *Associate Professor of Civil Engineering*
B.S. in C.E., 1945, British Columbia; M.S. in C.E., 1948, Stanford; Ph.D., 1952, California
- Meese, Richard Hunt, 1946 (1955), *Associate Professor of Civil Engineering*
B.S. in C.E., 1939, Washington; S.M., 1941, Harvard
- Miller, Alfred Lawrence, 1923 (1937), *Professor of Mechanics and Structures*
B.S. in C.E., 1920, C.E., 1926, Washington
- Miller, William Mackay, 1951 (1959), *Associate Professor of Civil Engineering*
B.S. in C.E., 1951, M.S. in C.E., 1952, Washington
- Mittet, Holger Peder, 1946 (1955), *Associate Professor of Civil Engineering*
B.S. in C.E., 1937, Washington; M.S. in C.E., 1938, Massachusetts Institute of Technology
- Moritz, Harold Kennedy, 1928 (1949), *Professor of Hydraulics*
B.S. in M.E., 1921, Massachusetts Institute of Technology
- Nece, Ronald Elliott, 1959 (1961), *Associate Professor of Civil Engineering*
B.S. in C.E., 1949, Washington; M.S. in C.E., 1951, Lehigh; Sc.D., 1958, Massachusetts Institute of Technology
- Niklaus, John Lewis, 1960, *Acting Instructor in Civil Engineering*
B.S. in C.E., 1955, M.S. in C.E., 1960, Tulane
- Norris, Charles Head, (1962), *Professor of Civil Engineering;*
Chairman of the Department of Civil Engineering
B.S. in C.E., 1931, Washington; S.M. in C.E., 1932, Sc.D. in Structural Engineering, 1942, Massachusetts Institute of Technology
- Paris, Paul Croce, 1957, *Assistant Professor of Civil Engineering*
B.S. in C.E., 1953, Michigan; M.S., 1955, Lehigh
- Rhodes, Fred Harold, Jr., 1927 (1951), *Professor of Civil Engineering*
B.S. in C.E., 1926, B.S. in M.E., 1926, C.E., 1935, Washington
- Richey, Eugene Porter, 1954 (1956), *Associate Professor of Civil Engineering*
B.S. in C.E., 1941, Alaska; M.S. (Meteorology), 1947, M.S. in C.E., 1948, California Institute of Technology; Ph.D., 1955, Stanford
- Sawhill, Roy Bond, 1956 (1960), *Associate Professor of Civil Engineering*
B.S. in C.E., 1950, Washington; M. of E., 1952, California
- Sergev, Sergius Ivan, 1923 (1946), *Professor of Engineering Mechanics*
B.S. in M.E., 1923, M.E., 1931, Washington
- Strausser, Howard Samuel, Jr., 1955 (1957), *Associate Professor of Civil Engineering*
B.S. in C.E., 1942, Virginia Military Institute; M.S.E., 1950, Johns Hopkins
- Sylvester, Robert Ohrum, 1947 (1957), *Professor of Sanitary Engineering*
B.S. in C.E., 1936, Washington; S.M., 1941, Harvard
- Thiers, Gerald Raymond, 1959, *Acting Assistant Professor of Civil Engineering*
B.S. in C.E., M.S. in C.E., California
- Tyler, Richard Gaines, 1929 (1954), *Professor Emeritus of Sanitary Engineering*
C.E., 1908, Texas; B.S. in C.E., 1910, Massachusetts Institute of Technology
- Van Horn, Robert Bowman, 1925 (1936), *Professor Emeritus of Civil Engineering*
B.S. in C.E., 1916, C.E., 1926, Washington
- Vasarhelyi, Dezsoe, 1949 (1961), *Professor of Civil Engineering*
B.A., 1928, Ref. Collegium Kolozsvár; Dipl. Ingr., 1932, Dr. Ingr., 1944, Technical University (Budapest)
- Wessman, Harold Everett, 1948, *Professor of Civil Engineering; Dean of the College of Engineering*
B.S., 1924, M.S., 1925, C.E., 1929, Ph.D., 1936, Illinois

ELECTRICAL ENGINEERING

- Aggarwal, Rajinder Pal, 1960, *Acting Instructor of Electrical Engineering*
B.S., 1952, Delhi University; M.S. in E.E., 1958, Minnesota
- Albrecht, Robert William, 1961, *Assistant Professor of Electrical Engineering*
B.S. in E.E., 1957, Purdue; M.S. in N.E., 1958, Ph.D. 1961, Michigan
- Bergseth, Frederick Robert, 1947 (1957), *Professor of Electrical Engineering*
B.S. in E.E., 1937, Washington; S.M. in E.E., 1938, Massachusetts Institute of Technology
- Bjorkstam, John Ludwig, 1955 (1960), *Associate Professor of Electrical Engineering*
B.S. in E.E., 1949, M.S. in E.E., 1952, Ph.D., 1958, Washington

- Carswell, Mary Irene, 1961, *Assistant Professor of Electrical Engineering*
B.S. in EE, 1947, Colorado; Ph.D., 1962, Stanford
- Clark, Robert Newhall, 1957, *Associate Professor of Electrical Engineering*
B.S. in E.E., 1950, M.S. in E.E., 1951, Michigan
- Cochran, Lyall Baker, 1934 (1952), *Professor of Electrical Engineering*
B.S. in E.E., 1923, E.E., 1936, Washington
- Cooley, William W., 1958, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1954, Washington
- Creedon, William E., 1960, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1929, Massachusetts Institute of Technology; M.S. in M.E., 1938, California
- Dearholt, Donald William, 1960, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1958, M.S. in E.E., 1960, New Mexico
- Domingos, Henry, 1960, *Acting Instructor of Electrical Engineering*
B.E.E., 1956, Clarkson; M.S. in E.E., 1958, Southern California
- Eastman, Austin Vitruvius, 1924 (1942), *Professor of Electrical Engineering;*
Chairman of the Department of Electrical Engineering
B.S. in E.E., 1922, M.S. in E.E., 1929, Washington
- Giarola, Attilio Jose, 1960, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1954, Polytechnic Institute of Sao Paulo, Brazil; M.S. in E.E., 1959, Washington
- Golde, Hellmut, 1959, *Assistant Professor of Electrical Engineering*
Dip.-Ing., 1953, Technische Hochschule; M.S., 1955, Ph.D., 1959, Stanford
- Guilford, Edward Charles, 1959 (1961), *Associate Professor of Electrical Engineering*
B.A., 1942, M.A., 1950, Utah; Ph.D., 1959, California
- Hanson, Gordon Harold, 1960, *Assistant Professor of Electrical Engineering*
B.A., 1949, M.A., 1951, British Columbia; Ph.D., 1957, Minnesota
- Harrison, Arthur Elliot, 1948 (1952), *Professor of Electrical Engineering*
B.S. in E.E., 1936, California; M.S., 1937, Ph.D., 1940, California Institute of Technology
- Hill, William Ryland, Jr., 1941 (1953), *Professor of Electrical Engineering;*
Associate Dean of the College of Engineering
B.S. in E.E., 1934, Washington; M.S. in E.E., 1938, E.E., 1941, California
- Hoard, George Lisle, 1920 (1941), *Professor of Electrical Engineering*
B.S. in E.E., 1917, M.S. in E.E., 1926, Washington
- Holden, Alistair David Craig, 1958, *Acting Instructor of Electrical Engineering*
B.S., 1955, Glasgow University; M.S., 1958, Yale
- Hsu, Chih-Chi, 1958, *Assistant Professor of Electrical Engineering*
B.S. in E.E., 1945, Chiao-Tung University; M.S. in E.E., 1949, Michigan; Ph.D., 1951, Ohio State
- Ishimaru, Akira, 1954 (1961), *Associate Professor of Electrical Engineering*
B.S. in E.E., 1951, Tokyo; Ph.D., 1958, Washington
- Johnson, David Laurence, 1955 (1961), *Professor of Electrical Engineering*
B.S. in E.E., 1948, Idaho; Ph.D., 1955, Purdue
- Kozdrowicki, Edward Walter, 1960, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1959, M.S. in E.E., 1960, Oklahoma
- Lewis, Laurel Jones, 1946 (1954), *Professor of Electrical Engineering*
A.B., 1933, E.E., 1935, Ph.D., 1947, Stanford
- Loew, Edgar Allan, 1909 (1948), *Professor Emeritus of Electrical Engineering;*
Dean Emeritus of the College of Engineering
B.S. in E.E., 1906, E.E., 1922, Wisconsin
- Lytle, Dean Winton, 1958, *Assistant Professor of Electrical Engineering*
B.S. in E.E., 1950, California; M.S. in E.E., 1954, Ph.D., 1957, Stanford
- Madhu, Swaminathan, 1957, *Acting Instructor of Electrical Engineering*
B.S., 1951, University of Madras; M.S. 1957, Tennessee
- Menon, Premachandran Rama, 1958, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1953, Banaras Hindu University
- Metz, Peter Robert, 1961, *Acting Instructor in Electrical Engineering*
B.S. in E.E., 1956, Washington; S.M. in E.E., 1958, Massachusetts Institute of Technology
- Noges, Endrik, 1958, *Assistant Professor of Electrical Engineering*
B.S. in E.E., 1954, M.S. in E.E. 1956, Ph.D., 1959, Northwestern

- Rao, N. Narayana, 1961, *Acting Instructor of Electrical Engineering*
B.S., 1952, India; M.S. in E.E., 1960, Washington
- Reynolds, Donald Kelly, 1959 (1960), *Professor of Electrical Engineering*
B.A., 1941, M.A., 1942, Stanford; Ph.D., 1948, Harvard
- Robbins, Floyd David, 1946 (1957), *Associate Professor of Electrical Engineering*
B.S. in E.E., 1925, E.E., 1949, Washington
- Robinson, Wesley A., 1961, *Lecturer in Electrical Engineering*
B.S., 1950, M.S., 1953, Ph.D., 1956, Washington
- Rogers, Walter Edwin, 1946 (1956), *Professor of Electrical Engineering*
B.S. in E.E., 1934, California; M.S. in E.E., 1948, Washington
- Saugen, John Louis, 1958, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1955, M.S. in E.E., 1958, Washington
- Schrader, David Hawley, 1954, *Acting Instructor in Electrical Engineering*
B.S. in E.E., 1951, Kansas
- Shimada, Katsunori, 1958, *Assistant Professor of Electrical Engineering*
B.S., 1945, Tokyo University; M.S. in E.E., 1954, Ph.D., 1958, Minnesota
- Sigelmann, Rubens Adolpho, 1959, *Acting Instructor in Electrical Engineering*
M.E. in E.E., 1952, Universidade do Sao Paulo
- Smith, George Shermann, 1921 (1960), *Professor Emeritus of Electrical Engineering*
B.S. in E.E., 1916, E.E., 1924, Washington
- Sokkappa, Balraj Gnana, 1956, *Acting Instructor in Electrical Engineering*
B.S., 1952, University of Madras; M.S., 1955, California
- Swarm, Howard Myron, 1947 (1955), *Professor of Electrical Engineering*
B.S. in E.E., 1940, M.S. in E.E., 1950, Washington; Ph.D., 1960, Stanford
- Tighe, Robert Francis, 1960, *Acting Instructor of Electrical Engineering*
B.S. in E.E., 1955, Washington
- Turner, Richard Lewis, Jr., 1955, *Instructor in Electrical Engineering*
B.S. in E.E., 1946; M.S. in E.E., 1952, Drexel Institute of Technology
- Wang, Charles Chen-ding, 1960, *Assistant Professor of Electrical Engineering*
B.S., 1957, Taiwan College; M.S., 1959, Brown; Ph.D., 1961, Stanford
- Watt, Lynn Alexander Keeling, 1959, *Assistant Professor of Electrical Engineering*
B.S., 1947, Manitoba; S. M., 1951, Chicago; Ph.D., 1959, Minnesota

GENERAL ENGINEERING

- Albrecht, Robert George, 1960 (1961), *Assistant Professor of General Engineering*
B.S. in C.E., 1956, Washington; M.S. in Structural Engr., 1960, Massachusetts Institute of Technology
- Alexander, Daniel Edward, 1954 (1961), *Associate Professor of General Engineering*
B.S. in M.E., 1947, M.S. in M.E., 1954, Washington
- Bartlett, Francis Grindall, 1956, *Assistant Professor General Engineering*
B.S.E. in Nav. Arch. and Marine Engrg., 1952, M.S.E. in Nav. Arch. and Marine Engrg., 1956, Michigan
- Boehmer, Herbert, 1937 (1961), *Professor of General Engineering*
Dipl. Engr., M.E., 1928, German Technical University, Brunswick; M.S. in A.E., 1933, Washington
- Bonow, Walter Burnett, 1956 (1958), *Assistant Professor of General Engineering*
B.S., 1948, Antioch College
- Brown, Robert Quixote, 1919 (1947), *Professor of General Engineering*
B.S. in E.E., 1916, Washington
- Chalk, William S., 1961, *Assistant Professor of General Engineering*
B.S. in M.E., 1950, M.S. in M.E., 1961, Washington
- Collins, James Douglass, 1958, *Assistant Professor of General Engineering*
B.S. in M.E., 1938, Michigan State; M.S. in I.E., 1958, Purdue
- Douglass, Clarence Eader, 1939 (1961), *Professor of General Engineering*
B.S., 1927, Washington State
- Douthwaite, Geoffrey Kingsley, 1961, *Instructor in General Engineering*
B.S. in E.E., 1952, Washington

- Dunn, Walter Lee, 1954 (1960), *Associate Professor of General Engineering*
B.S. in C.E., 1949, Montana State; M.P.H., 1953, California
- Hammer, Vernon Benjamin, 1947 (1957), *Associate Professor of General Engineering; Chairman of the Department of General Engineering*
B.S. in C.E., 1940, Washington; M.S. in S.E., 1941, Harvard
- Hoag, Albert Lynn, 1946 (1957), *Associate Professor of General Engineering*
B.S.F., 1941, B.S. in C.E., 1952, Washington
- Jacobsen, Philip Amunds, 1927 (1939), *Assistant Professor of General Engineering*
B.S. in Engr., 1926, Washington
- Konichek, Dorland Henry, 1954, (1960), *Associate Professor of General Engineering*
B.S. in C.E., 1930, North Dakota State College
- Macartney, Thomas Wakefield, 1946 (1957), *Associate Professor of General Engineering*
B.S. in C.E., 1939, B.S. in Com.E., 1946, M.S. in CE., 1956, Washington
- McCready, Roy Allison, 1958, *Instructor in General Engineering*
B.S. in Min., 1939, Montana School of Mines
- McNeese, Donald Charles, 1946 (1956), *Associate Professor of General Engineering*
B.S. in C.E., 1940, C.E., 1951, Wyoming
- Messer, Rowland Enlow, 1946 (1957), *Associate Professor of General Engineering*
B.S. in M.E., 1935, Washington
- Nelson, George Alvin, 1957, *Assistant Professor of General Engineering*
B.S. in C.E., 1925, Minnesota
- Prouty, Richard Allen, 1956 (1958), *Assistant Professor of General Engineering*
B.S. in M.E., 1952, Washington State; M.S. in M.E., Washington
- Pye, William Vincent, 1961, *Instructor in General Engineering*
B.S. in C.E., 1958, Washington; M.S. in C.E., 1961, Washington
- Rowlands, Thomas McKie, 1928 (1954), *Professor of General Engineering*
B.S. in Nav. Arch. and Marine Engr., 1926, Massachusetts Institute of Technology
- Seabloom, Robert Wendell, 1954 (1961), *Associate Professor of General Engineering*
B.S. in C.E., 1950, M.S. in C.E., 1956, Washington
- Seed, Richard Warren, 1951, *Lecturer in General Engineering*
B.S. in M.E., 1944, California Institute of Technology; LL.B., 1949, George Washington
- Stern, Paul Herman, 1956, *Instructor in General Engineering*
B.C.E., 1954, Cooper Union; M.S. in C.E., 1956, Washington
- Thompson, Wells, 1958 (1960), *Assistant Professor of General Engineering*
B.S., 1928, U.S. Naval Academy; M.S., 1938, California
- Warner, Frank Melville, 1913 (1954), *Professor Emeritus of General Engineering*
B.S. in M.E., 1907, Wisconsin
- Wilcox, Elgin Roscoe, 1921 (1936), *Professor of General Engineering*
B.S., 1915, Met.E., 1919, Washington

HUMANISTIC-SOCIAL STUDIES

- Botting, David Charles, Jr., 1955 (1961), *Associate Professor of Humanistic-Social Studies*
B.A., 1940, M.A., 1947, Washington; Ph.D., 1950, Chicago
- Chapman, Stuart Webster, 1947 (1954), *Professor of Humanistic-Social Studies; Chairman of the Department of Humanistic-Social Studies*
A.B., 1927, Boston; Ph.D., 1939, Yale
- Elliott, Eugene Clinton, 1953 (1959), *Associate Professor of Humanistic-Social Studies*
B.A., 1936, M.A., 1941, Washington; Doctor of the University of Paris, Sorbonne, 1952
- Higbee, Jay Anders, 1952 (1956), *Assistant Professor of Humanistic-Social Studies*
B.A., 1941, Iowa; M.A., 1949, Washington; D.S.S., 1955, Syracuse
- Hunner, Wesley Louis, 1957, *Assistant Professor of Humanistic-Social Studies*
B.A., 1935, M.A., 1938, Ph.D., 1950, Washington

- Leahy, Jack Thomas, 1959, *Instructor in Humanistic-Social Studies*
B.A., 1954, M.A., 1957, Washington
- Mise, Raymond Winfield, 1961, *Instructor in Humanistic-Social Studies*
B.A., 1957, Washington
- Rustad, John Ronald, 1948 (1955), *Assistant Professor of Humanistic-Social Studies*
B.A., 1948, M.A., 1949, Washington
- Skeels, Dell Roy, 1946 (1957), *Associate Professor of Humanistic-Social Studies*
B.A., 1941, M.A., 1942, Idaho; Ph.D., 1949, Washington
- Souther, James Walter, 1948 (1957), *Associate Professor of Humanistic-Social Studies; Assistant Dean of the College of Engineering*
B.A., 1947, M.A., 1948, Washington
- Trimble, Louis Preston, 1956 (1959), *Assistant Professor of Humanistic-Social Studies*
B.A., 1950, Ed.M., 1953, Eastern Washington
- White, Myron Lester, 1947 (1959), *Assistant Professor of Humanistic-Social Studies*
B.A., 1943, Ph.D., 1958, Washington

MECHANICAL ENGINEERING

- Anderson, Jay W., 1956 (1961), *Assistant Professor of Mechanical Engineering*
B.S. in M.E., 1955, M.S. in M.E., 1961, Washington
- Balise, Peter Louis, Jr., 1950 (1961), *Professor of Mechanical Engineering*
S.B., 1948, S.M., 1950, Massachusetts Institute of Technology
- Browne, Oscar Morrison, Jr., 1959 (1961), *Assistant Professor of Mechanical Engineering*
B.S., 1930, U.S. Naval Academy; M.S. in Naval Construction, 1935, Massachusetts Institute of Technology
- Childs, Morris Elsmere, 1954 (1961), *Professor of Mechanical Engineering*
B.S. in M.E., 1944, Oklahoma; M.S. in M.E., 1947, Ph.D., 1956, Illinois
- Costello, Charles Pierce, Jr., 1958 (1961), *Associate Professor of Mechanical Engineering*
B.S. in M.E., 1954, Washington; M.S. in M.E., 1955, Ph.D. in M.E., 1958, Stanford
- Crain, Richard Willson, Sr., 1936 (1953), *Associate Professor of Mechanical Engineering*
B.S. in E.E., 1930, B.S. in M.E., 1932, Colorado State; M.S. in M.E., 1946, Washington
- Day, Emmett Elbert, 1947 (1954), *Professor of Mechanical Engineering*
B.A., 1936, East Texas State Teachers College; B.S., 1945, M.S., 1946, Massachusetts Institute of Technology
- Depew, Creighton Arthur, 1960, *Assistant Professor of Mechanical Engineering*
B.S. in M.E., 1956, M.S. in M.E., 1957, Ph.D., 1960, California
- Drui, Albert Burnell, 1960, *Acting Assistant Professor of Mechanical Engineering*
B.S. in I.E., 1949, M.S. in I.E., 1957, Washington University (St. Louis)
- Emery, Ashley Francis, 1961, *Assistant Professor of Mechanical Engineering*
B.S., 1956, M.S., 1958, Ph.D., 1961, California
- Firey, Joseph Carl, 1954 (1961), *Professor of Mechanical Engineering*
B.S. in M.E., 1940, Washington; M.S. in M.E., 1941, Wisconsin
- Ford, Paul William, 1957 (1959), *Assistant Professor of Mechanical Engineering*
B.Ind.E., 1956, General Motors Institute; M.S. in M.E., 1959, Washington
- Frea, Ward John, Jr., 1961, *Acting Instructor in Mechanical Engineering*
B.S., 1954, M.S., 1961, Michigan College of Mining and Technology
- Fritz, Dale Charles, 1956 (1961), *Assistant Professor of Mechanical Engineering*
B.S. in M.E., 1955, B.S. in I.E., 1956, M.S. in M.E., 1960, Washington
- Galle, Kurt Robert, 1960, *Acting Associate Professor of Mechanical Engineering*
B.S. in A.E., 1946, B.S. in M.E., 1947, M.S. in M.E., 1949, Ph.D., 1951, Purdue
- Grimsrud, Lars, 1961, *Acting Instructor in Mechanical Engineering*
M.S. in M.E., 1955, Norwegian Institute of Technology; M.S. in Engr., 1957, Washington
- Guidon, Michael, III, 1946 (1956), *Associate Professor of Mechanical Engineering*
B.S. in M.E., 1942, Lehigh; M.S. in M.E., 1952, Washington

- Holt, Richard Edwin, 1954 (1957), *Assistant Professor of Mechanical Engineering*
B.S. in M.E., 1947, M.S. in Met.E., 1957, Washington
- Kauzlarich, James Joseph, 1961, *Associate Professor of Mechanical Engineering*
B.S., 1950, State University of Iowa; M.S., 1952, Columbia; Ph.D., 1958, Northwestern
- Kieling, William Clayton, 1956 (1959), *Assistant Professor of Mechanical Engineering*
B.S. in M.E., 1950, M.S. in M.E., 1959, Washington
- Kobayashi, Albert Satoshi, 1958 (1961), *Associate Professor of Mechanical Engineering*
B.S., 1947, Tokyo; M.S. in M.E., 1952, Washington; Ph.D., 1958, Illinois Institute of Technology
- McFeron, Dean Earl, 1958, *Professor of Mechanical Engineering*
B.S. in M.E., 1945, M.S. in M.E., 1948, Colorado; Ph.D., 1956, Illinois
- McIntyre, Harry John, 1919 (1958), *Professor Emeritus of Mechanical Engineering*
B.S. in M.E., 1915, M.B.A., 1923, Washington
- McMinn, Bryan Towne, 1920 (1946), *Professor of Mechanical Engineering; Chairman of the Department of Mechanical Engineering*
B.S. in M.E., 1918, Oregon State; M.S. in M.E., 1926, M.E., 1931, Washington
- Merchant, Howard Carl, 1961, *Assistant Professor of Mechanical Engineering*
B.S. in M.E., 1956, Washington; S.M., 1957, Massachusetts Institute of Technology; Ph.D., 1961, California Institute of Technology
- Mills, Blake David, Jr., 1946 (1947), *Professor of Mechanical Engineering*
B.S. in M.E., B.S. in E.E., 1934, M.E., 1947, Washington; M.S. in M.E., 1935, Massachusetts Institute of Technology
- Morrison, James Bryan, 1946 (1961), *Professor of Mechanical Engineering*
B.S. in M.E., 1943, Virginia Polytechnic Institute; M.S. in M.E., 1954, Washington
- Nordquist, William Bertil, 1947 (1955), *Associate Professor of Mechanical Engineering*
B.M.E., 1941, Rensselaer Polytechnic Institute; M.S., 1946, Massachusetts Institute of Technology
- Owens, Berl Winfield, 1948 (1956), *Associate Professor of Mechanical Engineering*
B.Aero.E., 1944, Minnesota; M.S. in M.E., 1953, Washington
- Schaller, Gilbert Simon, 1922 (1937), *Professor of Mechanical Engineering*
B.S. in M.E., 1916, Illinois; M.B.A., 1925, Washington
- Setchfield, Daniel Frank, 1956 (1958), *Instructor in Mechanical Engineering*
B.A., 1957, Washington
- Sherrer, Robert Eugene, 1960, *Associate Professor of Mechanical Engineering*
B.S. in M.E., 1948, Kansas; M.S. in E.M., 1953, Ph.D., 1958, Wisconsin
- Taggart, Raymond, 1959, *Assistant Professor of Mechanical Engineering*
B.S., 1948, London; Ph.D., 1956, Queens (Belfast)
- Waibler, Paul John, 1954 (1961), *Professor of Mechanical Engineering*
B.S. in M.E., 1943, Kansas State; M.S. in M.E., 1944, Yale; Ph.D., 1958, Illinois
- Winslow, Arthur Melvin, 1918 (1952), *Professor Emeritus of Mechanical Engineering; Research Consultant*
Ph.B., 1903, Brown; B.S., 1906, Massachusetts Institute of Technology

MINERAL ENGINEERING

- Anderson, Donald Lorraine, 1947 (1957), *Associate Professor of Mining Engineering*
B.S., 1938, St. Francis Xavier; B.Sc. in Min.E., 1941, Illinois
- Archbold, Thomas Frank, 1961, *Acting Assistant Professor of Metallurgical Engineering*
B.S. Met.E., 1955, M.S., 1957, Ph.D., 1961, Purdue
- Bauer, Wolf, 1954, *Lecturer in Ceramic Engineering*
B.S. in Cer.E., 1935, Washington
- Brien, Frederick Blyth, 1954 (1957), *Associate Professor of Mineral Engineering*
B.S. in Min.E., 1950, Alberta; M.S. in Mineral E., 1951, Columbia
- Campbell, Robert John, Jr., 1955, *Assistant Professor of Ceramic Engineering*
B.S., Ch.E., 1939, Oregon State; M.S. in Cer.E., 1954, Washington

Daniels, Joseph, 1911 (1954), *Professor Emeritus of Mining and Metallurgical Engineering*

S.B., 1905, Massachusetts Institute of Technology; M.S., 1908, E.M., 1933, Lehigh

Flanagan, William Francis, 1959, *Assistant Professor of Metallurgical Engineering*

B.S. in Physics, 1951, M.S., 1953, Sc.D., 1959, Massachusetts Institute of Technology

McNeilly, Clyde Emerson, 1959, *Assistant Professor of Ceramic Engineering*

B.S. in Cer.E., 1954, Alfred; Ph.D., 1959, Alfred

Morgan, David William, 1959, *Assistant Professor of Metallurgical Engineering*

B.A.Sc., 1948, M.A.Sc., 1949, British Columbia; D.I.C., 1953, Imperial College of Science and Technology (London); Ph.D., 1953, London

Mueller, James Irving, 1949 (1955), *Professor of Ceramic Engineering*

B.Cer.E., 1939, Ohio State; Ph.D., 1949, Missouri

Pifer, Drury Augustus, 1945 (1948), *Professor of Mining Engineering; Director of the School of Mineral Engineering*

B.S. in Min. E., 1930, M.S. in Min. E., 1931, Washington

Polonis, Douglas Hugh, 1955 (1958), *Associate Professor of Metallurgical Engineering*

B.S., 1951, British Columbia; M.S., 1953, Toronto; Ph.D., 1955, British Columbia

Roberts, Earl Champion, 1954 (1958), *Professor of Metallurgical Engineering*

B.S. in Met. E., 1943, Montana School of Mines; M.S. in Met.E., 1950, Ph.D., 1952, Massachusetts Institute of Technology

Roberts, Milnor, 1901 (1947), *Professor Emeritus of Mining Engineering*

B.A., 1899, Stanford

Shevlin, Thomas S., 1961, *Acting Associate Professor of Ceramic Engineering*

B.Cer.E., 1942, M.S., 1947, Ph.D., 1954, Ohio State

ENGINEERING EXPERIMENT STATION

Farquharson, Frederick Burt, 1925 (1940), *Director of the Engineering Experiment Station; Professor of Civil Engineering*

B.S. in M.E., 1923, M.E., 1927, Washington

Kelley, H. Harold, 1960, *Technical Editor*

B.S., 1930, Kansas State Teachers' College; M.A., 1938, University of Colorado

NORTHWEST EXPERIMENT STATION, UNITED STATES BUREAU OF MINES

Geer, Max Richard, 1935, *Chief Engineer; Lecturer in the School of Mineral Engineering*

B.E.M., 1934, Ohio State; M.S., 1935, E.M., 1943, Washington

FACULTY OF RESERVE OFFICERS TRAINING PROGRAM

AIR SCIENCE

Arnold, Maj. Robert C., 1959, *Assistant Professor of Air Science*

A.B., 1941, California; M.Ed., 1954, Trinity University (Texas)

Gustafson, Col. Roy W., 1961, *Professor of Air Science*

B.S., 1935, Washington; M.S., 1948, Stanford

Holloway, Maj. David T., 1959, *Assistant Professor of Air Science*

B.S., 1959, Maryland

Kilgore, Maj. Donald K., 1959, *Assistant Professor of Air Science*

B.A., 1948, Washington

Nelson, Capt. Deryl W., 1958, *Assistant Professor of Air Science*

B.A., 1951, Fresno State (California)

Pachl, Lt. Col. R. J., 1961, *Assistant Professor of Air Science*

B.S., 1940, Providence College (Rhode Island)

Robertson, Capt. John L., 1957, *Assistant Professor of Air Science*

B.A., 1952, Washington

Trowbridge, Capt. Charles E., 1958, *Assistant Professor of Air Science*

B.S., 1951, Idaho

MILITARY SCIENCE

- Collings, Lt. Col. Kent J., 1960, *Assistant Professor of Military Science*
B.S., 1939, California
- Condon, Lt. Col. Herbert Thomas, Jr., 1958, *Assistant Professor of Military Science*
B.A., 1938, Washington
- Gilchrist, Lt. Col. Charles Allen, 1959, *Assistant Professor of Military Science*
B.A., 1948, Missouri
- Goodrich, Col. Guinn Burch, 1961, *Professor of Military Science*
B.S., 1934, Tennessee
- Heinlein, Capt. Willard H., 1961, *Assistant Professor of Military Science*
B.A., 1951, Denver
- Kendrick, Maj. James O., Jr., 1961, *Assistant Professor of Military Science*
B.S., 1960, Maryland
- Kirk, Maj. Richard Laurens, 1958, *Assistant Professor of Military Science*
B.A., 1949, Washington
- Neal, Capt. William Bert, 1959, *Assistant Professor of Military Science*
B.S., 1950, Agricultural and Technical College of North Carolina
- Olson, Lt. Col. Charles Marshall, 1959, *Assistant Professor of Military Science*
B.M.S., 1958, Maryland
- Tullis, Capt. Murl Frank, 1960, *Assistant Professor of Military Science*
B.S., 1949, San Jose State
- Duncan, Master Sergeant James A., 1961, *Instructor of Military Science*
- McHendry, Specialist Fifth Class Curtis G., 1960, *Instructor of Military Science*
- Posthuma, Master Sergeant Frank A., Jr., 1960, *Instructor of Military Science*
- Schumacher, Sergeant First Class Norman J., 1960, *Instructor of Military Science*
- Shepard, Sergeant First Class William C., 1958, *Instructor of Military Science*
- Stockman, Master Sergeant Perry J., 1956, *Instructor of Military Science*
- Sutton, Sergeant First Class Richard P., 1955, *Instructor of Military Science*
- Taylor, Sergeant First Class Joseph A., 1960, *Instructor of Military Science*
- Yarberry, Sergeant Robert L., 1960, *Instructor of Military Science*

NAVAL SCIENCE

- Britain, GySgt. Fred Leonard, Jr., USMC, 1959, *Instructor in Naval Science*
- Bryan, GMC. Donald Wayne, USN, 1960, *Instructor in Naval Science*
- Christensen, Lt. Harvey Jonathan, (SC), USN, 1960, *Assistant Professor of Naval Science*
B.S., 1952, University of Minnesota
- Freeman, Lt. Albert Myrick, III, USNR, 1960, *Assistant Professor of Naval Science*
B.A., 1957, Cornell
- Gordon, Capt. Harold P., USN, 1961, *Professor of Naval Science*
B.S. A.E., 1937, Washington
- Havens, Lt. Stanley Laverne, USN, 1960, *Assistant Professor of Naval Science*
B.S., 1953, Lock Haven State College
- Keyes, Maj. Edward Burnett, Jr., USMC, 1960, *Assistant Professor of Naval Science*
B.A., 1945, California
- Kneebone, SK1. Franklin Davey, USN, 1960, *Instructor in Naval Science*
- Mills, CDR. William S., III, USNR, 1961, *Associate Professor of Naval Science*
B.A., 1942, Vanderbilt
- Nixon, Lt. Edward Calvert, USNR, 1960, *Assistant Professor of Naval Science*
B.S., 1952, Duke; M.S., 1954, North Carolina State College
- Smith, FTC. Bernard Henry, USN, 1960, *Instructor in Naval Science*
- Smith, Lt. Richards Macpherson, USN, 1959, *Assistant Professor of Naval Science*
A.B., 1953, University of Southern California
- Wright, QMC. Elmer George, USN, 1960, *Instructor in Naval Science*

APPENDIX

APPENDIX

UNDERGRADUATE ADMISSION, EXCEPTIONAL CASES

An applicant whose preparation and previous scholarship do not clearly qualify him for admission may submit additional evidence in support of his application. This may include scores on nationally recognized tests of scholastic aptitude or achievement; letters from school administrators, teachers, or counselors; and other information which may assist the Board of Admissions in evaluating his probability of success in the University.

Students admitted by special action of the Board of Admissions will be expected to achieve and maintain a satisfactory scholastic average in their University work and to fulfill any conditions specified by the Board at the time of their admission.

A student thus admitted on probation will be subject to scholarship rules given on page 27.

Furthermore, he or she may not (1) be pledged or initiated into a fraternity or sorority, or engage in those other student activities in which his right to participate is restricted by the regulations of the Committee on Student Welfare; (2) engage in those athletic activities in which his right to participate is restricted by regulations of the University Intercollegiate Athletics Committee.

ADVANCED STANDING AND TRANSFER OF CREDIT

1. The advanced standing for which an applicant's training appears to fit him is granted tentatively on admission. Definite advanced standing is not determined before the end of the student's first quarter in the University. The maximum that may be accepted from other colleges and universities is 135 quarter credits or senior standing. Transfer credit will not be allowed in the senior year.

2. Transfer credits will be accepted for upper-division credit *only* when earned at an accredited four-year degree-granting institution.

3. Transfer credits from institutions accredited for less than four years will not be accepted in excess of the accreditation of the school concerned.

4. Transfer of junior college credit shall apply on the University freshman and sophomore years only. A student who has completed a portion of his freshman and/or sophomore years in a four-year college may not transfer junior college credit in excess of that necessary to completion of the first two years in the University. In no case shall the transfer of junior college credit to the University exceed 90 quarter credits exclusive of physical education activity credits.

5. The maximum number of credits obtainable by acceptance of Armed Forces training schools credits will be 30. All such credits will be counted as extension

credits and will be included in the 90-credit maximum allowed toward the bachelor's degree, but none will apply toward the work of the senior year.

6. A maximum of 45 credits earned in extension and correspondence courses at other institutions may be transferred, but none of the credits can apply in the senior year. Extension and correspondence credits from schools that are not members of the National University Extension Association are accepted only after examination.

7. Credits earned in evening and extension classes or correspondence courses at this University are accepted after the student has satisfactorily completed 35 credits of work in residence (that is, registered in regular University classes). A maximum of 90 extension and/or correspondence credits is acceptable; the 90 credits may include the 45 extension and/or correspondence credits allowable from other institutions or may consist entirely of courses taken in this University's Division of Evening Classes or Division of Correspondence Study. All credits earned in advanced-credit examinations and all acceptable Armed Forces training schools credits must be counted in the 90 extension credit maximum. Up to 10 evening class or correspondence course credits from this University can apply toward the work of the senior year.

8. For work done in unaccredited institutions, extended secondary programs in institutions whose standing is unknown, and for work with private teachers, University credit is granted only after examination. Applications for advanced-credit examinations must be filed during the first quarter in residence.

9. No credit will be granted for courses taken in another college while the student is in residence at the University, unless written permission to register for such courses is obtained by the student from the University department giving such instruction in the subject, from his major department, and from the dean of his college. The prescribed written permission is effective only if obtained before registration. Nothing in this rule makes mandatory the granting of any credit by the University.

KOREAN VETERANS INFORMATION

Korean Certificate

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established.

Quarter Credit Requirements (Public Law 550)

14 credits	Full subsistence
10 to 13 credits	Three-fourth subsistence
7 to 9 credits	One-half subsistence
6 credits or less	Established tuition and fees
or credits $\div 14 \times \$110.00$, whichever is the lesser.	

Graduate Credit Requirements (Public Law 550) 500-level Courses or Above

9 credits	Full subsistence
7 to 8 credits	Three-fourths subsistence
5 to 6 credits	One-half subsistence
4 credits or less	Established tuition and fees
or credits $\div 14 \times \$110.00$, whichever is the lesser.	

If a graduate is combining 400-level courses with 500-level courses, he should consult with the Veterans Division, Safety Division Building, to determine the scale of pay.

Termination of Training

A veteran *eligible* under Public Law 550 must complete his training by *eight years* after his release from active service, or by January 31, 1965, whichever is earlier.

WITHDRAWALS**WITHDRAWAL FROM A COURSE**

Official withdrawal from a course is made only under the following conditions: (1) during the first fifteen calendar days of a quarter, with the consent of the withdrawing student's adviser; (2) after the first fifteen calendar days of a quarter and before the end of the first six calendar weeks of a quarter, with the approval of the student's adviser, the instructor of the course from which withdrawal is sought, and of the dean of the college in which the withdrawing student is enrolled; and (3) after the first six calendar weeks of a quarter and before final examination week, only upon certification in writing to the Registrar by the dean of the college in which the withdrawing student is enrolled that, in the judgment of the dean, withdrawal is necessitated by the student's hardship. Withdrawals from courses accomplished by any other method are unofficial withdrawals which are entered on a student's record as EW, and are assigned the value of E in the computation of the student's grade-point average. No official withdrawal may be made during final examination week.

Official withdrawals are entered on a student's record as follows: (1) a withdrawal within the first fifteen calendar days of a quarter, as W; (2) a withdrawal after the first fifteen calendar days of a quarter and before final examination week, as PW, if the student's work has been satisfactory, and as E, if the student's work has been unsatisfactory. Grades of PW and W are assigned no value in the computation of grade-point averages.

WITHDRAWAL FROM THE UNIVERSITY

The student should obtain at the office of Engineering Registration, 208 Guggenheim, the Request for Withdrawal From the University form.

MILITARY TRAINING

The two-year basic programs offered by the Departments of Air Science and Military Science and the four-year program offered by the Department of Naval Science, satisfy this requirement. For a complete list of courses offered by these Departments, see the *Yearly Time Schedule*. In addition to the basic programs, the Department of Air Science and the Department of Military Science each offers for selected students an advanced program which leads to commissioning in the Air Force or the Army. The four-year program of the Department of Naval Science, also for selected students, leads to commissioning in the Navy or Marine Corps.

Students enrolling in Naval ROTC, and those who take the advanced program of Air Force or Army ROTC must agree in writing to complete the course of training and accept a commission in the service for which they are trained. *The honoring of this commitment is a condition of graduation from the University.*

The basic program of the Department of Air Science consists of three quarters of military classroom instruction on the Foundations of Air Power. These are offered in the Spring Quarter of the first year and the Autumn and Winter Quarters of the second year. During each of the other three quarters, the student must substitute an approved University course in lieu of Air Science. Leadership laboratory is required each of the six quarters of the basic program and is conducted one hour each week. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*.

The basic program (freshmen and sophomores) of the Department of Military Science requires drill one hour each week. Classroom military studies for freshmen

are not required in the Autumn Quarter. One hour per week is required in the Winter Quarter, and two hours of classroom work are required in Spring Quarter. As a substitute for these classroom hours in Autumn Quarter of the freshman year, registration is required in a selected three-credit or five-credit course in another department. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*. Sophomores are required to attend two hours per week of classroom military studies throughout the academic year.

Information concerning the Naval Science ROTC program can be found on pages 90-92.

Exemptions from the military requirement are granted to:

1. Students who are twenty-three years of age or over at the time of original entry into the University.
2. Students who enter as juniors or seniors.
3. Special students.
4. Students registered for 6 credits or less.
5. Students who are not citizens of the United States.
6. Students who, because of physical condition, are exempted by the University Health Officer.
7. Students who have equivalent military service. Complete or partial exemptions, depending on length of service, are granted for previous active service in the Armed Forces or Coast Guard.
8. Students who are active members or reserve officers of the Armed Forces or Coast Guard, or commissioned officers of the National Guard.
9. Students who are active enlisted members of the National Guard or of the Organized Reserve of the Armed Forces or Coast Guard.
10. Transfer students who present acceptable credit for military training taken in other colleges. The amount of exemption depends on the amount of previous training. Transfer students are required to take military training only for the number of quarters they need to achieve junior standing by a normal schedule.
11. Students who seek exemption on grounds other than specified above, and whose petitions for exemption are first processed by the Office of the Dean of Students, and then approved by the Dean of the College after consultation with the appropriate ROTC commander.

Those who are exempted under paragraph 5 or 11 must arrange at the time of initial entrance to substitute equivalent extra credits in other University courses to equal the number of credits they would have been required to earn in military training courses.

PHYSICAL EDUCATION ACTIVITIES

Men students may use credits earned in freshman or varsity sports to satisfy the activity course requirement.

Women students, in fulfilling the three-quarter requirement, may take a maximum of two credits in any of the following: (1) swim area; (2) dance area; (3) tennis and badminton; (4) any other specific individual, dual, or team activity.

The following students are exempt from the requirement of activity courses:

1. Students who have attained the age of twenty-five. A student who attains the age of twenty-five during a quarter in which he is registered for a required physical education activity course shall be held for the completion of that course. This rule shall not be retroactive in its application to students who entered prior to Spring Quarter, 1951, and were exempted from required physical education courses under previous rules.
2. Students who enter as sophomores, juniors, or seniors.
3. Special students.

4. Students registered for 6 credits or less.

5. Students who, because of physical condition, are exempted by the Graduation Committee upon the recommendation of the Dean of the College. Such action will be taken only when the Dean has received a joint recommendation for exemption from the University Health Officer and the Executive Officer of the Department of Physical Education for Men or for Women, whichever is appropriate. All other students who are reported by the University Health Officer as physically unfit to join regular classes will be assigned by the Executive Officer of the Department of Physical Education for Men or for Women to special programs adapted to their needs.

6. Students who are veterans of military service. Complete exemption is granted for one year or more of active duty. This exemption does not grant credit. Veterans with less than one year of service receive no exemption.

7. Transfer students who present acceptable credit for physical education activity courses taken in other colleges. The amount of exemption depends on the number of quarters for which credit is transferred.

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration. The University reserves the right to change any of its fees and charges without notice.

The fee schedules for resident and nonresident students, following, apply to the academic year (Autumn, Winter, and Spring Quarters). Summer fees are listed in the *Summer Quarter Bulletin*.

EXEMPTIONS

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

EXTRA SERVICE CHARGES

A registration service charge of \$15.00 is assessed those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by In-Person Registration by action of the Registration Appeal Board. A late registration charge of \$15.00 is assessed any student granted permission to register after the last registration day before the opening of Autumn, Winter, or Spring Quarters by action of the Registration Appeal Board. A charge of \$5.00 is made Autumn, Winter, and Spring Quarters for each change of registration or change of section, or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University.

<i>Special Examination</i>	\$1.00
<i>Removal of an Incomplete</i>	2.00
<i>Washington Pre-College Differential Guidance (Grade Prediction) Test</i>	5.00
<i>Athletic Admission Ticket</i> (optional for ASUW members)	3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.	
<i>Military Uniform Rental</i>	25.00
Paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.	
<i>Breakage Ticket</i>	3.00
Required in some laboratory courses; ticket is returnable for full or partial refund.	
<i>Locker Rental, per quarter</i>	2.00
Required of men students taking physical education activities.	
<i>Quarterly Grade Report</i>	.50
One grade report is issued at the close of each quarter without charge; the charge, payable in advance, is made for each additional copy.	
<i>Transcripts</i>	1.00
One transcript is furnished without charge; the charge, payable in advance, is made for each additional copy.	
<i>Graduation Exercises Diploma</i>	10.00

FEES FOR RESIDENT STUDENTS

A resident is one who has been domiciled in Washington for at least a year immediately prior to registration.

Examples of Autumn, Winter, and Spring Quarter Fees for Various Types of Registration

Type of Registration	Tuition Fee	Incidental Fee	ASUW Fee*	Total Fees
			Autumn, Winter, and Spring Quarters	Autumn, Winter, and Spring Quarters
Full-time students** (undergraduate and graduate except in Medical and Dental Schools)	\$35.00	\$56.50	\$8.50	\$100.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	35.00	39.00	†	74.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)		56.50	8.50	65.00
		39.00	†	39.00
Full-time				
Part-time (max. 6 credits)§				
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (non-thesis)		56.50	†	56.50

* Athletic admission ticket is optional for ASUW members. Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.

** A \$25.00 uniform rental is paid by students in Army and Air Force ROTC, refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.

† Optional; if membership in ASUW is desired, the ASUW fee should be added to the total fee as shown for this type of registration.

‡ See Exemptions to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by the Graduate School.

MUSIC PRACTICE ROOM, per quarter: piano practice, \$3.00, one hour a day; \$5.00, two hours a day; \$6.00, three hours a day. Organ practice, \$6.00, one hour a day; \$10.00, two hours a day; \$12.00, three hours a day. Practice rooms are available only to students taking music courses.

PHYSICAL EDUCATION ACTIVITIES, per quarter: bowling, \$5.00; canoeing, \$3.00; golf instruction, \$1.50.

REFUND OF FEES, CHARGES, AND RENTALS

All fees will be refunded in full if complete withdrawal is made during the first three calendar days of the quarter; one-half the amount will be refunded if withdrawal is made during the first thirty calendar days. Refunds are not made to students withdrawing under discipline.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund, if payment was made by check.

FEES FOR NONRESIDENT STUDENTS

Prospective students are classified as nonresidents when their credentials come from schools outside Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

Examples of Autumn, Winter, and Spring Quarter Fees for Various Types of Registration

Type of Registration	Tuition Fee	Incidental Fee	ASUW Fee*	Total Fees
			Autumn, Winter, and Spring Quarters	Autumn, Winter, and Spring Quarters
Full-time students** (undergraduate and graduate) except in Medical and Dental Schools	\$105.00	\$186.50	\$8.50	\$200.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	105.00	69.00	†	174.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time	52.50	86.50	8.50	147.50
Part-time (max. 6 credits)§	52.50	69.00	†	121.50
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (non-thesis)		56.50	†	56.50

* Athletic admission ticket is optional for ASUW members. Autumn, Winter and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.

** A \$25.00 uniform rental is paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.

† Optional; if membership in ASUW is desired, the ASUW fee should be added to the total fee as shown for this type of registration.

‡ See Exemptions to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by Graduate School.

SCHOLARSHIPS AND LOANS

ENGINEERING EXPERIMENT STATION RESEARCH ASSISTANTSHIPS. The Board of the Engineering Experiment Station each year awards a limited number of assistantships to graduate students in various departments of the College of Engineering. These assistantships are granted to students who qualify for full graduate standing at the University and who submit outstanding records of scholarship in their undergraduate courses. The assistantships amounts to \$235.00 a month for twelve months, or a total of \$2,820.00. Approximately one half time will be devoted to research leading to a thesis. Additional information and application forms may be obtained from the Director of the Engineering Experiment Station.

AMERICAN SOCIETY FOR METALS SCHOLARSHIP, \$500. Awarded to sophomore student in metallurgical engineering.

AMERICAN ROCKET SOCIETY, PACIFIC NORTHWEST SECTION, \$213. Awarded to entering freshman in engineering or science who has a demonstrated interest in rockets or space flight. Must be from Washington, Oregon, Montana, Idaho, or Alaska, with a high school grade-point average of 3.00 or better.

AMERICAN SMELTING AND REFINING COMPANY SCHOLARSHIP, \$500. Awarded to senior in metallurgical engineering.

ARVA, INC. SCHOLARSHIP IN ELECTRONICS, \$300. Awarded to senior in electrical engineering, specializing in electronics.

ASPHALT PAVING ASSOCIATION FELLOWSHIP, \$500. Awarded to graduate student in civil engineering.

ASSOCIATED GENERAL CONTRACTORS FELLOWSHIP, \$250. Awarded to two senior students in civil engineering for graduate study.

WALLACE LIPPINCOTT ATKINSON PRIZE IN MINING ENGINEERING, \$25. Awarded to student in mining engineering.

SAMUEL G. BAKER AWARD IN CHEMICAL ENGINEERING, \$100. Awarded to outstanding senior student.

BECHTEL CORPORATION SCHOLARSHIPS, \$250. Awarded to four entering freshmen.

FRIENDS OF B-E-C-K CONSTRUCTORS SCHOLARSHIP IN ENGINEERING, \$500. Awarded to a sophomore or a junior engineering student.

HENRY K. BENSON SCHOLARSHIP, variable. Awarded to students in chemical engineering.

BOEING AIRPLANE COMPANY SCHOLARSHIPS, \$300. Awarded to four freshman students in aeronautical engineering, civil engineering, electrical engineering, and mechanical engineering, and continuing for the four undergraduate years.

BOEING AIRPLANE COMPANY GRADUATE FELLOWSHIPS, \$1,350 plus tuition and fees. Awarded to two graduate students in aeronautical engineering, civil engineering, electrical engineering, or mechanical engineering.

CIBA COMPANY SCHOLARSHIP, \$500. Awarded to junior in chemical engineering.

CONVAIR FELLOWSHIP, \$1,000 per year. Awarded to aeronautical, electrical, mechanical, civil, engineering students, on the basis of academic achievement, leadership, moral character, professional objective. Awarded expressly to those students preparing for the practice of engineering rather than teaching or pure research.

DOUGLAS AIRCRAFT COMPANY SCHOLARSHIP, \$750. Awarded to senior student in aeronautical engineering or mechanical engineering.

DOW CHEMICAL COMPANY SCHOLARSHIPS. Tuition scholarships awarded to ten undergraduate students in chemical engineering.

ENGINEERING COUNCIL SERVICE AWARD. Awarded to outstanding undergraduate student in the College.

SYLVIA W. FARNEY MEMORIAL SCHOLARSHIP, \$500. Awarded to junior in mechanical engineering for senior year.

FERRO CORPORATION FELLOWSHIP, \$2,500. Awarded to graduate student in ceramic engineering.

MAJOR REUBEN H. FLEET SCHOLARSHIP, \$500. Awarded to an undergraduate aeronautical engineering student.

GLADDING McBEAN & COMPANY SCHOLARSHIPS IN CERAMICS, \$350. Awarded to two freshman students in ceramic engineering and continuing for the four undergraduate years.

HEWLETT-PACKARD WASHINGTON ALUMNI SCHOLARSHIP, Tuition and fees. Awarded to undergraduate students in engineering, industrial design, or science.

HOOKE ELECTROCHEMICAL COMPANY RESEARCH FELLOWSHIP IN CHEMICAL ENGINEERING, \$2,500. For graduate students.

CLIFFORD A. HOULAHAN SCHOLARSHIP IN CERAMIC ENGINEERING, \$100. Awarded to undergraduate student in ceramic engineering.

IDEAL CEMENT COMPANY GRADUATE FELLOWSHIP IN CIVIL ENGINEERING, \$550 per quarter for four quarters. Awarded to graduate student in civil engineering interested in the field of cement or concrete technology.

IRE-AIEE SCHOLARSHIP, \$225. Awarded to student beginning his sophomore year in electrical engineering.

KAISER ALUMINUM AND CHEMICAL CORPORATION FELLOWSHIP, \$1,500 plus tuition and fees. Awarded to a graduate student in mechanical engineering.

LADIES AUXILIARY SEATTLE SECTION AMERICAN SOCIETY OF CIVIL ENGINEERS SCHOLARSHIP, \$100. Awarded to undergraduate student in civil engineering.

LIVINGSTON WERNECKE MEMORIAL SCHOLARSHIP IN MINERAL ENGINEERING, stipend variable. For undergraduate students, including freshmen.

LONGVIEW FIBRE COMPANY SCHOLARSHIP, \$200. Awarded to student in chemical engineering and to student in mechanical engineering.

WILLIAM MCKAY SCHOLARSHIP IN MINERAL ENGINEERING, stipend variable. For upper-division undergraduate students.

EDWARD ORTON, JR. CERAMIC FOUNDATION FELLOWSHIP, \$1,845 plus tuition. Awarded to graduate student in ceramic engineering.

PACIFIC COAST DIVISION PULP & PAPER MILL ASSOCIATION SCHOLARSHIP, tuition and fees. Awarded to freshman students in chemical engineering.

PAPER INDUSTRY MANAGEMENT ASSOCIATION SCHOLARSHIP, tuition. Awarded to undergraduate in chemical engineering.

LARRY PENBERTHY SCHOLARSHIP IN CERAMIC ENGINEERING, \$350. Awarded to a student in ceramic engineering.

PENNSYLVANIA GLASS SAND CORPORATION SCHOLARSHIP IN CERAMIC ENGINEERING, tuition only. Awarded to junior student in ceramic engineering.

BURT PORTER COMPANY SCHOLARSHIP, \$500. Awarded to entering freshman in electrical engineering.

PROCTOR & GAMBLE FELLOWSHIP IN CHEMICAL ENGINEERING, \$2,000-\$3,000. Awarded to graduate student. Not awarded every year.

PUGET SOUND CHAPTER AMERICAN SOCIETY OF METALS, \$200. Awarded to undergraduate student in metallurgical engineering.

PUGET SOUND ELECTRIC LEAGUE SCHOLARSHIP, \$250. Awarded to sophomore, junior, or senior in electrical engineering.

RAYONIER FOUNDATION SCHOLARSHIP, \$500. Awarded to two senior students in chemical engineering, electrical engineering, or mechanical engineering.

RAYONIER FOUNDATION FELLOWSHIP IN CHEMICAL ENGINEERING, \$2,500. Awarded to graduate student.

RICHFIELD OIL CORPORATION FELLOWSHIP IN CHEMICAL ENGINEERING, \$1,500. Awarded to graduate student.

MARJORIE ROTHERMEL MEMORIAL SCHOLARSHIP, \$750. Awarded to mechanical engineering student for senior year.

SQUARE D. SCHOLARSHIP, \$300. Awarded to a junior and senior in electrical engineering, industrial engineering, or mechanical engineering.

STANDARD OIL COMPANY OF CALIFORNIA SCHOLARSHIP IN MECHANICAL ENGINEERING, \$750. Awarded to undergraduate student in mechanical engineering.

STANDARD OIL COMPANY OF CALIFORNIA FELLOWSHIP IN CHEMICAL ENGINEERING, \$1,500. Awarded to graduate student.

SUNSHINE MINING COMPANY SCHOLARSHIP IN MINING ENGINEERING, \$300 per year for three years. Awarded to student registering in mining engineering.

MELVIN O. SYLLIAASEN MEMORIAL SCHOLARSHIPS, \$500. Awarded to two students in civil engineering.

TECHNICAL ASSOCIATION OF PULP AND PAPER INDUSTRY FELLOWSHIP IN CHEMICAL ENGINEERING, \$2,025. Awarded to graduate student.

TEXAS COMPANY FELLOWSHIP IN CHEMICAL ENGINEERING, \$2,025. Awarded to graduate student.

TODD-HICKOK MEMORIAL SCHOLARSHIP, \$250. Awarded to freshman student after first quarter in residence. A continuing scholarship awarded every four years.

VERMICULITE AWARDS IN CERAMIC ENGINEERING, \$150, \$75, \$25. Awarded to undergraduate or graduate students registering in ceramic engineering.

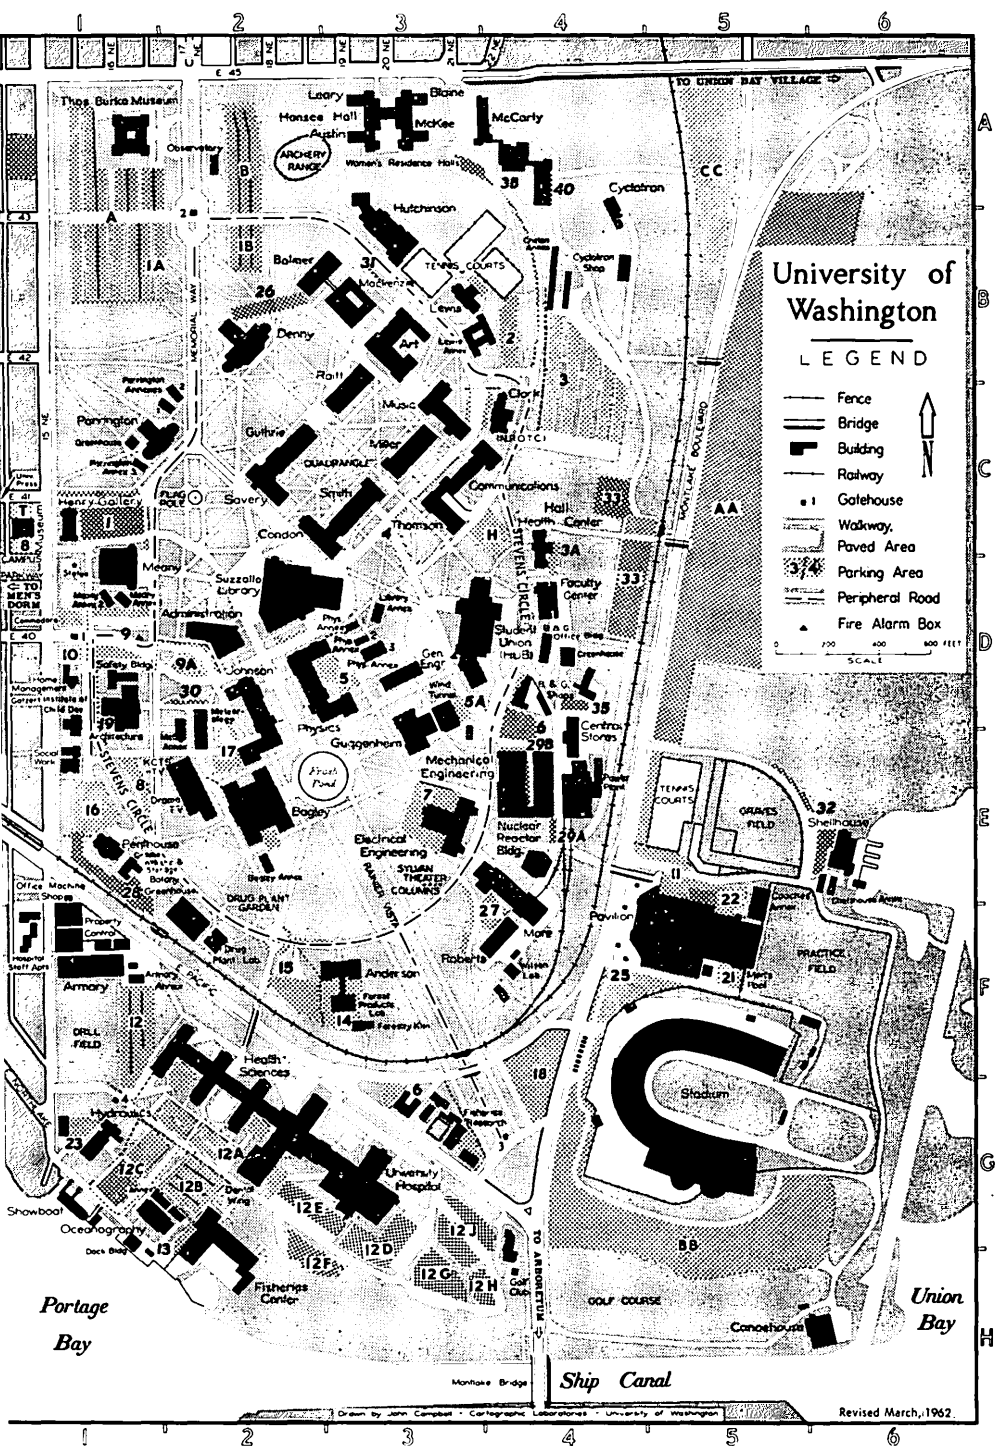

RUSSELL GIBSON WAYLAND SCHOLARSHIP IN MINING ENGINEERING, \$250. Awarded to student registered in mining engineering.

WEST COAST ELECTRONIC MANUFACTURERS' ASSOCIATION SCHOLARSHIP IN ELECTRICAL ENGINEERING, \$600. Awarded to undergraduate student in electrical engineering.

WESTERN ELECTRIC COMPANY SCHOLARSHIP, minimum \$400. Awarded to undergraduate student in electrical or mechanical engineering.

EUGENE AINSWORTH WHITE SCHOLARSHIP IN METALLURGICAL ENGINEERING, \$250. Awarded to student registered in metallurgical engineering.

Engineering Student Loan Fund, administered through the Office of the Dean of the College. Loans up to \$200 may be made to students who find it difficult to continue in school because of insufficient funds. Other emergency loans are made through the Office of the Dean of Students. See page 30.

BULLETIN • UNIVERSITY OF WASHINGTON

COLLEGE OF FISHERIES

1962-1964

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter Bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

CALENDAR

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this bulletin.

AUTUMN QUARTER, 1962

REGISTRATION PERIOD

- APR. 30-MAY 25 Advance Registration only for students in residence Spring Quarter, 1962. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
- SEPT. 10-27 In-Person Registration for students in residence Spring Quarter, 1962, who did not complete Autumn Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
- SEPT. 10-27 In-Person Registration for former students not in residence Spring Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Appointments or Permits is September 1.*
- JULY 15 Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointments will be mailed with Official Notice of Admission.
- SEPT. 1 Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
- SEPT. 11-27 In-Person Registration for ALL new students.
- SEPT. 27 Last day to register for Autumn Quarter, 1962. Note application deadlines above.
- OCT. 1-5. Change of registration by appointment only.

ACADEMIC PERIOD

- OCT. 1-MONDAY Instruction begins.
- OCT. 5-FRIDAY Last day to add a course
- NOV. 1-THURSDAY Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1963, due at Registrar's Office.
- NOV. 12-MONDAY State Admission Day holiday
- NOV. 21-WEDNESDAY Last day to submit applications for advanced credit examinations
- NOV. 21-26 Thanksgiving recess (6:30 p.m. to 7:30 a.m.)
- DEC. 8-SATURDAY Advanced credit examinations
- DEC. 12-18 Final examinations
- DEC. 18-TUESDAY Quarter ends

WINTER QUARTER, 1963

REGISTRATION PERIOD

- OCT. 29-Nov. 27 Advance Registration only for students in residence Autumn Quarter, 1962. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.

JAN. 2-4	In-Person Registration for students in residence Autumn Quarter, 1962, who did not complete Winter Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
JAN. 2-4	In-Person Registration for former students not in residence Autumn Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 1.</i>
DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
DEC. 20	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
JAN. 2-4	In-Person Registration for ALL new students.
JAN. 4	Last day to register for Winter Quarter, 1963. Note application deadlines above.
JAN. 7-11	Change of registration by appointment only.

ACADEMIC PERIOD

JAN. 7—MONDAY	Instruction begins
JAN. 11—FRIDAY	Last day to add a course
FEB. 21—THURSDAY	Last day to submit applications for advanced credit examinations
FEB. 22—FRIDAY	Washington's Birthday and Founder's Day holiday
MAR. 9—SATURDAY	Advanced credit examinations
MAR. 15-21	Final examinations
MAR. 21—THURSDAY	Quarter ends

SPRING QUARTER, 1963**REGISTRATION PERIOD**

JAN. 28-FEB. 21	Advance Registration only for students in residence Winter Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
MAR. 26-28	In-Person Registration for students in residence Winter Quarter, 1963, who did not complete Spring Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
MAR. 26-28	In-Person Registration for former students not in residence Winter Quarter, 1963. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is March 1.</i>
MAR. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
MAR. 15	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former

SUMMER QUARTER, 1963**REGISTRATION PERIOD**

General In-Person Registration for ALL students (*by appointment only*):

June 6-10

June 17-21

New students. Admission to the University is a prerequisite for registration in Summer Quarter classes. Complete credentials must be filed with the Office of Admissions by May 15 to be considered for admission with *Regular* standing. See *Summer Quarter Bulletin* regarding admission as a *nondegree* candidate with status *Summer Quarter Only*. New (entering) students will be mailed Registration Appointments with their Official Notice of Admission.

Students in residence Spring Quarter, 1963:

Registration Appointments or Permits to register will be issued according to class, *only upon presentation of ASUW card in person*, at the Registrar's Office as follows:

Seniors and Graduates.....Monday, April 22, 8 a.m. to 5 p.m.

JuniorsTuesday, April 23, 8 a.m. to 5 p.m.

SophomoresWednesday, April 24, 8 a.m. to 5 p.m.

FreshmenThursday, April 25, 8 a.m. to 5 p.m.

Former Students not in residence Spring Quarter, 1963, may obtain an Application for Appointment or Permit by writing to, or calling in person at, the Registrar's Office, Room 109, Administration Building, or telephoning LAkeview 4-6000, Extension 2551, beginning April 22 and preferably *no later than May 15*. Registration may be delayed by later application. Registration materials cannot be prepared until an application is received. The application deadline for term "a" and full Summer Quarter is June 17.

All students in the Schools of Law, Dentistry, and Medicine must file an Application for Registration Permit, although no appointment date is necessary.

AUTUMN QUARTER, 1963

REGISTRATION PERIOD

MAY 6-29	Advance Registration only for students in residence Spring Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 3-26	In-Person Registration for students in residence Spring Quarter, 1963, who did not complete Autumn Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
SEPT. 3-26	In-Person Registration for former students not in residence Spring Quarter, 1963. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is August 15.</i>
JULY 15	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
SEPT. 1	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
SEPT. 4-26	In-Person Registration for ALL new students.
SEPT. 26	Last day to register for Autumn Quarter, 1963. Note application deadlines above.
SEPT. 30-OCT. 4	Change of Registration by appointment only.

ACADEMIC PERIOD

SEPT. 30—MONDAY	Instruction begins
OCT. 4—FRIDAY	Last day to add a course
NOV. 1—FRIDAY	Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1964, due at Registrar's Office
NOV. 11—MONDAY	State Admission Day holiday
NOV. 22—FRIDAY	Last day to submit applications for advanced credit examinations
NOV. 27—DEC. 2	Thanksgiving recess (6:30 p.m. to 7:30 a.m.)
DEC. 7—SATURDAY	Advanced credit examinations
DEC. 11-17	Final examinations
DEC. 17—TUESDAY	Quarter ends

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this bulletin.

WINTER QUARTER, 1964**REGISTRATION PERIOD**

OCT. 29-NOV. 22	Advance Registration only for students in residence Autumn Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
DEC. 30-JAN. 2	In-Person Registration for students in residence Autumn Quarter, 1963, who did not complete Winter Quarter, 1964, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
DEC. 30-JAN. 2	In-Person Registration for former students not in residence Autumn Quarter, 1963. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 1.</i>
DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
DEC. 20	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
DEC. 30-JAN. 2	In-Person Registration for ALL new students.
JAN. 2	Last day to register for Winter Quarter, 1964. Note application deadlines above.
JAN. 6-10.	Change of Registration by appointment only.

ACADEMIC PERIOD

JAN. 6—MONDAY	Instruction begins
JAN. 10—FRIDAY	Last day to add a course
FEB. 21—FRIDAY	Last day to submit applications for advanced credit examinations
FEB. 22—SATURDAY	Washington's Birthday and Founder's Day holiday
MAR. 7—SATURDAY	Advanced credit examinations
MAR. 13-19	Final examinations
MAR. 19—THURSDAY	Quarter ends

SPRING QUARTER, 1964**REGISTRATION PERIOD**

JAN. 27—FEB. 21	Advance Registration only for students in residence Winter Quarter, 1964. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
MAR. 24-26	In-Person Registration for students in residence Winter Quarter, 1964, who did not complete Spring Quarter, 1964, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
MAR. 24-26	In-Person Registration for former students not in residence Winter Quarter, 1964. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is March 1.</i>

MAR. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
MAR. 15	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
MAR. 24-26	In-Person Registration for ALL new students.
MAR. 26	Last day to register for Spring Quarter, 1964. Note application deadlines above.
MAR. 30-APRIL 3	Change of registration by appointment only.

ACADEMIC PERIOD

MAR. 30—MONDAY	Instruction begins
APRIL 3—FRIDAY	Last day to add a course
MAY 8—FRIDAY	Last day to submit applications for advanced credit examinations
MAY 23—SATURDAY	Advanced credit examinations
MAY 30—SATURDAY	Memorial Day holiday
JUNE 5-11	Final examinations
JUNE 7—SUNDAY	Baccalaureate Sunday
JUNE 11—THURSDAY	Quarter ends
JUNE 13—SATURDAY	Commencement

For further information concerning subsequent quarters, inquire at the Registrar's Office.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this bulletin.

OBSERVANCE OF UNIVERSITY RULES AND REGULATIONS

It is the University's expectation that a student will follow University rules and regulations as they are stated in the Bulletins. In instances where no appeal procedure is spelled out and the student is persuaded that a special set of circumstances makes appeal reasonable, he may appeal the application of specific rules or regulations to the Office of the Dean of the School or College in which he is enrolled in the case of an academic matter, or to the Office of the Dean of Students in the case of a nonacademic matter. These offices will either render a decision on the appeal or refer the student to the proper office for a decision.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

ADMINISTRATION

BOARD OF REGENTS

MRS. A. SCOTT BULLITT, <i>President</i>	Seattle
ALBERT B. MURPHY, M.D., <i>Vice-President</i>	Everett
JOSEPH DRUMHELLER	Spokane
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima
HELEN E. HOAGLAND, <i>Secretary</i>	
DON H. WAGEMAN, <i>Treasurer</i>	

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN LEGGETT, Ph. D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>
RICHARD VAN CLEVE, Ph.D.	<i>Dean of the College of Fisheries</i>

FACULTY OF THE COLLEGE OF FISHERIES

The first date following a name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present academic rank.

- Bell, Frederick Heward, 1931, *Lecturer in Fisheries*
B.A., 1924, British Columbia
- Bell, Milo Carsner, 1953 (1957), *Associate Professor of Fisheries*
B.S., 1930, Washington
- DeLacy, Allan Clark, 1946 (1958), *Professor of Fisheries*
B.S., 1932, M.S., 1933, Ph.D., 1941, Washington
- Dollar, Alexander Melville, 1959 (1962), *Associate Professor of Fisheries*
B.S., 1948, M.S., 1949, California; Ph.D., 1958, Reading
- Donaldson, Lauren Russell, 1935 (1948), *Professor of Fisheries; Director of the Laboratory of Radiation Biology*
A.B., 1926, Intermountain Union College (Montana); M.S., 1931, Ph.D., 1939, Washington
- Fields, Paul Eldon, 1953 (1955), *Professor of Comparative Psychology*
A.B., 1926, A.M., 1927, Ohio Wesleyan; Ph.D., 1930, Ohio State
- Katz, Max, 1960 (1962), *Acting Associate Professor*
B.S., 1939, Ph.D., 1949, Washington
- Liston, John, 1957 (1960), *Associate Professor of Fisheries*
B.S., 1952, University of Edinburgh (Scotland); Ph.D., 1955, University of Aberdeen (Scotland)
- Lynch, James Eric, 1931 (1958), *Professor Emeritus of Fisheries*
B.A., 1917, M.A., 1921, Nebraska; Ph.D., 1929, California

Royce, William Francis, 1958, *Professor of Fisheries; Director of the Fisheries Research Institute*

B.S., 1937, Ph.D., 1943, Cornell University

Sparks, Albert Kirk, 1958, *Associate Professor of Fisheries*

B.S., 1947, M.S., 1949, Ph.D., 1957, Agricultural and Mechanical College of Texas

Thompson, William Francis, 1930 (1958). *Professor Emeritus of Fisheries*

B.A., 1911, Ph.D., 1930, Stanford

Van Cleve, Richard, 1948 (1958), *Professor of Fisheries; Dean of the College of Fisheries*

B.S., 1927, Ph.D., 1936, Washington

Welander, Arthur Donovan, 1937, (1958), *Professor of Fisheries; Professor in Laboratory of Radiation Biology*

B.S., 1934, M.S., 1940, Ph.D., 1946, Washington

Strickland, Helen D., *Librarian*

B.A., 1926, Hiram College

RESEARCH APPOINTMENTS

Ayyangar, Kilambi, *Research Assistant*

B.S., 1954, Andhra University, Waltair, India; M.S., 1961, University of British Columbia, Vancouver, B.C.

Chung, Jong Rak, *Research Assistant*

B.S., 1961, Washington

Dryfoos, Robert, *Research Assistant*

B.S., 1961, Washington

Ellis, James N., *Fisheries Biologist III*

B.S., 1942, Washington

Frick, Phyllis, *Laboratory Technician II*

B.S., 1957, Washington State

Greenough, Joseph, *Research Assistant*

A.B., 1959, Michigan

Guardia, Enrique, *Research Assistant*

B.S., 1961, Washington

Houghtby, Gary, *Assistant Bacteriologist*

B.S., 1956, M.S., 1961, Michigan State

Lichtenheld, Richard, *Fisheries Biologist I*

B.S., 1958, Colorado State

Lighthart, Bruce, *Research Assistant*

B.S., 1959, San Diego State

Raj, Harkisan, *Research Assistant Professor*

B.S., 1947, University of Bombay, Bombay, India; M.S., 1952, Ph.D., 1955, University of Poona, Poona, India

Simon, Raymond C., *Fisheries Biologist II*

B.S., 1957, M.S., 1960, Washington

Taub, Frieda B., *Research Assistant Professor*

B.A., 1955, M.S., 1957, Ph.D., 1959, Rutgers University

Ting, Robert Y., *Research Assistant*

B.S., 1955, Washington

Tripple, Mary Frances, *Laboratory Technician II*

B.S., 1961, Washington

Wedemeyer, Gary, *Research Assistant*

B.S., 1957, Washington

Wiebe, William, *Research Assistant*

B.A., 1957, Stanford

FISHERIES RESEARCH INSTITUTE

Anthony, Vaughn, *Research Assistant*

GENERAL INFORMATION

IN THE SPRING of 1861 three forward-looking Seattle citizens, Arthur A. Denny, Judge Edward Lander, and Charles C. Terry, deeded ten acres of land for the establishment of a new University in what was then Washington territory. Several months later, on November 4, 1861, the University of Washington opened the door of a new frame building where the twenty-two-year-old "principal," Asa S. Mercer, began the instruction of thirty-one students, many of them young men recruited from nearby logging camps.

By 1889, when Washington was admitted to the Union, the University had achieved a consistent program and an enrollment of more than one hundred students. But it was clear that the original building would soon be inadequate and that the University would need more room for development. In 1891 the new University site, the present 600 acre campus between Lake Washington and Lake Union, was selected. The first of the new buildings, Denny Hall, was completed in 1894 and occupied for the first time in September, 1895, when the University's enrollment was 425 students. (The original campus is now in the center of downtown Seattle. The Olympic Hotel stands on the ground occupied by the first University of Washington building).

Throughout its history the University has taken an active and earnest interest in the natural resources of the Northwest. This interest is evidenced by the establishment of a curriculum in mining engineering in 1893, the College of Forestry in 1907, and the College of Fisheries in 1919. In January of 1958, the Board of Regents of the University reaffirmed this interest and recognized the importance of fisheries to the economy of the area by incorporating the two fisheries groups on the campus, the School of Fisheries and the Fisheries Research Institute, into the re-established College of Fisheries. Food Science was established as a college curriculum in 1960.

PHILOSOPHY AND OBJECTIVES

The College of Fisheries was created to deal with the unique fisheries problems in the Northwest characterized by the rapid development and subsequent decline of great marine and anadromous fisheries. Its program and philosophy have been shaped by biological problems dealing with whole populations of fish, some of which have provided the first known examples of successful management of marine or anadromous species. Problems of equal magnitude arising from conflicting uses of waters essential for spawning of salmon have directed attention to fresh water. The importance of rapidly growing recreational fishing has further emphasized the importance of work in streams and lakes.

The undergraduate curricula followed by fisheries and food science students are designed to provide, in the earlier years, basic training in physical and biological science and, in the late stages of the program, broad coverage of professional topics in fisheries or food science. The aim is to produce at the bachelor's level graduates with a good general education, particularly in the basic sciences, and a level of professional competency which will enable them to deal confidently with the many and varied problems which await them in their future areas of employment.

The graduate program is designed to produce young scientists well grounded in basic and applied concepts in fisheries or food science and familiar with techniques and methods of modern research who can, hopefully, solve the basic biological problems which exist in the fields of fisheries and food science and, at the same time, promote more efficient, productive, and scientifically sound exploitation of the enormous national resources of the aquatic environment.

The fisheries and food science courses lay heavy emphasis on the particular situation of the Northwest, but this is done within a general context of wider interest arising from the international significance of these disciplines. Consequently, graduates from the College while eminently prepared for service within our own State and the Northwest area are also well able to fill positions in fisheries and food science in other parts of the United States of America and, indeed, of the world. The significant number of foreign students, sponsored by their home governments and international organizations, provides eloquent testimony of the unique situation of the College in the academic world and the degree of success which has been achieved in blending the needs of Northwest fisheries with those of the world at large in the formulation of the program.

COLLEGE FACILITIES

The College of Fisheries offers students an ideal balance of laboratory, classroom, and practical experience. The Fisheries Center houses the library, classrooms, laboratories, and general facilities as well as several research organizations. The building, constructed in 1949, is situated on the Lake Washington Ship Canal which connects Lake Washington, a large fresh-water lake, with the salt water of Puget Sound.

The branch library located in Fisheries Center contains research material covering subjects in fisheries, food science, and oceanography. It includes more than 14,000 bound volumes, 22,000 pamphlets, and currently receives more than 700 serial publications. All of the major abstract journals in the biological sciences are available in the library, as well as indexes to government research reports. Additional material needed for research work is obtained from other library collections on the campus or by interlibrary loan.

To assist in research and for teaching purposes, the College maintains a collection of about 250,000 preserved specimens, covering approximately 2000 species of fish from northern and southern oceans. As part of the practical experience and research program, the College has concrete fish ponds, connected to the Lake Washington Ship Canal by a fish ladder. Inside the Fisheries

Center, an experimental fish hatchery and salt water aquaria provide facilities for students to study the entire life cycle of the Pacific salmon as well as those of other fresh-water and salt-water fish. The Fish Behavior and Physiology Laboratory houses facilities for studying the behavior and swimming ability of fish.

In addition to the biological laboratories, there are complete laboratory facilities for both teaching and research in food science in the Fisheries Center. These include biochemical, microbiological and analytical laboratories, and a processing laboratory equipped with canning, freezing, smoking, and other food processing equipment.

A 67-foot, diesel-powered boat, with cabin laboratory, is operated by the College. The vessel, the "Commando," is used for instruction and research in Lake Washington, Puget Sound, and the North Pacific Ocean. It is capable of trawling to a depth of 1,000 fathoms, and is equipped for most other types of fishing used in the North Pacific.

Within two miles of the campus is located the headquarters of one of the Pacific Coast's largest fishing fleets. Puget Sound, in addition to its world-famous salmon and halibut fisheries, has extensive bottom fish, commercial oyster, clam, crab, and shrimp operations. Sports fishing, particularly for trout, is available in the Northwest's many lakes and streams. Full advantage is taken of the proximity of these natural resources in research and teaching.

THE FISHERIES RESEARCH INSTITUTE

The Fisheries Research Institute is a research branch of the College of Fisheries. The College's larger grants and contracts in the field of fishery biology are handled by the Institute under the direction of both teaching and research faculty. Employment on contracts and grants is given first to graduate or undergraduate students, and many graduate students are working toward their degrees on major fisheries problems which are being supported by contracts or grants.

The Institute was established in 1947 to continue research on salmon started in 1945 under the sponsorship of the Alaskan Salmon Industry, Inc. The research on salmon has continued and expanded under various industry, state, and federal contracts to most of the major salmon producing areas of Alaska and parts of the adjoining seas. Currently the principal salmon studies are: (1) ecology and population dynamics of red-salmon producing lakes, (2) migrations of salmon on the high seas, (3) effects of logging on salmon streams, (4) ecology of pink- and chum-salmon streams and nursery areas, and (5) guiding migrant salmon. Much of this work on salmon is important to the United States section of the International North Pacific Fisheries Commission, and members of the Institute staff participate in the meetings of this commission.

Research on problems other than salmon has been expanding rapidly. Current projects include benthic invertebrates of the North Pacific, several studies on oysters, ecology of paralytic shellfish toxicity, and studies of blood parasites of fish.

The Institute maintains headquarters on the University campus and semipermanent field stations at five locations in Alaska. A large amount of field and laboratory equipment is available together with a special collection of fisheries records from the Pacific Northwest and Alaska.

Provision is made to conduct research on fisheries problems in collaboration with other colleges and departments in the University, especially with engineering, economics, and law. Extensive use is made of the Pacific Northwest Computer Laboratory on the campus where IBM 650 and IBM 709 equipment is available.

RELATED ACTIVITIES

Offices are maintained in the Fisheries Center by the Washington State Department of Fisheries and the Washington State Department of Game. The Laboratory

of Radiation Biology, a national center for research in aquatic radiobiology supported by the Atomic Energy Commission, also has its quarters in the Fisheries Center.

In the city of Seattle are offices and laboratories of the U.S. Fish and Wildlife Service, and the headquarters of the International Pacific Halibut Commission is located on the campus.

The Friday Harbor Laboratories on San Juan Island, about eighty miles north of Seattle, are under the administration of the Graduate School and provide unique opportunities for teaching and research in the marine sciences. During the summer, courses in algology, marine zoology, fisheries, oceanography, and meteorology are offered for advanced undergraduate and graduate students.

ADMISSION TO THE UNIVERSITY AND TO THE COLLEGE

PRELIMINARY STATEMENTS

The Board of Admissions, which is appointed by the President, is responsible for the interpretation and administration of the regulations governing admission to the University.

The University recognizes high school diplomas, college credits presented for advanced standing, and college degrees earned in the following institutions: (1) high schools accredited by the Washington State Department of Public Instruction; (2) out-of-state high schools accredited by their state university and state department of public instruction, or by the regional accrediting association of the area; (3) colleges and universities accredited by their regional accrediting association.

Resident. Defined for purposes of admission and/or assessment of fees as an individual who has been domiciled in the state of Washington for one year immediately prior to his registration. The domicile of a minor is that of his parents or his legal guardian. The children of federal employees residing within the state of Washington and the children and spouses of staff members of the University are considered as residents for tuition purposes.

Nonresident. An applicant whose credentials are received from a school or college located outside the state of Washington. An applicant who believes himself eligible for resident status may apply for reclassification through the Office of Residence Classification which has final authority in determining such status.

Qualified Student. One whose scholastic standing and preparation meet the standards for admission to the University.

Regular Student. One who fulfills the following requirements: (1) has been granted regular admission to a college or school of the University; (2) whose current schedule for credit is satisfactory to the dean of his college or school; (3) has received medical clearance from the Student Health Service and has completed all of the required steps for registration, including the payment of tuition and fees, the filing of class cards, and the depositing of registration materials at Sections.

Grade-point averages. These are based on a four-point system in which A = 4, B = 3, C = 2, D = 1, E = 0. An adjustment to this system is made as necessary in the computation of grade-point averages earned at other institutions.

ADMISSION OF WASHINGTON RESIDENTS

ELIGIBILITY FOR ADMISSION WITH FRESHMAN STANDING

Undergraduate programs offered by the University lead to the baccalaureate degree; students, therefore, are admitted when, in the judgment of the University, they appear qualified to pursue a degree program with a reasonable probability of success. In making this judgment, the University's Board of Admissions con-

siders the applicant's total record, including such factors as scholastic achievement in a college preparatory program, recommendations of the high school principal or counselor, rank in class, and scores on any nationally administered tests associated with college entrance.

Scholastic achievement is measured largely in terms of the criteria listed below. All students entering the University are expected to meet these criteria. Non-residents and students who enter with advanced standing will find additional admission criteria in subsequent sections.

SCHOLASTIC CRITERIA

1. Graduation with diploma from an accredited high school.
2. Achievement of an over-all high school grade-point average of at least 2.50 in courses completed after September, 1960, and a grade-point average of at least 2.00 in courses completed prior to September, 1960.
3. Completion of a college preparatory program of at least 16 units to include the following:

a. English	at least 3 units
b. One foreign language	at least 2 units
c. College preparatory mathematics	at least 2 units
d. One laboratory science	at least 1 unit
e. Social science	at least 2 units
f. Electives from the above subjects	at least 2 units

Additional electives may be chosen from any subjects acceptable for high school graduation.

Intermediate algebra and trigonometry are prerequisites for the first courses in mathematics included in all College of Fisheries curricula. Students who plan to enter this College can, and preferably should, complete these courses in addition to the elementary algebra and plane geometry which normally are the two units of college preparatory mathematics. Without this additional preparation, students will probably find it necessary to spend an extra quarter at the University in completing work for the baccalaureate degree. It is recommended also that students study chemistry, physics, and if possible, biology while in high school.

Because an appropriate choice of high school electives serves to strengthen a student's preparation, the University will give this part of a student's record the same careful attention it gives to other aspects of his qualifications.

Junior High School Courses. The University recognizes college preparatory courses given in the junior high school and assigns them the same value as equivalent courses offered by the high school. Students who elect these subjects in the junior high school may subsequently achieve a superior degree of competence in related subject areas in high school.

Accelerated, Honors, and Advanced Placement Courses. The University encourages qualified students to extend themselves academically by taking advantage of advanced, accelerated, and honors courses offered by their schools. Successful participation in such challenging opportunities assures superior academic preparation and serves to identify those students more likely to profit from University-level honors courses.

The University of Washington grants placement and/or credit, at the discretion of the University department concerned, on the basis of scores earned in College Entrance Examination Board Advanced Placement Examinations, and on the basis of placement examinations administered to entering students (see "Required Tests and Examinations," page 23).

ELIGIBILITY FOR ADMISSION WITH ADVANCED STANDING

A qualified student in good standing at an accredited institution may apply for admission with advanced standing. Such an applicant is expected to have the same high school preparation as the student who enters as a freshman, and to

have a college grade-point average which meets the standards herein specified.

With fewer than 45 acceptable credits, an applicant must present a grade-point average of 2.50 in high school work completed after September, 1960; a 2.00 grade-point average in such work completed prior to this date; and a 2.00 cumulative average in all college work.

With 45 or more acceptable credits an applicant is expected to present a cumulative and last-term grade-point average of at least 2.00.

The Board of Admissions reserves the right to determine the exact amount of transfer credit to be accepted. Regulations concerning the transfer of credit may be found on page 47.

ADMISSION OF SPECIAL STUDENTS AND AUDITORS

Non-high school graduates who are 21 or older and legal residents of Washington may apply to the Board of Admissions for admission with special standing. With their application they must submit all available records of secondary school and college study. Special students may register in and take for credit whatever courses the dean of the college permits, but may not participate in student activities or receive degrees. By fulfilling conditions specified by the Board of Admissions, special students may change their status to that of regular students and may receive degrees.

Persons 21 or older may register as auditors in nonlaboratory courses or the lecture sessions of laboratory courses by obtaining the consent of the dean of the college and the instructors of the courses. Auditors do not participate in class discussion or laboratory work. They may receive credit for audited courses only by enrolling in them as regular students in a subsequent quarter.

ADMISSION OF NONRESIDENTS

ADMISSION OF NONRESIDENTS TO UNDERGRADUATE STANDING

Applications from nonresidents will be considered, but first preference is given legal residents of the state of Washington, and sons and daughters of University of Washington alumni residing outside the state.

Nonresident applicants are selected on the basis of their preparation and scholastic standing. In general, a freshman applicant must be eligible to enter the university of his own state, and satisfy the foregoing scholastic criteria with a 3.00 (B) grade-point average or place in the upper 25 per cent of his graduating class.

An applicant for admission with advanced standing with fewer than 45 college credits must have a cumulative grade-point average of at least 3.00 in standard college courses as well as a high school grade-point average of at least 3.00 or have been in the upper fourth of his class. An applicant presenting more than 45 credits for advanced standing must present a 2.70 grade-point average in standard college courses.

Sons and daughters of University of Washington alumni are admitted according to resident standards but are required to pay the regular nonresident tuition fees. Applicants for admission to curricula in which the University serves on a regional basis will be accorded special consideration by the Board of Admissions.

ADMISSION OF FOREIGN STUDENTS AND STUDENTS EDUCATED ABROAD

Applicants for admission with graduate or advanced undergraduate standing are expected to meet the same general requirements as nonresidents of Washington educated in American schools. However, they must file their credentials before March 1 to be considered for admission Autumn Quarter, or six months before the opening of another quarter in which they may wish to enroll. In addition, they must demonstrate a satisfactory command of the English language, and must have sufficient funds available in the United States to meet their expenses.

The official record of the Canadian student is the matriculation certificate or university admission certificate of his province. Canadian and foreign students who have been in university attendance must have official transcripts forwarded as required of all students. High school graduates and university transfer students must meet the scholarship requirements for nonresident students. See page 20.

UNDERGRADUATE ADMISSION, EXCEPTIONAL CASES

(See page 47.)

ADMISSION TO THE GRADUATE SCHOOL

Basic requirements for admission to the Graduate School are a bachelor's degree from an institution of recognized standing, a grade-point average of 3.00 in the junior and senior years of college work, approval of the Graduate School, and approval of the department in which the work is to be taken. For complete information, see the *Graduate School Bulletin*.

ADMISSION PROCEDURE

Requests for Application for Admission forms and correspondence regarding admission to any college or school of the University, undergraduate or graduate, should be addressed to the Office of Admissions, University of Washington, Seattle 5, Washington. Graduates of high schools and junior college students in the state of Washington may obtain this form from their principals.

Applications and required transcripts must be filed with the Office of Admissions prior to the following dates in order to be assured of consideration for admission to the quarter for which application is being made: July 15 for Autumn Quarter, December 1 for Winter Quarter, March 1 for Spring Quarter, May 15 for Summer Quarter.

All records become a part of the official file and can neither be returned nor duplicated for any purpose. Failure to submit complete credentials will be considered a serious breach of honor, and may result in permanent dismissal from the University.

A leaflet giving general information and instructions for registration is mailed with the Notice of Admission. In the event of a discrepancy, instructions in the leaflet supersede those found in earlier publications. *The University assumes no responsibility for applicants who come to the campus before they have been officially notified of their admission.*

The admissions credentials of applicants who do not register for the quarter to which they have been admitted are normally retained in the Office of Admissions for a period of one year from the date of application. At the end of this period, credentials on file are discarded unless the applicant has notified the Office of his continued interest in attending the University or of his enrollment in the Evening Classes program. Should a student wish to renew his application after the one-year lapse, he must submit new credentials in advance of the date given above for the quarter desired.

FOR FRESHMAN STANDING

An application form, obtained from the University's Office of Admissions or from a Washington high school, should be completed according to instructions appearing on the form and returned to the Office of Admissions.

Students may apply through their high schools on completion of the first semester of the senior year. Those who are qualified will be issued notices of early or conditional admission which become valid on graduation with a grade-point average of no less than 2.50 for the final semester. Others also will be notified of their admission status.

Scores on a nationally administered college aptitude test are not required. However, they may be helpful in evaluating a borderline student's probability of success.

FOR ADVANCED UNDERGRADUATE STANDING

An application form, obtained from the University's Office of Admissions or from a Washington junior college should be completed according to instructions appearing on the form and sent to the Office of Admissions. In addition, the applicant should request the principal of his high school and the registrar of each college he has attended to forward an official transcript of his record to the University's Office of Admissions. When these credentials have been evaluated, the applicant will be notified of his admission status.

FOR GRADUATE STANDING

An application form, obtained from the University's Office of Admissions, should be completed according to instructions appearing on the form and returned to the Office of Admissions. In addition an applicant should request the registrar of each college or university in which he has been enrolled as an undergraduate and/or graduate student to forward *two* official transcripts to the University's Office of Admissions. When these credentials have been evaluated, the applicant will be notified of his admission status. The student will find it convenient to have an additional copy of the record for reference.

VETERANS

ADMISSION OF VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Applications for and questions about government aid should be addressed to the Veterans Administration Regional Office.

WORLD WAR I OR II VETERANS

Under certain conditions a veteran of World War I or II who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges. See page 51.

KOREAN VETERANS

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building. Regulations concerning the Certificate are listed on page 49. Educational allowance payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

DISABLED VETERANS

A veteran with a disability under Public Law 894 should contact a training officer in the nearest Veterans Administration Office approximately four weeks prior to registration.

CHILDREN OF DECEASED VETERANS

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for Education and Training issued to those eligible persons by the Veterans Administration is to be presented, along with the Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed.

Credit requirements for monthly subsistence for Public Law 634 students are the same as those listed for Public Law 550 students; however, Public Law 634 students may not be authorized for less than half-time subsistence.

REQUIRED TESTS AND EXAMINATIONS

Washington Pre-College Testing Program

This grade prediction test is required of all entering freshmen, including those transferring to the University with fewer than 45 credits. In order to identify transfer students needing remedial instruction in English, the test is also required of those who have not completed a course equivalent to English 101 (English composition). High school seniors are advised to arrange through their high schools to take this test in the spring when it is offered throughout the state of Washington. Nonresidents of Washington may take the test at the time of their registration according to instructions mailed with the notice of admission. Sample copies are not available. Special, foreign, blind students, and auditors are exempted.

The several parts of this test have been selected because of their proven value for the prediction of grades most likely to be earned by a student. The results of the test are used by departmental advisers as an aid in assigning students to appropriate sections in English composition and other subjects. Therefore, it is advisable that the student bring a copy of the results with him when he comes for his first conference with his counselor or adviser.

Mathematics Placement Tests

One section of the Pre-College Test evaluates a student's mastery of intermediate algebra and plane geometry, while an additional placement test evaluates his knowledge of trigonometry. Satisfactory scores on these qualify a student to enroll in Mathematics 104 (Trigonometry) or Mathematics 105 (College Algebra).

Those who fail to qualify in both algebra and trigonometry may choose one of the following alternative plans:

1. Pass Mathematics 101 and then 104, or 105 or both. No credit is given for Mathematics 101 to students who have completed the third semester of high school algebra.
2. Pass Mathematics 103, in which the first four weeks are devoted to a review of intermediate algebra and the last six weeks to the study of plane trigonometry equivalent to Mathematics 104. The satisfactory completion of this course qualifies the student to enroll in Mathematics 105 (College Algebra).

Students who have studied trigonometry, fourth semester algebra, mathematical analysis, or similar subjects in high school, will be placed in the next appropriate course at the University according to their scores in additional placement tests given by the Department of Mathematics. It is advisable to review before taking these examinations. This generally applies to students entering such fields as engineering, architecture and urban planning, fisheries, forestry, pharmacy, mathematics, and the physical and marine sciences.

Medical Examination

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions, and to returning former students by the Registrar. This examination,

which is required before a student may register, is taken at the student's expense. A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on the campus.

REGISTRATION

PROCEDURE

ALL students, currently in school, who plan to register for a succeeding quarter (Summer Quarter excepted) must register by Advance Registration and pay fees by the stated deadline. Students are held responsible for knowing and observing registration procedures, dates, and deadlines which appear in the bulletins, in "Official Notices" in the *Daily*, and on campus bulletin boards.

New students are given appointments when they are notified of admission, and they receive complete directions for registering at the time of registration.

Students expecting to return to the University after an absence of a quarter or more (excluding Summer Quarter) must register by In-Person Registration. The required registration appointment may be obtained by writing to, calling at, or telephoning the Registrar's Office at the time specified in the Calendar, but in *no case* later than the stated deadline (see pages 4-9).

ADVISING

After notification of admission, and before registration, new students should visit or write to the College for help in planning their course programs. Academic and other counseling of fisheries students is given by faculty advisers in the College.

REGISTERED CREDITS ALLOWED EACH QUARTER

Except with the consent of his dean, no student may be registered for less than 12 credits (or the equivalent) or more than 16 credits (or the equivalent) or the number called for in the prescribed curricula, exclusive of physical education activity courses and lower-division military, naval, or air science courses. In no case may a student be registered for, or receive credit for more than 20 credits (or the equivalent) of work, exclusive of physical education activity courses, and lower-division military, naval, or air science courses. Work taken in noncredit courses or to remove entrance deficiencies, or concurrently in evening classes, by correspondence study, or in another collegiate institution, must be included in the computation of the total registered credits allowed.

CHANGES OF REGISTRATION

After students have registered, they cannot change their schedules except with permission of the Dean of the College. No student is permitted to make a registration change that involves entering a new course after the first calendar week of the quarter. After that time no student may register without the consent of the Dean and the instructor whose class the student wishes to enter.

WITHDRAWAL FROM COURSES OR FROM THE UNIVERSITY

See page 49.

SCHOLARSHIP

Grade points per credit are awarded on the following basis: a grade of A earns 4 points; B, 3 points; C, 2 points; D, 1 point. The grade of E or EW signifies failure and the grade point is 0. The quarterly and cumulative grade-point averages are computed by multiplying the grade point received in a course by the total number of credits the course carries, totaling these values, and dividing by the

total number of credits the student attempted. Courses for which any of the following symbols are recorded are not considered in determining the grade-point average: I, N, S, W, PW, X. Grade-point averages are calculated on the basis of all grades received in courses which carry academic credit, including courses repeated. Grades received in repeated courses do not cancel or replace any other grades. Only University of Washington residence credits will be used in these computations.

Any undergraduate student who has completed three or more quarters in the University and whose cumulative grade-point average is below 2.00 shall be placed on academic probation. Any undergraduate student who has completed not more than two quarters at the University shall be placed on probation when his cumulative grade-point average is below 1.80. The dean of the school or college in which the student is enrolled shall notify the student as soon as possible that he is on probation. Such action will be noted permanently on the student's official academic record.

ACADEMIC PROBATION

Academic probation is essentially a warning to the student that he must show improvement if he is to remain in the University. University regulations regarding scholastic eligibility for participation in intercollegiate athletics and other student activities shall be recommended to the Senate by the Faculty Committee on Intercollegiate Athletics and the Faculty Committee on Student Welfare respectively.

An undergraduate student on academic probation will be removed from probation at the end of any quarter in which his cumulative grade-point average reaches 2.00 or better.

Any undergraduate student on academic probation will be dropped: (1) if he fails to attain at least a 2.00 for the following quarter's work; or (2) if he fails to attain a 2.00 cumulative average at the end of the two subsequent quarters. Any student dropped under this rule will be notified in writing of this action by the dean of the school or college in which he is enrolled.

Only under exceptional circumstances will a student dropped under low scholarship rules be readmitted to the University. Such a student will be readmitted only at the discretion of the dean of the school or college to which he seeks admission. A student readmitted after being dropped under these rules will enter on academic probation. Such a student will be dropped: (1) if he fails to attain a 2.00 for the following quarter's work; or (2) if he fails to attain a 2.00 cumulative average at the end of two quarters. He will be removed from probation at the end of the quarter in which his cumulative grade-point average reaches 2.00 or better.

A senior who has completed the required number of credits for graduation but whose work in what would normally be his final quarter places him on probation will not receive a degree until he has been removed from probation. A senior who has completed the required number of credits for graduation but whose work in his last quarter results in his being dropped for low scholarship shall not receive a degree until he has been readmitted and removed from probation.

Senior standing is attained when 135 credits, plus the required quarters of physical education, have been earned. Of the work of the senior year (45 credits), at least 35 credits must be earned in three quarters of residence. The remaining 10 credits may be earned either in residence or in this University's evening classes or correspondence courses.

QUALIFICATIONS FOR GRADUATION

MINIMUM SUBJECT REQUIREMENTS

The University credit requirement for graduation is 180 academic credits (including Health Education 110 or 175) and the required quarters of physical education activity. The College of Fisheries requires that 9 credits or the equivalent in English 101, 102, and 103 (English Composition) be included in the total. At least

60 of the 180 credits must be in upper-division courses, those numbered 300 and above. A total of at least 36 credits in fisheries and food science is required. For graduation, students must have a cumulative average of 2.00 (C) in fisheries and food science courses and an over-all average of 2.00 (C) in all courses. Advanced ROTC courses do not count as upper-division credit, and no more than 18 credits in advanced ROTC courses may be counted toward graduation.

Students who transfer from other institutions are normally required to earn at least 10 credits in their major subject in this College.

MILITARY TRAINING

Military programs are available to University students on a voluntary basis.

The Departments of Air Science, Military Science, and Naval Science conduct the ROTC programs under agreements between the University and the United States Air Force, Army, and Navy. At the University, these programs are coordinated by the Dean of the College of Engineering. Complete descriptions of the military training programs may be found on pages 49 and 50.

PHYSICAL EDUCATION ACTIVITY COURSES

Students who enter the University as freshmen are required to complete one physical education activity course each quarter for the first three quarters of residence. In fulfilling the foregoing requirement, all students must pass a swimming test or satisfactorily complete one quarter of swimming. In fulfilling the three-quarter requirement, no activity course may be repeated for credit. Regulations concerning activity courses may be found on page 50.

HEALTH COURSES

All students who enter the University as freshmen are required to take Health Education 110 (women) or 175 (men) within the first three quarters of residence. The health education course requirement may be satisfied by passing a health-knowledge examination. Successfully passing this test exempts the student from the requirement but does not grant credit for Health Education 110 (women) or 175 (men). Veterans with one year or more of active service are exempt from this requirement.

ESTIMATE OF YEARLY EXPENSES

The figures given below are minimum estimates for an academic year, which includes Autumn, Winter, and Spring Quarters. Living costs and personal expenses vary widely with the needs of the individual student.

Tuition, Incidental, and Other Fees

Full-time resident student	\$300.00
Full-time nonresident student	600.00

<i>Athletic Admission Ticket</i> (optional)	6.50
---------------------------------------------	------

<i>Health and Accident Insurance</i> (optional)	17.25
-------------------------------------------------	-------

<i>Extra Service Charges and Rentals</i>	38.50
------------------------------------------	-------

Military uniform deposit, breakage ticket, and locker charges.

<i>Books and Supplies</i>	90.00
---------------------------	-------

Board and Room

Room and meals in Men's Residence Halls	720.00
-----------------------------------------	--------

Room and meals in Women's Residence Halls	660.00-765.00
-------------------------------------------	---------------

Room and meals in fraternity or sorority house (Including dues and social assessments.)	670.00-760.00
--------------------------------------------------------------------------------------------	---------------

Initial cost of joining is not included; this information may be obtained from the Interfraternity Council or Panhellenic Council.

<i>Personal Expenses</i>	300.00
--------------------------	--------

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration. The University reserves the right to change any of its fees and charges without notice.

The fee schedules for resident and nonresident students, appearing on pages 52 and 53, apply to the academic year (Autumn, Winter, and Spring Quarters). Summer fees are listed in the *Summer Quarter Bulletin*.

STUDENT ACTIVITIES AND SERVICES

ASSOCIATED STUDENTS

Membership in the Associated Students of the University of Washington, the central organization which conducts all student activities, is required of all regularly enrolled students. Through the ASUW Board of Control and its various committees and boards, students assume major responsibility in the government of student life. The ASUW helps to finance the programs of athletics, debates, concerts, lectures, and many other activities and facilities, including the University of Washington *Daily* and the Student Union Building.

FISHERIES CLUB

The students of the College of Fisheries formed the Fisheries Club in 1922. Since its beginning, the Club has been the center of extracurricular social and educational activities for the College students.

Meetings are held monthly, usually with prominent speakers from the various fields of the fishing industry. Frequently motion pictures are shown which deal with fisheries all over the world. In the past years the students have organized the Open House of the College of Fisheries. In addition the Club has its annual salmon bake and other social gatherings.

The Club has aided in procuring summer employment for many Fisheries students.

SCHOLARSHIPS AND LOANS

The University offers a number of awards for outstanding academic achievement. Some are given by the University, and many others are available through the generosity of friends and alumni. Information concerning the list of current awards and loans may be obtained from the Office of the Dean of Students.

Several scholarships and awards are available for students in the College of Fisheries. These are:

WALT SIMONSEN MEMORIAL SCHOLARSHIP, \$150. Awarded by the Washington State Sportsmen's Council to an outstanding senior student in fisheries, forestry, or game management.

THE NORTHERN COMMERCIAL COMPANY SCHOLARSHIP, \$500. Awarded to a senior or graduate student in fisheries technology.

ASSOCIATION OF PACIFIC FISHERIES SCHOLARSHIP, \$300. Awarded to an entering freshman in the College of Fisheries.

WILLIAM FRANCIS THOMPSON SCHOLARSHIP, \$250. Awarded to an undergraduate or graduate student in fisheries.

CROWN ZELLERBACH FOUNDATION SCHOLARSHIP, \$500. Awarded to an undergraduate or graduate student in fisheries biology.

PACIFIC FISHERIES BIOLOGIST SCHOLARSHIP, \$100 (every third year). Awarded to an undergraduate or graduate student in fisheries biology.

BUREAU OF COMMERCIAL FISHERIES FELLOWSHIP, \$3000-\$4000. Awarded to a graduate student in fisheries biology or in food science.

University Comptroller loans, National Defense Education Act loans, and emergency loans are administered by the Office of the Dean of Students.

The University of Washington awards 100 tuition scholarships each academic year to worthy students from other countries. There are no scholarships available for the Summer Quarter. These awards are made on the basis of the academic record of the student, recommendations from his professors, his need for such assistance, and the availability of such openings in his department at the University. These scholarships cover tuition only and are administered by the Foreign Exchange Scholarship Committee, Foreign Students Office, University of Washington, Seattle 5, Washington, U.S.A. Application for these scholarships must be made by March 1 for the following year.

OFFICE OF THE DEAN OF STUDENTS

The Office of the Dean of Students is concerned with the general welfare of students and welcomes correspondence and conferences with both parents and students. This Office works closely with the advisory system of the colleges and schools of the University; it directs students to faculty advisers, the Counseling Center, and other persons and agencies offering information and assistance with personal and social problems. The Dean of Students Office also has current information on Selective Service Regulations.

The Foreign Students Office operates through the Office of the Dean of Students. The Foreign Student Adviser and his staff offer guidance on all nonacademic problems to students from other countries. Questions about immigration regulations, housing, social relationships, personal problems, finances, minimum course requirements, and employment should be referred to this Adviser. Students who are interested in study abroad may obtain from him information about schools in other countries and about Fulbright and other scholarships.

COUNSELING CENTER

The Counseling Center in Lewis Hall Annex offers vocational and educational counseling to students who need help in their adjustments to college. The staff of the Center, which includes vocational counselors and psychologists, works closely with other student services and supplements the academic advisory program.

HOUSING

Information and applications for residence in University-owned housing for single persons may be obtained by writing to the Manager, Men's Residence Halls, 1201 N.E. Campus Parkway, Seattle 5, or to the Manager, Women's Residence Halls, University of Washington, Seattle 5. Until August 1, preference in assignment to vacancies is given to students under twenty-one years of age; thereafter, assignments are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

University regulations require that women students under twenty-one who do not live at home must live in approved group residences such as the Women's Residence Halls, sororities, and church-sponsored living groups. Other types of living arrangements must be reported to the Dean of Women and be approved by the student's parents or guardian.

Information about fraternities or sororities may be obtained by writing to the Interfraternity Council or the Panhellenic Council, Student Union Building, University of Washington, Seattle 5.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings, however, must be consulted in person.

Teaching and research assistants and other part-time sub-faculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have

children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 23 Administration Building, for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

HEALTH SERVICES

The University maintains a health service and infirmary to help guard against infectious diseases and incipient ill health.

The infirmary receives bed patients at any hour and provides nursing care, medicines, and the attendance of a staff doctor up to one week each quarter free of charge. For a period longer than one week, a charge of \$2.00 a day is made. At their own expense, infirmary patients may consult any licensed physician in good standing.

Health and accident insurance for students is available at the time of registration.

EMPLOYMENT

Part- and full-time work off campus may be obtained through the University Placement Office. Applications are accepted from students or graduates of the University and from the wives or husbands of University students. Because job listings change rapidly, application must be made in person after residence in Seattle has been established. Placement in jobs on the campus is handled by the Personnel Department and the ASUW Personnel Office.

The College of Fisheries assists students in the College to obtain summer employment while in the University and also to obtain permanent employment when they graduate. Some Research Assistantships furnishing part-time employment for students are available in the College. Both summer and part-time employment during the scholastic year are frequently available with the research organizations which are associated with the College of Fisheries on or near the campus and elsewhere in the Northwest. The Fisheries Research Institute normally hires students for summer work in the field and usually has several part-time positions available during the school year. Similar work is available in the Washington State Department of Game, Washington State Department of Fisheries, the U.S. Fish and Wildlife Service, the International Pacific Halibut Commission, Laboratory of Radiation Biology, Oregon Fish Commission, the International Pacific Salmon Fisheries Commission, and the Alaska Department of Fisheries. These jobs may be located within the state of Washington but frequently take the students to Alaska or elsewhere in the United States. These agencies normally interview students at the College of Fisheries during the Winter Quarter for the purpose of choosing both permanent employees and employees for temporary summer work. Fisheries students are encouraged to seek summer work in the field to gain valuable experience in both fisheries biology and fisheries or food technology.

Graduate students in the College of Fisheries are in a very favorable position to pursue an active research program leading to advanced degrees. Members of the instructional staff of the College are engaged in research programs that keep them abreast of the rapidly developing special fields of fisheries and food research. The fine physical facilities of the College provide many special laboratories where research may be conducted on thesis problems.

In addition to the opportunities for graduate work at the College of Fisheries, the federal government, International Fisheries Commissions, and State Fisheries Departments have research staffs working in laboratories on or near the campus. Many of the senior research members of the cooperating fisheries research laboratories and in industry are lecturers in the College. Graduate students, besides finding financial support in such laboratories, may, under special arrangements, carry out research which upon approval may be used to satisfy the thesis requirements for the advanced degree.

THE COLLEGE PROGRAMS

THE COLLEGE PROGRAMS

The College of Fisheries offers courses leading to the degrees of Bachelor of Science in Fisheries, Bachelor of Science with a major in Fisheries, Bachelor of Science with a major in Food Science, Master of Science, and Doctor of Philosophy.

The College programs are designed to provide both the scientific training and the professional competency necessary for graduates to satisfy the various needs of their chosen fields. A Bachelor of Science in Fisheries is granted to students successfully completing a prescribed curriculum. Three options are offered: marine fisheries biology, freshwater fisheries biology, and invertebrate fisheries. A Bachelor of Science with a major in Fisheries is granted to students successfully completing an elective curriculum including at least 36 fisheries credits. A Bachelor of Science with a major in Food Science is granted to students successfully completing a specified core curriculum and appropriate electives. Further specialization within these areas may be undertaken in graduate studies as preparation for careers in teaching and research.

BACHELOR'S DEGREES

Students working toward bachelor's degrees must qualify for admission to the University and the College. Course requirements for each degree are described below. General requirements for all degrees include physical education, scholarship and minimum credits, and senior-year residence.

Students should apply for bachelor's degrees during the first quarter of the senior year. If not more than ten years have elapsed since the date of a student's entry into the school or college in which he is to graduate, he may choose to graduate under the requirements set out in either the bulletin published by the appropriate school or college most recently prior to the date of his entry, or that published most recently prior to his anticipated date of graduation; provided, that when, in the opinion of the faculty of the school or college or a departmental executive officer or a dean acting for such faculty, substantial changes have been made in the curriculum since the student's entry, the student's choice shall be subject to the approval of the appropriate faculty, executive officer, or dean. Disapproval of the student's choice shall be faculty action and subject to the procedures of the Faculty Code. All responsibility for fulfilling graduation requirements shall rest with the student concerned. No student whose standing is in any way provisional can have an application for degree accepted.

FISHERIES

BACHELOR OF SCIENCE IN FISHERIES

A student may major in marine fisheries biology, freshwater fisheries biology, or invertebrate fisheries. He must take the courses required for all options, complete the required courses for his selected option, and earn a minimum of 30 credits from the list of recommended courses. At least 20 of the credits from the group of recommended courses must be in subjects other than fisheries.

Required courses for all Fisheries options:

Chemistry 100 (Chemical Science) or 101, 140, 150, 151, 160 (General), 170 (Qualitative Analysis), 221 (Quantitative Analysis); English 101, 102, 103 (Composition); Fisheries 101, 301, 303, 495 (6 credits); Mathematics 104 (Plane Trigonometry), 105 (College Algebra); 281 (Elements of Statistical Method) or 391 (Elementary Probability); Health Education 110 or 175; humanities or social sciences to equal 10 quarter credits; Zoology 111, 112 (General).

OPTION A. MARINE FISHERIES BIOLOGY

Required courses:

Fisheries 402, 405 or 406, 425, 426, 427; Mathematics 124 (Calculus with Analytic Geometry); Oceanography 203 (Introduction to Oceanography) or 390 (General Oceanography); Zoology 453-454 (Comparative Anatomy of Chordates) or 456 (Vertebrate Embryology).

OPTION B. FRESHWATER FISHERIES BIOLOGY

Required courses:

Biology 473 (Limnology); Fisheries 302, 402, 451, 452, 453, 460 or 461; Zoology 453-454 (Comparative Anatomy of Chordates) or 456 (Vertebrate Embryology).

OPTION C. INVERTEBRATE FISHERIES

Required courses:

Biology 472 (Principles of Ecology); Fisheries 302, 405, 406, 427, 454, 480; Mathematics 124 (Calculus with Analytic Geometry); Oceanography 203 (Introduction to Oceanography) or 390 (General Oceanography), 403 (Biological Oceanography); Zoology 330 (Natural History of Marine Invertebrates), 433, 434 (Invertebrate Zoology).

Recommended courses for all Fisheries options:

Biochemistry 361 (Biochemistry) and 363 (Biochemistry Laboratory), or 481 (Biochemistry) and 484 (Biochemistry Laboratory); Biology 451 (Genetics), 472 (Principles of Ecology), 473 (Limnology); Botany 112 (Elementary Botany); Chemistry 231, 232 (Organic Chemistry), 241, 242 (Organic Chemistry Laboratory); foreign language to equal 10 credits; Forestry 350 (Wildlife Management); Geology 101 (General) or 205 (Physical Geology); Mathematics 124, 125, 126 (Calculus with Analytic Geometry), 382, 383 (Statistical Inference in Applied Research); Oceanography 203 (Introduction to Oceanography) or 390 (General Oceanography), 403 (Biological Oceanography); Philosophy 120 (Introduction to Logic), 460 (Introduction to the Philosophy of Science); Physics 101, 102, 103 (General Physics), 107, 108, 109 (General Physics Laboratory); Zoology 330 (Natural History of Marine Invertebrates), 381 (Microtechnique), 400 (General Physiology), 433, 434 (Invertebrate Zoology), 458 (Vertebrate Physiology).

BACHELOR OF SCIENCE WITH A MAJOR IN FISHERIES

An elective curriculum is available for students desiring a Bachelor of Science with a major in Fisheries. The student must complete 36 credits in fisheries and sufficient electives to meet University graduation requirements. The choice of electives is subject to approval by the College.

Prospective students are invited to inquire about additional areas of emphasis in which undergraduate preparation may be made. Such areas include behavior, biometrics, economics, and water pollution. Study in some of these topics can be undertaken only at the graduate level.

In preparation for graduate work in the field of fish behavior, students should follow the program of courses below. A Bachelor of Science with a major in Fisheries will be granted to a student successfully completing this program together with electives sufficient to meet University graduation requirements. Since the purpose of this program is to prepare students for graduate study in fish behavior, a 3.00 grade-point average is required in the junior and senior years. A student who does not meet this grade-point requirement cannot be awarded a Bachelor of Science degree under this program.

Recommended courses:

Biology 451 (Genetics) and 451L (Genetics Laboratory), 472 (Principles of Ecology) and 472L (Ecology Laboratory); Chemistry 101 (General Chemistry), 102 (General and Organic Chemistry); English 101, 102, 103 (Composition); Fisheries 101, 301, 425, 451, 460, 495 (6 credits), and five elective credits in fisheries; foreign language to equal 15 credits (two years of one language should have been taken in high school; the first college language should be taken in the senior year); Health Education 110 or 175; Mathematics 105 (College Algebra); Philosophy 120 (Introduction to Logic), 460 (Introduction to the Philosophy of Science); Psychology 100 (General Psychology), 301 (Statistical Methods), 416 (Animal Behavior), 426 (Animal Laboratory); Zoology 111, 112 (General), 409 (Ethology), 409L (Ethology Laboratory), 456 (Vertebrate Embryology) or 458 (Vertebrate Physiology).

FOOD SCIENCE

BACHELOR OF SCIENCE WITH A MAJOR IN FOOD SCIENCE

The food science program provides a curriculum leading to a Bachelor of Science degree with a major in Food Science. It is recommended that the entering student will have completed mathematics to include advanced algebra and trigonometry, and laboratory science to include chemistry and physics.

The student should complete the required courses listed below together with sufficient electives to meet University graduation requirements. At least 10 credits in humanities or social sciences and 10 credits in biological sciences should be included.

Students intending to proceed to graduate study should take the more advanced series of courses (marked with an asterisk) in physics, biochemistry, and organic chemistry and should elect 15 credits of a foreign language.

Required Courses:

Biochemistry 361, 362 (Biochemistry) and 363 (Biochemistry Laboratory) or 481°, 482°, 483° (Biochemistry) and 484° (Biochemistry Laboratory); Chemistry 140, 150, 160 (General Chemistry), 151 (General Chemistry Laboratory), 170 (Qualitative Analysis), 221 (Quantitative Analysis), either 231, 232 (Organic Chemistry) and 241, 242 (Organic Chemistry Laboratory) or 335°, 336°, 337° (Organic Chemistry) and 345°, 346°, 347° (Organic Chemistry Laboratory); English 101, 102, 103 (Composition); Fisheries 480, 495; Food Science 481, 482, 483, 484, 485, 486, 487, 498; Health Education 110 or 175; Mathematics 105 (College Algebra), 124 (Calculus with Analytic Geometry), 281 (Elements of Statistical Method); Microbiology 400 (Fundamentals of Bacteriology); Physics 110, 111, 112 (Introductory Physics) or 101°, 102°, 103° (General Physics) and 107°, 108°, 109° (General Physics Laboratory).

Recommended Courses:

Accounting 210 (Fundamentals of Accounting); Botany 111, 112 (Elementary Botany), 461 (Yeasts and Molds); Chemistry 350 (Elementary Physical Chem-

istry), 426 (Instrumental Analysis); Fisheries 101, 301, 303, 406; Food Science 320 (Space Biology: Sealed Life-Support Systems); General Engineering 111 (Engineering Problems); Home Economics 300, 307 (Nutrition); Marketing 301 (Marketing, Transportation, and International Business: An Integrative Analysis); Mathematics 114 (Elementary Computer Programming), 125, 126 (Calculus with Analytic Geometry), 374 (Principles of Digital Computers and Coding), 382, 383 (Statistical Inference in Applied Research); Microbiology 430 (Microbial Metabolism); Philosophy 120 (Introduction to Logic), 460 (Introduction to the Philosophy of Science); Production 301 (Principles of Production); Preventive Medicine 440 (Water and Waste Sanitation), 441 (Milk and Food Sanitation); Zoology 111, 112 (General Zoology).

ADVANCED DEGREES

Students who intend to work toward a Master of Science or Doctor of Philosophy degree must apply for admission to the Graduate School and meet the requirements outlined in the *Graduate School Bulletin*. Graduate students must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded. For graduate study, the approval of both the College of Fisheries and the Graduate School is necessary.

Graduate students majoring in each option of the College of Fisheries are required to take a minor or a minimum number of supporting courses in other selected departments of the University. The nature and number of such courses are determined by the student's supervisory committee. All graduate students must complete 6 credits (three quarters) in Fisheries 520.

MASTER OF SCIENCE. Candidates must have the degree of Bachelor of Science in Fisheries or its equivalent. At least one year of approved study, with the completion of a research project, leads to the master's degree.

A total of not less than 36 credits in course work and thesis must be presented.

The candidate must present a certificate of proficiency in one foreign language.

DOCTOR OF PHILOSOPHY. Candidates must complete at least three years of graduate study including a dissertation. Credits for a master's degree may be applied toward the doctor's degree.

The candidate must present a certificate of proficiency in two foreign languages (one in addition to the Master of Science requirement).

COURSE-NUMBERING SYSTEM

Courses numbered from 100 through 299 are lower-division courses, for freshmen and sophomores; those numbered from 300 through 499 are upper-division, for juniors and seniors.

Courses numbered 500 and above are intended for and restricted to graduate students. Some courses numbered in the 300's and 400's are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the major department and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only; approved 400-level courses are accepted as part of the major. For a listing of approved 300- and 400-numbered courses, consult the *Graduate School Bulletin*.

Undergraduate students of senior standing who wish to register for a 500-level course must obtain permission from both the instructor of the class and the Dean of the Graduate School.

The number in parentheses following the course title indicates the amount of credit each course carries. In most lecture courses a credit is given for each class hour a week during a quarter; laboratory courses generally carry less credit than

the work time required. An asterisk in place of a credit number means that the amount of credit is variable. Hyphens between course numbers mean that credit is not granted until the series of courses is completed.

Courses to which the letter J is appended are joint courses in two or more departments and as such grant credit in one of the departments.

Not all of these courses are offered every quarter. Final confirmation of courses to be offered, as well as a list of times and places of class meetings, is given in the *Yearly Time Schedule*.

COURSES FOR UNDERGRADUATES IN FISHERIES

- 101 Development of Fisheries Science (5)**
Identification, distribution, and life histories of selected fish and shellfish; commercial and recreational fishing; utilization of fisheries products; problems faced in fisheries conservation and management. Recommended for nonmajors.
- 301 Anatomy of Fishes (5)** **Welander**
Survey of morphology and bodily functions of fishes. Prerequisite, Zoology 112.
- 302 Microbiology of Fisheries (5)** **Liston**
Bacteria, yeasts, mold, and protozoans associated with fish; their characteristics and importance in the fisheries. Prerequisite, Zoology 111.
- 303 Introduction to Invertebrate Fisheries (5)** **Sparks**
Taxonomy, morphology, and phylogeny of the invertebrate groups of importance to fisheries. Prerequisite, permission.
- X310 Fisheries Resources of the Pacific Northwest (3)**
Fishes of the Pacific area; life histories; fisheries; local, national, and international approaches to conservation. Prerequisite, 10 credits in biology or 15 credits in science, or permission. (Evening Classes only.)
- 402 Economically Important Fishes (5)** **Welander**
Survey of the system of fish classification; distribution of fishes. Prerequisite, 301.
- 405 Economically Important Mollusca (5)** **Sparks**
Classification, life histories, distribution, methods of cultivation, and economic importance of oysters, clams, scallops, abalones, cephalopods, and other mollusca. Prerequisite, Zoology 112.
- 406 Economically Important Crustacea (5)** **Sparks**
Classifications, life histories, distribution, methods of capture, and economic importance of crabs, shrimps, lobsters, crayfish, and the smaller crustacea. Prerequisite, Zoology 112.
- 425 Migrations and Races of Fishes (5)** **De Lacy**
Marking and other methods of determining migrations of fishes and homogeneity of fish populations; implications of these factors in the management of both freshwater and marine fisheries. Prerequisite, 402.
- 426 Early Life History of Marine Fishes (5)** **De Lacy**
Reproduction, larval, post-larval life of economically important marine fishes; dispersion and survival rates; implications in management of food fisheries; research methods in this field. Prerequisite, 402.
- 427 Ecology of Marine Fishes (5)** **De Lacy**
Effect of variations in hydrographic conditions, availability of food, geographic location, and other environmental conditions on distribution of fishes; their variation in abundance and availability to the fisheries; research techniques in this field. Prerequisite, 402.
- 451 Propagation of Salmonoid Fishes (5)** **Donaldson**
Natural propagation; methods of hatching and rearing; collection and incubation of salmon eggs; design, structure, and maintenance of hatcheries, pond systems, and aquaria. Prerequisites, 402 and 10 credits in chemistry.
- 452 Nutrition of Fishes (5)** **Donaldson**
Feeding and efficiency of diets; food costs and supplies; basic nutritional requirements of fish; nutritional diseases of fish. Prerequisites, 402 and 10 credits in chemistry.
- 453 Freshwater Fisheries Management: Biological (5)** **Donaldson**
Creel census methods; stocking policies, lake poisoning, pond fish propagation; determination of the productive capacities of streams, lakes, and ponds and their suitability for particular kinds of fishes. Prerequisites, 402 and 10 credits in chemistry.
- 454 Communicable Diseases of Fishes (5)** **Sparks**
Organisms causing diseases in fishes; prevention and known treatments of fish diseases. Prerequisites, 402 and Microbiology 301 or Fisheries 302.
- 460 Water Management and Fish Resources (5)** **M. C. Bell**
Stream flows and mechanics of freshwater environment, and other problems such as natural propagation; water flow measurement in streams and pipes; use of weirs; hatchery water requirements; screening of water diversions for protection of downstream migrants; nomenclature, water rights, and protective laws. (Offered Spring Quarter only.) Prerequisites, 402, Mathematics 105, and physics, or permission.
- 461 Water Management and Fish Resources (5)** **M. C. Bell**
Design of fish protective facilities and actual use of hydraulic turbines and spillways at dams; calibration of nets, etc. (Offered Autumn Quarter only.) Prerequisite, 460 or permission.

- 465 Problems in Fisheries Biology (6)**
Taxonomy, ecology, and life history of the fishes of the San Juan Islands and Northeast Pacific. (Offered at Friday Harbor Summer Quarter only.) Prerequisite, permission.
- 480 Introduction to Commercial Fishing Industry (5)** **F. H. Bell**
Lectures, demonstrations, and trips conducted by qualified persons from the industry. Commercial fishing operations, marketing, processing, reduction, organization, and labor relations are discussed and observed. Prerequisite, 15 credits in chemistry.
- 495 Introduction to Fisheries and Food Science Literature (2, maximum 6)**
Directed training in searching bibliographic sources. Prerequisite, 15 credits in fisheries.
- 499 Undergraduate Research (1-3, maximum 9)**
Individual research within the College of Fisheries or on-the-job training in governmental or industrial fisheries organizations. Prerequisite, permission.

COURSES FOR UNDERGRADUATES IN FOOD SCIENCE

- X320 Space Biology: Sealed Life-Support Systems (3)**
Problems and proposed solutions for supporting human life in sealed environments. Emphasis on long-term space travel. Prerequisite, 10 credits in chemistry or biology, or permission. (Evening Classes only.)
- 481 Introduction to Food Technology (5)** **Liston**
Chemical and biological properties of foods; principles of processing, storage, distribution, and spoilage. Prerequisite, permission.
- 482 Food Analysis I (3)** **Dollar**
Proximate analysis of foods by physical and chemical methods. Prerequisites, Biochemistry 483 or permission.
- 483 Food Analysis II (3)** **Dollar**
Analysis of foods for vitamins, fatty acids, other biological substances and additives by physical, chemical, and microbiological methods. Prerequisite, 482.
- 484 Principles of Food Processing I (5)** **Dollar, Liston**
Unprocessed foods, their composition, nutritional availability, associated microorganisms, storage, and distribution. Prerequisite, 481 or permission.
- 485 Principles of Food Processing II (5)** **Dollar, Liston**
Principles of food preservation by thermal processes, low temperature methods, chemical methods, irradiation, and other modern processes. Prerequisites, 482, 486 or permission.
- 486 Deteriorative Processes in Foods (5)**
Biochemical, microbiological, physical, and chemical changes occurring in foods. Prerequisites, 483, 485 or permission.
- 487 Food Analysis III (3)** **Dollar, Liston**
Quality assessment of foods including spoilage methods, rancidity methods, organoleptic and microbiological methods. Prerequisite, 483.
- 498 Undergraduate Thesis (2, maximum 6)**
Prerequisite, permission.

GRADUATE COURSES IN FISHERIES

- 501 On-the-Job Training (1-3, maximum 3 For M.S., 9 for Ph.D.)**
Guided on-the-job training in governmental or industrial fisheries organizations. Prerequisite, permission.
- 503 Systematic Ichthyology (5)** **Welander**
Principles and procedures of ichthyological taxonomy demonstrated by current problems and research. Prerequisites, 402 and permission.
- 505 Research Techniques in Shellfish Biology (5)** **Sparks**
A field and laboratory course dealing with research methods in the reproduction, growth, and mortality of oysters and clams.
- 510 Fish Behavior (3)** **Fields**
Behavior related to sensory-motor equipment. Design of experiments emphasized for studies ranging from naturalistic observation to controlled laboratory and field experiments. Prerequisite, permission.
- 511 Fish Behavior Laboratory (2-3, maximum 6)** **Fields**
Prerequisite, 510 or concurrent registration in 510.
- 520 Graduate Seminar (2, maximum 6)**
Training in methods of searching fisheries literature.
- 530 Biological Problems in Water Pollution (3)**
Biological and ecological changes in the aquatic environment resulting from domestic, industrial, radioactive, and agricultural wastes and methods for their evaluation. Prerequisite, permission.
- 556 Age and Growth of Fishes (5)** **Van Cleve**
Principles of growth; methods of determining age and rates of growth in freshwater and marine fishes. Prerequisite, 402, and Mathematics 383, or permission.
- 557 Population Enumeration (5)** **Van Cleve**
Methods of enumerating animal populations; availability; dominant age groups; gear selectivity. Prerequisite, 556 or permission.

- 558 Population Dynamics (5)** **Van Cleave**
Influence of natural and artificial factors on variation in abundance and yield from animal populations. Prerequisite, 557 or permission.
- 604 Research (*, maximum 3 for M.S., 10 for Ph.D.)**
- 700 Thesis (*)**

GRADUATE COURSES IN FOOD SCIENCE

- 504 Principles of Technological Research in Fisheries and Food (3)** **Liston**
A lecture and laboratory course designed to familiarize graduate students with the methods used in technological research. Prerequisite, permission.
- 604 Problems in Food Science (*, maximum 3 for M.S., 10 for Ph.D.)**
- 700 Thesis (*)**

OTHER COURSES FOR FISHERIES AND FOOD SCIENCE STUDENTS

BIOCHEMISTRY

- 361 Biochemistry (3)**
Lectures covering the basic principles of biochemistry, including the structure and metabolism of biologically important compounds. Prerequisite, Chemistry 102 or 232.
- 363 Biochemistry Laboratory (2)**
Laboratory exercises in general biochemistry for home economics students and others. Prerequisite, 361, which may be taken concurrently.
- 481, 482, 483 Biochemistry (3,3,3)**
Structure, metabolism, and function of substances pertinent to animal and plant life. A basic course for graduate or advanced undergraduate students. Biochemistry 483 is recommended as a concurrent course with 482. Prerequisites, Chemistry 337 for 481; 481 or permission for 482; 482 or permission for 483; introductory physical chemistry is recommended.
- 484 Biochemistry Laboratory (3)**
Laboratory exercises and conferences. Prerequisite, 481.

BIOLOGY

- 451 Genetics (3)** **Roman**
The principles underlying inheritance in animals and plants. Prerequisite, 10 credits in biological science.
- 472 Principles of Ecology (3)** **Edmondson**
Population biology, competition, predation, symbiosis, sociality, and relationship of community to environment. Prerequisites, Zoology 112 or Botany 112, or permission, and upper-division standing.
- 473 Limnology (5)** **Edmondson**
Biological, physical, and chemical features of lakes and other inland waters. Prerequisites, Zoology 112 or Botany 112, one year of college chemistry, and upper-division standing.

BOTANY

- 111 Elementary Botany (5)** **Meeuse, Walker**
Structure, physiology, and reproduction of plants, with emphasis on seed producing groups. Open to those who have had 105 only by permission of instructor.
- 112 Elementary Botany (5)** **Blaser**
Structure and relationships of the major plant groups. Prerequisites, 111, one year of high school botany, Biology 101J-102J, or Zoology 111 and 112.
- 461 Yeasts and Molds (5)** **Stuntz**
Classification, recognition, cultivation, and relationship to industries and man. Prerequisite, 15 credits in botany, microbiology, or zoology.

BUSINESS ADMINISTRATION

Accounting

- 210 Fundamentals of Accounting (3)**
Basic principles and procedures including recording of business transactions and preparation of financial statements. (Formerly 150.) Prerequisite, sophomore standing.

General Business

- 101 Business: An Introductory Analysis (5)**
The role of business in a modern economy: its growth, structure, organization, and relationship to environment. Business firms: their objectives, functions, and management. Problems of organization, decision making, controls, and related aspects. Opportunities in business.

Marketing**301 Marketing, Transportation, and International Business: An Integrative Analysis (5)**

Fundamentals of marketing concept and functions; consumer demand and behavior; spatial relationships, and physical distribution; domestic and foreign institutions, channels, and public policy.

Production**301 Principles of Production (3)**

The production function in business and industry; organization and administration; research and product development; plant location, layout, and equipment; planning and control of production; materials and quality control; methods analysis and time standards; industrial budget control; the background of scientific management.

CHEMISTRY**100 Chemical Science (5)**

Atoms, molecules, and chemical reactions. A survey of fundamental principles. Designed both as a terminal course for nonscience majors and as an introductory course for those who wish to continue with 101 or 140. (Note Mathematics prerequisite for 140). No credit to those who have had one unit or more of high school chemistry.

101 General Chemistry (5)

For nonscience and non-engineering majors who plan to terminate their study of chemistry with 101 or 102. Molecular theory, quantitative relationships in chemical processes, solutions, ionic equilibria, acids, bases, and salts. Chemistry of common metals and nonmetals. Prerequisite, one unit of high school chemistry or 100.

102 General and Organic Chemistry (5)

Organic compounds; hydrocarbons, alcohols, aldehydes, ketones, ethers, acids, aromatics, fats and oils, proteins and carbohydrates. (Formerly 120). Students who plan to take 231 should not take 102. Prerequisite, 101.

140 General Chemistry (3)

For science, engineering, and other majors who plan to take a year or more of chemistry courses. The structure of matter, atomic and molecular theory, the elements, valence and quantitative relationships. (Formerly 110.) Prerequisites, high school chemistry or 100, Mathematics 101 or passing score on algebra qualifying test.

150 General Chemistry (4)

For students planning more than two quarters of chemistry. Stoichiometry, gases, aqueous solutions, kinetics, acid and base equilibria, electrochemistry, oxidation and reduction. Prerequisite, 100 or 110, Mathematics 101 or 103, or passing score on algebra qualifying test.

151 General Chemistry Laboratory (2)

Experiments illustrating the quantitative relationships in chemistry. Prerequisites, 140 and concurrent registration in 150.

160 General Chemistry (3)

Periodic System, phase equilibria, metals and nonmetals, metallurgy, and nuclear reactions. Prerequisite, 150.

170 Qualitative Analysis (3)

Semi-microqualitative analysis for common cations and anions; separation and identification procedures. Prerequisites, 160, which may be taken concurrently.

221 Quantitative Analysis (5)

Volumetric and gravimetric. No credit if 325 has been taken. Prerequisite, 170.

231 Organic Chemistry (3)

For students planning only two quarters of organic chemistry. Structure, nomenclature, reactions and synthesis of the main types of organic compounds. Prerequisite, 150.

232 Organic Chemistry (3)

Continuation of 231. Prerequisite, 231.

241 Organic Chemistry Laboratory (2)

Usually to accompany 231. Preparation of representative compounds. Prerequisite, 231, which may be taken concurrently.

242 Organic Chemistry Laboratory (2)

Usually to accompany 232. Preparations and qualitative organic analysis. Prerequisites, 231, 232 (which may be taken concurrently), and 241.

335 Organic Chemistry (3)

For chemistry and chemical engineering majors and other qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Prerequisite, 170, which may be taken concurrently.

336 Organic Chemistry (3)

Continuation of 335. Prerequisite, 335.

337 Organic Chemistry (3)

Continuation of 336. Prerequisite, 336.

345 Organic Chemistry Laboratory (1)

Usually to accompany 335. Organic syntheses. Prerequisite, 335, which may be taken concurrently.

- 346 Organic Chemistry Laboratory (1)**
Continuation of 345. Usually to accompany 336. Prerequisites, 335, 336, and 345 which may be taken concurrently.
- 347 Organic Chemistry Laboratory (2)**
Continuation of 346. Usually to accompany 337. Prerequisites, 337 (which may be taken concurrently) and 346.
- 350 Elementary Physical Chemistry (5)**
Survey of some major topics in physical chemistry. Prerequisites, two quarters general chemistry, Physics 103, Mathematics 124.
- 426 Instrumental Analysis (3)** **Crittenden**
Introduction to electrical and optical methods of analysis. Prerequisites, 221 and 458.
- 455 Physical Chemistry (4)**
Structural aspects of physical chemistry; atomic and molecular structure, gases, liquids, solids, solutions, surfaces and colloid chemistry. Prerequisites, 160, Mathematics 153, and college physics.
- 456 Physical Chemistry (3)**
Solutions (electrolytes and non-electrolytes); thermodynamics; homogeneous and heterogeneous equilibria. Prerequisites, 455 and Mathematics 251.
- 457 Physical Chemistry (3)**
Electrochemistry and ionic equilibria; chemical kinetics and photochemistry. Prerequisite, 456.
- 458 Physical Chemistry Laboratory (4)**
Prerequisite, 456 or taken concurrently.

ENGLISH

- 101, 102, 103 Composition (3,3,3)** **Irmscher**
Fundamentals of effective exposition; collecting, organizing, and evaluating materials for writing; reading contemporary writings for meaning and form.

FAR EASTERN AND SLAVIC LANGUAGES AND LITERATURE**Japanese**

- 210, 211, 212 First-Year Reading Japanese (5,5,5)** **McKinnon**
Reading and translation of modern Japanese. Prerequisites, 101-102 or permission for 210, or this series may be taken concurrently with 101-102, 103; 210 for 211; 211 for 212.
- 301, 302, 303 Second-Year Reading Japanese (5,5,5)** **McKinnon**
Reading and translation of primary and secondary source materials in Japanese. Prerequisites, 212 or equivalent for 301; 301 for 302; 302 for 303.

Russian

- 100-105 Russian, A-B (5-5)** **Novikow, Pahn**
Covers material of 110 in two quarters. Recommended for students who know from experience that they assimilate foreign languages slowly, or for those who find a 10-credit course would interfere seriously with their schedules.
- 110 Russian, Intensive, AB (10)** **Gershevsky, Pahn**
Elementary Russian. Introduction to pronunciation, spelling, graded reading, essentials of grammar, conversation, exercises and drills. Student acquires six hundred-word vocabulary.
- 130 Scientific Russian (5)** **Gershevsky**
Introduction to written Russian as a research tool for science students. Readings in chemistry and physics, etc. Closed to Russian majors.
- 230 Scientific Russian, Intensive (10)** **Gershevsky**
Introduction to written Russian as a research tool for science students only. Readings in chemistry and physics. Closed to Russian majors.

FORESTRY

- 350 Wildlife Management (3)** **Brockman**
Interrelations between forests and wildlife; life histories and habits of animals involved. Prerequisites, junior standing and permission.

GENERAL ENGINEERING

- 111 Engineering Problems (3)** **Brown**
Training in methods of analyzing and solving simple engineering problems, principally dynamics and energy problems; introduction to the slide rule; coaching in proper methods of work and study, including training in systematic arrangement and clear workmanship. Prerequisites, high school physics, advanced algebra, and trigonometry or concurrent with trigonometry.

GEOLOGY

- 101 Geology for Nonscience Majors (5)** **Barksdale, Coombs, Mallory**
- 205 Physical Geology (5)**
Prerequisite, high school chemistry or permission.

GERMANIC LANGUAGES AND LITERATURE**101-102, 103 First-Year German (5-5,5)**

Recommended for prospective majors and minors and those who wish to work toward a speaking knowledge of the language. The methods and objectives are primarily oral-aural.

HOME ECONOMICS**300 Nutrition (2)****Crum**

Importance of food to the maintenance of health; nutritive values and human needs; ways of meeting human requirements at different cost levels. For nonmajors.

307 Nutrition (3 or 5)**Johnson**

Chemistry of digestion and metabolism. Food values; human requirements and ways of meeting them at different cost levels. Qualified transfer students receive 3 credits. Prerequisites, general chemistry and human physiology.

MATHEMATICS**104 Plane Trigonometry (3)**

Trigonometric functions, identities, graphs, logarithms, and solution of triangles. Mathematics 120 may be taken concurrently as a supplement to this course. No credit for students who have studied trigonometry in high school. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, and one year of plane geometry.

105 College Algebra (5)

Functions and graphs; linear and quadratic equations; progressions; complex numbers; theory of equations; determinants. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, or 103.

114 Elementary Computer Programming (2)

Programming and coding of problems for automatic digital computers. Flow charts, loops, subroutines. Codes written will be executed by machine. Prerequisite, 101 or equivalent.

124, 125, 126 Calculus with Analytic Geometry (5,5,5)

Plane analytic geometry, differentiation of algebraic and transcendental functions, anti-derivatives, definite integrals, technique of integration, vector algebra, solid analytic geometry, multiple integrals, partial derivatives, simple differential equations. Applications. Prerequisites, four years of high school mathematics and qualifying test, or 104 (or 103 or exemption by qualifying test) and 105 (or 156) for 124; 124 or 134 for 125; 125 or 135 for 126.

253 Analytic Geometry and Calculus (3)

Solid analytic geometry, multiple integrals, partial derivatives. Prerequisite, 252.

281 Elements of Statistical Method (5)

Numerical and machine computation; graphical and tabular presentation of data; averages, measures of scatter, and other statistics; scatter diagram, least-square lines, regression, and correlation; elements of sampling. Prerequisites, 105 and one year of plane geometry.

374 Principles of Digital Computers and Coding (5)

High-speed digital computation, number systems, machine components, programming, operation. Three hours lecture, four hours laboratory, per week with problems run on a high-speed machine. Prerequisites, 114 and 124 (or 134), and permission of instructor.

382, 383 Statistical Inference in Applied Research (5,5)**Chapman**

Elements of probability; discrete and continuous distribution; binomial, Poisson, and normal distributions. Elements of sampling; confidence limits; simple tests of statistical hypotheses, analysis of variance, and applications to biological problems. Prerequisites, 124 (or 134) and 281, or permission, for 382; 382 for 383.

391 Elementary Probability (3)

Sample space, random variables, laws of probability. Combinatorial probabilities. Distributions: binomial, normal; expectation, variance. Prerequisite, 126 or 136.

MICROBIOLOGY**301 General Microbiology (5)****Rickenburg**

Microorganisms and their activities. A survey course for students of pharmacy, nursing, home economics, education, and others with minimal training in chemistry. Prerequisites, two quarters of general chemistry.

400 Fundamentals of Bacteriology (*, maximum 6)**Douglas, Ordal**

Basic bacteriology; comparative morphology, taxonomy, physiology of bacteria. For students majoring in microbiology and others interested chiefly in the biological and chemical aspects of microbes. Required for students majoring in microbiology. Recommended for graduate students majoring in chemistry or biology. Prerequisites, 10 credits in organic chemistry, 10 credits in botany or zoology, and permission.

430 Microbial Metabolism (3 or 5)**Douglas**

Microbiological and biochemical aspects of industrially important fermentative and oxidative processes. For students majoring in microbiology or food technology. Prerequisites, 301 or 400, and Chemistry 221 and 232.

OCEANOGRAPHY

- 203 Introduction to Oceanography (5)** **Fleming**
A comprehensive description of the oceans and their relation to man; physical, chemical, biological, and geological aspects of the sea; areal distribution and seasonal cycles of properties; currents; factors affecting populations. Demonstrations and some classes aboard ship and in laboratories.
- 390 General Oceanography (5)** **Fleming**
Comprehensive treatment of physical, chemical, biological, and geological aspects of the oceans. Introductory to all courses in 400 series.
- 403 Biological Oceanography (5)** **Banase, English**
Physical, chemical, and biological factors characterizing the marine environment; factors controlling plant and animal populations; methods of sampling, identification, and analysis. Prerequisite, 390.

PHYSICAL AND HEALTH EDUCATION**Health Education**

- 110 Health Education (Women) (2)** **Gaines, Horne**
Current health information, with emphasis on women's responsibilities in application of health knowledge to attitudes and practices in modern and future life. Required of all freshman women; exemption without credit by examination.
- 175 Personal Health (Men) (2)**
Health information that affords a basis for intelligent guidance in the formation of health habits and attitudes. Required of all freshman men; exemption without credit by examination.

PHYSICS

- 101, 102, 103 General Physics (4,4,4)** **Kenworthy**
Concurrent registration in 107, 108, 109 recommended and may be required by individual departments. 101: mechanics. Prerequisites, plane geometry, trigonometry, and one year of high school physics or its equivalent by permission. 102: sound and electricity. Prerequisite, 101, 103: heat, light, and modern physics. Prerequisite, 102 or concurrent registration in 102.
- 107, 108, 109 General Physics Laboratory (1,1,1)** **Sanderman**
107: mechanics laboratory. Prerequisite, 101 or concurrent registration in 101. 108: sound, electricity, and magnetism laboratory. Prerequisite, 102 or concurrent registration in 102. 109: heat and light laboratory. Prerequisite, 103 or concurrent registration in 103.

ROMANCE LANGUAGES AND LITERATURE**French**

- 101-102, 103 Elementary (5,5,5)**
Methods and objectives are primarily oral-aural. Oral practice in the Language Laboratory is required. Honors sections are designated in the *Yearly Time Schedule* by an asterisk. No credit is granted for 101- until -102 (or a more advanced course, as approved by the Department) has been completed satisfactorily. Prerequisite for -102: 101- or one high school semester, or equivalent; for 103: A, B, or C in -102; A or B in second high school semester; or any passing grade in the third high school semester.

Spanish

- 110-111, 112 First-Year Reading Spanish (5-5,5)**
A beginning course for nonmajors, in which the acquisition of a reading knowledge is stressed. Prerequisite for 112, -111 or grade of A or B in second high school semester, or any passing grade in third high school semester, or equivalent.
- 121- Basic Grammar Review (5-)**
Refresher course; should be taken instead of 103 by students who received a grade of D in -102, or C or D in the second high school semester. No student may receive credit for both 103 and 121-; nor will credit be granted for 121- until 201 or equivalent has been completed.

SCANDINAVIAN LANGUAGES AND LITERATURE**Norwegian**

- 101-102, 103 Elementary Norwegian (3-3,3)** **Arestad**
Fundamentals of oral and written Norwegian.
- 104-105, 106 Norwegian Reading (2-2,2)**
Should accompany 101-102, 103.

ZOOLOGY

- 111, 112 General Zoology (5,5)**
Physical basis of life, structure, function, development, inheritance, evolution, and ecology of animals. 111: invertebrate phyla through molluscs. 112: annelids through chordates; 111 prerequisite for 112.
- 330 Natural History of Marine Invertebrates (5)** **Kohn**
A field and laboratory course emphasizing the habits, habitats, identification, and inter-relationships of marine animals. Prerequisites, 112 or 10 credits in biological sciences, and permission.

- 381 Microtechnique (4)** **Hsu**
Critical evaluation of each step in microslide preparation. Prerequisites, 112 and permission.
- 400 General Physiology (5)** **Florey**
Cell environment, metabolism and growth, irritability, general phenomena of organ function. Prerequisites, Chemistry 232, Physics 103 and 109 (or high school physics) and 10 credits in biological sciences.
- 409 Ethology (3)** **Orians**
Perception, nervous integration, movement, motivation, instinct, learning, and social behavior in animals, with emphasis upon their evolution and selective significance. Prerequisite, permission.
- 409L Ethology Laboratory (2)** **Orians**
Experiments with orientation, motivation, learning, and social behavior in animals, including special student research problems. Prerequisite, permission. (May be taken concurrently with 409.)
- 433, 434 Invertebrate Zoology (5,5)** **Illg, Kohn**
Morphology and phylogeny of invertebrates exclusive of terrestrial arthropods. Not open to students who have had 432. Prerequisites, 111 and 112.
- 453-454 Comparative Anatomy of Chordates (5-5)** **Snyder**
Phylogeny of the chordates and evolution of their organ systems. Structural modifications are correlated with function. Prerequisites, 111, 112, and 456, or permission.
- 456 Vertebrate Embryology (5)**
A descriptive and comparative study of development of chordates. Prerequisite, 112.
- 458 Vertebrate Physiology (6)** **Martin**
Emphasis on mammalian organ systems. Prerequisites, two quarters of college chemistry and 20 credits in biological sciences.

APPENDIX

APPENDIX

UNDERGRADUATE ADMISSION, EXCEPTIONAL CASES

An applicant whose preparation and previous scholarship do not clearly qualify him for admission may submit additional evidence in support of his application. This may include scores on nationally recognized tests of scholastic aptitude or achievement; letters from school administrators, teachers, or counselors; and other information which may assist the Board of Admissions in evaluating his probability of success in the University.

Students admitted by special action of the Board of Admissions will be expected to achieve and maintain a satisfactory scholastic average in their University work and to fulfill any conditions specified by the Board at the time of their admission.

A student thus admitted on probation will be subject to scholarship rules given on page 25.

Furthermore, he or she may not (1) be pledged or initiated into a fraternity or sorority, or engage in those other student activities in which his right to participate is restricted by the regulations of the Committee on Student Welfare; (2) engage in those athletic activities in which his right to participate is restricted by regulations of the University Intercollegiate Athletics Committee.

ADVANCED STANDING AND TRANSFER OF CREDIT

The Board of Admissions reserves the right to determine the exact amount of transfer credit to be accepted. The general regulations concerning the transfer of credits are as follows:

1. The advanced standing for which an applicant's training appears to fit him is granted tentatively on admission. Definite advanced standing is not determined before the end of the student's first quarter in the University. The maximum that may be accepted from other colleges and universities is 135 quarter credits or senior standing. Transfer credit will not be allowed in the senior year.

2. Transfer credits will be accepted for upper-division credit *only* when earned at an accredited four-year degree-granting institution.

3. Transfer credits from institutions accredited for less than four years will not be accepted in excess of the accreditation of the school concerned.

4. Transfer of junior college credit shall apply on the University freshman and sophomore years only. A student who has completed a portion of his freshman and/or sophomore years in a four-year college may not transfer junior college credit in excess of that necessary to completion of the first two years in the University. In no case shall the transfer of junior college credit to the University exceed 90 quarter credits exclusive of physical education activity credits.

5. The maximum number of credits obtainable by acceptance of Armed Forces training schools credits will be 30. All such credits will be counted as extension credits and will be included in the 90-credit maximum allowed toward the bachelor's degree, but none will apply toward the work of the senior year.

6. A maximum of 45 credits earned in extension and correspondence courses at other institutions may be transferred, but none of the credits can apply in the senior year. Extension and correspondence credits from schools that are not members of the National University Extension Association are accepted only after examination.

7. Credits earned in evening and extension classes or correspondence courses at this University are accepted after the student has satisfactorily completed 35 credits of work in residence (that is, registered in regular University classes). A maximum of 90 extension and/or correspondence credits is acceptable; the 90 credits may include the 45 extension and/or correspondence credits allowable from other institutions or may consist entirely of courses taken in this University's Division of Evening Classes or Division of Correspondence Study. All credits earned in advanced-credit examinations and all acceptable Armed Forces training schools credits must be counted in the 90 extension credit maximum. Up to 10 evening class or correspondence course credits from this University can apply toward the work of the senior year.

8. For work done in unaccredited institutions, extended secondary programs in institutions whose standing is unknown, and for work with private teachers, University credit is granted only after examination. Applications for advanced-credit examinations must be filed during the first quarter in residence.

9. No credit will be granted for courses taken in another college while the student is in residence at the University, unless written permission to register for such courses is obtained by the student from the University department giving such instruction in the subject, from his major department, and from the dean of his college. The prescribed written permission is effective only if obtained before registration. Nothing in this rule makes mandatory the granting of any credit by the University.

KOREAN VETERANS INFORMATION

Korean Certificate

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established.

Quarter Credit Requirements (Public Law 550)

14 credits.....	Full subsistence
10 to 13 credits.....	Three-fourths subsistence
7 to 9 credits.....	One-half subsistence
6 credits or less.....	Established tuition and fees
or credits \div 14 \times \$110.00, whichever is the lesser.	

Graduate Credit Requirements (Public Law 550) 500-level Courses or Above

9 credits.....	Full subsistence
7 to 8 credits.....	Three-fourths subsistence
5 to 6 credits.....	One-half subsistence
4 credits or less.....	Established tuition and fees
or credits $\div 14 \times \$110.00$, whichever is the lesser.	

If a graduate is combining 400-level courses with 500-level courses, he should consult with the Veterans Division, Safety Division Building, to determine the scale of pay.

Termination of Training

A veteran *eligible* under Public Law 550 must complete his training by *eight years* after his release from active service, or by January 31, 1965, whichever is earlier.

WITHDRAWALS**WITHDRAWAL FROM A COURSE**

Official withdrawal from a course is made only under the following conditions: (1) during the first fifteen calendar days of a quarter, with the consent of the withdrawing student's adviser; (2) after the first fifteen calendar days of a quarter and before the end of the first six calendar weeks of a quarter, with the approval of the student's adviser, the instructor of the course from which withdrawal is sought, and of the dean of the college in which the withdrawing student is enrolled; and (3) after the first six calendar weeks of a quarter and before final examination week, only upon certification in writing to the Registrar by the dean of the college in which the withdrawing student is enrolled that, in the judgment of the dean, withdrawal is necessitated by the student's hardship. Withdrawals from courses accomplished by any other method are unofficial withdrawals which are entered on a student's record as EW, and are assigned the value of E in the computation of the student's grade-point average. No official withdrawal may be made during final examination week.

Official withdrawals are entered on a student's record as follows: (1) a withdrawal within the first fifteen calendar days of a quarter, as W; (2) a withdrawal after the first fifteen calendar days of a quarter and before final examination week, as PW, if the student's work has been satisfactory, and as E, if the student's work has been unsatisfactory. Grades of PW and W are assigned no value in the computation of grade-point averages.

WITHDRAWAL FROM THE UNIVERSITY

The student should obtain at the office of the Dean of the College the Request for Withdrawal From the University form.

MILITARY TRAINING

Military training at the University of Washington has now been placed on an elective basis. Students wishing to participate in military programs can find a complete list of courses offered by the Departments of Air Science, Military Science and Naval Science in the *Yearly Time Schedule*. In addition to the basic programs, the Department of Air Science and the Department of Military Science each offers for selected students an advanced program which leads to commissioning in the Air Force or the Army. The four-year program of the Department of Naval Science, also for selected students, leads to commissioning in the Navy or Marine Corps.

Students enrolling in Naval ROTC, and those who take the advanced program of Air Force or Army ROTC must agree in writing to complete the course of training and accept a commission in the service for which they are trained. *The honoring of this commitment is a condition of graduation from the University.*

The basic program of the Department of Air Science consists of three quarters of military classroom instruction on the Foundations of Air Power. These are offered in the spring quarter of the first year and the autumn and winter quarters of the second year. During each of the other three quarters, the student must substitute an approved University course in lieu of Air Science. Leadership Laboratory is required each of the six quarters of the basic program and is conducted one hour each week. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*.

The basic program (freshmen and sophomores) of the Department of Military Science requires drill one hour each week. Classroom military studies for freshmen are not required in the Autumn Quarter. One hour per week is required in the Winter Quarter, and two hours of classroom work are required in Spring Quarter. As a substitute for these classroom hours in Autumn Quarter of the freshman year, registration is required in a selected three-credit or five-credit course in another department. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*. Sophomores are required to attend two hours per week of classroom military studies throughout the academic year.

Information concerning the Naval Science ROTC program can be found in the bulletins of the College of Arts and Sciences, the College of Business Administration, and the College of Engineering.

PHYSICAL EDUCATION ACTIVITIES

Men students may use credits earned in freshman or varsity sports to satisfy the activity course requirement.

Women students, in fulfilling the three-quarter requirement, may take a maximum of two credits in any of the following: (1) swim area; (2) dance area; (3) tennis and badminton; (4) any other specific individual, dual, or team activity.

The following students are exempt from the requirement of activity courses:

1. Students who have attained the age of twenty-five. A student who attains the age of twenty-five during a quarter in which he is registered for a required physical education activity course shall be held for the completion of that course. This rule shall not be retroactive in its application to students who entered prior to Spring Quarter, 1951, and were exempted from required physical education courses under previous rules.

2. Students who enter as sophomores, junior, or seniors.

3. Special students.

4. Students registered for 6 credits or less.

5. Students who, because of physical condition, are exempted by the Graduation Committee upon the recommendation of the Dean of the College. Such action will be taken only when the Dean has received a joint recommendation for exemption from the University Health Officer and the Executive Officer of the Department of Physical Education for Men or for Women, whichever is appropriate. All other students who are reported by the University Health Officer as physically unfit to join regular classes will be assigned by the Chairman of the Department of Physical Education for Men or for Women to special programs adapted to their needs.

6. Students who are veterans of military service. Complete exemption is granted for one year or more of active duty. This exemption does not grant credit. Veterans with less than one year of service receive no exemption.

7. Transfer students who present acceptable credit for physical education activity courses taken in other colleges. The amount of exemption depends on the number of quarters for which credit is transferred.

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration, except that new students must submit a \$50.00 advance payment of fees at the time they are admitted to the University. This advance payment is applied against the total tuition and fees collected from the student. In the event of failure to register, the \$50.00 advance payment is not refundable to the student. The University reserves the right to change any of its fees and charges without notice.

The fee schedules for resident and nonresident students, following, apply to the academic year (Autumn, Winter, and Spring Quarters). Summer fees are listed in the *Summer Quarter Bulletin*.

EXEMPTIONS

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

EXTRA SERVICE CHARGES

A registration service charge of \$15.00 is assessed those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by In-Person Registration by action of the Registration Appeal Board. A late registration charge of \$15.00 is assessed any student granted permission to register after the last registration day before the opening of Autumn, Winter, or Spring Quarters by action of the Registration Appeal Board. A charge of \$5.00 is made Autumn, Winter, and Spring Quarters for each change of registration or change of section, or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University.

<i>Special Examination</i>	\$1.00
<i>Removal of an Incomplete</i>	2.00
<i>Washington Pre-College Testing Program (Grade Prediction Test)</i>	5.00
<i>Athletic Admission Ticket (optional for ASUW members)</i>	3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.	
<i>Military Uniform Rental</i>	25.00
Paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.	
<i>Breakage Ticket</i>	3.00
Required in some laboratory courses; ticket is returnable for full or partial refund.	

	Quarters		Quarters	
Full-time students (undergraduate and graduate) except in Medical and Dental Schools)	\$105.00	\$86.50	\$8.50	\$200.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	105.00	69.00	†	174.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time	52.50	86.50	8.50	147.50
Part-time (max. 6 credits)§	52.50	69.00	†	121.50
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (nonthesis)		56.50	†	56.50

* Other fees consist of Student Activities, \$2.50; ASUW Bond Redemption, \$3.50; HUB Bond Redemption, \$1.00; Building Fund, \$1.50.

† Optional; if membership in ASUW is desired, the ASUW fee should be added to the total fee as shown for this type of registration.

‡ See Exemptions page 51 to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by the Graduate School.

<i>Locker Rental</i> , per quarter	2.00
Required of men students taking physical education activities.	
<i>Quarterly Grade Report</i>	.50
One grade report is issued at the close of each quarter without charge; the charge, payable in advance, is made for each additional copy.	
<i>Transcripts</i>	1.00
One transcript is furnished without charge; the charge, payable in advance, is made for each additional copy.	
<i>Graduation Exercises Diploma</i>	10.00

MUSIC PRACTICE ROOM, per quarter: piano practice, \$3.00, one hour a day; \$5.00, two hours a day; \$6.00, three hours a day. Organ practice, \$6.00, one hour a day; \$10.00, two hours a day; \$12.00, three hours a day. Practice rooms are available only to students taking music courses.

BULLETIN • UNIVERSITY OF WASHINGTON

COLLEGE OF FORESTRY

1961-1963

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter Bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study, and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

CALENDAR

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in the following Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

WINTER QUARTER, 1961

REGISTRATION PERIOD

OCT. 24-Nov. 18	Advance Registration only for students in residence Autumn Quarter, 1960. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
DEC. 27-29	In-Person Registration for students in residence Autumn Quarter, 1960, who did not complete Winter Quarter, 1961, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
DEC. 27-29	In-Person Registration for former students not in residence Autumn Quarter, 1960. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 9.</i>
DEC. 2	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
DEC. 20	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
DEC. 27-29	In-Person Registration for ALL new students.
DEC. 29	Last day to register for Winter Quarter, 1961. Note application deadlines above.
JAN. 3-9	Change of registration by appointment only.

ACADEMIC PERIOD

JAN. 3—TUESDAY	Instruction begins for all students
JAN. 9—MONDAY	Last day to add a course
FEB. 17—FRIDAY	Last day to submit applications for advanced credit examinations
FEB. 22—WEDNESDAY	Washington's Birthday and Founder's Day holiday
MAR. 4—SATURDAY	Advanced credit examinations
MAR. 13-16	Final examinations (4 o'clock classes, Friday, March 10, 4-6 p.m.)
MAR. 16—THURSDAY	Quarter ends

SPRING QUARTER, 1961**REGISTRATION PERIOD**

JAN. 23-FEB. 17	Advance Registration only for students in residence Winter Quarter, 1961. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
MAR. 21-23	In-Person Registration for students in residence Winter Quarter, 1961, who did not complete Spring Quarter, 1961, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
MAR. 21-23	In-Person Registration for former students not in residence Winter Quarter, 1961. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is March 10.</i>
MAR. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
MAR. 15	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
MAR. 21-23	In-Person Registration for ALL New students.
MAR. 23	Last day to register for Spring Quarter, 1961. Note application deadlines above.
MAR. 27-31	Change of registration by appointment only.

ACADEMIC PERIOD

MAR. 27—MONDAY	Instruction begins for all students
MAR. 31—FRIDAY	Last day to add a course
MAY 12—FRIDAY	Last day to submit applications for advanced credit examinations
MAY 27—SATURDAY	Advanced credit examinations
MAY 30—TUESDAY	Memorial Day holiday
JUNE 4—SUNDAY	Baccalaureate Sunday
JUNE 5-8	Final examinations (4 o'clock classes, Friday, June 2, 4-6 p.m.)
JUNE 8—THURSDAY	Quarter ends
JUNE 10—SATURDAY	Commencement

SUMMER QUARTER, 1961**REGISTRATION PERIOD**

General In-Person Registration for ALL students (*by appointment only*):

June 1, 2, 5

June 12-16

Registration may be delayed if new student Applications for Admission or former

student Applications for Appointment or Permit to register are received after May 15.

OCT. 29-Nov. 27	Advance Registration only for students in residence Autumn Quarter, 1962. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
JAN. 2-4	In-Person Registration for students in residence Autumn Quarter, 1962, who did not complete Winter Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
JAN. 2-4	In-Person Registration for former students not in residence Autumn Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 1.</i>
DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
DEC. 20	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
JAN. 2-4	In-Person Registration for ALL new students.
JAN. 4	Last day to register for Winter Quarter, 1963. Note application deadlines above.
JAN. 7-11	Change of registration by appointment only.

ACADEMIC PERIOD

JAN. 7—MONDAY	Instruction begins for all students
JAN. 11—FRIDAY	Last day to add a course
FEB. 21—THURSDAY	Last day to submit applications for advanced credit examinations
FEB. 22—FRIDAY	Washington's Birthday and Founder's Day holiday
MAR. 9—SATURDAY	Advanced credit examinations
MAR. 18-21	Final examinations (4 o'clock classes, Friday, March 15, 4-6 p.m.)
MAR. 21—THURSDAY	Quarter ends

For further information concerning subsequent quarters inquire at the Registrar's Office.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

ADMINISTRATION

BOARD OF REGENTS

JOHN L. KING, <i>President</i>	Seattle
JOSEPH DRUMHELLER, <i>Vice-President</i>	Spokane
MRS. A. SCOTT BULLITT	Seattle
HERBERT S. LITTLE	Seattle
ALBERT B. MURPHY	Everett
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima
HELEN E. HOAGLAND, <i>Secretary</i>	

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN H. LEGGETT, Ph.D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>
GORDON D. MARCKWORTH, M.F.	<i>Dean of the College of Forestry</i>

COLLEGE OF FORESTRY FACULTY

(AS OF OCTOBER, 1960)

The first date following a name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present academic rank.

- BROCKMAN, C. FRANK, 1946 (1957), *Professor of Forestry*
B.S., 1924, Colorado State; M.S., 1931, Washington
- BRYANT, BENJAMIN SMYTH, 1949 (1959), *Associate Professor of Forest Products*
B.S.F., 1947, M.S.F., 1948, Washington; D.F., 1951, Yale
- CAMPBELL, ROBERT KENNETH, 1958 (1960), *Assistant Professor of Forest Genetics*
B.A., 1951, Montana State University; M.S., 1954, Ph.D., 1958, University of Washington
- ERICKSON, HARVEY D., 1947 (1959), *Professor of Forest Products*
B.S., 1933, B.S., 1934, M.S., 1936, Ph.D., 1937, Minnesota
- GESSEL, STANLEY PAUL, 1948 (1956), *Associate Professor of Forest Soils*
B.S., 1939, Utah State Agricultural College; Ph.D., 1950, California
- LENEY, LAWRENCE, 1960, *Assistant Professor of Forest Products*
B.S., 1942, M.S., 1948, Ph.D., 1960, New York State University
- MARCKWORTH, GORDON DOTTER, 1939, *Professor of Forest Management; Dean of the College of Forestry*
B.S.F., 1916, Ohio State; M.F., 1917, Yale
- PEARCE, JOHN KENNETH, 1934 (1943), *Professor of Logging Engineering*
B.S.F., 1921, Washington
- ROBERTSON, JAMES CAMPBELL HAY, 1945 (1956), *Professor of Forest Management*
B.S.F., 1927, Washington; M.S.F., 1933, California; D.F., 1947, Duke
- SCHAEFFER, WALTER HOWARD, 1952 (1960), *Professor of Forestry*
B.S.F., 1936, Washington; M.S.F., 1937, Yale; Ph.D., 1952, Washington
- SCOTT, DAVID ROBERT MAIN, 1955 (1960), *Associate Professor of Silviculture*
B.A., 1942, Virginia; M.F., 1947, Ph.D., 1950, Yale

- STENZEL, GEORGE, 1949 (1957), *Associate Professor of Logging Engineering*
B.S., 1938, New Hampshire; M.F., 1939, Yale
- THOMAS, DAVID PHILLIP, 1950 (1959), *Associate Professor of Forest Products*
B.S.F., 1941, M.F., 1948, Washington
- TURNBULL, KENNETH JAMES, 1958, *Instructor of Forestry*
B.Sc., 1951, University of Edinburgh; M.F., 1958, Washington
- HUPMAN, CARL BRANTNER, JR., 1956, *Resident Manager of the Charles Lathrop
Pack Demonstration Forest*
B.S.F., 1939, Washington; M.F., 1946, Yale
- MULLIGAN, BRIAN O., 1946, *Director of the Arboretum*
N.D.H., 1933, England
- SMITH, BERNICE F., 1955, *Librarian*
B.A., 1936, B.A. in L.S., 1937, Washington
- GRONDAL, BROR LEONARD, 1913 (1959), *Professor Emeritus of Forest Products*
B.A., 1910, Bethany College (Kansas); M.S.F., 1913, Washington; D.Sc. (Hon.),
1943, Bethany College; Ph.D. (Hon.), 1951, Crown Zellerbach Paper School

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change fees, the rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

GENERAL INFORMATION

GENERAL INFORMATION

THE UNIVERSITY OF WASHINGTON College of Forestry was established in 1907, at a time when professional forestry education in the United States was in its infancy. The College began its program with a staff of two instructors and a class of ten students. Today, accredited by the 14,000-member Society of American Foresters, the College numbers 14 faculty, 280 students, and 1,850 alumni.

Since 1925, the College program has been centered in the main forestry building, Alfred H. Anderson Hall, where facilities include lecture rooms, laboratories, an assembly hall, student activity rooms, a Forest Club room, and the College Library. The building was a gift of Mrs. Agnes H. Anderson, whose husband was a pioneer lumberman and civic leader in Washington.

PHILOSOPHY AND OBJECTIVES

For over half a century, the College of Forestry has pursued the philosophy of its founders: that the important timber resource of the Northwest requires men especially trained to harvest the forest crop efficiently and wisely, and men skilled in techniques of converting the raw material to maximal economic use. These goals are set forth in the following Statement of Policy and Objectives, adopted February 9, 1960:

PREAMBLE:

The unusually large vested interests of the people of the State of Washington in the multiple-use of forest lands, and the increasing dependence of the state economy on advanced forestry practices and effective forest utilization, demand a dynamic program of forestry education and research. The University of Washington is uniquely located to lead this program because the concentration of diverse wood-using industries, and the forests, their products, and allied resources, provide the University with opportunities and responsibilities in all aspects of professional forestry instruction and in research.

OBJECTIVES

The objective of undergraduate professional education in the College of Forestry of the University of Washington is to provide the best professional instruction in the many aspects of

forest management, logging engineering, forest products, and such other related areas of forestry as may be dictated by future developments.

The objectives of the graduate program of forestry are to make available the best academic guidance, research facilities, and advanced professional education to foresters desiring intensification or specialization beyond the initial professional degree.

The objectives of the research program in forestry are to provide a medium of education primarily in graduate programs, to provide stimulus for professional growth by faculty, and to promote and execute fundamental forestry research.

Further general objectives include providing professional forestry leadership; the conduct of seminars, colloquia, short courses, and other similar media for various professional and non-professional groups; and the dissemination of forestry information by methods appropriate to the University and College.

Because Seattle is in the center of the Northwest timber industry, forestry students here encounter at first hand the forest-management and forest-industry problems with which they will be concerned as foresters. Government forests and private timber holdings serve as laboratories and are regularly integrated into the four-year curriculum in which students study forest management and logging engineering in the field. Practicing foresters contribute to the laboratory instruction. Sawmills, plywood plants, pulp and paper mills, wood-industry research laboratories, and other wood-processing plants, all in close proximity to the College, provide field laboratories for student projects in the forest products curriculum. This favorable educational environment makes it possible to incorporate practical experience into the academic program.

COLLEGE FACILITIES

THE LIBRARY

The College of Forestry Library, a branch of the University's Henry Suzzallo Library, contains 10,000 bound volumes and 20,000 pamphlets, reports, and monographs. It also possesses an excellent collection of approximately 500 forestry periodicals and many indexes to current forestry literature. Under the nation-wide Farmington Plan, sponsored by the Special Library Association, it has assumed responsibility for collecting all foreign material published in the fields of forestry and pulp and paper technology. This facility provides unusual opportunity for academic research.

FOREST SOILS LABORATORIES

Two Forest Soils Laboratories, in Anderson Hall, serve a dual purpose as research and teaching aids in the College. In addition to enabling graduate students to study all types of forest soil problems and thoroughly explore properties of forest soils, undergraduate students can become familiar with important forest soil characteristics and with methods for analyzing forest soils.

Supplementing the Forest Soils Laboratories is a field laboratory at Pack Demonstration Forest, where less elaborate studies of forest soils and other problems are conducted. These three laboratories have been important factors in expanding research on the growth of forest trees. Greenhouse space is also available through cooperation with the Botany Department.

HERBARIUM

The Herbarium supplements forestry students' field work in dendrology. The collection contains representative plant material from all parts of the United States, and includes dried mounted specimens of leaves, twigs, and flowers of the hard-wood trees, and shrubs and twigs of the coniferous species. Fruit specimens and a complete cone collection of American conifers are maintained apart from the mounted collection. The Herbarium also provides authentic specimens for use in identifying woody plant material in many branches of forestry work. Another herbarium, complete in range plants, is maintained by the Botany Department and is available to forestry students.

WOOD COLLECTION

The Wood Collection contains nearly 3,500 specimens from all parts of the world, providing authentic material for research and for identification of wood

samples. The collection is valuable in the study of properties, characteristics, and uses of various woods, and provides material for studies of wood structure, both gross and microscopic.

FOREST PRODUCTS LABORATORY

Housed in its own building on the campus, the Forest Products Laboratory is equipped to conduct advanced studies of wood and wood products. Sections of the Laboratory are devoted to timber physics, woodworking, wood gluing, wood preservation, kiln drying, photomicrography, advanced wood technology, fiber board, and particle board. Testing machines, presses, machine tools, chemical apparatus, kilns, and mensuration devices permit almost unlimited experiments with wood.

A dry kiln for research and instruction in wood seasoning is situated adjacent to the Forest Products Laboratory. It is equipped with modern instrumentation for remotely controlling the variables involved in the drying of lumber over a wide range of conditions. The 18-foot by 26-foot drying chamber is sufficiently large to reproduce conditions found in industrial-seasoning practice, yet not so large as to be unwieldy for conducting basic wood-drying research. Undergraduate students in forest products operate the kiln as part of their senior-year program.

ARBORETUM

The University Arboretum is a 267-acre park planted with trees and shrubs from all over the world. The diversified topography of the Arboretum, which produces varied soil and moisture conditions, and the mild climate of the Puget Sound region permit the growth of a greater number of species and varieties than is possible in almost any other area. The Arboretum is a ten-minute walk from the campus.

LEE MEMORIAL FOREST

The Lee Forest is a tract of young timber in Snohomish County, near Maltby, about twenty-two miles from the University. The 158-acre property was deeded to the College of Forestry in the early 1930's by Mr. and Mrs. George O. Lee in memory of Mr. Lee's parents, Mr. and Mrs. O. H. Lee, Snohomish County pioneers. An experimental and demonstration farm forestry area, the Lee Forest is used for teaching and research in forest management, silviculture, ecology, and forest soils. A number of permanent study plots have been established, a study map made, and intensive growth measurements taken. During the winter of 1952 a first thinning was made in Douglas fir stands thirty-five and fifty-five years old.

The accessibility, stocking age, and site of the Lee Forest make it exceptionally valuable for studies and demonstrations of farm forestry practices applicable in western Washington.

PACK DEMONSTRATION FOREST

The Charles Lathrop Pack Demonstration Forest, an enlargement and development of an original gift from the Charles Lathrop Pack Forestry Trust, is a tract of more than 2,300 acres. It extends along both sides of the Mt. Rainier National Park highway at La Grande, Washington, sixty-five miles from the University. The Pack Forest is an excellent field and research laboratory as well as a public demonstration project.

Since 1928, when several permanent sample plots were established, research projects in various phases of silviculture, mensuration, and forest soils have been set up. Cooperative studies are being conducted with the Pacific Northwest Forest and Range Experiment Station.

Complete facilities for classwork and living accommodations are available to students and instructors working at the Pack Forest.

FRESHMAN SUMMER CAMP

Forestry students who have completed the regular freshman-year program are required to register for the regular Summer Quarter session at Pack Forest.

Regular Summer Quarter fees are charged for the nine-week program as well as a \$10.00 Pack Forest Fee and a subsistence fee of approximately \$130.00.

The Pack Forest Summer Program is under the supervision of regular faculty assigned to summer teaching. The summer curriculum is comprised of plane and topographic surveying, forest mensuration, and ecology.

WINNIFRED DENNY MOORE MEMORIAL FOREST

The Winnifred Denny Moore Memorial Forest is a recent gift to the College of Forestry from Dr. Raymond C. Moore, professor of geology at the University of Kansas. The 450-acre tract is situated in the eastern Cascade Mountains, about 20 miles northwest of Cle Elum, in the Boulder Creek area of the Wenatchee National Forest.

The tract is forested with ponderosa and lodge pole pine, spruce, and fir. It is especially useful for ecological studies in eastern Cascade timber types and for experimental plantings and land management studies in the high altitudes of Eastern Washington.

INSTITUTE OF FOREST PRODUCTS

The Institute of Forest Products, which is housed in Anderson Hall, has three general objectives: (1) to provide students with increased opportunities for advanced study and research particularly in fields relating to products of the forest; (2) to provide for additional new and important research results especially in fields relating to forest products, and (3) to provide for increased University research cooperation with industry and government in fields relating to forest products. Predoctoral and postdoctoral research assistantships are available.

LECTURESHIP

The Colonel William B. Greeley Lectureship in Industrial Forestry was established by the Industrial Forestry Association in 1956 to commemorate one of the nation's foremost pioneer foresters. With the funds provided by the grant, prominent industrial foresters are invited to the College during the Winter Quarter to conduct a special course in industrial forestry which includes public lectures and a series of seminars. The Lectureship serves as a memorial to a man who made great contributions to American forestry through his support of industrial forestry, tree farming, the Keep Green movement, and numerous other significant advances in forestry.

ADMISSION TO THE UNIVERSITY

PRELIMINARY STATEMENTS

The Board of Admissions, which is appointed by the President, is responsible for the interpretation and administration of the regulations governing admission to the University.

The University recognizes high school diplomas, college credits presented for advanced standing, and college degrees earned in the following institutions: (1) high schools accredited by the Washington State Department of Public Instruction; (2) out-of-state high schools accredited by their state university and state department of public instruction, or by the regional accrediting association of the area; (3) colleges and universities accredited by their regional accrediting association.

Resident. Defined for purposes of admission and/or assessment of fees as an individual who has been domiciled in the state of Washington for one year immediately prior to his registration. The domicile of a minor is that of his parents or his legal guardian.

Nonresident. An applicant whose credentials are received from a school or college located outside the state of Washington. An applicant who believes himself eligible for resident status may apply for reclassification through the Office of Residence Classification which has final authority in determining such status.

Qualified Student. One whose scholastic standing and preparation meet the standards for admission to the University.

Regular Student. One who fulfills the following requirements: (1) has been granted regular admission to a college or school of the University; (2) whose current schedule for credit is satisfactory to the dean of his college or school; (3) has completed all of the required steps for registration, including the payment of tuition and fees, the filing of class cards, and the depositing of registration materials at Sections.

Grade-point averages. These are based on a four-point system in which A = 4, B = 3, C = 2, D = 1, E = 0. An adjustment to this system is made as necessary in the computation of grade-point averages earned at other institutions.

ELIGIBILITY FOR ADMISSION WITH FRESHMAN STANDING

(Applicable to Residents of the State of Washington)

Undergraduate programs offered by the University lead to the baccalaureate degree; students, therefore, are admitted when, in the judgment of the University, they appear qualified to pursue a degree program with a reasonable probability of success. In making this judgment, the University's Board of Admissions considers the applicant's total record, including such factors as scholastic achievement in a college preparatory program, recommendations of the high school principal or counselor, rank in class, and scores on any nationally administered tests associated with college entrance.

Scholastic achievement is measured largely in terms of the criteria listed below. All students entering the University are expected to meet these criteria. Non-residents and students who enter with advanced standing will find additional admission criteria in subsequent sections.

SCHOLASTIC CRITERIA

1. Graduation with diploma from an accredited high school.
2. Achievement of an over-all high school grade-point average of at least 2.50 in courses completed after September, 1960, and a grade-point average of at least 2.00 in courses completed prior to September, 1960.
3. Completion of a college preparatory program of at least 16 units to include the following:

a. English	at least 3 units
b. One foreign language	at least 2 units
c. College preparatory mathematics	at least 2 units
d. One laboratory science	at least 1 unit
e. Social science	at least 2 units
f. Electives	at least 2 units

from the above subjects

Additional electives may be chosen from any subjects acceptable for high school graduation.

Intermediate algebra (Algebra III) is prerequisite to the trigonometry course which begins the mathematics sequence taken in the freshman year by forestry students. Students who plan to enter this college should complete Algebra III and, if possible, trigonometry in addition to the elementary algebra and plane geometry which normally are the two units of college preparatory mathematics. It is recommended also that students complete at least one unit of biological science and one unit of physical science while in high school. Students who enter the College with thorough preparation in mathematics and the natural sciences will have the best chance of completing their Forestry program and receiving their Bachelor of Science degree in the shortest possible time.

Because an appropriate choice of high school electives serves to strengthen a student's preparation, the University will give this part of his record the same careful attention it gives to other aspects of his qualifications.

ELIGIBILITY FOR ADMISSION WITH ADVANCED STANDING

(Applicable to Residents of the State of Washington)

A qualified student in good standing at an accredited institution may apply for admission with advanced standing. Such an applicant is expected to have the same high school preparation as the student who enters as a freshman, and to have a college grade-point average which meets the standards herein specified.

With fewer than 45 acceptable credits, an applicant must present a grade-point average of 2.50 in high school work completed after September, 1960; a 2.00 grade-point average in such work completed prior to this date; and a 2.00 cumulative average in all college work.

With 45 or more acceptable credits an applicant is expected to present a cumulative and last-term grade-point average of at least 2.00. See also section on transfer of advanced credit, page 23.

ADMISSION OF NONRESIDENTS TO UNDERGRADUATE STANDING

Applications from nonresidents will be considered, but first preference is given legal residents of the state of Washington, and sons and daughters of University of Washington alumni residing outside the state.

Nonresident applicants are selected on the basis of their preparation and scholastic standing. In general, a freshman applicant must be eligible to enter the university of his own state, and satisfy the foregoing scholastic criteria with a 3.00 (B) grade-point average or place in the upper 25 per cent of his graduating class.

An applicant for admission with advanced standing with fewer than 45 college credits must have a cumulative grade-point average of at least 3.00 in standard college courses as well as a high school grade-point average of at least 3.00 or have been in the upper fourth of his class. An applicant presenting more than 45 credits for advanced standing must present a 2.70 grade-point average in standard college courses.

Sons and daughters of University of Washington alumni are admitted according to resident standards but are required to pay the regular nonresident tuition fees. Applicants for admission to curricula in which the University serves on a regional basis will be accorded special consideration by the Board of Admissions.

ADMISSION OF SPECIAL STUDENTS AND AUDITORS

Non-high school graduates who are 21 or older and legal residents of Washington may apply to the Board of Admissions for admission with special standing. With their application they must submit all available records of secondary school and college study. Special students may register in and take for credit whatever courses the dean of the college permits, but may not participate in student activities or receive degrees. By fulfilling conditions specified by the Board of Admissions, special students may change their status to that of regular students and may receive degrees.

Persons 21 or older may register as auditors in nonlaboratory courses or the lecture sessions of laboratory courses by obtaining the consent of the dean of the college and the instructors of the courses. Auditors do not participate in class discussion or laboratory work. They may receive credit for audited courses only by enrolling in them as regular students in a subsequent quarter.

ADMISSION OF FOREIGN STUDENTS AND STUDENTS EDUCATED ABROAD

Applicants for admission with graduate or advanced undergraduate standing are expected to meet the same general requirements as nonresidents of Washington educated in American schools and demonstrate a satisfactory command of the English language.

The official record of the Canadian student is the matriculation certificate or university admission certificate of his province. Canadian and foreign students who have been in University attendance must have official transcripts forwarded as required of all students. High school graduates and university transfer students must meet the scholarship requirements for nonresident students. See above.

ADMISSION OF VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Applications for and questions about government aid should be addressed to the Veterans Division Regional Office. See page 25.

ADMISSION OF UNDERGRADUATE STUDENTS WHO DO NOT MEET THE ADMISSIONS STANDARDS

An applicant whose preparation and previous scholarship does not clearly qualify him for admission may submit additional evidence in support of his application. This may include scores on nationally recognized tests of scholastic aptitude or achievement; letters from school administrators, teachers or counselors; and other information which may assist the Board of Admissions in evaluating his probability of success in the University.

Students admitted by special action of the Board of Admissions will be expected to achieve and maintain a satisfactory scholastic average in their University work and to fulfill any conditions specified by the Board at the time of their admission.

A student thus admitted on probation may continue attendance at the discretion of the dean of his college, but may not (1) be pledged or initiated into a fraternity or sorority, or engage in those other student activities in which his right to participate is restricted by the regulations of the Committee on Student Welfare; (2) engage in those athletic activities in which his right to participate is restricted by regulations of the University Intercollegiate Athletics Committee. Such a student shall be removed from probation when he has earned a minimum of 12 credits, exclusive of those in physical education activity and lower-division military training, with a 2.00 grade-point average. Provided, that if such a student carries less than 12 credits in one quarter he may not be removed from probation unless he has earned a minimum 2.00 grade-point average for the current quarter, as well as a minimum cumulative average of 2.00 for his total quarters in attendance. A student removed from probation under these provisions shall henceforth be subject to the regular scholarship rules.

ADMISSION TO THE GRADUATE SCHOOL

Basic requirements for admission to the Graduate School are a bachelor's degree from an institution of recognized standing, a grade-point average of 3.00 in the senior year of college work, approval of the Graduate School, and approval of the department in which the work is to be taken. For complete information, see the *Graduate School Bulletin*.

TRANSFER OF ADVANCED CREDIT FROM OTHER INSTITUTIONS

The Board of Admissions reserves the right to determine the exact amount of transfer credit to be accepted.

1. The advanced standing for which an applicant's training appears to fit him is granted tentatively on admission. Definite advanced standing is not determined before the end of the student's first quarter in the University. The maximum that may be accepted from other colleges and universities is 135 quarter credits or senior standing. Transfer credit will not be allowed in the senior year.

2. Transfer credits will be accepted for upper-division credit *only* when earned at an accredited four-year degree-granting institution.

3. Transfer credits from institutions accredited for less than four years will not be accepted in excess of the accreditation of the school concerned.

4. Transfer of junior college credit shall apply on the University freshman and sophomore years only. A student who has completed a portion of his freshman and/or sophomore years in a four-year college may not transfer junior college credit in excess of that necessary to completion of the first two years in the University. In no case shall the transfer of junior college credit to the University exceed 90 quarter credits exclusive of physical education activity credits.

5. The maximum number of credits obtainable by acceptance of Armed Forces training schools credits will be 30. All such credits will be counted as extension credits and will be included in the 90-credit maximum allowed toward the bachelor's degree, but none will apply toward the work of the senior year.

6. A maximum of 45 credits earned in extension and correspondence courses at other institutions may be transferred, but none of the credits can apply in the senior year. Extension and correspondence credits from schools that are not members of the National University Extension Association are accepted only after examination.

7. Credits earned in evening and extension classes or correspondence courses at this University are accepted after the student has satisfactorily completed 35 credits of work in residence (that is, registered in regular University classes). A maximum of 90 extension and/or correspondence credits is acceptable; the 90 credits may include the 45 extension and/or correspondence credits allowable from other institutions or may consist entirely of courses taken in this University's Division of Evening Classes or Division of Correspondence Study. All credits earned in advanced-credit examinations and all acceptable Armed Forces training schools credits must be counted in the 90 extension credit maximum. Up to ten evening class or correspondence course credits from this University can apply toward the work of the senior year.

8. For work done in unaccredited institutions, extended secondary programs in institutions whose standing is unknown, and for work with private teachers, University credit is granted only after examination. Applications for advanced-credit examinations must be filed during the first quarter in residence.

9. No credit will be granted for courses taken in another college while the student is in residence at the University, unless written permission to register for such courses is obtained by the student from the University department giving such instruction in the subject, from his major department, and from the dean of his college. The prescribed written permission is effective only if obtained before registration. Nothing in this rule makes mandatory the granting of any credit by the University.

ADMISSIONS PROCEDURE

Requests for Application for Admission forms and correspondence regarding admission to any college or school of the University should be addressed to the Office of Admissions, University of Washington, Seattle 5, Washington. Graduates of high schools in the state of Washington may obtain this form from their principals.

Applications and required transcripts must be filed with the Office of Admissions prior to the following dates in order to be assured of consideration for admission to the quarter for which application is being made: August 1 for Autumn Quarter, 1961, July 15 for subsequent Autumn Quarters, December 1 for Winter Quarter, March 1 for Spring Quarter, May 15 for Summer Quarter.

All records become a part of the official file and can neither be returned nor duplicated for any purpose. Failure to submit complete credentials will be considered a serious breach of honor, and may result in permanent dismissal from the University.

A leaflet giving general information and instructions for registration is mailed with the Notice of Admission. In the event of a discrepancy, instructions in the leaflet supersede those found in earlier publications. *The University assumes no responsibility for applicants who come to the campus before they have been officially notified of their admission.*

The admissions credentials of applicants who do not register for the quarter to which they have been admitted are normally retained in the Office of Admissions for a period of one year from the date of application. At the end of this period, credentials on file are discarded unless the applicant has notified the Office of his

continued interest in attending the University or of his enrollment in the Evening Classes program. Should a student wish to renew his application after the one-year lapse, he must submit new credentials in advance of the date given above for the quarter desired.

FOR FRESHMAN STANDING

An application form, obtained from the University's Office of Admissions or from a Washington high school, should be completed according to instructions appearing on the form and returned to the Office of Admissions. Pages two and three of the same form should be given to the applicant's high school principal with the request that the scholastic record be entered and forwarded to the University's Office of Admissions as soon as possible.

Students may apply through their high schools on completion of the first semester of the senior year. Those who are qualified will be issued notices of early or conditional admission which become valid on graduation with a grade-point average of no less than 2.50 for the final semester. Others also will be notified of their admission status.

Scores on a nationally administered college aptitude test are not required. However, they may be helpful in evaluating a borderline student's probability of success.

FOR ADVANCED UNDERGRADUATE STANDING

An application form, obtained from the University's Office of Admissions or from a Washington junior college should be completed according to instructions appearing on the form and sent to the Office of Admissions. In addition, the applicant should request the principal of his high school and the registrar of each college he has attended to forward an official transcript of his record to the University's Office of Admissions. When these credentials have been evaluated, the applicant will be notified of his admission status.

FOR GRADUATE STANDING

An application form, obtained from the University's Office of Admissions, should be completed according to instructions appearing on the form and returned to the Office of Admissions. In addition an applicant should request the registrar of each college or university in which he has been enrolled as an undergraduate or graduate student to forward *two* official transcripts to the University's Office of Admissions. When these credentials have been evaluated, the applicant will be notified of his admission status. The student will find it convenient to have an additional copy of the record for reference.

WORLD WAR I OR II VETERANS

Under certain conditions a veteran of World War I or II who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges. See page 32.

KOREAN VETERANS

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building. Educational allowance payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

Korean Certificate

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety

Division Building as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established.

Quarter Credit Requirements (Public Law 550)

14 credits	Full subsistence
10 to 13 credits.....	Three-fourths subsistence
7 to 9 credits.....	One-half subsistence
6 credits or less.....	Established tuition and fees
or credits \div 14 \times \$110.00, whichever is the lesser.	

Graduate Credit Requirements (Public Law 550) 500-level Courses or Above

9 credits	Full subsistence
7 to 8 credits.....	Three-fourths subsistence
5 to 6 credits.....	One-half subsistence
4 credits or less.....	Established tuition and fees
or credits \div 14 \times \$110.00, whichever is the lesser.	

If a graduate is combining 400-level courses with 500-level courses, he should consult with the Veterans Division, Safety Division Building, to determine the scale of pay.

Termination of Training

A veteran *eligible* under Public Law 550 must complete his training by *eight years* after his release from active service, or by January 31, 1965, whichever is earlier.

DISABLED VETERANS

A veteran with a disability under Public Law 894 should contact a training officer in the nearest Veterans Administration Office approximately four weeks prior to registration.

CHILDREN OF DECEASED VETERANS

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for a Program of Education issued to those eligible persons by the Veterans Administration is to be presented to the Veterans Division, Safety Division Building, on the date of registration.

REQUIRED TESTS AND EXAMINATIONS

Washington Pre-College Differential Guidance Test

This grade prediction test is required of all entering freshmen, including those transferring to the University with fewer than 45 credits. It is also required of transfer students who have not completed courses which are equivalent to English 101 (English composition) or Humanistics-Social Studies 265 (Techniques of Communication). High school seniors are advised to arrange through their high schools to take this test in the spring when it is offered throughout the state of Washington. Nonresidents of Washington may take the test at the time of their registration according to instructions mailed with the notice of admission. Sample copies are not available. Special, foreign, blind students, and auditors are exempted.

The several parts of this test have been selected because of their proven value for the prediction of grades most likely to be earned by a student. The result of the test are used by departmental advisers as an aid in assigning students to appropriate sections in English composition and other subjects, therefore it is advisable that the student bring a copy of the results with him when he comes for his first conference with his counselor or adviser.

Mathematics Placement Tests

One section of the Pre-College Differential Guidance Test evaluates a student's mastery of intermediate algebra and plane geometry. A satisfactory score on this section qualifies a student to enroll in Mathematics 104 (trigonometry) or Mathematics 105 (college algebra). Those who fail to qualify and wish to proceed to the study of more advanced mathematics courses may choose one of the following alternative plans:

1. Pass Mathematics 101 and then take 104, or 105 or both. Mathematics 101 is given only through the Division of Evening Classes or the Division of Correspondence Study. No credit is given for Mathematics 101 to students who have completed the third semester of high school algebra.
2. Pass Mathematics 103, in which the first four weeks are devoted to a review of intermediate algebra and the last six weeks to the study of plane trigonometry equivalent to Mathematics 104. The satisfactory completion of this course qualifies the student to enroll in Mathematics 105 (college algebra).

Students who have studied trigonometry, fourth semester algebra, mathematical analysis, or similar subjects in high school, will be placed in the next appropriate course at the University according to their scores in additional placement tests given by the Department of Mathematics. It is advisable to review before taking these examinations. This generally applies to students entering such fields as engineering, architecture and urban planning, fisheries, forestry, pharmacy, mathematics, and the physical and marine sciences.

MEDICAL EXAMINATION

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions, and to returning former students by the Registrar. This examination, which is required before a student may register, is taken at the student's expense. A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on the campus.

MISCELLANEOUS INFORMATION

Junior High School Courses. The University recognizes college preparatory courses given in the junior high school and assigns them the same value as equivalent courses offered by the high school. Students who elect these subjects in the junior high may subsequently achieve a superior degree of competence in related subject areas in high school.

Accelerated, Honors, and Advanced Placement Courses. The University encourages qualified students to extend themselves academically by taking advantage of advanced, accelerated and honors courses offered by their schools. The degree of achievement attained by students in selected areas may be measured by their performance in College Entrance Examination Board Advanced Placement Examinations and by other means which are described briefly in the following paragraphs.

The University of Washington endorses the Advanced Placement Program of the College Entrance Examination Board and grants placement and/or credit at the discretion of the University department concerned on the basis of scores earned in College Entrance Examination Board Advanced Placement Examinations. Successful participation in such challenging opportunities assures superior academic

preparation and serves to identify those students more likely to profit from University-level honors courses.

REGISTRATION

PROCEDURE

ALL students, currently in school, who plan to register for a succeeding quarter (Summer Quarter excepted) must register by Advance Registration and pay fees by the stated deadline. Students are held responsible for knowing and observing registration procedures, dates, and deadlines which appear in the bulletins, in "Official Notices" in the *Daily*, and on campus bulletin boards.

New students are given appointments when they are notified of admission, and they receive complete directions for registering at the time of registration.

Students expecting to return to the University after an absence of a quarter or more (excluding Summer Quarter) must register by In-Person Registration. The required registration appointment may be obtained by writing to, calling at, or telephoning the Registrar's Office at the time specified in the Calendar, but in no case later than the stated deadline (see pages 4-11).

ADVISING

After notification of admission, and before registration, new students should visit or write to the College for assistance in planning their course programs. Academic and other counseling of forestry students is assigned to faculty advisers in the College. The adviser for freshmen and new students is Professor Walter H. Schaeffer, 210 Anderson Hall.

REGISTERED CREDITS ALLOWED EACH QUARTER

Except with the consent of his dean, no student may be registered for less than 12 credits (or the equivalent) or more than 16 credits (or the equivalent) or the number called for in the prescribed curricula, exclusive of physical education activity courses and lower-division military, naval, or air science courses. In no case may a student be registered for, or receive credit for more than 20 credits (or the equivalent) of work, exclusive of physical education activity courses, and lower-division military, naval, or air science courses. Work taken in noncredit courses or to remove entrance deficiencies, or concurrently in evening classes, by correspondence study, or in another collegiate institution, must be included in the computation of the total registered credits allowed.

CHANGES OF REGISTRATION

After students have registered, they cannot change their schedules except with permission of the Dean of the College. No student is permitted to make a registration change that involves entering a new course after the first calendar week of the quarter. After that time no student may register without the consent of the Dean and the instructor whose class the student wishes to enter.

WITHDRAWAL FROM A COURSE

Official withdrawal from a course is made only under the following conditions: (1) during the first fifteen calendar days of a quarter, with the consent of the withdrawing student's adviser; (2) after the first fifteen calendar days of a quarter and before the end of the first six calendar weeks of a quarter, with the approval both of the instructor of the course from which withdrawal is sought and of the dean of the college in which the withdrawing student is enrolled; and (3) after the first six calendar weeks of a quarter and before final examination week, only upon certification in writing to the Registrar by the dean of the college in which the withdrawing student is enrolled that, in the judgment of the dean, withdrawal is necessitated by the student's hardship. Withdrawals from courses accomplished by any other method are unofficial withdrawals which are entered on a student's record as EW, and are assigned the value of E in the computation of the

student's grade-point average. No official withdrawal may be made during final examination week.

Official withdrawals are entered on a student's record as follows: (1) a withdrawal within the first fifteen calendar days of a quarter, as W; (2) a withdrawal after the first fifteen calendar days of a quarter, as PW, if the student's work has been satisfactory, and as E, if the student's work has been unsatisfactory. Grades of PW and W are assigned no value in the computation of grade-point averages.

WITHDRAWAL FROM THE UNIVERSITY

The student should obtain at the office of the Dean of the College the Request for Withdrawal From the University form. The same system of grading applies as that described under Withdrawal from a Course.

QUALIFICATIONS FOR GRADUATION

MINIMUM SUBJECT REQUIREMENTS

The University credit requirement for graduation is 180 academic credits (including Health Education 110 or 175) and the required quarters of military training and physical education activity. The College of Forestry requires that 9 credits or the equivalent in English 101, 102, and 103 (English Composition) be included in the total. At least 60 of the 180 credits must be in upper-division courses, those numbered 300 and above. Advanced ROTC courses do not count as upper-division credit, and no more than 18 credits in advanced ROTC courses may be counted toward graduation.

Students who transfer from other institutions are normally required to earn at least 10 credits in their major subject in this College.

SCHOLARSHIP

Grade points per credit are awarded on the following basis: a grade of A earns 4 points; B, 3 points; C, 2 points; D, 1 point. The grade of E or EW signifies failure and the grade point is 0. The quarterly and cumulative grade-point averages are computed by multiplying the grade point received in a course by the total number of credits the course carries, totaling these values, and dividing by the total number of credits the student attempted. Courses for which any of the following symbols are recorded are not considered in determining the grade-point average: I, N, S, W, PW, X. Grade-point averages are calculated on the basis of all grades received in courses which carry academic credit, including courses repeated. Grades received in repeated courses do not cancel or replace any other grades. Only University of Washington residence credits will be used in these computations.

Any undergraduate student who has completed three or more quarters in the University and whose cumulative grade-point average is below 2.00 shall be placed on academic probation. Any undergraduate student who has completed not more than two quarters at the University shall be placed on probation when his cumulative grade-point average is below 1.80. The dean of the school or college in which the student is enrolled shall notify the student as soon as possible that he is on probation. Such action will be noted permanently on the student's official academic record.

Academic probation is essentially a warning to the student that he must show improvement if he is to remain in the University. University regulations regarding scholastic eligibility for participation in intercollegiate athletics and other student activities shall be recommended to the Senate by the Faculty Committee on Intercollegiate Athletics and the Faculty Committee on Student Welfare respectively.

An undergraduate student on academic probation will be removed from probation at the end of any quarter in which his cumulative grade-point average reaches 2.00 or better.

Any undergraduate student on academic probation will be dropped: (1) if he fails to attain at least a 2.00 for the following quarter's work; or (2) if he fails to

attain a 2.00 cumulative average at the end of the two subsequent quarters. Any student dropped under this rule will be notified in writing of this action by the dean of the school or college in which he is enrolled.

Only under exceptional circumstances will a student dropped under low scholarship rules be readmitted to the University. Such a student will be readmitted only at the discretion of the dean of the school or college to which he seeks admission. A student readmitted after being dropped under these rules will enter on academic probation. Such a student will be dropped: (1) if he fails to attain a 2.00 for the following quarter's work; or (2) if he fails to attain a 2.00 cumulative average at the end of two quarters. He will be removed from probation at the end of the quarter in which his cumulative grade-point average reaches 2.00 or better.

A senior who has completed the required number of credits for graduation but whose work in what would normally be his final quarter places him on probation will not receive a degree until he has been removed from probation. A senior who has completed the required number of credits for graduation but whose work in his last quarter results in his being dropped for low scholarship shall not receive a degree until he has been readmitted and removed from probation.

SENIOR-YEAR RESIDENCE

Senior standing is attained when 135 credits, plus the required quarters of ROTC and physical education, have been earned. Of the work of the senior year (45 credits), at least 35 credits must be earned in three quarters of residence. The remaining 10 credits may be earned either in residence or in this University's evening classes or correspondence courses.

MILITARY TRAINING

The Departments of Air Science, Military Science, and Naval Science conduct the ROTC programs under agreements between the University and the United States Air Force, Army, and Navy. At the University, these programs are coordinated by the Dean of the College of Engineering.

The University requires male students who enter the University as freshmen or sophomores to complete six quarters of military training. (For exemptions, see below). The two-year basic programs offered by the Departments of Air Science and Military Science and the four-year program offered by the Department of Naval Science, satisfy this requirement. For a complete list of courses offered by these Departments, see the *Yearly Time Schedule*. In addition to the basic programs, the Department of Air Science and the Department of Military Science each offers for selected students an advanced program which leads to commissioning in the Air Force or the Army. The four-year program of the Department of Naval Science, also for selected students, leads to commissioning in the Navy or Marine Corps.

Students enrolling in Naval ROTC, and those who take the advanced program of Air Force or Army ROTC must agree in writing to complete the course of training and accept a commission in the service for which they are trained. *The honoring of this commitment is a condition of graduation from the University.*

The basic program of the Department of Air Science consists of three quarters of military classroom instruction on the Foundations of Air Power. These are offered in the spring quarter of the first year and the autumn and winter quarters of the second year. During each of the other three quarters, the student must substitute an approved University course in lieu of Air Science. Leadership Laboratory is required each of the six quarters of the basic program and is conducted one hour each week.

The basic program (freshmen and sophomores) of the Department of Military Science requires drill one hour each week. Classroom military studies for freshmen require two hours per week in the first quarter, one hour per week in the second quarter, and none in the third quarter. As a substitute for classroom military studies in the third freshman quarter, registration is required in a selected three-credit or five-credit course in another department. The list of courses

from which this substitute course may be selected is printed in the *Yearly Time Schedule*. Classroom military studies for sophomores require two hours per week throughout the academic year.

Information concerning the Naval Science ROTC program can be found in the bulletins of the College of Arts and Sciences, the College of Business Administration, and the College of Engineering.

Exemptions from the military requirement are granted to:

1. Students who are twenty-three or over at the time of original entry into the University.
2. Students who enter as juniors or seniors.
3. Special students.
4. Students registered for 6 credits or less.
5. Students who are not citizens of the United States.
6. Students who, because of physical condition, are exempted by the University Health Officer.
7. Students who have equivalent military service. Complete or partial exemptions, depending on length of service, are granted for previous active service in the Armed Forces or Coast Guard.
8. Students who are active members or reserve officers of the Armed Forces or Coast Guard, or commissioned officers of the National Guard.
9. Students who are active enlisted members of the National Guard or of the Organized Reserve of the Armed Forces or Coast Guard.
10. Transfer students who present acceptable credit for military training taken in other colleges. The amount of exemption depends on the amount of previous training. Transfer students are required to take military training only for the number of quarters they need to achieve junior standing by a normal schedule.
11. Students who seek exemptions on grounds other than specified above, and whose petitions for exemption are first processed by the Office of the Dean of Students, and then approved by the Dean of the College after consultation with the appropriate ROTC commander.

Those who are exempted under paragraph 5 or 11 must arrange at the time of initial entrance to substitute equivalent extra credits in other University courses to equal the number of credits they would have been required to earn in military training courses.

PHYSICAL AND HEALTH EDUCATION

Activity Courses. Students who enter the University as freshmen are required to complete one physical education activity course each quarter for the first three quarters of residence. In fulfilling the foregoing requirement, *all* students must pass a swimming test or satisfactorily complete one quarter of swimming. In fulfilling the three-quarter requirement, no activity course may be repeated for credit.

Men students may use credits earned in freshman or varsity sports to satisfy the activity course requirement.

Women students, in fulfilling the three-quarter requirement, may take a maximum of two credits in any of the following: (1) swim area; (2) dance area; (3) tennis and badminton; (4) any other specific individual, dual, or team activity.

The following students are exempt from the requirement of activity courses:

1. Students who have attained the age of twenty-five. A student who attains the age of twenty-five during a quarter in which he is registered for a required physical education activity course shall be held for the completion of that course. This rule shall not be retroactive in its application to students who entered prior to Spring Quarter, 1951, and were exempted from required physical education courses under previous rules.
2. Students who enter as sophomores, juniors, or seniors.

3. Special students.

4. Students registered for 6 credits or less.

5. Students who because of physical condition are exempted by the Graduation Committee upon the recommendation of the Dean of the College. Such action will be taken only when the Dean has received a joint recommendation for exemption from the University Health Officer and the Executive Officer of the Department of Physical Education for Men or for Women, whichever is appropriate. All other students who are reported by the University Health Officer as physically unfit to join regular classes will be assigned by the Executive Officer of the Department of Physical Education for Men or for Women to special programs adapted to their needs.

6. Students who are veterans of military service. Complete exemption is granted for one year or more of active duty. This exemption does not grant credit. Veterans with less than one year of service receive no exemption.

7. Transfer students who present acceptable credit for physical education activity courses taken in other colleges. The amount of exemption depends on the number of quarters for which credit is transferred.

Health Courses. All men students who enter the University as freshmen are required to take Health Education 175, a course in personal health, within the first three quarters of residence. The health education course requirement may be satisfied by passing a health-knowledge examination. Successfully passing this test exempts the student from the requirement but does not grant credit for Health Education 175. Veterans with one year or more of active service are exempt from this requirement. This exemption does not grant credit.

Women students who enter the University as freshmen are required to take Health Education 110 within the first three quarters of residence. Women entering the University for the first time may satisfy this requirement by passing a health-knowledge examination given during the Autumn Quarter registration period. Successfully passing this test exempts the student from the requirement but does not grant credit for Health Education 110.

TUITION AND FEES

All tuition and fees are payable at the time of registration. The University reserves the right to change any of its fees without notice.

Principal fees for each quarter (Autumn, Winter, and Spring) are listed below. Summer fees are listed in the *Summer Quarter Bulletin*.

Tuition

Resident students, per quarter	\$35.00
--------------------------------	---------

A resident student is one who has been domiciled in Washington for at least a year immediately prior to registration. The domicile of a minor is that of his parents.

Nonresident students, per quarter	105.00
-----------------------------------	--------

Prospective students are classified as nonresidents when their credentials come from schools outside Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

Auditors, per quarter	12.00
-----------------------	-------

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

Incidental Fee, per quarter

Full-time resident students	27.50
Part-time resident students (registered for 6 credits or less, exclusive of ROTC)	10.00
Full-time nonresident students	52.50
Part-time nonresident students (registered for 6 credits or less, exclusive of ROTC)	35.00
Auditors do not pay an incidental fee; there are no other exemptions.	

ASUW Fees

Membership, per quarter	8.50
Optional for auditors and part-time students.	
Athletic admission ticket (optional for ASUW members)	3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters only, \$3.50; Spring Quarter only, \$3.50.	

Military Uniform Deposit 25.00

Paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.

Pack Forest Fee 10.00

Paid in Summer Quarter when course is taken at Pack Forest.

Pack Forest Subsistence Fee 130.00

Approximate charge for meals during the quarter spent at Pack Forest.

Breakage Ticket Deposit 3.00

Required in some laboratory courses; ticket is returnable for full or partial refund.

Locker Fee, per quarter 1.50

Required of men students taking physical education activities.

Grade Report Fee .50

One grade report is issued at the end of each quarter without charge; the fee, payable in advance, is charged for each additional copy.

Transcript Fee 1.00

One transcript is furnished without charge; the fee, payable in advance, is charge 1 for each additional copy.

Graduation Fee 10.00

SPECIAL FEES

A registration service fee of \$15.00 is charged those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by in-person Registration by action of the Registration Appeal Board. A late registration fee of \$15.00 is charged any student granted permission to register after the last registration day before the opening of Autumn, Winter, and Spring Quarters by action of the Registration Appeal Board. A fee of \$5.00 is charged Autumn, Winter, and Spring Quarters for each change of registration, or change

of section, or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University. The fee for a special examination is \$1.00, and for removal of an Incomplete, \$2.00. A fee of \$5.00 is charged each student entering with less than 45 credits, who has not previously taken the Washington Pre-college Differential Guidance (Grade Prediction) Test.

PHYSICAL EDUCATION ACTIVITY FEES, per quarter are: bowling, \$5.00; canoeing, \$3.00, golf instruction, \$1.50.

REFUND OF FEES

All major fees will be refunded in full if complete withdrawal is made during the first three calendar days of the quarter; one-half the amount will be refunded if withdrawal is made during the first thirty calendar days. Fee refunds are not made to students withdrawing under discipline.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund of fees, if payment was made by check.

ESTIMATE OF YEARLY EXPENSES

The figures given below are minimum estimates for an academic year, which includes Autumn, Winter, and Spring Quarters. Living costs and personal expenses vary widely with the needs of the individual student.

Tuition, Incidental, and ASUW Membership Fees

Full-time resident student	\$213.00
Full-time nonresident student	498.00

<i>Athletic Admission Ticket</i> (optional)	6.50
---------------------------------------------	------

<i>Health and Accident Insurance</i> (optional)	16.50
-------------------------------------------------	-------

<i>Special Fees and Deposits</i>	38.50
----------------------------------	-------

Military uniform deposit, breakage ticket, and locker fees.

<i>Books and Supplies</i>	90.00
---------------------------	-------

Board and Room

Room and meals in Men's Residence Halls	675.00
-----------------------------------------	--------

Room and meals in Women's Residence Halls	615.00-720.00
-------------------------------------------	---------------

Room and meals in fraternity or sorority house (Including dues and social fees.)	670.00-760.00
-------------------------------------------------------------------------------------	---------------

Initial cost of joining is not included; this information may be obtained from the Interfraternity or Panhellenic Council.

<i>Personal Expenses</i>	300.00
--------------------------	--------

STUDENT ACTIVITIES AND SERVICES

ASSOCIATED STUDENTS

Membership in the Associated Students of the University of Washington, the central organization which conducts all student activities, is required of all regularly enrolled students. Through the ASUW Board of Control and its various committees and boards, students assume major responsibility in the government of student life. The ASUW helps to finance the programs of athletics, debates, concerts, lectures, and many other activities and facilities, including the University of Washington *Daily* and the Student Union Building.

FOREST CLUB

The Forest Club, founded in 1908, is an organization of students in the College of Forestry. Through the club, students and faculty members cooperate to keep in touch with current developments in forestry and lumbering and the leaders in these fields, and to interest the public in the College and in the forestry problems of the state. Club meetings feature prominent speakers and educational films. The club sponsors an all-day field event, called Garb Day, an annual formal dance, and an annual banquet, which is attended by representatives from nearly every field of forestry.

The Forest Club is affiliated with the Association of Western Forestry Clubs, a student-sponsored organization fostering inter-forest school cooperation among the eight accredited institutions in the western United States. A major project of this organization is the sponsorship of an annual Conservation Week to promote conservation through education.

Each year, Forest Club members work with the King County Forest Committee in conducting tree-farm tours for school children in the county. Serving as guides, students transmit their classroom and field-acquired knowledge to the younger generation so that America's junior citizens may appreciate the philosophy of conservation and wise use of the forest resource.

XI SIGMA PI

Organized at the University of Washington in 1908, Xi Sigma Pi is the oldest and largest national forestry honorary fraternity in the United States. It has chapters in nearly all the leading forestry schools in the country. At the University of Washington, Alpha Chapter encourages a high standard of scholarship in forestry education, the advancement of the profession, and fraternal relations among workers in forest activities.

Xi Sigma Pi requires a grade-point average of at least 3.00 for six quarters in residence at the College of Forestry.

The growth of Xi Sigma Pi is reflected in a membership list of more than 1,500, a list that includes names familiar to foresters throughout the country.

AWARDS AND LOANS

The University offers a number of awards for outstanding academic achievement. Some are given by the University, and many others are available through the generosity of friends and alumni. A handbook listing the current awards is available from the Office of the Dean of Students.

A number of scholarships and awards are specifically for students in the College of Forestry. These are:

1. **AGNES HEALY ANDERSON RESEARCH FELLOWSHIP.** Awarded a graduate student. Amount variable, depending on availability of funds and need.

2. **BILES-COLEMAN LUMBER COMPANY SCHOLARSHIP.** Awarded a graduate of Omak High School ranking in the upper half of his class and with an interest in forestry. Amount, \$500 a year for a four-year period.

3. **EDWARD K. BISHOP SCHOLARSHIP.** Amount \$500.

4. **J. H. BLOEDEL FORESTRY RESEARCH AND SCHOLARSHIP AWARD.** Amount (approximately \$1,000 annually) and number of grants variable; available to both graduate and undergraduate students.

5. **CROWN ZELLERBACH FOUNDATION SCHOLARSHIP.** Awarded a junior or senior in the College of Forestry; \$500.

6. **U. M. DICKEY SCHOLARSHIP.** Established by the Scott Paper Company, \$500 to \$1,000 annually for a two-year period to the outstanding student completing the sophomore year.

7. **CUSTOMERS OF THE ELLIOTT BAY LUMBER COMPANY SCHOLARSHIP.** One to a forest products major, one to a logging engineering major, and one to a forest

management major at the completion of the junior year for the senior year; three at \$500 each.

8. **HOMELITE CORPORATION AWARD.** Awarded outstanding students of forestry; amount, \$250 to \$500.

9. **PAUL H. JOHNS, JR., MEMORIAL AWARDS.** Awarded the outstanding junior and senior student; \$200 each.

10. **R. D. MERRILL FORESTRY RESEARCH AND SCHOLARSHIP AWARD.** Amount (approximately \$1,000 annually) and number of grants variable; available to both graduate and undergraduate students.

11. **MILL EQUIPMENT, INC. SCHOLARSHIP.** A scholarship for a student who has completed the Summer Quarter at Pack Forest; \$250.

12. **NORTHERN COMMERCIAL COMPANY SCHOLARSHIP.** Awarded a junior, senior, or graduate student; \$500.

13. **LAWRENCE OTTINGER FOREST PRODUCTS FELLOWSHIP.** Award of \$1,000 annually to a graduate student in forest products with interests in plywood, wood particle board, adhesives, or allied fields.

14. **RAYONIER FOUNDATION SCHOLARSHIP.** Annual grant to a graduate student in forestry; \$1,000.

15. **SEABOARD LUMBER COMPANY SCHOLARSHIP.** An annual award available to both undergraduate and graduate students; \$300.

16. **ST. REGIS PAPER COMPANY SCHOLARSHIP.** An amount of \$800 annually for a two-year period awarded an outstanding forestry student completing the sophomore year at the University of Washington, Oregon State College, University of Idaho, or University of Montana.

17. **UNIVERSITY OF WASHINGTON FORESTERS' ALUMNI ASSOCIATION SCHOLARSHIPS.** Awarded two outstanding high school seniors who are residents of the state of Washington and interested in majoring in forestry at the University of Washington. Two to be awarded at \$250 each.

18. **WASHINGTON BANKERS ASSOCIATION SCHOLARSHIP IN FORESTRY.** Awarded to outstanding high school seniors dedicated to the study of forestry at University of Washington; \$250.

19. **WEYERHAEUSER FELLOWSHIP IN FOREST MANAGEMENT.** Presented graduate students; two at \$2,000 each.

20. **HUGO WINKENWERDER GRADUATE FELLOWSHIP.** An annual award of \$1,000 given a graduate student in forestry.

21. **HUGO WINKENWERDER MEMORIAL SCHOLARSHIPS.** Awarded outstanding high school seniors dedicated to the pursuit of forestry at the University of Washington; six at \$200 each.

Further information on these awards may be obtained from the College of Forestry.

Two annual essay contests are open to forestry students. The Western Forestry and Conservation Association sponsors a contest each spring for juniors in the forestry schools of the West, with a first prize of \$100 and a second prize of \$75, plus a trip to the autumn conference of the association. The Pack Essay Contest, which is open to all students in the College, offers prizes of \$25, \$15, and \$10.

Loans for emergency purposes may be made to students in the College of Forestry through the Agnes H. Anderson Student Loan Fund. Information about the fund is available at the College of Forestry. Other emergency loans are made through the Office of the Dean of Students.

The University of Washington awards 100 tuition scholarships each academic year to worthy students from other countries. There are no scholarships available for the Summer Quarter. These awards are made on the basis of the academic record of the student, recommendations from his professors, his need for such assistance, and the availability of such openings in his department at the Univer-

sity. These scholarships cover tuition only and are administered by the Foreign Exchange Scholarship Committee, Foreign Students Office, University of Washington, Seattle 5, Washington, U.S.A. Application for these scholarships must be made by March 1 for the following year.

OFFICE OF THE DEAN OF STUDENTS

The Office of the Dean of Students is concerned with the general welfare of students and welcomes correspondence and conferences with both parents and students. This Office works closely with the advisory system of the colleges and schools of the University; it directs students to faculty advisers, the Counseling Center, and other persons and agencies offering information and assistance with personal and social problems. The Dean of Students Office also has current information on Selective Service regulations.

The Foreign Students Office operates through the Office of the Dean of Students. The Foreign Adviser and his staff offer guidance on all nonacademic problems to students from other countries. Questions about immigration regulations, housing, social relationships, personal problems, finances, minimum course requirements, and employment should be referred to this Adviser. Students who are interested in study abroad may obtain from him information about schools in other countries and about Fulbright and other scholarships.

COUNSELING CENTER

The Counseling Center in Lewis Hall Annex offers vocational and educational counseling to students who need help in their adjustments to college. The staff of the Center, which includes vocational counselors and psychologists, works closely with other student services and supplements the academic advisory program.

HOUSING

Information and applications for residence in University-owned housing for single persons may be obtained by writing to the Manager, Men's Residence Halls, 1201 Campus Parkway, Seattle 5, or to the Manager, Women's Residence Halls, University of Washington, Seattle 5. Preference in assignment to vacancies is given to students under twenty-one years of age until August 1; thereafter assignments are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

University regulations require that women students under twenty-one who do not live at home must live in approved group residences such as the Women's Residence Halls, sororities and church-sponsored living groups. Other types of living arrangements must be reported to the Dean of Women and be approved by the student's parents or guardian.

Information about fraternities or sororities may be obtained by writing to the Interfraternity Council or the Panhellenic Council, Student Union Building, University of Washington, Seattle 5.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings must, however, be consulted in person.

Teaching and research assistants and other part-time sub-faculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 23 Administration Building, for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

HEALTH SERVICES

The University maintains a health center and infirmary to help guard against infectious diseases and incipient ill health.

The infirmary receives bed patients at any hour and provides nursing care, medicines, and the attendance of a staff doctor up to one week each quarter free of charge. For a period longer than one week a charge of \$2.00 a day is made. At their own expense, infirmary patients may consult any licensed physician in good standing.

EMPLOYMENT

Part- and full-time work off campus may be obtained through the University Placement Office, Lewis Hall Annex. Applications are accepted from students or graduates of the University and from the wives or husbands of University students. Application must be made in person after residence in Seattle has been established. Placement in jobs on the campus is handled by the Personnel Department and the ASUW Personnel Office.

The College of Forestry faculty helps forestry students to obtain summer employment while in the University and permanent employment upon graduation. Summer work is usually available through the United State Forest Service, Bureau of Land Management, and National Park Service, the State Department of Natural Resources, and a number of companies in the forest and lumber industries. Many of these agencies and companies send representatives to the College during Winter Quarter to interview prospective employees. All students are encouraged to seek summer employment, because such work offers an excellent opportunity for practical experience as well as financial help.

FORESTRY ALUMNI ASSOCIATION

Graduates of the College of Forestry are members of the Washington Foresters' Alumni Association. The yearly dues are \$2.00. Members receive the *Washington Forester*, which is published annually, and the Alumni Directory. An annual alumni reunion is held each spring either at Pack Forest or at the College of Forestry in conjunction with the annual Forest Club Banquet.

THE PROGRAMS IN FORESTRY

THE PROGRAMS IN FORESTRY

THE COLLEGE OF FORESTRY offers courses leading to the degrees of Bachelor of Science in Forestry, Master of Forestry, Master of Science in Forestry, and Doctor of Philosophy. Curricula leading to these degrees are accredited by the Society of American Foresters.

BACHELOR OF SCIENCE IN FORESTRY

For undergraduate students working toward the bachelor's degree, specialization is offered in forest management, logging engineering, and forest products. Students must meet certain general requirements of the University and the College as well as the particular curriculum requirements which are described in the announcements below. General requirements for the bachelor's degree include military training, physical education, scholarship and minimum credits, course requirements, and senior-year residence.

Students should apply for bachelor's degrees during the first quarter of the senior year. If not more than ten years have elapsed since the date of a student's entry into the school or college in which he is to graduate, he may choose to graduate under the requirements set out in either the bulletin published by the appropriate school or college most recently prior to the date of his entry, or that published most recently prior to his anticipated date of graduation; provided, that when, in the opinion of the faculty of the school or college or a departmental executive officer or a dean acting for such faculty, substantial changes have been made in the curriculum since the student's entry, the student's choice shall be subject to the approval of the appropriate faculty, executive officer, or dean. Disapproval of the student's choice shall be faculty action and subject to the procedures of the Faculty Code. All responsibility for fulfilling graduation requirements shall rest with the student concerned. No student whose standing is in any way provisional can have an application for degree accepted.

ADVANCED DEGREES

Students who intend to work toward an advanced degree must apply for admission to the Graduate School and meet the requirements set forth by the Graduate School and the College of Forestry. *Graduate students must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.* The Master of Forestry, Master of Science in Forestry, and Doctor of Philosophy degrees are conferred by the Graduate School through the College of Forestry.

Master of Forestry. To qualify for the Master of Forestry degree, the candidate must have a bachelor's degree in forestry. Supporting course work is taken mainly in the field of forestry. Only 400- and 500-numbered courses or those listed in the *Graduate School Bulletin* are acceptable. A foreign language is not required.

Master of Science in Forestry. To qualify for the Master of Science in Forestry degree, the candidate must have a bachelor's degree in forestry or equivalent. A minor in science, constituting one third of the required course work is required in support of the forestry major. Only 400- and 500-numbered courses or those listed in the *Graduate School Bulletin* are acceptable. Candidates admitted with a forestry-equivalent bachelor's degree ordinarily require a minimum of two years to complete the degree. A foreign language is not required.

Doctor of Philosophy. General requirements are listed in the *Graduate School Bulletin*. Additionally, doctoral candidates in forestry are required to pass the language examinations for this degree within the first academic year beyond the master's degree or two academic years beyond the baccalaureate degree; whichever has preceded the doctoral candidacy.

COURSE-NUMBERING SYSTEM

Courses numbered from 100 through 299 are lower-division courses, for freshmen and sophomores; those numbered from 300 through 499 are upper-division, for juniors and seniors.

Courses numbered 500 and above are intended for and restricted to graduate students. Some courses numbered in the 300's and 400's are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the College of Forestry and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only; approved 400-level courses are accepted as part of the major. For a listing of approved 300- and 400-numbered courses, consult the *Graduate School Bulletin*.

Undergraduate students of senior standing who wish to register for a 500-level course must obtain permission from both the instructor of the class and the Dean of the Graduate School.

The number in parentheses following the course title indicates the amount of credit each course carries. In most lecture courses a credit is given for each class hour a week during a quarter; laboratory courses generally carry less credit than the work time required. An asterisk in place of a credit number means that the amount of credit is variable. Hyphens between course numbers mean that credit is *not* granted until the series of courses is completed.

Courses to which the letter J is appended are joint courses in two or more departments and as such grant credit in one of the departments.

Not all of these courses are offered every quarter. Final confirmation of courses to be offered, as well as a list of times and places of class meetings, is given in the *Yearly Time Schedule*.

CURRICULA

The lower-division curriculum is the same for all forestry students. Requirements for the first two years in the College are as follows:

First Year			
FIRST QUARTER	CREDITS	SECOND QUARTER	CREDITS
For. 101 Development.....	3	For. 130 Elem. Fire Control	3
Botany 114 Forestry		Botany 115 Forestry	
Botany	3	Botany	3
English 101 Composition ..	3	Chemistry 100 or 110	
Gen. Engr. 101 Engr.		General	4-3
Drawing	3	Gen. Engr. 121 Plane	
Math. 104 Plane		Surveying	3
Trig.	3	Math. 155 Algebra &	
Phys. Educ. activity	1	Calculus	3
ROTC	2-3	Phys. Educ. activity	1
		ROTC	2-3
	<hr/> 18-19		<hr/> 18-20

The summer quarter program at Pack Forest is required of all Forestry students after the completion of the freshman year.

Summer Quarter**(Pack Forest)**

	CREDITS
For. 120 Intro. to Forest Ecology	5
For. 140 Forest Surveying	5
For. 161 Mensuration Field Problems	5
	<hr/> 15

Second Year

FIRST QUARTER	CREDITS	SECOND QUARTER	CREDITS	THIRD QUARTER	CREDITS
For. 202 Dendrology	3	For. 206 Wood Technology ..	4	For. 203 Dendrology	3
For. 260 Mensuration	5	Botany 216 Physiology of Seed Plants	4	For. 210 Elem. Forest Soils	3
English 102 Composition ..	3	Economics 211 General ..	3	For. 240 General Logging ..	2
Physics 101 and 107		Physics 102 and 108		For. 273 Major Forest Industries	4
General	5	General	5	Physics 103 and 109	
ROTC	2-3	ROTC	2-3	General	5
				ROTC	2-3
	<hr/> 18-19		<hr/> 18-19		<hr/> 19-20

With the approval of their faculty advisers, third-year students choose a specialty and enter one of the three upper-division curricula in forestry.

CURRICULUM IN FOREST MANAGEMENT**Third Year**

FIRST QUARTER	CREDITS	SECOND QUARTER	CREDITS	THIRD QUARTER	CREDITS
For. 310 Gen. Forest Soils ..	4	For. 321 Silvics	3	For. 322 Silvicultural Methods	3
For. 403 Timber Physics ..	3	For. 372 Seasoning & Preservation	2	For. 335 Insect Control ..	3
English 253 Factual Writing	3	For. 465 Forest Photo Interpretation	3	For. 430 Adv. Fire Control	3
Approved electives	5	Zoology 204 Forestry Zoology	5	Botany 361 Forest Pathology	5
	<hr/> 15	Approved electives	2	Approved electives	1
			<hr/> 15		<hr/> 15

Fourth Year

FIRST QUARTER	CREDITS	SECOND QUARTER	CREDITS	THIRD QUARTER	CREDITS
For. 423 Application of Silvicultural Methods ..	3	For. 408 Economics & Finance	5	For. 466 Field Studies	5
For. 460 Forest Management	5	For. 409 Forest Policy & Administration	3	For. 467 Field Studies	5
Approved electives	6	Approved electives	7	For. 468 Field Studies	4
	<hr/> 14		<hr/> 15	For. 469 Field Studies	2

COURSES FOR UNDERGRADUATES

- 101 Development of Forestry (3)** **Schaeffer**
History of forestry and its present status in the United States. Orientation course required of all freshman forestry students; not open to others.
- 120 Introduction to Forest Ecology (5)** **Scott**
An elementary study of the ecology of forest communities. Particular emphasis on field investigations of succession and development as related to different environments. (Given only at Pack Forest.)
- 130 Elementary Forest Fire Control (3)** **Schaeffer**
Factors influencing spread of forest fires. Methods of forest fire prevention, presuppression, detection, and suppression. Prerequisite, 101 or 301.
- 140 Forest Surveying (5)** **Thomas**
Plane surveying with special emphasis on forest topographic mapping, including establishment of ground control through the use of the compass, Abney level, transit, level, steel tape, trailer chain and tape and pacing. Prerequisite, General Engineering 121. (Given only at Pack Forest.)
- 160 Elementary Forest Mensuration (5)** **Turnbull**
The analysis and interpretation of forestry data through the use of statistical methods; fundamentals of forest measurements. Prerequisite, Mathematics 155.
- 161 Field Problems in Forest Mensuration (5)** **Turnbull**
Field problems, including tree and timber stand measurement, site, tree form, and volume tables, timber cruising methods, log scaling, forest mapping, and growth investigations. Prerequisites, 160, General Engineering 101, 121, and Mathematics 156. (Given only at Pack Forest.)

- 202, 203 Dendrology (3,3)** **Brockman**
Identification, classification, and distribution of the trees of North America. Prerequisite: Botany 114.
- 206 Wood Technology (4)** **Erickson, Thomas, Leney**
The identification, uses, and basic physical and chemical properties of domestic and some foreign woods; natural moisture in wood; the effect of moisture changes on shrinking and swelling; calculations of moisture content, specific gravity and dimensional change. Prerequisites, 202, Botany 115, 10 credits in chemistry, and Physics 101 and 107.
- 210 Elementary Forest Soils (3)** **Campbell**
Rocks and minerals as parent materials for soils; relation of soils to geology and physiography; physical properties of soils. One Saturday field trip required.
- 240 General Logging (2)** **Stenzel**
Regional logging methods in the United States with emphasis on those used in the Pacific Northwest. Prerequisites, 202, 203.
- 260 Forest Mensuration (5)** **Turnbull**
Theory of log rules, volume tables, and yield tables. Measurement, computations, and analysis of tree and timber stand volume, structure, increment, and yield. Prerequisite, 161.
- 273 Major Forest Industries (4)** **Thomas**
Fundamentals of processing and distributing the primary forest products; role of major forest industries in the economic structure of the Pacific Northwest.
- 301 Survey of Forestry (3)** **Brockman**
History of the development of forestry, its aims and objectives; interrelationship between forestry and other phases of land use. For nonmajors.
- 307 Wood Structure (3)** **Leney**
Microscopic study of the structural features of wood. Identification of wood and wood fibers by microscopic methods. Prerequisite or concurrently, 206, Botany 216.
- 310 General Forest Soils (4)** **Gessel**
Study of chemical, biological, and morphological characteristics, and a laboratory study of physical properties, of forest soils. Consideration of soil properties important to tree growth. Introduction to soil development and classification. Prerequisites, 210, Botany 216.
- 320 Elements of Silviculture (3)** **Scott, Campbell**
The fundamentals of silvics and silviculture. Emphasis is placed on methods of controlling wood quality and quantity through silvicultural practice. For forest products students only. Prerequisites, 120, 210, 260, Botany 216.
- 321 Silvics (3)** **Scott, Campbell**
A study of forest ecology and the silvicultural characteristics of forest trees. Includes environmental factors, forest influences, the establishment, development and general characteristics of trees and stands. Prerequisites, 120, 310, Botany 216.
- 322 Silvicultural Methods (3)** **Scott**
The theory and technique of applying silvical knowledge in controlling establishment, composition, and growth of forest stands. Includes reproduction methods, intermediate cuttings, and techniques for controlling cutting. Prerequisites, 260, 321.
- 335 Forest Insect Control (3)** **Brockman**
Forestry practice in the control of insect attacks. Prerequisite, 320 or 322.
- 350 Wildlife Management (3)** **Brockman**
Interrelations between forests and wildlife; life histories and habits of animals involved. Prerequisites, junior standing and permission.
- 353 Range Management (3)** **Campbell**
Interrelations of plants, animals, and man on range lands. History of range-land use, principles and economics of proper use. One Saturday field trip required. (Offered alternate years; offered 1960-61.)
- 356 Forest Recreation (3)** **Brockman**
Recreational needs, values, resources, and objectives; planning and development of outdoor recreational resources. Prerequisites, 101 or 301, junior standing, and permission.
- 370 Wood Preservation (3)** **Erickson**
Wood-destroying agencies; semi-color classification and manner of attack. Theory of preservation; the important preservatives; pressure and nonpressure treating processes. Fire-retardant treatments, coatings and impregnation. Prerequisite, 307.
- 371 Wood Preservation Laboratory (2)** **Erickson**
Evaluation of preservatives; analysis of preservatives; specifications for treated wood products; testing and inspection. Field trips to nearby commercial treating plants. Must be preceded or accompanied by 370.
- 372 Seasoning and Preservation (2)** **Leney**
The elementary principles and practices of drying and treating wood with major emphasis on methods of air seasoning and nonpressure treating of wood suitable for home use and small-scale operations. Prerequisite, 206.
- 380 Lumber Grading (2)** **Thomas**
The principles of lumber grading and grade use with emphasis on softwood lumber grades. Hardwood and shingle grades included. Regular field trips. Prerequisites, 206, 273, 403 or 404.
- 401 Safety Practices in Forest Industries (2)** **Pearce**
Accident costs and frequency rates; accident investigations; safety inspection; safety organization and program. Prerequisite, senior standing or permission.

- 403 Timber Physics (3)** **Bryant**
The mechanical properties of wood; factors which affect its strength characteristics; introduction to graphic analysis of design problems; simple beam design. For forest management students only. Prerequisites, 160, 206, Mathematics 156, and Physics 101 and 107.
- 404 Timber Physics (5)** **Bryant**
The mechanical properties of wood; factors which affect its strength characteristics; graphic analysis of design problems; beam design; timber testing. Prerequisites, 160, 206, Mathematics 156, and Physics 101 and 107.
- 406 Microtechnique (3)** **Leney**
The technique of preparing, sectioning, staining, and mounting woody tissues and fibers for microscopic study. Prerequisite, 307, or permission.
- 407 Forest Economics (2)** **Turnbull**
A survey of the field of forest economics. Application of economic principles to forestry; economics of forest production and stumpage appraisal techniques. For forest products majors. Prerequisites, 260 and Economics 211.
- 408 Forest Economics and Finance (5)** **Turnbull**
Position of forests in the economic structure; cost of growing timber; valuation of land for forest production; stumpage appraisal techniques; problems of forest taxation; labor-management relations in the forest industry. Prerequisites, 260, 460, and Economics 211.
- 409 Forest Policy and Administration (3)** **Marckworth**
Development of the attitude of the federal government and the states toward forests, and the general methods of administering public interest in forests; the development of private forestry in the United States. Prerequisite, senior standing.
- 410 Advanced Forest Soils (3)** **Gessel**
A laboratory study of physical, chemical, and biological properties of forest soils. Prerequisites, 310 and permission.
- 423 Application of Silvicultural Methods (3)** **Scott**
A study of the application of silvicultural methods to the important forest species, types, and regions of North America. Prerequisites, 202, 203, 322.
- 424 Advanced Silviculture (3)** **Scott**
A detailed discussion of special problems or subjects in silviculture of interest to advanced students. Prerequisite, permission.
- 430 Advanced Forest Fire Control (3)** **Schaeffer**
Presuppression; suppression; training methods; analysis of protection facilities; proper methods of slash disposal and hazard removal; fire behavior; organization for large fires. Prerequisite, 130.
- 440 Construction (4)** **Stenzel**
Design and construction of forest roads; earth-moving methods and costs, explosives, surfacing, drainage. Laboratory: design of timber bridges. Prerequisites, 140, 403 or 404, and General Engineering 101.
- 441 Forest Engineering (5)** **Pearce, Stenzel**
Logging planning: road projection, selection of landings and settings, logging cost control. Land surveying, subdivision, platting, and boundaries. Prerequisites, 322, 440.
- 442 Logging Engineering (5)** **Pearce**
Logging machinery and equipment; application problems, with emphasis on motor truck performance. Field trips to logging equipment factories. Prerequisites, 240, 441.
- 446, 447, 448, 449 Logging Engineering Field Studies (3,5,5,3)** **Pearce, Stenzel**
446: logging plans. 447: topographic and timber surveys. 448: road location. 449: cost estimates and reports. Development of a complete logging plan for a timber tract. Courses given consecutively in Spring Quarter. Prerequisites, 442, Civil Engineering 213 and 315, or Forestry 465.
- 455 Forest Influences (4)** **Gessel, Scott**
A study of the effects of vegetation on climate, water and soil, with application to the conservation of water and soil and the control of floods. Fundamentals of watershed management are stressed. Prerequisite, permission.
- 460 Forest Management (5)** **Robertson**
Economic and technical principles involved in the management of federal, state, and private forest lands. Emphasis is placed on principles of forest management applied to integrated use of all forest resources. Techniques used in timber inventories and management plans for continuous production of forest crops. Prerequisite, senior standing.
- 461 Forest Management (3)** **Robertson**
Survey of the field of forest management. A comprehensive course in the general principles of forest management. For forest products majors. Prerequisite, 407.
- 465 Forest Photo Interpretation (3)** **Robertson**
The use of aerial photographs in mapping vegetation types and estimating timber volumes. Construction of aerial photomosaics. Use of aerial photographs in fire control and range and timber management. Allocation of cut; logging road location; construction of planimetric and topographic maps from vertical photographs. Prerequisites, 260 and permission.
- 466, 467, 468, 469 Senior Management Field Studies (5,5,4,2)** **Robertson**
466: surveys, use of aerial photographs in mapping forest types and estimating timber volumes. Application of statistical methods to cruising. 467: forest and land inventory in pine and fir regions. 468: growth and yield studies, permanent sample plots. 469: reports and summary of work accomplished by field studies. Course leads to development of a working plan for a large operation. All four courses are taken during the same quarter, and the entire quarter is spent off campus in a logging camp. Prerequisite, 460.

- 470 Forest Products Industries (5)** **Erickson**
Wood products other than lumber, plywood, and pulp. Derived and miscellaneous forest products. Economic and industrial aspects of forest products. Laboratory experiments and field trips. Prerequisite, 307.
- 471 Timber Design (3)** **Bryant**
Design of solid and laminated beams; design of trusses using timber connectors, bolts and other fastenings; column design; laminated arches. Prerequisite, 403 or 404.
- 472 Plywood, Lamination, and Glues (5)** **Bryant**
Techniques of manufacturing plywood and laminated wood; theory of adhesion, modern wood adhesives, gluing problems. Laboratory emphasizes student familiarization with glues and gluing techniques, individual research problems, visits to plywood and laminating operations. Prerequisites, 307 and 404.
- 476 Wood Pulp (6)** **Leney**
The preparation of wood for pulp manufacture; production of mechanical and chemical pulp; practical problems in the operation of pulp and paper mills. Prerequisites, 206 and 307.
- 478 Advanced Wood Technology (5)** **Erickson, Bryant**
The physical and chemical nature of wood; its colloidal properties as related to its physical and mechanical behavior in its solid and transmuted forms. Prerequisites, 370, 470, 472, 483.
- 481 Milling (5)** **Thomas**
The sawmilling process with emphasis on modern milling practice, sawmill layout, plant engineering, and mill management. Prerequisites, 206, 273, and 403 or 404.
- 482 Manufacturing Problems (5)** **Thomas**
Distribution and marketing of lumber, plywood, pulp, and other forest products; inter-regional and intra-industry competition; industry problems. Prerequisites, 470, 472, 481.
- 483 Theory and Practice of Kiln Drying (3)** **Thomas**
Wood-liquid relationships and hygrometry; application of gas laws. Problems in the design of dry kilns. Prerequisites, 206 and 470.
- 484 Forest Products Field Studies (2)** **Thomas**
Two-week field study of the forest products industry of the Northwest. Prerequisite, senior standing in forest products.
- 485 Forest Products Seminar (2)** **Staff**
Reports by students and outside speakers on topics of current interest in forest products; discussion of special problems and field trips. Prerequisites, senior standing in forest products.
- 490, 491, 492 Undergraduate Studies (1-5, 1-5, 1-5)** **Staff**
Preparation for work in fields for which there is not sufficient demand to warrant the organization of regular classes. Instructors are assigned according to the nature of the work.
- 495 Research Methods Seminar (3)** **Bryant**
Methods of approaching research problems; conventional statistical techniques which can be adapted to problems in forestry and forest products. Course is designed to improve the student's efficiency as a research worker. Prerequisite, senior or graduate standing.

COURSES FOR GRADUATES ONLY

- 500 Graduate Seminar (1, maximum 10)** **Staff**
Required of graduate students.
- 511 Seminar in Forest Soils (2)** **Gessel**
Prerequisites, 410 and permission.
- 512 Soil Morphology and Classification (3)** **Gessel**
An advanced study of the principles of soil formation and classification; intensive coverage of these principles as applied to the survey and classification of forested lands; the factors of the environment that determine soil properties. Prerequisite, permission.
- 513 Methods of Forest Soil Survey (5)** **Gessel**
A course of field studies to acquaint the student with forest soils of the Northwest and with soil classification and survey philosophies and procedures. Prerequisites, 512 and permission. (Offered alternate years; offered 1961-62.)
- 521 Advanced Silvics (3-5)** **Scott**
A consideration of current literature and topics in forest tree ecology and physiology. Prerequisite, permission.
- 522 Advanced Silviculture (3)** **Scott**
A detailed study of the literature dealing with the more recent applications of silviculture in world forestry. Prerequisite, permission.
- 523 Forest Tree Seed (2)** **Campbell, Scott**
The study of forest tree seed, including structure, development, production, collection, provenance, storage, germination, dormancy, and stimulation. Prerequisite, permission.
- 525 Research Methods in Forest Ecology (2)** **Campbell, Gessel, Scott, Turnbull**
Research philosophies and procedures as applied to forest biological problems. Required of all graduate students in forest management. Prerequisite, permission.
- 527 Forest Genetics (3)** **Campbell**
Tree-improvement breeding theory as related to elementary population genetics, variation in plant populations, and natural and artificial selection. Prerequisite, Biology 451 or permission.

- 541 Advanced Forest Engineering (5)** **Pearce**
Logging organization and management; logging cost analysis and budgeting. Prerequisite, permission.
- 542 Advanced Logging Engineering (3)** **Pearce**
Detailed consideration of problems of logging planning and truck road engineering, including the preparation and field layout of logging plans; location, design, and construction of logging truck roads. Prerequisite, permission.
- 571 Advanced Wood Preservation (3)** **Erickson**
Permeability of wood; theory of penetration; treating plants, their equipment and design. Prerequisites, 370 and 371.
- 572 Wood Chemistry and Analysis (3-5)** **Erickson**
Techniques for analyzing the chemical constituents of wood; the relationships between chemical properties and the structural properties and uses of various species of wood. Prerequisites, 307, 470, Chemistry 232, and permission.
- 573 Wood-Moisture Relations (2-3)** **Erickson**
Theories involved in relationships between wood and varying degrees of moisture content, conditions at fiber saturation point and between fiber saturation and zero moisture content. Prerequisites, 307, 404, and permission.
- 574 Wood-Resin Relations (3)** **Bryant**
The technology of synthetic resins as wood adhesives, wood impregnants, binders, overlays, and surface coatings. Prerequisites, 472 and permission.
- 575 Forest Products Economics (3)** **Thomas**
Economic considerations in planning for profitable and complete utilization of the forest resource under a variety of circumstances. Prerequisites, 482 and permission.
- 590 Graduate Studies (1-5)** **Staff**
Study in fields for which there is not sufficient demand to warrant the organization of regular courses.
- 600 Research (*)** **Staff**
- 700 Thesis (*)** **Staff**

Tutorial study designed to meet individual requirements is available to graduate students in the Graduate Studies courses listed below. Such study may include literature review, field, and laboratory work. The courses are offered in all quarters and credits can vary from 1 to 5. Prerequisites include graduate standing and permission of the instructor. Credits are individually arranged for each course.

- 510 Graduate Studies in Forest Soils (1-5)** **Gessel**
- 515 Graduate Studies in Forest Influences (1-5)** **Gessel, Scott**
- 520 Graduate Studies in Silvics and Silviculture (1-5)** **Scott**
- 526 Graduate Studies in Forest Genetics (1-5)** **Campbell**
- 530 Graduate Studies in Forest Fire Control (1-5)** **Schaeffer**
- 540 Graduate Studies in Logging Engineering (1-5)** **Pearce, Stenzel**
- 550 Graduate Studies in Forest Recreation (1-5)** **Brockman**
- 555 Graduate Studies in Wildlife Management (1-5)** **Brockman**
- 560 Graduate Studies in Forest History and Policy (1-5)** **Marckworth**
- 563 Graduate Studies in Forest Mensuration (1-5)** **Turnbull**
- 565 Graduate Studies in Forest Management (1-5)** **Robertson**
- 566 Graduate Studies in Forest Photogrammetry (1-5)** **Robertson**
- 568 Graduate Studies in Forest Finance and Economics (1-5)** **Turnbull**
- 570 Graduate Studies in Forest Products (1-5)** **Bryant, Erickson, Leney, Thomas**

PREScribed COURSES IN OTHER FIELDS

BOTANY

- 114, 115, 216 Forestry Botany (3,3,4)** **Staff**
114: structure of seed plants. 115: morphology of fungi and reproduction of seed plants. 216: physiology of seed plants. Prerequisites, 114 and Chemistry 150.
- 361 Forest Pathology (5)** **Staff**
Common wood-destroying fungi and diseases of forest trees. Prerequisite, 115 or equivalent.

BUSINESS LAW

- 307 Business Law (3)** **Staff**
For engineering students and others unable to take more than 3 credits in business law. May not be substituted for 201. Not open for credit to business administration students. Prerequisite, permission.

CHEMISTRY

- 100 Chemical Science (5)** **Staff**
Atoms, molecules, and chemical reactions. A survey of principles fundamental to the science of chemistry. Designed both as a terminal course for non-science majors and as an introductory course for those who wish to continue with Chemistry 101 or 140. No credit given to those who have had high school chemistry.
- 101 General Chemistry (5)** **Staff**
For non-science and non-engineering majors who plan to terminate their study of chemistry with 101 or 102. Molecular theory, quantitative relationships in chemical processes, solutions, ionic equilibria, acids, bases, and salts. Prerequisite, high school chemistry or 100.
- 102 General and Organic Chemistry (5)** **Staff**
A terminal course to follow 101. Chemistry of common metals and non-metals. Organic compounds; hydrocarbons, alcohols, aldehydes, ketones, ethers, acids, aromatics, fats and oils, proteins and carbohydrates. Prerequisite, 101.
- 150 General Chemistry (3)** **Staff**
Chemical calculations, solutions, and equilibrium theory. Concurrent registration in 151 is required. Prerequisite, 140.

CIVIL ENGINEERING

- 212 Route Location (3)** **Staff**
Alignment survey problems associated with the location of highways and railways, including preliminary and final location, staking of curves, compensation for curvature and sight distance, and preparation of location maps. Prerequisite, General Engineering 121.
- 213 Earthwork Measurements (3)** **Staff**
Highway and railway grades, profiles, cross sections, earthwork quantities, including shrinkage and swell, and application of the mass diagram to the problems of haul; legal description and estimates. Prerequisite, General Engineering 121.
- 315 Photogrammetry (3)** **Staff**
Application of aerial photography to the fields of engineering, geology, and forestry. Includes characteristics and geometry of aerial photographs, photo interpretation, flight planning and topographic map compilation from ground control and aerial photos. Includes a mapping project of a local area involving the establishment of ground control, flight line location by graphic triangulation, location of topography by use of the stereoscope parallax measuring devices, and vertical sketchmaster. Prerequisite, General Engineering 121 and junior standing; permission for nonengineering students.

ECONOMICS

- 211 General Economics (3)** **Staff**
Condensation of 200. Primarily for engineering and forestry students; other students by permission.

ENGLISH

- 101, 102 Composition (3,3)** **Staff**
Fundamentals of effective exposition; collecting, organizing, and evaluating materials for writing; reading contemporary writings for meaning and form.
- 253 Factual Writing (3) (Required for Forestry Management majors.)** **Staff**
Term papers and reports. Prerequisites for foresters, English 101 and 102.

GENERAL ENGINEERING

- 101 Engineering Graphics (3)** **Staff**
Short course for forestry and art students.
- 121 Plane Surveying and Measurements (3)** **Staff**
Surveying methods; use of the engineer's level, transit, and chain; computations of bearings, plane coordinate systems, areas, stadia surveying for topographic mapping; public land surveys. Emphasis is on physical measurements and problems. Prerequisites, 102 and trigonometry.

MATHEMATICS

- 104 Plane Trigonometry (3)** **Staff**
Trigonometric functions, identities, graphs, logarithms, and solution of triangles. Not open for credit to students who have taken trigonometry in high school. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, and one year of plane geometry.
- 155, 156 Algebra and Calculus (3,3)** **Staff**
Selected topics from college algebra, analytic geometry, and elementary calculus. Intended primarily for nonscience majors who need a brief introduction to calculus. Not open to students who have taken either 105, 124, or 153. Prerequisites, 103 or 104 for 155; 155 for 156.

PHYSICAL AND HEALTH EDUCATION**Health Education**

- 110 Health Education (Women) (2)** **Staff**
Health problems of freshman women. Required of all freshman women; exemption without credit by examination. See page 31.

- 175 Personal Health (Men) (2)** **Staff**
Health information that affords a basis for intelligent guidance in the formation of health habits and attitudes. Required of all freshman men; exemption without credit by examination. See page 31.
- 292 First Aid and Safety (Men and Women) (3)** **Staff**
The student may meet requirements for both standard and advanced American Red Cross first aid certification. Includes safety education in schools. Prerequisite for men, junior standing.

PHYSICAL EDUCATION ACTIVITIES

- 101 through 255 Physical Education Activities (Men) (1 each)** **Staff**
101, adapted activities; 106, handball; 107, basketball; 108, tennis; 109, softball; 110, golf (fee \$1.50 per quarter); 111, track; 112, crew (class), prerequisite, swimming; 114, boxing; 115, gymnastics; 117, wrestling; 118, volleyball; 119, swimming; 121, touch football; 122, badminton; 123, archery; 125, skiing (fee); 126, speedball; 127, bowling (fee); 128, weight training; 129, sailing; 131, beginning, 134, intermediate folk and square dancing; 151, contemporary dance; 154, social dance; 157, canoeing (fee, \$3.00 per quarter); 141, freshman, 241, varsity basketball; 142, freshman, 242, varsity crew, prerequisite, swimming; 143, freshman, 243, varsity football; 144, freshman, 244, varsity track; 145, freshman, 245, varsity swimming; 146, freshman, 246, varsity baseball; 147, freshman, 247, varsity tennis; 148, freshman, 248, varsity golf; 149, freshman, 249, varsity skiing; 150, freshman, 250, varsity volleyball; 152, freshman, 252, varsity gymnastics; 155, freshman, 255, varsity wrestling.
- 111 through 162, 211 through 267 Physical Education Activities (Women) (1 each)** **Staff**
111, adapted activities; 112, basic activities (general); 113-114, basic activities (applied); 115, archery; 118, badminton; 119, body conditioning; 121, bowling (fee); 124, fencing; 126, golf (fee, \$1.50 per quarter); 128, riding (fee); 129, sailing; 131, ski conditioning; 132, elementary skiing (fee); 133, tumbling and apparatus; 134, rebound tumbling; 135, tennis; 141, basketball; 142, field sports; 143, hockey; 144, softball; 145, volleyball; 148, folk and square dance; 149, international folk dance; 151, contemporary dance; 154, social dance; 155, tap dance; 157, canoeing (fee, \$3.00 per quarter); 160, adapted swimming; 161, beginning swimming; 162, elementary swimming; 215, intermediate archery; 218, intermediate badminton; 221, intermediate bowling (fee); 222, advanced bowling (fee); 224, intermediate fencing; 228, intermediate riding (fee); 230, ski racing (fee); 231, intermediate skiing (fee); 232, advanced skiing (fee); 235, intermediate tennis; 248, intermediate folk and square dance; 251, intermediate contemporary dance; 252, advanced contemporary dance; 257, intermediate canoeing (fee, \$3.00 per quarter); 263, intermediate swimming; 264, advanced swimming; 265, aquatic art; 266, diving; 267, lifesaving.

PHYSICS

- 101, 102, 103 General Physics (4,4,4)** **Staff**
Concurrent registration in 107, 108, 109 recommended with 101, 102, 103 and may be required by individual departments. 101: mechanics. Prerequisites, trigonometry and one year of high school physics or its equivalent by permission. 102: sound and electricity. No credit in 102 if 112 has been taken. Prerequisite, 101. 103: heat, light, and modern physics. No credit in 103 if 113 has been taken. Prerequisite, 102 or concurrent registration in 102.
- 107, 108, 109 General Physics Laboratory (1,1,1)** **Staff**
107: mechanics laboratory to be taken concurrently with 101. 108: sound, electricity, and magnetism laboratory to be taken concurrently with 102. 109: heat and light laboratory to be taken concurrently with 103.

ZOOLOGY

- 204 Forestry Zoology (5)** **Staff**
Evolution of animals to the level of the Arthropoda and Chordata; emphasis on these as the groups of animals of greatest practical importance in the forest fauna. Prerequisites, Botany 114, 115, and 216.

ELECTIVE COURSES FOR UNDERGRADUATES

The forestry curriculum provides for a considerable number of elective courses which are selected in consultation with faculty advisers to fit the individual student's educational objective. Conventional areas of elective course work include courses from the following list (elective courses are not restricted to this list):

ACCOUNTING

- 150 Fundamentals of Accounting (4)** **Staff**
151 Accounting Techniques (3) **Staff**

BOTANY

- 113 Elementary Botany (5)** **Staff**
431, 432 Taxonomy (5,5) **Staff**
471 Mineral Nutrition (5) **Staff**

BUSINESS WRITING

310 Business Correspondence (5) Staff

CHEMISTRY

170 Qualitative Analysis (3) Staff

221 Quantitative Analysis (5) Staff

231, 232 Organic Chemistry (3,3) Staff

241, 242 Organic Chemistry Laboratory (2,2) Staff

CIVIL ENGINEERING

214 Control Surveys (3) Staff

321 Roads and Pavements (3) Staff

ECONOMICS

340 Labor in the Economy (5) Staff

441 Union-Management Relations (5) Staff

ENGLISH

253 Factual Writing (3) (Required for Forestry Management majors.) Staff

GEOGRAPHY

360 Principles of Cartography (5) Staff

370 Conservation of Natural Resources (5) Staff

444 Geography of Water Resources (3 or 5) Staff

GEOLOGY

205 Rocks and Minerals (5) Staff

206 Elements of Physiography (5) Staff

207 Historical Geology (5) Staff

HISTORY

241 Survey of the History of the United States (5) Staff

463 The Westward Movement (5) Staff

464 History of Washington and the Pacific Northwest (5) Staff

HUMANISTIC-SOCIAL STUDIES (Logging Engineering majors only)

270 Engineering Report Writing (2) Staff

302 Technical Writing (3) Staff

331 Humanities-Social Studies (3) Staff

HUMAN RELATIONS IN BUSINESS AND INDUSTRY

365 Industrial Relations for Engineers (3) Staff

460 Human Relations in Business and Industry (5) Staff

MATHEMATICS

124 Calculus with Analytic Geometry (5) Staff

MECHANICAL ENGINEERING

201 Metal Casting (1) Staff

202 Welding (1) Staff

203 Metal Machining (1) Staff

220 Heat Engines (3) Staff

410 Engineering Administration (3) Staff

411 Engineering Economy (3) Staff

415 Statistical Quality Control (3) Staff

417 Methods Analysis (3) Staff

METEOROLOGY**101 Survey of the Atmosphere (5)****Staff****322 Regional Climatology (5)****Staff****MICROBIOLOGY****301 General Microbiology (5)****Staff****PERSONNEL****310 Personnel Management (5)****Staff****POLITICAL SCIENCE****202 American Government and Politics (5)****Staff****SPEECH****120 Introduction to Public Speaking (5)****Staff****327 Extempore Speaking (3)****Staff****ZOOLOGY****444 Entomology (5)****Staff****464 Natural History of Birds (Ornithology) (5)****Staff****465 Natural History of Mammals (5)****Staff**

BULLETIN • UNIVERSITY OF WASHINGTON

GRADUATE SCHOOL

1961-1963

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; two Summer Quarter bulletins; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

BULLETIN
UNIVERSITY OF WASHINGTON
General Series No. 974
June, 1961

Published twice monthly June, July, August, September, October, and monthly for the remainder of the year, at Seattle, Washington, by the University of Washington. Entered as second-class matter December 18, 1947, at the post office at Seattle, Washington, under the Act of August 24, 1912.

CALENDAR

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in the following Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

AUTUMN QUARTER, 1961

REGISTRATION PERIOD

MAY 1-26	Advance Registration only for students in residence Spring Quarter, 1961. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 5-22	In-Person Registration for students in residence Spring Quarter, 1961, who did not complete Autumn Quarter, 1961, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
SEPT. 5-22	In-Person Registration for former students not in residence Spring Quarter, 1961. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is September 15.</i>
AUG. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
SEPT. 1	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
SEPT. 7-22	In-Person Registration for ALL new students.
SEPT. 22	Last day to register for Autumn Quarter, 1961. Note application deadlines.
SEPT. 25-29	Change of registration by appointment only.

ACADEMIC PERIOD

SEPT. 25—MONDAY	Instruction begins
SEPT. 29—FRIDAY	Last day to add a course
OCT. 6—FRIDAY	Last day to file applications for master's degrees for Autumn Quarter.
NOV. 11—SATURDAY	State Admission Day holiday
NOV. 22-27	Thanksgiving recess (6:30 p.m. to 7:30 a.m.)
DEC. 6-12	Final examinations
DEC. 12—TUESDAY	Quarter ends

WINTER QUARTER, 1962**REGISTRATION PERIOD**

- OCT. 23-Nov. 17 Advance Registration only for students in residence Autumn Quarter, 1961. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
- DEC. 26-28 In-Person Registration for students in residence Autumn Quarter, 1961, who did not complete Winter Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
- DEC. 26-28 In-Person Registration for former students not in residence Autumn Quarter, 1961. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Appointments or Permits is December 8.*
- DEC. 1 Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
- DEC. 20 Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
- DEC. 26-28 In-Person Registration for ALL new students.
- DEC. 28 Last day to register for Winter Quarter, 1962. Note application deadlines.
- JAN. 2-8 Change of registration by appointment only.

ACADEMIC PERIOD

- JAN. 2—TUESDAY Instruction begins
- JAN. 8—MONDAY Last day to add a course
- JAN. 15—MONDAY Last day to file applications for master's degrees for Winter Quarter.
- FEB. 22—THURSDAY Washington's Birthday and Founder's Day holiday
- MAR. 9-15 Final examinations
- MAR. 15—THURSDAY Quarter ends

SPRING QUARTER, 1962**REGISTRATION PERIOD**

- JAN. 22-FEB. 16 Advance Registration only for students in residence Winter Quarter, 1962. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.

MAR. 20-22	In-Person Registration for students in residence Winter Quarter, 1962, who did not complete Spring Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
MAR. 20-22	In-Person Registration for former students not in residence Winter Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is March 9.</i>
MAR. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
MAR. 15	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
MAR. 20-22	In-Person Registration for ALL new students.
MAR. 22	Last day to register for Spring Quarter, 1962. Note application deadlines.
MAR. 26-30	Change of registration by appointment only.

ACADEMIC PERIOD

MAR. 26—MONDAY	Instruction begins
MAR. 30—FRIDAY	Last day to add a course
APRIL 6—FRIDAY	Last day to file applications for master's degrees for Spring Quarter.
MAY 30—WEDNESDAY	Memorial Day holiday
JUNE 1-7	Final examinations
JUNE 7—THURSDAY	Quarter ends
JUNE 9—SATURDAY	Commencement

SUMMER QUARTER, 1962**REGISTRATION PERIOD**

General In-Person Registration for ALL students (*by appointment only*):

May 31, June 1, 4

June 11-15

Registration may be delayed if new student Applications for Admission or former student Applications for Appointment or Permit to register are received after May 15.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

Students in the Schools of Law, Dentistry, Medicine, and the Hospital Division of the School of Nursing must file an Application for Registration Permit, although no appointment date is necessary.

Registration Appointments or Permits will be issued as follows:

Students in residence Spring Quarter, 1961:

Registration Appointments or Permits to register will be issued according to class, *only upon presentation of ASUW card in person*, at the Registrar's Office as follows:

Seniors and Graduates.....	Monday, April 16, 8 a.m. to 5 p.m.
Juniors	Tuesday, April 17, 8 a.m. to 5 p.m.
Sophomores	Wednesday, April 18, 8 a.m. to 5 p.m.
Freshmen	Thursday, April 19, 8 a.m. to 5 p.m.

Former Students not in residence Spring Quarter, 1962, may obtain an Application for Appointment or Permit by writing to, or calling in person at the Registrar's Office, Room 109, Administration Building, or telephoning LAkeview 4-6000, Extension 2551, beginning April 17 and preferably *no later than May 15*. Application for Registration Appointment must be received before registration materials can be processed. *New (entering) Students* will be mailed Registration Appointments with their Official Notice of Admission.

ACADEMIC PERIOD

JUNE 18—MONDAY	Instruction begins
JUNE 19—TUESDAY	Last day to add a course for the first term
JUNE 22—FRIDAY	Last day to add a course for the full quarter
JUNE 29—FRIDAY	Last day to file applications for master's degrees for Summer Quarter.
JULY 4—WEDNESDAY	Independence Day holiday
JULY 18—WEDNESDAY	Final examinations and first term end
JULY 19—THURSDAY	Second term begins
JULY 20—FRIDAY	Last day to add a course for the second term
AUG. 17—FRIDAY	Final examinations and second term end

AUTUMN QUARTER, 1962

REGISTRATION PERIOD

APR. 30—MAY 25	Advance Registration only for students in residence Spring Quarter, 1962. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 10-28	In-Person Registration for students in residence Spring Quarter, 1962, who did not complete Autumn Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
SEPT. 10-28	In-Person Registration for former students not in residence Spring Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is September 1.</i>

JULY 15	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointments will be mailed with Official Notice of Admission.
SEPT. 1	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
SEPT. 12-28	In-Person Registration for ALL new students.
SEPT. 28	Last day to register for Autumn Quarter, 1962. Note application deadlines.
OCT. 1-5	Change of registration by appointment only.

ACADEMIC PERIOD

OCT. 1—MONDAY	Instruction begins
OCT. 5—FRIDAY	Last day to add a course
OCT. 12—FRIDAY	Last day to file application for master's degrees for Autumn Quarter.
NOV. 12—MONDAY	State Admission Day holiday
NOV. 21-26	Thanksgiving recess (6:30 p.m. to 7:30 a.m.)
DEC. 12-18	Final examinations
DEC. 18—TUESDAY	Quarter ends

WINTER QUARTER, 1963**REGISTRATION PERIOD**

OCT. 29-Nov. 27	Advance Registration only for students in residence Autumn Quarter, 1962. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
JAN. 2-4	In-Person Registration for students in residence Autumn Quarter, 1962, who did not complete Winter Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
JAN. 2-4	In-Person Registration for former students not in residence Autumn Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 1.</i>
DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

JUNE 24—MONDAY	Instruction begins
JUNE 25—TUESDAY	Last day to add a course for the first term
JUNE 28—FRIDAY	Last day to add a course for the full quarter
JULY 4—THURSDAY	Independence Day holiday
JULY 5—FRIDAY	Last day to file applications for master's degrees for Summer Quarter
JULY 24—WEDNESDAY	Final examinations and first term end
JULY 25—THURSDAY	Second term begins
JULY 26—FRIDAY	Last day to add a course for the second term
AUGUST 23—FRIDAY	Final examinations and second term end

For further information concerning subsequent quarters inquire at the Registrar's Office.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

DEC. 20	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
JAN. 2-4	In-Person Registration for ALL new students.
JAN. 4	Last day to register for Winter Quarter, 1963. Note application deadlines.
JAN. 7-11	Change of registration by appointment only.

ACADEMIC PERIOD

JAN. 7—MONDAY	Instruction begins
JAN. 11—FRIDAY	Last day to add a course
JAN. 18—FRIDAY	Last day to file applications for master's degrees for Winter Quarter.
FEB. 22—FRIDAY	Washington's Birthday and Founder's Day holiday

ADMINISTRATION**BOARD OF REGENTS**

JOSEPH DRUMHELLER, <i>President</i>	Spokane
MRS. A. SCOTT BULLITT, <i>Vice-President</i>	Seattle
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
ALBERT B. MURPHY	Everett
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima
HELEN E. HOAGLAND, <i>Secretary</i>	
DON H. WAGEMAN, <i>Treasurer</i>	

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN LEGGETT, Ph.D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>
JOSEPH L. MCCARTHY, Ph.D.	<i>Dean of the Graduate School</i>
HENRIETTA WILSON, M.A.	<i>Assistant to the Dean of the Graduate School</i>
GEORGE W. FARWELL, Ph.D.	<i>Associate Dean of the Graduate School</i>
DAVID C. FOWLER, Ph.D.	<i>Associate Dean of the Graduate School</i>
EDWARD C. LINGAFELTER, Ph.D.	<i>Associate Dean of the Graduate School</i>

MAY 30—THURSDAY	Memorial Day
JUNE 7-13	Final examinations
JUNE 9—SUNDAY	Baccalaureate Sunday
JUNE 13—THURSDAY	Quarter ends
JUNE 15—SATURDAY	Commencement

SUMMER QUARTER, 1963

REGISTRATION PERIOD

General In-Person Registration for ALL students (*by appointment only*):

June 6, 7, 10

June 17-21

Registration may be delayed if new student Applications for Admission or former student Applications for Appointment or permit to register are received after May 15.

Students in the Schools of Law, Dentistry, Medicine, and the Hospital Division of the School of Nursing must file an Application for Registration Permit, although no appointment date is necessary.

Registration Appointments or Permits will be issued as follows:

Students in residence Spring Quarter, 1963:

Registration Appointments or Permits to register will be issued according to class, *only upon presentation of ASUW card in person*, at the Registrar's Office as follows:

Seniors and Graduates	Monday, April 22, 8 a.m. to 5 p.m.
Juniors	Tuesday, April 23, 8 a.m. to 5 p.m.
Sophomores	Wednesday, April 24, 8 a.m. to 5 p.m.
Freshmen	Thursday, April 25, 8 a.m. to 5 p.m.

Former Students not in residence Spring Quarter, 1963, may obtain an Application for Appointment or Permit by writing to, or calling in person at the Registrar's Office, Room 109, Administration Building, or telephoning LAkeview 4-6000, Extension 2551, beginning April 22 and preferably *no later than May 15*. Application for Registration Appointment must be received before registration materials can be processed. *New (entering) Students* will be mailed Registration Appointments with their Official Notice of Admission.

ACADEMIC PERIOD

JUNE 24—MONDAY	Instruction begins
JUNE 25—TUESDAY	Last day to add a course for the first term
JUNE 28—FRIDAY	Last day to add a course for the full quarter
JULY 4—THURSDAY	Independence Day holiday
JULY 5—FRIDAY	Last day to file applications for master's degrees for Summer Quarter
JULY 24—WEDNESDAY	Final examinations and first term end
JULY 25—THURSDAY	Second term begins
JULY 26—FRIDAY	Last day to add a course for the second term
AUGUST 23—FRIDAY	Final examinations and second term end

For further information concerning subsequent quarters inquire at the Registrar's Office.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

GRADUATE FACULTY COUNCIL AND GROUP OPERATING COMMITTEES

(The combined membership of the eight Group Operating Committees comprises the Graduate Faculty Council—Joseph L. McCarthy, *Chairman*.)

GROUP 1.

Edward E. Bostetter (Chairman), Abraham Keller, John B. McDiarmid, William H. Rey, and Arnold Stein.

GROUP 2.

Barnet Baskerville (Chairman), Kathleen Munro, Ruth E. Penington, Henry Ladd Smith, and Victor Steinbrueck.

GROUP 3.

Maynard G. Arsove, Allen C. Delacy, J. Hoover Mackin, William T. Simpson (Chairman), and Edwin H. Uehling.

GROUP 4.

W. Stull Holt, J. Richard Huber (Chairman), Clarence Schrag, Donald W. Treadgold, and Edward L. Ullman.

GROUP 5.

Theodore J. Barnowe, Guy G. Gordon, Alice H. Hayden, Fred J. Mueller (Chairman), and Dwight E. Robinson.

GROUP 6.

Ellis H. Dill, Harvey D. Erickson, Billy J. Hartz, Blake D. Mills (Chairman), and Earl C. Roberts.

GROUP 7.

Edmond H. Fischer, Neal B. Groman, Lyle H. Jensen, Allen M. Scher (Chairman), and Theodore C. West.

GROUP 8.

David H. Gronewold, Nathan Hall, Florence L. Hall, Katherine Hoffman, and Saul Schluger (Chairman).

GRADUATE FACULTY

(As of April 21, 1961)

A single date following the name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present academic rank.

Aagaard, George Nelson, 1954, *Professor of Medicine; Dean of the School of Medicine*

B.S., 1934, M.B., 1936, M.D., 1937, Minnesota

Abrahamson, Arthur Clarence, 1956 (1959), *Associate Professor of Social Work*

B.A., 1924, Augustana College; M.A., 1947, Minnesota

Adams, Robert Pardee, 1947, *Associate Professor of English*

B.A., 1931, Oberlin; Ph.D., 1937, Chicago

Alcala, Hugo R., 1961, *Professor of Romance Languages and Literature*

Bachiller, 1936, Doctor of Law, 1943, Asuncion (Paraguay); M.F.L., 1950, State College of Washington; Ph.D., 1953, Wisconsin

Allendoerfer, Carl Barnett, 1951, *Professor of Mathematics; Executive Officer of the Department of Mathematics*

B.S., 1932, Haverford College; B.A., 1934, M.A., 1939, Oxford (England); Ph.D., 1937, Princeton

Alps, Glen Earl, 1945 (1955), *Associate Professor of Art*

B.A., 1940, Colorado State College of Education; M.F.A., 1947, Washington

Alvord, Ellsworth C., Jr. (1960), *Associate Professor of Pathology*

B.S., 1944, Haverford College; M.D., 1946, Cornell

- Ames, William E., 1957, *Assistant Professor of Communications; Acting Director of the School of Communications*
B.S., 1948, South Dakota State; M.S., 1952, Iowa State
- Anderson, Arthur G., Jr., 1946 (1957), *Professor of Chemistry*
A.B., 1940, Illinois; M.S., 1942, Ph.D., 1944, Michigan
- Anderson, Berton Emmett, 1948 (1957), *Professor of Dental Science and Literature; Assistant Dean of the School of Dentistry; Director of Post-graduate Dental Education; Chairman of Admissions*
D.M.D., 1925, Oregon
- Anderson, Frederick Neil, 1945 (1959), *Associate Professor of Art*
B.A., 1943, Washington; M.F.A., 1954, Minnesota
- Archer, Stephen H., 1956 (1960), *Associate Professor of Finance*
B.A., 1949, M.A., 1953, Ph.D., 1958, Minnesota
- Arestad, Sverre, 1937 (1958), *Professor of Scandinavian Languages; Executive Officer of the Department of Scandinavian Languages*
B.A., 1929, Ph.D., 1938, Washington
- Arsove, Maynard Goodwin, 1951 (1961), *Professor of Mathematics*
B.S., 1943, Lehigh; M.S., 1948, Ph.D., 1950, Brown
- Avann, Sherwin Parker, 1946, *Assistant Professor of Mathematics*
B.S., 1938, Washington; M.S., 1940, Ph.D., 1942, California Institute of Technology
- Ayllón, Cándido, 1956 (1957), *Assistant Professor in Spanish*
B.A., 1951, Brooklyn; M.A., 1952, Ph.D., 1956, Wisconsin
- Babb, Albert Leslie, 1952 (1956), *Associate Professor of Chemical Engineering*
B.A.Sc., 1948, British Columbia; M.S., 1949, Ph.D., 1951, Illinois
- Babb, Warren, 1955, *Assistant Professor of Music*
B.A., 1938, M.A., 1939, Harvard
- Badgley, Franklin Ilsley, 1950 (1959), *Associate Professor of Meteorology and Climatology*
B.S., 1935, Chicago; M.S., 1948, Ph.D., 1951, New York
- Bacr, Donald M., 1957 (1961), *Associate Professor of Psychology*
A.B., 1950, Ph.D., 1957, Chicago
- Baily, Athol Romayne, 1949 (1955), *Associate Professor of Industrial Education*
B.S., 1931, Kansas State Teachers College; M.A., 1936, Ed.D., 1949, Missouri
- Balise, Peter Louis, Jr., 1953 (1961), *Professor of Mechanical Engineering*
S.B., 1948, S.M., 1950, Massachusetts Institute of Technology
- Ballantine, John Perry, 1926 (1937), *Professor of Mathematics*
A.B., 1918, Harvard; Ph.D., 1923, Chicago
- Barksdale, Julian Devreau, 1936 (1949), *Professor of Geology*
A.B., 1930, Stanford; Ph.D., 1936, Yale
- Barnes, Clifford Adrian, 1947 (1955), *Professor of Oceanography*
B.S., 1930; Ph.D., 1936, Washington
- Barnowe, Theodore Joseph, 1947 (1955), *Professor of Human Relations and Administration*
B.A., 1939, Morningside College (Iowa); M.A., 1940, Ph.D., 1946, Washington
- Barth, Ernest A. T., 1955 (1959), *Assistant Professor of Sociology*
B.A., Rochester, 1950; M.A., 1953, Ph.D., 1955, North Carolina
- Baskerville, Barnet, 1948 (1960), *Professor of Speech*
B.A., 1940, M.A., 1944, Washington; Ph.D., 1948, Northwestern
- Bassett, David Lee, 1959, *Professor of Anatomy*
A.B., 1934, M.D., 1939, Stanford
- Batey, Marjorie Viola, 1956, (1958), *Assistant Professor of Psychiatric Nursing*
Diploma, 1947, Sacred Heart Hospital, Washington; B.S., 1953, Washington; M.S., 1956, Colorado
- Batie, Harriett Virginia, 1941 (1954), *Assistant Professor of Education; Certification and Academic Adviser*
B.S., 1935, Hastings College; M.A., 1945, Ph.D., 1953, Washington
- Bauer, Harry C., 1945 (1947), *Professor of Librarianship; Special Assistant in Public Information*
A.B., 1927, M.S., 1929, Washington University, St. Louis; Certificate of Librarianship, 1931, St. Louis Library School

- Beale, James MacArthur, Jr., 1948 (1958), *Associate Professor of Music*
B.A., 1945, Harvard; B.Mus., 1946, M.Mus., 1947, Yale
- Bear, Herbert Stanley, Jr., 1957 (1958), *Assistant Professor of Mathematics*
B.A., 1950, Ph.D., 1957, California
- Beaumont, Ross Allen, 1940 (1954), *Professor of Mathematics*
A.B., 1936, M.S., 1937, Michigan; Ph.D., 1940, Illinois
- Benditt, Earl P., 1957, *Professor of Pathology; Executive Officer of the Department of Pathology*
B.A., 1937, Swarthmore; M.D., 1941, Harvard
- Bentley, G. Nelson, 1952 (1957), *Assistant Professor of English*
A.B., 1941, M.A., 1945, Michigan
- Benson, Merritt E., 1931 (1948), *Professor of Communications*
LL.B., 1930, Minnesota; B.A., 1942, Washington
- Berg, Kenneth Bernard, 1950 (1957), *Professor of Accounting*
B.S.C., 1939, North Dakota; M.S., 1941, Ph.D., 1952, Illinois; C.F.A., 1954, State of Washington
- Bergseth, Frederick Robert, 1947 (1957), *Professor of Electrical Engineering*
B.S. in E.E., 1937, Washington; S.M. in E.E., 1938, Massachusetts Institute of Technology
- Bevis, Leura Dorothy, 1947 (1956), *Associate Professor of Librarianship; Associate Director of the School of Librarianship*
B.A., 1927, Pomona; B.S. in L.S., 1947, Southern California; M.A., 1951, Washington
- Bijou, Sidney William, 1948 (1951), *Professor of Psychology; Director of the Bailey and Babette Gatzert Institute of Child Development*
B.S., 1933, Florida; M.A., 1936, Columbia; Ph.D., 1941, Iowa
- Bird, Winfred Wylam, 1928 (1946), *Associate Professor of Speech*
A.B., 1926, Lawrence College (Wisconsin); Ph.D., 1938, Iowa
- Birnbaum, Zygmunt William, 1939 (1950), *Professor of Mathematics; Director of the Laboratory of Statistical Research*
LL.M., 1925, Ph.D., 1929, John Casimir (Lwow, Poland)
- Bjorkstam, John Ludwig, 1955 (1960), *Associate Professor of Electrical Engineering*
B.S. in E.E., 1949, M.S. in E.E., 1952, Ph.D., 1958, Washington
- Blair, John Sanborn, 1952 (1961), *Professor of Physics*
B.S., 1943, Yale; M.S., 1949, Ph.D., 1951, Illinois
- Blandau, Richard Julius, 1949 (1951), *Professor of Anatomy; Associate Dean of the School of Medicine*
A.B., 1935, Linfield College; Ph.D., 1939, Brown; M.D., 1948, Rochester
- Blaser, Henry Weston, 1946 (1948), *Associate Professor of Botany*
B.S., 1931, A.M., 1933, Temple; Ph.D., 1940, Cornell
- Bluestone, George, 1957 (1959), *Assistant Professor of English*
B.A., 1949, Harvard; M.F.A., 1951, Iowa; Ph.D., 1956, Johns Hopkins
- Blumenthal, Robert McCallum, 1956 (1961), *Associate Professor of Mathematics*
B.A., 1952, Oberlin; Ph.D., 1956, Cornell
- Bodansky, David, 1954 (1958), *Associate Professor of Physics*
B.S., 1943, M.A., 1948, Ph.D., 1950, Harvard
- Bodemer, Charles W., 1956 (1959), *Assistant Professor of Anatomy*
B.A., 1951, Pomona College; M.A., 1952, Claremont Graduate School; Ph.D., 1956, Cornell
- Boehme, Thomas Kelman, 1960 (1961), *Assistant Professor of Mathematics*
B.S., 1952, Oklahoma University; M.S., 1957, Oklahoma State; Ph.D., 1960, California Institute of Technology
- Bogan, Richard Herbert, 1954 (1957), *Associate Professor of Civil Engineering*
B.S. in C.E., 1949, Washington; S.M., 1952, Sc.D., 1954, Massachusetts Institute of Technology
- Bollard, R. John, 1961, *Professor and Executive Officer, Aeronautical Engineering*
B.E., 1948, M.E., 1949, Canterbury College, New Zealand; Ph.D., 1954, Purdue University
- Bone, Hugh Alvin, 1948, *Professor of Political Science; Executive Officer of the Department of Political Science*
B.A., 1931, North Central College; M.A., 1935, Wisconsin; Ph.D., 1937, Northwestern
- Boozer, Mary Kathryn, 1960, *Assistant Professor of Medical-Surgical Nursing*
B.S.N., 1947, Colorado; M.N., 1955, Washington

- Boroughs, Homer, Jr., 1948 (1956), *Associate Professor of Elementary Education*
B.A., 1939, Western Washington College of Education; M.A., 1947, Ph.D., 1949, Washington
- Bostetter, Edward Everett, 1940 (1959), *Professor of English*
B.A., 1935, Franklin and Marshall (Pennsylvania); M.A., 1937, Ph.D., 1938, Princeton
- Bourque, Philip J., 1957, *Associate Professor of General Business*
A.B., 1949, Massachusetts; M.A., 1950, Ph.D., 1956, Pennsylvania
- Brabb, George J., 1956 (1960), *Associate Professor of Statistics*
B.S., 1950, M.S., 1954, Idaho; Ph.D., 1957, Illinois
- Brady, Lynn Robert, 1959, *Assistant Professor of Pharmacy*
B.S., 1955, M.S., 1957, Nebraska; Ph.D., 1959, Washington
- Brandt, Edna Mae, 1954 (1958), *Assistant Professor of Medical-Surgical Nursing*
Diploma, 1939, St. Joseph's Hospital School of Nursing, Illinois; B.A., 1952, Redlands; M.N., 1953, Washington
- Brazeau, Wendell Phillips, 1945 (1955), *Associate Professor of Art*
B.F.A., 1933, M.F.A., 1947, Washington
- Brewer, Stanley Harold, 1946 (1956), *Professor of Transportation*
B.A., 1942, M.B.A., 1943, Washington, I.C.C. Practitioner, 1948; F.M.B. Practitioner, 1950
- Brien, Frederick Blyth, 1954 (1957), *Associate Professor of Mineral Engineering*
B.S. in Min.E., 1950, Alberta; M.S. in Min.E., 1951, Columbia
- Briggs, James Robert, 1952 (1955), *Associate Professor of Secretarial Studies*
A.B., 1935, M.A., 1950, Washington; D.Ed., 1954, Stanford
- Brockman, Christian Frank, 1946 (1957), *Professor of Forestry*
B.S., 1924, Colorado State; M.S., 1931, Washington
- Brockway, Doris J., 1951, *Associate Professor of Home Economics*
B.A., 1926, Washington State; M.A., 1939, Washington
- Broer, Marion Ruth, 1947 (1960), *Professor of Physical Education*
B.S., 1933, M.S., 1936, Wisconsin; Ph.D., 1954, New York
- Brown, Arthur Charles, 1960, *Instructor in Physiology and Biophysics*
A.B., 1948, M.S., 1954, Chicago; Ph.D., 1960, Washington
- Brown, David V., 1951 (1960), *Associate Professor of Pathology*
B.A., 1935, Reed College; M.D., 1939, Oregon
- Brown, Edward Gordon, 1948 (1949), *Professor of Business Policy*
A.B., 1929, Washington; M.B.A., 1932, Harvard
- Brown, Malcolm Johnston, 1946 (1956), *Associate Professor of English*
B.A., 1931, Ph.D., 1946, Washington
- Brown, Stephen Darden, 1930 (1937), *Associate Professor of Business Law*
LL.B., 1925, A.B., 1932, Washington; LL.M., 1938, Stanford
- Brownell, Francis Herbert, III, 1950 (1961), *Professor of Mathematics*
B.A., 1943, M.S., 1947, Yale; Ph.D., 1949, Princeton
- Bruno, Pauline Mary, 1958, *Assistant Professor of Medical-Surgical Nursing*
B.S.N., 1952, M.S.N., 1954, Catholic University
- Bryant, Benjamin Smyth, 1949 (1959), *Associate Professor of Forestry; Director of Institute of Forest Products*
B.S.F., 1947, M.S.F., 1948, Washington; D.F., 1951, Yale
- Buck, George Crawford, 1950 (1958), *Assistant Professor of Germanic Literature*
B.A., 1942, Amherst; M.A., 1948, Ph.D., 1954, Yale
- Budel, Oscar, 1956 (1961), *Associate Professor of Italian Language and Literature*
Abitur, 1942, Dr.Phil., 1950, University of Wurzburg (Germany)
- Buettner, Konrad J. K., 1953 (1957), *Professor of Meteorology and Climatology*
B.S., 1922, Gymnasium (Pforte, Germany); Dr.phil., 1926, Göttingen (Germany); Dr.phil.habil., 1934, Kiel (Germany)
- Bunin, Sanford Melvin, 1957 (1960), *Assistant Professor of Human Relations and Personnel*
B.S., 1949, Western Reserve, M.A., 1951, Kent State; Ph.D., 1960, Texas
- Burke, Agnes Evelyn, 1943 (1953), *Associate Professor of Public Health Nursing*
B.S., 1930, Akron Municipal; Diploma, 1930, M.A., 1941, Western Reserve; C.P.H.N., 1943, Washington
- Burke, Robert Eugene, 1957 (1960), *Associate Professor of History*
A.B., 1946, Chico State College; M.A., 1947, Ph.D., 1950, California

- Burns, Harry Hamilton, 1934 (1948), *Associate Professor of English*
B.A., 1928, Ph.D., 1935, Washington
- Burns, Wayne, 1948 (1954), *Associate Professor of English*
A.B., 1938, Miami (Ohio); A.M., 1940, Harvard; Ph.D., 1946, Cornell
- Businger, Joost A., 1958 (1961), *Associate Professor of Meteorology and Climatology*
B.S., 1947, Doctoraal examen, 1950, Ph.D., 1954, Utrecht (Netherlands)
- Butow, Robert J. C., 1960, *Associate Professor of Japanese History*
A.B., 1947, A.M., 1948, Ph.D., 1953, Stanford
- Cady, George Hamilton, 1938 (1947), *Professor of Chemistry; Executive Officer of the Department of Chemistry*
A.B., 1927, A.M., 1928, Kansas; Ph.D., 1930, California
- Campbell, Robert John, Jr., 1955, *Assistant Professor of Ceramic Engineering*
B.S., Ch.E., 1939, Oregon State; M.S. in Cer.E., 1954, Washington
- Campbell, Robert Kenneth, 1958 (1960), *Assistant Professor of Forest Genetics*
B.A., 1951, Montana State University; M.S., 1954, Ph.D., 1958, Washington
- Campbell, Thomas Herbert, 1945 (1955), *Professor of Civil Engineering; Acting Executive Officer of the Department of Civil Engineering*
B.S. in C.E., 1934, Washington; M.S. in C.E., 1938, Massachusetts Institute of Technology
- Carlson, Dale Arvid, 1955 (1961), *Associate Professor of Civil Engineering*
B.S. in C.E., 1950, M.S. in C.E., 1951, Washington; Ph.D., 1960, Wisconsin
- Carr, Kenneth Mills, 1944 (1953), *Assistant Professor of Drama*
B.A., 1942, Eastern Washington College of Education; M.A., 1945, Washington
- Carrell, James Aubrey, 1939 (1947), *Professor of Speech*
A.B., 1927, Nebraska Wesleyan; M.A., 1929, Ph.D., 1936, Northwestern
- Cartwright, Philip Windsor, 1947 (1960), *Professor of Economics; Associate Dean of the College of Arts and Sciences*
A.B., 1940, M.A., 1942, Ph.D., 1950, Stanford
- Catton, William Robert, Jr., 1957, *Assistant Professor of Sociology*
A.B., 1950, Oberlin; M.A., 1952, Ph.D., 1954, Washington
- Chambers, Edward J., 1960, *Associate Professor of General Business*
B.Comm., 1945, B.A., 1946, M.A., 1947, British Columbia; Ph.D., 1953, Nebraska
- Chang, Kun, 1951 (1957), *Associate Professor of Far Eastern and Slavic Languages and Literature*
B.A., 1938, National Tsinghua (China); M.A., 1949, Ph.D., 1955, Yale
- Chapman, Douglas George, 1949 (1957), *Professor of Mathematics*
B.A., 1938, Saskatchewan; M.A., 1940, Ph.D., 1949, California
- Chapple, Stanley, 1948, *Professor of Music; Director of the School of Music*
D.Mus. (Hon.), 1947, Colby College
- Chenoweth, Harry Holt, 1946 (1957), *Associate Professor of Civil Engineering*
B.S. in C.E., 1937, M.S. in C.E., 1957, Washington
- Chessex, Jean-Charles, 1928 (1948), *Professor of French*
B.A., 1920, Gymnase Classique Lausanne, (Switzerland); B.D., 1922, M.A., 1925, Lausanne (Switzerland)
- Childs, Morris Elsmere, 1954 (1961), *Professor of Mechanical Engineering*
B.S. in M.E., 1944, Oklahoma; M.S. in M.E., 1947, Ph.D., 1956, Illinois
- Chiu, John S. Y., 1960, *Assistant Professor of Accounting and Finance*
B.A., 1952, National Taiwan University, Formosa; M.S., 1955, Kentucky; Ph.D., 1960, Illinois
- Church, Phil Edwards, 1935 (1948), *Professor of Meteorology and Climatology; Executive Officer of the Department of Meteorology and Climatology*
B.S., 1923, Chicago; M.A., 1932, Ph.D., 1937, Clark
- Clanton, Jack Reed, 1947 (1958) *Professor of Civil Engineering*
B.S. in C.E., 1936, Missouri School of Mines; M.S. in C.E., 1939, Pittsburgh
- Clark, Kenneth Courtright, 1948 (1960), *Professor of Physics*
B.A., 1940, Texas; A.M., 1941, Ph.D., 1947, Harvard
- Clark, Robert Newhall, 1957 (1959), *Associate Professor of Electrical Engineering*
B.S. in E.E., 1950, M.S. in E.E., 1951, University of Michigan

- Clarke, Henry Leland, 1958 (1959), *Associate Professor of Music*
A.B., 1928, A.M., 1929, Ph.D., 1947, Harvard
- Clawson, David Kay, 1958 (1961), *Associate Professor of Surgery; Head of the Division of Orthopedic Surgery*
M.D., 1952, Harvard
- Cobb, Mary Marguerite, 1953 (1958), *Assistant Professor of Public Health Nursing*
B.S.N., 1949, M.N., 1957, Washington
- Cohen, Joseph, 1932 (1941), *Assistant Professor of Sociology*
B.A., 1925, M.A., 1927, Washington; Ph.D., 1935, Michigan
- Cole, Kenneth Carey, 1924 (1936), *Professor of Political Science*
B.Litt. in Law, 1924, Oxford (England); Ph.D., 1930, Harvard
- Conway, John Ashby, 1927 (1950), *Professor of Drama*
B.A., 1927, Carnegie Institute of Technology
- Coombs, Howard Abbott, 1934 (1949), *Professor of Geology; Executive Officer of the Department of Geology*
B.S., 1929, M.S., 1932, Ph.D., 1935, Washington
- Corbally, John Edward, 1927 (1942), *Professor of Secondary Education; Director of Practice Teaching; Acting Director of the Bureau of School Service and Research*
B.A., 1918, Whitworth College; M.A., 1925, Ph.D., 1929, Washington
- Cornu, Max Donald, 1928 (1953), *Professor of English*
LL.B., 1922, M.A., 1926, Ph.D., 1928, Washington
- Corson, Harry Herbert, 1958 (1959), *Assistant Professor of Mathematics*
A.B., 1952, Vanderbilt; M.A., 1954, Ph.D., 1957, Duke
- Costello, Charles Pierce, Jr., 1958 (1961), *Associate Professor of Mechanical Engineering*
B.S. in M.E., 1954, Washington; M.S. in M.E., 1955, Ph.D., 1958, Stanford
- Costigan, Giovanni, 1934 (1948), *Professor of History*
B.A., 1926, B.Litt., 1930, M.A., 1930, Oxford (England); M.A., 1928, Ph.D., 1930, Wisconsin
- Costner, Herbert Lee, 1959 (1960), *Assistant Professor of Sociology*
A.B., 1953, Oklahoma; M.A., 1956, Ph.D., 1960, Indiana
- Crain, Richard Willson, Sr., 1936 (1953), *Associate Professor of Mechanical Engineering*
B.S. in E.E., 1930, B.S. in M.E., 1932, Colorado Agricultural and Mechanical College; M.S. in M.E., 1946, Washington
- Cramlet, Clyde Myron, 1920 (1948), *Professor of Mathematics*
B.S., 1916, Walla Walla College; M.S., 1920, Ph.D., 1926, Washington
- Creager, Joe S., 1958, *Assistant Professor of Oceanography*
B.A., 1951, Colorado College; M.S., 1953, Ph.D., 1958, Agricultural and Mechanical College of Texas
- Creore, Alvin Emerson, 1940 (1953), *Associate Professor of Romance Languages and Literature*
A.B., 1934, M.A., 1936, Rochester; Ph.D., 1939, Johns Hopkins
- Crider, James Roberts, 1952 (1957), *Assistant Professor of Drama*
B.A., 1945, Cornell College (Iowa); M.A., 1950, Washington
- Crittenden, Alden LaRue, 1947 (1960), *Associate Professor of Chemistry*
B.S., 1942, Ph.D., 1946, Illinois
- Crowell, Laura Irene, 1949 (1955), *Associate Professor of Speech*
B.A., 1929, South Dakota; M.A., 1940, Ph.D., 1948, Iowa
- Crutchfield, James Arthur, 1949 (1957), *Associate Professor of Economics*
A.B., 1940, M.A., 1942, California (Los Angeles); Ph.D., 1954, California
- Culbert, Sidney Spence, 1947 (1961), *Associate Professor of Psychology*
B.A., 1943, Ph.D., 1950, Washington
- Cutler, Russell Kelsey, 1946 (1948), *Associate Professor of Physical Education, Executive Officer of the Department of Physical Education for Men*
B.Ed., 1930, California (Los Angeles); M.S., 1934, Oregon; D.Ed., 1958, Stanford
- Danielsen, Edwin Frederick, 1959, *Assistant Professor of Meteorology and Climatology*
B.S., 1951, M.S., 1954, Ph.D., 1958, Washington

- Dash, Jay Gregory, 1960, *Acting Associate Professor in Physics*
B.S., 1944, New York City College; M.A., 1951, Ph.D., 1951, Columbia
- Dauben, Hyp Joseph, Jr., 1945 (1961), *Professor of Chemistry*
B.A., M.S., 1937, Ohio State; A.M., Ph.D., 1941, Harvard
- David, Jean Ferdinand, 1936 (1957), *Associate Professor of Romance Languages and Literature*
Bacc., 1923 College Grandchamp (Versaille, France); A.B., 1929, M.A., 1932, Saskatchewan; Ph.D., 1936, Johns Hopkins
- David, Morton Morris, 1953 (1957), *Associate Professor of Chemical Engineering*
B.S. in Ch.E., 1942, Colorado; D.Eng., 1950, Yale
- Davis, Alanson Bewick, 1947 (1955), *Lecturer and Stage Designer in Drama*
A.B., 1947, Washington
- Day, Emmett Elbert, 1947 (1954), *Professor of Mechanical Engineering*
B.A., 1936, East Texas State Teachers College; B.S., 1945, M.S., 1947, Massachusetts Institute of Technology
- Dehmelt, Hans Georg, 1955 (1957), *Associate Professor of Physics*
B.S., 1946, M.S., 1949, Ph.D., 1950, University of Goettingen (Germany)
- Dekker, David Bliss, 1948 (1959), *Associate Professor of Mathematics; Director of the Research Computer Laboratory*
A.B., 1941, California; M.S., 1943, Illinois Institute of Technology; Ph.D., 1948, California
- De Lacy, Allan Clark, 1946 (1958), *Professor of Fisheries*
B.S., 1932, M.S., 1933, Ph.D., 1941, Washington
- Delano, Myles S., 1958 (1960), *Associate Professor of Finance and Statistics*
A.B., 1943, Bates; M.A., 1947, Boston; Ph.D., 1960, Brown
- Demmery, Joseph, 1928 (1934), *Professor of General Business*
Ph.B., 1920, M.A., 1924, Chicago
- Denny, Brewster Castberg, 1961, *Associate Professor of Public Administration, Associate Director of School of Public Administration*
A.B., 1945, Washington; M.A., 1948, Ph.D., 1959, Fletcher School of Law and Diplomacy
- Depew, Creighton Arthur, 1960, *Assistant Professor of Mechanical Engineering*
B.S. 1956, M.S., 1957, Ph.D., 1960, California
- de Vries, Mary Aid, 1921 (1939), *Associate Professor of Physical Education*
B.A., 1920, Wisconsin
- Dietrichson, Paul, 1955 (1961), *Associate Professor of Philosophy*
A.B., 1947, Georgia; Ph.D., 1955, Yale
- Dietz, Robert Henry, 1947 (1958), *Professor of Architecture*
B.Arch., 1941, Washington; M.Arch., 1944, Massachusetts Institute of Technology
- Dill, Ellis Harold, 1956 (1959), *Associate Professor of Aeronautical Engineering*
B.S. in C.E., 1954, M.S. in C.E., 1955, Ph.D., 1956, California
- Dillard, David Hugh, 1953 (1959), *Assistant Professor of Surgery*
A.B., 1946, Whitman College; M.D., 1950, Johns Hopkins
- Dille, James Madison, 1936 (1946), *Professor of Pharmacology; Executive Officer of the Department of Pharmacology*
B.S., 1930, M.S., 1933, Nebraska; Ph.D., 1935, Georgetown; M.D., 1946, Illinois
- Dodd, Stuart Carter, 1947, *Professor of Sociology*
B.S., 1922, M.A., 1924, Ph.D., 1926, Princeton
- Dollar, Alexander Melville, 1959, *Assistant Professor of Fisheries*
B.S., 1948, M.S., 1949, California (Berkeley); Ph.D., 1958, Reading (England)
- Donaldson, Lauren Russell, 1935 (1948), *Professor of Fisheries; Director of the Laboratory of Radiation Biology*
A.B., 1926, Intermountain Union College (Montana); M.S., 1931, Ph.D., 1939, Washington
- Dorfman, Eugene, 1955, *Assistant Professor of Romance Linguistics*
A.B., 1938, New Jersey State Teachers College; A.M., 1947, Ph.D., 1950, Columbia
- Douglas, Howard Clark, 1941 (1958), *Professor of Microbiology and Genetics*
A.B., 1936, Ph.D., 1949, California
- Draper, Edgar Marian, 1925 (1936), *Professor of Curriculum; Director of In-Service Teacher Training*
B.A., 1916, M.A., 1925, Ph.D., 1926, Washington

- Du Pen, Everett George, 1945 (1960), *Professor of Art*
B.F.A., 1937, Yale
- Dvorak, August, 1923 (1937), *Professor of Education; Assistant Director of the Division of Counseling and Testing*
B.A., 1920, Ph.D., 1923, Minnesota
- Earle, Frances M., 1931 (1941), *Associate Professor of Geography*
A.B., 1918, Winthrop College; M.S., 1926, Columbia; Ph.D., 1929, George Washington
- Eastman, Austin V., 1924 (1942), *Professor of Electrical Engineering; Executive Officer of the Department of Electrical Engineering*
B.S. in E.E., 1922, M.S. in E.E., 1929, Washington
- Eastman, Fred Scoville, 1927 (1943), *Professor of Aeronautical Engineering*
B.S. in E.E., 1925, Washington; M.S., 1929, Massachusetts Institute of Technology
- Eby, E. Harold, 1927 (1947), *Professor of English*
Ph.B., 1923, Chicago; Ph.D., 1927, Washington
- Edelstein, Alex, 1955 (1959), *Associate Professor of Communications*
A.B., 1946, San Francisco State College; M.A., 1948, Stanford; Ph.D., 1958, Minnesota
- Edmondson, Walles Thomas, 1949 (1957), *Professor of Zoology*
B.S., 1938, Ph.D., 1942, Yale
- Edwards, Allen L., 1944 (1948), *Professor of Psychology*
B.A., 1932, Central College (Chicago); M.A., 1938, Ohio State; Ph.D., 1940, Northwestern
- Eggers, David Frank, Jr., 1950 (1956), *Associate Professor of Chemistry*
B.S., 1943, Illinois; Ph.D., 1950, Minnesota
- Ekse, Martin Ingvald, 1948 (1957), *Professor of Civil Engineering*
B.S., 1932, South Dakota State; M.S., 1948, Wisconsin
- Ellis, Ross C., 1954 (1957), *Assistant Professor of Geology*
B.A., 1953, Occidental College; Ph.D., 1959, Washington
- Emerson, Donald Eugene, 1946 (1953), *Associate Professor of History*
A.B., 1937, Johns Hopkins; M.A., 1938, Columbia; Ph.D., 1942, Johns Hopkins
- Emery, Donald William, 1934 (1954), *Associate Professor of English; Associate Director of the Bureau of School Services and Research*
A.B., 1927, A.M., 1928, Iowa
- Engle, Nathanael Howard, 1941, *Professor of Marketing*
A.B., 1925, A.M., 1926, Washington; Ph.D., 1929, Michigan
- Enos, Lucy DeReid, 1954 (1958), *Assistant Professor of Medical-Surgical Nursing*
Diploma, 1942, Pennsylvania Hospital School of Nursing; B.S., 1946, M.A., 1954, Minnesota
- Erickson, Harvey D., 1947 (1959), *Professor of Forest Products*
B.S., 1933, B.S., 1934, M.S., 1936, Ph.D., 1937, Minnesota
- Erickson, John Wilbur, 1956 (1960), *Assistant Professor of Art*
B.S., 1941, B.F.A., 1947, M.F.A., 1951, Illinois
- Erlich, Victor, 1948 (1959), *Professor of Far Eastern and Slavic Languages and Literature, Assistant Director of the Far Eastern and Russian Institute*
M.A., 1937, Free Polish University (Warsaw, Poland); Ph.D., 1951, Columbia
- Etcheson, Warren W., 1954 (1960), *Professor of Marketing; Assistant Dean of the College of Business Administration*
B.S., 1942, Indiana; M.A., 1951, Ph.D., 1956, Iowa
- Evans, Charles Albert, 1946, *Professor of Microbiology; Executive Officer of the Department of Microbiology*
B.S., 1935, B.M., 1936, M.D., 1937, Ph.D., 1942, Minnesota
- Everett, Newton Bennie, 1946 (1957), *Professor of Anatomy; Executive Officer of the Department of Anatomy*
B.S., 1937, M.S., 1938, North Texas State; Ph.D., 1942, Michigan
- Fairhall, Arthur William, 1954 (1958), *Associate Professor of Physics and Chemistry*
B.Sc., 1946, Queens (Kingston, Ontario); Ph.D., 1952, Massachusetts Institute of Technology
- Falk, Gertrude, 1954 (1957), *Assistant Professor of Pharmacology*
B.S., 1947, Antioch College; Ph.D., 1952, Rochester
- Falls, Gregory Alexander, 1961, *Professor of Drama; Director of the School of Drama*
B.A., 1943, Park College; M.A., 1949, Ph.D., 1953, Northwestern

- Faris, Robert E. Lee, 1948, *Professor of Sociology; Executive Officer of the Department of Sociology*
Ph.B., 1928, M.A., 1930, Ph.D., 1931, Chicago
- Farquharson, Frederick Burt, 1925 (1940), *Professor of Civil Engineering; Director of the Engineering Experiment Station*
B.S. in M.E., 1923, M.E., 1927, Washington
- Farwell, George Wells, 1948 (1959), *Professor of Physics; Associate Dean of the Graduate School*
S.B., 1941, Harvard; Ph.D., 1948, Chicago
- Fea, Henry Robert, 1954 (1959), *Associate Professor of Education*
B.A., 1942, B.Ed., 1947, M.Ed., 1948, Saskatchewan; Ph.D., 1950, California
- Fell, James Michael Gardner, 1956 (1960), *Associate Professor of Mathematics*
B.S., 1943, British Columbia; M.S., 1945, Ph.D., 1951, California
- Fernald, Robert Leslie, 1946 (1959), *Associate Professor of Zoology; Director of Friday Harbor Laboratories*
A.B., 1937, Monmouth College; Ph.D., 1941, California
- Fields, Paul Eldon, 1955, *Professor of Psychology*
A.B., 1926, A.M., 1927, Ohio Wesleyan; Ph.D., 1930, Ohio State
- Firey, Joseph Carl, 1954 (1960), *Professor of Mechanical Engineering*
B.S. in M.E., 1940, Washington; M.S. in M.E., 1941, Wisconsin
- Fischer, Edmond H., 1953 (1961), *Professor of Biochemistry*
Ph.D., 1947, Geneva
- Fischer, Louis, 1929 (1945), *Professor of Pharmaceutical Chemistry; Associate Dean of the College of Pharmacy; Chairman of the Department of Pharmaceutical Chemistry*
B.S., Ph.C., 1926, M.S., 1928, Ph.D., 1933, Washington
- Flanagan, William Francis, 1959, *Assistant Professor of Metallurgical Engineering*
B.S. in Physics, 1951, M.S., 1953, Sc.D., 1959, Massachusetts Institute of Technology
- Fleagle, Robert Guthrie, 1948 (1956), *Professor of Meteorology and Climatology*
A.B., 1940, Johns Hopkins; M.S., 1944, Ph.D., 1949, New York
- Fleming, Richard Howell, 1951, *Professor of Oceanography; Executive Officer of the Department of Oceanography*
B.A., 1929, M.A., 1931, British Columbia; Ph.D., 1935, California
- Florey, Ernst, 1956 (1960), *Associate Professor of Zoology*
Ph.D., 1953, University of Graz (Austria)
- Flowers, W. Baker, 1958 (1960), *Associate Professor of Accounting*
B.S., 1943, M.S., 1949, Alabama; Ph.D., 1959, Texas; C.P.A., 1954, State of Texas
- Foltz, Eldon Leroy, 1950 (1958), *Associate Professor of Neurosurgery*
B.S., 1941, Michigan State; M.D., 1943, Michigan
- Foote, Hope Lucille, 1923 (1948), *Professor of Art*
A.B., 1920, Iowa State Teachers College; M.A., 1923, Columbia
- Foster, Clifford Donald, 1959, *Assistant Professor in Education*
B.S., 1947, Northeast Missouri State College; M.A., 1952, Ph.D., 1957, Washington
- Fowler, David Covington, 1952 (1959), *Associate Professor of English; Associate Dean of the Graduate School*
B.A., 1942, Florida; M.A., 1947, Ph.D., 1949, Chicago
- Fox, Katharine Shirley, 1945 (1948), *Assistant Professor of Physical Education*
B.S., 1938, Washington; M.S., 1943, Oregon; Ph.D., 1955, Iowa
- Franzke, Albert Leonard, 1936 (1939), *Associate Professor of Speech*
B.A., 1916, M.A., 1923, Lawrence College (Wisconsin)
- French, Wendell L., 1958, *Associate Professor of Personnel*
B.A., 1948, M.P.S., 1949, Colorado; D.Ed., 1956, Harvard
- Fuller, Steven D., 1946 (1958), *Associate Professor of Art*
B.A., 1939, M.F.A., 1948, Washington
- Fyfe, Ian Millar, 1959, *Assistant Professor of Aeronautical Engineering*
A.R.T.C., 1950, Royal College of Science and Technology (Glasgow, Scotland); M.M.E., 1954, Delaware; Ph.D., 1957, Stanford
- Gallagher, Marian Gould, 1944 (1953), *Professor of Law; Law Librarian*
B.A., 1935, LL.B., 1937, B.A. in L.S., 1939, Washington

- Galstaun, Vanick Samuel, 1950 (1959), *Assistant Professor of Drama*
B.A., 1946, San Francisco State College; M.A., 1948, Washington
- Ganzer, Victor Martin, 1947 (1953), *Professor of Aeronautical Engineering*
B.A., 1933, Augustana College (Illinois); B.S. in A.E., 1941, Washington
- Garfield, Viola Edmundson, 1937 (1955), *Associate Professor of Anthropology*
B.A., 1928, M.A., 1931, Washington; Ph.D., 1939, Columbia
- Garlid, Kermit L., 1960, *Assistant Professor of Chemical Engineering*
B.S., 1950, River Falls State College (Wisconsin); B.Ch.E., 1956, Ph.D., 1961, Minnesota
- Gartler, Stanley Michael, 1957 (1961), *Associate Professor of Medicine and Genetics*
B.S., 1948, California (Los Angeles); Ph.D., 1952, California (Berkeley)
- Gates, Charles Marvin, 1936 (1951), *Professor of History*
B.A., 1926, Yale; M.A., 1928, Harvard; Ph.D., 1934, Minnesota
- Geballe, Ronald, 1943 (1959), *Professor of Physics; Executive Officer of the Department of Physics*
B.S., 1938, M.S., 1940, Ph.D., 1943, California
- Gerhart, James Basil, 1956 (1961), *Associate Professor of Physics*
B.S., 1950, California Institute of Technology; M.A., 1952, Ph.D., 1954, Princeton
- Gerstenberger, Donna L., 1960 (1961), *Assistant Professor of English*
B.A., 1951, Whitman College; M.A., 1952, Ph.D., 1958, Oklahoma
- Gessel, Stanley Paul, 1948 (1961), *Professor of Forest Soils*
B.S., 1939, Utah State Agricultural College; Ph.D., 1950, California
- Getoor, Ronald Kay, 1956 (1960), *Associate Professor of Mathematics*
A.B., 1950, M.S., 1951, Ph.D., 1954, Michigan
- Giblin, Elizabeth Clare, 1959, *Associate Professor of Medical-Surgical Nursing*
B.S.N., 1943, M.N., 1954, Washington; Ed.D. 1959, Colorado
- Gillam, Cornelius W., 1954 (1956), *Associate Professor of Business Law*
B.A., 1945, Carleton College; M.A., 1946, Minnesota; J.D., 1950, Ph.D., 1954, Chicago
- Gillingham, John Benton, 1947 (1961), *Associate Professor of Economics; Executive Officer of the Department of Economics*
A.B., 1939, Washington State; M.A., 1941, Wisconsin
- Goldberg, Leonard D., 1947 (1956), *Associate Professor of Business Law*
A.B., 1943, J.D., 1945, Chicago
- Golde, Hellmut, 1959, *Assistant Professor of Electrical Engineering*
Dip.-Ing, 1953, Technische Hochschule; M.S., 1955, Ph.D., 1959, Stanford
- Gonzales, Boyer, 1954, *Professor of Art; Director of the School of Art; Director, Henry Art Gallery*
B.S. in Architecture, 1931, Virginia; Student of McFee and Kuniyoshi
- Gordon, Donald Flemming, 1950 (1957), *Associate Professor of Economics*
B.A., 1944, Saskatchewan; M.A., 1946, Toronto; Ph.D., 1949, Cornell
- Gordon, Guy C., 1949 (1957), *Associate Professor of Marketing*
B.A., 1949, M.B.A., 1950, Washington; Ph.D., 1957, California
- Gordon, Milton P., 1959, *Assistant Professor of Biochemistry*
B.A., 1950, Minnesota; Ph.D., 1953, Illinois
- Gottfried, Alex, 1950 (1961), *Associate Professor of Political Science*
Ed.B., 1941, Chicago Teachers College; A.M., 1948, Ph.D., 1952, Chicago
- Gould, Florence Jones, 1948 (1958), *Associate Professor of English*
A.B., 1928, M.A., 1931, Oregon
- Grathwohl, Harrison L., 1958 (1960), *Associate Professor of Marketing*
B.S., 1951, M.B.A., 1952, D.B.A., 1957, Indiana
- Gray, Florence Irene, 1945 (1959), *Associate Professor of Nursing*
B.S.N., 1945, M.S., 1950, Washington
- Gray, Robert Simpson, 1939 (1961), *Associate Professor of Drama*
B.A., 1936, M.A., 1938, Washington
- Gregory, Norman Wayne, 1946 (1957), *Professor of Chemistry*
B.S., 1940, M.S., 1941, Washington; Ph.D., 1943, Ohio State
- Greengo, Robert E., 1957, *Assistant Professor of Anthropology*
A.B., 1948, M.A., 1951, California; Ph.D., 1957, Harvard

- Greenwald, Gilbert S., 1956 (1959), *Assistant Professor of Anatomy*
A.B., 1949, M.A., 1951, Ph.D., 1954, University of California (Berkeley)
- Griffiths, Gordon, 1959, *Associate Professor of History, Acting Executive Officer of the Department of History*
A.B., 1936, Ph.D., 1942, California (Berkeley); B.A., 1939, M.A., 1946, Oxford (England)
- Grimes, Wilma Horrell, 1953 (1961), *Associate Professor of Speech*
B.A., 1928, Wisconsin; M.A., 1947, Northwestern; Ph.D., 1953, Illinois
- Grimshaw, Austin, 1949, *Professor of Business Policy; Dean of the College of Business Administration*
S.D. in C.E., 1927, M.B.A., 1934, D.C.S., 1938, Harvard
- Groman, Neal Benjamin, 1950 (1958), *Associate Professor of Microbiology*
S.B., 1947, Ph.D., 1950, Chicago
- Gronewold, David H., 1954 (1960), *Professor of Social Work*
B.A., 1929, North Central College; M.A., 1952, Chicago
- Grummel, William Charles, 1950 (1955), *Associate Professor of Classics*
A.B., 1937, St. Louis; A.M., 1940, Washington University (St. Louis); Ph.D., 1949, New York
- Guidon, Michael, III, 1946 (1956), *Associate Professor of Mechanical Engineering*
B.S. in M.E., 1942, Lehigh; M.S. in M.E., 1952, Washington
- Guilford, Edward Charles, 1959 (1961), *Associate Professor of Electrical Engineering*
B.A., 1942, M.A., 1950, Utah; Ph.D., 1959, California (Berkeley)
- Gullans, Charles Bennett, 1955 (1957), *Assistant Professor of English*
B.A., 1948, M.A., 1951, Minnesota; Ph.D., 1956, Stanford
- Gunther, Erna, 1923 (1941), *Professor of Anthropology; Director of the Washington State Museum*
A.B., 1919, Barnard; A.M., 1920, Ph.D., 1928, Columbia
- Haag, Richard, 1958 (1960), *Associate Professor of Landscape Design*
B.S.L.A., 1950, California (Berkeley); M.L.A., 1952, Harvard
- Haaga, Agnes Marie, 1947 (1960), *Associate Professor of Drama*
B.A., 1936, Siena College (Tennessee); M.A., 1952, Northwestern
- Hafermehl, C. Louis, 1957 (1960), *Associate Professor of Art*
B.F.A., 1940, Bethany College (Kansas); M.F.A., 1955, Cranbrook Academy of Art (Michigan)
- Haggis, Alex John, 1960 (1961), *Assistant Professor of Zoology*
A.B., 1949, M.S., 1951, Wayne State; Ph.D., 1955, Rochester
- Hall, Florence Turnbull, 1952, *Assistant Professor of Home Economics*
B.Sc., 1943, Manitoba; M.S., 1945, Minnesota
- Hall, James Kendall, 1930 (1934), *Professor of Economics*
A.B., 1925, A.M., 1926, Oregon; Ph.D., 1929, Stanford
- Hall, James Winford, 1949 (1961), *Professor of English*
A.B., 1937, Kansas City; M.A., 1938, Wisconsin; Ph.D., 1949, Cornell
- Hall, Nathan Albert, 1952 (1961), *Professor of Pharmacy*
B.S., 1939, Ph.D., 1948, Washington
- Haller, Mary Elizabeth, 1931 (1949), *Associate Professor of Mathematics*
B.A., 1924, M.S., 1931, Ph.D., 1934, Washington
- Halpern, Isaac, 1953 (1960), *Professor of Physics*
B.S., 1943, City College of New York; Ph.D., 1948, Massachusetts Institute of Technology
- Halsey, George Dawson, Jr., 1951 (1958), *Professor of Chemistry*
B.S. in Ch.E., 1943, South Carolina; Ph.D., 1948, Princeton
- Hamack, Frank Hartmond, 1921 (1942), *Lecturer in Accounting*
LL.B., 1916, Georgetown
- Hamilton, Albert Charles, 1952 (1959), *Associate Professor of English*
B.A., 1945, Manitoba; M.A., 1948, Toronto; Ph.D., 1952, Cambridge
- Hammarlund, Edwin Roy, 1960, *Associate Professor of Pharmacy*
B.S., 1944, M.S., 1949, Ph.D., 1951, Washington
- Hanahan, Donald James, 1948 (1959), *Professor of Biochemistry*
B.S., 1941, Ph.D., 1944, Illinois

- Hanley, Clair Norton, 1952 (1956), *Associate Professor of Speech*
B.A., 1947, M.A., 1950, Ph.D., 1952, Iowa
- Hanneman, Carl Frederick, 1960, *Assistant Professor of Social Work*
B.A., 1949, Washington State; M.A., 1951, Indiana
- Hanson, Gordon Harold, 1960, *Assistant Professor of Electrical Engineering*
B.A., 1949, M.A., 1951, British Columbia; Ph.D., 1957, Minnesota
- Hanson, Kermit Osmond, 1948 (1954), *Professor of Accounting, Finance, and Statistics; Associate Dean of the College of Business Administration*
A.B., 1938, Luther College (Iowa); M.S., 1940, Ph.D., 1950, Iowa State College
- Hanzeli, Victor Egon, 1957 (1961), *Assistant Professor of Romance Languages and Literature*
LL.B., 1947, Pazmany Peter University (Budapest); M.A., 1955, Ph.D., 1961, Indiana
- Harbold, William Henry, 1949 (1955), *Assistant Professor of Political Science*
A.B., 1947, Pennsylvania State; M.A., 1949, Ph.D., 1953, Harvard
- Harder, Virgil E., 1955 (1959), *Associate Professor of Business Communications*
B.S.C., 1950, M.A., 1950, Iowa; Ph.D., 1958, University of Illinois
- Harkins, Henry Nelson, 1947, *Professor of Surgery; Executive Officer of the Department of Surgery*
B.S., 1925, M.S., 1926, Ph.D., 1928, M.D., 1931, Chicago
- Harrington, Donal Francis, 1938 (1952), *Professor of Drama*
B.A., 1928, Montana; M.A., 1933, Columbia
- Harris, Edison Davis, 1947, *Associate Professor of Music*
B.S., 1942, New York
- Harris, Markham, 1946 (1957), *Associate Professor of English*
A.B., 1929, M.A., 1931, Williams
- Harrison, Arthur Elliot, 1948 (1952), *Professor of Electrical Engineering*
B.S. in E.E., 1936, California; M.S., 1937, Ph.D., 1940, California Institute of Technology
- Hartz, Billy J., 1955 (1957), *Associate Professor of Civil Engineering*
B.S. (C.E.), 1952, M.S. (C.E.), 1954, Ph.D., 1955, California
- Hatch, Melville Harrison, 1927 (1941), *Professor of Zoology*
B.A., 1919, M.A., 1921, Ph.D., 1925, Michigan
- Hayden, Alice Hazel, 1942 (1952), *Professor of Education; Director of Graduate Studies in Education*
Ph.C., 1928, B.S., M.S., 1929, Oregon State; Ph.D., 1932, Purdue
- Hayner, Norman Sylvester, 1925 (1937), *Professor of Sociology*
A.B., 1920, Washington; M.A., 1921, Ph.D., 1923, Chicago
- Heath, Willis Robertson, 1957 (1959), *Assistant Professor of Geography*
B.A., 1954, M.A., 1956, Ph.D., 1958, Washington
- Heathers, Louise Bussard, 1945, *Assistant Professor of Psychology; Senior Clinical Psychologist in the Counseling Center*
B.A., 1933, Washington; Ph.D., 1940, Yale
- Heideger, William Joseph, 1957, *Assistant Professor in Chemical Engineering*
B.S., 1954, Carnegie Institute of Technology; M.S.E., 1955, Ph.D., 1959, Princeton
- Heilman, Robert Bechtold, 1948, *Professor of English; Executive Officer of the Department of English*
A.B., 1927, Lafayette; M.A., 1930, Ohio State College; M.A., 1931, Ph.D., 1935, Harvard
- Heinemann, Margot Edith, 1954 (1956), *Assistant Professor in Medical-Surgical Nursing; Educational Coordinator of the Harborview Teaching Unit*
B.S.N., 1945, Seattle University; M.N., 1954, Washington
- Heinitz, Eva, 1948 (1956), *Associate Professor of Music*
- Henderson, Joseph Edmonds, 1929 (1942), *Professor of Physics; Director of the Applied Physics Laboratory*
B.S., 1922, College of Wooster; Ph.D., 1928, Yale
- Henley, Ernest M., 1954 (1961), *Professor of Physics*
B.E.E., 1944, City College of New York; Ph.D., 1951, California
- Hennes, Robert Graham, 1934 (1947), *Professor of Civil Engineering*
B.S. in C.E., 1927, Notre Dame; M.S., 1928, Massachusetts Institute of Technology

- Henning, Charles Nathaniel, 1948 (1955), *Professor of Finance; Director Faculty Research and Publications in College of Business Administration*
A.B., 1938, M.A., 1940, Ph.D., 1952, California (Los Angeles)
- Henning, Dale A., 1955 (1956), *Associate Professor of Policy and Administration and Production*
B.S., 1948, M.B.A., 1949, Pennsylvania; Ph.D., 1954, Illinois
- Henry, Bernard Stauffer, 1931 (1941), *Professor of Microbiology*
B.S., 1925, M.A., 1926, Ph.D., 1931, California
- Hensley, Mercedes Hoover, 1939 (1952), *Lecturer in Art*
B.F.A., 1930, M.F.A., 1938, Washington
- Hermans, Thomas Gerald, 1929 (1940), *Assistant Professor of Psychology*
B.S., 1923, M.A., 1927, Washington
- Hewitt, Edwin, 1948 (1954), *Professor of Mathematics*
A.B., 1940, M.A., 1941, Ph.D., 1942, Harvard
- Hickey, Maurice J., 1956, *Professor of Oral Surgery; Dean of the School of Dentistry*
D.M.D., 1932, Harvard; M.D., 1937, Columbia
- Higgs, Paul McClellan, 1926 (1959), *Associate Professor of Physics*
B.S., 1919, Washington
- Hilen, Andrew Reuben, Jr., 1945 (1959), *Professor of English*
B.A., 1937, Washington; Ph.D., 1943, Yale
- Hill, W. Ryland, 1941 (1953), *Professor of Electrical Engineering; Associate Dean of the College of Engineering*
B.S. in E.E., 1934, Washington; M.S. in E.E., 1938, E.E., 1941, California
- Hitchcock, C. Leo, 1937 (1944), *Professor of Botany; Executive Officer of the Department of Botany; Curator of Herbarium*
A.B., 1927, Pomona; A.M., 1929, Claremont Colleges; Ph.D., 1931, Washington University (St. Louis)
- Hitchner, Dell Gillette, 1947 (1951), *Associate Professor of Political Science*
B.A., 1936, Wichita; M.A., 1937, Missouri; Ph.D., 1940, Wisconsin
- Hixson, William John, 1950 (1958), *Associate Professor of Art*
B.A., 1948, M.F.A., 1950, Oregon
- Hoffman, Katherine Janet, 1942 (1956), *Professor of Nursing; Assistant Dean of the School of Nursing; Director of the Graduate Programs in Nursing*
A.B., 1929, College of Puget Sound; Diploma, 1934, Tacoma General Hospital School of Nursing; M.N., 1941, Ph.D., 1956, Washington
- Holland, John Joseph, 1959, *Assistant Professor of Microbiology*
B.S., 1953, Loyola; Ph.D., 1957, California (Los Angeles)
- Holt, William Stull, 1940, *Professor of History*
A.B., 1920, Cornell; Ph.D., 1926, Johns Hopkins
- Hopkins, William Stephen, 1946, *Professor of Economics*
B.S., 1925, M.A., 1928, Oregon; Ph.D., 1932, Stanford
- Horita, Akira, 1954 (1961), *Associate Professor of Pharmacology*
A.B., 1950, M.S., 1951, Ph.D., 1954, Washington
- Horst, A. Paul, 1947, *Professor of Psychology*
B.A., 1927, California; Ph.D., 1931, Chicago
- Horton, George Plant, 1934 (1946), *Associate Professor of Psychology; Acting Executive Officer of the Department of Psychology*
B.S., 1926, M.A., 1930, Ph.D., 1932, Princeton
- Horwood, Edgar Miller, 1946 (1957), *Associate Professor of Civil Engineering*
B.S. in M.E., 1942, Georgia Institute of Technology; M.S. in Regional Planning, 1951, Washington; Ph.D., 1959, University of Pennsylvania
- Hosmer, Margaret George, 1948 (1954), *Lecturer in Home Economics*
B.S., 1918, North Carolina
- Hougie, Cecil, 1960, *Associate Professor of Pathology; Director, Hospital Clinical Hematology Laboratory*
M.R.C.S. (England), L.R.C.P. (London), 1945; M.B., B.S., 1946, University of London
- Howery, Victor I., 1952 (1953), *Professor of Social Work; Dean of the School of Social Work*
B.S., 1936, Wisconsin State; Ph.M., 1946, M.S.W., 1948, Ph.D., 1949, Wisconsin

- Hsiao, Kung-chuan, 1951 (1959), *Professor of Far Eastern Languages and Literature; Assistant Director of the Far Eastern and Russian Institute*
Graduate, 1920, National Tsinghua (China); B.A., 1922, M.A., 1923, Missouri;
Ph.D., 1926, Cornell
- Hsu, Chih-Chi, 1958, *Assistant Professor of Electrical Engineering*
B.S., 1945, Chiao-Tung University, Shanghai, China; M.S.E., 1949, University of Michigan;
Ph.D., 1951, Ohio State University
- Hsu, Wellington Siang, 1944 (1960), *Professor of Zoology*
B.S., 1922, Illinois; M.S., 1924, D.Sc., 1928, Harvard
- Huber, J. Richard, 1939 (1949), *Professor of Economics*
B.A., 1931, College of Wooster; M.A., 1933, Ph.D., 1937, Princeton
- Hudson, G. Donald, 1951, *Professor of Geography; Executive Officer of the Department of Geography*
Ph.B., 1925, A.M., 1926, Ph.D., 1934, Chicago
- Huenekens, Frank, 1951 (1961), *Professor of Biochemistry*
B.S., 1943, Ph.D., 1948, California
- Hufford, George Allen, 1958, *Assistant Professor of Mathematics*
B.S., Engr., 1946, California Institute of Technology; MSEE, 1948, Washington;
M.A., 1952, Ph.D., 1953, Princeton
- Hughes, Eric Lester, 1951 (1956), *Assistant Professor of Physical Education*
B.S., 1947, M.S., 1948, Illinois; D.Ed., 1956, Washington
- Hughes, Glenn Arthur, 1919 (1942), *Professor of Drama*
B.A., 1916, Stanford; M.A., 1920, Washington
- Huitric, Alain C., 1955 (1957), *Assistant Professor of Pharmaceutical Chemistry*
B.S., 1950, Loyola; M.S., 1952, Ph.D., 1954, California
- Hunt, Marguerite, 1949 (1960), *Professor of Social Work*
A.B., 1929, Brown; M.S., 1936, Western Reserve
- Hurvitz, Leon Nahum, 1955 (1957), *Assistant Professor of Japanese Language and Literature*
B.A., 1949, Chicago; M.A., 1951, Ph.D., 1959, Columbia
- Illg, Paul Louis, 1952 (1959), *Professor of Zoology*
A.B., 1936, M.A., 1941, California; Ph.D., 1952, George Washington
- Immerwahr, Raymond Max, 1958 (1960), *Professor of Germanic Languages and Literature*
B.A., 1934, Swarthmore; M.A., 1935, Northwestern; Ph.D., 1941, California (Berkeley)
- Ingle, John Ide, 1948 (1959), *Professor of Periodontics and Endodontics; Executive Officer of the Department of Periodontics and Endodontics*
D.D.S., 1942, Northwestern; M.S.D., 1948, Michigan
- Irmischer, William Frederick, 1960, *Associate Professor of English; Director of Freshman English*
B.A., 1941, Louisville; M.A., 1947, Chicago; Ph.D., 1950, Indiana
- Irvine, Demar Buel, 1937 (1960), *Professor of Music*
A.B., 1929, M.A., 1931, California; Ph.D., 1937, Harvard
- Isbell, John Rolfe, 1957 (1959), *Associate Professor of Mathematics*
B.S., 1951, Chicago; Ph.D., 1954, Princeton
- Ishimaru, Akira, 1954 (1961), *Associate Professor of Electrical Engineering*
B.S. in E.E., 1951, Tokyo; Ph.D., 1958, Washington
- Jackson, William A. Douglas, 1955 (1960), *Professor of Geography and of Far Eastern and Slavic Languages and Literature*
B.A., 1946, M.A., 1949, Toronto; Ph.D., 1953, Maryland
- Jacobs, Melville, 1928 (1952), *Professor of Anthropology*
A.B., 1922, City College of New York; A.M., 1923, Ph.D., 1931, Columbia
- Jacobsohn, Boris Abbott, 1948 (1959), *Professor of Physics*
A.B., 1938, A.M., 1939, Columbia; Ph.D., 1947, Chicago
- Jacobson, Berthe Poncy, 1937 (1948), *Professor of Music*
Diploma, 1915, Conservatory of Music (Geneva); Diploma, 1917, Schola Cantorum (Paris);
Diploma, 1921, Dalcroze School (Geneva)
- Jans, James P., 1957 (1960), *Associate Professor of Mathematics*
A.B., 1949, M.A., 1950, Ph.D., 1955, Michigan

- Jensen, Lyle Howard, 1949 (1961), *Professor of Anatomy*
B.A., 1939, Walla Walla College; Ph.D., 1943, Washington
- Jerbert, Arthur Rudolph, 1921 (1937), *Associate Professor of Mathematics*
B.S., 1916, M.S., 1923, Ph.D., 1928, Washington
- Jessup, John Hunnicutt, 1926 (1927), *Associate Professor of Educational Sociology*
A.B., 1920, Earlham College; M.A., 1924, Iowa
- Johanson, Lennart Noble, 1951 (1956), *Associate Professor of Chemical Engineering*
B.S., 1942, Utah; M.S., 1943, Ph.D., 1948, Wisconsin
- Johnson, David Laurence, 1955 (1961), *Professor of Electrical Engineering*
B.S. in E.E., 1948, Idaho; Ph.D., 1955, Purdue
- Johnson, Dudley W., 1960, *Associate Professor of Finance and Business Statistics*
B.A., 1950, Pacific University (Oregon); M.A., 1953, Ph.D., 1957, Northwestern
- Johnson, Fletcher Ormond, 1950, *Lecturer in Accounting*
B.B.A., 1924, Washington; C.P.A., 1925, States of Washington, Pennsylvania, California, Illinois
- Johnson, Mary Louise, 1945 (1957), *Professor of Home Economics;*
Director of the School of Home Economics
B.A., 1940, Hardin-Simmons (Texas); M.S., 1942, Wisconsin; D.Sc., 1954, Harvard School of Public Health
- Johnson, Pauline, 1941 (1958), *Professor of Art*
B.A., 1929, Washington; M.A., 1936, Columbia
- Johnson, Richard A., 1955 (1959), *Associate Professor of Production, Policy and Administration*
B.B.A., 1949, M.B.A., 1952, Minnesota; D.B.A., 1958, Washington
- Johnson, Walter G., 1948 (1956), *Professor of Scandinavian Languages*
B.A., 1927, Augsburg College; M.A., 1929, Minnesota; Ph.D., 1935, Illinois
- Johnston, Norman John, 1960 (1961), *Associate Professor of Architecture and Urban Planning*
B.A., 1942, Washington; B.Arch., 1949, Oregon; Master of City Planning, 1959, Pennsylvania
- Jolivet, Vincent M., 1956 (1959), *Associate Professor of Finance*
B.S., 1952, McGill; M.B.A., 1954, D.B.A., 1957, Harvard
- Jones, Frank William, 1955, *Associate Professor of English and Comparative Literature*
B.A., 1934, Manitoba; Ph.D., 1941, Wisconsin; B.A., M.A., 1955, Oxford (England)
- Joppa, Robert Glenn, 1945 (1957), *Associate Professor of Aeronautical Engineering*
B.S. in A.E., 1945, M.S. in A.E., 1951, Washington
- Kahn, Robert Ludwig, 1948 (1960), *Associate Professor of Germanic Literature*
B.A., 1944, M.A., 1945, Dalhousie (Nova Scotia); Ph.D., 1950, Toronto
- Kakiuchi, Hiroaki George, 1957 (1960), *Assistant Professor of Geography*
A.B., 1952, A.M., 1953, Ph.D., 1957, Michigan
- Kaminsky, Howard, 1957, *Assistant Professor of History*
M.A., 1949, Ph.D., 1952, Chicago
- Kaplan, Alex, 1960, *Associate Professor of Biochemistry*
A.B., 1932, Ph.D., 1936, California (Berkeley)
- Kast, Fremont E., 1951 (1961), *Professor of Production, Policy and Administration*
A.B., 1946, San Jose State College; M.B.A., 1949, Stanford; D.B.A., 1956, Washington
- Katz, Solomon, 1936 (1950), *Professor of History; Dean of the College of Arts and Sciences*
A.B., 1930, Ph.D., 1933, Cornell
- Keller, Abraham Charles, 1948 (1952), *Associate Professor of Romance Languages and Literature*
B.A., 1936, M.A., 1937, Ohio State; Ph.D., 1946, California
- Kent, Joseph Chan, 1952 (1961), *Associate Professor of Civil Engineering*
B.S. in C.E., 1945, British Columbia; M.S. in C.E., 1948, Stanford; Ph.D., 1952, California
- Kenworthy, Ray W., 1929 (1950), *Associate Professor of Physics*
B.A., 1924, M.S., 1925, Iowa; Ph.D., 1938, Washington
- Key, David, 1957 (1960), *Assistant Professor of Philosophy*
A.B., 1951, Kenyon College; M.A., 1953, Ph.D., 1955, Cornell

- Kidwell, M. Kathro, 1939 (1950), *Associate Professor of Physical Education*
B.S., 1927, Nebraska; M.S., 1928, Wisconsin; Ed.D., 1954, Columbia
- Kim, Young Bae, 1955 (1957), *Assistant Professor of Physics*
B.S., 1950, Washington; Ph.D., 1954, Princeton
- Kingston, John Maurice, 1940 (1959), *Associate Professor of Mathematics;*
Executive Secretary of the Department of Mathematics
B.A., 1935, Western Ontario; M.A., 1936, Ph.D., 1939, Toronto
- Klee, Victor L., Jr., 1953 (1957), *Professor of Mathematics*
B.A., 1945, Pomona College; Ph.D., 1949, Virginia
- Klutas, Edna May, 1960, *Assistant Professor of Occupational Health Nursing and*
Public Health Nursing
Diploma, 1940, Columbia-Presbyterian School of Nursing, New York; B.S., 1951, Washington; M.P.H., 1957, Yale
- Knowles, Henry P., 1957 (1961), *Assistant Professor of Personnel*
B.S., 1935, U.S. Naval Academy; M.B.A., 1947, Harvard, Ph.D., 1961, Stanford
- Knudson, Harry R., Jr., 1958 (1961), *Associate Professor of Personnel and*
Human Relations
B.S., 1952, M.B.A., 1953, Indiana; D.B.A., 1958, Harvard
- Kobayashi, Albert Satoshi, 1958 (1961), *Associate Professor of Mechanical*
Engineering
B.S., 1947, Tokyo; M.S. in M.E., 1952, Washington; Ph.D., 1958, Illinois Institute of Technology
- Kolb, Keith Robert, 1952 (1960), *Associate Professor of Architecture*
B.Arch., 1947, Washington; M.Arch., 1950, Harvard
- Kolde, Endel Jakob, 1951 (1959), *Professor of International Business and*
Marketing
B.S., 1949, National Military Academy (Estonia); D.H.S., 1947, Stockholm (Sweden); M.A., 1951, D.B.A., 1954, Washington
- Korg, Jacob, 1955 (1956), *Assistant Professor of English*
B.A., 1943, City College of New York; M.A., 1947, Ph.D., 1952, Columbia
- Kraus, Bertram S., 1957, *Professor of Physical Anthropology*
A.B., 1934, Western Reserve University; M.A., Ph.D., 1949, Chicago
- Kraut, Joseph, 1953 (1958), *Assistant Professor of Biochemistry*
B.S., 1950, Bucknell; Ph.D., 1953, California Institute of Technology
- Krebs, Edwin Gerhard, 1948 (1957), *Professor of Biochemistry*
A.B., 1940, Illinois; M.D., 1943, Washington University (St. Louis)
- Kruckeberg, Arthur Rice, 1950 (1960), *Associate Professor of Botany*
B.A., 1941, Occidental College; Ph.D., 1950, California
- Krupski, Edward, 1944 (1955), *Associate Professor of Pharmaceutical Chemistry*
B.S., 1939, M.S., 1941, Ph. D., 1949, Washington
- Kunde, Norman Frederick, 1931 (1949), *Associate Professor of Physical Education*
B.S., 1928, M.S., 1932, Washington; D.Ed., 1946, New York
- Larsen, Otto Nyholm, 1949 (1958), *Associate Professor of Sociology; Director,*
Washington Institute for Sociological Research
B.A., 1947, M.A., 1949, Ph.D., 1955, Washington
- La Russo, Dominic Anthony, 1951 (1956), *Assistant Professor of Speech*
B.A., 1950, M.A., 1952, Ph.D., 1956, Northwestern
- Law, David Barclay, 1947 (1949), *Associate Professor of Pedodontics; Executive*
Officer of the Department of Pedodontics
D.D.S., B.S.D., 1938, M.S., 1941, Northwestern
- Lawrence, Richard Glenn, 1956 (1961), *Associate Professor of Social Work,*
Assistant Dean of the School of Social Work
B.A., 1948, M.A., 1951, Iowa
- LeBreton, Preston P., 1960, *Professor of Policy and Administration and Executive*
Officer of the Department of Policy, Personnel Relations and Production
B.S., 1947, M.B.A., 1949, Louisiana State; Ph.D., 1953, Illinois
- Lee, Gordon Canfield, 1961, *Professor and Dean, College of Education*
A.B., 1937, University of California; M.A., 1938, Ph.D., 1948, Columbia

- Leggett, Glenn Hubert, 1952, *Associate Professor of English; Vice Provost*
B.A., 1940, Middlebury College; B.A., 1941, Ph.D., 1949, Ohio State
- Leik, Robert Kendric, 1959, *Assistant Professor of Sociology*
B.S., 1953, Oregon; M.S., 1957, Ph.D., 1959, Wisconsin
- Lewis, Laurel Jones, 1946 (1954), *Professor of Electrical Engineering*
A.B., 1933, E.E., 1935, Ph.D., 1947, Stanford
- Li, Fang-kuei, 1949 (1950), *Professor of Chinese Linguistics and of Anthropology*
A.B., 1926, Michigan; A.M., 1927, Ph.D., 1928, Chicago
- Lieberman, Irving, 1956, *Professor of Librarianship; Director of the School of Librarianship*
B.S., 1935, New York; B.S. (L.S.), 1939, Ed.D., 1955, Columbia
- Lingafelter, Edward Clay, Jr., 1939 (1952), *Professor of Chemistry; Associate Dean of the Graduate School*
B.S., 1935, Ph.D., 1939, California
- Liston, John, 1957 (1960), *Associate Professor of Fisheries*
B.S., 1952, University of Edinburgh (Scotland); Ph.D., 1955, University of Aberdeen (Scotland)
- Little, Wallace I., 1954 (1956), *Associate Professor of Transportation*
B.S., 1943, M.S., 1947, Illinois; Ph.D., 1952, Wisconsin
- Loomis, Ted Albert, 1947 (1957), *Professor of Pharmacology; State Toxicologist*
B.S., 1939, Washington; M.S., 1941, Ph.D., 1943, Buffalo; M.D., 1946, Yale
- Lord, Jere Johns, 1952 (1957), *Associate Professor of Physics*
A.B., 1943, Reed College; M.A., 1948, Ph.D., 1950, Chicago
- Lorig, Arthur Nicholas, 1934 (1949), *Professor of Accounting*
B.A., 1922, Wisconsin; M.A., 1932, Stanford; Ph.D., 1936, Chicago; C.P.A., 1927, State of California
- Loucks, Roger Brown, 1936 (1948), *Professor of Psychology*
B.S. in C.E., 1927, Ph.D., 1930, Minnesota
- Lounsbury, Warren Carson, 1948 (1958), *Lecturer in Drama*
A.B., 1946, Western Reserve; M.A., 1953, Washington
- Lovett, Wendell Harper, 1948 (1960), *Associate Professor of Architecture*
B.Arch., 1947, Washington; M.Arch., 1948, Massachusetts Institute of Technology
- Luft, John H., 1956 (1961), *Associate Professor of Anatomy*
B.S., 1949, M.D., 1953, Washington
- Lytle, Dean, 1958, *Assistant Professor of Electrical Engineering*
B.S. in E.E., 1950, University of California; M.S. in E.E., 1954, Ph.D., 1957, Stanford
- Lytle, Scott Harrison, 1949 (1957), *Associate Professor of History*
A.B., 1940, Princeton; Ph.D., 1948, Cornell
- Macdonald, Catherine Joan, 1945 (1954), *Assistant Professor of Social Work*
B.A., 1936, Washington
- MacDonald, Cecilia, 1949 (1957), *Associate Professor of Elementary Education*
B.A., 1946, Central Washington College of Education; M.Ed., 1952, Washington
- Mackin, Joseph Hoover, 1934 (1947), *Professor of Geology*
B.S., 1930, New York; M.A., 1932, Ph.D., 1936, Columbia
- Magee, Donal Francis, 1951 (1957), *Associate Professor of Pharmacology*
B.A., 1944, M.A., B.Med., B.Ch., 1948, Oxford (England); Ph.D., 1952, Illinois
- Maier, Henry William, 1959 (1960), *Associate Professor of Social Work*
A.B., 1947, Oberlin College; M.S., 1949, Western Reserve; Ph.D., 1959, Minnesota
- Maki, John McGilvrey, 1939 (1956), *Professor of Japanese Government and Politics*
B.A., 1932, M.A., 1936, Washington; Ph.D., 1948, Harvard
- Mallory, Virgil Standish, 1952 (1957), *Associate Professor of Geology*
A.B., 1943, Oberlin; M.A., 1948, Ph.D., 1952, California
- Mander, Linden Alfred, 1928 (1937), *Professor of Political Science*
B.A., 1917, M.A., 1920, Adelaide (Australia)
- Mansfield, Louise Wasson, 1951 (1952), *Assistant Professor of Medical-Surgical Nursing*
Diploma, 1937, Samaritan Hospital School of Nursing (Idaho); B.S., 1947, Ohio State; M.A., 1951, Columbia

- Marckworth, Gordon Dotter, 1939, *Professor of Forest Management; Dean of the College of Forestry*
B.S.F., 1916, Ohio State; M.F., 1917, Yale
- Marcus, Sumner, 1955 (1961), *Professor of Business Law; Executive Officer of the Department of General Business*
A.B., 1931, M.B.A., 1933, LL.B., 1936, Harvard; D.B.A., 1958, Washington
- Martin, Arthur Wesley, Jr., 1937 (1950), *Professor of Physiology; Executive Officer of the Department of Zoology*
B.S., 1931, College of Puget Sound; Ph.D., 1936, Stanford
- Martin, Charles Emanuel, 1924, *Professor of Political Science; Director of the Institute of International Affairs*
B.Litt., 1914, M.A., 1915, California; Ph.D., 1918, Columbia; LL.D., 1942, Southern California
- Martin, George M., 1957 (1960), *Assistant Professor of Pathology*
B.S., 1949, M.D., 1953, Washington
- Martin, Harold Clifford, 1948 (1952), *Professor of Aeronautical Engineering*
B.S. in M.E., 1934, M.S., 1937, New York; Ph.D., 1950, California Institute of Technology
- Martin, Howard Hanna, 1930 (1940), *Professor of Geography*
B.S., 1922, Pennsylvania; A.M., 1923, Ph.D., 1929, George Washington; Sc.D. (Hon.), 1937, Monmouth College
- Marts, Marion Ernest, 1946 (1961), *Professor of Geography; Director of Evening Classes and of Summer Quarter*
B.A., 1937, M.A., 1944, Washington; Ph.D., 1950, Northwestern
- Masek, George E., 1957 (1961), *Associate Professor of Physics*
B.S., 1950, M.S., 1951, Ph.D., 1955, Stanford
- Mason, Alden C., 1946 (1957), *Associate Professor of Art*
B.A., 1942, M.F.A., 1947, Washington
- Matchett, William H., 1954 (1961), *Associate Professor of English*
B.A., 1949, Swarthmore; M.A., 1950, Ph.D., 1957, Harvard
- McAdams, Laura Elizabeth, 1941 (1951), *Associate Professor of Home Economics*
B.S., 1923, M.S., 1932, Kansas State
- McCaffree, Kenneth Maurice, 1949 (1956), *Associate Professor of Economics*
B.A., 1940, Southwestern College (Kansas); M.A., 1942, Denver; Ph.D., 1950, Chicago
- McCarthy, Joseph Le Page, 1941 (1952), *Professor of Chemical Engineering; Dean of the Graduate School*
B.S. in Ch.E., 1934, Washington; M.S., 1936, Idaho; Ph.D., 1938, McGill
- McCarthy, Walter Charles, 1949 (1957), *Associate Professor of Pharmaceutical Chemistry*
B.S., 1943, Massachusetts Institute of Technology; Ph.D., 1949, Indiana
- McDiarmid, John Brodie, 1949 (1956), *Professor of Classics; Executive Officer of the Department of Classics*
B.A., 1936, Toronto; Ph.D., 1940, Johns Hopkins
- McFarlan, Lee Horace, 1927 (1946), *Professor of Mathematics*
B.S., 1917, Kansas State Teachers College; M.A., 1921, Ph.D., 1924, Missouri
- McFeron, Dean Earl, 1958, *Professor of Mechanical Engineering*
B.S. in M.E., 1943, M.S. in M.E., 1948, Colorado; Ph.D., 1956, Illinois
- McGuire, Joseph William, 1950 (1961), *Professor of Business Fluctuations*
Ph.B., 1948, Marquette; M.B.A., 1950, Ph.D., 1956, Columbia
- McKay, George Frederick, 1927 (1943), *Professor of Music*
B.Mus., 1923, Rochester
- McKee, Bates, 1958, *Assistant Professor of Geology*
B.S., 1955, Yale; Ph.D., 1958, Stanford
- McKeever, Benjamin Butler, 1949, *Associate Professor of Psychology*
A.B., 1930, M.A., 1931, Harvard; Ph.D., 1940, Iowa
- McKinnon, Richard Nichols, 1951 (1957), *Associate Professor of Japanese Language and Literature*
A.B., 1947, A.M., 1949, Ph.D., 1951, Harvard

- McMinn, Bryan Towne, 1920 (1946), *Professor of Mechanical Engineering; Executive Officer of the Department of Mechanical Engineering*
B.S. in M.E., 1918, Oregon State; M.S. in M.E., 1926, M.E., 1931, Washington
- McMinn, Trevor James, 1956, *Assistant Professor of Mathematics*
B.A., 1942, Utah; Ph.D., 1955, California
- McNeilly, Clyde Emerson, 1959, *Assistant Professor of Ceramic Engineering*
B.S. Cer. E., 1954, Ph.D., 1958, Alfred
- Meeuse, Bastiaan Jacob Dirk, 1952 (1960), *Professor of Botany*
B.Sc., 1936, Doctoraal Examen, 1939, Leiden (Holland); Doctor, 1943, Delft (Holland)
- Meier, Robert C., 1957 (1961), *Assistant Professor of Production*
B.S., 1952, Indiana; M.A., 1955; Ph.D., 1961, Minnesota
- Melden, Abraham Irving, 1946 (1956), *Professor of Philosophy*
A.B., 1931, California (Los Angeles); A.M., 1932, Brown; Ph.D., 1938, California
- Merendino, K. Alvin, 1948 (1955), *Professor of Surgery*
B.A., 1936, Ohio; M.D., 1940, Yale; Ph.D., 1946, Minnesota
- Metzger, Lore, 1960 (1961), *Assistant Professor of English*
B.A., 1946, Hunter College; M.A., 1947, Ph.D., 1956, Columbia
- Meyer, Herman Carl Henry, 1934 (1942), *Associate Professor of Germanic Languages; Executive Secretary of the Department of Germanics*
B.A., 1924, Capital (Ohio); Ph.D., 1936, Chicago
- Michael, Ernest A., 1953 (1960), *Professor of Mathematics*
B.A., 1947, Cornell; M.A., 1948, Harvard; Ph.D., 1951, Chicago
- Michael, Franz H., 1942 (1948), *Professor of Far Eastern History and Government*;
Dr.Jur., 1933, Freiburg (Germany)
- Miller, Alfred Lawrence, 1923 (1937), *Professor of Mechanics and Structures*
B.S. in C.E., 1920, C.E., 1926, Washington
- Miller, Charles John, 1927 (1945), *Professor of Marketing; Executive Officer of the Department of Marketing, Transportation, and International Business*
B.B.A., 1922, M.B.A., 1927, Washington
- Mills, Blake David, Jr., 1946 (1947), *Professor of Mechanical Engineering*
B.S. in M.E., B.S. in E.E., 1934, Washington; M.S. in M.E., 1935, Massachusetts
Institute of Technology; M.E., 1947, Washington
- Mills, Caswell Albert, 1942 (1961), *Associate Professor of Physical Education; Lecturer in Public Health*
B.A., 1935, North Dakota State Teachers College; M.A., 1943, Ph.D., 1960, Washington
- Misch, Peter H., 1947 (1950), *Professor of Geology*
D.Sc., 1932, Göttingen (Germany)
- Mittet, Holger Peder, 1946 (1955), *Associate Professor of Civil Engineering*
B.S. in C.E., 1937, Washington; M.S. in C.E., 1938, Massachusetts Institute of Technology
- Miyamoto, Shotaro Frank, 1945 (1956), *Associate Professor of Sociology*
B.A., 1936, M.A., 1938, Washington; Ph.D., 1950, Chicago
- Moore, Alton Wallace, 1948 (1951), *Professor of Orthodontics; Executive Officer of the Department of Orthodontics*
D.D.S., 1941, California; M.S., 1948, Illinois
- Morel, Anne C., 1960 (1961), *Associate Professor of Mathematics*
B.A., 1941, California (Los Angeles); Ph.D., 1953, California
- Morgan, David William, 1959, *Assistant Professor of Metallurgical Engineering*
B.A.S.C., 1948, M.A.S.C., 1949, British Columbia; D.I.C., 1953, Imperial College of Science and Technology (London); Ph.D., 1959, London
- Moritz, Harold Kennedy, 1928 (1949), *Professor of Hydraulics*
B.S. in M.E., 1921, Massachusetts Institute of Technology
- Morrill, Richard L., 1960, *Assistant Professor of Geography*
B.A., 1955, Dartmouth; M.A., 1957, Ph.D., 1959, Washington
- Morris, Morris David, 1949 (1961), *Professor of Economics*
A.B., 1941, Ph.D., 1954, California
- Morrison, James Bryan, 1946 (1960), *Professor of Mechanical Engineering*
B.S. in M.E., 1943, Virginia Polytechnic Institute; M.S. in M.E., 1954, Washington
- Morrison, Kenneth N., 1948 (1957), *Associate Professor of Fixed Partial Dentures; Executive Officer of the Department of Fixed Partial Dentures*
D.D.S., 1943, Toronto (Canada); M.S., 1952, Washington

- Moseley, Spencer Altemont, 1948 (1959), *Associate Professor of Art*
B.A., 1948, M.F.A., 1951, Washington
- Mottet, N. Karle, 1959 (1961), *Associate Professor of Pathology*
B.S., 1947, Washington State University; M.D., 1952, Yale
- Motulsky, Arno Gunther, 1953 (1961), *Professor of Medicine and Genetics*
B.S., 1945, M.D., 1947, Illinois
- Moulton, Ralph Wells, 1941 (1950), *Professor of Chemical Engineering; Executive Officer of the Department of Chemical Engineering*
B.S. in Ch.E., 1932, M.S. in Ch.E., 1934, Ph.D., 1938, Washington
- Mueller, Fred J., 1956 (1959), *Associate Professor of Accounting and Finance*
B.A., 1953, M.A., 1954, Washington; Ph.D., 1956, Ohio State
- Mueller, James Irving, 1949 (1955), *Professor of Ceramic Engineering*
B.Cer.E., 1939, Ohio State; Ph.D., 1949, Missouri
- Mund, Vernon Arthur, 1932 (1937), *Professor of Economics*
B.B.A., 1928, M.B.A., 1929, Washington; Ph.D., 1932, Princeton
- Munro, Kathleen, 1929 (1945), *Professor of Music*
B.M., 1924, Washington; M.A., 1929, Columbia; Ph.D., 1937, Washington
- Murphey, W. Rhoads, III, 1952 (1956), *Associate Professor of Geography*
A.B., 1941, Harvard College; A.M., 1942, A.M., 1948, Ph.D., 1950, Harvard University
- Murray, B. Louise, 1957, *Assistant Professor of Maternal Child Nursing*
B.S., 1938, Portland; M.N., 1950, Washington
- Nash, Shirley Istars, 1952 (1957), *Assistant Professor of Nursing; Educational Coordinator, Virginia Mason Hospital Teaching Unit*
Diploma, 1941, Virginia Mason Hospital School of Nursing; B.S., C.N.S., 1949, M.N., 1956, Washington
- Nece, Ronald Elliott, 1959 (1961), *Associate Professor of Civil Engineering*
B.S. in C.E., 1949, Washington; M.S. in C.E., 1951, Lehigh; Sc.D., 1958, Massachusetts Institute of Technology
- Neddermeyer, Seth Henry, 1946 (1952), *Professor of Physics*
A.B., 1929, Stanford; Ph.D., 1935, California Institute of Technology
- Nelson, Oliver Wendell, 1945 (1952), *Associate Professor of Speech*
B.A., 1933, M.A., 1939, Ph.D., 1949, Washington
- Nelson, Robert A., 1955 (1956), *Associate Professor of Transportation*
A.B., 1941, Clark; M.B.A., 1947, Boston; Ph.D., 1954, Clark
- Neurath, Hans, 1950, *Professor of Biochemistry; Executive Officer of the Department of Biochemistry*
Ph.D., 1933, Vienna
- Neushul, Michael, Jr., 1960, *Instructor in Botany*
B.A., 1955, Ph.D., 1959, University of California (Los Angeles)
- Nielsen, Mabel, 1957 (1959), *Assistant Professor of Home Economics*
B.S., 1935, Idaho; M.S., 1941, Iowa State College
- Nijenhuis, Albert, 1956 (1961), *Professor of Mathematics*
B.S., 1947, M.S., 1950, Ph.D., 1952, Amsterdam (The Netherlands)
- Nilsen, Thomas Robert, 1946 (1954), *Assistant Professor of Speech*
B.A., 1940, M.A., 1948, Washington; Ph.D., 1953, Northwestern
- Niven, Harold Franklin, Jr., 1958, *Assistant Professor of Radio-Television*
B.A., 1948, Denver; M.A., 1949, Stanford; Ph.D., 1958, Ohio State
- Noges, Endrik, 1958, *Assistant Professor of Electrical Engineering*
B.S., 1954, M.S., 1956, Ph.D., 1958, Northwestern
- Nordquist, William Bertil, 1947 (1955), *Associate Professor of Mechanical Engineering*
B.M.E., 1941, Rensselaer Polytechnic Institute; M.S., 1946, Massachusetts Institute of Technology
- Normann, Theodore Frederick, 1940 (1958), *Professor of Music*
B.A., 1925, Macalester College; M.A., 1928, Columbia
- North, Douglass Cecil, 1950 (1960), *Professor of Economics; Director of the Institute of Economic Research*
B.A., 1942, Ph.D., 1952, California
- Northwood, Lawrence K., 1959 (1960), *Associate Professor of Social Work*
B.A., 1947, Wayne; Ph.D., 1953, Michigan

- Nostrand, Howard Lee, 1939, *Professor of Romance Languages and Literature; Executive Officer of the Department of Romance Languages and Literature*
B.A., 1932, Amherst College; A.M., 1933, Harvard; Docteur, 1934, Université de Paris (France)
- Nunke, Ronald John, 1958, *Assistant Professor of Mathematics*
B.S., 1950, M.S., 1951, Ph.D., 1955, Chicago
- Nyhus, Lloyd M., 1952 (1959), *Associate Professor of Surgery*
B.A., 1945, Pacific Lutheran; M.D., 1947, Alabama
- O'Brien, Timothy Frederick, 1956 (1958), *Associate Professor of Aeronautical Engineering*
B.S. in A.E., 1947, M.S. in A.E., 1951, Sc.D., 1958, Massachusetts Institute of Technology
- Ogilvie, Alfred Livingston, 1951 (1957), *Associate Professor of Periodontics and Endodontics*
D.D.S., 1944, Toronto; M.S., 1948, California
- O'Keefe, Kathleen Baxter, 1959 (1960), *Assistant Professor of Mathematics*
A.B., 1946, M.S., 1948, Ph.D., 1959, California (Berkeley)
- Olcott, Virginia, 1931 (1945), *Associate Professor of Medical-Surgical Nursing*
Diploma, 1926, Peter Bent Brigham Hospital School of Nursing (Massachusetts); B.S., 1927, M.S., 1931, C.P.H.N., 1949, Washington
- Ordal, Erling Josef, 1937 (1957), *Professor of Microbiology*
B.A., 1927, Luther College; Ph.D., 1936, Minnesota
- Orians, Gordon H., 1960, *Assistant Professor of Zoology*
B.S., 1954, Wisconsin; Ph.D., 1960, California (Berkeley)
- Orr, Jack E., 1956, *Professor of Pharmacy; Dean of the College of Pharmacy; State Chemist*
B.S., 1940, Purdue; Ph.D., 1943, Wisconsin
- Osterud, Kenneth Leland, 1949, *Assistant Professor of Zoology*
B.A., 1935, Randolph-Macon College; Ph.D., 1941, New York
- Ottenberg, Simon, 1955 (1961), *Associate Professor of Anthropology*
B.A., 1948, Wisconsin; Ph.D., 1957, Northwestern
- Palmer, John Milton, 1952 (1954), *Assistant Professor of Speech*
B.A., 1946, M.A., 1950, Washington; Ph.D., 1952, Michigan
- Paris, Paul Croce, 1957, *Assistant Professor of Civil Engineering*
B.S. in C.E., 1953, Michigan; M.S., 1955, Lehigh
- Parsons, Jack R., 1955 (1957), *Associate Professor of Social Work*
B.A., 1935, M.A., 1940, College of the Pacific; M.S., 1943, Columbia; Ph.D., 1958, Chicago
- Pascal, Paul, 1953 (1956), *Assistant Professor of Classics*
B.A., 1948, Vermont; Ph.D., 1953, North Carolina
- Patterson, Viola Hansen, 1947 (1958), *Associate Professor of Art*
B.S. in L.S., 1921, B.F.A., 1925, M.F.A., 1947, Washington
- Patton, Harry Dickson, 1947 (1956), *Professor of Physiology and Biophysics*
B.A., 1939, Arkansas; Ph.D., 1943, M.D., 1946, Yale
- Payne, Blanche, 1927 (1942), *Professor of Home Economics*
B.S., 1916, Kansas State Teachers College; M.A., 1924, Columbia
- Pearce, John Kenneth, 1934 (1943), *Professor of Logging Engineering*
B.S.F., 1921, Washington
- Peck, Charles Elwin, 1951 (1955), *Associate Professor of Business Communications*
B.A., 1935, Wichita; M.A., 1947, Ph.D., 1950, Iowa
- Pedersen, Roma M. Kittelsby, 1953 (1961), *Associate Professor of Medical-Surgical Nursing*
B.S.N., 1943, Minnesota; M.N., 1955, Washington
- Peck, Clifford L., 1938, *Assistant Professor of Physical Education*
B.S., 1929, Washington; M.A., 1931, Columbia
- Pence, Orville Leon, 1941 (1954), *Associate Professor of Speech*
B.A., 1935, M.A., 1939, Washington; Ph.D., 1946, Iowa
- Penington, Ruth Esther, 1928 (1951), *Professor of Art*
B.F.A., 1927, M.F.A., 1929, Washington

- Perrin, Porter Gale, 1947, *Professor of English*
A.B., 1917, Dartmouth; A.M., 1921, Maine; Ph.D., 1936, Chicago
- Person, Henry Axel, 1937 (1961), *Associate Professor of English*
A.B., 1927, Ph.D., 1942, Washington
- Peterson, Marion Elizabeth, 1951 (1958), *Associate Professor of Librarianship*
B.A., 1930, B.A. in Librarianship, 1941, M.A., 1957, Washington
- Phillips, William Louis, 1949 (1961), *Associate Professor of English; Assistant Dean of the College of Arts and Sciences*
B.A., 1942, Iowa State Teachers College; M.A., 1947, Ph.D., 1949, Chicago
- Pierce, Richard Scott, 1955 (1960), *Professor of Mathematics*
B.S., 1950, Ph.D., 1952, California Institute of Technology
- Pifer, Drury Augustus, 1945 (1948), *Professor of Mining Engineering; Director of the School of Mineral Engineering*
B.S. in Min.E., 1930, M.S. in Min.E., 1931, Washington
- Pigott, William, III, 1957 (1960), *Associate Professor of Finance*
B.S.S., 1949, Seattle; M.A., 1955, Ph.D., 1957, Washington
- Plein, Elmer Michael, 1938 (1951), *Professor of Pharmacy; Coordinator of Pharmaceutical Services*
PhC., B.S., 1929; M.S., 1931, Ph.D., 1936, Colorado
- Polonis, Douglas Hugh, 1955 (1958), *Associate Professor of Metallurgical Engineering*
B.A.Sc., 1951, British Columbia; M.A.Sc., 1953, Toronto; Ph.D., 1955, British Columbia
- Poppe, Nicholas Nikolaevich, 1949 (1951), *Professor of Slavic and Altaic Studies and of Anthropology*
Master, 1923, Petrograd (Russia); Ph.D., 1934, Petersburg (Russia)
- Powell, Sargent Gastman, 1919 (1943), *Professor of Chemistry*
B.S., M.S., 1916, Washington; Ph.D., 1920, Illinois
- Powers, Francis Fountain, 1928 (1940), *Professor of Educational Psychology*
B.A., 1923, Washington; M.A., 1927, Oregon; Ph.D., 1928, Washington
- Prehn, Richmond T., 1958 (1960), *Associate Professor of Pathology*
M.D., 1947, Long Island College of Medicine
- Pressly, Thomas James, 1949 (1960), *Professor of History*
A.B., 1940, A.M., 1941, Ph.D., 1950, Harvard
- Pyke, Ronald, 1960, *Assistant Professor of Mathematics*
B.A., 1953, McMaster; M.S., 1955, Ph.D., 1956, Washington
- Rabinovitch, Benton Seymour, 1948 (1957), *Professor of Chemistry*
B.S., 1939, Ph.D., 1942, McGill
- Rader, Melvin Miller, 1930 (1948), *Professor of Philosophy*
A.B., 1925, M.A., 1927, Ph.D., 1929, Washington
- Rahskopf, Horace G., 1928 (1944), *Professor of Speech; Executive Officer of the Department of Speech*
A.B., 1920, Willamette; M.A., 1927, Ph.D., 1935, Iowa
- Rattray, Maurice, Jr., 1950 (1957), *Associate Professor of Oceanography*
B.S., 1944, M.S., 1947, Ph.D., 1951, California Institute of Technology
- Ray, Dixy Lee, 1945 (1957), *Associate Professor of Zoology (on leave 1961-63)*
B.A., 1937, M.A., 1938, Mills College; Ph.D., 1945, Stanford
- Ray, Verne Frederick, 1933 (1947), *Professor of Anthropology*
B.A., 1931, M.A., 1933, Washington; Ph.D., 1937, Yale
- Read, Kenneth E., 1957 (1958), *Associate Professor of Anthropology; Acting Executive Officer of the Department of Anthropology*
B.A., 1940, M.A., 1946, Sydney (Australia); Ph.D., 1948, London (England)
- Read, William Merritt, 1927 (1945), *Professor of Classics; Director of University Press*
A.B., 1923, DePauw; M.A., 1924, Ph.D., 1927, Michigan
- Redford, Grant H., 1945 (1956), *Associate Professor of English*
B.S., 1937, Utah State; M.A., 1940, Iowa
- Reed, Carroll Edward, 1946 (1959), *Professor of Germanic Languages*
B.A., 1936, M.A., 1937, Washington; Ph.D., 1941, Brown

- Reed, Richard John, 1954 (1958), *Associate Professor of Meteorology and Climatology*
B.S., 1945, California Institute of Technology; Sc.D., 1949, Massachusetts Institute of Technology
- Reeves, George Spencer, 1935 (1948), *Associate Professor of Physical Education*
B.S., 1933, Oregon State; M.S., 1937, Oregon; M.P.H., 1951, California
- Reiffer, Erwin, 1947 (1955), *Professor of Chinese Language*
Dr.Rer.Pol., 1931, Vienna (Austria)
- Reinert, Otto, 1956 (1958), *Assistant Professor of English*
B.A., 1947, Lafayette; M.A., 1948, Ph.D., 1952, Yale
- Reiss, Grace Dewey, 1947 (1960), *Associate Professor of Social Work*
B.A., 1932, Iowa; M.A., 1940, Minnesota
- Reshetar, John Stephen, Jr., 1957 (1958), *Associate Professor of Political Science*
B.A., 1945, Williams; M.A., 1946, Ph.D., 1950, Harvard
- Rey, William Henry, 1950 (1959), *Professor of Germanic Literature; Executive Officer of Germanic Languages*
Ph.D., 1937, Frankfurt (Germany)
- Reynolds, Donald Kelly, 1959 (1960), *Professor of Electrical Engineering*
B.A., 1941, M.A., 1942, Stanford; Ph.D., 1948, Harvard
- Richards, Francis Asbury, 1959, *Associate Professor of Oceanography*
B.S., 1939, Illinois; M.S., 1942, Nevada; Ph.D., 1950, Washington
- Richardson, Frank, 1956 (1959), *Associate Professor of Zoology; Curator in Zoology, Washington State Museum*
B.A., 1934, Pomona; Ph.D., 1939, California
- Richardson, Roger Wolcott, Jr., 1960, *Assistant Professor of Mathematics*
B.S., 1951, Louisiana State; Ph.D., 1958, Michigan
- Richey, Eugene Porter, 1954 (1956), *Associate Professor of Civil Engineering*
B.S. in C.E., 1941, Alaska; M.S., 1947, M.S. in C.E., 1948, California Institute of Technology; Ph.D., 1955, Stanford
- Riedel, Richard Anthony, 1949 (1950), *Assistant Professor of Orthodontics*
D.D.S., 1945, Marquette; M.D.S., 1948, Northwestern
- Rieke, William O., 1958 (1961), *Assistant Professor of Anatomy*
M.D., 1958, Washington
- Rising, L. Wait, 1934 (1936), *Professor of Pharmacy; Chairman of the Department of Pharmacy and Pharmacy Administration*
Ph.G., B.S., 1924, Oregon State; M.S., 1926, Ph.C., 1928, Ph.D., 1929, Washington
- Ritter, David Moore, 1944 (1959), *Professor of Chemistry*
S.B., 1933, Ph.D., 1937, Chicago
- Roberts, Earl Champion, 1954 (1958), *Professor of Metallurgical Engineering*
B.S. in Met.E., 1943, Montana School of Mines; M.S. in Met.E., 1950, D.Sc., 1952, Massachusetts Institute of Technology
- Robertson, James Campbell H., 1945 (1956), *Professor of Forest Management*
B.S.F., 1927, Washington; M.S.F., 1933, California; D.F., 1947, Duke
- Robinson, Dwight E., 1950 (1956), *Professor of Business Fluctuations*
B.A., 1936, Yale; M.A., 1946, Oxford (England); Ph.D., 1948, Columbia
- Robinson, Rex Julian, 1929 (1945), *Professor of Chemistry*
B.A., 1925, DePauw; M.A., 1927, Ph.D., 1929, Wisconsin
- Roethke, Theodore Huebener, 1947 (1948), *Professor of English*
A.B., 1929, A.M., 1936, Michigan
- Rogers, Walter Edwin, 1946 (1956), *Professor of Electrical Engineering*
B.S. in E.E., 1934, California; M.S. in E.E., 1948, Washington
- Roller, Julius Abraham, 1945 (1960), *Professor of Accounting; Acting Executive Officer of the Department of Accounting, Finance and Statistics*
B.B.A., 1934, Washington
- Roman, Herschel Lewis, 1942 (1952), *Professor of Genetics; Executive Officer of the Department of Genetics*
A.B., 1936, Ph.D., 1942, Missouri

- Roosen-Runge, Edward C., 1952 (1959), *Professor of Anatomy*
M.D., 1936, Hamburg (Germany)
- Rosenmeyer, Thomas Gustav, 1955 (1960), *Professor of Classics*
B.A., 1944, McMaster (Hamilton, Ontario); M.A., 1945, Toronto; Ph.D., 1949, Harvard
- Rosenzweig, Jim, 1956 (1959), *Associate Professor of Policy, Administration and Operations Research*
B.A., 1951, M.B.A., 1954, Washington; Ph.D., 1956, Illinois
- Rosinbum, Ralph Rambo, 1948 (1953), *Assistant Professor of Music*
B.A., 1947, M.A., 1948, Washington
- Royce, William F., 1958, *Professor of Fisheries; Director of the Fisheries Research Institute*
B.S., 1937, Ph.D., 1943, Cornell
- Ruch, Theodore Cedric, 1946, *Professor of Physiology; Executive Officer of the Department of Physiology and Biophysics*
B.A., 1927, Oregon; M.A., 1928, Stanford; B.A., 1930, B.Sc., 1932, Oxford (England); Ph.D., 1933, Yale
- Rushmer, Robert Frazer, 1947 (1956), *Professor of Physiology and Biophysics*
B.S., 1936, M.D., 1939, Chicago
- Ryan, Milo, 1946 (1957), *Professor of Journalism and Radio-Television*
B.A., 1928, M.A., 1934, Michigan
- Salyer, Rufus Coleman, Jr., 1953 (1956), *Assistant Professor of Education; Director of College of Education Bureau of Teacher Service and Placement*
B.A., 1930, Seattle Pacific; M.A., 1931, Ph.D., 1955, Washington
- Sanderman, Llewellyn Arthur, 1928 (1952), *Associate Professor of Physics; Executive Secretary of the Department of Physics*
B.S., 1923, Linfield College; M.S., 1931, Ph.D., 1943, Washington
- Saporta, Sol, 1960 (1961), *Associate Professor of Romance Languages*
B.A., 1944, Brooklyn College; M.A., 1952, Ph.D., 1955, Illinois
- Sarason, Irwin Gerald, 1956 (1959), *Associate Professor of Psychology*
B.A., 1951, Rutgers; M.A., 1953, Iowa; Ph.D., 1955, Indiana
- Sarkanen, Kyosti Vilho, 1961, *Associate Professor of Wood Chemistry in the College of Forestry; Lecturer in Chemical Engineering; Associate Director of the Institute of Forest Products*
B.Sc., 1947, Helsinki University; M.Sc., 1952, Ph.D., 1956, State University College of Forestry (New York)
- Sauerlander, Annemarie, 1947 (1949), *Associate Professor of Germanic Literature*
B.A., 1928, M.A., 1930, Buffalo; Ph.D., 1936, Cornell
- Savalle, Max, 1947, *Professor of History*
A.B., 1925, M.A., 1926, Ph.D., 1932, Columbia
- Sawhill, Roy Bond, 1956 (1960), *Associate Professor of Civil Engineering*
B.S. in C.E., 1950, Washington; M. of E., 1952, California
- Saxberg, Borje O., 1957, *Assistant Professor of Policy, Administration, and Production*
B. Econ., 1950, Swedish University College of Commerce (Finland); B.S., 1952, Oregon State; M.S., 1953, Ph.D., 1958, Illinois
- Scarf, Frederick Leonard, 1956 (1961), *Associate Professor of Physics*
A.B., 1951, Temple; Ph.D., 1955, Massachusetts Institute of Technology
- Schaeffer, Walter Howard, 1952 (1960), *Professor of Forestry*
B.S.F., 1936, Washington; M.S.F., 1937, Yale; Ph.D., 1952, Washington
- Schaller, Gilbert Simon, 1922 (1937), *Professor of Mechanical Engineering*
B.S. in M.E., 1916, Illinois; M.B.A., 1925, Washington
- Scher, Allen Myron, 1950 (1957), *Associate Professor of Physiology and Biophysics*
B.A., 1942, Ph.D., 1951, Yale
- Schluger, Saul, 1958, *Professor of Periodontics; Director, Graduate Dental Education*
D.D.S., 1931, Louisville

- Schmid, Calvin Fisher, 1937 (1941), *Professor of Sociology; Director of the Office of Population Research*
A.B., 1925, Washington; Ph.D., 1930, Pittsburgh
- Schmidt, Fred Henry, 1946 (1956), *Professor of Physics*
B.S.E., 1937, Michigan; M.A., 1940, Buffalo; Ph.D., 1945, California
- Schrag, Clarence Clyde, 1944 (1960), *Professor of Sociology*
B.A., 1939, Washington State; M.A., 1945, Ph.D., 1950, Washington
- Schrieber, Albert N., 1948 (1956), *Professor of Production and Policy and Administration*
B.S. in M.E., 1938, Illinois Institute of Technology; M.B.A., 1947, Harvard
- Schubert, Wolfgang Manfred, 1947 (1958), *Professor of Chemistry*
B.S., 1941, Illinois; Ph.D., 1947, Minnesota
- Scott, David Robert Main, 1955 (1960), *Associate Professor of Silviculture*
B.A., 1942, Virginia; M.F., 1947, Ph.D., 1950, Yale
- Segal, Jack, 1960 (1961), *Assistant Professor of Mathematics*
B.S., 1955, M.S., 1957, Miami; Ph.D., 1960, Georgia
- Selfridge, John Lewis, 1960 (1961), *Associate Professor of Mathematics*
B.S., 1951, Washington; Ph.D., 1958, California (Los Angeles)
- Sergev, Sergius Ivan, 1923 (1946), *Professor of Engineering Mechanics*
B.S. in M.E., 1923, M.E., 1931, Washington
- Seyfried, Warren R., 1956 (1958), *Associate Professor of Business Fluctuations and Real Estate*
B.S. (M.E.), 1943, Vanderbilt; M.B.A., 1954, D.B.A., 1956, Indiana
- Sherman, John Clinton, 1942 (1954), *Associate Professor of Geography*
A.B., 1937, Michigan; M.A., 1943, Clark; Ph.D., 1947, Washington
- Sherris, John Charles, 1959 (1960), *Associate Professor of Microbiology; Director of the Clinical Microbiology Laboratories at the University Hospital*
M.B., B.S., 1948, M.D., 1950, London (England)
- Shih, Vincent Yu-Chung, 1945 (1956), *Professor of Chinese Literature and Philosophy*
B.A., 1925, Fukien Christian (China); M.A., 1930, Yenching (China); Ph.D., 1939, Southern California
- Shimada, Katsunori, 1958, *Assistant Professor of Electrical Engineering*
B.S., 1945, Tokyo U.; M.S., 1954, Ph.D., 1958, Minnesota
- Shipman, George Anderson, 1946, *Professor of Political Science; Director of the Institute of Public Affairs*
B.A., 1925, M.A., 1926, Wesleyan (Connecticut); Ph.D., 1931, Cornell
- Siks, Geraldine Brain, 1950 (1961), *Associate Professor of Drama*
B.A., 1935, Central Washington College of Education; M.A., 1940, Northwestern
- Simpson, Lurline Violet, 1924 (1944), *Associate Professor of Romance Languages and Literature*
B.A., 1920, M.A., 1924, Ph.D., 1928, Washington
- Simpson, William Tracy, 1948 (1957), *Professor of Chemistry*
A.B., 1943, Ph.D., 1948, California
- Sivertz, Victorian, 1926 (1949), *Associate Professor of Chemistry, Executive Secretary of Department of Chemistry*
B.S., 1922, Washington; M.S., 1924, West Virginia; Ph.D., 1926, McGill
- Skahen, Julia Goodsell, 1946 (1961), *Associate Professor of Anatomy, Physiology and Biophysics*
B.S., 1926, M.S., 1928, Washington; Ph.D., 1940, Chicago
- Smith, Charles Wallace, 1948 (1959), *Associate Professor of Art*
Pratt Institute; B.A., 1954, Washington; M.F.A., 1956, Cranbrook Academy of Art
- Smith, Edmund Arthur, 1957 (1959), *Assistant Professor of Social Work*
B.A., 1953, M.A., 1954, Washington; Ph.D., 1957, Harvard
- Smith, Harriet Holbrook, 1949 (1960), *Associate Professor of Nursing Service Administration*
A.B., 1918, Mount Holyoke; Diploma, 1920, Seattle General Hospital School of Nursing; M. of Nursing, 1957, Washington

- Smith, Henry Ladd, 1955, *Professor of Journalism*
Ph.B., 1929, Yale; M.A., 1936, Ph.D., 1946, Wisconsin
- Smith, Moncrieff Hynson, Jr., 1949 (1959), *Professor of Psychology*
A.B., 1940, M.A., 1941, Missouri; Ph.D., 1947, Stanford
- Smith, Orville A., Jr., 1958 (1959), *Assistant Professor of Anatomy, Physiology and Biophysics*
B.A., 1949, Arizona; M.A., 1950, Ph.D., 1953, Michigan State
- Smullyan, Arthur Francis, 1946 (1956), *Professor of Philosophy; Executive Officer of the Department of Philosophy*
B.A., 1937, City College of New York; M.A., 1940, Ph.D., 1941, Harvard
- Snyder, Richard Craine, 1949 (1957), *Associate Professor of Zoology*
A.B., 1940, Bucknell; A.M., 1941, Ph.D., 1948, Cornell
- Sommerfeld, Franz Rene, 1947 (1961), *Associate Professor of Germanic Literature*
A.B., 1944, California (Berkeley); M.A., 1946, Columbia
- Sparks, Albert K., 1958 (1959), *Associate Professor of Fisheries*
B.S., 1947, M.S., 1949, Ph.D., 1957, Texas A and M
- Spector, Ivar, 1931 (1943), *Associate Professor of Russian Civilization*
Graduate, 1919, Teacher's Seminar (Russia); M.A., 1926, Northwestern; Ph.D., 1928, Chicago
- Sperry, Robert, 1954 (1960), *Associate Professor of Art*
B.A., 1950, Saskatchewan; M.F.A., 1955, Washington
- Spiro, Melford E., 1957, *Professor of Anthropology*
B.A., 1941, Minnesota; Ph.D., 1950, Northwestern
- Sreebny, Leo M., 1957, *Associate Professor of Oral Pathology; Executive Officer of the Department of Oral Pathology; Associate Professor Department of Pathology in the School of Medicine*
A.B., 1942, D.D.S., 1945, M.S., 1950, Ph.D., 1954, University of Illinois
- Stadler, David R., 1956 (1957), *Assistant Professor of Genetics*
A.B., 1948, Missouri; M.A., 1950, Ph.D., 1952, Princeton
- Stanton, Robert Bruce, 1956 (1958), *Assistant Professor of English*
B.A., 1949, M.A., 1950, Kansas City; Ph.D., 1953, Indiana
- Stein, Arnold Sidney, 1948 (1953), *Professor of English*
A.B., 1936, Yale; A.M., 1938, Ph.D., 1942, Harvard
- Steinbrueck, Victor, 1946 (1960), *Professor of Architecture*
B.Arch., 1935, Washington
- Stenzel, George, 1949 (1957), *Associate Professor of Logging Engineering*
B.S., 1938, New Hampshire; M.F., 1939, Yale
- Stevens, Leonard Woodbury, 1937 (1961), *Associate Professor of Physical Education*
B.S., 1933, M.S., 1941, Washington
- Stevens, Walter William, 1959, *Assistant Professor of Speech*
B.A., 1951, M.A., 1953, Wayne State; Ph.D., 1959, Michigan
- Stevenson, John K., 1954 (1959), *Assistant Professor of Surgery*
M.D., 1949, University of Rochester
- Stibbs, Gerald Denike, 1948, *Professor of Operative Dentistry and Fixed Partial Dentures; Executive Officer of the Department of Operative Dentistry; Director of the Dental Operatory*
B.S., D.M.D., 1931, Oregon
- Stirling, Brents, 1932 (1949), *Professor of English*
L.L.B., 1926, Ph.D., 1934, Washington
- Storey, Reed K., 1956 (1960), *Associate Professor of Accounting*
B.S., 1952, Utah; C.P.A., 1952, State of Utah; Ph.D., 1958, California
- Stotland, Ezra, 1957 (1961), *Associate Professor of Psychology*
B.S. in Social Science, 1948, City College of New York; M.A., 1949, Ph.D., 1953, Michigan
- Stout, George Hugh, 1957, *Assistant Professor of Chemistry*
B.S., 1953, M.S., 1954, Ph.D., 1956, Harvard
- Strausser, Howard Samuel, Jr., 1955 (1957), *Associate Professor of Civil Engineering*
B.S. in C.E., 1942, Virginia Military Institute; M.S.E., 1950, Johns Hopkins

- Strayer, George Drayton, Jr., 1949, *Professor of Educational Administration*
B.S., 1927, Princeton; M.A., 1928, Ph.D., 1934, Columbia
- Street, Robert Elliott, 1948 (1955), *Professor of Aeronautical Engineering*
B.S., 1933, Rensselaer Polytechnic Institute; A.M., 1934, Ph.D., 1939, Harvard
- Streib, John Frederick, Jr., 1947 (1960), *Associate Professor of Physics*
B.S., 1936, Ph.D., 1942, California Institute of Technology
- Strother, Charles Riddell, 1947, *Professor of Psychology; Professor of Clinical Psychology in the School of Medicine; Director of the Pilot School*
B.A., 1929, M.A., 1932, Washington; Ph.D., 1935, Iowa
- Strother, David Boyd, 1958, *Assistant Professor of Speech*
A.B., 1950, Georgetown College; M.A., 1951, Northwestern; Ph.D., 1958, Illinois
- Stuntz, Daniel Elliot, 1940 (1958), *Professor of Botany*
B.S., 1935, Washington; Ph.D., 1940, Yale
- Stutsman, Louise M., 1956 (1959), *Assistant Professor of Social Work*
B.A., 1940, Cornell College; M.A., 1949, Chicago
- Sugar, Peter Frigyes, 1959, *Assistant Professor of History*
A.B., 1954, City College of New York; A.M., 1956, Ph.D., 1959, Princeton
- Suh, Doo Soo, 1955, *Lecturer in Korean Languages and Literature*
Graduate, 1930, Keijo Imperial University (Seoul, Korea); M.A., Ph.D., 1953, Columbia University
- Sutermeister, Robert A., 1949 (1952), *Professor of Personnel Industrial Relations*
A.B., 1934, Harvard; M.A., 1942, Washington
- Swarm, Howard Myron, 1947 (1959), *Professor of Electrical Engineering*
B.S. in E.E., 1940, M.S. in E.E., 1950, Washington, Ph.D., 1960, Stanford
- Sylvester, Robert Ohrum, 1947 (1957), *Professor of Sanitary Engineering*
B.S. in C.E., 1936, Washington; S.M., 1941, Harvard
- Szeftal, Marc Moise, 1961, *Professor of Russian History; Professor of History*
Matura, 1919, Stan. Staszic Gymnasium, Magister of Laws, 1925, University of Warsaw;
Docteur en droit, 1934, Lic. Slav. Phil. Hist., 1939, Université Libre (Belgium)
- Taggart, Raymond, 1959, *Assistant Professor of Mechanical Engineering*
B.S., 1948, London; Ph.D., 1956, Queens (Belfast)
- Tate, Robert F., 1953 (1961), *Associate Professor of Mathematics*
A.B., 1944, California; M.A., 1949, North Carolina; Ph.D., 1952, California
- Taylor, Donald Stewart, 1954 (1955), *Assistant Professor of English*
A.B., 1947, M.A., 1948, Ph.D., 1950, California
- Taylor, George Edward, 1939 (1941), *Professor of Far Eastern History and Politics; Executive Officer of the Department of Far Eastern and Slavic Languages and Literature; Director of the Far Eastern and Russian Institute*
A.B., 1927, A.M., 1928, D.Litt., 1957, Birmingham (England)
- Terrell, Margaret Elma, 1928 (1944), *Professor of Home Economics*
A.B., 1923, Penn College (Iowa); M.A., 1927, Chicago
- Terry, Miriam, 1930 (1950), *Associate Professor of Music*
B.Mus., 1926, M.A., 1948, Washington
- Thomas, David Phillip, 1950 (1959), *Associate Professor of Forest Products*
B.S.F., 1941, M.F., 1948, Washington
- Thomas, Morgan David, 1959 (1960), *Associate Professor of Geography*
B.A., 1951, Ph.D., 1954, Queen's (Belfast, Northern Ireland)
- Thompson, Laurence C., Jr., 1957 (1959), *Assistant Professor of Linguistics and Russian*
A.B., 1949, Middlebury; M.A., 1950, Ph.D., 1954, Yale
- Tiffany, William Robert, 1947 (1956), *Associate Professor of Speech*
B.A., 1946, M.A., 1947, Washington; Ph.D., 1951, Iowa
- Torney, John Alfred, Jr., 1930 (1948), *Associate Professor of Physical Education*
B.S., 1928, Washington; M.A., 1930, Columbia
- Torrence, Gerard Rutgers, 1954 (1961), *Associate Professor of Architectural Engineering*
B.S. in C.E., 1949, Washington; M.S. in S.E., 1950, Massachusetts Institute of Technology
- Towe, Arnold L., 1953 (1957), *Assistant Professor of Physiology and Biophysics*
B.A., 1948, Pacific Lutheran; Ph.D., 1953, Washington

- Treadgold, Donald Warren, 1949 (1959), *Professor of Russian History; Professor of History*
B.A., 1943, Oregon; M.A., 1947, Harvard; D.Phil., 1950, Oxford (England)
- Tschudin, Mary Stickels, 1942 (1955), *Professor of Nursing; Dean of the School of Nursing*
B.S.N., 1935, C.P.H.N., 1936, M.S., 1939, Ph.D., 1959, Washington
- Tsutakawa, George, 1946 (1957), *Associate Professor of Art*
B.A., 1937, M.F.A., 1950, Washington
- Turner, Mabel Alexandra, 1941 (1959), *Associate Professor of Librarianship*
A.B., 1926, Oregon; B.S. in L.S., 1931, M.S. in L.S., 1959, Columbia
- Tyler, Varro E., Jr., 1957 (1961), *Professor of Pharmacognosy; Chairman of the Department of Pharmacognosy; Director, Drug Plant Gardens*
B.S., 1949, Nebraska; M.S., 1951, Ph.D., 1953, Connecticut
- Uehling, Edwin Albrecht, 1936 (1947), *Professor of Physics*
A.B., 1925, Wisconsin; M.A., 1930, Ph.D., 1932, Michigan
- Ullman, Edward L., 1951, *Professor of Geography*
S.B., 1934, Chicago; A.M., 1935, Harvard; Ph.D., 1942, Chicago
- Vance, Joseph Alan, 1957, *Assistant Professor of Geology*
B.S., 1951, Ph.D., 1957, Washington
- Van Cleve, Richard, 1948, *Professor of Fisheries; Dean of the College of Fisheries*
B.S., 1927, Ph.D., 1936, Washington
- Vanderbilt, Rolfe Kermit, 1958 (1960), *Assistant Professor of English*
B.A., 1947, Luther College (Iowa), M.A., 1949, Ph.D., 1956, Minnesota
- Van Horn, Robert Bowman, 1925 (1936), *Professor of Hydraulic Engineering*
B.S. in C.E., 1916, C.E., 1926, Washington
- Vargas-Barón, Anibal, 1949, *Associate Professor of Spanish*
B.A., 1926, Asbury College; M.A., 1929, Ph.D., 1943, Washington
- Vasarhelyi, Desi D., 1949 (1961), *Professor of Civil Engineering*
B.A., 1928, Ref. Collegium Kolozsvár (Romania); Dipl.Ingr., 1932, Dr.Ingr., 1944, Technical University (Budapest, Hungary)
- Verrall, John Weedon, 1948 (1959), *Professor of Music*
R.Mus., 1929, Minneapolis College of Music; Certificate of Music, 1932, Liszt Conservatory (Budapest); B.A., 1934, Minnesota
- Vopni, Sylvia Freda, 1952 (1961), *Associate Professor of Education*
B.A., 1931, M.A., 1938, Ph.D., 1955, Washington
- Wager, Leonard Wesley, 1954 (1957), *Assistant Professor of Sociology*
B.A., 1949, M.A., 1952, Washington; Ph.D., 1959, Chicago
- Wagner, Louis Charles, 1947 (1955), *Professor of Marketing*
B.B.A., 1938, Washington; M.A., 1940, Minnesota
- Wagoner, David R., 1954 (1961), *Associate Professor of English*
B.A., 1947, Pennsylvania State; M.A., 1949, Indiana
- Waibler, Paul John, 1954 (1961), *Professor of Mechanical Engineering*
B.S. in M.E., 1943, Kansas State; M.S. in M.E., 1944, Yale; Ph.D., 1958, Illinois
- Walker, Lauren McNeal, 1946 (1957), *Professor of Accounting*
B.A., 1939, M.B.A., 1943, Washington; C.F.A., 1943, State of Washington
- Walker, Richard Battson, 1948 (1960), *Professor of Botany*
B.S., 1938, Illinois; Ph.D., 1948, California
- Walter, Edward D., 1953 (1957), *Associate Professor of Social Work*
B.A., 1940, Carleton College; M.S.W., 1951, Southern California
- Ward, Arthur Allen, Jr., 1948 (1955), *Professor of Surgery; Head of the Division of Neurosurgery*
B.A., 1938, M.D., 1942, Yale
- Warner, Daniel S., 1954 (1955), *Associate Professor of Journalism*
B.A., 1928, Michigan; M.A., Oregon, 1958
- Warnke, Frank Joseph, 1961, *Associate Professor of English*
A.B., 1948, Yale; M.A., 1951, Ph.D., 1954, Columbia
- Watson, James Bennett, 1955, *Professor of Anthropology*
A.B., 1941, A.M., 1945, Ph.D., 1948, Chicago

- Watson, Walter, 1958 (1959), *Assistant Professor of Sociology*
B.A., 1953, Southern Methodist; M.S., 1954, Ph.D., 1959, Wisconsin
- Watt, Lynn Alexander Keeling, 1959, *Assistant Professor of Electrical Engineering*
B.S., 1947, Manitoba; S.M., 1951, Chicago; Ph.D., 1959, Minnesota
- Webster, Donald Hopkins, 1939 (1948), *Professor of Political Science; Director of the Bureau of Governmental Research and Services*
B.A., 1929, LL.B., 1931, Ph.D., 1933, Washington
- Weiner, Seymour S., 1953 (1959), *Associate Professor of Romance Languages and Literature*
B.A., 1940, City College of New York; M.A., 1941, California; M.S. in L.S., Ph.D., 1952, Columbia
- Weiser, Russell Shivley, 1934 (1949), *Professor of Microbiology*
B.S., 1930, M.S., 1931, North Dakota State; Ph.D., 1934, Washington
- Weiss, Daniel Aaron, 1955 (1958), *Assistant Professor of English*
B.A., 1939, Northwestern; M.A., 1950, Columbia; Ph.D., 1955, Northwestern
- Welander, Arthur Donovan, 1937 (1958), *Professor of Fisheries, Professor in Laboratory of Radiation Biology*
B.S., 1934, M.S., 1940, Ph.D., 1946, Washington
- Welman, Valentine S., 1954 (1957), *Assistant Professor of Art*
B.F.A., 1952, Denver; M.F.A., 1954, Colorado
- Wessman, Harold Everett, 1948, *Professor of Civil Engineering; Dean of the College of Engineering*
B.S., 1924, M.S., 1925, C.E., 1929, Ph.D., 1936, Illinois
- West, Theodore Clinton, 1949 (1959), *Associate Professor of Pharmacology*
B.S., 1948, M.S., 1949, Ph.D., 1952, Washington
- Wheatley, John J., 1960, *Assistant Professor of Marketing*
S.B., 1947, Harvard; M.B.A., 1954, Ph.D., 1959, Buffalo
- Wheeler, Bayard O., 1948 (1953), *Professor of General Business and Real Estate*
A.B., 1928, California; M.A., 1930, Washington; Ph.D., 1942, California
- Wheeler, Harry Eugene, 1948 (1951), *Professor of Geology*
B.S., 1930, Oregon; A.M., 1932, Ph.D., 1935, Stanford
- Wheeler, Sara H., 1955 (1960), *Associate Professor of Librarianship*
B.A., 1936, Nebraska; B.S., (L.S.), 1940, Columbia; M.A., 1954, Chicago
- Whiteley, Arthur Henry, 1947 (1959), *Professor of Zoology*
B.A., 1938, Kalamazoo College; M.A., 1939, Wisconsin; Ph.D., 1945, Princeton
- Wilcox, Philip E., 1952 (1957), *Associate Professor of Biochemistry*
B.S., 1943, California Institute of Technology; Ph.D., 1949, Wisconsin
- Wilets, Lawrence, 1958 (1959), *Associate Professor of Physics*
B.S., 1948, Wisconsin; M.A., 1950, Ph.D., 1952, Princeton
- Wilhelm, Hellmut, 1948 (1953), *Professor of Chinese History and Literature*
Ph.D., 1932, Berlin (Germany)
- Wilkie, Richard Francis, Jr., 1937 (1948), *Assistant Professor of Germanic Literature*
B.A., 1934, M.A., 1936, Washington; Ph.D., 1953, California
- Williams, Robert Walter, 1959 (1960), *Professor of Physics*
A.B., 1941, Stanford; M.A., 1943, Princeton; Ph.D., 1948, M.I.T.
- Williston, Frank Goodman, 1943 (1949), *Professor of Far Eastern History*
A.B., 1922, Ohio Wesleyan; M.A., 1926, Ph.D., 1935, Chicago
- Wilsing, Weston C., 1953 (1960), *Associate Professor of Secretarial Studies*
B.Ed., 1943, Wisconsin Teachers College; M.A., 1946, Columbia; D.B.A., 1959, Washington
- Wilson, Clotilde, 1929 (1961), *Associate Professor of Romance Languages*
B.A., 1926, M.A., 1927, Ph.D., 1931, Washington
- Wilson, Ruth Marian, 1936 (1945), *Associate Professor of Physical Education; Executive Officer of the Department of Physical Education for Women*
B.S., 1931, Utah; M.S., 1936, Wisconsin
- Wilson, William Charles Eade, 1928 (1947), *Professor of Romance Languages*
B.A., 1922, Montana; M.A., 1925, Ph.D., 1928, Washington
- Wilson, William Ronald, 1920 (1929), *Professor of Psychology*
B.A., 1917, M.S., 1920, Ph.D., 1925, Washington

- Wingate, Marcel E., 1957, *Assistant Professor of Speech*
B.A., 1948, Grinnell; M.S., 1952; Ph.D., 1956, Washington
- Winther, Sophus Keith, 1925 (1940), *Professor of English*
B.A., 1918, M.A., 1919, Oregon; Ph.D., 1926, Washington
- Wittfogel, Karl August, 1949, *Professor of Chinese History*
Ph.D., 1938, Frankfurt (Germany)
- Wolfe, Myer Richard, 1949 (1958), *Professor of Urban Planning*
B.S., 1940, New Hampshire; M. Regional Planning, 1947, Cornell
- Wood, Richard Lyman, 1959, *Instructor in Anatomy*
B.A., 1950, Linfield College; Ph.D., 1957, Washington
- Woodburne, Lloyd Stuart, 1950, *Professor of Psychology*
A.B., 1929, M.A., 1930, Ph.D., 1932, Michigan
- Woodbury, J. Walter, 1950 (1957), *Associate Professor of Physiology and Biophysics*
B.S., 1943, M.S., 1947, Ph.D., 1950, Utah
- Woodcock, Edith, 1930 (1945), *Associate Professor of Music*
B.M., 1925, Rochester; M.M., 1936, Washington
- Woolf, William Blauvelt, 1959 (1960), *Assistant Professor of Mathematics*
B.A., 1953, Pomona College; M.A., 1955, Claremont College; Ph.D., 1959, Michigan
- Worcester, Dean Amory, Jr., 1946 (1951), *Associate Professor of Economics*
B.A., 1939, M.A., 1940, Nebraska; Ph.D., 1943, Minnesota
- Wykhuis, Walter A., 1956, *Associate Professor of Prosthodontics*
B.A., 1932, Calvin College; D.D.S., 1936, Chicago College of Dental Surgery
- Wylie, Turrell Verl, 1958 (1959), *Assistant Professor of Tibetan Language and Civilization*
B.A., 1952, Ph.D., 1958, Washington
- Yen, Isabella Yiyun, 1960, *Associate Professor of Chinese Language*
B.A., 1938, National Peking (China); A.M., 1951, Michigan; Ph.D., 1956, Cornell
- Young, Allan Charles, 1949 (1960), *Professor of Physiology and Biophysics*
B.A., 1930, M.A., 1932, British Columbia; Ph.D., 1934, Toronto
- Young, Harry Allen, 1948, *Professor of Prosthodontics; Executive Officer of the Department of Prosthodontics*
D.D.S., 1919, Indiana
- Zelle, Max Romaine, 1961, *Professor of Genetics; Director, Center for Radiological Sciences*
B.S., 1937, Ph.D., 1940, Iowa State College
- Zetlin, Emanuel Roman, 1947, *Professor of Music*
B.A., 1916, Imperial Conservatory (Petrograd); D.Mus. (Hon.), 1936, Washington College of Music, Washington, D. C.
- Zillman, Lawrence John, 1932 (1953), *Professor of English*
B.A., 1928, Ph.D., 1936, Washington
- Zuckerman, Herbert Samuel, 1939 (1952), *Professor of Mathematics*
B.S., 1932, California Institute of Technology; M.S., 1934, Chicago; Ph.D., 1936, California

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

GENERAL INFORMATION

GENERAL INFORMATION

The University of Washington Graduate School was formally established in 1911 and over the years it has grown steadily in quality, scope, and size.

Programs leading to the master's and doctor's degrees are offered in fifty-eight departments or other organizational units within twelve schools and colleges of the University. Graduate instruction and the supervision of the research of graduate students is conducted by a Graduate Faculty of some seven hundred senior professors. More than three thousand graduate students are now seeking their master's or doctorate degrees in the Graduate School at the University of Washington, and some three hundred postdoctorate students are also in residence.

In addition to its primary role in relation to graduate students, graduate faculty, and graduate study programs and degrees, the Graduate School is also responsible for the administration of certain academic or research activities and facilities of general significance in all or many fields of knowledge throughout the University.

ORGANIZATION AND ADMINISTRATION

The Graduate School is administratively responsible for graduate study in whatever division of the University such study is undertaken. This involves supervision of student programs which go beyond formal undergraduate work or the work of the professional schools into areas of advanced training education, research, and scholarship.

The Graduate School is administered through the Office of the Dean, the Executive Committee of the Graduate School, Group Operating Committees, and the Graduate Faculty Council. The Graduate Faculty Council is composed of representatives elected to eight Group Operating Committees by the members of the graduate faculty, and it and the Executive Committee of the Graduate School serve as the legislative and policy-making bodies of the graduate faculty. The Executive Committee consists of the Dean of the Graduate School and the elected chairman of each of the eight group Operating Committees; it acts as an advisory group to the Dean and as an administrative committee for the Graduate Faculty Council.

PHILOSOPHY AND OBJECTIVES

The Graduate School recognizes major responsibilities in three closely related fields—teaching, research, and public service.

Highly able students who have completed baccalaureate programs are offered the opportunity further to improve their knowledge, understanding, and ability to create and to practice in their chosen fields. Their achievements may be recognized by the award of the degree of Master at the end of one or two years of study, or Doctor at the end of three or more years of study. Students who have completed advanced degree programs usually serve as teachers, research or administrative leaders, or professional practitioners in their respective fields.

In contrast with undergraduate work, graduate study is ordinarily focused quite sharply on some specific field and the student is expected to develop and demonstrate substantial initiative, mature judgment, and creativeness. Often the graduate student carries on his program in close association with his chosen professor in a tutorial type relationship.

Many diverse programs of graduate study are available. In nearly all of these two objectives can be distinguished, although their relative importance may differ. In many programs particular emphasis is placed on leading the student to excellence in his ability to teach, and to create new knowledge by research; his achievements are recognized by the award to him of the Master of Arts or the Master of Science degree, or the Doctor of Philosophy degree. In other programs emphasis is placed on leading the student to excellence in his ability to practice the art of his field or profession; in these cases his achievements are recognized by the award to him of a more specifically designated degree such as Master of Nursing or Master of Science in Electrical Engineering or of Doctor of Education.

A program of graduate study normally includes advanced class work and lectures but is particularly characterized by the independent study and research which the graduate student is expected to conduct. The results of this independent study and research are set forth in a Master's thesis or a Doctor's dissertation. A Master's thesis is a modest contribution to knowledge, or a review or a report on knowledge, or a design, or a composition in the student's field. A Doctor's dissertation should set forth a significant contribution to knowledge in the student's field presented in scholarly form and demonstrating that he is now competent to conduct reliable, important, and independent research.

The Graduate School is concerned basically with the fundamental and applied research activities conducted throughout the University, and endeavors to assist in the development of arrangements, funds, and facilities needed to encourage and support the research activities of the professors, students, and other scholars and scientists engaged in investigational work. The Graduate School is also concerned with the maintenance and steady improvement in the public service provided by the University to the state, the region, and the nation, and especially including research cooperation with other institutions and with business and industry.

The primary contributions from the University's Graduate School to the community are to be found in the students who have achieved high levels of competence as evidenced by their completion of programs of advanced study, and in the significant research results obtained by these students, their professors, and other scholars and scientists associated with the University.

UNIVERSITY RESEARCH COORDINATION

Research is of particular concern to the Graduate School since the advanced instruction of graduate students is largely guidance in research, and since the continuing effectiveness of professors in instruction of graduate students rests largely upon continuation of the scholarly research activities of these professors. Thus the research policies and practices of the University are to a considerable degree developed through and administered by the Graduate School.

THE GRADUATE SCHOOL RESEARCH FUND

Modest funds are available through the University to aid in the support of research activities of the faculty and graduate students. These monies are allocated by the Dean of the Graduate School with the advice of the Graduate School Research Fund Committee, appointed by the Dean, which reviews proposals for research support, formulates regulations concerning personnel and use of funds, and stimulates interest in investigative activities. The Committee is concerned with allocations of the Initiative 171 monies which help to support research in medicine and biology, and of the other funds of the Graduate School, which support research primarily in the fields of the arts, humanities, and social sciences.

AGNES H. ANDERSON RESEARCH FUND

The Agnes H. Anderson Research Fund for the support of research was formed from the proceeds of a very generous gift donated by two anonymous friends of the University. Accepted by the Board of Regents in 1943, the fund is named in memory of the donor of Alfred H. Anderson Hall and the Agnes Healy Anderson Forestry Trust Fund. The selection of research projects and allocation of funds for their support are recommended to the President of the University by the Dean of the Graduate School after consultation with a faculty committee.

THE GRADUATE SCHOOL CONSULTANTS FUND

Modest funds are available through the Graduate School to provide assistance in bringing distinguished scholars and scientists in the vicinity to the University for a day or for short periods for consultations and seminar discussions to assist members of the faculty and graduate students in carrying forward their research. For information relating to the Consultants Fund, communication may be addressed to the Dean of the Graduate School.

GIFT, GRANT, AND CONTRACT RESEARCH FUNDS

Research requiring substantial amounts of faculty, graduate student, or other staff time, or significant use of University facilities may be undertaken by the University under arrangements specified in a gift, grant, or contract agreement between the research sponsor and the University. The sponsor usually pays all of the costs associated with the project, such as salaries, wages, supplies, travel, and special equipment needed for the research. Participation of faculty members in grant or contract research activities is on a voluntary basis, and assignments to such research are usually treated as part of the regular academic load. Graduate students, postdoctorate students, and full-time technical or professional research personnel may aid in carrying out the research program.

Whenever possible, results of sponsored research are published in appropriate technical or professional journals as soon as publication appears warranted.

Patent provisions may be made part of an agreement covering sponsored research work. In such a case recognition is given to the interests of the sponsor, the research worker or inventor, the University, and the general public whose taxes and gifts support the University.

Grants are often made by foundations, industries, and other agencies for basic research in designated fields without explicit definition of projects or goals. Grants of this kind contribute in an especially important way to the advancement of knowledge through basic research.

The Graduate School is the academic agency of the University responsible for the administration of research funds supported by grants or contracts and for the final review and transmission of research proposals to outside agencies.

OFFICE OF UNIVERSITY RESEARCH

The Office of University Research has been established to assist in the further development of the research activities of the University and the community. Its two main responsibilities are (1) to provide a central point of contact for off-campus agencies turning to the University for research assistance, and (2) to aid members of the faculty in developing and maintaining their several research programs.

RESEARCH COOPERATION WITH BUSINESS OR INDUSTRY

University research cooperation with business or industry may be developed through the Office of University Research. This cooperation usually takes one of two forms. In one of these, a faculty member provides advice or other assistance toward the solution of a business or industrial problem in accordance with the terms of a consulting agreement. In the other, sponsorship of a research project is assumed by an outside agency through a research grant or a research contract established between the agency and the University. The Office of University Research is prepared to assist in the initiation of either type of arrangement. Requests for information and assistance should be addressed to: University of Washington, The Coordinator, Office of University Research, Graduate School, Seattle 5, Washington.

SPECIAL ACTIVITIES, UNITS, AND FACILITIES

Some academic or research activities and facilities are of general significance in all or many fields of knowledge throughout the University. In certain cases, special University units have been established and are administered by the Graduate School. A description of these organizations is given in the following paragraphs.

BUREAU OF GOVERNMENTAL RESEARCH AND SERVICES

Director: Donald H. Webster, 266 Smith Hall

The Bureau of Governmental Research and Services was established in 1934 as a research and service arm of the University of Washington to carry out community responsibilities to the state by contributing toward the solution of governmental problems and in helping to advance the science of public administration. The Bureau is administratively a part of the Graduate School.

The primary purpose of the Bureau is to provide research and advisory services to the governmental agencies of the state and its political subdivisions. The published research of the Bureau appears in the form of reports, information bulletins, and research memoranda. Although the Bureau has specialized in municipal research, its services are available to all levels of state and local government. It functions as a central organization to which inquiries may be directed, and provides information concerning governmental problems. In addition, its personnel serve as advisers and consultants to quasi-public agencies and various civic organizations.

Another major function of the Bureau is organizing and sponsoring educational and training conferences, the most important of which is the annual Institute of Government. The Bureau also engages in a number of supplementary activities, including maintenance of a library reference service and ordinance file, a news and publicity service, and the training and placement of governmental administrators, teachers, and research personnel.

Through the facilities of the Bureau of Governmental Research and Services graduate students are afforded special opportunities for study and research in problems of state and local government.

CENTER FOR GRADUATE STUDY AT HANFORD

Director: Kermit B. Bengtson, Richland, Washington

The Center for Graduate Study at Hanford, located at Richland, Washington, is an off-campus facility maintained by the University of Washington in cooperation with Washington State University and Oregon State University. The facility is available for graduate study and research to students associated with the participating universities, as well as other institutions of higher learning in the Pacific Northwest and elsewhere. Course work completed through the Center, and research performed in the Hanford laboratories, upon approval in advance, may be

applied toward the fulfillment of the requirements for certain advanced degrees offered by the University of Washington and other institutions.

The Center particularly serves professionally trained people working at the Hanford Atomic Products Operation and others who wish to obtain advanced degrees. The courses available in most cases correspond closely with those included in the advanced degree programs available on the Seattle campus. Currently upper-division and graduate-level courses are available in business administration, chemistry, librarianship, mathematics, physics, radiology, and in chemical, electrical, mechanical, metallurgical, and nuclear engineering. Atomic Energy Commission-owned laboratory facilities, operated by the General Electric Company, are available for research purposes on an individual arrangement basis and provide an exceptional opportunity to do research work requiring facilities not available at most institutions of higher learning.

Most of the students and faculty of the Center are employees of the Atomic Energy Commission or its prime contractor, the General Electric Company, although such employment is not a prerequisite for enrollment at the Center or appointment to the faculty. Classes at the Center are presently held only in the evening or late afternoon. Employment at the Hanford Atomic Products Operation and access to Atomic Energy Commission laboratories are generally available only to citizens of the United States.

All requests for information concerning the activities and the programs of study and research at the Center, availability of facilities, admission to activities, and for copies of the Center's *Bulletin* containing general information and course offerings should be addressed to: The Director, Center for Graduate Study at Hanford, University of Washington, Richland, Washington.

CENTER FOR RADIOLOGICAL SCIENCES

Director: Max R. Zelle, 104 Fisheries Building

The Center for Radiological Sciences, located in the Fisheries Building on the University of Washington campus, is an organization and a set of facilities maintained to coordinate teaching, research, and service programs relating to the radiological sciences. During recent years knowledge relating to radiations of various types has expanded rapidly and the effects of radiation on materials and biological systems are of much scientific interest as well as practical importance. Since these developments have occurred and are proceeding within several of the conventional fields of science, the Center functions to bring together faculty members, research scientists, and graduate students interested in one or another of the various fields of science relating to radiation. Specialized laboratories and facilities for research in the radiological sciences are available in the Center and close relations are maintained with research scientists in the laboratories of the Hanford Atomic Products Operations at Richland, Washington. For students interested in graduate degrees related to the radiological sciences, a program leading to the degree of Master of Science in Radiological Science is available (see page 197 in section on Graduate Programs), as well as a number of programs leading to the degree of Doctor of Philosophy.

Requests for information concerning the activities, facilities, and programs of study and research coordinated through the Center and for copies of Center literature, should be addressed to: University of Washington, The Director, Center for Radiological Sciences, Seattle 5, Washington.

FRIDAY HARBOR LABORATORIES

Director: Robert L. Fernald, 201 Johnson Hall

The Friday Harbor Laboratories, the marine laboratories of the University of Washington, are administered by the Dean of the Graduate School with the aid of a committee of the faculty. The staff of the Laboratories is made up of professors from various Departments of the University (Botany, Fisheries, Meteorology, Oceanography, and Zoology) and visiting professors from other institutions.

The Friday Harbor Laboratories are located approximately eighty miles north of Seattle near the town of Friday Harbor on San Juan Island. This island is one of the largest of the 172 which make up the San Juan Archipelago located in the northwest section of the state of Washington between Vancouver Island and the United States mainland.

The islands of the San Juan Archipelago are, in general, rocky, wooded, and with precipitous shores. Many are deeply indented by narrow, fjord-like inlets. They have been strongly glaciated leaving valleys filled with drift and occasional lakes, swamps, and sphagnum and peat bogs. The Laboratories are located on a state game preserve of 484 acres of wooded land with about two miles of shore line. This is an admirable location for the study of various aspects of marine science and for many types of investigations.

Within a relatively short distance from the Laboratories are sea waters varying from oceanic to those highly diluted by streams, with depths to 1,000 feet, bottoms varying from mud to rock, and water movements ranging from those of quiet bays and lagoons to those of swift tideways.

The waters about the San Juan Archipelago have exceptionally abundant and varied marine flora and fauna. The area is rich in both phytoplankton and zooplankton. Brown, green, blue-green, and red algae are present in quantity.

Representatives of all major and most minor phyla of invertebrates can be collected within a reasonable distance from the Laboratories. Shore collecting and dredging in the many diverse ecological situations provide an abundance of forms for ecological, experimental, morphological, and systematic work.

The laboratory buildings are provided with aquaria and running sea water supplied through either polyethylene or glass pipes and fittings which deliver water free from metallic contamination.

During the summer the Laboratories offer an opportunity for independent and supervised research as well as a varied program of instruction primarily for graduate students (exceptional, advanced undergraduates are occasionally admitted). The program of courses usually includes work in algology, fish biology, oceanographic meteorology, oceanography, invertebrate zoology, invertebrate physiology or embryology. An annual bulletin is published describing the summer program and the facilities available. Throughout the year, the use of the facilities of the Laboratories for research in various areas of marine science is encouraged.

All requests for information concerning the program of study and research, availability of facilities, and admission to the Laboratories should be addressed to: University of Washington, The Director, Friday Harbor Laboratories, Seattle 5, Washington.

THE INSTITUTE OF FOREST PRODUCTS

Director: Ben S. Bryant, 303 Anderson Hall

The Institute of Forest Products, established by action of the 1947 Legislature of the State of Washington, was transferred in 1959 to the administration of the University of Washington through the Graduate School.

Objectives of the Institute program are: To provide students with increased opportunity for advanced study and research in fields relative to products of the forest; To provide for additional new and important research results in fields relative to forest products; To provide for increased University research cooperation with industry and government in fields relative to forest products.

The Institute grants Research Assistantships to graduate students who are or will become candidates for doctor's or master's degrees in fields relating to forest products. These Institute students are sponsored and supervised by members of the faculty and the students conduct graduate study and research in the usual academic programs, Forestry, Forest Products, Chemistry, Chemical Engineering, Mechanical Engineering, Economics, and Marketing, in the corresponding Colleges of Forestry, Engineering, Arts and Sciences, and Business Administration.

Research proposals are made by members of the faculty and the Scientific Committee of the Institute approves as many as possible in favor of recommended graduate students.

Postdoctoral research assistantships are also available to provide for part-time or full-time devotion to the study of significant fundamental problems in fields relating to forest products.

Excellent research facilities are established. Complete equipment is available in the Forest Products Laboratory for research on wood anatomy (microscopy and photomicrography), wood preservation, wood chemistry, lumber and plywood adhesives, mechanical properties testing, mechanical pulping and wood-moisture relations. Three forests, a sawmill, a bark-chipper unit, and an experimental dry kiln are available in the College of Forestry. In the Chemical Engineering and Chemistry laboratories equipment is available for chemical pulping studies, the isolation and identification of chemical components of wood, the processing of cellulose and paper and related products, as well as excellent general apparatus and facilities for research in chemical engineering and chemistry. Electron microscopes, IBM 650 and 709 high speed machine computing equipment, and extensive libraries are available. Many important forest products industry laboratories are situated near the University in the Pacific Northwest region.

The Institute serves as a point of contact between the University and the forest products industry. Short courses and special conferences for members of the industry may be provided as well as technical information. Institute seminars are held fortnightly through the academic year. A new Forest Science Laboratory will soon provide additional housing and laboratory facilities for the Institute.

All requests for information concerning the programs of study and research of the Institute, the availability of facilities, admission to activities, and for copies of the Institute's literature should be addressed to: University of Washington, The Director, Institute of Forest Products, Seattle 5, Washington.

INSTITUTE OF PUBLIC AFFAIRS

Director: George A. Shipman, 204D Smith Hall

The Institute of Public Affairs, established in 1947 and a part of the Graduate School since 1960, is concerned with research and service activities relative to public affairs and with graduate professional education for public administration. A program of graduate study leading to the degree of Master of Public Administration (M.P.A.) is offered and this is described on page 213 under School of Public Administration.

Basic research and consultation work directly related to instructional activities may be undertaken on a project basis. Projects range from major undertakings supported by foundation grants to individual undertakings reinforced by Institute facilities. The primary objective is to formulate and to test working assumptions in the broad area of public policy formation and expression, with a view toward enriching the resources of instruction and applied analysis. Field projects, usually in the form of short-term consultation agreements, are undertaken from time to time when the problem involved has a place in the interests of the Institute and its staff.

The Institute, in a service capacity, also carries on a variety of activities designed to reinforce public agencies and professional organizations in strengthening the professional performances of administrative people. These activities for the most part, are forms of continuing education. They include cooperation with the American Society for Public Administration, the United States Civil Service Commission, and various agencies of the state government. An annual conference on public administration is held. Workshops and mid-career seminars are also sponsored.

All requests for information concerning the program and facilities of the Institute of Public Affairs should be addressed to: University of Washington, The Director, Institute of Public Affairs, Seattle 5, Washington.

LABORATORY OF RADIATION BIOLOGY

Director: Lauren R. Donaldson, 110 Fisheries Center

The University of Washington Board of Regents, in January 1958, established the Laboratory of Radiation Biology to expand University studies of the biological effects of atomic radiation. (The Laboratory absorbed and supplanted the Applied Fisheries Laboratory, established in 1943.) The Laboratory, which is supported by funds provided to the University under contracts with the Atomic Energy Commission, is an administrative unit of the Graduate School.

A research program is carried on by the Laboratory at the Pacific Proving Ground, the Fern Lake Research Station, and in the laboratories at the University of Washington.

The program is planned to aid in meeting the need for trained specialists in the field of radiation biology, in which the physical and biological sciences join forces to combine the skills of the two areas of learning.

Graduate students wishing to enter the field of radiation biology should hold degrees in the biological sciences with supporting course work in physics, chemistry, and mathematics, or in the physical sciences of chemistry or physics with supporting courses in the biological sciences.

Requests for information concerning the activities and programs of study and research available through the Laboratory, admission to activities and for copies of the Laboratory's literature should be addressed to: University of Washington, The Director, Laboratory for Radiation Biology, Seattle 5, Washington.

OFFICE OF SCHOLARLY JOURNALS

Acting Director: Emily Johnson, 3 Administration Building

The University has established and now maintains an Office of Scholarly Journals in association with the Graduate School. The function of the Office is to provide assistance to members of the University faculty who have editorial responsibilities in relation to the publication of the many scholarly journals now associated with the University of Washington.

Requests for information concerning the activities and facilities of the Office should be addressed to: University of Washington, The Director, Office of Scholarly Journals, Graduate School, Seattle 5, Washington.

RESEARCH COMPUTER LABORATORY

Director: David B. Dekker, 812 Mechanical Engineering

The Research Computer Laboratory, established in September, 1956, as an agency of the Graduate School, provides electronic calculating facilities and auxiliary punched-card equipment for use by faculty and research personnel of the University. The facilities of the Research Computer Laboratory are also available to neighboring institutions which do not have their own computers.

The facilities include an IBM 650 and an IBM 709 with a 32K core, twelve tape units, complete off-line tape-to-card, card-to-tape, and tape-to-printer equipment.

The Research Computer Laboratory is administered by the Dean of the Graduate School with the aid of a committee of the faculty of the University of Washington, and a Pacific Northwest Research Computer Laboratory Committee consisting of faculty representatives from all interested colleges and universities of the Pacific Northwest.

All requests for information concerning the facilities of the Laboratory should be addressed to: University of Washington, The Director, Research Computer Laboratory, Seattle 5, Washington.

UNIVERSITY OF WASHINGTON PILOT SCHOOL

Director: C. R. Strother, 3737 Brooklyn Ave.

Opportunities for research and training in various aspects of special education were expanded by the establishment of the Pilot School on September 1, 1960.

This was made possible by a grant from a private source. The objectives to be achieved are threefold:

1. To provide training and experience for appropriate University students who will serve during their professional life to assist handicapped children. Students from the fields of education, psychology, speech and hearing, medicine, nursing, social work, and others may participate.

2. To provide for research on central nervous system impairments leading to perceptual difficulties, to be carried out by University faculty and graduate students and other interested and qualified persons.

3. To provide high quality diagnostic and educational assistance to a small number of neurologically impaired children and, in addition, to provide a model applicable elsewhere for the establishment and maintenance of special schools for handicapped children.

The Pilot School is in operation in temporary facilities located adjacent to the University campus. The school serves children between the ages of two to fifteen. Children are selected to participate in the Pilot School program by an Admissions Committee. Only a limited number of children can be accommodated. The service aspects of the program are extended only to the extent that they are needed to serve the research and training objectives of the program.

The Pilot School represents an inter-disciplinary, cooperative program administered by the Graduate School. The University Pilot School Committee has representatives from such disciplines as: pediatrics, psychology, psychiatry, speech and hearing, education, and social work. A lay Advisory Board works with the Pilot School Committee in consideration of policies and in relating the work of the School to that of different agencies and groups concerned with problems of handicapped children. This program provides an important opportunity for improved training of teachers and professional workers. It also offers important opportunities for research in fields of special education, psychology, psychiatry, and medicine.

Requests for information concerning the activities, facilities, and programs of study and research available through the Pilot School, and for copies of the Pilot School's literature should be addressed to: University of Washington, The Director, Pilot School, Seattle 5, Washington.

UNIVERSITY OF WASHINGTON PRESS

**Director: William M. Read, Helen Ardelle Building, Northwest 41st Street and
University Way Northeast**

The University of Washington Press, a division of the Graduate School, is the publishing arm of the University. It publishes scholarly books of both specialized and general interest, and original works in the arts, whether written by members of the faculty or by qualified persons outside the University. It also handles textbooks and the publications of certain University laboratories and bureaus. The Press manages all details of editing and design of its products, buys its printing and binding on a contract basis, and has facilities to distribute its books over all the world.

The Committee on the University Press assists the Dean of the Graduate School in general administration of the Press. This Committee also screens the manuscripts offered to the Press, selects those that are to be published, authorizes the use of the Press imprint, and promotes the interests of the Press. Individually, the members of the Committee represent the various publishing interests of the University and encourage their colleagues to submit manuscripts to the Press.

The Press invites members of the faculty and other scholars to bring to it publications problems at an early stage in the development of a project.

Requests for information concerning the Press should be addressed to: University of Washington, The Director, University of Washington Press, Seattle 5, Washington.

WALKER-AMES AND VISITING PROFESSORSHIPS

The Walker-Ames Fund was founded in 1931 by Maud Walker Ames and her husband, Edwin Gardner Ames. Its purpose was to enable the University of Washington "to guarantee to the state of Washington the scholarly and educational services of the most distinguished minds available in this and other countries . . ." Since the first Walker-Ames visiting professor was appointed in 1936, well over one hundred notable scholars have come to the University as temporary members of the faculty and have enriched the intellectual life of the University community.

For information relating to the Walker-Ames Fund and to Walker-Ames Professorships, communications may be addressed to: University of Washington, The Chairman, Walker-Ames Committee, Graduate School, Seattle 5, Washington.

GRADUATE STUDY INFORMATION

GRADUATE STUDY INFORMATION

ADMISSION TO THE GRADUATE SCHOOL

In general, properly qualified students who are graduates of the University of Washington or of other colleges or Universities of recognized rank may be admitted to the Graduate School.

The primary criterion for admission to the Graduate School is the applicant's apparent ability, as decided by the University, to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance and, ordinarily, the applicant should have at least a B or a 3.00 grade-point average for the courses taken during the junior and senior years of his undergraduate study. He should also show completion of an undergraduate program appropriate as preparation for graduate study in his chosen field. Consideration will also be given to other evidence which may be available. In some cases, an applicant may give promise of making satisfactory progress in graduate work although his undergraduate grade average may be less than B or 3.00 or his undergraduate preparation may be inadequate; in these cases and other unusual cases an applicant may be admitted to the Graduate School on the favorable written recommendation of the appropriate University of Washington executive officer with approval by the Dean of the Graduate School. The University will be able to grant admission only if sufficient faculty and facilities are available to provide for the applicant's program.

Ordinarily, only students who have been admitted to the Graduate School are permitted to enroll in courses numbered 500 or above and to gain credits applicable to the fulfillment of advanced degree programs.

Admission to the Graduate School provides the opportunity for continuance of graduate study and research only for the period during which the graduate student maintains satisfactory performance and progress toward completion of his graduate degree program, along with a status of physical and mental health approved by the University. The Dean of the Graduate School may alter the status of a graduate student.

ADMISSION PROCEDURE

Requests for the form, "Application for Admission to the Graduate School," and correspondence regarding admission should be addressed to the University of Washington, Office of Admissions, Seattle 5, Washington.

The application form and required transcripts must be filed, according to instructions appearing on the application form, with the Office of Admissions prior to the following dates in order to be assured of consideration for admission to the quarter for which application is being made: August 1 for Autumn Quarter, 1961 (July 15 for subsequent Autumn Quarters); December 1 for Winter Quarter; March 1 for Spring Quarter; May 15 for Summer Quarter. In some cases, departments have an earlier admission deadline which must be observed. Please check in this bulletin the section pertaining to the appropriate department.

When the required application forms and credentials have been received and evaluated, the applicant will be notified of his admission status. Students wishing an unofficial evaluation of their transcripts and advanced information regarding their eligibility for admission may submit credentials in the spring term preceding graduation.

All records become a part of the official file and can neither be returned nor duplicated for any purpose. A student should obtain an additional copy of his official credentials to keep in his possession for advisory purposes. Failure to submit complete credentials will be considered a serious breach of honor, and may result in permanent dismissal from the University.

A leaflet giving general information and instructions for registration is mailed with the notice of admission. In the event of a discrepancy, instructions in the leaflet supersede those found in earlier publications. *The University assumes no responsibility for students who do not apply the information or observe the instructions given in the leaflet or for applicants who come to the campus before they have been officially notified of their admission.*

The admissions credentials of applicants who do not register for the quarter to which they have been admitted are normally retained in the Office of Admissions for a period of one year from the date of application. At the end of this period, credentials on file are discarded unless the applicant has notified the Admissions Office of his continued interest in attending the University or of his enrollment in the Evening Classes program. Should a student wish to renew his application after the one-year lapse, he must submit new credentials in advance of the dates given above for the quarter desired.

A student entering the University for the first time is required to submit to the Student Health Service (Hall Health Center) a form containing his health history, as well as a report of a physical examination by a physician. The Office of Admissions will send new students the form and necessary instructions.

ADMISSION OF UNIVERSITY OF WASHINGTON GRADUATES

University of Washington graduates apply for admission in the same manner and satisfy the same requirements as students completing their baccalaureate degrees at other schools. They may obtain the appropriate forms from the Office of Admissions. Former students of the University of Washington who were not in residence the preceding Spring Quarter are given until September 15 to file complete credentials for an Autumn Quarter application.

University of Washington students who are within six credits of completing their undergraduate work, and who otherwise meet the requirements for admission to the Graduate School, may register the quarter just prior to admission to the Graduate School for as many as six credits in graduate courses in addition to their six credits of undergraduate work. This registration and these arrangements must receive prior approval by the Graduate School; however, students concerned will not be reclassified as graduates until the bachelor's degree has been granted and after their official admission to the Graduate School. Only under these circumstances may graduate work taken as an undergraduate be applied toward an advanced degree. Further registration for graduate work is contingent upon completion of the requirements for the bachelor's degree.

ADMISSION OF VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Applications

for and questions about government aid should be addressed to the Veterans Division Regional Office.

ADMISSION OF FOREIGN STUDENTS AND STUDENTS EDUCATED ABROAD

Applicants for admission with graduate standing are expected to meet the same general requirements as nonresidents of Washington educated in American schools. However, they must file their credentials before March 1 to be considered for admission Autumn Quarter or six months before the opening of another quarter in which they may wish to enroll. In addition, they must demonstrate a satisfactory command of the English language.

FELLOWSHIP AND ASSISTANTSHIP APPLICATIONS

Students applying for fellowships and assistantships should make certain that complete transcripts and credentials are on file. Usually awards and appointments are made about March 15 or earlier. Application forms may be secured by writing to the Graduate School.

SECOND BACHELOR'S DEGREE

Students who wish to obtain a second bachelor's degree register in the undergraduate college from which they expect to obtain the degree, not in the Graduate School.

VETERANS INFORMATION

WORLD WAR I OR II VETERANS

Under certain conditions a veteran of World War I or II who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges (see page 63).

KOREAN VETERANS

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building. Educational allowance payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

KOREAN CERTIFICATE

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses, as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established.

GRADUATE CREDIT REQUIREMENTS (Public Law 550) 500-level Courses or Above

9 credits.....	Full subsistence
7 to 8 credits.....	Three-fourths subsistence
5 to 6 credits.....	One-half subsistence
4 credits or less.....	Established tuition and fees
or credits \div 14 x \$110.00, whichever is the lesser	

If a graduate is combining 400-level courses with 500-level courses he should check with the Veterans Division, Safety Division Building, to determine the scale of pay.

TERMINATION OF TRAINING

A veteran *eligible* under Public Law 550 must complete his training by *eight* years after his release from active service, or by January 31, 1965, whichever is earlier.

DISABLED VETERANS

A veteran with a disability under Public Law 894 should contact a training officer in the nearest Veterans Administration Office approximately four weeks prior to registration.

CHILDREN OF DECEASED VETERANS

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for a Program of Education issued to those eligible persons by the Veterans Administration is to be presented along with his Program of Studies to the Veterans Division, Safety Division Building, on the date of registration.

REQUIRED EXAMINATIONS**MEDICAL EXAMINATION**

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions, and to returning former students by the Registrar. This examination, which is required before a student may register, is taken at the student's expense. A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on the campus.

REGISTRATION**REGULAR STUDENT**

A regular student is a student who fulfills the following requirements: (1) he has been granted regular admission to the Graduate School; (2) his current Program of Studies is satisfactory to the Dean of the Graduate School; (3) he has received medical clearance from the Student Health Service and has completed all of the required steps for registration, including paying tuition and fees, the filing of class cards, and the depositing of registration materials at Sections.

PROCEDURE

ALL students, currently in school, who plan to register for a succeeding quarter (Summer Quarter excepted) must register by Advance Registration and pay fees by the stated deadline. Students are held responsible for knowing and observing registration procedures, dates, and deadlines which appear in the bulletins, in "Official Notices" in the *Daily*, and on campus bulletin boards.

New students are given appointments when they are notified of admission, and they receive complete directions for registering at the time of registration.

Students expecting to return to the University after an absence of a quarter or more (excluding Summer Quarter) must register by In-Person Registration. The required registration appointment may be obtained by writing to, calling at, or telephoning the Registrar's Office at the time specified in the Calendar, but in *no case* later than the stated deadline (see pages 5 to 10).

ADVISING

After notification of admission and before registration, the student should confer with his departmental adviser about the program for his current registration,

which must be approved by the adviser before it is presented to the Graduate School Office. As soon as the student's Supervisory Committee is appointed, he should meet with this Committee and work out plans for his entire graduate program. It is primarily to this Committee, and especially the Chairman of this Committee that the student must look for individual counsel, guidance, and instruction in the scholarly study and research which characterize graduate work.

REGISTERED CREDITS ALLOWED EACH QUARTER

The maximum load for graduate students is regarded as 15 credits per quarter; 12 credits constitute a normal load. The programs of students employed in the University or elsewhere will be limited; such students must discuss their schedules with the Dean when they register. Students who are employed full time cannot register for more than 6 credits.

Only courses numbered 400, 500, and 600 can be applied to credit in the major field for advanced degrees. Courses numbered 300 are not applicable to credit toward advanced degrees except when applied by permission toward the graduate minor or supporting courses.

CHANGES OF REGISTRATION

After students have registered, they cannot change their schedules except with permission of the Dean of the Graduate School. No student is permitted to make a registration change that involves entering a new course after the first calendar week of the quarter. After that time no student may register without the consent of the Dean of the Graduate School and of the instructor whose class the student wishes to enter.

WITHDRAWAL FROM A COURSE

Official withdrawal from a course is made only under the following conditions: (1) during the first 15 calendar days of a quarter, with the consent of the withdrawing student's adviser; (2) after the first 15 calendar days of a quarter and before the end of the first six calendar weeks of a quarter, with the approval of both the instructor of the course from which withdrawal is sought and of the dean of the college in which the withdrawing student is enrolled; and (3) after the first six calendar weeks of a quarter and before final examination week, only upon certification in writing to the Registrar by the dean of the college in which the withdrawing student is enrolled that, in the judgment of the dean, withdrawal is necessitated by the student's hardship. Withdrawals from courses by any other method are unofficial withdrawals which are entered on a student's record as EW, and are assigned the value of E in the computation of the student's grade-point average. No official withdrawal may be made during final examination week.

Official withdrawals are entered on a student's record as follows: (1) a withdrawal within the first 15 calendar days of a quarter, as W; (2) a withdrawal after the first 15 calendar days of a quarter, and before Final Examination Week, as PW, if the student's work has been satisfactory, and as E, if the student's work has been unsatisfactory. Grades of PW and W are assigned no value in the computation of grade-point averages.

WITHDRAWAL FROM THE UNIVERSITY

The student should obtain at the office of the Dean of the Graduate School the Request for Withdrawal From the University form. The same system of grading applies as that prescribed under Withdrawal From a Course.

ASSISTANTSHIPS, FELLOWSHIPS, AND SCHOLARSHIPS

The Graduate School provides for the employment of many graduate students as research and teaching assistants and predoctoral associates. Such appointments give students opportunities for self-support and for valuable experience. More than 750 such appointments were made during the past year.

Appointments are granted only to graduate students of high intellectual competence and attainment whose educational goals are clearly defined. An appointment shall be made only when it is reasonably certain that it will help the student toward the attainment of his goal. Succeeding appointments may be made if the student's progress toward the degree is satisfactory. Maintenance of high scholarship shall also be a condition of reappointment.

Students holding appointments are required to render an average of 20 hours of service per week to the University. The appointments may be on a nine-month basis and ordinarily cover the period running from September 16 through June 15. Predoctoral associate appointments and other student assistantships do not provide for paid vacation or sick leave.

Students who accept appointments as predoctoral associates, and/or teaching and research assistants must confine their employment to such appointments and **MUST BE REGISTERED FOR A MINIMUM OF 9 CREDITS OF RESEARCH, COURSE, OR THESIS WORK EACH QUARTER DURING THE PERIOD OF THEIR APPOINTMENTS.**

Students holding these appointments pay resident tuition and fees.

Students holding appointments may not also hold foreign student tuition scholarships.

PREDOCTORAL ASSOCIATES. Persons holding such appointments shall hold a master's degree or its equivalent and shall give evidence of teaching and/or research ability. They must be actively pursuing the doctor's degree. Such persons may be appointed to either teaching or research responsibilities in the University; they shall not have faculty status. Appointments are ordinarily on a nine-month basis and may not be renewed for more than three years. The current stipend for a nine-month appointment is \$2,376.

TEACHING ASSISTANTS. The services of teaching assistants shall be limited to the supervision and leadership of quiz sections, discussion sections, or laboratory sections, service as class assistants, and other services strictly comparable to these. No assistant shall be given the reading and grading of papers as his whole assignment, but reading may be combined with the duties enumerated. Teaching assistants shall not be permitted to be in charge of a course, but shall be given some degree of responsibility in the supervision of laboratory or classroom work so that they may be introduced to teaching activities gradually and effectively. The current stipend for a nine-month appointment is \$2,115.

RESEARCH ASSISTANTS. Recipients of research assistantships shall engage in systematic research as assistants in research activities for which a faculty member is responsible. The current stipend for a nine-month appointment is \$2,115.

OTHER STUDENT ASSISTANTSHIPS. Graduate students may be hired on an hourly basis to assist faculty members in teaching and research. Readers are so classified, as are students who give routine assistance in research.

RESEARCH FELLOWSHIPS. Special fellowships are available from private, industrial, foundation, government, and other sources. Examples of these are the Standard Oil Company of California Fellowship in chemical engineering, The RCA Scholarship in electrical engineering, and the Family Society Fellowships in social work. Inquiries and applications may be directed to the Graduate School or to the Executive Officer of the appropriate academic department of your interest.

SCHOLARSHIPS AND LOANS. In addition to assistantships and fellowships, the University offers a variety of financial aids to graduate students. These include special fellowships, scholarships, loans, and a wide range of work opportunities.

Scholarship grants are usually available only after a student has earned a good record at the University of Washington. Some graduate scholarships are awarded by academic departments from funds available only to their students. The Schools of Drama and Music have such funds. Special Graduate School Fellowships may be awarded to graduate students in any field. Inquiries and applications should be sent to the Graduate School office.

Emergency and long-term loans are available through the Office of the Dean of Students. Application for a loan should be made at least six weeks before the money is needed.

FOREIGN STUDENT SCHOLARSHIPS. The University of Washington awards 100 tuition scholarships each academic year to worthy students from other countries. There are no scholarships available for the Summer Quarter. These awards are made on the basis of the academic record of the student, recommendations from his professors, his need for such assistance, and the availability of such openings in his department at the University. These scholarships cover tuition only and are administered by the Foreign Exchange Scholarship Committee, Foreign Students Office, University of Washington, Seattle 5, Washington, U.S.A. Application for these scholarships must be made by March 1 for the following year.

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All tuition and fees are payable in United States dollars at the time of registration. The University reserves the right to change any of its fees without notice.

The following fee schedule for resident and nonresident students apply to the academic year (Autumn, Winter, and Spring Quarters). Summer fees are listed in the *Summer Quarter Bulletin*.

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter or Evening Classes students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

Advanced Degree Fees, dentistry and surgery

Resident students, per quarter, tuition, incidental, and ASUW fees \$175.00

Nonresident students, per quarter, tuition, incidental, and ASUW fees 290.00

Students working toward advanced degrees in dentistry and surgery (but not in basic sciences departments) pay the regular tuition of the Schools of Dentistry and Medicine and miscellaneous fees.

Thesis Only Extra Service Charge 56.50

Those having completed all requirements for a master's or doctor's degree except the thesis or dissertation may be registered for thesis only and must be certified by the Dean of the Graduate School and are required to pay this extra service charge and any laboratory breakage charge. ASUW fee, optional.

Degree Only Extra Service Charge 56.50

Nonthesis students registered for Degree Final Only must be certified by the Dean of the Graduate School and are required to pay this extra service charge and any laboratory breakage charge. ASUW fee, optional.

EXTRA SERVICE CHARGES

A registration service charge of \$15.00 is assessed those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register

by In-Person Registration by action of the Registration Appeal Board. A late registration charge of \$15.00 is assessed students eligible for In-Person Registration who fail to register before the first day of instruction Autumn, Winter, and Spring Quarters by action of the Registration Appeal Board. A charge of \$5.00 is assessed Autumn, Winter, and Spring Quarters for each change of registration or change of section or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University.

Athletic Admission Ticket (optional for ASUW members)	3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; for Winter and Spring Quarters only, \$3.50; for Spring Quarter only, \$3.50.	
Language Examination	1.00
This charge is assessed for a foreign language reading examination.	
Breakage Ticket	3.00
Required in some laboratory courses; ticket is returnable for full or partial refund.	
Quarterly Grade Report	.50
One grade report will be issued each quarter without charge; the charge, payable in advance, is assessed for each additional copy.	
Transcripts	1.00
One transcript is furnished without charge; the charge, payable in advance, is assessed for each additional copy.	

FEES FOR RESIDENT STUDENTS

A resident is one who has been domiciled in Washington for at least a year immediately prior to registration.

Examples of Autumn, Winter, and Spring Quarter Fees for Various Types of Registration

Type of Registration	Tuition Fee	Incidental Fee	ASUW Fee*	Total Fees
			Autumn, Winter, and Spring Quarters	Autumn, Winter, and Spring Quarters
Full-time students** (undergraduate and graduate) except in Medical and Dental Schools	\$35.00	\$56.50	\$8.50	\$100.00
Auditors		39.00		39.00
Part-time (max. 6 credits exclusive of ROTC)§	35.00	39.00	†	74.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time		56.50	8.50	65.00
Part-time (max. 6 credits)§		39.00	†	39.00
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (nonthesis)		56.50	†	56.50

* Athletic admission ticket is optional for ASUW members. Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.

** A \$25.00 uniform rental is paid by students in Army and Air Force ROTC; refundable if uniform is returned in good condition. Limitation on refund will be explained during registration.

† Optional; if membership in ASUW is desired, the ASUW fee should be added to the total fee as shown for this type of registration.

‡ See Exemptions (page 63) to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by Graduate School. See statement about Thesis Only Charge and Degree Final Charge on page 63.

Thesis Binding and Publication

Master's degree candidates 2.00
The charge covers the cost of binding one copy for the University Library.

Doctor's degree candidates 25.00
The charge covers the cost of binding manuscript copies for the University Library and the cost of microfilm publication.

Graduation Exercises Diploma 5.00

Removal of an Incomplete 2.00

REFUND OF FEES

All fees will be refunded in full if complete withdrawal from the University is made during the first three calendar days of the quarter; one-half the amount will be refunded if withdrawal is made during the first thirty calendar days. Fee refunds are not made to students withdrawing under discipline.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund of fees, if payment was made by check.

FEES FOR NONRESIDENT STUDENTS

Prospective students are classified as nonresidents when their credentials come from schools outside Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

*Examples of Autumn, Winter, and Spring Quarter Fees for Various
Types of Registration*

Type of Registration	Tuition Fee	Incidental Fee	ASUW Fee*	Total Fees
			Autumn, Winter, and Spring Quarters	Autumn, Winter, and Spring Quarters
Full-time students** (undergraduate and graduate) except in Medical and Dental Schools	\$105.00	\$86.50	\$8.50	\$200.00
Auditors		39.00		39.00
Part-time (max. 6 credits exclusive of ROTC)§	105.00	69.00	†	174.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time	52.50	86.50	8.50	147.50
Part-time (max. 6 credits)§	52.50	69.00	†	121.50
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (nonthesis)		56.50	†	56.50

* Athletic admission ticket is optional for ASUW members. Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.

** A \$25.00 uniform rental is paid by students in Army and Air Force ROTC; refundable if uniform is returned in good condition. Limitation on refund will be explained during registration.

† Optional; if membership in ASUW is desired, the ASUW fee should be added to the total fee as shown for this type of registration.

‡ See Exemptions (page 63) to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by Graduate School. See statement about Thesis Only Charge and Degree Final Charge on page 63.

ESTIMATE OF YEARLY EXPENSES

The figures given below are minimum estimates for an academic year, which includes Autumn, Winter, and Spring Quarters. Living costs and personal expenses vary widely with the needs of the individual student.

Tuition, Incidental, and ASUW Membership Fees

Full-time resident student	\$300.00
----------------------------	----------

Full-time nonresident student	600.00
-------------------------------	--------

<i>Athletic Admission Ticket</i> (optional)	6.50
---------------------------------------------	------

<i>Health and Accident Insurance</i> (optional)	16.50
-------------------------------------------------	-------

<i>Books and Supplies</i>	90.00
---------------------------	-------

Board and Room

Room and meals in Men's Residence Halls	675.00
-----------------------------------------	--------

Room and meals in Women's Residence Halls	615.00-720.00
-------------------------------------------	---------------

<i>Personal Expenses</i>	300.00
--------------------------	--------

STUDENT ACTIVITIES AND SERVICES

ASSOCIATED STUDENTS

Membership in the Associated Students of the University of Washington, the central organization which conducts all student activities, is required of all regularly enrolled students. Through the ASUW Board of Control and its various committees and boards, students assume major responsibility in the government of student life. The ASUW helps to finance the programs of athletics, debates, concerts, lectures, and many other activities and facilities, including the University of Washington *Daily* and the Student Union Building.

OFFICE OF THE DEAN OF STUDENTS

The Office of the Dean of Students is concerned with the general welfare of students and welcomes correspondence and conferences with both parents and students. This Office works closely with the advisory system of the colleges and schools of the University; it directs students to faculty advisers, the Counseling Center, and other persons and agencies offering information and assistance with personal and social problems. The Office of the Dean of Students also has current information on Selective Service regulations.

The Foreign Students Office operates through the Office of the Dean of Students. The Foreign Student Adviser and his staff offer guidance on all nonacademic problems to students from other countries. Questions about immigration regulations, housing, social relationships, personal problems, finances, minimum course requirements, and employment should be referred to this Adviser. Students who are interested in studying abroad may obtain from him information about schools in other countries and about Fulbright and other scholarships.

COUNSELING CENTER

The Counseling Center, Lewis Hall Annex, offers vocational and educational counseling to students who need help in their adjustments to college. The staff of the Center, which includes vocational counselors and psychologists, works closely with other student services and supplements the academic advisory program.

HOUSING

Information and applications for residence in University-owned housing for single persons and for childless married graduate students may be obtained by writing to the University of Washington, Manager, Men's Residence Halls, 1201 Campus Parkway, Seattle 5, or to the University of Washington, Manager, Women's Residence Halls, Seattle 5. Many men graduate students live in Rofcre

House in one of the Men's Residence Halls. Preference in assignment to vacancies in the Residence Halls is given to students under twenty-one years of age until August 1; thereafter assignments are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings must, however, be consulted in person.

Information about fraternities or sororities may be obtained by writing to the University of Washington, Interfraternity Council, or the Panhellenic Council, Student Union Building, Seattle 5.

Teaching and research assistants and other part-time sub-faculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 23 Administration Building, for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

HEALTH SERVICES

The University maintains a health service and infirmary to help guard against infectious diseases and incipient ill health. The infirmary receives bed patients at any hour and provides nursing care, medicines, and the attendance of a staff doctor up to one week each quarter free of charge. For a period longer than one week, a charge of \$2.00 a day is made. At their own expense, infirmary patients may consult any licensed physician in good standing.

Health and Accident Insurance for students is available at the time of registration.

EMPLOYMENT

Part- and full-time work off campus may be obtained at the University Placement Office. Applications are accepted from students or graduates of the University and from the wives or husbands of University students. Application must be made in person after residence has been established in Seattle.

There are many job opportunities on the campus for graduate students. For example, dormitory counselorships are available in the Men's Residence Halls, and skilled technicians are employed in nearly every University activity. Students may apply directly to the department in which they hope to work or to the Personnel Department.

Working students must be sure to correlate their employment with Graduate School regulations governing study loads (see Registration, page 61).

THE GRADUATE PROGRAMS

THE GRADUATE PROGRAMS

THE GRADUATE SCHOOL offers programs leading to the master's degree through the following schools and colleges: *Architecture and Urban Planning*; *Arts and Sciences*: anthropology, art, botany, chemistry, classics, communications, drama, economics, English (including general and comparative literature), Far Eastern and Slavic languages and literature, genetics, geography, geology, Germanic languages and literature, history, home economics, mathematics, meteorology and climatology, music, oceanography, philosophy, physical education, physics, political science, psychology, Romance languages and literature, Scandinavian languages and literature, sociology, speech, and zoology; *Business Administration*; *Dentistry*; *Education*; *Engineering*: aeronautical, chemical, civil, electrical, mechanical, and mineral engineering; *Fisheries*; *Forestry*; *Librarianship*; *Medicine*: anatomy, biochemistry, microbiology, pharmacology, physiology and biophysics, and surgery; *Nursing*; *Pharmacy*; *Public Administration*; and *Social Work*. Interdisciplinary programs in *Linguistics* and in *Radiological Sciences* are administered by special committees of the Graduate School.

Programs leading to the Doctor of Philosophy degree are offered through the following schools and colleges: *Arts and Sciences*: anthropology, botany, chemistry, classics, economics, English (including general and comparative literature), Far Eastern and Slavic languages and literature, genetics, geography, geology, Germanic languages and literature, history, mathematics, meteorology and climatology, music, oceanography, philosophy, physics, political science, psychology, Romance languages and literature, sociology, speech, and zoology; *Education*; *Engineering*: aeronautical, chemical, civil, electrical, mechanical, and metallurgical engineering; *Fisheries*; *Forestry*; *Medicine*: anatomy, biochemistry, microbiology, pathology, pharmacology, and physiology and biophysics; and *Pharmacy*. An interdisciplinary program in *Linguistics* is administered by a special committee.

A program for the degree Doctor of Musical Arts, a professional degree primarily for students preparing for college teaching with emphasis in performance or composition, is offered through the School of Music.

A program leading to the degree of Doctor of Business Administration is offered through the College of Business Administration. This is a professional degree primarily for students preparing for teaching and research positions in business administration and for administrative and policy-making positions in business.

A program for the degree of Doctor of Education, a professional degree primarily for teachers and school administrators, is offered through the College of Education.

RESIDENCE

The residence requirement for the master's degree is one year (three quarters). The requirement for the doctor's degree is three years, two of them at the University of Washington. Since one of the two years must be spent in continuous full-time residence (three out of four consecutive quarters), the residence requirement for the doctor's degree cannot be met solely with summer study.

Although the normal load in graduate work is 12 credits, full residence credit is granted for any quarter in which at least 9 credits in graduate course, research, or thesis work are acceptably completed. Courses numbered below 300 are not applicable to residence or course credit for advanced degrees.

Residence credit for part-time students is figured on the basis of 12 credits per quarter, and students who carry less than the number required for full residence will increase proportionately the amount of time necessary to obtain a graduate degree.

All work for a master's degree must be completed within six years; for the doctor's degree, within ten years. This includes applicable work from the master's degree and work transferred from other institutions.

Students who are doing research or thesis work must register for this work in order to obtain residence credit. The number of research or thesis credits for which students register should be the proportion of the normal load which they are devoting to research or thesis. For example, if a student is on a half-time basis and is concentrating exclusively on thesis preparation, registration for thesis should be one-half the normal load or 6 credits. Registration for thesis should always be indicated separately from registration for research; in other words, registration for graduate research courses (those numbered 600) must be for work other than that covered by registration for thesis.

Theses may be written *in absentia* only if all course and residence requirements have been completed. In exceptional cases, however, residence credit may be given when a thesis is prepared *in absentia* because necessary data cannot be obtained at the University. Arrangements for writing theses *in absentia* must be approved in advance by the Graduate School and the department which is supervising the work.

All students, whether *in absentia* or in residence, must be registered with the University the quarter in which they receive their degrees.

SCHOLARSHIP

If students are to make satisfactory progress toward advanced degrees, success in their courses of study must be assumed. To be eligible for a degree in the Graduate School a student must have an average of B (3.00) in ALL courses numbered 300 and above. Students whose work is not of approved quality may be asked by the Dean of the Graduate School to withdraw from the Graduate School.

MASTER'S DEGREES

To qualify for a master's degree, the candidate must meet these requirements:

1. Present at least 27 credits of course work successfully completed. Half of the work for the master's degree, including the thesis, must be in courses numbered 500 and above.
2. Present a minimum of three full-time quarters of residence credit. (Part-time quarters may be accumulated to meet this requirement.)
3. Present a certificate of proficiency in a foreign language (unless specifically excepted for a particular degree).
4. Prepare a thesis which is approved by the Supervisory Committee (unless specifically excepted in a particular program). Credit for the thesis ordinarily should be one fourth of the total credit, usually 9 credits, for the degree. Students

must register for thesis. The number of credits indicated in such registration should be the proportion of the normal load which the student is devoting to the thesis.

5. Satisfy any additional requirements the major department or the Supervisory Committee imposes.

While every candidate is expected to take some work outside his major department, the major department and the Supervisory Committee determine the requirements for supporting courses. The candidate should consult with his Supervisory Committee in planning requirements for the minor.

Students must satisfy the requirements for the degree which are in force at the time the degree is to be awarded.

Candidates are expected to attend Commencement exercises.

ADMISSION TO CANDIDACY FOR THE MASTER'S DEGREE

The student must make application for the master's degree at the Graduate School Office *within the first two weeks of the quarter in which he expects the degree to be conferred*. When the application is received, the Graduate School will review the student's record and his current registration and will notify him, his department, and his Supervisory Committee promptly as to whether he will have satisfied the requirements for the degree at the end of the quarter. The previous work taken by the student, together with his current registration as planned with the approval of his department, must meet the requirements for the degree if the application is to be approved. Failure to meet the requirements of the Graduate School or of the department will necessarily prolong the student's candidacy for his degree. The student and his departmental adviser should be thoroughly acquainted with the requirements for the particular degree.

TRANSFER AND EXTENSION CREDIT

Up to 9 graduate credits taken while a graduate student in the Graduate School of another accredited institution may be applied toward the master's degree. Six credits of extension work may be similarly applied, but only if taken at the University of Washington and only if taken after the student has been officially admitted to the Graduate School here. A combination of transfer and extension work not exceeding 9 credits may be applied to the master's degree. The minimum residence requirement of three quarters at the University of Washington may not be reduced by transfer or extension credits. Neither correspondence credit nor credit by examination is acceptable.

EXAMINATION

As soon as is appropriate, but not later than the time when the student's application for the degree has been approved, his major department appoints a Supervisory Committee consisting of not less than three members, including a member from the minor department, if any. The chairman of this committee arranges the time and place of the Final Examination, the results of which must be reported to the Graduate School Office at least two weeks before the date on which the degree is to be conferred. The examination may be oral or written, and all members of the committee must certify its results. If the examination is not satisfactory, the committee may recommend to the Graduate School that the candidate be allowed to take another examination after an interval of further study.

THESIS

The thesis should be evidence of the candidate's ability to do independent investigation and to present the results in clear and systematic form. Two copies of the thesis, with forms signed by the members of the examining committee from the major department, must be deposited in the Graduate School Office at least two weeks before the degree is to be conferred. The department may require the candidate to present an additional copy for its own use. Instructions for the preparation of theses in acceptable form may be obtained from the Graduate School.

NONTHESIS PROGRAMS

Some departments have arranged programs for the master's degree which do not require the preparation of a thesis. These programs normally include a more comprehensive plan of course work or more extensive examinations than thesis programs, or they may include some approved research activity in lieu of a thesis. Nonthesis programs must be approved by the department and indicated in the student's registration not later than the beginning of the second quarter of his work.

DOCTOR'S DEGREES

The doctor's degree is by nature and tradition the highest certificate of membership in the academic community. As such it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctor's degree are devices whereby the candidate may demonstrate his present capacities and future promise for scholarly work.

In order to qualify for the doctor's degree, the candidate must meet the following minimum requirements:

1. Complete a program of study and research as planned by his major department or college, and his Supervisory Committee, of which half, including the thesis, must be in courses numbered 500 or above.

2. Present a minimum of three academic years of resident study, two of them at the University of Washington with at least one year in continuous full-time residence. (The continuous year may be satisfied with three out of four consecutive full-time quarters.)

3. Demonstrate a reading knowledge of two foreign languages related to the major field of study. (Language requirements for the Doctor of Business Administration and the Doctor of Education degrees are slightly different.)

4. Prepare a thesis or dissertation which is a significant contribution to knowledge and which clearly indicates training in research. Credit for the dissertation ordinarily should be one-third of the total credit, i.e. usually 36 credits, for the degree. Students must register for thesis. The number of credits indicated in such registration should be the proportion of the normal load which the student is devoting to the thesis.

5. Pass creditably a General Examination in the major field and, when a part of the program, in the minor field or supporting courses.

6. Pass creditably a Final Examination, which is usually devoted to the dissertation and the field with which it is concerned.

While every candidate is expected to take some work outside his major department, the Supervisory Committee determines the requirements for minors and supporting courses.

Students must satisfy the requirements which are in force at the time the degree is to be awarded.

Candidates are expected to attend Commencement exercises.

ADMISSION TO CANDIDACY FOR THE DOCTORAL DEGREE

As soon as is appropriate, but not later than the end of the second year of the student's graduate work, the major department will request the Graduate School to appoint a Supervisory Committee, which will include a graduate faculty representative, to assume general sponsorship of the prospective candidate. At the end of two years of graduate study, and after a successful demonstration of proficiency in two foreign languages, the chairman of the Supervisory Committee may present to the Graduate School for approval a warrant permitting the student to take the

General Examination for admission to candidacy for the doctoral degree. This is taken by the Graduate School to mean that, in the opinion of the Committee, the student's background of study and preparation is sufficient to justify his undertaking the examinations. The warrant should indicate the time, place, and manner of the examination, and must be received at least two weeks prior to the proposed examination date. The warrant is approved by the Graduate School only after the prescribed requirements of residence and study have been met. If the examination is oral, a majority of the examining committee must be present during the entire examination.

If the student's performance in his General Examination is judged by his Supervisory Committee to be satisfactory, then a warrant certifying the successful completion of his General Examination is filed in the Graduate School Office by the Chairman of his Supervisory Committee.

Thereafter, the student is identified and designated as a candidate for a doctoral degree and ordinarily devotes his time primarily to the completion of research for his thesis or dissertation and to preparation for his Final Examination.

Normally, a student must be registered at least two quarters at the University of Washington after he passes his General Examination and before a warrant is authorized for the Final Examination.

THESIS OR DISSERTATION AND FINAL EXAMINATION

The candidate must present a thesis or dissertation demonstrating original and independent investigation and achievement; it should reflect not only his mastery of research techniques but also his ability to select an important problem for investigation and to deal with it competently. Instructions for the preparation of theses in acceptable form may be obtained from the Graduate School.

When the Supervisory Committee believes that the doctoral candidate is prepared to take his Final Examination, the Graduate School is asked to designate a thesis-reading committee from among the members of the Supervisory Committee. Using forms provided by the Graduate School, the reading committee prepares a report briefly summarizing the distinctive achievement of the research, the methods used, and the results. If the report is favorable and is presented to the Graduate School two weeks before the Final Examination date, and if the candidate has met all other requirements, a warrant authorizing the Final Examination is issued by the Graduate School.

The thesis report is not binding upon the Supervisory Committee, but is intended to insure that, except for minor alterations, the dissertation is ready for final presentation. The Graduate School returns the thesis report to the Supervisory Committee, together with the warrant for the Final Examination, and upon approval by the Supervisory Committee at the time of the Final Examination, it is bound with the dissertation.

If the Final Examination is satisfactory, the Supervisory Committee signs the Graduate School's warrant and returns it at least two weeks before the end of the quarter in which the degree is to be conferred. If the examination is unsatisfactory, the Supervisory Committee may recommend that the Dean of the Graduate School permit a second examination after a period of further study.

PUBLICATION OF DOCTORAL DISSERTATIONS

All doctoral dissertations are published in full on microfilm. Two weeks before the end of the quarter in which the degree is to be conferred, the candidate must present two copies of his dissertation to the Graduate School. Each copy is to be accompanied by a copy of the thesis report and an abstract, not exceeding six hundred words in length, which has been approved by the Supervisory Committee at the time of the final examination. A receipt for the \$25.00 publication charge must be shown when the dissertation is presented.

Abstracts are published in full in the publication *Microfilm Abstracts*, and the manuscript copies of the dissertations are kept on file in the University Library. A positive of each microfilmed dissertation is sent to the Library of Congress to be entered in its subject and author file, and the negative is retained by University Microfilms, of Ann Arbor, Michigan, which provides additional microfilm copies on order.

The candidate signs the necessary publication agreement at the time he presents his dissertation to the Graduate School, and if he wishes he may apply for a copyright. Publication in microfilm does not preclude other forms of publication.

COURSE-NUMBERING SYSTEM

Courses numbered 500 and above are intended for and restricted to graduate students. Some courses numbered in the 300's and 400's are open both to graduates and to upper-division undergraduates. Such courses are listed in this Bulletin and, when acceptable to the Supervisory Committee, and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300 courses for the minor or supporting fields only; approved 400 courses are accepted as part of the major.

Undergraduate students of senior standing who wish to register for a 500 course must obtain permission from both the instructor of the class and the Dean of the Graduate School.

Hyphens between course numbers mean that credit is not granted until the series of courses is completed. The number in parentheses following the course title indicates the amount of credit each course carries. In most lecture courses, a credit is given for each class hour a week during a quarter; laboratory courses generally carry less credit than the work time required. An asterisk in place of a credit number means that the amount of credit is variable.

Not all of these courses are offered every quarter. Final confirmation of courses to be offered, as well as a list of times and places of class meetings, is given in the *Yearly Time Schedule*.

COLLEGE OF ARCHITECTURE AND URBAN PLANNING

Dean: ARTHUR P. HERRMAN, 204 Architecture Hall

ARCHITECTURE

The program leading to the degree of Master of Architecture stresses professional consultation, with emphasis on the analysis of the forces which shape architecture, such as economics, structure, history, mechanical and electrical equipment, aesthetics, and social and psychological influences. Seminars and research focus upon a study of the interaction of these forces and their resultant effect upon architecture. The student is permitted to select his study in various areas of interest with special emphasis on civic design, planning, and building organization in education and health facilities. Such supplementary courses will be offered from those listed in the *Graduate School Bulletin* as the graduate adviser deems appropriate to an individual's program.

A student seeking admission to the graduate program in Architecture must satisfy the requirements of admission as outlined in the *Graduate School Bulletin* of the University of Washington. In registering, he must show evidence of having attained a Bachelor of Architecture degree, or the equivalent, from an accredited college or school of Architecture in the United States or any other country. In addition, he must produce scholastic evidence of his proficiency in design, planning, structures, mechanics, aesthetics, and history to his Supervisory Committee

in the faculty of the College of Architecture and Urban Planning. All deficiencies, or lack of necessary academic subject material required to secure the degree of Bachelor of Architecture from the College of Architecture and Urban Planning of the University of Washington, must be corrected before admission will be considered. If deficiencies are evident the student must satisfy any additional requirements the Graduate Committee deems necessary.

A degree of Master of Architecture will be awarded upon satisfactory completion of 36 or more credits, including 9 credits for a master's thesis. A foreign language is not required. A minimum of one school year (three quarters) in residence is required of students seeking a degree of Master of Architecture. The master's thesis may be prepared and presented during the three-quarters residence period; however, such procedure will not be encouraged in order that more time and effort can be devoted to required subject material during the academic year.

Further inquiries regarding the program should be addressed to: Prof. Robert H. Dietz, Chairman, Graduate Program in Architecture, College of Architecture and Urban Planning.

REQUIRED PROFESSIONAL COURSES

Architecture 524, 525, 526	Advanced Architectural Studies (6,6,6)	Staff
Studies to provide a comprehensive knowledge for solving problems dealing with architecture.		
Architecture 560, 561, 562	Graduate Seminar (3,3,3)	Dietz
Advanced analysis and interpretation of the forces influencing architecture.		
Architecture 700	Thesis (9)	Staff

ELECTIVES

Architecture 450	Landscape Seminar (2)	Haag
Architecture 468	Professional Practice (2)	Herrman
Urban Planning 479	The Urban Form (2)	Johnston
Urban Planning 480	Urban Planning Analysis I (3)	Wolfe
Urban Planning 482	Urban Community Facilities (2)	Staff
Urban Planning 485	Housing (2)	Wolfe
Urban Planning 490	City Planning Design (7)	Wolfe
Civil Engineering 403	Principles of Urban Planning (3)	Horwood
Economics 350	Public Finance and Taxation I (5)	Ballesteros
Political Science 375	Problems of Municipal Government and Administration (5)	Warren
Real Estate 301	Urban Land Economics and Real Estate Institutions (5)	Staff

URBAN PLANNING

Advisory Committee: EDGAR M. HORWOOD, Associate Professor of Civil Engineering; CALVIN F. SCHMID, Professor of Sociology; JOHN C. SHERMAN, Associate Professor of Geography; DONALD H. WEBSTER, Professor of Political Science; BAYARD O. WHEELER, Professor of Business Administration; MYER R. WOLFE, Professor of Urban Planning

The professional degree Master of Urban Planning is awarded for demonstrated competence in urban studies and urban planning methodology. The program is administered by the College of Architecture and Urban Planning, but also involves a number of other academic departments which are represented in the Advisory Committee listed above.

Candidates are admitted to the curriculum after meeting general admission requirements of the Graduate School and the requirements of the College of Architecture and Urban Planning and the Advisory Committee. Applicants may come from undergraduate areas in the social sciences, humanities and applied arts, and

sciences or professions. The curriculum is also oriented toward offering a minor in urban planning to graduate students in related fields.

The degree will be awarded upon satisfactory completion of specified courses, a thesis, and an oral examination. The varying background of training and experience found among candidates for this degree permits some adjustment of the student's program to meet individual needs and objectives. Courses are divided into *foundation* courses, which include urban study and background courses, and *professional* courses, the core of the program. The Urban Planning Curriculum Prospectus (available upon request) lists in detail the *foundation* course requirements, some of which may be satisfied before entrance to the graduate curriculum. The required *professional* courses are listed below. No foreign language is required.

Further inquiries regarding the program should be addressed to: Prof. M. R. Wolfe, Chairman, Graduate Program in Urban Planning, College of Architecture and Urban Planning.

REQUIRED PROFESSIONAL COURSES

Urban Planning 479	The Urban Form (2)	Johnston
Urban Planning 480, 481	Urban Planning Analysis I and II (3,3)	Wolfe, Staff
Urban Planning 482	Urban Community Facilities (2)	Staff
Urban Planning 590, 591, 592, 593	Urban Planning Problems (7,7,7,7)	Wolfe, Staff
Typical planning problems using the city as a laboratory. Emphasis on urban research, evaluation of basic data, planning proposals, and presentation techniques. Prerequisite, graduate student in urban planning.		
Civil Engineering 521	Seminar in Urban Transportation Planning (2)	Horwood
Political Science 581, 582	Seminar in Metropolitan and Urban Planning Problems (3,3)	Webster
Sociology 530	Advanced Human Ecology (3)	Schmid
or 531	Demography (3)	Schmid
Real Estate 520	Seminar in Real Estate and Urban Land Economics (3)	Seyfried
or Geography 510	Research Seminar: Settlement and Urban Geography (3, maximum 9)	Ullman
Urban Planning 600	Research (*)	Staff
Urban Planning 700	Thesis (9)	Staff

COLLEGE OF ARTS AND SCIENCES

Dean: SOLOMON KATZ, 122 Thomson Hall

ANTHROPOLOGY

Acting Executive Officer: KENNETH E. REED, 345 Savery

The Department offers courses leading to the degrees of Master of Arts and Doctor of Philosophy.

All candidates for advanced degrees must demonstrate basic proficiency in all fields of anthropology in the First Year Examination, given during the third quarter of full residence. The fields are: general ethnology, archaeology, linguistics, physical anthropology, and social anthropology. A part of the graduate work, with permission, may be devoted to a minor in a related field.

Students whose preparatory work in anthropology is inadequate will be required to take additional undergraduate courses before being admitted to graduate study.

MASTER OF ARTS. Candidates must complete an approved program of courses and pass the master's examination which will cover general ethnology and two other fields of anthropology, selected from those listed above. The thesis must be in one of the three fields.

DOCTOR OF PHILOSOPHY. Candidates must complete an approved program of courses, and pass the General Examination which will cover general ethnology and, normally, two other fields of anthropology selected from those listed above. The dissertation must be in general ethnology or one of the selected fields. In unusual cases, permission may be given for coverage of general ethnology and only one other field.

Special permission is required for the candidate to proceed directly to the doctorate without taking a master's degree. The language requirements must be satisfied at least three quarters before the General Examination. Field work is normally required of all candidates.

Requirements for a minor in anthropology for a doctor's degree are the same as for the master's degree with a minimum of 12 credits in courses numbered 500 or above.

COURSES

311 Indian Cultures of the Pacific Northwest (3)	Garfield
314J Peoples of Central and Northern Asia (3) Offered jointly with the Far Eastern and Russian Institute.	Staff
315 Peoples of the Far North (3) (Offered 1962-63.)	Garfield
317 Ethnology of Southeast Asia (3) (Offered 1962-63.)	Staff
320 Primitive Technology (5)	Greengo, Gunther
332 The Religions of Primitive Peoples (3)	Read, Staff
350 Basis of Civilization (3)	Watson
355 Introduction to Language (3)	Jacobs, Staff
370 Methods and Problems of Archaeology (5)	Greengo
371 Analysis of Archaeological Data (3) (Offered 1962-63.)	Greengo
380 Primate and Human Evolution (3)	Avis
415 The Character of Eskimo Life (3)	Ray
417 Middle American Civilization (3) (Offered 1962-63.)	Greengo
418 Ethnology of Meso-America (3)	Ray
425 Applied Anthropology (3)	Ottenberg
431 Primitive Literature (3)	Garfield
432 Magic, Religion, and Philosophy (3)	Ray
433 Primitive Art (3)	Gunther, Staff
434 Comparative Morals and Value Systems (3)	Read
435, 436 Primitive and Peasant Economic Systems (3,3)	Staff
437 Primitive Political Institutions (3)	Ray
438 The Analysis of Kinship Systems (3)	Read
441 Culture and Personality (5)	Spiro, Staff
442 Childhood and Society (3)	Spiro, Staff
451J, 452J, 453J Phonetics and Phonemics (3,3,3) Offered jointly with the curriculum of the Committee on Linguistics.	Staff
455 Areal Linguistics (3, maximum 6)	Jacobs, Staff
460 History of Anthropological Theory (3)	Jacobs, Staff
462J, 463J Morphology and Syntax (3,3) Offered jointly with the curriculum of the Committee on Linguistics.	Staff
470 Culture History of Austronesia (3)	Greengo
480 Physical Anthropology: Anatomy (3)	Avis
481 Physical Anthropology: Structure and Function	Avis
482 Physical Anthropology: Genetics (3)	Avis

- 500, 501, 502 Preceptorial Reading (3,3,3)** **Staff**
A "core" course for the beginning graduate student in which the fields and problems of contemporary anthropology are systematically surveyed.
- 505 Field Techniques in Ethnography (3)** **Ray, Staff**
The techniques of collecting, recording, ordering, and utilizing ethnographic data in the field. Problems of rapport, sample, interview, observation, and interpretation.
- 510 Seminar in Areal Ethnology (3, maximum 9)** **Staff**
An intensive analysis of the cultural problems of a selected area in their spatio-temporal context.
- 511 Cultural Problems of the Northwest Coast (3, maximum 6)** **Garfield**
The major ethnological questions of the region are examined.
- 519J Seminar on Asia (3, maximum 6)** **Staff**
The large cultural regions of the continent are studied in succession with special reference to anthropological problems. (Offered jointly in alternate years, with the Far Eastern and Russian Institute; offered 1962-63.)
- 521 Native American Culture History (4)** **Garfield, Staff**
An historical interpretation of the geographical distribution of critical aspects of North and South American Indian cultures.
- 522 Cultural Problems of Western America (3)** **Ray**
Analysis of the components of representative Indian cultures west of the Rocky Mountains and research on selected problems.
- 524 Seminar in Cultural Problems of Arctic and Sub-Arctic (3, maximum 6)** **Garfield, Staff**
Cultural relationships across the North Pacific; culture history of Arctic regions, Asiatic and American; cultural factors in cold-land adaptation and adjustment.
- 525 Seminar in Culture Processes (3, maximum 6)** **Watson**
The concept of process and its application to the study of culture.
- 527 Acculturation (3)** **Watson**
Systematic analysis of psychological, social, and cultural implications of the contact of peoples.
- 530 Structures and Functions of Oral Literature (3)** **Jacobs**
(Offered 1962-63.)
- 531 Analysis of Oral Literature (3, maximum 6)** **Garfield**
Various approaches to the study of folklore and myth.
- 537, 538, 539 Non-Western Political Systems (6,6,6)** **Staff**
Ethnic manifestations, methodological problems and theoretical implications of polity in a wide range of cultures; workshop and research.
- 541 Seminar in Psychological Aspects of Culture (3)** **Spiro, Staff**
Selected problems in the relation of culture and personality types.
- 542J Personality Patterns in Japanese Culture (3)** **Staff**
The nature and content of Japanese social life as it bears upon Japanese character. Prerequisite, permission. Offered jointly with the Far Eastern and Russian Institute.
- 553J Analysis of Linguistic Structures (3)** **Jacobs, Li**
Offered jointly with the Far Eastern and Russian Institute.
- 555J Methods in Comparative Linguistics (3)** **Staff**
Offered jointly with the curriculum of the Committee on Linguistics.
- 559 Seminar in Language and Culture (3)** **Jacobs, Staff**
Theoretical and methodological problems in language and culture.
- 561 Seminar in Methods and Theories (3, maximum 9)** **Watson, Ray**
- 563 Structural-Functional Analysis (3-9)** **Read, Spiro**
- 565-566-567 History of Anthropological Sciences (3-3-3)** **Staff**
A "core" course for beginning graduate students, in which the growth and development of anthropological science is analyzed.
- 570 Seminar in Archaeology (3)** **Greengo**
(Offered 1962-63.)
- 571 Field Course in Archaeology (5)** **Greengo**
Study of prehistoric cultures through archaeological excavation and analysis. Work will be largely in the state of Washington, but other areas may be included. (Offered Summer Quarter only.)
- 580 Anthropology in Contemporary Problems (3)** **Gunther**
(Offered 1962-63.)
- 581 Anthropological Migration and Population Study (3)** **Staff**
(Offered 1962-63.)
- 582 Seminar in Race and Genetics (3)** **Staff**
- 600 Research (*)** **Staff**
- 700 Thesis (*)** **Staff**

ART

Director: BOYER GONZALES, 102 Art Building

The School of Art offers courses leading to the degree of Master of Fine Arts. In addition to Graduate School general admission requirements (see page 57), students desiring to pursue a course of study leading to the Master of Fine Arts degree must have a grade average of B or better in the undergraduate art major and must have completed the equivalent of our undergraduate degree requirements. The applicant must also prepare a student show indicating the scope and proficiency of his undergraduate work, which will be voted upon by the faculty before his admission is fully approved.

The student's program of studies will be determined by his committee from the direction of work needed for his thesis and from the needs indicated by his background and his level of achievement in graduate study. The committee may require additional work beyond the basic minimum if it feels it is necessary for the student to make up deficiencies or inadequacies.

Students accepted for admission will be required to complete a program of a minimum of 36 credits of scheduled class work and 9 credits of thesis for a total of 45 credits for the degree. A maximum of 9 credits (if approved) may be transferred from other schools. An acquaintance with the general field of art and proficiency in performance will be expected of each recipient of the degree of Master of Fine Arts.

The thesis is in the nature of a project, such as a series of paintings, prints, sculpture, or ceramic objects, designs in metal, fabric, or other equivalent project executed with a background of research. In most cases the thesis is not finished during the one year of residence, as more time is often required for its satisfactory completion. The thesis must be in a form suitable to the committee and must be approved by the faculty of the School of Art.

A record of the thesis in approved form, consisting of photographs, color transparencies, and the like, together with research material, a written statement of goals and background of the thesis, will be kept by the School of Art and must be filed in the Art Library two weeks before the end of the quarter in which the degree is to be received.

A selection from the student's thesis may be reserved for inclusion in the annual exhibition of masters' theses of the School of Art at the Henry Art Gallery.

COURSES

307, 308, 309 Portrait Painting (3,3,3)	Brazeau, Hixson
310, 311, 312 Interior Design (5,5,5)	Foote
316, 317, 318 Design for Industry (3,3,3)	Smith
322, 323, 324 Sculpture (3,3,3)	Du Pen
332, 333, 334 Advanced Sculpture (3,3,3)	Du Pen
340 Design for Printed Fabrics (3)	Penington
341J Greek Archaeology and Art (2) Offered jointly with the Department of Classics.	Edmonson
342J Roman Archaeology and Art (2) Offered jointly with the Department of Classics.	Edmonson
343J Greek Sculpture (2) Offered jointly with the Department of Classics.	Edmonson
350 Introduction to Printmaking (3)	Alps
351 Printmaking—Etching (3)	Alps
352 Printmaking—Serigraph (3)	Alps
353, 354, 355 Advanced Ceramic Art (5,5,5)	Sperry
357 Metal Design (3)	Penington

358 Jewelry Design (3)	Penington
359 Enameling (3)	Penington
360, 361, 362 Life (3,3,3)	Staff
366, 367, 368 Commercial Design (3,3,3)	Erickson
369, 370, 371 Costume Design (2,2,2)	Staff
375, 376, 377 Advanced Painting (3,3,3)	Staff
382 Art of India (3) (Offered alternate years; offered 1961-62.)	Rogers
383 Art of China (3) (Offered alternate years; offered 1961-62.)	Rogers
384 Art of Japan and Korea (3) (Offered alternate years; offered 1961-62.)	Rogers
386 The Art of the Ancient Near East (3) (Offered alternate years; offered 1962-63.)	Rogers
387 Islamic Art (3) (Offered alternate years; offered 1962-63.)	Rogers
388 Medieval Art (3) (Offered alternate years; offered 1962-63.)	Rogers
402J Greek and Roman Pottery (3) Offered jointly with the Department of Classics.	Edmonson
404J Greek and Roman Sculpture (3) Offered jointly with the Department of Classics.	Edmonson
410 Illustration (5)	Erickson
423, 424, 425 Art History and Criticism (2,2,2)	Rogers
426 The Origins of Modern Art (2)	Rogers
427 Art Since Cezanne (2)	Rogers
428 Oriental Ceramic Art (2)	Rogers
436, 437, 438 Sculpture Composition (5,5,5)	Du Pen
445, 446, 447 Advanced Industrial Design (5,5,5)	Del Giudice
450, 451, 452 Advanced Printmaking (5,5,5)	Alps
457, 458, 459 Advanced Metal and Jewelry (3,3,3)	Penington
463, 464, 465 Composition (3,3,3)	Brazeau, Hixson
466, 467, 468 Commercial Design (5,5,5)	Welman
472, 473, 474 Advanced Interior Design (5,5,5)	Footo
479, 480, 481 Fashion Illustration (2,2,2)	Staff
485, 486, 487 Advanced Ceramic Art (5,5,5)	Sperry
490 Art Education in the Schools (3)	Staff
498 Individual Projects (3 or 5, maximum 15)	Staff
500, 501, 502 Seminar in Art Education (3-5, 3-5, 3-5) Special problems in the teaching and supervision of art in the public schools. Prerequisite, graduate standing in art education.	Staff
507, 508, 509 Advanced Portrait Painting (3,3,3)	Brazeau, Hixson
510 Advanced Illustration (3 or 5)	Staff
522, 523, 524 Advanced Sculpture (3 or 5, 3 or 5, 3 or 5)	Du Pen
530, 531, 532 Advanced Design (3 or 5, 3 or 5, 3 or 5)	Staff
550, 551, 552 Advanced Printmaking (3 or 5, 3 or 5, 3 or 5)	Alps
553, 554, 555 Advanced Ceramic Art (3 or 5, 3 or 5, 3 or 5)	Sperry
560, 561, 562 Advanced Life Painting (3 or 5, 3 or 5, 3 or 5)	Staff
563, 564, 565 Composition (3 or 5, 3 or 5, 3 or 5)	Staff
600 Research (*)	Staff
700 Thesis (*)	Staff

BOTANY

Executive Officer: C. L. HITCHCOCK, 342 Johnson Hall

The Department of Botany offers programs leading to the degrees of Master of Science and Doctor of Philosophy. Fields for specialization are algology, anatomy and morphology, physiology, mycology, and taxonomy; and students may also choose genetics, in cooperation with the staff of the Department of Genetics. Students are encouraged to work out modern experimental approaches to problems. Facilities include a herbarium, well known for its collections of plants of the Pacific Northwest, adequate greenhouse and outplanting space, controlled-environment chambers, adequately equipped laboratories, good library facilities, a special peat-bog study area, and the Friday Harbor Marine Laboratories. Candidates for degrees take an examination on the general fields of botany shortly after beginning their studies. Certain parts of this examination may be deferred for students with deficiencies in undergraduate course work. Foreign language requirements are usually met with French, German, or Russian, but Latin may be accepted in the case of students in taxonomy. Training in organic chemistry is required for all candidates who lack this preparation.

MASTER OF SCIENCE. Students pursue a course of study designed to enhance their general and specialized training in botany and related sciences; take an examination in their field of specialization and in the other fields of botany; and submit a thesis describing their research.

DOCTOR OF PHILOSOPHY. Students pursue a program of formal and informal study in botany and related fields leading to a broader and more intensive training than is possible in the Master of Science studies. In preparation for the oral General Examination prescribed by the Graduate School, the candidate is required to pass detailed written departmental examinations in his field of specialty and usually also in a second field related to his field of specialty, and examinations in less detail in the remaining fields of botany. In the thesis study and in the writing of the thesis, the candidate is expected to develop and display originality and high potential as an independent investigator.

| Must be accompanied by 508. Prerequisite, permission. | |

- 509 Cellular Physiology (3)** **Whitoley**
Chemistry and physiology of the interkinetic and dividing nucleus, nucleocytoplasmic interactions, physiology of differentiated cells. (Offered alternate years; offered 1961-62.) Prerequisite, Zoology 400 or permission of instructor. (Biology 508 and 509 may be elected separately or in either sequence).

- 573 Topics in Limnology (2)** **Edmondson**
May be repeated for credit.

BOTANY

- 331 Ornamental Plants (3)** **Kruckeberg**
332 Taxonomy Field Trip (*, maximum 12) **Staff**
(Offering to be announced.)
- 361 Forest Pathology (5)** **Stuntz**
371 Elementary Plant Physiology (5) **Meeuse, Walker**
431, 432 Taxonomy (5,5) **Hitchcock**
(Offered alternate years; offered 1961-62.)
- 441, 442, 443 Morphology (5,5,5)** **Blaser, Neushul**
(Offered alternate years; offered 1962-63.)
- 444 Plant Anatomy (5)** **Blaser**
(Offered alternate years; offered 1961-62.)
- 445 Marine Algology (6)** **Neushul**
(Offered at Friday Harbor Summer Quarter only.) Prerequisites, 112 and permission.
- 446 Algology (5)** **Neushul**
Classification, recognition, and cultivation of marine and freshwater algae. Prerequisites, 112, or 20 credits in biology. (Offered alternate years; offered 1961-62.)
- 461 Yeasts and Molds (5)** **Stuntz**
462, 463 Mycology (5,5) **Stuntz**
471 Mineral Nutrition (5) **Walker**
(Offered alternate years; offered 1962-63.)
- 472 Plant Physiology (5)** **Meeuse, Walker**
473 Plant Physiology (3) **Meeuse**
(Offered alternate years; offered 1962-63.)
- 473L Plant Physiology Laboratory (2)** **Meeuse**
Must be accompanied by 473.
- 474 Plant Physiology (3)** **Walker**
(Offered alternate years; offered 1961-62.)
- 474L Plant Physiology Laboratory (2)** **Walker**
Must be accompanied by 474.
- 475 Problems in Algal Physiology (6)** **Meeuse**
(Offered at Friday Harbor, Summer Quarter only.)
- 498 Special Problems in Botany (1-15)** **Staff**
Prerequisite, permission.
- 520 Seminar (1)** **Staff**
Prerequisite, permission.
- 521 Topics in Plant Physiology (2, maximum 10)** **Meeuse, Walker**
Modern trends and methods in plant physiology. Prerequisite, 371 or 472, or permission.
- 522 Seminar in Morphology and Taxonomy (*, maximum 5)** **Staff**
Current research and trends in morphology and taxonomy of higher plants. Comparison of classical with modern approaches and concepts. Prerequisite, permission.
- 600 Research (*)** **Staff**
Original investigations of special problems in genetics, morphology, mycology, taxonomy, or plant physiology.
- 700 Thesis (*)** **Staff**

CHEMISTRY

Executive Officer: GEORGE H. CADY, 101 Bagley Hall

The Department of Chemistry offers courses leading to the degrees of Master of Science and Doctor of Philosophy. Candidates for advanced degrees are expected to take the qualifying and cumulative examinations. The qualifying, or entrance, examinations are designed to assess the student's knowledge and understanding of the material normally contained in an undergraduate program with a major in chemistry. These examinations are usually given Monday and Tuesday preceding

the opening of Autumn Quarter and may be repeated during the first week of Winter Quarter and toward the end of Spring Quarter. All parts of this examination should be passed within a year. The cumulative examinations, given six times during each academic year, are General Examinations in the student's area of specialization (analytical, inorganic, organic, or physical chemistry) and are designed to stimulate independent study and thought. They attempt to evaluate the breadth of knowledge gained from courses, seminars, literature, and the student's ability to apply this knowledge to diverse problems.

MASTER OF SCIENCE. Candidates for this degree usually present German as their foreign language.

DOCTOR OF PHILOSOPHY. The cumulative examination requirement for this degree is satisfied when six examinations have been passed. The language requirement may be satisfied by passing examinations in German and in either Russian or French.

COURSES

335, 336, 337	Organic Chemistry (3,3,3)	Staff
345, 346, 347	Organic Chemistry Laboratory (1,1,2)	Staff

427	Advanced Quantitative Theory (3)	Crittenden
428	Chemical Microscopy (3)	Robinson
429	Microquantitative Analysis (3)	Robinson
445	Qualitative Organic Analysis (3)	Staff
446	Advanced Organic Analysis (3)	Staff
447	Organic Synthesis (3)	Staff
511	Advanced Inorganic Chemistry (2) Halogens; less familiar metals; chelate, clathrate, interstitial and non-stoichiometric compounds; other selected topics. Prerequisite, 416 or permission.	Cady
512	Advanced Inorganic Chemistry (2) Acid-base theory; mechanism of certain reactions; compounds of nonmetals of groups 3, 4, and 5. Prerequisite, 416 or permission.	Ritter
513	Advanced Nuclear Chemistry (2) Nuclear reactions, fission, complex radioactive decay, absolute counting techniques, radiochemical separations, low-level techniques, geochemistry, cosmochemistry, chemistry of the synthetic elements. Prerequisite, 418 or permission.	Fairhall
526	Advanced Instrumental Analysis (3) Absorption and emission spectroscopy, polarography, potentiometry, and dielectric properties as applied to problems in analytical chemistry. Prerequisite, 426 or permission.	Crittenden
530, 531, 532	Advanced Organic Chemistry (3,3,3) Consideration of synthetic methods, structure determinations, and reaction mechanisms for acyclic, alicyclic, and aromatic compounds of synthetic and natural origin, with emphasis on modern theory and practice. Prerequisites, 337 and 445, or permission.	Staff
543	Natural Organic Products (3) Structure determination, properties and synthesis of steroids and other natural organic products of current importance. Prerequisite, 532 or permission.	Anderson

- 544 Theoretical Organic Chemistry (3)** **Staff**
Application of the theories of chemical bonding and equilibria to the structures and reactions of organic compounds. Prerequisite, 532 or permission.
- 545 Organic Synthetic Methods (3)** **Dauben**
Consideration of carbon skeleton synthetic methods, with emphasis on Diels-Alder, organo-metallic and basecatalyzed condensation reactions. Prerequisite, 532 or permission.
- 546 Organic Radical Reactions (3)** **Dauben**
Survey of reactions in solution involving radical intermediates. Prerequisite, 532 or permission.
- 547 Organic Heterocycles (3)** **Stout**
Synthesis and reactions of organic heterocycles, with emphasis on those of natural origin. Prerequisite, 532 or permission.
- 548 Physical Organic Chemistry (3)** **Schubert**
Interpretation and application of data obtained by combined methods of organic and physical chemistry to the problems of structures of organic compounds and mechanisms of organic reactions. Prerequisite, 532 or permission.
- 550, 551, 552 Advanced Physical Chemistry (3,3,3)** **Staff**
Thermodynamics and statistical mechanics, atomic and molecular structure, kinetic theory, and chemical kinetics. Prerequisite, 357 or permission.
- 555 Quantum Chemistry (3)** **Staff**
Calculation of energy levels for simple systems, approximation methods. Prerequisite, 551 or permission.
- 560 Chemical Kinetics (3)** **Rabinovitch**
Consideration of reaction rate theory and applications including specialized aspects of topical interest. Prerequisite, 552 or permission.
- 561 Thermodynamics of Solutions (3)** **Gregory**
The chemical potential and related partial molar thermodynamic properties, activity, thermodynamics of ions, electrochemical phenomena, theories of solutions. Prerequisite, 550 or permission.
- 562 Chemical Crystallography (3)** **Lingafelter**
Crystal structure of diffraction of X rays, electrons, neutrons; crystal chemistry; spectra of crystals; theory of metals. Prerequisite, 551 or permission.
- 563 Electron Dynamics (3)** **Simpson**
Chemical binding, dispersion forces, spectroscopy. Prerequisite, 555 or permission.
- 564 Molecular Dynamics (3)** **Eggers**
Molecular dynamics, force constants, symmetry, selection rules, and polar properties. Prerequisite, 555 or permission.
- 565 Statistical Mechanics (3)** **Halsøy**
Phase integral, quantum statistics, cooperative phenomena. Prerequisite, 555 or permission.
- 581 Topics in Inorganic Chemistry (3, maximum 18)** **Staff**
Open only to students accepted for doctoral work in chemistry.
- 582 Topics in Analytical Chemistry (3, maximum 18)** **Staff**
Open only to students accepted for doctoral work in chemistry.
- 583 Topics in Organic Chemistry (3, maximum 18)** **Staff**
Open only to students accepted for doctoral work in chemistry.
- 585 Topics in Physical Chemistry (3, maximum 18)** **Staff**
Open only to students accepted for doctoral work in chemistry.
- 590 Seminar in General Chemistry (1, maximum 18)** **Staff**
- 591 Seminar in Inorganic Chemistry (1, maximum 18)** **Staff**
- 592 Seminar in Analytical Chemistry (1, maximum 18)** **Staff**
- 593 Seminar in Organic Chemistry (1, maximum 18)** **Staff**
- 595 Seminar in Physical Chemistry (1, maximum 18)** **Staff**
- 600 Research (*)** **Staff**
- 700 Thesis (*)** **Staff**

CLASSICS

Executive Officer: JOHN B. McDIARMID, 218 Denny Hall

The Department of Classics offers programs leading to the degrees of Master of Arts and Doctor of Philosophy. Specific departmental requirements are described briefly below. More complete information may be obtained from the Department.

MASTER OF ARTS. Requirements are: a minimum of 27 credits in courses or seminars in Greek, Latin, and related subjects approved by the Department; either

an acceptable thesis or 9 additional credits in Greek or Latin 599, Graduate Reading; a minimum of three full-time quarters of residence; a reading knowledge of either French or German.

DOCTOR OF PHILOSOPHY. Requirements are: a minimum of 72 credits in courses or seminars in Greek, Latin, and related subjects approved by the Department; an acceptable dissertation; a minimum of three academic years of resident study, two of them at the University of Washington, one of which must be spent in continuous full-time residence; a reading knowledge of French and German. Candidates must pass a General Examination, both written and oral, before beginning work on the thesis, and a Final Examination upon completion of the thesis.

COURSES

GREEK

300	Greek Language, Accelerated (3)	Wyatt
309	Advanced Grammar and Composition (1, maximum 4)	Staff
N391	Sight Reading (0)	Staff
413	The Pre-Socratic Philosophers (3) (Offered alternate years; offered 1962-63.)	McDiarmid
414	Plato (3) (Offered alternate years; offered 1962-63.)	Rosenmeyer
415	Aristotle (3) (Offered alternate years; offered 1962-63.)	McDiarmid
420	Greek Epic (3) (Offered alternate years; offered 1961-62.)	Edmonson
422	Herodotus and the Persian Wars (3) (Offered alternate years; offered 1961-62.)	Edmonson
424	Thucydides and the Peloponnesian War (3) (Offered alternate years; offered 1961-62.)	Edmonson
442, 443, 444	Greek Drama (3,3,3) (Offered alternate years; offered 1961-62.)	McDiarmid
451	Lyric Poetry (3) (Offered alternate years; offered 1962-63.)	Rosenmeyer
453	Pindar: The Epinician Odes (3) (Offered alternate years; offered 1962-63.)	McDiarmid
455	Hellenistic Poetry (3) (Offered alternate years; offered 1962-63.)	Rosenmeyer
490	Supervised Study (3-6, maximum 18)	Staff
520	Seminar (3, maximum 27)	Staff
599	Graduate Reading (*, maximum 18) Supervised reading in selected fields.	Staff
600	Research (3-5, maximum 15)	Staff
700	Thesis (*)	Staff
702	Degree Final (0) Limited to students completing a nonthesis degree program.	Staff

LATIN

300	Latin Language, Accelerated (3)	Wyatt
309	Advanced Grammar and Composition (1, maximum 4)	Staff
N391	Sight Reading (0)	Staff
401	Medieval Latin (3)	Pascal
412	Lucretius (3) (Offered alternate years; offered 1961-62.)	Grummel
413	Cicero's Philosophical Works (3) (Offered alternate years; offered 1961-62.)	Grummel
414	Seneca (3) (Offered alternate years; offered 1961-62.)	Grummel
422	Livy (3) (Offered alternate years; offered 1962-63.)	Edmonson
423	Cicero's Orations (3) (Offered alternate years; offered 1962-63.)	Edmonson
424	Tacitus (3) (Offered alternate years; offered 1962-63.)	Edmonson

- 430 **Latin Novel (3)** Fredricksmeyer
(Offered alternate years; offered 1961-62.)
- 442 **Roman Drama (3)** Pascal
(Offered alternate years; offered 1962-63.)
- 451 **Roman Satire (3)** Pascal
(Offered alternate years; offered 1961-62.)
- 455 **Catullus (3)** Grummel
(Offered alternate years; offered 1962-63.)
- 456 **Horace (3)** Fredricksmeyer
(Offered alternate years; offered 1962-63.)
- 458 **Roman Epic (3)** Grummel
(Offered alternate years; offered 1961-62.)
- 475LJ **Improvement of Teaching: Latin (5)** Grummel, Pascal
Offered jointly with the College of Education. (Offered Summer Quarter only.)
- 475XJ **Caesar for High School Teachers (2½)** Grummel
Offered jointly with the College of Education. (Offered Summer Quarter only.)
- 490 **Supervised Study (3-6, maximum 18)** Staff
- 520 **Seminar (3, maximum 27)** Staff
- 599 **Graduate Reading (*, maximum 18)** Staff
Supervised reading in selected fields.
- 600 **Research (3-5, maximum 15)** Staff
- 700 **Thesis (*)** Staff
- 702 **Degree Final (0)** Staff
Limited to students completing a nonthesis degree program.

CLASSICS COURSES IN ENGLISH

- 422 **Greek Historians and Philosophers in English (3)** Rosenmeyer
- 426 **Greek and Roman Epic in English (3)** Rosenmeyer
- 427 **Greek and Roman Drama in English (3)** McDiarmid
- 430 **Greek and Roman Mythology (3)** Grummel
- 440 **Greek and Roman Critics in English (3)** Grummel

CLASSICAL ARCHAEOLOGY

- 341J **Greek Archaeology and Art (2)** Edmonson
Offered jointly with the School of Art.
- 342J **Roman Archaeology and Art (2)** Edmonson
Offered jointly with the School of Art.
- 343J **Greek Sculpture (2)** Edmonson
Offered jointly with the School of Art.
- 402J **Greek and Roman Pottery (3)** Edmonson
Offered jointly with the School of Art. (Offered alternate years; offered 1962-63.)
- 404J **Greek and Roman Sculpture (3)** Edmonson
Offered jointly with the School of Art. (Offered alternate years; offered 1962-63.)
- 406 **Greek Architecture (3)** Edmonson
(Offered alternate years; offered 1962-63.)
- 511 **Mycenaean Archaeology (3)** Edmonson
The art, architecture, and culture of Greece in the late Bronze Age, with emphasis on recent archaeological and linguistic discoveries. (Offered alternate years; offered 1961-62.)
- 513 **Athenian Topography (3)** Edmonson
Detailed consideration of the topography and monuments of ancient Athens from the beginning through the Roman period. (Offered alternate years; offered 1961-62.)
- 515 **Attic Epigraphy (3)** Edmonson
Study of Athenian inscriptions with emphasis on their historical value. The classification and editing of inscriptions, epigraphical techniques, and special problems are treated in detail. (Offered alternate years; offered 1961-62.)

CLASSICAL LINGUISTICS

- 501 **Comparative Phonology of Greek and Latin (3)** Wyatt
The phonological developments of Greek and Latin from Indo-European to the classical periods of both languages. (Offered alternate years; offered 1961-62.)
- 503 **History of the Greek Language (3)** Wyatt
The morphological and syntactical development of the Greek language from Homer through the New Testament; the development of prose and poetic style. (Offered alternate years; offered 1961-62.)
- 505 **History of the Latin Language (3)** Wyatt
The morphological and syntactical development of the Latin language; the development of Latin as a literary language. (Offered alternate years; offered 1961-62.)

- 506 Italic Dialects (3)** **Wyatt**
The principal remains of the non-Latin languages and dialects of ancient Italy. (Offered alternate years; offered 1962-63.)
- 508 Greek Dialects (3)** **Wyatt**
The non-Attic dialects of ancient Greek, based on a study of inscriptions and the literary remains. (Offered alternate years; offered 1962-63.)
- 510 Mycenaean Greek (3)** **Wyatt**
A study of the Linear-B tablets found in Crete and the Greek mainland. (Offered alternate years; offered 1962-63.)

COMMUNICATIONS

Acting Director: WILLIAM E. AMES, 129 Communications Building

The School of Communications offers courses leading to the degree of Master of Arts in Communications. Graduate students elect up to three fields of study and research, including society and mass communications, history and communications, communications and law, propaganda, theory and research in mass communications, advertising, and radio-television.

Students who wish to utilize courses in the School of Communications as a minor in graduate study leading to the degree of Doctor of Philosophy in another department should consult the Director of the School.

COURSES

Although other courses may be substituted on approval, those for which credit customarily is given toward the degree of Master of Arts in Communications include the following from the Communications sequence: 402, 406, 411, 414, 415, 480, 498, 502, 506, 511, 514, 580, 598, and 600.

Students taking courses in Communications toward an advanced degree in some other division or department may earn credit in any of the following courses in the School of Communications:

ADVERTISING

- 340 Advertising Procedures (5)** **Denis**
440 Advertising Campaigns (3) **Warner**

COMMUNICATIONS

- 316 Contemporary Affairs (3)** **Staff**
402 Freedom of the Press and Communications Law (3) **Benson**
403 Problems in Public Relations (3) **Christian**
406 Press and Society (3) **Ames**
411 Introduction to Mass Communications Research (3) **Edelstein**
414 History of Journalism (3) **Smith**
415 Comparative Communications (3) **Staff**
416 Press and World Affairs (3) **Staff**
470 Theory and Criticism of Broadcasting (3) **Niven**
480 Propaganda (3) **Edelstein**
498 Problems of Communications (1-5, maximum 10) **Staff**
502 Government and Mass Communications Seminar (3) **Benson**
506 Press and Society Seminar (3) **Ames**
511 Mass Communications Research Seminar (3) **Edelstein**
514 Journalism and History Seminar (3) **Smith**
570 Seminar in Theory and Criticism of Broadcasting (3) **Niven**
Prerequisite, 470.
580 Seminar in Propaganda (3) **Edelstein**
598 Selected Readings (1-5, maximum 5) **Staff**
600 Research (3-5) **Staff**
700 Thesis (*) **Staff**

JOURNALISM

- | | | |
|------------|------------------------------------------------------|---------------|
| 320 | Legal Aspects of Journalism (3) | Benson |
| 413 | Editorial Writing, Policies, and Research (3) | Benson |

RADIO-TELEVISION

- | | | |
|-------------|----------------------------------------------------------------|-----------------|
| 360 | Advanced Radio Production (2) | Cranston |
| 372 | Radio Dramatic Writing (3) | Adams |
| 373 | Television Writing (3) | Cranston |
| 450 | Television Programming (3) | Ryan |
| 451 | Television Performance (2) | Mally |
| 455 | Television Film Techniques (2 or 3) | Staff |
| 456 | Television Staging and Graphics (2 or 3) | Staff |
| 459J | Television in the Schools (2½) | Adams |
| | Offered jointly with the College of Education. (Formerly 460.) | |
| 461 | Television Production (3) | Ryan |
| 465 | Television Workshop Laboratory (2-4, maximum 8) | Ryan |
| 475 | Station Organization (3) | Adams |
| | Prerequisite, permission. | |
| 476 | Advanced Radio News Laboratory (2, maximum 6) | Cranston |

DRAMA

Director: GREGORY FALLS, 113 Drama-TV Building

The School of Drama offers courses leading to the degree of Master of Arts. Normally, although not necessarily, a major in drama is supported by a minor in English, speech, radio-TV, or comparative literature.

For the Master of Arts degree the requirement is a minimum of 36 credits, 9 of which are earned by the thesis. In addition to the thesis credits, 9 credits must be earned in courses numbered 500 or above. All candidates are required to take 501.

Three major areas of concentration are available: acting-directing, technical, and children's drama. The course of study for the master's degree will vary individually. A program leading to a degree is developed by the candidate and a faculty graduate Supervisory Committee, taking into account preparation, professional objectives, and professional interests. A student's general course of study must be approved in conference before he begins his work. A student transferring from another institution must make up any courses required for the Bachelor of Arts degree in drama in his respective area of emphasis, if he has not had the equivalent course work or practical experience. Required courses numbered in the 400 series may be applied toward the Master of Arts degree.

Each candidate is required to pass a comprehensive examination administered by his committee over the whole field of drama upon completion of his graduate program of study. In addition, he must pass an examination in a foreign language of his choice.

For students who qualify in the field of direction or children's drama, a thesis production may be permitted in partial fulfillment of the thesis requirement. Creative theses in the technical fields of drama and playwriting are also permitted. Such theses must be in a form suitable to the Committee and, in addition to involving research where applicable, must be presented in written form.

Although the required minimum of work in residence for the master's degree is three quarters, it is advisable to project for four quarters, and in the case of transfer students from institutions with a limited curriculum in drama, even five quarters.

The requirements for students from other departments to earn a minor in drama for the Master of Arts degree is 12 credits of work in approved courses acceptable for graduate credit in drama.

COURSES

300 Fundamentals of Stagecraft (5) Not open to students having credit in 403, 404, or 409.	Conway, Lounsbury
307 Fundamentals of Puppetry (2)	Valentinetti
335 Children's Theater (3)	Carr
338 Creative Dramatics (3)	Haaga, Siks
403 Scene Construction (3)	Lounsbury
404 Scene Design (3)	Conway, Davis
405 Historic Costume and Movement (3)	Crider
406 Theatrical Make-up (2)	Davis
407 History of Theatrical Costume (2)	Crider
408 Stage Costume Construction (2)	Crider
409 Stage Lighting (3)	Conway, Lounsbury
413 Advanced Scene Construction (2, maximum 4)	Lounsbury
414 Applied Scene Design (2, maximum 4)	Conway
415 Costume Projects (2, maximum 4)	Crider
416 History of Masks and Mask Making (2)	Davis
417 History of Wigs and Wigmaking (2)	Crider
418 Scene Painting (2, maximum 4)	Davis
419 Advanced Stage Lighting (2)	Lounsbury
421, 422 Advanced Acting (3,3)	Harrington
423 Acting Projects (2)	Staff
426 High School Play Direction (3)	Gray, Harrington
431 Advanced Puppetry (2)	Valentinetti
432 Applied Puppetry (2, maximum 6)	Valentinetti
434 Children's Theater (3) For nonmajors only.	Carr
435 Children's Theater Directing (2)	Carr
435L Children's Theater Directing Laboratory (1)	Carr
436 Children's Theater Production (3)	Carr
437 Creative Dramatics With Children (3) For nonmajors only.	Haaga, Siks
438 Creative Dramatics (2)	Haaga, Siks
438L Creative Dramatics Laboratory (1)	Haaga, Siks
439 Workshop in Creative Dramatics (3)	Haaga, Siks
440 History and Aesthetics of the Motion Picture (3)	Galstaun
441 History of World Theater and Drama: Classic and Oriental (5)	Conway, Hughes
442 History of World Theater and Drama: Medieval and Renaissance (5)	Conway, Hughes
443 History of World Theater and Drama: Modern (5)	Conway, Hughes
445 Playwrighting (3, maximum 9)	Hughes
461 Theory and Fundamentals of Musical Comedy (2)	Staff
462 Musical Comedy Direction (3)	Staff
479 Special Studies (1-5, maximum 5)	Staff
481 Theory and Fundamentals of Directing (2)	Harrington
481L Directing Laboratory (1)	Harrington
482 Projects in Directing (2)	Harrington
497 Theater Organization and Management (2)	Hughes
500 Seminar in Production (3) Critical discussion of the problems and interrelationship of direction, design, costume, staging, and lighting from preliminary through post-production stages of recent productions. Prerequisite, permission.	Conway, Crider, Davis, Harrington, Lounsbury
501 Nature of Graduate Study in Drama (2) Bibliographical resources for dramatic literature; the evaluation and organization of primary and secondary sources; the sources and philosophies of historical and contemporary criticisms.	Harrington

- 504 Advanced Stage Design (3)** **Conway**
Designing for modern and classic plays which offer special production problems. Adaptation of plays, operas, and musicals to small theatres. Analysis of play structure in relation to design requirements. Prerequisites, 404, 414, and permission of instructor.
- 505 Advanced Stage Costume Construction and Design (3)** **Crider**
Practical production experience in the design and construction of costumes and work with costume "stock." Required reading and research using the historic clothing museum collection as an integral part of the course. Prerequisites, 405, 407, 408, and permission of instructor.
- 509 Scenic Projection (3)** **Conway**
Theories and laboratory work with various methods of scenic projection; opportunity for experiment in production. Prerequisite, 409 or permission of instructor.
- 513 Technical Direction (3, maximum 9)** **Lounsbury**
Practical experience for the technician. Student assumes responsibility of technical director for at least one major production. Prerequisites, 403, 413, and permission of instructor. 300 acceptable only by special permission.
- 519 Lighting Research and Development (3, maximum 9)** **Lounsbury**
A practical course in the actual development of new types of spotlights, projectors, or other theatrical lighting equipment. Prerequisites, 409, 419, and permission of instructor.
- 530 Seminar in Children's Drama (5)** **Carr, Haaga, Siks**
Reading, critical discussion and analysis of literature, and scholarly research on formal and informal drama for and with children.
- 551-552-553 Teaching of Acting (2-2-2)** **Harrington**
Theory and practice of teaching acting at the college level. Observation and practice teaching, seminar, required reading, and analysis of theories. Prerequisites, 421, 422, and permission of instructor.
- 581 Advanced Directing (3)** **Harrington**
Preparation and production of a play which presents problems of an advanced nature in its directorial requirements. Rehearsals and seminar integral part of course. Prerequisites, 482 and permission of instructor.
- 600 Research (*)** **Staff**
Prerequisites, permission of adviser and instructor.
- 700 Thesis (*)** **Staff**

ECONOMICS

Executive Officer, J. B. GILLINGHAM, 331 Savery Hall

The Department of Economics offers courses leading to the degrees of Master of Arts and Doctor of Philosophy. Requirements for both advanced degrees include work in the Graduate Core Program of the Department and in some of these fields of specialization: economic theory and the history of economic thought; money, banking, and cycles; government regulation and public utilities; labor economics; public finance; economic history; international trade; economic systems and development; and statistics and econometrics.

A beginning graduate student with a four-year degree, B.A. B.S., etc., and no prior economics or economic theory should expect to take Economics 300 and 301, and such other preliminary work in each field selected as is necessary for him prior to graduate work in that field.

MASTER OF ARTS. Candidates must complete a portion of the Graduate Core Program (to include Economics 501, 502, and one course from among Economics 503, 504, or 481), and two fields, one of which must be in economics. Those who choose two fields in economics will be expected to complete a minimum of 14 credits in 500-level courses in economics (8 in the Graduate Core Program). Those who take a field in a related subject will be expected to take a minimum of 11 credits in 500-level courses in economics (8 in the Graduate Core Program). All candidates must meet the Graduate School's general requirements of 27 credits in graduate course work, in addition to the thesis and language requirements.

Requirements for a minor in economics for a master's degree include a minimum of 8 credits in advanced economics courses (400- and 500-level).

DOCTOR OF PHILOSOPHY. Candidates must complete the Graduate Core Program and three fields, two of which must be in economics. One of the three fields may be economic theory and the history of economic thought, which includes work in economic theory and doctrine not covered in the Graduate Core Program. A

candidate may offer a minor in another department related to his field of major interest, or, with permission of his Supervisory Committee, he may offer a program of selected courses outside of economics as the third field.

Through the cooperation of the Far Eastern and Russian Institute, a candidate may offer, together with a minor in Far Eastern, a Far Eastern area study program as a substitute for one field. In such a case the work offered will include the Graduate Core Program and one field in economics, one joint economics and Far Eastern, and the Far Eastern minor. When this option is allowed, the candidate normally chooses a thesis subject related to his Far Eastern specialty, and the thesis is jointly supervised by the Institute and the Department.

Doctoral candidates offering a minor in economics must demonstrate competence in a portion of the Graduate Core Program (which shall include Economics 501 and 502 and one course from among Economics 503, 504, and 481), and one field in economics. While normally 25 credits in 400- or 500-level courses will be required, candidates with an adequate background may offer less. In any case, a minimum of 11 credits in 500-level courses (8 in the Graduate Core Program) must be offered. Normally one 500-level course will be required in the field of economics.

GRADUATE CORE PROGRAM

- | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| 411 Introduction to the Use of Mathematics in Economy Theory (5) | Staff |
| 481 Economic Statistical Analysis (5) | Staff |
| 501 Micro-Economic Analysis I (4) | Staff |
| Techniques of economic theory; maximizing behavior of individual economic units; analysis of production and demand functions and the resulting pricing of products and productive services; the allocation of resources under partial equilibrium. Relies on formal abstract theorizing and model building. Prerequisites, 300 and 301, or permission. | |
| 502 Macro-Economic Analysis I (4) | Staff |
| Analysis of theories of income, employment, and output under static conditions; quantity theory of money; relation of monetary and "real" theories; stability and instability of income over time; growth of the economy. Prerequisites, 300 and 301, or permission. | |
| 503 Development of Modern Economic Theory (3) | Staff |
| Origins and development of currently received economic theory; neo-classical economics and its critics. | |
| 504 Economic History and Economic Development (3) | Staff |
| Analysis of determinants of long-run economic development; theoretical issues in the long-run supply and efficiency of productive factors; consideration of case studies from economic history in relation to theoretical issues. | |
| 511 Micro-Economic Analysis II (3) | Staff |
| Advanced economics of the firm and of demand theory; linear programming; game theory; aspects of welfare economics; and consideration of current literature and research in micro-economics. Prerequisite, 501. | |
| 512 Macro-Economic Analysis II (3) | Staff |
| Dynamic income theory; consideration of current literature and research in macro-economics. Prerequisite, 502. | |

COURSES

ECONOMIC THEORY AND HISTORY OF ECONOMIC THOUGHT

- | | |
|------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 306 Development of Economic Thought (5) | Gordon |
| 404 Advanced Price Analysis (5) | Crutchfield |
| 411 Introduction to the Use of Mathematics in Economic Theory (5) | Staff |
| 503 Development of Modern Economic Theory (3)
(See Graduate Core Program) | Staff |
| 505 Value and Distribution Theory (3) | Mund |
| Systematic review of the theories of value, price, costs, and supply. The capital concept. Income and its functional distribution. | |
| 515 History of Economic Thought (3) | Gordon |
| Marxian, classical, and earlier economic thought. | |

MONEY, BANKING, AND CYCLES

- | | |
|-----------------------------------------------|--------------------|
| 320 Money and Banking (5) | Crutchfield |
| 421 Money, Credit, and the Economy (5) | Crutchfield |

- 422 Economic Cycles (5)** Staff
521 Monetary Theory (3) Crutchfield
 Recent developments in monetary theory. Prerequisite, permission.
522 Cycle Theory (3) Staff
 Leading theories of economic cycles, with emphasis upon recent developments. Prerequisite, permission.

GOVERNMENT REGULATION AND PUBLIC UTILITIES

- 330 Government and Business (5)** Mund
432, 433 Economics of Public Utilities (5,5) Hall
530 Public Control of Industry (3) Mund
 Public policy in the United States on industrial combinations, pricing practices, and monopoly control. Recent issues in the public control of business. Prerequisite, permission.
532 Public Utilities (3) Hall
 Critical consideration of recent developments in the study of public utilities. Special emphasis on electrical utilities and public power projects of federal and local governments. Prerequisite, permission.

LABOR ECONOMICS

- 340 Labor in the Economy (5)** Staff
441 Union-Management Relations (5) Gillingham, Hopkins, McCaffree
442 American Labor History (5) Gillingham
443 Labor Market Analysis (5) McCaffree
445 Social Security (5) Hopkins
541 Theory of Trade-Unionism (3) Gillingham
 Prerequisite, permission.
542 Labor Economics (3) Hopkins
 Prerequisite, permission.

PUBLIC FINANCE AND TAXATION

- 350 Public Finance and Taxation I (5)** Ballesteros, Hall
451 Public Finance and Taxation II (5) Hall
550 Public Finance (3) Ballesteros
 Fiscal policy instrumentalities and comparative effects on income and employment; limitations of fiscal policy; review of current literature. Prerequisite, permission.
551 Public Finance (3) Hall
 Special problems in the fields of taxation and public debt; review of current literature. Prerequisite, permission.

ECONOMIC HISTORY

- 460J Economic History of Europe (5)** Morris
 Offered jointly with the Department of History.
462 Development of American Commercial Capitalism (5) North
463 Development of American Industrial Capitalism (5) North
504 Economic History and Economic Development (3) Staff
561 European Economic History (3) Morris
 Emphasis on the period since 1750. Prerequisite, permission.
562 American Economic History (3) North
 Emphasis on the theoretical issues involved in American economic development.

INTERNATIONAL TRADE

- 370 Economic Principles of Foreign Trade (5)** Huber
471 International Economics (5) Staff
472 International Economic Problems (5) Huber
571 International Trade Theory (3) Huber
 Modern developments in national income theory and welfare economics with relation to international trade. Prerequisite, permission.
572 International Economic Theory (3) Staff
 Problems of foreign trade and exchange controls, and international monetary policies. Prerequisite, permission.

ECONOMIC SYSTEMS AND DEVELOPMENT

- 390 Comparative Economic Systems (5)** Worcester
391 Economic Development (5) Staff

495 The Economy of Soviet Russia (5) **Staff**

595 Soviet Economics (3) **Staff**
Analysis of problems of economic measurement, economic development, optimum resource allocation, national income, and planning in the Soviet Union. Prerequisite, permission.

STATISTICS AND ECONOMETRICS

481 Economic Statistical Analysis (5) **Staff**

580 Econometrics (3) **Staff**
Study of empirical significance of economic theory and related methodological problems.

GENERAL

600 Research (*) **Staff**
Prerequisite, permission.

700 Thesis (*) **Staff**

ENGLISH

Executive Officer: ROBERT B. HEILMAN, 115 Parrington Hall

The purpose of graduate work in English is the acquisition of a body of learning and the development of critical skills and standards of judgment. Though having central objectives identical to all, the graduate English program can provide a background for different professional pursuits: some students may look forward to careers as scholars and college teachers; others to positions in the secondary school system; and still others to work in the fields of professional writing, editing, and publishing. The Department of English has sought, therefore, to keep its general requirements for advanced degrees sufficiently broad and flexible to permit the following emphases in courses and dissertations: classification and analysis of literary works in their historical context; theories of criticism, and the analysis and evaluation of literary works; theory and analysis of discourse, with special emphasis on types, structure, and style, and with incidental emphasis on the teaching of composition; linguistic analysis and language processes in Old and Middle English and American English with related work in other languages; projects in imaginative writing, supported by courses in criticism and literary periods and types (for the Master of Arts only).

Programs leading to the degrees of Master of Arts in general literature and Doctor of Philosophy in comparative literature are also offered in this Department.

Each student's program will be planned in consultation with a graduate adviser in the Department and will emphasize his particular interests and abilities.

Candidates for advanced degrees in English must present an undergraduate English major equivalent to that at the University of Washington, which requires 50 quarter credits. All candidates for advanced degrees must complete English 505 in their first quarter of residence.

MASTER OF ARTS. A minimum of 35 credits is required, of which 25 must be in courses numbered 500 or above. Ten credits may be in courses in other departments. A maximum of 5 quarter credits may be transferred from an accredited institution.

The candidate must show a reading knowledge of one foreign language by the time he has fulfilled his course requirements and before he takes the written M.A. examination.

He must pass a written examination on three fields chosen by him in consultation with the Chairman of Graduate Programs.

In the advanced crediting program the candidate must complete 25 credits, not more than 5 of which must be in advanced writing courses, and present, in addition, a piece of original imaginative writing (thesis, 10 credits).

DOCTOR OF PHILOSOPHY. The candidate for the Ph.D. must complete a minimum of 70 credits in course work (of which 55 must be at the 500- or 600-level) before taking his qualifying examination. Fifteen credits may be in approved courses in other departments. English 530 and English 531 are required. The credits that

may be transferred from another institution (not more than 35) are subject to review by the Graduate Studies Committee.

The candidate must show a reading knowledge of two foreign languages (usually Latin or French, and German—though upon approval of the Graduate Studies Committee and the Graduate School he may offer appropriate substitutes).

A General Examination (not given during the Summer Quarter) is based on the assumption that the candidate's reading and study have prepared him for the following: A critical essay of about 5,000 words in a field chosen by the candidate and approved by the Graduate Studies Committee, written during the first three weeks of the quarter in which the candidate takes his examination; a one-day written examination testing the candidate's command of the facts of literary history and the content of English and American literary works; an oral examination which will emphasize two fields other than that of the critical essay.

As soon as possible after he has passed his General Examination, the candidate must submit for the approval of the Graduate Studies Committee a statement of the subject of his dissertation. On the basis of this statement, the Graduate Studies Committee will recommend a dissertation committee to the Dean of the Graduate School. The candidate must pass a Final oral Examination devoted to the dissertation and to the field with which it is concerned.

MINORS IN ENGLISH. The requirement for a minor in English for a master's degree is 20 credits in undergraduate and graduate work combined, plus 10 credits in graduate courses earned in residence.

The requirement for a minor in English for the doctor's degree is 20 credits in undergraduate and graduate work combined, plus 20 credits in graduate courses. At least half the credits must be in courses numbered 500 or above and at least 10 must be earned in residence.

COURSES

361, 362, 363	American Literature (5,5,5)	Staff
367, 368, 369	Seventeenth-Century Literature (5,5,5)	Staff

FAR EASTERN AND RUSSIAN INSTITUTE

Director: GEORGE E. TAYLOR, 406 Thomson Hall

The Far Eastern and Russian Institute administers programs of undergraduate and graduate studies and research on Russia, China, Japan, Inner Asia, and the Far East in general. It is closely associated with the Department of Far Eastern and Slavic Languages and Literature, through which Far Eastern and Slavic studies in the humanities are organized (see page 100).

The Institute itself does not grant degrees. It arranges the programs in Far Eastern and Russian studies for the Bachelor of Arts and Master of Arts degrees given through the Department of Far Eastern and Slavic Languages and Literature. That Department has programs of study leading to the Doctor of Philosophy degree in Far Eastern and Slavic Languages and Literature. Graduate degrees in the social sciences (with Far Eastern and Russian emphasis) are sponsored by the Institute in cooperation with the Departments of Anthropology, Economics, Geography, History, Political Science, and others. In the joint programs leading to the advanced degree in these departments, graduate students receive training in their respective disciplines which they apply to their study of the Far East or Russia. These joint programs are described in the curricular announcements of the respective departments.

The Institute sponsors research projects in the following fields: Modern China, Inner Asia (Tibet, Mongolia, Turkestan), Modern Japan, Russia, and Eastern Europe. Each of these projects has its own research colloquium, composed of faculty from various disciplines.

543	Seminar on Russia in Asia (3)	Staff
	Selected topics on relations of Russia and the Soviet Union with Asia. (Offered alternate years; offered 1962-63.) Prerequisite, permission.	
545J	Seminar on Japanese Government and Diplomacy (3, maximum 6)	Maki
	Offered jointly with the Department of Political Science.	
549J	Japanese History (3-6)	Butow
	Field course in Japanese history. Offered jointly with the Department of History. Prerequisite, permission.	

A number of graduate students have the opportunity to participate in the research through special studies of their own and to profit from the advice and criticism of faculty members working on the projects. The Far Eastern and Russian Institute has a number of research fellowships which are given to especially qualified graduate students.

- 550J-551J-552J Seminar in Japanese History (3-6)-(3-6)-(3-6)** Butow
Offered jointly with the Department of History. Prerequisite, permission.
- 553J Analysis of Linguistic Structures (3)** Jacobs, Li
Offered jointly with the Department of Anthropology.
- 598 Inner Asia Research Colloquium (5, maximum 15)** Chang, Hurvitz, Li, Poppe, Wylio, Staff
- 599 Modern China Research Colloquium (5, maximum 15)** Hsiao, Lo, Michael, Shih, Taylor, Wilhelm, Staff
- A research seminar dealing with various aspects of Chinese society, modern and contemporary. Prerequisite, permission.
- 600 Research (*)** Staff
Prerequisite, permission.
- 700 Thesis (*)** Staff

The following courses may be used for credit toward a Far Eastern major or minor.

- Anthropology 317 Ethnology of Southeast Asia (3)**
- Art 382 Art of India (3)**
- Art 383 Art of China (3)**
- Art 384 Art of Japan and Korea (3)**
- Art 428 Oriental Ceramic Art (2)**
- Economics 495 The Economy of Soviet Russia (5)**
- Economics 595 Soviet Economics (3)**
- Philosophy 428 Chinese Philosophy (5)**
- Philosophy 429 Neo-Confucianism (5)**
Prerequisite, 428 or permission.
- Political Science 344 Chinese Government (5)**
- Political Science 414 Oriental Political Thought (5)**
- Political Science 420 Foreign Relations of the Soviet Union (5)**
- Political Science 429 International Relations in the Far East (5)**
- Political Science 432 American Foreign Policy in the Far East (5)**
- Political Science 441 Political Institutions of the Soviet Union (5)**

FAR EASTERN AND SLAVIC LANGUAGES AND LITERATURE

Executive Officer: GEORGE E. TAYLOR, 406 Thomson Hall

The Department of Far Eastern and Slavic Languages and Literature offers courses leading to the degrees of Master of Arts and Doctor of Philosophy. In addition, the Department faculty cooperates in the arrangements for joint degrees (see the Far Eastern and Russian Institute).

Faculty advisers draw up student programs on the basis of individual requirements. Entering graduate students without a substantial amount of undergraduate work on Russia or the Far East are normally expected, in their first year, to take senior level courses (including Far Eastern 310) in the area of their interest. Entering graduate students planning to specialize in language and literature normally devote a major part of their first year to language work.

MASTER OF ARTS. The Department offers courses leading to the Master of Arts degree in the fields of language and literature and in regional studies.

The Master of Arts degree in the fields of language and literature is offered in any language and literature for which the Department is responsible and for which there are staff, curriculum, and library holdings necessary for research on the master's level. A prerequisite for this degree is the ability to do research in the language appropriate to the student's field of interest. In some cases a knowledge of French or German may also be required. In addition to course work and seminars in the appropriate language and literature, students are also expected to take work relating to the history and culture of the area and in the fields of linguistics or comparative literature. General requirements are 45 credits (including a minimum of 12 in seminar work) and a thesis.

- 441 **Tibetan Cultural History: Hegemonic Period (3)** **Wylie**
- 442 **Tibetan Cultural History: Theocratic Period (3)** **Wylie**
- 443 **Chinese Social Institutions (5)** **Hsiao**
(Offered alternate years; offered 1961-62.)
- 444 **Chinese History: Earliest Times to 221 B.C. (5)** **Wilhelm**
(Offered alternate years; offered 1962-63.)
- 445 **Chinese History: 221 B.C. to 906 A.D. (5)** **Wilhelm**
(Offered alternate years; offered 1962-63.)
- 446 **Chinese History: 906 A.D. to 1840 A.D. (5)** **Wilhelm**
(Offered alternate years; offered 1962-63.)
- 447 **Modern Chinese History (5)** **Michael**
- 450 **Survey of Turkic Culture of Central Asia (3)** **Staff**
- 452J **Early Japanese History (5)** **Butow**
Offered jointly with the Department of History.
- 453J **Modern Japanese History (5)** **Butow**
Offered jointly with the Department of History.
- 456J **Diplomatic History of the Far East (5)** **Butow**
Offered jointly with the Department of History.
- 482J **History of India: Earliest Times to 647 A.D. (5)** **Staff**
Offered jointly with the Department of History.
- 483J **History of India: 647 to 1525 (5)** **Staff**
Offered jointly with the Department of History.
- 484J **History of India: 1525 to the Present (5)** **Staff**
Offered jointly with the Department of History.
- 504J **Research Seminar: Japan (3, maximum 6)** **Kakiuchi**
Geography. Offered jointly with the Department of Geography.
- 505J **Research Seminar: China and Northeast Asia (3, maximum 6)** **Murphey**
Geography. Offered jointly with the Department of Geography.
- 506J **Research Seminar: Southeast Asia (3, maximum 6)** **Earle**
Geography. Offered jointly with the Department of Geography.
- 507J **Research Seminar: Soviet Union (3, maximum 6)** **Jackson**
Geography. Offered jointly with the Department of Geography.
- 519J **Seminar on Asia (3, maximum 6)** **Staff**
The large cultural regions of the continent are studied in succession, with special reference to anthropological problems. (Offered jointly, in alternate years, with the Department of Anthropology; offered 1962-63.)
- 520J **Seminar on the Foreign Policy of the Soviet Union (3)** **Reshetar**
Offered jointly with the Department of Political Science. Prerequisite, permission.
- 521, 522, 523 **Seminar on Modern Asian History (3,3,3)** **Staff**
- 525, 526 **Seminar on Far Eastern Diplomacy (3,3)** **Williston**
- 530, 531 **Seminar on China (3,3)** **Hsiao, Wilhelm**
- 533 **Seminar on Chinese Society (4)** **Staff**
Institutional analysis of representative periods and key aspects of Chinese society. (Offered when demand is sufficient.)
- 534J **Modern European History: Russia (3-6)** **Treadgold**
Offered jointly with the Department of History.
- 535J-536J-537J **Seminar in Russian History (3-6)-(3-6)-(3-6)** **Treadgold**
Seminar in modern Russian history. Offered jointly with the Department of History. Prerequisites, reading knowledge of Russian and permission.
- 538 **Seminar on Modern China (3)** **Michael**
Studies of problems in Chinese government, politics, ideology, and social and economic issues from 1911 to the present.
- 541J **The Soviet Political System (4)** **Reshetar**
Critical appraisal of the principal research methods, theories, and types of literature dealing with the government and politics of the Soviet Union. Offered jointly with the Department of Political Science. Prerequisite, permission.
- 542J **Personality Patterns in Japanese Culture (3)** **Staff**
The nature and content of Japanese social life as it bears upon Japanese character. Offered jointly with the Department of Anthropology. Prerequisite, permission.
- 543 **Seminar on Russia in Asia (3)** **Staff**
Selected topics on relations of Russia and the Soviet Union with Asia. (Offered alternate years; offered 1962-63.) Prerequisite, permission.
- 545J **Seminar on Japanese Government and Diplomacy (3, maximum 6)** **Maki**
Offered jointly with the Department of Political Science.
- 549J **Japanese History (3-6)** **Butow**
Field course in Japanese history. Offered jointly with the Department of History. Prerequisite, permission.

- 550J-551J-552J Seminar in Japanese History (3-6)-(3-6)-(3-6)** Butow
Offered jointly with the Department of History. Prerequisite, permission.

FAR EASTERN AND SLAVIC LANGUAGES AND LITERATURE

Executive Officer: GEORGE E. TAYLOR, 406 Thomson Hall

The Department of Far Eastern and Slavic Languages and Literature offers courses leading to the degrees of Master of Arts and Doctor of Philosophy. In addition, the Department faculty cooperates in the arrangements for joint degrees (see the Far Eastern and Russian Institute).

Faculty advisers draw up student programs on the basis of individual requirements. Entering graduate students without a substantial amount of undergraduate work on Russia or the Far East are normally expected, in their first year, to take senior level courses (including Far Eastern 310) in the area of their interest. Entering graduate students planning to specialize in language and literature normally devote a major part of their first year to language work.

MASTER OF ARTS. The Department offers courses leading to the Master of Arts degree in the fields of language and literature and in regional studies.

The Master of Arts degree in the fields of language and literature is offered in any language and literature for which the Department is responsible and for which there are staff, curriculum, and library holdings necessary for research on the master's level. A prerequisite for this degree is the ability to do research in the language appropriate to the student's field of interest. In some cases a knowledge of French or German may also be required. In addition to course work and seminars in the appropriate language and literature, students are also expected to take work relating to the history and culture of the area and in the fields of linguistics or comparative literature. General requirements are 45 credits (including a minimum of 12 in seminar work) and a thesis.

The Master of Arts degree in the area of regional studies is offered with the support of the Far Eastern and Russian Institute and the various cooperating Departments. Students taking this degree concentrate on the area of their choice (either in the Far East or Russia) and on one discipline, but their programs are normally arranged with supporting course work in other disciplines as they deal with this area. Disciplines in which such course work is available are anthropology, economics, geography, history, linguistics, philosophy, literature, and political science. For regional studies, a working knowledge of the appropriate language is required. General requirements are a minimum of 45 credits (including at least 12 in seminar work) and a thesis.

In some cases, e.g. high school teachers, it is possible to arrange a Master of Arts degree in Far Eastern regional studies for students without a working knowledge of a Far Eastern language. Strong discipline training is required.

DOCTOR OF PHILOSOPHY. The Department of Far Eastern and Slavic Languages and Literature offers a program leading to the Doctor of Philosophy degree with a specialization in any of the languages or literatures for which the Department is responsible and for which there are available the staff, curriculum, and library holdings necessary for research on the doctoral level.

Students interested in working for this degree must have, as a minimum requirement for beginning their programs, the equivalent of a strong undergraduate major in any language or literature or in Far Eastern or Russian area studies.

Each candidate must present a program covering four fields of study. The fields may be in a single language and literature for which the Department is responsible, or in a combination of such languages and literatures, or in a combination of three fields within the Department plus a field in either linguistics or comparative literature.

The Department recommends that all students have some familiarity with a second Far Eastern or Slavic language and culture as well as work in linguistics or general and comparative literature.

All candidates are expected to be familiar with the history, society, and culture of the country in whose language or literature they are specializing. In cases where it would be appropriate, a field may be approved in another discipline dealing with the area involved.

COURSES

CHINESE

300 Chinese, Non-Intensive F (5)	Hung
301 Chinese Language, Intensive EF (10)	Li, Hung
302, 303, 304 Intermediate Modern Chinese (5,5,5)	Yen
405, 406, 407 Classical and Documentary Chinese (5,5,5)	Reifler
408 Chinese Reference Works and Bibliography (3) (Offered alternate years; offered 1962-63.)	Wilhelm
430 Readings in Chinese Philosophical Texts (5) Prerequisite, permission.	Shih
455, 456, 457 Chinese Literature (5,5,5) (Offered alternate years; offered 1961-62.)	Shih
460 Advanced Modern Chinese (5, maximum 15) Prerequisite, 304.	Yen
522, 523, 524 Readings in Classical Chinese (5,5,5)	Reifler
525 Structure of Chinese Characters (5)	Reifler
526, 527, 528 Studies in Chinese Literature (5,5,5) 526: literature of the Chou and Han periods. 527: literature from Wei to T'ang times. 528: literature since the end of T'ang. (Offered alternate years; offered 1961-62.)	Cheng
529 Chinese Phonology (3)	Li
530 Studies in Chinese Prose (5) (Offered alternate years; offered 1961-62.)	Cheng
531 Studies in Chinese Poetry (5) (Offered alternate years; offered 1962-63.)	Shih

- 532 Studies in Chinese Drama and Novel (5)** Shih
(Offered alternate years; offered 1962-63.)
- 535 Chinese Epigraphy (3, maximum 6)** Reifler
Introduction to texts in ancient character forms; selected readings of inscriptions on bronzes and oracle bones.
- 536, 537, 538 Readings in Chinese Political Thought and Institutions (5,5,5)** Hsiao
For students wishing to develop proficiency in using Chinese source material. Different texts each quarter, selected primarily on basis of students' needs. (Offered alternate years; offered 1962-63.) Prerequisite, permission.
- 550 Seminar on Chinese Literature (4, maximum 8)** Shih
- 555 Seminar on Chinese Linguistics (3, maximum 9)** Li
Advanced phonology, problems of archaic Chinese, dialectology; descriptive and historical treatment of Sinitic languages. For advanced students of Chinese or of linguistics. Prerequisite, permission.
- 560 Modern Chinese Readings (5, maximum 15)** Chang
Selections from learned journals in intermingled style. (Colloquial and literary Chinese.) Prerequisite, 304.
- 600 Research (*)** Staff
Prerequisite, permission.
- 700 Thesis (*)** Staff

JAPANESE

- 301, 302, 303 Second-year Reading Japanese (5,5,5)** Hurvitz
- 401, 402, 403 Advanced Reading Japanese (5,5,5)** Hurvitz
- 460 Readings in Modern Japanese Literature (3-5, maximum 15)** McKinnon
(Offered alternate years; offered 1962-63.)
- 522, 523, 524 Readings in Documentary Japanese (5,5,5)** McKinnon
(Offered when demand is sufficient.) Prerequisite, permission.
- 550 Readings in Classical Japanese Literature (3-5, maximum 15)** McKinnon
Readings in prose, poetry, and drama, antiquity to nineteenth century. (Offered alternate years, offered 1961-62.) Prerequisite, permission.
- 570 Seminar in Japanese Literature (3-5, maximum 15)** McKinnon
Close examination of selected periods, writers or genres, including problems of literary criticism in Japanese literature. (Offered alternate years; offered 1962-63.) Prerequisite, 15 credits in 460, or 550.
- 600 Research (*)** Hurvitz, McKinnon
Prerequisite, permission.
- 700 Thesis (*)**

KOREAN

- 302-303 Elementary Spoken Korean Language (5-5)** Suh
- 304 Intermediate Korean (5)** Suh
- 405 Korean Grammar (5)** Suh
- 406, 407 Advanced Korean Reading (5,5)** Suh
- 501, 502, 503 Seminar in Korean (3-5, 3-5, 3-5)** Suh

MONGOLIAN

- 302 Introduction to Mongolian (5)** Poppe
(Offered alternate years; offered 1962-63.)
- 303 Modern Mongolian Literary Language (5)** Poppe
(Offered alternate years; offered 1962-63.)
- 304 Colloquial Mongolian (5)** Poppe
(Offered alternate years; offered 1962-63.)
- 305 Classical Mongolian (5)** Poppe
(Offered alternate years; offered 1962-63.)
- 521 Ancient Mongol: hPhagspa Script (3)** Poppe
Script and grammar of hPhagspa texts; reading and translation. (Offered alternate years; offered 1961-62.) Prerequisite, 304.
- 522 Mongol: Ancient Texts (3)** Poppe
Grammar and reading of Mongol texts of the fourteenth to seventeenth centuries. Historical texts are emphasized. (Offered alternate years; offered 1961-62.)
- 580 Comparative Grammar of the Altaic Languages (3)** Poppe
Comparative phonology and morphology of Mongol and Turkic and other related languages. (Offered alternate years; offered 1961-62.)
- 600 Research (*)** Poppe
Prerequisite, permission.

POLISH

- 401, 402 Phonetics, Grammar, and Vocabulary (5,5) **Staff**
 411 Readings in Polish (5) **Staff**

RUSSIAN

- 311, 312, 313 Intermediate Russian A, B, C (5,5,5) **Novikow, Staff**
 330 Scientific Russian Readings (5, maximum 10) **Gorshevsky**
 341 Social Science Russian (5) **Pahn**
 342 Social Science Russian Readings (5) **Pahn**
 345 Social Science Russian, Intensive (10) **Staff**
 (Offered Summer Quarter only.)
 361, 362, 363 Russian Readings A, B, C (3,3,3) **Gribanovsky**
 451, 452 Advanced Russian Grammar and Composition (5,5) **Erlich, Staff**
 455 History of Russian Standard Spoken Language (5) **Staff**
 465 Modern Russian Poetry (3) **Erlich**
 (Offered alternate years; offered 1961-62.)
 468 Contemporary Russian Literary Criticism (3) **Erlich**
 (Offered alternate years; offered 1962-63.)
 475 Russian Literature and Area (3) **Staff**
 (Offered Summer Quarter only.)
 551 Advanced Russian Syntax (3) **Poppe**
 A detailed structural analysis of the sentence types in the Russian literary language with emphasis on grammatical categories and word classes. (Offered alternate years; offered 1962-63.)
 557 Seminar in Russian Language (3) **Staff**
 Examination and discussion of Russian masterpieces.
 560 Studies in Early Russian Literature (3) **Staff**
 (Offered alternate years; offered 1961-62.)
 565 Russian Eighteenth-Century Literature (5) **Staff**
 A discussion of representative works of Russian poetry, prose, fiction, and criticism in the formative period in the history of Russian letters. Prerequisite, 320 or permission.
 566 Pushkin (4) **Erlich**
 Analysis of the works of Alexander Pushkin. (Offered alternate years; offered 1962-63.)
 567 Studies in Russian Prose (4) **Erlich, Staff**
 Close analysis of representative works of the nineteenth-century Russian prose fiction in original texts. (Offered alternate years; offered 1961-62.)
 569 Russian Oral Epic Tradition (3) **Erlich**
 Introduction to Russian folklore. (Offered every three years; offered 1962-63.)
 590 Seminar in Russian Literary History (4) **Erlich**
 Close examination of selected periods or figures in Russian literature. (Offered alternate years; offered 1961-62.) Prerequisite, 10 graduate credits in Russian literature.
 600 Research (*) **Staff**
 Prerequisite, permission.
 700 Thesis (*) **Staff**

SERBO-CROATIAN

- 401-402 Phonetics, Grammar, and Vocabulary (5-5) **Staff**
 411 Reading in Serbo-Croatian (5) **Staff**

SLAVIC

- 450 Introduction to Slavic Philology (3) **Staff**
 552 Phonetic Structure of Slavic Languages (3) **Staff**
 A detailed analysis of the phonological evolution of the various Slavic languages from the earliest period of the Common Slavic language. (Offered alternate years; offered 1961-62.)
 553 Morphological Features of Slavic Languages (3) **Poppe, Staff**
 A survey of the development of the various grammatical forms of the Slavic languages from the Common Slavic period. (Offered alternate years; offered 1961-62.)
 555 Old Church Slavonic (3) **Staff**
 The rise and development of the earliest Slavic literary language and a descriptive study of its orthography, phonology, morphology, and syntax. (Offered alternate years; offered 1962-63.)
 556 Readings in Old Church Slavonic (3) **Staff**
 Reading and grammatical interpretation of a selected group of Old Church Slavonic texts. (Offered alternate years; offered 1962-63.)

TIBETAN

- 401-402-403 Colloquial Tibetan (3-3-3)** **Wylie**
404-405-406 Literary Tibetan (3-3-3) **Wylie**
414 Readings in Modern Tibetan (3, maximum 9) **Wylie**
500 Advanced Literary Tibetan (3, maximum 9) **Wylie**
 Reading of Tibetan manuscripts and xylographs with emphasis on biographical, historical, and geographic material. Prerequisites, 406 and permission.
502, 503, 504 Comparative Study of Chinese, Mongolian, Tibetan, and Sanskrit Texts (5,5,5) **Staff**
534 Buddhistic Tibetan (2, maximum 6) **Chang**
 Reading of Tibetan translations of Buddhist literature. Knowledge of Sanskrit desirable but not required. Prerequisites, 406 and permission.
544 Ancient Tibetan Documents (2, maximum 6) **Chang**
 Reading of selections from ancient documents, treaties, edicts, and annals. Knowledge of Chinese desirable but not required. Prerequisites, 406 and permission.
600 Research (*) **Staff**
 Prerequisite, permission.

TURKIC

- 301, 302, 303 Introduction to Central Asian Turkic (3,3,3)** **Staff**
501, 502 Comparative Grammar of Central Asian Turkic (3,3) **Staff**
 Comparative phonology, morphology, and syntax of the Turkic languages (Uighur, Kazakh, Tartar, Kirghiz, Uzbek, Eastern Turki). History of the Turkic languages. Prerequisites, Turkic 303, German, and Russian.
503 Seminar on Central Asian Turkic Literature (3) **Staff**
 Prerequisites, Turkic 502, German, and Russian.

LITERATURE COURSES IN ENGLISH

- Chinese 320 Chinese Literature in English (5)** **Shih**
 (Offered alternate years, offered 1962-63.)
Japanese 420 Japanese Literary Tradition (5) **McKinnon**
Japanese 421 Modern Japanese Literature in English (5) **McKinnon**
Japanese 422 Studies in Japanese Poetry in English (5) **McKinnon**
 (Offered alternate years, offered 1962-63.)
Japanese 423 Studies in Japanese Drama in English (5) **McKinnon**
 (Offered alternate years; offered 1961-62.)
Korean 320 Korean Literature in English (5) **Suh**
Mongolian 320 Mongolian Literature in English (5) **Poppe**
 (Offered alternate years; offered 1961-62.)
Russian 320 Russian Literature in English (5) **Staff**
Russian 421 Contemporary Russian Literature in English (5) **Erlich**
Russian 422 Russian Plays in English (5) **Staff**
Russian 426 The Russian Novel in English (5) **Erlich**
 Gogol, Goncharov, Turgeniev
Russian 427 The Russian Novel in English (5) **Erlich**
 Dostoevski and Tolstoy
Slavic 320 Polish Literature in English (5) **Erlich**
 (Offered alternate years; offered 1962-63.)

GENERAL AND COMPARATIVE LITERATURE

Chairman: FRANK W. JONES, 119A Parrington Hall

MASTER OF ARTS. Candidates for the degree of Master of Arts with a major in General Literature should ordinarily present a Bachelor of Arts in English, in a foreign language, or in General Literature.

Course requirements are 35 credits (of which 25 must be in courses numbered 500 or above): 10 credits in General or Comparative Literature (including Comparative Literature 510 or 511) and 25 credits in two or more literatures or related fields. With the permission of the Chairman of the Program and the departments concerned, a thesis may be presented for 10 of the 35 credits.

By the time the candidate has fulfilled the course requirements, and before he takes the M.A. examination, he must pass the graduate reading tests in at least two of the languages included in the program: Chinese, Danish, French, German, Greek, Italian, Japanese, Korean, Latin, Norwegian, Russian, Spanish, and Swedish. The candidate's native language may not be one of those by which he meets this requirement.

The candidate must pass a written examination consisting of questions on two or more literatures and on the relations between them.

DOCTOR OF PHILOSOPHY. The degree of Doctor of Philosophy with a major in Comparative Literature is awarded through the candidate's major department and his Supervisory Committee. The following departments are authorized to sponsor candidates: English, Classics, Far Eastern and Slavic Languages and Literature, Germanic Languages and Literature, and Romance Languages and Literature.

Before taking his qualifying examination, the candidate must complete a minimum of 70 credits in graduate course work. These must include Comparative Literature 510 and 511; 35 credits in the candidate's major literature (including English 505 if the major literature is English); and 25 credits in his minor field or fields. The major literature must be Chinese, English, French, German, Greek, Italian, Latin, Japanese, Russian, or Spanish. The minor field may be in any of the languages listed under the M.A. requirements.

The candidate must know at least two languages in the program sufficiently well for graduate study of their literatures. The languages are those listed under the M.A. requirements.

The qualifying examination is to be taken within three quarters (Summer Quarter excepted) after completing course work. It is based on the assumption that the reading and study of the candidate have prepared him for the following: a critical essay of about 5,000 words on a comparative topic; a written examination testing the candidate's knowledge of a genre as represented in the major and minor literatures; an oral examination in the major and minor fields.

The candidate's major department will recommend a dissertation committee to the Dean of the Graduate School. The candidate may request any member of the graduate faculty in his major or minor field to supervise his dissertation. The supervisor will not be a member of the dissertation committee.

A final oral examination on the dissertation, and on the field or fields with which it is concerned, must be completed at least two weeks before the end of the quarter in which the degree is to be granted.

COURSES

450, 451 Romanticism and the Nineteenth Century in Europe (5,5)	Staff
480 The Symbolist Movement (5)	Staff
510, 511 Studies in General and Comparative Literature (5, maximum 10) (5, maximum 10)	Staff
700 Thesis (*)	Staff

LITERATURE COURSES IN OTHER DEPARTMENTS

CLASSICS

- 426 Greek and Roman Epic in English (3)
- 427 Greek and Roman Drama in English (3)
- 440 Greek and Roman Critics in English (3)

FAR EASTERN AND SLAVIC LANGUAGES AND LITERATURE

- Russian 421 Contemporary Russian Literature in English (5)
- Russian 422 Russian Plays in English (5)
- Russian 423 The Russian Novel in English (5)

Russian 424 The Russian Symbolists in English (3)

Russian 425 Dostoevski in English (5)

GERMANIC LANGUAGES AND LITERATURE

462 Goethe in English (3)

464 Thomas Mann in English (3)

ROMANCE LANGUAGES AND LITERATURE

French 418 Literature of the Enlightenment in English (3)

Italian 481, 482 Dante in English (2,2)

Romance 460 The Literature of the Renaissance in English (5)

SCANDINAVIAN LANGUAGES AND LITERATURE

480 Ibsen and His Major Plays in English (2)

481 Strindberg and His Major Plays in English (2)

GENETICS

Executive Officer: HERSCHEL L. ROMAN, 340 Johnson Hall

The Department of Genetics offers a graduate program leading to the degrees of Master of Science and Doctor of Philosophy. In addition to the courses given by the Department, the program includes a selection of courses in other areas, particularly in biochemistry, microbiology, botany, zoology, and statistics. Candidates for the degrees may specialize in microbial genetics or in human genetics. Clinical facilities for the study of human genetics are made available by the Department's affiliation with the Division of Medical Genetics in the Department of Medicine.

COURSES

BIOLOGY

351 Human Genetics (3) Gartler

451 Genetics (3) Roman

451L Genetics Laboratory (2) Staff
Must be accompanied by 451.

452 Cytogenetics (3) Roman

452L Cytogenetics Laboratory (2) Hawthorne
Must be accompanied by 452.

453 Topics in Genetics (2, maximum 6) Staff

GENETICS

520 Seminar (1) Staff
Prerequisite, permission.

551 Genetics of Microorganisms (3) Stadler
The contributions of research with microorganisms are discussed in relation to basic genetic concepts. Prerequisite, Biology 451 or permission.

552 Genetics of Microorganisms Laboratory (3) Stadler
The student learns how to use a variety of microorganisms as research tools for problems in genetics. Prerequisite, 551 or permission.

600 Research (*) Staff

700 Thesis (*) Staff

GEOGRAPHY

Executive Officer: G. DONALD HUDSON, 406 Smith Hall

Programs of study leading to the degrees of Master of Arts and Doctor of Philosophy in geography are developed by the Department and the student, taking into account the student's preparation, professional objectives, and professional interests. These programs are largely restricted to four fields selected by the Department for special emphasis: economic geography, the Far East, the Soviet Union, and cartography. The student considering the Department for professional training should be certain, or at least be able to predict, that his interests will center on one of these fields. If he enters the Department, he must be prepared to work within the framework of the specialist or be ready to equip himself to do so. This may mean, for example, additional preparatory work in geography, a working knowledge of Russian or a Far Eastern language, competence in statistical methodology, or special studies in allied social sciences.

The departmental library serves as a reference-research collection of selected recent and basic sources in geography and allied fields. It contains approximately 4,000 titles, subscribes to the leading American and foreign journals, and has such standard source materials as publications of the United States Bureau of the Census. The map library, containing approximately 125,000 sheets, follows a plan of development similar to that of the departmental library.

Courses and seminars pertinent to graduate study in the Department are offered in other departments of the College of Arts and Sciences and such professional schools as the Colleges of Business Administration and Engineering. With regard to the Far East and the Soviet Union, opportunities for studies supplementary to geography are unique. The Far Eastern and Russian Institute, primarily a research organization, offers specialized studies largely in fields of history and government and provides excellent specialized library sources. Faculty research projects and seminars include the participation of faculty and graduates in the Department of Geography. Languages taught in the Department of Far Eastern and Slavic Languages and Literature include: Chinese, Japanese, Korean, Mongolian, Polish, Tibetan, Turkic, and Russian. Interdepartmental relationships are also maintained with three additional departments that offer advanced studies in the Far East and Soviet field. These are the Departments of Economics, History, and Political Science.

COURSES

SYSTEMATIC GEOGRAPHY

325 Historical Geography of America (3)	Martin
370 Conservation of Natural Resources (5)	Thomas
375 Political Geography (5)	Jackson
440J Manufacturing (3 or 5) Lectures (3 credits); independent study (2 additional credits), optional with permission of instructor. Offered jointly with the Department of Economics.	Thomas
442 Regional Specialization (3 or 5) Lectures (3 credits); independent study (2 additional credits), optional with permission of instructor. Prerequisite, 441.	Morrill
444 Geography of Water Resources (3 or 5) Lectures (3 credits); independent study (2 additional credits), optional with permission of instructor.	Marts
448 Geography of Transportation (5)	Ullman
477 Urban Geography (5)	Ullman
510 Research Seminar: Settlement and Urban Geography (3, maximum 9)	Ullman
530 Research Seminar: The Economic Geographer and Lesser-Developed Areas (3, maximum 6)	Thomas
537 Research Seminar: Quantitative Methods in Economic Geography (3, maximum 6)	Morrill
538 Research Seminar: Geography of Transportation (3, maximum 6)	Ullman

539	Research Seminar: Utilization of Water Resources (3, maximum 6)	Marts
540	Research Seminar: Geography of Manufacturing (3, maximum 6)	Thomas
575	Research Seminar: Political Geography (3, maximum 6)	Jackson

REGIONAL GEOGRAPHY

301	Anglo-America (5)	Staff
302	The Pacific Northwest (3)	Staff
303J	Monsoon Asia (5) Offered jointly with the Far Eastern and Russian Institute.	Earle, Kakiuchi
304	Europe (5)	Martin
305	Latin America (5)	Heath
306	Africa (5)	Staff
307	Australia and New Zealand (5)	Earle
332J	Islands of the Pacific (3) Offered jointly with the Far Eastern and Russian Institute.	Earle
333J	The Soviet Union (5) Offered jointly with the Far Eastern and Russian Institute.	Jackson
402	United States (5)	Martin
412J	South Asia (5) Offered jointly with the Far Eastern and Russian Institute.	Murphey
413J	East Asia (5) Offered jointly with the Far Eastern and Russian Institute.	Staff
433J	Problems in the Geography of the Soviet Union (3 or 5) Lectures (3 credits); independent study (2 additional credits), optional with permission of instructor. Offered jointly with the Far Eastern and Russian Institute. Prerequisite, 333J or permission.	Jackson
434J	Problems in the Geography of Southeast Asia (5) Offered jointly with the Far Eastern and Russian Institute.	Earle
435J	Problems in the Geography of China (5) Offered jointly with the Far Eastern and Russian Institute.	Murphey
437J	Problems in the Geography of Japan (5) Offered jointly with the Far Eastern and Russian Institute.	Kakiuchi
504J	Research Seminar: Japan (3, maximum 6) Offered jointly with the Far Eastern and Russian Institute.	Kakiuchi
505J	Research Seminar: China and Northeast Asia (3, maximum 6) Offered jointly with the Far Eastern and Russian Institute.	Murphey
506J	Research Seminar: Southeast Asia (3, maximum 6) Offered jointly with the Far Eastern and Russian Institute.	Earle
507J	Research Seminar: Soviet Union (3, maximum 6) Offered jointly with the Far Eastern and Russian Institute.	Jackson
508	Research Seminar: Anglo-America (3, maximum 6)	Hudson, Marts

CARTOGRAPHY

360	Principles of Cartography (5)	Heath, Sherman
361	Experimental Cartography (5) Prerequisite, 360.	Heath, Sherman
363	Aerial Photographs as Source Materials (2) Prerequisite, 360.	Heath, Sherman
425J	Graphic Techniques in the Social Sciences (5) Offered jointly with the Department of Sociology. Prerequisite, Sociology 223 or permission.	Schmid
458	Map Intelligence (3)	Sherman
462	Problems in Map Compilation and Design (5) Prerequisite, 360.	Heath, Sherman
464	Problems in Map Reproduction (3) Prerequisite, 360.	Heath
520	Research Seminar: Cartography (3, maximum 6)	Heath, Sherman

INTRODUCTORY RESEARCH TECHNIQUES

426	Statistical Measurement and Inference (5) Prerequisite, an introductory course in statistics or permission.	Morrill
490	Field Research (6, maximum 12)	Staff

INTRODUCTION TO PROFESSIONAL TRAINING

500 Contemporary Geographic Thought (3)	Staff
501 Geographic Analysis (3)	Morrill
502 Professional Writing in Geography (*, maximum 6)	Staff
503 Source Materials in Geographic Research (3)	Staff

NONTHESIS AND THESIS RESEARCH

600 Research (*)	Staff
700 Thesis (*)	Staff

GEOLOGY

Executive Officer: HOWARD A. COOMBS, 42 Johnson Hall

The Department of Geology offers courses leading to the degrees of Master of Science and Doctor of Philosophy. All candidates for advanced degrees in geology must have completed essentially the same academic work as outlined in the undergraduate curriculum. Examinations for both the master's and doctor's degree will include subjects from the whole field of geology. All candidates must have an approved field course such as 401, or other field experience which is approved by the department.

MASTER OF SCIENCE. For the M.S. degree 45 credits are required, with a minimum of 36 credits in work other than field geology. Either a thesis or a research paper (Geology 600—5 credits) is required. The language requirement for this degree must be met with either French, German, or Russian.

DOCTOR OF PHILOSOPHY. Candidates must present any two of the following languages, French, German, or Russian, for the language requirement. All Ph.D. candidates must have either an M.S. or an M.A. degree.

COURSES

308 Structural Geology (5)	McKee
310 Geology For Engineers (5)	McKee
320 Sedimentary Petrology (5)	Barksdale
330 General Paleontology (5)	Mallory
344 Field Methods (5)	Barksdale
361 Stratigraphy (5)	Wheeler
401 Field Course (15) (Offered Spring Quarter only.)	Staff
412 Physiography of the United States (5)	Mackin
414 Map Interpretation (5)	Mackin
423 Optical Mineralogy (5)	Vance
424 Petrography and Petrology of Igneous Rocks (5)	Vance
425 Petrography and Petrology of Metamorphic Rocks (5)	Vance
427 Ore Deposits (5)	Ellis
436 Micropaleontology (5) (Offered odd years only.)	Mallory
443 Advanced Structural Geology (5)	Misch
450 Elements of Seismology (5)	Neumann
480 History of Geology (3)	Barksdale
481 Preparation of Geologic Reports and Publications (3)	Coombs
503 Advanced Petrography and Petrology of Sedimentary Rocks (3) Thin section study of sedimentary rocks. (Offered even years only.)	Barksdale
510 Advanced Studies in Physiography (*, maximum 10) Research projects in physiography and glacial geology.	Mackin
515 Fluvial Morphology (*, maximum 5) Advanced study of landforms in humid and arid regions.	Mackin

- 516 Glacial Geology (5)** **Mackin**
Systematic study of glacial landforms and deposits.
- 520 Seminar (*)** **Staff**
- 521 Metamorphic Minerals (5)** **Misch**
Nature and paragenesis of metamorphic minerals; physical, chemical, and geological interpretation of paragenesis. (Offered odd years only.)
- 522 Regional Metamorphism and Granitization (5)** **Misch**
Deformation and crystallization, migmatization, and mobilization. (Offered even years only.)
- 524 Advanced Igneous Petrography and Petrology (3 or 5)** **Vance**
The origin of the igneous rocks with emphasis on the interpretation of textures. (Offered odd years only.)
- 530 Advanced Studies in Paleontology (*)** **Mallory, Wheeler**
Selected work in paleontology. (Offered odd years only.)
- 531 Biostratigraphy (5)** **Mallory**
The data and principles of stratigraphic paleontology and of chronologic biostratigraphy. (Offered even years only.)
- 540 Advanced Studies in Structural Geology (*)** **Misch, McKee**
Selected readings and individual conferences on fundamental problems in structural geology.
- 545 Structure of Europe (5)** **Misch**
Structural evolution and tectonic forms of Europe. (Offered even years only.)
- 546 Structure of Asia and West Pacific Rim (5)** **Misch**
Structural evolution from Central Asia to West Pacific; geotectonic principles. (Offered odd years only.)
- 547 Literature on Structural Geology (3 or 5)** **Misch**
Selected readings and seminars on Cordilleran structures.
- 550 Advanced Studies in Geophysics (*, maximum 9)** **Neumann**
Individual research on specific problems in seismometry and seismic data analysis.
- 560 Advanced Studies in Stratigraphy (*)** **Mallory, Wheeler**
Selected work in biostratigraphy or physical stratigraphy.
- 563 West Coast Cenozoic Stratigraphy (4)** **Mallory**
Lithologic and faunal studies of the West Coast Cenozoic. (Offered even years only.)
- 565 Paleozoic Stratigraphy (4)** **Wheeler**
North American Paleozoic stratigraphy as a basis for interpretation of regional and inter-regional geologic episodes. (Offered even years only.)
- 568 Mesozoic Stratigraphy (4)** **Wheeler**
North American Mesozoic stratigraphy as a basis for interpretation of regional and inter-regional geologic episodes. (Offered odd years only.)
- 570 Advanced Studies in Mineralogy, Petrography, and Petrology (*)** **Coombs, Misch**
Selected readings and individual conferences on fundamental problems regarding the origin and development of minerals and rocks.
- 571 Engineering Geology (3)** **Coombs**
Geologic principles as applied to large engineering projects. Emphasis is on the physical properties of rocks and their relation to contemplated engineering structures.
- 572 Geochemistry (3)** **McKee**
The chemistry of geologic processes and the study of the distribution and migration of elements in minerals and rocks. Prerequisite, graduate standing in geology.
- 580 Advanced Studies in Economic Geology (*)** **Coombs**
Selected readings and individual conferences on the application of geology to deposits of economic significance.
- 600 Research (*)** **Staff**
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

GERMANIC LANGUAGES AND LITERATURE

Executive Officer: WILLIAM H. REY, 340 Denny Hall

The Department of Germanic Languages and Literature offers courses leading to the degrees of Master of Arts and Doctor of Philosophy. To register for any graduate course in German, students must receive permission from the Executive Officer of the Department.

MASTER OF ARTS. Candidates must, in addition to fulfilling general requirements of the Graduate School, complete a program of 36 credits. If the student minors in some other department, he may take a minimum of 24 credits in Germanics.

If his entire program lies within the field of Germanics, he must elect 24 credits in modern literature and 12 credits in philology and medieval literature or vice versa.

The M.A. program is designed for three quarters and consists of a compact schedule of courses, which are repeated every year. The courses in the modern field are devoted to Lessing (431), Schiller (438), Goethe (434, 435), Romanticism (515), Nineteenth-Century Drama (416), Nineteenth-Century Prose (417), and Twentieth-Century Literature (518). They are complemented by courses in Middle High German, and Middle High German Literature in the Original (556, 557), Bibliography (501), and Linguistic Analysis of German (405). The candidate must pass a comprehensive written examination covering his main fields of study. In addition, the candidate must submit an acceptable thesis, giving evidence of the mastery of scholarly procedure. For the thesis he will obtain at least 9 credits.

A minor in Germanics for the M.A. degree must consist of a minimum of 12 credits in acceptable courses beyond an undergraduate minor in the field. In no instance, however, may a minor in Germanics for the master's degree be less than a major for the bachelor's degree at the University of Washington.

DOCTOR OF PHILOSOPHY. For a major in Germanics, the student must complete all of the stated requirements of the Graduate School, pursue his studies for at least three graduate years, pass General Examinations on the field, and submit a satisfactory dissertation which demonstrates a mastery of scholarly procedure and is an acceptable contribution to knowledge. The candidate must complete a minimum of 81 credits in course work after admission to the Graduate School (45 credits beyond the M.A.) before taking his General Examinations. If he minors in another department, he may elect a minimum of 30 credits in Germanics. If his entire program lies within the field of Germanics, he must elect 30 credits in modern literature (since 1500), and 15 credits in philology and the older literature, or vice versa. Furthermore, he is expected to earn at least 9 credits in supervised research (600). The General Examinations, which are both written and oral, will not be confined to courses taken at the University or elsewhere, but will endeavor to demonstrate the student's breadth of knowledge, which he has acquired by independent reading and study. His intensive training in areas of special interest and his abilities in critical evaluation will also be tested.

For a minor in Germanics, a minimum of 15 credits is required. In no instance, however, may a minor in Germanics for the doctor's degree be less than the course requirements stated for the master's degree.

COURSES

401, 402, 403	Grammar and Composition (2,2,2)	Staff
404	History of the German Language (5) (Offered 1961-62.)	Meyer
405	Linguistic Analysis of German (3)	Reed
410, 411, 412	Survey of Modern German Literature and Culture (3,3,3)	Staff
416	Nineteenth-Century Drama (3)	Sauerlander
417	Nineteenth-Century Prose (3)	Roy
431	Lessing (3)	Buck
434	Goethe I (3)	Loeb
435	Goethe II (3)	Loeb
438	Schiller (3)	Kahn
497	Studies in German Literature (1-5, maximum 15)	Staff
498	Studies in German Language (1-5, maximum 15)	Staff
500	Methodology (3) (Offered 1961-62.)	Sommerfeld
501	Bibliography (3)	Sommerfeld
502	History of German Criticism (3) (Offered 1962-63.)	Roy

503 Modern Poetry (3) (Offered 1961-62.)	Sommerfeld
515 Romanticism (3)	Immerwahr
518 Twentieth-Century Literature (3)	Rey
520 Seminar in Medieval Literature (3) (Offered 1962-63.)	Hruby
521 Seminar in the Literature of the Reformation and Renaissance (3) (Offered 1961-62.)	Wilkie
522 Seminar in Baroque (3) (Offered 1962-63.)	Sommerfeld
524 Seminar in Eighteenth-Century Literature (3) (Offered 1961-62.)	Staff
525 Seminar in Romanticism (3) (Offered 1961-62.)	Immerwahr
526 Seminar in Nineteenth-Century Drama (3) (Offered 1962-63.)	Sauerlander
527 Seminar in Nineteenth-Century Prose (3) (Offered 1961-62.)	Rey
528 Seminar in Twentieth-Century Literature (3) (Offered 1962-63.)	Rey
544 Seminar in Goethe (3) (Offered 1962-63.)	Loeb
550 Gothic (3) (Offered 1961-62.)	Meyer
552 Old High German (3) (Offered 1961-62.)	Reed
555 Old Saxon (3) (Offered 1962-63.)	Reed
556 Middle High German (3)	Meyer
557 Middle High German Literature in the Original (3)	Hruby
558 Studies in Medieval German Literature (3) (Offered 1961-62.)	Hruby
560 Modern German Dialects (3) (Offered 1962-63.)	Reed
590, 591, 592 Seminar in Literary History (1-5, 1-5, 1-5)	Staff

HISTORY

Acting Executive Officer: W. STULL HOLT, 308 Smith Hall

The Department of History offers courses leading to the degrees of Master of Arts and Doctor of Philosophy. Before beginning graduate work, students should have completed an undergraduate history major or the equivalent. It is expected that students specializing in Far Eastern history will have had sound undergraduate preparation in history.

The requirements for both advanced degrees include work in selected fields of history. Each field is a brief period or a restricted topic which is part of a general subject in one of the major divisions of history. Subjects within the first division are ancient history, medieval history, and Renaissance history; those within the second division are modern European history, United Kingdom, British Empire, and Commonwealth history; American history is the third division; subjects within

the fourth division are the history of science, historiography, and the philosophy of history; subjects within a fifth division, Far Eastern history, may be selected by arrangement with the Department of History and the Far Eastern and Russian Institute.

The Department wishes to call attention to its policy of expecting every graduate student to pass one foreign language requirement within the first year of residence; and in the case of a candidate for the Ph.D. degree, the second foreign language examination within the second year of residence. If one or both of the languages are Oriental or similarly subject to unusual conditions, the student will be permitted a longer period.

Students wishing to enter graduate study in history are expected to submit their applications and supporting documents prior to March 1. All applications will then be considered by the Department as well as by the Graduate School of the University and the resulting decisions will be announced by April 1. Later applications and applications for admission to other than the Autumn Quarter will be considered, but the applicants must recognize that all available space may be taken.

In addition to the information requested on the application for admission to the Graduate School, each applicant is expected to secure letters of recommendation from three of the professors under whom he has worked. These letters are to be mailed directly to the University of Washington, Department of History. Each applicant must also submit with his application an essay of from 500 to 1,000 words on the subject, "Why Study History?"

MASTER OF ARTS. In history there are two programs leading to the degree of Master of Arts. The professional program is planned as the first year of a scholar's career, and the assumption is that the student expects to continue working for the degree of Doctor of Philosophy. The second or general program is designed to meet the interests and purposes of secondary school teachers and other students who think of the M.A. as a terminal degree. The major emphasis is placed upon reading and lecture courses which will enrich and broaden the student's knowledge of history rather than upon technical problems of research and original scholarship.

The candidate in the professional program must complete 500, 501, and 502, one seminar, and graduate courses in three fields selected for special study. The subjects from which the candidate selects the fields should be in different divisions of history. In addition, he must have a reading knowledge of one foreign language and must submit an acceptable thesis, the writing of which should involve original research and the fundamentals of historical method.

The candidate in the general program must complete 500, 501, and 502, four courses numbered in the 400's (two in each of two divisions of history), and one graduate course in a field selected for special study. In addition, he must have a reading knowledge of a foreign language and must submit an acceptable thesis, the emphasis of which may be on interpretation rather than on research.

Students majoring in Far Eastern history must meet the requirements for the professional program, except that they may take either 500, 501, or 502. One field is arranged in cooperation with the Far Eastern and Russian Institute.

The prerequisite for a minor in history for the master's degree is an undergraduate program in history or such preparation as the Department deems satisfactory. For this minor, 15 credits in history are required in courses numbered 400 and 500, subject to the approval of the Department.

DOCTOR OF PHILOSOPHY. Candidates must complete 500, 501, 502, and at least two years of seminar work, participate in the work of the advanced seminar, and prepare at least four fields from subjects in the five divisions of history described above. (Only in a single division may candidates choose two fields.) In addition, they must have a reading knowledge of two foreign languages related to their major fields of study and they are expected to complete a minor in another department.

Students majoring in Far Eastern history are expected to satisfy the same

requirements except that only one year of seminar work in the Department of History is required. Two fields are arranged in cooperation with the Far Eastern and Russian Institute.

Students majoring in ancient history are expected to satisfy the same requirements as other students, except that only one year of seminar work in the History Department may be required. They will take two fields of ancient history, and one of the remaining fields will be arranged in cooperation with the Classics Department. Additional work in other ancient history may be prescribed in lieu of a minor. Before advanced scholarly work in ancient history can be seriously undertaken, a working knowledge of Latin and Greek is essential.

A history minor for the doctor's degree requires 500, 501, 502, and 25 credits in courses numbered 400 and 500, subject to the approval of the Department.

COURSES

ANCIENT HISTORY

- | | | |
|-----|-------------------------------------------------|----------------|
| 401 | Greece in the Age of Pericles (3) | Edmonson, Katz |
| 402 | Alexander the Great and the Hellenistic Age (5) | Edmonson, Katz |

COURSES IN FIELDS OF SPECIALIZATION

These courses are introductions to advanced study. They are designed to show how important historical conclusions have been reached, to suggest further research, and particularly to give bibliographical guidance to students in their preparation for the examinations in the fields selected.

510	Greek, Roman or Byzantine History (3-6)	Edmonson, Katz
514	Medieval History (3-6)	Kaminsky
515	Renaissance and Reformation History (3-6)	Griffiths
520	History of Science (3-6)	Staff
525-526-527	Seminar in the History of Science (3-6)-(3-6)-(3-6)	Staff
532	Modern European History: Germany (3-6)	Emerson
533	Modern European History: France (3-6)	Lytle
534J	Modern European History: Russia (3-6) Offered jointly with the Far Eastern and Russian Institute.	Treadgold
541	American History: Early (3-6)	Savelle
542	American History: Western (3-6)	Burke, Gates
543	American History: Civil War (3-6)	Pressly
544	American History: National Period (3-6)	Gates, Holt
545	American History: Twentieth Century (3-6)	Burke, Pressly
549J	Japanese History (3-6) Offered jointly with the Far Eastern and Russian Institute. Prerequisite, permission.	Butow
575	English History (3-6)	Costigan, Levy
576	British Empire History (3-6)	Staff

SEMINARS

503-504	Seminar in Philosophy of History (3-6)-(3-6) (Offered alternate years; offered 1961-62.)	Costigan
517-518-519	Seminar in Ancient or Medieval History (3-6)-(3-6)-(3-6)	Kaminsky, Katz
521-522-523	Seminar in Modern European History (3-6)-(3-6)-(3-6)	Emerson, Lytle
535J-536J-537J	Seminar in Russian History (3-6)-(3-6)-(3-6) Offered jointly with the Far Eastern and Russian Institute. Prerequisites, reading knowledge of Russian and permission.	Treadgold
550J-551J-552J	Seminar in Japanese History (3-6)-(3-6)-(3-6) Offered jointly with the Far Eastern and Russian Institute. Prerequisite, permission.	Butow
553-554-555	Seminar in American History: Early (3-6)-(3-6)-(3-6)	Savelle
563-564-565	Seminar in American History: Western (3-6)-(3-6)-(3-6)	Burke, Gates
590-591-592	Seminar in American History: National Period (3-6)-(3-6)-(3-6)	Holt
593-594-595	Advanced Seminar (3-6)-(3-6)-(3-6)	Holt

HOME ECONOMICS

Director: MARY LOUISE JOHNSON, 201 Raitt Hall

The School of Home Economics offers courses leading to the degrees of Master of Arts, Master of Science, Master of Arts in Home Economics, and Master of Science in Home Economics. The master's degree programs require a minimum of 45 credits. Half of the work, including the thesis, must be in courses numbered 500 or above.

MASTER OF ARTS OR MASTER OF SCIENCE. The Master of Arts is attained by work in textiles and clothing, the Master of Science, by work in foods and nutrition. Study in either area may be combined with home economics education or family economics. A minor in a field related to home economics is required.

MASTER OF ARTS IN HOME ECONOMICS OR MASTER OF SCIENCE IN HOME ECONOMICS. There is no foreign language requirement for these degrees. Candidates may take all their work in home economics or may take up to 15 credits in related fields, such as art, economics, education, public health, or the biological, physical, or social sciences. Candidates must present acceptable undergraduate preparation in home economics and basic fields.

DIETETIC INTERNSHIPS. Graduates in institution administration who wish to become hospital dietitians select a hospital training course, which is a dietetic internship, for their fifth year of study. Those who wish to become dietitians in lunchrooms, restaurants, or dormitories select an administration internship, such as the one offered by the School of Home Economics. Some of these internships carry graduate credit, and completion of all approved courses makes students eligible for membership in the American Dietetic Association.

COURSES

307 Nutrition (3 or 5)	Johnson
315 Advanced Food Selection and Preparation (2 or 5)	Nielsen
316 Demonstration Techniques (3)	Nielsen
321 Applied Design (2)	Payne
322 Applied Design (2)	Payne
329 Hand Weaving (2)	Brockway
334 Costume Design (3)	Payne
338 Clothing for the Family (3)	Payne
354 Family Economics and Finances (5)	Hall
407 Advanced Nutrition (3)	Johnson
408 Diet Therapy (3)	Johnson
415 Experimental Foods (3)	Nielsen
425 Advanced Textiles (3)	Brockway
429 Advanced Weaving (3)	Brockway
432, 433 History of Costume and Textiles (4,4)	Payne
434 Costume Design (3)	Shigaya
435 Advanced Costume Design (5)	Payne
436 Advanced Costume Design (5)	Payne
447 Advanced Home Furnishing (3)	Hosmer
454 Advanced Family Economics and Finances (2)	Hall
457 Child Nutrition and Care (3)	Johnson
472 Institution Food Purchasing (3)	Terrell
473 Institution Management (5)	Terrell
474 Institution Management (5)	Sandstrom
475 Institution Equipment (3)	Terrell
495 Special Problems in Home Economics (*, maximum 10)	Staff
507 Readings in Nutrition (*) Library research. Prerequisite, 407 or equivalent.	Johnson
515 Readings in Food Selection and Preparation (*) Professional literature on recent developments. Prerequisite, 315 or equivalent, or permission.	Nielsen
525 Seminar in Textiles (3) Readings and discussion of factors affecting economic utilization and technical development of textile products. Trends in current research and methods of investigation. For graduate students in textiles and clothing. Prerequisites, 125, 425 or equivalent.	Brockway
554 Social and Economic Problems of the Consumer (3-5) Selected topics in the family economics field. Prerequisites, 454 or equivalent, or permission.	Hall
562 Home Economics Education (*) Study of achievements, trends, functions, methods, and teaching materials.	McAdams
576, 577, 578 Supervised Field Work (4,4,4) Three quarters of practice and organized classwork for graduates in institution management and dietetics. An administrative dietetics internship approved by the American Dietetic Association.	Terrell, Staff

600 Research (*)

- A. Costume design
- B. Institution administration
- C. Nutrition
- D. Textiles
- E. Family economics

- F. Foods
- G. Home economics education
- H. Family relations
- I. Home management
- K. Home furnishing

Staff**700 Thesis (*)****Staff****LINGUISTICS**

Committee: K. CHANG, Far Eastern; D. FOWLER, English; M. JACOBS, Anthropology; F.-K. LI, Far Eastern; N. POPPE, Far Eastern; C. REED, Germanics; E. REIFLER, Far Eastern; T. ROSENMEYER, Classics; L. THOMPSON, Far Eastern; S. SAPORTA, Romance Languages, Chairman.

The Graduate School offers a program of studies for graduate students leading to master's and doctoral degrees in Linguistics. The program is administered by the Interdepartmental Committee on Linguistics in cooperation with various departments. Queries regarding the program in Linguistics may be addressed to the University of Washington, Chairman, Committee on Linguistics, 229C Denny Hall, Seattle 5.

Normal requirements of the Graduate School for admission to candidacy for an advanced degree in linguistics include the equivalent of 45 quarter hours (30 semester hours) of undergraduate college credits in language study. This requirement implies the attainment of proficiency in one language other than English, or, in the instance of a non-native speaker of English, a course of study and proficiency in a language other than his native speech. The Graduate School may be consulted when there is need for special determination regarding meeting the requirements for admission to candidacy. To register for courses, candidates should consult with the Chairman of the Linguistics Committee.

MASTER OF ARTS. Requirements are as follows (subject to readjustment by the candidate's committee):

1. A reading knowledge of German and French, to be demonstrated before the end of one year of graduate study.
2. The following courses or equivalents: 404, 405, 406, 501, 502, 503 (plus 400, 451J, 452J, 453J, 462J, 463J, if the candidate has not previously taken courses equivalent to these in phonetics, phonemics, morphology, and syntax).
3. Additional credits in linguistics or supporting areas, as approved by the Committee.
4. Completion of a thesis acceptable to the Committee on Linguistics and successful performance in a comprehensive examination.

DOCTOR OF PHILOSOPHY. A student may plan to proceed directly for the doctoral degree without an M.A., but the committee reserves the right to require any individual student to present himself as a candidate for the M.A. before accepting him as a candidate for the Ph.D. Requirements include items one, two, and three for the M.A., plus the following (subject to readjustment by the student's committee):

1. A structural knowledge of Latin and Greek, to be demonstrated as early as possible. This requirement may be fulfilled either by examination or by enrolling for Latin 300 and Greek 300, offered by the Classics Department.
2. Linguistics 504, 505, 506, 514, 515, 516, 530, and 599.
3. Nine additional credits in linguistics or supporting areas, as approved by the Committee.
4. The General Examination, usually conducted at the conclusion of course work, in (1) descriptive linguistics, (2) historical-comparative linguistics, and (3) a specialty of the candidate's choice, e.g., Germanics, Romance, Slavic, Chinese, Altaic, American Indian linguistics, etc.

5. Independent research in the analysis of a language utilizing a native speaker or speakers and/or manuscripts in the language.
6. A Final Examination and a thesis suitable for publication.

COURSES

- 400 Survey of Linguistic Method and Theory (3)** Saporta
404, 405, 406 Indic and Indo-European (3,3,3) Chang
 Prerequisite, permission.
- 451J, 452J, 453J Phonetics and Phonemics (3,3,3)** Thompson
 Offered jointly with the Department of Anthropology. Prerequisite, permission.
- 462J, 463J Morphology and Syntax (3,3)** Saporta
 Offered jointly with the Department of Anthropology. Prerequisite, 400 or permission.
- 501, 502, 503 Linguistic Analysis Laboratory (3,3,3)** Thompson
 Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisites, 453J, 463J, or permission.
- 504 Indo-European Comparative Phonology (2)** Reed
 Sound systems of the principal families of Indo-European and the relation of these to a hypothetical parent tongue. (Offered 1962-63.) Prerequisite, 406.
- 505, 506 Indo-European Comparative Grammar (2,2)** Reed
 Systematic treatment of Indo-European grammar, with extensive surveys of individual language groups. (Offered 1962-63.) Prerequisite, 504.
- 514, 515, 516 Seminar in Comparative Linguistics for Students of Indo-European (2,2,2)** Li
 Advanced problems in comparative linguistics; special attention to work with languages having few or no written records. Prerequisite, 506 or permission.
- 530 Dialectology (3)** Reed
 The principles of dialect deviation as related to linguistic structure and usage. Prerequisite, 452J or permission.
- 555J Methods in Comparative Linguistics (3)** Staff
 Offered jointly with the Department of Anthropology. Method and theory of comparative linguistics in relation to anthropological research. Prerequisite, permission.
- 580 Problems in Linguistics (2, maximum 6)** Reed
 A course for advanced students of linguistics, dealing with significant movements, techniques, skills, and theories in the field. Prerequisite, permission.
- 599 Linguistics Colloquium (1)** Staff
 Biweekly seminar attended by faculty and graduate students to discuss research in progress and topics of general interest. Attendance is required for a minimum of three quarters during the student's residence. Prerequisite, permission.
- 600 Research (1-5)** Staff
- 700 Thesis (*)** Staff

Specialized course work is available in various cooperating departments. Each student is expected to elect an area of specialization and work out with the Chairman of his Supervisory Committee an appropriate program of courses supporting his required work. The fields of specialization regularly available at this institution are the following (cooperating departments in parentheses):

- Altaic (Far Eastern and Slavic Languages and Literature)
- American Indian linguistics (Anthropology)
- Anthropological linguistics (Anthropology)
- Chinese (Far Eastern and Slavic Languages and Literature)
- Classical linguistics (Classics)
- English (English, Germanic Languages and Literature)
- Germanic (Germanic Languages and Literatures)
- Japanese and Korean (Far Eastern and Slavic Languages and Literature)
- Oral Literature (Anthropology, Comparative Literature)
- Romance (Romance Languages and Literature)
- Scandinavian (Germanic Languages and Literature, Scandinavian Languages and Literature)
- Slavic (Far Eastern and Slavic Languages and Literature)
- Southeast Asian linguistics (Far Eastern and Slavic Languages and Literature)
- Speech and Phonetics (Speech)
- Tibetan (Far Eastern and Slavic Languages and Literature)

For a listing of course work in these fields consult the section of this bulletin pertaining to the department indicated.

In certain cases arrangements may be made for students to specialize in fields not listed above. Students interested in such a possibility should consult with the chairman of the committee stating their specific interests and objectives.

MATHEMATICS

Executive Officer: C. B. ALLENDOERFER, 239 Physics Hall

The Department of Mathematics offers courses leading to the degrees of Master of Arts, Master of Arts in Teaching Mathematics, Master of Science, Master of Science in Mathematical Statistics, and Doctor of Philosophy.

The candidate's minimum undergraduate preparation for an advanced degree in mathematics must be equivalent to the requirements for a mathematics major for the Bachelor of Arts degree. Candidates presenting only the minimum amount of undergraduate mathematics cannot expect to earn a master's degree in less than two years.

Since one foreign language is required for all the above masters' degrees except the Master of Arts in Teaching Mathematics and two languages are required for the doctor's degree, candidates for admission are advised to elect languages as undergraduates. French, German, and Russian are the only languages acceptable toward these degrees.

The minor in mathematics for a master's degree requires at least 12 credits in approved courses numbered 400 or above. At least 9 of these are to be taken in residence.

The minor for the degree of Doctor of Philosophy requires a minimum of 33 approved credits in courses numbered 400 or above, including at least 6 credits in each of three of the four categories, algebra, analysis, geometry, and statistics.

MASTER OF ARTS. A minimum of 27 approved credits in courses numbered 400 or above, with at least 9 credits in courses numbered 500 or above, is prescribed. These courses must include at least 6 credits in each of algebra, analysis, and one other field. The thesis for this degree, while demonstrating ability and aptitude, may be largely expository.

MASTER OF ARTS IN TEACHING MATHEMATICS. This degree is intended for present or prospective high school teachers of mathematics to provide them with the background in this subject which is essential for effective teaching of their students in high school. It is assumed that candidates for the degree are eligible to teach in the secondary school of their choice and, consequently, the program for the degree is devoted primarily to courses in mathematics.

A minimum of 30 approved credits in courses numbered 400 or above, with at least 5 credits in courses numbered 500 or above, is prescribed. These credits must all be in mathematics except that Education 475A, Improvement of Teaching: Secondary Mathematics, may be included. The thesis for this degree should be an exposition of a mathematical subject closely related to the content of secondary school mathematics. There is no language requirement for this degree.

MASTER OF SCIENCE. A minimum of 27 approved credits in courses numbered 400 or above, with at least 18 credits in courses numbered 500 or above, is prescribed. These courses must include at least 6 credits in each of algebra, analysis, and one other field. The thesis should demonstrate the student's ability to engage in independent research.

Under certain circumstances, this degree may also be awarded to a student who has passed the General Examinations for the Ph.D. degree. In such cases, no thesis is required.

MASTER OF SCIENCE IN MATHEMATICAL STATISTICS. The undergraduate preparation should consist of courses in probability and statistical inference equivalent to

Mathematics 481 and 482. The candidate must present a minimum of 27 approved credits in mathematics courses numbered 400 or above. This work may include, on approval, some courses in mathematical statistics needed to make up deficiencies in undergraduate preparation and must include 15 credits in mathematical statistics courses numbered 500 or above. The thesis should demonstrate the student's ability to engage in independent research.

DOCTOR OF PHILOSOPHY. The General Examination of a candidate for this degree covers (1) the subject matter usually covered in first-year graduate courses in algebra, real variable, and two other fields chosen by the candidate and approved by his Supervisory Committee; and (2) additional material related to the candidate's field of special interest, such as that included in second-year graduate courses.

COURSES

301 Elementary Number Theory (3)	Staff
322 Principles of Differential Equations (3)	Staff
324, 325 Advanced Calculus I, II (3,3)	Staff
374 Principles of Digital Computers and Coding (5)	Staff
382, 383 Statistical Inference in Applied Research (5,5)	Staff
391 Elementary Probability (3)	Staff
392 Elements of Statistics (3)	Staff
401 Matrices (3)	Staff
402, 403 Introduction to Modern Algebra (3,3)	Staff
404 Linear Algebra (3)	Staff
407 Game Theory and Linear Programming (3)	Staff
411, 412, 413 Linear and Modern Algebra (3,3,3)	Staff
424, 425, 426 Fundamental Concepts of Analysis (3,3,3)	Staff
427, 428, 429 Topics in Applied Analysis (3,3,3)	Staff
441, 442, 443 Advanced Geometry (3,3,3)	Staff
444, 445 Foundations of Geometry (3,3)	Staff
464, 465, 466 Numerical Analysis I, II, III (3,5,5)	Staff

482 Statistical Inference (3)	Staff
483 Theory of Correlation (3)	Staff
484 Distribution Free Inference (3)	Staff
485 Analysis of Variance (3)	Staff
497J Special Topics in Mathematics for Teachers (2-5, maximum 15) Offered jointly with the College of Education.	Staff
498 Special Topics in Mathematics (2-5, maximum 15)	Staff
501, 502 Foundations of Mathematics (3,3) Fundamental concepts and methods of mathematics; the axiomatic method; the logical foundations of mathematics.	Staff
504, 505, 506 Modern Algebra (3,3,3) Theory of groups, rings, integral domains, and fields; polynomials; vector spaces, Galois Theory, and theory of ideals. Prerequisites, 403 or equivalent for 504; 504 for 505; 505 for 506.	Staff
510 Seminar in Algebra (*, maximum 5) Prerequisite, permission.	Staff
511, 512, 513 Special Topics in Algebra (2-3, 2-3, 2-3) Each may be repeated twice for credit. In recent years the following subjects have been covered: Abelian Groups, Algebraic Function Fields, Algebraic Number Theory, Classical Groups, Game Theory, Group Extensions, Lattice Theory, Lie Algebras, Number Theory, and Structure of Rings.	Staff

- 524, 525, 526 Real Variable (3,3,3) Staff**
Metric spaces; general measures and integration; differentiation of set functions; real valued functions on the line; Banach spaces. Prerequisites, 426 or equivalent for 524; 524 for 525; 525 for 526.
- 527 Elements of Real Variables for Scientists (3) Staff**
Compactness theorems, Lebesgue integration and limit theorems, Fubini theorem, L_p spaces, L_2 Fourier transform theory. Prerequisites, 427, 428, 429, or permission.
- 528, 529 Hilbert Space Operators and Applications (3,3) Staff**
Spectral theorem for bounded Hermitian operators, statement for unbounded operators, application to ordinary and partial differential operators with Fourier transforms, construction of Green functions, Schrödinger equation, eigenvalue distributions, perturbation theory; contour integral representation, special functions. Prerequisites, 527 for 528; 528 for 529.
- 530 Seminar in Analysis (*, maximum 5) Staff**
Prerequisite, permission.
- 531, 532, 533 Special Topics in Analysis (2-3, 2-3, 2-3) Staff**
Each may be repeated twice for credit. In recent years the following subjects have been covered: Functional Analysis, Abstract Harmonic Analysis, Linear Operations in Hilbert Space, Group Representations, Fourier Series and Integrals, Topological Linear Spaces, Potential Theory, and Numerical Analysis.
- 534, 535, 536 Complex Variable (3,3,3) Staff**
Complex numbers; analytic functions; contour integration; power series; analytic continuation; sequences of analytic functions; conformal mapping of simply connected regions. Prerequisites, 426 for 534; 534 for 535; 535 for 536.
- 538, 539 Non-Linear Ordinary Differential Equations (3,3) Staff**
Phase plane; analysis of critical points (nodes saddle points, foci); theory of oscillations, limit cycles, Poincaré-Bendixon theory; topological methods, fixed point theorem. Prerequisites, 322 and 324 (or 236) for 538; 538 for 539.
- 544, 545, 546 Differential Geometry (3,3,3) Staff**
Differential geometry of curves and surfaces in ordinary space and in n -space. Differential forms and the Cartan calculus. Differential geometry in the large. Prerequisites, 401 and 426 for 544; 544 for 545; 545 for 546.
- 550 Seminar in Geometry (*, maximum 5) Staff**
Prerequisite, permission.
- 551, 552, 553 Special Topics in Geometry (2-3, 2-3, 2-3) Staff**
Each may be repeated twice for credit. In recent years the following subjects have been covered: Riemannian Geometry, Differentiable Manifolds, Complex Manifolds, Geometry of Convex Bodies.
- 561, 562, 563 General Topology (3,3,3) Staff**
Theory of sets; metric spaces; topological spaces; compactness and other covering properties, function spaces; polyhedra; dimension theory. Prerequisites, 426 for 561; 561 for 562; 562 for 563.
- 564, 565, 566 Algebraic Topology (3,3,3) Staff**
Classical and modern approaches to algebraic topology; complexes and their homology theory; applications: fixed points, primary obstruction; products and Poincaré duality; axiomatic approach; covering spaces. Prerequisites, 506 for 564; 564 for 565; 565 for 566.
- 569J Partial Differential Equations (3) Staff**
Classification of second order partial differential equations; solution by separation of variables and reduction to a boundary value problem; theory of characteristics and solutions by means of Green's functions. Examples from classical mechanics of continua. Prerequisite, 428 or Aeronautical Engineering 568. Offered jointly with the Department of Aeronautical Engineering.
- 570 Seminar in Topology (*, maximum 5) Staff**
Prerequisite, permission.
- 571, 572, 573 Special Topics in Topology (2-3, 2-3, 2-3) Staff**
Each may be repeated twice for credit; special topics from general and algebraic topology.
- 581, 582, 583 Advanced Theory of Statistical Inference (3,3,3) Staff**
Elements of decision theory; Neyman-Pearson theory; randomized tests; maximum likelihood statistics; confidence regions; distribution-free statistics; linear hypotheses; analysis of variance; block design. Prerequisites, 484 and 485, or permission for 581; 581 for 582; 582 for 583.
- 590 Seminar in Probability and Statistics (*, maximum 5) Staff**
Prerequisite, permission.
- 591, 592, 593 Special Topics in Statistics (3,3,3) Staff**
Each may be repeated twice for credit. In recent years the following subjects have been covered: Advanced Probability Theory, Stochastic Processes, Distribution-Free Inference, Game and Decision Theory, Advanced Theory of Estimation (including Sequential Estimation).
- 600 Research (*) Staff**
Prerequisite, permission.
- 700 Thesis (*) Staff**
- 702 Degree Final Staff**
Limited to students completing a nonthesis degree program.

METEOROLOGY AND CLIMATOLOGY

Executive Officer: PHIL E. CHURCH, 201F Meteorology Building

The Department offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy. These programs are open to qualified students who have earned a bachelor's degree in a physical science or mathematics. The distinction between candidates for the M.S. and Ph.D. degrees is made on the basis of a qualifying examination taken after two quarters of graduate study. This examination covers fundamental aspects of meteorology and the relevant mathematics and physics.

Courses in the following subjects are normally considered as prerequisites to study toward an advanced degree, mathematics through ordinary differential equations (Mathematics 221) and advanced calculus (Mathematics 234), modern physics (Physics 320), and thermodynamics (Meteorology 340 or Physics 371), and atmospheric analysis (Meteorology 350).

Each student working toward an advanced degree is expected to attend Department colloquia and to attend and participate in the Graduate Student Forum which meets weekly for critical discussion of a published paper of current interest.

MASTER OF SCIENCE. The program of study and research is intended to enable the student throughout his scientific career to grow with his field, to recognize and understand new concepts, and to master new procedures as they emerge.

The minimum course requirements are 27 graduate credits exclusive of research or thesis, of which 3 must be in applied mathematics or mathematical physics and 15 must be in meteorology courses numbered above 500.

A thesis is required. It must demonstrate the student's ability to use research methods in a limited area and to discuss critically his own and other investigators' work.

DOCTOR OF PHILOSOPHY. The degree of Doctor of Philosophy signifies understanding and knowledge normally attained only through the original solution of a problem of substantial scientific importance.

A student who passes the qualifying examination with distinction may embark on the Ph.D. program under the sponsorship of a faculty Supervisory Committee. The General Examination, taken at the end of the second year of residence, is composed of a written examination which tests mastery of general and theoretical meteorology and of relevant mathematical methods; and an oral examination which tests depth of understanding of a topic within the student's area of special interest, selected in advance.

At least half of the credits earned prior to the General Examination should be in courses numbered above 500, and at least 21 credits should be earned in approved mathematics and physics courses numbered above 400. The thesis is an important part of the candidate's program; it must represent an original contribution of substantial scientific importance.

COURSES

301 Introduction to Atmospheric Science (5)	Staff
321 Physical Climatology (5)	Church
322 Regional Climatology (5)	Church
329 Microclimatology (3)	Buettner
340 Introduction to Atmospheric Physics (5)	Businger, Fleagle
350 Introduction to Atmospheric Analysis (5)	Reed
360 Meteorological Instruments and Observations (5)	Badgley
431, 432 Atmospheric Physics (5,3)	Businger, Fleagle
441, 442 Introduction to Atmospheric Motions (5,5)	Fleagle, Reed

- 451 Atmospheric Analysis (5)** **Danielson**
- 452 Forecasting Laboratory (5)** **Danielson, Reed**
Prerequisite, 451.
- 462 Sea-Air Transfer Processes (6)** **Fleagle**
(Offered at Friday Harbor Summer Quarter only.)
- 492 Readings in Meteorology or Climatology (*)** **Staff**
- 493 Special Problems in Meteorology or Climatology (*)** **Staff**
- 494 Meteorological Statistics (*)** **Staff**
- 522 Advanced Regional Climatology (3)** **Church**
Intensive study of the characteristics of climatic elements for a selected region or climatic type and a statistical analysis of the elements studied. Prerequisite, 322 or permission.
- 528 Applied Meteorology and Bioclimatology (3)** **Buettner**
Interrelationship of meteorology and climatology to: human health and heat balance, aviation and space medicine, air pollution, agriculture, forestry, transportation, etc. Prerequisites, 322 and 341 or permission.
- 531 The Upper Atmosphere (3)** **Buettner**
Structure, composition, and dominant physical and photochemical processes. Sound propagation, aurora, air glow, ionosphere, and Van Allen belts. Role of the sun. Exosphere and planetary atmospheres. Prerequisites, Mathematics 322 and Physics 320, or permission.
- 532 Atmospheric Electricity (3)** **Buettner**
Formation and disappearance of atmospheric ions. Normal air electrical field. Lightning and its causes. Earth magnetic field. Prerequisite, 531 or permission.
- 533 Atmospheric Radiation (3)** **Buettner**
Solar spectrum. Atmospheric scattering, spectra of water vapor and other gases. Albedo of earth and atmosphere. Radiative heat balance. Prerequisites, Physics 320 and Mathematics 322.
- 541, 542 Dynamic Meteorology (3,3)** **Fleagle**
541: basic equations of dynamic meteorology, circulation and potential vorticity theorems, barotropic and baroclinic atmospheres, large and small scale approximations. Prerequisite, Mathematics 325 or Aeronautical Engineering 567 or equivalent. 542: particle dynamics applied to large scale motions and to stability criteria, linearized barotropic wave, numerical forecasting equations, baroclinic, diabatic and topographic effects. Prerequisites, 541 and Mathematics 221.
- 543, 544 Atmospheric Wave Theory (3,3)** **Fleagle**
543: perturbation equations in Eulerian and Lagrangian form, wave motions in incompressible and compressible fluids, wave theory of cyclones; flow over mountains. Prerequisites, 442, Mathematics 322, or permission. 544: structure of baroclinic wave, baroclinic instability, general circulation, dispersion of waves, associated Legendre equation, wave motion on spheres, atmospheric tides. Prerequisite, 543.
- 546, 547, 548 Atmospheric Turbulence (3,3,3)** **Bagley, Businger**
546: laminar and turbulent flow; analogy between kinetic theory of gases and turbulence theory; Reynolds averaging; dissipation of energy; statistical descriptions of turbulent flow. Prerequisite, 442 or permission. 547: diffusion of matter in the atmosphere; application of Fickian and statistical theories of diffusion; use of Lagrangian and Eulerian correlation functions. Prerequisite, 546. 548: turbulent flux of heat, momentum, and moisture in the layer of the atmosphere next to the earth; Richardson's stability criterion; free convection. Prerequisite, 546.
- 551 Advanced Atmospheric Analysis (5, maximum 10)** **Danielson, Reed**
Selected advanced nonroutine types of analysis. Exercises in objective map analysis and numerical weather prediction. Prerequisite, 442 or permission.
- 560 Theory of Meteorological Instruments (3)** **Badgley**
The physical theory of the operation of meteorological instruments. Emphasis on new and specialized research instruments and on more difficult problems involving standard instruments. Prerequisites, one year of calculus and permission.
- 570 Seminar on Cloud Physics (2)** **Staff**
The physical processes in the formation and modification of clouds and the formation of precipitation in the atmosphere are examined. Prerequisite, permission.
- 572 Seminar on Polar Meteorology (3)** **Staff**
Critical examination of source materials and original papers on selected topics applicable to polar meteorology. Prerequisite, permission.
- 593 Laboratory in Experimental Meteorology (3, maximum 6)** **Badgley**
The role of controlled-model experiments in meteorology. Laboratory study of cloud formation and modification; convection cells, turbulent air motion; thermally-induced air drainage; flow over obstacles; wave motion; surface of discontinuity; atmospheric circulation. Prerequisite, 542.
- 600 Research (*)** **Staff**
- 700 Thesis (*)** **Staff**

MUSIC

Director: STANLEY CHAPPLE, 104 Music Building

The School of Music offers courses leading to the degrees of Master of Arts in Music, Doctor of Philosophy, and Doctor of Musical Arts. All candidates for advanced degrees are expected to be proficient in general musicianship, including piano, and must show a satisfactory knowledge of music theory and music literature. The School of Music issues information leaflets, "Graduate Studies," as a guide to the standards expected for each of the various degrees and majors.

MASTER OF ARTS IN MUSIC. The minimum requirements are: for a major in composition, music education, musicology, or opera, 36 credits and a 9-credit thesis; for a major in music performance (piano, violin, voice, organ, conducting), 39 credits and a 6-credit thesis. The candidate's committee may require additional work beyond the basic minimum, depending upon the student's previous preparation, level of accomplishment in graduate studies, and educational objectives. Musicology is the only major which requires a reading knowledge of either French or German.

DOCTOR OF PHILOSOPHY. This degree is offered with a major in music, and with opportunity for specialization in musicology or music theory. Candidates must have a reading knowledge of French and German. Three years of graduate study are required, of which two must be spent in residence at the University of Washington. A minimum of 80 credits is required, of which 36 credits must be in music courses numbered 500 or above, and 20 to 30 credits will normally represent supporting courses in other departments. In addition, the candidate must present an acceptable thesis representing original and independent investigation.

DOCTOR OF MUSICAL ARTS. This degree is intended as a recognition of high professional attainment in some major branch of performance, or in original composition, or in the field of music teaching. Since only experienced and technically competent musicians will be admitted to the program, it is expected that the doctoral studies will be devoted largely to the broadening and deepening of professional preparation for teaching at the college level.

Three years of graduate study are required, of which two must be spent in residence at the University of Washington. A minimum of 80 credits of course work must be completed, of these half must represent music courses numbered 500 or above. Individual programs may be flexible, but should include broadening experience in various musical disciplines, and in departments other than music, along with intensive study of a specialty. In lieu of a single longer dissertation, candidates will submit three theses. One of the theses must be a research paper; the other two may be additional research papers, or musical compositions, or essays of a critical or methodological nature.

A reading knowledge of two foreign languages is required.

COURSES

301 Contemporary Idioms (3)	McKay
303 Keyboard Harmony (3)	Staff
304 Choral Literature (1)	Terry
307, 308 Music Before 1750 (2,2)	Babb, Terry, Woodcock
317 Chamber Music (2)	Ferrin
321 Modal Counterpoint (3)	Babb
322 Tonal Counterpoint (3)	Verrall
330 Vocal or Instrumental Instruction (2-3, maximum 18)	Staff
331, 332, 333 Keyboard Transposition and Improvisation (2,2,2)	Beale
334, 335, 336 Accompanying (2,2,2)	Hokanson
337, 338, 339 Repertoire (2,2,2)	Staff

340	University Concert Band (1, maximum 6)	Welke
344	Elementary School Music (4)	Normann
345	The General Music Class (2)	Normann
346J	Teachers' Course in Secondary School Music (4) Count 2 credits as education and 2 as music. Offered jointly with the College of Education.	Normann
347	Music in the United States (2)	Clarke
348	Twentieth-Century Music in the Americas (2)	Clarke
350	Vocal or Instrumental Instruction (2-3, maximum 18)	Staff
352	Musical Form (3)	Woodcock
353	Orchestration (3)	McKay, Verrall
354	Band Arranging (2)	Welke
355	Music Calligraphy (1)	Verrall
357	Church Music (3)	Woodcock
360	University Symphony Orchestra (1, maximum 6)	Chapple
367	History of Chamber Music (3)	Irvine
377, 378, 379	Score Reading (1,1,1)	Irvine
380	Advanced Chamber Music (1, maximum 6)	Staff
384	Instrumental Conducting (1)	Welke
385	Choral Conducting (2)	Munro
401	Contemporary Idioms (3)	McKay
407	Renaissance Music (2)	Irvine
408	Baroque Music (3)	Terry
409	Contemporary Music (3)	McKay
414, 415	School Choral Materials (1,1)	Staff
417	Medieval Music (2)	Irvine
421	Modal Counterpoint (3)	Babb
422	Tonal Counterpoint (3)	Verrall
424, 425	School Instrumental Materials (1,1)	Cole, Normann
427	Haydn and Mozart (3)	Terry
428	Beethoven (3)	Woodcock
430	Vocal or Instrumental Instruction (2-3, maximum 18)	Staff
434, 435, 436	Piano Teaching (2,2,2)	Moore
437	Rococo and Preclassic Music (3)	Terry
440	Wind Sinfonietta (2, maximum 6) (Offered Summer Quarter only.)	Welke
447	Schumann and Brahms (3)	Woodcock
449	Late Nineteenth-Century Music (3)	Irvine
450	Vocal or Instrumental Instruction (2-3, maximum 18)	Staff
452	Musical Form (3)	Woodcock
453	Orchestration (3)	Beale
460	Sinfonietta (1, maximum 9)	Chapple
464, 465	Opera Direction and Production (4,4)	Rosinbum
467	History of Keyboard Music (3)	Woodcock
474	The Curriculum in Music Education (3)	Normann
480	Opera Theatre (2, maximum 6)	Chapple, Rosinbum
481	Harmonic Analysis (3)	Beale
484	Instrumental Conducting (1)	Cole
485	Choral Conducting (2)	Munro
486	Instrumental Conducting (1)	Chapple
487, 488	History of Opera (3,3)	Clarke, Munro
490	Collegium Musicum (1-2, maximum 6)	Bostwick, Heinitz, Terry
491	Composer's Laboratory (3, maximum 18)	McKay, Verrall
495	Advanced Choral Conducting (3)	Munro

- 497, 498 History of Choral Music (3,3)** **Munro, Terry**
- 500 Methods of Musical Research (3)** **Irvine**
Bibliography and research techniques. Designed to prepare students for their work in seminars, individual research, and the writing of theses.
- 507 Seminar in Renaissance and Baroque Music (3, maximum 6)** **Munro**
Prerequisite, one or more undergraduate courses in the same field.
- 508 Seminar in Classic and Romantic Music (3, maximum 6)** **Woodcock**
Prerequisite, one or more undergraduate courses in the same field.
- 509 Seminar in Modern Music (3, maximum 6)** **Verrall**
Prerequisite, one or more undergraduate courses in the same field.
- 514 Psychological Foundations of Music (3)** **Normann**
The nature of musical effects; growth and development of musical powers; factors influencing musical taste; applications of music to therapy and industry.
- 524, 525, 526 Seminar in Music Education (3,3,3)** **Normann**
Special problems in the teaching and supervision of music in the elementary grades, junior and senior high school, and junior college; the role of music in society. Prerequisite, one year of teaching experience.
- 547 Seminar in American Music (3, maximum 6)** **Clarke**
History and literature of music in the United States from 1600 to the present.
- 550 Vocal or Instrumental Instruction (3, maximum 12)** **Staff**
Prerequisite, 30 credits in the same branch of performance.
- 561 Problems in Choral and Orchestral Scoring (2-5)** **Verrall**
Special techniques of choral, orchestral, and dramatic composition. Original composition and research with emphasis on the evolution of ensemble types and forms.
- 566 Opera Direction and Production (4 or 6, maximum 12)** **Rosinbum**
Practical experience with problems of the opera theatre.
- 568, 569 Historiography and Criticism (3,3)** **Irvine**
An approach to critical scholarship through the review and evaluation of the writings of music historiographers and music critics with main emphasis on the period since 1770.
- 577, 578 Early Notation (2,2)** **Irvine**
577: Gregorian notation; ars antiqua; ars nova. 578: white mensural notation; lute and organ tablatures. Prerequisites, 417 for 577, 407 for 578, or permission.
- 579 Seminar in Musicology (3, maximum 6)** **Irvine**
Selected topics in music history, literature, and theory. Prerequisite, permission.
- 584, 585, 586 Advanced Conducting (1-3, 1-3, 1-3)** **Chapple**
Analysis of scores leading to rehearsal and preparation of musical groups.
- 590 Recital (2, maximum 6)** **Staff**
Public performance in one solo recital and in chamber music, cantata, concerto, opera, or oratorio.
- 591 Graduate Composition (*)** **McKay, Verrall**
- 600 Research (*)** **Staff**
Prerequisite, permission.
- 700 Thesis (*)** **Staff**

OCEANOGRAPHY

Executive Officer: RICHARD H. FLEMING, 202 Oceanography Building

The Department of Oceanography offers courses leading to the degrees of Master of Science and Doctor of Philosophy. The graduate programs are built upon a broad background in the basic sciences and in oceanography. Therefore, to be accepted a student must have an undergraduate major in oceanography or in one of the supporting sciences. The student specializes in either biological, chemical, geological, or physical oceanography after having met the basic science and upper-division oceanography requirements.

Russian, German, French, and Japanese are the most valuable foreign languages in the advanced study of oceanography.

In many courses, work at sea is performed on board the M. V. "Brown Bear" and other vessels which are attached to the Department. Summer Quarter instruction is offered both on the University campus and at the Friday Harbor Laboratories in the San Juan Islands.

COURSES

- 390 General Oceanography (5)** Barnes, Richards
- 401 General Physical Oceanography (5)** Barnes
- 403 Biological Oceanography (5)** Banse, English
- 405 Geological Oceanography (5)** Creager
- 410 Physical Oceanography (3)** Barnes
- 411 Ocean Tides and Waves (3)** Rattray
- 412 Ocean Currents (3)** Barnes
- 415 Fundamentals of Underwater Acoustics (3)** Murphy
- 416 Applications of Underwater Acoustics (2)** Murphy
- 421-422 Chemical Oceanography (2-2)** Richards
- 423, 424 Chemical Oceanography Laboratory (2,2)** Richards
- 452 Sedimentary Processes (3)** Creager
- 453 Sedimentary Techniques (2)** Creager
- 460 Field Experience in Oceanography (6)** Staff
(Offered Summer Quarter only.)
- 461 Applications of Oceanography (3)** Fleming
- 511, 512, 513 Marine Hydrodynamics (3,3,3)** Rattray
Methods for solving problems in physical oceanography. Prerequisite, a major in a physical science.
- 514 Field Work in Marine Hydrodynamics (6)** Rattray
Application of marine hydrodynamics principles to field measurements. (Offered Summer Quarter when demand is sufficient.) Prerequisite, a major in a physical science.
- 515 Waves (2)** Rattray
Application of marine hydrodynamics principles to the wave motion in the oceans. Prerequisite, 513.
- 516 Ocean Circulation (2)** Rattray
Hydrodynamic theories concerning the origin and characteristics of the major ocean currents. Prerequisite, 513.
- 517 Oceanography of Inshore Waters (5)** Barnes, Rattray
Theories and techniques of investigation and interpretation of conditions existing in inshore waters with particular reference to mixing and flushing and to areas adjacent to the state of Washington; use of dynamic models. Prerequisite, 512.
- 518 Seminar in Physical Oceanography (*, maximum 9)** Staff
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite, permission.
- 519 Interaction of the Sea and Atmosphere (5)** Staff
The interchange of heat, water, and energy; study of budgets and of the mechanisms of exchange. Prerequisites, 410 and Meteorology 462.
- 520 Seminar (*, maximum 6)** Staff
- 521 Seminar in Chemical Oceanography (*, maximum 9)** Richards
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite, permission.
- 523 Advanced Problems in Chemical Oceanography (1-4, maximum 18)** Richards
Field and laboratory work on selected problems of current interest. Prerequisites, 424 and permission.
- 531 Seminar in Biological Oceanography (*, maximum 9)** Banse
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite, permission.
- 532 Marine Microbiology (1-4)** Ordal
Ecology and biochemistry of marine bacteria. Prerequisites, Microbiology 300 and permission.
- 533 Zooplankton Ecology (6)** Staff
Adaptations, modifications, and life histories of animals in the plankton. Evaluation of methods and techniques used in field and laboratory studies. (Offered Summer Quarter only in alternate years, beginning 1962, at Friday Harbor Laboratories.) Prerequisite, permission.
- 534 Phytoplankton Ecology (6)** Staff
Contemporary problems in marine phytoplankton investigations. Evaluation of methods used in field and laboratory studies. (Offered Summer Quarter only in alternate years, beginning 1962, at Friday Harbor Laboratories.) Prerequisite, permission.
- 535 Advanced Plankton Ecology (3)** Banse
Factors controlling the distribution, abundance, and production of plankton organisms, with a consideration of recent methods of sampling and analysis. Prerequisite, permission.

536 Benthos Ecology (3)	Banse
Quantitative consideration of the population of the sea-bed. Discussion of modern methods of sampling and analysis. Factors affecting production. Prerequisite, permission.	
551 Seminar in Geological Oceanography (*, maximum 9)	Creager
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite, permission.	
553 Research Techniques in Marine Geology (3)	Creager
Planning field programs; selection of equipment and survey procedures; collection, analysis, compilation, and presentation of bathymetric and sediment data; evaluation of techniques and results. Prerequisites, 405 and 453.	
555, 556 Advanced Marine Geology (3,3)	Creager
Contemporary problems in marine geology; concepts supporting or at variance with the accepted hypotheses; discussion of recent advances. Prerequisite, 553.	
600 Research (*)	Staff
700 Thesis (*)	Staff

PHILOSOPHY

Executive Officer: ARTHUR F. SMULLYAN, 264 Savery Hall

The Department of Philosophy offers courses leading to the degrees of Master of Arts and Doctor of Philosophy.

MASTER OF ARTS. The Department requires the candidate to take a written general qualifying examination, of three hours' duration, to test the student's fitness for candidacy for the M.A. degree. This examination should be taken as early as possible and no later than the first quarter of the second year of graduate study.

Only after qualifying for candidacy by passing the General Examination may the student register for thesis credit and thus formally undertake work on his dissertation as a candidate for the M.A. degree.

Residence and credit requirements include a full year of residence, 9 credits per quarter plus 9 thesis credits (36 credits). In addition to the 9 thesis credits, 9 others must be in 500-level courses.

The candidate is required to write a thesis acceptable to his committee, and must pass a final oral examination on his thesis.

DOCTOR OF PHILOSOPHY. Candidates are required by the Department to pass four General Examinations covering the fields of logic, history of philosophy, metaphysics and epistemology, and ethics. The candidate is expected to have taken courses and seminars in these fields and his program must be approved by his Supervisory Committee. In addition, he must prepare an acceptable dissertation and pass the oral Final Examination on it.

COURSES

320 History of Ancient Philosophy (5)	Keyt
321 History of Medieval Philosophy (5)	Boler
322 History of Modern Philosophy (5)	Staff
325 History of Nineteenth-Century Philosophy (5) (Not offered 1961-62.)	Staff
326 History of Recent Philosophy (5)	Staff
347 Philosophy in Literature (5)	Staff
410 Social Philosophy (5)	Rader
424 Recent American Philosophy (3)	Staff
428 Chinese Philosophy (5)	Shih
429 Neo-Confucianism (5)	Shih
431 Philosophy of Plato (3) (Not offered 1961-62.)	Keyt
433 Philosophy of Aristotle (3)	Keyt
436 British Empiricism (3) (Not offered 1961-62.)	Melden

437	Philosophy of Hume (3) (Not offered 1961-62.)	Melden
438	Philosophy of Kant (3) (Not offered 1961-62.)	Dietrichson, Smullyan
440	Advanced Ethics (3)	Melden
445	Philosophy of Art (5)	Rader
448	Philosophy in Nineteenth-Century Literature (5)	Rader
450	Epistemology (3)	Smullyan
453	Semantics (5)	Staff
456	Metaphysics (5)	Dietrichson, Smullyan
460	Introduction to the Philosophy of Science (5) (Not offered 1961-62.)	Staff
463	Philosophy of Mind (3) (Not offered 1961-62.)	Melden
465	Philosophy of History (5)	Rader
467	Philosophy of Religion (5) (Not offered 1961-62.)	Dietrichson
469	Existentialist Philosophy (3) (Not offered 1961-62.)	Dietrichson
470	Advanced Logic (5)	Keyt, Smullyan
480	Philosophical Studies (2, maximum 4) (Selected honors students only.)	Staff
484	Reading in Philosophy (1-4, maximum 12) Prerequisite, permission of Executive Officer.	Staff
490	Philosophy of Leibniz (3) (Not offered 1961-62.)	Melden
491	Philosophy of Spinoza (3)	Staff
520	Seminar in Ancient Philosophy (2, maximum 8) (Not offered 1961-62.)	Keyt
522	Seminar in Modern Philosophy (2, maximum 8)	Staff
526	Seminar in Recent Philosophy (2, maximum 8)	Staff
540	Seminar in Ethics (2, maximum 8)	Melden
545	Seminar in Philosophy of Art (2, maximum 8)	Rader

PHYSICAL AND HEALTH EDUCATION

Executive Officer for Women: RUTH M. WILSON, 105 Hutchinson Hall

Executive Officer for Men: R. K. CUTLER, 210 Edmundson Pavilion

The School of Physical and Health Education offers courses leading to the degrees of Master of Science and Master of Science in Physical Education. Candidates for the degree of Doctor of Philosophy in other departments may obtain a minor in physical education.

The master's degree programs aim to prepare personnel who will contribute to the further growth of their profession through development and refinement of concepts and philosophy, participation in research, leadership of colleagues, and

stimulation of their future teacher-education and recreational-leadership students. These programs aim to inspire students to question objectively and to search for basic answers through scientific processes. Specifically, the objectives are to provide situations and experiences which stimulate the development of an inquiring mind, critical thinking, increased skill in effective oral and written expression; to provide a background for clear interpretation and intelligent application of research literature; to promote increased understanding of basic concepts, current philosophies, and major issues and trends in the fields of physical education, health education, and recreation.

There is no foreign language requirement for the Master of Science in Physical Education.

Candidates for the master's degrees or a doctor's degree with a minor in physical education must have completed essentially the same program of study as outlined in one of the undergraduate curricula.

All candidates must meet the Graduate School's general requirement for course work and a thesis. Additional requirements will be determined in conference with the Departmental adviser. At least 22 credits, including the thesis, must be in courses numbered 500 and above.

A total of not less than 41 credits for men, including thesis, must be presented. A minimum of 6 credits for women, 5 for men, must be in Physical Education 600.

For a minor in physical education for the master's degree, the candidate must present a minimum of 26 preparatory credits in physical education, one course in physiology, and at least 12 credits in advanced courses.

COURSES

PROFESSIONAL AREAS

HEALTH EDUCATION

429	Methods in Teaching First Aid and Safety (Men and Women) (3)	Reeves
451	Workshop in Health Education for the Classroom Teacher (Men and Women) (2½)	Staff
	(Offered Summer Quarter only.)	
453	Methods and Materials in Health Teaching (Men and Women) (3)	Staff
465	School Environmental Health Programs (Men and Women) (3)	Mills, Reeves
503	Seminar in Health Education (Men and Women) (3)	Staff
	Prerequisites, 453, 465, and Physical Education 345.	
508	Administration of the School Health Program (Men) (3)	Reeves
	Prerequisites, 291, 465, Preventive Medicine 461 or equivalent, or permission.	
600	Research (Men and Women) (2-5)	Staff
700	Thesis (Men and Women) (*)	Staff

PHYSICAL EDUCATION

322	Kinesiology (Men and Women) (3)	Cutler
340	Administration of Intramural Sports (Men) (3)	Stevens, Staff
345	Principles of Physical Education (Men and Women) (3)	Torney
351	Theatre Dance (Men and Women) (2)	de Vries
355	Modern Dance Workshop (Men and Women) (2, maximum 6)	de Vries
435	Adapted Physical Education (Men) (3)	Cutler
435	Adapted Activities (Women) (3)	Kidwell
447	Tests and Measurements (Men and Women) (3)	Cutler
450	The School Physical Education Program (Men and Women) (men, 3; women, 2)	Peek, Wilson
459-460	Dance Production (Women) (2-2)	de Vries
N466	Coaching (Women) (0)	Kidwell, Staff
478	Workshop in Elementary School Physical Education (Men and Women) (2½)	Horne
	(Offered Summer Quarter only.)	
480	Principles of Movement (Women) (3)	Broer, Fox

- 493 Problems in Athletics (Men) (3)** Torney
- 495 Fitness Workshop (Men and Women) (3)** Fox
(Offered Summer Quarter only.)
- 501 Seminar in Physical Education (Men and Women) (3)** Broer, Torney, Wilson
Prerequisites, 345 and 450.
- 502 Problems in Physical Education (Men and Women) (2½)** Wilson, Staff
(Offered Summer Quarter only.) Prerequisites, 345 and 450, or permission.
- 506 The Curriculum (Men and Women) (3)** Kunde
Selection and organization of program content in relation to characteristics and needs of pupils and local conditions. Prerequisite, 345 or permission.
- 507 Supervision in Physical Education (Men) (2½)** Peek
(Offered Summer Quarter only.) Prerequisites, 345 and 450, or permission.
- 547 Seminar in Research Procedures (Men and Women) (3)** Broer, Fox
Prerequisites, 447 and Mathematics 281, or equivalent.
- 580 Seminar in Human Performance (Women) (3)** Broer, Staff
(Offered Summer Quarter only.) Prerequisites, Physical Education 322, 380, or permission.
- 600 Research (Men and Women) (2-5)** Staff
- 700 Thesis (Men and Women) (*)** Staff

RECREATION EDUCATION

- 344 Organization and Administration of Camp Programs (Men and Women) (3)** Kunde, Stallings
- 426 Field Work in Recreation (Women) (5)** Kidwell
- 454 Recreation Field Work (Men) (3)** Kunde
- 504 Administration of Recreation (Men and Women) (5)** Kunde
Prerequisites, 324, and Physical Education 345, or permission.
- 524 Seminar in Community Resources and Organization for Recreation (Men and Women) (3)** Kunde
Functional analysis of integrated community resources and organization for recreation services. Experience in recreation fact finding and evaluation. Study of pertinent problems and needs in the field. Prerequisite, permission.
- 600 Research (Men and Women) (2-5)** Staff
- 700 Thesis (Men and Women) (*)** Staff

PHYSICS

Executive Officer: RONALD GEBALLE, 215 Physics Hall

The Department of Physics offers programs leading to the degrees of Master of Science and Doctor of Philosophy. Specific departmental requirements are described briefly below. More complete information can be obtained by writing to the Department.

Undergraduate preparation is expected to include upper-division courses in electricity and magnetism, mechanics, the properties of matter, advanced calculus and mathematical physics, atomic physics, and nuclear physics. Deficiencies may cause a delay of as much as a year. A reading knowledge of German, French, or Russian is desirable.

Candidates for advanced degrees in Physics are expected to pass certain examinations as part of the departmental degree requirements. The first, a written preliminary examination, is designed to assess the student's knowledge and understanding of the material normally included in an undergraduate program with a major in physics. Ordinarily, a student is expected to take the preliminary examination during his first year of regular graduate study at this University. It is given during the Winter Quarter each year. No student is permitted to take the preliminary examination more than two times without special departmental approval.

MASTER OF SCIENCE. A minimum of 36 approved credits must be submitted, of which 18 must be in courses numbered 500 or above. These 18 credits must include a minimum of 3 credits in Physics 520 or Physics 600 (both courses require the sponsorship of an instructor), and a minimum of 12 credits in other physics graduate courses. No thesis is required. Candidates for the degree of

Master of Science must pass a final examination, usually oral. No student is permitted to take the final examination who has not been approved for it following the preliminary examination. Reading proficiency in a foreign language must be demonstrated by examination. Russian, French, and German are suitable for this purpose.

Students in other fields desiring a minor in physics for a master's degree must submit 9 credits in courses numbered 300 or above and 9 credits in courses numbered 400 or above.

DOCTOR OF PHILOSOPHY. The Department requires preparation equivalent to the courses 505, 506, 509, 510, 511, 513, 514, 515, 517, 518, 519, 524, 525, and 528, as well as Mathematics 527 (Elements of Real Variables for Scientists), 528, and 529 (Hilbert Space Operators and Applications). Additional courses of interest will be selected by the student and his Supervisory Committee. Reading proficiency in two foreign languages must be demonstrated by examination. Russian, French, and German are suitable for this purpose.

In addition to the preliminary examination, candidates for the degree of Doctor of Philosophy must pass successively, a written qualifying examination, a General Examination for admission to candidacy, and a Final Examination. No student is permitted to take the qualifying examination who has not been approved for it subsequent to the preliminary examination. A student in the program leading to the Ph.D. is expected to take the qualifying examination in his second year of regular graduate study. The qualifying examination is given once each Autumn and Spring Quarter. It is designed to assess the depth of the student's knowledge of the principle branches of physics.

In the oral General Examination the student is examined on topics related to the general area of physics in which he plans to do his thesis research. No student who has not passed the qualifying examination is permitted to take the General Examination, and ordinarily not until he has been accepted by a member of the staff as a research student. A student is expected to take the General Examination as soon as possible after passing the qualifying examination, usually early in his third year of regular graduate study. Passing the General Examination constitutes admission to candidacy for the Ph.D.

Each student bears responsibility for being informed of the dates on which the examinations are offered and for planning his own program so that he can take the various examinations at appropriate times.

A candidate for this degree is required to conduct an original and independent investigation in one of the fields of physics. Results of this research are submitted as a thesis. In his Final Examination, the candidate presents these results orally to the Department and is examined in his field of research.

A minor for a doctor's degree requires the equivalent of a bachelor's degree in physics and three graduate courses.

COURSES

320	Introduction to Modern Physics (3)	Staff
323	Introduction to Nuclear Physics (3)	Staff
325, 326, 327	Electricity and Magnetism (3,3,4)	Staff
367, 368, 369	Special Problems (*,*,*)	Staff
371, 372	Properties of Matter (3,3)	Staff
461, 462, 463	Introduction to Atomic and Nuclear Physics (3,3,3)	Staff
471, 472, 473	Atomic and Nuclear Physics Laboratory (3,3,3)	Staff
481, 482, 483	Introduction to Mathematical Physics (3,3,3)	Staff

Graduate courses numbered to and including 528, as well as 558, 560, 561, 566, 568, and 570, are given each year. Others are given intermittently, depending on demand; in most cases this means once every two years. Further information may be obtained from the Department of Physics or the current Yearly Time Schedule.

- 505, 506 Advanced Mechanics (3,3)** **Staff**
Dynamics of a particle; generalized coordinates and Lagrange's equations; variational principles and Hamilton's equations; kinematics and dynamics of rigid body motion; special relativity; canonical transformations and Hamilton-Jacobi theory; coupled small oscillations and normal coordinates.
- 509, 510, 511 Atomic, Molecular, and Nuclear Structure (2,2,2)** **Staff**
Introduction to quantum theory and application of quantum mechanics to problems in atomic, molecular, and nuclear structure. This course should be particularly appropriate to graduate students in other areas of science and engineering who wish to acquire some understanding of modern physics.
- 513, 514, 515 Electricity and Magnetism (4,4,4)** **Staff**
Properties of electric and magnetic fields in free space and material media; boundary value problems; radiation from accelerated charges and electromagnetic waves; relativistic formulation of electrodynamics.
- 517, 518, 519 Quantum Mechanics (4,4,3)** **Staff**
Physical and historical basis for quantum theory; solutions of the Schrödinger wave equation for discrete and continuous energy eigenvalues; representation of physical variables as operators and matrix formulation of quantum mechanics; spin angular momentum and identical particles; approximation methods; relativistic wave equations; and quantization of fields.
- 520 Seminar (1-2)** **Staff**
Seminars in the following subjects meet regularly: high energy physics, gaseous conduction studies and optical spectroscopy, magnetic resonance phenomena, nuclear, low temperature, and theoretical physics. Prerequisite, permission.
- 524, 545 Thermodynamics and Statistical Mechanics (3,3)** **Staff**
Thermodynamics and Statistical Mechanics. Statistical mechanical basis for the fundamental thermodynamical laws and concepts; applications of thermodynamic reasoning to selected physical problems; classical statistical distribution functions; quantum statistical mechanics. Prerequisite, 517 or concurrent registration in 517.
- 528 Current Problems of Physics (2)** **Staff**
Discussion of research topics which are currently being investigated within the department; detailed study of at least one research problem.
- 552 Conduction Through Gases (3)** **Staff**
Prerequisite, 509.
- 558 High Energy Physics (3)** **Staff**
Prerequisite, 560.
- 560, 561 Theoretical Nuclear Physics (3,3)** **Staff**
Prerequisites, 510 and 518.
- 562 Theory of Spectra (3)** **Staff**
Prerequisites, 509 and 518.
- 564 Relativity (3)** **Staff**
Prerequisites, 506 and 515.
- 566 Topics in Advanced Quantum Mechanics (3)** **Staff**
Prerequisite, 518.
- 568 Theory of Solids (3)** **Staff**
Prerequisite, 518.
- 570 Quantum Field Theory (3)** **Staff**
Prerequisite, 519.
- 574 Atomic and Molecular Collisions (3)** **Staff**
- 576 Selected Topics in Experimental Physics (*, maximum 6)** **Staff**
Prerequisite, permission.
- 578 Selected Topics in Theoretical Physics (*, maximum 6)** **Staff**
Prerequisite, permission.
- 600 Research (*)** **Staff**
Research currently is in progress in the following fields: acoustics, high energy physics, gaseous electronics, low temperature physics, magnetic resonance phenomena, natural radioactivity, nuclear physics, solid state physics, spectroscopy, and theoretical physics. Prerequisite, permission.
- 700 Thesis (*)** **Staff**
Prerequisite, permission.
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

POLITICAL SCIENCE

Executive Officer: HUGH ALVIN BONE, 206 Smith Hall

The Department of Political Science offers courses leading to the degrees of Master of Arts and Doctor of Philosophy. Candidates for these degrees must have completed an undergraduate major or the equivalent in political science.

Candidates must acquire mastery of a field of concentration in which the doctoral thesis is prepared and of additional supporting fields. The following fields may be used for both purposes: political theory; international law and relations; comparative government; public law; public administration; American government and politics; and state and local government. Combinations of some of the above fields may be required.

Candidates may be permitted to substitute special regional fields for any of the above general fields under the conditions set forth below. But if this is done, comparative government may not be offered as well. Candidates are also encouraged to minor, or offer supporting courses, in other social sciences such as history, economics, sociology, psychology, or geography.

The field of political theory is required in all programs, and courses 511, 512, and 513 are normally required. Not less than two thirds of the minimum credits required for the degree must consist of those earned in courses numbered 500 or above.

MASTER OF ARTS. A total of 36 credits in individually approved programs is required. The candidate must also submit an essay of distinction and pass a comprehensive examination on the content of a major and two minor fields.

If the candidate is permitted to adopt Far Eastern or Russian political science as a field of concentration, he must have a reading knowledge of the appropriate foreign language, and both of his supporting fields must be in general political science.

DOCTOR OF PHILOSOPHY. A minimum of 108 credits is required, including 27 allowed for the thesis. The candidate must present a field of concentration and four supporting fields.

If the candidate is permitted to adopt Far Eastern or Russian political science as a field of concentration, he may also present a related field of regional studies as one of his supporting fields.

COURSES

POLITICAL THEORY AND PUBLIC LAW

311 Theories of Modern Government (5)	Harbold
362 Introduction to Public Law (5)	Danelski
411 The Western Tradition of Political Thought (5)	Harbold
412 American Political Thought (5)	Harbold
413 Contemporary Political Thought (5)	Harbold
414 Oriental Political Thought (5) (Offered alternate years; offered 1961-62.)	Hsiao
415 Analytical Political Theory (5)	Cassinelli
460 Introduction to Constitutional Law (5)	Cole, Danelski
461 The Courts and Civil Liberty (5)	Cole
511, 512, 513 Seminar in Readings in Political Science (3,3,3) Important writings of the masters in political science; the political classics.	Cole, Danelski
514 Seminar in Problems of Political Theory (3) Selected topics, historical and conceptual, national, regional, and universal.	Harbold
515 Scope and Methods in Political Science (3) Inquiry into the philosophic foundations of various approaches in political science and their possible contributions to an understanding of politics. Substantial background in philosophy, as well as in political science, is highly desirable.	Harbold
562, 563, 564 Public Law (3,3,3) General legal concepts applicable to the conduct of governmental activities.	Cole

GOVERNMENT, POLITICS, AND ADMINISTRATION

350 Government and Interest Groups (5)	Gottfried
351 The American Democracy (5)	Gottfried
353 Theory and Practice of Government in the State of Washington (3)	Warren
360 The American Constitutional System (3)	Webster

- 370 Government and the American Economy (5) Gottfried
- 375 Problems of Municipal Government and Administration (5) Webster
- 376 State and Local Government and Administration (5) Warren
- 450 Political Parties and Elections (5) Bone
- 451 The Legislative Process (5) Bone
- 452 Political Processes and Public Opinion (5) Kessel
- 470 Introduction to Public Administration (5) Kroll, Warren
- 471 Administrative Management (5) Kroll
- 472 Introduction to Administrative Law (5) Danelski, Shipman
- 473 Comparative Administrative Systems (5) Kroll
- 480 Metropolitan Area Government (5) Warren
- 550, 551, 552 Seminar in Politics (3,3,3) Gottfried
Topical and regional studies of political associations in the United States; leading principles and motivations of political action and leadership; legislative processes; methodology and bibliography.
- 570-571-572 The Administrative Process (3-3-3) Kroll
An analysis of the administrative process relying primarily upon case materials and emphasizing policy formation, organization behavior, the nature of administrative roles, and the mechanism of responsibility.
- 573-574-575 Public Management (3-3-3) Shipman
Expression of public policy through program activity, program planning, programming and scheduling, budgeting, staffing, fiscal and other operating controls, evaluations of effectiveness. Prerequisite, admission to graduate curriculum in public administration, or permission.
- 576-577-578 Administrative Problems (3-3-3) Shipman
Methods employed in the analysis of administrative problems, programs, organization, process, procedure, and staffing; the design of organizations and operations. Prerequisite, admission to graduate curriculum in public administration.
- 580, 581, 582 Seminar in Metropolitan and Urban Planning Problems (3,3,3) Webster
The metropolitan community: nature, characteristics, functions, governmental structure, and intergovernmental relationships. Urban planning: theory; law and administration, policy determination, and public relations. Methods and devices for plan implementation. Drafting local ordinances for planning, zoning, subdivision control, and urban renewal.

INTERNATIONAL LAW, ORGANIZATION, AND RELATIONS

- 321 American Foreign Policy (3) Gottfried
- 322 The Foreign Service (3) Riley
- 323 International Relations of the Western Hemisphere (5) Mander
- 324 Contemporary International Relations in Europe (5) Hitchner
- 328 The United Nations and Specialized Agencies (5) Mander
- 335J Japanese Foreign Policy in Asia (3) Maki
Offered jointly with the Far Eastern and Russian Institute.
- 336 National Power and International Politics (5) Martin
- 420 Foreign Relations of the Soviet Union (5) Reshetar
- 425-426 International Law (3-3) Martin
- 427 International Government and Administration (5) Hitchner
- 429 International Relations in the Far East (5) Maki
- 430 International Relations in the Middle and Near East (5) Mander
- 432 American Foreign Policy in the Far East (5) Michael, Taylor
- 520J Seminar on the Foreign Policy of the Soviet Union (3) Reshetar
Offered jointly with the Far Eastern and Russian Institute. Prerequisite, permission.
- 521 Seminar in the Theory of International Relations (3) Mander
The principal theories underlying interstate relations; the sovereign state as a unit in the community of states; the theory of the state and the theory of the society of nations.
- 522, 523, 524 International Government and Organization (3,3,3) Mander
Constitutional organization and administrative procedures, with particular reference to the United Nations, specialized agencies, and other recent developments.
- 525, 526, 527 Seminar in Foreign Policy (3,3,3) Martin
The European states system; foreign policies of the major European powers; alliances and the balance of power; leading principles of American foreign policy; current problems in American diplomacy; international practice and procedure: international conferences; foreign offices.

- 530 Seminar in Regional Foreign Policy (3)** **Mander**
Regionalism in the world order and economy; the "region" as a basis of foreign policy; foreign interests and policies of the major regions of the world; the U.S.S.R., Central Europe, Western Europe, the British Empire, the Middle and Near East, the Far East, and Latin America.

FOREIGN AND COMPARATIVE GOVERNMENT

- 343 Modern British Government (5)** **Cassinelli, Hitchner**
344 Chinese Government (5) **Michael**
(Offered alternate years; offered 1961-62.)
345J Japanese Government (3) **Maki**
Offered jointly with the Far Eastern and Russian Institute.
346 Governments of Western Europe (5) **Cassinelli, Hitchner**
347 Governments of Eastern Europe (5) **Reshetar**
441 Political Institutions of the Soviet Union (5) **Reshetar**
445 Comparative Political Institutions (5) **Hitchner, Martin**
541J The Soviet Political System (4) **Reshetar**
Critical appraisal of the principal research methods, theories, and types of literature dealing with the government and politics of the Soviet Union. Offered jointly with the Far Eastern and Russian Institute. Prerequisite, permission.
542 Seminar in Commonwealth Governments (3) **Mander**
Analysis of the governments of Canada, Australia, and New Zealand; their relations with the United Kingdom.
543 Seminar in British Government (3) **Hitchner**
Advanced studies in British parliamentary government.
545J Seminar on Japanese Government and Diplomacy (3, maximum 6) **Maki**
Offered jointly with the Far Eastern and Russian Institute.

GENERAL

- 506, 507, 508 Contemporary Problems, Domestic and Foreign (3,3,3)** **Martin**
600 Research (*) **Staff**
700 Thesis (*) **Staff**

PSYCHOLOGY

Acting Executive Officer: GEORGE P. HORTON, M40 Denny Hall

The Department of Psychology offers courses leading to the degrees of Master of Science and Doctor of Philosophy. The Department also offers jointly with the Department of Physiology and Biophysics a degree of Doctor of Philosophy.

The Department offers general and specialized courses, seminars, practica, and research opportunities in the major areas of psychology. The Department believes that general training in psychology should precede specialization.

Applicants who wish to undertake graduate study leading to an advanced degree in psychology must satisfy admission requirements of the Department of Psychology as well as those of the Graduate School. Supplementary application materials will be mailed to the applicant by the departmental Committee on Selection.

The Miller Analogies Test is required for admission to the graduate program. Arrangements for taking the test may be made through the Psychological Corporation, 304 East 45th Street, New York 17, N. Y., or through a local center certified to give the test.

The applicant to the graduate program should have a bachelor's or master's degree, courses in psychology, an academic preparation regarded as adequate by the Selection Committee, and favorable ratings by former teachers. As a general rule, the applicant should have maintained a 3.00 grade-point average in the senior year and in all graduate work completed. The type of supplementary academic preparation regarded as particularly desirable includes courses in mathematics, biology, chemistry, physics, and foreign languages (particularly French and German).

MASTER OF SCIENCE. A minimum of 27 approved course credits (major and minor) is required, with combined thesis, research, and course credits totaling at

least 36 credits. In his undergraduate and graduate work, the master's candidate must have completed the courses which in this bulletin are numbered 301, 400, 413, 514-515, 520, and additional courses assuring a general background in psychology. Reading knowledge of one foreign language (preferably French or German) is required. The student is expected to present a thesis, the general nature and design of which will be decided upon by the student and his sponsor during the second or third quarter in residence. Oral examination by the candidate's thesis committee over the thesis and any additional topics the committee feels to be desirable will be arranged approximately three weeks before the end of the quarter in which the candidate expects to receive his degree.

DOCTOR OF PHILOSOPHY. The student is normally required to complete the master's degree before being admitted to further work leading toward the doctorate. Permission to continue beyond the master's degree will depend upon the quality of the course work and of the thesis leading to that degree.

Reading knowledge of two foreign languages (preferably French and German) is required and both language examinations must be passed before the time of writing the General Examination. Substitution of one or both of these languages must be approved by the Dean of the Graduate School. The candidate is expected to present a dissertation, the general nature and design of which will be decided upon by the student and his sponsor. The candidate's Supervisory Committee will have the responsibility of arranging the Final Examination (oral) covering the dissertation and related material in his major and minor field(s). Candidates must meet all general requirements of the Graduate School and the Department before taking the Final Examinations.

The General Examination for Ph.D. candidates will be designed to evaluate not only the student's knowledge of psychology but also his critical ability and his facility and effectiveness in utilizing the concepts, methods, and procedures of the field, and will cover both the more general systematic background and the student's more special areas of interest. This examination will be given at the end of two years of full-time graduate work approved by the Department, and after the candidate has passed two of the required foreign languages.

MINORS FOR ADVANCED DEGREES IN PSYCHOLOGY. Depending upon the student's program, orientation, and recommendations by his sponsor or adviser, any of the following subject areas may constitute minors for advanced degrees: physiology, sociology, economics, anthropology, speech, mathematics, zoology, philosophy, or education. Special petition will be required for a minor in other areas. The student is expected to obtain a written statement of the requirements as they pertain to his program from the department in which he intends to minor.

MINOR IN PSYCHOLOGY. Graduate students desiring to minor in psychology are expected to have as a prerequisite at least 20 credits in psychology, including statistical methods, as preparation before credit will be given toward a minor in this field. The minor for the master's degree will consist of 12 credits (in addition to the 20 mentioned above). The candidate must present his program for approval by the Department. No examination will be required if the candidate has maintained a grade-point average of 3.00 or better in the minor field.

A minor for the Ph.D. degree will consist of 20 approved credits beyond the requirements for the M.S.

Any specific information not covered here may be obtained by writing directly to the Department of Psychology.

- 414, 415 Thinking and Problem Solving (3,3)** Culbert, McKeever
- 416 Animal Behavior (3)** Horton
- 421 The Neural Basis of Behavior (5)** Woodburne
- 422 Physiological Psychology (5)** Loucks
- 423 Sensory Basis of Behavior (5)** Horton
- 426 Animal Laboratory (5)** Smith
- 427 Conditioning (5)** Loucks
- 435 Applied Experimental Psychology (3)** Culbert, Horton
- 441 Perception (5)** Culbert
- 445 Theories of Social Psychology (5)** Stotland
- 446 Objective Assessment of Personality (3)** Edwards
- 447 Psychology of Language (5)** Culbert
- 449 Psychology of Social Movements (3)** Stotland
- 450 Techniques in Social Psychology (5)** Stotland
- 451 Laboratory in Social Psychology (5)** Stotland
- 462 Readings in Psychology (1-3, maximum 9)** Staff
- 484 Laboratory in Child Behavior (5)** Baer, Birnbrauer
- 490 The Development of Behavior (5)** Baer
- 501 Problems in Learning Theory (3)** McKeever
Selected topics in the interpretation and evaluation of current theories of learning. Prerequisite, permission.
- 507 History of Psychology (5)** Esper
Experimental and theoretical backgrounds of modern psychology, especially in the nineteenth century. Prerequisite, permission.
- 509 Problems in Developmental Psychology (5)** Baer, Bijou
A critical analysis of current theoretical problems, of approaches to theory formulation, and a review of some typical pieces of research in the field of child behavior and personality development. Prerequisites, 306 or 308, 490, and permission.
- 514-515 Experimental Design (3-3)** Edwards
The nature of research and experimentation in psychology. Experimental techniques and controls. The use of randomization. Tests of technique. The analysis of variance and the design of experiments. Repeated measurements designs. Trend analysis. Models for testing hypotheses. The interpretation of research results. Prerequisites, 301 and permission.
- 516 Introduction to Multivariate Psychological Measurement (5)** Horst
Special quantitative techniques essential to understanding of multivariate psychological measurement theory. Elementary principles of matrix algebra basic to this theory and efficient computational routines are emphasized. (Offered alternate years; offered 1962-63.) Prerequisites, 301 and 413, or permission.

- 517 Factor Analysis (5)** **Horst**
Mathematical and theoretical foundations; alternative methods of analysis; computational procedures; applications to psychological problems. (Offered alternate years; offered 1962-63.) Prerequisite, 516 or permission.
- 518 Test Construction (5)** **Horst**
Correlational analysis; statistical bases of test construction and of the use of test batteries; practice in test construction. (Offered alternate years; offered 1962-63.) Prerequisite, 517 or permission.
- 520 Seminar (2)** **Staff**
May be repeated for credit. Prerequisite, permission.
- 523 Seminar in the History of Psychology (2)** **Esper**
May be repeated for credit. Prerequisite, permission.
- 524 Seminar in Physiological Psychology (2)** **Horton, Loucks**
May be repeated for credit. Prerequisite, permission.
- 525 Seminar in Genetic and Comparative Psychology (2)** **Horton**
May be repeated for credit. Prerequisite, permission.
- 527 Seminar in Social Psychology (2)** **Edwards, Stotland**
May be repeated for credit. Prerequisite, permission.
- 528 Seminar in Experimental Psychology (2)** **Hermans**
May be repeated for credit. Prerequisite, permission.
- 529 Seminar in Clinical Psychology (2)** **Bijou, Sarason, Strother**
May be repeated for credit. Prerequisite, permission.
- 530 Seminar in Theory (2)** **Staff**
May be repeated for credit. Prerequisite, permission.
- 531 Seminar in Learning and Motivation (2)** **Staff**
May be repeated for credit. Prerequisite, permission.
- 544-545 Psychology of Social Attitudes (3-3)** **Edwards**
Theory and techniques of attitude-scale construction; scaling by the methods of equal-appearing intervals and of summated ratings; scale analysis; applications of attitude scales in education, industry, and the social sciences; determinants of attitudes and experimental studies of attitude change. (Not offered 1961-62.) Prerequisite, 301 or permission.
- 581 Individual Testing (Children) (5)** **Staff**
Construction, administration, and scoring of individual mental tests used with children. Prerequisites, 306 or 308, 413, and permission.
- 582 Individual Testing (Adults) (5)** **Staff**
Construction, administration, and scoring of clinical psychological tests used with adults. Prerequisites, 305, 413, 581, and permission.
- 585 Experimental Problems in Clinical Psychology (5)** **Bijou, Birnbrauer**
Analysis of research and theories of concepts and processes in deviant behavior. Prerequisite, permission.
- 587 Advanced Personality Theory (3)** **Sarason**
The theories of personality development relating to the psychodynamics of personality organization. Prerequisites, 405 and permission.
- 588 Psychopathology (3)** **Strother**
Selected topics in psychopathology. Prerequisite, 587 or permission.
- 589 Theories and Systems of Psychotherapy (3)** **Strother**
A review of some of the principal theories and systems of psychotherapy. Prerequisite, 588 or permission.
- 591 Projective Personality Tests (3)** **Sarason**
Theory of projective tests; practice in scoring and interpreting projective tests with emphasis on the Rorschach. Prerequisites, 581, 582, or permission.
- 592 Projective Personality Tests (3)** **Sarason**
Introduction to administration, analysis, and interpretation of the Thematic Apperception Test and other projective personality tests. Prerequisites, 591 and permission.
- 593 Projective Personality Test Research (3)** **Sarason**
Review of research literature relevant to projective personality tests; experimental problems in application of projective techniques to the field of personality. Prerequisites, 591, 592, and permission.
- 596 Field Work in Clinical Psychology (3-5, maximum 36)** **Staff**
Field training in clinics and institutions for students of clinical psychology. May be repeated for credit. Prerequisite, permission.
A. Clerkship in child testing B. Clerkship in adult testing C. Externship
- 599 Survey of Clinical Psychometrics (2)** **Strother**
The nature, development, and clinical application of psychological tests. Prerequisites, permission and registration in the School of Social Work.
- 600 Research (*)** **Staff**
The name of the staff member with whom nonthesis research will be done should be indicated in registration. Prerequisite, permission
- 700 Thesis (*)** **Staff**

ROMANCE LANGUAGES AND LITERATURE

Executive Officer: HOWARD L. NOSTRAND, 217 Denny Hall

The Department of Romance Languages and Literature offers courses leading to the degrees of Master of Arts and Doctor of Philosophy. A knowledge of Latin and an acquaintance with masterpieces of other literature are strongly recommended. The equivalent of an undergraduate major in Romance Languages is required for admission to candidacy for an advanced degree in the Department.

The student is responsible for knowing and meeting the general requirements of the Graduate School.

MASTER OF ARTS. This Department offers two thesis programs for the degree of Master of Arts, both designed for those who may subsequently want to become candidates for the degree of Doctor of Philosophy, and a nonthesis, terminal program for those who intend to teach in a school or junior college. The reading knowledge examination for the M.A. degree must be taken in a language other than the candidate's major language.

For the first of the thesis programs the Departmental requirements are: oral and written proficiency in the major language; at least 36 quarter credits in literature and linguistics, usually divided between a major and a minor subject (Romance 401 and 581 must be included, and half of the 36 credits must be in courses numbered 500 and above); a knowledge of representative literary works, such as those listed in syllabi obtainable from the Department (the M.A. and B.A. syllabi for an M.A. major, and the B.A. syllabus for an M.A. minor); a satisfactory thesis, to be submitted to the Department in completed form not less than four weeks before the date of the final examination.

The second of the thesis programs prepares the student to specialize in problems of foreign language learning and the 36 quarter credits of course work are designed to give competence in the following fields: oral and written proficiency in the major language; knowledge of representative literary works equivalent to an M.A. minor in either French or Spanish; familiarity with general and Romance linguistics; and a knowledge of educational principles and psychological forces affecting the development of language learning. The thesis requirement is the same as for the first program cited.

The nonthesis, terminal program for language teachers stresses linguistic proficiency and acquaintance with area and culture. Forty-five credits are required, including: French or Spanish 409; French or Spanish 541, 542, 543; Romance Linguistics 401 plus at least 2 credits from Romance Linguistics 505, 506, 507; French or Spanish 600, devoted to area studies (3-5 credits); qualifying essay (5 credits). The remainder of the 45 credits in this program will normally be taken from other courses offered by this Department, in accordance with the requirements of the Graduate School. Especially recommended are Romance 572J and 573J. The candidate should note the special requirements of the Graduate School for this degree, which will be found elsewhere in this Bulletin.

DOCTOR OF PHILOSOPHY. Two doctoral programs are offered. One is intended for students whose primary interest lies in language and literature, the other for those who wish to specialize in the training and supervision of language teachers and in research on language teaching. The M.A. degree is required as a prerequisite for the Ph.D. General Examination, unless an exception is voted by the Graduate Studies Committee. General requirements common to both of these programs are: candidates must be accepted by the Graduate Studies Committee of the Department; the student's adviser must present a course plan, as early as possible, to the Department's Graduate Studies Committee for approval; all candidates are expected to demonstrate near-native proficiency in the major Romance language; a satisfactory thesis must be submitted to the Chairman of the Supervisory Committee in completed form not less than six weeks before the date of the Final Examination; a reading knowledge of two foreign languages other than the

major is required (the languages are usually German and French or Spanish); prior to the General Examination, any candidate who has not written a master's thesis will be required to write, after consultation with his adviser, a critical paper designed to develop and demonstrate his capacity for research and criticism.

The program of studies for the Ph.D. degree with specialization in Romance languages and literature will require a minimum of 90 credits divided among the major, two minor fields, and any related topics for which the student may be held responsible. Whatever the combination of major and minors may be, every candidate will be examined on a minimum of one literary figure in French, Italian, and Spanish. The authors in Italian and Spanish will normally be Dante and Cervantes. The candidate will also be examined on Romance Linguistics in accordance with a syllabus obtainable from the Department. Minors outside the Department may be included in the 90 credits required. Further special requirements for this degree program are as follows:

1. **MAJOR FIELD.** The student's area of concentration is to be chosen from among the following fields: French literature, Spanish literature, (Peninsular and Spanish-American), Italian literature, and Romance linguistics.

2. **MINOR FIELDS.** Normally two minors, or supporting fields, are to be chosen by the student from among the following: French literature, Spanish literature (Peninsular and Spanish-American), Italian literature, Portuguese literature (Peninsular and Brazilian), and Romance linguistics. In the case of supporting literatures, the candidate is expected to acquire a knowledge of their historical development (using as a basis of study the works suggested in the departmental syllabi), as well as a more particular acquaintance with the works of one major author in each literature.

3. **RESEARCH METHODS.** Romance 581, Methodology and Bibliography of Research (2) is required of all candidates for the Ph.D.

4. **GENRE.** The student will be expected to demonstrate in the General Examination a thorough knowledge of one literary genre, usually in all the literatures embraced by his program and over a specified period of their history. The choice of genre and period must be approved by the student's adviser and the Graduate Studies Committee.

Special requirements for the Ph.D. candidate specializing in language teacher training and supervision include a minimum of 90 quarter credits in courses aimed at developing competence in the following fields:

1. **LITERATURE.** Candidates are expected to complete the equivalent of a Ph.D. minor in either French or Spanish literature, and consequently should have a knowledge of works such as those listed in the M.A. syllabus.

2. **LINGUISTICS.** Candidates will be expected to acquire command of current developments in linguistics, both theoretical and applied, and to demonstrate the ability to relate these principles to the analysis and teaching of French or Spanish. In addition to Romance 401, 505, 506, 507 and French or Spanish 541, 542, 543, courses in general linguistics are strongly recommended.

3. **EDUCATION AND PSYCHOLOGY OF LANGUAGE.** Candidates will be expected to acquire a knowledge of the methodology of language teaching, the application of psychological principles and the uses of experimentation, and tests and measurements in connection with the language learning process. The following courses are among those designed to develop this competence: Education 490, Educational Statistics (5); Psychology 447, Psychology of Language (5); and 514-515, Experimental Design (6).

4. **RESEARCH METHODS.** Romance 581, Methodology and Bibliography of Research (2) is required of all candidates for the Ph.D. In addition, candidates in this program are expected to acquire a knowledge of significant research and methods in the field of language teaching through participation in Romance 599, Research in Romance Linguistics (2-5, maximum 15).

COURSES

ROMANCE LINGUISTICS AND LITERATURE, GENERAL AND COMPARATIVE

- 401, 402 Introduction to Romance Linguistics (2,2)** **Dorfman**
Prerequisite, junior standing or equivalent of one year of Romance Language or Latin.
- 505, 506, 507 Romance Linguistics (2,2,2)** **Dorfman**
Principles of comparative linguistics; a brief history of the Romance languages and detailed investigation of their linguistic evolution.
- 521, 522, 523 Phonemic Analysis and Description (2,2,2)** **Dorfman**
Phonology as functional phonetics; brief history of the phoneme idea; comparison of the variant phonemic systems in the Romance languages and other linguistic structures; functional and structural analysis of linguistic expression.
- 531 Problems in Romance Linguistics (2-5, maximum 10)** **Staff**
- 572J, 573J Romance Language Teachers' Seminar (2½,2½)** **Simpson**
The teaching of foreign languages; conducted as a workshop. Opportunity for directed practice teaching of elementary and secondary school children. Offered jointly with the College of Education. (Offered Summer Quarter only.)
- 581, 582, 583 Methodology and Bibliography of Research (2,2,2)** **Nostrand, Weiner**
Bibliographical resources for Romance literatures; recurrent types of research problems and the accumulating methodology; standards of evidence; the evaluation and organization of evidence; the philosophies of literary history and its relation to bibliography and criticism.
- 584, 585, 586 Seminar in Romance Culture (3,3,3)** **Staff**
Individual and collective research in the evolution of concepts common to Romance literature. Open to graduates of this and other departments. (Offered 1961-62.)
- 590 Research in Comparative Romance Literature (2-5, maximum 20)** **Staff**
- 599 Research in Romance Linguistics (2-5, maximum 15)** **Staff**
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

CATALAN

- 535 Catalan Language and Literature (5)** **Simpson**
Survey of political and literary history of Catalonia. Reading and reports on modern Catalan literary works. (Offered when demand is sufficient.)

FRENCH

- 304, 305, 306 Survey of French Literature (5,5,5)** **Staff**
304: 1100-1680
305: 1680-1800
306: 1800-1960
- 390 Supervised Study (2-5, maximum 20)** **Staff**
- 409 Advanced Phonetics (3)** **Creore, Dorfman**
- 421, 424, 425, 426 Fiction (3,3,3,3)** **Simpson, Snyder, Weiner, C. Wilson**
421: Fiction, 1660-1800 (Offered Spring, 1962)
424: Fiction, 1800-1850 (Offered Summer, 1962)
425: Fiction, 1850-1900 (Offered Autumn, 1961)
426: Fiction, 1900-1950 (Offered Winter, 1963)
- 430 Advanced Conversational French (1-3, maximum 6)** **Hanzeli**
(Offered Summer Quarter only.)
- 431, 432, 433, 434 Poetry (3,3,3,3)** **Nostrand, Snyder, Weiner**
431: Poetry: Baroque (Offered Summer, 1962)
432: Poetry: Romantic Poetry (Offered Spring, 1963)
433: Parnassian and Symbolist Poetry (Offered Autumn, 1962)
434: Twentieth-Century Poetry (Offered Winter, 1962)
- 454, 455, 456, 457 Nonfiction (3,3,3,3)** **David, Hanzeli, Keller**
454: Nonfiction of the Classic Period (Offered Winter, 1964)
455: Eighteenth-Century Nonfiction (Offered Spring, 1963)
456: Nineteenth-Century Nonfiction (Offered Winter, 1962)
457: Twentieth-Century Nonfiction (Offered Autumn, 1962)
- 461, 462, 463, 464 Drama (3,3,3,3)** **Chessex, Creore, Hanzeli, Snyder**
461: Seventeenth-Century Drama (Offered Winter, 1963)
462: Eighteenth-Century Drama (Offered Spring, 1962)
463: Nineteenth-Century Drama (Offered Autumn, 1963)
464: Twentieth-Century Drama (Offered Autumn, 1961)
- 501 Studies in Renaissance Prose (5)** **Koller**
Rabelais and Montaigne. (Offered Autumn, 1963.)
- 502 Studies in Renaissance Poetry (5)** **Creore**
The Pléiade. (Offered Autumn, 1962.)

- 504 Contemporary French Literature (5)** **David**
Parties and schools of thought after World War I. Special emphasis will be laid on "intelligence" and related concepts such as the "heart" and "honor." (Offered Spring, 1962.)
- 513 Old French Literature (3)** **Simpson**
Literary backgrounds; reading and discussion of selected texts. (Offered Autumn, 1961.)
- 521 Studies in Fiction: 1660-1800 (3)** **Hanzeli**
Detailed investigation of the French novel and *conte philosophique* during the period 1680 to 1800. Diderot and his contemporaries, Marivaux, Prévost, Rousseau, Laclos, and Voltaire. (Offered Summer, 1965.)
- 524 Studies in Fiction: 1800-1850 (3)** **Staff**
Detailed investigation of the development of the French novel in the first half of the nineteenth century. Hugo, Balzac, Sand, and others. (Offered Winter, 1962.)
- 525 Studies in Fiction: 1850-1900 (3)** **Simpson**
Detailed investigation of the French novel in the second half of the nineteenth century, Flaubert, Zola, Bourget, and others. (Offered Autumn, 1962.)
- 526 Studies in Fiction: 1900-1950 (3)** **C. Wilson**
Detailed investigation of the French novel in the twentieth century. The works of Proust, Gide, Aymé, Camus, Sartre, and their contemporaries. (Offered Autumn, 1964.)
- 532 Studies in Nineteenth-Century Poetry (3)** **Snyder**
Research in the poetry of the Romantic period. Critical examination of the poetic works of Hugo, Lamartine, and Vigny. (Offered Spring, 1962.)
- 533 Studies in Parnassian and Symbolist Poetry (3)** **Nostrand**
Research in the poetry of the Parnassians and Symbolists. Critical examination of the poetry of Leconte de Lisle, Hérédia, Prudhomme, and Baudelaire. (Offered Summer, 1963.)
- 534 Studies in Twentieth-Century Poetry (3)** **Weiner**
Research in French poetry of the twentieth century. Critical examination of the poetry of René Char, Valéry, Artaud, Aragon, and others. (Offered Autumn, 1963.)
- 541, 542, 543 History of the French Language (2,2,2)** **Dorfman**
A survey of the phonological, morphological, and syntactical development of the French language from its origins to the present. (Offered alternate years; offered 1962-63.)
- 554 Studies in Seventeenth-Century Nonfiction (3)** **Keller**
Intensive investigation of critics and essayists of the seventeenth century. Detailed study of La Rochefoucauld, Descartes, Pascal, La Bruyère, and Mme de Sévigné. (Offered Summer, 1962.)
- 555 Studies in Eighteenth-Century Nonfiction (3)** **Hanzeli**
Intensive investigation of critics and essayists of the eighteenth century, such as Voltaire, Montesquieu, Rousseau, and Diderot. (Offered Summer, 1964.)
- 556 Studies in Nineteenth-Century Nonfiction (3)** **David**
Intensive investigation of critics and essayists of the nineteenth century, such as Madame de Staël, Chateaubriand, Sainte-Beuve, Tocqueville, Comte, Rinan, and Taine. (Offered Winter, 1963.)
- 557 Studies in Twentieth-Century Nonfiction (3)** **David**
Intensive investigation of such contemporary critics as Péguy, Maurras, Chartier, Guilton, Thibaudet, Maurier, and Valéry. (Offered Spring, 1964.)
- 561 Studies in Seventeenth-Century Drama (3)** **Keller**
Research in the drama of Racine, Corneille, or Molière. (Offered Winter, 1962.)
- 562 Studies in Eighteenth-Century Drama (3)** **Hanzeli**
Research in the drama of the eighteenth century as exemplified in the works of Marivaux, Crébillon, Voltaire, La Chaussée, and Diderot. (Offered Winter, 1965.)
- 563 Studies in Nineteenth-Century Drama (3)** **Croore**
Research in the drama of the nineteenth century as exemplified in the works of Hugo, Musset, Scriber, Augier, and Dumas fils. (Offered Spring, 1963.)
- 564 Studies in Twentieth-Century Drama (3)** **Chessex**
Research in the drama of the twentieth century as exemplified in the works of Brieux, Curiel, Lenormand, Anouilh, Matherland, Sartre, Cocteau, Giraudoux, Beckett, and Ionesco. (Offered Summer, 1962.)
- 575, 576 Literary Criticism (5,3)** **Nostrand, Weiner**
Major philosophies of criticism and their exponents. The influences which affected standards, purposes, and methodologies.
575: Nineteenth and early twentieth centuries. (Offered Spring, 1962.)
576: Twentieth century. (Offered Winter, 1963.)
- 580 Explication de Texte (3)** **David, Keller**
Close study of short pieces of French prose and poetry. The method consists of a literary analysis of the text from different viewpoints: biographical, historical, etc. Lectures, discussion, and student *explications*. (Offered Spring, 1963.)
- 590 Special Seminar and Conference (2-5, maximum 20)** **Staff**
Group seminars and conferences will be scheduled under this number to meet special needs. For individual conferences under this number, permission of the executive officer is required.
- 600 Research (2-5, maximum 20)** **Staff**
- 700 Thesis (*)** **Staff**

- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

ITALIAN

- 390 Supervised Study (2-5, maximum 20)** **Budel**
- 421, 422, 423 Survey of Italian Literature (3,3,3)** **Budel**
- 512, 513 Dante (3,3)** **Budel**
Dante and the *Dolce stil nuovo*: *La vita nuova*, *Le rime*. The Dante of the *Divina commedia*. Dante's literary aesthetics: *De vulgari eloquentia*, *Il convivio*. (Offered 1962-63.)
- 531 Literary Problems (2-5, maximum 20)** **Budel**
Field (see A-F, below) must be specified in registering. For individual conferences under this number (but not for group projects) permission of the Executive Officer is required.
A. Middle ages and fourteenth century D. Eighteenth century
B. Renaissance E. Nineteenth century
C. Baroque F. Twentieth century
- 541, 542, 543 History of the Italian Language (2,2,2)** **Budel, Dorfman**
A survey of the phonological, morphological, and syntactical development of the Italian language from its origins to the present. (Offered 1962-63.)
- 551, 552, 553 Seminar in Humanist and Renaissance Prose and Poetry (3,3,3)** **Budel**
551: Humanism and Early Renaissance: Pulci, Boccaccio, Poliziano, Lorenzo il Magnifico, Boiardo, Sannazaro, Marsilio Ficino, Pico della Mirandola. (Offered 1961-62.)
552: High Renaissance: Castiglione, Ariosto, Machiavelli, Folengo, Bembo, Trissino. (Offered 1961-62.)
553: Late Renaissance: Michelangelo, Tasso, Bandello, Pietro Aretino. Renaissance literary theory from Coluccio Salutati to Scaligero. (Offered 1962-63.)
- 561, 562, 563 Italian Literature of the Nineteenth and Twentieth Centuries (3,3,3)** **Budel**
(Offered 1962-63.)
- 600 Research (2-5, maximum 20)** **Staff**
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

PORTUGUESE

- 390 Supervised Study (2-5, maximum 20)** **C. Wilson**

PROVENÇAL

- 534 Old Provençal (3)** **Simpson**
(Offered when demand is sufficient.)

SPANISH

- 304, 305, 306 Survey of Spanish Literature (3,3,3)** **Staff**
- 390 Supervised Study (2-5, maximum 20)** **Staff**
- 409 Phonetics, Pronunciation, Intonation (3)** **Vargas-Baron**
- 430 Advanced Conversational Spanish (1-3, maximum 6)** **Ayllon**
(Offered Summer Quarter only.)
- 441, 442, 443 Drama (3,3,3)** **W. Wilson**
(Offered alternate years; offered 1961-62.)
- 451, 452, 453 Spanish Literature Since 1700 (3,3,3)** **Staff**
(Offered alternate years; offered 1962-63.)
- 461, 462, 463 Spanish Literature of the Golden Era (3,3,3)** **W. Wilson**
(Offered alternate years; offered 1963-64.)
- 471, 472, 473 Individual Authors (3,3,3)** **Staff**
(Offered when there is sufficient demand.)
- 481, 482, 483 Spanish-American Literature (3,3,3)** **Alcala, Vargas-Baron**
(Offered alternate years; offered 1961-62.)
- 485 Romanticism, Realism, and Naturalism in Spanish America (3)** **Vargas-Baron**
(Offered alternate years; offered 1962-63.)
- 486 The Modernista Movement in Spanish-American Literature (3)** **Vargas-Baron**
(Offered alternate years; offered 1962-63.)
- 487 The Contemporary Spanish-American Novel (3)** **Vargas-Baron**
(Offered alternate years; offered 1962-63.)
- 511 The Poema de Mio Cid (3)** **Sousa**
(Offered alternate years; offered 1961-62.)
- 512 Epic Poetry (3)** **Sousa**
The epic material in old Spanish literature and its later treatment in poetry and drama. Special investigations and reports. (Offered alternate years; offered 1961-62.)

- 513 The Spanish Ballad (3)** **Ayllon**
The origin and evolution of the Spanish ballad. (Offered alternate years; offered 1961-62.)
- 515 The Contemporary Spanish-American Short Story (3)** **Vargas-Baron**
Leading short story writers in Spanish America. (Offered 1962-63.)
- 521 The Renaissance in Spain (5)** **Ayllon**
(Offered alternate years; offered 1963-64.)
- 531 Literary Problems (2-5, maximum 20)** **Staff**
Field (see A-H, below) must be specified in registering. For individual conferences under this number (but not for group projects) permission of the Executive Officer is required. Maximum credit to be 5 in any one sub-division.
 A. Middle ages
 B. Renaissance
 C. Golden age
 D. Eighteenth century
 E. Nineteenth century
 F. Twentieth century
 G. Spanish colonial literature
 H. Latin America
- 541, 542, 543 History of the Spanish Language (2,2,2)** **Sousa**
A survey of the phonological, morphological, and syntactical development of the Spanish language from its origins to the present. (Offered 1962-63.)
- 571 The Modern Essay (3)** **Alcala, Vargas-Baron**
Leading essayists of Spain and Spanish America. (Offered 1963-64.)
- 572 Modern Poetry (3)** **Alcala, Vargas-Baron**
Romanticism and later movements in Spanish and Spanish-American poetry. (Offered 1963-64.)
- 600 Research (2-5, maximum 20)** **Staff**
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

COURSES IN ENGLISH TRANSLATION

Recommended as appropriate minor or supporting studies for students majoring in other departments. Courses in English translation are not applicable toward undergraduate or graduate majors in the Department of Romance Languages and Literature.

FRENCH

- 416 Rabelais and Montaigne in English (3)** **Keller**
- 417 Racine and Moliere in English (3)** **Chessex**
- 418 Literature of the Enlightenment in English (3)** **Hanzeli**
Voltaire, Rousseau, Diderot
- 419 Nineteenth-Century Novel in English (3)** **Keller**
- 420 Twentieth-Century Fiction in English (3)** **Weiner**

ITALIAN

- 318 Italian Literature in English (5)** **Budel**
- 384 Renaissance Literature of Italy in English (2)** **Budel**
- 481, 482 Dante in English (2,2)** **Budel**

ROMANCE LITERATURE

- 460 The Literature of the Renaissance in English (5)** **Keller**

SPANISH

- 315 Latin-American Authors in English (5)** **Vargas-Baron**

SCANDINAVIAN LANGUAGES AND LITERATURE

Executive Officer: **SVERRE ARESTAD, 215 Denny Hall**

The Department of Scandinavian Languages and Literature offers courses leading to the degree of Master of Arts. To meet the language requirement for this degree, French or German is recommended. Candidates must earn 20 credits in courses numbered 500 and above.

COURSES**DANISH**

490 Supervised Reading (*, maximum 5) Arestad

NORWEGIAN

450 History of Norwegian Literature (3) Arestad

490 Supervised Reading (*, maximum 5) Arestad

SCANDINAVIAN LITERATURE

500, 501, 502 Old Icelandic (2,2,2) Johnson

507 Ibsen (*, maximum 5) Arestad

508 The Scandinavian Novel (*, maximum 5) Arestad

510, 511, 512 Strindberg (2,2,2) Johnson

515 Modern Danish and Norwegian Poetry (3) Arestad

516 Modern Danish and Norwegian Drama (3) Arestad

517 Modern Swedish Poetry (3) Johnson

518 The Swedish Novel (3) Johnson

700 Thesis (*) Staff

SWEDISH

450 History of Swedish Literature (3) Johnson

455 History of the Swedish Language (3) Johnson

490 Supervised Reading (*, maximum 6) Johnson

COURSES IN ENGLISH

309, 310, 311 The Scandinavian Novel in English (2,2,2) Arestad, Johnson

382 Twentieth-Century Scandinavian Drama in English (2) Johnson

480 Ibsen and His Major Plays in English (2) Arestad

481 Strindberg and His Major Plays in English (2) Johnson

SOCIOLOGY

Executive Officer: ROBERT E. L. FARIS, 108A Smith Hall

The Department of Sociology offers courses leading to the degrees of Master of Arts and Doctor of Philosophy.

All graduate students must complete undergraduate requirements for a major in sociology before becoming candidates for degrees. Students whose undergraduate work in sociology seems inadequate may be required to pass a qualifying examination before being admitted to graduate courses.

Requirements for both advanced degrees include work in some of these fields of specialization: sociological theory; research methods and social statistics; ecology and demography; social interaction; social institutions; social organization; and social disorganization.

MASTER OF ARTS. Candidates must complete an approved program in advanced sociology courses and a minor in a related field or a program of related courses. At least 9 of the sociology credits must be in courses numbered 500 and above. A reading knowledge of a foreign language is required. Candidates must take a final examination in two fields of sociology and a separate examination in the minor given by the department in which the minor courses are taken. The master's thesis must be submitted seven weeks before the degree is to be granted.

DOCTOR OF PHILOSOPHY. Candidates must complete a program of courses approved by the Department. Half of the credits, including the thesis, must be in courses numbered 500 and above. The residence requirement is three years, two of them at the University of Washington. One of the two years must be spent in continuous full-time residence.

A reading knowledge of two foreign languages is required.

A completed thesis must be submitted seven weeks before the degree is conferred.

A written General Examination will cover four fields of specialization, one of which must be research methods and social statistics. A minor sequence or a program of related courses in addition to the fields, is also required.

An oral Final Examination is given on the completion of all requirements, including the thesis.

COURSES

310 General Sociology (5)	Larsen, Staff
331 Population Problems (5)	Watson
352 The Family (5)	Staff
362 Race Relations (5)	Barth
365 Urban Community (5)	Cohen
371 Criminology (5)	Hayner, Schrag
389 Reading in Selected Fields (2-5, maximum 15)	Staff
410 History of Sociological Thought (5)	Catton
411, 412, 413 Systematic Sociology (3,3,3)	Dodd
414 Sociological Theory (5)	Schrag
415 Theory of Social Organization (5)	Wager
420 Methods of Sociological Research (5)	Faris
421 Methodology: Case Studies and Interviewing (3)	Larsen
423 Advanced Social Statistics (5)	Costner
425J Graphic Techniques in the Social Sciences (5) Offered jointly with the Department of Geography.	Schmid
426 Methodology: Quantitative Techniques in Sociology (3)	Costner
427 Statistical Classification and Measurement (3)	Costner
428-429 Sampling and Experimentation (3-3)	Costner
430 Human Ecology (5)	Cohen, Schmid
440 Primary Interaction and Personal Behavior (5)	Faris
442 Public Opinion (3)	Larsen
443 Mass Communication (5)	Larsen
445 Social Movements (3)	Miyamoto
447 Social Control (5)	Staff
448 Sociometric Analysis and Group Structure (5)	Schrag
450 Contemporary American Institutions (5)	Wager
451 Social Change and Trends (5)	Catton
453 Social Factors of Marriage (3)	Leik
455 Housing in the American Community (5)	Cohen
458 Institutional Forms and Processes (5)	Faris
459 Comparative Social Systems: Latin America (3)	Hayner
460 Social Differentiation (5)	Barth
463 American Negro Community (3)	Barth
466 Industrial Sociology (5)	Wager
467 Industry and the Community (3)	Wager
468 Sociology of Occupations and Professions (5)	Wager
472 Juvenile Delinquency (5)	Hayner, Schrag
473 Corrections (5)	Hayner, Schrag
474 Probation and Parole (3)	Hayner
475 Problems in the Administration of Correctional Programs (3)	Schrag
N510, N511, N512 Departmental Seminar (0,0,0) Monthly meetings with reports on independent research by graduate students and staff members.	Staff

- 521, 522, 523 Seminar in Methods of Sociological Research (3,3,3)** **Staff**
Prerequisites, 223, 414, and 420, or equivalents.
- 528 Seminar in Selected Statistical Problems in Social Research (3)** **Staff**
Prerequisite, 426.
- 530 Advanced Human Ecology (3)** **Schmid**
Prerequisites, 230 or 430, and 15 credits in social science.
- 531 Demography (3)** **Schmid**
Research problems in population and vital statistics. Prerequisites, 331, and 15 credits in social science or permission.
- 540 Seminar in Social Interaction (3)** **Miyamoto**
Evaluation of studies in social interaction. Analyzes types of interaction, interaction models, and such major variables as roles, self-conception, and the influence of norms. Prerequisite, 440 or equivalent.
- 541 Seminar on Small Group Research (3)** **Miyamoto**
Theories, methodology, and studies in the area of small group research. Covers such topics as interaction channels, group cohesion, group locomotion, and consensus in groups. Prerequisite, permission.
- 543 Communications Seminar (3)** **Larson**
Sociological research in mass communication. Emphasis on the role of groups in providing norms and networks in the flow of information and influence from the mass media. Prerequisite, 443 or equivalent.
- 550, 551, 552 Marriage and the Family (3,3,3)** **Leik**
Analysis of marriage and family patterns and problems, with initial emphasis on research findings and methods. Individual research on selected projects. Prerequisite, 352 or equivalent.
- 566, 567 Industrial Sociology Seminar (3,3)** **Wager**
Research training in industrial sociology. Readings and field projects. Prerequisite, 466 or equivalent.
- 571 Correctional Communities (3)** **Hayner**
Prerequisites, 371 and 473, or equivalent.
- 572 Analysis of Criminal Careers (3)** **Hayner**
Personal and social factors in criminal maturation and reformation. Prerequisites, 371 and 473, or equivalent.
- 573 Crime Prevention (3)** **Hayner**
Prerequisites, 371 and 472, or equivalent.
- 574 Seminar in Methods of Criminological Research (3)** **Schrag**
Provides training in the technical analysis of published research in criminology; designs and processes studies in parole prediction, prediction of prison adjustment, and prediction of treatment effect. Prerequisite, permission.
- 599 Reading in Selected Fields (2-5, maximum 15)** **Staff**
Open only to qualified graduate students by permission.
- 600 Research (2-5)** **Staff**
Original field projects carefully planned and adequately reported. Certain projects can be carried on in connection with the Public Opinion Laboratory or the Office of Population Research. Open only to qualified graduate students by permission.
- 700 Thesis (*)** **Staff**

SPEECH

Executive Officer: HORACE G. RAHSKOPF, 209 Parrington Hall

The Department of Speech offers courses leading to the degrees of Master of Arts and Doctor of Philosophy.

Students who undertake advanced study of speech usually have college teaching or clinical work in speech and hearing therapy as their goals, although they may be planning to enter other professions where a high degree of competence in and understanding of oral communication are essential. Such students are expected to present an undergraduate background of not less than 35 quarter credits of approved courses in speech. In certain cases the Department may accept a limited amount of credit in closely related fields as part of the required undergraduate background. In general it is expected that a student's background in speech will constitute a broad orientation in the field. When this is not the case, the Department may require certain speech courses outside the area of specialization, either as additional undergraduate training or as part of the graduate program.

Facilities of the Department include laboratories for research in oral communication and experimental phonetics and a well-equipped speech clinic with unusually wide resources for clinical experience and research.

MASTER OF ARTS. Candidates must complete 36 credits of approved course work of which 12 credits should be in a minor or supporting courses from closely related areas. Thesis research may be in any subdivision of the field.

DOCTOR OF PHILOSOPHY. Two major areas of concentration are available: public address and rhetoric including argumentation and discussion, and speech correction and hearing including experimental phonetics.

COURSES

VOICE AND PHONETICS

- 310 Voice Science (5)** Tiffany
411 Anatomy of the Vocal Organs and Ear (5) Palmer
415 Advanced Voice and Phonetics (5) Tiffany
 Prerequisite, 310 or permission.
510 Experimental Phonetics (3) Tiffany
 Application of experimental methods to research in voice and phonetics; critical review of research literature. Prerequisite, 415 or permission.

RHETORIC AND PUBLIC ADDRESS

- 320 Public Speaking (5)** Franzke
 Not open to students who have credit in 420. Prerequisite, 220 or permission.
420 Advanced Public Speaking (5) Baskerville
 Not open to students who have credit in 320. Prerequisite, 220 or permission.
421 Persuasion (3) Pence
 Prerequisite, 220 or 230, or permission.
425, 426 American Public Address (5,5) Baskerville
428 British Public Address (5) Strother
 (Offered alternate years; offered 1961-62.)
521 Studies in Greek and Roman Rhetoric (5) Rahskopf
 Critical analysis of writings on rhetoric by Plato, Aristotle, Cicero, Quintilian, and others.
522 Studies in Medieval and Renaissance Rhetoric (5) LaRusso
 A critical analysis of selected persons, works, and topics related to the development of rhetorical theory during the Middle Ages and the Renaissance. (Offered alternate years; offered 1961-62.) Prerequisite, 521.
523 Studies in Modern Rhetoric (5) Pence
 Critical analysis of writings on rhetoric by Cox, Wilson, Bacon, Campbell, Blair, Whately, and others. (Offered alternate years; offered 1962-63.) Not open to students who received credit for 522 prior to Spring, 1957.
525 Rhetorical Criticism (3) Baskerville
 The history and method of rhetorical criticism. Application of standards to notable British and American speeches. Prerequisite, 425, 426, or 428.
530 Experimental Problems in Public Address (3-5) Pence
 Analysis of theoretical considerations in audience and listening behavior; application of measurement techniques. (Offered alternate years; offered 1961-62.) Prerequisite, permission.

ARGUMENT AND DISCUSSION

- 332 Principles of Group Discussion (5)** Crowell, Nilsen
335 Methods of Debate (3) Strother
 Prerequisite, 220 or 230, or permission.
432 Problems of Discussion Leadership (3) Crowell
436 Methods of Public Discussion (5) Franzke

ORAL INTERPRETATION OF LITERATURE

- 340 Oral Interpretation of Prose (3)** Grimes
345 Choral Speaking (3) Grimes
 (Offered alternate years; offered 1962-63.)
440 Oral Interpretation of Poetry (3) Grimes
540 Studies in Oral Interpretation (3) Grimes
 Critical analysis of writings by Sheridan, Walker, Rush, Delsarte, Bell, Curry, Emerson, and others. (Offered alternate years; offered 1961-62.) Prerequisite, 440.

TEACHING OF SPEECH

- 359 Speech in the Classroom (3)** Nelson

- 457 Debate and Discussion Problems in High School and College (2½)** **Staff**
(Offered Summer Quarter only.)
- 550 Studies in Speech Education (3)** **Nolson**
Philosophical, curricular, and methodological problems of speech instruction. (Offered alternate years; offered 1962-63.)

RADIO-TV SPEECH

- 361 Advanced Radio-TV Speech (3)** **Bird**

SPEECH CORRECTION

- 470, 471 Speech Correction (5,5)** **Carrell**
- 473 Diagnostic Methods in Speech Correction (5)** **Wingate**
Prerequisite, 471.
- 474 Clinical Practice in Speech Correction (1-5, maximum 15)** **Palmer**
Prerequisites, 471 and 473 which may be taken concurrently.
- 475 Stuttering (2)** **Wingate**
- 476 Language Development of the Child (3)** **Wingate**
(Offered alternate years; offered 1962-63.)
- 478 Interview Techniques for Speech and Hearing Rehabilitation (3)** **Wingate**
(Offered alternate years; offered 1961-62.)
- 570, 571, 572, 573 Organic Disorders of Speech (3,3,3,3)** **Carrell**
Etymology, diagnosis, and therapy. 570: morphogenic disorders, especially cleft palate and dental malocclusions. Not open to students who took 574 prior to Autumn, 1956. (Offered alternate years; offered 1962-63.) 571: dysarthria, especially cerebral palsy. (Offered alternate years; offered 1961-62.) 572: aphasia. (Offered alternate years; offered 1962-63.) 573: pathologic disorders of voice. (Offered alternate years; offered 1961-62.) Prerequisite for each course, 471 or permission.
- 574 Advanced Clinical Practice in Speech Correction (1-5, maximum 10)** **Palmer**
Prerequisite, 474.
- 575 Stuttering Therapy (3)** **Wingate**
(Offered alternate years; offered 1962-63.) Prerequisite, 475 or permission.
- 578 Psychogenic Factors in Speech and Hearing Disorders (2)** **Wingate**
Psychogenic factors as etiological agents in speech and hearing disorders. (Offered alternate years; offered 1961-62.) Prerequisite, Psychology 305 or permission.

HEARING

- 480 Introduction to Hearing (5)** **Hanley**
- 481, 482 Principles and Methods of Aural Rehabilitation (5,5)** **Palmer**
Prerequisites, 480 for 481; 481 or permission for 482.
- 484 Clinical Practice in Aural Rehabilitation (1-5, maximum 15)** **Hanley**
Prerequisite, 480, 481.
- 485 Medical Background for Audiology (2)** **Staff**
(Offered alternate years; offered 1962-63.)
- 487 Audiometry (3)** **Hanley**
- 488 Hearing Aid Evaluation and Selection (2)** **Hanley**
(Offered alternate years; offered 1962-63.)
- 580 Advanced Audiology (5)** **Hanley**
Methods, techniques, and instruments used in the measurement of auditory function. Review of research literature. (Offered alternate years; offered 1962-63.) Prerequisite, 480 or permission.
- 584 Advanced Clinical Practice in Aural Rehabilitation (1-5, maximum 10)** **Hanley**
Prerequisite, 484.
- 587 Advanced Audiometry (2)** **Hanley**
Special diagnostic tests of auditory function; clinical practice. (Offered alternate years; offered 1961-62.) Prerequisite, 487.
- 588 Advanced Audiometry (2)** **Hanley**
Course in clinical diagnostic procedures involved in threshold finding, pre-surgical and surgical audiometry and electroencephalographic audiometry. (Offered alternate years; offered 1962-63.) Prerequisite, 487.
- 589 Advanced Audiometry (2)** **Hanley**
Clinical procedures utilized in the measurement of auditory recruitment and aural overload. Special attention will be placed on the Rainville masking technique. (Offered alternate years; offered 1961-62.) Prerequisite, 487.

GENERAL

- 400 Backgrounds in Speech (3)** **Rahskopf**
- N500 Departmental Seminar (0)** **Staff**
Reports of research by graduate students and staff members.

501 Introduction to Graduate Study in Speech (3)	Crowell
600 Research (*)	Staff
700 Thesis (*)	Staff

SEMINARS

590 Seminar in Theory of Speech (2, maximum 6) Prerequisite, 400 or permission. (Offered 1962-63.)	Rahskopf
591 Seminar in Voice and Phonetics (2, maximum 6) Prerequisite, permission. (Offered 1961-62.)	Tiffany
592 Seminar in Rhetoric and Public Address (2, maximum 6) Prerequisite, permission. (Offered 1961-62.)	Staff
593 Seminar in Argument and Discussion (2, maximum 6) Prerequisite, permission. (Offered 1963-64.)	Staff
594 Seminar in Oral Interpretation (2, maximum 6) Prerequisite, permission. (Offered 1962-63.)	Grimes
595 Seminar in the Teaching of Speech (2, maximum 6) Prerequisite, permission. (Offered 1961-62.)	Nelson
597 Seminar in Speech Correction (2, maximum 6) Prerequisite, permission. (Offered 1962-63.)	Staff
598 Seminar in Hearing (2, maximum 6) Prerequisite, permission. (Offered 1962-63.)	Staff

ZOOLOGY

Executive Officer: ARTHUR W. MARTIN, 142 Johnson Hall

The Department of Zoology offers courses of study leading to the degrees of Master of Science and Doctor of Philosophy. Candidates for advanced degrees are expected to complete the academic work outlined in the undergraduate curriculum for the Bachelor of Science degree, in addition to their graduate course program. Students seeking an advanced degree must be accepted for research supervision by a member of the staff. A choice of supervisor need not be made immediately, but will not ordinarily be delayed into the second year of graduate work. Graduate students are not formally recognized as candidates by the Department until they have passed the written General Examination in five basic fields: comparative anatomy, embryology, general physiology, genetics, and invertebrate zoology.

COURSES**BIOLOGY**

401 Cytology (3) Prerequisite, Botany 112 or Zoology 112, or permission of instructor.	Hsu
401L Cytology Laboratory (2) To be taken concurrently with 401. Prerequisite, permission of instructor.	Hsu
451 Genetics (3)	Roman
451L Genetics Laboratory (2) To be taken concurrently with 451.	Roman
452 Cytogenetics (3)	Roman
452L Cytogenetics Laboratory (2) To be taken concurrently with 452.	Roman
453 Topics in Genetics (2, maximum 6)	Roman
454 Evolutionary Mechanisms (3)	Kruckeberg
472 Principles of Ecology (3) Prerequisite, 10 credits in upper-division biological science, or permission of instructor.	Edmondson
472L Ecology Laboratory (2) To be taken concurrently with 472. Prerequisite, permission of instructor.	Edmondson
473 Limnology (5) Prerequisites, Botany 112 or Zoology 112, one year college chemistry, upper-division standing, and permission of instructor.	Edmondson
501 Advanced Cytology (5) Detailed study of structure and function of the cell.	Hsu

- 508 Cellular Physiology (3)** **Whiteley**
Cell membrane and permeability, cytoplasmic physiology, intracellular energetics and biosynthesis, physiology of cell division, cell movement. (Offered alternate years; offered 1962-63.) Prerequisite, Zoology 400 or permission of instructor.
- 508L Cellular Physiology Laboratory (2)** **Whiteley**
Prerequisites, concurrent registration in Biology 508 or 509, and permission of instructor.
- 509 Cellular Physiology (3)** **Whiteley**
Chemistry and physiology of the interkinetic and dividing nucleus, nucleocytoplasmic interactions, physiology of differentiated cells. (Offered alternate years; offered 1961-62.) Prerequisite, Zoology 400 or permission of instructor. (Biology 508 and 509 may be elected separately or in either sequence).
- 573 Topics in Limnology (2)** **Edmondson**
Readings in the literature of limnology, with detailed discussion of modern problems. May be repeated for credit. Prerequisite, permission of instructor.

ZOOLOGY

- 330 Natural History of Marine Invertebrates (5)** **Staff**
Prerequisite, permission of instructor.
- 362 Natural History of Vertebrates (5)** **Snyder**
(Offered alternate years; offered 1962-63.)
- 381 Microtechnique (4)** **Hsu**
- 400 General Physiology (5)** **Flory**
- 402 History of Zoology (3)** **Hatch**
- 403 Comparative Vertebrate Histology (5)** **Staff**
- 409 Ethology (3)** **Orians**
Prerequisite, permission of instructor.
- 409L Ethology Laboratory (2)** **Orians**
Prerequisite, 409 concurrently and permission of instructor.
- 423 Protozoology (5)** **Osterud**
Prerequisite, upper-division standing or permission of instructor.
- 432 Marine Invertebrate Zoology (8)** **Staff**
(Offered at Friday Harbor Summer Quarter only) Not open for credit to students who have had 433, 434.
- 433, 434 Invertebrate Zoology (5,5)** **Illg, Kohn**
Not open for credit to students who have had 432. Prerequisite, permission of instructor.
- 435 Parasitology (5)** **Osterud**
Prerequisite, upper-division standing or permission of instructor.
- 444 Entomology (5)** **Hatch**
- 453-454 Comparative Anatomy of Chordates (5-5)** **Snyder**
- 456 Vertebrate Embryology (5)** **Haggis**
- 457 Experimental Morphogenesis (3)** **Fernald**
- 457L Experimental Morphogenesis Laboratory (2)** **Fernald**
Prerequisite, permission of instructor.
- 458 Vertebrate Physiology (6)** **Martin**
Prerequisite, 20 credits in biological science or permission.
- 462 Vertebrate Systematics and Life Histories (5)** **Orians, Snyder**
(Offered alternate years; offered 1961-62.) Prerequisites, 112 or equivalent, and permission of instructor.
- 464 Natural History of Birds (Ornithology) (5)** **Richardson**
(Alternates with 465)
- 465 Natural History of Mammals (5)** **Staff**
(Alternates with 464)
- 475 Vertebrate Zoogeography (3)** **Staff**
- 498 Special Problems in Zoology (1-5, maximum 15)** **Staff**
- 506 Topics in Experimental Embryology (2, maximum 6)** **Staff**
Seminars and discussions of aspects of growth of special current interest.
- 516 Chemical Embryology (3)** **Whiteley**
Cytochemistry of cytoplasmic segregation, specificity in growth and development, cellular interactions in development, control mechanisms in development. (Offered alternate years; offered 1961-62.) Prerequisite, permission of instructor.
- 516L Chemical Embryology Laboratory (2)** **Whiteley**
Must be accompanied by 516.
- 517 Chemical Embryology (3)** **Whiteley**
Sex determination, gametogenesis, sperm metabolism, physiology of fertilization, mechanics of cleavage, energetics of development. (Offered alternate years; offered 1962-63.) Prerequisite, permission of instructor.

- 517L Chemical Embryology Laboratory (2)** **Whiteley**
Must be accompanied by 517.
- 520, 521, 522 Seminar (1,1,1)** **Staff**
- 533 Advanced Invertebrate Zoology (6)** **Staff**
The rich and varied invertebrate fauna of the San Juan Archipelago is studied, emphasizing systematics and ecology, with opportunity for developing individual research problems. (Offered at Friday Harbor Summer Quarter only.) Prerequisite, 10 credits in invertebrate zoology or equivalent.
- 534 Topics in Advanced Invertebrate Zoology (2)** **Illg**
Advanced considerations in morphology, ecology, phylogeny of invertebrates; emphasizing current developments. Prerequisites, 434 or equivalent, and permission of instructor.
- 536 Advanced Invertebrate Embryology (6)** **Staff**
Morphological and experimental studies of development of selected types of marine invertebrates. (Offered at Friday Harbor Summer Quarter only.) Prerequisites, 433, 434, and 456.
- 537 Comparative Invertebrate Physiology (3)** **Floreys**
Selected chapters of comparative physiology of nerve, muscle, circulation, respiration, renal function, and hormone action. Prerequisites, 400 and 434.
- 537L Comparative Invertebrate Physiology Laboratory (2)** **Floreys**
Exercises in kymographic, oscilloscopic and other recording of mechanical, electrical, and metabolic phenomena of invertebrate organ function. Must be accompanied by 537. Prerequisite, permission of instructor.
- 538 Advanced Invertebrate Physiology (6)** **Staff**
Comparative physiology of muscle and nervous systems, selected topics in the physiology of osmoregulation, respiration, circulation, chromatophore regulation, metabolism, and nutrition. (Offered at Friday Harbor Summer Quarter only.) Prerequisite, chemistry through organic, physics, and 10 credits in invertebrate zoology or equivalent.
- 554 Advanced Vertebrate Morphology (3)** **Snyder**
Current problems and trends in vertebrate anatomy emphasizing functional relationships. Prerequisites, -454, 456, and permission of instructor.
- 558 Comparative Vertebrate Physiology (6)** **Martin**
Advanced studies with particular reference to cold-blooded vertebrates and to birds. Prerequisite, 400 or equivalent.
- 578 Advanced Ecology (5)** **Orians**
Analysis of ecosystems, fundamental properties of populations, problems of environmental utilizations, population regulation, community sampling. Prerequisite, Biology 472 or permission of instructor.
- 581 Systematic Zoology (4)** **Illg**
History, principles, and procedures of zoological taxonomy; review of biological bases of phylogeny; history and principles of zoological nomenclature. Prerequisite, permission of instructor.
- 598 Seminar in General and Comparative Physiology (2)** **Floreys**
Study and discussion of classical and current literature in the field of general and comparative physiology. Prerequisites, 400, 433, 434, and permission of instructor.
- 600 Research (*)** **Staff**
- 700 Thesis (*)** **Staff**

COLLEGE OF BUSINESS ADMINISTRATION

Dean: AUSTIN GRIMSHAW, 115 Business Administration Staff Building

The College of Business Administration offers courses leading to the degrees of Master of Business Administration, Master of Arts, and Doctor of Business Administration. Graduate training is given in these fields of specialization: accounting; business and its environment; business policy and business administration; finance and banking; international business; marketing; personnel and industrial relations; production; real estate; research and statistical control; and transportation. However, these areas shall not be held to exclude others which may be appropriate in special instances. There are no foreign language requirements for the M.B.A. and D.B.A. degrees.

Before the College approves an application for admission the applicant must have submitted to the College the result of the Admission Test for Graduate Study in Business. Inquiries concerning this test should be addressed to the Educational Testing Service, 20 Nassau Street, Princeton, New Jersey, or 4640 Hollywood Boulevard, Los Angeles 27, California.

Full graduate standing is granted applicants who have the necessary prerequisites and a cumulative grade-point average of 3.00 (B) or higher. *Students who*

do not meet this requirement may be admitted (1) if they have a grade-point average of 3.25 or higher during their senior year, (2) if they rank in the upper third of their collegiate graduating class, or (3) if they have achieved a high score on the Admission Test for Graduate Study in Business.

MASTER OF BUSINESS ADMINISTRATION. The M.B.A. program is designed for students who are preparing for professional careers in business management. Graduate seminars in business policy, administration, and controls build upon a foundation of undergraduate courses in functional and tool subjects; only a modest amount of specialization in a single subject area is possible. The broad objective is to help the student develop the analytical tools and understanding of business administration which would be of continuing value throughout his career as a business manager.

A minimum of 36 credits is required for the M.B.A. degree. At least 27 credits must be in business administration courses. The following courses are required:

	Credits
Accounting 592	3
General Business 570, 571-572	9
Policy and Administration 575, 576, or 586.....	3
Policy and Administration 593 or 594.....	3
Electives (The electives must include at least three areas of business administration with a <i>maximum</i> of 9 credits in <i>any</i> area. All of the elective credits shall be in 500-numbered courses.)	18
	<hr/> 36

In addition to the above course requirements, students will be required to pass a comprehensive written examination in their final quarter of course work.

The residence requirement for master's degrees is one year (three quarters). Students who lack background in business administration and economics may require from one to three quarters of additional study.

MASTER OF ARTS. The M.A. program is designed for students who desire greater specialization than is possible under the M.B.A. program (except by exceeding the minimum 36 quarter credits). Students electing the M.A. program usually have an objective other than preparation for a career as a professional manager; some are interested in becoming technical business specialists, some are interested in research careers, and others are interested in teaching careers in a limited subject area.

The student in this program must complete a minimum of 36 credits including a thesis, with a major in one of the fields of graduate study offered by the College of Business Administration. A minimum of 15 credits, exclusive of the thesis, must be earned in the major field. A minor may be taken in the College of Business Administration or elsewhere. A minimum of 9 credits is required in the minor field. If the minor is elected outside the College, requirements of the department offering the minor must be met.

A minimum of 18 credits must be earned in courses for graduates (500 to 600 series); the remaining course credits may be in 400-level courses approved for graduate credit. The student must have a reading knowledge of an acceptable foreign language, as determined by examination.

Minor in Business Administration. Candidates for a master's degree in other colleges who elect a minor in the College of Business Administration must have as a background 15 credits in acceptable courses in business administration. The student must earn a minimum of 15 credits in approved upper-division and graduate courses in one field of business administration.

DOCTOR OF BUSINESS ADMINISTRATION. The D.B.A. program is designed to further advanced study in business administration for persons preparing for careers in teaching, business, and government; since the inception of the program, the

majority of D.B.A. graduates have entered university teaching careers. Students enrolled in this program are expected to possess the professional administrative competency which is the objective of the M.B.A. program, and—in addition—they are required to demonstrate academic competence in four areas of study, at least three of which must be in the College of Business Administration. Hence, the objective of the D.B.A. program is to provide breadth of training in the integrative processes involved in administrative planning and control concurrently with subject area specialization which will enable a graduate to actively participate in advancing the frontiers of knowledge both in teaching and research in his primary areas.

A requirement for consideration for the D.B.A. program is a grade-point average of at least 3.25 during the preceding year of graduate study. Applications for admission to the D.B.A. program must be accompanied by three letters of recommendation, at least two of which must come from former instructors.

COURSES

ACCOUNTING

Managerial Accounting

- | | |
|----------------------------------|-------|
| 311 Cost Accounting (3) | Staff |
| 460 Advanced Cost Accounting (3) | Staff |
| 475 Administrative Controls (3) | Staff |

Financial Accounting

- | | |
|-------------------------------------------|-------|
| 321 Equity Accounting (3) | Staff |
| 331 Income Determination Accounting (5) | Staff |
| 485 Consolidated Financial Statements (3) | Staff |
| 486 Fiduciary Accounting (2) | Staff |
| 490 Advanced Problems (3) | Staff |
| 495 Advanced Accounting Theory (3) | Staff |

Income Tax

- | | |
|------------------------------|-------|
| 421 Federal Income Tax (5) | Staff |
| 450 Special Tax Problems (3) | Staff |

Auditing

- | | |
|-------------------------------------------|-------|
| 411 Auditing Standards and Principles (3) | Staff |
| 470 Case Studies in Auditing (5) | Staff |

Systems and Data Processing

- | | |
|-----------------------------------------------------------------------------------------|-------|
| 344 Introduction to Electronic Data Processing (3) | Staff |
| 440 Accounting Systems (3) | Staff |
| 444J Applications of Digital Computers (3)
Offered jointly with Business Statistics. | Staff |

Institutional Accounting

- | | |
|-------------------------|-------|
| 480 Fund Accounting (3) | Staff |
|-------------------------|-------|

Graduate Seminars

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 520 Seminar in Financial Accounting (3)
A critical examination of accounting theories, concepts, and standards pertaining to current assets and liabilities and relevant income determination problems. Prerequisites, 321, 331 and permission. | Staff |
| 521 Seminar in Financial Accounting (3)
A critical examination of accounting theories, concepts, and standards pertaining to noncurrent balance sheet items and relevant income determination problems. Prerequisites, 321, 331, and permission. | Staff |
| 522 Seminar in Cost Accounting (3)
Critical examination of theories of managerial accounting. Differentiation of objectives of managerial and financial accounting, joint costs, absorption costing, direct costing, standard costing, distribution costing, techniques of analysis of cost data, including differential cost analysis. Prerequisites, 311 and permission. | Staff |

- 592 Seminar in Administrative Controls (3)** **Staff**
The use of accounting and statistics by management in the exercise of its planning and controlling functions; e.g., forecasting, budgets, standard costs, analysis of cost variations. Controllership as a function in the business enterprise. Prerequisites, 230 and permission.
- 604 Research (*, maximum 10)** **Staff**
Prerequisite, permission.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

BUSINESS AND ITS ENVIRONMENT

- 552 Legal Aspects of Business Regulation (3)** **Staff**
Examination, from the administrative point of view, of advanced legal problems bearing directly upon top management's decisions concerning basic operating policy. Prerequisite, permission.
- 562 Responsibilities of Business Leadership (3)** **Staff**
Social responsibilities of business in relation to changing social forces. Relationships between business and consumers, government, labor, and agriculture. Problems of business ethics. Prerequisite, permission.
- 590 Business History (3)** **Staff**
Evolution of business institutions with special emphasis upon changing administrative policy, business organization, and methods in the American environment from the colonial period to the present. Prerequisite, permission.
- 593 Seminar in Business Fluctuations (3)** **Staff**
Business problems arising from fluctuations in prices and demand; analysis of static causes and effects of business policy on fluctuations; methods of adjustment by the firm; appraisal of corrective measures internal and external to business. Prerequisite, permission.
- 594 Seminar in Business Forecasting (3)** **Staff**
Problems of business forecasting and their setting; study and appraisal of forecasting methods in current use by corporations, advisory services and governmental agencies; review of actual cases and experience; techniques of preparing forecasts for the individual firm. Prerequisite, permission.
- 597 Behavioral Science of Business (3)** **Staff**
Analysis of the business system in the light of the concepts and methods of the behavioral disciplines. Prerequisite, permission.
- 598 Analysis of Business Behavior (3)** **Staff**
Current broad problems of business concerns in the American economy. The topics, one of which is usually discussed each quarter, emphasize practical price determination, cost analysis, firm behavior, motivation, or other similar subjects. Prerequisite, permission.
- 604 Research (*, maximum 10)** **Staff**
Prerequisite, permission.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

BUSINESS COMMUNICATIONS

- 410 Advanced Written Business Communications (5)** **Staff**

BUSINESS LAW

- 403 Commercial Law (5)** **Staff**
- 420 Law in Accounting Practice (3)** **Staff**

BUSINESS STATISTICS: QUANTITATIVE ANALYSIS

- 330 Time Series Analysis and Index Number Theory (3)** **Staff**
- 340 Survey Research Methods for Business (3)** **Staff**
- 350 Quantitative Analysis for Business (5)** **Staff**
- 401 Advanced Business Statistics (3)** **Staff**
- 444J Application of Digital Computers (3)** **Staff**
Offered jointly with the Department of Accounting.
- 450 Analytical Techniques in Business I (3)** **Staff**
- 451 Analytical Techniques in Business II (3)** **Staff**
- 460 Multivariate Analysis for Business (3)** **Staff**
- 501 Quantitative Methods (3)** **Staff**
A survey of techniques in analytical and descriptive statistics and operations research useful in guiding business decisions. Prerequisite, permission.

- 520 Seminar in Business Statistics (3, maximum 6)** **Staff**
Reading, discussion, and limited practice in the application of selected statistical techniques. Areas: statistical decision processes; nonparametric statistics; advanced application of statistical techniques in administrative control; advanced multivariate analysis; theories and techniques of time series analysis and index number construction. Prerequisite, permission.
- 550 Seminar in Operations Research Techniques (3, maximum 6)** **Staff**
An intensive study of operations research tools useful in business analysis such as linear and other programming techniques, queuing theory, and simulation. Prerequisite, permission.
- 604 Research (*, maximum 10)** **Staff**
Prerequisite, permission.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

FINANCE

- 327 International Finance (3)** **Staff**
- 330 Investments (3)** **Staff**
- 335 Securities Markets (3)** **Staff**
- 420 Money Markets (3)** **Staff**
- 423 Commercial Banking (3)** **Staff**
- 428 Credit Administration (3)** **Staff**
- 436 Investment Analysis (3)** **Staff**
- 450 Problems in Corporation Finance (4)** **Staff**
- 453 Capital Allocation (3)** **Staff**
- 520 Seminar in Banking Problems (3)** **Staff**
Selected problems of contemporary and permanent significance in domestic and international banking and finance. Prerequisite, permission.
- 521 Seminar in Money Markets (3)** **Staff**
Supply and demand for funds in short-term and long-term money markets; analysis of the influence of the money supply, bank reserves, legal restrictions, institutional portfolio policies, and changing needs and instruments of corporation finance. An objective of this seminar is to develop ability to analyze and appraise current money market developments. Prerequisite, permission.
- 522 Seminar in Corporation Finance (3)** **Staff**
Emphasizes selected contemporary problems and methods, internal and external, in solving corporate financial problems and indicating financial trends. Extensive reading and discussion is required in designated areas. Prerequisite, permission.
- 604 Research (*, maximum 10)** **Staff**
Prerequisite, permission.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

GENERAL BUSINESS

- 439 Analysis of Business Conditions (4)** **Staff**
- 441 Managerial Economics (3)** **Staff**
- 444 Business and Society (4)** **Staff**
- 570 Seminar in Business Research (3)** **Staff**
Business research methods and techniques. Emphasis is placed on what business research is; how it is done (stressing the scientific method as a research procedure) and who does it. Sources of relevant information are covered. Students will carry out the formulation of a research project—defining the problem, pinpointing sources of information, selecting a method of approach. Prerequisite, permission.
- 571-572 Business Studies (3-3)** **Staff**
Independent study of the field of business administration; critical evaluation of business analysis and research methods. Effective communication of ideas is emphasized. Methods and content of independent research studies being completed by the students are subjected to critical evaluation in seminar discussion. Prerequisites, 570 and approved research topic outline for 571-; 571- for -572; 571-572 open only to Master of Business Administration nonthesis students.
- 604 Research (*, maximum 10)** **Staff**
Prerequisite, permission.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

HUMAN RELATIONS IN BUSINESS AND INDUSTRY

- 460 Human Relations in Business and Industry (4)** **Staff**
Not open to BA graduate students.

INTERNATIONAL BUSINESS

- 320 International Business Environment (5)** **Staff**
370 Foreign Area Analysis (5) **Staff**
420 Foreign Trade Practices (5) **Staff**
470 Problems in Foreign Operations Management (5) **Staff**
520, 521 Seminar (3,3) **Staff**
Trends and contemporary problems in international operations management, business relations and services, economic policies, and related subjects; research and sources of information useful for solving international business problems. Each quarter a different aspect is emphasized. Prerequisite, permission.
604 Research (*, maximum 10) **Staff**
Prerequisite, permission.
700 Thesis (*) **Staff**
702 Degree Final (0) **Staff**
Limited to students completing a nonthesis degree program.

MARKETING

- 371 Wholesaling (5)** **Staff**
381 Retailing (5) **Staff**
391 Advertising (5) **Staff**
400 Marketing and Physical Distribution Management (Domestic and Foreign) (3) **Staff**
401 Sales Management (5) **Staff**
421 Marketing Research (5) **Staff**
441 Retail Sales Promotion (3) **Staff**
491 Marketing Problems (5) **Staff**
520 Marketing Trends and Developments (3) **Staff**
The current evolution of marketing is subjected to critical evaluation. Significant marketing trends and developments are reviewed analytically. Prerequisite, 301 and permission.
521 Marketing's Role in Contemporary America (3) **Staff**
The role of marketing in helping to meet the challenges of full employment and an expanding flow of goods and services through the American economy. Specific problem areas which may be examined include: marketing costs and efficiency, marketing and government, marketing and monopoly, pricing, and channels of distribution. Prerequisites, 301 and permission.
522 Advanced Marketing Concepts (3) **Staff**
The interdisciplinary exchange of ideas related to marketing is studied. New marketing theories and evolving concepts of marketing management are examined and critically appraised. Prerequisites, 520 or 521, and permission.
604 Research (*, maximum 10) **Staff**
Prerequisite, permission.
700 Thesis (*) **Staff**
702 Degree Final (0) **Staff**
Limited to students completing a nonthesis degree program.

PERSONNEL AND INDUSTRIAL RELATIONS

- 345 Personnel Methods and Theory I (3)** **Staff**
346 Personnel Methods and Theory II (3) **Staff**
450 Industrial Relations Administration (5) **Staff**
520 Seminar in Personnel and Industrial Relations (3) **Staff**
By case discussion and brief written reports, analysis of the problems and policies in personnel administration in the following areas is covered: business philosophy, ethics, personnel policies, the role of the personnel director, breadth of the personnel department's responsibilities, collective bargaining, supervision, job evaluation, and safety. Prerequisite, permission.
521 Current Problems in Personnel and Industrial Relations (3) **Staff**
Current problems in these areas: selection, appraisal, performance review, and development of executives; executive salary administration; white-collar unionization; preparation for contract negotiations; problems surrounding strikes. Prerequisite, one course in personnel, industrial relations, or labor economics, or permission.
604 Research (*, maximum 10) **Staff**
Prerequisite, permission.

- 700 Thesis (*)** **Staff**
702 Degree Final (0) **Staff**
 Limited to students completing a nonthesis degree program.

POLICY AND ADMINISTRATION

- 440 Organization Theory (3)** **Staff**
441 Advanced Organization Theory (3) **Staff**
463 Administrative Behavior (4) **Staff**
470 Business Policy (4) **Staff**
471 Problems of the Independent Businessman (3) **Staff**
480 Business Simulation (5) **Staff**
565 Seminar in Comparative Administrative Theory (3) **Staff**
 An evaluation of the various approaches to the study of administration. A theoretical and historical point of view is taken. Each approach to the study of administration is analyzed independently, and also related to a general theory of administration. Prerequisite, permission.
575 Human Aspects of Administration (3) **Staff**
 Examines the processes of administration in organizations with a primary focus on organizational behavior. Develops the basic contributions of social science and other sources in the formulation of administrative-organizational behavior concepts and conceptual schemes. Critically evaluates the status of administrative theory in relation to administrative practice. Prerequisite, permission.
576 Human Aspects of Administration (3) **Staff**
 Develops in depth some of the most basic contributions to administrative theory and practice made by past and current research, thought, and experience. Typically examines several major research studies relating to administration and organizational behavior, drawing on studies from psychology, sociology, social, and cultural anthropology, business administration, government, and other sources. Prerequisite, permission.
580 Planning and Decision Theory (3) **Staff**
 Development of a theory of planning including foundation for theory, process of planning, role of participants in planning, the auxiliary functions, and integration into a general theory. Prerequisite, permission.
586 Seminar in Administrative Organization (3) **Staff**
 A reading, research, and discussion course in organization theory covering concepts of power, authority and influence, objectives and goals, decision and planning theory, communications theory, delegation and decentralization, and considerations of values, social issues, and future trends in organization. Research and theories in other fields, such as the behavioral sciences and economics, will be related to business organization theory. Prerequisite, permission.
593, 594 Policy Determination and Administration (3,3) **Staff**
 Development of an appreciation for and skill in dealing with policy problems faced by the chief administrative officers of business firms. Analysis of problems which relate to determination of objectives; development of policies to achieve the objectives; organization of executive personnel to implement the policies; coordination of the organization; appraisal and adjustments to changes in the environment. The course is intended to give a clearer insight not only into how business decisions are reached, but into the motivation of businessmen in deciding what to do under varying circumstances. Case study seminars with simulation (business gaming) included in 594. (It is recommended that these courses be scheduled toward the end of the student's course work.) Prerequisites, permission for 593; 593 for 594.

- 604 Research (*, maximum 10)** **Staff**
 Prerequisite, permission.

- 700 Thesis (*)** **Staff**

- 702 Degree Final (0)** **Staff**
 Limited to students completing a nonthesis degree program.

PRODUCTION

- 341 Production Management I (3)** **Staff**
342 Production Management II (3) **Staff**
343 Production Management III (3) **Staff**
455 Analytical Techniques in Production Management (3) **Staff**
460 Manufacturing Administration (5) **Staff**
520 Seminar in Production (3) **Staff**
 Research, readings, and reports on current problems in the field using a topical approach with emphasis on such areas as product research and development, plant location, equipment policies, materials and quality controls, and production planning and control. Prerequisite, permission.
521 Seminar in Manufacturing (3) **Staff**
 Policy formulation and administration of manufacturing enterprises by analysis of case studies of selected industries emphasizing integration of the functions of production management with the major goals of the organization. Prerequisite, permission.

- 604 Research (*, maximum 10) Staff
Prerequisite, permission.
- 700 Thesis (*) Staff
- 702 Degree Final (0) Staff
Limited to students completing a nonthesis degree program.

REAL ESTATE

- 410 Real Estate Valuation and Administration (5) Staff
- 520 Seminar in Real Estate and Urban Land Economics (3) Staff
Analysis and evaluation of land allocation systems, institutional aspects of the real-estate industry, and problems arising from competition of spatial units within urban markets. Prerequisite, permission.
- 521 Seminar in Real Estate Administration (3) Staff
The administrative approach to management problems in the real-estate industry; analysis of the business functions of production, finance, and distribution of real-estate services. Prerequisite, permission.
- 604 Research (*, maximum 10) Staff
Prerequisite, permission.
- 700 Thesis (*) Staff
- 702 Degree Final (0) Staff
Limited to students completing a nonthesis degree program.

RISK AND INSURANCE

- 320 Insurance Theory (3) Staff
- 330 Risk Analysis (5) Staff
- 432 Advanced Risk Problems I (3) Staff
- 438 Advanced Risk Problems II (3) Staff
- 480 Risk Management (3) Staff
- 520 Seminar (3) Staff
Considers theoretical aspects of the insurance business rather than the public and sales factors. Examination is made of the economic theory underlying insurance and a number of the management problems facing the industry. Class is conducted on a discussion basis, with the members of the class preparing and presenting reports on the management problems discussed. Prerequisite, permission.
- 604 Research (*, maximum 10) Staff
Prerequisite, permission.
- 700 Thesis (*) Staff
- 702 Degree Final (0) Staff
Limited to students completing a nonthesis degree program.

TRANSPORTATION

- 372 Physical Distribution Management (3) Staff
- 440 Transportation Pricing (3) Staff
- 471 Public Policy in Transportation (3) Staff
- 481 Cases in Transportation Carrier Management (3) Staff
- 491 Cases in Physical Distribution Management (3) Staff
- 520 Seminar (3) Staff
Current transportation problems and practices. Relationship and effect of changing national policies and regulations on transportation businesses. Prerequisite, permission.
- 604 Research (*, maximum 10) Staff
Prerequisite, permission.
- 700 Thesis (*) Staff
- 702 Degree Final (0) Staff
Limited to students completing a nonthesis degree program.

SCHOOL OF DENTISTRY

Dean: MAURICE J. HICKEY, C301 Health Sciences

Director, Graduate Dental Education: SAUL SCHLUGER, B324 Health Sciences

The School of Dentistry offers, through the Graduate School, course work leading to a Master of Science in Dentistry degree with a major in orthodontics, pedodontics, restorative dentistry, oral pathology, oral surgery, periodontics, or endodontics. Classes are selectively admitted once a year at the beginning of the Autumn Quarter.

An applicant is eligible for admission to the Graduate School provided he is a graduate of a School of Dentistry approved by the Council on Dental Education of the American Dental Association, or of a university dental school, located outside of the North American continent, whose curriculum and admission requirements are similar to those of the School of Dentistry, University of Washington. The candidate must also meet the admission requirements of the Graduate School of the University of Washington.

After a candidate has been declared eligible for admission, his acceptance must be approved by the Graduate Admissions Committee of the School of Dentistry. This approval will be based upon the availability of places in the various classes. A maximum of ten students can be accommodated each year in orthodontics, two in pedodontics, and varying numbers, not to exceed two, in each of three phases of restorative dentistry, depending upon the availability of teaching and research staff members. There will be four openings for majors in periodontics, two in endodontics, one in oral pathology, and one in oral surgery, beginning each Autumn Quarter.

A minimum of eight consecutive quarters (24 months) of residence is required for the Master of Science in Dentistry degree with a major in periodontics, endodontics, and oral pathology; a minimum of six consecutive quarters (18 months) for a major in orthodontics and pedodontics; a minimum of three quarters (9 months) of basic science subjects plus a two-year hospital residency for a major in oral surgery, and a minimum of three quarters (9 months) for a major in restorative dentistry. Under the program for restorative dentistry, the student determines his major field (operative dentistry, fixed partial dentures, or prosthodontics) by the electives he selects. No foreign language is required.

ORAL PATHOLOGY. Required courses are: 520, 521; Pathology 441- 442- 443.

ORAL SURGERY. Required courses are: 500, 501, 502, 530, 531, 532, 540, 541, 542, 550; Oral Diagnosis and Treatment Planning 500; Oral Pathology 531; Conjoint (Med.) 426-427, 446-447; Conjoint (Med.) 585; Physiology and Biophysics, 484; Pathology 441-442-443; Psychiatry 400.

ORTHODONTICS. Required courses are: 500, 501, 502, 503, 504, 546, 547, 548, 549, 550; Dentistry 416, 417, 510, 511, 512, 513, 514, 515, 518, 588, 589; Pediatrics 505; Psychiatry 450.

PEDODONTICS. Required courses are: Conjoint 532; Dentistry 416, 417, 510, 511, 512, 513, 515; Orthodontics 500; Pediatrics 505 (Physical Growth of the Well Child); Pedodontics 500, 501, 502, 503, 504, 546, 547, 548, 549, 550; Psychiatry 450 (Principles of Personality Development).

PERIODONTICS. Required courses are: 546, 547, 548, 549, 550, 551, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 591, 592, 593; Anatomy 405, 406; Biochemistry 401, 402; Conjoint (Dent.) 532, 533; Psychiatry 400, 430; Dentistry 563.

ENDODONTICS. Required courses are: 535, 546, 547, 548, 549, 550, 551, 560, 561, 562, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 591, 592, 593; Anatomy 405, 406; Biochemistry 401, 402; Psychiatry 400; Microbiology 441, 442, 510.

RESTORATIVE DENTISTRY. Required courses are: Conjoint (Dent.) 532, 533; Dentistry 416, 417, 510, 511, 518, 580, 581, 588, 589, 590; Prosthodontics 560, 561, 562, 563, 564; and electives to make a total of 45 credits. In this program, the student selects electives to specialize in either operative dentistry, fixed partial dentures, or prosthodontics.

The approved list of electives for all programs includes such subjects as anatomy, anthropology, biometrics, child development, education, microbiology, nutrition, physiology, psychiatry, psychology, public health, speech, and maxillofacial prosthesis courses.

The programs are planned to prepare students to think independently, to evaluate their own services and the literature used, and to develop their clinical operative skills to a level to permit the successful practice of their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment, which comprise the clinician's most valuable armamentarium. The seminar method of teaching is generally used. The purpose of the programs is not only to train students in the art of their respective specialties, but also to encourage basic science research in specialties on a graduate level in possible preparation for academic careers or for research. Research may be undertaken in the major department or in cooperation with other departments. The opportunity for collaborative research is excellent because of the close proximity of the other colleges and departments in the University.

The graduate programs operate on the quarter system. There are three 11-week quarters in the academic school year. In order for the graduate dental programs to be continuous, the Summer Quarter has also been made an 11-week quarter.

Applications are received and processed throughout the school year. All applications for admission, as well as all necessary credentials, must be submitted on or before December 1 for consideration for entrance in the following Autumn Quarter.

COURSES

CONJOINT

532, 533 Basic Science (3,4)

Sreebny, Staff

Seminars on clinical pathological phenomena with their basic causal factors discussed from inter-disciplinary viewpoints.

DENTISTRY

416 Scientific Methodology in Dental Research (3)

Kraus

Principles of scientific methodology and basic statistics. Problem definition. Principles of classification. Collection of data. Techniques of analysis. Formation of hypothesis. Search of the literature. Experimentation. Sampling techniques. Graphic presentation of material. Ordering of quantitative data. Phenomena of distributions of biological data. Tests of significance, and their interpretation.

417 Scientific Methodology in Dental Research (3)

Kraus

Advanced biometric techniques. Analysis of variance and co-variance. Linear and curvilinear regression. Multiple regression and analysis of variance. Orthogonal polynomials. Experimental designs: general principles, precision, replications. Randomized blocks and Latin squares. Incomplete block designs.

510 Applied Osteology and Myology of the Head and Neck (2)

Moore

Detailed study as a background for the study of the growth and development of the head and for cephalometric roentgenogram interpretation. (Department of Orthodontics)

511 Roentgenographic Cephalometry (2)

Erickson, Moore

Basic principles, history, and techniques of roentgenographic cephalometry. (Department of Orthodontics)

512, 513 Growth and Development (2,2)

Moore

Review of the various methods of studying human growth, with special emphasis upon growth of the head, and study of the development of the dentition from birth through maturity; analysis of the factors that produce normal occlusion and malocclusion. Prerequisite, 512 for 513. (Department of Orthodontics)

514 Genetics and Its Applications to Dental Problems (2)

Kraus

Genes and the nature of genic action. Significance of mitosis and meiosis. Hereditary syndromes involving cranial structures. Introduction to population genetics. Genetics of the blood groups and their medico-legal implications. Hereditary aspects of the human dentition.

515 Evolution of the Human Cranio-facial Complex (2)

Kraus

Darwinism and the genetic basis for biological evolution. Principles of evolution. Paleontological evidence of human evolution. Evolution of the cranio-facial complex. Evolution of the dentition. Malocclusion from the genetic and phylogenetic perspectives. Variability in the cranio-facial complex and its interpretation in terms of evolution.

518 Scientific Methodology in Dental Research (2)

Kraus

Critical review of dental literature. Application of principles learned in 416 and 417 to selected monographs and papers in dentistry and related fields of the basic sciences.

535 Oral Microbiology (3)

Zeldow

An advanced lecture-laboratory survey of the oral flora and diseases related to their activity.

563 Minor Tooth Movement (2)

Moore

A lecture-clinic course dealing with minor tooth movement necessary to successful periodontal therapy. Prerequisite, permission.

- 580 Gnathodynamics (2)** **Moore, Young**
A seminar devoted to a comprehensive review of the temporomandibular joint and its associated structures. Thorough review of the anatomy and growth processes of the head and oral mechanism, with special emphasis upon the functional aspect of the human denture. Study of the instruments designed to imitate jaw movement and their effectiveness, together with the pathologies of the temporomandibular joint. (Departments of Orthodontics and Prosthodontics)
- 581 Restorative Treatment Planning (4)** **Morrison, Staff**
Coordinated application of knowledge gained from both graduate and undergraduate courses to the diagnosis and treatment of the more complicated cases. (Department of Operative Dentistry)
- 582 Cast Metal Restorations (4)** **Morrison, Staff**
Metallography of cast metals; physical properties of waxes and investments. Control of shrinkage. Interrelationships of physical properties of metals and physiology of oral tissues; thermal conductivity and pulpal response; galvanism; tissue tolerance in respect to various metals. Direct and indirect technics. Principles of cavity preparation that apply specifically to cast restorations. (Department of Fixed Partial Dentures)
- 588, 589, 590 Seminar in Occlusion (2,2,2)** **Staff**
A continuous seminar in the dynamics and physiology of occlusion and related phenomena.

ENDODONTICS

- 545, 547, 548 Clinical Endodontics (3,4,4)** **Ingle, Staff**
The clinical diagnosis and treatment of the pulpless tooth.
- 549, 550, 551 Clinical Endodontics (3,4,4)** **Ingle, Staff**
The clinical diagnosis and treatment of the pulpless tooth. Prerequisites, 546, 547, 548.
- 560, 561, 562 Restoration of the Pulpless Tooth (2,1,1)** **Morrison, Staff**
A lecture-clinical course emphasizing the restorative problem peculiar to the pulpless tooth.
- 576, 577, 578 Endodontic Seminar (2,2,2)** **Ingle, Staff**
A continuous weekly seminar devoted to review of endodontic and related literature and to discussion of teaching methods and philosophy of teaching and treatment.
- 579, 580, 581 Endodontic Seminar (2,2,2)** **Ingle, Staff**
A continuous weekly seminar devoted to review of endodontic and related literature and to discussion of teaching methods and philosophy of teaching and treatment. Prerequisites, 576, 577, 578.
- 582, 583, 584 Treatment Planning Seminar (2,2,2)** **Ingle, Staff**
A weekly seminar to discuss controversial treatment problems and difficult diagnostic cases.
- 585, 586, 587 Treatment Planning Seminar (2,2,2)** **Ingle, Staff**
A continuation of the weekly seminar to discuss controversial treatment problems and difficult diagnostic cases. Prerequisites, 582, 583, 584.
- 591, 592, 593 Clinical Practice Teaching (1,1,1)** **Ingle, Staff**
A closely supervised experience in teaching clinical endodontics to the undergraduate dental student. Prerequisites, 546, 547, 548, 576, 577, 578.
- 600 Research (*)** **Ingle, Staff**
An investigative program in one of the basic sciences under the direction of the departmental faculty. Prerequisite, permission.
- 700 Thesis (*)** **Ingle, Staff**
An investigative program carried out under the direction of a member of the Department staff by the candidate for the degree of Master of Science in Dentistry. The problem may be in one of the basic sciences or may have clinical application.

FIXED PARTIAL DENTURES

- 400, 401 Advanced Fixed Partial Dentures (1,1)** **Hagen, Morrison**
- 446 Advanced Clinical Crowns and Fixed Partial Dentures (8)** **Morrison, Staff**
- 561 Abutments and Distribution of Masticatory Stresses (4)** **Morrison, Staff**
Tissue responses of bone and periodontal membrane to increased masticatory loads; physical principles involved in replacements in different locations in the mouth; considerations involved in length of span; retention form and resistance form; study of broken-stress design and fixed removable attachments; esthetic consideration of abutment preparation.
- 562 Advanced Dental Ceramics (3)** **Morrison, Staff**
Baked porcelain as a substitute for lost tooth structure. Physical properties of the material; pyrochemical reactions in firing. Indications and contraindications in restorative dentistry. Color in dental ceramics; esthetics, a major consideration; use of stains. Veneer crowns and inlays—variant preparations of the teeth. Methods of impression taking, die formation, and construction of matrices. Manipulation of the various porcelains; the factors involved. Variations in technics of fabrication of restoration. Clinical considerations in respect to insertion and maintenance.
- 700 Thesis (*)** **Staff**
An investigative program carried out under the direction of a member of the Department staff by the candidate for the degree of Master of Science in Dentistry. The problem may be in one of the basic sciences or may have a clinical application.

OPERATIVE DENTISTRY

- 400, 401, 402 Advanced Operative Dentistry (1,1,1)** **Stibbs**
- 446 Advanced Clinical Operative Dentistry (7)** **Stibbs, Staff**
- 561 Plastics as Restorative Materials (4)** **Stibbs, Staff**
 Metallography of silver-tin amalgams; physical properties of zinc oxyphosphate cements, siliceous cements, and acrylic resins. Postoperative history of teeth restored with plastic materials; relative service life of materials. Basic and variant designs of cavity preparation, considering morphology of tooth, masticatory stress, physical properties of material, and location and size of restoration. Variant technics of manipulation of plastics; analysis of failures in plastics.
- 562 Gold Foil Restorations (4)** **Stibbs, Staff**
 Tissue reactions to operative procedures; response of dental pulp to thermal change; age changes in dentinal wall and histology of dental pulp. Indications and contraindications for gold foil in restorative procedures. Physical properties of dentin, cohesive and noncohesive pure gold foil, and platinum-centered foil. Rationale of manipulation of these materials. Modifications of basic cavity preparation for foil: Black, Ferrier, Woodbury, True, etc. Procedures for condensation and finishing.
- 700 Thesis (*)** **Staff**
 An investigative program carried out under the direction of a member of the Department staff by the candidate for the degree of Master of Science in Dentistry. The problem may be in one of the basic sciences or may have a clinical application.

ORAL DIAGNOSIS AND TREATMENT PLANNING

- 400, 401, 402 Advanced Oral Diagnosis and Treatment Planning (1,1,1)** **Jacobson**
- 446 Advanced Clinical Oral Diagnosis and Treatment Planning (1)** **Staff**
- 500 Extraoral Radiology (1)** **Jacobson**
 The purpose of this course is to familiarize the student with the various techniques necessary to produce diagnostic radiographic films of the jaws and their contiguous parts. This is done by means of seminar and clinical performance on patients.
- 502 Advanced Roentgenology (1)** **Jacobson**
 Techniques and radiographic interpretation of advanced oral roentgenology.

ORAL PATHOLOGY

- 520 Seminar in Oral Pathology (1-3, maximum 9)** **Staff**
 Conferences, seminars and round table discussions of advanced topics and recent literature in oral pathology. Prerequisite, permission.
- 531 Oral Pathology (5)** **Staff**
 The purposes of this course are to train the student so that he may intelligently interpret manifestations of pathology as they occur in the oral cavity and to stimulate an intellectual curiosity regarding the basic pathological mechanisms responsible for these changes.
- 600 Research (*)** **Staff**
 Prerequisite, permission.
- 700 Thesis (*)** **Staff**

ORAL SURGERY

- 500, 501, 502 Oral Surgery Seminar (2,2,2)** **Gehrig, Swenson, Staff**
 A continuous weekly seminar devoted to oral surgery theory and literature and practical case reviews.
- 530 Clinical Pathology Conference (1)** **Gehrig, Swenson, Staff**
 A clinical pathology conference of patients presented by graduate students.
- 540, 541, 542 Advanced Oral Surgery Clinic (3,3,3)** **Gehrig, Swenson, Staff**
 The clinical diagnosis and treatment of oral surgical conditions.
- 550 Anatomical Approaches to Head and Neck Surgery (2)** **Gehrig, Swenson, Staff**
 A study and laboratory dissection of the anatomical structures as they are found in major oral surgery procedures. Prerequisite, permission.
- 600 Research (*)** **Gehrig, Swenson, Staff**
 An investigative program in one of the basic or clinical sciences under the direction of the departmental faculty. Prerequisite, permission.
- 700 Thesis (*)** **Gehrig, Swenson, Staff**

ORTHODONTICS

- 500, 501, 502, 503, 504 Orthodontics Seminar (2,4,4,2,2)** **Staff**
 Methods of diagnosis, analysis, and treatment planning of malocclusion; analysis of methods and theoretical principles used in the treatment of malocclusion. The student presents a detailed case analysis and plan of treatment for each clinical patient he is supervising. Each course is a prerequisite to the following course.
- 546, 547, 548, 549, 550, 551 Clinical Orthodontics (4,5,5,5,5,6)** **Staff**
 Technics of construction and manipulation of the edgewise arch mechanism; application of the technics in the treatment of malocclusion. Treatment of patients begins in the second quarter. Each course is a prerequisite to the following course.

600 Research (*) **Staff**
Prerequisite, permission.

700 Thesis (*) **Staff**
An investigative program carried out under the direction of a member of the Department staff by the candidate for the degree of Master of Science in Dentistry. The problem may be in one of the basic sciences or may have a clinical application.

PEDODONTICS

500, 501, 502, 503, 504 Pedodontics Seminar (2,2,2,2,2) **Law**
Seminar on problems of tooth formation, development, calcification, and eruption in the child. Management of clinical problems of tooth development; operative procedures, pulp therapy, treatment planning, and the consideration of emotional factors in pedodontic practice.

546, 547, 548, 549, 550 Clinical Pedodontics (*,*,*,*,*) **Staff**
Advanced clinical practice. Assignment of selected cases, with student responsibility for complete examination, diagnosis, and treatment planning including completion of the case. The use of appliances to effect limited tooth movement in cases of space closure and the application of the Broadbent-Bolton cephalometer in diagnosis and treatment.

600 Research (*) **Staff**
Prerequisite, permission.

700 Thesis (*) **Staff**
An investigative program carried out under the direction of a member of the Department staff by the candidate for the degree of Master of Science in Dentistry. The problem may be in one of the basic sciences or may have a clinical application.

PERIODONTICS

546, 547, 548 Clinical Periodontics (3,4,4) **Schluger, Staff**
The clinical diagnosis and treatment of periodontal disease.

549, 550, 551 Clinical Periodontics (3,4,4) **Schluger, Staff**
The clinical diagnosis and treatment of periodontal disease. Prerequisites, 546, 547, 548.

576, 577, 578 Periodontics Seminar (2,2,2) **Stern**
A continuous weekly seminar devoted to review of periodontic and related literature and to discussion of teaching methods and philosophy of teaching and treatment.

579, 580, 581 Periodontics Seminar (2,2,2) **Stern**
A continuation of the weekly seminars devoted to review of periodontic and related literature and to discussion of teaching methods and philosophy of teaching and treatment. Prerequisites, 576, 577, 578.

582, 583, 584 Treatment Planning Seminar (2,2,2) **Schluger**
A weekly seminar to discuss controversial treatment problems and difficult diagnostic cases.

585, 586, 587 Treatment Planning Seminar (2,2,2) **Schluger**
A continuation of the weekly seminar to discuss controversial treatment problems and difficult diagnostic cases. Prerequisites, 582, 583, 584.

591, 592, 593 Clinical Practice Teaching (1,1,1) **Ogilvie, Staff**
A closely supervised experience in teaching clinical periodontics to the undergraduate dental student. Prerequisites, 546, 547, 548, 576, 577, 578.

600 Research (*) **Staff**
An investigative program in one of the basic sciences under the direction of the departmental faculty. Prerequisite, permission.

700 Thesis (*) **Schluger, Staff**
An investigative program carried out under the direction of a member of the Department staff by the candidate for the degree of Master of Science in Dentistry. The problem may be in one of the basic sciences or may have clinical application.

PROSTHODONTICS

400, 401 Advanced Complete Denture Prosthodontics (1,1) **Young, Special Lecturers**

402 Advanced Removable Partial Denture Prosthodontics (1) **Wykhuis**

446 Senior Clinical Prosthodontics (5) **Staff**

560 Complete Dentures (4) **Young**
A seminar-laboratory-clinic course dealing with the needs for reproduction of oral tissues in the edentulous mouth; the physical requirements of various types of complete denture restorations; routines, materials, equipments used; tissue responses to physical and functional stimuli.

561 Immediate Dentures (4) **Young**
A seminar-laboratory-clinic course in immediate complete denture treatments. Discussion of diagnosis and treatment planning; variations in basic denture procedures; the surgical operations preparing the ridges for dentures; tissue reaction and wound healing; postoperative care; patient information. Clinical operations using procedures and equipments for denture construction.

- 562 Removable Partial Dentures (4)** **Young**
A seminar-laboratory-clinic course in removable partial denture treatments. Discussions of diagnosis and treatment planning; stresses on mucosa, bone, and abutment teeth, and the influence of natural and modified tooth crowns on abutment values. Clinical operations using procedures and equipments for removable partial denture construction.
- 563 Obturators and Speech Appliances (2)** **Beder**
Theories, principles, technical and clinical experience in the fabrication of prostheses for the patient presenting congenital or acquired defects of the palate and contiguous tissue. Active participation in affiliated hospital programs will be provided whenever available. Desirous for applicant to furnish own patient if possible.
- 564 Definitive and Adjunctive Maxillofacial Appliances (2)** **Beder**
Theories, principles, technical experience in the fabrication of somatoprostheses, appliances for the osteotomized mandible, vehicle and protective devices in irradiation therapy, stents, cranial prostheses, and splints. Active participation in affiliated hospital programs will be provided whenever available. Desirous for applicant to furnish own patient if possible.
- 700 Thesis (*)** **Staff**
An investigative program carried out under the direction of a member of the Department staff by the candidate for the degree of Master of Science in Dentistry. The problem may be in one of the basic sciences or may have a clinical application.

COLLEGE OF EDUCATION

Dean: GORDON CANFIELD LEE, 230 Miller Hall

EDUCATIONAL OBJECTIVES OF THE GRADUATE PROGRAMS IN EDUCATION. The advanced degree programs in Education are designed to further the knowledge of candidates in specialized subject-matter areas and to offer advanced professional training appropriate to the goal of the individual. Qualifications for acceptance include a solid undergraduate training and successful teaching experience. In addition to opportunities for specialized training, candidates are required to have training in the conduct and application of research procedures and the development of communication skills.

The College of Education offers courses leading to the degrees of Master of Arts, Master of Education, Doctor of Education, and Doctor of Philosophy.

All candidates for advanced degrees are required to have at least 20 credits in background courses in education. One year of successful teaching or administrative experience is required for admission to candidacy for master's degrees; two years of continuously successful teaching or administrative experience are required for admission to doctoral candidacy.

MASTER OF ARTS. The requirements are: 24 credits in education, including 591 and 10 credits in each of two fields in education; and 12 credits of approved course work in a department other than education. The fields in education from which work may be taken for the M.A. degree are: higher education, curriculum, educational administration and supervision, educational methods, educational psychology, educational sociology, elementary education, guidance and counseling, history and philosophy of education, and remedial and special education. Students must pass written final examinations, and present an acceptable thesis on an approved topic.

Master's candidates who are taking a minor in education must present a minimum of 12 approved credits in education courses.

MASTER OF EDUCATION. The requirements are: 27 credits in education, including 591 and a minimum of 5 credits in each of four fields in education; and 15 credits in two departments other than education, including 5 credits in courses numbered above 500. The fields in education from which work may be taken for the M.Ed. degree are: audio-visual education, business education, higher education, comparative education, curriculum, educational administration, educational methods, educational psychology, educational sociology, educational supervision, elementary education, guidance and counseling, history and philosophy of education, industrial education, remedial and special education, secondary education, and tests and measurements. Students must pass written final examinations over the selected four fields in education and present an acceptable thesis on an approved topic.

DOCTOR OF EDUCATION. The requirements are: 60 credits in education, including 490 or 491, 587 and 588 or 589, 591, a minimum of 12 credits in one field in education, a minimum of 9 credits in each of three other fields in education, and electives to make up the total; and 45 credits in departments other than education, including 9 to 15 credits each in arts and letters, science and mathematics, foreign language, and social sciences. The fields in education from which prospective Ed.D. candidates may elect work are: higher education, curriculum, educational administration and supervision, educational methods, educational psychology, educational sociology, elementary education, guidance and counseling, history and philosophy of education, and remedial and special education. Normally, it is expected that students who plan to enter upon doctoral work will have maintained a grade-point average of 3.50 or better in their work for the master's degree.

DOCTOR OF PHILOSOPHY. The requirements are: 70 credits in education, including 490, 587 and 588 or 589, 591, and approximately 15 credits in each of three fields in education; and either 35 credits in one department other than education, or 20 credits in each of two departments other than education. The fields in education in which prospective Ph.D. candidates may specialize are: higher education, curriculum, educational administration and supervision, educational methods, educational psychology, elementary education, guidance and counseling, history and philosophy of education, and remedial and special education. Normally, it is expected that students who plan to enter upon doctoral work will have maintained a grade-point average of 3.50 or better in their work for the master's degree.

Doctoral candidates who are taking a minor in education must present a minimum of 35 approved credits in education courses.

COURSES

For a listing of courses offered any given quarter, together with the time and place of meeting, consult the Yearly Time Schedule which is available for reference in the College of Education Advisory Office, 221 Miller Hall. Since the amount of credit for courses offered during Summer Quarter varies slightly in some cases from that given during the regular quarters, it is advisable to refer to the Summer Quarter Bulletin for the specific number of credits for a particular course.

401 Advanced Educational Psychology (3)	Fea
Prerequisite, permission.	
402 Child Study and Development (3)	Hayden, McDonald
Prerequisite, permission.	
403 Psychology of Elementary School Subjects (3)	Foster
Prerequisite, permission.	
404 Education of Exceptional Children (3)	Hayden
Prerequisite, permission.	
405 Problems of Adolescence (3)	Fea
Prerequisite, 209 and permission.	
406 Character Education (3)	Staff
Prerequisite, permission.	
407 Teaching the Gifted Child (3)	Staff
Prerequisite, permission.	
407W Workshop in Teaching the Gifted Child (3)	Staff
Prerequisite, permission.	
408 Mental Hygiene for Teachers and Administrators (3)	Salyer
Prerequisite, permission.	
409AJ Training of the Mentally Retarded (5)	Bijou, Hayden
Offered jointly with the Department of Psychology. (Offered Summer Quarter only.) Pre-requisite, permission.	
409BJ Psychology of the Mentally Retarded (5)	Bijou, Hayden
Offered jointly with the Department of Psychology. (Offered Summer Quarter only.) Pre-requisite, permission.	
409CJ Training the Emotionally Disturbed (5)	Hayden, Strother
Offered jointly with the Department of Psychology. (Offered Summer Quarter only.) Pre-requisite, permission.	
409DJ Psychology of the Emotionally Disturbed (5)	Hayden, Strother
Offered jointly with the Department of Psychology. (Offered Summer Quarter only.) Pre-requisite, permission.	

409F The Teaching of Speech to the Deaf (6)	Staff
Prerequisite, permission.	
409G The Teaching of Language to the Deaf (6)	Staff
Prerequisite, permission.	
409WJ Advanced Workshop in the Education of the Retarded (10)	Staff
Offered jointly with the Department of Psychology. (Offered Summer Quarter only.) Prerequisite, permission.	
410 Educational Sociology (3)	Jessup
Prerequisite, permission.	
412 Foundations of Freedom and Education (3)	Staff
(Offered Summer Quarter only.) Prerequisite, permission.	
415 Principles of Safety Education (3)	Corbally
Prerequisite, permission.	
415D Principles of Safety Education: Driver Education (5)	Corbally
Prerequisite, permission.	
417 Adult Education (3)	Jessup
Prerequisite, permission.	
417W Workshop for Administrators of Adult Education (3)	Staff
Prerequisite, permission.	
420 Theory and Technique of Kindergarten and Primary Teaching (3)	MacDonald
Prerequisite, permission.	
421 Remedial Education (3)	Fea
Prerequisite, permission.	
422 Remedial Education Clinic (3)	Fea
Prerequisite, 425 or equivalent.	
425 Remedial Reading (3)	Fea
Prerequisite, 374 or equivalent.	
430 Public School Administration (3)	Strayer
Prerequisite, permission.	
430P Workshop for Public School Business Officials (2)	Staff
(Offered Summer Quarter only.)	
430W Workshop in School Administration (1)	Staff
(Offered Summer Quarter only.)	
431 School Finance (3)	Strayer
Prerequisite, 430 or permission.	
433 Elementary School Organization and Administration (3)	Jessup
Prerequisite, permission.	
434 High School Organization and Administration (3)	Strayer
Prerequisite, permission.	
435 Administration and Supervision of Junior High Schools (3)	Staff
Prerequisite, permission.	
437 School Supervision (3)	Jessup
Prerequisite, permission.	
439 Pupil Personnel and Progress Reporting (3)	Vopni
Prerequisite, permission.	
445V Principles and Objectives of Vocational Education (3)	Baily
Prerequisite, permission.	
447 Principles of Guidance (3)	Salyer
Prerequisite, permission.	
448E Guidance in the Elementary School (3)	Salyer
Prerequisite, 447.	
448S Guidance in the Secondary School (3)	Salyer
Prerequisite, 447.	
449 Workshop on Pupil Personnel Service (3)	Vopni
Prerequisite, permission.	
455 Auditory and Visual Aids in Teaching (3)	Hayden
Prerequisite, permission.	
456 Auditory and Visual Aids in Teaching (3)	Hayden
Prerequisite, 455 or equivalent.	
457 Audio-Visual Aids Management (3)	Hayden
Prerequisite, permission.	
459J Television in the Schools (3)	Staff
Offered jointly with the School of Communications. Prerequisite, permission.	
460J Field Training in Health Education (5)	Vavra
Offered jointly with the Department of Preventive Medicine. Prerequisite, permission.	

461 Elementary School Curriculum (3) Prerequisite, permission.	Jessup
466 Workshop in Curriculum Improvement (1-15, maximum 15) Prerequisite, 467 or permission.	Draper
467 Principles and Techniques of Curriculum Improvement (3) Prerequisite, 360.	Draper
470 Historical Backgrounds of Educational Methods (3) Prerequisite, permission.	Staff
471D Observation and Student Teaching of Deaf Children (6) Prerequisite, permission.	Staff
471E,X,S Advanced Directed Teaching (4-16) Prerequisite, 371 or permission.	Staff
474 Workshop in the Improvement of Teaching (5) Prerequisite, permission.	Boroughs, Foster, Hayden, Vopni
475 Improvement of Teaching (3) Prerequisite, permission.	Hayden
475A Improvement of Teaching: Secondary Mathematics (5) Prerequisite, teaching experience or permission.	Staff
475B Improvement of Teaching: Arithmetic (3) Prerequisite, permission.	Vopni
475GJ Geography in the Social Studies Curriculum (5) Offered jointly with the Department of Geography. Prerequisite, permission.	Staff
475H Improvement of Teaching: Language Arts (3) Prerequisite, permission.	Fea
475I Improvement of Teaching: Industrial Education (3) Prerequisite, permission.	Baily
475LJ Improvement of Teaching: Latin (5) Offered jointly with the Department of Classics. (Offered Summer Quarter only.) Prerequisite, permission.	Grummel
475M Improvement of Teaching: Social Studies (3) Prerequisite, permission.	Boroughs
475N Introduction to the Literature of Nature Study (2) Prerequisite, permission.	Vopni
475S Improvement of Teaching: Elementary School Science (3) Prerequisite, permission.	Vopni
475T Improvement of Teaching: Secondary School Science (3) Prerequisite, permission.	Vopni
475XJ Caesar for High School Teachers (2½) Offered jointly with the Department of Classics. (Offered Summer Quarter only.) Prerequisite, permission.	Staff
476D Materials and Methods of Teaching Typewriting (2½) (Offered Summer Quarter only.) Prerequisite, permission.	Staff
476E Materials and Methods of Teaching Office and Clerical Practice (2½) (Offered Summer Quarter only.) Prerequisite, permission.	Staff
476H Workshop in Current Problems of Distributive Education (2½, maximum 5) (Offered Summer Quarter only.) Prerequisite, permission.	Staff
476I Problems of Distributive Education (3) Prerequisite, permission.	Staff
476K Coordination of Distributive Education and Diversified Occupational Programs (2-3, maximum 3) (Offered Summer Quarter only.) Prerequisite, permission.	Staff
476L Materials and Methods of Teaching Gregg Shorthand and Transcription (2½) (Offered Summer Quarter only.) Prerequisite, permission.	Staff
476M Principles and Problems of Business Education (2½) (Offered Summer Quarter only.) Prerequisite, permission.	Staff
476N Materials and Methods of Teaching Bookkeeping and General Business Subjects (2½) (Offered Summer Quarter only.) Prerequisite, permission.	Staff
477 The Teaching of Reading (3) Prerequisite, permission.	Fea
478J Workshop in Elementary School Physical Education (2½) Offered jointly with the Department of Women's Physical and Health Education. (Offered Summer Quarter only.) Prerequisite, permission.	Staff
480 History of Education (5) Prerequisite, permission.	Jessup

- 481 Workshop in Industrial Education (3-10, maximum 10)** **Baily, Staff**
Prerequisite, permission.
- 482 Advanced Tools and Materials (3)** **Baily**
Prerequisite, permission.
- 483 Organization and Administration of Industrial Education (3)** **Baily**
Prerequisite, permission.
- 484 Comparative Education (5)** **Jessup**
Prerequisite, permission.
- 485 Advanced General Shop for Industrial Education Teachers (3)** **Baily**
Prerequisite, 182 or equivalent, or permission.
- 486 Trends in Industrial Education (3)** **Baily**
Prerequisite, permission.
- 487 Instructional Analysis for Industrial Education Teachers (3)** **Baily**
Prerequisite, permission.
- 488 Philosophy of Education (3)** **Staff**
Prerequisite, permission.
- 489 Current Problems in Industrial Education (3)** **Baily**
Prerequisite, permission.
- 490 Educational Statistics (5)** **Dvorak**
Prerequisite, 390.
- 491 Advanced Educational Measurements (3)** **Dvorak**
Prerequisite, 390 and 490, or Psychology 301 or equivalent.
- 497J Special Topics in Mathematics for Teachers (2-5, maximum 15)** **Staff**
Offered jointly with the Department of Mathematics. Prerequisite, permission.
- 501 Seminar in Educational Psychology (3)** **Fea**
Psychological principles of education; summary of research results in application to school problems. Prerequisites, a background in general and educational psychology, and permission.
- 506 Internship in Special Education (2-10, maximum 10)** **Hayden**
Supervised experiences in special education for advanced students. Prerequisite, permission.
- 510 Seminar in Educational Sociology (3)** **Jessup**
Application of sociological principles to school problems; individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees. Prerequisite, permission.
- 522 Seminar in Diagnostic and Remedial Work in Education (3)** **Fea**
Study of the recent research in diagnosis of and remediation for learning difficulties in the academic school subjects. Prerequisite, permission.
- 525 Seminar in Elementary Education (3)** **Boroughs**
An exploration into the philosophy, history, curriculum, and method of the elementary school, with emphasis upon individual research. Prerequisite, doctoral candidacy or special permission.
- 531 Seminar in Administration: Finance (5)** **Strayer**
Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The relation of costs to efficiency; preparation of the budget, salary schedules, sources of school revenue, problems of state and local school support, and state and local control of school funds; financing capital outlay, research, and public relations. Prerequisites, 430, 431, and doctoral candidacy or special permission.
- 533 Seminar in Administration: School Buildings (3)** **Strayer**
School building surveys; sharing responsibility for the educational plant; types of school buildings and building materials; appraisal of existing school plants; heating and ventilating; acoustics; special areas; audio-visual illumination and color; preparation of floor plans on the basis of educational plans; building maintenance and school insurance; modernizing existing buildings; financing the school plant program. Prerequisites, 430 and doctoral candidacy or special permission.
- 536 Internship in Educational Administration (1-10, maximum 10)** **Strayer**
Recommended for all doctoral candidates preparing for administrative positions except those having sufficient experience as administrators. Half-time work in a school district or districts in close proximity to the University of Washington for one, two, or three quarters, depending upon the student's previous experience. Supervision by staff members of the College of Education and the superintendent of schools or school principal in the selected school district. Prerequisites, 430 and doctoral candidacy or special permission.
- 538 Public Relations for Public Schools (3)** **Strayer**
Relationship between the public schools and the public, with emphasis on the two-way flow of ideas between school and community; the school board, administrators, advisory groups, and the public relations program; school personnel and the public; pupils, parents, and community attitudes; proven techniques and media; special versus continuous public relations programs; special problems such as school finance, school extracurricular activities, and building programs. Prerequisites, 430 and doctoral candidacy or special permission.
- 541 Student Appraisal (3)** **Vopni**
Emphasis on the utilization of objective measures for purposes of guidance. Prerequisite, 447 or permission.
- 542 Information Services (3)** **Vopni**
Emphasis on educational and vocational guidance. Prerequisite, 447 or permission.

- 543 Counseling (3)** **Vopni**
Emphasis on the theory and practice of pupil counseling. Prerequisite, 447 or permission.
- 544 Organization and Administration of Guidance Programs (3)** **Vopni**
Basic considerations in planning, organizing, and operating school guidance programs; analysis of issues and problems encountered in formulating policy and evaluating services. Prerequisite, 447 or permission.
- 546 Internship in Guidance (2-10, maximum 10)** **Vopni**
Supervised practice in guidance activities for advanced students. Prerequisite, 447 or permission.
- 547 Seminar in Guidance (3)** **Corbally**
Individual problems in the areas of organization, supervision, and administration of guidance in the elementary and secondary schools. Prerequisites, 447 or equivalent and doctoral candidacy or special permission.
- 550 Development and Organization of Higher Education (3)** **Staff**
Higher education from the standpoint of the new instructor; history of administrative organization. Prerequisite, doctoral candidacy or special permission.
- 551 College Problems (3)** **Staff**
A consideration of the pertinent problems of the college teacher and his tasks. Prerequisite, doctoral candidacy or special permission.
- 552 Improvement of College Teaching (3)** **Hayden**
An analysis of type of teaching applicable to the college level, with special reference to lectures, assignments, use of textbooks, student reports, quiz techniques, panel discussions, the use of visual aids, syllabi, and bibliographies. Prerequisite, doctoral candidacy or special permission.
- 555 The Junior College (3)** **Staff**
An outline study of the history, philosophy, and curriculum of junior colleges in general, with special emphasis upon junior colleges in the Northwest. Special problem studies are optional.
- 560 Seminar in Curriculum: Cooperative Research in Curriculum (3)** **Draper**
Research studies in the field of curriculum development will be designed for experimentation in the public schools. An analytical study will be made of the place of action research in the curriculum field. Prerequisites, 467 and doctoral candidacy or special permission.
- 561 Seminar in Curriculum: Studies in Fusion, Correlation, and Child-Centered Programs (3)** **Draper**
Research in fusion, correlation, and child-centered programs in the large block of time. Prerequisites, 467 and doctoral candidacy or special permission.
- 568 Seminar in Secondary Education (3)** **Draper**
Research in the field of extraclass activities with emphasis on evaluation. Fusion and correlation with curriculum areas will be studied. Prerequisite, 467.
- 570, 571 Problems in Modern Methods (3,3)** **Foster**
The nature of teaching and the problems involved in the underlying principles and practices of types of modern methodology, with special reference to experimental studies in the project, the unit, socialized recitation, audio-visual aids, supervised study, lesson plans, lectures, assignments, and the activity movement.
- 572J, 573J Romance Language Teachers' Seminar (2½, 2½)** **Staff**
Theory and practice of foreign language learning; how language is learned; the principal obstacles; techniques for learning a foreign language as a child, as an adolescent, as an adult; the possibilities and the limits of electronic aids. Offered jointly with the Department of Romance Languages and Literature. (Offered Summer Quarter only.)
- 575 Seminar in Language Arts (3)** **Fea**
Study of recent research in listening, oral language, reading and written language, emphasizing psychological and interrelated aspects. (Offered Summer Quarter only.) Prerequisites, 374, 475 or equivalent, and permission.
- 587, 588, 589 Seminar in Philosophy of Education (3,3,3)** **Staff**
The nature and meaning of philosophy as it relates to educational objectives, methodology, curriculum, and administration, from the points of view represented in idealism, realism, naturalism, and pragmatism.
- 591 Methods of Educational Research (3)** **Hayden**
A study of devices and methods used in conducting research. Designed to assist students in planning, organizing, and writing theses. Required of candidates for advanced degrees.
- 600 Research (*)** **Staff**
Prerequisites, 591 and permission of instructor and Director of Graduate Studies in Education. Instructor and field must be designated in registration.
 Audio-visual education Educational supervision
 Higher education Elementary education
 Comparative education Guidance and counseling
 Curriculum History and philosophy of education
 Educational administration Industrial education
 Educational methods Remedial and special education
 Educational psychology Secondary education
 Educational sociology Tests and measurements
- 700 Thesis (*)** **Staff**
Advanced degree candidates in education must register for "thesis." When registration is for "thesis only," an incidental fee of \$56.50 is charged and the work may be done *in absentia* by special permission.

COLLEGE OF ENGINEERING

Dean: HAROLD E. WESSMAN, 206 Guggenheim Hall

In the College of Engineering, graduate study leading to a Master of Science degree with departmental designation is available in the Departments of Aeronautical, Chemical, Civil, Electrical, and Mechanical Engineering, and in the School of Mineral Engineering through the Divisions of Ceramic, Metallurgical, and Mining Engineering.

The degree of Master of Science in Engineering (without departmental designation) is offered to qualified advanced students whose undergraduate majors have been in departments different from those in which they have worked toward master's degrees and to students who are doing graduate work in several engineering departments with the approval of advisers in their major departments.

The degrees of Master of Aeronautical Engineering and Master of Electrical Engineering are offered to students who satisfactorily complete an approved two-year program of graduate work in aeronautical or electrical engineering.

Graduate study leading to the Doctor of Philosophy degree is available in aeronautical, chemical, civil, electrical, and mechanical engineering, in metallurgy, and through the interdisciplinary program of engineering mechanics.

Admission to graduate study in engineering requires the approval of both the Graduate School and the engineering department in which the major work will be done.

NUCLEAR ENGINEERING

A graduate program in Nuclear Engineering leading to the degree Master of Science in Engineering is now offered by the College of Engineering. The degree is designated as Major: Nuclear Engineering. The program is a cooperative undertaking of the Departments of Chemical Engineering, Civil Engineering, Electrical Engineering, Mechanical Engineering, and Metallurgical Engineering, and is administered by a faculty committee composed of representatives from these departments under the chairmanship of Dr. Albert L. Babb, Department of Chemical Engineering.

The requirements for the Master of Science in Engineering degree are 36 credits of course work and a thesis equivalent to 9 credits of course work. The course work is usually divided in the ratio of two to one between nuclear engineering courses and selected courses from other departments. It is recommended that candidates for this degree include 500, 501, 510, and 539 among their courses. Attendance in N521 will normally be required for three quarters. No foreign language is required.

Doctorate programs are available for students with undergraduate majors in Chemical and Mechanical Engineering and who have a master's degree, with a major in Nuclear Engineering or equivalent.

COURSES

444 Nuclear Materials (4)	Polonis
445 Nuclear Metallurgy Laboratory (2)	Polonis
484 Introduction to Nuclear Engineering (4)	Babb
485 Nuclear Instruments (3)	Wilson
486 Nuclear Power Plants (3)	McFeron
487 Tracer Techniques in Engineering Measurements (3)	Feroy
500 Nuclear Reactor Theory I (5)	Garlid

A lecture course in nuclear reactor physics covering: nuclear reactions; production of neutrons; diffusion of neutrons; slowing down of neutrons; Fermi Age Theory and applications; general theory of homogeneous multiplying systems and heterogeneous reactors. Prerequisites, 484 or permission, Physics 323 or equivalent, and Mathematics 221; equivalent of Mathematics 428 recommended.

- 501 Nuclear Reactor Theory II and Laboratory (4)** **Staff**
A continuation of 500, covering time behavior of nuclear reactors; fundamentals of reactor control; elements of perturbation and transport theory. The laboratory work will center around the natural uranium-graphite reactor. Experiments will include measurements of the scattering and absorption of neutrons, flux distributions in the exponential pile, lattice parameters, and studies with a reactor simulator and reactor control circuits. Prerequisite, 500.
- 502 Nuclear Engineering Laboratory (5)** **Staff**
An advanced laboratory course centered around the 10-KW nuclear reactor. Experiments will include studies of reactor operating characteristics and measurements utilizing gamma and neutron radiations. Prerequisite, 501.
- 510 Nuclear Reactor Engineering (3)** **Babb**
An advanced course in engineering analysis of nuclear reactor systems. The course covers core design methods; heat generation and distribution in nuclear reactor systems; the removal and utilization of heat for power production; fuel cycles and processing of irradiated reactor fuels; shielding of nuclear radiations. Prerequisite, 500.
- N521, N522, N523 Graduate Seminar (0,0,1)** **Staff**
- 539 Nuclear Reactor Design (3)** **McFeron**
A design laboratory course involving the synthesis of reactor theory, engineering analysis, material specifications, and economics to meet the design specifications for a complete nuclear reactor facility. Emphasis upon cycle analysis, hazards, arrangements and requirements peculiar to nuclear reactor plants. Prerequisite, 510.
- 559 Control of Radioactive Wastes (3)** **Bogan**
Environmental problems resulting from utilization of nuclear reactions; radioactive waste disposal practice; decontamination of water supplies; reactor site location and control of stream and atmospheric pollution. Prerequisite, Physics 320 or permission.
- 599 Special Topics in Nuclear Engineering (2-5, maximum 15)** **Staff**
Discussions and readings of topics of current interest in the field of nuclear engineering research. Subject matter may include reactor fuels and materials, reactor dynamics and control, instrumentation, thermonuclear processes, and direct conversion problems.
- 700 Thesis (*)** **Staff**

Additional complementary courses are offered in the Departments of Chemistry, Mathematics, and Physics within the College of Arts and Sciences. Mathematics 427, 428, and 429 (Topics in Applied Analysis) are particularly recommended for majors in nuclear engineering. Students having prerequisite courses in physical chemistry will be interested in the following two courses: Chemistry 418 (Radiochemistry) and 419 (Radiochemistry Laboratory).

All students planning to take graduate work in nuclear engineering are advised to include in their undergraduate programs the following courses or their equivalents: Mathematics 221 (Elements of Differential Equations); Physics 320 (Introduction to Modern Physics), Physics 323 (Introduction to Nuclear Physics); Materials Engineering 250 (Fundamentals of Materials Science); Nuclear Engineering 484 (Introduction to Nuclear Engineering).

Questions concerning the nuclear engineering program should be addressed to Dr. Albert L. Babb.

AERONAUTICAL ENGINEERING

Executive Officer: RICHARD JOHN H. BOLLARD, 207 Guggenheim Hall

The Department of Aeronautical Engineering offers courses leading to the advanced degrees of Master of Science in Aeronautical Engineering, Master of Science in Engineering (see page 173), Master of Aeronautical Engineering, and Doctor of Philosophy. Students who intend to work toward advanced degrees must meet the requirements of the Graduate School, and must have, or must take without graduate credit, a first course in differential equations. Candidates for advanced degrees with insufficient undergraduate aeronautical engineering background may be required to take some undergraduate courses which are not counted toward the advanced degree.

MASTER OF SCIENCE IN AERONAUTICAL ENGINEERING. A total of 30 credits of course work and a thesis equivalent to 9 credits of course work are required. All programs of study must be approved by the Department and will normally include aeronautical courses in the 500 series, plus selected courses from other depart-

ments. No foreign language is required. The thesis for the Master of Science degree may be waived in certain cases for students who present evidence of having performed a thesis-type investigation. Such a waiver requires staff approval and 9 additional credits of course work.

MASTER OF AERONAUTICAL ENGINEERING. A total of 72 credits of course work and a more extensive thesis, equivalent to 18 credits of course work, are required for this more advanced degree. Other requirements are similar to those for the Master of Science degree.

DOCTOR OF PHILOSOPHY. Candidates for this degree must complete an approved program of studies and a research program which makes a definite contribution to knowledge.

Before the student is allowed to take the General Examination for admission to candidacy, he must take comprehensive written and oral examinations to test his understanding and comprehension of the broad field of Aeronautical Engineering, including aerodynamics, dynamics, structures, aeroelasticity, mathematics, and physics. After admission to candidacy and while carrying out the investigation for his thesis, it is recommended that the student be in full-time residence for at least one academic year of three consecutive quarters.

COURSES

300, 301, 302 Aerodynamics (3,3,3)	Staff
320 Aerodynamics Laboratory (3)	Staff
330, 331, 332 Aircraft Structural Analysis (3,3,3)	Dill, O'Brien
350 Aircraft Structural Laboratory (2)	Dill, O'Brien
360 Aircraft Engines (3)	Eastman
N390-N391-392 Seminar (0-0-1)	Eastman, Staff
404 Introduction to Theoretical Aerodynamics (3)	Ganzer, Street
405 Elements of Gas Dynamics (3)	Ganzer, Street
410, 411, 412 Aircraft Design (3,3,3)	Staff
422 Aerodynamics Laboratory (3)	Staff
425 Flight Test Laboratory (3)	Joppa
430 Aerodynamic Performance, Stability, and Control (3)	Ganzer
441 Advanced Structural Design (3)	O'Brien
450 Astronautics (3)	Street
461 Jet Propulsion (3)	Ganzer
462 Propellers and Moving Wing Systems (3)	Eastman
470 Analytical Problems in Aeronautics (3)	Staff
480 Elementary Dynamics (3)	Staff
481 Elementary Aeroelasticity (3)	Martin, O'Brien
499 Special Projects (2-5, maximum 10)	Staff
505 Aerodynamics of Incompressible Fluids (3)	Fyfe, Street
Theory of perfect incompressible fluids; Euler's equations of motion; circulation and vorticity, potential flow, conformal transformations, and theory of the two-dimensional airfoil; lifting line theory of the finite wing. Prerequisite, 404 or permission.	
506 Aerodynamics of Incompressible Fluids (3)	Street
Theory of viscous incompressible fluids; the Navier-Stokes equations, dimensional analysis, and exact solutions; Prandtl's boundary layer theory, Karman's integral theorem, and laminar and turbulent boundary layer over airfoils and bodies of revolution.	
508 Aerodynamics of Compressible Fluids (3)	Fyfe, Street
Equations of motion in general vector form; exact solutions for shock waves, expansion waves, and flow past cones; small perturbation theory applied to bodies of revolution and wings in subsonic and supersonic flow. Prerequisite, 405 or permission.	
539 Hypersonic Aerodynamics (3)	Street
Fundamental concepts of hypersonic flow; Newtonian flow theory, small disturbance theory and other known methods of solution of inviscid flow problems; the hypersonic laminar boundary layer; flow over flat plate; the blunt body problem; high temperature effects. Prerequisite, 405 or permission.	

- 510 Nonstationary Gas Dynamics (3)** **Fyfe, O'Brien**
Time dependent fluid flow problems; wave and shock propagation in gases and solids; the interaction of different wave forms and boundaries. Prerequisite, 569J or permission.
- 511 Unsteady Aerodynamics (3)** **Fyfe, O'Brien**
Oscillating airfoils at subsonic and supersonic speeds; consideration of wings and bodies in unsteady flow. Prerequisites, 404, 405, or permission.
- 513 Heat Transfer in Aeronautics (3)** **Street**
Laws of heat transfer; forced convection in laminar and turbulent boundary layers with heat transfer; methods of alleviation and applications in high-speed aerodynamic heating. Prerequisite, 506 or permission.
- 514 Rarefied Gas Dynamics (3)** **Street**
Kinetic theory of gases; Boltzmann equation and the Maxwell transport equation; equations of continuum and slip flow, free-molecule and near free-molecule flows; applications to ultra-high altitude flight. Prerequisites, 405 and permission.
- 516 Stability and Control I (3)** **Ganzer**
Aerodynamics of control; the general problem of dynamic stability; the influence of aerodynamic parameters on flying characteristics. Prerequisite, 430 or equivalent.
- 517 Stability and Control II (3)** **Ganzer**
Equations of motion with control terms; response of airplane to actuation of controls; automatic stability and control. Prerequisite, 516.
- N520-N521-522 Seminar (0-0-1)** **Staff**
- 523 Seminar in Aerodynamics (1-2, maximum 12)** **Fyfe, Street**
Study of recent advances in aerodynamics with students and staff reporting on recent publications. Topics vary from year to year. Open only to students having the M.S. degree or its equivalent.
- 530 Theory of Elastic Structures (3)** **Dill, Martin**
Stresses, strains, displacements; Hooke's Law; basic equations of elasticity; virtual work and energy theorems; application of theory to selected problems; approximate methods.
- 531 Analysis of Shells (3)** **O'Brien**
Kinematical, equilibrium, and inertial relationships for arbitrary shells; considerations of orthotropy, finite deflections and thermal stresses; applications to advanced aerospace structures.
- 533 Theory of Plasticity (3)** **Dill, Martin**
Physical behavior of elastic-plastic and plastic structures; development of stress-strain relations and conditions for yielding; discussion of extremum principles; application of theory to representative problems. Prerequisite, 530 or Civil Engineering 572, or Mechanical Engineering 551.
- 540 Structural Problems (3)** **Dill, Martin**
Theory for analysis of complex structures; displacement and force methods; use of high speed calculating equipment; heated structures; nonlinear problems. Prerequisite, 530 or Civil Engineering 572, or Mechanical Engineering 551.
- 550 Dynamics of Aircraft Structures (3)** **Martin, O'Brien**
Equations of motion of restrained and unrestrained elastic structures; response of elastic systems to time dependent forces and to forces arising from motion of the system; calculation of dynamic overstresses in complex structures. Prerequisite, 553, or Civil Engineering 574, or Mechanical Engineering 567.
- 553 Aircraft Vibrations (3)** **Martin, O'Brien**
Natural frequencies and modes of vibrations of linear systems; forced vibrations and motion dependent forces; Lagrange's equations and Hamilton's principle; matrix methods for discrete and continuous systems typical of aircraft structures. Prerequisite, 480 or permission.
- 556 Aeroelasticity (3)** **Martin, O'Brien**
Concept of functional diagrams and aeroelastic operators; quasi-static lifting-surface deformations and stability; control surface effectiveness; nonstationary lifting-surface deformations and stability; general dynamics of aerodynamic, structural, and control system interactions. Prerequisite, 481 or permission.
- 557 Nonlinear Problems in Airplane Dynamics (3)** **Fyfe, Street**
The application to aeronautics of nonlinear ordinary differential equations of motion, and the topology of their integral curves in the phase plane; dynamical interpretation of singular points; existence of periodic solutions; questions of stability; nonlinear resonance; frequency demultiplication; relaxation oscillations. Prerequisite, Mathematics 538, or equivalent.
- 567, 568 Analysis in Engineering (3,3)** **Staff**
Mathematical methods for solving problems arising in engineering. 567: vector analysis, matrices, tensors, complex variables; 568: calculus of variations, Sturm-Liouville problems, series solutions and special functions for ordinary differential equations, orthogonal functions.
- 569J Partial Differential Equations (3)** **Fyfe, Street**
Classification of second order partial differential equations; solution by separation of variables and reduction to a boundary value problem; theory of characteristics and solutions by means of Green's functions. Examples from classical mechanics of continua. Offered jointly with the Department of Mathematics. Prerequisite, 568 or Mathematics 428.

- 580, 581, 582 General Theory of Continuous Media (3,3,3)** **Dill, Street**
 General formulation of the classical field theories: Fundamental concepts of motion, stress, energy, entropy, and electromagnetism for a continuum; conservation of mass; balance of momentum; balance of energy, including thermodynamics of irreversible deformations; balance of electromagnetism. General nature of constitutive equations for a continuum. Examples of kinematic, energetic, mechanical, thermo-mechanical, electromagnetic, and electromechanical constitutive equations. Prerequisite, 567 or permission.
- 599 Special Projects (2-5, maximum 15)** **Staff**
 An investigation on a special project by the student under the supervision of a staff member.
- 600 Research (*)** **Staff**
 Prerequisite, permission of Executive Officer.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
 Limited to students completing a nonthesis degree program.

CHEMICAL ENGINEERING

Executive Officer: RALPH W. MOULTON, 37 Bagley Hall

The Department of Chemical Engineering offers courses leading to the degrees of Master of Science in Chemical Engineering, Master of Science in Engineering (see page 173), and Doctor of Philosophy.

Entrance, or qualifying, examinations are required of prospective candidates for the degrees of Master of Science in Chemical Engineering and Doctor of Philosophy. These examinations are designed to assess the student's knowledge and understanding of the material normally contained in an undergraduate program with a major in chemical engineering. They are usually given Thursday and Friday preceding the opening of Autumn Quarter, during the first week of Winter Quarter, and toward the end of Spring Quarter.

MASTER OF SCIENCE IN CHEMICAL ENGINEERING. The requirements for this degree are 30 credits of course work and a thesis. The course work is usually divided in the ratio of about two to one between major department and other departments. It is recommended that candidates for this degree include 570, 571, 574, and 575 among their courses. No foreign language is required.

DOCTOR OF PHILOSOPHY. Students who have completed at least one year of satisfactory graduate study and are acceptable for work leading to the Doctor of Philosophy degree in chemical engineering are required to take cumulative examinations regularly, twice each quarter. They are not then required to take formal examinations in courses offered by the Department, except as may be specified by their research professors or Supervisory Committees. The cumulatives are general examinations in the field of chemical engineering and are designed to stimulate independent study and thought. They attempt to evaluate the breadth of knowledge gained from courses, seminars, and literature, and the student's ability to apply this knowledge to problems of a diverse nature. The cumulative requirement is satisfied when six examinations are passed, usually out of the first twelve taken.

COURSES

- N381, N382 Field Trip (0,0)** **Staff**
- 383 Industrial Stoichiometry (2)** **Staff**
- 384 Industrial Stoichiometry (4)** **Staff**
- 385 Chemical Engineering Thermodynamics (4)** **Staff**
- 470 Transport Process Principles (4)** **Staff**
- 471, 472, 473 Unit Operations (3,3,3)** **Staff**
- 474, 475, 476 Unit Operations Laboratory (2,2,2)** **Staff**
- 481 Process Design Principles I (3)** **Staff**
- 482 Process Design Principles II (3)** **Staff**

- 483 Chemical Engineering Process Design (4)** **Staff**
- 485 Industrial Electrochemistry (3)** **Moulton**
(Offered when demand is sufficient.)
- 520 Graduate Seminar (1-5)** **Staff**
- 570 Introduction to Transport Phenomena (3)** **Sleicher**
Derivation of general differential equations for transport of heat, mass, and momentum; kinetic theory of fluids and its application to transport phenomena based on molecular motion; methods for estimating transport coefficients in fluids. Prerequisite, 471.
- 571 Heat Transfer (3)** **David**
Steady and unsteady state conduction with emphasis on numerical methods. Radiation; design theory background and application to furnace design; convection; introductory concepts; methods for predicting coefficients; recent developments in theory; heat-exchanger design. Prerequisites, 570 and 575, or permission.
- 572 Mass Transfer (3)** **Johanson**
Application of fundamental principles to industrial problems in binary and multicomponent distillation. Equilibrium and rate of transfer; ideal and nonideal systems. Graphical and analytical calculation methods. Design, control, and instrumentation of fractionating equipment. Prerequisites, 570 and 575, or permission.
- 573 Absorption and Extraction (3)** **Heideger**
Diffusion theory; transfer of material between phases; design of absorption equipment; multicomponent systems; performance of absorption equipment; simultaneous absorption and chemical reaction; solvent extraction. (Offered alternate years; offered 1962-63.) Prerequisites, 570 and 575, or permission.
- 574 Fluid Mechanics (3)** **Sleicher**
Mechanism of fluid flow. Total energy balance and Bernoulli's theorem. Integration of the differential equations for motion of a fluid. Poiseuille, Fanning, and other equations. Turbulent flow and boundary-layer relationships. High velocity flow. Introductory design calculations. Prerequisites, 570 and 575, or permission.
- 575 Advanced Chemical Engineering Thermodynamics (3)** **McCarthy**
Principles of thermodynamics. Applications to unit operations and to prediction of phase equilibria and chemical equilibria. Prerequisite, 385.
- 581 Kinetics and Catalysis (3)** **Johanson**
Homogeneous and heterogeneous systems, with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisites, 571 and 575, or permission.
- 582 Advanced Topics in Mass Transfer (3)** **Staff**
Theoretical and practical study of special batch and continuous multistage processes for separation of various substances, including isotopes. Ion exchange, chemical exchange, gas and thermal diffusion, chromatographic, electrophoretic, and other processes are considered. Prerequisite, permission.
- 583 Advanced Topics in Chemical Engineering (1-3)** **Staff**
Discussions and readings of topics of current interest in the field of chemical engineering unit operations. Subject matter changes from year to year. Prerequisite, satisfactory completion of one year of graduate study in chemical engineering or permission.
- 584 Advanced Topics in Chemical Engineering Science (1-3)** **Staff**
Discussions and readings of topics of current interest in the field of chemical engineering unit processes. Subject matter changes from year to year. Prerequisite, satisfactory completion of one year of graduate study in chemical engineering or permission.
- 585 Topics in Chemical Engineering Plant Design (1-3)** **Staff**
Discussions and readings of topics of current interest in the field of chemical engineering plant design. Subject matter changes from year to year. Prerequisite, satisfactory completion of one year of graduate study in chemical engineering or permission.
- 586 Chemistry of High Polymers (3, maximum 6)** **McCarthy**
Fundamentals of substances with high molecular weight, including study of valence consideration, molecular weight determination, polymerization and condensation reactions, cracking, fiber and film formation, glasses, and mechanical properties as related to chemical structure. (Offered alternate years; offered 1962-63.) Prerequisites, Chemistry 232 and 356.
- 587 Cellulose and Lignin (3)** **McCarthy**
Chemistry and technology of cellulose, lignin, and related substances. Origin and status in plant tissue, isolation procedures, physical characteristics, and chemical reactions. Chemical processing in pulp, paper, rayon, and plastic industries. (Offered alternate years; offered 1961-62.) Prerequisites, Chemistry 336 and 356, or permission.
- 596 Topics in Chemical Engineering Research (3, maximum 18)** **Staff**
Discussions and readings of topics of current interest in the field of chemical engineering research. Subject matter changes from year to year. Prerequisite, satisfactory completion of one year of graduate study in chemical engineering or permission.
- 600 Research (*)** **Staff**
Prerequisite, permission of Executive Officer.
- 700 Thesis (*)** **Staff**

CIVIL ENGINEERING

Acting Executive Officer: THOMAS H. CAMPBELL, 201 More Hall

The Department of Civil Engineering offers courses leading to the degrees of Master of Science in Engineering (see page 173), Master of Science in Civil Engineering, and Doctor of Philosophy.

MASTER OF SCIENCE IN CIVIL ENGINEERING. Graduate work leading to this degree is offered in the fields of hydraulic engineering, sanitary engineering, soil mechanics, engineering mechanics, structural engineering, and transportation (highway) engineering. The requirements are: a minimum of 39 credits, of which 30 credits must be in formal course work and 9 in thesis. No foreign language is required.

DOCTOR OF PHILOSOPHY. Candidates for this degree must complete an approved program of studies and a research program which makes a definite contribution to knowledge. This research program may be in one of the following areas: hydraulics and fluid mechanics, sanitary engineering, soil mechanics, engineering mechanics, structural engineering, or transportation engineering.

COURSES

GENERAL

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| 509 Engineering Relations (2) | Staff |
| Methods of setting up engineering problems and investigations; written and oral presentation, both professional and economic, in the student's major field. Prerequisite, graduate standing. | |
| 520 Seminar (1, maximum 6) | Staff |
| Formal presentation for discussion and criticism of all research of the graduate years, 1 credit (required). Required of all candidates for the master's degree during their final quarter in residence. | |
| 595 Advanced Professional Design and/or Analysis (2-5, maximum in one field, 15) | Staff |
| Special studies under the direction of staff members. Students should register for H (hydraulics), M (materials), P (planning), S (structural), W (sanitary), or T (transportation). | |
| 600 Research (*) | Staff |
| Special investigation by graduate students under the direction of staff members. Students should register for H, M, P, S, W, or T. Prerequisite, permission of Executive Officer. | |
| 700 Thesis (*) | Staff |

SURVEYING

- | | |
|-------------------------------|----------------------------|
| 315 Photogrammetry (3) | Chittenden, Colcord |
|-------------------------------|----------------------------|

TRANSPORTATION ENGINEERING

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 403 Principles of Urban Planning (3) | Horwood |
| 422 Railway Engineering (3) | Ekse |
| 423 River and Harbor Engineering (3) | Ekse, Meese |
| 424 Highway Pavement Design (3) | Ekse |
| 426 Airfield Design (3) | Ekse |
| 428 Highway Policy and Economics (3) | Hennes, Horwood |
| 429 Traffic Engineering—Operations (3) | Horwood, Sawhill |
| 430 Traffic Engineering—Design (3) | Sawhill |
| 521 Seminar in Urban Transportation Planning (2) | Hennes, Horwood |
| Prerequisite, Civil Engineering or Urban Planning graduates, or permission. | |
| 523 Port Development (4) | Ekse, Hennes |
| Engineering design of port facilities, river and protective works; study of tides, currents, wave action, layout of channels and anchorage basins, and wharf and other waterfront constructions. Prerequisites, 342 and senior or graduate standing. | |
| 524 Modern Pavement Theory (4) | Ekse |
| Elastic slab theory as applied to rigid pavements, considering such factors as subgrade reaction, stress repetition, temperature, and warping stresses; theories of plastic equilibrium as applied to base courses and flexible mats. Other elements of highway design. Two lectures, one laboratory period, and one conference. Prerequisite, graduate standing. | |
| 530 Advanced Traffic Engineering—Freeways (4) | Sawhill |
| Factors and elements in the geometric design and location of arterials, freeways, interchange connections, and parking facilities. Special studies and reports. Prerequisite, Civil Engineering graduate, or permission. | |

HYDRAULIC ENGINEERING

- 342 **Fluid Mechanics (4)** Chenoweth, Kent, Moritz, Nece, Richey
- 343 **Hydraulic Engineering (5)** Chenoweth, Kent, Moritz, Richey
- 441 **Intermediate Fluid Mechanics (3)** Nece, Richey
- 442 **Introduction to Hydrodynamics (3)** Nece, Richey
- 445 **Hydraulic Machinery (3)** Chenoweth, Moritz
- 447 **Applied Hydrology (3)** Campbell, Richey
- 448 **Reclamation (3)** Campbell, Van Horn
- 542 **Hydrodynamics I (4)** Nece, Richey
Fundamentals of fluid potential motion. Two- and three-dimensional flow examples, including free surface flows. Complex variables, conformal mapping, other solution techniques. (Not open to students with credit in 442.) Prerequisite, 441 or permission.
- 543 **Hydrodynamics II (3)** Nece, Richey
Circulation and lift. Vortex motion. Introduction to viscous flows: the Navier-Stokes equations, and some exact solutions. Instability of laminar flow. Introduction to turbulent flow. Prerequisite, 542.
- 544 **Wave Dynamics (3)** Richey
Application of wave theory to the interaction of water waves and objects, emphasizing forces on moored and stationary marine structures. Forces on bottom sediments. Prerequisites, 542, Oceanography 411, or permission.
- 547 **Advanced Hydrology (4)** Campbell, Richey
Theory and application of hydrology, with emphasis on water power development. Precipitation, runoff, maximum and minimum flows, flood routing. Economics of storage and transportation of water. Types of hydroelectric installations; multiple use projects. Special problems in hydrology and hydraulic power. Prerequisites, 342 and graduate standing.
- 549 **Experimental Hydrodynamics (3)** Nece, Richey
Experimental studies of steady and unsteady flow phenomena. Model tests as used in hydraulic design. Instrumentation and experimental techniques. Prerequisite, 441 or equivalent, or permission.

SANITARY ENGINEERING

- 350 **Introduction to Sanitary Engineering (3)** Bogan, Carlson, Sylvester
- 450 **Advanced Sanitary Engineering Laboratory (5)** Bogan, Sylvester
- 452 **Water Supply (3)** Bogan, Carlson, Sylvester
- 453 **Water Treatment (3)** Bogan, Sylvester
- 454 **Sewerage (3)** Bogan, Carlson, Sylvester
- 456 **Sewage Treatment (3)** Bogan, Sylvester
- 457 **Environmental Engineering Problems (3)** Bogan, Sylvester
- 553 **Advanced Water Treatment Design (4)** Bogan, Sylvester
Functions and performance of unit operations employed in water treatment. Methods of design and process applications involving sedimentation, chemical coagulation, filtration, demineralization, and the removal of radioisotopes. Functional design of a complete water treatment plant by the student to meet specific requirements. (Not open to students with credit in 453.) Prerequisites, 450, 452, or permission.
- 556 **Advanced Sewage Treatment Design (4)** Bogan, Sylvester
Application and design of unit operations and processes employed in sewage treatment, including mechanical and gravitational separations, aerobic and anaerobic biochemical transformations, aeration and ORP control. Functional design of a complete sewage treatment plant. (Not open to students with credit in 456.) Prerequisites, 450, 454, or permission.
- 557 **Industrial Waste Treatment (4)** Bogan, Sylvester
Origin and properties of waste gases, aerosols, and liquids from industries, including chemical, petroleum, pulp and paper, food processing, metallurgical, pharmaceutical, and nuclear energy. Laboratory analysis and treatment of wastes. (Not open to students with credit in 457.) Prerequisites, 450, 452, 454; Physics 320; Microbiology 300 or 301; or permission.

ENGINEERING MATERIALS

- 362 **Materials of Construction (3)** Clanton, Mittet
- 363 **Materials of Construction (3)** W. Miller, Vasarhelyi
- 466 **Soil Mechanics (3)** Hennes, Meese
- 467 **Earthwork Engineering (3)** Hennes, Meese
- 468 **Engineering Properties of Soils (3)** Hennes, Meese

- 567 Advanced Soil Mechanics and Foundations (4)** Hennes, Meese
Design of earth dams and analysis of slope stability. Dam foundations. Stress distribution in a semi-infinite elastic solid, and its application to foundation analysis. Hydraulics of groundwater flow, including piping, uplift, and quicksand phenomena. Flow net construction. Moisture-density control in earth embankment. Weekly seminar on current publications in the field of soil mechanics with special emphasis on landslides, seepage, and earth fill. (Not open to students with credit in 467.) Prerequisites, 466 and graduate standing.
- 569 Applied Soil Mechanics (3)** Hennes, Meese
Soil mechanics in engineering practice; the application of theory to the analysis of footings, piling, retaining walls, tunnels, and other substructures. Prerequisites, 466 and graduate standing.

STRUCTURAL ANALYSIS AND DESIGN AND ENGINEERING MECHANICS

- 371, 372, 373 Structural Theory (3,3,3)** Chenoweth, Clanton, Hartz, Mittet, Rhodes
- 475, 476, 477 Structural Design (3,3,3)** Clanton, A. L. Miller, Rhodes, Sergev
- 482 Advanced Reinforced and Prestressed Concrete (3)** Mittet
- 485 Applied Structural Analysis (3)** A. L. Miller
- 494 Introduction to the Mechanics of Continuous Media (3)** Hartz
- 570 Strain Measurements (3)** Hartz, Vasarhelyi
Experimental determination of strain under static and dynamic loads; mechanical, optical and electrical strain gages; transducers for displacement, velocity and acceleration; photoelasticity, strain rosette, brittle coating and other methods; problems of instrumentation, and analysis of data. Prerequisite, graduate standing in engineering.
- 571 Advanced Strength of Materials (3)** Hartz, Sergev
Stresses and deflection of curved bars, beams on elastic foundation, beams with axial forces, shear center, stresses and deflection of thin plates, stresses in thick cylinders; stresses in pressure vessels. Particular emphasis is on the technique of breaking down the problems to fundamentals and solving the resultant mathematical equations. Prerequisites, Mathematics 221 and graduate standing in engineering.
- 572 Theory of Elasticity (3)** Sergev
A more rigorous approach to stress and strain problems, including differential equations of equilibrium, compatibility conditions, stress function; stresses in and deflection of beams, stresses in semi-infinite plates, disks, curved bars, and stress concentration. Introduction to torsion of prismatic bars and energy methods. The subject matter deals primarily with two-dimensional problems. Prerequisite, 571, or permission.
- 573 Elastic Stability (3)** Sergev
The study of buckling phenomena in columns, beams, plates, and tubes, with practical application. Prerequisite, 571, or permission.
- 574 Dynamics of Structures (3)** Hartz
Stresses and deflections in structures due to dynamic loads. Methods for the analysis of lumped and distributed mass systems. Response of structures to earthquake, moving, and blast loads. Prerequisite, 585, or permission.
- 576 Theory of Plates and Shells (3)** Sergev
Stresses and deflections of flat plates and shells. Effect of transverse loads on circular and rectangular plates. General theory of thin shells. Prerequisite, 573 or permission.
- 577 Energy Methods in Structural Mechanics (3)** Hartz
Basic energy and minimal principles of mechanics, calculus of variations and variational methods; applications to structures, elasticity, plates and shells, stability, and vibrations. Prerequisites, 571, 585, or permission.
- 578 Advanced Analytical Mechanics (3)** Paris
Generalized coordinates and La Grange's equations; fundamental theorems and applications; Hamilton's principle; canonical equations; transformation theory; integrals of dynamical equations. Prerequisite, Mathematics 221, or permission.
- 579 Advanced Theory of Elasticity (3)** Hartz
General formulation of the equations of two- and three-dimensional linear theory of elasticity using vectors and tensors; general methods of solution including stress and strain functions and complex variable; nonlinear elasticity. Prerequisites, Mathematics 221, Civil Engineering 572, or Mechanical Engineering 551, or Aeronautical Engineering 530, or permission.
- 581 Advanced Structures (3)** A. L. Miller, Vasarhelyi
Truss deflection and secondary stresses. Trussed arches. Multi-span trusses. Redundant members. Mueller-Breslau Maxwell-Mohr, and strain-energy methods.
- 582 Advanced Structures (3)** A. L. Miller, Vasarhelyi
Multi-story, multi-bay rigid frames including wind and earthquake loads. Theory of flexure of members of nonuniform section. Nonrectangular rigid frames. Moment-area and moment-distribution methods.
- 583 Advanced Structures (3)** A. L. Miller, Vasarhelyi
Ideal, two-hinged and hingeless elastic arches. Influence lines for statically indeterminate structures. Castigliano's theorem and strain-energy methods applied to curved members of nonuniform section.

- 584 Plastic Design of Structures (3)** **Vasarhelyi**
Plastic (inelastic) behavior of structural materials. Applications to the design of structural members and systems. Principles of upper and lower bound. Limitations and economy of the procedure. Prerequisite, 581.
- 585 Numerical and Model Methods of Structural Analysis (3)** **Hartz, Vasarhelyi**
Review of basic structural theory. Introduction to matrix, numerical, and approximate methods. Dimensional analysis and model similitude. Structural model analysis. Analogs and analog computers. Prerequisite, graduate standing in engineering.
- 586 Structural Materials and Design (3)** **Vasarhelyi**
A critical review and discussion of the mechanical properties of structural steel, structural aluminum alloy, and reinforced concrete which affect structural design. Fatigue and impact in metal structures. Failure of structures and structural members. Prerequisite, graduate standing in Civil Engineering.
- 587 Design of Welded Structures (3)** **Vasarhelyi**
A broad review of the factors such as the function of the structure, the mechanical properties of the base metal and welds, structural details, and type of loading which must be considered in the design of a welded structure. Prerequisite, 586.
- 590 Structures Under Wind (3)** **Farquharson**
Fundamental principles governing the static or dynamic response of suspended structures, transmission lines, tall stacks and other flexible structures subject to deflection, overturning, or oscillation, as result of wind action. Prerequisite, graduate standing in engineering.

ELECTRICAL ENGINEERING

Executive Officer: AUSTIN V. EASTMAN, 202 Electrical Engineering

The Department of Electrical Engineering offers courses leading to the degrees of Master of Science in Electrical Engineering, Master of Science in Engineering (see page 173), Master of Electrical Engineering, and Doctor of Philosophy.

No foreign language is required for the master's degrees, but mathematics through at least one quarter of differential equations is a prerequisite to all graduate work.

Students who received their undergraduate training at other institutions are expected to have substantially the same training as that given to students at this University. In case of deficiencies, students may be required to take certain undergraduate courses in addition to the normal graduate program.

MASTER OF SCIENCE IN ELECTRICAL ENGINEERING. A total of 36 credits of course work and a suitable thesis are required for this degree. Course work should be divided between electrical engineering and supporting courses in other fields in the ratio of approximately two to one. The courses must include 510 and N520-N521-522. Other electrical engineering courses must be chosen from those numbered 500 or above, with the following exception: On the approval of the candidate's supervisory committee, not more than two of the following senior elective courses, 441, 469, 479, 485, may be applied to this degree. University of Washington graduates are expected to include 441 and one of the others in their undergraduate programs.

MASTER OF ELECTRICAL ENGINEERING. This is a more advanced degree than that of Master of Science in Electrical Engineering. A total of 72 credits of course work and a more extensive thesis are required. Other requirements are similar to those for the Master of Science degree. Certain physics courses may be used in partial satisfaction of the major requirements.

DOCTOR OF PHILOSOPHY. This is primarily a research degree. It is not conferred as a result of course work, no matter how faithfully or long it is pursued. The granting of the degree under the sponsorship of the faculty in this department is based essentially on general proficiency and distinctive attainments in electrical engineering, particularly on the demonstrated ability to pursue independent research. Evidence of research investigation is the production of a doctoral thesis which makes a definite contribution to knowledge and is presented with a satisfactory degree of literary skill. In addition to the general requirements of the Graduate School (see page 74) the faculty in this department selects prospective

candidates for the doctor's degree from outstanding students at the master's level by means of a series of written examinations given each year in the Winter Quarter.

COURSES

- | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|
| 311 Electric Transients (4) | Staff |
| To be taken concurrently with 312. | |
| 312 Electric Transients Laboratory (1) | Staff |
| To be taken concurrently with 311. | |
| 331 Fields and Materials (4) | Staff |
| To be taken concurrently with 332. | |
| 332 Fields and Materials Laboratory (1) | Staff |
| To be taken concurrently with 331. | |
| 333 Basic Electronics I (4) | Staff |
| To be taken concurrently with 334. | |
| 334 Basic Electronics Laboratory (1) | Staff |
| To be taken concurrently with 333. | |
| 335 Basic Electronics II (4) | Staff |
| To be taken concurrently with 336. | |
| 336 Electronics Laboratory (1) | Staff |
| To be taken concurrently with 335. | |
| 400 Vacuum Tubes and Electronics (5) | Staff |
| 441 Linear System Analysis (3) | Lewis |
| 451 Dynamics of Electro-Mechanical Systems (3) | Staff |
| 469 Advanced Field Theory (4) | Staff |
| 471 Amplifier Theory (5) | Hill |
| 477 Principles of Computer Applications (4) | Johnson |
| 479 Fundamentals of Automatic Control (4) | Bergseth, Clark, Hsu, Noges |
| 483 Introductory Communication Theory (3) | Lytle, Swarn |
| 485 Introduction to Solid State Electronics (4) | Bjorkstam, Watt |
| 493 Guidance and Control (4) | Clark |
| 505 Analysis of Random Processes (3) | Lytle |
| Probability theory; discrete and continuous random variables; stochastic processes. Spectral analysis of random signals and noise. Introduction to Markov processes. | |
| 510 Introductory Network Theory (5) | Hsu, Lewis, Lytle |
| Mathematical concepts applicable to network theory, including mesh and nodal formulations in matrix form. Linear transformations and relation of quadratic forms to energy functions. Elements of complex variable including conformal transformations and complex potential applied to fields and networks. Complex contour integration and evaluation of residues; application to Laplace transforms and determination of transient response. Prerequisite, 441. | |
| 511, 512 Network Synthesis (3,3) | Lewis |
| Network representations in the complex frequency domain, realizability criteria, synthesis of driving point and transfer impedance and coupling networks for prescribed transfer characteristics, canonical forms and network equivalents, frequency and time domain aspects of approximating response functions. Prerequisite, 510. | |
| 514 Power System Analysis (5) | Bergseth |
| Methods of analysis of power systems, with emphasis on the interrelations between generation, transmission, and distribution; symmetrical components; evaluation of system parameters and sequence networks; fault studies; transient and steady-state behavior of systems; elements of system protection. Prerequisite, 340 or 351. | |
| 515 Measurements and Circuit Components (2) | Cochran |
| Measurements of circuit components from zero to one thousand megacycles, impedance and phase measurements at audio through UHF; use of electronic counters and precision frequency measuring equipment; noise figure measurements. Prerequisite, 411. | |
| N520-N521-522 Seminar (0-0-2) | Staff |
| Required for all graduate students. | |
| 531 Solid State Electronics I (4) | Bjorkstam, Watt |
| Matrix formulation of quantum theory, perturbation theory; lattice vibrations; introduction to the band theory of solids; some properties of normal and super conducting metals; dielectric and magnetic properties of materials including some discussion of ferroelectricity and ferromagnetism; luminescence; fundamentals of magnetic resonance. | |
| 532 Solid State Electronics II (4) | Bjorkstam, Hanson |
| Solid state electronic devices including ferrites, parametric amplifiers, masers, semiconductor and superconductor devices. | |

- 551 Power System Protection (3)** **Bergsoth**
Protection of power systems and equipment against both overvoltages and overcurrents; includes power circuit breakers, fuses, relays, lightning arrestors, expulsion tubes, and the influence of neutral grounding methods in overvoltages. (Offered alternate years; offered 1962-63.) Prerequisite, 514 or permission.
- 562 Physical Electronics (3)** **Shimada**
Basic analysis of vacuum tubes and gas discharges. Thermionic emission, work function, Schottky effect. Field emission and devices using field emission and cold emission. Space-charge-limited current flow. Application of conformal mapping in electrostatic field in tubes. Noise. Kinetic theory of gases; creation of charged particles. Modes of gas discharges; various regions in gas discharges. Microwave properties of plasma. Ion sheath; probe technique. Discussions on plasma energy convectors. Prerequisite, 441.
- 563 Electrical Noise I (3)** **Shimada**
The noise theory and its application to electron devices. Fourier analysis of stationary random process; correlation; noise power spectrum. Statistics; distribution functions; Gaussian distribution. Characterization of noisiness; noise ratio, noise figure, noise measure, noise temperature. Noise measurements; noise in quadratic detector. Prerequisite, 505 or permission.
- 564 Electrical Noise II (3)** **Shimada**
Noise in vacuum tubes, semiconductors; noise suppression, excess noise. Noise in transistors, mixers, detectors, parametric amplifiers, electron beam devices, masers, and other low noise devices. Prerequisite, 563.
- 566 Microwave Measurements (2)** **Harrison**
Measurements of wave length, admittance, power, dielectric constant, and losses in the microwave frequency region utilizing wave guide techniques. Problems in impedance matching and impedance transformation based on laboratory work. Includes one three-hour laboratory per week. Prerequisites, 335 and 411.
- 567 Microwave Vacuum Tubes (4)** **Harrison**
Theory of microwave vacuum tubes, including triodes, klystrons, traveling wave tubes, and magnetrons, and their modulation characteristics. Oscillator theory is considered in detail, with klystron oscillators used to illustrate general principles. Prerequisite, 566 or permission.
- 568 Microwave Electronics (3)** **Golde**
A selection of topics applicable to the study of microwave tubes. Formation and focusing of electron beams. Application of various theories to the interaction of electron beams with electro-magnetic fields. Prerequisite, 469.
- 570 Antenna Theory (3)** **Reynolds, Swamp**
Theory of radiation; impedance characteristics and radiation patterns of thin linear antenna elements; properties and synthesis of antenna arrays; field intensity calculations. Prerequisite, 469.
- 572 Microwave Network Theory (4)** **Ishimaru**
Theory of uniform waveguides, application of general network theory to waveguides and cavities; matrix representation; equivalent circuit for waveguide discontinuities. Quasi-static solution and variational principles. Radial and spherical waveguides; slow-wave structures; anisotropic media. Prerequisites, 411, 441, and 469.
- 574 Microwave Antennas (4)** **Carswell**
Fundamental principles underlying the design of microwave antennas. Slot antenna on cylinder. Green's function and eigenfunctions. Watson transform. Theory of slot on waveguides. Physical optics, variational expression for radar cross section. Corequisites, 572 and Mathematics 429, or permission.
- 575 Microwave Propagation (3)** **Ishimaru**
Microwave propagation through anisotropic media. Slow waves and leaky waves. Surface waves. Mode theory and dipole over earth. Rayleigh and Kirchhoff approximation. Wiener-Hopf techniques. Prerequisite, 572.
- 576 Communication Theory I (3)** **Lytle**
Mathematical theory of communication. Information theory for discrete and continuous systems. Channel capacity and coding. Prerequisite, 505 or permission.
- 577 Communication Theory II (3)** **Lytle**
Communication in the presence of noise. Analysis of systems with random inputs. Optimum linear systems, statistical detection of signals, decision theory. Statistical analysis of nonlinear systems. Prerequisite, 505 or permission.
- 578 Radio Propagation I (3)** **Swarm**
Theory of electromagnetic propagation over a finite conductive earth and in a horizontally stratified media; theory of scattering with applications to the troposphere. Prerequisite, 469.
- 579 Radio Propagation II (3)** **Swarm**
Theory of electromagnetic propagation in ionized medium with application to the ionosphere. Theory of ionospheric scattering, meteor reflection, and auroral propagation. Prerequisite, 469.
- 580 Electroacoustics (4)** **Rogers, Hill**
Vibration of strings, bars, and membranes; acoustical wave equation and solutions; electric, acoustic, and mechanical analogies; acoustical networks and measurements; architectural acoustics; properties of hearing; loudspeakers, microphones, and sound reproduction. Includes one four-hour laboratory on alternate weeks. (Offered alternate years; offered 1962-63.) Prerequisite, 411.

- 581 Control System Measurements (2)** **Noges**
Theory and practice in measurement of control system parameters. Determination of transfer functions for various system components by transient and frequency response measurements. Prediction of feedback system performance from experimentally derived data, with experimental verification. Use of the analog computer in simulation. Prerequisite, 479.
- 582 Analytical Design of Linear Control Systems (4)** **Clark**
Synthesis of linear automatic control systems to satisfy analytical performance criteria. Performance measures for control systems and minimization techniques. Elements of probability theory and statistical analysis of random, continuously varying time functions. Minimization of mean square error in the presence of noise. The adaptive control system problem. Prerequisites, 479, 505, and 510.
- 583 Nonlinear Control Systems (3)** **Clark, Noges**
Dynamic analysis of nonlinear control systems. Graphical and numerical methods for solution of nonlinear differential equations. Limit cycles and other phenomena peculiar to nonlinear systems. Use of phase-space, describing function, and simulation techniques in the analysis of nonlinear servomechanisms. Self-adaptive control systems. Prerequisites, 479 and 510.
- 584 Sampled-Data Control Systems I (4)** **Hsu**
Sampling process and data reconstruction; Z-transform analysis of linear sampled-data systems; modified Z-transform analysis behavior of systems between sampling instants; multirate sampled-data systems; sampled-data systems with finite sampling duration; general design principles of sampled-data systems. Prerequisites, 479, 510, Mathematics 427.
- 585 Sampled-Data Control System II (4)** **Hsu**
Digital compensation of control systems; sampled-data control systems with random input; nonlinear sampled-data control systems; other current topics on sampled-data control systems. Prerequisite, 584.
- 586 Electrical Computing Methods (4)** **Johnson**
Study of field models, analog and digital computers, and various special-purpose computers for solving electrical problems. Includes one three-hour laboratory per week. Prerequisite, graduate standing.
- 587 Applications of Digital Computers to Engineering Problems (4)** **Johnson**
Evaluation and application of numerical methods in solution of typical engineering problems by means of digital computers. Choice of method, problem organization, error, convergence, limitations and considerations for specific computers. Curve fitting and random selection. Prerequisites, 505 and 586.
- 588 Logical Design of Digital Computers (3)** **Johnson**
Circuit components and binary numbers, Boolean algebra and the simplification of Boolean functions. Memory element input and application equations. Digital computer memories, computer arithmetic units, control units. Computer design organization. Prerequisite, graduate standing.
- 599 Selected Topics in Electrical Engineering (*)** **Staff**
Prerequisite, permission of Executive Officer.
- 600 Research (*)** **Staff**
Prerequisite, permission of Executive Officer.
- 700 Thesis (*)** **Staff**

MECHANICAL ENGINEERING

Executive Officer: BRYAN T. McMINN, 142 Mechanical Engineering

The Department of Mechanical Engineering offers courses leading to the degrees of Master of Science in Engineering (see page 173), Master of Science in Mechanical Engineering, and Doctor of Philosophy.

MASTER OF SCIENCE IN MECHANICAL ENGINEERING. Although options are not designated, graduate offerings in mechanical engineering are so arranged that candidates for the master's degree who are interested in the special fields of heat power, heat transfer, gas dynamics, air conditioning and refrigeration, nuclear power, advanced engineering materials, stress analysis, and design will find well-integrated programs available. Subject to the approval of the candidate's committee, work beyond bachelor requirements in physics, mathematics, aeronautical engineering, civil engineering, and electrical engineering is permitted and sometimes required. The thesis is normally the equivalent of 9 credits, in which case 36 credits of course work are required for the master's degree. No foreign language is required.

DOCTOR OF PHILOSOPHY. Candidates for this degree must complete an approved program of studies and a research program which makes a definite contribution to knowledge.

COURSES

- 320 Thermodynamics (5) Childs, McMinn, Nordquist
 325 Thermodynamics (4) Childs, Depew, McFeron
 327 Thermodynamics (3) Costello, McMinn, Waibler
 330 Experimental Thermodynamics (3) Costello, Crain, Firey
 340 Engineering Materials (3) Day, Ford, Mills, Taggart
 341 Aircraft Materials (2) Schaller
 342 Industrial Materials and Processes (3) Ford, Mills
 Not open to engineering students.
 361, 362 Machine Design (3,3) Browne, Crain, Fritz, Kielling, Morrison
 367 Dynamics of Machines (3) Balise, Morrison, Nordquist, Sherrer
 368 Kinematics (3) Day, Kielling, Morrison
 410 Engineering Administration (3) Owens, Schaller, Setchfield
 411 Engineering Economy (3) Schaller, Setchfield
 414 Industrial Safety (2) Anderson
 415 Statistical Quality Control (3) Drui, Fritz, Owens
 417 Methods Analysis (3) Drui, Owens
 418 Work Simplification (2) Owens
 424 Power Plants (5) Nordquist, Waibler
 425 Air Conditioning (3) Crain, Depew
 426 Thermodynamics for Nonmajors (4) Childs, McFeron, Waibler
 428 Refrigeration (3) Depew, McMinn
 430 Introduction to Heat Transfer (3) Childs, Costello, McFeron, Waibler
 432 Gas Dynamics I (3) Childs, Costello
 434 Advanced Mechanical Engineering Laboratory (3) Firey, Nordquist
 436 Friction and Lubrication (3) Firey, Mills, Morrison
 441 Automatic Control (3) Balise, Galle
 443 Instrumentation (3) Balise, Galle
 464 Theory of Welding (3) Holt
 465 Welding Design (3) Holt
 468 Machine Design (3) Day, Kielling, Morrison
 469 Dynamics of Machines (3) Balise, Kobayashi, Morrison, Nordquist
 481 Internal Combustion Engines (3) Firey, Guidon
 482 Internal Combustion Engine Laboratory (3) Firey, Guidon
 483 Internal Combustion Engine Design (3) Firey, Guidon
 485 Rocket Propulsion (3) Guidon
 490, 491, 492 Naval Architecture (3,3,3) Rowlands
 516 Statistical Analysis of Engineering Measurements (3) Drui, Owens
 Application of statistical techniques to engineering problems; design of engineering test procedures so as to evaluate experimental error; investigation of inherent variability of processes and systems. Prerequisite, 415 or permission.
 N518-N519-520 Seminar (0-0-1, maximum 6) Staff
 521 Thermodynamics III (3) Childs, Costello, Nordquist
 A critical study of the fundamental concepts of thermodynamics; nonflow and steady-flow processes; enthalpy; point properties; reversibility; vapors vs. perfect gases. Prerequisites, 327 and graduate standing, or permission.
 522 Thermodynamics IV (3) McFeron, Waibler
 Selected topics from the thermodynamics and dynamics of fluid flow. The thermodynamics of reactive systems. Introductory kinetic theory of gases. Prerequisite, 521.
 524 Combustion (3) Firey
 Chemical and physical processes of combustion, preparation of fuels, applications, design of combustion equipment. Prerequisite, 521.
 526 Air Conditioning (3) Childs
 Study at the graduate level of heat-transfer aspects of air-conditioning problems; special problems in humidifying and dehumidifying; automatic control and zoning; noise and vibration control; laboratory and field tests of air-conditioning installations. Prerequisites, 425 and graduate standing or permission.

- 529 Advanced Refrigeration (3)** **Depew**
Review of basic cycles and equipment, cold storage practice, refrigeration in food manufacture and distribution, industrial applications, frozen foods and other low temperature applications, capital and operating cost studies, and design problems. Prerequisites, 428 and graduate standing or permission.
- 530 Radiative Heat Transfer (3)** **Depew**
Fundamentals of thermal radiation for black, gray, nongray, diffuse, and specular surfaces. Gaseous radiation and special applications of thermal radiation. Prerequisite, graduate standing in engineering or permission.
- 531 Heat Transfer (3)** **Childs, Costello, Waibler**
Fundamentals of the conduction process. The analysis of steady-state and transient heat conduction in single and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Solutions for transient systems with unsteady boundary conditions, and with moving or fixed heat sources. Prerequisites, 430 and differential equations.
- 532 Convective Heat Transfer (3)** **Waibler**
An introduction to fluid flow and boundary layer theory as applicable to forced and natural convection heat transfer. Dimensional analysis. Condensation and boiling heat transfer. Design of heat exchangers. Prerequisite, 430, differential equations, or permission.
- 533 Gas Dynamics II (3)** **Childs, Costello**
A continuation of 432. A study of the dynamic and thermodynamic relationships for the flow of fluids. Application of basic laws to flow processes in pipes, nozzles, diffusers, compressors, and turbines; wave phenomena; introduction to multidimensional flow; experimental techniques and measurements. Prerequisites, 432 and graduate standing, or permission.
- 534 Experimental Heat Transfer (3)** **McFeron, Waibler**
Study of instrumentation and techniques used in heat transfer measurements; investigation of conduction, radiation, and convection phenomena. Liquid metal and water heat-transfer loops will be used for experiments to determine heat flux, film coefficients, boiling pressure drops, and other phenomena of current interest. Prerequisite, 531 or 532, or permission.
- 536 Gas Dynamics III (3)** **Childs**
A continuation of 533. A study of the dynamic and thermodynamic relationships for the flow of fluids; application of the basic laws in multidimensional flow; unsteady one-dimensional flow. Prerequisite, 533.
- 537 Gas Dynamics IV (3)** **Childs**
A study of the dynamic and thermodynamic relationships for the flow of real fluids considering effects of viscosity and heat conductivity; applications of basic laws to problems in flow through nozzles, diffusers and ducts; free turbulence; jets and wakes. Prerequisite, 536.
- 541 Advanced Engineering Materials (3)** **Mills, Taggart**
Behavior of engineering materials as affected by various conditions of loading and environment. Lecture, laboratory, and studies of technical literature. Prerequisite, 340 or permission.
- 542 Topics in Engineering Materials (3)** **Mills, Taggart**
Selected topics of current importance concerning the nature and behavior of engineering materials. Lecture, laboratory, and studies of technical literature. Prerequisite, 541 or permission.
- 545 Automation (3)** **Baliso**
Concepts in addition to feedback that are important in automatic production, including automatic data processing, computers, numerical control of machine tools, and integrated manufacturing systems. Prerequisite, 564 or permission.
- 549 Fluid Power Control (3)** **Baliso**
An analytical treatment of hydraulic and pneumatic power applied in control systems. Valve actuators, hydraulic transmissions, block diagram representation, steady-state and dynamic analysis, applications, recent developments.
- 551 Applied Elasticity (3)** **Day, Kobayashi, Sherrer**
General equilibrium relations and the stress-strain relations, homogeneous, isotropic, elastic materials. Elastic stress distributions in machine components; plane-stress and plane-strain problems; torsion of various-shaped bars, bending of prismatic bars; thermal-stress problems. Prerequisite, graduate standing in mechanical engineering, or permission.
- 552 Applied Plasticity (3)** **Kobayashi, Sherrer**
Yield conditions and stress-strain relations in the transition range. Elastic-plastic stress distributions in machine components; thick-walled spherical shells and thick-walled tubes under internal pressures; rotating cylinders and disks; torsion and bending of bars; thermal stresses in shells, rotating disks and plates. Prerequisite, 551 or permission.
- 553 Applied Viscoelasticity (3)** **Kobayashi, Sherrer**
Time-dependent aspects of stress, strain, and stability in mechanical-engineering design. Stress analysis in the presence of creep and stress relaxation. Uniaxial loading, pressure vessels, rotating disks, plates, columns. Cyclic variation of load and temperature. Prerequisite, 551 or permission.
- 554 Advanced Theory of Plasticity (3)** **Kobayashi**
Basic equations for three-dimensional problems of perfectly plastic solid, general consideration of discontinuous solutions, problems in plane strain and plane stress, problems in elastic-plastic solids and rigid-plastic solids. Prerequisites, 552, Civil Engineering 579, or permission.

- 556 Experimental Stress Analysis (3)** **Day**
Studies of stress and strain relationships under static and dynamic loading. Analytical methods for determination of stress and strains in irregular members. Theory and practice of the photoelastic method. Brittle lacquer method for study of strain. Application of resistance wire strain gauges to measurement of dynamic and static strain. Interferometry as a tool in stress analysis. Principles and application of mechanical strain gauges. Lecture and laboratory. Prerequisite, graduate standing in engineering or permission.
- 557 Experimental Stress Analysis (3)** **Day**
Study of the membrane, electrical and other analogies for the solution of two-dimensional stress problems. Application of the computer to the iterative method of solution for stress analysis. Birefringent coating and three-dimensional photoelastic applications to engineering problems. X ray, brittle coatings, and strain-rosette methods of strain analysis. Residual stress study, dynamic photoelasticity and evaluation of strain measuring instruments. Lecture and laboratory. Prerequisite, 556.
- 558 Experimental Stress Analysis (3)** **Day**
Seminar and individual research on special problems in experimental stress analysis. Prerequisite, 557 or permission.
- 564 Mechanical Engineering Analysis (3)** **Balise**
Development of solutions to mathematically analogous problems from various fields in mechanical engineering with emphasis on analytical thinking. Use of analogs in the study of mechanical behavior. Distributed parameters in heat flow and dynamics problems. Application of complex variables to mechanical system analysis. Prerequisites, 463 or equivalent, and graduate standing in mechanical engineering, or permission.
- 567 Advanced Dynamics of Machines (3)** **Kobayashi, Sherrer**
Dynamics of particles and of rigid bodies, with emphasis upon applications involving machine parts and other engineering components. Generalized coordinates, La Grange's equations, Hamilton's principle. Prerequisite, 469 or equivalent, or permission.
- 568 Vibrations of Machinery (3)** **Kobayashi, Mills, Sherrer**
Study of mechanical vibration phenomena, linear damped and undamped multi-degree-of-freedom and continuous systems, free and forced vibration, analytical and numerical methods. Prerequisite, Mathematics 321 or permission.
- 571 Servomechanisms I (3)** **Balise**
Applications of feedback to meet accuracy and stability requirements of closed-loop systems; transient and transfer-function methods of analysis; comparative study of mechanical, hydraulic, pneumatic, and electrical components; testing and design. Prerequisite, 564 or permission.
- 572 Servomechanisms II (3)** **Balise**
Continuation of 571 to include topics of current importance. Further study of nonlinear control, statistical analysis of feedback systems, sampled-data methods, self-adaptive systems. Prerequisite, 571.
- 584 Gas Turbines (3)** **Guidon**
Applications of gas turbines; gas turbine cycles (theoretical Brayton, simple open, regenerative, reheat, intercooling, and closed cycles); axial-flow compressors; centrifugal compressors; turbines; combustion systems; gas turbine power plant materials; plant performance. Prerequisites, 481 and graduate standing in engineering, or permission.
- 589 Nonlinear Mechanical Vibrations (3)** **Sherrer**
Study of systems with nonlinear damping and restoring forces, applications of the phase-plane delta and the Ritz averaging method, and stability of nonlinear oscillations. Prerequisite, 568 or permission.
- 590 Random Mechanical Vibrations (3)** **Sherrer**
The study of the problems in measuring random vibrations, in designing simulation equipment, and in mechanical design for random vibration in aircraft and missiles. Prerequisite, 568 or permission.
- 599 Special Projects (1-5, maximum 9)** **Staff**
- 600 Research (*)** **Staff**
Prerequisite, permission of Executive Officer.
- 700 Thesis (*)** **Staff**

MINERAL ENGINEERING

Director: DRURY A. PIFER, 328 Roberts Hall

The School of Mineral Engineering, through the Divisions of Ceramic, Metallurgical, and Mining Engineering, offers courses leading to the degrees of Master of Science in Engineering (see page 173), Master of Science in Mining, Coal Mining, Metallurgical, or Ceramic Engineering; and Master of Science in Ceramics or Metallurgy. No foreign language is required for these degrees. The School also offers preparation for the degree of Doctor of Philosophy in metallurgy.

Materials Engineering

Courses in materials engineering relate to those aspects of applied science which are common to many kinds of materials. They are offered jointly by the faculties in ceramics, metallurgy, and mining, and are basic to more advanced study.

COURSES

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 351 Mineral Processing I (4) | Brien |
| 352 Mineral Processing II (2) | Brien |
| 412 Introduction to X-ray Diffraction (3) | Mueller |
| 481 Mineral Industry Economics (3) | Pifer |
| 512 X-ray Diffraction Analysis (3) | Mueller |
| Theory and laboratory practice in use of X-ray diffraction for quantitative analysis and introduction to structure determination. Prerequisite, 412 or equivalent. | |
| 513 X-ray Diffraction Analysis (3) | Flanagan |
| Advanced theory of X rays as applied to problems of the solid state; concept of reciprocal space and application of Fourier analysis to study of crystal perfection; analysis of randomness, size effect and cold work distortion in crystals by X-ray diffraction interpretation of diffuse scattering. | |
| N520 Engineering Materials Science Colloquium (0) | Staff |

Ceramic Engineering

MASTER OF SCIENCE IN CERAMIC ENGINEERING. A total of 36 credits of course work and a suitable thesis is required for this degree. A comprehensive oral examination completes the requirements. Candidates may select courses and research in accordance with their special interests and objectives. Graduate work is largely concerned with advanced materials science as applied to ceramics; however, courses may be selected which also prepare for plant operation and management. Graduates of accredited ceramic engineering curricula and graduates of other accredited engineering curricula who complete the basic undergraduate courses in ceramic engineering and in science may become candidates.

MASTER OF SCIENCE IN CERAMICS. Students with undergraduate majors in science, particularly chemistry or physics, may become candidates for this degree after completing basic undergraduate courses in ceramics.

COURSES

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| 312 Physical Ceramics: Structure and Rheology (5) | Mueller |
| 313 Physical Ceramics: Colloids and Rheology (3) | Mueller |
| 314 Physical Ceramics: Ceramic Equilibria I (3) | McNeilly |
| 315 Vitreous State (4) | McNeilly |
| 401 Process Ceramics: Drying and Firing (4) | Campbell |
| 402-403 Equipment and Plant Design (2-2) | Campbell |
| 410 Physical Ceramics: Ceramic Equilibria II (3) | McNeilly |
| 421 Ceramic Bodies Laboratory (3) | Campbell, McNeilly |
| 422 Ceramic Petrography (3) | Brien |
| 440 Glass Technology (3) | Staff |
| 450 Pyroprocessing of Nonmetallics (3) | Bauer |
| 470 Refractories (3) | Mueller |
| 500 Ceramic Vitrology (3) | McNeilly |
| Composition and formation of glasses in ceramic bodies: their effect on such properties as mechanical and dielectric strength, porosity, hardness, chemical durability, refractoriness, and resistance to erosion. | |
| 501 Process Ceramics: Production Control (3) | Campbell |
| Application of industrial management and production control methods in the ceramic industry; production characteristics and their effects on the product; explanation and analysis of standards for products and their effects on manufacturing methods in the ceramic industry. | |

- 502 Process Ceramics: Unit Process Control (3)** **Campbell**
Principles of process control as applied to the ceramic industry; methods of measurement and evaluation of data for the control of partial size, viscosity, moisture content, fusion points, workability, humidity, temperature, drying rates, furnace atmospheres and pressures, time-temperature relationships, body and glaze textures, and imperfection causes; application of control data to plant production.
- 503 Process Ceramics: High Temperature Topics (3)** **Campbell**
Application of the fundamentals of heat transfer, reaction rates, and heat sources to the design and use of high temperature kilns, furnaces, and allied equipment.
- 511 Theoretical Physical Ceramics (3)** **Mueller**
Theory and application of colloidal phenomena to the use of ceramic raw materials; colloidal state; colloidal crystal structure; surface phenomena; electrokinetics; base exchange. Prerequisite, 512.
- 512 Theoretical Physical Ceramics (3)** **Mueller**
Theory and measurement of physical properties of ceramics; reactions of ceramic materials; surface area determinations; zeta potentials; particle size measurement; thermal analysis; laboratory measurements. Prerequisite, 511.
- 513 Applied Physical Ceramics (3, maximum 6)** **Mueller, Staff**
Application of physical ceramic principles to the control of ceramic production; instrumentation studies. Prerequisite, 512.
- 520 Seminar (1, maximum 6)** **Staff**
Required for all graduate students.
- 590 Industrial Minerals Research (*)** **Staff**
- 599 Special Topics in Ceramics (*)** **Staff**
- 600 Research (*)** **Staff**
Prerequisite, permission of Executive Officer.
- 700 Thesis (*)** **Staff**

Metallurgical Engineering

MASTER OF SCIENCE IN METALLURGICAL ENGINEERING. A total of 36 credits in course work and a suitable thesis are required for this degree; and a comprehensive oral examination completes the requirements. Candidates may select courses in accordance with their special interests and objectives. Graduate work is largely concerned with advanced materials science as applied to physical metallurgy, extractive metallurgy, or mineral dressing. However, courses may also be selected which prepare for plant operation and management. Graduates of accredited metallurgical engineering curricula and graduates of other engineering curricula who complete the basic undergraduate courses in metallurgical engineering may become candidates.

MASTER OF SCIENCE IN METALLURGY. Students with undergraduate majors in science, particularly physics or chemistry, may become candidates for this degree after completing basic undergraduate courses in metallurgy.

DOCTOR OF PHILOSOPHY PROGRAM (METALLURGY). Students who have completed one year of graduate work may request an examination to determine whether or not the faculty will advise proceeding to the Ph.D. General Examination. A critical examination of the applicant's record, recommendations, and proposed course of study will be pertinent to this decision. The language requirement will be satisfied by passing the scheduled examinations in any two of either German, French, or Russian. In addition to course work, a candidate will be expected to study independently for examination on a list of subjects prepared by his Supervisory Committee. General Examinations will be taken at the end of the second year or during the third year of residence. The General Examinations will be sufficiently comprehensive to demonstrate the candidate's ability to deal with broad aspects of materials science, as well as his specialized subject area. Each candidate will present a written dissertation based on his research program which makes an original and independent contribution to knowledge. Proficiency in basic research will be of paramount importance and the research will be conducted in the University laboratories. The Final Examination will consist of the candidate's oral defense of his thesis.

COURSES

321 Metallurgical Stoichiometry II (3)	Morgan
322 Metallurgical Thermodynamics I (3)	Morgan
324 Chemical Metallurgy Laboratory (1)	Morgan
361, 362, 363 Physical Metallurgy (4,4,4)	Roberts
420 Metallurgical Plant Design (2)	Morgan
421 Metallurgical Thermodynamics II (4)	Lloyd
422 Chemical Metallurgy: Process Calculations (2)	Staff
424 Metallurgical Experimental Techniques (2)	Morgan
441 Engineering Physical Metallurgy (3)	Polonis
442 Engineering Physical Metallurgy Laboratory (1) May be taken concurrently with 441.	Polonis, Staff
450 Light Metals (3)	Roberts
460 Deformation of Metals (3)	Polonis
461 Advanced Physical Metallurgy (3)	Roberts
464 Applied Physical Metallurgy (3)	Flanagan
466 Theory of Metals (3)	Flanagan
520 Seminar (1, maximum 6) Review of research problems and recent literature. Required for all graduate students.	Staff
525 Thermodynamic Topics in Metallurgy (3) Selected topics in the application of classical and statistical thermodynamics to systems of current metallurgical interest. Prerequisite, 322.	Morgan
531 Advanced Metallurgy (*) Study of selected problems, with particular attention to recent publications and scientific applications in physical or extractive metallurgy.	Staff
541 Theoretical Structural Metallurgy (3) Advanced study of structural imperfections in metals; vacant lattice sites; influence of foreign atoms; fundamentals and applications of dislocation theory. Prerequisite, 363.	Polonis
542 Theoretical Structural Metallurgy (3) Metal crystal growth; detailed consideration of solidification including experimental techniques; single crystals, substructure, segregation phenomena and zone melting; interfaces and internal boundaries. Prerequisite, 541.	Polonis
543 Theoretical Structural Metallurgy (3) The fundamental view of mechanical properties and deformation of metals; elasticity, anelasticity, and internal friction; plasticity, geometry of slip, work hardening. Prerequisite, 541.	Polonis
551 Special Topics in Advanced Physical Metallurgy (3, maximum 6) Selected topics concerned with current developments in physical metallurgy.	Flanagan
561 Phase Transformations in Solid Metals (3) Phase transformations in solid metals and alloys. An advanced treatment of phase transformations from the standpoint of crystallography, reaction kinetics, and thermodynamics. Prerequisite, 363.	Roberts
562 Phase Transformations in Solid Metals (3) Kinetics of tempering carbon and low-alloy steels, theories of nucleation and grain-growth phenomena, recrystallization, precipitation hardening. Prerequisite, 561.	Roberts
563 Phase Transformations in Solid Metals (3) Diffusion theory, martensitic transformations, and other solid state transformations. Prerequisite, 562.	Roberts
566 Advanced Theory of Metals (3) Modern theories of the metallic state and their relationship to the physical properties of metals. Prerequisite, 466.	Flanagan
599 Special Topics in Metallurgy (*)	Staff
600 Research (*) Prerequisite, permission of Executive Officer.	Staff
700 Thesis (*)	Staff

Mining Engineering

MASTER OF SCIENCE IN MINING ENGINEERING. Candidates for this degree may elect work in mining or mineral dressing in accordance with their special interests. Special study in the fields of labor relations and management is available. The

student may select courses in preparation for exploration and development, operation and management, engineering, or mining geology. Graduate studies in mineral dressing cover the fields of metallic and nonmetallic minerals and coal, with special work on advanced theory and practice. Graduates of accredited mining engineering curricula and graduates of other accredited engineering curricula who complete the basic undergraduate courses in mining engineering and geology may become candidates.

MASTER OF SCIENCE IN COAL MINING ENGINEERING. Candidates for this degree may undertake research in the laboratories of the United States Bureau of Mines Northwest Experiment Station in cooperation with the staff of the Bureau. Study is available in mine engineering, operation, labor relations, and management. Graduates of other accredited engineering curricula must complete basic undergraduate courses in mining engineering in order to become candidates.

COURSES

306 Mine Excursion (1, maximum 2)	Staff
322 Methods of Mining (4)	Anderson
325 Mineral Land Valuation (2)	Anderson
330 Mine Surveying (3)	Anderson
331 Mine Mapping (1)	Anderson
425 Rock Mechanics (2)	Pifer
426 Exploration and Development of Mineral Deposits (3)	Pifer
427 Exploration Geophysics: Introduction (2)	Anderson
432 Mine Engineering (5)	Anderson
433 Mine Ventilation (3)	Anderson
463 Mineral Processing: Flotation (3)	Brien
464 Mineral Processing: Hydrometallurgy (4)	Brien
465 Mineral Processing: Microscopy (2)	Brien
466 Mineral Processing: Practices (2)	Brien
467 Mineral Process Plant Design (2)	Brien
476 Coal Preparation (2)	Brien
483 Mining Laws (1)	Pifer
485 Industrial Minerals (3)	Brien
520 Seminar (1, maximum 6)	Staff
Lectures and discussions; review of research problems and recent literature.	
521 Metal Mining (*)	Anderson, Pifer
Production methods; mining control; support; applied efficiency methods; administration; equipment and machinery; deep-level mining; health and safety; special problems. Arranged in accordance with student's major interest.	
522 Mine Shafts (3)	Pifer
Location and design, surface plant, and collar preparation; sinking, support, stations and bottoms, equipment and maintenance; safety and costs; rectangular, square, and circular shafts.	
523 Coal Mining (*)	Pifer
Studies in coal mining and coal preparation with particular reference to the Pacific Northwest. Prerequisite, graduate standing.	
525 Rock Mechanics (3)	Pifer
Physical properties and mechanics of response by rocks under stress; theories of stress distribution around underground structures; dynamic stress in rock fragmentation; application to mine design and operations sequence; strata control. Prerequisite, 425.	
560 Mineral Processing (*)	Brien
Special problems and research.	
561 Advanced Mineral Processing Preparation (*)	Brien
Unit process studies in comminution, sizing, classifying, and auxiliary processes.	
562 Advanced Mineral Processing Laboratory (*)	Brien
Experimental study of theoretical principles of preparation and concentration. Arranged concurrently with 561 and 563 or as required.	
563 Advanced Mineral Processing Theory (*)	Brien
Physics and chemistry of beneficiation.	

564 Advanced Mineral Processing Design (*)	Brien
Plant layout studies, economics, and equipment design.	
571 Cooperative Research with United States Bureau of Mines (6)	Staff
600 Research (*)	Staff
Prerequisite, permission of Executive Officer.	
700 Thesis (*)	Staff

COLLEGE OF FISHERIES

Dean: **RICHARD VAN CLEVE, Fisheries Center**

The College of Fisheries offers courses leading to the degrees of Master of Science and Doctor of Philosophy. Applicants must have completed the equivalent of an undergraduate major in fisheries or an undergraduate major in a related field. A broad training in the basic sciences is desirable.

Candidates will be expected to attain a general knowledge of fisheries in addition to their specialization in specific areas of fisheries biology, or food science. Graduate students may be required to take supporting courses in other selected departments of the University. The graduate program is determined by a supervisory committee in consultation with the student. All graduate students must complete 6 credits (three quarters) in Fisheries 520.

MASTER OF SCIENCE. At least one year of approved study, with the completion of a research project, leads to the master's degree.

A total of not less than 36 credits in course work and thesis must be presented, as well as a certificate of proficiency in one foreign language.

DOCTOR OF PHILOSOPHY. Candidates must complete at least three years of graduate study including a dissertation. Credits earned for a master's degree may be applied toward the doctor's degree.

The candidate must present a certificate of proficiency in two foreign languages (one in addition to the Master of Science requirement).

COURSES IN FISHERIES

301 Anatomy of Fishes (5)	Welander
302 Microbiology of Fisheries (5)	Liston
303 Introduction to Invertebrate Fisheries (5)	Sparks
402 Economically Important Fishes (5)	Welander
405 Economically Important Mollusca (5)	Sparks
406 Economically Important Crustacea (5)	Sparks
425 Migrations and Races of Fishes (5)	De Lacy
426 Early Life History of Marine Fishes (5)	De Lacy
427 Ecology of Marine Fishes (5)	De Lacy
451 Propagation of Salmonoid Fishes (5)	Donaldson
452 Nutrition of Fishes (5)	Donaldson
453 Fresh-Water Fisheries Management: Biological (5)	Donaldson
454 Communicable Diseases of Fishes (5)	Sparks
460 Water Management and Fish Resources (5) (Offered Spring Quarter only.)	M. C. Bell
461 Water Management and Fish Resources (5) (Offered Autumn Quarter only.)	M. C. Bell
465 Problems in Fish Biology (6) (Offered at Friday Harbor Summer Quarter only.)	Staff
480 Introduction to Commercial Fishing Industry (5)	F. H. Bell
495 Introduction to Fisheries and Food Science Literature (2, maximum 6)	Staff
501 On-the-Job Training (1-3, maximum 3 for M.S., maximum 9 for Ph.D.)	Staff
Guided on-the-job training in governmental or industrial fisheries organizations. Prerequisite, permission.	

- 503 Systematic Ichthyology (5)** **Welander**
Principles and procedures of ichthyological taxonomy demonstrated by current problems and research. Prerequisites, 402 and permission.
- 504 Principles of Technological Research in Fisheries and Food (3)** **Liston**
A lecture and laboratory course designed to familiarize graduate students in fisheries with the methods used in technological research. Prerequisite, permission.
- 505 Research Techniques in Shellfish Biology (5)** **Sparks**
A field and laboratory course dealing with research methods in the reproduction, growth, and mortality of oysters and clams.
- 510 Fish Behavior (3)** **Fields**
Behavior related to sensory-motor equipment. Design of experiments emphasized for studies ranging from naturalistic observation to controlled laboratory and field experiments. Prerequisite, permission.
- 511 Fish Behavior Laboratory (2-3, maximum 6)** **Fields**
Prerequisite, 510 or concurrent registration in 510.
- 520 Graduate Seminar (2, maximum 6)** **Staff**
Training in methods of searching fisheries literature.
- 556 Age and Growth of Fishes (5)** **Van Cleve**
Principles of growth; methods of determining age and rates of growth in fresh-water and marine fishes. Prerequisites, 402, and Mathematics 383 or permission.
- 557 Population Enumeration (5)** **Van Cleve**
Methods of enumerating animal populations; availability; dominant age groups; gear selectivity. Prerequisite, 556 or permission.
- 558 Population Dynamics (5)** **Van Cleve**
Influence of natural and artificial factors on variation in abundance and yield from animal populations. Prerequisite, 557 or permission.
- 604 Research (*, maximum 3 for M.S., 10 for Ph.D.)** **Staff**
- 700 Thesis (*)** **Staff**

COURSES IN FOOD SCIENCE

- 481 Introduction to Food Technology (5)** **Liston**
Prerequisite, permission.
- 482 Food Analysis 1 (3)** **Dollar**
Prerequisites, Biochemistry 483 or permission
- 483 Food Analysis 2 (3)** **Dollar**
Prerequisite, 482.
- 484 Principles of Food Processing 1 (5)** **Dollar, Liston**
Prerequisite, 481 or permission.
- 485 Principles of Food Processing 2 (5)** **Dollar, Liston**
Prerequisites, 482, 486 or permission.
- 486 Deteriorative Processes in Foods (5)** **Dollar, Liston**
Prerequisites, 483, 485 or permission.
- 487 Food Analysis 3 (3)** **Dollar, Liston**
Prerequisite, 483.

COLLEGE OF FORESTRY

Dean: GORDON D. MARCKWORTH, 206 Anderson Hall

The objectives of the graduate program of forestry are to make available the best academic guidance, research facilities, and advanced professional education to foresters desiring intensification or specialization beyond the initial professional degree. The research program in forestry provides a medium of education primarily in graduate programs to promote and execute fundamental forestry research.

Students who intend to work toward an advanced degree must apply for admission to the Graduate School and meet the requirements set forth by the Graduate School and the College of Forestry. *Graduate students must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.* The Master of Forestry, Master of Science in Forestry, and Doctor of Philosophy degrees are conferred by the Graduate School through the College of Forestry.

MASTER OF FORESTRY. To qualify for admission to the Master of Forestry degree program the candidate must have a bachelor's degree in forestry. Supporting

course work is taken mainly in the field of forestry. Only 400- and 500-numbered courses, or those listed in the *Graduate School Bulletin*, are acceptable. A foreign language is not required.

MASTER OF SCIENCE IN FORESTRY. To qualify for admission to the Master of Science in Forestry degree program, the candidate must have a bachelor's degree in forestry or equivalent. A minor in science, constituting one third of the required course work, is required in support of the forestry major. Only 400- and 500-numbered courses, or those listed in the *Graduate School Bulletin*, are acceptable. Candidates admitted with a forestry-equivalent bachelor's degree ordinarily require a minimum of two years to complete the degree. A foreign language is not required.

DOCTOR OF PHILOSOPHY. General requirements are listed in preceding sections. Additionally, doctoral candidates in forestry are required to pass the language examinations for this degree within the first academic year beyond the master's degree, or two academic years beyond the baccalaureate degree; whichever has preceded the doctoral candidacy.

COURSES

310 General Forest Soils (4)	Gessel
401 Safety Practices in Forest Industries (2)	Pearce
403 Timber Physics (3)	Bryant
404 Timber Physics (5)	Bryant
406 Microtechnique (3)	Leney
407 Forest Economics (2)	Turnbull
408 Forest Economics and Finance (5)	Turnbull
409 Forest Policy and Administration (3)	Marckworth
410 Advanced Forest Soils (3)	Gessel
423 Application of Silvicultural Methods (3)	Scott
424 Advanced Silviculture (3)	Scott
430 Advanced Forest Fire Control (3)	Schaeffer
440 Construction (4)	Stenzel
441 Forest Engineering (5)	Pearce, Stenzel
442 Logging Engineering (5)	Pearce
446, 447, 448, 449 Logging Engineering Field Studies (3,5,5,3)	Pearce, Stenzel
455 Forest Influences (4)	Gessel, Scott
460 Forest Management (5)	Robertson
461 Forest Management (3)	Robertson
465 Forest Photo Interpretation (3)	Robertson
466, 467, 468, 469 Senior Management Field Studies (5,5,4,2)	Robertson
470 Forest Products Industries (5)	Erickson
471 Timber Design (3)	Bryant
472 Plywood, Lamination, and Glues (5)	Bryant
476 Wool Pulp (6)	Leney
478 Advanced Wood Technology (5)	Bryant, Erickson
481 Milling (5)	Thomas
482 Manufacturing Problems (5)	Thomas
483 Theory and Practice of Kiln Drying (3)	Thomas
484 Forest Products Field Studies (2)	Thomas
485 Forest Products Seminar (2)	Staff
495 Research Methods Seminar (3)	Bryant
500 Graduate Seminar (1, maximum 10) Required of graduate students.	Staff

- 511 Seminar in Forest Soils (2)** **Gessel**
Prerequisites, 410 and permission.
- 512 Soil Morphology and Classification (3)** **Gessel**
An advanced study of the principles of soil formation and classification; intensive coverage of these principles as applied to the survey and classification of forested lands; the factors of the environment that determine soil properties. Prerequisite, permission.
- 513 Methods of Forest Soil Survey (5)** **Gessel**
A course of field studies to acquaint the student with forest soils of the Northwest and with soil classification and survey philosophies and procedures. (Offered alternate years; offered 1961-62.) Prerequisites, 512 and permission.
- 521 Advanced Silvics (3-5)** **Scott**
A consideration of current literature and topics in forest tree ecology and physiology. Prerequisite, permission.
- 522 Advanced Silviculture (3)** **Scott**
A detailed study of the literature dealing with the more recent applications of silviculture in world forestry. Prerequisite, permission.
- 523 Forest Tree Seed (2)** **Campbell, Scott**
The study of forest tree seed, including structure, development, production, collection, provenance, storage, germination, dormancy, and stimulation. Prerequisite, permission.
- 525 Research Methods in Forest Ecology (2)** **Campbell, Gessel, Scott, Turnbull**
Research philosophies and procedures as applied to forest biological problems. Required of all graduate students in forest management. Prerequisite, permission.
- 527 Forest Genetics (3)** **Campbell**
Tree-improvement breeding theory as related to elementary population genetics, variation in plant populations, and natural and artificial selection. Prerequisite, Biology 451 or permission.
- 541 Advanced Forest Engineering (5)** **Pearce**
Logging organization and management; logging cost analysis and budgeting. Prerequisite, permission.
- 542 Advanced Logging Engineering (3)** **Pearce**
Detailed consideration of problems of logging planning and truck road engineering; including the preparation and field layout of logging plans; location, design, and construction of logging truck roads. Prerequisite, permission.
- 571 Advanced Wood Preservation (3)** **Erickson**
Permeability of wood; theory of penetration; treating plants, their equipment and design. Prerequisites, 370 and 371.
- 572 Wood Chemistry and Analysis (3-5)** **Erickson**
Techniques for analyzing the chemical constituents of wood; the relationships between chemical properties and the structural properties and uses of various species of wood. Prerequisites, 307, 470, Chemistry 232, and permission.
- 573 Wood-Moisture Relations (2-3)** **Erickson**
Theories involved in relationships between wood and varying degrees of moisture content, conditions at fiber saturation point and between fiber saturation and zero moisture content. Prerequisites, 307, 404, and permission.
- 574 Wood-Resin Relations (3)** **Bryant**
The technology of synthetic resins as wood adhesives, wood impregnants, binders, overlays, and surface coatings. Prerequisites, 472 and permission.
- 575 Forest Products Economics (3)** **Thomas**
Economic considerations in planning for profitable and complete utilization of the forest resource under a variety of circumstances. Prerequisites, 482 and permission.
- 590 Graduate Studies (1-5)** **Staff**
Study in fields for which there is not sufficient demand to warrant the organization of regular courses.
- 600 Research (*)** **Staff**
- 700 Thesis (*)** **Staff**

Tutorial study designed to meet individual requirements is available to graduate students in the Graduate Studies courses listed below. Such study may include literature review, field, and laboratory work. The courses are offered in all quarters and credits can vary from 1 to 5. Prerequisites include graduate standing and permission of the instructor. Credits are individually arranged for each course.

- 510 Graduate Studies in Forest Soils (1-5)** **Gessel**
- 515 Graduate Studies in Forest Influences (1-5)** **Gessel, Scott**
- 520 Graduate Studies in Silvics and Silviculture (1-5)** **Scott**
- 526 Graduate Studies in Forest Genetics (1-5)** **Campbell**
- 530 Graduate Studies in Forest Fire Control (1-5)** **Schaeffer**
- 540 Graduate Studies in Logging Engineering (1-5)** **Pearce, Stenzel**

550 Graduate Studies in Forest Recreation (1-5)	Brockman
555 Graduate Studies in Wildlife Management (1-5)	Brockman
560 Graduate Studies in Forest History and Policy (1-5)	Marckworth
563 Graduate Studies in Forest Mensuration (1-5)	Turnbull
565 Graduate Studies in Forest Management (1-5)	Robertson
566 Graduate Studies in Forest Photogrammetry (1-5)	Robertson
568 Graduate Studies in Forest Finance and Economics (1-5)	Turnbull
570 Graduate Studies in Forest Products (1-5)	Bryant, Erickson, Leney, Thomas

INTERDISCIPLINARY PROGRAM RADIOLOGICAL SCIENCES

A program leading to the degree of Master of Science in Radiological Science is offered by the interdisciplinary faculty Radiological Science Groups. Candidacy for this degree is open to students having completed bachelor's degrees in physical or biological sciences or in engineering. The curriculum is suitable for holders of AEC Fellowships in Health Physics, but is not limited to these.

Prerequisites for graduate study in Radiological Sciences include Physics 323 (Introduction to Nuclear Physics, or the equivalent), Mathematics 221 (Differential Equations) and a year of general biology at the college level. A student with one deficiency may be accepted for the program provided he removes the deficiency during the first year of graduate study. No credit toward the degree will be allowed for a course used to remove a deficiency.

A minimum of 42 credits, including 9 credits for thesis, must be completed for the degree. The thesis is held to be an important feature of the degree program. Topics for thesis may be chosen in the fields of the radiological sciences or in related fields, subject to approval of the adviser.

For additional information, please communicate with Prof. Max R. Zelle, 104 Fisheries Building.

SCHOOL OF LIBRARIANSHIP

Director: IRVING LIEBERMAN, 111 Library

The program in Librarianship is intended to prepare a selected group of college graduates for a professional career in library work. Programs are offered leading to the degrees of Master of Librarianship and Master of Law Librarianship. The basic professional curriculum is organized around a group of studies designed to provide a sound foundation in the principles and methods of librarianship. These studies are required of all candidates having a degree in librarianship. In addition, the student elects courses which will prepare him for a special field of library service. Programs in special fields of library service are those designed for children and young people's work, school library work, and law librarianship. Other programs may be designed in accordance with the individual needs of the student. The School of Librarianship is accredited by the American Library Association and is a member of the Association of American Library Schools.

ADMISSION. The approval of both the Graduate School and the School of Librarianship is necessary for admission. The full program may be entered in either Autumn or Summer Quarter. *The deadline for submission of application and complete credentials for Autumn Quarter is July 15, and for Summer Quarter, May 15.* It is recommended that candidates for admission write to the School of Librarianship for its *Announcement*, which describes in detail the programs offered and the requirements for admission and the degrees.

SUMMER PROGRAM. The full program for the Master of Librarianship degree is available to Summer Quarter students. Basic required courses are offered every summer, and continuations of these courses are given in alternate summers. Additional course offerings vary from year to year but are planned to enable students to complete requirements for the degree by attendance during summers only.

LIBRARY FACILITIES. The School of Librarianship is in the south wing of the Henry Suzzallo Library.

The book collection of the School contains the essential materials on librarianship, the William E. Henry collection of rare books, an outstanding collection of children's books, and a high school library collection. These materials are supplemented by the University Library with its numerous departmental and research libraries containing more than one million volumes. Students have access to the facilities of the Pacific Northwest Bibliographic Center and to the University's Audio-Visual Services. The Seattle Public Library, the King County Public Library, and many school, college, and special libraries are available for observation and field work.

COURSES

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| 451 Children's Books (3) | Peterson, Wheeler |
| 452 Storytelling (3) | Wheeler |
| 460 School Library Administration (3) | Turner |
| 461 School Library Materials (3) | Turner |
| 462 Reading of Young People (3) | Turner |
| 463 Elementary Classification and Cataloging (4) | Peterson, Turner |
| 464 Elements of Technical Processes (3) | Peterson, Turner |
| 470 History of the Book (3) | Bevis |
| 500 Libraries, Librarians, and Society (2) | Lieberman |
| Objectives and principal fields of library services. Major trends and problems. | |
| 501 Libraries, Librarians, and Society (2) | Bevis |
| Continuation of 500. Prerequisite, 500. | |
| 502 Library Organization and Administration (3) | Staff |
| Study of public and academic library service, including a consideration of legal structure; finance and statistics; buildings and equipment; personnel; public relations; and other phases of library management. The extension of library service is also considered. | |
| 509 Directed Field Work (2-4) | Bevis, Lieberman |
| Four weeks of professionally supervised field work in various types of libraries. | |
| 510 Evaluation of Library Materials (4) | Bevis |
| Sources of information about books; criteria of evaluation for selection; evaluation of general reference materials; procedures of reader's services. | |
| 511 Library Materials in the Humanities and Social Sciences (3) | Bevis, Turner |
| Survey and evaluation of library resources in these fields. Included are reference tools, bibliographies, landmark books, and contemporary literature, with reference to the needs of different kinds of readers. Prerequisite, 510. | |
| 512 Library Materials in Science and Technology (3) | Bevis |
| Continuation of 511. Prerequisite, 510. | |
| 513 Government Publications (2) | Bevis |
| Government publications of the United States and foreign countries, their acquisition, organization, and use. (Offered Summer Quarter only.) | |
| 514 The Library and Audio-Visual Materials (3) | Lieberman |
| Types, cost, utility, and characteristics of modern sensory aids employed in communicating ideas; organization for handling films, film-strips, recordings and transcriptions, slides, pictures, exhibits, and similar materials in the library; experience in operating various types of equipment; techniques in extending the use of audio-visual materials by community groups; sources of information about materials and equipment. | |
| 520 Organization of Library Materials: Theory and Principles (4) | Peterson |
| The organization of library materials for use; principles of cataloging, classification, and subject analysis: study of the Dewey Decimal and Library of Congress schemes of classification. | |
| 531 Organization of Library Materials: Comparative Methods (4) | Peterson |
| Cataloging practices and methods employed to meet varying needs. Prerequisite, 530. | |
| 532 Organization of Library Materials: Advanced Problems (2) | Peterson |
| Cataloging of special materials; maps, music, microfilm, and rare books; special classification schemes. Prerequisite, 531. | |

- 540 Advanced Legal Bibliography (2)** **Gallagher**
Bibliographical data and use of federal and state law reports and statutes; quasi-legal and commissioners' reports of the states; bar association records, legal periodicals, indexes and digests, and cooperative bibliographies of law collections.
- 541 Selection and Processing of Law Library Materials (4)** **Gallagher**
Aids to selection, processing, microphotography of legal material, etc.
- 542 Legal Reference and Research (5)** **Gallagher**
Bibliographical lists, law reference questions, briefing, and annotations. (Offered Summer Quarter only.)
- 543 Law Library Administration (5)** **Gallagher**
Staff, patrons and public relations, circulation, architecture, book arrangements, equipment, rules, publicity, publications, budgets, reports, professional societies, regional service.
- 550 Introduction to Library Service for Children (3)** **Wheeler**
The philosophy, organization, and administration of a children's department in a public library, together with an examination of its relationship to other social agencies in the community.
- 553 Library Work with Children (2)** **Wheeler**
Further study of the organization and function of a children's department in a public library, with special attention to the study of reference books, periodicals, library publicity, and cooperation with the schools. Includes actual practice in conducting library lessons and book talks. Prerequisite, 550.
- 554 Children's Literature (3)** **Wheeler**
Reading and discussion of children's books of all levels; examination of tools and review media for selection, with practice in selection for various fields of interest. Prerequisite, 451 or 550.
- 599 Methods of Research in Librarianship (2)** **Staff**
A survey of problems and methods.
- 600 Research (*)** **Staff**
Systematic investigation under faculty direction of a special project approved by the Director and the instructors concerned.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)** **Staff**
Limited to students completing a nonthesis degree program.

SCHOOL OF MEDICINE

Dean: GEORGE N. AAGAARD, C304 Health Sciences Building

In accordance with the general requirements of the Graduate School, the School of Medicine, as an integral part of the Division of Health Sciences, offers programs leading to the degrees of Master of Science and Doctor of Philosophy in the Departments of Anatomy, Biochemistry, Microbiology, Pharmacology, and Physiology and Biophysics. In the Department of Surgery, a program leading to the degree of Master of Science is offered. Students who intend to work toward one of these degrees should confer with the executive officer of the department in which they intend to major.

Several other departments of the School offer courses which may be of interest to graduate students in related fields, and these are listed below. The *School of Medicine Bulletin* contains more complete descriptions of courses numbered below 500.

ANATOMY

Executive Officer: N. B. EVERETT, G511 Health Sciences Building

The Department of Anatomy offers courses leading to the degrees of Master of Science and Doctor of Philosophy. It is desirable that candidates for graduate work in anatomy have a broad and well-correlated knowledge of the general fields of biology, chemistry, physics, and mathematics.

Graduate work in anatomy does not rest upon any rigid or specific list of courses; the program will depend primarily on the applicant's field of interest. In addition to the usual courses in gross and microscopic anatomy, specialized training is offered in the fields of electron microscopy, X-ray diffraction, tracer

biology, experimental cytology, cytochemistry, polarization microscopy, and microspectrometry.

COURSES

- | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| 301 General Anatomy (4) | Staff |
| 328, 329 Gross Anatomy (6,4) | Bodemer, Staff |
| 330 Microscopic Anatomy (4) | Wood |
| 331 Neuroanatomy (2) | Bodemer, Everett, Rieko |
| 350-351 Human Function and Structure (6-6) (See Conjoint Courses, page 206.) | |
| 401-402-403 Gross Anatomy (8-4-4) | Bassett |
| 404 Human Embryology (3) | Blandau |
| 405-406 Microscopic and Submicroscopic Anatomy (4-4) | Luft, Roosen-Runge |
| 409 Basis of Neurology (3,5, or 8) (See Conjoint Courses, page 206.) | |
| 440 Special Topics in Dissection (2, maximum 6) | Bassett, Staff |
| Prerequisite, permission. | |
| 505 Advanced General Histology (3) | Roosen-Runge, Wood |
| Comparative study of tissues in selected phyla of vertebrates and invertebrates. Prerequisites, 330, 405, or permission. | |
| 510 Cytochemistry (4) | Luft |
| The finer distribution of chemical substances in cells and tissues; methods of cytochemistry and their theoretical basis and validity. Prerequisite, permission. | |
| 515 Biological X-ray Structure Analysis (3) | Jensen |
| Theory of X-ray diffraction, with emphasis on applications to biological systems. Prerequisite, permission. | |
| 518 Developmental Neurology (2) | Bodemer |
| Detailed consideration of the problems of development, growth, and regeneration of the nervous system and its functions. Prerequisites, Zoology 456 or equivalent, and permission. | |
| 521 Seminar in Molecular and Submicroscopic Anatomy (2) | Luft, Wood |
| The molecular and micellar basis of bodily structure. Prerequisite, permission. | |
| 525 Brain Dissection (2) | Everett |
| Laboratory work in dissection of the human brain, supplemented by lectures emphasizing developmental and functional aspects of neurology. Prerequisite, permission. | |
| 530 Biological Tracer Techniques (2) | Everett |
| Techniques of using radioactive isotopes as tracers in biological research. Prerequisite, permission. | |
| 531, 532, 533 Electron Microscopy (2-5,2-5,2-5) | Luft, Wood |
| Theoretical and practical aspects of electron microscopy of biological material, including electron diffraction. Prerequisites, 405-406 or permission. | |
| 540 Embryology of the Heart (2) | Blandau |
| A detailed study of the embryology of the heart and great vessels during the first eight weeks of life. Prerequisite, 404 or permission. | |
| 550 Biological Polarization Microscopy (4) | Staff |
| Theory, technique, and application of polarization microscopy in biological studies. Prerequisite, permission. | |
| 555 Mammalian Reproduction (3) | Blandau, Greenwald, Roosen-Runge |
| Fundamental processes of reproductive anatomy and physiology of laboratory animals. Prerequisite, permission. | |
| 557 Seminar (1-3, maximum 9) | Staff |
| Prerequisite, permission. | |
| 585 Surgical Anatomy (2-4, maximum 12) (See Conjoint Courses, page 206.) | |
| 600 Research (*) | Staff |
| Prerequisite, permission. | |
| 700 Thesis (*) | Staff |

BIOCHEMISTRY

Executive Officer: HANS NEURATH, C408 Health Sciences Building

Training in biochemistry begins at the advanced undergraduate or graduate level, and studies toward the degree of Doctor of Philosophy are recommended for students planning a career in this field. Biochemists occupy positions in aca-

demic teaching and research institutions, in hospitals, and in industry and government laboratories.

The Department offers courses in basic biochemistry for students in various areas of study in the University, including the natural sciences, medicine, dentistry, and others. Students who intend to work toward a degree of Master of Science or Doctor of Philosophy must present a bachelor's degree with a major in chemistry or its equivalent, and should have some background in biology

COURSES

- 361 Biochemistry (3)** **Staff**
- 362 Biochemistry Laboratory (3)** **Staff**
- 363 Biochemistry Laboratory (2)** **Staff**
- 401, 402 Biochemistry (5,3)** **Staff**
- 403 Biochemistry Laboratory (3)** **Staff**
Required for first-year medical students; open to a limited number of students with allied interests. Prerequisites, 401 and 402, or permission.
- 481, 482, 483 Biochemistry (3,3,3)** **Staff**
Recommended for advanced undergraduate or graduate students of chemistry, biochemistry, and various biological sciences. Prerequisites, Chemistry 337 for 481; 481 or permission for 482; 482 or permission for 483; introductory physical chemistry is recommended.
- 484 Biochemistry Laboratory (3)** **Staff**
Laboratory projects and conferences. For students of biochemistry, chemistry, and various biological sciences. Prerequisites, 481 and 482; the latter course to be taken concurrently.
- 520 Seminar (1-3, maximum 9)** **Staff**
Prerequisite, permission.
- 562 Physical Biochemistry (2)** **Staff**
This course acquaints the student with certain specialized applications of physical chemistry and their use in biochemical research. Quantitative aspects of methods especially applicable to the study of high molecular weight compounds and systems of biological interest are considered. (Offered 1963-64.) Prerequisites, 563, 564, and Chemistry 357, or permission.
- 563, 564 Proteins (2,2)** **Neurath, Wilcox**
The chemistry and biological activity of proteins and naturally occurring protein structures are considered from the viewpoints of the properties of protein solutions, molecular structure, and biological function. Proteins found in a wide variety of tissues, both plant and animal, are discussed. (Offered 1963-64.) Prerequisites, 483 or permission for 563; 563 for 564.
- 565, 566, 567 Enzymes and Enzyme Action (2,2,2)** **Fischer, Huennekens**
Preparation and properties of enzymes and enzyme systems, including methods of measurement, kinetic analysis, and theory of enzyme catalysis; classification and properties of individual enzymes, coenzymes, and enzyme systems. (Offered 1961-62.) Prerequisites, 482 and Chemistry 357, or permission for 565; 565 for 566; 566 for 567.
- 568 Biochemistry of Lipides (2)** **Hanahan**
The structure and metabolism of sterols, steroids, fatty acids, and the complex lipides will be treated on an advanced level. (Offered Autumn Quarter, 1962.) Prerequisite, 402 or 483, or permission.
- 569 Biochemistry of Nucleic Acids (2)** **Gordon**
Chemistry and structure of nucleic acids, enzymes active on nucleic acids, and the biosynthesis and metabolism of the components of nucleic acids are considered. Current concepts of the replication of nucleic acids, information transfer, and the biological functions of nucleic acids including the infectivity of viruses will be discussed. (Offered 1962-63.) Prerequisite, 402 or 483, or permission.
- 570 Topics in Mammalian Biochemistry (2)** **Krebs**
An advanced treatment of topics related to metabolism in the intact animal: organ function, body pools, hormonal control, energy balance, nitrogen balance, and nutrition. Biochemical changes in certain diseases are discussed. (Offered 1962-63.) Prerequisite, 402 or 483, or permission.
- 583 Advanced Biochemistry Laboratory (3)** **Staff**
Biochemical preparations and investigations of physical and chemical properties by special techniques, including spectrophotometry, polarimetry, ultracentrifuge, electrophoresis, isotope tracer applications, etc. Prerequisites, 483 and permission.
- 600 Research (*)** **Staff**
Prerequisite, permission.
- 700 Thesis (*)** **Staff**

MICROBIOLOGY

Executive Officer: CHARLES A. EVANS, G305 Health Sciences Building

The Department of Microbiology offers courses leading to the degrees of Master of Science and Doctor of Philosophy. Candidates for these degrees may specialize in general and medical bacteriology, immunology, parasitology, medical mycology, virology, and physiology of bacteria. Course requirements vary according to the field chosen.

COURSES

301 General Microbiology (5)	Staff
320 Media Preparation (*, maximum 5)	Duchow
322 Applied Bacteriology (5)	Staff
400 Fundamentals of Bacteriology (*, maximum 6)	Douglas, Ordal
430 Industrial Microbiology (3 or 5)	Douglas
441-442 Medical Bacteriology, Virology, and Immunology (*, maximum 5-, -*, maximum -5) Evans, Groman, Henry, Sherris, Weiser	
443 Medical Mycology (*, maximum 2)	Henry
444 Medical Parasitology (*, maximum 4)	Groman
510 Physiology of Bacteria (3) Fundamental physiological and metabolic processes of bacteria. (Offered alternate years; offered 1961-62.) Prerequisite, permission of instructor.	Douglas, Ordal, Whiteley
520 Seminar (1)	Staff
530 Comparative Morphology and Physiology of the Higher Bacteria (4) Enrichment, isolation, and comparative morphology and physiology of selected representatives of the following groups of bacteria: Nitrobacteriaceae, Rhodobacteriaceae, Caulobacteriaceae, Actinomycetales, Myxobacteriales, Chlamydoxanthales, Caryophanales, and Borcelomycetaceae. (Offered alternate years; offered 1961-62.) Prerequisite, permission.	Ordal
540 Virology (*, maximum 4) (Offered alternate years; offered 1961-62.) Prerequisites, at least one quarter of general microbiology and permission.	Evans, Groman, Holland
550 Advanced Immunology (*, maximum 4) (Offered alternate years; offered 1962-63.) Prerequisites, 441- and permission.	Weiser
600 Research (*)	Staff
700 Thesis (*)	Staff

PATHOLOGY

Executive Officer: EARL P. BENDITT, D505 Health Sciences Building

The Department of Pathology offers programs leading to the degree of Doctor of Philosophy in the field of experimental pathology. Graduate work in pathology is designed to give the candidate a sound basis in modern quantitative biology for future research in experimental pathology. Candidates must have at least a bachelor's degree with a major in physical or biological science. Course requirements will vary with the background of the candidate. Specialized approaches to problems of experimental pathology include histo-chemical and cyto-chemical, electron microscopic, immunologic, and others. Candidates may concentrate research activities in such areas as cardiovascular disease, cancer, inflammation at the cellular and molecular level, and neuro-pathological processes.

COURSES

321 Medical Technology (5) (Offered Summer Quarter only.)	Staff
---------------------------------------------------------------------	--------------

- 322-323-424-425, 426 Medical Technology (6-6-6-6, 16)** **Staff**
- 441- General Pathology (6-)** **Staff**
Prerequisite, permission.
- 442-443 Special Pathology (-5-5)** **Staff**
Prerequisite, 441- or equivalent.
- 446-447 Laboratory Procedures (4-2) (See Conjoint Courses, page 206.)**
- 470 Surgical Pathology (*)** **Staff**
- 476 Clinical Pathological Conference (*)** **Staff**
- 500 Principles of Pathology (4 or 6)** **Staff**
The material covered is concerned primarily with the fundamental alterations in tissues and organs in disease processes and the results of these changes. This course is open to selected graduate students in the biological sciences. Prerequisite, permission.
- 503 Enzymatic Histochemistry (2-3)** **Bonditt**
Development of basic concepts with technical and experimental applications. Elective open to medical students and graduate students by permission. Limited to six students.
- 520 Seminar (2, maximum 10)** **Staff**
Review of current problems of both research and practical nature by various members of the Department of Pathology with discussion of presentations by senior members of the Department. Prerequisite, permission of Executive Officer.
- 521 Seminar in Contemporary Professional Literature (1)** **Staff**
A review of current literature as applied to the field of pathology. Discussion of presentations by senior members of the Department. Prerequisite, permission of Executive Officer.
- 551 Experimental Pathology (2-5, maximum 20)** **Staff**
Assignments depend upon the background and interest of the individual. Problems may be concerned with animal experimentation or with specimens obtained from human beings. Special techniques and specialized equipment are utilized when indicated. Methods of keeping data and statistics are considered. Open only to graduate students and fellows who are assigned to work with senior members of the staff. Prerequisite, permission of Executive Officer.
- 552 Clinical Pathology (2-5, maximum 20)** **Staff**
A study of the principles and techniques of the usual clinical chemical procedures or of the tests used to study diseases of the hematopoietic system. The control of precision and accuracy is stressed, as is the interpretation of the results obtained. The work in either biochemistry or hematology may be taken in the appropriate sequence. For graduate students and fellows who are assigned to the laboratory in clinical biochemistry.
- 553 Pediatric Pathology (*, maximum 10)** **Staff**
Assignments according to need and background. By arrangement, for fellows and graduate students.
- 600 Research (*)** **Staff**
Selected problems arranged in accordance with the student's needs. Prerequisite, permission of Executive Officer.
- 700 Thesis (*)** **Staff**

PHARMACOLOGY

Executive Officer: JAMES M. DILLE, F421 Health Sciences Building

The Department of Pharmacology offers courses leading to the degrees of Master of Science and Doctor of Philosophy. Students who intend to work toward one of these degrees must present a bachelor's degree with a major in one of the sciences, such as zoology, chemistry, physics, pharmacy, psychology, or physiology.

COURSES

- 442-443 General Pharmacology (5-4)** **Staff**
- 507 Journal Seminar (*, maximum 6)** **Staff**
Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Prerequisites, -443 and permission.
- N508 Research Seminar (0)** **Staff**
Research progress reports and reports on results of completed research. Prerequisites, -443 and permission.
- 509 Pharmacology Laboratory Methods (*)** **Staff**
Advanced and special techniques of pharmacological investigation. Material is changed from quarter to quarter to fit students' needs, and the course may be repeated for credit provided the subject matter is not duplicated. Prerequisites, -443 and permission.

525, 526, 527 Advanced Pharmacology (2,2,2)**Staff**

An advanced treatment of basic concepts of pharmacology, both theoretical and methodological. Subject matter will be varied from quarter to quarter and course may be repeated for credit. Prerequisite, permission.

600 Research (*)**Staff**

Participation in research projects already set in progress by members of the Department staff. Directed experience in research investigation. Prerequisites, -443 and permission.

700 Thesis (*)**Staff**

PHYSIOLOGY AND BIOPHYSICS

Executive Officer: T. C. RUCH, G405 Health Sciences Building

The Department of Physiology and Biophysics offers courses leading to the degree of Master of Science and Doctor of Philosophy.

Physiology is based upon zoology, physics, chemistry, and mathematics. It interlocks closely with the other basic medical sciences—anatomy, biochemistry, pharmacology, and pathology—and with psychology. For this reason, physiology appeals to students with quite diverse backgrounds and goals. In the organization of the graduate program in physiology and biophysics, several specializations within the broad field of physiology are recognized, and the requirements and curricula are different for each, although there is considerable overlapping. The areas of specialization may be described as (1) mammalian and pathological physiology, (2) biophysics, for which undergraduate mathematics and physics are prerequisites, (3) physiology of behavior, in which undergraduate psychological training is a prerequisite. For students wishing a more equal distribution of time between physiology and psychology a conjoint Ph.D. degree program in these subjects is offered.

Biophysics emphasizes the physical aspects of organs and control systems, studied by the instruments and methods of thinking used by physicists. A bachelor's degree in physical science or equivalent is required.

The basic graduate courses in physiology and biophysics include 401-402 and Conjoint 409 (Basis of Neurology).

Graduate students in physiology and biophysics with a medical degree will have their curricula adjusted in accordance with their training.

Students who intend to work toward a degree of Master of Science or Doctor of Philosophy must meet the requirements of the Graduate School as outlined in the *Graduate School Bulletin*. Students with a bachelor's degree in zoology, psychology, chemistry, engineering, physics, or with an M.D. degree are acceptable as candidates for M.S. and Ph.D. degrees.

COURSES

350-351 Human Function and Structure (6-6) (See Conjoint Courses, page 206.)

401-402 Advanced Human Physiology (7-7)

Ruch, Staff

409 Basis of Neurology (3,5 or 8) (See Conjoint Courses, page 206.)

411 Introductory Biophysics (4)

Brown, Woodbury, Young

416 Biophysics (5)

Woodbury, Young

424 Introductory Membrane Potentials (3)

Woodbury

484 Endocrinological Reaction to Stress (*)

Patton, Staff

491 Medical Physics (2)

Brown, Young

492 Selected Topics in Physiology and Biophysics (2)

Staff

493 Techniques in Cardiopulmonary Diagnosis (2)

Carlson, Rushmer, Staff

494 Neurological Study Unit (2) Physiology, Neuroanatomy, Neurology, Neuropathology, Neurosurgery, and Psychiatry Staff

- 515-516-517 Physiological Proseminar (5-5-5) Staff**
A guided survey of the experimental literature of major topics in physiology. Course conducted as seminar with oral analysis of assigned papers and topics. Prerequisites, 401-402, Conjoint 409, and permission.
- 520 Physiology Seminar (2-5) Staff**
Selected topics in physiology.
- 521 Biophysics Seminar (2-5) Young**
Selected topics in biophysics.
- 522 Biophysics of External Respiration (2-5) Young**
Viscous and elastic properties of chest-lung system; flow of gases in tubes. Generalized alveolar air equations. Principle of infrared absorption and emission type of rapid gas analyzers. Prerequisite, permission.
- 523 Heat Transfer and Temperature Regulation (2-5) Young**
Prerequisite, B.S. in physical science or permission.
- 524 Advanced Membrane Potentials (3) Woodbury**
Quantitative analysis of electrical activity in nerve. Active sodium-potassium transport. Ionic flux equations. Conductance changes. Calculation of the action potential. Prerequisite, permission.
- 525, 526, 527 Advanced Mammalian and Clinical Physiology (*,*,*) Staff**
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite, permission.
- 528 Physiological Control Systems (2-5) Young**
Theories of nonlinear mechanics and their applications to physiological control systems. Prerequisite, B.S. in physical science or permission.
- 529 Motoneuron Physiology (4) Towe, Woodbury**
Electrical properties of surface membrane; excitatory and inhibitory reactions and their ionic mechanisms; properties of the spike potential; interaction of synaptic responses. Prerequisites, 515-516-517, 424, and permission.
- 530 Synapse and Reflex Seminar (4) Staff**
A guided survey of the literature pertaining to reflex and synaptic physiology. Course is conducted as seminar with students giving oral reports on assigned topics. Prerequisite, 401-402, 515-516-517, and permission.
- 532-533 Basic Principles of Physiological Instrumentation (4-4) Young**
Pulse generator; A.C. and D.C. high-gain amplifier circuits; oscilloscopes and oscillographs; recording of pressure, volume, and flow in liquids and gases; calorimetry and pyrometry; continuous gas analysis. Prerequisite, permission.
- 534 Applied Physiological Instrumentation (2-5) Staff**
Study and use of research instruments applicable to the nervous system (stimulators, amplifiers, and oscilloscopes), the cardiovascular system (cinéfluorograph, electro- and stetho-cardiograph, oximeter, strain gauge manometers, etc.), and respiratory and metabolic activity (flow meters, minute volume integrator, infrared and paramagnetic gas analyzers, cardi tachometer, thermocouples, gradient calorimeter). Prerequisites, 532 and permission.
- 535 Operative Techniques in Neurophysiology (2-5) Patton, Smith**
Deafferentation, decerebration and Sherrington reflex preparation; osteoplastic bone flap, Horsley-Clarke apparatus, implanted electrodes, and reconstruction of lesions; primate colony and operating room management. Prerequisite, permission.
- 536 Behavioral Techniques in Neurophysiology (2-3) Smith, Towe, Staff**
Study and use of behavioral methods applicable to nervous system studies, quantification of activity and physiological variables, interpretation of neural lesions and chronic electrode implants. Prerequisite, permission.
- 550 Cortical Potentials (4) Towe**
Properties of continuous and evoked cortical potentials and their interactions. Relationship of cortical unit activity to cortical potentials. Prerequisites, 424, 515-516-517, and permission.
- 600 Research (*) Staff**
Prerequisite, permission.
- 700 Thesis (*) Staff**

PREVENTIVE MEDICINE

Executive Officer: J. THOMAS GRAYSTON, B506 Health Sciences Building

COURSES

- 323 Introduction to Public Health Principles and Practice (3) Wilkey**
- 420 Introduction to Epidemiology and Biostatistics (3) Alexander, Bennett**

422	Introduction to Environmental Health (3)	Vavra
424	Public Health Problems (3)	Vavra
440	Water and Waste Sanitation (4)	Hatlen
441	Milk and Food Sanitation (4)	Hatlen
442	Vector Control and General Sanitation (3)	Hatlen
450	Measurement and Control of Air Pollution	Breysse
453	Industrial Hygiene Techniques (3)	Breysse
460J	Field Training in Health Education (5) Offered jointly with the College of Education. (Offered Summer Quarter only.)	Vavra
461	School and Community Health Programs (5)	Mills, Reeves
463	Community Organization for Health Education (3)	Vavra
464	Community Health Education Techniques (3)	Vavra
470	Introduction to Biometry (3)	Bennett
472	Applied Statistics in Health Sciences (2-4)	Bennett
476	Sample Survey Techniques (3-5)	Staff
477	Statistical Methods in Biological Assay (3)	Bennett
478	Practice of Epidemiology (3)	Staff
479	Industrial Medicine (3)	Staff
480	Public Health Problems (*, maximum 6)	Staff
482	Field Practice in Public Health (2-6)	Staff
483	Field Practice in Public Health (6)	Staff
484	Field Practice in Public Health (3)	Staff
485J	School Health Problems (3) Offered jointly with the School of Nursing.	Christian, Vavra
490	Public Health Administration (3)	Alexander, Peterson
492J	Problems in International Health (2) Offered jointly with the School of Nursing.	Staff
502J	Applied Group Development Principles (3) A study of the factors that contribute to productive group effort with application of group development principles for professional health personnel. Offered jointly with the School of Nursing. Prerequisites, permission, Speech 332 or equivalent, and background in the health field.	Murray, Vavra

CONJOINT COURSES

Conjoint courses are offered cooperatively by departments in the School of Medicine. They are designed to integrate basic medical training with clinical work and, in some cases, to integrate basic medical training in two or more fields. In the descriptions of these courses, the name of the department with primary responsibility for each course precedes the names of the other sponsoring departments.

COURSES

- 350-351 Human Function and Structure (6-6)** Skahen, Staff
For master's degree candidates in psychology and other students not majoring in anatomy or physiology. Offered by the Departments of Anatomy and Physiology. Prerequisite, permission.
- 409 Basis of Neurology (3,5, or 8)** Everett, Patton, Ruch
Offered by the Departments of Anatomy and Physiology. Prerequisite, permission for graduate students.
- 446-447 Laboratory Procedures (4-2)** Staff
Offered by the Departments of Pathology and Medicine. Prerequisite, permission for graduate students.

- 496 Concept of the Child (3)** **Delsher, Jensen, Staff**
Offered by the Departments of Pediatrics and Preventive Medicine. For nonmedical students. Prerequisite, permission.
- 585 Surgical Anatomy (2-4, maximum 12)** **Staff**
An intensive course devoted to one region of the body each quarter, i.e., thorax, abdomen, upper extremity, head, and neck. Offered by the Departments of Anatomy and Surgery. Prerequisite, permission.

PEDIATRICS

Executive Officer: ROBERT A. ALDRICH, BB807 University Hospital

COURSES

- 496 Concept of the Child (3)** (See Conjoint Courses, page 206.)
- 505 Physical Growth of the Well Child (2)** **Jensen, Staff**
Weekly seminars, eighteen hours. The correlation between growth and development and diseases in the child as pertaining to dental health. For graduate students in dentistry. Prerequisite, permission.

PSYCHIATRY

Executive Officer: HERBERT S. RIPLEY, B516 Health Sciences Building

The Department of Psychiatry offers courses designed to help students in medicine, nursing, psychology, social work, education, and others concerned with human problems to attain a scientific grasp of psychiatric principles. Using these principles, students will be able to evaluate interpersonal relationships and use to the greatest advantage their potentialities for understanding and dealing with personality reactions.

COURSES

- 450 Principles of Personality Development (2)** **Kaufman**
Not open to students who have taken 267.
- 451 Principles of Personality Development (2)** **Heilbrunn**
Continuation of 450. Not open to students who have taken 267. Prerequisite 450 or permission.
- 452 Clinical Psychiatry (2)** **Schwartz**
Not open to students who have taken 457 or 557. Prerequisite, 267 or 451, or permission.
- 553 Psychodynamics and Psychopathology (2)** **Heilbrunn**
Heredity, constitution, physical changes, and family and social relationships as determinants in psychodynamics are discussed. Attention is paid to defense mechanisms such as anxiety, depression, resentment, evasion, withdrawal, repression, projection, and overcompensation as commonly encountered in psychopathology. Prerequisite, 267 or 451, or permission.
- 558 Seminar: Interviewing (2)** **Staff**
Case studies are presented by individual students for discussion of the psychodynamics and methods of dealing with personality problems. For graduate students who are having practical experience in interviewing. Prerequisite, permission.
- 559 Child Psychiatry (2)** **Kaufman**
Series of discussions and lectures dealing with psychopathology of children. Prerequisite, 267 or 451, or permission.
- 565 Biological Foundations of Psychiatry (2)** **Heilbrunn**
Anatomical and physiological factors involved in various forms of psychopathology. Prerequisite, permission.

SURGERY

Executive Officer: HENRY N. HARKINS, BB477 University Hospital

The Department of Surgery offers courses leading to the degree of Master of Science. The purpose of this program is not to train students in the art of surgery or in surgical techniques, but to encourage basic science research in surgical problems on a graduate level.

Departmental requirements for candidacy include an M.D. degree from an approved medical school and preferably a year of internship in a hospital approved by the Council on Medical Education and Hospitals of the American Medical Association.

Candidates must earn a minimum of 45 credits, including not less than 15 credits of course work, exclusive of research, in surgery and allied graduate courses. A minor is to be taken in one of the basic medical sciences—anatomy, biochemistry, microbiology, pathology, pharmacology, or physiology and biophysics. The thesis must be based upon research carried out under the supervision of a member of the full-time teaching staff. The student must appear at an oral examination in which his thesis is defended and knowledge of his major and minor fields is demonstrated.

The examiners will consist of a committee appointed by the Department of Surgery.

COURSES

- 520 General Surgery Seminar (5)** **Harkins, Merendino, Nyhus, Stevenson**
Conferences, seminars, and round-table discussions of advanced surgical topics and recent literature in the field.
- 521 Orthopedic Research Seminar (*)** **Clawson, Andrews, Anderson**
Each week a current laboratory topic is discussed with members of the attending and resident staff. Active participation of the student is required. Prerequisite, graduate student.
- 522 Orthopedic Seminar (*)** **Clawson, Staff**
Seminar in current topics of orthopedic interest. Prerequisite, senior medical student or graduate student.
- 585 Surgical Anatomy (2-4, maximum 12) (See Conjoint Courses, page 206.)**
- 590 Surgical Experimental Techniques (5)** **Harkins, Merendino, Nyhus, Stevenson**
Basis for graduate research and advanced thesis work.
- 598 Seminar in Urology (*)** **Ansell, Staff**
Problems in the field of urology discussed by various visiting members of the faculty of urology and of other departments to provide a well-rounded basic scientific and clinical presentation.
- 600 Research (*)** **Harkins, Ansell, Merendino, Ward, Staff**
- 700 Thesis (*)** **Staff**

SCHOOL OF NURSING

Dean: MARY S. TSCHUDIN, C303 Health Sciences Building

The School of Nursing offers courses leading to the degrees of Master of Arts and Master of Nursing. Programs of study provide for advanced professional preparation and research in a selected clinical area, in teaching or administration in schools of nursing, or in nursing services in hospitals or public health agencies. They are designed to develop superior professional competence, and to prepare the graduate for positions of administrative, teaching, or advanced clinical responsibility.

Each student's background and goals are considered individually in the planning of the program.

The patterns outlined below are the usual ones for the master's degrees.

MASTER OF ARTS. The requirements for the Master of Arts are:

	CREDITS
Course work in major field	18
Nursing 521	2
Education 591	3
Thesis	10
Course work in minor field	12
	<hr/> 45

The minor may be chosen in a field such as sociology, education, social work, business administration, psychology, psychiatry, history, or creative writing.

MASTER OF NURSING. The Master of Nursing is a professional degree with emphasis on advanced preparation and background in the field of specialization.

	CREDITS
Course work in major field.....	18
Nursing 521	2
Education 591	3
Thesis	10
Supporting courses from allied fields.....	12
	<hr/>
	45

The supporting courses may be chosen in fields such as sociology, business administration, journalism, or anthropology.

There is no foreign language requirement for this degree.

POST-MASTER'S STUDY. Students who hold the master's degree in nursing may enroll for an additional period of study. Individual programs are planned to include advanced work in supporting sciences, advanced clinical field work, and independent research in nursing.

The School of Nursing offers a minor on the doctoral level for those students who are matriculated in another discipline. The minor in nursing should total 35 credits in courses offering graduate credit, of which at least half must be at the 500 level. The recommended sequence of courses for each student is determined in the light of her previous work.

COURSES

430 Advanced Nursing Field Work (3)	Staff
431 Advanced Nursing Field Work (2)	Staff
435 Practice Supervision in Nursing (3)	Staff
436 Practice Teaching in Nursing (3)	Staff
454 Administration in Nursing (2)	Smith
455 Administration of Schools of Nursing (3)	Hoffman
456 Nursing Service Administration (3)	Smith
462 Teaching in Schools of Nursing (3)	Mansfield
463 Personnel Guidance in Nursing (3)	Batey
464 The Nurse in Mental Health (3)	Batey
466 In-Service Education in Nursing (3)	Smith
467 Evaluation of Performance in Nursing (3)	Olcott
481 The Nurse in School Vision Programs (2)	Christian
485J School Health Problems (3) Offered jointly with the Department of Preventive Medicine.	Christian, Vavra
486 Occupational Health Programs, Nursing Implications (3)	Klutas
492J Problems in International Health (2) Offered jointly with the Department of Preventive Medicine.	Leahy
498 Methods of Supervision in Public Health Nursing (3)	Leahy
501 Development of Nursing Procedures (2) Nursing procedures as a basis for nursing service planning and as a teaching tool. Procedures analyzed against selected criteria. Development of procedures according to clinical needs.	Giblin
502J Applied Group Development Principles (3) A study of the factors that contribute to productive group effort with application of group development principles for professional health personnel. Offered jointly with the Department of Preventive Medicine. Prerequisites, permission, Speech 332 or equivalent, and background in the health field.	Murray

- 504 Seminar in Occupational Health Nursing (2)** **Klutas**
Intensive analysis of selected problems in occupational health nursing.
- 505 Seminar in Administration of Schools of Nursing (3)** **Hoffman, Tschudin**
Discussion and analysis of situations in administration of schools of nursing. Prerequisite, 455 or equivalent.
- 506 Seminar in Nursing Service Administration (3)** **Smith**
Discussion and analysis of situations in administration of nursing services. Prerequisite, 456 or equivalent.
- 507 Seminar in Nursing Problems in Mental Health (2)** **Nehren**
Mental health problems in family relationships, with emphasis on psychiatric concepts in the nurse's therapeutic role in the family milieu. Prerequisites, 508 and permission.
- 508 Seminar in Advanced Psychiatric Nursing (2)** **Batey**
Exploration of interpersonal relations; emphasis upon the nurse's therapeutic role with the psychiatric patient and in the total milieu. To be taken concurrently with 430.
- 509 Seminar in School Nursing (3)** **Christian**
The application of public health nursing concepts, principles, and research findings in the analysis and solution of school nursing problems.
- 510 Curriculum Development in Nursing Education (5)** **Hoffman, Tschudin**
Current curriculum patterns and trends in nursing education; the development of curriculum materials; problems in the study and implementation of nursing curriculum. Prerequisite, 417 or equivalent.
- 511 Psychosomatic Nursing (3)** **Nehren**
Seminar and clinical experiences centered on problems of interrelationships of physical and emotional aspects of illness. Prerequisite, basic psychiatric nursing or permission.
- 512 Advanced Fields in Psychiatric Nursing (3)** **Batey**
Practicum devoted to the solution of nursing problems in psychiatric situations. Emphasis on specific interpersonal and intraprofessional relationships in the care of mental patients. Prerequisite, permission.
- 513 Field Experience in Mental Health Nursing (3)** **Nehren**
Selected experience in the identification and analysis of mental health problems in family relationships, with emphasis on utilizing psychiatric concepts to develop therapeutic nursing relationships within the family milieu. Concurrent with 507.
- 515 Special Fields in Public Health Nursing (3)** **Leahy**
Investigation of public health nursing responsibilities in special fields. Emphasis varies with interest and needs of the students. Prerequisite, permission.
- 521 Methods of Research in Nursing (2)** **Hoffman**
Methods of research applied to the solution of problems in all fields of nursing.
- 530 Advanced Concepts in Maternal and Child Health and Implications for Nursing (3)** **Murray**
Consideration of changing philosophy in maternal and child care; factors influencing health; ways of meeting health needs; role of the nurse in solution of related problems. Prerequisite, permission.
- 542 Seminar in Cardiovascular Nursing (3)** **Giblin**
Analysis of nursing problems of patients with cardiovascular conditions from the standpoint of the potential pathophysiology and the physical and emotional factors involved. Prerequisites, 430 (medical-surgical), 464, or permission.
- 570 Seminar in Clinical Research in Nursing (3)** **Hoffman**
Philosophy, problems of design; use of criterion measures in terms of patient care. Prerequisite, permission.
- 600 Research (*)** **Hoffman, Staff**
- 700 Thesis (*)** **Hoffman, Staff**

COLLEGE OF PHARMACY

Dean: JACK E. ORR, 102 Bagley Hall

The College of Pharmacy offers a program of graduate study encompassing a thorough education in the fundamentals and theories of the disciplines necessary for specialization in one of the pharmaceutical sciences; and a broad education in allied supporting sciences which will qualify the graduate to assume a place in teaching, research, manufacturing, or hospital pharmacy. The degrees of Master of Science and Doctor of Philosophy are offered.

The College of Pharmacy is accredited by the American Council on Pharmaceutical Education and is a member of the American Association of Colleges of Pharmacy.

Basic requirements for admission to graduate study in the pharmaceutical sciences are met by an undergraduate degree in pharmacy. Students with undergraduate majors in the biological or physical sciences may also be admitted, but they will be required to complete courses basic to their chosen field of study during their graduate careers. Applicants must demonstrate above-average scholastic ability and promise.

Undergraduates who have decided to pursue graduate work may expedite their programs by selection of pertinent electives. Although the choice of electives will vary with the identity of the student's selected field in the pharmaceutical sciences, it should be emphasized that graduate studies in the College of Pharmacy require adequate preparation in the physical and biological sciences, in mathematics, and in foreign language. Students who have not completed certain desired courses during their undergraduate work may be permitted to do so during their graduate programs.

Specialization is offered in pharmaceutical chemistry, pharmacognosy, pharmacy, and hospital pharmacy. Graduate study toward an advanced degree in pharmacology is directed by the Department of Pharmacology of the School of Medicine. The hospital pharmacy program may include a hospital pharmacy internship or residency if desired by the student.

Graduate programs of study vary with the specialization selected, and although they are flexible and are adapted to the needs of the individual student, certain general recommendations may be made. For majors in pharmacy and pharmaceutical chemistry, courses in physical chemistry (calculus is a prerequisite), biochemistry, qualitative organic chemistry, and statistical methods are basic to all programs, in addition to courses in the major fields. These may be supplemented by advanced courses in the physical or biological sciences.

For hospital pharmacy majors, courses in the basic health sciences including biochemistry, microbiology, and pharmacology are necessary in addition to the specialized courses in hospital pharmacy and manufacturing pharmacy.

For pharmacognosy majors, courses in organic chemistry, biochemistry, and plant physiology are basic to most programs. These are generally best supplemented in the biological areas by courses in plant anatomy, taxonomy, microbiology, and mycology. In the physical area, specialized courses in organic chemistry, analytical chemistry, and physical chemistry are utilized.

All graduate students are encouraged to pursue additional courses in the pharmaceutical sciences other than their fields of specialization. Specific recommendations based upon individual interests and information concerning courses may be obtained from the chairman of the department concerned or from the Dean, College of Pharmacy.

MASTER OF SCIENCE. The candidate must present at least 27 credits of course work, exclusive of thesis and nonthesis research. He must complete a research project, prepare an acceptable thesis (unless specifically excepted in a particular program), and pass a final examination. He must present a certificate of proficiency in one foreign language.

DOCTOR OF PHILOSOPHY. The candidate must present a minimum total of 56 credits of course work, exclusive of thesis and nonthesis research. The credits earned for the master's may be applied toward the doctor's degree. The candidate must pass a General Examination for admission to candidacy for the doctor's degree, complete a research project, prepare an acceptable thesis, and pass a Final Examination. The research for the doctor's degree must be done at the University of Washington (this does not apply to candidates beginning their graduate studies prior to September, 1958). The candidate must present a certificate of proficiency in two foreign languages (one in addition to the Master of Science requirement).

COURSES**PHARMACEUTICAL CHEMISTRY**

- 430 Inorganic Medicinal Products (3)** McCarthy, Orr
- 440, 441, 442 Organic Medicinal Products (3,3,3)** Fischer
- 480 Advanced Organic Medicinal Products Laboratory (3)** Huitric
- 497 Toxicology (3)** Fischer
- 511, 512, 513 Advanced Pharmaceutical Chemistry (3,3,3)** Krupski
pH determination and buffer systems, fluorometry, chromatography, ion exchange, and the use of various instruments for scientific investigations and vitamin determinations. (Offered every third year; offered 1961-62.)
- 520 Seminar (1, maximum 5)** Staff
Graduate students must attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed.
- 521, 522 Advanced Organic Medicinal Products (3,3)** Huitric
Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems and recent advances in drug design. Prerequisites, Chemistry 357, 531, and Biochemistry 482, or permission. (Offered every other year; offered 1962-63.)
- 531, 532, 533 Plant Chemistry (3,3,3)** McCarthy
Alkaloids, volatile oils, steroids, and glycosides, including methods of isolation, proof of structure and configuration, and synthesis, with emphasis on materials of pharmaceutical interest. (Offered every third year; offered 1962-63.)
- 600 Research (*)** Staff
- 700 Thesis (*)** Staff

PHARMACOGNOSY

- 405 Advanced Pharmacognosy (3)** Tyler
- 406 Medicinal Plants (2)** Tyler
- 411 Hormones and Glandular Products (2)** Brady
- 412 Immunological Agents (2)** Brady
- 520 Seminar (1, maximum 5)** Staff
Graduate students must attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed.
- 581 Topics in Pharmacognosy (1, maximum 2)** Tyler
Discussions and readings of topics of current interest in the field of pharmacognosy. Subject matter changes from year to year. Prerequisite, reading knowledge of German.
- 600 Research (*)** Staff
- 700 Thesis (*)** Staff

PHARMACY AND PHARMACY ADMINISTRATION

- 420 Manufacturing Pharmacy (3)** Plein
- 473 Cosmetic Manufacturing (3)** Rising
- 483 Hospital Pharmacy (3-5)** Plein
- 520 Seminar (1, maximum 5)** Staff
Graduate students must attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed.
- 540 Pharmaceutical Emulsions (2)** Rising
Problems in the preparation of emulsions in pharmaceutical manufacturing. Prerequisites, Pharmaceutical Chemistry 239 and Chemistry 357, or equivalent.
- 550 Solvents and Solvent Extraction (2)** Plein
Theories of solvent extraction and the use of solvents applied to pharmaceutical manufacturing. Prerequisite, permission.
- 600 Research (*)** Staff
- 700 Thesis (*)** Staff

SCHOOL OF PUBLIC ADMINISTRATION

Acting Director: JOSEPH L. McCARTHY, 3 Administration Building

A graduate program of study and research intended to prepare selected groups of college graduates for professional careers in public administration and public affairs, and leading to the degree of Master of Public Administration, is offered through the School of Public Administration. Faculty members representing a variety of contributing academic disciplines cooperate in conducting the program.

Students wishing to pursue study and research in the School of Public Administration must be officially admitted to the Graduate School and to the School itself. A broad undergraduate education, emphasizing the basic, social sciences, is desirable preparation for the program of the School, which is directed toward the development of the generalist in administration and public affairs, rather than of the research or technical specialist. Primary emphasis in instruction is upon policy formation, administration theory, the sociology of organizations, public management, the economics of public activity, and public law. For students interested in local government administration, a special field of local affairs is offered. These students may also gain valuable experience through participation in the activities of the Institute of Public Affairs, the Bureau of Government Research and Services, and other units of the University. The program for the Master of Public Administration degree is two years in duration, with a summer internship between the first and second years.

For additional information please communicate with Prof. George A. Shipman, 208B Smith Hall.

SCHOOL OF SOCIAL WORK

Dean: VICTOR I. HOWERY, 102 Social Work Hall

The School of Social Work offers a two-year, six-quarter program leading to the professional degree of Master of Social Work. The professional program is accredited by the Council on Social Work Education. It provides an educational experience which has been designed to prepare students:

- a. To help individuals, groups, or communities with what are to them unsatisfying social situations, or with what are to society unsatisfactory social situations. These are social situations where:
 - (1) An individual, group, or community is dissatisfied with his or its performance.
 - (2) An individual, group, or community violates explicitly stated requirements of society.
- b. To expand the knowledge upon which social work practice is based.
- c. To record and impart social work knowledge pertinent to social welfare.

During the course of study, students may emphasize an interest in social case work, social group work, social community organization, social agency administration, or social research. Among the areas of practice for which students are prepared by completion of the course of study are: adoptions, foster home care, institutional care, child protection, child guidance, family counseling, probation and parole, medical social work, school social work, public assistance service, community planning, community center work, and social group work programs.

MASTER OF SOCIAL WORK. Requirements for the degree include completion of the prescribed curriculum, a minimum of three quarters of residence at this School, the equivalent of field work in six quarters, and completion of either an individual thesis or a research project.

COURSES

- 300 Survey of Social Service Programs (3)** **Lawrence, Staff**
- 391 Supervised Study (2-6, maximum 6)** **Lawrence**
- 400 Field of Social Welfare (5)** **Lawrence, Parsons**
- 401 Principles of Interviewing (2)** **Lawrence, Reiss**
- 502 Social Welfare Organization (2)** **Parsons, Smith**
Historical origins of concepts, policies, and social welfare institutions, critical analysis of current public and private programs at all jurisdictional levels; use of social welfare concepts in planning.
- 503 Social Welfare Organization (2)** **Parsons, Smith**
Historical origins of concepts, policies, and social welfare institutions, critical analysis of current public and private programs at all jurisdictional levels; use of social welfare concepts in planning.
- 504 Social Welfare Organization (2)** **Parsons, Smith**
Historical origins of concepts, policies, and social welfare institutions, critical analysis of current public and private programs at all jurisdictional levels; use of social welfare concepts in planning.
- 508 Basic Values and Concepts in Social Work Method (2)** **Abrahamson, Maier**
An identification and analysis of basic value concepts and principles underlying social case work, social group work, and social community organization practice.
- 509 Readings in Social Work (*, maximum 6)** **Staff**
Prerequisite, permission.
- 510 Social Case Work (2)** **Abrahamson, Gronewold, Reiss**
The case work process in a variety of settings through the analysis and discussion of case records; consideration of basic interviewing principles; development of understanding of motivations in human behavior and application of this understanding in case work. Prerequisite, permission.
- 511 Social Case Work (2)** **Abrahamson, Gronewold, Reiss**
Continuation of generic case-work theory, with emphasis on diagnosis and case-work treatment. Prerequisite, 510.
- 512 Social Case Work (2)** **Abrahamson, Gronewold, Reiss**
Elaboration and intensification of basic case-work concepts and their application in practice to various types of agencies. Prerequisite, 511.
- 515 Field Instruction (4-8, maximum 12)** **C. Macdonald, Staff**
Prerequisite, permission.
- 520 Seminar (*, maximum 6)** **Staff**
Prerequisite, permission.
- 521 Social Group Work (2)** **Maier, Walter**
Professional social group work as a method and process; objectives, techniques, skills, and media of group work method, and criteria for evaluation of results. Prerequisite, permission.
- 522 Social Group Work (2)** **Maier, Walter**
Continuation of social group work study with emphasis on process in groups and identification of group goals.
- 523 Social Group Work (2)** **Maier**
Continuation of study in social group work with emphasis on method, skill, and analysis of the professional role.
- 524 Advanced Social Group Work (2)** **Maier, Walter**
Continued intensive study on social group work method with emphasis on the utilization of program media and the concept of program planning process.
- 525 Advanced Social Group Work (2)** **Maier, Walter**
Continued intensive study on social group work method with emphasis on structuring group situations, and application of the method to institutional settings.
- 526 Advanced Social Group Work (2)** **Maier, Walter**
Continued intensive study of social group work method with emphasis on the integration of prerequisite course content and the analysis of issues and trends in social group work practice.
- 530 Advanced Social Case Work (2)** **Abrahamson, Hunt, Reiss**
Intensive study of the case-work process to deepen and broaden the caseworker's knowledge and understanding of the dynamics of human behavior and to enable him to develop greater skill in interviewing. Prerequisite, permission.
- 531 Advanced Social Case Work (2)** **Abrahamson, Hunt, Reiss**
Continuation of intensive study of case material, with emphasis on sound direction in case-work treatment. Prerequisite, 530.

- 532 Advanced Social Case Work (2)** **Abrahamson, Hunt, Reiss**
Intensive drill in case analysis, seeing the case as a whole, achieving a balanced perspective on the relationship between inner and outer forces, and planning appropriate treatment. Prerequisite, 531.
- 533 Trends in Social Case Work (2)** **Abrahamson, Hunt, Reiss**
Generic and differential factors in understanding and utilizing various administrative settings in social case-work practice. Study of developments and trends in social case-work practice. Prerequisite, permission.
- 534 Trends in Social Case Work (2)** **Abrahamson, Hunt, Reiss**
Continuation of 533. Prerequisite, permission.
- 535 Advanced Field Instruction (4-8, maximum 12)** **C. Macdonald, Staff**
Prerequisite, 515.
- 556 Social Aspects of Illness and Disability (2)** **R. Macdonald**
Physical growth and change of the individual as correlated with factors of emotional and social development; consideration of specific medical problems. Prerequisite, permission.
- 557 Social Work with Sick, Disabled, or Handicapped Persons** **R. Macdonald**
Application of select behavioral science concepts to social work practice with persons who are ill, handicapped, or disabled. Prerequisite, 556.
- 570 Administration of Social Agencies (2)** **Parsons**
Problems of administration that confront the administrator and his staff in any public or private agency; relations with board and staff; problems of finance and budget making, office management. Emphasis on dynamic principles of the administrative process. Prerequisite, permission.
- 572 Social Community Organization (2)** **Walter**
Problems of adjusting social welfare needs and resources; understanding the social forces of the community; methods used by public and private agencies to organize to meet social welfare needs; interpretation of agency programs to the community; the place of boards and committees. Prerequisite, permission.
- 573 Social Welfare Planning Process (2)** **Walter**
An examination of the process of promoting and sustaining an adjustment between social welfare resources and social welfare needs. Analysis of personal and social factors in specific community organization efforts and the nature of the professional worker's participation in them. Discussion based upon records of specific community situations. Prerequisite, 572.
- 580 Public Welfare (2)** **Parsons**
Care of needy under poor laws, emergency relief and modern public assistance programs; characteristics of state assistance plans; administration of work relief; federal grants-in-aid; adult probation and parole; vocational rehabilitation services. Prerequisite, permission.
- 586 Statistics in Social Work (2)** **Staff**
Elementary statistical method applied to social welfare problems; sources for continuing statistical reports; interpretation and use of statistics in welfare administration. Prerequisite, permission.
- 587 Law and Social Welfare (2)** **Gronewold**
The basis of law, its philosophy and development, its broad principles, and the procedure by which it operates; specific aspects of law pertinent to social work orientation, including law in relation to the family, children, guardianships, and acts against society, and property laws. Prerequisite, permission.
- 590 Social Work Research (2)** **Northwood, Stutsman**
Methods used in the study of social work practice, program evaluation, and community needs and resources. Study of current social work research field practice through group research projects. Presentation and evaluation of research projects currently carried by students in the research program. Prerequisite, second-year graduate standing.
- 591 Social Work Research (2)** **Northwood, Stutsman**
Continuation of study of research methods. Prerequisite, 590.
- 592 Social Work Research (2)** **Northwood, Stutsman**
Continuation of study of research methods. Prerequisite, 591.
- 593-594-595 Field Practice in Research (2-2-2)** **Staff**
Field practice in a group project in lieu of an individual thesis. Includes development of research design, collection of data, tabulation and analysis, and report writing. Prerequisite, 590 or its equivalent.
- 700 Thesis (*)** **Staff**
- 702 Degree Final (0)**
Limited to students completing a nonthesis degree program.

BULLETIN • UNIVERSITY OF WASHINGTON

**CENTER FOR
GRADUATE STUDY AT HANFORD**
RICHLAND, WASHINGTON
1961-62

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; two Summer Quarter bulletins; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

CALENDAR

AUTUMN, WINTER, AND SPRING QUARTERS
(Autumn Quarter, 1961, through Summer Quarter, 1962)

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

AUTUMN QUARTER, 1961

REGISTRATION PERIOD

SEPT. 5-9 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

SEPT. 11 Instruction begins
Nov. 23 Thanksgiving holiday
DEC. 1 Instruction ends

WINTER QUARTER, 1962

REGISTRATION PERIOD

DEC. 4-9 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

DEC. 11 Instruction begins
DEC. 25-29 Christmas holiday
MARCH 9 Instruction ends

SPRING QUARTER, 1962

REGISTRATION PERIOD

MARCH 12-17 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

MARCH 19 Instruction begins
MAY 30 Memorial Day holiday
JUNE 8 Instruction ends

SUMMER QUARTER, 1962

REGISTRATION PERIOD

JUNE 11-16 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

JUNE 18 Instruction begins
JULY 4 Independence Day holiday
AUG. 17 Instruction ends

UNIVERSITY OF WASHINGTON COMMITTEE ON THE CENTER FOR GRADUATE STUDY AT HANFORD

JOSEPH L. MCCARTHY, <i>Chairman</i>	KERMIT O. HANSEN, <i>Business Administration</i>
CARL B. ALLENDOERFER, <i>Mathematics</i>	W. RYLAND HILL, <i>Electrical Engineering</i>
ALBERT L. BABB, <i>Chemical Engineering</i>	B. T. MCMINN, <i>Mechanical Engineering</i>
PAUL C. CROSS, <i>Chemistry</i>	RALPH W. MOULTON, <i>Chemical Engineering</i>
AUSTIN V. EASTMAN, <i>Electrical Engineering</i>	DRURY A. PIFER, <i>Mineral Engineering</i>
RONALD GEBALLE, <i>Physics</i>	KERMIT B. BENGTSON, <i>Director of the Center for Graduate Study (at Richland) (ex officio)</i>

FACULTY OF THE CENTER FOR GRADUATE STUDY

The date following the name indicates the beginning of service at the Center.

- Alkire, George (1951)
B.S., 1942, Walla Walla College; M.S., 1944, Oregon; Ph.D., 1948, Ohio State
- Allen, Carol Wesley (1959)
B.S., 1953, M.S., 1955, Ph.D., 1958, Purdue
- Bair, William J., Jr. (1955)
B.A., 1949, Ohio Wesleyan; Ph.D., 1954, Rochester
- Batch, John Martin (1959)
B.S., 1949, M.S., 1950, Montana State; Ph.D., 1955, Purdue
- Bierlein, Theo Karl (1959)
B.S., 1945, Ph.D., 1950, Washington
- Brouns, Richard John (1952)
B.S., 1942, St. John's (Minnesota); M.S., 1944, Ph.D., 1948, Iowa State
- Burger, Leland Leonard (1950)
B.A., 1939, Wyoming; Ph.D., 1948, Washington
- Bush, Spencer Harrison (1954)
B.S., 1948, M.S., 1950, Ph.D., 1953, Michigan
- Carter, John Lemuel, Jr. (1955)
B.A., 1941, Baylor; M.Sc., 1943, Brown; Ph.D., 1953, Cornell
- Dean, Robert Yost (1952)
B.A., 1942, Willamette; M.S., 1946, Ph.D., 1952, California Institute of Technology
- Finnigan, Jerome Woodruff (1959)
B.S., 1950, Northwestern; M.S., 1953, Idaho; Ph.D., 1958, Oregon State
- Foster, Duncan Graham, Jr. (1957)
B.A., 1951, Swarthmore College; Ph.D., 1956, Cornell
- Fryar, Robert Marshall (1950)
B.S., 1947, Idaho; M.S., 1948, Ph.D., 1950, Purdue
- Fullmer, George Clinton (1960)
B.S., 1947, Washington
- Harvey, Roland Arthur (1954)
B.S., 1950, Oregon State
- Heacock, Harold Wendall (1961)
B.S., 1950, M.S., 1958, Oregon State
- Jaech, John Lewis (1954)
B.A., 1952, M.S., 1953, Washington

- Johnson, Benjamin Martineau, Jr. (1957)
B.Ch.E., 1952, Cornell; Ph.D., 1956, Wisconsin
- Lang, Linton William (1956)
B.S., 1941, Washington; M.S., 1953, Idaho
- Leggett, Robert Dean (1960)
B.S., 1952, M.S., 1952, Ohio State; Ph.D., 1959, Carnegie Institute (Pennsylvania)
- Lindenmeier, Charles William (1961)
B.S., 1952, Colorado State; Ph.D., 1960, Cornell
- Locke, Gardner Lincoln (1955)
A.B., 1942, A.M., 1947, Stanford
- Love, William Junior (1953)
B.S., 1944, M.S., 1948, Colorado; Ph.D., 1952, Illinois
- Ludwick, Jimmy Donald (1961)
B.S., 1953, College of Idaho; M.S., 1956, Ph.D., 1958, Purdue
- Merckx, Kenneth Ring (1956)
B.S., 1950, Northwestern; M.S., 1951, Ph.D., 1953, Stanford
- Minor, James Ernest (1959)
B.S., 1941, Washington State; Ph.D., 1950, Washington
- Morrell, Dwight Lyman (1957)
B.S., 1954, M.S., 1956, Brigham Young
- Morrey, John Rolph (1960)
B.A., 1954, Brigham Young; Ph.D., 1958, Utah
- Myers, Ira Thomas (1960)
B.S., 1948, M.S., 1952, Ph.D., 1958, Washington State
- Nichols, Paul Frothingham (1959)
B.S., 1953, College of William and Mary; Ph.D., 1958, Duke
- Nicholson, Wesley Lathrop (1956)
B.A., 1950, M.A., 1952, Oregon; Ph.D., 1955, Illinois
- Nielsen, Julian Moyes (1955)
B.S., 1942, Wyoming; M.A., 1947, Stanford; Ph.D., 1951, Southern California
- Nightingale, Richard Edwin (1956)
B.A., 1949, Whitman; Ph.D., 1953, Washington State
- Nilson, Roy (1959)
B.A., 1950, Whitman; M.S., 1952, Ph.D., 1956, Illinois
- Paul, Ronald Stanley (1952)
B.S., 1947, M.S., 1949, Ph.D., 1951, Oregon
- Platt, Allison M. (1952)
B.S., 1942, Carnegie Institute of Technology; M.S., 1950, Agricultural and Mechanical College of Texas
- Riches, John William (1954)
B.S., 1947, Washington State; M.S., 1949, Ph.D., 1951, California
- Roesch, William Carl (1951)
B.A., 1945, Miami; Ph.D., 1949, California Institute of Technology
- Schmid, Loren Clark (1961)
B.S., 1953, M.S., 1954, Ph.D., 1958, Michigan
- Schwendiman, Lysle Christian (1960)
B.S., 1939, Idaho
- Tobin, John Charles (1958)
B.S., 1949, M.S., 1950, Ph.D., 1957, Michigan

Triplett, John Roger (1954)

B.S., 1947, M.S., 1948, Kansas

Wickes, Thomas A., Jr. (1957)

B.A., 1952, Montana State; M.S., 1955, Ph.D., 1957, Purdue

Wiggins, Alvin Dennie (1958)

A.B., 1951, M.A., 1953, Ph.D., 1957, California

Wilson, Archie Spencer (1954)

B.S., 1946, Iowa State; M.S., 1950, Ph.D., 1951, Chicago

Wood, Donald Eugene (1959)

B.S., 1951, Nevada; M.S., 1953, Ph.D., 1956, Northwestern

Members of the University's faculty in Seattle who teach courses in Richland are listed in the bulletin of the appropriate University College or School.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

GENERAL INFORMATION

GENERAL INFORMATION

THE GENERAL ELECTRIC COMPANY, under prime contract with the Atomic Energy Commission, operates the facility known as the Hanford Works in Eastern Washington. This World War II development provides employment for about 8,000 persons in the Tri-City (Richland-Kennewick-Pasco) area. To meet the educational needs of this group, a school was established in 1946 known as the General Electric School of Nuclear Engineering. The University of Idaho, Oregon State University, Washington State University, and the University of Washington recognized this school and allowed transfer of earned credits.*

This school was transferred to the administration of the University of Washington as of July 1, 1958, and has since been operated in cooperation with Washington State University and Oregon State University as the Center for Graduate Study at Hanford. While programs offered through the Center are oriented to serve those working toward graduate degrees, it is stressed that enrollment is not contingent upon the intent to secure a degree or a graduate degree and is open to any person, irrespective of employment, who can meet the academic prerequisites for enrollment. Most classes are held after hours and enrollment usually will be inconvenient for persons not having gainful employment in the Tri-City area. Employment at the Hanford Atomic Products Operation generally is unavailable to foreign nationals.

Credits earned at the Center for Graduate Study may be applied, under certain conditions, toward degree programs on the respective campuses of the three participating institutions. *One specific condition is that each student intending to actively pursue a full course of study leading to an advanced degree have his entire educational plan approved by the appropriate institution at an early date. This should be done as soon as a student has formulated definite plans, and must be done prior to completion of 12 quarter credits of course work at the Center.* This bulletin is intended to provide information regarding the Center for Graduate Study only. For information regarding degree requirements, etc., the student should consult the appropriate bulletin of the participating institution of his choice. Such bulletins are available in the Center for Graduate Study Office.

All three participating institutions require that, with certain exceptions, each master's degree candidate spend a minimum of one quarter or one semester in full-time resident study on the home campus. Students working toward the degree of Doctor of Philosophy must plan to fulfill on the home campus of the institution of their choice the residence requirement specified for this degree by that institution.

*The University of Idaho participated in the program until June, 1960.

ENROLLMENT AND ADMISSION

Any student enrolling for credit toward an advanced degree must institute proceedings for admission as a regular graduate student in the participating institution of his choice. Formal admission to a participating institution, except in the case of graduate students in Business Administration and Librarianship, must be obtained prior to completion of a course if credit for that course toward an advanced degree will ever be desired; such credit cannot be granted at a later date for courses completed prior to admission to the graduate school of a participating institution. *Students in Business Administration and Librarianship must be formally admitted to the Graduate School prior to the time of registration. A minimum of one month should be allowed for processing of applications for admission to the Graduate School of the University of Washington. New students in all disciplines are encouraged and advised to complete their admission to the graduate school of the participating institution of their choice prior to the time of actual registration for courses.*

In general, properly qualified students who are graduates of the University of Washington or of other colleges or universities of recognized rank may be admitted to the Graduate School.

The primary criterion for admission to the Graduate School is the applicant's apparent ability, as decided by the University, to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance and, ordinarily, the applicant should have at least a B or a 3.00 grade-point average for the courses taken during the junior and senior years of his undergraduate study. He should also show completion of an undergraduate program appropriate as preparation for graduate study in his chosen field. Consideration will also be given to other evidence which may be available. In some cases, an applicant may give promise of making satisfactory progress in graduate work although his undergraduate grade average may be less than B or 3.00 or his undergraduate preparation may be inadequate; in these cases and other unusual cases an applicant may be admitted to the Graduate School on the favorable written recommendation of the appropriate executive officer with approval by the Dean of the Graduate School. The University will be able to grant admission only if sufficient faculty and facilities are available to provide for the applicant's program.

Admission to the Graduate School provides the opportunity for continuance of graduate study and research only for the period during which the graduate student maintains satisfactory performance and progress toward completion of his graduate degree program. The Dean of the Graduate School may alter the status of a graduate student on the written recommendation of the appropriate executive officer or the chairman of the supervisory committee.

Applications for admission must be substantiated by certain credentials and reports submitted in accordance with University rules and practices. All applicants must submit *two* official transcripts of all undergraduate work and of any graduate work.

It is the student's responsibility to make certain that complete credentials covering all his previous college education are submitted to the University. To be official they must be forwarded by the registrars of institutions previously attended, direct to the Registrar of the University. These records become part of the official file and cannot be returned to the student nor duplicated for any purpose whatsoever, as the University does not issue or certify copies of transcripts from other institutions.

Prospective enrollees desiring to work toward graduate degrees are urged to consult a catalog or bulletin from the appropriate institution in order to be certain of meeting admission requirements.

Enrollment in Center for Graduate Study courses without credit may be permitted provided the prospective enrollee is deemed to have the proper background, and provided no exclusion of students desiring to take the course for credit would

result. Students enrolling without credit will be graded and such enrollment is in every way similar to enrollment with credit except that formal admission on the home campus of one of the participating institutions is not necessary.

Auditors, defined as persons attending lectures but not receiving a grade or participating in any laboratory work, problems, or examinations, will normally be accepted after accommodation of all others.

TUITION

Tuition is at the rate of \$35.00 per quarter per course for all courses. The fee schedule is the same regardless of whether the course is taken for credit, without credit, or audited. Veterans' benefits may be applied, if available to the individual, and a tuition refund plan is available to General Electric employees which provides for refund of half the tuition fee under certain conditions. A similar plan is available to Atomic Energy Commission employees.

REGISTRATION

All registration is taken care of at the Center for Graduate Study Office, located at 1112 Lee Boulevard, Richland (telephones Whitehall 5-6523 or Whitehall 2-1111, Ext. 6-5241).

The Center Office is normally open from 8 a.m. to 12 noon and from 1 to 4:30 p.m. Monday through Friday during the entire year. Registration may be accomplished at the Center Office in person *by appointment only* during special registration weeks designated in the calendar. A limited number of registration appointments are available outside of regular office hours during the special registration weeks for those who find it difficult to arrange for an appointment during regular hours. It is recommended that students who desire counselling or who have other registration problems plan to register in person, but a system of mail registration has been established for the convenience of those whose registration will be routine and its use is recommended. Advance registration without penalty is possible for those who find it necessary to be out of town during a registration week. Registration appointments or material for mail registration may be obtained by writing or calling the Center Office at any time within the three-week period immediately preceding a registration week.

Registration may, in addition, be accomplished during the first week of classes, but a penalty of \$5.00 will be assessed for registration during this time. Registration will be closed after the first week of classes.

Full payment of tuition at the rate of \$35.00 per course is due at the time of registration and must be made before registration is complete. Tuition may be paid by cash or check. All tuition fees for a course will be refunded if a course is cancelled by the Center for Graduate Study because of insufficient registration. All fees will also be refunded if a student officially withdraws from a course at any time prior to the end of the first week of instruction. Fifty per cent of the fees paid will be refunded if a student officially withdraws between the end of the first week and the end of the fourth week of instruction. No refunds will be made after the first four weeks except in the case of entry into military service.

In the case of nonmilitary withdrawals taking place more than four weeks after the start of a quarter, a grade will be issued at the time of withdrawal indicating the progress of the student up to that time, but the grade will not be considered an official course grade.

The normal course load is considered to be 3 quarter credits, but up to 6 quarter credits may be carried with permission of the Director.

TEXTBOOKS

All students are expected to obtain personal copies of the text chosen by the instructor. All textbooks are available locally in Richland. Other texts for reference are kept on the school reference shelf in the Center library.

CONDUCT OF CLASSES

All classes are normally held in the Center for Graduate Study Building, 1112 Lee Boulevard in Richland. Most classes meet one evening a week from 7 to 9:30. The meeting day of each class is announced at registration time, but may be changed by the mutual consent of the instructor, the class, and the Director of the Center.

COURSE INFORMATION

GENERAL

This bulletin has been prepared for use during the academic year 1961-62, but tentative course offerings for an additional two years have also been included in order that students may better plan their programs of study. It must be understood, however, that offerings listed beyond the academic year 1961-62 are tentative and for planning purposes only.

A student enrolled at the Center, who has progressed to the point where he is ready to undertake thesis or other research work, should discuss this need with the executive officer of the appropriate department on the home campus. It is the policy of the University to permit under certain conditions the carrying on of thesis and other research work at Hanford.

COLLEGE OF ARTS AND SCIENCES

CHEMISTRY

- R355 Physical Chemistry (4)** **Burger**
Introduction to quantum mechanics, statistical mechanics, theory of gases, thermodynamics—first and second law. Prerequisites, general chemistry, analytic geometry and calculus, college physics, or permission. (Offered Autumn, 1961.)
- R356 Physical Chemistry (3)** **Morrey**
Thermodynamics—second law, continued: phase equilibria, thermodynamic properties of chemical substances, chemical equilibria, statistical thermodynamics, solutions. Prerequisite, R355. (Offered Winter, 1962.)
- R357 Physical Chemistry (3)** **Burger**
Transport and rate processes, reaction rates in gases, the solid state, atomic and molecular spectra, surface chemistry. Prerequisite, R356. (Offered Spring, 1962.)
- R415 The Chemical Bond (3)** **Wilson**
Electron structure of the elements and the chemical bond, complex ions. Prerequisite, undergraduate physical chemistry or permission. (Offered Autumn, 1961.)
- R416 Inorganic Chemistry (3)** **Wilson**
Chemistry of the elements and their compounds in relation to the periodic system. Prerequisite, R415. (Offered Winter, 1962.)
- R471 Nuclear Chemistry (3)** **Nielson**
History of the study of radioactivity; the atomic nucleus; the production, nature, and energetics of nuclear reactions; and the equations of radioactive decay and growth. Prerequisite, physical chemistry. (Tentatively offered Autumn, 1962.)
- R472 Nuclear Chemistry (3)** **Nielson**
Nuclear states and the systematics of radioactive processes, interactions of radiation with matter, radiation chemistry, hot-atom chemistry, and the chemistry of artificially produced elements. Prerequisite, R471. (Tentatively offered Winter, 1963.)
- R511 Advanced Inorganic Chemistry (2)** **Wilson**
Acid base theory; electron transfer reactions; complex ion reactions and stabilities. Prerequisite, R416 or permission. (Offered Spring, 1962.)

- R512 Advanced Inorganic Chemistry (2)** **Wilson**
Halogens, less familiar metals, chelate, clathrate, interstitial and nonstoichiometric compounds; other selected topics. Prerequisite, R416 or permission. (Offered Autumn, 1962.)
- R514 Radiochemistry (3)** **Ludwick**
Detection and measurement of nuclear radiation, statistical nature of radioactivity measurements, techniques for the study of radionuclides, radioisotopes as chemical tracers, cosmic ray phenomena. Prerequisite, R472. (Tentatively offered Spring, 1963.)
- R525 Advanced Chemical Analysis (3)** **Brouns**
Theory and basic principles of modern chemical analysis. Precipitation reactions, application of organic precipitants, separations by vaporization and extraction, ion exchange methods, electrometric methods, and volumetric analysis. Special topics include isotopic tracer methods and the analysis of gases and organic compounds. Prerequisite, degree in chemistry or chemical engineering, or permission. (Tentatively offered Autumn, 1962.)
- R526 Advanced Instrumental Analysis (3)** **Alkire**
Theoretical principles of instrumental methods used as research tools in the fields of chemistry, physics, biophysics, metallurgy, and engineering. Topics covered include emission and absorption spectroscopy, X-ray fluorescence, magnetic resonance, chromatography, mass spectrometry, and radiation detection. Prerequisite, degree in chemistry, physics, or chemical engineering. (Tentatively offered Winter, 1963.)
- R550, R551, R552 Advanced Physical Chemistry (3,3,3)** **Morroy**
Thermodynamics and statistical mechanics, atomic and molecular structure, kinetic theory, and chemical kinetics. Prerequisite, undergraduate course in physical chemistry. (Offered 1963-64.)
- R562 Chemical Crystallography (3)** **Bierlein, Minor**
Crystals; diffraction of X rays, electrons, and neutrons; determination of structure of crystals. Prerequisite, degree in chemistry, physics, or engineering. (Tentatively offered Winter, 1963.)
- R572 Chemical Crystallography (3)** **Bierlein, Minor**
Texture, growth, and diffraction of crystals; imperfections. Prerequisite, R562. (Tentatively offered Spring, 1963.)
- R575 Electrochemistry (3)** **Burger**
Electrical units and electrolytic conductance, theory of solutions, ion migration, activity coefficients, modern theories of acids and bases, electrolytic deposition and the mechanisms of corrosion, electro-kinetic phenomena. With its widespread application to the use and protection of materials used in process design, this course is pertinent to many problems in engineering as well as in chemistry. Prerequisite, undergraduate thermodynamics or permission. (Tentatively offered Spring, 1963.)
- R576 Solutions, Solvents, and Solvent Extraction (3)** **Burger**
A physical-chemical review of the nature of solutions. Chemical bonds, molecular structure, molecular and ionic complexes, nonaqueous solvents and the distribution between phases. In addition to the thermodynamic approach to solvent extraction, some special problems concerning kinetics and interfacial phenomena will be briefly considered. Prerequisite, permission. (Offered Winter, 1962.)

MATHEMATICS

- R321, R322 Differential Equations (3,3)** **Wiggins**
Elementary methods of solution, linear differential equations, systems of linear differential equations, solutions in series, some classical equations. Prerequisite, differential and integral calculus. (Offered Autumn, 1961, and Winter, 1962. Tentatively offered Autumn and Winter, 1962, 1963.)
- R324, R325 Advanced Calculus (3,3)** **Nicholson**
Vectors, differential calculus of functions of several variables, vector differential calculus, integral calculus of functions of several variables, vector integral calculus, infinite series. Prerequisite, differential and integral calculus. (Offered Autumn, 1961, and Winter, 1962. Tentatively offered Autumn and Winter, 1962, 1963.)
- R326 Infinite Series and Related Topics (3)** **Nicholson**
Basic concepts of infinite sequences and series, uniform convergence, integration and differentiation of series, power series, infinite products, summation and numerical methods, summability, asymptotic expansions. Prerequisite, R325. (Offered Spring, 1962. Tentatively offered Spring, 1963.)
- R411, R412 Linear Algebra (2,2)** **Nicholson**
Linear vector spaces, linear transformations, matrices, determinants, linear products, spectral theory and diagonalization, quadratic forms. Prerequisite, differential and integral calculus. (Offered Autumn, 1961, and Winter, 1962.)
- R427, R428, R429 Topics in Applied Analysis (3,3,3)** **Wiggins**
R427: Elementary complex variable. Prerequisite, R325. (Offered Autumn, 1961. Tentatively offered Autumn, 1962.)
R428: Laplace transforms, boundary value problems, Fourier series, Bessel functions. Prerequisites, R321, R325. (Offered Winter, 1962. Tentatively offered Winter, 1963.)
R429: Legendre functions, curvilinear coordinates, calculus of variations. Prerequisite, R428. (Offered Spring, 1962. Tentatively offered Spring, 1963.)

- R485, R486, R487 Calculus of Probabilities (2,2,2)** **Wiggins**
 Fundamental concepts, combinatorial analysis, conditional probability, random variables, mathematical expectation, law of large numbers, important types of distributions, random walks, central limit theorem, discrete valued stochastic processes. Prerequisite, R412. (Offered 1961-62.)
- R491, R492, R493 Mathematical Statistics (2,2,2)** **Jaech**
 Fundamental concepts, sampling distributions, counted data, 1 and 2 population normal distribution statistics, linear regression, correlation, multiple regression, analysis of variance and covariance, inefficient statistics, non-parametric, sequential analysis. Prerequisite, R412 or permission. (Tentatively offered 1962-63.)
- R494, R495, R496 Design of Experiments (2,2,2)** **Jaech**
 Basic concepts, reduction of experimental error, randomization, Latin squares, randomized blocks, factorials, balanced incomplete designs, confounding, response surfaces. Prerequisite, R493. (Offered 1961-62.)
- R537, R538, R539 Methods of Mathematical Physics (2,2,2)** **Dean**
 Linear vector spaces, linear functionals, linear operators, Banach and Hilbert Spaces, introduction to spectral theory of operators, Green's functions, symbolic functions and operations, eigenvalue problems of ordinary and partial differential equations, integral equations. Prerequisites, R412, R427, R428, R429. (Tentatively offered 1962-63.)

PHYSICS

- R321 Introduction to Modern Physics (3)** **Paul**
 This course is primarily to introduce engineering graduates and graduates of scientific disciplines other than physics to the field of atomic, molecular, and nuclear phenomena. Brief review of classical physics, elementary kinetic theory, atomic structure of matter and electricity, introduction to quantum effects, and the nuclear atom. Prerequisites, college physics, and differential and integral calculus. (Offered Autumn, 1961. Tentatively offered Autumn, 1962.)
- R322 Introduction to Modern Physics (3)** **Paul**
 Physical foundations and interpretations of quantum mechanics, the wave mechanics description of the hydrogen atom and more complex atoms, molecular spectra, solid-state physics, relativity theory, and quantum electrodynamics. Prerequisite, R321. (Offered Winter, 1962. Tentatively offered Winter, 1963.)
- R323 Introduction to Modern Physics (3)** **Paul**
 Natural radioactivity, radioactive decay laws, Alpha decay, Beta decay, Gamma emission, nuclear fission and nuclear reactors, fusion reactions, cosmic radiation, high-energy particles, and nuclear force theories. Prerequisite, R322. (Offered Spring, 1962. Tentatively offered Spring, 1963.)
- R461 Introduction to Atomic and Nuclear Physics (3)** **Nilson**
 These courses (R461, R462, R463) are intended for physics majors and graduates in fields other than physics who require a rigorous treatment of this subject as preparation for more advanced graduate study in physics, particularly in nuclear physics and reactor theory. The first quarter covers the theory of relativity through a brief introduction to the general theory, basic postulates of quantum mechanics with examples from the free-particle and one-electron problems, radiation and radiative transitions, and the Pauli principle and atomic structure. Prerequisites, differential equations, undergraduates course in electricity and magnetism, or permission. (Tentatively offered Autumn, 1962.)
- R462 Introduction to Atomic and Nuclear Physics (3)** **Nilson**
 Atomic and molecular spectroscopy, quantum statistics, solid state physics, X rays, and basic nuclear properties. Prerequisite, R461. (Tentatively offered Winter, 1963.)
- R463 Introduction to Atomic and Nuclear Physics (3)** **Nilson**
 Radioactivity and nuclear stability, nuclear reactions, nuclear forces and structure, particles, cosmic radiation, and stellar energy. Prerequisite, R462. (Tentatively offered Spring, 1963.)
- R481, R482, R483 Introduction to Mathematical Physics (3,3,3)** **Lindenmeier**
 Linear vector algebra and vector calculus; continuum theory of solids and fluids; statistical mechanics and kinetic theory; boundary value problems in classical field theory; multipole series and Green's functions; special relativity and elementary quantum mechanics. Prerequisites, undergraduate courses in electricity and magnetism and properties of matter, or equivalent. (Offered 1961-62.)
- R505, R506 Advanced Mechanics (3,3)** **Triplott**
 Dynamics of a particle and of rigid bodies; generalized coordinates and Lagrangian theory; variational principles. Hamilton's equations of motion, vibration, and normal coordinates; relativistic dynamics. Prerequisites, Mathematics R427, R428, R429, or permission. (Tentatively offered Winter and Spring, 1963.)
- R513, R514, R515 Electricity and Magnetism (4,4,4)** **Foster**
 The properties of electric and magnetic fields as boundary value problems; applications of harmonic functions and conformal transformations; electrodynamics and electromagnetic waves in empty space and material media and in the presence of conducting boundaries; relativistic mechanics and the covariant four-dimensional formulation of electrodynamics; radiation, scattering, and dispersion. Prerequisite, R483 or permission. (Offered 1961-62.)

- R517, R518, R519 Quantum Mechanics (4,4,3)** **Carter**
 Historical and postulational foundations of quantum theory; quantization of simple systems; spin, perturbation theory, scattering, and relativistic quantum theory of particles. Prerequisite, R506 or permission. (Tentatively offered 1963-64.)
- R576 Selected Topics in Experimental Physics (*, maximum 6)**
 Prerequisite, permission.
- R578 Selected Topics in Theoretical Physics (*, maximum 6)**
 Prerequisite, permission.
- R581, R582, R583 Advanced Reactor Physics (3,3,3)**
 Advanced methods for the design analysis of nuclear reactors, with particular reference to mathematical and computational techniques. The course covers linear operator equations, variational principles, perturbation theory, machine computation, and numerical methods; the transport equation, slowing down, and diffusion models; and applications to lattice parameters, reactor dynamics, and fuel cycle analysis. Prerequisites, Nuclear Engineering R506 and Mathematics R428, or equivalent. (Tentatively offered 1963-64.)

COLLEGE OF BUSINESS ADMINISTRATION

The graduate program in Business Administration is staffed largely by members of the University faculty in Seattle who travel to Richland each week to conduct their classes. Students contemplating work toward a Master of Business Administration degree should apply for admission to the Graduate School as far in advance as possible of the quarter in which they wish to begin their studies in order to permit the Center and the College of Business Administration to take their backgrounds into consideration when scheduling Richland courses.

ACCOUNTING

- R522 Seminar in Cost Accounting (3)** **Storey†**
 Critical examination of theories of managerial accounting. Differentiation of objectives of managerial and financial accounting, joint costs, absorption costing, direct costing, standard costing, distribution costing, techniques of analysis of cost data, including differential cost analysis. Prerequisite, 330 and permission. (Offered Summer, 1962.)
- R592 Seminar in Administrative Controls (3)** **Berg†, Storey†**
 The use of accounting and statistics by management in the exercise of its planning and controlling functions; e.g., forecasting, budgets, standard costs, analysis of cost variations. Controllership as a function in the business enterprise. Prerequisites, 230 and permission. (Offered Autumn, 1961, and Summer, 1962.)

FINANCE

- R300P Business Finance (5)**
 The role of financial institutions in meeting short-, intermediate-, and long-term credit needs of businesses and individuals. An accelerated course, for graduate students only, to remove background deficiency in 320 and 350. Prerequisites, postgraduate standing with a senior year grade-point average of 3.00 and permission. (Offered Autumn, 1961.)
- R521 Seminar in Money Markets (3)** **Johnson†**
 Supply and demand for funds in short-term and long-term money markets; analysis of the influence of the money supply, bank reserves, legal restrictions, institutional portfolio policies, and changing needs and instruments of corporation finance. An objective of this seminar is to develop ability to analyze and appraise current money market developments. Prerequisite, permission. (Offered Winter, 1962.)
- R522 Seminar in Corporation Finance (3)** **Mueller†**
 Emphasizes selected contemporary problems and methods, internal and external, in solving corporate financial problems and indicating financial trends. Extensive reading and discussion is required in designated areas. Prerequisite, permission. (Offered Spring, 1962.)

MARKETING

- 522 Advanced Marketing Concepts (3)**
 The interdisciplinary exchange of ideas related to marketing is studied. New marketing theories and evolving concepts of marketing management are examined and critically appraised. Prerequisites, 520 or 521, and permission. (Offered Spring, 1962.)

†Member of the University faculty in Seattle.

POLICY AND ADMINISTRATION

- R575 Human Aspects of Administration (3)** **Barnowe†**
An examination of present-day thinking, points of view, and developing research with a major stress on the human aspects of administration. Various areas are developed by extensive reading, case discussion, and individual reports on special projects and research. Prerequisite, permission. (Offered Autumn, 1961.)
- 586 Seminar in Administrative Organization (3)** **Rosenzweig†**
Examination of organization concepts and theories, aimed at developing working principles and an organized philosophy of management. Reading and discussion of the classical and current literature of the field, including an examination of the philosophy of organization of various outstanding business leaders. Prerequisite, permission. (Offered Winter, 1962.)

COLLEGE OF ENGINEERING

CHEMICAL ENGINEERING

- R486 Chemical Engineering Analysis (3)** **Finnigan**
An engineering course designed to increase the student's facility in solving problems with the aid of mathematics. The emphasis is placed on expressing physical problems in mathematical language and following through to obtain numerical solutions. Only a minimum time will be spent on methods of solving differential equations. Problems will be taken from fields of chemical engineering interest such as diffusional processes, heat transfer, fluid flow, thermodynamics, and kinetics. Prerequisites, graduate standing in chemical engineering with mathematics at least through a course in differential equations. (Offered Autumn, 1961. Tentatively offered Autumn, 1962.)
- R570 Introduction to Transport Phenomena (3)** **Johnson**
Derivation of general differential equations for transport of heat, mass, and momentum; kinetic theory of fluids and its application to transport phenomena based on molecular motion; methods for estimating transport coefficients in fluids. Prerequisite, undergraduate course in unit operations, or permission. (Offered Autumn, 1961. Tentatively offered Autumn, 1962.)
- R571 Heat Transfer I (3)** **Batch**
Steady and unsteady state conduction with emphasis on numerical methods. Radiation, design theory background and application to furnace design, convection, introductory concepts, methods for predicting coefficients, recent developments in theory, heat-exchanger design. Prerequisite, R570. (Offered Winter, 1962.)
- R573 Absorption and Extraction (3)** **Johnson**
A study of mass transfer, primarily in gaseous and liquid systems. From the basic theoretical principles of diffusion are developed the working equations of mass transfer which are subsequently used to obtain exact solutions to several types of diffusion problems of interest to the chemical engineer. The basic principles are next applied to obtaining an understanding of several diffusion processes such as absorption, extraction, ion exchange, and thermal diffusion. Prerequisites, R486 and R570. (Offered Winter, 1962.)
- R574 Fluid Mechanics (3)** **Fryar**
Mechanism of fluid flow. Total energy balance and Bernoulli's Theorem. Integration of the differential equations for motion of a fluid. Poiseuille, Fanning, and other equations. Turbulent flow and boundary-layer relationships. High velocity flow. Introductory design calculations. Prerequisites, undergraduate course in fluid mechanics or hydraulics, and R570. (Tentatively offered Winter, 1963.)
- R575 Advanced Chemical Engineering Thermodynamics (3)** **Platt**
Principles of thermodynamics. Applications to unit operations and to prediction of phase equilibria and chemical equilibria. Prerequisites, undergraduate course in chemical engineering thermodynamics and graduate standing, or permission. (Tentatively offered Winter, 1963.)
- R576 Heat Transfer II (3)** **Batch**
Continuation of R571. Prerequisites, R571 and R574. (Offered Spring, 1962.)
- R581 Kinetics and Catalysis (3)** **Platt**
Kinetics of homogeneous and heterogeneous systems, with emphasis on application of chemical engineering principles applied to the design of industrial development and production reactors. Prerequisite, R575. (Tentatively offered Spring, 1963.)
- R582 Advanced Topics in Mass Transfer (3)** **Johnson**
Theoretical and practical study of special batch and continuous multistage processes for separation of various substances, including isotopes. Ion exchange, chemical exchange, gas and thermal diffusion, chromatographic, electrophoretic, and other processes are considered. Prerequisite, R573 or permission. (Tentatively offered Spring, 1962.)
- R583 Advanced Topics in Chemical Engineering (1-3)** **Batch, Fryar**
Discussions and readings of topics of current interest in the field of chemical engineering unit operations. Prerequisites, R574, R576, or permission. (Tentatively offered Spring, 1963.)

†Member of the University faculty in Seattle.

CIVIL ENGINEERING

- R571 Advanced Strength of Materials (3)** **Merckx**
 Stresses and deflection of curved bars, beams on elastic foundation, beams with axial forces, shear center, stresses and deflection of thin plates, stresses in thick cylinders. This course accomplishes two goals: (1) the methods of solving the above problems, (2) the use of homogeneous solutions to account for boundary condition and of the methods of superposition to solve for stress conditions in composite structures. Prerequisites, undergraduate course in strength of materials, ordinary differential equations, and graduate standing. (Tentatively offered Autumn, 1963.)
- R572 Theory of Elasticity (3)** **Merckx**
 This course provides the background for the rigorous methods of solution used on more advanced problems. It also provides the physical background for the understanding of plastic yielding criteria. Prerequisite, R571. (Offered Winter, 1962.)
- R575 Plastic Design of Structures (3)** **Merckx**
 Plastic (inelastic) behavior of structural materials. Applications to the design of structural members and systems. Principles of upper and lower bound. Limitations and economy of the procedure. Prerequisite, R572. (Offered Spring, 1962.)
- R591 Mechanical Analysis with Inelastic Continuum (3)** **Merckx**
 The use of material models to represent material behavior, simple analyses of bar and beam structures and the use of thermodynamics to provide the unifying connection between various models. Prerequisite, R572. (Tentatively offered Spring, 1963.)

*ELECTRICAL ENGINEERING

- R478- Fundamentals of Automatic Control (0-)** **Allen**
 No credit allowed for R478- until R479 has been completed satisfactorily. An introductory course presenting the basic methods of analysis of linear feedback systems. Subjects covered are: the Laplace Transform, transfer functions, frequency response, Root locus, stability criteria, and transient solutions. Prerequisite, degree in engineering, or permission. (Tentatively offered Autumn, 1962.)
- R479 Fundamentals of Automatic Control (-4)** **Allen**
 Intermediate subjects in the field of feedback system analysis and synthesis. The subjects included are: performance criteria, synthesis to meet design criteria, the analysis of multi-loop systems, the relationship of frequency response to transient response, introduction to nonlinear systems and nonlinear analysis, and current topics. Prerequisite, R478-. (Tentatively offered Winter, 1963.)

MECHANICAL ENGINEERING

- R412 Engineering Economics (3)** **Lang**
 A composite study of theoretical engineering economy presented in two categories. The first part covers economic principles and elementary accounting and corporate investment procedures including studies of money equivalents; amortization practices within present tax structure; capital requirements for process plants; and the relationship of costs, earnings, profits, and returns. The second part of the course will illustrate the techniques of applying these principles with emphasis on comparative annual costs, earning ratios, pay-out times, economic balance, and investment principles. Prerequisites, degree in engineering or permission. (Offered Autumn, 1963.)
- R521 Thermodynamics (3)** **Fryar**
 An introductory course in graduate level thermodynamics. The course is designed to give the student an appreciation of classical thermodynamics and is taught primarily from the scientific rather than the engineering approach. Fundamentals, logic, and mathematics are stressed. This course will establish the principles for R522. Prerequisite, undergraduate course in thermodynamics or permission. (Tentatively offered Autumn, 1962.)
- R522 Thermodynamics (3)** **Fryar**
 Thermodynamics of chemical reactions including the third law and equilibrium conversion. Analysis of the thermodynamics of fluid flow, heat transfer, and certain other processes. Prerequisite, R521. (Tentatively offered Winter, 1963.)
- R523 Thermodynamics (3)** **Fryar**
 Analysis of heat power cycles including steam turbine cycle design, optimization of parameters, and effect of operational variables. The application of nuclear reactors as the heat source of the steam turbine cycle is covered in some detail. Prerequisite, R522. (Tentatively offered Spring, 1963.)
- R568 Vibrations (3)** **Merckx**
 Single degree of freedom, including free vibrations undamped, free vibrations damped, forced vibrations (harmonic forcing); multidegree of freedom, including free vibrations (natural frequencies), forced vibrations of multidegree of freedom systems; use of energy techniques, including approximations of continuous systems (natural frequency). Prerequisite, senior standing or permission. (Tentatively offered Autumn, 1962.)

* Course offerings in Electrical Engineering for academic years succeeding 1961-62 are to be arranged.

- R569 Advanced Vibrations (3)** **Merckx**
Vibration of continuous systems, natural frequency of a string, rod, etc., natural frequency of a beam, vibration of circular membrane; phase plane methods, transient solutions, non-linear solutions, forced vibrations (limit cycles), nonharmonic forcing; integral techniques (Green functions); introduction to variational methods (classical mechanics). Prerequisite, R568. (Tentatively offered Winter, 1963.)
- R570 Wave Motion (3)** **Merckx**
Shock waves in fluids; plane waves, phase and group velocity; spherical waves; spectrum analysis (use of transform); elastic waves (bars, beams, and plates). Prerequisite, R569. (Tentatively offered Spring, 1963.)
- R577 Mechanical Analysis Principles (3)** **Merckx**
Special emphasis is given to determining localized stresses due to displacement incompatibilities. Membrane theory of shells, symmetrical bending of thin cylindrical shells, circular plate theory, and twisting of circular rings. Prerequisites, undergraduate course in strength of materials, Mathematics R322, and graduate standing. (Tentatively offered Autumn, 1963.)
- R578 Mechanical Analysis Principles (3)** **Merckx**
Introduction to the concepts of energy methods of solution, the elastic approach, and elastic stability. Energy methods applied to the problems of thin-curved beams or thermal stress in piping, thin-walled curved tubes or elbows, and tube sheets. Elastic approach used on thick-walled cylinders, stress concentrations, and thermal stress problems. Prerequisite, R577. (Tentatively offered Winter, 1964.)
- R579 Mechanical Analysis Principles (3)** **Merckx**
Consideration of real material behavior, material failure criteria for stress rupture, fatigue, brittle fracture, and low cycle fatigue. Analysis of multiaxial stress and strain conditions. Examples of plastic analyses, creep analyses, and thermal ratcheting. Prerequisites, undergraduate course in strength of materials, Mathematics R322, and graduate standing. (Offered Autumn, 1961.)

METALLURGICAL ENGINEERING

- *R361 Physical Metallurgy (4)** **Bush, Tobin, Leggett**
An introduction to the fundamentals of physical metallurgy: classification of metals, the periodic table, atomic structure and interatomic relationships, crystallography of metals including Miller indices, single crystals, and polycrystals; alloys and alloying binary equilibrium diagrams, substitutional and interstitial solid solutions, and intermetallic compounds; the applications of the phase rule. Prerequisites, undergraduate physics. Graduate credit only toward a minor degree. (Offered Autumn, 1961.)
- *R362 Physical Metallurgy (4)** **Bush, Tobin, Leggett**
The physical metallurgy of iron and steel, preparation, atomic nature and allotropic change in iron; metastable binary phase diagrams, alloying behavior of iron, iron-graphite and iron-Fe₃C phase diagrams; equilibrium relations in plain carbon steels, the metallurgy of cast iron, reaction kinetics of phase transformations in steels, the mechanism of formation of subcritical substances; alloy steels; hardenability and hardenability concepts. Prerequisites, R361 or engineering metallurgy. (Offered Winter, 1962.)
- *R363 Physical Metallurgy (4)** **Bush, Leggett, Tobin**
Metallurgical phenomena of industrial importance: casting and solidification, heat and cold working, surface treatment of metals, joining, machining and powder metallurgy; equilibrium and non-equilibrium structures and phases; diffusion and diffusion dependent mechanisms such as recovery, recrystallization growth, aging and precipitation hardening; gases in metals; metal failure analysis. Prerequisite, R362. (Offered Spring, 1962.)
- R447 Nuclear Metallurgy (3)** **Bush, Leggett, Tobin**
The behavior of fissionable and nonfissionable metals in a reactor environment, including the fundamental mechanisms for irradiation behavior of U. Prerequisite, course in elements or fundamentals of metallurgy, or permission. (Offered Autumn, 1961.)
- R544 Irradiation Effects in Metals and Alloys (3)** **Bush, Leggett, Tobin**
Review of neutron induced damage in fissionable and nonfissionable metals and alloys. Influence of crystal structure, impurity atoms, phases on physical and mechanical properties based on current damage theories and empirical data. Interpretation of damage and understanding of damage mechanisms. Prerequisites, R569, Mathematics R322. (Tentatively offered Autumn, Winter, 1964.)
- R547 Advanced Nuclear Metallurgy (3)** **Bush, Leggett, Tobin**
Damage mechanisms in nonfissionable metals as related to crystallographic structure and other significant properties. Prerequisite, R447. (Offered Spring, 1964.)
- R567, R568, R569 Advanced Physical Metallurgy (3, 3, 3)** **Bush**
Electron theory of metals; statistical thermodynamic approach to solid state reactions—order, disorder, phase transformations, diffusion, nucleation, and growth; theory of alloys (Hume-Rothery); metal interfaces; dislocation theory. Prerequisite, degree in metallurgical engineering or permission. (Tentatively offered 1962-63.)

*Subject to approval of University Curriculum Committee.

NUCLEAR ENGINEERING

- R384 Nuclear Engineering Survey (0)** **Fullmer**
For those desiring qualitative concepts of the nuclear fuel-reactor separations field. Physics of the pile reaction—nuclear reactions, elementary reactor physics; heat transfer and fluid flow; reactor materials—structural and fuel; reactor control and safety; transuranic and isotope chemistry—separations plant design and operation. Prerequisite, degree in engineering or science, or permission. (Offered Autumn, 1961. Tentatively offered Autumn, 1962; Autumn, 1963.)
- R484 Introduction to Nuclear Engineering (3)** **Weeks**
A course in nuclear engineering for seniors, graduate students, and practicing engineers; covering elements of reactor nuclear physics; elementary nuclear reactor theory; radiation shielding; materials of construction. Prerequisites, Mathematics R322, Physics R323. (Offered Spring, 1962. Tentatively offered Spring, 1963; Spring, 1964.)
- R485 Nuclear Instruments (3)** **Paul**
A lecture and laboratory course devoted to the basic design and operation of the instruments used in nuclear engineering, such as badges, dosimeters, Geiger counters, proportional counters, survey meters, scalars, radiation monitors, scintillation spectrometers, etc. Experiments will demonstrate the characteristics of nuclear instruments and associated circuitry. Safety practices will be emphasized throughout the course. Prerequisite, R484. (Offered Winter, 1962. Tentatively offered Autumn, 1962.)
- R486 Nuclear Power Plants (3)** **Heacock**
The design, operation, and maintenance of the nuclear power plant, architectural layouts, basic heat-power cycle components, and essential auxiliary equipment. A critical survey of existing, or proposed, nuclear power plants covering the range of power applications and reactor types with emphasis on those generating commercial electrical power. The effects of such specific requirements as capital costs, fuel cycle, space and weight on plant design, and equipment arrangement. Prerequisite, R484 or permission. (Offered Spring, 1963.)
- R501 Nuclear Reactor Theory Laboratory (3)** **Wood**
A laboratory course in reactor physics using exponential piles, the Hanford Standard Pile, and analog computers. Experiments will include measurement of diffusion length, material buckling, and effective pile size; calibration of foils and neutron sources with an introduction to scintillation counting techniques; analog computer studies of reactor kinetics and control; measurement of danger coefficients and lattice parameters; and selected experiments according to class interests. Prerequisite, R506. (Offered Spring, 1962. Tentatively offered Spring, 1963.)
- *R502-R503 Nuclear Engineering Laboratory (3-3)** **Schmid**
An advanced laboratory course centered around a 100-watt graphite reactor. Experiments will be performed utilizing the steady-state and dynamic characteristics of the reactor. Some experiments will also be performed employing the reactor as a source of radiation. Training in reactor startup and shutdown procedures and in instrumentation checkout and calibration is included in the course. Prerequisite, R501 or permission. (Offered Autumn, 1961 and Winter, 1962.)
- R505, R506 Nuclear Reactor Theory (3,3)** **Wood**
A lecture course in nuclear reactor physics covering neutron production, reactions, and cycles; diffusion and slowing down of neutrons; theory of criticality of homogeneous and heterogeneous systems; reactor kinetics and control theory; and elements of perturbation theory. Prerequisites, R484, Mathematics R428 (Mathematics R427 and R429 recommended, but not required), and Physics R323. (Offered Autumn 1961, Winter, 1962. Tentatively offered Autumn, 1962, Winter, 1963.)
- R510 Nuclear Reactor Engineering (3)**
An advanced course in engineering analysis of nuclear reactor systems. The course covers core design methods, heat generation and distribution in nuclear reactor systems, the removal and utilization of heat for power production, fuel cycles and processing of irradiated reactor fuels, shielding of nuclear radiations. Prerequisite, R506. Offered Spring, 1963.)
- R539 Nuclear Reactor Design (3)** **Locke**
A design laboratory course involving the synthesis of reactor theory, engineering analysis, material specifications, and economics to meet the design specifications for a complete nuclear reactor facility. Emphasis upon cycle analysis, hazards, arrangements, and requirements peculiar to nuclear reactor plants. Prerequisite, R510. (Offered Spring, 1962.)
- R559 Control of Radioactive Wastes (3)** **Schwendiman**
Sources of radioactive wastes in nuclear plants and other installations, permissible limits, safe methods for disposal, methods for reducing volumes and concentrations, sampling and analysis techniques, air and liquid stream monitoring, site selection as influenced by waste disposal criteria, release and consequence of radioactive isotopes during disastrous incidents. Prerequisite, Physics R323 or permission. (Tentatively offered Winter, 1963.)

SCHOOL OF LIBRARIANSHIP

- R510 Evaluation of Library Materials (4)**
Sources of information about books; criteria of evaluation for selection; evaluation of general reference materials; procedures of reader's services. (Offered Autumn, 1961.)
- R511 Library Materials in the Humanities and Social Sciences (3)**
Survey and evaluation of library resources in these fields. Included are reference tools, bibliographies, landmark books, and contemporary literature, with reference to the needs of different kinds of readers. Prerequisite, R510. (Offered Winter, 1962.)
- R512 Library Materials in Science and Technology (3)**
Continuation of R511. Prerequisite, R510. (Offered Spring, 1962.)

SCHOOL OF MEDICINE**RADIOLOGY**

- R400 Radiobiology (3)** **Bair**
This course requires only a minimum background in chemistry and does not presume any prior study of biology. Chemical, biological, and genetic effects of irradiation on unicellular and multicellular organisms, tolerance and dosage limits, effect of internal emitters, radiological ecology. Prerequisites, degree in science or engineering, Physics R323, or permission. (Tentatively offered Spring, 1963.)
- R485 Radiation Dosimetry (4)** **Roesch, Myers**
The measurement of radiation energy loss relationships in gases and solids; detection techniques and circuits; units; consideration of human exposure limits. Prerequisite, permission. (Offered Winter, 1962.)

BULLETIN • UNIVERSITY OF WASHINGTON

CENTER FOR
GRADUATE STUDY AT HANFORD
RICHLAND, WASHINGTON
1962-63

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter Bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

CALENDAR

AUTUMN, WINTER, AND SPRING QUARTERS
(Autumn Quarter, 1962, through Summer Quarter, 1963)

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

AUTUMN QUARTER, 1962

REGISTRATION PERIOD

Aug. 23-Sept. 6 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

SEPT. 10	Instruction begins
Nov. 22	Thanksgiving holiday
Nov. 30	Instruction ends

WINTER QUARTER, 1963

REGISTRATION PERIOD

DEC. 3-8 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

DEC. 10	Instruction begins
DEC. 24-28	Christmas holiday
MARCH 8	Instruction ends

SPRING QUARTER, 1963

REGISTRATION PERIOD

MARCH 11-16 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

MARCH 18	Instruction begins
MAY 30	Memorial Day holiday
JUNE 7	Instruction ends

SUMMER QUARTER, 1963

REGISTRATION PERIOD

JUNE 17-22 Registration *by appointment only* for all students. See page 13 for further information on registration.

ACADEMIC PERIOD

JUNE 24	Instruction begins
JULY 4	Independence Day holiday
AUG. 23	Instruction ends

ADMINISTRATION

BOARD OF REGENTS

MRS. A. SCOTT BULLITT, <i>President</i>	Seattle
ALBERT B. MURPHY, M.D., <i>Vice-President</i>	Everett
JOSEPH DRUMHELLER	Spokane
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima
HELEN E. HOAGLAND, <i>Secretary</i>	
DON H. WAGEMAN, <i>Treasurer</i>	

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN H. LEGGETT, Ph.D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>

GRADUATE SCHOOL ADMINISTRATION

JOSEPH L. MCCARTHY, Ph.D., <i>Dean of the Graduate School</i>
HENRIETTA WILSON, M.A., <i>Assistant to the Dean</i>
GEORGE W. FARWELL, Ph.D., <i>Associate Dean of the Graduate School</i>
KERMIT B. BENGTSON, Ph.D., <i>Director of the Center for Graduate Study</i> (at Richland)
HELEN BRINCK, <i>Administrative Assistant to the Director (at Richland)</i>

EXECUTIVE COMMITTEE OF THE GRADUATE SCHOOL

JOSEPH L. MCCARTHY, <i>Chairman</i>	ALICE H. HAYDEN, <i>Education</i>
ARNOLD S. STEIN, <i>English</i>	BLAKE D. MILLS, <i>Mechanical</i> <i>Engineering</i>
BARNET BASKERVILLE, <i>Speech</i>	EDMOND H. FISCHER, <i>Biochemistry</i>
J. HOOVER MACKIN, <i>Geology</i>	SAUL SCHLUGER, <i>Dentistry</i>
J. RICHARD HUBER, <i>Economics</i>	

HANFORD INTER-UNIVERSITY COMMITTEE

JOSEPH L. MCCARTHY, <i>Chairman, Dean of the Graduate School, University of Washington</i>
DONALD S. FARNER, <i>Dean of the Graduate School, Washington State University</i>
HENRY P. HANSEN, <i>Dean of the Graduate School, Oregon State University</i>

- Roesch, William Carl (1951)
B.A., 1945, Miami; Ph.D., 1949, California Institute of Technology
- Schmid, Loren Clark (1961)
B.S., 1953, M.S., 1954, Ph.D., 1958, Michigan
- Schwendiman, Lysle Christian (1960)
B.S., 1939, Idaho
- Tobin, John Charles (1958)
B.S., 1949, M.S., 1950, Ph.D., 1957, Michigan
- Vitro, Robert Edward (1961)
B.C.S., 1957, Seattle University; M.B.A., 1960, Washington
- Wiggins, Alvin Dennie (1958)
A.B., 1951, M.A., 1953, Ph.D., 1957, California
- Wilburn, Norman Patrick (1959)
B.S., 1953, M.S., 1954, Ph.D., 1958, California Institute of Technology
- Wilson, Archie Spencer (1954)
B.S., 1946, Iowa State; M.S., 1950, Ph.D., 1951, Chicago
- Wood, Donald Eugene (1959)
B.S., 1951, Nevada; M.S., 1953, Ph.D., 1956, Northwestern

Members of the University's faculty in Seattle who teach courses in Richland are listed in the bulletin of the appropriate University College or School.

OBSERVANCE OF UNIVERSITY RULES AND REGULATIONS

It is the University's expectation that a student will follow University rules and regulations as they are stated in the Bulletins. In instances where no appeal procedure is spelled out and the student is persuaded that a special set of circumstances makes appeal reasonable, he may appeal the application of specific rules or regulations to the Office of the Dean of the School or College in which he is enrolled in the case of an academic matter, or to the Office of the Dean of Students in the case of a nonacademic matter. These offices will either render a decision on the appeal or refer the student to the proper office for a decision.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

GENERAL INFORMATION

GENERAL INFORMATION

The Center for Graduate Study at Hanford was created primarily to provide for the continuing educational needs of professional persons employed on the Hanford Project by the Atomic Energy Commission and its contractors. It came into existence on July 1, 1958. The Center, in fulfilling this need, replaces the former General Electric School of Nuclear Engineering originally established in 1946.

The Center is administered by the University of Washington in cooperation with Washington State University and Oregon State University. Programs offered through the Center are oriented to serve those working toward graduate degrees, but it is stressed that enrollment is not contingent upon the intent to secure a degree or a graduate degree and is open to any person, irrespective of employment, who can meet the academic prerequisites for enrollment. Most classes are held after hours, and enrollment usually will be inconvenient for persons not having gainful employment in the Tri-City area. Employment at the Hanford Atomic Products Operation generally is unavailable to foreign nationals.

Classroom space and administrative offices of the Center are located at 1112 Lee Boulevard in downtown Richland, Washington. Atomic Energy Commission owned laboratory facilities, which are a part of the Hanford Project and which are operated by the General Electric Company, are used in connection with class or research work where the use of such facilities may be necessary and available.

PHILOSOPHY AND OBJECTIVES

The Center was created to make it possible for locally-employed, professional persons interested in continuing their formal education to do so within the framework of a University organization, to increase the amount of contact possible between regular University faculty and local professional people, and to encourage University-Hanford Project cooperation in research activities. In accomplishing these purposes, the Center may be regarded as an agent of the three Universities participating in its operation. Its basic philosophy and objectives therefore are essentially those of the participating Universities. Students at the Center must elect to affiliate with one of the three participating Universities and, after the election is made, are governed by the philosophy of the chosen University. This Bulletin therefore is intended to provide information regarding the Center for Graduate Study only. For information regarding degree requirements, etc., the student should consult the appropriate bulletin of the participating institution of his choice. Such bulletins are available in the Center for Graduate Study Office.

It is a part of the philosophy of all three participating institutions that, with certain exceptions, each Master's degree candidate spend a minimum of one quarter or one semester in full-time resident study on the home campus. Students working toward the degree of Doctor of Philosophy must plan to fulfill on the home campus of the institution of their choice the residence requirement specified for this degree by that institution. Each student intending actively to pursue a full course of study leading to an advanced degree is also required to have his entire educational plan approved by the appropriate institution at an early date in the course of his study. *This should be done as soon as the student has formulated definite plans and must be done prior to completion of twelve quarter credits of course work at the Center. Failure to comply with this requirement may result in refusal by the participating University to accept for credit toward graduate degrees courses completed at the Center.*

It is the policy of all three participating Universities to permit, on an individual approval basis and subject to certain general restrictions, the performance of thesis research work within the boundaries of the Hanford Project.

ENROLLMENT AND ADMISSION

Any student enrolling for credit toward an advanced degree must institute proceedings for admission as a regular graduate student in the participating institution of his choice. Formal admission to a participating institution, except in the case of graduate students in Business Administration and Librarianship, must be obtained prior to completion of a course if credit for that course toward an advanced degree will ever be desired; such credit cannot be granted at a later date for courses completed prior to admission to the graduate school of a participating institution. *New students in all disciplines are encouraged and advised to complete their admission to the graduate school of the participating institution of their choice prior to the time of actual registration for courses.*

The requirements for admission listed below pertain only to the Graduate School of the University of Washington. Requirements for admission to the Graduate School of Washington State University or Oregon State University are generally equivalent, but prospective enrollees in affiliation with either of these Universities should consult an appropriate bulletin for detailed admission requirements in order to be certain they qualify.

In general, properly qualified students who are graduates of the University of Washington or of other colleges or universities of recognized rank may be admitted to the Graduate School of the University of Washington.

The primary criterion for admission to the Graduate School is the applicant's apparent ability, as decided by the University, to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance and, ordinarily, the applicant should have at least a B or a 3.00 grade-point average for the courses taken during the junior and senior years of his undergraduate study. He should also show completion of an undergraduate program appropriate as preparation for graduate study in his chosen field. Consideration will also be given to other evidence which may be available. In some cases, an applicant may give promise of making satisfactory progress in graduate work although his undergraduate grade average may be less than B or 3.00, or his undergraduate preparation may be inadequate; in these cases and other unusual cases, an applicant may be admitted to the Graduate School on the favorable written recommendation of the appropriate department chairman with approval by the Dean of the Graduate School. The University will be able to grant admission only if sufficient faculty and facilities are available to provide for the applicant's program.

Admission to the Graduate School provides the opportunity for continuance of graduate study and research only for the period during which the graduate student maintains satisfactory performance and progress toward completion of his graduate

degree program. The Dean of the Graduate School may alter the status of a graduate student on the written recommendation of the appropriate department chairman or the chairman of the supervisory committee.

Applications for admission must be substantiated by certain credentials and reports submitted in accordance with University rules and practices. All applicants must submit *two* official transcripts of all undergraduate work and of any graduate work.

It is the student's responsibility to make certain that complete credentials covering all his previous college education are submitted to the University. To be official they must be forwarded by the registrars of institutions previously attended, direct to the Registrar of the University. These records become part of the official file and cannot be returned to the student nor duplicated for any purpose whatsoever, as the University does not issue or certify copies of transcripts from other institutions. *Students in Business Administration must be formally admitted to the Graduate School prior to the time of registration. A minimum of one month should be allowed for processing of applications for admission to the Graduate School of the University of Washington.*

Enrollment in Center for Graduate Study courses without credit may be permitted provided the prospective enrollee is deemed to have the proper background, and provided no exclusion of students desiring to take the course for credit would result. Students enrolling without credit will be graded and such enrollment is in every way similar to enrollment with credit except that formal admission on the home campus of one of the participating institutions is not necessary.

Auditors, defined as persons attending lectures but not receiving a grade or participating in any laboratory work, problems, or examinations, will normally be accepted after accommodation of all others.

TUITION

Tuition is at the rate of \$35.00 per quarter per course for all courses. The fee schedule is the same regardless of whether the course is taken for credit, without credit, or audited. Veterans' benefits may be applied, if available to the individual, and a tuition refund plan is available to General Electric employees which provides for refund of half the tuition fee under certain conditions. A similar plan is available to Atomic Energy Commission employees.

REGISTRATION

All registration is taken care of at the Center for Graduate Study Office, located at 1112 Lee Boulevard, Richland (telephones WHitehall 5-6523 or WHitehall 2-1111, Ext. 6-5241).

The Center Office is normally open from 8 a.m. to 12 noon and from 1 to 4:30 p.m. Monday through Friday during the entire year. Registration may be accomplished at the Center Office in person *by appointment only* during special registration weeks designated in the calendar. A limited number of registration appointments are available outside of regular office hours during the special registration weeks for those who find it difficult to arrange for an appointment during regular hours. It is recommended that students who desire counselling or who have other registration problems plan to register in person, but a system of mail registration has been established for the convenience of those whose registration will be routine and its use is recommended. Advance registration without penalty is possible for those who find it necessary to be out of town during a registration week. Registration appointments or material for mail registration may be obtained by writing or calling the Center Office at any time within the three-week period immediately preceding a registration week.

Registration may, in addition, be accomplished during the first week of classes, but a penalty of \$5.00 will be assessed for registration during this time. Registration will be closed after the first week of classes.

Full payment of tuition at the rate of \$35.00 per course is due at the time of registration and must be made before registration is complete. Tuition may be paid by cash or check. All tuition fees for a course will be refunded if a course is cancelled by the Center for Graduate Study because of insufficient registration. All fees will also be refunded if a student officially withdraws from a course at any time prior to the end of the first week of instruction. Fifty per cent of the fees paid will be refunded if a student officially withdraws between the end of the first week and the end of the fourth week of instruction. No refunds will be made after the first four weeks.

In the case of withdrawals taking place more than four weeks after the start of a quarter, a grade will be issued at the time of withdrawal indicating the progress of the student up to that time, but the grade will not be considered an official course grade.

The normal course load is considered to be 3 quarter credits, but up to 6 quarter credits may be carried with permission of the Director.

TEXTBOOKS

All students are expected to obtain personal copies of the text chosen by the instructor. All textbooks are purchased by mail order. Other texts for reference are kept on the school reference shelf in the Center library.

CONDUCT OF CLASSES

All classes are normally held in the Center for Graduate Study Building, 1112 Lee Boulevard in Richland. Most classes meet one evening a week from 7 to 9:30. The meeting day of each class is announced at registration time, but may be changed by the mutual consent of the instructor, the class, and the Director of the Center.

COURSE INFORMATION

GENERAL

This bulletin has been prepared for use during the academic year 1962-63, but tentative course offerings for an additional two years have also been included in order that students may better plan their programs of study. It must be understood, however, that offerings listed beyond the academic year 1962-63 are tentative and for planning purposes only.

A student enrolled at the Center who has progressed to the point where he is ready to undertake thesis or other research work should discuss this need with the chairman of the appropriate department on the home campus. It is the policy of all three participating Universities to permit under certain conditions the carrying on of thesis and other research work at Hanford.

COLLEGE OF ARTS AND SCIENCES CHEMISTRY

- | | | |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| R415 | The Chemical Bond (3)
Electron structure of the elements and the chemical bond, complex ions. Prerequisite, undergraduate physical chemistry or permission. (Offered on demand.) | Wilson |
| R416 | Inorganic Chemistry (3)
Chemistry of the elements and their compounds in relation to the periodic system. Prerequisite, R415. (Offered on demand.) | Wilson |
| R455 | Physical Chemistry (4)
Introduction to quantum mechanics, statistical mechanics, theory of gases, thermodynamics—first and second law. Prerequisites, general chemistry, analytic geometry and calculus, college physics, or permission. (Offered on demand.) (Formerly R355.) | Burger |
| R456 | Physical Chemistry (3)
Thermodynamics—second law, continued; phase equilibria, thermodynamic properties of chemical substances, chemical equilibria, statistical thermodynamics, solutions. Prerequisite, R455. (Offered on demand.) (Formerly R356.) | Burger |
| R457 | Physical Chemistry (3)
Transport and rate processes, reaction rates in gases, the solid state, atomic and molecular spectra, surface chemistry. Prerequisite, R456. (Offered on demand.) (Formerly R357.) | Burger |
| R471 | Nuclear Chemistry (3)
History of the study of radioactivity; the atomic nucleus; the production, nature, and energetics of nuclear reactions; and the equations of radioactive decay and growth. Prerequisite, physical chemistry. (Tentatively offered Autumn, 1963.) | Nielsen |
| R472 | Nuclear Chemistry (3)
Nuclear states and the systematics of radioactive processes, interactions of radiation with matter, radiation chemistry, hot-atom chemistry, and the chemistry of artificially produced elements. Prerequisite, R471. (Tentatively offered Winter, 1964.) | Nielsen |
| R511 | Advanced Inorganic Chemistry (2)
Acid base theory; electron transfer reactions; complex ion reactions and stabilities. Prerequisite, R416 or permission. (Offered on demand.) | Keder |
| R512 | Advanced Inorganic Chemistry (2)
Halogens, less familiar metals, chelate, clathrate, interstitial and nonstoichiometric compounds; other selected topics. Prerequisite, R416 or permission. (Offered Autumn, 1962.) | Keder |

- R514 Radiochemistry (3)** **Ludwick**
Detection and measurement of nuclear radiation, statistical nature of radioactivity measurements, techniques for the study of radionuclides, radioisotopes as chemical tracers, cosmic ray phenomena. Prerequisite, R472. (Tentatively offered Spring, 1964.)
- R525 Advanced Chemical Analysis (3)** **Brouns**
Theory and basic principles of modern chemical analysis. Precipitation reactions, application of organic precipitants, separations by vaporization and extraction, ion exchange methods, electrometric methods, and volumetric analysis. Special topics include isotopic tracer methods and the analysis of gases and organic compounds. Prerequisite, degree in chemistry or chemical engineering, or permission. (Offered Autumn, 1962.)
- R526 Advanced Instrumental Analysis (3)** **Alkire**
Theoretical principles of instrumental methods used as research tools in the fields of chemistry, physics, biophysics, metallurgy, and engineering. Topics covered include emission and absorption spectroscopy, X-ray fluorescence, magnetic resonance, chromatography, mass spectrometry, and radiation detection. Prerequisite, degree in chemistry, physics, or chemical engineering. (Offered Winter, 1963.)
- R550, R551, R552 Advanced Physical Chemistry (3,3,3)** **Morrey**
Thermodynamics and statistical mechanics, atomic and molecular structure, kinetic theory, and chemical kinetics. Prerequisite, undergraduate course in physical chemistry. Tentatively offered 1963-64.)
- R553 Theory of Rate Processes (3)** **Morrey**
Historical developments up to and including the absolute theory of rate processes; quantum mechanics necessary in development of Heitler-London equation, and statistical approach. Use of potential energy surfaces in theoretical predictions. Gas phase, solution, and surface mechanisms. Treatment of viscosity and diffusion. Prerequisite, R552 or permission. (Offered on demand.)
- R562 Chemical Crystallography (3)** **Bierlein, Minor**
Crystals; diffraction of X rays, electrons, and neutrons; determination of structure of crystals. Prerequisite, degree in chemistry, physics, or engineering. (Offered Winter, 1963.)
- R572 Chemical Crystallography (3)** **Bierlein, Minor**
Texture, growth, and diffraction of crystals; imperfections. Prerequisite, R562. (Offered Spring, 1963.)
- R575 Electrochemistry (3)** **Burger**
Electrical units and electrolytic conductance, theory of solutions, ion migration, activity coefficients, modern theories of acids and bases, electrolytic deposition and the mechanisms of corrosion, electro-kinetic phenomena. With its widespread application to the use and protection of materials used in process design, this course is pertinent to many problems in engineering as well as in chemistry. Prerequisite, undergraduate thermodynamics or permission. (Offered Spring, 1963.)
- R576 Solutions, Solvents, and Solvent Extraction (3)** **Burger**
A physical-chemical review of the nature of solutions. Chemical bonds, molecular structure, molecular and ionic complexes, nonaqueous solvents and the distribution between phases. In addition to the thermodynamic approach to solvent extraction, some special problems concerning kinetics and interfacial phenomena will be briefly considered. Prerequisite, permission. (Offered on demand.)

ECONOMICS

- R200 Introduction to Economics (5)**
Organization, operation, and control of the American economy; consideration of problems of inflation, unemployment, taxation, the public debt, monopoly, trade unions, and international trade. American capitalism compared with communism and socialism. (Offered on demand.)

FAR EASTERN AND SLAVIC LANGUAGES AND LITERATURE

(No credit is given toward an advanced degree for the following lower-division Russian courses.)

RUSSIAN

- R106 Scientific Russian (3)** **Pahn†**
Introduction to written Russian as a research tool for science students. Readings in chemistry and physics, etc. (Closed to Russian majors. Prerequisite, permission. (Offered on demand.)
- R108 Scientific Russian (3)** **Pahn†**
Reading and translation of material mainly from chemistry and physics. Discussion of grammatical structure and composition. Prerequisite, R106 or permission. (Offered on demand.)
- R109 Scientific Russian (3)** **Pahn†**
Reading and translation of scientific materials with concentration on chemistry, physics, and mathematics. Discussion of grammar and composition. Prerequisite, R108 or permission. (Offered on demand.)
- R205 Scientific Russian (3)** **Pahn†**
Intermediate reading of Russian scientific literature in various fields. Discussion of grammar and composition. Prerequisite, R109 or permission. (Offered on demand.)

†Member of the University of Washington faculty in Seattle.

- R485, R486, R487 Calculus of Probabilities (2,2,2)** **Wiggins**
 Fundamental concepts, combinatorial analysis, conditional probability, random variables, mathematical expectation, law of large numbers, important types of distributions, random walks, central limit theorem, discrete valued stochastic processes. Prerequisite, R412. (Offered 1961-62.)
- R491, R492, R493 Mathematical Statistics (2,2,2)** **Jaech**
 Fundamental concepts, sampling distributions, counted data, 1 and 2 population normal distribution statistics, linear regression, correlation, multiple regression, analysis of variance and covariance, inefficient statistics, non-parametric, sequential analysis. Prerequisite, R412 or permission. (Tentatively offered 1962-63.)
- R494, R495, R496 Design of Experiments (2,2,2)** **Jaech**
 Basic concepts, reduction of experimental error, randomization, Latin squares, randomized blocks, factorials, balanced incomplete designs, confounding, response surfaces. Prerequisite, R493. (Offered 1961-62.)
- R537, R538, R539 Methods of Mathematical Physics (2,2,2)** **Dean**
 Linear vector spaces, linear functionals, linear operators, Banach and Hilbert Spaces, introduction to spectral theory of operators, Green's functions, symbolic functions and operations, eigenvalue problems of ordinary and partial differential equations, integral equations. Prerequisites, R412, R427, R428, R429. (Tentatively offered 1962-63.)

PHYSICS

- R321 Introduction to Modern Physics (3)** **Paul**
 This course is primarily to introduce engineering graduates and graduates of scientific disciplines other than physics to the field of atomic, molecular, and nuclear phenomena. Brief review of classical physics, elementary kinetic theory, atomic structure of matter and electricity, introduction to quantum effects, and the nuclear atom. Prerequisites, college physics, and differential and integral calculus. (Offered Autumn, 1961. Tentatively offered Autumn, 1962.)
- R322 Introduction to Modern Physics (3)** **Paul**
 Physical foundations and interpretations of quantum mechanics, the wave mechanics description of the hydrogen atom and more complex atoms, molecular spectra, solid-state physics, relativity theory, and quantum electrodynamics. Prerequisite, R321. (Offered Winter, 1962. Tentatively offered Winter, 1963.)
- R323 Introduction to Modern Physics (3)** **Paul**
 Natural radioactivity, radioactive decay laws, Alpha decay, Beta decay, Gamma emission, nuclear fission and nuclear reactors, fusion reactions, cosmic radiation, high-energy particles, and nuclear force theories. Prerequisite, R322. (Offered Spring, 1962. Tentatively offered Spring, 1963.)
- R461 Introduction to Atomic and Nuclear Physics (3)** **Nilson**
 These courses (R461, R462, R463) are intended for physics majors and graduates in fields other than physics who require a rigorous treatment of this subject as preparation for more advanced graduate study in physics, particularly in nuclear physics and reactor theory. The first quarter covers the theory of relativity through a brief introduction to the general theory, basic postulates of quantum mechanics with examples from the free-particle and one-electron problems, radiation and radiative transitions, and the Pauli principle and atomic structure. Prerequisites, differential equations, undergraduates course in electricity and magnetism, or permission. (Tentatively offered Autumn, 1962.)
- R462 Introduction to Atomic and Nuclear Physics (3)** **Nilson**
 Atomic and molecular spectroscopy, quantum statistics, solid state physics, X rays, and basic nuclear properties. Prerequisite, R461. (Tentatively offered Winter, 1963.)
- R463 Introduction to Atomic and Nuclear Physics (3)** **Nilson**
 Radioactivity and nuclear stability, nuclear reactions, nuclear forces and structure, particles, cosmic radiation, and stellar energy. Prerequisite, R462. (Tentatively offered Spring, 1963.)
- R481, R482, R483 Introduction to Mathematical Physics (3,3,3)** **Lindenmeier**
 Linear vector algebra and vector calculus; continuum theory of solids and fluids; statistical mechanics and kinetic theory; boundary value problems in classical field theory; multipole series and Green's functions; special relativity and elementary quantum mechanics. Prerequisites, undergraduate courses in electricity and magnetism and properties of matter, or equivalent. (Offered 1961-62.)
- R505, R506 Advanced Mechanics (3,3)** **Triplott**
 Dynamics of a particle and of rigid bodies; generalized coordinates and Lagrangian theory; variational principles. Hamilton's equations of motion, vibration, and normal coordinates; relativistic dynamics. Prerequisites, Mathematics R427, R428, R429, or permission. (Tentatively offered Winter and Spring, 1963.)
- R513, R514, R515 Electricity and Magnetism (4,4,4)** **Foster**
 The properties of electric and magnetic fields as boundary value problems; applications of harmonic functions and conformal transformations; electrodynamics and electromagnetic waves in empty space and material media and in the presence of conducting boundaries; relativistic mechanics and the covariant four-dimensional formulation of electrodynamics; radiation, scattering, and dispersion. Prerequisite, R483 or permission. (Offered 1961-62.)

- R517, R518, R519 Quantum Mechanics (4,4,3)** **Carter**
 Historical and postulational foundations of quantum theory; quantization of simple systems; spin, perturbation theory, scattering, and relativistic quantum theory of particles. Prerequisite, R506 or permission. (Tentatively offered 1963-64.)
- R576 Selected Topics in Experimental Physics (*, maximum 6)**
 Prerequisite, permission.
- R578 Selected Topics in Theoretical Physics (*, maximum 6)**
 Prerequisite, permission.
- R581, R582, R583 Advanced Reactor Physics (3,3,3)**
 Advanced methods for the design analysis of nuclear reactors, with particular reference to mathematical and computational techniques. The course covers linear operator equations, variational principles, perturbation theory, machine computation, and numerical methods; the transport equation, slowing down, and diffusion models; and applications to lattice parameters, reactor dynamics, and fuel cycle analysis. Prerequisites, Nuclear Engineering R506 and Mathematics R428, or equivalent. (Tentatively offered 1963-64.)

COLLEGE OF BUSINESS ADMINISTRATION

The graduate program in Business Administration is staffed largely by members of the University faculty in Seattle who travel to Richland each week to conduct their classes. Students contemplating work toward a Master of Business Administration degree should apply for admission to the Graduate School as far in advance as possible of the quarter in which they wish to begin their studies in order to permit the Center and the College of Business Administration to take their backgrounds into consideration when scheduling Richland courses.

ACCOUNTING

- R522 Seminar in Cost Accounting (3)** **Storey†**
 Critical examination of theories of managerial accounting. Differentiation of objectives of managerial and financial accounting, joint costs, absorption costing, direct costing, standard costing, distribution costing, techniques of analysis of cost data, including differential cost analysis. Prerequisite, 330 and permission. (Offered Summer, 1962.)
- R592 Seminar in Administrative Controls (3)** **Berg†, Storey†**
 The use of accounting and statistics by management in the exercise of its planning and controlling functions; e.g., forecasting, budgets, standard costs, analysis of cost variations. Controllership as a function in the business enterprise. Prerequisites, 230 and permission. (Offered Autumn, 1961, and Summer, 1962.)

FINANCE

- R300P Business Finance (5)**
 The role of financial institutions in meeting short-, intermediate-, and long-term credit needs of businesses and individuals. An accelerated course, for graduate students only, to remove background deficiency in 320 and 350. Prerequisites, postgraduate standing with a senior year grade-point average of 3.00 and permission. (Offered Autumn, 1961.)
- R521 Seminar in Money Markets (3)** **Johnson†**
 Supply and demand for funds in short-term and long-term money markets; analysis of the influence of the money supply, bank reserves, legal restrictions, institutional portfolio policies, and changing needs and instruments of corporation finance. An objective of this seminar is to develop ability to analyze and appraise current money market developments. Prerequisite, permission. (Offered Winter, 1962.)
- R522 Seminar in Corporation Finance (3)** **Mueller†**
 Emphasizes selected contemporary problems and methods, internal and external, in solving corporate financial problems and indicating financial trends. Extensive reading and discussion is required in designated areas. Prerequisite, permission. (Offered Spring, 1962.)

MARKETING

- 522 Advanced Marketing Concepts (3)**
 The interdisciplinary exchange of ideas related to marketing is studied. New marketing theories and evolving concepts of marketing management are examined and critically appraised. Prerequisites, 520 or 521, and permission. (Offered Spring, 1962.)

†Member of the University faculty in Seattle.

istration degree should apply for admission to the Graduate School as far in advance as possible of the quarter in which they wish to begin their studies in order to permit the Center and the College of Business Administration to take their backgrounds into consideration when scheduling Richland courses.

ACCOUNTING

- R200P Managerial Accounting (5)** **Morrell**
Principles of financial statements and the double entry system. Manufacturing, partnership, and corporation accounting. Financial and cost analysis and interpretation. An accelerated course, for graduate students only, to remove background deficiency in R210, R220, and R230. Prerequisites, postgraduate standing with a senior year grade-point average of 3.00 and permission. (Offered on demand.)
- R331 Income Determination Accounting (5)** **Morrell**
Concepts and principles underlying accounting processes. Theory and problems of financial accounting, including financial statement analysis. (Formerly R310.) Prerequisite, basic accounting analysis. (Offered on demand.)
- R592 Seminar in Administrative Controls (3)**
The use of accounting and statistics by management in the exercise of its planning and controlling functions; e.g., forecasting, budgets, standard costs, analysis of cost variations. Controllership as a function in the business enterprise. Prerequisites, R230 and permission. (Offered on demand.)

BUSINESS STATISTICS: QUANTITATIVE ANALYSIS

- R200P Statistical Analysis (3)** **Brosky†**
A survey of the basic elements of descriptive statistics. An accelerated course, for graduate students only, to remove background deficiency in Business Statistics 201. Prerequisites, postgraduate standing with a senior year grade-point average of 3.00 and permission. (Offered Autumn, 1962.)

FINANCE

- R300P Business Finance (5)** **Vitro**
The role of financial institutions in meeting short-, intermediate-, and long-term credit needs of businesses and individuals. An accelerated course, for graduate students only, to remove background deficiency in 320 and 350. Prerequisites, postgraduate standing with a senior year grade-point average of 3.00 and permission. (Offered on demand.)
- R560 Seminar in Investments (3)** **Mueller†**
Selected topics in investments; exploration of new developments in security analysis; intensive student research in chosen areas. Prerequisite permission. (Offered Spring, 1963.)

GENERAL BUSINESS

- R441 Managerial Economics (3)** **Johnson†**
Analysis of factors affecting decisions within business firms. Motivation, inter-firm relationships, cost and pricing policies, are among subjects examined. Prerequisite, Business Statistics R301 or permission. (Offered Winter, 1963.)
- R570 Seminar in Business Research (3)**
Business research methods and techniques. Emphasis is placed on what business research is; how it is done, stressing the scientific method as a research procedure; and who does it. Sources of relevant information are covered. Students will carry out the formulation of a research project; defining the problem, pinpointing sources of information, selecting a method of approach. Prerequisite, permission. (Offered on demand.)
- R571-R572 Business Studies (3-3)**
Independent study in the field of business administration; critical evaluation of business analysis and research methods. Effective communication of ideas is emphasized. Methods and content of independent research studies being completed by the student are subjected to critical evaluation in seminar discussion. Prerequisites, R570 and approved research topic outline for R571-; R571- for -R572; R571-R572 open only to MBA nonthesis students. (Offered on demand.)

HUMAN RELATIONS IN BUSINESS AND INDUSTRY

- R400P Human Relations in Business and Industry (3)**
Cases are used to develop an understanding of human situations in business and industry. Useful skills and concepts are developed as aids in diagnosing and taking action. Prerequisites, postgraduate standing and permission. (This course not applicable to an advanced degree.) (Offered on demand.)

†Member of the University of Washington faculty in Seattle.

MARKETING

R300P Marketing, Transportation, and International Business:

An Integrative Analysis

Wheatley†

Analytical survey of institutions, functions, problems, and policies in the distribution of goods from producer to consumer. An accelerated course, for graduate students only, to remove background deficiency in R301. Prerequisites, postgraduate standing with a senior year grade-point average of 3.00 and permission. (Offered Summer, 1963.)

R522 Advanced Marketing Concepts (3)

Wheatley†

The interdisciplinary exchange of ideas related to marketing is studied. New marketing theories and evolving concepts of management are examined and critically appraised. Prerequisites, R520 or R521, and permission. (Offered Spring, 1963.)

POLICY AND ADMINISTRATION

R575 Human Aspects of Administration (3)

Administration process with primary focus on organizational behavior. Basic contributions of social science and other sources in formulation of administrative-organizational conceptual schemes. Administrative theory in relation to administrative practice. Prerequisite, permission. (Offered on demand.)

R576 Human Aspects of Administration (3)

Barnowe†

Basic contributions to administrative theory and practice made by past and current research, thought, and experience. Typically examines several major research studies, drawing on findings from psychology, sociology, social and cultural anthropology, business administration, government, and other sources. Prerequisite, permission. (Offered Autumn, 1962.)

R586 Seminar in Administrative Organization (3)

A reading, research, and discussion course in organization theory covering concepts of power, authority and influence, objectives and goals, decision and planning, communications, delegation and decentralization, and considerations of values, social issues, and future trends in organization. Research and theories in other fields, such as behavioral sciences and economics, will be related to business organization theory. Prerequisite, permission. (Offered on demand.)

R593, R594 Policy Determination and Administration (3,3)

Rosenzweig†

Analysis of policy problems faced by chief administrative officers of business firms. Determination of objectives; development of policies to achieve objectives; organization of executive personnel to implement policies; coordination of the organization; appraisal and adjustments to changes in environment. The course is intended to give a clearer insight not only into how business decisions are reached, but into the motivation of businessmen in deciding what to do under varying circumstances. Case study seminars with simulation (business gaming) included in R594. (It is recommended that these courses be scheduled toward the end of the student's course work.) Prerequisite, Master of Business Administration candidacy and permission for R593; R593 for R594. (R593 offered Winter, 1963. R594 offered on demand.)

PRODUCTION

R520 Seminar in Production (3)

Newell†

Research readings, and reports on current problems in the field, using a topical approach with emphasis on such areas as product research and development, plant location, equipment policies, materials and quality controls, and production planning and control. Prerequisite, permission.

COLLEGE OF ENGINEERING

CHEMICAL ENGINEERING

R486 Chemical Engineering Analysis (3)

Wilburn

An engineering course designed to increase the student's facility in solving problems with the aid of mathematics. The emphasis is placed on expressing physical problems in mathematical language and following through to obtain numerical solutions. Only a minimum time will be spent on methods of solving differential equations. Problems will be taken from fields of chemical engineering interest such as diffusional processes, heat transfer, fluid flow, thermodynamics, and kinetics. Prerequisite, permission. (Offered Autumn, 1962. Tentatively offered Autumn, 1963.)

R570 Introduction to Transport Phenomena (3)

Johnson

Derivation of general differential equations for transport of heat, mass, and momentum; kinetic theory of fluids and its application to transport phenomena based on molecular motion; methods for estimating transport coefficients in fluids. Prerequisite, undergraduate course in unit operations, or permission. (Offered Autumn, 1962. Tentatively offered Autumn, 1963.)

†Member of the University of Washington faculty in Seattle.

- R571 Heat Transfer I (3)** **Batch**
Steady and unsteady state conduction with emphasis on numerical methods. Radiation, design theory background and application to furnace design, convection, introductory concepts, methods for predicting coefficients, recent developments in theory, heat-exchanger design. Prerequisite, R570. (Offered Winter, 1963.)
- R573 Absorption and Extraction (3)** **Johnson**
A study of mass transfer, primarily in gaseous and liquid systems. From the basic theoretical principles of diffusion are developed the working equations of mass transfer which are subsequently used to obtain exact solutions to several types of diffusion problems of interest to the chemical engineer. The basic principles are next applied to obtaining an understanding of several diffusion processes such as absorption, extraction, ion exchange, and thermal diffusion. Prerequisites, R486 and R570. (Tentatively offered Winter, 1964.)
- R574 Fluid Mechanics (3)**
Mechanism of fluid flow. Total energy balance and Bernoulli's Theorem. Integration of the differential equations for motion of a fluid. Poiseuille, Fanning, and other equations. Turbulent flow and boundary-layer relationships. High velocity flow. Introductory design calculations. Prerequisites, undergraduate course in fluid mechanics or hydraulics, and R570. Offered on demand.
- R575 Advanced Chemical Engineering Thermodynamics (3)** **Platt**
Principles of thermodynamics. Applications to unit operations and to prediction of phase equilibria and chemical equilibria. Prerequisites, undergraduate course in chemical engineering thermodynamics and graduate standing, or permission. (Offered Winter, 1963.)
- R576 Heat Transfer II (3)** **Batch**
Continuation of R571. Prerequisites, R571 and R574. (Offered Spring, 1963.)
- R581 Kinetics and Catalysis (3)** **Platt**
Kinetics of homogeneous and heterogeneous systems, with emphasis on application of chemical engineering principles applied to the design of industrial development and production reactors. Prerequisite, R575. (Offered Spring, 1963.)
- R582 Advanced Topics in Mass Transfer (3)** **Johnson**
Theoretical and practical study of special batch and continuous multistage processes for separation of various substances, including isotopes. Ion exchange, chemical exchange, gas and thermal diffusion, chromatographic, electrophoretic, and other processes are considered. Prerequisite, R573 or permission. (Tentatively offered Spring, 1963.)
- R583 Advanced Topics in Chemical Engineering (1-3)** **Batch**
Discussions and readings of topics of current interest in the field of chemical engineering unit operations. Prerequisites, R574, R576, or permission. (Tentatively offered Spring, 1964.)

CIVIL ENGINEERING

- R584 Plastic Design of Structures (3)** **Merckx**
Concepts of plastic behavior, limit design, and shakedown are presented. Application to frame and shell structures is stressed. Prerequisite, R589. (Tentatively offered Spring, 1964.)
- R588 Analysis of Structures (3)** **Merckx**
Influence coefficients and matrix methods of analysis in analyzing frame types of structures. Castigliano's Theorem is applied to curved members. Prerequisites, Mathematics R322 and graduate standing, or permission. (Tentatively offered Autumn, 1963.)
- R589 Analysis of Structures (3)** **Merckx**
Influence coefficients and matrix methods of analysis applied to axially-symmetric structures. Membrane solutions and bending solutions for circular plates, circular cylinders, axially-symmetric shells, and rings are obtained for the influence coefficients. Prerequisite, R588. (Tentatively offered Winter, 1964.)

ELECTRICAL ENGINEERING

- R441 Linear System Analysis (3)**
Frequency and time domain properties of signals. Fourier methods for determining the response of linear systems. Transform methods and operational properties. Comparison of Fourier and Laplace transform methods. Prerequisite, 311 (Electric Transients) or permission. (Offered Autumn, 1962.)
- R478- Fundamentals of Automatic Control (0-)**
No credit allowed for R478- until -R479 has been completed satisfactorily. An introductory course presenting the basic methods of analysis of linear feedback systems. Subjects covered are: the Laplace Transform, transfer functions, frequency response, Root locus, stability criteria, and transient solutions. Prerequisite, degree in engineering, or permission. (Offered on demand.)
- R479 Fundamentals of Automatic Control (-4)**
Intermediate subjects in the field of feedback system analysis and synthesis. The subjects included are: performance criteria, synthesis to meet design criteria, the analysis of multi-loop systems, the relationship of frequency response to transient response, introduction to nonlinear systems and nonlinear analysis, and current topics. Prerequisite, R478-. (Offered on demand.)

- R505 Analysis of Random Processes (3)**
Probability Theory; discrete and continuous random variables; stochastic processes. Spectral analysis of random signals and noise. Introduction to Markov processes. Prerequisite, R441 or permission. (Offered Winter, 1963.)
- R586 Electrical Computing Methods (4)** **Wilburn**
Study of field models, analog and digital computers, and various special-purpose computers for solving electrical problems. Includes one three-hour laboratory per week. Prerequisite, graduate standing. (Offered Spring, 1963.)

MECHANICAL ENGINEERING

- R412 Engineering Economics (3)** **Lang**
A composite study of theoretical engineering economy presented in two categories. The first part covers economic principles and elementary accounting and corporate investment procedures including studies of money equivalents; amortization practices within present tax structure; capital requirements for process plants; and the relationship of costs, earnings, profits, and returns. The second part of the course will illustrate the techniques of applying these principles with emphasis on comparative annual costs, earning ratios, pay-out times, economic balance, and investment principles. Prerequisites, degree in engineering or permission. (Offered Autumn, 1962.)
- R521 Thermodynamics (3)**
An introductory course in graduate level thermodynamics. The course is designed to give the student an appreciation of classical thermodynamics and is taught primarily from the scientific rather than the engineering approach. Fundamentals, logic, and mathematics are stressed. This course will establish the principles for R522. Prerequisite, undergraduate course in thermodynamics or permission. (Tentatively offered Autumn, 1963.)
- R522 Thermodynamics (3)**
Thermodynamics of chemical reactions including the third law and equilibrium conversion. Analysis of the thermodynamics of fluid flow, heat transfer, and certain other processes. Prerequisite, R521. (Tentatively offered Winter, 1964.)
- R523 Thermodynamics (3)**
Analysis of heat power cycles including steam turbine cycle design, optimization of parameters, and effect of operational variables. The application of nuclear reactors as the heat source of the steam turbine cycle is covered in some detail. Prerequisite, R522. (Tentatively offered Spring, 1964.)
- R568 Vibrations (3)** **Morckx**
Single degree of freedom, including free vibrations undamped, free vibrations damped, forced vibrations (harmonic forcing); multidegree of freedom, including free vibrations (natural frequencies), forced vibrations of multidegree of freedom systems; use of energy techniques, including approximations of continuous systems (natural frequency). Prerequisite, senior standing or permission. (Offered on demand.)

METALLURGICAL ENGINEERING

- R361 Physical Metallurgy I (4)** **Bush, Tobin, Leggett**
An introduction to the fundamentals of physical metallurgy: classification of metals, the periodic table, atomic structure and interatomic relationships, crystallography of metals including Miller indices, single crystals, and polycrystals; alloys and alloying binary equilibrium diagrams, substitutional and interstitial solid solutions, and intermetallic compounds; the applications of the phase rate. Prerequisites, undergraduate physics. Graduate credit only toward a minor degree. (Offered Autumn, 1962.)
- R362 Physical Metallurgy II (4)** **Bush, Tobin, Leggett**
The physical metallurgy of iron and steel, preparation, atomic nature and allotropic change in iron; metastable binary phase diagrams, alloying behavior of iron, iron-graphite and iron-Fe₃C phase diagrams; equilibrium relations in plain carbon steels, the metallurgy of cast iron, reaction kinetics of phase transformations in steels, the mechanism of formation of subcritical substances; alloy steels; hardenability and hardenability concepts. Prerequisites, R361 or engineering metallurgy. (Offered Winter, 1963.)
- R363 Physical Metallurgy III (4)** **Bush, Tobin, Leggett**
Metallurgical phenomena of industrial importance: casting and solidification, heat and cold working, surface treatment of metals, joining, machining and powder metallurgy; equilibrium and non-equilibrium structures and phases; diffusion and diffusion dependent mechanisms such as recovery, recrystallization growth, aging and precipitation hardening; gases in metals; metal failure analysis. Prerequisite, R362. (Offered Spring, 1963.)
- R436 Metallurgical Thermodynamics (3)** **Bush**
Basic concepts of thermodynamics as applied to metallurgy. Particular emphasis will be given to physical metallurgical applications. First, second, and third laws of thermodynamics, fugacity, activity, and the equilibrium constant; thermodynamics of solutions. Prerequisites, undergraduate course in thermodynamics, Mathematics R322, or permission. (Offered on demand.)
- R447 Nuclear Metallurgy (3)** **Bush, Leggett, Tobin**
The behavior of fissionable and nonfissionable metals in a reactor environment, including the fundamental mechanisms for irradiation behavior of U. Prerequisite, course in elements or fundamentals of metallurgy, or permission. (Tentatively offered Autumn, 1963.)

- R450 Light Metals (3)** **Bush, Leggett, Tobin**
The metallurgy of aluminum, magnesium, titanium, and their alloys. Prerequisite, undergraduate courses in physical metallurgy or engineering physical metallurgy, or permission. (Offered on demand.)
- R470 Metallurgical Problems and Their Evaluation (3)** **Bush**
Metal specimens taken from objects that failed during service will be discussed and the samples presented to the student for evaluations. The student will present his evaluation in the form of a technical report. Prerequisites, R536 and R569. (Offered on demand.)
- R536 Advanced Metallurgical Thermodynamics (3)** **Bush**
Phase relations, homogenous and heterogeneous equilibria, free-energy-composition and temperature-pressure diagrams, and the iron carbon systems. Prerequisite, R436. (Offered on demand.)
- R537 Corrosion and Oxidation of Metals (3)** **Bush**
Basic corrosion and oxidation mechanisms for various metals with emphasis on those pertaining to stainless steels. Prerequisite, senior-level course in elements of physical metallurgy or permission. (Offered on demand.)
- R544 Irradiation Effects in Metals and Alloys (3)** **Bush, Leggett, Tobin**
Review of neutron induced damage in fissionable and nonfissionable metals and alloys. Influence of crystal structure, impurity atoms, phases on physical and mechanical properties based on current damage theories and empirical data. Interpretation of damage and understanding of damage mechanisms. Prerequisites, R569, Mathematics R322. (Tentatively offered Spring, 1964.)
- R547 Advanced Nuclear Metallurgy (3)** **Bush, Leggett, Tobin**
Damage mechanisms in nonfissionable metals as related to crystallographic structure and other significant properties. Prerequisite, R447. (Tentatively offered Winter, 1964.)
- R567, R568, R569 Advanced Physical Metallurgy (3, 3, 3)** **Bush**
Electron theory of metals; statistical thermodynamic approach to solid state reactions—order, disorder, phase transformations, diffusion, nucleation, and growth; theory of alloys (Hume-Rothery); metal interfaces; dislocation theory. Prerequisite, degree in metallurgical engineering or permission. (Offered on demand.)

NUCLEAR ENGINEERING

- R484 Introduction to Nuclear Engineering (4)** **Hofmann**
A course in nuclear engineering for seniors, graduate students, and practicing engineers; covering elements of reactor nuclear physics; elementary nuclear reactor theory; radiation shielding; materials of construction. Prerequisites, Mathematics R322, Physics R323. (Offered Spring, 1963. Tentatively offered Spring, 1964.)
- R485 Nuclear Instruments (3)**
A lecture and laboratory course devoted to the basic design and operation of the instruments used in nuclear engineering, such as badges, dosimeters, Geiger counters, proportional counters, survey meters, scalars, radiation monitors, scintillation spectrometers, etc. Experiments will demonstrate the characteristics of nuclear instruments and associated circuitry. Safety practices will be emphasized throughout the course. Prerequisite, R484. (Offered Autumn, 1962.)
- R486 Nuclear Power Plants (3)** **Heacock**
The design, operation, and maintenance of the nuclear power plant, architectural layouts, basic heat-power cycle components, and essential auxiliary equipment. A critical survey of existing, or proposed, nuclear power plants covering the range of power applications and reactor types with emphasis on those generating commercial electrical power. The effects of such specific requirements as capital costs, fuel cycle, space and weight on plant design, and equipment arrangement. Prerequisite, R484 or permission. (Tentatively offered Spring, 1964.)
- R501 Nuclear Reactor Theory Laboratory (3)** **Bennett**
A laboratory course in reactor physics using exponential piles, the Hanford Standard Pile, and analog computers. Experiments will include measurement of diffusion length, material buckling, and effective pile size; calibration of foils and neutron sources with an introduction to scintillation counting techniques; analog computer studies of reactor kinetics and control; measurement of danger coefficients and lattice parameters; and selected experiments according to class interests. Prerequisite, R506. (Offered Spring, 1963. Tentatively offered Spring, 1964.)
- R502-R503 Nuclear Engineering Laboratory (3-3)** **Schmid**
An advanced laboratory course centered around a 100-watt graphite reactor. Experiments will be performed utilizing the steady-state and dynamic characteristics of the reactor. Some experiments will also be performed employing the reactor as a source of radiation. Training in reactor startup and shutdown procedures and in instrumentation checkout and calibration is included in the course. Prerequisite, R501 or permission. (Offered Autumn, 1962 and Winter, 1963.)
- R505, R506 Nuclear Reactor Theory (3,3)** **Nichols**
A lecture course in nuclear reactor physics covering neutron production, reactions, and cycles; diffusion and slowing down of neutrons; theory of criticality of homogeneous and heterogeneous systems; reactor kinetics and control theory; and elements of perturbation theory. Prerequisites, R484, Mathematics R428 (Mathematics R427 and R429 recommended, but not required), and Physics R323 or R483. (Offered Autumn, 1962, Winter, 1963. Tentatively offered Autumn, 1963, Winter, 1964.)

R510 Nuclear Reactor Engineering (3)

An advanced course in engineering analysis of nuclear reactor systems. The course covers core design methods, heat generation and distribution in nuclear reactor systems, the removal and utilization of heat for power production, fuel cycles and processing of irradiated reactor fuels, shielding of nuclear radiations. Prerequisite, R506. (Offered Spring, 1963. Tentatively offered Autumn, 1963.)

R539 Nuclear Reactor Design (3)**Heacock**

A design laboratory course involving the synthesis of reactor theory, engineering analysis, material specifications, and economics to meet the design specifications for a complete nuclear reactor facility. Emphasis upon cycle analysis, hazards, arrangements, and requirements peculiar to nuclear reactor plants. Prerequisite, R510. (Offered on demand.)

R559 Control of Radioactive Wastes (3)**Schwendiman**

Sources of radioactive wastes in nuclear plants and other installations, permissible limits, safe methods for disposal, methods for reducing volumes and concentrations, sampling and analysis techniques, air and liquid stream monitoring, site selection as influenced by waste disposal criteria, release and consequence of radioactive isotopes during disastrous incidents. Prerequisite, Physics R323 or permission. (Offered Winter, 1963. Tentatively offered Winter, 1964.)

SCHOOL OF LIBRARIANSHIP**R510 Evaluation of Library Materials (4)****Orr**

Sources of information about books; criteria of evaluation for selection; evaluation of general reference materials; procedures of reader's services. (Offered on demand.)

R511 Library Materials in the Humanities and Social Sciences (3)**Orr**

Survey and evaluation of library resources in these fields. Included are reference tools, bibliographies, landmark books, and contemporary literature, with reference to the needs of different kinds of readers. Prerequisite, R510. (Offered on demand.)

R512 Library Materials in Science and Technology (3)**Orr**

Continuation of R511. Prerequisite, R510. (Offered on demand.)

R530 Organization of Library Materials: Theory and Principles (4)**Orr**

The organization of library materials for use; principles of cataloging, classification, and subject analysis; study of the Dewey Decimal and Library of Congress schemes of classification. (Offered Autumn, 1962.)

R531 Organization of Library Materials: Comparative Methods (4)**Orr**

Cataloging practices and methods employed to meet varying needs. Prerequisite, R530. (Offered Winter, 1963.)

R532 Organization of Library Materials: Advanced Problems (2)**Orr**

Cataloging of special materials; maps, music, microfilm, and rare books; special classification schemes. Prerequisite, R531. (Offered Spring, 1963.)

SCHOOL OF MEDICINE**RADIOLOGY****R400 Radiobiology (3)****Bair**

This course requires only a minimum background in chemistry and does not presume any prior study of biology. Chemical, biological, and genetic effects of irradiation on unicellular and multicellular organisms, tolerance and dosage limits, effect of internal emitters, radiological ecology. Prerequisites, degree in science or engineering, Physics R323, or permission. (Offered Autumn, 1962.)

R485 Radiation Dosimetry (4)**Roesch**

The measurement of radiation energy loss relationships in gases and solids; detection techniques and circuits; units; consideration of human exposure limits. Prerequisite, permission. (Offered Winter, 1963.)

BULLETIN • UNIVERSITY OF WASHINGTON

SCHOOL OF LAW

1962-1964

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter Bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

BULLETIN
UNIVERSITY OF WASHINGTON

General Series No. 980

April, 1962

Published twice monthly June, July, August, September, October, and monthly for the remainder of the year at Seattle, Washington, by the University of Washington. Entered as second-class matter December 18, 1947, at the post office at Seattle, Washington, under the Act of August 24, 1912.

CALENDAR*Dates in this Calendar are subject to change without notice.***SUMMER QUARTER, 1962****REGISTRATION PERIOD**

JUNE 4-JUNE 8 Registration for Summer Quarter

ACADEMIC PERIOD

JUNE 11—MONDAY First term begins
 JULY 4—WEDNESDAY Independence Day holiday
 JULY 18—WEDNESDAY First term ends
 JULY 19—THURSDAY Second term begins
 AUGUST 24—FRIDAY Second term ends

AUTUMN QUARTER, 1962**REGISTRATION PERIOD**

MAY 23-24 Advance Registration only for students in residence Spring Quarter, 1962. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.

JULY 15 Deadline for ALL new students to submit Applications for Admission with complete credentials.

SEPT. 20 All new first-year students must register in person.

SEPT. 21-25 Orientation program for first-year students.

SEPT. 25 In-Person Registration for new transfer students with at least full second-year standing. Also, In-Person Registration for former students not in residence Spring Quarter, 1962, and those attending Spring Quarter, 1962, who failed to complete Advance Registration. Former students may obtain Registration Permits by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Permits is August 15.***ACADEMIC PERIOD**

SEPT. 26—WEDNESDAY Instruction begins
 OCT. 2—TUESDAY Last day to add a course
 NOV. 12—MONDAY State Admission Day holiday
 NOV. 21-26 Thanksgiving recess (5:30 p.m. to 7:30 a.m.)
 DEC. 15—SATURDAY End of examination period

WINTER QUARTER, 1963**REGISTRATION PERIOD**

NOV. 7-9 Advance Registration only for students in residence Autumn Quarter, 1962. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.

JAN. 2-4 In-Person Registration for former students not in residence Autumn Quarter, 1962, and those attending Autumn Quarter, 1962, who failed to complete Advance Registration. Registration Permits may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Permits is December 1.*

ACADEMIC PERIOD

JAN. 7—MONDAY	Instruction begins
JAN. 11—FRIDAY	Last day to add a course
FEB. 22—FRIDAY	Washington's Birthday and Founder's Day holiday
MAR. 23—SATURDAY	End of examination period

SPRING QUARTER, 1963**REGISTRATION PERIOD**

FEB. 5-7	Advance Registration only for students in residence Winter Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
MAR. 26-28	In-Person Registration for former students not in residence Winter Quarter, 1963, and those attending Winter Quarter, 1963, who failed to complete Advance Registration. Registration Permits may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Permits is March 1.</i>

ACADEMIC PERIOD

APR. 1—MONDAY	Instruction begins
APR. 5—FRIDAY	Last day to add a course
MAY 30—THURSDAY	Memorial Day holiday
JUNE 14—FRIDAY	End of examination period
JUNE 15—SATURDAY	Commencement

SUMMER QUARTER, 1963**REGISTRATION PERIOD**

JUNE 10-14	Registration for Summer Quarter
------------	---------------------------------

ACADEMIC PERIOD

JUNE 17—MONDAY	First term begins
JULY 4—THURSDAY	Independence Day holiday
JULY 24—WEDNESDAY	First term ends
JULY 25—THURSDAY	Second term begins
AUGUST 30—FRIDAY	Second term ends

AUTUMN QUARTER, 1963**REGISTRATION PERIOD**

MAY 21-22	Advance Registration only for students in residence Spring Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
JULY 15	Deadline for ALL new students to submit Applications for Admission with complete credentials.
SEPT. 19	All new first-year students must register in person.
SEPT. 20-24	Orientation program for first-year students.

SEPT. 24

In-Person Registration for new transfer students with at least full second-year standing. Also, In-Person Registration for former students not in residence Spring Quarter, 1963, and those attending Spring Quarter, 1963, who failed to complete Advance Registration. Former students may obtain Registration Permits by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Permits is August 15.*

ACADEMIC PERIOD

SEPT. 25—WEDNESDAY

Instruction begins

OCT. 1—TUESDAY

Last day to add a course

NOV. 11—MONDAY

State Admission Day holiday

NOV. 27—DEC. 2

Thanksgiving recess (5:30 p.m. to 7:30 a.m.)

DEC. 14—SATURDAY

End of examination period

WINTER QUARTER, 1964**REGISTRATION PERIOD**

Nov. 5-7

Advance Registration only for students in residence Autumn Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.

DEC. 30—JAN. 2

In-Person Registration for former students not in residence Autumn Quarter, 1963, and those attending Autumn Quarter, 1963, who failed to complete Advanced Registration. Registration Permits may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Permits is December 1.*

ACADEMIC PERIOD

JAN. 6—MONDAY

Instruction begins

JAN. 10—FRIDAY

Last day to add a course

FEB. 22—SATURDAY

Washington's Birthday and Founder's Day holiday

MAR. 21—SATURDAY

End of examination period

SPRING QUARTER, 1964**REGISTRATION PERIOD**

FEB. 4-6

Advance Registration only for students in residence Winter Quarter, 1964. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that Quarter.

MAR. 24-26

In-Person Registration for former students not in residence Winter Quarter, 1964, and those attending Winter Quarter, 1964, who failed to complete Advance Registration. Registration Permits may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Permits is March 1.*

ACADEMIC PERIOD

MAR. 30—MONDAY

Instruction begins

APR. 3—FRIDAY

Last day to add a course

MAY 30—SATURDAY

Memorial Day holiday

JUNE 12—FRIDAY

End of examination period

JUNE 13—SATURDAY

Commencement

ADMINISTRATION**BOARD OF REGENTS**

MRS. A. SCOTT BULLITT, <i>President</i>	Seattle
ALBERT B. MURPHY, M.D., <i>Vice-President</i>	Everett
JOSEPH DRUMHELLER	Spokane
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima
HELEN E. HOAGLAND, <i>Secretary</i>	
DON H. WAGEMAN, <i>Treasurer</i>	

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN LEGGETT, Ph.D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>
GEORGE NEFF STEVENS, S.J.D.	<i>Dean of the School of Law*</i>
LEHAN K. TUNKS, J.S.D.	<i>Dean of the School of Law**</i>
RICHARD B. AMANDES, LL.M.	<i>Assistant Dean of the School of Law</i>

* Until Jan. 1, 1963.

** Effective Jan. 1, 1963.

SCHOOL OF LAW FACULTY

A single date following the name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present academic rank.

- Amandes, Richard B., 1958 (1960), *Assistant Dean; Associate Professor of Law*
(Legal Research and Writing, Appellate Arguments)
A.B., 1950, California (Berkeley); LL.B., 1953, University of California, Hastings College of the Law; LL.M., 1956, New York University. Admitted to practice in California and Washington.
- Cosway, Richard, 1958, *Professor of Law*
(Criminal Law and Procedure, Commercial Transactions, Creditors' Rights, Social Legislation)
A.B., 1935, Denison University; LL.B., 1942, Cincinnati. Admitted to practice in Ohio.
- Cross, Harry M., 1943 (1949), *Professor of Law*
(Property I, Property II, Equitable Remedies, Community Property)
B.A., 1936, Washington State; LL.B., 1940, Washington. Admitted to practice in Washington.
- Fletcher, Robert L., 1956 (1960), *Professor of Law*
(Property II, Constitutional Law, Trusts, Probate Practice)
A.B., 1939, LL.B., 1947, Stanford. Admitted to practice in Washington.

- Gallagher, Marian Could, 1944 (1953), *Professor of Law; Law Librarian*
(Legal Research and Writing)
B.A., 1935, B.A. in L.S., 1939, LL.B., 1937, Washington. Admitted to practice in Washington.
- Gose, J. Gordon, 1944 (1946), *Professor of Law*
(Business Associations, Income Taxation, Wills and Administration, Corporation Finance)
A.B., 1926, Whitman College; LL.B., 1929, Washington; LL.D., 1956, Whitman College. Admitted to practice in Washington.
- Harsch, Alfred, 1930 (1940), *Professor of Law*
(Income Taxation, Estate Planning, Legislation, State and Local Tax, Death and Gift Taxation)
A.B., 1926, LL.B., 1928, Washington; LL.M., 1940, Columbia. Admitted to practice in Washington.
- Henderson, Dan Fenno, 1962, *Research Professor and Director of the Law of Asian Countries Program*
(International Transactions, Comparative Law)
B.A., 1944, Whitman College; B.A., 1945, Michigan; LL.B., 1949, Harvard; Ph.D., 1955, California (Berkeley). Admitted to practice in Washington, California, Japan and Korea.
- Johnson, Ralph W., 1955 (1961) *Professor of Law*
(Property I, Agency, Natural Resources, Conveyancing)
Diploma, 1945, Lehigh; B.S. in Law, 1947, LL.B., 1949, Oregon. Admitted to practice in Oregon and Washington.
- Levy, Ernst, 1937 (1952), *Professor Emeritus of History, Political Science and Law*
LL.D., 1906, Berlin.
- Meisenholder, Robert, 1954, *Professor of Law*
(Agency, Business Associations, Civil Procedure II, Evidence, Federal Jurisdiction)
A.B., 1936, South Dakota; J.D., 1939, S.J.D., 1942, Michigan. Admitted to practice in South Dakota, New York and Ohio.
- Morris, Arval, 1955 (1961), *Professor of Law*
(Criminal Law and Procedure, Constitutional Law, Jurisprudence, Supreme Court Today)
B.A., 1951, Colorado College; M.A., 1952, LL.B., 1955, Colorado; LL.M., 1958, Yale. Admitted to practice in Colorado.
- Mucklestone, Robert S., 1961, *Lecturer in Law*
(Estate Planning)
B.S., 1953, LL.B., 1954, Washington. Admitted to practice in Washington.
- Nottelmann, Rudolph H., 1927 (1961) *Professor Emeritus of Law*
B.A., 1912, LL.D., 1952, Monmouth College; M.A., 1913, Illinois; LL.B., 1922, Yale.
- Peck, Cornelius J., 1954 (1958), *Professor of Law*
(Torts, Administrative Law, Labor Law, Labor Relations)
B.S., 1944, Harvard; Certificate, 1945, Harvard Business School; LL.B., 1949, Harvard. Admitted to practice in Massachusetts and Washington.
- Richards, John W., 1931 (1937), *Professor of Law*
(Torts, Damages, Admiralty, Evidence)
B.A., 1923, Wisconsin; LL.B., 1926, LL.M., 1930, S.J.D., 1931, Harvard. Admitted to practice in Wisconsin.
- Rieke, Luvern V., 1949 (1956), *Professor of Law*
(Contracts, Domestic Relations, Government Regulation of Business)

OBSERVANCE OF UNIVERSITY RULES AND REGULATIONS

It is the University's expectation that a student will follow University rules and regulations as they are stated in the Bulletins. In instances where no appeal procedure is spelled out and the student is persuaded that a special set of circumstances makes appeal reasonable, he may appeal the application of specific rules or regulations to the Office of the Dean of the School or College in which he is enrolled in the case of an academic matter, or to the Office of the Dean of Students in the case of a nonacademic matter. These offices will either render a decision on the appeal or refer the student to the proper office for a decision.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

GENERAL INFORMATION

GENERAL INFORMATION

THE SCHOOL OF LAW

THE SCHOOL OF LAW was established at the University of Washington in 1899. It is presently housed in Condon Hall, named after John T. Condon, the organizer and first dean of the Law School. The building is designed and constructed for the particular needs of a law school.

The School is a member of the Association of American Law Schools and is approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association.

OBJECTIVES AND METHODS OF INSTRUCTION

The objective of the faculty of the School of Law is to train young men and women for the practice of law anywhere in the United States, whether it be as advocate, counsellor, judge, or law teacher, in accordance with the highest traditions of professional responsibility. The study of law may also serve as the stepping-stone to a career in government, politics, or business. The curriculum and the methods of instruction are designed to develop in the student his highest potential, whatever may have been his reason for entering the school.

Since the problems of the individual litigant or client are at the same time a part of the larger problems of an enormously complex and competitive society, it is necessary in the training of effective practicing lawyers and judges to provide the widest possible perspective of history, economics, social sciences, and philosophy. It is essential that the student see and understand the law, not as a self-contained system designed primarily for the settlement of disputes between individuals, but as a decisive, if not the dominant, factor of social control in a society which is in constant flux. Thus the law is not, and cannot be, static. The man who is "learned in the law," as the old phrase put it, is still the one who has developed the ability to find sound solutions to new problems by developing and using, rather than merely echoing, the teachings of the past.

Methods of instruction vary with the instructor and the course. The basic materials are the actual decisions of appellate courts, supplemented by selected readings from other sources which shed light on the nature of judicial, administrative, and legislative processes. Classroom techniques encourage the student to rely upon his own initiative and to develop his powers of perception and communication.

The first two years of the curriculum are devoted to the study of basic courses and are required of all students. The third year is almost wholly elective, so that the student, in the light of his own developed interests, may delve more deeply into those subjects which he thinks will best suit his needs.

PROGRAM IN THE LAW OF ASIAN COUNTRIES

In the Winter Quarter of 1962, the School of Law established its program in the Law of Asian Countries. Supported by funds from the Ford Foundation, this program will place its initial research emphasis on the legal aspects of foreign investments, licensing, and trade, starting with Japan, and extending in due course to other Asian countries such as the Philippines, India, Malaya, and China.

Courses are offered on various aspects of the legal problems likely to be encountered in dealing with Asian affairs. The research and teaching programs are designed to develop materials not presently available to western legal scholarship and to meet the growing demand for lawyers and scholars trained in such matters.

LAW LIBRARY

The Law School Library contains over 144,000 volumes; included are decisions of all English and American courts of last resort and the reported decisions of all lower courts in the United States. Extensive collections of English, American, and colonial statutes are available, as are copies of all legal periodicals published in English.

In addition, the Law School Library has one of the best collections of Japanese law materials in the United States and other substantial Asian collections which are being augmented rapidly by use of new funds obtained from the Ford Foundation.

STATE AND FEDERAL COURTS

The School of Law is within a convenient distance of federal and state courts sitting in Seattle, and students can witness the trial of actual cases. The United States District Court is in session and tries cases almost continuously. The United States Court of Appeals for the Ninth Circuit holds a session in the city each year. The superior court for King County, the justice courts, the municipal court, and the juvenile court are in session throughout the school year. The Supreme Court of the State of Washington, at Olympia, is also within comparatively easy reach and provides opportunities for students to hear the argument of cases on appeal.

ADMISSION TO THE LAW SCHOOL

ADMISSION TO THE LAW SCHOOL

PRELEGAL EDUCATION

The School of Law does not prescribe a definite prelegal curriculum for its applicants. The wide range of lawyers' tasks and the difference in offerings from school to school preclude such an approach. However, there are certain goals which every prelegal student should keep before him in planning his college program. He should strive to acquire the ability to read, write, and speak the English language well; to gain a critical understanding of values and human institutions, political, economic, and social; and to understand and develop in himself creative power in thinking. Not only memory, but accomplishment in understanding, not just knowing, but knowing why and how, should be the objectives.

College advisers will help students decide what courses in their college or university will best accomplish these ends. The School of Law faculty will be glad to assist in program planning.

Because of the possibility of its being overlooked, we do suggest that a course in the general principles of accounting should be taken as a part of the prelaw work. See the Law School rule under "Accounting Requirement" below.

Since briefs, pleadings, and legal memoranda and other papers which law students are required to prepare and submit must be typewritten, we strongly urge all students to obtain a minimal skill in typing while an undergraduate. Law school and Washington State Bar examinations may be typed by those desiring to do so.

ACCOUNTING REQUIREMENT

An applicant should present evidence that he has successfully completed, with a grade of C or better, and has received college credit for a complete course in the general principles of accounting. Students are encouraged to fulfill this requirement before entering the School of Law. A student who has not successfully completed a course in accounting at the college level prior to admission to Law School must fulfill this requirement before starting his second year in the School.

UNDERGRADUATE DEGREE PROGRAMS FOR NONDEGREE APPLICANTS TO THE SCHOOL OF LAW

Students attending the University of Washington who are interested in entering the School of Law prior to obtaining a degree should make inquiry of the prelaw adviser of the College of Arts and Sciences or of the College of Business Administration as to possible programs which would permit the student to apply first year law courses towards the satisfaction of undergraduate degree requirements.

Students at other institutions should consult their prelegal advisers concerning similar programs in their schools.

The student's prelegal program should be planned with an eye to the Law School Admission requirements listed in the following paragraphs.

ADMISSION TO THE FIRST-YEAR CLASS

To meet the minimum requirements for admission to the first-year class in the School of Law, an applicant must:

Rule 1. Be of good moral character and at least eighteen years of age.

Comment. Good moral character is a requirement for admission to the Bar of every state in the United States. A character investigation is a routine part of the procedure for admission to the Bar. In some jurisdictions a preliminary character investigation is conducted when the applicant begins his work in law school; in other jurisdictions it is not made until the applicant applies for permission to take the Bar examination, or to take the Oath of Attorney.

The age limit is set to comply with the age requirement of most, if not all, jurisdictions for admission to the Bar.

Rule 2. Either (a) hold the degree of Bachelor of Arts or Bachelor of Science from a college or university of recognized standing, or (b) have successfully completed three-fourths of the work required for a bachelor's degree granted on the basis of a four-year period of residence in a college or university of recognized standing, with a scholarship average of at least 2.50 on a 4.00 basis. A nondegree applicant must have the registrar, dean, or department head submit directly to the School of Law a certificate stating that he has successfully completed three-fourths of the requirements for a degree, is in good standing, and is eligible to return.

Comment. This provision is technical. Since it is strictly enforced, an explanation of its exact meaning is in order.

1. *Recognized standing* means a college or university approved or conditionally or provisionally approved by the American Association of Collegiate Registrars and Admissions Officers.

2. *Quantity of prelegal work required.*

- a. *Degree applicants* must present a degree of Bachelor of Arts or Bachelor of Science, based upon a four-year period of residence in a college or university of recognized standing.

Work done in residence means work done in class in a college or university of recognized standing, as defined above. If done off the campus of such college or university, it means work done in a class meeting in regular sessions each week under the personal supervision and instruction of a member of the instructional staff of the college or university.

If the applicant is a degree candidate, a limited amount of correspondence work acceptable by a college or university of recognized standing may be included.

- b. *Nondegree applicants* must have successfully completed three-fourths of the work required for a bachelor's degree granted on the basis of a four-year period of residence in a college or university of recognized standing. Compliance with this requirement must be supported by a certificate stating that the applicant has successfully completed the requirement, is in good standing, and is eligible to return.

To meet this requirement the nondegree applicant must be able to demonstrate, and the officer certifying him to us should be satisfied, that the applicant is ready to advance into his fourth and final year, with nothing left to do but to complete the fourth-year requirements. For example, such an applicant would not meet this requirement unless,

(1) All high-school or other admission deficiencies, if any, had been satisfied.

(2) All lower-division (freshman and sophomore) requirements had been met, whether academic or nonacademic, whether scholastic or extra-curricular (such as ROTC, or physical education, or the like).

(3) All major and/or minor requirements up to and including the third year had been completed.

(4) He could, if he remained, complete the requirements for his bachelor's degree in one more year.

Before qualifying as a nondegree candidate three additional conditions must be met and should be considered by the certifying officer,

(1) The work must be *work done in residence* as defined in 2a, above.

(2) *No correspondence work whatsoever should be considered* in determining whether the applicant has successfully completed three-fourths of the work required for a degree, since we are not permitted to accept correspondence work from nondegree applicants.

(3) Not more than 10 per cent of the credits presented for admission shall be in *nontheory courses* in military science, hygiene, domestic arts, physical education, vocal or instrumental music, or courses without intellectual content of substantial value. This means that if the applicant's first three years are heavily loaded with such nontheory courses and light with respect to the substantive courses required for his major and minors, if any, he might not be able to show compliance with the three-fourths requirement even though he has accumulated three-fourths of the number of credits required for a degree. If a question arises as to whether a particular course is a nontheory course, we would be glad to discuss the matter with the interested college or university officials.

3. *Quality of Prelegal Work Required—Scholarship.*

a. *A degree applicant's* prelegal work must have been passed with a scholastic average at least equal to the average required for graduation from the institution granting the degree. It will be assumed that this requirement has been met upon presentation of evidence that the applicant holds a bachelor's degree from an accredited college or university, as defined above.

b. *The nondegree applicant* must have successfully completed his prelegal studies with at least a 2.50 scholarship average on a 4.00 basis. In testing his work for compliance, we require that the nondegree candidate must have obtained the required 2.50 scholastic average on (1) *all* work undertaken in his undergraduate curriculum, and (2) in addition, on *all* work undertaken excluding nontheory courses in military science, hygiene, domestic arts, physical education, vocal or instrumental music, or courses without intellectual content of substantial value.

For example, a student with a 2.50 or better average on *all* work undertaken by virtue of several high grades in nontheory courses such as physical education or vocal or instrumental music, but less than a 2.50 with such courses excluded, would not be eligible for admission under (b) of Rule 2 above. From the other side, a student with a 2.50 or better average on theory courses alone who has less than a 2.50 average on *all* work undertaken because of poor grades in nontheory courses is equally ineligible. The nondegree applicant must be consistently better than average.

Rule 3. Take the Law School Admission Test administered by the Educational Testing Service. *No application will be processed unless the applicant has taken this test no later than April of the year in which he desires to enter Law School.*

The tests are given at many points throughout the United States on specified dates in November, February, April, and August. Completed applications to take the test must be in the hands of the Educational Testing Service at least two weeks prior to the date set for any particular test. *This means that the applicant who has not taken, or made arrangements to take, this test by mid-March will not be eligible for admission to this Law School during the forthcoming school year.*

Application forms and brochures may be obtained by writing to the Educational Testing Service, Princeton, New Jersey, or may be picked up at the School of Law. The charge for this examination is \$10.00.

An applicant should indicate on the test application form that his score should be reported to the University of Washington School of Law.

No special preparation for this test is necessary. It is designed to measure intellectual and legal aptitudes rather than knowledge of any particular subject matter.

Comment. We urge all students who are considering a legal education to take this test by February of the year in which they plan to enter Law School. Delay in taking the test may jeopardize or eliminate an applicant's chances for admission to this or some other Law School during the next school year.

Rule 4. Have a Law School Prediction Index Score of at least 7 if a degree candidate, or 8 if a nondegree candidate, this score to be based upon the student's grade-point average and his Law School Admission Test score.

Comment. Until changed, and subject to change at any time by Faculty action, the Law School Prediction Index Score will be determined as follows:

The applicant will be given from 1 to 10 points for, and depending upon, his undergraduate grade-point average, and from 1 to 10 points for, and depending upon, his Law School Admission Test score. The two figures so ascertained, when added together, will give the applicant's Law School Prediction Index Score.

In order to determine Prediction Index scores, use the table below.

Law School Admission		Grade-Point Average
Test Score		(on a 4.00 basis)
L.S.A.T.	Points	G.P.A.
609 and above	10	3.32 and above
565 - 608	9	3.09 - 3.31
537 - 564	8	2.90 - 3.08
514 - 536	7	2.77 - 2.89
490 - 513	6	2.65 - 2.76
465 - 489	5	2.55 - 2.64
439 - 464	4	2.46 - 2.54
412 - 438	3	2.32 - 2.45
370 - 411	2	2.18 - 2.31
369 and below	1	2.17 and below

For example, a degree applicant with a grade-point average of 2.36 would earn 3 points. If his Law School Admission Test score was 415 he would earn 3 points. This applicant would not be eligible for admission to this Law School. If his Law School Admission Test had been 439 or higher, he would have earned 4 or more points, and he would be eligible under this rule. So also, had his Law School Admission Test score been 415, but his grade-point average been 2.46 or higher, he would have earned 4 or more points, and would be eligible for admission.

The nondegree candidate is held to a higher requirement. Since he must have at least a 2.50 grade-point average to start with, which will give him at least 4 points, he must score at least 439 on the Law School Admission Test to obtain the additional 4 points needed for eligibility. We are convinced from past experience that this higher requirement is justified. The nondegree applicant runs a greater risk in that if he fails to successfully complete his Law School program he has lost not only a year's time but also the degree which he could have earned had he remained an undergraduate.

Rule 5. 1. The prospective student must submit, before July 15, an application for admission on a form obtained from the University of Washington School of Law, 205 Condon Hall. See Rule 6.

2. Two official transcripts of all college work must be sent by the student's college or university *directly* to the School of Law; however, students applying for admission who last attended, or are attending, the University of Washington need have only one complete transcript forwarded directly to the School of Law. All records become a part of the official file. They will not be returned or duplicated.

3. Each applicant must submit two permanent passport-size facial photographs (approximately 2 x 2 inches) on or before date of registration.

Comment. Students should arrange to have their transcripts sent directly to the Law School. These arrangements should be made as early as possible. *However, we suggest that the student instruct the Registrar to delay mailing the transcripts until all grades and the degree, if any, upon which the applicant is relying for admission, are recorded.*

Rule 6. Time Limits.

To be eligible for consideration for enrollment in the Autumn Quarter:

(1) An application on the official form and complete credentials must be received at the School of Law by 5:00 p.m., July 15.

(2) Applicants whose records are incomplete and who must take summer work or finish work in progress to complete their requirements, if otherwise satisfactory, will be accepted, subject to the successful completion of this work within a time limit to be determined by the facts of the case.

Comment. The applicant should understand that this Rule will be enforced. It will not be waived. Failure to comply in any respect will mean the loss of a year. This rule is not arbitrary. It takes time to process an application. The applicant who is really interested in attending Law School need have no trouble with it. *Apply early.* Applicants who delay, or who come to the University before their credentials have been submitted, or before officially notified of acceptance, *do so at their own risk.*

ADMISSION WITH ADVANCED STANDING IN LAW

To qualify for admission with advanced standing, an applicant must meet the following minimum requirements.

1. Meet all of the requirements for admission to the first-year class in this Law School, except that if the applicant's Prediction Index is less than that required under Rule 4, Admission to the First Year Class, his application may be approved if he ranks in the upper half of the members of his law school class who advanced into the second or third year. If the applicant has not yet taken the Law School Admission Test (see Rule 3, Admission to the First-Year Class), he must do so. If he has taken the test, he should have his test score forwarded to this School by the Educational Testing Service. (See Rule 3.)

2. Be a student in good standing in a Law School which is a member of the Association of American Law Schools. The applicant must have the Dean of the Law School last attended forward *directly* to the School of Law a certification that the applicant is in good standing and eligible to return.

3. Have forwarded *directly* to the School of Law two official transcripts of all law work previously taken, in addition to two transcripts of all prelegal college study.

4. Forward a letter stating why he desires to transfer to this School of Law.

While transfers with advanced standing are accepted, it is generally advisable

for a student to complete his study of law at one school. Where the applicant has completed more than one year of law study, advanced standing will be permitted only in exceptional cases. Even though a student is otherwise acceptable, no credit will be given for courses in which he has received a grade lower than the graduation average required at his school (generally a C grade or its equivalent).

ADMISSION OF SPECIAL STUDENTS

A person who is not working for a degree and who is not planning a career in law may apply for admission as a special student. The applicant must be at least twenty-three years old, and his general education must entitle him to admission to the freshman class at the University of Washington. The number of those who can be granted this privilege is restricted. A special student must make application for admission in the same manner as first-year students.

ACCEPTANCE

All applicants whose application papers are complete will be notified by letter of the action taken on their applications. If accepted, they will be given an appointment date for their registration.

See Rule 6(2) above.

MEDICAL EXAMINATION

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions and to returning former students by the Registrar. This examination, which is required before a student may register, is taken at the student's expense. A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on campus.

VETERANS INFORMATION

ADMISSION OF VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Applications for and questions about government aid should be addressed to the Veterans Administration Regional Office.

WORLD WAR I OR II VETERANS

Under certain conditions a veteran of World War I or II who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges. See information under Fees, Extra Service Charges, and Rentals.

KOREAN VETERANS

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building. Educational allowance

payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

KOREAN CERTIFICATE

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses, as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established.

QUARTERLY CREDIT REQUIREMENTS FOR LAW STUDENTS (PUBLIC LAW 550)

12 credits.....	Full subsistence
8 to 11 credits.....	Three-fourths subsistence
6 to 7 credits.....	One-half subsistence
5 credits or less.....	Established tuition and fees or credits ÷ 14 × \$110.00, whichever is the lesser

Veterans planning to attend Law School during the summer should consult with the Veterans Division, Safety Division Building, regarding the credit requirements for subsistence.

TERMINATION OF TRAINING

A veteran *eligible* under Public Law 550 must complete his training by *eight* years after his release from active service, or by January 31, 1965, whichever is earlier.

DISABLED VETERANS

A veteran with a disability under Public Law 894 should contact a training officer in the nearest Veterans Administration Office approximately four weeks prior to registration.

CHILDREN OF DECEASED VETERANS

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for Education and Training issued to those eligible persons by the Veterans Administration is to be presented, along with the Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed.

Credit requirements for monthly subsistence for Public Law 634 students are the same as those listed for Public Law 550 students, however, Public Law 634 students may not be authorized for less than half-time subsistence.

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration except that new students must submit a \$50.00 advance payment of fees at the time they are admitted to the University. This advance payment is applied against the total tuition and fees collected from the student. The University reserves the right to change any of its fees and charges without notice.

The fee schedules for resident and nonresident students, appearing on pages 24 and 25, apply to the academic year (Autumn, Winter, and Spring Quarters).

EXEMPTIONS**Veterans of World Wars I or II**

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter or Evening Classes students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for reistration in order to prevent personal payment.

EXTRA SERVICE CHARGES

A registration service charge of \$15.00 is assessed those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by In-Person Registration by action of the Registration Appeal Board. A late registration charge of \$15.00 is assessed any student granted permission to register after the last registration day before the opening of Autumn, Winter, or Spring Quarters

FEES FOR RESIDENT STUDENTS

A resident is one who has been domiciled in Washington for at least a year immediately prior to registration.

Examples of Autumn, Winter, and Spring Quarter Fees for Various Types of Registration

Type of Registration	Tuition Fee	Incidental Fee	ASUW Fee* Autumn, Winter, and Spring Quarters	Total Fees Autumn, Winter, and Spring Quarters
Full-time students**	\$35.00	\$56.50	\$8.50	\$100.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	35.00	39.00	†	74.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time		56.50	8.50	65.00
Part-time (max. 6 credits)§		39.00	†	39.00

* Athletic admission ticket is optional for ASUW members. Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.

** A \$25.00 uniform rental is paid by students in Army and Air Force ROTC, refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.

† Optional; if membership in ASUW is desired, the ASUW fee should be added to the total fee as shown for this type of registration.

‡ See Exemptions above to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

by action of the Registration Appeal Board. A charge of \$5.00 is made Autumn, Winter, and Spring Quarters for each change of registration or change of section, or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University.

Athletic Admission Ticket (optional for ASUW members) 3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.

Military Uniform Rental 25.00
Paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.

Transcripts 1.00
One transcript is furnished without charge; the charge, payable in advance, is made for each additional copy.

Graduation Exercises Diploma 10.00
(If this is a second University of Washington bachelor's degree, the graduation exercises diploma is \$5.00.)

Physical Education Activities
(Per quarter: bowling, \$5.00; canoeing, \$3.00; golf instruction, \$1.50.)

REFUND OF FEES, CHARGES, AND RENTALS

All fees will be refunded in full if complete withdrawal is made during the first three calendar days of the quarter; one-half the amount will be refunded if withdrawal is made during the first thirty calendar days. Refunds are not made to students withdrawing under discipline.

FEES FOR NONRESIDENT STUDENTS

Prospective students are classified as nonresidents when their credentials come from schools outside Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

Examples of Autumn, Winter, and Spring Quarter Fees for Various Types of Registration

Type of Registration	Tuition Fee	Incidental Fee	ASUW Fee*	Total Fees
			Autumn, Winter, and Spring Quarters	Autumn, Winter, and Spring Quarters
Full-time students**	\$105.00	\$86.50	\$8.50	\$200.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	105.00	69.00	†	174.00
Ex-service personnel of World Wars I and II†				
(Chapter 46, Laws of 1945)				
Full-time	52.50	86.50	8.50	147.50
Part-time (max. 6 credits)§	52.50	69.00	†	121.50

* Athletic admission ticket is optional for ASUW members. Autumn, Winter and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.

** A \$25.00 uniform rental is paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.

† Optional; if membership in ASUW is desired, the ASUW fee should be added to the total fee as shown for this type of registration.

‡ See Exemptions on page 24 to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund, if payment was made by check.

ESTIMATE OF YEARLY EXPENSES

Tuition, Incidental, and ASUW Membership Fees

Resident students	\$300.00
Nonresident students	600.00

Initial cost of joining a fraternity or sorority is not included; this information may be obtained from the Interfraternity or Panhellenic Councils.

<i>Personal Expenses</i>	300.00
--------------------------	--------

SCHOLARSHIPS, LOANS, PRIZES, AND AWARDS

Applications for most grants are considered by the Law School Committee on Scholarships in July, at which time the applicants can more accurately reflect their probable summer earnings. There are some funds normally allocated to entering students for which applications must be submitted by March 1. To be considered for any grant, an applicant must have on file with the Law School his Law School Admission Test score.

It is suggested that potential applicants inquire of the Dean's Office at an early date for application forms and additional information concerning presently available scholarships, possible additional scholarships, or changes in the deadline dates.

ASIAN LAW SCHOLARSHIPS. Beginning with the academic year 1962-1963, the University of Washington School of Law will offer two scholarships in the amount of \$600 for beginning law students who have a language, international trade, or area background which would be useful in the study of the international legal problems of Japan, the Philippines, India, China, or other Asian countries.

It is expected that students receiving the scholarships would participate in the University of Washington School of Law Program in the Law of Asian Countries and would receive further and sustained financial support based on their progress in the program.

SCHOLARSHIPS

JAMES M. BAILEY MEMORIAL SCHOLARSHIP. Awards totaling \$500 to "outstanding students in law" are made during the summer for the following academic year by the trustees of Consolidated Charities. The awards are made on the basis of scholastic promise and achievement and financial need.

LAWRENCE BOGLE and CASSIUS E. GATES SCHOLARSHIP AWARD. An annual award of \$750 by the other members of the firm of Bogle, Bogle & Gates in honor of the named partners.

THE CARKEEK SCHOLARSHIP. The Vivian M. Carkeek scholarship fund of \$450 annually was established by the will of Florence L. Carkeek in memory of her husband's devotion to the ideals of justice and law.

DELTA THETA PHI-STORY SENATE FOUNDERS' SCHOLARSHIP FUND. This scholarship was established by Clarence W. Pierce, one of the founders of Delta Theta Phi-Story Senate. The income from the fund will be awarded each year as a scholarship to that member of Story Senate, Delta Theta Phi, having the highest cumulative two-year law school grade average.

FRANK E. HOLMAN LAW STUDENT GRANT. The Frank E. Holman Law Student Fund was established pursuant to an agreement between the Board of Regents and the partners of Mr. Holman in order to provide for annual grants in amounts to be determined annually under the terms of the agreement to students in the Law School on the basis of financial need, scholarship, aptitude for the law, and character. Prospective first-year students are eligible for consideration.

JUDGE ROBERT M. JONES MEMORIAL AWARD. Established by Mrs. Marjorie M. Jones in memory of her late husband to promote appreciation of the fundamental purposes of the American legal system and particularly the Constitution of the United States. The amount available each year is expected to be \$500 to be awarded to the law student or students best demonstrating this appreciation according to rules established each year.

KARR, TUTTLE, CAMPBELL, KOCH, AND GRANBERG SCHOLARSHIP. An award of \$300 established by the named Seattle law firm to a deserving student matriculated in the Law School. Consideration is to be given to demonstrated scholastic achievement, need, and good citizenship.

LAW WIVES ASSOCIATION OF UNIVERSITY OF WASHINGTON SCHOLARSHIP. A \$300 scholarship awarded annually by the Law Wives to a married law student for his second or third year based upon financial need.

MACDONALD, HOAGUE AND BAYLESS AWARD. Established by the named Seattle law firm as a grant to the applicant, for his third year in Law School, whose interests and activities inside and outside of Law School best meet criteria indicating civic responsibility and leadership. An award of \$600 is made in the Spring of the applicant's second year in Law School.

NATIONAL ASSOCIATION OF CLAIMANTS AND COMPENSATION ATTORNEYS (Washington Chapter). An annual award of \$200 to stimulate interest in the responsibility of attorneys in representing the injured and improving medical-legal relationships in the field of personal injury litigation.

SEATTLE-KING COUNTY BAR AUXILIARY SCHOLARSHIP. A scholarship awarded annually by the King County Bar Auxiliary to a third-year law student based upon need, scholarship, and character, with special emphasis on need.

UNIVERSITY TRAFFIC COURT JUDGE. A third-year law student appointed by the Dean on recommendation from the Faculty Committee on Scholarships. Any student in good standing is eligible but preference will normally be given to members of the Law Review or Legal Aid Program. \$25.00 monthly.

WASHINGTON TITLE INSURANCE COMPANY GRANT. An annual grant of \$350 established by the named company to a deserving law student, based upon need, scholarship, and performance in property law courses.

WILLIAM WALLACE WILSHIRE MEMORIAL SCHOLARSHIP FUND. This fund was established under the will of the late Fannie Belden Shepherd. The will provides that the net income from the fund shall be expended and disbursed in the form of scholarships to students enrolled in the School of Law, and that in awarding the scholarships "the Board of Regents shall be governed by the financial need, general character, and demonstrated scholastic ability of the applicants for such scholarships." The maximum amount awarded under any one scholarship is \$750. Prospective first-year students are eligible for consideration.

LOAN FUNDS

CLASS OF 1939 LOAN SCHOLARSHIP. The members of the class of 1939 have contributed a loan scholarship of approximately \$350 annually to be awarded to a

third-year student. The class requests that the recipient, though without legal obligation, expresses a willingness to replenish the fund when in the future his financial position makes it possible for him to do so.

HICKMAN LOAN FUND. A loan fund administered by the Peoples National Bank of Washington which is available to properly qualified young men from King County to further their education.

JUDGE RALPH OLSON MEMORIAL LOAN FUND. An emergency loan fund established for second- and third-year law students by Mrs. Olson and her sons through contributions of friends and associates in memory of Judge Olson.

DR. JOHN T. ROBSON LOAN FUND. A loan fund for law students established by John T. Robson, M.D., member of the Law Class of 1957.

ISABELLA MARGARET SCOTT MEMORIAL LOAN. A loan fund for deserving law students from the estate of Isabella M. Scott.

J. P. TONKOFF LOAN FUND. An emergency loan fund established in the name of Mr. Tonkoff, a Yakima lawyer, by a client preferring to remain anonymous, to express partially the appreciation and high regard in which his professional efforts are held.

UNIVERSITY SCHOLARSHIP AND LOAN FUNDS. University scholarships are granted on application and on a competitive basis. Usual requirements include scholarly achievement and promise, excellence of character, and financial need. The University also administers several funds from which loans are made to students who have successfully completed at least one quarter at the University. A handbook listing scholarships is available from the Office of the Dean of Students.

UNIVERSITY OF WASHINGTON LAW SCHOOL ALUMNI FUND. This fund, established and maintained through a program of annual giving by alumni, makes available money to students and the School to foster the aims of the School in such manner as a Board of Overseers of the fund may determine. A portion of the money is available for loans to qualified students, but ordinarily loan funds disbursed under the direction of the Law School Scholarships Committee are not available to first-year law students. Therefore, it is particularly important that the entering student make adequate provision for anticipated expenses during his first year.

PRIZES AND AWARDS

APPELLATE MOOT COURT. Each year the Student Bar Association sponsors an Appellate Moot Court Competition. It is designed to develop skill in research and brief writing and to encourage forensic ability. Prizes donated by law book publishing houses are awarded to the four finalists.

NATHAN BURKAN MEMORIAL COMPETITION. The American Society of Composers, Authors, and Publishers awards annually in each of the approved law schools of the country a first prize of \$150 and a second prize of \$50 for the best papers by graduating students on subjects within the field of copyright law.

THE CARKEEK PRIZE. The Vivian M. Carkeek prize of \$50 is awarded annually "for the best student contribution to the *Washington Law Review* on a point of Washington law or any point of peculiar interest to Washington attorneys."

THE W. G. McLAREN PRIZE. Awards of \$100 and \$50 are made annually to the first-year students submitting the best solutions to a problem in legal draftsmanship. The awards are presented by W. G. McLaren, a leading Seattle citizen and lawyer.

LAW WEEK AWARD. The United States *Law Week* Award, a prize of approximately \$100 value, is given to the graduating student in law who, in the judgment of the faculty committee, has made the most satisfactory scholastic progress in his final year. The award consists of a year's complimentary subscription to *Law Week*.

LEGAL AID BUREAU PROGRAM AWARD. An award made annually to a student participant in the Legal Aid Bureau Program for superior performance in the program.

IVOR LUSTY AWARD. An award of \$50 will be made annually to the third-year student who submits the best solution to a problem involving a security transaction in international trade. Interested students who are not enrolled in the course in Credit Transactions may receive a copy of the problem and appropriate instructions in the Dean's Office. The award is made by Ivor Lusty, a graduate of the School.

THE SEATTLE LIFE INSURANCE AND TRUST COUNCIL WILL CONTEST. During each academic year awards are made to the four law students who, in the opinion of the judges, draft the best will based on a stipulated set of facts. The prizes are \$350, \$250, \$150, and \$75.

UNIVERSITY OF WASHINGTON LAW SCHOOL ALUMNI SCHOLASTIC IMPROVEMENT PRIZES. Two prizes will be awarded annually, depending upon the availability of funds, one to a student entering the third year and one to a graduating student showing the greatest scholastic improvement in the second and third year, respectively.

THE PROGRAM IN LAW

THE PROGRAM IN LAW

THE LL.B. DEGREE

THE DEGREE OF BACHELOR OF LAWS (LL.B.) is conferred upon all regular students who have completed satisfactorily the prescribed course of study in residence, consisting of a minimum of 132 quarter credits in professional law subjects, including required courses, with a scholarship average of at least 68, extending over at least nine quarters.

GRADING

The grading system of the School of Law is as follows: 85-100=A; 77-84=B; 68-76=C; 60-67=D; 0-59=E.

A copy of the probation, drop, and reinstatement rules is distributed to each student the first day of instruction.

EXAMINATIONS

Examinations are conducted under an honor system administered by the Student Bar Association.

ATTENDANCE—THE ABSENCE RULE

Regular and punctual class attendance is required of every student. The right to take examinations, as well as the privilege of continuing in the Law School, is conditioned upon compliance with this rule.

STUDY PROGRAMS OFFERED

REGULAR PROGRAM FOR FULL-TIME STUDENTS

This program leads to an LL.B. degree at the end of three academic years, Autumn through Spring. Students are encouraged to follow this program whenever possible. It is the position of the faculty of the School of Law that no student can do justice to himself in the regular program if he is engaged in any substantial amount of outside employment or activities.

ACCELERATED PROGRAM

It is possible for a student to accelerate the date of his graduation by completing successfully a full program of study during the summers between his first and second, and second and third years in the School of Law. For example, under this program a student who enters the School of Law in the Autumn of 1962 will be able to graduate in December, 1964, and thus be eligible for the state bar examination in January, 1965. To accelerate, a student must have the approval of the Dean's Office. The School policy is to permit only those students whose grades at the end of the first year indicate that they have at least an average, as compared with a minimum, proficiency for the study of the law to undertake the accelerated program.

PART-TIME PROGRAMS

A systematic program for students who are unable to attend Law School on a full-time basis is available. The primary purpose of the program is to allow students who must maintain employment to attend Law School. Wherever and whenever possible, classes will be scheduled in the mornings, thus permitting students to obtain or continue afternoon and/or evening employment. The part-time program requires fifteen quarters of study over a four-year period. To finish on schedule, the student will be required to attend three summer sessions. His credit load per quarter will average slightly less than nine instead of the normal fifteen credits required of full-time students.

An intermediate program in which a student may average twelve hours per quarter for eleven quarters may also be arranged for students requiring less outside employment.

Students who start Law School on a part-time program are not permitted to switch to the full-time program without special permission of the Dean.

SUMMER SCHOOL

The Law School offers a limited number of courses for its own students who are qualified and who desire to accelerate, or who are following a prescribed part-time program, or who desire to take additional subject-matter and for students from other law schools who have completed at least one year of study and who wish to do additional work for credit in their respective schools.

Several of the courses offered deal with subjects in which local law is of unusual significance. These courses will be of particular interest to students from other schools who plan to practice in this state. The Summer School courses also afford opportunity for further study by practicing lawyers who desire systematic instruction in specialized areas of expanding significance.

Students with advanced standing who wish to transfer to this Law School as degree candidates and who desire to begin their study in the Summer Quarter must comply with the admission procedures set forth above.

CURRICULUM

The first and second years of law study are composed of a program of required courses. Except for Law 569, Office Management and Professional Responsibility, the third-year program is entirely elective.

FIRST YEAR

400	Contracts (4-3-3)	<i>Rieke, Shattuck</i>
410	Civil Procedure I (3)	<i>Stevens</i>
420	Criminal Law and Procedure (2-3)	<i>Cosway, Morris</i>

STUDENT ACTIVITIES AND SERVICES

STUDENT ACTIVITIES AND SERVICES

STUDENT ACTIVITIES

STUDENT BAR ASSOCIATION

The objectives of this organization are to promote useful activities among the students in the Law School; to foster a professional outlook on the part of such students; to promote and bring about contacts and cooperation between members of the association and members of the bar; to foster a close relationship between members of the association and members of the Law School faculty; and to carry on and promote activities for the best interest of its members, the faculty, and the School. The association sponsors an annual School banquet for members of the judiciary, the bar, the faculty, and the student body and their spouses and guests. Throughout the year, it sponsors other social functions, engages speakers to appear before the law student body, engages in intramural recreational activities, publishes a newspaper, conducts the School's moot court competition, and aids in the operation of the Legal Aid program.

Every student enrolled in the Law School is a member of this association. The elective officers—president, vice-president, secretary, and treasurer, together with two elected representatives from each class—comprise the executive board.

The Student Bar Association is affiliated with the American Law Student Association, which is sponsored by the American Bar Association.

LEGAL AID BUREAU PROGRAM

In cooperation with the Seattle-King County Bar Association and under the supervision of a faculty adviser, students of demonstrated ability in the second- and third-year classes are offered the opportunity of assignment to regular weekly office hours at the Legal Aid Bureau in Seattle. The services of the Bureau are available to persons who are unable to afford the services of an attorney. Students are given the fullest responsibility consistent with their experience and ability. They interview clients to determine the nature of their problems; after consulting with the Bureau director or the faculty adviser, they dispose of those cases which

require only advice; they conduct negotiations for settlements with opposing parties or their attorneys; and they prepare cases for litigation under the supervision of the Bureau director or one of a panel of volunteer attorneys, with whom they appear in court. The practical experience thus acquired and the honor which attaches to selection for membership in the program are of considerable assistance to the young attorney embarking on his professional career.

VOLUNTARY DEFENDER PROGRAM

Participation in the Voluntary Defender Program is limited to students in the second and third years who have completed the course in Criminal Law and Procedure. The function of the participants is to assist attorneys who have been appointed by the Superior Court of the State of Washington to defend persons charged with a crime who are unable to afford legal representation. The students assist the attorneys by investigating, doing research, and performing any other services required to prepare the case for trial. Participation in this program not only gives the student invaluable experience but also gives the attorney additional assistance to insure that every defendant in a criminal proceeding gets a fair trial and is adequately represented by counsel.

MOOT COURT PROGRAM

With the assistance and cooperation of the faculty, the Student Bar Association conducts an extensive moot court competition. Competing students research assigned problems, prepare appropriate briefs, and present oral argument before courts composed of judges, lawyers, and faculty members.

Each student is required to compete in one round during his first year in conjunction with the course in Legal Research and Writing; a second argument is required of all students in their second year. Additional voluntary rounds determine the moot court finalists, who present their arguments before Judges of the Supreme Court of the State of Washington. Prizes donated by law book publishers are awarded to the four finalists.

A team from the School of Law also participates annually in the unique International Moot Court Competition with a team from the Faculty of Law of the University of British Columbia.

ORDER OF THE COIF

The Order of the Coif is a national honorary legal society with a chapter at the University. The order encourages scholarship and the advancement of the ethical standards of the legal profession. Membership is restricted to students who have demonstrated outstanding scholarship, and who are within the upper ten per cent of the graduating class.

"WASHINGTON LAW REVIEW"

The *Washington Law Review* is a quarterly legal periodical. It is published by a student board consisting of approximately twenty-five select second- and third-year students under the direction of five student editorial officers and with assistance from the law faculty. The *Review* serves as a medium of expression for legal scholars and is devoted particularly to the interpretation, advancement, and harmonious development of the law. It contains scholarly articles by judges, lawyers, teachers, and authorities in related business and professional fields. Surveys and discussions, based on thorough research by student members of the board, of important court decisions and topics of concern and interest to members of the profession, are included.

The possibility of gaining admission to the *Law Review* staff provides students with an additional incentive to strive for high standards of performance during their first year in law school. In most cases, admission to *Law Review* is based upon the student's performance during his first year. Only a very limited number of students are admitted on the basis of their high scholastic performance during their second year.

A place on the student editorial board is an invaluable experience for professional life, and should be one of the goals of every law student. It provides opportunities to develop skill in research and expression beyond those available in normal classwork activity. As a member of the *Law Review* staff, the student will gain his first experience in solving both administrative and peculiarly legal problems through organized cooperative effort. *Law Review* membership affords a means by which the student can make a real contribution to the legal profession during his years at law school.

LEGAL FRATERNITIES

Three law fraternities are represented at the School of Law: Story Senate of Delta Theta Phi, Dunbar Chapter of Phi Alpha Delta, and Ballinger Inn of Phi Delta Phi International. Composed of and governed by law students, these fraternities serve to promote and develop comradeship, loyalty to the School and to the law, and an understanding of and devotion to the finest traditions of the legal profession.

ASSOCIATED STUDENTS

Membership in the Associated Students of the University of Washington, the central organization which conducts all student activities, is required of all regularly enrolled students. Through the ASUW Board of Control and its various committees and boards, students assume major responsibility in the government of student life. The ASUW helps to finance the programs of athletics, debates, concerts, lectures, and many other activities and facilities, including the University of Washington *Daily* and the Student Union Building.

STUDENT SERVICES

HOUSING

Information and applications for residence in University-owned housing for single persons may be obtained by writing to the Manager, Men's Residence Halls, 1201 N.E. Campus Parkway, Seattle 5, or to the Manager, Women's Residence Halls, University of Washington, Seattle 5. Preference in assignment to vacancies is given to students under twenty-one years of age until August 1; thereafter assignment are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

University regulations require that women students under twenty-one who do not live at home must live in approved group residences such as the Women's Residence Halls, sororities, and church-sponsored living groups. Other types of living arrangements must be reported to the Dean of Women and be approved by the student's parents or guardian.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings, however, must be consulted in person.

Teaching and research assistants and other part-time sub-faculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 23 Administration Building, for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

HEALTH SERVICES

The University maintains a health service and infirmary to help guard against infectious diseases and incipient ill health.

The infirmary receives bed patients at any hour and provides nursing care, medicines, and the attendance of a staff doctor up to one week each quarter free of charge. For a period longer than one week, a charge of \$2.00 a day is made. At their own expense, infirmary patients may consult any licensed physician in good standing.

Health and accident insurance for students is available at the time of registration.

GRADUATE PLACEMENT

The School maintains a placement service to assist students in finding legal positions upon graduation, and provides assistance to alumni who are seeking new associations. It also aids students in finding legal positions for the summer months. Of course, the securing of employment remains the ultimate responsibility of the individual. However, the experience of the recent past indicates that virtually all graduates can be suitably placed.

WORK PLACEMENT

There are available a limited number of part-time positions for student attendants in the Law School Library.

Part- and full-time work off campus may be obtained at the University Placement Office. Applications are accepted from students or graduates of the University and from the wives or husbands of University students. Application must be made in person after residence in Seattle has been established. Placement in jobs on the campus is handled by the Personnel Department and the ASUW Personnel Office.

LAW SCHOOL ALUMNI ASSOCIATION

The Alumni Association of the School of Law has been active since 1922. Originally an informal association of graduates of the School, the association was formally organized as a nonprofit corporation August 17, 1949, and is governed by elected officers independently of the School of Law.

The association is designed to give graduates information about the location and activities of the Law School alumni, as well as the current accomplishments, objectives, and problems of the School itself. Among its goals are keeping the law alumni in closer touch with each other in the practice of law and stimulating the younger practitioners to greater activity in their local and state bar associations. Committees of the association assist in placement of graduating students, relocation of graduates, and procurement of student loan funds and scholarships. Membership in the Alumni Association, on a dues-paying basis, is open to any graduate.

Association officers for the year 1961-62 are: Grant Armstrong, '29, Chehalis, president; Ralph Rogers, '34, Tacoma, vice-president; James Gay, '43, Seattle, treasurer; and Luvern V. Rieke, '49, Law School, executive secretary. Trustees: Lyle D. Keith, '32, Spokane; Frank A. Sheirs, '49, Port Orchard; Warren L. Shattuck, '34, Seattle; Jack Cunningham, '50, Centralia; Herbert Davis, '35, Prosser; Harold Lant, '32, Bellingham; and William Montgomery, '35, Seattle. Overseers of the Law School Alumni Fund: Robert H. Van Eaton, '49, Kirkland; Harwood A. Bannister, '40, Mt. Vernon; James B. Hovis, '50, Yakima; J. Guthrie Langsdorf, '35, Vancouver; Fred Crollard, '10, Wenatchee; Arthur Paulsen, '46, Tacoma; and Harry M. Cross, '40, Seattle.

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter Bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. **UNIVERSITY RULES AND REGULATIONS**, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. **HANDBOOK OF SCHOLARSHIPS**, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

BULLETIN
UNIVERSITY OF WASHINGTON
General Series No. 981
May, 1962

Published twice monthly June, July, August, September, October, and monthly for the remainder of the year at Seattle, Washington, by the University of Washington. Entered as second-class matter December 18, 1947, at the post office at Seattle, Washington, under the Act of August 24, 1912.

CALENDAR

Application for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

AUTUMN QUARTER, 1962

SEPT. 24—MONDAY	Instruction begins, Medicine III and IV, Term 1 (8 a.m.)
OCT. 1—MONDAY	Instruction begins, Medicine I and II (8 a.m.)
NOV. 12—MONDAY	State Admission Day holiday
NOV. 21—WEDNESDAY	Instruction ends, Medicine III
NOV. 23—FRIDAY	Instruction begins, Medicine III, Term 2 (8 a.m.)
NOV. 21-26	Thanksgiving recess (5 p.m. to 8 a.m.) Medicine I and II
NOV. 22	Thanksgiving holiday, Medicine III and IV
DEC. 15—SATURDAY	Instruction ends, Medicine IV (1 p.m.)
DEC. 17—MONDAY	Instruction begins, Medicine IV, Term 2 (8 a.m.)
DEC. 13-18	Examinations, Medicine I and II
DEC. 18—TUESDAY	Instruction ends, Medicine I and II (5 p.m.)
DEC. 22—SATURDAY	Christmas recess begins, Medicine III and IV (12:30 p.m.)
JAN. 2—WEDNESDAY	Christmas recess ends, Medicine III and IV (8 a.m.)

WINTER QUARTER, 1963

JAN. 7—MONDAY	Instruction begins, Medicine I and II (8 a.m.)
JAN. 30—WEDNESDAY	Instruction ends, Medicine III
JAN. 31—THURSDAY	Instruction begins, Medicine III, Term 3 (8 a.m.)
FEB. 22—FRIDAY	Washington's Birthday and Founder's Day holiday
MAR. 18-22	Examinations, Medicine I and II
MAR. 16—SATURDAY	Instruction ends, Medicine IV (5 p.m.)
MAR. 18—MONDAY	Instruction begins, Term 3, Medicine IV (8 a.m.)
MAR. 22—FRIDAY	Instruction ends, Medicine I and II (5 p.m.)

SPRING QUARTER, 1963

APR. 1—MONDAY	Instruction begins, Medicine I and II (8 a.m.)
APR. 2—TUESDAY	Instruction ends, Medicine III
APR. 3—WEDNESDAY	Instruction begins, Medicine III, Term 4 (8 a.m.)
MAY 30—THURSDAY	Memorial Day holiday
JUNE 10-14	Examinations
JUNE 14—FRIDAY	Instruction ends
JUNE 15—SATURDAY	Commencement

AUTUMN QUARTER, 1963

SEPT. 23—MONDAY	Instruction begins, Medicine III and IV, Term 1 (8 p.m.)
SEPT. 30—MONDAY	Instruction begins, Medicine I and II (8 a.m.)
NOV. 11—MONDAY	State Admission Day holiday
NOV. 20—WEDNESDAY	Instruction ends, Medicine III (1 p.m.)
NOV. 22—FRIDAY	Instruction begins, Medicine III, Term 2 (8 p.m.)
NOV. 20-25	Thanksgiving recess (5 p.m. to 8 a.m.)

Nov. 21	Thanksgiving holiday, Medicine III and IV
DEC. 14—SATURDAY	Instruction ends, Medicine IV (5 p.m.)
DEC. 16—MONDAY	Instruction begins, Medicine IV, Term 2 (8 p.m.)
DEC. 12-17	Examinations, Medicine I and II
DEC. 17—TUESDAY	Instruction ends, Medicine I and II (5 p.m.)
DEC. 21—SATURDAY	Christmas recess begins, Medicine III and IV (1 p.m.)
DEC. 30—MONDAY	Christmas recess ends, Medicine III and IV (8 a.m.)
JAN. 1—WEDNESDAY	New Year holiday, Medicine III and IV

WINTER QUARTER, 1964

JAN. 6—MONDAY	Instruction begins, Medicine I and II (8 a.m.)
JAN. 29—WEDNESDAY	Instruction ends, Medicine III
JAN. 30—THURSDAY	Instruction begins, Medicine III, Term 3 (8 p.m.)
FEB. 22—SATURDAY	Washington's Birthday and Founder's Day holiday
MAR. 16-20	Examinations, Medicine I and II
MAR. 14—SATURDAY	Instruction ends, Medicine IV (5 p.m.)
MAR. 16—MONDAY	Instruction begins, Medicine IV, Term 3 (8 a.m.)
MAR. 20—FRIDAY	Instruction ends, Medicine I and II (5 p.m.)

SPRING QUARTER, 1964

MAR. 30—MONDAY	Instruction begins, Medicine I and II (8 a.m.)
MAR. 31—TUESDAY	Instruction ends, Medicine III (1 p.m.)
APR. 1—WEDNESDAY	Instruction begins, Medicine III, Term 4 (8 a.m.)
MAY 30—SATURDAY	Memorial Day holiday
JUNE 8-12	Examinations
JUNE 12—FRIDAY	Instruction ends
JUNE 13—SATURDAY	Commencement

OBSERVANCE OF UNIVERSITY RULES AND REGULATIONS

It is the University's expectation that a student will follow University rules and regulations as they are stated in the Bulletins. In instances where no appeal procedure is spelled out and the student is persuaded that a special set of circumstances makes appeal reasonable, he may appeal the application of specific rules or regulations to the Office of the Dean of the School or College in which he is enrolled in the case of an academic matter, or to the Office of the Dean of Students in the case of a nonacademic matter. These offices will either render a decision on the appeal or refer the student to the proper office for a decision.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

ADMINISTRATION

BOARD OF REGENTS

MRS. A. SCOTT BULLITT, <i>President</i>	Seattle
ALBERT B. MURPHY, M.D., <i>Vice-President</i>	Everett
JOSEPH DRUMHELLER	Spokane
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima

HELEN E. HOAGLAND, *Secretary*

DON H. WAGEMAN, *Treasurer*

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN H. LEGGETT, Ph.D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>
GEORGE N. AAGAARD, M.D.	<i>Dean of the School of Medicine</i>

BOARD OF HEALTH SCIENCES

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
GEORGE N. AAGAARD, M.D.	<i>Dean of the School of Medicine; Chairman of the Board</i>
MAURICE J. HICKEY, M.D., D.M.D.	<i>Dean of the School of Dentistry</i>
SOLOMON KATZ, Ph.D.	<i>Dean of the College of Arts and Sciences</i>
JOSEPH L. MCCARTHY, Ph.D.	<i>Dean of the Graduate School</i>
JACK E. ORR, Ph.D.	<i>Dean of the College of Pharmacy</i>
MARY S. TSCHUDIN, R. N., Ph.D.	<i>Dean of the School of Nursing</i>
JEAN MILNE, <i>Secretary</i>	

OFFICERS OF THE SCHOOL OF MEDICINE

GEORGE N. AAGAARD, M.D.	<i>Dean</i>
RICHARD J. BLANDAU, M.D., Ph.D.	<i>Associate Dean</i>

JOHN R. HOGNESS, M.D. Associate Dean
MARY ADAMS, B.A. Assistant to the Dean

HEALTH SCIENCES ADMINISTRATIVE OFFICERS

JEAN ASHFORD, M.L. Acting Librarian
BOYD BALDWIN, M.A. Audio-Visual Coordinator
DERWIN R. DE MERS Business Manager
JAMES H. FARNSWORTH, M.S. Director of Scientific Stores
CLIFFORD L. FREEHE Television Coordinator
DONALD F. HISCOX, B.F.A. Administrative Assistant
GEORGE A. LEHMAN, B.S. Plant Engineer
TOMMY W. PENFOLD, D.V.M. Director of Vivarium
JESSIE W. PHILLIPS, B.F.A. Director of Medical Illustration
JAMES R. SISLEY, B.S. Director of Medical Instrument Shop
SEYMOUR STANDISH, JR., B.A. Assistant to the Chairman of the
Board of Health Sciences
STEPHEN E. NORD, B.A. Personnel

UNIVERSITY HOSPITAL ADMINISTRATIVE OFFICERS

LEROY S. RAMBECK, B.A. Hospital Administrator
JOHN R. HOGNESS, M.D. Medical Director
PHILIP J. GILLETTE, M.P.H. Assistant Hospital Administrator

FACULTY, SCHOOL OF MEDICINE

The following lists include all faculty members except those at the assistant and associate levels.

The first date following a name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present academic rank.

ADMINISTRATION

AAGAARD, George N., 1954
Dean of the School of Medicine
B.S., 1934, M.B., 1936, M.D., 1937,
Minnesota
BLANDAU, Richard J., 1949 (1955)
Associate Dean of the School of Medicine
A.B., 1935, Linfield College; Ph.D., 1939,
Brown; M.D., 1948, Rochester
HOGNESS, John R., 1951 (1959)
Associate Dean of the School of Medicine
and Medical Director of the University
Hospital
B.S., 1943, M.D., 1946, Chicago
NOLAN, Donald E., 1951
Administrative Consultant
M.D., 1936, Minnesota

SHERWOOD, Kenneth K., 1947
Administrative Consultant
B.S., 1923, B.M., 1925, M.D., 1926,
Minnesota

BASIC HEALTH SCIENCES

ANATOMY

BASSETT, David L., 1959
Professor of Anatomy
A.B., 1934, M.D., 1939, Stanford
BLANDAU, Richard J., 1949 (1951)
Professor of Anatomy; Assistant Dean,
School of Medicine
A.B., 1935, Linfield College; Ph.D.,
1939, Brown; M.D., 1948, Rochester

- BLEVINS, Charles E., 1962
Instructor in Anatomy
B.A., 1947, M.A., 1948, Stanford University; Ph.D., 1961, University of California
- BODEMER, Charles W., 1956 (1959)
Associate Professor of Anatomy
B.A., 1951, Pomona College; M.A., 1952, Claremont Graduate School; Ph.D., 1956, Cornell
- EVERETT, Newton B., 1946 (1957)
Professor of Anatomy; Chairman of the Department of Anatomy
B.S., 1937, M.S., 1938, North Texas State College; Ph.D., 1942, Michigan
- JENSEN, Lyle H., 1949
Professor of Anatomy, Administrative Officer
B.A., 1939, Walla Walla College; Ph.D., 1943, Washington
- LUFT, John H., 1956 (1958)
Associate Professor of Anatomy
B.A., 1949, M.D., 1953, Washington
- ODLAND, George F., 1955
Assistant Professor of Anatomy
M.D., 1946, Harvard
- RIEKE, William O., 1958
Assistant Professor of Anatomy
M.D., 1958, Washington
- ROOSEN-RUNGE, Edward C., 1952 (1959)
Professor of Anatomy
M.D., 1936, Hamburg (Germany)
- SKAHEN, Julia G., 1946
Associate Professor of Anatomy, Physiology and Biophysics
B.S., 1926, M.S., 1928, Washington; Ph.D., 1940, Chicago
- SUNDSTEN, John W., 1962
Instructor in Anatomy
A.B., 1956, Ph.D., 1961, University of California at Los Angeles
- WOOD, Richard L., 1959
Assistant Professor of Anatomy
B.A., 1950, Linfield College; Ph.D., 1957, Washington

RESEARCH APPOINTMENTS

- BOYDEN, Edward A., 1955 (1956)
Research Professor of Anatomy
A.B., 1909, A.M., 1911, Ph.D., 1916, Harvard
- RUMERY, Ruth E., 1955 (1960)
Research Assistant Professor of Anatomy
B.S., 1943, New Hampshire; M.S., 1947, Ph.D., 1952, Rochester

CLINICAL APPOINTMENTS

- DeMARSH, Quin B., 1947 (1955)
Clinical Associate Professor of Anatomy
B.S., 1935, Washington; M.S., 1937, M.B., 1939, M.D., 1940, Northwestern
- LASHER, Earl Parsons, 1946 (1955)
Clinical Assistant Professor of Anatomy
B.A., 1931, M.D., 1934, Cornell
- LINDAHL, Wallace W., 1947 (1953)
Clinical Instructor in Anatomy
B.S., 1933, Washington State; M.D., 1938, Northwestern
- SWARTZ, Edgar, 1950 (1955)
Clinical Instructor in Anatomy
A.B., 1942, Ohio; M.D., 1943, Cincinnati

BIOCHEMISTRY

- COX, David J., 1960
Instructor in Biochemistry
B.A., 1956, Wesleyan; Ph.D., 1960, Pennsylvania

- DAVIE, Earl W.
Associate Professor of Biochemistry
B.S., 1950, Ph.D., 1954, Washington
- FISCHER, Edmond H., 1953 (1956)
Professor of Biochemistry
Ph.D., 1947, Geneva (Switzerland)
- GOLDSWORTHY, Patrick D., 1952 (1957)
Lecturer in Biochemistry
A.B., 1941, M.A., 1947, Ph.D., 1952, California
- GORDON, Milton P., 1959
Associate Professor of Biochemistry
B.A., 1950, Minnesota; Ph.D., 1953, Illinois
- HANAHAN, Donald James, 1950 (1959)
Professor of Biochemistry
B.S., 1941, Ph.D., 1944, Illinois
- KAPLAN, Alex, 1960
Associate Professor of Biochemistry
A.B., 1932, California (Los Angeles); Ph.D., 1936, California
- KREBS, Edwin G., 1948 (1957)
Professor of Biochemistry
A.B., 1940, Illinois; M.D., 1943, Washington University
- NEURATH, Hans, 1950
Professor of Biochemistry; Chairman of the Department of Biochemistry
Ph.D., 1933, Vienna (Austria)
- THOMPSON, Guy A., Jr., 1960 (1962)
Instructor in Biochemistry
B.S., 1953, Mississippi State; Ph.D., 1959, California Institute of Technology
- WALSH, Kenneth A., 1959 (1962)
Assistant Professor of Biochemistry
B.Sc., 1951, McGill (Canada); M.S., 1953, Purdue; Ph.D., 1959, Toronto (Canada)
- WILCOX, Philip E., 1952 (1957)
Associate Professor of Biochemistry
B.S., 1943, California Institute of Technology; Ph.D., 1949, Wisconsin

RESEARCH APPOINTMENTS

- GABRIO, Beverly W., 1950 (1959)
Research Assistant Professor of Biochemistry
A.B., 1944, Lindenwood College; Ph.D., 1950, Rochester
- KELLER, Patricia J., 1955 (1956)
Research Associate Professor of Biochemistry
B.S., 1945, Detroit; Ph.D., 1953, Washington University
- KUMAR, Sampath K.S.V., 1961
Research Instructor
B.Sc.(Hons), 1953, Loyola College, Madras, India; Ph.D., 1958, Madras University
- POSNER, Jerome B., 1961
Research Instructor of Biochemistry
B.S., 1951, M.D., 1955, Washington
- STEIN, Eric A., 1954 (1958)
Research Assistant Professor of Biochemistry
Ph.D., 1954, Geneva (Switzerland)

MICROBIOLOGY

- CHAMBERS, Velma C., 1956 (1958)
Instructor and Research Instructor in Microbiology
R.N., 1937, Mercy Hospital; B.S., 1942, M.S., 1948, Ph.D., 1954, Washington
- DOUGLAS, Howard Clark, 1941 (1958)
Professor of Microbiology and Genetics
A.B., 1936, Ph.D., 1949, California
- DUCHOW, Esther A., 1940 (1954)
Instructor in Microbiology
B.S., 1934, M.S., 1952, Washington

- EVANS, Charles A., 1946
Professor of Microbiology; Chairman of the Department of Microbiology
B.S., 1935, B.M., 1936, M.D., 1937, Ph.D., 1942, Minnesota
- GROMAN, Neal B., 1950 (1958)
Associate Professor of Microbiology
B.S., 1947, Ph.D., 1950, Chicago
- HENRY, Bernard S., 1931 (1946)
Professor of Microbiology
B.S., 1925, M.A., 1926, Ph.D., 1931, California
- HOLLAND, John J., 1960 (1961)
Associate Professor of Microbiology
B.S., 1953, Loyola; Ph.D., 1957, California (Los Angeles)
- LANCASTER, Louis J., 1959
Instructor in Microbiology
B.S., 1952, Virginia Polytechnic Institute; M.D., 1956, Maryland
- NESTER, Eugene W., 1962
Instructor in Microbiology
B.S., 1952, Cornell; Ph.D., 1959, Western Reserve
- ORDAL, Erling J., 1937 (1957)
Professor of Microbiology
A.B., 1927, Luther College (Iowa); Ph.D., 1936, Minnesota
- SHERRIS, John C., 1959
Associate Professor of Microbiology; Director, Hospital Clinical Microbiology Laboratory
M.B., B.S., 1948, M.D., 1950, London
- SPOTTS, Charles R., 1963
Instructor in Microbiology
B.A., 1955, M.A., 1957, Ph.D., 1960, California
- WEISER, Russell S., 1934 (1949)
Professor of Microbiology (Immunology)
B.S., 1930, M.S., 1931, North Dakota State; Ph.D., 1934, Washington

RESEARCH APPOINTMENTS

- BINGHAM, Margaret N., 1956
Research Instructor in Microbiology
B.A., 1936, Stanford; M.D., 1940, Oregon
- OH, Jang O., 1960
Research Instructor in Microbiology
M.D., 1948, Severance Medical College (Korea); Ph.D., 1960, Washington
- PACHA, Robert E., 1961
Research Instructor in Microbiology
B.S., 1955, M.S., 1958, Ph.D., 1961, Washington
- RIDGWAY, George, 1956
Research Instructor in Microbiology
B.S., 1949, M.S., 1951, Ph.D., 1954, Washington
- WHITELEY, Helen R., 1953 (1961)
Research Associate Professor of Microbiology
B.A., 1942, California; M.S., 1947, Texas; Ph.D., 1951, Washington

CLINICAL APPOINTMENTS

- BRANCATO, Frank P., 1958
Clinical Instructor in Microbiology
B.S., 1948, Long Island; A.M., 1949, Boston; Ph.D., 1952, Washington State
- VENNESLAND, Kirsten, 1954
Clinical Instructor in Microbiology
B.S., 1934, M.D., 1942, Chicago

PATHOLOGY

- ALVORD, Ellsworth C., Jr., 1960 (1962)
Professor of Pathology
B.S., 1944, Haverford College; M.D., 1946, Cornell

- BENDITT, Earl P., 1957
Professor of Pathology; Chairman of the Department of Pathology
B.A., 1937, Swarthmore; M.D., 1941, Harvard
- BROWN, David V., 1951 (1960)
Associate Professor of Pathology
B.A., 1935, Reed College; M.D., 1939, Oregon
- HOUGIE, Cecil, 1960
Associate Professor of Pathology
M.R.C.S. (England), L.R.C.P. (London), 1945; M.B., B.S., 1946, University of London
- LAGUNOFF, David, 1960 (1962)
Assistant Professor of Pathology
M.D., 1957, University of Chicago
- MARTIN, George M., 1957 (1960)
Assistant Professor of Pathology
B.S., 1949, M.D., 1953, Washington
- MOTTET, N. Karle, (1959) 1961
Associate Professor of Pathology
B.S., 1947, Washington State; M.D., 1952, Yale
- PREHN, Richmond T., 1958 (1960)
Associate Professor of Pathology
M.D., 1947, Long Island College of Medicine
- REICHENBACH, Dennis D., 1961
Instructor in Pathology
B.S., 1955; M.D., 1958, University of Washington
- ROSS, Russell, 1962
Assistant Professor of Pathology and Oral Pathology
A.B., 1951, Cornell University; D.D.S., 1955, Columbia University; Ph.D., 1962, University of Washington
- SMUCKLER, Edward A., 1961
Instructor in Pathology
A.B., 1952, Dartmouth College; M.D., 1956, Tufts University
- SREEBNY, Leo M., 1957 (1961)
Professor of Oral Pathology and Pathology
D.D.S., 1945, Ph.D., 1954, Illinois
- WIEGENSTEIN, Louise, 1948 (1953)
Instructor of Pathology (Part-time)
B.S., 1938, Simmons College; M.D., 1946, Tufts

RESEARCH APPOINTMENTS

- ERIKSEN, Nils, 1949 (1957)
Research Assistant Professor of Pathology
B.S., 1939, Ph.D., 1944, Washington
- PRIEST, Robert E., 1957 (1960)
Research Assistant Professor of Pathology
B.A., 1950, Reed College; M.D., 1954, Chicago
- SHAW, Cheng-Mei, 1960 (1962)
Research Assistant Professor of Pathology
M.D., 1950, National Taiwan University School of Medicine
- WATTS, Ruth M., 1957 (1961)
Research Instructor of Pathology
B.S., 1921, Washington; M.S., 1925, Yale; Ph.D., 1930, Chicago

CLINICAL APPOINTMENTS

- BITAR, Emmanuel, 1949
Clinical Instructor in Pathology
B.S., 1935, Washington; M.D., 1939, Oregon
- BONIFACI, Robert W., 1962
Clinical Instructor of Pathology
M.D., 1949, Tufts College
- BUSTEED, Frank F., 1962
Clinical Instructor of Pathology
B.A., 1948, British Columbia; M.D., 1952, Washington

- CREIGHTON, S. Allison, 1949 (1958)
Clinical Assistant Professor of Pathology
B.S., 1930, New Brunswick; M.D.,
C.M., 1935, McGill (Canada)
- EGGERTSEN, Burton S., 1962
Clinical Instructor in Pathology
B.S., 1947, University of South Dakota;
M.D., 1949, Southwestern Medical
College, University of Texas
- ELLIS, Ralph C., 1961
Clinical Assistant Professor of Pathology
M.D., 1937, University of Kansas
- GIEDT, Walvin R., 1962
Clinical Instructor of Pathology
B.Sc. in Med., 1933, University of South
Dakota; M.D., 1937, University of
Chicago (Rush)
- GRIFFITH, Paul C., 1954 (1960)
Clinical Assistant Professor of Pathology
A.B., 1941; M.D., 1943, University of
Nebraska
- HABERMAN, Clayton R., 1954 (1959)
Clinical Instructor in Pathology
B.S., 1947, M.D., 1949, Wisconsin
- HOLYOKE, John B., 1955
Clinical Assistant Professor of Pathology
B.S., 1937, M.D., 1940, Nebraska
- HOLMES, Elizabeth J., 1960
Clinical Instructor in Pathology
B.A., 1949, Stanford University; M.D.,
1954, Women's Medical College of
Pennsylvania
- JENSEN, Clyde Reynolds, 1947
Clinical Assistant Professor of Pathology
A.B., 1923, Dartmouth; M.D., 1925,
Rush Medical College
- JONES, Hugh Warren, 1949 (1958)
Clinical Assistant Professor of Pathology
B.S., 1934, M.D., 1938, Arkansas
- KNUDTSON, Kenneth P., 1953
Clinical Assistant Professor of Pathology
B.S., 1938, M.D., 1941, Wisconsin
- LARSON, Charles P., 1947 (1948)
Clinical Assistant Professor of Pathology
B.A., 1931, Gonzaga; M.D., C.M.,
1936, McGill (Canada)
- LAZERTE, Gordon D., 1958 (1961)
Clinical Assistant Professor in Pathology
M.D., 1948, Tufts
- LUND, Paul K., 1947
Clinical Assistant Professor of Pathology
B.A., 1934, Carleton College; M.D.,
C.M., 1940, McGill (Canada)
- MARSHALL, Charles E., 1959
Clinical Instructor in Pathology
M.D., 1940, Australia; D.C.P., 1952,
London University
- MASON, David G., 1947 (1949)
Clinical Assistant Professor of Pathology
B.A., 1930, M.D., 1935, Oregon
- POWELL, Clermont S., 1954 (1961)
Clinical Assistant Professor of Pathology
M.D., 1948, Jefferson Medical College
- RICKER, Walter A., 1946 (1954)
Clinical Associate Professor of Pathology
M.D., 1939, Marquette
- SCHULDBERG, Irving I., 1953 (1958)
Clinical Assistant Professor of Pathology
B.A., 1937, M.D., 1940,
Southern California
- TESLUK, Henry, 1956
Clinical Instructor in Pathology
A.B., 1941, M.D., 1943, Cornell
- THORSON, Theodore A., 1952 (1959)
Clinical Assistant Professor of Pathology
M.D., 1950, Washington

PHARMACOLOGY

- DILLE, James Madison, 1946
*Professor of Pharmacology; Chairman
of the Department of Pharmacology*
B.S., 1930, M.S., 1933, Nebraska;
Ph.D., 1935, Georgetown; M.D., 1946,
Illinois
- ELDER, John T., 1957
Instructor in Pharmacology
B.S., 1953, M.S., 1955, Massachusetts
College of Pharmacy; Ph.D., 1959,
Washington
- HOLLIDAY, Audrey R., 1957 (1959)
Assistant Professor in Pharmacology
B.A., 1945, Oregon; M.S., 1949, Ph.D.,
1957, Washington
- HORITA, Akira, 1954 (1961)
Associate Professor of Pharmacology
B.A., 1950, M.S., 1951, Ph.D., 1954,
Washington
- LOOMIS, Ted Albert, 1947 (1957)
*State Toxicologist; Professor of
Pharmacology*
B.S., 1939, Washington; M.S., 1941,
Ph.D., 1943, Buffalo; M.D., 1946, Yale
- MAGEE, Donal F., 1951 (1962)
Professor of Pharmacology
B.A., 1944, M.A., B.M., B.Ch., 1948,
Oxford (England); Ph.D., 1952, Illinois
- WEST, Theodore C., 1949 (1959)
Associate Professor of Pharmacology
B.S., 1948, M.S., 1949, Ph.D., 1952,
Washington

RESEARCH APPOINTMENTS

- THIERSCH, John B., 1950 (1954)
*Research Associate Professor of
Pharmacology*
M.D., 1935, Bern (Switzerland); M.D.,
1935, Freiburg (Germany); Med.
Habl., 1938, Adelaide (Australia);
M.D., 1951, Washington

PHYSIOLOGY AND BIOPHYSICS

- BROWN, Arthur C., 1960
Instructor in Physiology and Biophysics
B.A., 1948, M.S., 1954, Chicago; Ph.D.,
1960, Washington
- FINLEY, Theodore N., 1961
*Assistant Professor of Physiology and
Biophysics and Anesthesiology*
M.D., 1954, Johns Hopkins Medical School
- GLICKSTEIN, Mitchell, 1962
*Assistant Professor of Physiology and
Biophysics and Psychology*
B.A., 1951, Ph.D., 1958, Chicago
- KENNEDY, Thelma T., 1958 (1961)
*Assistant Professor of Physiology and
Biophysics*
Ph.B., B.S., 1947, M.S., 1949, Ph.D.,
1955, Chicago
- PATTON, Harry D., 1947 (1956)
Professor of Physiology and Biophysics
B.A., 1939, Arkansas; Ph.D., 1943, M.D.,
1946, Yale
- RANCK, James B., Jr., 1961
Instructor in Physiology and Biophysics
B.A., 1952, Haverford College; M.D.,
1955, Columbia
- RUCH, Theodore C., 1946 and 1961
*Professor of Physiology and Biophysics
and Chairman of the Department of
Physiology and Biophysics; Director,
Regional Primate Research Center at the
University of Washington*
B.A., 1927, Oregon; M.A., 1928, Stanford;
B.A., 1930, B.Sc. Oxon., 1932, Oxford
(England); Ph.D., 1933, Yale

- RUSHMER, Robert F., 1947 (1956)
Professor of Physiology and Biophysics
B.S., 1936, Chicago; M.D., 1939, Rush
Medical College
- SCHER, Allen M., 1950 (1962)
Professor of Physiology and Biophysics
B.A., 1942, Ph.D., 1951, Yale
- SKAHEN, Julia G., 1946 (1961)
*Associate Professor of Physiology and
Biophysics and Anatomy*
B.S., 1926, M.S., 1928, Washington;
Ph.D., 1940, Chicago
- SMITH, Orville A., 1958 (1959)
*Assistant Professor of Physiology and
Biophysics; Assistant Director of
Regional Primate Research Center at the
University of Washington*
B.A., 1949, Arizona; M.A., 1950, Ph.D.,
1953, Michigan State
- TOWE, Arnold L., 1953 (1962)
*Associate Professor of Physiology and
Biophysics*
B.A., 1948, Pacific Lutheran College;
Ph.D., 1953, Washington
- WIEDERHIELM, Curt A. R., 1961
Instructor in Physiology and Biophysics
Karolinska Institutet, 1947; Ph.D., 1961,
Washington
- WOODBURY, J. Walter, 1950 (1962)
Professor of Physiology and Biophysics
B.S., 1943, M.S., 1947, Ph.D., 1950, Utah
- YOUNG, Allan C. 1949 (1960)
Professor of Physiology and Biophysics
B.A., 1930, M.A., 1932, British Columbia
(Canada); Ph.D., 1934, Toronto
(Canada)

RESEARCH APPOINTMENTS

- BRAND, Edmund H., 1953 (1956)
*Research Instructor in Physiology and
Biophysics*
B.S., 1947, Pacific
- KOCH, Alan R., 1957 (1961)
*Research Assistant Professor of Physiology
and Biophysics*
B.S., 1951, Michigan; Ph.D., 1955,
Columbia

PREVENTIVE MEDICINE

- ALEXANDER, E. Russell, 1961
*Assistant Professor of Preventive Medicine
and Pediatrics*
Ph.B. 1948, S.B., 1950; M.D., 1953,
Chicago
- BENNETT, Blair M., 1950 (1962)
*Associate Professor of Preventive
Medicine*
A.B., 1938, Georgetown; M.A., 1941,
Columbia; Ph.D., 1950, California
- FREMONT, Joseph C., 1961
Assistant in Preventive Medicine
B.S., 1957, M.D., 1959, Illinois
- GRAYSTON, J. Thomas, 1960
*Professor of Preventive Medicine and
Chairman, Department of Preventive
Medicine*
B.S., 1947, M.D., 1948, M.S., 1952,
Chicago
- HATLEN, Jack B., Jr., 1952 (1958)
Instructor in Preventive Medicine
B.S., 1949, M.S., 1958, Washington
- MARTIN, Harry B., 1961
*Associate Professor of Preventive Medicine
and Director, Environmental Research
Laboratory*
B.A., 1943, Washington; M.D., 1949,
Johns Hopkins
- MERRITT, James E., 1961 (1962)
Instructor in Preventive Medicine
B.A., 1949, M.S.W., 1951, Washington

- MILLS, Caswell A., 1954 (1960)
*Assistant Professor of Preventive
Medicine and Associate Professor of
Men's Physical Education*
B.A., 1935, Minot State Teachers College;
M.A., 1943, Ph.D., 1959, Washington
- REEVES, G. Spencer, 1950
*Associate Professor of Preventive Medicine
and Men's Physical Education*
B.S., 1933, M.S., 1937, Oregon; M.P.H.,
1951, California
- STANDISH, Seymour M., Jr., 1956
*Lecturer in Preventive Medicine and
Assistant to the Chairman, Board of
Health Sciences*
B.A., 1942, Washington

RESEARCH APPOINTMENTS

- BOATMAN, Edwin S., 1961
Research Associate in Preventive Medicine
B.S., 1950, B.S., 1952, British
Post-graduate Medical School; M.S.,
1961, Washington
- BREYSSSE, Peter A., 1957
*Research Instructor in Preventive
Medicine*
B.S., 1952, Idaho; M.S., 1954, Washington
State; M.P.H., 1957, Pittsburgh
- JENKIN, Howard M., 1961
*Research Assistant Professor of Preventive
Medicine*
B.S., 1949, Wisconsin; Ph.D., 1960,
Chicago
- KENNY, George E., 1961
*Research Instructor in Preventive
Medicine*
B.S., 1952, Fordham; M.S., 1957, North
Dakota; Ph.D., 1961, Minnesota
- SOPER, Maxine S., 1961
Research Associate in Preventive Medicine
B.Sc., 1952, Minnesota

CLINICAL APPOINTMENTS

- AGER, Ernest A., 1962
Clinical Instructor in Preventive Medicine
B.S., 1947, M.B., 1951, M.D., 1952;
M.P.H., 1960, Minnesota
- BRYAN, Elizabeth, 1961
Clinical Instructor in Preventive Medicine
B.A., 1932, M.D., 1937, Western Reserve
- BUCOVE, Bernard, 1957 (1961)
*Clinical Associate Professor of Preventive
Medicine*
M.D., 1937, D.P.H., 1946, Toronto,
Canada
- DEISHER, Robert W., 1954 (1962)
Clinical Professor of Preventive Medicine
B.A., 1941, Knox College (Illinois); M.D.,
1944, Washington University
- FISH, John O., 1960
Clinical Instructor in Preventive Medicine
B.S., 1949, Washington; M.P.H., 1959,
Michigan
- GIEDT, Walvin R., 1948
Clinical Instructor in Preventive Medicine
B.S., 1933, South Dakota; M.D., 1937,
Rush Medical College; M.P.H., 1941,
Johns Hopkins
- HALL, Nora Page, 1950 (1961)
*Clinical Instructor in Preventive
Medicine*
B.S., 1937, Washington State; M.P.H.,
1950, California
- HANKS, Thrift G., 1952 (1961)
*Clinical Associate Professor of Preventive
Medicine*
B.S., 1934, M.S., M.D., 1939, Illinois

- LANE, H. Wallace, 1957 (1962)
Clinical Assistant Professor in Preventive Medicine
AB., 1933, M.A., 1935, M.D., 1939, Kansas; M.P.H., 1951, Johns Hopkins
- LEHMAN, Sanford P., 1951
Clinical Assistant Professor of Preventive Medicine
B.S., 1928, Wooster College; M.D., 1934, Cincinnati; M.P.H., 1941, Michigan
- LESTER, Charles N., 1962
Clinical Instructor in Preventive Medicine
B.A., 1928, M.D., 1934, Colorado; M.P.H., 1960, California
- MYKUT, Margaret C., 1951 (1960)
Clinical Associate Professor of Preventive Medicine
B.S., 1938, Oregon; M.A., 1944, Washington
- NORTHROP, Cedric, 1947 (1954)
Clinical Assistant Professor of Preventive Medicine
B.A., 1930, M.D., 1936, Oregon
- PETERSON, Donald R., 1960
Clinical Instructor in Preventive Medicine
B.A., 1944, Oregon State; M.S., 1946, M.D., 1947, Oregon; M.P.H., 1958, California
- SEALEY, J. Leon, 1962
Clinical Instructor in Preventive Medicine
B.S., 1934, M.S., 1936, Kansas State; M.D., 1947, Kansas
- WANG, San-Pin, 1961
Clinical Assistant Professor of Preventive Medicine
M.D., 1944, D.Sc., 1959, Keio, Japan; M.P.H., 1952, Michigan
- WILKEY, John R., 1949 (1958)
Clinical Associate Professor of Preventive Medicine
B.A., 1926, Western Ontario, Canada; M.D., C.M., 1931, McGill, Canada; D.P.H., 1940, Toronto, Canada
- WOOLRIDGE, Robert L., 1961
Clinical Assistant Professor of Preventive Medicine
B.A., 1941, South Dakota; M.S., 1943, Chicago; D.Sc., 1961, Keio, Japan
- KENNEDY, William F., 1960
Instructor in Anesthesiology
B.S., 1952, Bates College, Lewiston, Maine; M.D., 1957, Maryland
- ORALLO, Maria, 1961 (1962)
Instructor in Anesthesiology
A.A., 1948, M.D., 1953, Univ. of Santo Tomas, Manila, P.I.
- RITCHIE, J. M. Graham, 1961
Instructor in Anesthesiology
M.A., 1946, Cambridge; M.R.C.S., 1950, Royal College of Physicians and Surgeons; M.B., B.Chir., 1951, Cambridge; L.M.C.C., 1955 (Canada)
- RENSAA, Margaret A., 1961
Instructor in Anesthesiology
B.S., 1953, Alberta; M.D., 1955, Alberta (Canada)
- SABAWALA, Phiroze B., 1961
Assistant Professor of Anesthesiology and Pharmacology
M.C.P.S., 1950, Grant (Bombay)
- TAKAMURA, John M., 1960
Instructor in Anesthesiology
D.D.S., 1945, Tokyo Dental College; M.D., 1950, Keio University Medical School, Tokyo, Japan
- TAYLOR, James V., 1961
Instructor in Anesthesiology
B.A., 1950, M.D., 1954, University of British Columbia (Vancouver, Canada)

CLINICAL APPOINTMENTS

- BACKUP, Phillip H., 1961
Clinical Assistant Professor of Anesthesiology
A.B., 1949, Middlebury College; M.D., 1946, Vermont College of Medicine
- BRIDENBAUGH, L. Donald, 1960
Clinical Assistant Professor of Anesthesiology
B.S., 1943, Nebraska; M.D., 1947, Nebraska
- COMPTON, David W., 1961
Clinical Instructor of Anesthesiology
B.S., 1937, Washington; M.D., 1941, Pennsylvania
- EATHER, Kenneth F., 1961
Clinical Assistant Professor of Anesthesiology
B.S., 1942, Nevada; M.D., 1945, Pennsylvania
- GOODSON, David N., 1961
Clinical Instructor of Anesthesiology
M.A., 1950, Cambridge; M.B., B.Ch., 1953, Charing Cross Hospital Medical School (England)
- MASON, Gene W., 1961
Clinical Instructor of Anesthesiology
B.S., 1949, Northwestern; M.B. and M.D., 1953, Chicago Medical School
- MOORE, DANIEL C., 1961
Clinical Associate Professor of Anesthesiology
A.B., 1940, Amherst; M.D., 1944, Northwestern
- MOUSEL, Lloyd H., 1961
Clinical Assistant Professor of Anesthesiology
B.S., 1927, M.D., 1930, Nebraska; M.S., 1939, Minnesota
- MORRIS, Lucien E., 1961
Clinical Professor of Anesthesiology
B.S., 1936, Oberlin College; M.D., 1943, Western Reserve
- TURNBULL, Lawrence F., 1961
Clinical Instructor of Anesthesiology
B.S., 1943, Washington State; M.D., 1946, Northwestern

CLINICAL MEDICAL SCIENCES

ANESTHESIOLOGY

- AASHEIM, Geordis M., 1960
Instructor in Anesthesiology, Veterans Administration Hospital
B.A., 1951, Saskatoon; M.D., 1955, Toronto
- BONICA, John J., 1960
Professor of Anesthesiology; Chairman of the Department of Anesthesiology
B.S., 1938, New York University; M.D., 1942, Marquette
- CRAWFORD, Edward W., 1962
Instructor in Anesthesiology
B.S., 1948, Michigan; M.D.C.M., 1952, McGill (Canada)
- FINLEY, Theodore N., 1961
Assistant Professor of Anesthesiology, Physiology, and Biophysics
B.S., 1950, Washington; M.D., 1954, Johns Hopkins
- GREEN, Henry D., 1961
Assistant Professor of Anesthesiology
M.D., 1953, Washington University, St. Louis
- HANSEN, John M., 1961
Associate Professor of Anesthesiology
M.B.Ch.B., 1943, Otago (England)

WANGEMAN, Clayton P., 1961
Clinical Professor of Anesthesiology
 A.B., 1929, Ohio Wesleyan University;
 M.D., 1933, Western Reserve

MEDICAL PRACTICE

ADAMS, J. Gordon, 1951
Affiliate in General Practice
 B.S., 1927, Washington; M.D., 1933, California

ANDERSON, Dorothy B., 1952
Affiliate in General Practice
 B.S., 1935, Washington; M.D., 1941, Women's Medical College of Pennsylvania

ANDERSON, Richard M., 1953
Affiliate in General Practice
 B.S., 1940, Washington; M.D., 1944, Stanford

ASHLEY, Grant D., 1952
Affiliate in General Practice
 B.S., 1938, Appalachian State Teachers College; M.D., 1945, Bowman Gray Medical School

BAKER, A. Bruce, 1957
Affiliate in General Practice
 B.S., 1929, M.D., 1932, Oregon

BALDECK, Joseph E., 1960
Affiliate in General Practice
 M.D., 1931, Creighton

BARDARSON, Baird M., 1960
Affiliate in General Practice
 M.D., 1955, Washington

BARNES, Kenneth O., 1953
Affiliate in General Practice
 B.S., 1940, Washington; M.D., 1943, Chicago

BENSON, R. A., 1949
Affiliate in General Practice
 B.A., 1926, St. Olaf College; M.D., 1932, Chicago

BUNKER, Raymond J., 1958
Affiliate in General Practice
 M.D., 1947, N.Y.U. College of Medicine

CALDWELL, J. Presley, 1952
Affiliate in General Practice
 B.S., 1930, South Dakota State; B.M., M.D., 1933, Northwestern

CAMPICHE, John L., Jr., 1957
Affiliate in General Practice
 Ph.B., 1947, S.B., 1948, M.D., 1951, Chicago

CHING, Ernest F., 1950
Affiliate in General Practice
 B.S., 1935, Hawaii; M.D., 1939, College of Medical Evangelists

COFFIN, Stanley, 1960
Affiliate in General Practice
 M.D., 1953, Washington

DAY, Charles G., 1949
Affiliate in General Practice
 B.A., 1935, M.D., 1938, Oregon

FERREE, Virgil D., 1957
Affiliate in General Practice
 B.S., 1934, Pacific Union; M.D., 1937, College of Medical Evangelists

FISCHER, Harold C., 1954
Affiliate in General Practice
 B.A., 1938, M.A., 1945, Illinois; B.S., M.D., 1943, Chicago College of Medicine

FISHER, William T., 1960
Affiliate in General Practice
 B.S., 1949, M.D., 1953, Washington

FRITZ, Harold D., 1949
Affiliate in General Practice
 M.D., 1924, Cincinnati

GAMON, Wilfred A., 1953
Affiliate in General Practice
 B.S. in Medicine, 1941, South Dakota; B.M., M.D., 1943, Northwestern

GOINEY, Bernard J., 1954
Affiliate in General Practice
 B.S., 1932, Washington; M.D., 1940, Oregon

GUDGEL, Kenneth E., 1951
Affiliate in General Practice
 B.S., 1945, M.D., 1948, Iowa

HAHN, John R., 1952
Affiliate in General Practice
 B.S., 1948, M.D., 1950, Nebraska

HAMMOND, Don R., 1952
Affiliate in General Practice
 B.S., 1942, B.S. in Medicine, 1943, M.D., 1944, Northwestern

HEATH, Malcolm G., 1960
Affiliate in General Practice
 B.A., 1935, Carolina; M.D., C.M., 1941, McGill

HICKS, W. W., 1952
Affiliate in General Practice
 M.D., 1920, Virginia

HITCHMAN, Robert N., 1960
Affiliate in General Practice
 B.S., 1944, Washington; M.D., 1948, Marquette

HUBER, Dale G., 1955
Affiliate in General Practice
 B.S., 1941, Washington; M.D., 1945, Northwestern

JOHNSON, A. Holmes, 1949
Affiliate in General Practice
 B.A., 1918, Morningside College; B.S., 1919, Oregon; M.D., 1924, Northwestern

JUDY, Frederick R., 1949
Affiliate in General Practice
 B.A., 1926, Whitman College; M.A., M.D., 1938, Oregon

JUDY, Harriet E., 1949
Affiliate in General Practice
 B.S., 1926, Whitman College; M.D., 1933, Oregon

KINZIE, Ralph V., 1949
Affiliate in General Practice
 A.B., 1938, Manchester College; M.D., 1942, Indiana

KIRKPATRICK, Wendell C., 1960
Affiliate in General Practice
 M.D., 1951, Washington University

KLAAREN, C. J., 1950
Affiliate in General Practice
 B.S., 1927, William Penn College; M.D., 1931, Iowa

KRAABEL, Austin B., 1958
Affiliate in General Practice
 B.A., B.S., 1935, North Dakota; M.D., 1937, Oregon

KRETZLER, Harry H., 1949
Affiliate in General Practice
 B.S., 1921, M.D., 1923, Nebraska

KUNZ, George G. R., Jr., 1957
Affiliate in General Practice
 B.S., 1935, Washington; B.S. in Medicine, 1940, North Dakota; M.D., 1942, Temple Medical School

LAYTON, Richard H., 1957
Affiliate in General Practice
 M.D., 1954, Washington

LINELL, Michael A., 1960
Affiliate in General Practice
 M.R.C.S., L.R.C.P., 1938, London University (England)

LOCKRIDGE, Thaddeus L., 1954
Affiliate in General Practice
 B.A., 1936, Montana; M.D., 1942, Pennsylvania

- LOEHR, Doyle M., 1950
Affiliate in General Practice
B.S., 1927, Simpson College (Iowa);
M.D., 1931, Iowa
- LOREE, David R., 1954
Affiliate in General Practice
A.B., 1926, B.S., 1927, Linfield College;
M.D., 1934, Oregon
- LUNDY, L. Fred, 1949
Affiliate in General Practice
Ph.G., 1905, Fremont College of
Pharmacy; M.D., 1909, Creighton
- MANSFIELD, Charles O., 1949
Affiliate in General Practice
B.S., 1939, Washington; M.D., 1943,
Oregon
- McARTHUR, Charles E., 1949
Affiliate in General Practice
A.B., 1926, Bethel College; M.A., 1929,
Kansas; M.D., 1938, Oklahoma
- McKINLAY, Duncan W., 1960
Affiliate in General Practice
B.A., 1926, Walla Walla; M.D., 1937,
College of Medical Evangelists
- MILLIGAN, John O., 1954
Affiliate in General Practice
B.S., 1934, M.D., 1936, Nebraska
- MOORE, James A., 1960
Affiliate in General Practice
B.S., 1938, North Dakota State College;
M.D., 1943, Northwestern
- MUNGER, Irvia C., Jr., 1949
Affiliate in General Practice
A.B., 1923, Wyoming; B.S. in Medicine,
1924, M.D., 1925, Nebraska
- RAWSON, Errol W., 1949
Affiliate in General Practice
B.S., 1919, Washington; M.D., 1925,
Rush Medical College
- RAYMAN, Mortimer S., 1960
Affiliate in General Practice
S.B. 1941, Harvard; M.D., 1944,
Columbia
- RICH, Richard I., 1956
Affiliate in General Practice
B.S., 1936, College of Puget Sound; M.D.,
1940, Jefferson Medical College
- ROSENBLADT, L. M., 1953
Affiliate in General Practice
M.D., 1932, Nebraska
- SCHEYER, Carl J., 1949
Affiliate in General Practice
B.S., 1932, College of Puget Sound; M.D.,
1936, Louisville
- SLADE, Erwin R., 1960
Affiliate in General Practice
B.S., 1940, Washington; M.D., 1943,
Oregon
- SLIND, Ole, 1953
Affiliate in General Practice
B.S., 1938, Washington State; M.D.,
1942, Washington University
- SPENCER, Bob A., 1960
Affiliate in General Practice
B.S., 1942, North Texas State;
M.D., 1946, Texas
- STILES, Richard A., 1960
Affiliate in General Practice
B.S., 1946, Washington State; M.D.,
1953, Northwestern
- STIMPSON, Edward K., 1949
Affiliate in General Practice
A.B., 1927, Stanford; M.D., 1932,
Harvard
- STORRS, Henry G., 1955
Affiliate in General Practice
B.A., 1942, Amherst; M.D., 1945,
Pennsylvania
- SULKOSKY, Leo F., 1951
Affiliate in General Practice
B.A., 1935, Washington; M.D., 1944,
Oregon
- TAIT, Arnold C., 1953
Affiliate in General Practice
B.S., 1939, Pacific Union College
(California); M.D., 1940, College
of Medical Evangelists
- TAYLOR, J. Earl, Jr., 1949
Affiliate in General Practice
B.S., B.M., M.D., 1940, Illinois
- THALER, Joseph, 1953
Affiliate in General Practice
A.B., 1929, M.A., 1930, Ph.D., 1933,
Cornell; M.D., 1937, Rochester
- TUCKER, Frederick A., 1950
Affiliate in General Practice
B.S., 1927, Washington State; M.D., 1931,
University of Louisville
- UNDERHILL, Frank J., 1960
Affiliate in General Practice
B.S., 1940, Washington;
M.D., 1943, Oregon
- WATTS, Arthur B., 1958
Affiliate in General Practice
B.S., 1938, Chicago; M.B., 1942, M.D.,
1943, Northwestern
- WAY, John D., 1951
Affiliate in General Practice
A.B., 1934, M.D., 1940, Kansas
- WEBSTER, Bruce J., 1949
Affiliate in General Practice
B.S., 1936, Washington; M.D., 1940,
Oregon
- ZIMMERMAN, James E., 1947
Affiliate in General Practice
B.S., 1942, Washington State; M.D.,
1945, Oregon

MEDICINE

- AAGAARD, George N., 1954
Professor of Medicine
B.S., 1934, M.B., 1936, M.D., 1937,
Minnesota
- BIERMAN, Edwin L., 1962
Assistant Professor of Medicine
A.B., 1951, Brooklyn; M.D., 1955, Cornell
- BIRCHFIELD, Richard I., 1960
Instructor in Medicine
B.S., 1950, M.D., 1953, Washington
- BRUCE, Robert A., 1950 (1959)
Professor of Medicine
B.S., 1938, Boston; M.S., 1940, M.D.,
1943, Rochester
- CHATRIAN, Gian E., 1959
Assistant Professor of Surgery
(Neurosurgery) and Medicine
(Neurology)
M.D., 1951, Naples (Italy)
- COBB, Leonard A., 1957 (1960)
Assistant Professor of Medicine
B.S., 1949, M.D., 1952, Minnesota
- DECKER, John L., 1958 (1962)
Associate Professor of Medicine
B.A., 1942, Richmond; M.D., 1951,
Columbia
- DODGE, Harold T., 1957 (1961)
Associate Professor of Medicine
M.D., 1948, Harvard
- DOWLING, J. Thomas, 1961
Associate Professor of Medicine
B.S., 1948, Washington; M.D., 1952,
Harvard
- ENSINCK, John W., 1960 (1961)
Instructor in Medicine and Assistant
Director, Clinical Research Center
B.S., 1952, M.D.C.M., 1956, McGill,
Montreal (Canada)

- EVANS, Robert S., 1951 (1959)
Professor of Medicine
B.S., 1934, Washington; M.D., 1938, Harvard
- FINCH, Clement A., 1949 (1955)
Professor of Medicine
B.S., 1936, Union College; M.D., 1941, Rochester
- GABRIO, Beverly W., 1953 (1959)
Lecturer in Medicine and Research Assistant Professor of Biochemistry
A.B., 1944, Lindenwood; Ph.D., 1950, Rochester
- GARTLER, Stanley M., 1957 (1961)
Associate Professor of Medicine and Genetics
B.S., 1948, California (Los Angeles); Ph.D., 1952, California
- GOODNER, Charles J., 1962
Assistant Professor of Medicine
B.A., 1951, Reed; M.D., 1955, Utah
- HEGSTROM, Robert M., 1956 (1962)
Instructor in Medicine
M.D., 1955, Washington
- HOGNESS, John R., 1951 (1960)
Associate Professor of Medicine; Medical Director, University Hospital; Associate Dean, School of Medicine
B.S., 1943, M.D., 1946, Chicago
- KIRBY, William M. M., 1949 (1955)
Professor of Medicine
B.S., 1936, Trinity; M.D., 1940, Cornell
- KLEBANOFF, Seymour J., 1962
Associate Professor of Medicine
M.D., 1951, Toronto (Canada)
- MOTULSKY, Arno G., 1953 (1961)
Professor of Medicine and Genetics
B.S., 1945, M.D., 1947, Illinois
- NELP, Wil B., 1962
Assistant Professor of Radiology and Medicine
B.A., 1951, Franklin; M.D., 1955, Johns Hopkins
- ODLAND, George F., 1957 (1962)
Assistant Professor of Medicine and Anatomy
M.D., 1946, Harvard
- PARKER, Frank, 1960 (1962)
Instructor in Medicine
M.D., 1958, Washington
- PASNICK, Lila J., 1959 (1962)
Instructor in Medicine
B.S., 1952, Puget Sound; M.D., 1956, Oregon
- PAULSEN, C. Alvin, 1958 (1961)
Assistant Professor of Medicine
B.A., 1947, M.D., 1952, Oregon
- PETERSDORF, Robert G., 1959 (1962)
Professor of Medicine
B.A., 1948, Brown; M.D., 1952, Yale
- PLUM, Fred, 1953 (1962)
Professor of Medicine
A.B., 1944, Dartmouth; M.D., 1947, Cornell
- RICH, Clayton, 1960 (1962)
Associate Professor of Medicine
M.D., 1948, Cornell
- RUBIN, Cyrus E., 1954 (1962)
Professor of Medicine
A.B., 1943, Brooklyn; M.D., 1945, Harvard
- SCHNATZ, J. David, 1960 (1962)
Instructor in Medicine
A.B., 1953, Princeton; M.D., 1957, Buffalo
- SCRIBNER, Belding H., 1951 (1962)
Professor of Medicine
A.B., 1941, California; M.D., 1945, Stanford; M.S., 1951, Minnesota

- SIMON, Ernest R., 1959 (1961)
Instructor in Medicine
M.D., 1954, Harvard
- SWANSON, August G., 1954 (1959)
Assistant Professor of Medicine (Neurology) and of Pediatrics (Neurology)
A.B., 1951, Westminster College; M.D., 1949, Harvard
- VANARDEL, Paul P., Jr., 1953 (1962)
Associate Professor of Medicine
B.S., 1947, Yale; M.D., 1951, Columbia
- VOLWILER, Wade, 1949 (1959)
Professor of Medicine
A.B., 1939, Oberlin College; M.D., 1943, Harvard
- WILLIAMS, Robert H., 1948
Professor of Medicine; Chairman of the Department of Medicine
A.B., 1929, Washington and Lee; M.D., 1934, Johns Hopkins
- WOOD, Francis C., Jr., 1960 (1961)
Instructor in Medicine
A.B., 1950, Princeton; M.D., 1954, Harvard

RESEARCH APPOINTMENTS

- GLOMSET, John A., 1960
Research Assistant Professor of Medicine
Med. Kand., 1953, Med. Dr., 1960, Uppsala (Sweden)
- GOLDSWORTHY, Patrick D., 1952 (1957)
Research Assistant Professor of Medicine and Lecturer in Biochemistry
A.B., 1941, M.A., 1947, Ph.D., 1952, California
- WAYS, Peter O., 1954 (1962)
Research Instructor in Medicine
B.A., 1949, Harvard; M.D., 1953, Columbia

CLINICAL APPOINTMENTS

- AHERN, James J., 1951 (1961)
Clinical Associate Professor of Medicine
B.S., 1938, Washington; M.D., 1945, Chicago
- ALLEN, John D., 1956 (1962)
Clinical Instructor in Medicine
M.D., 1955, Harvard
- ALTOSE, Alexander R., 1949
Clinical Instructor in Medicine
M.B., 1937, M.D., 1938, Northwestern
- ANDRUS, William W., 1955 (1959)
Clinical Instructor in Medicine
M.D., 1953, Harvard
- ARCESE, Norman, 1956 (1958)
Clinical Instructor in Medicine
B.S., 1943, Alabama; M.B., M.D., 1946, Northwestern
- ARONSON, Samuel F., 1949 (1958)
Clinical Associate Professor of Medicine
B.S., 1931, Washington; M.D., 1936, Northwestern
- ARST, Daniel B., 1955 (1962)
Clinical Instructor in Medicine
A.B., 1938, Wichita; M.D., 1944, Kansas
- BAILEY, Richard J., 1954
Clinical Affiliate in Medicine
M.S., 1926, M.D., 1927, Minnesota
- BAIN, Robert C., 1958 (1961)
Clinical Instructor in Medicine
B.S., M.D., 1949, Northwestern; M.S., 1956, Minnesota
- BAKER, William B., 1961 (1962)
Clinical Instructor in Medicine
B.S., 1949, Yale; M.D., 1953, Washington
- BAKKE, John L., 1951 (1961)
Clinical Associate Professor of Medicine
B.S., 1943, Washington State; M.D., 1945, Harvard

- BANNICK, Edwin G., 1949
Clinical Professor of Medicine
B.S., 1918, M.D., 1920, Iowa
- BARNES, Robert H., Jr., 1950 (1957)
Clinical Assistant Professor of Medicine
B.S., 1940, Virginia Military Institute;
M.D., 1943, Virginia
- BARRETT, Beach, 1955 (1961)
Clinical Assistant Professor of Medicine
M.E., 1940, Cornell; M.D., 1952,
Washington
- BERGY, Gordon G., 1952 (1959)
Clinical Assistant Professor of Medicine
A.B., 1947, West Virginia; M.D., 1949,
Michigan
- BINGHAM, James B., 1949 (1959)
Clinical Associate Professor of Medicine
B.S., 1935, M.D., 1937, Wisconsin
- BOBROFF, Arthur, 1950 (1955)
Clinical Instructor in Medicine
A.B., 1940, New York; M.D., 1944,
Louisville
- BRIDGES, William C., 1948 (1961)
Clinical Assistant Professor of Medicine
B.S., 1938, Washington; M.D., 1940, Yale
- BROWN, Norman K., 1960 (1962)
Clinical Instructor in Medicine
A.B., 1952, Amherst; M.D., 1956, Harvard
- BRUENNER, Bertram F., 1949 (1955)
Clinical Assistant Professor of Medicine
B.S., 1926, M.S., 1928, M.D., 1929,
Minnesota
- BURNELL, James M., 1950 (1960)
Clinical Associate Professor of Medicine
M.D., 1949, Stanford
- CAMPBELL, Alexander D., 1949 (1955)
Clinical Assistant Professor of Medicine
B.A., 1930, Whitman College; M.D.,
1934, Johns Hopkins
- CAPACCIO, George D., 1949
Clinical Assistant Professor of Medicine
M.D., 1931, Virginia
- CASSERD, Fredrick, 1955 (1960)
Clinical Instructor in Medicine
B.S., 1947, Washington; M.D., 1950,
Oregon
- CLEMENTS, Randolph, 1957 (1962)
Clinical Instructor in Medicine
M.D., 1949, Texas
- CLEVELAND, Fred Edward, 1951 (1957)
Clinical Assistant Professor of Medicine
and Lecturer in Nursing
B.S., 1937, M.D., 1941, Virginia
- COLEMAN, Daniel, 1950 (1960)
Clinical Associate Professor of Medicine
B.S., 1942, Carroll College; M.D., 1945,
Jefferson Medical College
- COLEN, John, 1959 (1961)
Clinical Instructor in Medicine
C.M., 1947, M.D., 1950, Leiden
(Netherlands)
- COLLINS, John D., 1949 (1956)
Clinical Assistant Professor of Medicine
B.S., 1933, Washington; M.D., 1938,
Northwestern
- CRAMPTON, Joseph H., 1949 (1960)
Clinical Professor of Medicine
B.S., 1938, Idaho; M.D., 1941, Vanderbilt
- CREELMAN, Ernest W., 1959 (1962)
Clinical Instructor in Medicine
M.D., 1946, Harvard
- CROSBIE, James, 1952 (1960)
Clinical Associate Professor of Medicine
M.D., 1945, Chicago
- DARVILL, Fred T., Jr., 1954 (1960)
Clinical Instructor in Medicine
B.S., 1948, M.D., 1951, Washington
- DEMARSH, Quin B., 1947 (1961)
Clinical Professor of Medicine
B.S., 1935, Washington; M.S., 1937,
B.M., 1939, M.D., 1940, Northwestern
- DONOHUE, Dennis M., 1952 (1961)
Clinical Associate Professor of Medicine
M.D., 1951, Washington
- DUNNING, Marcelle F., 1952 (1957)
Clinical Assistant Professor of Medicine
B.A., 1935, Hunter College; M.A., 1936,
Columbia; M.D., 1940, New York
University
- EGGERS, Rolf van Kerval, 1949 (1954)
Clinical Assistant Professor of Medicine
B.A., B.S., 1930, North Dakota; M.D.,
1933, Rush Medical College
- ELGEE, Neil J., 1952 (1960)
Clinical Assistant Professor of Medicine
B.S., 1946, New Brunswick (Canada);
M.D., 1950, Rochester
- ERICKSON, Robert V., 1960 (1962)
Clinical Instructor in Medicine
B.A., 1952, M.D., 1956, Washington
- EVANS, Ernest M., 1949
Clinical Instructor in Medicine
A.B., 1935, Haverford College; M.D.,
1939, Pennsylvania
- EYER, Kenneth M., 1960 (1962)
Clinical Instructor in Medicine
M.D., 1956, Washington
- FEIN, Sherwood B., 1954 (1958)
Clinical Instructor in Medicine
B.S., 1948, M.D., 1951, Western Reserve
- FERGUS, Emily B., 1953 (1960)
Clinical Assistant Professor of Medicine
A.B., 1946, Mount Holyoke; M.D., 1950,
Pittsburgh
- FEY, Louis D., 1949
Clinical Instructor in Medicine
B.S., 1934, Washington; M.B., 1938,
M.D., 1939, Northwestern
- FISHER, Peter, 1956 (1961)
Clinical Assistant Professor of Medicine
M.D., 1948, Pennsylvania
- FODOR, Oscar A., 1950 (1957)
Clinical Instructor in Medicine
B.S., 1938, Franklin and Marshall College;
M.D., 1942, Indiana
- FOE, Adrian A., 1952 (1956)
Clinical Instructor in Medicine
M.D., 1945, Nebraska
- FOSTER, Robert F., 1948
Clinical Assistant Professor of Medicine
B.S., 1925, Washington; M.D., 1930,
Northwestern
- FRANCIS, Byron F., 1949
Clinical Professor of Medicine
B.S., 1922, Washington; M.D., 1926,
Washington University
- FRANKLIN, Abby, 1955 (1960)
Clinical Assistant Professor of Medicine
M.D., 1948, Ohio State
- FRAYSER, Lois, 1950 (1960)
Clinical Assistant Professor of Medicine
B.A., 1928, Richmond; M.S., 1935, M.D.,
1943, Michigan
- GIBLETT, Eloise R., 1952 (1961)
Clinical Associate Professor of Medicine
B.S., 1942, M.S., 1947, M.D., 1951,
Washington
- GREENLEAF, Richard Cranch, 1950 (1957)
Clinical Assistant Professor of Medicine
B.S., 1939, Yale; M.D., 1942, Columbia
- HACKEDORN, Howard M., 1953 (1960)
Clinical Assistant Professor of Medicine
B.S., 1935, Washington State; M.D.,
1940, Harvard; M.S., 1951, Oregon

- HAGEN, John M. V., 1952 (1958)
Clinical Assistant Professor of Medicine and Lecturer in Nursing
B.A., 1942, Wyoming; M.D., 1950, Rochester
- HAMES, George H., 1950
Clinical Instructor in Medicine
B.A., 1926, Victoria; M.D., 1929, Toronto (Canada)
- HAMMER, Charles J., Jr., 1960 (1962)
Clinical Instructor in Medicine
A.B., 1950, Western Maryland; M.D., 1954, Maryland
- HAVILAND, James W., 1949 (1956)
Clinical Professor of Medicine and Lecturer in Nursing
A.B., 1932, Union College; M.D., 1936, Johns Hopkins
- HENLEY, Elaine D., 1956 (1961)
Clinical Assistant Professor of Medicine
B.A., 1947, California (Los Angeles); M.D., 1951, California
- HILDEBRAND, Alice G., 1949 (1961)
Clinical Associate Professor of Medicine
B.S., 1932; M.D., 1936, Nebraska; M.S., 1940, Minnesota
- HOGUE, Philip N., 1949 (1957)
Clinical Assistant Professor of Medicine
B.S., 1936, Washington; M.B., 1940, M.D., 1941, Northwestern
- HOUGHTON, Benjamin C., 1951 (1956)
Clinical Associate Professor of Medicine
M.D., 1934, Iowa
- HUDSON, Dean G., 1953 (1959)
Clinical Instructor in Medicine
B.S., 1946, Washington; M.D., 1950, Cornell
- JOBB, Emil, 1949 (1959)
Clinical Assistant Professor of Medicine and Lecturer in Nursing
B.S., 1937, B.M., 1941, M.D., 1942, Wayne
- JOHN, Gregory G., 1953 (1962)
Clinical Assistant Professor of Medicine
B.S., 1949, Washington; M.D., 1952, Oregon
- JOHNSON, Willard P., 1959 (1961)
Clinical Instructor in Medicine
B.A., 1948, California; M.D., 1953, Texas
- JONES, Richard F., 1955 (1957)
Clinical Instructor in Medicine
B.A., 1943, M.D., 1946, Oregon
- KATSMAN, Alvin, 1952 (1961)
Clinical Assistant Professor of Medicine
B.S., 1944, Washington; M.D., 1948, Nebraska; M.S., 1950, Iowa
- KELLY, William J., 1954 (1957)
Clinical Instructor in Medicine
B.S., 1941, Seattle University; M.D., 1945, Temple
- KING, Harold E., 1959 (1961)
Clinical Instructor in Medicine
B.A., 1950, Stanford; M.D., 1955, Washington
- KING, Robert L., 1949 (1954)
Clinical Associate Professor of Medicine and Lecturer in Nursing
M.D., 1928, B.S., 1931, Virginia
- KOHLI, Daniel R., 1951 (1954)
Clinical Instructor in Medicine
A.B., 1938, Wisconsin; M.B., 1941, M.D., 1942, Northwestern
- KOFER, John J., 1956 (1962)
Clinical Assistant Professor of Medicine
B.S., 1950, M.D., 1953, Washington
- KOREY, Herman G., 1951 (1953)
Clinical Instructor in Medicine
B.S., 1932, Chicago; M.D., 1936, Rush Medical College
- KRANTZ, Clement I., 1949
Clinical Assistant Professor of Medicine
A.B., 1920, M.D., 1924, Johns Hopkins
- KROUSE, Howard, 1956 (1960)
Clinical Assistant Professor of Medicine (Neurology and Psychiatry)
B.A., 1939, M.D., 1943, Iowa
- LANE, Fenton J., 1954 (1957)
Clinical Instructor in Medicine
M.D., 1945, Michigan
- LANE, James J., Jr., 1957 (1962)
Clinical Instructor in Medicine
B.S., 1951, Northwestern; M.D., 1955, Washington
- LARSON, Earl R., 1955 (1961)
Clinical Instructor in Medicine
B.S., 1951, M.D., 1953, Minnesota; M.I.H., 1955, Harvard
- LAWS, E. Harold, 1949 (1958)
Clinical Associate Professor of Medicine
B.S., 1938, M.D., 1940, Indiana
- LAYMAN, James D., Jr., 1953 (1961)
Clinical Assistant Professor of Medicine
B.S., 1944, Seattle University; M.D., 1947, St. Louis
- LEEDE, William E., 1949
Clinical Instructor in Medicine
B.S., 1934, M.D., 1937, Oregon
- LEFFMAN, Henry, 1956 (1961)
Clinical Associate Professor of Medicine (Neurology and Psychiatry)
M.D., 1935, Prague, Czechoslovakia
- LEHMANN, John Hans, 1950 (1956)
Clinical Instructor in Medicine
M.D., 1935, Perugia (Italy)
- LENFANT, Claude J. M., 1961
Clinical Instructor in Medicine
M.D., 1956, Faculte Medecine, Paris (France)
- LEVENSON, Robert M., 1955 (1959)
Clinical Instructor in Medicine
M.D., 1946, Louisville
- LINDAHL, Wallace W., 1949 (1960)
Clinical Associate Professor of Medicine (Neurology)
B.S., 1933, Washington State; M.D., 1938, Northwestern
- LINDBERG, John H., 1955 (1961)
Clinical Assistant Professor of Medicine
B.S., 1946, Washington; B.M., M.D., 1948, Northwestern
- LINELL, Michael A., 1955 (1958)
Clinical Instructor in Medicine
M.R.C.S., L.R.C.P., 1938, Kings College (England)
- LOGAN, Gordon A., 1952 (1958)
Clinical Assistant Professor of Medicine
B.S., 1945, M.S., 1947, Purdue; M.D., 1951, Columbia
- LUCAS, John E., 1952 (1960)
Clinical Associate Professor of Medicine
B.S., 1940, Washington; M.D., 1943, Harvard; M.S., 1951, Minnesota
- MALDEN, Marcel, 1960 (1961)
Clinical Instructor in Medicine
M.B., Ch.B., M.R.C.S., L.R.C.P., 1952, Sheffield (England)
- MANCHESTER, Robert C., 1949 (1960)
Clinical Assistant Professor of Medicine
A.B., 1927, Ohio Wesleyan; M.S., 1930, M.D., 1932, Rochester
- MARSHALL, Helen S., 1950 (1956)
Clinical Instructor in Medicine
B.S., 1939, M.D., 1942, Wisconsin
- MARTIN, Carroll J., 1952 (1961)
Clinical Associate Professor of Medicine and Physiology-Biophysics
B.S., M.D., 1940, Iowa

- MARTIN, John K., 1949
Clinical Assistant Professor of Medicine
B.S., 1926, M.D., 1928, Nebraska
- MERRYFIELD, Lloyd W., 1951 (1958)
Clinical Instructor in Medicine
B.S., 1942, M.S., 1943, California
Institute of Technology; M.D., 1950, Harvard
- MICHEL, Jean C., 1951 (1960)
Clinical Assistant Professor of Medicine
B.S., 1943, Bowdoin College; M.D., 1946, Columbia
- MITTELSTAEDT, Lester W., 1952 (1958)
Clinical Instructor in Medicine
B.S., 1944, Washington; M.D., 1949, Oregon
- MORGAN, Edward H., 1951 (1957)
Clinical Assistant Professor of Medicine and Lecturer in Nursing
A.B., 1938, DePauw; B.M., M.D., 1943, Northwestern; Ph.D., 1950, Minnesota
- MORTON, Robert J., 1948 (1954)
Clinical Assistant Professor of Medicine
A.B., 1939, M.D., 1943, Kansas; M.S., 1947, Minnesota
- MULLINS, John R., 1954 (1962)
Clinical Assistant Professor of Medicine (Neurology)
B.S., 1942, Gonzaga; M.D., 1945, St. Louis
- MURRAY, John S., 1958 (1961)
Clinical Instructor in Medicine
A.A., 1949, Vincennes; B.S., 1951, M.D., 1954, Indiana
- NELSON, Averly M., 1949
Clinical Instructor in Medicine
B.S., 1937, Washington; M.D., 1941, Oregon
- NIELSEN, Robert L., 1952 (1961)
Clinical Assistant Professor of Medicine
M.D., 1951, Harvard
- NOLAN, Donald E., 1951 (1961)
Clinical Associate Professor of Medicine (Administration)
B.S., M.B., 1935, M.D., 1936, Minnesota
- PACE, William R., Jr., 1951 (1954)
Clinical Instructor in Medicine
B.S., 1943, M.D., 1945, Arkansas
- PAINE, Robert M., 1951 (1954)
Clinical Instructor in Medicine and Lecturer in Nursing
B.S., 1942, Bowdoin College; M.D., 1946, Columbia
- PATON, Richard R., 1957 (1961)
Clinical Instructor in Medicine
B.S., 1950, M.D., 1954, Washington
- PAXSON, Chauncey G., Jr., 1956 (1960)
Clinical Instructor in Medicine
M.D., 1950, Jefferson Medical College
- PEARSALL, H. Rowland, 1957 (1960)
Clinical Assistant Professor of Medicine
B.S., 1939, Roanoke College; M.D., 1943, Medical College of Virginia
- PEARSON, Clarence C., 1948 (1954)
Clinical Assistant Professor of Medicine and Lecturer in Nursing
B.A., 1934, M.D., 1937, Texas; M.S., 1947, Minnesota
- PEIRCE, Charlotte T., 1950 (1954)
Clinical Instructor in Medicine
B.A., 1937, Bryn Mawr; M.D., 1941, Johns Hopkins
- PERRY, David M., 1955 (1962)
Clinical Assistant Professor of Medicine
B.A., 1950, Washington; M. D. C. M., 1954, McGill, Montreal (Canada)
- PILLOW, Randolph P., 1951 (1956)
Clinical Instructor in Medicine and Lecturer in Nursing
B.A., 1942, M.D., 1944, Virginia

and Gynecology*
B.S., 1938, Washington; M.D., 1942,
Oregon
- DONALDSON, L. Bruce, 1948 (1957)
*Clinical Assistant Professor of Obstetrics
and Gynecology*
B.S., 1935, Northwestern; M.D., 1939,
Michigan
- FINE, Charles S., 1948 (1959)
*Clinical Assistant Professor of Obstetrics
and Gynecology*
M.D., 1937, Toronto (Canada)
- GOMBERG, Bernard, 1954
*Clinical Instructor in Obstetrics and
Gynecology*
B.S., 1939, M.S., M.D., 1941, Illinois
- GRIFFIN, Joe L., 1958 (1959)
*Clinical Instructor in Obstetrics and
Gynecology*
A.B., 1941, M.D., 1944, Illinois
- HARRISON, Harold E., 1951 (1957)
*Clinical Assistant Professor of Obstetrics
and Gynecology*
B.S., 1931, M.D., 1933, Creighton
University
- HAYDEN, Glen E., 1960
*Clinical Assistant Professor of Obstetrics
and Gynecology*
A.B., 1942, Wisconsin; M.D., 1946,
Marquette University

- HELWIG, Carl M., 1948 (1955)
Clinical Associate Professor of Obstetrics and Gynecology
M.D., 1926, Ohio State
- KEIFER, Walter S., 1960
Clinical Instructor in Obstetrics and Gynecology
A.B., 1939, College of Emporia; M.D., 1943, Kansas
- KETTERING, Harry A., 1951 (1955)
Clinical Instructor in Obstetrics and Gynecology
B.A., 1942, M.D., 1945, Oregon
- KIMBALL, Charles Dunlap, 1948 (1957)
Clinical Associate Professor of Obstetrics and Gynecology
M.D., 1934, Buffalo
- KNUDSON, Wendell C., 1948 (1957)
Clinical Instructor in Obstetrics and Gynecology
B.S., 1933, Washington; M.D., 1938, Northwestern
- LEE, Albert F., 1948 (1957)
Clinical Assistant Professor of Obstetrics and Gynecology
B.S., 1935, College of Puget Sound; M.D., 1937, Duke
- LOWDEN, Robert J., 1954 (1957)
Clinical Instructor in Obstetrics and Gynecology
B.S., 1942, Seattle University; M.D., 1945, Marquette
- MACCAMY, Edwin Thomas, 1949 (1956)
Clinical Instructor in Obstetrics and Gynecology
B.S., 1937, Gonzaga; M.S., M.D., 1940, Northwestern
- McINTYRE, Donald M., 1946 (1955)
Clinical Assistant Professor of Obstetrics and Gynecology
B.S., 1939, Washington; M.D., 1943, Chicago
- NUCKOLS, Hugh Hunter, 1948 (1957)
Clinical Assistant Professor of Obstetrics and Gynecology
B.S., 1930, Washington; M.D., 1934, Pennsylvania
- PETERSON, Paul G., 1948 (1957)
Clinical Assistant Professor of Obstetrics and Gynecology
A.B., 1927, St. Olaf College; M.D., 1932, Rush Medical College
- RICE, Glen S., 1949 (1960)
Clinical Assistant Professor of Obstetrics and Gynecology
A.B., 1938, Pacific College; M.D., 1942, Oregon
- ROLLINS, Paul R., 1948 (1957)
Clinical Associate Professor of Obstetrics and Gynecology
Ph.C., B.S., 1924, Washington; M.D., 1928, Washington University
- ROTTON, Glenn Nelson, 1948
Consultant in Obstetrics and Gynecology
B.S., 1915, M.D., 1926, Iowa
- RUTHERFORD, Robert N., 1948 (1957)
Clinical Assistant Professor of Obstetrics and Gynecology
A.B., 1932, Illinois; M.D., 1936, Harvard
- SCHROEDER, Herman J., 1948 (1950)
Clinical Instructor in Obstetrics and Gynecology
Ph.C., B.S., 1931, Washington; M.D., 1940, Oregon
- SMITH, R. Philip, 1948 (1957)
Clinical Assistant Professor of Obstetrics and Gynecology
A.B., 1930, B.S., 1932, M.D., 1934, Kansas
- STIPP, Charles G., 1960
Clinical Instructor in Obstetrics and Gynecology
A.B., 1939, M.D., 1943, Kansas
- THORP, Donald J., 1948
Consultant in Obstetrics and Gynecology
A.B., 1921, B.S., 1923, M.D., 1927, Michigan
- WALKER, Albert T., 1961
Clinical Assistant Professor of Obstetrics and Gynecology
A.B., 1922, M.A., 1923, M.D., 1926, California

PEDIATRICS

- ALDRICH, Robert A., 1956
Professor of Pediatrics; Chairman of the Department of Pediatrics
B.A., 1939, Amherst; M.B., 1943, M.D., 1944, Northwestern
- ALEXANDER, E. Russell, 1961
Assistant Professor of Preventive Medicine and Pediatrics
Ph.B., 1948, S.B., 1950, M.D., 1953, Chicago
- BAKER, Helen, 1956
Instructor in Pediatrics

Professor of Pediatrics; Director of the Child Health Center and Director of Clinic for Child Study
A.B., 1941, Knox College (Illinois); M.D., 1944, Washington University
- GUNTHEROTH, Warren G., 1958 (1962)
Associate Professor of Pediatrics
M.D., 1952, Harvard
- HAMMER, Sherrel L., 1959 (1962)
Instructor in Pediatrics
B.A., 1953, College of Idaho; M.D., 1957, Washington
- IGO, Robert P., 1958 (1961)
Assistant Professor of Pediatrics
B.S., 1950, M.D., 1952, Utah
- KELLEY, Vincent C., 1958
Professor of Pediatrics
B.A., 1934, M.S., 1935, North Dakota; B.S. (Education), 1936, Ph.D., 1942, B.S. (Medicine), 1944, M.S., 1945, M.D., 1946, Minnesota
- MACKLER, Bruce, 1957 (1961)
Professor of Pediatrics
B.S., 1939, M.D., 1943, Temple
- McNELLIS, Ellen, 1958
Instructor in Pediatrics
M.B.Ch.B., 1938, D.P.H., 1940, Glasgow (Scotland)
- SEELY, J. Rodman, 1958
Assistant Professor of Pediatrics
B.S., 1950, M.D., 1952, Utah
- SHURTLEFF, David B., 1960 (1962)
Assistant Professor of Pediatrics
M.D., 1955, Tufts
- SOBEL, Raymond, 1960
Associate Professor of Psychiatry and Pediatrics
B.A., 1937, Harvard; M.D., 1941, N.Y.U. College of Medicine

- SWANSON, August G., 1958 (1959)
Assistant Professor of Medicine and Pediatrics (Neurology)
 A.B., 1945, Westminster; M.D., 1949, Harvard
- WAXMAN, Sorrel H., 1959 (1962)
Assistant Professor of Pediatrics
 B.A., 1952, M.D., 1956, University of Toronto (Canada)
- WEDGWOOD, Ralph P., 1962
Associate Professor of Pediatrics
 M.D., 1947, Harvard
- WILLIAMS, Christopher P., 1959 (1962)
Instructor in Pediatrics
 B.A., 1953, Oregon; M.D., 1958, University of Oregon Medical School

RESEARCH APPOINTMENTS

- ABEL, Francis Lee, 1961
Research Instructor in Pediatrics
 A.A., 1950, Creston Jr. College, Iowa;
 B.A., 1952, Kansas; M.D., 1957, Harvard; Ph.D., 1960, Wisconsin
- CHAR, Donald F. B., 1959 (1962)
Research Assistant Professor in Pediatrics
 M.D., 1950, Temple
- LABBE, Robert F., 1957
Research Associate Professor of Pediatrics
 B.S., 1947, Portland; M.S., 1949, Ph.D., 1951, Oregon State
- ORIGENES, Mauricio L., 1958 (1960)
Research Instructor in Pediatrics
 A.A., 1949, M.D., 1954, Catholic University (Philippines)
- SMITH, Elizabeth Knapp, 1958
Research Associate Professor of Pediatrics
 B.S., 1938, Florida State; M.S., 1939, Michigan; Ph.D., 1943, Iowa
- YU, Wei Liang (William), 1959 (1961)
Research Instructor in Pediatrics
 M.D., 1947, Cheeloo University, Tsinan, China

CLINICAL APPOINTMENTS

- ADKINS, George E. M., 1949 (1953)
Clinical Instructor in Pediatrics
 B.S., 1941, Washington; M.D. 1944, Oregon
- ANDERSON, O. William, 1950 (1951)
Clinical Instructor in Pediatrics
 B.S., 1931, Idaho; B.M., 1935, M.D., 1936, Northwestern
- BIERMAN, C. Warren, 1958 (1959)
Clinical Assistant Professor of Pediatrics
 M.D., 1947, Harvard
- BILLINGTON, Sherod M., 1947 (1956)
Clinical Associate Professor of Pediatrics
 A.B., 1932, M.D., 1935, Vanderbilt
- CLEIN, Norman W., 1947 (1956)
Clinical Associate Professor of Pediatrics
 B.S., 1924, M.D., 1925, Northwestern
- DOCTER, Jack Merton, 1948 (1959)
Clinical Associate Professor of Pediatrics
 B.S., 1937, Washington; M.D., 1941, Columbia
- DOUGLASS, Frank H., 1950
Consultant in Pediatrics
 Ph.G., 1919, Washington State; M.D., 1925, Oregon
- EMERSON, Bettina Meyerhoff, 1948 (1950)
Clinical Instructor in Pediatrics
 M.D., 1943, Johns Hopkins
- GREGORES, Basil, 1961
Clinical Instructor in Pediatrics
 M.D., 1953, Washington
- GRYTBAK, Margit H., 1948 (1950)
Clinical Instructor in Pediatrics
 B.S., 1930, B.M., 1932, M.D., 1944, Minnesota

- GUY, May Borquist, 1948 (1950)
Clinical Instructor in Pediatrics
 A.B., 1923, Reed College; M.D., 1932, Cornell; M.P.H., 1938, Harvard
- GUY, Percy F., 1947
Clinical Instructor in Pediatrics
 M.D., 1922, Michigan; M.P.H., 1938, Harvard
- HARTMANN, John R., 1955 (1960)
Clinical Assistant Professor in Pediatrics
 M.D., 1947, Johns Hopkins
- HOFFMAN, Robert W., 1952 (1954)
Clinical Instructor in Pediatrics
 M.D., 1946, St. Louis
- JAQUETTE, William Alderman, Jr., 1947 (1956)
Clinical Associate Professor of Pediatrics
 A.B., 1932, Harvard; M.D., 1936, Pennsylvania
- JOHNSON, Walfred W., 1956
Clinical Instructor in Pediatrics
 B.A., 1947, Montana; M.D., 1951, St. Louis
- JOSLIN, Blackburn S., 1959
Clinical Instructor in Pediatrics
 B.S., 1943, Haverford; M.D., 1947, Johns Hopkins
- JOY, Frederick B., 1947 (1956)
Clinical Assistant Professor of Pediatrics
 B.A., 1929, M.D., 1931, Oregon
- JUSTICE, Robert S., 1955 (1958)
Clinical Instructor in Pediatrics
 B.A., 1949, College of Puget Sound; M.S.W., 1955, Washington
- KAPLAN, Charles, 1948 (1956)
Clinical Assistant Professor of Pediatrics and Lecturer in Nursing
 B.A., 1934, M.D., 1937, Toronto (Canada)
- KIRSCHVINK, Joseph Francis, 1959
Clinical Instructor in Pediatrics
 B.S., 1950, Arizona State; M.D., 1955, Utah
- KUMASAKA, Yugio, 1958 (1960)
Clinical Instructor in Pediatrics
 M.D., 1955, Washington
- LAGOZZINO, Daniel A., 1950 (1958)
Clinical Instructor in Pediatrics
 B.S., 1940, Washington; M.D., 1943, Oregon
- LAVECK, Gerald, 1957 (1960)
Clinical Assistant Professor of Pediatrics
 B.S., 1948, M.D., 1951, Washington
- LEWIS, Donald, 1956 (1958)
Clinical Instructor in Pediatrics
 B.S., 1947, M.D., 1951, Northwestern
- LUCE, Ralph R., 1950 (1956)
Clinical Assistant Professor of Pediatrics
 B.S., 1941, M.S., 1942, Idaho; M.D., 1945, Washington University
- MACKOFF, Leslie, 1956 (1959)
Clinical Instructor in Pediatrics
 A.B., 1948, California; M.D., 1953, Washington
- MOLL, Frederic C., 1959
Clinical Professor of Pediatrics
 A.B., 1937, M.D., 1940, Rochester
- MOLL, Gretchen, 1960
Clinical Assistant Professor of Pediatrics
 B.A., 1936, Bennington; M.D., 1941, Yale
- PRIEST, Jean H., 1960
Clinical Instructor in Pediatrics
 Ph.B., 1947, B.S., 1949, M.D., 1953, Chicago
- PYNE, Gordon E., 1959
Clinical Instructor in Pediatrics
 B.S., 1949, M.D., 1953, Washington
- SKINNER, Alfred L., 1955 (1960)
Clinical Instructor in Pediatrics
 A.B., 1947, M.D., 1951, Harvard

- SPICKARD, Vernon W., 1947 (1956)
Senior Consultant in Pediatrics

Clinical Instructor in Psychiatry
M.D., 1952, Nebraska
- RICE, Jerrold S., 1957
Clinical Instructor in Psychiatry
B.A., 1948, Denver; M.D., 1952,
Nebraska
- RILEY, John B., 1948
Clinical Instructor in Psychiatry
B.S., 1929, M.B., 1933, M.D., 1934,
Minnesota
- ROBERTS, Richard W., 1959 (1962)
Clinical Instructor in Psychiatry
B.S., 1953, Washington State; M.D., 1958,
Washington

ROSE, Jerman W., 1960
Clinical Associate Professor of Psychiatry
B.S., 1939, Wake Forest; M.D., 1943,
Temple

ROWLETT, David B., 1957 (1960)
Clinical Instructor in Psychiatry
A.B., 1949, M.D., 1953, Kansas

SAYER, Robert J., 1951 (1961)
Clinical Assistant Professor of Psychiatry
A.B., 1944, Pennsylvania; M.D., 1948,
Columbia

SCHER, Maryonda E., 1955 (1959)
Clinical Instructor in Psychiatry
B.S., 1950, M.D., 1954, Washington

SCHMIDL, Fritz, 1961
Clinical Assistant Professor of Psychiatry
(Social Worker)
M.S., 1941, Columbia; J.D., Vienna, 1920

SCHWARTZ, Lawrence H., 1955 (1962)
Clinical Assistant Professor of Psychiatry
M.D., 1949, Duke

SHAW, Ian A., 1954
Clinical Instructor in Psychiatry
M.D., 1948, Harvard

SHOVLAIN, Francis E., 1949
Clinical Affiliate in Psychiatry
A.B., 1921, M.D., 1923, Creighton

STOLZHEISE, Ralph M., 1948
Clinical Instructor in Psychiatry
A.B., 1926, Willamette; M.D., 1934,
Oregon

STRAND, Glenn T., 1953 (1960)
Clinical Assistant Professor of Psychiatry
B.S., 1948, M.D., 1952, Washington

TAYLOR, Benjamin M., 1954 (1955)
Clinical Instructor in Psychiatry
M.D., 1949, St. Louis

THOMPSON, Robert W., 1959 (1962)
Clinical Instructor in Psychiatry
B.S., 1951, M.S., 1952, Stanford; M.D.,
1958, Wisconsin

VOORHEES, William D., 1953 (1960)
Clinical Assistant Professor of Psychiatry
B.A., 1942, M.D., 1945, Johns Hopkins

WELT, Walter B., 1952 (1958)
Clinical Assistant Professor of Psychiatry
B.A., 1943, M.D., 1946, Utah

WHITING, Adolph M., 1951
Clinical Instructor in Psychiatry
B.S., 1943, M.B., 1945, M.D., 1946,
Minnesota

WRIGHT, Robert G., 1959 (1961)
Clinical Instructor in Psychiatry
B.A., 1950, Johns Hopkins; M.D.,
1954, Rochester

RADIOLOGY

FIGLEY, Melvin M., 1958
Professor of Radiology; Chairman of the
Department of Radiology
M.D., 1944, Harvard

KORNELL, Albert K., 1961
Instructor in Radiology
M.D., 1956, Creighton Medical School

LEIGHTON, Robert S., 1955 (1962)
Assistant Professor of Radiology
B.A., 1933, M.D., 1938, Minnesota

LOOP, John W., 1959
Assistant Professor of Radiology
B.S., 1948, M.D., 1952, Harvard

PARKER, Robert G., 1956 (1959)
Associate Professor of Radiology
B.S., 1945, M.D., 1948, Wisconsin

PHILLIPS, Leon A., 1959
Assistant Professor of Radiology
B.S., 1948, M.D., 1952, Yale

CLINICAL APPOINTMENTS

ADDINGTON, Ercell A., 1948
Clinical Assistant Professor of Radiology
B.A., 1928, Carleton College; M.D.,
1932, M.A., 1939, Minnesota

BAIR, William J., 1957
Lecturer in Radiology
B.A., 1949, Ohio Wesleyan; Ph.D., 1954,
Rochester

BENESH, Alfred J., 1951 (1954)
Clinical Assistant Professor of Radiology
B.A., 1926, M.A., 1931, South Dakota;
M.D., 1933, Chicago

CARLILE, Thomas B., Jr., 1948
Clinical Assistant Professor of Radiology
A.B., 1936, M.D., 1939, Michigan

GILBERTSON, Eva L., 1950
Clinical Instructor in Radiology
B.A., 1938, North Dakota; M.D., 1941,
Temple; M.S., 1947, Minnesota

HADDEN, George N., 1956 (1958)
Clinical Assistant Professor of Radiology
B.S., 1947, M.D., 1951, Washington

HARTZELL, Homer V., 1948
Clinical Assistant Professor of Radiology
A.B., 1930, Stanford; M.D., 1936, Oregon

MARTIN, Owen, 1962
Clinical Instructor of Radiology
M.D., 1946, St. Louis University

MYERS, Ira T., 1956
Lecturer in Radiology
B.S., 1948, M.S., 1952, Ph.D., 1958,
Washington State

NELSON, James F., 1953 (1958)
Clinical Associate Professor of Radiology
M.D., 1946, Northwestern

PARKER, Herbert M., 1948
Clinical Assistant Professor of Radiology
B.S., 1930, M.S., 1931, Manchester
(England)

ROEDEL, Robert F., 1958
Clinical Instructor in Radiology
B.S., 1942, Washington; M.D., 1946,
Marquette

ROESCH, William C., 1953 (1959)
Clinical Assistant Professor of Radiology
A.B., 1945, Miami; Ph.D., 1949,
California Institute of Technology

ROSENBERG, Robert H., 1955
Clinical Instructor in Radiology
B.S., 1949, M.B., 1951, M.D., 1952,
Minnesota

TEMPLETON, Frederic E., 1947 (1953)
Clinical Professor of Radiology
B.S., 1927, Washington; M.D., 1931,
Oregon

WALKER, John H., 1948 (1959)
Clinical Assistant Professor of Radiology
B.S., 1936, Washington; M.D., 1940,
Michigan

WARD, Byron H., 1951 (1959)
Clinical Assistant Professor of Radiology
B.S., 1935, Washington; M.D., 1939,
Oregon

WILDERMUTH, Orless, 1956
Clinical Associate Professor of Radiology
A.B., 1939, B.S., 1941, Missouri;
M.D., 1943, Cincinnati

WOOTTON, Peter, 1959
Clinical Assistant Professor of Radiology;
Radiation Physicist
Hon. B. Sc., 1944, Birmingham (England)

SURGERY

AKESON, Wayne H., 1961
Assistant Professor of Orthopedics
M.D., 1953, Chicago

ANSELL, Julian, 1959 (1961)
Associate Professor of Surgery; Head of the Division of Urology
 B.A., 1947, Bowdoin; M.D., 1951, Tufts; Ph.D., 1959, Minnesota

BELL, John W., 1959 (1960)
Associate Professor of Surgery
 B.S., 1942, Washington; M.D., 1945, Harvard

CAMMOCK, Earl E., 1960
Instructor in Surgery
 B.A., 1949, B.S. 1950, M.D., 1953, Minnesota

CANTRELL, James R., 1960
Professor of Surgery
 A.B., 1944, M.D., 1946, Johns Hopkins

CHATRIAN, Gian, 1959
Assistant Professor of Neurosurgery and Neurology; Head of the EEG Laboratory
 M.D., 1951, Naples (Italy)

CLAWSON, D. Kay, 1958 (1961)
Associate Professor of Surgery; Head of the Division of Orthopedics
 M.D., 1952, Harvard

DEVITO, Robert V., 1956 (1962)
Assistant Professor of Surgery and Head of the Division of Plastic and Maxillofacial Surgery
 B.A., 1949, British Columbia (Canada); M.D., 1953, Washington

DILLARD, David H., 1953 (1959)
Assistant Professor of Surgery
 A.B., 1946, Whitman College; M.D., 1950, Johns Hopkins

FOLTZ, Eldon L., 1950 (1957)
Associate Professor of Neurosurgery
 B.S., 1941, Michigan State; M.D., 1943, Michigan

HARKINS, Henry Nelson, 1947
Professor of Surgery; Chairman of the Department of Surgery
 B.S., 1925, M.S., 1926, Ph.D., 1928, Chicago; M.D., 1931, Rush Medical College

JESSEPH, John E., 1955 (1961)
Assistant Professor of Surgery
 A.B., 1949, Whitman College; M.D., 1953, M.S., 1956, Washington

KELLY, William A., 1959
Instructor in Neurosurgery
 M.D., 1954, Cincinnati

MERENDINO, K. Alvin, 1948 (1955)
Professor of Surgery
 B.S., 1936, Ohio; M.D., 1940, Yale; Ph.D., 1946, Minnesota

NYHUS, Lloyd M., 1952 (1959)
Associate Professor of Surgery
 B.A., 1945, Pacific Lutheran College; M.D., 1947, Alabama

PATERSON, James R. S., 1961
Instructor in Urology
 B.S., 1944, St. Andrews; M.B. Ch.B., 1947, Edinburgh; F.R.C.S. Ed., 1953, Edinburgh

STEVENSON, John K., 1954 (1959)
Assistant Professor of Surgery
 M.D., 1949, Rochester

TOLSTEDT, Grandon E., 1957 (1961)
Assistant Professor of Surgery
 B.S., 1948, South Dakota State; M.D., 1953, Northwestern

WARD, Arthur A., Jr., 1948 (1955)
Professor of Surgery; Head of the Division of Neurosurgery
 B.S., 1938, M.D., 1942, Yale

WHITE, Lowell E., Jr., 1954 (1960)
Assistant Professor of Neurosurgery
 B.S., 1951, M.D., 1953, Washington

WINTERSCHIED, Loren C., 1957 (1962)
Assistant Professor of Surgery
 B.A., 1948, Willamette; Ph.D., 1953, M.D., 1954, Pennsylvania

RESEARCH APPOINTMENTS

FLETCHER, T. Lloyd, 1951 (1955)
Research Associate Professor of Surgery
 A.B., 1937, M.D., 1938, Clark (Massachusetts); Ph.D., 1949, Wisconsin

PAN, Hsi-Lung, 1954 (1955)
Research Instructor in Surgery
 B.S., 1946, Fukien Christian (China); M.S., 1950, College of Puget Sound; M.S., 1953, Washington

SCHMIDT, Joan A., 1955
Research Instructor in Orthopedics
 B.A., 1943, Regis College; M.S., 1950, Washington

CLINICAL APPOINTMENTS

ADAMS, Alfred O., 1950
Consultant in Orthopedic Surgery
 M.D., 1924, Washington University

ANDERSON, David W., 1961
Clinical Instructor in Orthopedics
 B.S., 1946, California; M.D., 1949, Cincinnati

ANDERSON, Kirk J., 1952 (1959)
Clinical Instructor in Orthopedic Surgery
 B.A., 1941, College of Idaho; M.D., 1944, Oregon

ANDERSON, Roger, 1948
Senior Consultant in Orthopedic Surgery
 B.S., 1915, Hamline (Minnesota); M.D., 1918, Northwestern

ASH, Joseph L., 1949
Consultant in Otolaryngology
 B.S., 1923, M.D., 1925, Creighton

BAKER, Joel W., 1948 (1952)
Consultant in Surgery
 M.D., 1928, Virginia

BERENS, Sylvester N., 1953 (1956)
Consultant in Neurosurgery
 B.S., 1924, M.D., 1928, Creighton

BILL, Alexander H., Jr., 1948 (1960)
Clinical Instructor in Surgery
 A.B., 1935, M.D., 1939, Harvard

BLACKMAN, James, 1948
Consultant in Surgery
 A.B., 1928, Kalamazoo College (Michigan); M.D., 1932, Johns Hopkins

BOGARDUS, George M., 1951 (1960)
Clinical Assistant Professor of Surgery
 M.D., 1938, Duke

BOWLES, Albert J., 1948
Consultant in Surgery
 A.B., 1919, M.D., 1923, Oregon

BROWN, Walter S., 1952
Clinical Instructor in Surgery
 A.B., 1927, Alabama; M.D., 1932, Illinois

BURGESS, Ernest M., 1948
Clinical Instructor in Orthopedic Surgery
 A.B., 1932, Utah; M.D., 1937, Columbia

BURKE, Donald R., Jr., 1954 (1960)
Clinical Instructor in Surgery
 B.S., 1945, M.D., 1948, Creighton; M.S., 1955, St. Louis

CAIN, Alvin L., 1958
Consultant in Otolaryngology
 B.S., 1941, Bethany; B.S., 1943, West Virginia; M.D., 1944, Virginia

CALLAHAN, John J., 1961
Clinical Instructor in Orthopedics
 B.S., 1938, Washington; M.D., McGill University, 1942

- CARPENTER, Wayne W., 1961
Clinical Assistant Professor of Surgery
B.S., 1936, M.D., 1940, Nebraska
- CHAMBERS, Edward F. S., 1948
Consultant in Orthopedic Surgery
M.D., 1907, Pennsylvania
- CHISM, Carl E., 1952 (1958)
Clinical Instructor in Surgery
and *Lecturer in Nursing*
B.S., 1936, M.D., 1941, Nebraska
- COE, Herbert E., 1947
Senior Consultant in Surgery
and *Lecturer in Nursing*
A.B., 1904, M.D., 1906, Michigan
- COE, Robert C., 1956 (1958)
Clinical Instructor in Surgery
B.S., 1940, Washington; M.D., 1950, Harvard
- CORBETT, Donald G., 1960
Senior Consultant in Urology
A.B., 1923, M.D., 1927, Pennsylvania
- CRENSHAW, William B., 1955 (1958)
Clinical Instructor in Urology
B.A., 1944, M.D., 1948, Virginia
- CRYSTAL, Dean K., 1947 (1960)
Clinical Assistant Professor of Surgery
and *Lecturer in Nursing*
B.S., 1936, Washington; B.A., 1938, Oxford; M.D., 1941, Johns Hopkins
- DAWSON, John H., Jr., 1961
Clinical Instructor in Surgery
B.A., 1945, Brown; M.D., 1950, Northwestern
- DIEFENDORF, Richard O., 1958
Consultant in Surgery
B.A., 1934, Amherst College; M.D., 1938, Columbia
- DUNCAN, John A., 1948
Consultant in Surgery
B.S., 1931, Washington; M.D., C.M., 1933, McGill (Canada)
- DUNCAN, William R., 1948
Clinical Instructor in Orthopedic Surgery
M.D., C.M., 1938, McGill (Canada)
- EADE, Gilbert G., 1960
Clinical Instructor in Surgery
B.S., 1948, M.D., 1951, Washington
- EDMARK, K. William, Jr., 1955
Clinical Instructor in Surgery
M.D., 1948, Colorado
- EDMUNDS, Louis H., 1948
Consultant in Orthopedic Surgery
B.A., 1922, Hampden Sydney College (Virginia); M.D., 1928, Virginia
- EGGERS, Harold E., Jr., 1949 (1956)
Clinical Instructor in Urology
B.S., 1933, M.D., 1937, Nebraska
- EMMEL, Harry E., 1949 (1959)
Clinical Instructor in Orthopedics
B.A., 1936, Willamette; M.D., 1940, Oregon
- FINLEY, John W., 1953 (1960)
Clinical Assistant Professor of Surgery
B.S., 1940, Idaho; M.D., 1943, Harvard
- FLASHMAN, Forest L., 1961
Clinical Assistant Professor of Orthopedics
B.A., 1937, Montana State; M.D., 1941, Northwestern; M.S., 1946, Minnesota
- FLORES, Robert E., 1948 (1958)
Clinical Instructor in Surgery
B.S., 1938, Western Kentucky State Teachers College; M.D., 1941, Louisville
- FORBES, Robert D., 1947 (1948)
Senior Consultant in Surgery
M.D., C.M., 1903, McGill (Canada)
- GLOYD, Park W., 1961
Clinical Assistant Professor of Orthopedics
B.S., 1945, Washington; M.D., 1948, Pennsylvania
- GOFF, Willard F., 1956
Clinical Instructor in Otolaryngology
B.S., 1931, Washington; M.D., 1935, Oregon
- GRIFFITH, Charles A., 1952 (1961)
Clinical Assistant Professor of Surgery
B.A., 1942, M.D., 1945, Harvard
- GRUMMEL, Roger W., 1961
Clinical Instructor in Surgery
B.S., 1950, University of Puget Sound; M.D., 1954, Oregon
- HALL, Donald T., 1948 (1960)
Clinical Assistant Professor of Surgery
B.S., 1931, Washington; M.D., 1935, Harvard
- HARPER, Harry P., 1952
Consultant in Surgery
B.S., 1936, M.D., 1937, Minnesota
- HAVEN, Hale A., 1948 (1956)
Senior Consultant in Neurosurgery
B.S., 1927, M.D., 1928, M.S., 1930, Ph.D., 1933, Northwestern
- HENRY, Frank C., 1949 (1960)
Clinical Instructor in Surgery
A.B., 1934, James Millikin (Illinois); M.D., 1940, Illinois
- HERRMANN, Siegfried F., 1948
Senior Consultant in Surgery
B.S., 1915, Hamline (Minnesota); M.B., M.A., 1919, M.D., 1920, Minnesota
- HERRON, Paul W., 1961
Clinical Instructor in Surgery
B.S., 1950, Washington State; M.D., 1954, Washington
- HILL, Lucius D., 1959
Clinical Instructor in Surgery
M.D., 1944, Virginia
- HUGHES, Carl W.
Clinical Associate Professor of Surgery
B.A., 1939, Missouri; M.D., 1944, Tennessee
- HUTCHINSON, J. Carl, 1946 (1948)
Clinical Instructor in Surgery
B.S., 1927, Idaho; M.D., 1933, Northwestern; M.S., 1945, Minnesota
- HUTCHINSON, William B., 1948
Consultant in Surgery
B.S., 1931, Washington; M.D., 1936, McGill (Canada)
- JARVIS, Fred J., 1948
Consultant in Surgery
B.S., 1928, M.D., 1932, Iowa
- JENSEN, Carl D. F., 1949
Consultant in Ophthalmology
M.D., 1931, Maryland
- JENSEN, Ole, Jr., 1949 (1956)
Clinical Assistant Professor of Urology
B.S., 1934, Washington; M.D., C.M., 1939, McGill (Canada); D.Med.Sc., 1944, Columbia
- JONES, Thomas W., 1960
Clinical Instructor in Surgery
B.S., 1949, Washington State; M.D., 1953, M.S., 1957, Washington
- KANAR, Edmund A., 1951 (1955)
Consultant in Surgery
B.S., 1943, M.D., 1945, Wayne
- KENNELLY, John M., Jr., 1956 (1959)
Clinical Assistant Professor of Urology
B.S., 1945, Willamette; M.D., 1948, George Washington
- KING, Brien T., 1947
Senior Consultant in Surgery
M.D., 1911, Vanderbilt
- KIRILUK, Lawrence B., 1949 (1960)
Clinical Assistant Professor of Surgery
and *Lecturer in Nursing*
B.M., 1945, M.D., 1946, Minnesota

- KNOPP, Lawrence M., 1954 (1956)
Clinical Instructor in Neurosurgery
B.S., 1949, Southwestern; M.S., 1949,
M.D., 1951, Tennessee
- LANE, John D., 1958
Consultant in Surgery
B.S., 1923, M.D., 1927, Georgia
- LASHER, Earl P., Jr., 1946 (1948)
Clinical Instructor in Surgery
B.A., 1931, M.D., 1934, Cornell
- LAUGHLIN, Robert C., 1949 (1952)
Clinical Assistant Professor of Surgery;
Acting Head of the Division of
Ophthalmology
B.A., 1931, Harvard; M.D., 1935,
Johns Hopkins
- LEAVITT, Darrell G., 1948
Consultant in Orthopedic Surgery
B.S., 1924, M.D., 1927, Oregon
- LEAVITT, Harry L., 1948
Consultant in Orthopedic Surgery
B.A., 1927, Oregon; M.D., 1930, Michigan
- LECOQC, John F., 1948
Senior Consultant in Orthopedic Surgery
M.D., 1925, A.B., 1926, Oregon
- LINEBACK, Carl M., 1962
Clinical Assistant Professor of Surgery
B.A., 1943, M.D., 1946, Emory University
- LITVIN, Lewis E., 1961
Clinical Instructor in Surgery
B.S., 1937, Washington; M.D., 1941,
Boston University
- LOBB, Allan W., 1955 (1960)
Clinical Assistant Professor of Surgery
and Lecturer in Nursing
B.S., 1941, Washington; M.D., 1946,
George Washington
- LOE, Ralph H., 1948 (1955)
Consultant in Surgery
B.S., 1925, Washington; M.D.,
1926, Pennsylvania
- LOUGHLIN, Ivan K., 1961
Clinical Instructor in Orthopedics
B.S., 1939, Washington; M.D., 1943,
Oregon
- LYMAN, John C., 1948
Senior Consultant in Surgery
B.S., 1909, Whitman College; M.D.,
1913, Johns Hopkins; D.Sc., 1946,
Whitman College
- MACMAHON, Charles E., 1948
Clinical Assistant Professor of Surgery
and Lecturer in Nursing
B.S., 1932, Washington; M.D.,
1936, Harvard
- MASON, J. Tate, 1950 (1960)
Clinical Assistant Professor of Urology
B.S., 1936, Washington; M.D., 1940,
Michigan
- MCDONALD, James L., 1959
Clinical Instructor in Surgery
M.D., 1945, St. Louis
- McELMEEL, Eugene F., 1947 (1949)
Clinical Instructor in Otolaryngology
B.A., 1930, St. Thomas (Minnesota);
B.S., 1933, M.D., 1936, Minnesota
- McKAY, John L., 1962
Clinical Assistant Professor of Surgery
B.S., 1943, Seattle University; M.D.,
1951, Creighton University
- McLEMORE, Ira O., 1948 (1952)
Senior Consultant in Orthopedic Surgery
M.D., 1923, Georgia
- McMAHON, William A., 1960
Clinical Instructor in Surgery
B.S., 1930, St. Charles College; M.D.,
1934, St. Louis University
- METHENY, David, 1948
Consultant in Surgery
A.B., 1920, Pennsylvania; M.D., 1923,
Jefferson
- MILLER, James W., 1948
Clinical Instructor in Orthopedic Surgery
A.B., 1936, M.D., 1939, Michigan
- MILLS, Waldo O., 1952 (1960)
Clinical Instructor in Surgery
B.A., 1937, Willamette; M.D., 1940,
Oregon
- MOONEY, J. Garth, 1961
Clinical Instructor in Orthopedics
B.S., 1943, Washington; M.D., 1945,
Oregon
- MOWERY, Charles R., 1956
Clinical Instructor in Surgery
B.S., 1940, M.D., 1943, Chicago
- MULLEN, Bernard P., 1948
Consultant in Surgery
B.S., 1918, Wisconsin; M.D., 1921,
Rush Medical College
- MURPHY, Thomas O., 1958
Consultant in Surgery
B.S., 1943, Willamette; M.D., 1949,
Johns Hopkins; Ph.D., 1957, Minnesota
- NASH, Henry H., 1961
Clinical Instructor in Orthopedics
B.A., 1943, Harvard; M.D., 1946,
Harvard Medical School
- NELSON, Jack N., 1949 (1956)
Clinical Assistant Professor of Urology
B.S., 1929, Walla Walla; M.D., 1932,
College of Medical Evangelists
- NELSON, Wallace, 1958 (1960)
Clinical Instructor in Neurosurgery
M.D., 1952, Washington
- NORGORE, Martin, 1946 (1952)
Consultant in Surgery
B.S., 1921, Washington; M.D., 1926,
Oregon
- OHMAN, Albert C., 1949 (1956)
Clinical Assistant Professor of Urology
M.D., 1932, Colorado
- OLSON, Clarence, 1952 (1960)
Clinical Instructor in Surgery
B.S., 1928, Chicago; M.D., 1933,
Rush Medical College
- OLSON, Hilding H., 1950 (1958)
Clinical Associate Professor of Surgery
B.S., 1939, Washington; M.D., 1943,
Oregon
- OSMUN, Paul M., 1949
Clinical Instructor in Otolaryngology
A.B., 1932, Brown; M.D., C.M., 1938,
McGill (Canada)
- PALKEN, Morton, 1954 (1958)
Clinical Instructor in Urology
B.S., 1943, M.D., 1946, Tufts College
- PARKER, Dean, 1948
Clinical Instructor in Urology
B.S., 1933, M.D., 1939, Iowa
- PASSMORE, Jack W., 1962
Clinical Assistant Professor of Surgery
B.S., 1943, M.D., 1948, Kansas
- PAYNE, J. Thomas, 1951 (1955)
Consultant in Surgery
B.S., 1938, Westminster College;
M.D., 1942, Vanderbilt
- PHILLIPS, James W., 1949 (1953)
Clinical Instructor in Surgery and
Lecturer in Nursing; Acting Head
of the Division of Otolaryngology
B.S., 1934, M.D., 1938, Stanford
- PILLING, Matthew A., 1952 (1958)
Clinical Instructor in Surgery
B.S., 1936, Nebraska State Teacher's
College; M.D., 1941, Nebraska

- PINKHAM, Roland D., 1948 (1960)
Clinical Assistant Professor of Surgery
B.S., 1934, Washington; M.D., 1939,
Stanford
- POWELL, Archie C., 1949
Clinical Instructor in Otolaryngology
B.S., M.D., 1936, Nebraska
- RAMSAY, J. Finlay, 1948
Clinical Instructor in Surgery
B.S., 1926, Washington; M.D., 1930,
Oregon
- ROGGE, Edgar A., 1961
Clinical Instructor in Orthopedics
B.S., 1931, Washington; M.D., 1935,
George Washington
- ROSSO, Weymar A., 1956 (1958)
Clinical Instructor in Urology
B.S., 1939, University of Puget Sound;
M.D., 1943, Louisville
- SACHS, Allan E., 1952
Clinical Instructor in Surgery
B.S., 1934, Chicago; M.D., 1937, Rush
Medical College
- SANDERSON, Eric R., 1947 (1960)
Clinical Instructor in Surgery
B.S., 1923, Minnesota; M.D., 1937,
Harvard
- SAUVAGE, Lester R., 1959
Clinical Instructor in Surgery
M.D., 1948, St. Louis
- SCHEINMAN, Louis J., 1953 (1956)
Clinical Instructor in Urology
B.A., 1942, North Carolina; M.D., 1945,
Long Island College
- SHERIDAN, Alfred I., 1948 (1960)
Clinical Instructor in Surgery
B.S., 1938, Washington; M.D., 1943,
Northwestern
- SMITH, Meredith P., 1962
Clinical Instructor in Surgery
B.S., 1945, St. Lawrence University;
M.D., 1949, Maryland; M.S., 1957,
Minnesota
- SPEIR, Edward B., 1948
*Consultant in Surgery and Lecturer in
Nursing*
B.A., 1929, M.D., 1933, Kansas
- STAFFORD, Donald E., 1948
Clinical Instructor in Neurosurgery
B.A., 1932, Park College (Missouri);
M.D., 1935, Harvard; M.S., 1941,
Minnesota
- STELLWAGEN, William J., 1949
Consultant in Ophthalmology
A.B., 1927, M.D., 1934, M.S., 1940,
Michigan
- STEWART, John E., 1961
Clinical Assistant Professor of Orthopedics
B.S., 1936, Washington; M.D., 1941,
Harvard
- STONE, Caleb S., Jr., 1948
Consultant in Surgery
B.S., 1922, Washington; M.D., 1926,
Washington University; M.S., 1934,
Virginia
- STRAUSS, Alfred A., 1962
Clinical Professor of Surgery
Ph.C., 1904, Washington; B.S., 1906,
Chicago; M.D., 1908, Rush Medical
College
- THOMAS, George I., 1955 (1961)
Clinical Assistant Professor of Surgery
B.A., 1946, California; M.D., 1949,
Johns Hopkins
- TUELL, Joseph I., 1948
Consultant in Orthopedic Surgery
B.S., 1929, M.D., 1932, Oregon
- TYTUS, John S., 1960
Clinical Instructor in Neurosurgery
M.D., 1947, Ohio
- TYVAND, Raymond E., 1949
Clinical Instructor in Urology
B.A., 1923, B.S., 1926, North Dakota;
M.D., 1929, Rush Medical College
- VAN PATTER, Ward N., 1961
Clinical Instructor in Surgery
M.D., 1944, Western Ontario Medical
School
- VETTO, Roy R., 1960
Clinical Instructor in Surgery
B.S., 1947, Gonzaga; M.D., 1951, Jefferson
Medical College
- WEBER, Julius A., 1949 (1953)
Consultant in Otolaryngology
B.S., 1923, M.D., 1925, Nebraska
- WHITE, Thomas T., 1953 (1962)
Clinical Associate Professor of Surgery
B.S., 1942, Harvard; M.D., 1945,
New York
- WORGAN, David K., 1950 (1954)
Clinical Instructor in Urology
B.S., 1939, M.D., 1943, Maryland
- WYRENS, Rollin G., 1949
Clinical Instructor in Urology
B.S., 1934, M.D., 1938, Northwestern;
M.S., 1942, Minnesota
- YUNCK, William P., 1949
Clinical Instructor in Urology
B.S., 1930, B.M., 1934, M.D., 1935,
Minnesota
- ZECH, Ralph K., 1953 (1957)
Clinical Instructor in Surgery
B.S., 1947, Seattle University;
M.D., 1949, Creighton
- ZECH, Raymond L., 1947 (1948)
Senior Consultant in Surgery
B.S., 1919, M.D., 1920, Northwestern

COMMITTEES

DIVISION OF HEALTH SCIENCES

INSTRUMENT SHOP: H. D. Patton, *Chairman*; M. P. Gordon, L. Mansfield, C. E. Rubin. **EX OFFICIO:** D. F. de Mers, J. R. Hogness.

LIBRARY: R. R. Weiser, *Chairman*; J. Ashford, *Secretary*; B. E. Anderson, E. A. Boyden, J. A. Glomset, F. Gray, T. A. Loomis, M. Milczewski, E. J. Ordal, K. K. Sherwood, P. E. Wilcox, **EX OFFICIO:** D. F. de Mers, E. Strange, KCH Librarian.

MEDICAL ILLUSTRATION: D. L. Bassett, *Chairman*; J. Phillips, *Secretary*; D. J. Hanahan, J. J. Holland, N. McConnell, A. W. Moore, R. E. Rumery, J. G. Skahen, T. C. West. **EX OFFICIO:** D. R. de Mers, J. R. Hogness.

OPEN HOUSE: J. J. Bonica, *Chairman*; P. Bruno, L. A. Cobb, A. Horita, J. I. Ingle, J. E. Orr. **EX OFFICIO:** G. A. Lehman, S. M. Standish.

TELEVISION EVALUATION AND PLANNING: A. W. Moore, *Chairman*; B. F. Baldwin, *Secretary*; E. A. Duchow, J. T. Elder, S. Hay, E. C. Roosen-Runge. **EX OFFICIO:** D. R. de Mers, C. L. Freehe, D. F. Hiscox, J. Phillips.

VIVARIUM: A. A. Ward, Jr., *Chairman*; C. A. Evans, L. M. Sreebny, J. W. Woodbury. **EX OFFICIO:** D. F. de Mers, J. R. Hogness, T. W. Penfold.

SCHOOL OF MEDICINE

ADMISSIONS: R. J. Blandau, *Chairman*; J. Gilbert, *Secretary*; C. W. Bodemer, H. T. Dodge, L. H. Jensen, R. G. Petersdorf, C. A. Smith, Jr., A. G. Swanson. **EX OFFICIO:** G. N. Aagaard, H. S. Ripley, R. C. Snyder.

APPOINTMENTS AND PROMOTIONS: R. H. Williams, *Chairman*, R. A. Aldrich, J. T. Grayston, H. D. Patton. **ALTERNATES:** N. B. Everett, M. M. Figley, A. A. Ward, Jr., R. R. Weiser.

BASIC SCIENCE HEADS: G. N. Aagaard, *Chairman*; J. Milne, *Secretary*; E. P. Benditt, J. M. Dille, C. A. Evans, N. B. Everett, J. T. Grayston, J. R. Hogness, H. Neurath, T. C. Ruch.

CARDIOVASCULAR TRAINING GRANT COMMITTEE: R. A. Bruce, *Chairman*; W. G. Guntheroth, Merendino, L. A. Phillips, R. F. Rushmer, R. S. Weiser, T. C. West.

CLINICAL HEADS: G. N. Aagaard, *Chairman*; M. Adams, *Secretary*; R. A. Aldrich, J. J. Bonica, M. M. Figley, H. N. Harkins, S. R. Hogness, C. A. Hunter, J. F. Lehmann, H. S. Ripley, R. H. Williams.

CLINICAL INVESTIGATION: R. H. Williams, *Chairman*; T. A. Loomis, L. E. White.

CLINICAL RESEARCH CENTER: W. Volwiler, *Chairman*; G. N. Aagaard, R. A. Aldrich, C. A. Evans, J. R. Hogness, K. A. Merendino, H. Neurath, L. S. Rambeck, R. H. Williams.

CONJOINT 426-27 ADVISORY COMMITTEE: R. A. Bruce, *Chairman*; J. F. Afonso, D. Dillard, T. H. Holmes, V. C. Kelley, J. F. Lehmann, L. A. Phillips. **EX OFFICIO:** G. N. Aagaard, R. J. Blandau.

CONJOINT 446-47 ADVISORY COMMITTEE: B. K. Scribner, *Chairman*; A. Kaplan, N. K. Mottet, R. G. Parker, J. C. Sherris. **EX OFFICIO:** G. N. Aagaard, R. J. Blandau.

COORDINATED LECTURE PROGRAM: R. S. Blandau, *Chairman*; M. Adams, *Secretary*; T. H. Holmes, L. M. Nyhus, R. G. Petersdorf.

CURRICULUM COMMITTEE: A. M. Scher, *Chairman*; M. Adams, *Secretary*; R. J. Blandau, J. R. Cantrell, R. W. Deisher, M. M. Figley, E. H. Fischer, T. H. Holmes, F. Plum. **EX OFFICIO:** J. R. Hogness.

DEAN'S COMMITTEE ON COOPERATION WITH VETERANS ADMINISTRATION: G. N. Aagaard, *Chairman*; W. Y. Baker, E. P. Benditt, J. S. Bonica, M. M. Figley, H. N. Harkins, M. J. Hickey, C. A. Hunter, J. F. Lehmann, J. F. Ramsay, H. S. Ripley, J. W. Shaw, C. S. Stone, D. D. Nolan, R. H. Williams.

EVALUATION COMMITTEES: R. J. Blandau, *Chairman*; M. Adams, *Secretary*; Committees for each year of the curriculum composed of all staff members taking part in the teaching of that year and other full-time staff members who are interested.

EXECUTIVE COMMITTEE: G. N. Aagaard, *Chairman*; M. Adams, *Secretary*; R. A. Aldrich, E. P. Benditt, R. J. Blandau, J. J. Bonica, J. M. Dille, C. A. Evans, N. B. Everett, M. M. Figley, S. T. Grayston, H. N. Harkins, J. R. Hogness, C. A. Hunter, J. F. Lehmann, H. Neurath, H. S. Ripley, T. C. Ruch, R. H. Williams. *Ex officio*: D. R. de Mers, L. S. Rambeck, S. M. Standish.

FACULTY AWARDS COMMITTEE: K. A. Merendino, *Chairman*; D. L. Bassett, H. S. Bennett, R. F. Rushmer.

FACULTY NEEDS: J. R. Hogness, *Chairman*; J. Milne, *Secretary*; R. A. Aldrich, E. P. Benditt, C. A. Evans, J. T. Grayston, C. A. Hunter, R. H. Williams.

HOSPITAL EXECUTIVE COMMITTEE: G. N. Aagaard, *Chairman*; M. Vollen, *Secretary*; R. A. Aldrich, E. P. Benditt, J. J. Bonica, M. M. Figley, H. N. Harkins, M. J. Hickey, J. R. Hogness, C. A. Hunter, J. F. Lehmann, J. E. Orr, H. S. Ripley, M. S. Tschudin, R. H. Williams. *Ex officio*: L. S. Rambeck.

INSTITUTIONAL CANCER GRANT: F. M. Huennekens, *Chairman*; D. K. Clawson, B. Mackler, R. G. Parker, R. T. Prehn, C. E. Rubin, L. M. Sreebny, A. H. Whiteley. *Ex officio*: J. L. McCarthy.

INTERNSHIP ADVISORY: P. P. VanArsdel, Jr., *Chairman*; G. Paynton, *Secretary*; D. H. Dillard, H. T. Dodge, D. C. Figge, J. L. Hampson, J. W. Loop, A. G. Swanson, L. E. White. *Ex officio*: J. R. Hogness.

LABORATORY MATERIALS: A. A. Ward, *Chairman*; H. C. Douglas, A. M. Scher.

MEDICAL STAFF ADMINISTRATIVE COMMITTEE: G. N. Aagaard, *Chairman*; M. Vollen, *Secretary*; R. A. Aldrich, E. P. Benditt, J. J. Bonica, M. M. Figley, H. N. Harkins, J. R. Hogness, C. A. Hunter, J. F. Lehmann, H. S. Ripley, R. H. Williams, J. I. Ingle, L. S. Rambeck.

MEDICAL THESIS COMMITTEE: E. G. Krebs, *Chairman*; E. C. Alvord, V. C. Kelley, J. H. Luft, E. C. Roosen-Runge, R. L. Wood.

MICROSCOPE COMMITTEE: B. S. Henry, *Chairman*.

OBJECTIVES OF MEDICAL EDUCATION: J. L. Decker, *Chairman*; J. Milne, *Secretary*; E. C. Alvord, D. L. Bassett, J. J. Bonica, W. G. Guntheroth, D. J. Hanahan, W. L. Herrmann, D. F. Magee, A. G. Motulsky, W. O. Rieke, R. Sobel, C. R. Strother. *Ex officio*: G. N. Aagaard, R. J. Blandau.

OCCUPATIONAL THERAPY ADVISORY AND EVALUATION COMMITTEE: J. F. Lehmann, *Chairman*; C. B. Bakker, G. D. Brunner, D. K. Clawson, R. P. Igo, J. B. Redford, M. G. Shevlin.

PHYSICAL THERAPY ADVISORY AND EVALUATION COMMITTEE: J. F. Lehmann, *Chairman*; G. D. Brunner, D. K. Clawson, W. F. Fordyce, J. S. MacMillan, F. Plum, W. C. Stolov. *Ex officio*: R. R. Cutler.

POSTGRADUATE MEDICAL EDUCATION: G. N. Aagaard, *Chairman*; A. Steen, *Secretary*; J. Ansell, R. R. de Alvarez, J. R. Cantrell, E. L. Foltz, H. D. Green, T. H. Holmes, H. Olson, C. E. Rubin, R. Sobel, A. G. Swanson.

RESEARCH TRAINING GRANT COMMITTEE: C. W. Bodemer, *Chairman*; M. Adams, *Secretary*; H. C. Douglas, T. C. Ruch, A. A. Ward. *Ex officio*: R. J. Blandau.

SCHEDULE COMMITTEE – FIRST, SECOND, THIRD, AND FOURTH YEARS: R. J. Blandau, *Chairman*; M. Adams, *Secretary*; R. R. de Alvarez. All full-time staff members taking part in the medical school teaching for that year are members.

SCHOLARSHIP AND GIFT: R. J. Blandau, *Chairman*; M. Adams, *Secretary*; R. S. Evans, A. Horita, O. A. Smith, R. S. Weiser. *Ex officio*: C. W. Bodemer.

THE DIVISION OF HEALTH SCIENCES

THE DIVISION OF HEALTH SCIENCES

THE DIVISION OF HEALTH SCIENCES of the University of Washington was established in the fall of 1945 to include the Schools of Dentistry, Medicine, and Nursing, the College of Pharmacy, the student Health Service, and the University Hospital. In February, 1945, the legislature of the state of Washington authorized the Board of Regents of the University to establish the Schools of Dentistry and Medicine, which were brought into the Division along with the already existing School of Nursing and College of Pharmacy. The University has offered training in nursing for over twenty-five years, and since 1931 the School of Nursing has had an integrated academic and hospital course leading to bachelor's and advanced degrees. The College of Pharmacy was founded in 1894, established a four-year course leading to a bachelor's degree in 1904 and a five-year course in 1957, and now offers both bachelor's and advanced degrees. (The nursing program is described in the *School of Nursing Bulletin*, the pharmacy program in the *College of Pharmacy Bulletin*, and the dentistry program in the *School of Dentistry Bulletin*.)

Each part of the Division of Health Sciences functions as an autonomous unit. The Division coordinates development, research, and teaching activities to strengthen and reinforce the work of each unit. For example, the basic health sciences departments meet the needs of the whole Division and of other sections of the University that are concerned with work in anatomy, biochemistry, microbiology, pathology, pharmacology, physiology and biophysics, and public health, and preventive medicine.

HEALTH SCIENCES PLANT

The Health Sciences Building overlooks the Portage Bay Yacht Basin between Lake Washington and Lake Union. It is near enough to the upper campus to offer great potentialities for cooperative research with other sections of the University, such as the Departments of Anthropology, Botany, Chemistry, Genetics, Physics, Psychology, and Zoology; the College of Engineering; the College of Fisheries; the School of Social Work; and the Student Health Service (Hall Health Center).

From 1945 to 1949, the Schools of Dentistry, Medicine, and Nursing were in temporary quarters while the Health Sciences Building was planned and built. In

March, 1947, ground was broken and construction begun on the building which now houses administrative units of the three schools, library and auditorium facilities of the entire Division, research and clinical units of the School of Dentistry, the basic health sciences departments, and laboratories and offices of the Departments of Pediatrics and Psychiatry. The first units were occupied in January, 1949, and the rest of the building was occupied in the fall of that year.

The Health Sciences Building was designed to provide space for teaching and research activities and maximum flexibility for future needs. Because interior walls are not supporting structures, redesign of areas within the building can be readily accomplished when changing demands make it necessary. The present facilities represent an investment of more than \$20,000,000 in construction and equipment.

The second unit of the new University Hospital was completed in the spring of 1959 and the first patients were admitted May 4, 1959. This 320-bed unit includes the inpatient and outpatient facilities of the hospital, the hospital laboratories, X-ray facilities, the emergency department, a large new physical medicine and rehabilitation unit, the premature nursery, etc. This second unit is contiguous with the first unit of the Hospital, which was completed in 1954 and which houses the teaching and research areas of the five clinical departments of the School of Medicine.

In addition, the Samuels Research Wing was completed in April of 1960. This wing houses additional laboratories of the clinical departments. Completion of these closely integrated units provides the University with one of the finest plants in the United States.

Funds have been received from the Federal Government for a center for cancer research, a regional primate center, and Unit I of the biology complex, which will house the departments of biochemistry and genetics. These buildings will be an extension of the Health Sciences Building to the west. Construction will begin during the present biennium.

The Health Sciences Library, which serves the Schools of Medicine, Dentistry, and Nursing, and is used in much research work done in other sections of the University, has about 89,000 carefully selected volumes (with stack space for 40,000 more) and subscribes to more than 1,619 periodicals. All books and periodicals are on open shelves and are easily accessible. Library facilities include ten glass-paneled and soundproofed reading, study, and conference rooms, as well as adequate space for microfilm and microcard readers and special study groups. The University Library also is used by health sciences students; the interlibrary loan service is particularly valuable since it makes all the medical resources of the country available for research.

HOSPITAL AFFILIATIONS

The clinical teaching programs of the Schools of Medicine, Dentistry, and Nursing are conducted not only in the University Hospital but also in hospitals affiliated with the Division of Health Sciences. Faculty members, including chairmen of clinical departments, with full time status, are appointed in teaching and service capacities at these hospitals. Many aspects of the clinical teaching program in Medicine are centered at the King County Hospital, which has a bed capacity of 480 to 535 in the Harborview Division and 240 in the Chronic Disease and Convalescent Division. Offices, laboratories, and classrooms at this hospital accommodate many of the activities of the clinical departments. The United States Veterans Administration Hospital, in Seattle, which has a bed capacity of approximately 320, is closely integrated with other teaching facilities of the Division of Health Sciences. The Veterans Administration operates this hospital as a "Dean's Committee Hospital," with the cooperation of Seattle physicians and the health sciences faculty. The Children's Orthopedic Hospital, the United States Public Health Service Hospital, and Firland Sanatorium also are affiliated with the Division. Children's Orthopedic Hospital has a bed capacity of

200, with excellent facilities in all branches of pediatrics. The U.S.P.H.S. Hospital has a capacity of 343 to 500; it is a well organized and efficiently staffed institution to which some medical students are assigned for their clerkships. Firland Sanatorium, with a capacity of 1,086, offers unusually fine opportunities for study and treatment of tuberculosis. The University of Washington Child Health Center, located in the University Hospital, provides opportunity for medical students to study the phenomena of normal growth and development of infants and children. The Center is sponsored jointly by the Departments of Pediatrics, Preventive Medicine, and Psychiatry.

The state mental hospitals are affiliated in the elective externship training program for fourth-year medical students. Western State Hospital, at Fort Steilacoom, has a bed capacity of 3,007; Eastern State Hospital, at Medical Lake, 2,361; and Northern State Hospital, at Sedro Woolley, 2,273.

Additional hospital affiliations for use in both undergraduate and graduate training programs may be developed throughout the state in the future. The School of Medicine stresses the importance of a solid foundation in general medicine in planning its program of affiliations with qualified hospitals. The ultimate goal of the Division of Health Sciences is a continuous educational program for undergraduate and graduate training in all of its professional schools.

VETERANS

ADMISSION OF VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Applications for and questions about government aid should be addressed to the Veterans Administration Regional Office.

WORLD WAR I OR II VETERANS

Under certain conditions a veteran of World War I or II who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges. See page 47.

KOREAN VETERANS

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building. Educational allowance payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

TRAINING ALLOWANCE

The rate of training allowance is on a full-time basis for medical students pursuing the regular prescribed medical curriculum. If further information is desired consult the Veterans Division, Safety Division Building.

TERMINATION OF TRAINING

A veteran *eligible* under Public Law 550 must complete his training by *eight* years after his release from active service, or by January 31, 1965, whichever is earlier.

DISABLED VETERANS

A veteran with a disability under Public Law 894 should contact a training officer in the nearest Veterans Administration Office approximately four weeks prior to registration.

CHILDREN OF DECEASED VETERANS

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for a Program of Education issued to those eligible persons by the Veterans Administration is to be presented to the Veterans Division, Safety Division Building, on the date of registration.

STUDENT ACTIVITIES AND SERVICES

HOUSING

Information and applications for residence in University-owned housing for single persons may be obtained by writing to the Manager, Men's Residence Halls, 1201 N.E. Campus Parkway, Seattle 5, or to the Manager, Women's Residence Halls, University of Washington, Seattle 5. Preference in assignment to vacancies is given to students under twenty-one years of age until August 1; thereafter assignments are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

University regulations require that women students under twenty-one who do not live at home must live in approved group residences such as the Women's Residence Halls, sororities, and church-sponsored living groups. Other types of living arrangements must be reported to the Dean of Women and be approved by the student's parents or guardian.

Information about fraternities or sororities may be obtained by writing to the Interfraternity Council or the Panhellenic Council, Student Union Building, University of Washington, Seattle 5.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings must, however, be consulted in person.

Teaching and research assistants and other part-time subfaculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 23 Administration Building, for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

PART-TIME EMPLOYMENT

The demands upon the time of students in the medical and dental courses make it inadvisable for them to undertake any kind of part-time work during the school year.

MEDICAL EXAMINATION

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions, and to returning former students by the Registrar. This examination, which is required before a student may register, is taken at the student's expense.

A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on the campus.

ASSOCIATED STUDENTS

Membership in the Associated Students of the University of Washington, the central organization which conducts all student activities, is required of all regularly enrolled students. Through the ASUW Board of Control and its various committees and boards, students assume major responsibility in the government of student life. The ASUW helps finance the programs of athletics, debates, concerts, lectures, and many other activities and facilities, including the University of Washington *Daily* and the Student Union Building.

Physician's Oath

*AT THE time of being admitted as Member of the
Medical Profession*

*I SOLEMNLY pledge myself to consecrate my life to
the service of humanity.*

*I WILL give to my teachers the respect and gratitude
which is their due;*

*I WILL practice my profession with conscience and
dignity;*

*THE HEALTH of my patient will be my first con-
sideration;*

I WILL respect the secrets which are confided in me;

*I WILL maintain by all the means in my power, the
honor and the noble traditions of the medical
profession;*

MY COLLEAGUES will be my brothers;

*I WILL not permit considerations of religion, nation-
ality, race, party politics or social standing to
intervene between my duty and my patient;*

*I WILL maintain the utmost respect for human life,
from the time of conception; even under threat, I
will not use my medical knowledge contrary to
the laws of humanity.*

*I MAKE these promises solemnly, freely and upon
my honor.*

Declaration of Geneva World Medical Association

THE SCHOOL OF MEDICINE

THE SCHOOL OF MEDICINE

THE SCHOOL OF MEDICINE offers a four-year program of courses leading to the degree of Doctor of Medicine (M.D.), programs leading to the Master of Science and Doctor of Philosophy degrees for students in the Graduate School, programs leading to Bachelor of Science degrees in Physical Therapy and in Occupational Therapy and Rehabilitation, and courses for practicing physicians. The four-year curriculum for an M.D. degree includes studies in three main areas: Basic Health Sciences, Conjoint Courses, and Clinical Sciences. In the Basic Health Sciences, the Departments of Anatomy, Biochemistry, Genetics, Microbiology, Pathology, Pharmacology, Physiology and Biophysics, and Preventive Medicine offer courses for medical, dental, nursing, and pharmacy students and for students in other University curricula. Conjoint Courses, sponsored jointly by various departments, are designed to integrate teaching in different medical fields. In the Clinical Sciences, the Departments of Anesthesiology, Medicine, Obstetrics and Gynecology, Pediatrics, Physical Medicine and Rehabilitation, Psychiatry, Radiology, and Surgery provide clinical study in the fields of medical specialization and in general medical practice.

The School of Medicine is approved by the Council on Medical Education and Hospitals of the American Medical Association and by the Association of American Medical Colleges. It participates in the student exchange program of the Western Interstate Commission for Higher Education, under which legal residents of certain Western states which do not have medical schools may pay the tuition and fees charged to legal residents of Washington rather than the higher nonresident rate. These states are Alaska, Arizona, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming. To be eligible for this program, the student must be certified by his home state. State eligibility requirements vary, and the number of students who can be included in the program each year depends on appropriations by the legislature. A student interested in this program must apply to the certifying officer in his home state, whose address may be obtained by writing to the Western Interstate Commission for Higher Education, Fleming Law Building, Boulder, Colorado.

PHILOSOPHY AND OBJECTIVES OF THE SCHOOL OF MEDICINE

The School of Medicine seeks to begin the preparation of the individual for service in many fields of endeavor from the practice of medicine to the complex problems of public health in a modern world; from the study of human emotion to research in the chemical processes of life itself. Diversified professional opportunities unequalled by any other profession require persons whose ultimate goals may be the practice of medicine, teaching, or research in all of the basic health sciences or clinical areas of medicine, public health, radiation biology, or hospital administration, to mention only a few. Individuals with a wide variety of backgrounds can find both challenge and satisfaction in the field of medicine.

The fundamental objective of undergraduate medical education is to provide a solid foundation for the student's future development.

Undergraduate medical education must permit the student to learn fundamental principles applicable to the whole body of medical knowledge, to acquire habits of reasoned and critical judgment of evidence and experience, and to develop an ability to use these principles wisely in solving problems of health and disease.

To implement the fundamental objective, the School of Medicine provides an opportunity for the student: (1) to acquire basic professional knowledge, (2) to establish sound habits of self education and of accuracy and thoroughness, (3) to attain basic clinical and social skills, (4) to develop sound attitudes, (5) to gain an understanding of professional and ethical principles. These five requirements are obviously not distinctly separable, but are mutually interdependent.

A special word needs to be said about the development of "sound attitudes." Attitudes need to be inculcated as well as knowledge. The attitude of continuing education, the idea that the physician must remain a student throughout his life, is stressed. Establishing respect for scientific investigation and its importance in advancement of medical knowledge is a major factor in developing this attitude and in making the final product a soundly educated and trained physician.

Even though emphasis is placed on the scientific aspects of the practice of medicine, of equal importance is the development of such qualities as humanness, kindness, sympathy, and warm patient-doctor relationships. In addition, every effort is made to develop the attitude of humility in the student, the awareness of the limitations of any one physician, the necessity to seek help when it is needed without loss of personal integrity or self-respect.

Given incentive and opportunity to learn and guidance toward the grasp of principles, with the problems of health and disease as a frame of reference, it is hoped that the student will build the necessary foundation for his career in medicine, be it practice (general or limited), teaching, research, or administration. The student should develop into a responsible professional person, and be able to gain and maintain the confidence and trust of his patients, the respect of those with whom he works, and the support of the community in which he lives.

ADMISSION TO THE UNIVERSITY AND TO THE SCHOOL

The faculty of the School of Medicine believes that the appropriate level of scholarly achievement and preparation for medicine can best be developed in a liberal arts program with the emphasis on a major area of interest selected by the student in any field sufficiently demanding in scholastic discipline. A "pre-med course" with no further aim than admission to medical school is not recommended. The faculty believes that competence for the study of medicine can best be demonstrated by developing a depth of understanding in a major field. Therefore, a degree program of four years' duration is preferred. In exceptional circumstances, consideration will be given to applicants who may qualify at the end of three years of college work.

Before admission each applicant must have completed the minimum requirements listed below and must have demonstrated his proficiency in these subjects by obtaining a grade-point average of 2.50 or better. Calculation of the grade-

point average is made by multiplying the grade point received in a course (A=4, B=3, C=2, D=1) by the number of credits earned in the course, totaling these values, and dividing by the total number of credits earned.

	QUARTER CREDITS	SEMESTER CREDITS
Biology	12	8
Chemistry	18	12
Physics	12	8

In addition, proficiency in English and basic mathematics is expected of every applicant. Applicants from the University of Washington must have satisfied lower-division physical and health education requirements.

In recognition of the diverse opportunities afforded the graduate of medicine, the specified requirements are purposely kept to a minimum. In this manner each student has the opportunity to pursue, as his major field of study, any area of special interest to him, be it in the physical sciences, biological sciences, or humanities, and still acquire the intellectual skills necessary to the regular medical curriculum. In general, college courses which constitute part of the medical curriculum are not encouraged. Throughout the medical program, elective time as well as time for research and theses affords the student an opportunity to apply the knowledge and concepts acquired in his major field to the appropriate areas of medicine.

APPLICATION PROCEDURE

Applications and all credentials should be sent to the Admissions Committee. Because the Committee begins examining applications a year ahead of the time of entrance, *early application is advisable*. The final date on which applications for entrance in Autumn Quarter may be submitted is *January 1*. An application fee of \$5.00 is required of all applicants who are not residents of the state of Washington. On or before that date, each applicant must submit the following:

1. Formal application for admission on the form furnished by the School of Medicine.
2. Official transcript of previous college record (sent directly from the registrars of the institutions where preprofessional training was taken to the Admissions Committee) showing the complete college record, with grades and credits. Each applicant is required to include a list of the courses he is taking and plans to take to complete his preprofessional study before entering the School of Medicine. Canadian applicants must include a copy of their University Entrance Certificate.
3. Names, addresses, and departments, of three science and two nonscience instructors to whom recommendation forms may be sent. (University of Washington premedical students should consult the Premedical Adviser about recommendations.)
4. The score received in the Medical College Admission Test. Arrangements for this test may be made with the premedical adviser at the institution where premedical training is being taken. Medical aptitude tests are customarily given in May and October of each year. When the student takes the test, he should request that his scores be sent directly to the Admissions Committee. Further information on this test may be obtained by writing to the Educational Testing Service, 20 Nassau Street, Princeton, New Jersey.
5. Three copies of a short autobiography.

Primary consideration is given to applications from residents of Washington and from students certified by the Western Interstate Commission for Higher Education. A certain number of out-of-state applicants are accepted each year, with preference to qualified applicants from neighboring states and territories where

no medical school exists. Applicants from states outside the Pacific Northwest are accepted only when they present exceptional academic records.

It is the policy of this school not to accept for admission students who have failed in other medical schools or who have been dismissed from them.

All applicants are given consideration on the same basis regardless of race, color, sex, religion, or parental occupation.

Students taking their premedical undergraduate work at the University of Washington customarily enroll in the College of Arts and Sciences and consult the premedical Adviser, Mrs. Helen Pearce, 121 Miller Hall, for help in planning their programs.

Information concerning admission to the curriculum in physical therapy and occupational therapy may be found under the Department of Physical Medicine and Rehabilitation, page 83.

TRANSFER STUDENTS

Transfer students are accepted into the second- and third-year classes only when vacancies occur, and only if they are in good standing at the school in which they are already enrolled. When vacancies do occur, applicants from two-year medical schools are given preference. Transfer students are not accepted in the fourth year. Applicants for entrance to the second- or third-year class must submit the following:

1. Formal application for admission on the form furnished by the School of Medicine.
2. Official transcripts of premedical and medical training (sent directly from the registrars of the institutions where the training was taken to the Admissions Committee).
3. The score received in the Medical College Admission Test.
4. A letter from the dean of the medical school indicating the student's status and relative standing in his class.
5. Three copies of a short autobiography.

Students applying for transfer from nonaccredited medical schools, in addition to the usual application, are required to pass qualifying examinations in the basic health sciences, i.e., anatomy, biochemistry, microbiology, pathology, pharmacology, and physiology. These qualifying examinations may be offered by the departments involved at a regularly scheduled time once a year. The candidate may offer successful completion of Part I examinations of the National Board of Medical Examiners in lieu of the departmental examinations. Permission to take these examinations is obtained through the School of Medicine. Accredited schools are listed in the educational number of the *Journal of the American Medical Association*.

PROCESSING OF APPLICATIONS

EVALUATION OF CREDENTIALS. The Admissions Committee examines each applicant's credentials and bases its decisions on the objective evaluation of these factors: preprofessional training, evidences of scholarship, place of residence, Medical College Admission Test rating, and personal evaluation of the student by premedical instructors in their letters of recommendation.

PERSONAL INTERVIEW. If an examination of the credentials shows them to be satisfactory, the applicant may be requested to appear for a personal interview by the Admissions Committee. At the time of interview the applicant is requested to submit two unmounted photographs (2 by 3 inches). A personal interview will not be requested if the credentials are not satisfactory. Applicants who are in school a considerable distance from Seattle may request that their interviews be held at some more convenient location; out-of-state interviews are arranged by the Committee.

NOTIFICATION OF ACCEPTANCE OR REJECTION. All candidates are given written notification of the acceptance or rejection of their applications as soon as possible after the Admissions Committee has reached a decision. Acknowledgment of notification of acceptance should be made in writing by the successful applicant within a reasonable length of time.

ACCEPTANCE OF APPOINTMENT. Within two weeks after a candidate has accepted the position offered to him in the School of Medicine, the Comptroller of the University will request a deposit of \$50.00. This deposit is applied to the first quarter's tuition. If the student wishes to withdraw, the deposit is refundable for any reason before January 15. After January 15, it is refundable only in case of withdrawal for bona fide illness, failure to complete basic premedical requirements, induction into military service, or failure to pass the physical examination required of all students at the time of the first registration.

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration. The University reserves the right to change any of its fees and charges without notice. *A table of charges for medical, physical therapy, and occupational therapy students is on page 89.*

Resident students

A resident student is one who has been domiciled in Washington for at least a year immediately prior to registration. The domicile of a minor is that of his parents.

Nonresident students

Prospective students are classified as nonresidents when their credentials come from schools outside Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits or (3) are United States citizens who served in the armed forces of governments associated with the United States during World War I or II and received honorable discharges. Proof of eligibility for this exemption should be presented to the Veterans Division, Safety Division Building. Nonresident students who meet one of these requirements pay one half the nonresident tuition. This exemption is not granted to Summer Quarter students. Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

EXTRA SERVICE CHARGES

A registration service charge of \$15.00 is assessed those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by In-Person Registration by action of the Registration Appeal Board. A late registration charge of \$15.00 is assessed any student granted permission to register after the last registration day before the opening of Autumn, Winter, or Spring Quarters by action of the Registration Appeal Board. A charge of \$5.00 is made Autumn, Winter, and Spring Quarters for each change of registration or change of section, or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University.

**TUITION AND FEES PER QUARTER FOR STUDENTS OF MEDICINE, PHYSICAL THERAPY,
AND OCCUPATIONAL THERAPY**

TYPE OF REGISTRATION	TUITION FEE	INCIDENTAL FEE	OTHER FEES ¹ AUTUMN, WINTER AND SPRING QUARTERS	TOTAL FEES AUTUMN, WINTER AND SPRING QUARTERS
<i>Medicine</i>				
Resident	\$100.00	\$66.50	\$8.50	\$175.00
Nonresident	165.00	116.50	8.50	290.00
<i>Physical Therapy²</i>				
Resident	65.00	37.50	8.50	111.00
Nonresident	125.00	82.50	8.50	216.00
<i>Occupational Therapy²</i>				
Resident—Full-time	65.00	37.50	8.50	111.00
Nonresident—Full-time	125.00	82.50	8.50	216.00
Resident—Part-time ³	65.00	15.00	*	80.00
Nonresident—Part-time ³	125.00	50.00	*	175.00

* Optional

¹ Other fees consist of Student Activities, \$2.50; ASUW Bond Redemption, \$3.50; HUB Bond Redemption, \$1.00; and Building Fund, \$1.50.

² Summer Quarter (resident and nonresident) Fees, \$102.50; ASUW, \$2.50 = \$105.00

³ Clinical Training

Special Examination \$1.00

Removal of an Incomplete 2.00

Athletic Admission Ticket (optional for ASUW members) 3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50;
Spring Quarter, \$3.50.

Quarterly Grade Report .50
One grade report is issued at the close of each quarter without charge; the charge, payable in advance, is made for each additional copy.

Transcripts 1.00
One transcript is furnished without charge; the charge, payable in advance, is made for each additional copy.

Graduation Exercises Diploma 10.00

REFUND OF FEES, CHARGES, AND RENTALS

All fees will be refunded in full if complete withdrawal is made during the first three calendar days of the quarter; one half the amount will be refunded if withdrawal is made during the first thirty calendar days. Fee refunds are not made to students withdrawing under discipline.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund of fees, if payment was made by check.

ESTIMATE OF YEARLY EXPENSES

Tuition, Incidental, and Other Fees

Full-time resident students \$525.00

Full-time nonresident students 870.00

Athletic Admission Ticket (optional) 6.50

Health and Accident Insurance (optional) 17.25

Microscope Purchase 350.00-500.00

All first-year medical students must buy microscopes so they may be used in the first week of Autumn Quarter. A scientific supply house in Seattle furnishes the kind of microscope students should use. Students who plan to buy second-hand, foreign-made, or other nonrecommended instruments should make sure they meet the standards of the Medical School Committee on Microscopes. The minimum requirements for a suitable microscope are a monocular type with 3 achromatic objectives of approximately the following magnifications: X10, X45 and X95; an X10 ocular; and an uncalibrated mechanical stage and carrying case.

Books and Supplies 100.00-150.00

Transportation

Beginning in the Winter Quarter of the second year of medicine, students must make arrangements for transportation to and from various hospitals in Seattle where they receive part of their training.

Board and Room

Double room and meals in Men's Residence Halls 720.00

Double Room and meals in Women's Residence Halls 660.00-720.00

Single room and meals in Women's Residence Halls 765.00

Room and meals in fraternity house 700.00-800.00

Personal Expenses 300.00

FINANCIAL AID TO STUDENTS

The ever increasing demands of medical education in terms of the effort and lengthy training required to master the accumulated knowledge necessary to the practice of medicine has resulted in costs which seem prohibitive to many prospective students.

Solutions to the problem of the burdensome cost of medical education is a matter of growing public concern and the subject of extensive current study by various public and private agencies. It is generally agreed that an increase in financial aid to medical students may be necessary to recruit and train capable physicians in sufficient numbers to meet the medical needs of an expanding population.

The University of Washington School of Medicine has received substantial private and public endowments which provide financial aid to deserving medical students in the nature of awards and prizes, fellowships, scholarships, grants-in-aid, and loans See pages 58 and 59.

The recipients of these various forms of financial aid are selected by the Scholarship Committee of the School of Medicine with the assistance and approval of appropriate administrative officials.

FELLOWSHIPS. A fellowship is an academic award of honor, based upon scholastic achievement, designed to aid and encourage the student in the furtherance of his studies or research. In cases in which the fellow collaborates with a faculty member the fellow is expected to take the lead as principal investigator. The fellow is allowed freedom of publication of his results as a condition of the grant. He is expected to devote his full time and energy to his project and may not be otherwise gainfully employed during the period of his fellowship. A fellowship may be cancelled at any time by the Scholarship Committee. Ordinarily, the fellowships cover the three months of the summer. Under certain circumstances investigative work may be continued throughout the year at a reduced stipend. See page 59.

TRAINEESHIPS. A traineeship differs from a fellowship in that the student is not expected to take as principal investigator. He is usually less experienced in research, and the stipend is somewhat less. See page 58.

SCHOLARSHIPS. A scholarship is an academic award based upon both scholarship and need and is designed to aid and encourage the student in the furtherance

of his studies or research. It carries the same rules of tenure as a fellowship except that the recipient can engage in remunerative employment upon written consent of the Scholarship Committee. A scholarship may be cancelled at any time by the Scholarship Committee. See page 58.

GRANTS-IN-AID. Grants-in-aid are made to students in good standing on the basis of need only. The recipient may engage in remunerative employment only with the written consent of the Scholarship Committee. The student must be willing to submit a realistic analysis of his complete financial situation in detail.

ASSISTANTSHIPS. A number of positions with individual faculty members are usually available to medical students during the summer months. Most of these positions involve laboratory work on research projects.

LOANS FOR MEDICAL STUDENTS. Loans are made on the same basis as grants-in-aid. Amounts up to \$6,000 or more in case of special need may be loaned to any one student over the four years of his training. The loans mature six years after graduation. They are interest free until completion of the internship and thereafter bear 2 per cent interest to maturity. Financial aid is made available through the funds listed below.

BURDON-IRWIN-JOHNSON LOAN FUND. The women physicians of Seattle established a loan fund in honor of Dr. Minnie Burdon, Dr. Lillian Irwin, and Dr. Hannah Johnson to aid women medical students.

CHI OMEGA LOAN FUND. The Seattle Chi Omega Alumnae established a loan fund in 1956 to aid deserving medical students.

DEAN OF MEDICINE STUDENT LOAN FUND. This fund is composed of small bequests made to the School of Medicine to aid medical students.

FREDERICK EPLIN LOAN FUND. The Pacific Northwest Medical Association established a loan fund in memory of Frederick Eplin, M.D., founder of the Association, in 1960.

W. K. KELLOGG FOUNDATION LOAN FUND. Through the generosity of the W. K. Kellogg Foundation a loan fund was established in 1958 for medical students.

JOHN MILES MILLER LOAN FUND. The John Miles Miller Loan Fund was established in 1958 in memory of John Miles Miller by his friends. The fund is exclusively for first-year medical students.

WARREN B. SPICKARD LOAN FUND. The Warren B. Spickard Loan Fund was established in 1961 in memory of Warren B. Spickard, M.D., by his friends.

ALICE C. STOTLAR LOAN FUND. The fund was established in March, 1951, to aid deserving medical students in obtaining their education.

DR. EVERETT O. JONES SCHOLARSHIP AND LOAN FUND. Under the terms of a trust created by the late Dr. Everett O. Jones, pioneer Seattle surgeon, the annual net income from the estate is turned over to the University to provide scholarships and loans to worthy students in the School of Medicine.

EDWARD L. TURNER SCHOLARSHIP AND LOAN FUND. This fund was established by faculty, students, and friends in 1953 in honor of Dr. Edward L. Turner, first Dean of the University of Washington School of Medicine, to aid medical students.

WASHINGTON ACADEMY OF GENERAL PRACTICE. The Washington Academy of General Practice established a loan fund for medical students in 1956.

JOHN AND MARY WILSON LOAN FUND. Under the terms of a foundation created by the late Mary Wilson the annual net income from the estate is used to provide scholarships and loans to medical students on the basis of character, scholastic ability, and need.

THE WOMEN'S AUXILIARY TO THE YAKIMA COUNTY MEDICAL SOCIETY. The Women's Auxiliary to the Yakima County Medical Society established a loan fund in 1960 for deserving medical students.

LOANS FOR INTERNS AND RESIDENTS

BRISTOL LOAN FUND. The Bristol Loan Fund was established in 1961 by the Bristol Laboratories for interns and residents under the jurisdiction of the School of Medicine faculty.

CHARLES E. WATTS MEDICAL EDUCATION FUND. The friends of Charles E. Watts, M.D., established a memorial loan fund in his name to be used for loans to residents in training in internal medicine.

APPLICATION PROCEDURES

Unless specified otherwise, application for fellowships, scholarships, and grants-in-aid should be directed to the Office of the Dean of Medicine before March 15 of each year. Application forms and related information may be obtained from the Office of the Dean of Medicine upon request. See page 58 for available scholarships and fellowships.

In case of emergency or special need an application for grant-in-aid may be made at any time.

Application for a loan may be made at any time to the Office of the Dean.

Application for assistantships should be made to faculty members.

PAYMENTS

All payment of monies concerned with endowment awards, prizes, stipends, grants-in-aid, and loans are made by the University Comptroller.

STUDENT ACHIEVEMENT AND PROMOTION

Student achievement in each course is reported by the Dean's Office to the Registrar as *P* (Pass), *A* (Excellent), *B* (Good), *C* (Average), *D* (Poor), or *E* (Failure).

D signifies that the work is of passing grade but poor. Warnings are sent to students who receive *D* in any quarter.

E signifies that the work is of failing grade. Students who receive an *E* in one major subject may be permitted to take additional work and a re-examination, if permission is granted by the instructor in the course, the Dean, and the Executive Committee. If the additional work and re-examination are satisfactory, the student's grade may be raised from *E* to *D* and promotion may be granted provided that the remainder of the work is satisfactory. If students receive *E* in more than one major subject in one year, they may not make up these deficiencies.

Each department keeps careful records of student work. At the end of each academic year the Executive Committee of the School of Medicine evaluates the accomplishment of the student during that year and determines his fitness for promotion. When general academic achievement is unsatisfactory in any year, the student is subject to dismissal from the School. Even though a student who has been dismissed from the School of Medicine may succeed in passing a medical school course which he has previously failed by taking it as part of his course in another school or college, this is not regarded as evidence that a student's abilities justify readmitting him to Medical School. Students who have been dismissed because of low scholarship can be readmitted only by action of the Executive Committee; those who are readmitted are on probation and must maintain a quality of work consistently above the minimum requirements. The faculty of the School of Medicine does not favor repetition of courses in cases of low scholarship and will not permit a student to repeat a year of work except when illness or some other extenuating circumstance justifies an exception.

EVALUATION OF FOURTH-YEAR STUDENTS

All fourth-year students are required to take Part II of the National Board Examinations in April of the year of graduation. Those receiving an over-all score of less than 75 will be examined by a committee of the faculty.

CLASS SCHEDULES

Current schedules for all classes are distributed to medical students at the beginning of each academic year. The 1962-64 schedules may be found on pages 54-57.

FIRST AND SECOND YEARS

During the first and second years of the medical course, the school year is divided into three quarters of eleven weeks each. These quarters conform to the University calendar. In the first year, the major courses of instruction are anatomy, biochemistry, and physiology and biophysics, with introductory courses in psychiatry. In the second year, the major courses are pathology, microbiology, pharmacology, conjoint physical diagnosis, and conjoint laboratory procedures, with a course in psychiatry and an introductory course in preventive medicine.

The second year serves as a bridge between the basic health sciences and the clinical sciences on which the student will concentrate during the third and fourth years. During the latter part of the second year, the student devotes an increasing amount of time to learning the art of history-taking and physical examination. In these studies, the student works closely with people preparing him for the role of physician.

THIRD AND FOURTH YEARS

During the third and fourth years of the medical school program, a major amount of the student's time is devoted to his clinical clerkships. In the clinical clerkship, the student has an opportunity to take histories, and to examine patients and follow the progress of their illness. The student is carefully supervised. Instruction is largely on an individual or small group basis. There is decreasing utilization of lectures and large group conferences. During the clinical clerkship, the student has an opportunity to study the health problems of individual patients, to learn to advance his knowledge of these problems through personal study in textbooks and the current medical literature, and to discuss the problems presented by his patients with members of the teaching staff.

In the third year of the course, the school year is divided into four terms of nine weeks each: thirteen and one-half weeks of medicine; nine weeks of surgery; nine weeks of pediatrics; four and one-half weeks of psychiatry.

During the fourth year, the school year is divided into three terms of twelve weeks each: six weeks of selective surgical specialties; eight weeks of obstetrics-gynecology, one week of which includes conjoint work with pediatrics on the newborn; two weeks of anesthesiology; two weeks of physical medicine and rehabilitation; twelve weeks of an integrated program of medicine, psychiatry, preventive medicine, and pediatrics; and six weeks of elective work.

Specialty instruction in such fields as ophthalmology, otolaryngology, radiology, forensic and legal medicine, medical ethics, medical economics, urology, orthopedics, hematology, cardiology, gastro-enterology, dermatology, etc. is given in the regularly assigned class hours.

The Saturday morning schedule of the third and fourth years includes lectures and clinical conferences which are assigned to the departments of the School of Medicine.

ELECTIVE COURSES

Approximately 25 per cent of the available class hours in each year is left unscheduled in the required curriculum, thus providing students with time in which they may elect work in areas of special interest. In the first and second years, Tuesday and Thursday afternoons are unscheduled throughout the year. In the fourth year, a block of six weeks is available for required electives. Information concerning elective course offerings is available at the Dean's Office.

GENERAL PRACTICE EXTERNSHIP

The general practice externship is available as an elective to fourth-year students. Periods of two to six weeks may be spent with a general physician engaged

actively in practice in the Pacific Northwest area. During this time the student lives in the home of the physician preceptor, accompanies him in his medical work in his office, at the hospital, and on sick calls in the homes of patients. This affords the student first-hand knowledge of the life and work of the family doctor and gives him a type of teaching which he may not get on his clinical clerkships. The student also has an opportunity to see the role which the physician plays as a citizen in his own community.

MEDICAL THESIS PROGRAM

The medical thesis program of the School of Medicine is voluntary, and participation in it is initiated by the student. Often a student will become especially interested in some particular field in medicine. This interest will lead him to a desire to learn more about the field or to do special work in it. The thesis program is a means of fulfilling his desire. A prize is awarded for the best thesis submitted each year, and certain departments have available prizes for the best thesis written under that department's supervision. The preparation of a satisfactory thesis generally carries with it honors in the department. Further information concerning the thesis program may be obtained from the chairman of the Medical Thesis Committee or from the Dean's Office.

HONORS

MEDICAL STUDENTS HONORS DAY

Medical Students Honors Day is held late in the spring of each year under the auspices of the Scholarship Committee. It provides an opportunity for selected students to present formally the results of their investigations to the students and faculty of the School of Medicine. Various scholarships, awards, and research fellowships are granted on this occasion.

ALPHA OMEGA ALPHA

A charter as Alpha of Washington was granted to the School of Medicine in 1950 by Alpha Omega Alpha, the honorary medical fraternity. Members are elected by the membership of Alpha Omega Alpha on the basis of high scholarship and good moral character.

AWARDS AND PRIZES

NORMAN W. CLEIN THESIS AWARD. An award of \$100 is given for the best thesis written by a graduating senior as determined by the Thesis Committee.

DR. EVERETT O. JONES SCHOLARSHIP PRIZES. Prizes of \$100 are awarded students who have demonstrated outstanding scholarship each year.

O'DONNELL AWARD. An annual award of \$100 was established by Margaret H. O'Donnell in 1952 to be awarded by the Department of Psychiatry to the senior medical student who has done outstanding academic and creative work in psychiatry.

FREDERICK C. MOLL PRIZE IN PEDIATRICS. An annual award of \$100 was established by Margaret H. O'Donnell in 1957 to be awarded to the senior medical student who has done outstanding work in the field of pediatrics.

MEDICAL AUXILIARY SCHOLARSHIP PRIZE. The Medical auxiliary of the University of Washington School of Medicine contributes an annual scholarship prize of \$100 to an outstanding student.

MEDICAL MRS. PRIZE. The Medical Mrs., an organization of students' wives, offers a scholarship prize of \$200 annually to the outstanding junior.

NU SIGMA NU BASIC MEDICAL RESEARCH AWARD. An award of \$100 is given annually by the Beta Chapter of Nu Sigma Nu Medical Fraternity to an underclassman, preferably a second year student, who, in the opinion of the Scholarship Committee, demonstrates superior ability in basic medical research.

FIRST-YEAR SCHEDULE 1962-63

Autumn Quarter

Hour	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY
8:30	Psych. 400	Anat. 405-	Anat. 405-	Anat. 401-	Anat. 404	Unassigned

THIRD-YEAR CLERKSHIP SCHEDULE 1962-63

	Term I		Term II		Term III		Term IV		June 2-9	June 10-14
Sections	Sept. 24-Nov. 21		Nov. 23-Jan. 30		Jan. 31-Apr. 2		Apr. 3-June 1		R E A D I N G P E R I O D	E X A M I N A T I O N S
Section A ¼ of class	Medicine Clerkship		Medicine Clerkship	Psychiatry Clerkship	Surgery Clerkship		Pediatrics Clerkship			
Section B ¼ of class	Medicine Clerkship	Psychiatry Clerkship	Surgery Clerkship		Pediatrics Clerkship		Medicine Clerkship			
Section C ¼ of class	Surgery Clerkship		Pediatrics Clerkship		Medicine Clerkship		Medicine Clerkship	Psychiatry Clerkship		
Section D ¼ of class	Pediatrics Clerkship		Medicine Clerkship		Medicine Clerkship	Psychiatry Clerkship	Surgery Clerkship			

THIRD-YEAR LECTURE SCHEDULE 1962-63

Lectures for third year are confined to Saturday mornings in which all clinical departments take part, calling in basic science departments on certain problems. Many of the lectures are the conjoint treatment of a subject by more than one department.

FOURTH-YEAR CLERKSHIP SCHEDULE 1962-63

	Term I				Term II			Term III			June 10-14	
Sections	Sept. 24-Dec. 15				Dec. 17-March 16			March 18-June 8			E X A M I N A T I O N S	
Section A ¼ of class	Medicine Psychiatry Preventive Medicine Pediatrics				Electives		Selected Surgical Specialties		Obstetrics- Gynecology	Obstetrics- Gynecology		Anesthesiology Phys. Med. & Rehab. Pediatrics
Section B ¼ of class	Electives		Selected Surgical Specialties		Obstetrics- Gynecology	Obstetrics- Gynecology	Anesthesiology Phys. Med. & Rehab. Pediatrics		Medicine Psychiatry Preventive Medicine Pediatrics			
Section C ¼ of class	Obstetrics- Gynecology	Obstetrics- Gynecology	Anesthesiology Phys. Med. & Rehab. Pediatrics		Medicine Psychiatry Preventive Medicine Pediatrics			Electives		Selected Surgical Specialties		

Medical Practice 483—Hospital Extension Service. Each student is responsible for an assigned number of home care cases throughout the year under the guidance of an instructor.

FOURTH-YEAR SCHEDULE 1962-63

Lectures for fourth year are confined to Saturday mornings in which all clinical departments take part, calling in basic science departments on certain problems. Many of the lectures are the conjoint treatment of a subject by more than one department.

AWARDS AND PRIZES (Cont'd)

PHI DELTA EPSILON AWARD. An annual award of \$100 to the outstanding graduating senior, selected by the Scholarship Committee, was established by the Phi Delta Epsilon Graduate Club in 1954.

ROCHE AWARD. An annual award of a gold Omega watch is given by the Hoffman-LaRoche Company to the sophomore who has shown outstanding scholarship, character, personality, and seriousness of purpose during his first two years in the study of medicine.

SEATTLE GYNECOLOGICAL SOCIETY PRIZE. The Seattle Gynecological Society in 1960 established an annual award of \$250 for outstanding achievement in obstetrics and gynecology by a senior student.

SEATTLE SURGICAL SOCIETY PRIZE. The Seattle Surgical Society in 1961 established an annual award of \$250 for outstanding achievement in surgery by a senior student.

SCHOLARSHIPS

Stipends of the various scholarships listed below range from full tuition and fees (\$525) to larger amounts sufficient to cover the entire financial needs of the student through four years of medical school. (See page 51 for method of application.)

A number of four-year scholarships have been established for the purposes of meeting the full needs of especially gifted and promising students who would otherwise be unable to finance their medical education. Continuance of the scholarship is contingent upon satisfactory scholastic standing.

AVALON FOUNDATION. The Avalon Foundation has made available \$10,000 for medical scholarships for the year 1962-63.

JOHN BYRNE MEMORIAL SCHOLARSHIP. An annual scholarship for a medical student of tuition costs was established in 1949 by Mr. C. J. Byrne in memory of John Byrne.

ANNA C. DUNLAP SCHOLARSHIP FUND. In order to provide financial assistance to medical students interested in the fields of cancer, diseases of the heart, children's diseases, and nervous diseases, the late Anna C. Dunlap established a trust fund, the income of which is to be used for scholarships for medical students. Recipients of the scholarships must have completed at least the first year in medical school and have demonstrated personal and scholastic worthiness. They must be industrious, and give promise of useful citizenship. Special consideration will be given to students who are self-supporting.

GROUP HEALTH COOPERATIVE SCHOLARSHIP. An annual scholarship to cover tuition and fees for a worthy medical student whose residence is in the state of Washington is offered through the generosity of the Group Health Cooperative of Puget Sound.

DR. EVERETT O. JONES SCHOLARSHIP AND LOAN FUND. Under the terms of a trust created by the late Dr. Everett O. Jones, pioneer Seattle surgeon, the annual net income from the estate is given to the University of Washington to provide scholarships and loans to worthy students in the School of Medicine.

HELEN M. RUSSELL FUND. This fund for medical students was established in 1954 through a bequest of the estate of Helen M. Russell.

SPOKANE EXCLUSIVE PRESCRIPTION PHARMACIES MEDICAL SCHOLARSHIP. An annual scholarship was established by four Spokane pharmacies (Cowen's Pharmacy, Hart and Dilatush, Inc., Miller and Felt Pharmacy, and Whitlock's Pharmacy) to be given to a deserving medical student, preferably from the Spokane area.

EDWARD L. TURNER SCHOLARSHIP AND LOAN FUND. This fund for medical students was established by faculty, students, and friends in 1953 in honor of the late Dr. Edward L. Turner, first Dean of the University of Washington School of Medicine.

JOHN AND MARY WILSON FOUNDATION. Under terms of a trust created by the late Mary Wilson, the net income from the fund is used for scholarships for medical students. Awards are made on the basis of character and scholarship.

NATIONAL FOUNDATION SCHOLARSHIPS. Scholarships for students in the health fields are available through the National Foundation, 800 Second Avenue, New York 17, New York. Application should be made directly.

FELLOWSHIPS FOR THE SUMMER MONTHS

Each year a considerable number of research fellowships carrying stipends of \$500 to \$1200 are available to provide qualified medical students with the opportunity to engage in investigative work during the summer recess. The smaller stipends are frequently supplemented by funds from other sources. In special cases the fellowship may carry on through the year on a reduced stipend.

The available fellowships and their sources are listed below.

From Individuals

WILLIAM B. BRADSHAW TRUST FUND. This fund was established in 1955 to provide an annual fellowship award for research in epilepsy or other disorders of the central nervous system. One fellowship is awarded each year.

JULIA H. LANE FOUNDATION. In 1955, a living trust for medical students of the University of Washington was established to provide funds for summer research fellowships, student loans, counseling service for premedical students, and research in the various medical fields such as rehabilitation, diseases of ageing, etc. Three or four fellowships are awarded each year.

From National Institutes of Health

Forty-five Medical Student Research Training Grant Fellowships: field unrestricted. Fellowships in specialties supported by various training grants.

From Foundations

One Allergy Foundation of America Fellowship: field restricted to allergy; applicants must have completed second year of medicine.

From Pharmaceutical Houses

Two Lederle Medical Student Research Fellowships: field restricted to basic sciences. Two Smith, Kline, and French Fellowships: field restricted to psychiatry.

From Industry

One Tobacco Industry Research Fellowship: field unrestricted.

FELLOWSHIPS FOR A FULL YEAR

A few suitably qualified students may wish to interrupt their formal medical education to gain experience in research. Such students are often gifted in research and later choose a research career.

In order to encourage such students, a post-sophomore fellowship program has been established. Although the drop-out period permitted is one to three years, most post-sophomore fellows elect a period of one year. Six of these fellowships are available from the Medical Student Research Training Grant. They carry a tax-free stipend of \$3,200 plus an allowance of \$350 for each dependent and tuition.

RESEARCH AND TRAINING GRANTS

Each year grants from various public and private sources are received by individual faculty members and by the School of Medicine to support medical research and training in teaching and research. Extensive training programs, supported largely by the National Institutes of Health, provide training in teaching and research to individuals at the undergraduate, graduate, and postdoctoral levels including both premedical and medical students.

In 1961, grant expenditures in the School of Medicine for research projects totaled \$3,378,000, including \$778,000 in training grants.

THE DEPARTMENTAL PROGRAMS

THE DEPARTMENTAL PROGRAMS

THE SCHOOL OF MEDICINE through its departments and inter-departmental programs offers curricula leading to the degrees of Doctor of Medicine and Bachelor of Science in Physical Therapy and in Occupational Therapy and graduate study leading to the degrees of Master of Science and Doctor of Philosophy in accordance with the requirements of the Graduate School.

DEGREES

DOCTOR OF MEDICINE. Upon completion of the four-year curriculum of the School of Medicine, the M.D. degree is awarded to candidates who have (1) given evidence of good moral character; (2) completed the last two years of medical training as regularly matriculated students in the School of Medicine; (3) satisfactorily completed the required work throughout the course; (4) fulfilled all special requirements; and (5) discharged all indebtedness to the University.

DOCTOR OF MEDICINE WITH HONOR. Those students who meet the above requirements and whose work places them in the highest ten per cent of the graduating class receive a Doctor of Medicine with honor.

BACHELOR OF SCIENCE. A curriculum leading to a bachelor's degree with a major in preventive medicine is offered for students in the College of Arts and Sciences. Professional courses in the curriculum are given by the Department of Preventive Medicine in the School of Medicine. Public health students may choose an option in environmental health, biometry, or health education. The professional courses are described in this Bulletin, along with other courses offered by the Department of Public Health and Preventive Medicine, and the curriculum is described in the *College of Arts and Sciences Bulletin*.

A curriculum leading to a bachelor's degree with a major in microbiology is offered through the College of Arts and Sciences. Microbiology courses are described in this Bulletin, and the curriculum is described in the *College of Arts and Sciences Bulletin*.

BACHELOR OF SCIENCE IN MEDICAL TECHNOLOGY. The medical technology program is designed to train young men and women to be professional workers in hospital, clinic, public health, and medical research laboratories. The prescribed preparatory program consists of three years of regular university training with emphasis upon certain courses in chemistry and biology. This is followed by an eighteen-month

period of full-time instruction and training in medical technology itself. Information concerning curriculum and admission to the program in medical technology may be found under the Department of Pathology (see page 72).

BACHELOR OF SCIENCE IN PHYSICAL THERAPY. A curriculum in physical therapy is offered by the Department of Physical Medicine and Rehabilitation in the School of Medicine. It provides professional training in the basic sciences and the clinical use of accepted physical therapy modalities and procedures. Information concerning admission to physical therapy and its curriculum may be found under the Department of Physical Medicine and Rehabilitation (see page 87).

BACHELOR OF SCIENCE IN OCCUPATIONAL THERAPY. A curriculum in occupational therapy is offered by the Department of Physical Medicine and Rehabilitation in the School of Medicine. It provides professional training in the basic sciences and the clinical use of occupational therapy. Information concerning admission to occupational therapy and its curriculum may be found under the Department of Physical Medicine and Rehabilitation (see page 85).

MASTER OF SCIENCE AND DOCTOR OF PHILOSOPHY. Work leading to master degrees and Doctor of Philosophy degrees is offered, in accordance with the requirements of the Graduate School, in the Departments of Anatomy, Biochemistry, Microbiology, Pathology, Pharmacology, Physiology and Biophysics. A master's degree program is offered by the Department of Surgery.

Students who intend to work toward one of these degrees should confer with the chairman of the department in which they intend to major. Specific requirements for admission to candidacy for advanced degrees are given in the *Graduate School Bulletin*.

LICENSURE

Admission to the practice of medicine in any state is conditional upon the requirements of a state board of medical examiners. Admission to practice in the state of Washington is dependent upon the candidate's having an M.D. degree, completing a one-year rotating internship, and passing the basic science and licensing examinations. For candidates who are already licensed to practice in another state, the licensing examination may be waived by reciprocity with that state or with the National Board of Medical Examiners. In some instances completion of the basic science requirements may be arranged by reciprocity also.

Further information about licensure requirements may be obtained from the State Department of Licenses, Professional Division, Olympia, Washington.

POSTGRADUATE MEDICAL EDUCATION

INTERNSHIPS AND RESIDENCIES

Internships of one-year duration in clinical medicine are available at the University Hospital, the King County Hospital, and the Children's Orthopedic Hospital. All clinical departments participate in the training program for interns in one or more of these institutions. Residency training programs are available in the clinical fields of anesthesiology, cardiology, general surgery, medicine, neurology, neurosurgery, obstetrics, gynecology, orthopedic surgery, pathology, pediatrics, physical medicine and rehabilitation, psychiatry, radiology, and urology. The residency programs vary in duration from two to five years and are integrated, providing for rotation through several of the University affiliated hospitals during this period of training.

POSTDOCTORAL FELLOWSHIPS AND TRAINEESHIPS

Postdoctoral fellowships and traineeships are available in all basic health sciences and clinical departments. They are designed to provide further research and teaching experience for the advanced student who has already obtained his Ph.D. or M.D. degree.

CONTINUING EDUCATION

The School of Medicine functions as a center for continuing medical education for physicians in the region. A series of short courses (in general extending from one day to one week) designed primarily for the general physician is offered at various times throughout the year. The clinical faculty, with the assistance of basic science investigators, plans and gives courses which provide the practicing physician with an opportunity to review fundamental concepts and to go into recent advances in diagnosis and treatment in some depth in specialized fields, such as cardiology, electrolyte and fluid balance, gastroenterology, hematology, infectious diseases, neurology, metabolism, allergy, practical psychiatry, emotional problems in children, gynecologic and obstetric endocrinology, and so forth.

The School cooperates with the Washington State Department of Health and other governmental agencies, physicians' organizations, and voluntary organizations in developing refresher courses in cancer, diseases of the heart, diabetes, alcoholism, safety, and so forth.

Physicians are always welcome to participate in the regular rounds and conferences scheduled in the University Hospital and clinics and the hospitals affiliated with the University in the teaching program.

Refresher courses are extended to other health professions such as medical technologists, physical therapists, and occupational therapists.

Detailed information about such instruction is given in announcements describing the specific courses, the times they are scheduled, the number of students accepted, and the tuition fees.

CONTINUOUS COURSES

The courses listed below are offered throughout the school year.

GROSS ANATOMICAL DISSECTION. Physicians who desire additional individual experience in the dissection of the entire cadaver or parts thereof may make arrangements through the Division of Postgraduate Medical Education and the Department of Anatomy. Laboratory space and anatomical material will be provided (no staff participation).

The fees are in proportion to the amount of gross material supplied.

REVIEW FOR SPECIALTY BOARDS. Physicians who want to review material in preparation for specialty boards may study gross and microscopic material, with descriptions, in the departmental laboratories. Desk space and microscopes are available. This is not a course but a program of individual study, which may be arranged in accordance with individual needs. Inquiries should be directed to the Department of Pathology.

COURSE-NUMBERING SYSTEM

First-year courses for medical students are numbered from 400 to 424, second-year courses from 425 to 449, third-year courses from 450 to 474, and fourth-year courses from 475 to 499. Courses numbered below 400 are given for students in other University curricula, and those numbered 500 and above are open only to students in the Graduate School.

The number in parentheses following the course title indicates the amount of credit each course carries. In most lecture courses a credit is given for each class hour a week during a quarter; laboratory courses generally carry less credit than the work time required. An asterisk in place of a credit number means that the amount of credit is variable. Hyphens between course numbers mean that credit is not granted until the series of courses is completed.

Not all of these courses are offered every quarter. Final confirmation of courses to be offered, as well as a list of times and places of class meetings, is given in the *Yearly Time Schedule*.

BASIC HEALTH SCIENCES

ANATOMY

Chairman: N. B. EVERETT, G511 Health Sciences Building

In the Department of Anatomy, instruction is given in gross human anatomy, microscopic anatomy, submicroscopic anatomy, embryology, and neurology so as to present an orderly picture of the structural organization of the body. Opportunities are afforded for advanced work and investigation in these subjects.

Students who intend to work toward a degree of Master of Science or Doctor of Philosophy must meet the requirements of the Graduate School as outlined in the *Graduate School Bulletin*.

COURSES

- 301 General Anatomy (4)**
Elementary work in human anatomy with lectures, correlated laboratories, and demonstrations. For health education, anthropology, physical education, speech students, and medical technicians; others by permission. Not open to premedical, pre dental, or nursing students.
- Conjoint 317-318 Elementary Anatomy and Physiology (6-6) (See Conjoint Courses, page 78.)**
- 328, 329 Gross Anatomy (6,4)**
Lectures and dissection. The first quarter is devoted to a study of the entire human body except the head and neck areas, with emphasis on the thoracic and abdominal regions, and the second quarter to an intensive study of the head and neck areas. For dental students; others by permission.
- 330 Microscopic Anatomy (4)**
Lecture and laboratory work in microscopic anatomy. For dental students; others by permission.
- 331 Neuroanatomy (2)**
Lecture and laboratory work in neuroanatomy. For dental students; others by permission.
- Conjoint 350-351 Human Function and Structure (6-6) (See Conjoint Courses, page 78.)**
- 401-402-403 Gross Anatomy (8-4-4)** **Bassett**
Intensive lectures and dissection accompanied by roentgenographic demonstrations. Study of the entire human body except the brain and spinal cord. Required for first-year medical students. Prerequisite for nonmedical students, permission.
- 404 Human Embryology (3)** **Blandau**
Lectures and laboratory demonstrations covering the development of the human embryo and fetus, with emphasis on abnormal development; special attention to problems of maturation, fertilization, and physiology of the gametes. Required for first-year medical students. Prerequisite for nonmedical students, permission.
- 405-406 Microscopic and Submicroscopic Anatomy (4-4)**
Essentials of microscopic, submicroscopic, and chemical anatomy. Required for first-year medical students. Prerequisite for nonmedical students, permission.
- Conjoint 409 Basis of Neurology (3,5, or 8) (See Conjoint Courses, page 78.)**
- 440 Special Topics in Dissection (1,2, maximum 6)** **Bassett**
Individual work in dissection and study of selected regions of the body. Prerequisite, permission.
- 444 History of the Morphological Sciences (2-3)** **Bodemer**
Growth of animal morphology from antiquity through the nineteenth century, emphasizing development of biological ideas, methodology and other influences contributing to modern disciplines. Prerequisite, permission.
- 498 Undergraduate Thesis(*)**
For medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)**
For medical students. Prerequisite, permission.
- 505 Advanced General Histology (3)** **Roosen-Runge, Wood**
Comparative study of tissues in selected phyla of vertebrates and invertebrates. Prerequisite, 330, 405 or permission.
- 510 Cytochemistry (4)**
The finer distribution of chemical substances in cells and tissues; methods of cytochemistry and their theoretical basis and validity. Prerequisite, permission.
- 515 Biological X-ray Structure Analysis (3)** **Jensen**
Theory of X-ray diffraction, with emphasis on applications to biological systems. Prerequisite, permission.
- 518 Developmental Neurology (2)** **Bodemer**
Detailed consideration of the problems of development, growth, and regeneration of the nervous system and its functions. (Offered Winter Quarter, 1964.) Prerequisite, Zoology 456 or equivalent.

- 521 Seminar in Molecular and Submicroscopic Anatomy (2)** **Luft, Wood**
The molecular and micellar basis of bodily structure. Prerequisite, permission.
- 525 Brain Dissection (2)** **Everett**
A detailed consideration of the macroscopic anatomy of the human brain. Prerequisite, permission.
- 530 Biological Tracer Techniques (2)** **Everett, Rieko**
Techniques of using radioactive isotopes as tracers in biological research. Prerequisite, permission.
- 531, 532, 533 Electron Microscopy (2-5, 2-5, 2-5)** **Luft**
Theoretical and practical aspects of electron microscopy of biological material, including electron diffraction. Prerequisites, 405-406 or permission.
- 540 Embryology of the Heart (2)** **Blandau**
A detailed study of the embryology of the heart and great vessels during the first eight weeks of life. (Offered Winter Quarter, 1964.) Prerequisite, 404.
- 550 Biological Polarization Microscopy (4)**
Theory, technique, and application of polarization microscopy in biological studies. Prerequisite, permission.
- 555 Mammalian Reproduction (3)** **Blandau, Roosen-Runge**
Fundamental processes of reproductive anatomy and physiology of laboratory animals. Prerequisite, permission.
- 557 Seminar (1-3, maximum 9)**
Prerequisite, permission.
- Conjoint 585 Surgical Anatomy (2-4, maximum 12) (See Conjoint Courses, page 78.)**

COURSES FOR GRADUATES ONLY

- 600 Research (*)**
Prerequisite, permission.
- 700 Thesis (*)**

BIOCHEMISTRY

Chairman: HANS NEURATH, C408 Health Sciences Building

Biochemistry is the study of the chemical structure and properties of substances important to animal and plant life and of the chemical processes of living systems. Training in biochemistry begins at the advanced undergraduate or graduate level, and studies toward the degree of Doctor of Philosophy are recommended for students planning a career in this field. The course of advanced study is designed to give each student a firm foundation upon which to base further professional progress. Biochemists occupy positions in academic teaching and research institutions, in hospitals, and in industry and government laboratories.

The Department offers courses in basic biochemistry for students in various areas of study in the University, including the natural sciences, medicine, dentistry, and others. The laboratories of the Department are excellently equipped for modern biochemical research. Students who intend to work toward a degree of Master of Science, or Doctor of Philosophy must meet the requirements of the Graduate School as outlined in the *Graduate School Bulletin*. They must present a bachelor's degree with a major in chemistry or its equivalent, and should have some background in biology. Applicants should communicate with the Chairman of the Department before registration.

COURSES

- 361 Biochemistry (3)**
An introductory one-quarter course in general biochemistry covering basic principles, including the structure and metabolism of biologically important compounds. For students in dentistry, home economics, medical technology, pharmacy, and others. Prerequisite, Chemistry 102 or 232.
- 362 Biochemistry Laboratory (3)**
Laboratory exercises and conferences. Certain experimental aspects of biochemistry of special interest to dental students are considered. For dental students. Prerequisite, 361, which may be taken concurrently.

- 363 Biochemistry Laboratory (2)**
Laboratory exercises in general biochemistry for students in home economics, medical technology, and others by permission. Prerequisite, 361, which may be taken concurrently.
- 401, 402 Biochemistry (5,3)**
Lectures and conferences in the first quarter cover the fundamentals of biochemistry. The second quarter emphasizes metabolism in man. Required for first-year medical students; open to a limited number of students with allied interests. Prerequisites, Chemistry 242 for 401; 401 for 402; and permission.
- 403 Biochemistry Laboratory (3)**
Required for first-year medical students; open to a limited number of students with allied interests. Prerequisites, 401 and 402, and permission.
- 420 Seminar on Biochemistry Literature (1)**
A survey of current biochemical literature. Required of all first-year graduate students in biochemistry.
- 481, 482, 483 Biochemistry (3,3,3)**
Lectures and conferences cover the fundamentals of biochemistry with emphasis upon chemical structure, enzymatic reactions, intermediary metabolism and biochemistry of physiological functions. Recommended for advanced undergraduate or graduate students of chemistry, biochemistry, and various biological sciences. Prerequisites, Chemistry 337 for 481; 481 or permission for 482; 482 or permission for 483; introductory physical chemistry is recommended.
- 484 Biochemistry Laboratory (3)**
Laboratory projects and conferences. For students of biochemistry, chemistry, and various biological sciences. Prerequisites, 481 and 482; the latter course to be taken concurrently.
- 498 Undergraduate Thesis (*)**
For senior medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)**
Investigative work on enzymes, proteins, lipides, intermediary metabolism, physical biochemistry, and related fields. Prerequisite, permission.

COURSES FOR GRADUATES ONLY

- 520 Seminar (1-3, maximum 9)**
Prerequisite, permission.
- 562 Physical Biochemistry (2)**
This course acquaints the student with certain specialized applications of physical chemistry and their use in biochemical research. Quantitative aspects of methods especially applicable to the study of high molecular weight compounds and systems of biological interests are considered. (Offered 1963-64.) Prerequisites, 483 and Chemistry 357 or permission.
- 563, 564 Proteins (2,2)** **Neurath, Wilcox**
The chemistry and biological activity of proteins are considered from the viewpoints of the properties of protein solutions, molecular structure, and biological function. Proteins found in a wide variety of tissues, both plant and animal, are discussed. (Offered 1963-64.) Prerequisites, 562 or permission for 563; 563 for 564.
- 565, 566, 567 Enzymes and Enzyme Action (2,2,2)**
Preparation and properties of enzymes and enzyme systems, including methods of measurement, kinetic analysis, and theory of enzyme catalysis; classification and properties of individual enzymes, coenzymes, and enzyme systems. (Offered 1964-65.) Prerequisites, 483 and Chemistry 357, or permission for 565; 565 for 566; 566 for 567.
- 568 Biochemistry of Lipides (2)** **Hanahan**
The structure and metabolism of sterols, steroids, fatty acids, and the complex lipides will be treated on an advanced level. (Offered Autumn Quarter, 1962.) Prerequisite, 402 or 482 or permission.
- 569 Biochemistry of Nucleic Acids (2)** **Gordon**
Chemistry and structure of nucleic acids, enzymes active on nucleic acids, and the biosynthesis and metabolism of the components of nucleic acids are considered. Current concepts of the replication of nucleic acids including the infectivity of viruses will be discussed. (Offered Winter Quarter, 1963.) Prerequisite, permission.
- 570 Topics in Mammalian Biochemistry (2)** **Krebs**
An advanced treatment of topics related to metabolism in the intact animal; organ function, body pools, hormonal control, energy balance, nitrogen balance, and nutrition. Biochemical changes in certain diseases are discussed. (Offered Spring Quarter, 1963.) Prerequisite, 402 or 482, or permission.
- 583 Advanced Biochemistry Laboratory (4)**
Biochemical preparations and investigations of physical and chemical properties by special techniques, including spectrophotometry, polarimetry, ultracentrifuge, electrophoresis, isotope tracer applications, etc. Prerequisites, 484 and permission.
- 600 Research (*)**
Prerequisite, permission.
- 700 Thesis (*)**

MICROBIOLOGY

Chairman: **CHARLES A. EVANS, G305 Health Sciences Building**

Microbiology is the science of microscopic organisms, their biological characteristics, chemical activities, industrial uses, and disease-producing mechanisms. The related fields concerned with parasites, viruses, and immunity are included in the work of this Department.

In addition to courses for medical students, the Department of Microbiology offers programs in microbiology leading to a bachelor's degree in the College of Arts and Sciences. The purpose of the undergraduate degree is to prepare the individual to assume the responsibilities of a microbiologist upon graduation and to provide him with the background which will permit him to study for an advanced degree if his capabilities warrant it. Students who intend to work toward a degree of Master of Science or Doctor of Philosophy must meet the requirements of the Graduate School as outlined in the *Graduate School Bulletin*. The fields of specialization for advanced degrees are general and medical bacteriology, immunology, parasitology, medical mycology, virology, and physiology of bacteria. Course requirements vary according to the field chosen.

COURSES

- 201 Topics in Microbiology (3)** **Spotts**
Selected topics in microbiology: a course for nonscience majors based on topics of special value for understanding the nature of science, biological phenomena of broad significance, or the nature of microbial processes to man.
- 235 Microbiology for Students of Dentistry (7)** **Holland**
Lecture and laboratory introducing the student to the principles of microbiology. Infectious microorganisms and the flora of the mouth are emphasized. Required for second-year dental students. Students who have had previous training in microbiology may substitute a research problem for the laboratory work. Prerequisite, for nondental students, permission.
- 301 General Microbiology (5)** **Nester**
Microorganisms and their activities. For students of pharmacy, dental hygiene, nursing, home economics, education, and others interested in a one-quarter survey course, with minimal training in chemistry. Prerequisite, two quarters of general chemistry.
- 320 Media Preparation (*, maximum 5)** **Duchow**
Practical work in the preparation of culture media and solutions. Nutritional requirements of microorganisms are considered. For students expecting to enter vocations involving laboratory work with bacteria. Prerequisites, 301 or equivalent and permission.
- 322 Applied Bacteriology (5)** **Sherris**
Practical experience in a public health or clinical laboratory; fifteen hours per week. For students majoring in medical microbiology. Prerequisite, 441-442 or equivalent, and permission.
- 400 Fundamentals of Bacteriology (*, maximum 6)** **Douglas, Ordal**
Basic bacteriology; comparative morphology, taxonomy, physiology of bacteria. For students majoring in microbiology and others interested chiefly in the biological and chemical aspects of microbes. Required for students majoring in microbiology. Recommended for graduate students in biochemistry or biology. Prerequisites, 10 credits in organic chemistry, 10 credits in botany or zoology, and permission.
- 430 Microbial Metabolism (3 or 5)** **Douglas**
The major patterns of fermentative and oxidative metabolism of yeasts and bacteria. For students majoring in microbiology or food science. Prerequisites, 400 or 301, and Chemistry 221 and 232.
- 441-442 Medical Bacteriology, Virology, and Immunology (*, maximum 5-, *, maximum 5)** **Evans, Groman, Henry, Sherris, Weiser**
441- includes a brief survey of general bacteriology and virology; an introduction to immunology, formation and properties of antibodies, nature of antigen-antibody reactions, blood groups, allergies, and an analysis of factors of innate and acquired immunity. During the last part of 441- and throughout 442, specific pathogenic bacteria and viruses are studied in detail. Students who have had previous work in bacteriology may by special permission be allowed to take 441- or 442 for less than the full 5 credits. Required for second-year medical students. Open to upper-division undergraduates and graduate students. Prerequisites, 10 credits in organic chemistry, 10 credits in botany or zoology, and permission.
- 443 Medical Mycology (*, maximum 2)** **Henry**
Consideration of morphology, physiology, immunology, and epidemiology of the medically important fungi. Offered three weeks of quarter. Required for second-year medical students. Open to upper-division undergraduates and graduate students. Prerequisites, 441-442 or equivalent, and permission.

- 444 Medical Parasitology (*, maximum 4)** **Groman**
Consideration of medically important parasites with emphasis on their biology in relation to the production and prevention of disease. Offered eight weeks of quarter. Required for second-year medical students. Open to upper-division undergraduates and graduate students. Prerequisites, 441-442 or equivalent, and permission.
- 498 Undergraduate Thesis (*)**
For medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)**
Specific problems in industrial, medical, and general microbiology. Prerequisites, senior standing and permission.

COURSES FOR GRADUATES ONLY

- 510 Physiology of Bacteria (3)** **Whiteley**
Fundamental physiological and metabolic processes of bacteria. (Offered alternate years; offered 1963-64.) Prerequisite, permission of instructor.
- 520 Seminar (1)**
- 530 Comparative Morphology and Physiology of the Higher Bacteria (4)** **Ordal**
Enrichment, isolation, and comparative morphology and physiology of selected representatives of the following groups of bacteria: Nitrobacteriaceae, Rhodobacteriaceae, Caulobacteriaceae, Actinomycetales, Myxobacteriales, Chlamydobacteriales, Caryophanales, and Borrelomycetaceae. (Offered alternate years; offered 1963-64.) Prerequisite, permission.
- 540 Virology (*, maximum 4)** **Evans, Groman, Holland**
Prerequisite, permission. (Offered alternate years; offered 1963-64.)
- 550 Advanced Immunology (*, maximum 4)** **Weiser**
(Offered alternate years; offered 1962-63.) Prerequisites, 441- and permission.
- 600 Research (*)**
- 700 Thesis (*)**

PATHOLOGY

Chairman: EARL P. BENDITT, D505 Health Sciences Building

Pathology is the study of disease processes. The functional manifestations of disease are the expression of underlying morphological and chemical aberrations. Hence, the study of disease involves the application of a wide variety of techniques such as electron microscopy, histo- and cytochemistry, and others, along with the use of advanced concepts of modern biological investigation.

Courses are offered for medical students, dental students, and other students of the health sciences. A program leading to the degree of Doctor of Philosophy in Experimental Pathology is offered through the Graduate School to qualified individuals. Postdoctoral training for qualified persons is also offered in Pathology.

A curriculum leading to the degree of Bachelor of Science in Medical Technology is provided in the Department of Pathology. This curriculum is offered through the College of Arts and Sciences.

COURSES

- 231 General Pathology (5)** **Sreebny, Ross**
This course is open to dental students and to selected graduate students in the basic sciences. The objective is to cover in a more brief form the basic work covered in detail in 441-, 442-, and 443. The method of presentation is therefore the same as in those courses. A reasonable knowledge of gross and microscopic anatomy, physiology, and biochemistry is essential to understand the principles underlying the fundamental alterations in tissues and organs in disease processes and the results of these changes. While the general tissue and systemic manifestations are considered by-processes, the applications of these diseases to the mouth, teeth, and neck are particularly stressed. For dental students; graduate students by permission.
- 310 General Pathology (2)** **Wiegenstein**
Study of causes, processes, and effects of important diseases. Lectures, demonstrations, and discussions. A reasonable knowledge of anatomy, histology, and physiology is required. For students of dental hygiene, physical therapy, and medical technology; others by permission.
- 321 Medical Technology (5)** **Smuckler, Lagunoff, Hougie**
The first half of the course is devoted to the principles and practice of histological, histochemical and electron microscopic tissue technic; the second half is devoted to hematology. (Offered Summer Quarter only.) Prerequisite, permission.

- 322- Medical Technology (6-)** **Smuckler**
Clinical Chemistry I. Completion of three years prescribed curriculum.
- 323- Medical Technology (-6-)** **Smuckler**
Clinical Chemistry II. Prerequisite, permission.
- 424- Medical Technology (-6-)** **Smuckler**
Clinical Chemistry III, assigned projects. Prerequisite, permission.
- 425 Medical Technology (-6)** **Smuckler**
Internship I. Prerequisite, permission.
- 426 Medical Technology (16)** **Smuckler**
Internship II. Prerequisite, permission.
- 430 Autopsy Participation and Review (*)**
Course consists of medical student participation and review of autopsy cases. Autopsies will be done at one of the four hospitals: University Hospital, King County, Veterans Administration, and Children's Orthopedic. Elective open to second-year medical students.
- 431 Microscopic Autopsy Review (*)**
The slides from interesting autopsies will be reviewed by the students individually and then with the instructor. Clinical correlation will be stressed. Elective open to second-year medical students. Limited to ten students.
- 432 Cardiovascular Pathology Conference (*)** **Reichenbach**
This course consists of two parts, a combined medical, surgical, and radiological conference on selected cardiovascular topics by members of the faculty or guest speakers, followed by laboratory review of gross and microscopic cardiovascular pathology. Elective open to first- and second-year medical students. Limited to two students.
- 441- General Pathology (6-)** **Benditt, Prehn**
The purpose of this course is to introduce the student to the basic concepts and the principal pathologic processes. This is achieved by the combination of lectures, laboratory, and demonstrations of human pathologic material and experimentally produced disease. In addition, participation in autopsies by small groups of students is part of the program. This and a demonstration of pathologic specimens in the gross is programmed primarily in the one afternoon session. For medical students; graduate students by permission. A suitable knowledge of anatomy, including histology, physiology, and biochemistry is required. Autopsy session is not required for graduate students. For second-year medical students; graduate students by permission.
- 442-443 Special Pathology (-5-5)** **Mottet, Alvord**
Presents a coherent, systematic survey of the pathological processes affecting each organ system. A detailed review of specific diseases is correlated with basic science information. An attempt is made to present the biology of disease as it affects man. Prerequisite, 441- or equivalent.
- Conjoint 446-447 Laboratory Procedures (4-2) (See Conjoint Courses, page 78.)**
- 470 Surgical Pathology (*)** **Mottet**
Students participate in this course during the period in which they are taking the regular course work in surgery. The objective is to demonstrate fresh gross surgical material and to review microscopic sections from the more interesting material. For third-year medical students; graduate students by permission.
- 476 Clinical Pathological Conference (*)**
Interesting, unusual, or provocative diagnostic cases are taken from the files of the various teaching hospitals each week for clinical review, discussion, differential diagnosis, and correlation with the pathological findings. For third- and fourth-year medical students; graduate students by permission.
- 480 Autopsy Pathology (*)** **Mottet**
Advanced course in autopsy technique. Gross and histologic study of postmortem material. Surgical pathology and clinical pathology. Attendance at and participation in clinicopathological conferences and other hospital activities: King County, Children's Orthopedic, Veterans Administration, and University Hospitals. Elective open to senior medical students.
- 483 Neuropathology (*)** **Alvord, Shaw**
Gross and microscopic study of selected autopsied cases, conference discussions, review of study sets, and experimental project. Elective open to first-, second-, and fourth-year medical students.
- 498 Undergraduate Thesis (*)**
Prerequisite, permission. Elective for medical students.
- 499 Undergraduate Research (*)**
Prerequisite, permission. Elective for medical students.

COURSES FOR GRADUATES ONLY

- 500 Principles of Pathology (4 or 6)**
The material covered is concerned primarily with the fundamental alterations in tissues and organs in disease processes and the results of these changes. This course is open to selected graduate students in the biological sciences by permission.
- 503 Enzymatic Histochemistry (2-3)** **Benditt, Lagunoff**
Development of basic concepts with technical and experimental applications. Elective open to medical students and graduate students. Prerequisite, permission. Limited to six students. Offered alternate Winter Quarters; offered Winter, 1963.

- 504 Determinative Histochemistry (2-3)** **Lagunoff**
Principles and techniques of histochemical identification of proteins, polysaccharides and lipids. Prerequisite, permission. Elective open to medical students and graduate students. Offered alternate Winter Quarters; offered Winter, 1964.
- 520 Seminar (2, maximum 10)**
Review of current problems of both research and practical nature by various members of the Department of Pathology with discussion of presentations by senior members of the Department. Prerequisite, permission of Chairman.
- 521 Seminar in Contemporary Professional Literature (1)**
A review of current literature as applied to the field of pathology. Discussion of presentations by senior members of the Department. Prerequisite, permission of Chairman.
- 551 Experimental Pathology (2-5, maximum 8)**
The purpose of the course is to introduce the student to the fundamental problems in experimental pathology. Both animal experiments and material derived from human disease are utilized. Techniques applicable to particular problems are illustrated. The relationship of alterations and structure, chemistry, and function are emphasized. Such problems as cellular alterations in disease from the fine structure and molecular standpoint, immunology and its relationship to carcinogenesis, allergic encephalitis, mechanisms of inflammation, pathogenesis of arteriosclerosis and other similar problems are covered. Open only to graduate students, fellows, or trainees. Prerequisite, 231 or 441, and/or permission of Chairman.
- 552 Clinical Pathology (2-5, maximum 20)**
A study of the principles and techniques of the usual clinical chemical procedures or of the tests used to study diseases of the hematopoietic system. The control of precision and accuracy is stressed, as is the interpretation of the results obtained. The work in either biochemistry or hematology may be taken in the appropriate sequence. For graduate students and fellows who are assigned to the laboratory in clinical biochemistry.
- 553 Pediatric Pathology (*, maximum 10)**
Assignments according to need and background. By arrangement, for fellows and graduate students.
- 600 Research (*)**
Selected problems arranged in accordance with the student's needs. Prerequisite, permission of Chairman.
- 700 Thesis (*)**

CURRICULUM IN MEDICAL TECHNOLOGY

THE PREPROFESSIONAL PROGRAM

The program of instruction in medical technology is supervised by the Department of Pathology in the School of Medicine. A preprofessional program in medical technology is supervised by the College of Arts and Sciences during the first two years. Students are referred to the *College of Arts and Sciences Bulletin* for course descriptions and credits and for an explanation of the University requirements for English composition, health education, and physical education. The Advisory office of the College of Arts and Sciences is in 121 Miller Hall. Beginning with the Autumn Quarter of the third year advising will be transferred to the Department of Pathology in the School of Medicine.

THE PROFESSIONAL PROGRAM

At the end of the Winter Quarter of the third year, students apply for admission to the eighteen-month period of fulltime instruction in medical technology. During this period they register for the courses Pathology 321, 322, 323, 424, 425, and 426, Medical Technology. The first twelve months of this period consists of full-time classroom and laboratory instruction offered in the School of Medicine. This is followed by approximately six months of full-time instruction and supervised experience in affiliated hospital and public health laboratories.

This program is approved by the Council on Medical Education and Hospitals of the American Medical Association. Graduates are eligible to be examined by the Board of Registry of the American Society of Clinical Pathologists. They are urged to take this examination and become Registered Medical Technologists.

BACHELOR OF SCIENCE IN MEDICAL TECHNOLOGY

Students should choose their electives in order to satisfy the college group requirements. A suggested sequence of required courses is as follows:

First Year

FIRST QUARTER	CREDITS	SECOND QUARTER	CREDITS	THIRD QUARTER	CREDITS
Chem. 140	3	Chem. 150 General	4	Chem. 160 General	3
Math 105 General or	5	Chem. 151 Lab	2	Chem. 170 Qual. Anal.	3
Math 155 Algebra	3	Zoology 111 General	5	Zoology 112 General	5
	<hr/> 6 or 8		<hr/> 11		<hr/> 11

Second Year

FIRST QUARTER	CREDITS	SECOND QUARTER	CREDITS	THIRD QUARTER	CREDITS
Chem. 221 Quant. Anal.	5	Chem. 231 Organic	3	Chem. 232 Organic	3
	<hr/> 5	Chem. 241 Org. Chem		Chem. 242 Org. Chem.	
		Lab.	2	Lab.	2
			<hr/> 5		<hr/> 5

Third Year

FIRST QUARTER	CREDITS	SECOND QUARTER	CREDITS	THIRD QUARTER	CREDITS
Micro. 441- Med. Bact. ...	5	Micro. -442 Med. Bact. ...	5	Micro. 443 Mycology ...	2
	<hr/> 5		<hr/> 5	Micro. 444 Parasit.	4
				Biochem. 361 Biochem. ...	3
				Biochem. 361 Biochem. ...	
				Lab.	3
					<hr/> 12

It is suggested that students might elect such courses as Anatomy 301, Pathology 310, and Chemistry 335, 336 and 337, or Biochemistry 481, 482, 483, in place of their respective courses in chemistry and biochemistry. Permission is required for courses in biochemistry and microbiology.

Fourth Year

During the 18-month period of specialized training the student becomes familiar with the common clinical laboratory procedures and with the interpretation of the results obtained. They learn the tests used in the laboratories of clinical chemistry, hematology, serology, urinalysis, microbiology and pathology. Special programs, such as Cytology, Histochemistry, and Electron Microscope Technique, are available as areas of specialization in the last year of training. Further information can be obtained from the Department of Pathology.

PHARMACOLOGY

Chairman: JAMES M. DILLE, F421 Health Sciences Building

Pharmacology deals with the mechanisms whereby modification of physiological function is produced by drugs, and with the application of these drugs to the relief and treatment of disease.

The Department of Pharmacology provides courses for medical, dental, and pharmacy students and for those doing graduate work in these fields. Students who intend to work toward a degree of Master of Science or Doctor of Philosophy must meet the requirements of the Graduate School as outlined in the *Graduate School Bulletin*. They must present a bachelor's degree with a major in any of the sciences, such as zoology, chemistry, physics, pharmacy, psychology, or physiology. Applicants should communicate with the Chairman before registration.

COURSES**234 General Pharmacology (4)**

The action of drugs on physiological functions, with special emphasis on agents which are important in the practice of dentistry. Laboratory experiments and demonstrations of the action of drugs. For dental students.

301-302 General Pharmacology (4-5)

The action of drugs on physiological function, with special reference to the use of drugs in the treatment of disease. Toxicological manifestations of excessive doses of drugs; management and treatment of these poisonous effects. Laboratory experiments and demonstrations. For pharmacy students.

442-443 General Pharmacology (5-4)

The action of drugs, with emphasis on their basic mechanisms and their application to the relief and treatment of disease. Toxicological manifestations of excessive doses of drugs; management and treatment of these poisonous effects. Laboratory experiments and demonstrations. Required for second-year medical students. Prerequisite for graduate students, a major or a minor in pharmacology.

498 Undergraduate Thesis (*)

For medical students. Prerequisite, permission.

499 Undergraduate Research (*)

Participation in departmental research projects. For medical students. Prerequisite, permission.

COURSES FOR GRADUATES ONLY**507 Journal Seminar (*, maximum 6)**

Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Prerequisites, -443 and permission.

N508 Research Seminar (0)

Research progress reports and reports on results of completed research. Prerequisites, -443 and permission.

509 Survey of Pharmacological Techniques (3)**Dille**

Principles and specific laboratory techniques for the evaluation of drug effects on the basic physiological systems. Elective for second-year medical students. Prerequisites, 442-443 or 301-302 or 234 and permission.

510 Survey of Pharmacological Techniques (3)**Dille**

Continuation of Pharmacology 509. Prerequisite, 509. Open to medical students.

511 Special Pharmacological Techniques (2)

A laboratory treatment of biochemical, biophysical, and surgical approaches employed in pharmacological investigation. Elective for second-year medical students. Prerequisites, 442-443 or 301-302 or 234 or permission.

525 Card ovascular Pharmacology (2)*West**

A didactic consideration of drug action on electrical and mechanical events in the heart and vascular system with clinical correlation. Open to medical students. Prerequisites, 442-443 or 301-302 or 234 and permission. Offered alternate year.

526 Autonomic Pharmacology (2)**Elder**

An advanced treatment of pharmacologic effects on storage, release and action of autonomic transmitter substances. Open to medical students. Prerequisites, 442-443 or 301-302 or 234 and permission. Offered alternate years.

527 Biochemical Pharmacology (2)**Horita**

Biochemical considerations of the mechanisms of action, structure-activity relationships, and metabolism of pharmacologic agents. Open to medical students. Prerequisites, 442-443 or 301-302 or 234 and permission. Offered alternate years.

528 Central Nervous System Pharmacology (2)**Sabawala**

Concepts of the modification of the functions of the central nervous system by drugs. Open to medical students. Prerequisites, 442-443 or 301-302 or 234 and permission. Offered alternate years.

529 Psychopharmacology (2)**Holliday**

The principles and methods of determining the action of drugs modifying human behavior. Open to medical students. Prerequisites, 442-443 or 301-302 or 234 and permission. Offered alternate years.

530 Gastrointestinal Pharmacology (2)**Magee**

A functional basis for the effects of drugs on mechanical and secretory processes within the gastrointestinal tract. Open to medical students. Prerequisites, 442-443 or 301-302 or 234 and permission. Offered alternate years.

531 Toxicology (2)**Loomis**

A descriptive treatment of harmful effects of chemicals on biological tissue and chemical analytical aspects of forensic medicine. Open to medical students. Prerequisites, 442-443 or 301-302 or 234 and permission. Offered alternate years.

600 Research (*)

Participation in research projects already set in progress by members of the Department staff. Directed experience in research investigation. Prerequisites, -443 and permission.

700 Thesis (*)**PHYSIOLOGY AND BIOPHYSICS**

Chairman: THEODORE C. RUCH, G405 Health Sciences Building

Physiology deals with the processes, activities, and phenomena incidental to and characteristic of life and living organisms. Courses in this field are given for medical, dental, pharmacy, and nursing students, and for graduate students.

In biophysics the emphasis is on the physical aspects of organs and systems,

studied by the instruments and methods of thinking used by physicists. A bachelor's degree in physical science or equivalent is required for students specializing in biophysics.

Students who intend to work toward a degree of Master of Science or Doctor of Philosophy must meet the requirements of the Graduate School as outlined in the *Graduate School Bulletin*. Students with a bachelor's degree in zoology, psychology, chemistry, engineering, physics, or with an M.D. degree are acceptable as candidates for M.S. and Ph.D. degrees.

COURSES

- 123 Human Physiology (6)** **Woodbury**
Lectures, laboratories, demonstrations, and small group conferences in human physiology stressing applications to dentistry. For dental students.
- Conjoint 317-318 Elementary Anatomy and Physiology (6-6)**
(See Conjoint Courses, page 78.)
- Conjoint 350-351 Human Function and Structure (6-6)** (See Conjoint Courses, page 78.)
- 360 General Human Physiology (5)**
Lecture, laboratory, and laboratory conference instruction in the basic principles and basic laboratory techniques of physiology. For students of pharmacy. Prerequisites, Zoology 112, Chemistry 242 and 333, Physics 102 and 108, Microbiology 301.
- 401-402 Advanced Human Physiology (7-7)** **Patton**
Advanced work in physiology approached from the biophysical, mammalian, and clinical points of view. Small-group teaching and special laboratory problems. Required for first-year medical students; graduate students by permission.
- Conjoint 409 Basis of Neurology (3,5, or 8)** (See Conjoint Courses, page 78.)
- 411 Introductory Biophysics (4)** **Brown, Woodbury, Young**
A general discussion of physical concepts in physiology including membrane phenomena, control systems, and energy exchange. Prerequisite, B.S. in physical science or permission.
- 416 Biophysics (5)** **Woodbury, Young**
Study of bio-electric phenomena in mathematical and physical terms; volume conductors, simple circuit theory, membrane and electrode potentials, and elementary servomechanism theory. For students with biological background. Prerequisite, permission.
- 424 Introductory Membrane Potentials (3)** **Woodbury**
Ionic basis of electrical activity in excitable tissues. Membrane structure, capacity, resistance. Ion distributions, permeation, active sodium potassium transport. Cable and excitable properties of membrane. Prerequisite, permission.
- 491 Medical Physics (2)** **Brown, Young**
Review of physical principles applicable to medicine. Elective for medical students; graduate students by permission.
- 492 Selected Topics in Physiology and Biophysics (2)**
Seminars or research in collaboration with a faculty member on topics selected by individual arrangement. Elective for medical students; graduate students by permission.
- 493 Techniques in Cardiopulmonary Diagnosis (2)** **Rushmer**
Application of physiological principles in analysis of cardiopulmonary function. Elective for medical students; graduate students by permission.
- 494 Neurological Study Unit (2)** **Physiology, Neuroanatomy, Neurology, Neuropathology, Neurosurgery, and Psychiatry**
Faculty and student discussion of neurological topics illustrated with clinical cases or demonstrations. Elective for medical students; graduate students by permission.
- 498 Undergraduate Thesis (*)**
For medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)**
For medical students. Prerequisite, permission.

COURSES FOR GRADUATES ONLY

- 515-516-517 Physiological Proseminar (5-5-5)**
A guided survey of the experimental literature of major topics in physiology. Course conducted as seminar with oral analysis of assigned papers and topics. Prerequisites, 401-402, Conjoint 409, and permission.
- 520 Physiology Seminar (2-5)**
Selected topics in physiology. Prerequisite, permission.
- 521 Biophysics Seminar (2-5)** **Young**
Selected topics in biophysics. Prerequisite, permission.
- 522 Biophysics of External Respiration (2-5)** **Young**
Viscous and elastic properties of chest-lung system; flow of gases in tubes. Generalized alveolar air equations. Principle of infrared absorption and emission type of rapid gas analyzers. Prerequisite, permission.

- 523 Heat Transfer and Temperature Regulation (2-5)** Young
Prerequisite, B.S. in physical science or permission.
- 524 Advanced Membrane Potentials (3)** Woodbury
Quantitative analysis of electrical activity in nerve. Active sodium-potassium transport. Ionic flux equations. Conductance changes. Calculation of the action potential. Prerequisite, permission.
- 525, 526, 527 Advanced Mammalian and Clinical Physiology (2-5, 2-5, 2-5)**
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite, permission.
- 528 Physiological Control System (2-5)** Young
Theories of nonlinear mechanics and their applications to physiological control systems. Prerequisite, B.S. in physical science or permission.
- 529 Motoneuron Physiology (4)** Towe, Woodbury
Electrical properties of surface membrane; excitatory and inhibitory reactions and their ionic mechanisms; properties of the spike potential; interaction of synaptic responses. Prerequisites, 515-516-517, 424, and permission.
- 530 Synapse and Reflex Seminar (4)** Patton
A guided survey of the literature pertaining to reflex and synaptic physiology. Course is conducted as seminar with students giving oral reports on assigned topics. Prerequisite, 401-402, 515-516-517, and permission.
- 532-533 Principles of Physiological Instrumentation (4-4)** Young
Pulse generator; A.C. and D.C. high-gain amplifier circuits; oscilloscopes and oscillographs; recording of pressure, volume, and flow in liquids and gases; calorimetry and pyrometry; continuous gas analysis. Prerequisite, permission.
- 534 Applied Physiological Instrumentation (2-5)**
Study and use of research instruments applicable to the nervous system (stimulators, amplifiers, and oscilloscopes), the cardiovascular system (cinéfluorograph, electro- and stetho-cardiograph, oximeter, strain gauge manometers, etc.), and respiratory and metabolic activity (flow meters, minute volume integrator, infrared and paramagnetic gas analyzers, cardiotachometer, thermocouples, gradient calorimeter). Prerequisites, 532 and permission.
- 535 Operative Techniques in Neurophysiology (2-5)** Patton, Smith
Deafferentation, decerebration, and Sherrington reflex preparation, osteoplastic bone flap, Horsley-Clarke apparatus, and reconstruction of lesions; primate colony and operating room management. Prerequisite, permission.
- 536 Behavioral Techniques in Neurophysiology (2-3)** Smith, Towe
Study and use of behavioral methods applicable to nervous system studies, quantification of activity and physiological variables, interpretation of neural lesions and chronic electrode implants. Prerequisite, permission.
- 550 Cortical Potentials (4)** Towe
Properties of continuous and evoked cortical potentials and their interactions. Relationship of cortical unit activity to cortical potentials. Prerequisites, 515, 519, and permission.
- 600 Research (*)**
Prerequisite, permission.
- 700 Thesis (*)**

PREVENTIVE MEDICINE

Chairman: J. THOMAS GRAYSTON, B506 Health Sciences Building

Preventive Medicine is concerned with the means of spread and control of communicable disease, the application of statistics to biological problems, and the nature and control of environmental factors affecting human health.

Courses are provided for medical and nursing students. In addition, the department offers courses for a four-year curriculum leading to a Bachelor of Science degree in the College of Arts and Sciences (see the *College of Arts and Sciences Bulletin*).

COURSES

- 323 Introduction to Public Health Principles and Practices (3)** Wilkey
A survey of principles, practices, and the agencies concerned. This basic course is required of all preventive medicine majors.
- 410 Preventive Medicine, Implications for Nursing (2)** Merritt
Statistics, epidemiology, public health administration, and certain public health programs are considered in further detail than in 323. Required of senior nursing students in the basic nursing curriculum. Prerequisite, 323.
- 420 Introduction to Epidemiology and Biostatistics (3)** Alexander, Bennett
Descriptive, analytic, and experimental epidemiology as presented in examples from the field of communicable disease. Includes descriptive statistics as applicable in epidemiology. Prerequisites, 323, Microbiology 301 or permission, or graduate standing.

- 422 Introduction to Environmental Health (3)** **Hatlen**
Relationship of man to his environment, how it affects his physical well-being, and what he can do to influence this environment for the protection of his health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Prerequisite, 323 or 461 or permission, or graduate standing.
- 424 Public Health Programs (3)** **Martin, Merritt**
Current problems and programs of major concern in the following areas: maternal and child health, accident prevention, mental health, chronic diseases, and medical economics. Prerequisite, 323 or 461 or permission, or graduate standing.
- 425 Introduction to Preventive Medicine (1)** **Alexander, Bennett, Grayston**
Lectures on principal communicable diseases of man, with emphasis on methods for their control. Required for second-year medical students.
- 440 Water and Waste Sanitation (4)** **Hatlen**
Advanced study of the sanitary control of water supplies and sewage and refuse disposal, with emphasis on the knowledge and skills utilized by the sanitarian. Prerequisite, 422 or permission.
- 441 Milk and Food Sanitation (4)** **Hatlen**
Advanced study of the sanitary control of the production, processing, and distribution of milk and food. Prerequisite, 422 or permission.
- 442 Vector Control and General Sanitation (3)** **Hatlen**
Advanced study of the control of rodents and arthropod vectors of disease; the control of environmental utilities, including plumbing, swimming pools, bathing beaches, recreation areas, housing, schools, and other topics of general sanitation. Prerequisite, 422 or permission.
- 450 Measurement and Control of Air Pollution (2)** **Broyss**
Description of methods for air pollution research and control, including field survey techniques, stack sampling, continuous monitoring, and use of control equipment. Administrative problems are also discussed. For preventive medicine majors; others by permission.
- 453 Industrial Hygiene Techniques (3)** **Broyss**
Field and industrial laboratory testing procedures for chemical and physical hazards as employed by industrial health workers. Prerequisite, permission.
- 460J Field Training in Health Education (5)**
Four and one-half weeks of full-time supervised work experience in the health education division of a local official health agency. Offered jointly with the College of Education. (Offered Summer Quarter only.) Prerequisite, permission.
- 461 School and Community Health Programs (5)** **Mills, Reeves**
Organizational structure, function, and services of official and nonofficial community and school health agencies, with particular attention to the interrelated roles of teachers, physicians, nurses, and sanitarians. Prerequisite, junior standing.
- 463 Community Organization for Health Education (3)**
Trends and problems in community health education, including community organization. Prerequisite, 323 or 461, or permission.
- 464 Community Health Education Techniques (3)**
Practice in the techniques of working with groups; preparation and use of visual education materials. Prerequisite, 323 or 461, or permission.
- 470 Introduction to Biometry (3)** **Bennett**
Statistical methods used in the compilation, interpretation, and presentation of vital data. Prerequisite, permission.
- 472 Applied Statistics in Health Sciences (2-4)** **Bennett**
Application of statistical techniques to biological and medical research; design and interpretation of experiments. Prerequisite, permission.
- 475 Clerkships and Seminar (*)**
A half-term of case-oriented study of the management of complex health problems, emphasizing the utilization of community health agencies in the care of patients. Required for fourth-year medical students.
- 476 Sample Survey Techniques (3-5)** **Bennett**
Methods appropriate for conducting and analyzing results of sample surveys. (Offered when demand is sufficient.) Prerequisite, permission.
- 477 Statistical Methods in Biological Assay (3)** **Bennett**
Methods appropriate to estimation of the dose-effect relationship; biological standardization; microbiological assay; design of experiments. (Offered when demand is sufficient.) Prerequisite, permission.
- 478 Practice of Epidemiology (3)**
Participation in the work of the Division of Acute Communicable Disease Control of the Seattle-King County Department of Public Health, including field investigations of important or unusual disease outbreaks. Senior medical student elective.
- 480 Public Health Problems (*, maximum 6)**
Special assignments in the field of public health. Prerequisite, permission.
- 482 Field Practice in Public Health (2-6)**
An assignment to a local health department for supervised application of public health practices. Prerequisite, permission.

- 483 Field Practice in Public Health (6)**
An assignment to a local health department for practice in program planning. Prerequisite, permission.
- 484 Field Practice in Public Health (3)**
An assignment to a local health department for training in the utilization of community resources. Prerequisite, permission.
- 490 Public Health Administration (3)** **Bucove**
Public health administration, including philosophy, legal aspects, program and fiscal planning, personnel management, and public relations. Prerequisite, 420, 422, 424, or permission.
- 492 Problems in International Health (2)**
Conference and discussion based on a survey of international health organizations and the services offered by regions and countries. Prerequisite, permission.
- 498 Undergraduate Thesis (*)**
For medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)**
Prerequisite, permission.

CONJOINT COURSES AND MEDICAL PRACTICE

CONJOINT COURSES

Conjoint courses are offered cooperatively by departments in the School of Medicine. They are designed to integrate basic medical training with clinical work and, in some cases, to integrate basic medical training in two or more fields. In the descriptions of these courses, the name of the department with primary responsibility for each course precedes the names of the other sponsoring departments.

COURSES

- 317-318 Elementary Anatomy and Physiology (6-6)** **Skahen**
Human physiology with anatomical demonstrations. An elementary course integrating anatomy, histology, physiology, and biochemistry of the human body. Offered by the Departments of Anatomy and Physiology and Biophysics. For nursing and dental hygiene students; others by permission only.
- 350-351 Human Function and Structure (6-6)** **Skahen**
An intermediate course integrating anatomy, histology, physiology, and biochemistry of the human body. Offered by the Departments of Anatomy and Physiology and Biophysics. For master's degree candidates in psychology and other students not majoring in anatomy or physiology. Prerequisite, permission.
- 490 Public Health Administration (3)** **Bucove**
An advanced course in the anatomy of the central nervous system and its correlation with neurophysiology. Offered by the Departments of Anatomy and Physiology and Biophysics. Required for first-year medical students. Prerequisite for graduate students, permission.
- 426-427 Introduction to Physical Diagnosis (4-9)**
Introduction to clinical medical sciences. The student is taught the techniques of interview, how to take complete histories and perform general physical examinations. Knowledge acquired in the basic medical sciences is used to explain the mechanism of development of cardinal symptoms and the signs of major diseases. Offered by the Departments of Medicine, Obstetrics and Gynecology, Pediatrics, Physical Medicine and Rehabilitation, Psychiatry, and Surgery. Required for second-year medical students.
- 446-447 Laboratory Procedures (4-2)**
Lectures on the principles of some of the common clinical laboratory tests and on their use in diagnosis and in following the course of therapy. The laboratory work demonstrates technical details, sources of error, and relative accuracy of certain of these tests, and it provides an opportunity for the students to perform some of the tests they will use in subsequent ward duty. Offered by the Departments of Pathology and Medicine. Required for second-year medical students. Prerequisite for graduate students, permission.
- 585 Surgical Anatomy (2-4, maximum 12)**
An intensive course of lectures and dissection devoted to one region of the body each quarter, i.e., thorax, abdomen, upper extremity, head, and neck. Offered by the Departments of Surgery and Anatomy. Prerequisite, permission.

MEDICAL PRACTICE

COURSES

- 401 History of Medicine (*)** **Haviland**
An introduction to the historical background of medicine including ethics and economics following orientation in the field; student and faculty participation in informal seminar-type presentation and discussion is emphasized. Open to all medical students.

- 475 Externship in General Practice (*)** **Aagaard**
A period of two to six weeks of work with a selected general practitioner to give a firsthand view of the interests and problems presented in medical practice. Open to fourth-year medical students.
- 481 Medical Ethics, Economics, and Legal Medicine (*)** **Aagaard**
Lectures and discussions by authorities in these fields on topics of current and practical interest for the future physician. Required for fourth-year medical students.
- 483 Hospital Extension Service (*)**
Students are assigned home-care cases for which they are responsible under the guidance of the instructor. Open to third- and fourth-year students.

CLINICAL MEDICAL SCIENCES

ANESTHESIOLOGY

Chairman: JOHN J. BONICA, RR205 University Hospital

The Department of Anesthesiology has broad responsibilities for the teaching of medical students throughout their four years of undergraduate training. Members of the Department participate in the teaching of applied anatomy to students during their first year. During the second year members of the Department who also have joint appointments in physiology and pharmacology participate in teaching of students in these areas. During the clinical years the students are taught the basic principles of anesthesiology, including artificial respiration and resuscitation. Instruction is provided by means of lectures, conjoint courses, and clinical clerkships. In addition the Department carries out a very active training program for interns and residents in anesthesiology and affords residents in surgery, obstetrics, and oral surgery some experience in anesthesiology.

COURSES

- 480 Clinical Clerkship (*)** **Bonica**
Each fourth-year medical student is assigned to anesthesiology for a period of four weeks, half days. During this time he participates actively in the management of surgical, obstetric, and medical patients who require anesthesiologic care. The various techniques of general, regional, and psychologic analgesia and anesthesia are demonstrated in the operating room, and subsequently the student carries out these various procedures under the supervision of the staff. Laboratory demonstrations are used to emphasize certain important anatomic, physiologic, and physical problems that may arise during clinical anesthesia. The student participates in the pre- and post-anesthetic management of patients. Required for fourth-year medical students.
- 486 Externship in Anesthesiology (*)** **Bonica**
The student is given an opportunity to study and obtain experience in clinical anesthesia in depth. During the period of six weeks he obtains experience in all techniques of inhalation anesthesia, regional anesthesia, intravenous anesthesia, and the pre- and post-anesthetic care of surgical and obstetric patients and in the management of special anesthesiologic problems encountered in general surgery, orthopedics, neurosurgery, urologic surgery, pediatric surgery, cardiovascular surgery, and obstetrics. He is also given ample opportunity to participate in the care of patients with special medical problems such as intractable pain, chronic pulmonary insufficiency, and peripheral vascular disease. Elective for medical students. Prerequisite, permission.
- 498 Undergraduate Thesis (*)**
For medical students. Prerequisite, 499.
- 499 Undergraduate Research (*)**
Specific research problems relating to pulmonary, cardiovascular, renal, and central nervous system functions and their alteration by anesthetic agents and techniques. For medical students. Prerequisite, permission.
- 520 Anesthesiology Seminar (5)** **Bonica**
Anesthesiology conferences, lectures, and symposia on advanced anesthesiologic topics.

MEDICINE

Chairman: ROBERT H. WILLIAMS, BB557 University Hospital

In the second year, the student is introduced to many problems of clinical medicine and the main avenues for their resolution; in the third year, he becomes more adept in the complete work-up and therapy of problems in general internal medicine; in the fourth year, emphasis is placed on the difficult and special problems.

range of medical problems that are responsible for the hospitalization of infants and children. In the fourth year students may take advantage of an advanced clinical clerkship or sub-internship during the elective period, and receive conjoint instruction in pediatrics throughout much of the year.

Instruction is provided by means of conjoint courses, lectures, and clinical clerkships.

COURSES

401 Samples of Clinical Medicine (*)

Elective course in which select patients will be shown to illustrate problems in clinical

COURSES

404 Human Growth and Development (*)

Deisher

An opportunity is provided to observe and closely follow an infant and his family throughout one or two years. The influence of constitutional and environmental factors on growth and development will be demonstrated in individual interviews and group discussions with members of the pediatric staff. Open to first- and second-year medical students.

Conjoint-426-427 Introduction to Physical Diagnosis (4-9) (See Conjoint Courses, page 78.)**465 Clinical Clerkships (*)**

An eight-week general pediatrics inpatient and outpatient clerkship. Students are divided between the pediatric facilities at the University Hospital and the Children's Orthopedic Hospital and work under the supervision of members of the departmental faculty. Required for third-year medical students.

480 Senior Pediatric Elective Clerkship (*)

Outpatient, inpatient, newborn, and emergency room experiences. Participation in house staff teaching conferences. Clinical investigational projects, if desired.

481 Research in Child Growth and Development (*)

Aldrich, Deisher

Pursuit of short-term projects in growth and development by student under guidance of Child Health Center staff, including special behavior problems in childhood. Open to senior medical students. Prerequisite, permission.

482 Pediatric Endocrinology and Metabolic Disease (*)

Kelley

Special research problems in pediatric endocrinology and teratology will be undertaken in the laboratory and/or clinic. The problem will depend on the student's interests. Open to all medical students. Prerequisite, permission.

483 Clinical Experience in Problems of Well Child Care (*)

Aldrich, Deisher

Further experience at the Child Health Center in the common problems met in clinical practice among well children from infancy through adolescence. Open to senior medical students. Prerequisite, permission.

484 Clinical Pediatrics (*)

Aldrich

Assignment of hospital wards or newborn nursery at University Hospital, King County Hospital, and Children's Orthopedic Hospital. Open to senior medical students. Prerequisite, permission.

485 Clinical Problems in Mental Retardation (*)

Aldrich, Deisher

Experience in multi-disciplined evaluation of the retarded child and study of the community management of this problem. Open to senior medical students. Prerequisite, permission.

486 Pediatric Cardiology (*)

Guntheroth

Experience with diagnostic techniques, medical and surgical therapy of children with heart disease. Emphasis on physical diagnosis, electrocardiography, and cardiac radiology. Open to senior medical students. Prerequisite, permission.

487 Pediatric Neurology

Swanson

An advanced course in neurology with emphasis on neurological disease in the immature nervous system. Experience in special diagnostic techniques will be available. Prerequisite, permission.

488 Congenital Defects (*)

Shurtleff

An advanced course in pediatrics providing experience in the clinical diagnosis and management of structural and metabolic congenital defects. Prerequisite, permission.

489 Pediatric Outpatient Clinics (*)

Aldrich

Elective clerkship includes diagnosis and management in the general medical and subspecialty pediatrics clinics of the University Hospital. Prerequisite, permission.

490 Adolescent Development (*)

Hammar

An advanced pediatric clerkship dealing with special problems of the adolescent. Senior medical students are offered an experience in a multidisciplinary clinic at University Hospital. Prerequisite, permission.

496 Concept of the Child (3)

Deisher, Tjossem

An advanced course for students who desire a more complete understanding of the child through integration of the viewpoints of pediatrics, preventive medicine, psychology, psychiatry, nutrition, social work, and nursery education. For nonmedical students. (Formerly Conjoint 496.) Prerequisite, permission.

498 Undergraduate Thesis (*)

Aldrich

For medical students. Prerequisite, permission.

499 Undergraduate Research (*)

Aldrich

An opportunity to work in the laboratory on problems related to pediatrics. Open to first- and second-year medical students. Prerequisite, permission.

COURSE FOR GRADUATES ONLY

505 Physical Growth of the Well Child (2)

Nine weekly seminars (eighteen hours). Presentation by departmental staff of relationships between growth and development and diseases of childhood as they pertain to dental health. For graduate students in dentistry. Prerequisite, permission.

- 493 Problems in Fluid Balance and Kidney Disease (*)**
Students will see complicated diagnostic problems in fluid and electrolyte balance on the renal service of the University Hospital. Fourth-year medical student elective.
- 498 Undergraduate Thesis (*)**
For medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)**
Case studies, with laboratory research. For medical students. Prerequisite, permission.

OBSTETRICS AND GYNECOLOGY

Chairman: CHARLES A. HUNTER, BB617 University Hospital

The Department of Obstetrics and Gynecology represents the field of normal and complicated obstetrics, growth and development of the unborn fetus, medical and surgical diseases of women, endocrinology as it is peculiar to the female, and the preventive phases of obstetrics and gynecology.

COURSES

Conjoint-426-427 Introduction to Physical Diagnosis (4-9) (See Conjoint Courses, page 78.)

- 466 Introduction to Obstetrics and Gynecology (*)**
Lectures on embryology, physiology, and endocrinology of the pelvic organs; pregnancy and parturition; diseases associated with pregnancy; etiology, pathology, symptomatology, and diagnosis of gynecological conditions.
- 476 Obstetric Externship (*)**
Student to be assigned to one of two hospitals: Madigan Army Hospital or Providence Hospital. All terms, twelve days, full time.
- 479 Obstetric and Gynecological Investigation (*)**
The investigation may cover any one of the following fields: uterine muscle physiology, toxemias of pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology. All terms. By arrangement.
- 480 Clinical Clerkships (*)**
The student spends eight weeks as a clinical clerk on obstetrics and gynecology at the University Hospital and at the King County Hospital. On the obstetrical service the student actively participates in the deliveries and closely follows the management of all obstetric patients. In the gynecology service the student makes ward rounds and actively participates in the medical or surgical management of the inpatient gynecologic patients. In addition, he is assigned to the obstetric and gynecologic outpatient clinics which afford him the opportunity to learn the office problems of the specialty. Required for fourth-year medical students.
- 481 Senior Seminar (*)**
Current literature in obstetrics and gynecology, oncology, and research as it pertains to obstetrics and gynecology. Selected presentations of research done in our department will also be presented from time to time. All terms, one hour weekly by arrangement.
- 484 Endocrinology of Reproduction (*)** **Herrmann**
The biochemistry of steroids. Steroid metabolism as related to clinical problems. Diagnosis and treatment of endocrine disorders. Case studies with special emphasis on modern methods of investigation.
- 498 Undergraduate Thesis (*)**
For medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)**
Discussion of methods used in obstetrics and gynecology research. Several specific projects relating to the most fascinating and intriguing problems of the specialty will be dealt with.

PEDIATRICS

Chairman: ROBERT A. ALDRICH, BB807 University Hospital

The student is instructed about the role of growth and development in the emotional and physical responses of infants and children during health and illness.

In the second year the student is oriented toward the principal problems that appear at various ages from infancy through adolescence. The third year is primarily devoted to developing the student's ability to recognize and treat the broad range of medical problems that are responsible for the hospitalization of infants and children. In the fourth year students may take advantage of an advanced clinical clerkship or sub-internship during the elective period, and receive conjoint instruction in pediatrics throughout much of the year.

Instruction is provided by means of conjoint courses, lectures, and clinical clerkships.

COURSES

- 404 Human Growth and Development (*)** **Deisher**
An opportunity is provided to observe and closely follow an infant and his family throughout one or two years. The influence of constitutional and environmental factors on growth and development will be demonstrated in individual interviews and group discussions with members of the pediatric staff. Open to first- and second-year medical students.
- Conjoint-426-427 Introduction to Physical Diagnosis (4-9) (See Conjoint Courses, page 78.)**
- 465 Clinical Clerkships (*)**
An eight-week general pediatrics inpatient and outpatient clerkship. Students are divided between the pediatric facilities at the University Hospital and the Children's Orthopedic Hospital and work under the supervision of members of the departmental faculty. Required for third-year medical students.
- 480 Senior Pediatric Elective Clerkship (*)**
Outpatient, inpatient, newborn, and emergency room experiences. Participation in house staff teaching conferences. Clinical investigational projects, if desired.
- 481 Research in Child Growth and Development (*)** **Aldrich, Deisher**
Pursuit of short-term projects in growth and development by student under guidance of Child Health Center staff, including special behavior problems in childhood. Open to senior medical students. Prerequisite, permission.
- 482 Pediatric Endocrinology and Metabolic Disease (*)** **Kelley**
Special research problems in pediatric endocrinology and teratology will be undertaken in the laboratory and/or clinic. The problem will depend on the student's interests. Open to all medical students. Prerequisite, permission.
- 483 Clinical Experience in Problems of Well Child Care (*)** **Aldrich, Deisher**
Further experience at the Child Health Center in the common problems met in clinical practice among well children from infancy through adolescence. Open to senior medical students. Prerequisite, permission.
- 484 Clinical Pediatrics (*)** **Aldrich**
Assignment of hospital wards or newborn nursery at University Hospital, King County Hospital, and Children's Orthopedic Hospital. Open to senior medical students. Prerequisite, permission.
- 485 Clinical Problems in Mental Retardation (*)** **Aldrich, Deisher**
Experience in multi-disciplined evaluation of the retarded child and study of the community management of this problem. Open to senior medical students. Prerequisite, permission.
- 486 Pediatric Cardiology (*)** **Guntheroth**
Experience with diagnostic techniques, medical and surgical therapy of children with heart disease. Emphasis on physical diagnosis, electrocardiography, and cardiac radiology. Open to senior medical students. Prerequisite, permission.
- 487 Pediatric Neurology** **Swanson**
An advanced course in neurology with emphasis on neurological disease in the immature nervous system. Experience in special diagnostic techniques will be available. Prerequisite, permission.
- 488 Congenital Defects (*)** **Shurtleff**
An advanced course in pediatrics providing experience in the clinical diagnosis and management of structural and metabolic congenital defects. Prerequisite, permission.
- 489 Pediatric Outpatient Clinics (*)** **Aldrich**
Elective clerkship includes diagnosis and management in the general medical and subspecialty pediatrics clinics of the University Hospital. Prerequisite, permission.
- 490 Adolescent Development (*)** **Hammar**
An advanced pediatric clerkship dealing with special problems of the adolescent. Senior medical students are offered an experience in a multidisciplinary clinic at University Hospital. Prerequisite, permission.
- 496 Concept of the Child (3)** **Deisher, Tjossem**
An advanced course for students who desire a more complete understanding of the child through integration of the viewpoints of pediatrics, preventive medicine, psychology, psychiatry, nutrition, social work, and nursery education. For nonmedical students. (Formerly Conjoint 496.) Prerequisite, permission.
- 498 Undergraduate Thesis (*)** **Aldrich**
For medical students. Prerequisite, permission.
- 499 Undergraduate Research (*)** **Aldrich**
An opportunity to work in the laboratory on problems related to pediatrics. Open to first- and second-year medical students. Prerequisite, permission.

COURSE FOR GRADUATES ONLY

- 505 Physical Growth of the Well Child (2)**
Nine weekly seminars (eighteen hours). Presentation by departmental staff of relationships between growth and development and diseases of childhood as they pertain to dental health. For graduate students in dentistry. Prerequisite, permission.

PHYSICAL MEDICINE AND REHABILITATION

Chairman: JUSTUS F. LEHMANN, CC814 University Hospital

The Department of Physical Medicine and Rehabilitation provides instruction for medical students, interns, and residents in the comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rational for use of physical therapy, occupational therapy, and other paramedical specialties; and advanced investigation of special problems encountered in the field. In addition, the Department conducts a residency training program for the specialty of Physical Medicine and Rehabilitation.

The Department offers a curriculum in Occupational Therapy (see pages 85 and 86) and a curriculum in Physical Therapy (see pages 87 and 88).

COURSES

- N107 Introduction to Occupational Therapy (0)** **Hume**
Orientation to occupational therapy as a paramedical specialty. Elementary concepts of treatment-through-activity and their application in various disability areas. Relationship of occupational therapy to allied specialties such as nursing, physical therapy, social work.
- 290 Pre-Occupational Therapy Clerkship (2)**
Supervised observation and work with patients in local occupational therapy clinics concurrent with lectures on professional ethics and on elementary techniques of occupational therapy. Prerequisite, permission.
- 302 Terminology (1)** **Brunner**
Common terms, abbreviations, prefixes, and suffixes used in medicine and various term usage in the field of physical medicine and rehabilitation. Required for occupational therapy students and physical therapy students, others by permission.
- N306 Introduction (0)**
Orientation; history, scope of physical medicine and rehabilitation; relationships of physical therapy, occupational therapy, nursing, rehabilitation counseling, social service and other allied services in carrying out the team concept of a complete rehabilitation program. Required for physical therapy students, others by permission.
- 320-321 Medical Science (4-4)** **Staff of Departments of Medicine, Obstetrics and Gynecology, Physical Medicine and Rehabilitation, Radiology, Surgery**
Lectures in medical science fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, physical medicine and rehabilitation, orthopedics, rheumatology, and roentgenology. Required for occupational therapy students and physical therapy students, others by permission.
- 332 Pathologic Physiology for Physical Therapists and Occupational Therapists (5)** **Lehmann, Stolov**
Emphasis on normal and pathologic physiology of the circulatory, respiratory, central nervous and musculo-skeletal systems as basis for treatment in occupational therapy and physical therapy. Required for occupational therapy students and physical therapy students, others by permission. Prerequisites, Anatomy 301, Zoology 208.
- 342 Advanced Kinesiology (3)** **Lehmann**
Study of joint motion and muscle function in relation to both the normal and abnormal state. Analysis is made of specific techniques employed in the field of physical medicine and rehabilitation. Required for physical therapy students, others by permission.
- 350-351 Function of the Locomotor System (3- or 4-)(-3 or-4)** **Lehmann, Stolov**
Functions of musculo-skeletal system as applied to normal and pathologic patterns of motion. Emphasis on upper extremity, shoulder girdle, lower extremity and trunk. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students and physical therapy students, others by permission. Prerequisites, Anatomy 301, Zoology 208.
- 350L-351L Anatomy Laboratory for Occupational Therapists (1-1)** **Shevlin**
Study of musculo-skeletal, peripheral-vascular and peripheral-nervous systems from projected material. Concurrent with 350-351. Required for occupational therapy students, others by permission.
- 380 Occupational Therapy Theory I (4)** **Hume, Shevlin**
Study of fundamentals applicable to all areas of treatment with particular emphasis on the use of occupational therapy in the treatment of physical disabilities. Correlated with 342. Prerequisite, third-year occupational therapy students.
- 408 Tests and Measurements (3)** **McMillan, Rathbun**
Methods of performing, recording, and interpreting test procedures used in physical medicine and rehabilitation; measurement of joint motion, evaluation of muscle strength through manual tests, and posture evaluation. Laboratory. Required for physical therapy students, others by permission.
- 416 Ethics and Administration (2)** **Brunner**
Basic principles of medical ethics, professional organizations and obligations of a physical therapist, and the administration of a physical therapy department. Required for physical therapy students, others by permission.

- 451 Anatomy Dissection for Physical Therapists (4)** **Redford**
Dissection of musculo-skeletal, peripheral-vascular and peripheral-nervous systems, including gross anatomy of other areas. Required for occupational therapy students and physical therapy students, others by permission.
- 461 Massage (3)** **Brunner**
History of massage, methods of application, indications and contraindications, with the physiological effects on various systems of the body. Laboratory. Required for physical therapy students, others by permission.
- 463-464 Modality Treatments (4-5)** **Brunner, Rathbun**
Theory, technique, demonstration and practice in the use of the physical agents employed in physical therapy which include thermotherapy, actinotherapy, hydrotherapy, low-frequency and high-frequency currents, and ultrasound. Required for physical therapy students, other by permission.
- 466-467 Advanced Biophysical and Physiological Effects of Modalities (2-2)** **Lehmann**
Biophysical principles of equipment employed in physical therapy, physiological effects produced. Required for physical therapy students, others by permission.
- 468 Therapeutic Activities I (1-5)** **Hume**
Laboratory study of materials and techniques in a variety of handicrafts as they are used in occupational therapy. Includes a study of the design and fabrication of splints, self-help devices, etc. Prerequisite, fourth-year occupational therapy students.
- 469 Therapeutic Activities II (1-5)** **Hume**
Laboratory survey of special skills used in occupational therapy (recreation skills, industrial activities, etc.). Adjusted to meet the needs of the individual student. Prerequisite, third-year occupational therapy students.
- 470-471-472 Therapeutic Exercise (3-3-3)** **McMillan**
Methods of application, physiologic and therapeutic effects of exercises commonly used for treatment purposes in physical therapy. Opportunities are provided for supervised clinical practice of skills, and special attention is given to correlation of techniques to appropriate age level and handicap. New developments from the field are analyzed and evaluated. Required for physical therapy students, others by permission.
- 476 Physical Restoration, Ambulation, and Transfer Activities (3)** **Rathbun**
Instruction in theory and methods of physical restoration of the severely handicapped patient. Laboratory demonstration, practice, and supervised clinical practice in: selection, care and use of wheelchairs, crutches, canes, walkerettes, and other assistive devices; training in use of braces and prostheses; special problems in the area of activities of daily living. Required for physical therapy students, others by permission.
- 477 Occupational Therapy Clinical Affiliation in Physical Disabilities (1-6, maximum 6)** **Shevlin**
Directed and supervised clinical practice in the Occupational Therapy Clinics of the University Hospital Rehabilitation Center or other affiliated hospitals. Required for fourth-year occupational therapy students.
- 481 Occupational Therapy Theory II (3)** **Shevlin**
Emphasizes the total rehabilitation of the physically disabled patient. Includes a study of the various professions and agencies and organizations involved in the comprehensive care of the physically disabled. Prerequisite, fourth-year occupational therapy students.
- 482 Occupational Therapy Theory III (3)** **Hume**
A study of the application of occupational therapy in special fields: pediatrics (including cerebral palsy); geriatrics; patients with special problems (blind, deaf, mentally retarded, etc.). Prerequisite, fourth-year occupational therapy students.
- 483 Occupational Therapy Theory IV (3)**
A study of the principles and techniques of occupational therapy in the treatment of the psychiatric patient. Prerequisite, fourth-year occupational therapy students.
- 484 Occupational Therapy Theory V (2)** **Shevlin**
Principles of administration, organization, and supervision as applied in the management of occupational therapy programs. Prerequisite, fourth-year occupational therapy students.
- 486 Special Techniques and Procedures (3)** **Rathbun**
Special problems encountered in clinical affiliations, discussions and demonstrations of special problems, tests, and operating procedures. For physical therapy students, others by permission.
- 492 Occupational Therapy Clinical Affiliation in General Medicine and Surgery and/or Tuberculosis (1-8, maximum 8)** **Shevlin**
Directed and supervised clinical practice in Occupational Therapy Clinics for general medical and surgical patients. Arranged in University Hospital or other affiliated hospitals. Required for fourth- or fifth-year occupational therapy students.
- 493 Occupational Therapy Clinical Affiliation in Pediatrics (1-4, maximum 4)** **Shevlin**
Directed and supervised clinical practice in a pediatric occupational therapy service. Arranged in University Hospital or other affiliated hospitals. Required for fifth-year occupational therapy students.
- 494 Occupational Therapy Clinical Affiliation in Psychiatry (1-6, maximum 6)** **Shevlin**
Directed and supervised clinical practice in Psychiatric Occupational Therapy Clinics in University Hospital or other hospitals approved for occupational therapy teaching. Required for fifth-year occupational therapy students.

495 Clinical Affiliations in Physical Therapy (12)

Twelve to fifteen weeks with 600 minimum working hours. Clinical application of physical therapy techniques under supervision in the Physical Therapy Departments of affiliated hospitals. Required for physical therapy students.

496 Electromyography and Electrodiagnosis (*)

Elective work in clinical electromyography and other electro-diagnostic methods with lecture-demonstrations involving selected cases in the laboratories. Prerequisite, permission.

498 Undergraduate Thesis (*)

Prerequisite, permission.

499 Undergraduate Research (*)

a) Research for undergraduate medical students. Participation in clinical and basic research projects in the department. b) Research projects with special reference to modality treatment and physical therapy techniques for physical therapy students. Research projects with special reference to occupational therapy techniques for occupational therapy students. Prerequisite, permission.

520 Seminar (1-5)

Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics. Prerequisite, permission.

CURRICULUM IN OCCUPATIONAL THERAPY

The Department of Physical Medicine and Rehabilitation offers courses leading to the degree of Bachelor of Science in Occupational Therapy in the School of Medicine. This program has been accredited by the American Occupational Therapy Association and the Council on Medical Education and Hospitals of the American Medical Association.

PHILOSOPHY AND OBJECTIVES

The curriculum in Occupational Therapy is planned to allow the student a broad base of liberal arts and humanities which will give him an awareness of social change and a feeling of responsibility for recognizing and meeting social needs, both as an individual and as a member of a health profession.

The student must appreciate the role of work in human development and its relation to human values. He must learn the basic principles behind the use of activity for the improvement of conditions of mental and physical illness and inadequacy.

Self-development is encouraged to promote sound and ethical attitudes and effective interpersonal relationships.

It is emphasized to the student that the use of judgment is inherent in the effective application of his skill and knowledge, and every effort is made to develop in him the habit of investigation and continued study.

THE PROFESSIONAL PROGRAM

Students are admitted to the curriculum at the junior level and must have completed the following courses or their equivalent, with a cumulative grade-point average of 2.50:

Anatomy 301	General Anatomy
Art 109	Design
Chemistry 101, 102	General and Organic Chemistry
Psychology 100, 101	General and Adjustment Psychology
Sociology 110	Survey of Sociology
Zoology 208	Elementary Human Physiology

A total of thirty-seven quarter credits of varied skills are required, to be chosen from the Arts (Fine and Applied), from Education, from Recreation, or from other departments of the University, upon approval by the Occupational Therapy adviser. The following basic skills courses are usually required of occupational therapy students at the University of Washington as a part of the above requirement:

Art 201	Ceramic Art
Education 182	General Shop for Industrial Education Teachers
Education 280, 383-	Fundamentals of Woodwork for Industrial Education Teachers and Advanced Woodwork
Home Economics 329	Hand Weaving

When an adequate portion of skills courses are completed in the preoccupational therapy program, the student has the opportunity to complete three months of clinical affiliations during Winter Quarter of the senior year and also has a greater opportunity for upper-division electives in the junior and senior years.

SUMMARY OF THE THIRD- AND FOURTH-YEAR PROGRAMS

Third Year

	15-16				15-16

*Students are advised to choose the majority of electives in the third and fourth years from the behavioral sciences.

CLINICAL AFFILIATIONS

A minimum of nine months total of clinical affiliations are required, to include physical disabilities, psychiatry, pediatrics, general medicine and surgery, and/or tuberculosis. Part of these affiliations are given at the University Hospital and part must be taken in other institutions. Students are given an opportunity to select from approved teaching programs throughout the country.

THE PREPROFESSIONAL PROGRAM

Students at the University of Washington should register in the College of Arts and Sciences as preoccupational therapy majors. High school students should arrange their current course of study for admission to that College. Transfer students should consult the Division of Occupational Therapy at University Hospital to determine their eligibility for the preprofessional or professional program. University of Washington freshmen should enroll for the orientation course Physical Medicine and Rehabilitation N107 Autumn Quarter. Sophomores take Physical Medicine and Rehabilitation 290 with permission from the Division of Occupational Therapy adviser.

CURRICULUM IN PHYSICAL THERAPY

The Department of Physical Medicine and Rehabilitation offers courses leading to the degree of Bachelor of Science in Physical Therapy in the School of Medicine.

The curriculum is approved by the American Physical Therapy Association and by the Council on Medical Education and Hospitals of the American Medical Association. Students are admitted to the Physical Therapy curriculum on the junior level, where they will receive instruction, training, and clinical experience in physical therapy. Prior to enrollment in the curriculum, a student must have completed, with a cumulative grade-point average of 2.50, a two-year program of courses providing a broad educational background, as well as the prerequisites for the curriculum in physical therapy.

PHILOSOPHY AND OBJECTIVES

The Curriculum in Physical Therapy has as one of its major objectives the development of a broad academic background with considerable emphasis on liberal education. Ample opportunity is provided for growth in many areas of interest. An equally important objective is the acquisition of knowledge and skills fundamental to the field of physical therapy. Emphasis is placed on the development of habits of individual study and the ability to make sound judgments. Consideration is given to growth in the areas of social and professional relationships. Facility in effective techniques of communication and teaching are given special attention. The four-year educational program is designed to meet these objectives.

The Advisory and Evaluation Committee of Physical Therapy requires the following courses given at the University of Washington. Students taking pre-physical therapy work at other institutions may compare these courses with those given in their schools by checking the course descriptions given in the *College of Arts and Sciences Bulletin*.

QUARTER CREDITS

Anatomy 301	4
Chemistry 100 and/or 101, 102.....	10 or 15
Mathematics 101, 103, 104, or 105.....	3 or 5
Microbiology 301	5
Physics 170, 170L	6
Psychology 100, 101	10
Psychiatry 267	2
Sociology 110	5
Speech 100	5
Zoology 118, 118L, or 208.....	5-6

The Advisory and Evaluation Committee of Physical Therapy recommends that students choose electives with the aim of broadening their background in human relationships and understanding.

High school students desiring to enter the curriculum in physical therapy at the University of Washington should arrange their current course of study to meet the requirements for admission to the College of Arts and Sciences.

COMPARISON OF CURRICULA IN OCCUPATIONAL AND PHYSICAL THERAPY

The educational programs in Occupational Therapy and in Physical Therapy share a common need for studies in human anatomy and physiology with a special emphasis on the musculo-skeletal and nervous systems and a need for basic studies in pathological physiology and medical sciences. In these areas of study, the two curricula share identical courses. In other areas, the two curricula are independent programs, with separate faculties for instruction in the professional courses and separate Advisory and Evaluation Committees.

The application procedures, student promotion policies, and fees are departmental policies which apply to both curricula except where exceptions are specifically noted.

APPLICATION PROCEDURE

For entrance to the Autumn Quarter, the applicant must initiate the following steps on or before March 1: (1) Arrange a personal interview with a member of the teaching staff of the division; (2) Submit formal application to the Advisory and Evaluation Committee of the division concerned, c/o Department of Physical Medicine and Rehabilitation, Room CC814 University Hospital. (Application forms are available from the Department.); (3) Arrange for official transcript(s) to be sent directly from the registrar(s) of previous college(s) to the Advisory and Evaluation Committee, including complete record with grades and credits to date. (When college transcripts do not include a complete list of high school courses and

credits, such a list must be submitted with the application. Also include a list of courses the applicant is currently taking or will take to complete preprofessional requirements. An official record of grades for such courses must be submitted when available.); (4) An unmounted recent photograph, 2x2 inches, is desirable but not required.

PROCESSING OF APPLICATIONS

The Advisory and Evaluation Committee bases its decision on the objective evaluation of applicant's residence, preprofessional training, evidences of scholarship, and evidences of personal qualification for the work. The Committee or any one of its members may request a personal interview with the applicant to supplement the above information.

NOTIFICATION

The Committee gives written notice to the applicant as soon as possible after a decision is made. Within two weeks after a candidate has been notified that he is accepted, the Comptroller of the University requires a deposit of \$50.00. This deposit is applied to the tuition for the first quarter. It is refundable only in cases of withdrawal for bonafide illness, failure to complete basic preprofessional requirements, induction into military service, or failure to pass the physical examination required of all students at the time of registration.

STUDENT ACHIEVEMENT AND PROMOTION

The University grade-point system is used. Students are notified of their grades at the end of each quarter.

A student must maintain an average of 2.50, and a cumulative average of 2.50 is required for graduation. If the work in a course is incomplete, a grade of I may be given. This Incomplete must be removed before September 15 if the student is to advance into the next year's class.

At the end of each academic year the Advisory and Evaluation Committees evaluate the accomplishment of the student during the year and determine his fitness for promotion. When promotion is not recommended, the student is subject to dismissal from the curriculum. The Advisory and Evaluation Committees reserve the right to dismiss a student from the curriculum for any reason it deems sufficient. A student is advanced only when his general attitude, scholastic progress, and personal attributes are considered satisfactory.

CLASS SCHEDULES

The curriculum in physical therapy and the curriculum in occupational therapy operate on the quarter system of the University. There are three 11-week quarters in the third and fourth years.

Occupational Therapy requires a minimum of six months or two quarters of additional clinical affiliation. Physical Therapy requires three months of clinical practice which is completed in the summer quarter of the senior year.

TUITION AND FEES FOR THIRD AND FOURTH YEARS

All tuition and fees are payable at the time of registration. The University reserves the right to change any of its fees without notice. The following is a table of charges per quarter for the six quarters of academic work in the curriculum of physical therapy and in the curriculum of occupational therapy.

	<i>Tuition</i>	<i>Incidental Fee</i>	<i>Other Fees*</i>	<i>Total</i>
Resident	\$ 65.00	\$37.50	\$8.50	\$111.00
Nonresident	\$125.00	\$82.50	\$8.50	\$216.00

* Other fees consist of Student Activities, \$2.50; ASUW Bond Redemption, \$3.50; HUB Bond Redemption, \$1.00; Building Fund, \$1.50.

THE FOLLOWING ARE THE CHARGES FOR CLINICAL TRAINING:**Summer Quarter (both curricula)**

Resident and

Nonresident	—	\$82.50	\$2.50	\$ 85.00
-------------------	---	---------	--------	----------

Autumn, Winter, and Spring Quarters (Occupational Therapy students only)

Resident	\$ 65.00	\$15.00	None	\$ 80.00
----------------	----------	---------	------	----------

Nonresident	\$125.00	\$50.00	None	\$175.00
-------------------	----------	---------	------	----------

EXEMPTIONS, SPECIAL FEES, AND REFUND OF FEES (Same as for medical students, see pages 47 and 48.)

PSYCHIATRY

Chairman: HERBERT S. RIPLEY, BB867 University Hospital

The Department of Psychiatry aims to provide students of medicine, nursing, psychology, social work, education, and others concerned with human problems with a scientific grasp of psychiatric principles so that they will be able to evaluate interpersonal relationships and use to the greatest advantage their potentialities for understanding and dealing with personality reactions.

Instruction in psychiatry is given during each of the four years of the medical course and is coordinated and integrated with the various disciplines in medicine. Thus from the beginning of his medical career the student is stimulated to think in terms of understanding the totally functioning human being.

COURSES

- 267 Introduction to Mental Hygiene (2)** **Davies**
A survey of the development of personality and a consideration of minor emotional problems in children and adults. For nonmedical students. Not open to students who have taken 450 or 451.
- 400 Human Personality Development and Behavior (1,1,1)**
Emotional and personality development from infancy through old age; the adaptation of the individual to his environment, with attention to the roles of heredity, constitution, physical changes, and family and social relationships as determinants in psychodynamics. Comparative personality development is illustrated by animal and human behavior. Required for first-year medical students.
- Conjoint 426-427 Introduction to Physical Diagnosis (4-9) (See Conjoint Courses, page 78.)**
- 430 Psychopathology (2)** **Bakker, Hampson, Orr, Ripley, Sobel**
Abnormalities of behavior, thinking, and feeling, and the structural and psychological factors that produce them. Anxiety, depression, elation, withdrawal, repression, compensation, projection, and other personality reactions are discussed. Required for second-year medical students.
- 440 Physiology of Emotions (*)** **Holmes**
Seminar based on discussion of selected reading of original articles from psychophysiologic and psychosociologic literature. Designed to orient and interest students for participation in current or future research projects. Elective for first- and second-year medical students only. Prerequisite, permission.
- 441 Individual Psychological Testing (*)** **Preston**
Instruction in the administration and interpretation of the Rorschach, Thematic Apperception, and Wechsler-Bellevue Test results with patients in psychiatric wards or in out-patient clinics. Elective for second-year medical students only. Prerequisite, permission.
- 442 Culture and Illness (*)** **Jackson**
Examination of several social systems with regard to the manner in which patterns of illness are developed, maintained, or modified by cultural elements. A lecture-discussion course with guided reading. Elective for first- and second-year medical students only. Prerequisite, permission.
- 443 Seminar in Theories of Personality (*)** **Hampson**
A consideration of major contemporary theories of personality and their relevance to psychiatry. Elective for medical students only.
- 450 Principles of Personality Development (2)** **Kaufman**
Discussion of the principles of personality development and the problems most commonly met. Consideration will be given to the physiologic, psychologic, and cultural factors from infancy through adolescence. For nonmedical students. Not open to students who have taken 267. Prerequisite, senior or graduate standing.

- 451 Principles of Personality Development (2)** **Heilbrunn**
Continuation of 450. Consideration will be given to the physiologic, psychologic, and cultural factors from maturity through old age. For nonmedical students. Not open to students who have taken 267. Prerequisite, 450 or permission.
- 452 Clinical Psychiatry (2)** **Schwartz**
Discussion of clinical psychiatry considering causation, prevention, treatment, and rehabilitation. Not open to students who have taken 457 or 557. For nonmedical students. Prerequisite, 267 or 451 or permission.
- 465 Clinical Clerkships (*)**
Four weeks of closely supervised experience on a psychiatric inpatient service. The student is responsible for diagnostic evaluations of patients with a variety of psychiatric disorders at the University Hospital, King County Hospital, and Veterans Administration Hospital. He is introduced to the principles of the use of psychologic tests, ward milieu management, group psychotherapy, and the physical and pharmacologic treatments. Clinical conferences with discussion of psychoses, psychoneuroses, and psychosomatic disorders are held. Lectures are given throughout the year. Required for third-year medical students.
- 475 Psychiatric Externship (*)**
Three or six weeks of work at a state psychiatric hospital where the student has an opportunity to learn from firsthand experience and active participation the methods used in caring for seriously ill patients. Elective for fourth-year medical students only. Prerequisite, permission.
- 480 Clinical Diagnosis and Treatment (*)**
Individually supervised outpatient experience with adults and children is obtained in the Outpatient Departments at the University Hospital, King County Hospital and at the Community Psychiatric Clinic. Emphasis is placed on an understanding of the psychodynamics of minor mental and emotional problems, the therapeutic interaction between the doctor and patient, and the simpler methods of counselling and psychotherapy. Lectures are given throughout the year. Required for fourth-year medical students.
- 490 Advanced Clinical Psychiatry (*)**
Clinical work, which may include inpatient and outpatient experience, is arranged to accommodate the particular interests of students. The objective is to give more prolonged and intensive experience than is possible in the required fourth-year work. Opportunities for this experience are available at the University Hospital, Seattle Veterans Administration Hospital, the Community Psychiatric Clinic, and King County Hospital. Elective for fourth-year medical students only. Prerequisite, permission.
- 491 Seminars and Conferences in Psychiatry (*)** **Ripley**
Special seminars and conferences on a variety of topics can be arranged to accommodate the particular interests of students. Opportunity will be afforded to gain experience in the theory of the interview and the doctor-patient relationship. Elective for medical students only. Prerequisite, permission.
- 492 Behavioral Science Study Unit (*)** **Holmes**
A variety of topics will be presented under the sponsorship of the Department of Psychiatry, with participation of faculty members from the Division of Neurosurgery and the Departments of Pediatrics, Pharmacology, Physiology and Biophysics, Psychology, and Sociology. When practicable, selected patients will illustrate topics presented. Elective for medical students only. Prerequisite, permission.
- 498 Undergraduate Thesis (*)**
Supervised library, clinical, or experimental work. Elective for medical students only. Prerequisite, permission.
- 499 Undergraduate Research (*, maximum 15)**
Special projects in various aspects of clinical and laboratory psychiatry, including work in psychoses, psychoneuroses, psychosomatic disorders, child psychiatry, geriatrics, social psychiatry, and psychological testing can be arranged with the instructor. Elective for fourth-year medical students only. Prerequisite, permission.

COURSES FOR GRADUATES ONLY

- 553 Psychodynamics and Psychopathology (2)** **Heilbrunn**
Heredity, constitution, physical changes, and family and social relationships as determinants in psychodynamics are discussed. Attention is paid to defense mechanisms such as anxiety, depression, resentment, evasion, withdrawal, repression, projection, and overcompensation as commonly encountered in psychopathology. For nonmedical students. Prerequisite, 267 or 451 or permission.
- 558 Seminar: Interviewing (2)**
Case studies are presented by individual students for discussion of the psychodynamics and methods of dealing with personality problems. For graduate students who are having practical experience in interviewing. For nonmedical students. Prerequisite, permission. (Not offered 1962-63.)
- 559 Child Psychiatry (2)** **Kaufman**
Series of discussions and lectures dealing with psychopathology of children. For nonmedical students. Prerequisite, 267 or 451 or permission.
- 565 Biological Foundations of Psychiatry (2)** **Heilbrunn**
Anatomical and physiological factors involved in various forms of psychopathology. For nonmedical students. (Not offered 1962-63.) Prerequisite, permission.

RADIOLOGY

Chairman: MELVIN M. FIGLEY, SS230 University Hospital

The courses given by this department are designed for students in the Graduate School and the School of Medicine. Some are concerned with the basic aspects of ionizing radiations, their measurement, control, and principles of safe application. Other courses are concerned with their application to the diagnosis of human disease and the control of human cancer.

Conjoint-426-427 Introduction to Physical Diagnosis (4-9) (See Conjoint Courses, page 78.)

COURSES

- 465 Diagnostic Radiology (*)** **Figley, Phillips**
A series of lectures for medical students describing in general principle and some detail the applications of radiological methods to clinical diagnostic problems. Prerequisite, third-year medical students.
- 475 Therapeutic Radiology (*)** **Parker**
A series of presentations for medical students with the Departments of Surgery, Medicine, and Pathology on the clinical aspects of the major human cancers and their control with surgery or radiation.
- 480 Experimental Radiation Dosimetry (3)** **Baltzo**
Radiological instrumentation, standards and techniques pertinent to measurement and control of human exposure to ionizing radiation in X-ray and isotope applications. Prerequisite, Physics 473 or Chemistry 395 or permission.
- 485 Radiation Dosimetry (4)** **Myers, Roesch**
The measurement of radiation energy loss relationships in gases and solids, detection techniques and circuits, units, consideration of human exposure limits. Prerequisite, permission.
- 493 Special Problems in Radiological Health (2 or 4, maximum 8)** **Baltzo**
Observation and participation in research and clinical use of radiation emitters. Prerequisite, permission.
- 494 Clerkship: Diagnostic Radiology (*)** **Figley**
Observation, instruction, and supervised participation in clinical fluoroscopy, radiography, film interpretation, and X-ray conferences. Prerequisites, senior standing and permission.
- 495 Clerkship: Therapeutic Radiology (*)** **Parker**
Observation, instruction, and supervised participation in clinical radiation therapy including clinical examination, treatment planning and administration, and conferences. Prerequisites, senior standing and permission.
- 498 Undergraduate Thesis (*)**
The student may write a thesis in either therapeutic or diagnostic phases of radiology. Prerequisite, permission.
- 520 Radiology Seminar (2)**
- 604 Research (*, maximum 12)**

The following Radiology courses are offered at the Center for Graduate Study at Richland, Washington.

- R400 Radiobiology (3)** **Bair**
This course requires only a minimum background in chemistry and does not presume any prior study of biology. Chemical, biological, and genetic effects of irradiation on unicellular and multicellular organisms, tolerance and dosage limits, effect of internal emitters, radiological ecology. Prerequisites, degree in science or engineering, Physics R323, or permission. (Offered Autumn, 1962)
- R485 Radiation Dosimetry (4)** **Roesch, Myers**
The measurement of radiation energy loss relationships in gases and solids; detection techniques and circuits; units; consideration of human exposure limits. Prerequisite, permission. (Offered Winter, 1963.)

SURGERY

Chairman: HENRY N. HARKINS, BB477 University Hospital

In the Department of Surgery, instruction is carried on during all four years of the medical student's training and is integrated with that of the other departments in the School of Medicine. In the first year, lectures are given concerning a few selected basic surgical applications of biology. In the second year, emphasis is placed on surgical physical diagnosis. In the third year, the inpatient clerkship in general surgery forms the core of the entire program. The student is assigned

patients and handles all aspects of care except direction of treatment. In the fourth year, attention is paid to the surgical subspecialties; neurosurgery, orthopedics, and urology. Special studies in general surgery, experimental surgery, ophthalmology, otolaryngology, and other surgical specialties are offered as electives.

The purpose of the undergraduate instruction in surgery is to provide the student with a basic background of surgical principles and surgical diagnosis and a knowledge of surgical diseases.

In addition to the basic undergraduate instruction, a fully certified surgical residency program is available in general surgery and the surgical specialties. Those participating in these residency programs may work toward a degree of Master of Science by meeting the requirements of the Graduate School as outlined in the *Graduate School Bulletin*. Performance of a fundamental experimental research problem of high caliber is an additional requirement for this advanced degree.

COURSES

Conjoint 426-427 Introduction to Physical Diagnosis (4-9) (See Conjoint Courses, page 78.)

465 Clinical Clerkships (*)

Third-year students will be assigned to the surgical services of the King County Hospital, Veterans Administration Hospital, or University Hospital. The student will gain experience in both inpatient and outpatient care of the patient seen on the surgical service. The student's responsibility for inpatients will consist of a complete initial workup, routine laboratory studies, and day-to-day participation in their diagnostic and therapeutic care. Particular attention will be given to the correlation of basic science material and clinical disease. Instruction in surgical pathology will be provided. Operating room experience will also be included. Seminars will be conducted weekly in each of the surgical specialty areas. Required for third-year medical students.

475 Preceptorship in Orthopedics (*)

Anderson, Gloyd

Student will follow a preceptor in all his work to better understand the pathophysiology and management of problems of the musculo-skeletal system. Elective for medical students. Prerequisite, permission Division and Department.

476 Pediatric Orthopedic Clerkship (*)

Students will be assigned to the orthopedic service at Children's Orthopedic Hospital where they will have the opportunity to study problems of the musculo-skeletal system in patients on an inpatient and outpatient basis. The student becomes an integral part of the service and assists in patient care; attends rounds, seminars, and correlative anatomy conferences. Elective for medical students. Prerequisite, permission Division and Department.

477 Electroencephalography Laboratory (*)

Chatrian

Introduction to EEG techniques and interpretation as well as the opportunity to obtain superficial acquaintance with neurophysiological techniques. Elective for medical students. Prerequisite, permission Division and Department.

478 Neurosurgery Research (*)

Chatrian, Foltz, Kelly, Ward, White

Investigation of special problems as an intimate member of the research team in the neurosurgical laboratory. Research to lead to a thesis if desired. Elective for medical students. Prerequisite, permission Division and Department.

479 Clinical Neurosurgery (*)

Foltz, Kelly, Ward, White

Student serves clinical clerkship as active extern on neurosurgery ward at University Hospital or affiliated hospital. Elective for medical students. Prerequisite, permission Division and Department.

480 Surgery Clerkship-Selective Elective: Neurosurgery, Orthopedics, Urology (*)

Time is divided between the inpatient and outpatient services of two of these divisional specialties; affords student opportunity to explore in depth the various diagnostic techniques and therapeutic management offered to patients in these surgical specialties. Two specialties required for fourth-year medical students.

481 Surgical Externship in Ophthalmology and Otolaryngology (*)

Passmore, and Lineback, Madigan; Cain, U.S.P.H. Hospital

At Madigan Hospital, individual externship training in outpatient department of ophthalmology and otolaryngology; the student attends hospital conferences and meetings. At U.S.P.H. Hospital, externship in otolaryngology in outpatient clinic (visits average 600 per month); the student utilizes own diagnostic abilities, performs or assists instructor in all phases of patient workups and care; attends ward rounds and conferences. Elective for medical students. Prerequisite, permission Division and Department.

482 Externship in General Surgery (*)

Baker, Savage, Speir

Students assigned inpatient cases on general surgery services. Responsible for patient workups, follow assigned patients to Operating Room. Participates in ward rounds, and surgical conferences. Selected hospitals. Elective for medical students. Prerequisite, permission Division and Department.

- 483 Urology Research (*)** **Ansell**
The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students. Prerequisites, permission Division and Department.
- 484 Clinical Urology (*)** **Ansell**
Student participates in the full activities of the service including ward rounds, conferences, diagnostic procedures, surgery, and case presentations and is assigned to one of three teaching hospitals where he shares with house staff in responsibility for the care of patients on this service. Elective for medical students. Prerequisite, permission Division and Department.
- 485 Cardiovascular Surgery (*)** **Dillard, Merendino, Winterscheid**
Students actively engage in the care and treatment of inpatient and outpatient surgical cardiovascular cases. They will work closely with the cardiovascular team on preoperative diagnostic studies, in the operating room, and postoperative patient care. Elective for medical students. Prerequisite, permission Division and Department.
- 487 Animal Surgery (*)** **Stevenson**
Participating students perform as a surgical team approximately six complete representative procedures in animal laboratory under standard operating room conditions, utilizing standard operating room techniques. Special conference precedes each session. Elective for medical students. Prerequisite, permission.
- 498 Undergraduate Thesis (*)**
Offered to those students who have engaged in summer research in any division of the Department of Surgery. Provides time for extension of such projects and opportunity to study and prepare for completion of thesis on selected surgical subjects. Elective for medical students. Prerequisites, summer research and permission from the Division and Department.
- 499 Undergraduate Research (*)**
(Subject to approval.)

COURSES FOR GRADUATES ONLY

- 520 General Surgery Seminar (5)** **Harkins, Merendino, Nyhus, Stevenson**
Conferences, seminars, and round-table discussions of advanced surgical topics and recent literature in the field.
- 521 Orthopedic Research Seminar (*)** **Akeson, Anderson, Clawson**
Each week a current laboratory topic is discussed with members of the attending and resident staff. Active participation of the student is required. Prerequisite, graduate student.
- 522 Orthopedic Seminar (*)** **Clawson**
Seminar in current topics of orthopedic interest. Prerequisite, senior medical student or graduate student.
- 585 Surgical Anatomy (2-4, maximum 12) (See Conjoint Courses, page 78.)**
- 590 Surgical Experimental Techniques (5)** **Harkins, Merendino, Nyhus, Stevenson**
Basis for graduate research and advanced thesis work.
- 598 Seminar in Urology (*)**
Problems in the field of urology discussed by various visiting members of the faculty of urology and of other departments to provide a well-rounded basic scientific and clinical presentation.
- 600 Research (*)**
- 700 Thesis (*)**

ROSTER OF STUDENTS IN MEDICINE

Degrees of Doctor of Medicine Conferred, June 11, 1960

CLASS OF 1960

- ALLEN, William C., Bothell
University of Washington
Mountain View Hospital
- ANDERSON, James L., Seattle
B.A., University of Washington
Doctors Hospital
- ANDERSON, Robert W., Hilo, Hawaii
B.A., College of Puget Sound
Wayne County General Hospital
- ANDERSON, William F., Tacoma
B.A., Pacific Lutheran College
Pierce County Hospital
- ANGLE, Herbert G., Jr., Shelton
B.A., University of Washington
Harbor General Hospital
- BELL, Eldon E., Snohomish
B.S., University of Washington
Minneapolis General Hospital
- BELL, Jack W., Seattle
University of Washington
Sacramento County Hospital
- BOSWELL, John W., Fairbanks, Alaska
Stanford University
University of Washington
Santa Clara Hospital
- BOYER, Garry O., Spokane
B.S., Washington State College
Highland Alameda County Hospital
- BRANDT, Alan D., Spokane
B.S., University of Idaho
Orange County Hospital
- BRAY, Ronald E., Seattle
University of Washington
King County Hospital
- CALLERO, Vern L., Seattle
Gonzaga University
B.S., Seattle University
Providence Hospital
- CONNELLY, Glenn Hart, Jr., Portland,
Oregon
University of Washington
B.S., Oregon State College
San Francisco Hospital
- CORBETT, Ronald K., Spokane
B.A., University of Washington
University of California Hospitals
- CURRIN, Douglas R., Clarkston
B.A., Washington State College
University of California Hospitals
- DAUS, Joseph K., Seattle
B.S., Washington State College
San Francisco Hospital
- DIPPE, Donald W., Grand Forks, N.D.
B.A., B.S., University of North Dakota
University of Illinois
U.S. Public Health Service, Staten Island
- DOBBS, Larry S., Kirkland
Harvard University
B.A., University of Washington
King County Hospital
- DUNPHY, Barry E., Lynnwood
B.A., Yale University
U.S. Navy, San Diego
- EVANGER, Arden E., Camas
Willamette University
B.A., University of Washington
U.S. Public Health Service, Staten Island
- FERGUSON, Donald E., Klamath Falls,
Oregon
B.S., Whitworth College
General Hospital of Fresno County
- FORGAARD, Dean M., Seattle
University of Washington
B.S., Washington State College
Minneapolis General Hospital
- FREEMAN, Melvin I., Seattle
B.S., University of Washington
VAH, Los Angeles
- GAUB, Margaret L., Seattle
B.S., University of Washington
Jackson Memorial Hospital
- GAUGER, Grant E., Seattle
B.S., University of Washington
Deaconess Hospital
- HALL, George A., Missoula, Montana
Montana State University
B.S., University of Washington
U.S. Army, Letterman General Hospital
- HALL, George M., Edmonds
University of Minnesota
B.S., University of Washington
St. Lukes Hospital
- HARRIS, Arthur K., Camas
B.S., University of Washington
Minneapolis General Hospital
- HEUPEL, Alden R., Eureka, S.D.
B.A., Sioux Falls College
M.A., University of South Dakota
Santa Barbara Cottage Hospital
- HILLMAN, R. S. Lyle, Mountain, N.D.
B.A., B.S., University of North Dakota
U.S. Navy, San Diego
- HOLLINGSWORTH, Kennan H., Bellevue
B.S., University of Washington
- HUNT, Hal H., Denver, Colorado
University of Washington
University of California
B.A., Whitman College
Children's Orthopedic Hospital
- JOHNSON, George M., Bismarck, N.D.
B.A., B.S., University of North Dakota
St. Lukes Hospital
- JONES, Dwaine L., Edmonds
University of Washington
U.S. Navy, Oakland
- KENNEDY, John B., Everett
University of Washington
B.A., Stanford University
University of Texas Medical Branch
Hospital
- KNORR, William C., Kent
University of Washington
Eastern Washington College of Education
B.A., Pacific Lutheran College
King County Hospital
- KNUTSON, Lyman B., Miles City, Montana
University of Utah
B.S., Utah State Agricultural College
King County Hospital
- KOKENGE, LeRoy F., Yakima
B.S., Gonzaga University
Strong-Memorial-Rochester Municipal
Hospital
- LESTER, Edward L., Port Angeles
B.S., Washington State College
King County Hospital
- LUEHRS, James G., Mercer Island
U.S. Naval Dental Technician School
University of Washington
U.S. Navy, Oakland
- McKINLAY, Glenn W., Spokane
Washington State College
B.S., Whitworth College
St. Lukes Hospital

- MAHNKE, James H., Walla Walla
B.A., Harvard College
University of Minnesota Hospital
- MANRING, Daniel A., Spokane
B.S., Washington State College
U.S. Navy, San Diego
- MATHESON, David L., Seattle
B.A., Central Washington College of
Education
University of Texas Medical Branch
Hospital
- MEZISTRANO, Joseph S., Seattle
B.S., University of Washington
University of Kansas Medical Center
- MORLOCK, Noel L., Oak Harbor
University of Washington
Detroit Receiving Hospital
- MORRIS, Ralph L., Mossyrock
B.A., University of Washington
University Hospital
- MULFORD, Beatrice A., Onalaska
Lower Columbia Junior College
B.A., Pacific Lutheran College
Ancker Hospital
- MURPHY, Solbritt S., Stockholm, Sweden
University of Washington
Royal Charles Institute of Medicine
Children's Orthopedic Hospital
- MYERS, Lafe H., Jr., Richland
B.A., University of Washington
U.S. Navy, San Diego
- NELSON, Leslie G., Everett
B.S., Seattle Pacific College
Los Angeles County Hospital
- NIELSEN, Tore K., Tacoma
B.A., Pacific Lutheran College
Ancker Hospital
- NORMANN, Sigurd J., Edmonds
University of Washington
University of California Hospital
- PHILLIPS, Clarence A., Jr., Oklahoma
City, Okla.
B.A., University of Washington
U.S. Public Health Service, Seattle
- PROCTOR, Merton D., Great Falls,
Montana
Carleton College
San Diego Junior College
University of Washington
Virginia Mason Hospital
- RALSTON, L. Atley, Sheridan, Wyoming
B.A., Whitman College
University of Kansas Medical Center
- RICE, Edwin G., Grand Forks, N.D.
B.A., B.S., University of North Dakota
Minneapolis General Hospital
- RUDY, Lloyd W., Jr., Wenatchee
B.S., Washington State College
University of California Hospital
- SHERARD, Donald J., Seattle
B.A., Yale University
King County Hospital
- SIGURDSON, Thorbjorg, Edmonds
University of Washington
R.N., Ancker Hospital Training School for
Nurses
U.S. Public Health Service, Staten Island
- SMITH, Robert F., Seattle
University of Washington
B.S., Seattle Pacific College
Denver General Hospital
- SORENSEN, Lowell E., Pierre, S.D.
B.S., South Dakota State College
B.S., University of South Dakota
Doctors Hospital
- TENNYSON, Eugene H., Bremerton
B.A., Whitman College
King County Hospital
- THOMPSON, Gale E., Libby, Montana
Montana State College
B.A., Pacific Lutheran College
U.S. Army, Madigan General Hospital
- TURNER, David L., E. Stroudsburg, Pa.
B.S., Whitworth College
St. Lukes Hospital
- TWISS, Richard D., The Dalles, Oregon
Gonzaga University
University of California Hospital
- WATSON, Milton R., Walla Walla
B.A., Whitman College
Santa Clara County Hospital
- WILHYDE, David E., Tacoma
Whitman College
B.S., College of Puget Sound
University of Chicago Hospital
- WOOD, Edward M.
Texas Technological College
B.S., Oregon State College
Ph.D., Cornell University
Pierce County Hospital
- WRIGHT, Bruce C., Newport
B.A., Whitman College
King County Hospital
- YOUNG, Gary J., Camas
University of Portland
B.S., University of Washington
St. Vincents Hospital
- ZASKE, Merlin R., Vancouver
Clark Junior College
University of California Hospital

Degrees of Doctor of Medicine Conferred, June 10, 1961

CLASS OF 1961

- ALMQUIST, Edward E., Seattle
University of Washington
Strong-Memorial-Rochester Municipal
Hospital
- AMBUR, Richard F., Seattle
B.S., Seattle University
University of Utah Affiliated Hospital
- ANDERSON, Lennart L., Seattle
B.A., University of Washington
Highland Alameda County Hospital
- BADER, Max C., Seattle
University of Washington
U.S. Public Health Service Hospital,
Seattle
- BASKIN, Michael S., Tacoma
University of Washington
University of California Hospital

Stritch School of Medicine
Army Medical Service Hospital
- GIMLETT, David M., Tacoma
B.A., Stanford University
Harvard University
B.S., University of Washington
Mountain View General Hospital
- GLICKMAN, Kenneth I., Seattle
B.S., University of Washington
University of Utah Affiliated Hospitals
- GOLLNICK, Lea V., Seattle
B.S., University of Washington
Philadelphia General Hospital
- GRANT, Gray B., Seattle
B.S., University of Washington
Highland Alameda County Hospital
- GREENE, Larry M., Seattle
B.A., University of Washington
Orange County General Hospital
- GULDJORD, Knute M., Poulsbo
B.S., Washington State College
Harbor General Hospital
- HANSEN, Sigvard T., Jr., Yakima
B.A., Whitman College
King County Hospital
- HAYNES, James M., Seattle
B.A., University of Washington
Bellevue Second Medical Division, Cornell
University
- HEDGES, Gary R., Juneau, Alaska
B.A., Johns Hopkins University
Cleveland Metropolitan General Hospital
- HOLCENBERG, John S., Seattle
B.A., Harvard College
Barnes Hospital
- HOLLINGSWORTH, Ralph R., Kelso
Lower Columbia Junior College
B.S., University of Washington
Boston University Straight Specialties
- HUNTINGTON, HOWARD W., Tacoma
B.A., St. Olaf College
Good Samaritan Hospital
- JACKLIN, Alexander J., Seattle
University of Washington
University of California
San Diego County General
- JENSEN, Hanne M., Copenhagen, Denmark
University of Copenhagen
University of Washington Hospital
- JOHNSON, Rick L., Kelso
B.S., Washington State College
Philadelphia General Hospital
- KAMM, Ralph F., Lebanon, Illinois
B.S., University of Washington
North Carolina Memorial Hospital
- KEENE, John E., Yakima
B.S., Washington State College
University of Texas Medical Branch
Hospital
- KENNEY, G. James, Jr., Gig Harbor
B.A., University of Washington
Providence Hospital
- KRAUSE, Ronald L., Snohomish
B.A., Whitman College
Minneapolis General Hospital
- LEECH, Richard W., Bothell
B.A., University of Washington
Wayne County General Hospital
- LEWIS, Karsten C., Albany, Oregon
University of Washington
University of Oregon Medical School
- LOOP, Maj T., Stockholm, Sweden
Royal Medical School of Uppsala
Medical School of Lund
University of Chicago
Children's Orthopedic Hospital
- LOTTSFELDT, Fredrik I., Kirkland
University of Wisconsin
University of Washington
University of Minnesota Hospital
- MCALISTER, Robert, Seattle
Princeton University
King County Hospital
- MELTON, Russell W., Veradale
B.A., Gonzaga University
U.S. Naval Hospital, Oakland
- MILLETT, David W., Seattle
B.S., Seattle University
Minneapolis General Hospital
- MILNER, John E., Bremerton
B.S., U.S. Military Academy
University of Washington
Peter Bent Brigham Hospital
- MURPHY, William P., Seattle
Los Angeles City College
Los Angeles State College
University of Washington
Orange County General Hospital
- ODELL, Rollin W., Jr., Seattle
B.S., University of Washington
University Hospital-Ann Arbor
- OGDEN, Frank W., Honolulu, Hawaii
B.S., Seattle Pacific College
Army Medical Service Hospital-Brooke
General Hospital
- OWENS, Delwin T., Jr., Joseph, Utah
University of Utah
Weber College
B.S., University of Washington
Sacramento County Hospital
- PELTER, William M., San Diego, California
B.S., University of Nevada
University of Washington
Santa Clara County Hospital
- PETERSON, Norman E., Seattle
University of Washington
Philadelphia General Hospital
- POWELL, William J., Coeur d'Alene, Idaho
Northern Idaho Junior College
Gonzaga University
University of Washington
Cincinnati General Hospital

- PRICE, Richard F., Gig Harbor
B.S., College of Puget Sound
Cleveland Metropolitan General Hospital
- RAHE, Richard H., Seattle
Princeton University
Bellevue Second Medical Division—Cornell University
- RANDOLPH, Gerald G., Richland
B.S., The Citadel
King County Hospital
- RANEY, James O., Tacoma
B.S., Washington State College
Edward J. Meyer Memorial Hospital
- SHORT, Denis S., Grand Coulee
B.A., Central Washington College of Education
Medical College of Virginia Hospital Division
- STROM, Clarence G., Everett
B.A., Pacific Lutheran College
Minneapolis General Hospital
- SULLIVAN, Frank W., Kennewick
B.A., University of Washington

B.A., Wisconsin State College
B.S., University of South Dakota
- LAWRENCE-BERREY, Robert E., Walla Walla
B.A., Whitman College
- LEITCH, Cecil M., Grand Forks, N.D.
B.A., St. Olaf College
B.S., University of North Dakota
- LEMIRE, Ronald J., Seattle
College of William and Mary
University of Washington
- LILLIBRIDGE, Clinton B., Olympia
B.S., University of Washington
- MacLEAN, James B., Spokane
B.S., University of Washington

MACS, Juris M., Tacoma
B.S., College of Puget Sound

MILLETT, Fay E., Jr., Seattle
B.A., University of Washington

MOON, John B., Fresno, California
B.A., Pacific Lutheran University

NILSEN, John A., Graham
B.A., Pacific Lutheran University

NOMURA, Fred M., Jr., Seattle
University of Washington

OBENCHAIN, Dean F., Boise, Idaho
Westmont College
Boise Junior College
B.S., College of Idaho
B.S., State University of South Dakota

ODELL, Gary R., Seattle
University of Oregon
University of Washington

O'HARA, Brian A., Vancouver
B.A., Stanford University
Portland State College

PREWITT, Charles D., Twisp
B.A., Eastern Washington College of
Education

RADACK, Morris L., Avon, S.D.
B.S., South Dakota State College
B.M., State University of South Dakota

REDFIELD, William J., Bellevue
College of Puget Sound
B.A., Stanford University

REEDY, Michael K., Seattle
University of Chicago
B.A., University of Washington

SACHS, Marshall H., Seattle
B.A., University of Washington

SCHEYER, Stanley C., Tacoma
Stanford University
University of Washington

SCHIMMELBUSCH, Werner H., Seattle
University of Washington

SCHWINDT, Robert R., Castle Rock
Pacific Lutheran College
University of Washington

SEYMOUR, Paul D., Centralia
Centralia Junior College
University of Washington

SHEA, Michael W., Spokane
B.A., Gonzaga University

SMITH, Donald C., Aberdeen
Grays Harbor Junior College
University of Washington

SMITH, Michael R., Spokane
University of Notre Dame

STERN, Robert, Spokane
B.A., Harvard College

TAYLOR, Neal, Burley, Idaho
B.S., Brigham Young University

TURNER, Eugene F., Seattle
Shasta College
Westmont College
B.A., University of Washington
University of South Dakota

WALDRON, Frank D., Tacoma
D.V.M., Washington State College
Central Washington College of Education

WALKUP, Gary L., Richland
Eastern Washington College of Education
B.S., University of Washington

WENNERBERG, Richard P., Longview
B.S., Stanford University

WERTHMANN, Florian J., Fall City
B.S., Rensselaer Polytechnic Institute
Ohio State University
University of Washington

WONG, Guy Y., Seattle
B.A., University of Washington

ZUEGE, Robert H., Ottawa, Illinois
B.A., Harvard University

CLASS OF 1963

ANDERSON, Robert D., Seattle
University of Washington
B.S., Brigham Young University

ANDERSON, Seth E., Jr., Tacoma
B.A., Pacific Lutheran University

BERNHARD, Dan C., Seattle
B.S., University of Wisconsin

BOETTCHER, William G., Sitka, Alaska
B.S., Washington State University

BOWEN, Joyce M., Taylorsville, Miss.
Mississippi Southern College
Jones Junior College
B.S., Mississippi State University
University of Colorado

BOYCE, Noble E., Jr., Mercer Island
B.A., Whitman College

BROUGHTON, Tom W., Seattle
University of Washington

BRUNZELL, John D., Spokane
B.A., Whitman College
University of Washington

CANTY, Charles R., Jr., Butte, Montana
B.A., Carroll College

CHARD, Ronald L., Pomeroy
B.S., Washington State University
Duke University
University of Washington

CHINN, Joseph, Seattle
B.A., Yale University
University of Washington

CHINN, Mullan A., Seattle
B.S., University of Washington

DELATEUR, Barbara J., Hoquiam
University of Washington
Maryhurst College
B.S., St. Louis University

DICKERSON, Ben R., Spokane
B.A., Eastern Washington College of
Education
Oregon State College
University of California, Los Angeles
Gonzaga University

DONAHOO, Stanley E., Seattle
University of Washington

ELLINGSEN, Donald A., Spokane
B.S., Washington State University

FALL, Gordon F., Seattle
B.S., University of Washington

FAUCHALD, Nils, Jr., Mercer Island
B.A., Yale University

FOSS, Donald L., Fergus Falls, Minn.
Concordia College
B.S., University of North Dakota

FRAGOLA, Louis A., Jr., Seattle
B.S., University of Connecticut
University of Washington

FRANK, Peter G., Shelton
B.S., University of Washington

FRITZ, Kirkland J., Marquette, Mich.
Northern Michigan College
B.A., Pacific Lutheran College

GOWING, Burton R., Seattle
B.S., University of Washington

GRANT, Frederick J., Seattle
B.A., University of Washington

GREEN, Ralph R., Seattle
B.A., University of Washington

GROESBECK, Clarence J., Seattle
Central Washington College of Education
B.S., University of Washington

- HANSEN, Peter O., Cheney
Eastern Washington College of Education
- HARRINGTON, Robert L., Seattle
Gonzaga University

BULLETIN • UNIVERSITY OF WASHINGTON

SCHOOL OF NURSING

1962-1964

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter Bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

ACADEMIC PERIOD

JUNE 22—MONDAY	Instruction begins
JUNE 23—TUESDAY	Last day to add a course for the first term
JUNE 26—FRIDAY	Last day to add a course for the full quarter
JULY 3—FRIDAY	Last day to submit applications for advanced credit examinations for first term
JULY 18—SATURDAY	Advanced credit examinations
JULY 22—WEDNESDAY	Final examinations and first term end
JULY 23—THURSDAY	Second term begins
JULY 24—FRIDAY	Last day to add a course for the second term
JULY 31—FRIDAY	Last day to submit applications for advanced credit examinations for second term
AUGUST 15—SATURDAY	Advanced credit examinations
AUGUST 21—FRIDAY	Final examinations and second term end

AUTUMN QUARTER, 1964**REGISTRATION PERIOD**

MAY 11-29	Advance Registration only for students in residence Spring Quarter, 1964. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 1-24	In-Person Registration for students in residence Spring Quarter, 1964, who did not complete Autumn Quarter, 1964, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
SEPT. 1-24	In-Person Registration for former students not in residence Spring Quarter, 1964. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is August 15.</i>
JULY 15	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
AUGUST 28	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
SEPT. 2-24	In-Person Registration for ALL new students.
SEPT. 24	Last day to register for Autumn Quarter, 1964. Note application deadlines.
SEPT. 28-OCT. 2	Change of Registration by appointment only.

ACADEMIC PERIOD

SEPT. 28—MONDAY	Instruction begins
OCT. 2—FRIDAY	Last day to add a course

OCT. 30—FRIDAY	Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1965, due at Registrar's Office
NOV. 11—WEDNESDAY	State Admission Day holiday
NOV. 20—FRIDAY	Last day to submit applications for advanced credit examinations
NOV. 25-30	Thanksgiving Recess (6 p.m. to 7:30 a.m.)
DEC. 5—SATURDAY	Advanced credit examinations
DEC. 8—TUESDAY	Final examinations
DEC. 15—TUESDAY	Quarter ends

For further information concerning subsequent quarters, inquire at the Registrar's Office.

OBSERVANCE OF UNIVERSITY RULES AND REGULATIONS

It is the University's expectation that a student will follow University rules and regulations as they are stated in the Bulletins. In instances where no appeal procedure is spelled out and the student is persuaded that a special set of circumstances makes appeal reasonable, he may appeal the application of specific rules or regulations to the office of the dean of the school or college in which he is enrolled in the case of an academic matter, or to the Office of the Dean of Students in the case of a nonacademic matter. These offices will either render a decision on the appeal or refer the student to the proper office for a decision.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

ADMINISTRATION

BOARD OF REGENTS

MRS. A. SCOTT BULLITT, <i>President</i>	Seattle
E. A. ADDINGTON	Bellevue
JOSEPH DRUMHELLER	Spokane
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima

HELEN E. HOAGLAND, *Secretary*

DON H. WAGEMAN, *Treasurer*

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN LEGGETT, Ph.D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>
MARY S. TSCHUDIN, Ph.D.	<i>Dean, School of Nursing</i>
KATHERINE J. HOFFMAN, Ph.D.	<i>Assistant Dean and Director of Graduate Programs, School of Nursing</i>
FLORENCE I. GRAY, M.S.	<i>Director, Undergraduate Programs, School of Nursing</i>

BOARD OF HEALTH SCIENCES

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
GEORGE N. AAGAARD, M.D.	<i>Dean of the School of Medicine; Chairman of the Board</i>
MAURICE J. HICKEY, D.M.D., M.D.	<i>Dean of the School of Dentistry</i>
JOSEPH L. MCCARTHY, Ph.D.	<i>Dean of the Graduate School</i>
JACK E. ORR, Ph.D.	<i>Dean of the College of Pharmacy</i>
MARY S. TSCHUDIN, R.N., Ph.D.	<i>Dean of the School of Nursing</i>
SOLOMON KATZ, Ph.D.	<i>Dean of the College of Arts and Sciences</i>
JEAN MILNE, <i>Secretary</i>	

GENERAL INFORMATION

GENERAL INFORMATION

NURSING EDUCATION AT THE UNIVERSITY began in 1917 with the introduction of a prenursing program developed in response to the need for expanded educational opportunities for young women. The early offerings in nursing consisted of a few public health nursing courses for graduates of hospital schools of nursing. Under the leadership of Mrs. Elizabeth S. Soule, the opportunities in nursing education were extended, and both undergraduate and graduate programs were developed. The Department of Nursing Education, which was established in 1921, became the School of Nursing in the College of Arts and Sciences in 1934. In 1945, it became an autonomous professional school in the Division of Health Sciences, with Mrs. Soule as its first Dean. The Division, which includes the Schools of Dentistry, Medicine, and Nursing, the College of Pharmacy, and the University Hospital, was established to coordinate and reinforce the work of each of these units in its development, research, and teaching activities and to plan cooperatively for the education of young men and women in the health professions.

The School of Nursing offers programs leading to the degrees of Bachelor of Science in Nursing, Master of Arts, and Master of Nursing. Individually planned post-master's programs are available and a minor in nursing on the doctoral level is offered for students matriculated in another discipline. In addition, the School offers supplementary work in psychiatric and public health nursing, courses in specific clinical subjects for affiliating students in other schools of nursing, and courses of general interest to any University student.

All programs of the School, undergraduate and graduate, are fully approved by the Accrediting Service of the National League for Nursing. Both baccalaureate programs are approved for preparation for public health nursing.

PHILOSOPHY AND OBJECTIVES

The School of Nursing acknowledges its responsibility for the quality of its educational programs and for promoting effective nursing service for the people of the state of Washington through teaching, research, and public service.

UNDERGRADUATE PROGRAMS

The faculty believe that the qualified student brings to the professional school a background from which she makes her individual contribution to nursing. Opportunity for self-direction in the management of her own life is a part of personal and professional growth. Diversified interests promote cultural and emotional maturity. Breadth of academic background, which is gained through the use of all of the resources of the University, contributes to fulfillment of professional responsibilities and personal interests. The physical, biological, and social sciences and the humanities are recognized as essential aspects of professional nursing education.

The professional nurse is characterized by: (1) ability to give complete nursing care in all fields; (2) effective use of basic communication skills in organizing, planning, and directing the work of others; (3) cooperative relationships with allied professional and citizen groups for the improvement of total health services; (4) maintenance of personal identity; and (5) satisfaction in her daily life as she serves her community, upholds the ideals of the nursing profession, and works toward its continued improvement and growth.

Curricular offerings are planned to develop the professional nurse who is able to give complete nursing care within the framework of the physician's therapeutic design, to carry out nursing procedures skillfully and with understanding, to exercise discriminative judgment and insight, and to assist in the prevention of disease and in the conservation of physical and mental health in the community. Better learning occurs where sound psychological principles are utilized. Correlated theory and clinical practice are offered in the care of the physically and mentally ill in the hospital and in the home, and in teaching, treatment, rehabilitation, prevention, and health conservation for all age groups. Nursing experiences are planned to provide for continuity, sequence, and integration in all areas in order to effect gradual broadening and deepening of understandings, values, and skills. Individual counseling and supervision are directed toward helping the student to develop her personal and professional potentialities. This broad background of education facilitates the student's continuing professional development following graduation and provides the foundation for graduate study.

GRADUATE PROGRAMS

In the conduct of its graduate programs, the faculty believe that the School has an obligation to provide an environment and climate in which any qualified graduate student in nursing may engage in study directed toward individual goals of advanced professional competence. The curricula, while containing a nucleus of required courses, should be sufficiently flexible to enable the student to meet individual needs and enlarge the view she holds of her profession and its relationship to society.

Graduate study connotes that the student will increasingly assume independent responsibility for learning, scholarly investigation, and communication of the outcome of research.

The School of Nursing believes that it should promote and foster opportunities for individual, group, intra- and interdisciplinary study and research, and for sharing the contributions which students engaged in graduate study can make to one another, to the School, and to the profession.

The School of Nursing believes that the functions of the teacher in graduate education are to provide the environment and the climate within which the learner can learn, to guide and counsel, and to share his knowledge with the learner.

In order to qualify for a graduate degree, the student should be able to work effectively with others to meet the health needs of people and, since research in nursing is essential for the continuing growth of the profession, be able to use a scientific approach in solving nursing problems and to communicate findings in an appropriate manner. Graduate work should be directed toward intensive study in a selected area (or areas) of nursing. It is recognized that the level of accomplishment in clinical nursing, teaching, or supervision will vary for each student. Graduate study in any area of nursing implies that a student, regardless of age and kind or amount of experience, will be basically competent in nursing and in any major clinical field elected for graduate study.

The faculty believe that the constantly changing concepts and practices in nursing and the ever increasing demands for nurses with graduate education support the convictions that: (1) the maximum freedom which is consistent with sound educational practice should be permitted graduate students in nursing, in order that individuals with varying degrees of ability and experience may have equal opportunities to progress; and (2) that creative and critical thinking should

be stimulated and disciplined by the study and practice of research methods, through conducting individual research and reporting findings.

EDUCATIONAL RESOURCES

The rich instructional and research facilities and services of the University contribute in many ways to the quality of the School's programs in nursing and provide a stimulating environment in which to learn. Nursing education draws both upon these diverse University resources and upon excellent clinical facilities of a number of cooperating hospitals and public health agencies in the community.

The Health Sciences Building, which is located at the south end of the campus near the Portage Bay Yacht Basin, houses the administrative units of the Schools of Nursing, Dentistry, and Medicine and a variety of classrooms, research and laboratory facilities, a library, and an auditorium. The University Hospital, adjacent to the Health Sciences Building, was opened in May, 1959, and has a 300-bed capacity. It provides extensive inpatient and outpatient departments; thus it is an excellent teaching and research facility for students in nursing and other health sciences fields.

The undergraduate and graduate clinical teaching programs of the School of Nursing are conducted in a variety of hospitals and community agencies which cooperate with the School through making their facilities available for student instruction. In addition to the University Hospital, the School uses the general facilities of King County Hospital System, with a bed capacity of 450 in King County Unit I and 220 in Unit II; Swedish Hospital, with a bed capacity of 377; Virginia Mason Hospital, with a bed capacity of 217; and The Doctors' Hospital, with a bed capacity of 187. Hospitals offering health care for selected individuals or specific illnesses include the Children's Orthopedic Hospital, with a capacity of 200 beds; Firland Sanatorium, with a capacity of 431; and the state mental hospitals, Northern State Hospital, capacity 2,273, Western State Hospital, capacity 3,007, and Eastern State Hospital, capacity 2,361. The psychiatric unit of the United States Veteran's Administration Hospital in Seattle, capacity 80 beds, provides an additional facility in this area. Experience in community health nursing is arranged through the public health departments of Seattle-King County, Tacoma-Pierce County, Snohomish County, Kitsap-Bremerton County, Benton-Franklin County, Clark-Skamania County, Bellingham-Whatcom County, and the City of Spokane. Other community facilities are used, as necessary, to provide selected learning experiences for students.

The University libraries contain over a million books and acquire 65,000 more each year. They currently receive 17,000 periodicals. The Henry M. Suzzallo Library, opened in 1926, houses the main collection, the general catalog, the reference division and documents section, current periodicals, the science room, and the reserve book room. Twenty branch libraries for special academic subjects are located in other buildings. Among these is the Health Sciences Library, which serves the schools and departments in the Division of Health Sciences. A collection of 100,000 volumes especially chosen for the general education of the undergraduate will be located in an addition to the Suzzallo Library, to be completed in 1963.

ADMISSION REQUIREMENTS OF WASHINGTON RESIDENTS*

Undergraduate programs offered by the University lead to the baccalaureate degree; students, therefore, are admitted when, in the judgment of the University, they appear qualified to pursue a degree program with a reasonable probability of

* *Resident*: defined for purposes of admission and/or assessment of fees as an individual who has been domiciled in the state of Washington for one year immediately prior to his registration. The domicile of a minor is that of his parents or his legal guardian. The children of federal employees residing within the state of Washington and the children and spouses of staff members of the University are considered as residents for tuition purposes.

success. In making this judgment, the University's Board of Admissions considers the applicant's total record, including such factors as scholastic achievement in a college preparatory program, recommendations of the high school principal or counselor, rank in class, and scores on any nationally administered tests associated with college entrance.

ADMISSION WITH FRESHMAN STANDING

Scholastic Criteria. Scholastic achievement is measured largely in terms of the criteria listed below. All students entering the University are expected to meet these criteria. Nonresidents and students who enter with advanced standing will find additional criteria in subsequent sections.

1. Graduation with a diploma from a high school accredited by the Washington State Department of Public Instruction, or from an out-of-state high school accredited by its state university and state department of public instruction or by the regional accrediting association of the area.
2. Achievement of an over-all high school grade-point average of at least 2.50 in courses completed after September, 1960, and a grade-point average of at least 2.00 in courses completed prior to September, 1960. Grade-point averages are based on a four-point system in which A = 4, B = 3, C = 2, D = 1, E = 0. An adjustment to this system is made, as necessary, in the computation of grade-point averages earned at other institutions.
3. Completion of a college preparatory program of at least 16 units to include the following:

a. English	at least 3 units
b. One foreign language	at least 2 units
c. College preparatory mathematics	at least 2 units
d. One laboratory science	at least 1 unit
e. Social science	at least 2 units
f. Electives from the above subjects	at least 2 units

Additional electives may be chosen from any subjects acceptable for high school graduation.

High School Electives. Because an appropriate choice of high school electives serves to strengthen a student's preparation, the University will give this part of her academic record the same careful attention it gives to other aspects of her qualifications. Students who expect to enter the School of Nursing should plan their high school electives carefully, both to lay the foundations for their general education which will be continued at the college level and to insure that they are adequately prepared to begin their study in the School of Nursing. Students should select subjects in English, languages, social sciences, natural sciences, mathematics, and fine arts which will provide a well-rounded preparation for college study.

Since a knowledge of mathematics is of increasing importance in the changing technology of our society, it is advisable for students to include at least an additional $\frac{1}{2}$ unit of algebra in the electives specified in "f" above. Students planning to enter the School of Nursing are advised to select chemistry as their first laboratory science and biology or physics as an elective in preparation for the professional nursing program. A fourth unit in English also will be found helpful.

Accelerated, Honors, and Advanced Placement Courses. The University encourages qualified students to extend themselves academically by taking advantage of advanced, accelerated, and honors courses offered by their high schools. Successful participation in such challenging opportunities assures superior academic preparation. The University of Washington grants placement and/or credit in selected subjects, at the discretion of the University department concerned, on the basis of scores earned in College Entrance Examination Board Advanced Placement Exam-

inations and on the basis of placement examinations administered to entering students (see Required Tests and Examination, page 22).

The University recognizes college preparatory courses given in the junior high school and assigns them the same value as equivalent courses offered by the high school.

ADMISSION WITH ADVANCED STANDING

A qualified student in good standing at an accredited institution may apply for admission with advanced standing. This applies particularly to the student wishing to transfer from another basic collegiate nursing program and to the student entering the graduate nurse baccalaureate program. Such an applicant is expected to have the same high school preparation as the student who enters as a freshman. With fewer than 45 acceptable credits, an applicant must present a grade-point average of 2.50 in high school work completed after September, 1960; a 2.00 grade-point average in such work completed prior to that date; and a 2.00 cumulative average in all college work. With 45 or more acceptable credits, an applicant is expected to present a cumulative and last-term grade-point average of at least 2.00. Applicants to the graduate nurse baccalaureate program must be graduates of an approved junior college or hospital school of nursing.

Transfer of Advanced Credit from Other Institutions. The Board of Admissions reserves the right to determine the exact amount of transfer credit to be accepted. The general regulations concerning the transfer of credits are as follows:

1. The advanced standing for which an applicant's training appears to fit him is granted tentatively on admission. Definite advanced standing is not determined before the end of the student's first quarter in the University. The maximum that may be accepted from other colleges and universities is 135 quarter credits, or senior standing. Transfer credit will not be allowed in the senior year.

2. Transfer credits will be accepted for upper-division credit *only* when earned at an accredited four-year degree-granting institution.

3. Transfer credits from institutions accredited for less than four years will not be accepted in excess of the accreditation of the school concerned.

4. Transfer of junior college credit shall apply on the University freshman and sophomore years only. A student who has completed a portion of his freshman and/or sophomore years in a four-year college may not transfer junior college credit in excess of that necessary to completion of the first two years in the University. In no case shall the transfer of junior college credit to the University exceed 90 quarter credits exclusive of physical education activity credits.

5. The maximum number of credits obtainable by acceptance of Armed Forces training schools credits will be 30. All such credits will be counted as extension credits and will be included in the 90-credit maximum allowed toward the bachelor's degree, but none will apply toward the work of the senior year.

6. A maximum of 45 credits earned in extension and correspondence courses at other institutions may be transferred, but none of the credits can apply in the senior year. Extension and correspondence credits from schools that are not members of the National University Extension Association are accepted only after examination.

7. Credits earned in evening and extension classes or correspondence courses at this University are accepted after the student has satisfactorily completed 35 credits of work in residence (that is, registered in regular University classes). A maximum of 90 extension and/or correspondence credits is acceptable; the 90 credits may include the 45 extension and/or correspondence credits allowable from other institutions or may consist entirely of courses taken in this University's Division of Evening Classes or Division of Correspondence Study. All credits earned in advanced-credit examinations and all acceptable Armed Forces training schools credits must be counted in the 90 extension credit maximum. Up to 10 evening

class or correspondence course credits from this University can apply toward the work of the senior year.

8. For work done in unaccredited institutions, extended secondary programs in institutions whose standing is unknown, and for work with private teachers, University credit is granted only after examination. Applications for advanced credit examinations must be filed during the first quarter in residence.

9. No credit will be granted for courses taken in another college while the student is in residence at the University, unless written permission to register for such courses is obtained by the student from the University department giving such instruction in the subject, from his major department, and from the dean of his college. The prescribed written permission is effective only if obtained before registration. Nothing in this rule makes mandatory the granting of any credit by the University.

ADMISSION OF SPECIAL STUDENTS AND AUDITORS

Non-high school graduates who are 21 or older and legal residents of Washington may apply to the Board of Admissions for admission with special standing. With their application they must submit all available records of secondary school and college study. Special students may register in and take for credit whatever courses the dean of the college permits, but may not participate in student activities or receive degrees. By fulfilling conditions specified by the Board of Admissions, special students may change their status to that of regular students and may receive degrees.

Persons 21 or older may register as auditors in nonlaboratory courses or the lecture sessions of laboratory courses by obtaining the consent of the dean of the college and the instructors of the courses. Auditors do not participate in class discussion or laboratory work. They may receive credit for audited courses only by enrolling in them as regular students in a subsequent quarter.

ADMISSION OF NONRESIDENTS*

ADMISSION OF NONRESIDENTS TO UNDERGRADUATE STANDING

Applications from nonresidents will be considered, but first preference is given to legal residents of the state of Washington and to sons and daughters of University of Washington alumni residing outside the state.

Nonresident applicants are selected on the basis of their preparation and scholastic standing. In general, a freshman applicant must be eligible to enter the university of his own state, and must satisfy the foregoing scholastic criteria with a 3.00 (B) grade-point average, or place in the upper 25 per cent of his graduating class.

An applicant for admission with advanced standing with fewer than 45 college credits must have a cumulative grade-point average of at least 3.00 in standard college courses as well as a high school grade-point average of at least 3.00, or have been in the upper fourth of his class. An applicant presenting more than 45 credits for advanced standing must present a 2.70 grade-point average in standard college courses. For regulations on transfer of credit, see page 19.

Sons and daughters of University of Washington alumni are admitted according to resident standards but are required to pay the regular nonresident tuition fees. Applicants for admission to curricula in which the University serves on a regional basis will be accorded special consideration by the Board of Admissions.

* *Nonresident: an applicant whose credentials are received from a school or college located outside the state of Washington. An applicant who believes himself eligible for resident status may apply for reclassification through the Office of Residence Classification, which has final authority in determining such status.*

ADMISSION OF FOREIGN STUDENTS AND STUDENTS EDUCATED ABROAD

Applicants for admission with graduate or advanced undergraduate standing are expected to meet the same general requirements as nonresidents of Washington educated in American schools. However, they must file their credentials before March 1 to be considered for admission Autumn Quarter, or six months before the opening of another quarter in which they may wish to enroll. In addition, they must demonstrate a satisfactory command of English and must have sufficient funds available in the United States to meet their expenses.

The official record of the Canadian student is the matriculation certificate or university admission certificate of his province. Canadian and foreign students who have been in university attendance must have official transcripts forwarded as required of all students. High school graduates and university transfer students must meet the scholarship requirements for nonresident students. See page 20.

UNDERGRADUATE ADMISSION, EXCEPTIONAL CASES

See page 49.

ADMISSION TO THE GRADUATE SCHOOL

Basic requirements for admission to the Graduate School are a bachelor's degree from an institution of recognized standing, graduation from an approved school of nursing, a grade-point average of 3.00 in junior and senior years of college work, approval of the Graduate School, and approval of the School of Nursing. For complete information, see the *Graduate School Bulletin*.

ADMISSIONS PROCEDURE

Requests for Application for Admission forms and correspondence regarding admission to any college or school of the University, undergraduate or graduate, should be addressed to the University of Washington, Office of Admissions, Seattle 5, Washington. Graduates of high schools in the state of Washington may obtain this form from their principals or advisers.

Students may apply, through their high schools, on completion of the first semester of the senior year. Those who are qualified will be issued notices of early, or conditional, admission which becomes valid on graduation with a grade-point average of no less than 2.50 for the final semester. Others also will be notified of their admission status. Scores on a nationally administered college aptitude test are not required. However, they are helpful in evaluating a borderline student's probability of success.

Applications and required transcripts must be filed with the Office of Admissions prior to the following dates in order to be assured of consideration for admission to the quarter for which application is being made: July 15 for Autumn Quarter, December 1 for Winter Quarter, March 1 for Spring Quarter, May 15 for Summer Quarter.

In addition to the completed application form to the University, an applicant for advanced undergraduate standing or graduate standing in nursing must complete an application to the School of Nursing. The form may be obtained from, and must be returned directly to, the School of Nursing. An official transcript from each high school, school of nursing, or college attended is required of an applicant for advanced undergraduate standing, and two official transcripts from each college or university and school of nursing, if not part of a university, attended are required of an applicant for graduate standing.

All records become a part of the official file and can be neither returned nor duplicated for any purpose. Failure to submit complete credentials will be con-

sidered a serious breach of honor, and may result in permanent dismissal from the University.

The University assumes no responsibility for applicants who come to the campus before they have been officially notified of their admission.

VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Tuition exemptions and other benefits available to them are detailed on pages 49 and 50. Applications for, and questions about, government aid should be addressed to the Veterans Administration Regional Office.

REGISTRATION

PROCEDURE

A leaflet giving general information and preliminary instructions for registration is mailed with the Notice of Admission. New students are given appointments when they are notified of admission, and they receive complete directions for registering at the time of registration.

New students to the School of Nursing, particularly those with advanced undergraduate or graduate standing, are urged to plan an appointment with an adviser, to develop a program of studies prior to their registration date.

All students currently in school who plan to register for a succeeding quarter (Summer Quarter excepted) must register by Advance Registration and pay fees by the stated deadline. Students are held responsible for knowing and observing registration procedures, dates, and deadlines which appear in the bulletins, in "Official Notices" in the *Daily*, and on campus bulletin boards.

Students expecting to return to the University after an absence of a quarter or more (excluding Summer Quarter) must register by In-Person Registration. The required registration appointment may be obtained by writing to, calling at, or telephoning the Registrar's Office at the time specified in the Calendar, but *in no case* later than the stated deadline (see pages 4-11).

REQUIRED TESTS AND EXAMINATIONS

WASHINGTON PRE-COLLEGE TESTING PROGRAM

This differential guidance test battery is required of all entering freshmen, including those transferring to the University with fewer than 45 credits. It is also required of transfer students who have not completed courses which are equivalent to English 101 (English Composition) or Mathematics 101 (Intermediate Algebra). High school seniors are advised to arrange through their high schools to take this test in the spring, when it is offered throughout the state of Washington. Nonresidents of Washington may take the test at the time of their registration according to instructions mailed with the notice of admission. Sample copies are not available. Special, foreign, and blind students, and auditors are exempted.

The several parts of this test have been selected because of their proven value for the prediction of grades most likely to be earned by a student. Since results of the test are used by departmental advisers as an aid in assigning students to appropriate sections in English composition and other subjects, the student should bring a copy of the results with him when he comes for his first conference with his counselor or adviser.

GRADUATE NURSE EXAMINATION

Applicants to the graduate nurse baccalaureate program must take the National League for Nursing Graduate Nurse Examination before, or as soon as possible after, entering the School of Nursing. An application form and directions for completing this requirement may be obtained from the School of Nursing or the National League for Nursing. The examination is given in various parts of the country on established dates.

MEDICAL EXAMINATION

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions, and to returning former students by the Registrar. This examination, which is required before a student may register, is taken at the student's expense. A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on the campus.

ADVISING

After notification of admission, and before registration date, the student should seek assistance from the School of Nursing in the selection of courses for her first academic program. An academic adviser, one of the faculty, is designated for each level of program in the School.

The student will find the first meeting with her adviser much more profitable if the material sent to her has been studied before arrival on campus. The advisers of the School will make every effort to help the student plan a program of studies to fit her individual needs within the educational policy of the School and to assist her in solving her academic problems. The student is urged to discuss the opportunities available to her at the University with her family and her fellow students, and, after she has begun her study at the University, with the faculty who conduct her classes, as well as the adviser to whom she is assigned. She is expected to inform herself, by studying the *School of Nursing Bulletin* and the *Yearly Time Schedule*, of the availability of various courses and programs of study, so that her meetings with her adviser may be devoted to an informed and intelligent discussion of genuine academic questions and of the proper direction for her educational development.

Students contemplating admission to the University and wishing further information about programs offered or direction in planning their programs are urged to write for assistance.

REGISTERED CREDITS ALLOWED EACH QUARTER

Except with the consent of the Dean, no student may be registered for less than 12 credits (or the equivalent) or more than 16 credits (or the equivalent) or the number called for in the prescribed curriculum, exclusive of physical education activity courses and lower-division military, naval, or air science courses. In no case may a student be registered for, or receive credit for, more than 20 credits (or the equivalent) of work, exclusive of physical education activity courses, and lower-division military, naval, or air science courses. Work taken in noncredit courses or to remove entrance deficiencies, or concurrently in evening classes, by correspondence study, or in another collegiate institution, must be included in the computation of the total registered credits allowed.

CHANGES OF REGISTRATION

After students have registered, they cannot change their schedules except with permission of the Dean of the School. No student is permitted to make a registration change that involves entering a new course after the first calendar week of the quarter. After that time, no student may register without the consent of the Dean and the instructor whose class the student wishes to enter.

WITHDRAWALS FROM COURSES OR FROM THE UNIVERSITY

See pages 50 and 51.

CONTINUATION IN THE UNIVERSITY AND THE SCHOOL OF NURSING**SCHOLARSHIP**

Grade points per credit are awarded on the following basis: a grade of A earns 4 points; B, 3 points; C, 2 points; D, 1 point. The grade of E or EW signifies failure, and the grade point is 0. The quarterly and cumulative grade-point averages are computed by multiplying the grade point received in a course by the total number of credits the course carries, totaling these values, and dividing by the total number of credits the student attempted. A course for which any of the following symbols is recorded is not considered in determining the grade-point average: I, N, S, W, PW, X. Grade-point averages are calculated on the basis of all grades received in courses which carry academic credit, including courses repeated. Grades received in repeated courses do not cancel or replace any other grades. Only University of Washington residence credits will be used in these computations.

A cumulative grade-point average of 2.00 is required for continuation in the School of Nursing with full standing. Students falling below 2.00 are placed on academic probation.

ACADEMIC PROBATION

Academic probation is essentially a warning to the student that she must show improvement if she is to remain in the University. Any undergraduate student who has completed three or more quarters in the University and whose cumulative grade-point average is below 2.00 will be placed on academic probation. Any undergraduate student who has completed not more than two quarters at the University will be placed on probation when her cumulative grade-point average is below 1.80. The Dean of the School will notify the student as soon as possible that she is on probation. Such action will be noted permanently on the student's official academic record.

An undergraduate student on academic probation will be dropped from the University: (1) if she fails to attain at least a 2.00 for the following quarter's work; or (2) if she fails to attain a 2.00 cumulative average at the end of the two subsequent quarters. Only under exceptional circumstances will a student dropped under low scholarship rules be readmitted to the University. Such a student will be readmitted only at the discretion of the dean of the school or college to which she seeks admission, and if readmitted, will enter on academic probation. Such a student will be dropped: (1) if she fails to attain a 2.00 for the following quarter's work; or (2) if she fails to attain a 2.00 cumulative average at the end of two quarters. She will be removed from probation at the end of the quarter in which her cumulative grade-point average reaches 2.00 or better.

A senior who has completed the required number of credits for graduation but whose work in what would normally be her final quarter places her on probation will not receive a degree until she has been removed from probation. A senior who has completed the required number of credits for graduation but whose work in her last quarter results in her being dropped for low scholarship may not receive a degree until she has been readmitted and removed from probation.

LICENSURE

Students may be admitted to the graduate nurse baccalaureate program or to the master's program in nursing prior to completion of the state board professional examination, but for continuation in either program, students must be licensed to practice nursing in a state or country.

HEALTH CARE

A program of health care is planned for students in nursing. This includes periodic health examinations, chest X rays, and inoculation for smallpox, tetanus, poliomyelitis, and diphtheria. Students are expected to assume initiative in following the health program.

PROFESSIONAL RESPONSIBILITY

Majors in nursing are held responsible for knowing and adhering to the rules and regulations of the University of Washington and the School of Nursing. Because the School has a responsibility to the public and to the profession of nursing, it must require of its graduates not only adequate knowledge of nursing theory and practice, but also the qualifications which are important to a professional nurse. Maintenance of good relationships with patients and co-workers, a well adjusted mental outlook, and a sincere interest in people are considered requisite for a successful nursing career. Good physical health is another necessary factor for continuing success in nursing.

The School of Nursing reserves the privilege of retaining only those students who, in the judgment of the faculty, satisfy the requirements of scholarship, health, and personal suitability for nursing.

QUALIFICATIONS FOR GRADUATION

Students should apply during the first quarter of the senior year for a Bachelor of Science in Nursing degree. If not more than ten years have elapsed since the date of a student's entry into the school or college in which she is to graduate, she may choose to graduate under the requirements set out in either the bulletin published by the appropriate school or college most recently prior to the date of her entry, or that published most recently prior to her anticipated date of graduation; provided, that when, in the opinion of the faculty of the school or college or a departmental chairman or a dean acting for such faculty, substantial changes have been made in the curriculum since the student's entry, the student's choice shall be subject to the approval of the appropriate faculty, departmental chairman, or dean. Disapproval of the student's choice shall be faculty action and subject to the procedures of the *Faculty Code*. All responsibility for fulfilling graduation requirements shall rest with the student concerned. No student whose standing is in any way provisional can have an application for degree accepted.

Graduate nurse baccalaureate students who have not had psychiatric nursing as part of their previous nursing program must fulfill the requirement before the application for degree can be submitted. Arrangements for fulfilling this requirement may be made with the program adviser.

UNIVERSITY REQUIREMENTS

The University credit requirement for graduation is 180 academic credits (including Health Education 110 or 175) and the required quarters of physical education activity. At least 60 of the 180 credits must be in upper-division courses, those numbered 300 and above. Advanced ROTC courses do not count as upper-division credit, and no more than 18 credits in advanced ROTC courses may be counted toward graduation.

Physical Education Activity Courses. Students who enter the University as freshmen are required to complete one physical education activity course each quarter for the first three quarters of residence. In fulfilling the foregoing requirement, *all* students must pass a swimming test or satisfactorily complete one quarter of swimming. In fulfilling the three-quarter requirement, no activity course may be repeated for credit. Regulations concerning activity courses may be found on page 51.

Health Courses. All students who enter the University as freshmen are required to take Health Education 110 (women) or 175 (men) within the first three quarters of residence. The health education course requirement may be satisfied by passing a health-knowledge examination offered during the autumn registration period. Successfully passing this test exempts the student from the requirement but does not grant credit for the courses. Veterans with one year of active service are exempt from this requirement.

ESTIMATE OF YEARLY EXPENSES

The figures given below are minimum estimates for an academic year, which includes Autumn, Winter, and Spring Quarters. Living costs and personal expenses vary widely with the needs of the individual student.

Tuition, Incidental, and Other Fees

Full-time resident student	\$300.00
Full-time nonresident student	600.00

Athletic Admission Ticket (optional) 6.50

Health and Accident Insurance (optional) 17.25

Extra Service Charges and Rentals 38.50

Military uniform deposit, breakage ticket, and locker charges

Books and Supplies 90.00

Board and Room

Room and meals in Men's Residence Halls	720.00
Room and meals in Women's Residence Halls	660.00-765.00
Room and meals in fraternity or sorority house	670.00-760.00

(including dues and social fees)

Initial cost of joining is not included; this information may be obtained from the Interfraternity Council or Panhellenic Council.

Personal Expenses 300.00

In addition to above yearly costs, students should be prepared to pay the cost of transportation between the University campus and the teaching units. This amount will vary from quarter to quarter. Basic-degree students should plan approximately \$50.00 for the purchase of uniforms in the sophomore year and approximately \$15.00 for special achievement tests throughout the program. Graduate students who are candidates for an advanced degree should plan for approximately \$150.00 for costs connected with the preparation of the master's thesis.

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration. The University reserves the right to change any of its fees and charges without notice.

The fee schedules for resident and nonresident students, appearing on pages 53 and 54, apply to the academic year (Autumn, Winter, and Spring Quarters). Summer fees appear in the *Summer Quarter Bulletin*.

STUDENT SERVICES AND ACTIVITIES

OFFICE OF THE DEAN OF STUDENTS

The Office of the Dean of Students is concerned with the general welfare of students and welcomes correspondence and conferences with both parents and students. This Office works closely with the advisory system of the colleges and schools of the University; it directs students to faculty advisers, the Counseling Center, and other persons and agencies offering assistance with personal and social problems.

The Foreign Students Office operates through the Office of the Dean of Students. The Foreign Student Adviser and his staff offer guidance on all nonacademic problems to students from other countries. Questions about immigration regulations, housing, social relationships, personal problems, finances, minimum course requirements, and employment should be referred to this Adviser. Students who are interested in studying abroad may obtain from him information about schools in other countries and about Fulbright and other scholarships.

COUNSELING CENTER

The Counseling Center in Lewis Hall Annex offers vocational and educational counseling to students who need help in their adjustments to college. The staff of the Center, which includes vocational counselors and psychologists, works closely with other student services and supplements the academic advisory program.

HOUSING

Information and applications for residence in University-owned housing for single persons may be obtained by writing to the Manager, Men's Residence Halls, 1201 N.E. Campus Parkway, Seattle 5, or to the Manager, Women's Residence Halls, University of Washington, Seattle 5. Until August 1, preference in assignment to vacancies is given to students under twenty-one years of age; thereafter, assignments are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

University regulations require that women students under twenty-one who do not live at home must live in approved group residences such as the Women's Residence Halls, sororities, and church-sponsored living groups. Other types of living arrangements must be reported to the Dean of Women and be approved by the student's parents or guardian.

Information about fraternities or sororities may be obtained by writing to the Interfraternity Council or the Panhellenic Council, Student Union Building, University of Washington, Seattle 5.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings must, however, be consulted in person.

Teaching and research assistants and other part-time subfaculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 4039 15th Avenue N.E., for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

HEALTH SERVICES

The University maintains a health center and an infirmary to help guard against infectious diseases and incipient ill health.

The infirmary receives bed patients at any hour and provides nursing care, medicines, and the attendance of a staff doctor, up to one week each quarter, free of charge. For a period longer than one week, a charge of \$2.00 a day is made. At their own expense, infirmary patients may consult any licensed physician in good standing.

Health and accident insurance for students is available at the time of registration.

All students in the School of Nursing are required to take a special health examination, chest X rays, and inoculation for smallpox, typhoid, tetanus, poliomyelitis, and diphtheria before beginning clinical laboratory courses and previous to the public health nursing field quarter. Defects must be corrected at the student's own expense.

ASSOCIATED STUDENTS

Membership in the Associated Students of the University of Washington, the central organization which conducts all student activities, is required of all regularly enrolled students. Through the ASUW Board of Control and its various committees and boards, students assume major responsibility in the government of student life. The ASUW helps to finance the programs of athletics, debates, concerts, lectures, and many other activities and facilities, including the University of Washington *Daily* and the Student Union Building.

Associated Nursing Students. All students registered in the Basic Program of the School of Nursing are eligible to belong to the Associated Nursing Students Organization. By belonging to ANS, students are eligible to belong to SWANS (State of Washington Association of Nursing Students), which is made up of students from all the schools of nursing in Washington. As a member of SWANS, a student is automatically a member of the National Student Nurse Association.

Among the functions of ANS are those which provide for unity and fellowship among classes, the promotion of interest in nursing, and the promotion of the interests and welfare of the nursing student.

Graduate Nurse Club. All students registered in the Graduate Nurse Program or in the Graduate level programs are eligible for membership in the Graduate Nurse Club. This is primarily a social organization.

FINANCIAL AIDS

A considerable number of scholarships are awarded annually on a competitive basis. In general, scholarships are awarded on the basis of (1) scholarship achievement above the 3.00 (B) grade-point average, (2) financial need, and (3) participation in the extracurricular activities of the campus and community.

Applications are available through the Office of the Dean of Students during Winter Quarter, and awards are made late in the spring for the following academic

year. The University bulletin, *Handbook of Scholarships*, describes the various awards.

All students are encouraged to investigate resources in their local communities for possible scholarships or other financial aids.

UNDERGRADUATE SCHOLARSHIPS, AWARDS, AND LOANS FOR NURSING STUDENTS

A limited number of scholarships, awards, and loans are administered by the School of Nursing Scholarship Committee for currently enrolled students. These are listed in the *Handbook of Scholarships*. The *Wealthy Ann Robinson Scholarship* is awarded to an outstanding graduate nurse preparing for public health nursing. Basic students may also apply through this Committee to the Washington State League for Nursing for scholarship assistance. The *Elizabeth Sterling Soule Scholarship* is awarded by this organization and the Washington State Nurses' Association.

The Seattle-King County Visiting Nurse Service provides scholarships to graduate nurse students who plan to enter the field of public health nursing and expect to remain in the state of Washington.

Loan funds of both an emergency and long-term nature are available upon application to the Office of the Dean of Students. This office also assumes responsibility for the National Defense Student Loan Program. Full-time students who are making normal and satisfactory progress are eligible to apply.

Amounts up to \$200 are loaned, upon application to the School of Nursing Scholarship Committee, from the Kellogg Nursing Loan Fund, the King County Nursing Home Fund, and the Eleanor S. Olsen and Nursing Education Loan Fund. Graduate nurses may apply directly to the Loan Fund of the Washington State Nurses' Association.

The University of Washington awards one hundred tuition scholarships each academic year to worthy students from other countries. There are no scholarships available for the Summer Quarter. These awards are made on the basis of the academic record of the student, recommendations from his professors, his need for such assistance, and the availability of such openings in his department at the University. These scholarships cover tuition only and are administered by the Foreign Exchange Scholarship Committee, Foreign Students Office, University of Washington, Seattle 5, Washington, U.S.A. Applications for these scholarships must be made by March 1 for the following year.

Federal grants and traineeships are available to qualified students in the graduate nurse program. Students who anticipate continuing with graduate study in psychiatric nursing and who meet requirements may be considered for the National Institute of Mental Health Traineeship during the senior year of their baccalaureate studies. Applications for federal grants and traineeships are made to the Dean of the School of Nursing.

Educational Programs Offered by the Military Services. The Army Student Nurse Program provides two years of educational opportunity on enlisted reserve status during the junior and senior years of the curriculum. Upon completion of the basic nursing program and licensure as registered nurses, participants are required to accept commissions as second lieutenants in the Army Nurse Corps and to serve on active duty for a period determined by the time spent in the student nurse program.

The Navy Nurse Corps Candidate Program offers a similar opportunity for qualified students during the senior year. Upon graduation and licensure as registered nurses, appointees under this program will be obligated to accept appointment as ensigns in the Nurse Corps of the Naval Reserve and to serve on active duty for a minimum of two years.

Students in the Graduate Nurse Baccalaureate Program may apply for the same appointment in the Army Student Nurse Program if they have completed their diploma program within the past 30 months and are able to complete the requirements for their degree within 24 months.

GRADUATE TRAINEESHIPS, ASSISTANTSHIPS, AND FELLOWSHIPS

The University of Washington participates in the Professional Nurse Traineeship Program as administered by the Division of Nursing Resources of the U.S. Public Health Service. This program offers a limited number of traineeships for qualified applicants who are preparing for educational, supervisory, or public health positions in nursing.

The National Institute of Mental Health has made available to the School of Nursing a limited number of traineeships for nurses eligible for advanced study in psychiatric nursing, child psychiatric nursing, and for psychiatric nurses who are seeking doctoral level study in other disciplines.

Applications for the above traineeships should be made directly to the Office of the Dean of the School of Nursing.

The Graduate School provides for the employment of teaching and research assistants. (See *Graduate School Bulletin*, page 61.) Foreign students on an educational visa are eligible to apply for such assistantships.

Requests for assistantship application forms should be sent to the Admissions Office, and the completed application should be returned to the Dean, School of Nursing.

Post-master's students in nursing, and predoctoral students with the major in another discipline and the minor in nursing, may be eligible for financial assistance through one of the following fellowship programs. Applications should be made directly to the agency administering the fellowship. *The United States Public Health Service Fellowship*: Chief, Research Fellowship Branch, Division of Research Grants, National Institutes of Health, Bethesda 14, Maryland; *The National League for Nursing Fellowship*: Chairman, National League for Nursing Fellowship Program, 10 Columbus Circle, New York 19, N.Y.

NURSING EDUCATION AWARD

The Nursing Education Award is granted annually to the outstanding graduate of each of the programs of the School of Nursing: the basic, the graduate nurse, and the graduate program. Candidates are selected on the basis of their scholarship; their contribution to the community, the University, and the School of Nursing; and their potential contribution to the profession of nursing.

THE PROGRAMS IN NURSING

THE PROGRAMS IN NURSING

BACHELOR OF SCIENCE IN NURSING

Two undergraduate curricula are offered leading to the degree of Bachelor of Science in Nursing. One, the Basic Nursing Program, is for students with no previous preparation in nursing; the other, the Graduate Nurse Program, is for graduates of hospital or junior college schools of nursing.

BASIC NURSING PROGRAM

The basic nursing curriculum is planned for four academic years and one summer session. The distribution of required courses provides a balance of professional and general education. Study in the arts and sciences is distributed over the first three years; professional nursing study is dispersed throughout the four years, but in greater concentration during the junior and senior years. There is a close interrelationship between the general and professional educational aspects of the program. An academic adviser will assist the student to select subjects in the humanities and social sciences which will contribute to the individual's intellectual and personal development.

Clinical instruction is provided in all of the major fields of nursing: medical-surgical, maternal-child health, psychiatric, and public health nursing. This instruction is carried on in a variety of hospitals and other community facilities.

Public health nursing field instruction, during the senior year, may be in one of several agencies either in, or outside of, Seattle. During the field instruction quarter, the student usually lives in the area in which she has been assigned. She must be prepared to have a car for use during the quarter, have a current driver's license, and meet state requirements for insurance protection.

A graduate of the basic program is prepared for beginning positions in all fields of professional nursing. Upon completion of the program, she is eligible to take the state licensing examination to become a registered nurse.

The requirements for the basic nursing program are:

<i>Area</i>	<i>Credits</i>
Nursing (102, 227, 228, 298, 299, 367, 368, 369, 370, 371, 372, 373, 374, 407, 409, 413, 414, 415, 416, 421, 422, 429, and 412 or 499)	90
Related Medical Sciences (Preventive Medicine 323 and 410 and Pharmacy 261)	8
Physical and Biological Sciences (Chemistry 101, 102, Physics 170, Microbiology 301, Conjoint 317-318)	32
Humanities (English 101, 102, 103 required and Humanities 101, 102, 103 recommended)	24
Social Sciences (Psychology 100, Sociology 110, Home Economics 119, and Health Education 110)	16
Electives in Humanities and Social Sciences	10
Plus three physical education activities	Total 180

Program of studies for the first year:

<i>Autumn Quarter</i>	<i>Credits</i>	<i>Winter Quarter</i>	<i>Credits</i>	<i>Spring Quarter</i>	<i>Credits</i>
Chemistry 101	5	Nursing 102	2	English 103	3
English 101	3	Chemistry 102	5	Health Educ. 110	2
Humanities 101	5	English 102	3	Humanities 103	5
Phys. Educ. 112	1	Humanities 102	5	Physics 170	5
Elective	2	Phys. Educ. 114	1	Phys. Educ. Activity	1
	<u>16</u>		<u>16</u>		<u>16</u>

Sociology 110 may be taken in place of Physics 170 in the freshman year.

Courses in the freshman year may be taken in any accredited junior college, college, or university. The remainder of the program is to be completed at the University of Washington. Students who wish to transfer to this School from another university school of nursing may be admitted to the basic professional program if they qualify for admission to the University and meet the professional requirements of the School as determined by the Admissions Committee of the School of Nursing.

GRADUATE NURSE PROGRAM

This baccalaureate curriculum is designed for graduate nurses seeking a liberal and generalized professional education as preparation for graduate study or further professional practice. It provides an opportunity to extend the previous preparation of the nurse, through study in the social and natural sciences, the humanities, and nursing. Increased ability to give comprehensive nursing care and to assist in the prevention and control of disease and in promotion of health in work with individual patients, families, and community health groups is emphasized. Public health nursing is an integral part of the curriculum. Students are given the opportunity to apply these concepts to the care of patients and of family groups in hospital and community agencies.

Students entering the program who are graduates of approved hospital schools of nursing may be allowed a maximum of 65 credits toward the Bachelor of Science in Nursing. These credits are withheld until the student has completed satisfactorily 30 credits (15 of them at this University). Graduates from Associate in Arts degree nursing programs will be allowed a maximum of 90 credits toward the Bachelor of Science in Nursing.

The requirements for the graduate nurse program are:

<i>Professional Courses</i>	90 credits
Nursing 361, 365, 366, 415, 416, 417, 418, 419, 425; plus credit from school of nursing	
<i>General Education Courses</i>	90 credits
Humanities	(15 credits)
(including English 101, 102, 103)	
Social Sciences	(15-17 credits)
(including Psychology 101 and Sociology 310)	
Biological and Physical Sciences	(15 credits)
Social Work and Public Health	(8-10 credits)
Electives	(35 credits)
<i>Total</i>	180 credits

The candidate for the Bachelor of Science in Nursing is advised to select proportionately those scientific and cultural courses which will extend her background in general education and strengthen her preparation for professional nursing. Of the 180 credits required for graduation, 60 must be in upper-division courses.

Registered nurses are urged to carry professional liability insurance during their clinical practice courses.

ADVANCED DEGREES

The School of Nursing offers graduate curricula leading to the degrees of Master of Arts or Master of Nursing and a minor on the doctoral level for students matriculated in another discipline. Post-master's programs planned on an individual basis are also available.

MASTER'S PROGRAMS

The curricula provide for advanced professional preparation and research in a specialized area of nursing and in teaching, supervision, or administration. Majors are offered in the following areas: maternal-child nursing; medical-surgical nursing; psychiatric nursing, public health nursing, school nursing, and occupational health nursing; administration of nursing services; administration of schools of nursing.

Most programs are four quarters in length, but they may vary with the particular major field and the number of credits carried each quarter. At least half of the total credits taken must be at the 500 level or above. Each student in the master's degree program carries out original research in nursing and presents a written thesis. Within the first quarter of graduate study, the student should plan her entire program with her major adviser in order to insure a satisfactory sequence of courses.

Master of Nursing. This professional degree is offered with emphasis on advanced preparation in an area of specialization in nursing. Courses from two fields outside of nursing provide supporting work for the nursing major. A foreign language is not required for this degree. Requirements for the Master of Nursing degree are:

<i>Area of Study</i>	<i>Credits</i>
Major: nursing specialty courses	18
Related Fields: courses in two other disciplines	12
Research: courses in research and thesis	15
	<hr/>
	45

Master of Arts. This academic degree is offered, with a major in nursing and a minor in another discipline. Students are encouraged to select a minor which will serve as a basis for further post-master's study. Students are expected to meet the undergraduate prerequisites of the minor department as listed in the *Graduate School Bulletin*. The required course work and exact number of credits for the minor are determined by the minor department. A candidate for this degree is required to demonstrate a reading knowledge of one foreign language. Requirements for the Master of Arts degree are:

<i>Area of Study</i>	<i>Credits</i>
Major: nursing specialty courses	18
Minor: courses in another discipline	12
Research: courses in research and thesis	15
	<hr/>
	45

POST-MASTER'S PROGRAMS

Students who hold the master's degree may enroll for an additional period of study on the post-master's level. This may be for the purposes of gaining additional depth in the area of study begun on the master's level, for broadening one's area of specialized preparation through study in another area of nursing, or for obtaining additional knowledge and skill in nursing research. Post-master's study is offered in the areas of maternal-child nursing, medical-surgical nursing, adult and child psychiatric nursing, administration in schools of nursing, and research in nursing. Individual programs of study may be planned in keeping with the student's interests and long range professional goals.

The School of Nursing offers a minor on the doctoral level for those students who are matriculated in another discipline. The minor in nursing should total 35 credits in courses offering graduate credit, of which at least half must be at the 500 level. The recommended sequence of courses for each student is determined in the light of her previous work and future goals.

SUPPLEMENTARY WORK IN PUBLIC HEALTH NURSING

For the nurse who holds a bachelor's degree which did not include public health nursing, the School of Nursing offers a supplementary program designed to prepare for beginning positions in public health nursing.

The program requires at least two quarters of full-time study at the University of Washington and a minimum of 20 quarter credits. At least half of the course work must be in nursing. Public health nursing field study is required. Other specific nursing and related courses to be taken by the student will be determined after a review of the student's transcripts and a personal conference with a School of Nursing adviser.

The student should follow the admission procedure of Admission to the Graduate School. (See *Graduate School Bulletin*.)

For additional requirements during public health nursing field instruction see page 33 (basic program).

AFFILIATE COURSES

The School of Nursing provides lower-division, undergraduate courses in psychiatric nursing and tuberculosis nursing for students enrolled in various hospital schools of nursing in the state of Washington. The lower-division courses are directed toward basic competence in the clinical area, but assume less preparation in the social, biological, and physical sciences on the part of the student than is required for the upper-division courses. Public health nursing theory and field experience courses, as developed for the basic-degree students, are offered for students enrolled in certain university schools of nursing.

Affiliating students enroll in the University and the School of Nursing for the quarter that they are taking the designated courses. (See also page 39.) They must meet the admission requirements prescribed for this program and must pay the usual tuition and fees. Appropriate University credit is granted upon successful completion of the courses.

COURSE-NUMBERING SYSTEM

Courses numbered from 100 through 299 are lower-division courses, for freshmen and sophomores; those numbered from 300 through 499 are upper-division, for juniors and seniors.

Courses numbered 500 and above are intended for, and restricted to, graduate students. Some courses numbered in the 300's and 400's are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the major department and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only; approved 400-level courses are accepted as part of the major. For a listing of approved 300- and 400-numbered courses, consult the *Graduate School Bulletin*.

Undergraduate students of senior standing who wish to register for a 500-level course must obtain permission from both the instructor of the class and the Dean of the Graduate School.

The number in parentheses following the course title indicates the amount of credit each course carries. In most lecture courses, a credit is given for each class hour a week during a quarter; laboratory courses generally carry less credit than

the work time required. An asterisk in place of a credit number means that the amount of credit is variable. Hyphens between course numbers mean that credit is not granted until the series of courses is completed.

Courses to which the letter J is appended are joint courses in two or more departments and, as such, grant credit in one of the departments.

Not all of these courses are offered every quarter. Final confirmation of courses to be offered, as well as a list of times and places of class meetings, is given in the *Yearly Time Schedule*.

COURSES FOR BASIC DEGREE STUDENTS

- 101 Introduction to Professional Nursing (2)** **Baker**
The history of modern nursing and its important trends, with emphasis on the role of the professional nurse and her use of communication and observation skills. Last time offered Autumn Quarter, 1962.
- 102 Introduction to Professional Nursing (2)** **Nash**
Orientation to the profession, emphasizing present day concepts of nursing and preparation required. A survey of fields of nursing and interrelationships with other health groups. Lectures, discussions, observations, and field visits.
- 227 The Nurse and Family Health (2)**
Concepts of health and family living, with emphasis on cultural factors, including variations in values and standards, as they affect health. Family visits, for experience in using observation and communication skills.
- 228 Nursing Fundamentals (4)**
Introduction to effects of illness on individuals. Selected nursing measures to meet patient's needs, including technical, communication, observation skills. Natural and social science principles applied. Two hours of lecture-discussion, six hours of clinical laboratory, weekly.
- 298 Introduction to Normal Growth and Development (2)** **Chinque**
Basic concepts and principles related to the nursing care of children from infancy through the preschool period. Classroom observation of children at different age levels, parent interviews, case studies, lecture, and discussion. To be taken concurrently with 368.
- 229 Introduction to Normal Growth and Development (2)** **Chinque**
Basic concepts and principles related to the nursing care of children from school age through adolescence. Schoolroom observations, child interviews, lecture, and discussion. To be taken concurrently with 370.
- 367 Nursing Principles in Mother and Child Care (4)** **Stewart**
An introduction to major concepts in family-centered care of mothers and infants; scientific and nursing principles in the care of women before, during, and after childbirth, and in infant care during the newborn period. To be taken concurrently with 368.
- 368 Nursing Practice in Mother and Child Care (5)**
The application of scientific and nursing principles to the care of women, before, during, and after childbirth, and to the care of the newborn infant. Fifteen hours experience per week in prenatal clinics, obstetricians' offices, and hospitals. To be taken concurrently with 367.
- 369 Nursing Principles in Mother and Child Care (4)** **Stewart**
Continuation of 367, with emphasis on meeting the health needs of children from birth through adolescence. Includes health supervision, and common illnesses and disabilities of children. To be taken concurrently with 370.
- 370 Nursing Practice in Mother and Child Care (5)**
Continuation of 368, with emphasis on the health supervision of the well child and the care of children with common illnesses and disabilities. Fifteen hours experience per week in clinics, hospitals, and pediatricians' offices. Concurrent with 369.
- 371 Principles of Medical-Surgical Nursing (5)** **Boozar, Pederson**
Analysis of deviations in basic needs commonly occurring in any adult who is ill; nursing care given to assist in correcting or controlling deviations. Discussion of common medical-surgical conditions occurring from malfunction in gastro-intestinal, respiratory, and cardiovascular systems, and nursing care specifically related to each. Identification of principles from nursing and biological, physiological, and social sciences used in giving preventive and therapeutic nursing care. To be taken concurrently with 372.
- 372 Medical-Surgical Nursing Practice (5)**
Application of scientific and nursing principles to the care of adult patients ill with selected medical and surgical conditions. Emphasis on development of skill in planning and giving general nursing care based on the individual needs of the patient. Fifteen hours experience per week in hospital wards and operating room.
- 373 Principles of Medical-Surgical Nursing (5)** **Boozar, Pedersen**
Relationships between pathological changes, symptom formation, medical therapy, and nursing care in adults ill with common medical-surgical conditions occurring from malfunction in special sense organs, endocrine, urinary, integumentary, nervous, and musculoskeletal systems. Scientific facts and principles which form the basis for nursing procedures and observation. To be taken concurrently with 374.

- 374 Medical-Surgical Nursing Practice (5)**
Supervised practice in care of medical-surgical patients in hospital wards and in the operating room; observation in selected clinics or physicians' offices. Common elements, and significant differences, in care of patients with specialized nursing problems during illness, convalescence, and rehabilitation. Fifteen hours experience per week.
- 407 Principles of Ward Management and Bedside Teaching (3)** **Claypool, Nash**
Problems of ward administration, with emphasis on the supervisory and teaching functions of the team leader, and on the provision of patient teaching. Human relations in the ward situation are stressed. To be taken concurrently with 422.
- 409 Professional Problems in Nursing (2)**
Responsibilities of the professional nurse to the community. Study of professional organizations, opportunities in various fields of nursing, legislation, accreditation, and professional literature. To be taken concurrently with 422.
- 412 Scientific Principles in Nursing Care (3)** **Brandt, Mansfield**
An undergraduate seminar devoted to a critical analysis of nursing situations, with emphasis on the identification and utilization of the inherent social and natural science principles. Student research project utilized as a learning experience.
- 413 Principles of Psychiatric Nursing (5)** **Beckwith**
Concepts and principles of psychiatric-mental health nursing used in planning care of mentally ill patients. Psychiatric therapies and rehabilitation measures. To be taken concurrently with 414.
- 414 Psychiatric Nursing Practice (5)** **Beckwith, Schultz**
Application of psychiatric-mental health principles and skills in the care of selected psychiatric patients. Fifteen hours clinical experience in community psychiatric facilities.
- 415 Community Health Nursing Principles (3)** **Cobb, Vail**
Analysis of family and community health situations and current nursing programs. Emphasis on selected problem-solving skills. To be taken concurrently with 416.
- 416 Community Health Nursing Practice (5)** **Christian, Cobb, Coombe, Fisher, Vail**
Application of public health nursing principles and skills in family and community health situations.
- 421 Selected Problems in Clinical Nursing (4)** **Little**
Analysis of complex nursing problems related to the care of adults or children with chronic or acute illness, in ordinary and emergency situations. Includes the formulation of comprehensive nursing care plans for selected patients or groups of patients. Two two-hour seminar periods per week. To be taken concurrently with 422.
- 422 Senior Nursing Practice (6)** **Little, Rose**
Experience in dealing with complex nursing care problems including those associated with stress or emergency situations. Planning, directing, guiding, evaluating nursing care activities, as an individual and as a team leader. Three consecutive weeks of total experience will be concentrated on the care of tuberculosis patients. Eighteen hours of supervised clinical experience.
- 429 Nursing Functions in Gerontology (2)** **Beckwith**
Nursing principles related to the physical, social, and emotional needs of the geriatric patient in individual, family, and group settings. Biological, social, and cultural influences upon the aging population included.
- 499 Undergraduate Research (1-5, maximum 5)** **Brandt**
Supervised individual research on a specific nursing problem. Open to qualified majors in the senior year. Prerequisite, permission of instructor. May substitute for 412. To be taken concurrently with 416.

COURSES FOR OTHER UNIVERSITY STUDENTS

- 100 Care and Prevention of Illness in the Home (3)** **Olcott**
Health and safety factors in the home and community; recognition of early symptoms of physical or mental illness as an important factor in the prevention of disease or disability. First aid in the home; conditions commonly treated at home; medications and supportive treatments; care before and after pregnancy; infant care; child growth and development; common psychological reactions to illness or disability; choosing a doctor and a hospital; consideration of community health resources. (Open to any student.)
- 101 Introduction to Professional Nursing (2)** **Gray**
The history of modern nursing and its important trends, with emphasis on the role of the professional nurse and her use of communication and observation skills. Last time offered Autumn Quarter, 1962.
- 102 Introduction to Professional Nursing (2)** **Gray, Nash**
Orientation to the profession, emphasizing present day concepts of nursing and preparation required. A survey of fields of nursing and interrelationships with other health groups. Lectures, discussions, observations, and field visits. (Open to any student.)
- 315, 316 Nursing for Physical Therapists (2,2)** **Hay**
Selected nursing activities and techniques for students in the physical therapy program.

COURSES FOR UNDERGRADUATE NURSING AFFILIATE STUDENTS

- 250 Introduction to Psychiatry and Psychiatric Nursing (5)** **Stankiewicz, Stockwell**
Concepts and principles used in planning nursing care of mentally ill patients. Therapies and rehabilitation measures. To be taken concurrently with 251.
- 251 Selected Psychiatric Nursing Practice (5)** **Cashar, Doree, Stankiewicz, Stockwell**
Application of fundamental principles in planning and caring for the mentally ill patient. Fifteen hours clinical experience in community psychiatric facilities. To be taken concurrently with 250.
- 252 Introduction to Nursing Care and Treatment of Tuberculosis (2)** **Sorensen**
Basic concepts regarding the etiology, control, and treatment of tuberculosis. Relevant natural and social science principles and the rehabilitation of the chronically ill, including the alcoholic. Lectures, discussions, and demonstrations. Seven hours per week for three weeks.
- 253 Selected Tuberculosis Nursing Practice (2)** **Sorensen**
Emphasis on planning comprehensive nursing care of the chronically ill, including the alcoholic, by utilization of paramedical services. Problem-solving approach stressed. Hospital practice, ward discussions, clinic, and conferences. Twenty-two hours of laboratory experience per week for three weeks.
- 402 Principles of Tuberculosis Nursing Care (2)** **Sorensen**
Chronic and communicable disease nursing as exemplified in patients with tuberculosis, including those with alcoholism. An exploration of preventive programs, medical management, community facilities, and related family and community problems. Seven hours of lectures and discussions per week for three weeks.
- 403 Tuberculosis Nursing Practice (2)** **Sorensen**
Application of chronic and communicable disease nursing concepts and principles to the care of patients with tuberculosis, including those with alcoholism. Utilization of paramedical services in complex nursing situations. Emphasis on the problem-solving approach and interpersonal relations in nursing. Twenty-two hours of laboratory experience per week for three weeks.
- 415 Community Health Nursing Principles (3)** **Cobb, Vail**
Analysis of family and community health situations and current nursing programs. Emphasis on selected problem-solving skills. Prerequisites, 366, 417, 419, and Preventive Medicine 323.
- 416 Community Health Nursing Practice (5)** **Christian, Cobb, Coombe, Fisher, Vail**
Application of public health nursing principles and skills in family and community health situations. Concurrent with 415.

COURSES FOR GRADUATE NURSE STUDENTS

- 361 Survey of Trends in Contemporary Nursing (2)** **Schumann, Streich**
Emphasis on current problems.
- 365 Therapeutics and Nursing Care (2)** **Baker**
The nurse's responsibilities in the use of selected therapeutic agents, treatment, and diagnostic tests.
- 366 Special Problems in Nursing Care (2)** **Fatka, Nehren**
Emphasis on mental health aspects. Concurrent with 419.
- 415 Community Health Nursing Principles (3)** **Cobb, Vail**
Analysis of family and community health situations and current nursing programs. Prerequisites, 366, 417, 419 and Preventive Medicine 323.
- 416 Community Health Nursing Practice (5)** **Christian, Cobb, Coombe, Fisher, Vail**
Application of public health nursing principles and skills in family and community health situations. Concurrent with 415.
- 417 Principles of Teaching Nursing and Health (3)** **Klutas**
Introduction to learning principles and processes as related to nursing. Prerequisites, Psychology 100 and Education 209 or equivalent.
- 418 Supervision in Nursing (3)**
Principles of supervision as they apply to nursing in hospitals and health services. The importance of interpersonal relations in supervision.
- 419 Contemporary Nursing in the Hospital (3)** **Patrick**
Weekly conferences, and four hours of weekly clinical experience in nursing in hospitals. Fundamental problems in nursing care. Prerequisite, 365. Concurrent with 366.
- 425 Current Literature in Nursing (2)** **Martin**
Concurrent with 415.

COURSES FOR GRADUATE STUDENTS

- 430 Advanced Nursing Field Work (3)**
Identification and analysis of problems in advanced clinical nursing. Principles pertinent to development, application, and evaluation of plans for optimum nursing. Experience in

medical-surgical, maternal-child, public health, psychiatric-mental health, school, or occupational health nursing. Weekly seminar.

- 431 Advanced Nursing Field Work (2)**
Continuation of Nursing 430. Experiences chosen in the area of major clinical interest. Prerequisite, 430.
- 435 Practice Supervision in Nursing (3)**
Planned experience in supervisory functions. Prerequisites, 454, experience in field, or permission.
- 436 Practice Teaching in Nursing (3)**
Planned experience in formal and clinical teaching. Prerequisites, 462 and experience in clinical field, or permission.
- 454 Administration in Nursing (2)** **Byerly**
Administrative behavior, personnel administration; coordinating functions of the nursing administrator. Prerequisite, 418 or permission.
- 455 Administration of Schools of Nursing (3)** **Hoffman**
Application of principles: over-all administrative functions as they relate to organization, student and faculty personnel, curriculum facilities, finance, records, and reports in schools of nursing. Prerequisite, 454 or permission.
- 456 Nursing Service Administration (3)** **Byerly**
Application of fundamentals of administration and organization to nursing service in the hospital. Discussion of selection, assignment, supervision, and evaluation of hospital nursing personnel; techniques for control of equipment and supplies; communication; and interdepartmental and interpersonal relations. Prerequisite, 454 or permission.
- 462 Teaching in Schools of Nursing (3)** **Jenkin**
Principles and methods of teaching applied to clinical nursing; group development of objectives and course content; planning of courses and units of learning for selected clinical areas; selection of instructional aids and textbooks; the role of the instructor in classroom teaching and clinical practice. Prerequisites, 417 or equivalent, Education 209, or permission.
- 463 Personnel Guidance in Nursing (3)** **Nehren**
Development of concepts and principles of interpersonal relations as used in personnel guidance. Prerequisite, Education 447 or permission.
- 464 The Nurse in Mental Health (3)** **Batey**
Concepts of nursing and of growth and development applied to nurse-patient interaction; emphasis on prevention and resolution of emotional problems experienced in nursing situations. Nursery school experience. Prerequisite, permission.
- 466 In-Service Education in Nursing (3)** **Jenkin**
Programs involving various groups of workers in different institutions and agencies.
- 467 Evaluation of Performance in Nursing (3)** **Olcott**
Philosophy and principles of performance evaluation for nurses with administrative, teaching, and supervisory responsibility in various health agencies. The purposes of evaluation as they relate to guidance of staff, to increased satisfaction in one's work, and to improved patient care.
- 471NJ Advanced Directed Teaching: School Nursing (4)** **Boroughs, Christian**
Directed school nursing practice in public schools, including health education and health services. Offered jointly with the College of Education. Prerequisite, permission.
- 481 The Nurse in School Vision Programs (2)** **Christian**
Nurse's role and responsibilities. Relationship of vision programs to community health services. Lectures, discussions, and demonstrations.
- 485 School Health Problems (3)** **Christian**
Analysis of and planning for programs based on developmental needs of the school-age child. Field observation and participation in school health programs. Prerequisite, permission.
- 486 Occupational Health Programs, Nursing Implications (3)** **Klutas**
Philosophy, scope, types of programs; functions of health personnel; interpersonal and community relationships; environmental and preventive health aspects. Emphasis on role of the nurse. Prerequisite, permission.
- 498 Methods of Supervision in Public Health Nursing (3)**
Principles of supervision and their relationship to administration. Prerequisites, 454 or equivalent, preparation and experience in public health nursing, and permission.
- 501 Development of Nursing Procedures (2)** **Carnevali**
Nursing procedures as a basis for nursing service planning and as a teaching tool. Procedures analyzed against selected criteria and developed according to clinical needs.
- 502 Applied Group Development Principles (3)** **Nehren**
Factors that contribute to productive group effort; application of principles for professional health personnel. Prerequisites, permission and Speech 332 or equivalent.
- 504 Seminar in Occupational Health Nursing (2)** **Klutas**
Intensive analysis of selected problems.
- 505 Seminar in Administration of Schools of Nursing (3)** **Hoffman**
Discussion and analysis of situations in such administration. Prerequisite, 455 or equivalent.

- 506 Seminar in Nursing Service Administration (3)** **Byerly**
Discussion and analysis of situations in such administration. Prerequisite, 456 or equivalent.
- 507 Seminar in Nursing Problems in Mental Health (2)** **Nehren**
Psychiatric concepts in the nurse's therapeutic role in the family milieu. Prerequisites, 508 and permission.
- 508 Seminar in Advanced Psychiatric Nursing (2)** **Batey**
Exploration of interpersonal relations; the nurse's therapeutic role with the psychiatric patient and in the total milieu. To be taken concurrently with 430.
- 509 Seminar in School Nursing (3)** **Christian**
The application of public health nursing concepts, principles, and research findings in the analysis and solution of school nursing problems.
- 510 Curriculum Development in Nursing Education (5)** **Pedersen**
Current patterns and trends in nursing education; development of materials; problems in study and implementation of nursing curricula. Prerequisite, 417 or equivalent.
- 511 Psychosomatic Nursing (3)** **Nehren**
Seminar and clinical experiences centered on problems of interrelationships of physical and emotional aspects of illness. Prerequisite, basic psychiatric nursing or permission.
- 512 Advanced Fields in Psychiatric Nursing (3)** **Batey**
Practicum devoted to solution of nursing problems in psychiatric situations. Specific interpersonal and interprofessional relationships in the care of mental patients. Prerequisite, permission.
- 513 Field Experience in Mental Health Nursing (3)** **Nehren**
Selected experience in the identification and analysis of mental health problems in family relationships; utilizing psychiatric concepts in developing therapeutic nursing relationships in the family milieu. Concurrent with 507.
- 515 Special Fields in Public Health Nursing (3)**
Investigation of public health nursing responsibilities. Emphasis varies with interest and needs of the students. Prerequisite, permission.
- 521 Methods of Research in Nursing (2)** **Hoffman**
Methods of research applied to the solution of problems in all fields of nursing.
- 530 Advanced Concepts in Maternal and Child Health and Implications for Nursing (3)** **Murray**
Consideration of changing philosophy in maternal and child care; factors influencing health; ways of meeting health needs; role of the nurse in solution of related problems. Prerequisite, permission.
- 535 Problems in Nursing Mentally Retarded Children (3)** **Chinque**
Analysis of significant problems in care of mentally retarded children and their families, through consideration of the complex biophysical, psychological, and sociocultural factors involved. Prerequisite, permission.
- 540 Seminar in Medical-Surgical Nursing (3)** **Giblin**
Criteria for judging the effectiveness of nursing actions used to help alleviate or prevent pathophysiological changes evidenced in physical illness. Prerequisite, permission.
- 542 Seminar in Cardiovascular Nursing (3)** **Giblin**
Analysis of nursing problems of such patients; potential pathophysiology and the physical and emotional factors involved. Prerequisites, 430 (medical-surgical), 464, or permission.
- 550 Advanced Public Health Nursing (3)** **Burke**
Advanced developments in the sciences of nursing and public health.
- 558 Seminar in Advanced Public Health Nursing (3)** **Burke**
Application of concepts, principles, and research findings in analysis and solution of current and complex community health problems. Prerequisite, permission.
- 570 Seminar in Clinical Research in Nursing (3)** **Hoffman**
Philosophy, problems of design; use of criterion measures in terms of patient care. Prerequisite, permission.
- 600 Research (*)**
- 700 Thesis (*)**

REQUIRED COURSES IN ALLIED FIELDS

CHEMISTRY

- 101 General Chemistry (5)**
For nonscience and nonengineering majors who plan to terminate their study of chemistry with 101 or 102. Molecular theory, quantitative relationships in chemical processes, solutions, ionic equilibria, acids, bases, and salts. Prerequisite, high school chemistry or 100.
- 102 General and Organic Chemistry (5)**
A terminal course to follow 101. Chemistry of common metals and nonmetals. Organic compounds; hydrocarbons, alcohols, aldehydes, ketones, ethers, acids, aromatics, fats and oils, proteins and carbohydrates. Prerequisite, 101.

CONJOINT**317-318 Elementary Anatomy and Physiology (6-6)**

Human physiology with anatomical demonstrations. An elementary course integrating anatomy, histology, physiology, and biochemistry of the human body. Offered jointly by the Departments of Anatomy and Physiology and Biophysics. For nursing and dental hygiene students only.

ENGLISH**101, 102, 103 Composition (3,3,3)**

Fundamentals of effective exposition; collecting, organizing, and evaluating materials for writing; reading contemporary writings for meaning and form.

GENERAL EDUCATION**101 Literature (5)**

An introduction to literary forms and techniques through the analysis of representative examples of narrative and poetic art; the relationship of content and expression.

102 The Arts (5)

Painting, sculpture, music, architecture, the dance, and drama studied through example, discussion, and criticism.

103 Philosophy (5)

Methods of reflective thinking and the use of them in considering such essential questions as the existence and nature of God, the meaning of a good life and a good social order, the nature and limits of human knowledge, the relationship between mind and body, and the nature of the universe. This course may be offered in partial fulfillment of the requirements for a major in philosophy.

HOME ECONOMICS**119 Family Nutrition (4)**

Normal nutritional requirements of the family and simple dietary modifications. Food selection. Cultural effects on diet pattern. Orientation to community nutrition facilities. For student nurses.

MICROBIOLOGY**301 General Microbiology (5)**

Microorganisms and their activities. For students of pharmacy, dental hygiene, nursing, home economics, education, and others interested in a one-quarter survey course, with minimal training in chemistry. Prerequisite, two quarters of general chemistry.

PHYSICAL EDUCATION**HEALTH EDUCATION****110 Health Education (Women) (2)**

Current health information; women's responsibilities in application of health knowledge to attitudes and practices in modern life. Required of all freshman women; exemption, without credit, by examination. Physical Education 112 and 114 are strongly recommended as two of the three P.E. activities required of all basic students (except those otherwise exempted).

PHYSICS**170 Introduction to Health Sciences Physics (5)**

Selected physical theories and principles and their application to home and hospital situations.

PSYCHOLOGY**100 General Psychology (5)**

Introduction to the principles of human behavior.

310, 311 Survey of Psychological Problems (3,3)**PREVENTIVE MEDICINE****323 Introduction to Public Health Principles and Practices (3)**

A survey of principles, practices, and the agencies concerned.

410 Preventive Medicine: Implications for Nursing (2)

Statistics, epidemiology, public health administration, and certain public programs are considered in further detail than in 323. Prerequisite, 323.

SOCIAL WORK**400 Field of Social Welfare (5)****401 Principles of Interviewing (2)****SOCIOLOGY****110 Survey of Sociology (5)**

Basic principles of social relationships. Primarily for freshmen and sophomores. Not open to students who have taken 310.

FACULTY OF THE SCHOOL OF NURSING

(As of September, 1962)

A single date following the name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present academic rank.

- Anderson, Eugenia Elaine, 1961, *Assistant Professor of Medical-Surgical Nursing*
B.S.N., 1949, Colorado; M.N., 1958, Washington
- Baker, Joan Mercedes, 1956 (1961), *Acting Instructor in Medical-Surgical Nursing*
B.S.N., 1955, Washington; M.S., 1959, Rutgers
- Batey, Marjorie, 1956 (1958), *Assistant Professor of Psychiatric Nursing*
Diploma, 1947, Sacred Heart Hospital School of Nursing, Washington; B.S., 1953, Washington; M.S., 1956, Colorado
- Beckwith, Evelyn M., 1960, *Assistant Professor of Psychiatric Nursing*
Diploma, 1931, Mt. Sinai Hospital School of Nursing, Ohio; B.S., 1951, M.N., 1953, Washington
- Boozar, Mary, 1956, *Assistant Professor of Medical-Surgical Nursing*
B.S., 1947, Colorado; M.N., 1955, Washington
- Brandt, Edna Mae, 1954 (1955), *Assistant Professor of Medical-Surgical Nursing*
Diploma, 1939, St. Joseph's Hospital School of Nursing, Illinois; B.A., 1952, Redlands; M.N., 1953, Washington
- Breckenridge, Flora, 1953, *Instructor in Medical-Surgical Nursing*
Diploma, 1941, Evanston Hospital School of Nursing; B.S., 1952, Western Reserve
- Bruno, Pauline, 1958 (1959), *Assistant Professor of Medical-Surgical Nursing*
Diploma, 1945, St. Vincent Hospital School of Nursing, Massachusetts; B.S., 1952, M.S.N., 1954, Catholic University
- Burke, A. Evelyn, 1943 (1953), *Associate Professor of Public Health Nursing*
B.S., 1930, Akron Municipal; Diploma, 1930, M.A., 1941, Western Reserve; C.P.H.N., 1943, Washington
- Byerly, Elizabeth Lee, 1962, *Acting Instructor in Maternal-Child Nursing*
Diploma, 1947, Michael Reese Hospital School of Nursing, Illinois; B.S.N., 1955, Iowa State; M.N., 1958, Washington
- Carnevali, Doris Lorraine, 1962, *Instructor in Medical-Surgical Nursing*
B.S.N., 1947; M.N., 1961, Washington
- Cashar, Leah G., 1952 (1959), *Instructor in Psychiatric Nursing*
Diploma, 1945, St. Joseph's Hospital School of Nursing, Kansas; B.S., 1951, Washington
- Chinque, Katherine, 1947 (1959), *Assistant Professor of Maternal-Child Nursing*
Diploma, 1931, Providence Hospital School of Nursing, Michigan; B.S., 1946, Wayne; M.P.H., 1951, Michigan
- Christian, Doris Cowles, 1957 (1958), *Instructor in Public Health Nursing*
Diploma, 1944, Springfield Hospital School for Nurses, Massachusetts; B.S.S., 1950, Chicago; M.A., 1957, Washington
- Claypool, Janet McClane, 1961, *Acting Instructor in Maternal-Child Nursing*
B.S.N., 1959; M.N., 1960, Washington
- Cobb, Marguerite, 1953 (1958), *Assistant Professor of Public Health Nursing*
B.S.N., 1959, M.N., 1957, Washington

- Colin, Louise, 1961, *Instructor in Medical-Surgical Nursing*
Diploma, 1947, Brooklyn Hospital School of Nursing; B.S., 1958, Columbia;
M.N., 1959, Washington
- Coombe, Evelyn, 1961, *Instructor in Public Health Nursing*
Diploma, 1945, Providence Hospital, Kansas; B.S., 1955, Colorado; M.N., 1956, Washington
- Critchley, Deane, 1962, *Instructor in Psychiatric Nursing*
B.S., 1957; M.S., 1959, California
- Cross, Harriet, 1932 (1941), *Assistant Professor of Public Health Nursing*
Diploma, 1921, Columbia Hospital School of Nursing, Wisconsin; B.S., 1925, Minnesota;
C.P.H.N., 1938, M.N., 1940, Washington
- Doree, Emily I., 1962, *Instructor in Psychiatric Nursing*
Diploma, 1944, Ottawa Civic Hospital School of Nursing; C.P.H.N., 1954, University of
British Columbia; B.S., 1960, Washington
- Fatka, Nada, 1961, *Instructor in Psychiatric Nursing*
Diploma, 1952, Iowa Methodist Hospital School of Nursing; B.S., 1955, Iowa;
M.S., 1958, Colorado
- Fisher, Alice Lorene, 1961, *Lecturer in Public Health Nursing*
B.S.N., 1930, Minnesota; M.S.P.H., 1936, Michigan
- Giblin, Elizabeth, 1951 (1959), *Associate Professor of Medical-Surgical Nursing*
B.S.N., 1943, M.N., 1954, Washington; Ed.D., 1959, Colorado
- Gray, Florence, 1945 (1959), *Associate Professor of Nursing*
B.S.N., 1945, M.S., 1950, Washington
- Hastie, Elizabeth May, 1960, *Instructor in Medical-Surgical Nursing*
B.S.N., 1958, University of British Columbia; M.N., 1961, Washington
- Hay, Stella Leader, 1955 (1958), *Assistant Professor of Medical-Surgical Nursing*
Diploma, 1942, Eitel Hospital School of Nursing, Minnesota; B.S., 1944, M.A., 1951,
Minnesota
- Heinemann, Margot Edith, 1954 (1956), *Assistant Professor of Medical-Surgical
Nursing*
B.S.N., 1945, Seattle University; M.N., 1954, Washington
- Hewitt, Helon, 1961, *Research Instructor in Psychiatric Nursing*
Diploma, 1955, Emanuel Hospital School of Nursing, Oregon; B.S.N., 1959, M.N., 1961,
Washington
- Hoffman, Katherine, 1942 (1956), *Professor of Nursing; Assistant Dean of the
School of Nursing*
A.B., 1929, College of Puget Sound; Diploma, 1934, Tacoma General Hospital School of
Nursing; M.N., 1941, Ph.D., 1956, Washington
- Jenkin, Shirley Ann, 1961, *Acting Instructor in Medical-Surgical Nursing*
B.S.N., 1956, Washington State; M.N., 1961, Washington
- Julian, Joseph, 1961, *Research Instructor in Nursing*
A.B., 1958, San Francisco State; M.A., 1961, Washington
- Klemer, Margaret Grim, 1962, *Instructor in Maternal-Child Nursing*
Diploma, 1937, St. Margaret Memorial Hospital School of Nursing, Pennsylvania;
B.S.N.E., 1942, University of Pittsburgh; M.S., 1962, Alabama
- Klutas, Edna May, 1960, *Assistant Professor of Occupational Health Nursing and
Public Health Nursing*
Diploma, 1940, Columbia-Presbyterian Hospital School of Nursing, New York; B.S., 1951,
Washington; M.P.H., 1957, Yale
- Kogan, Kate, 1962, *Research Assistant Professor in Nursing; Clinical Assistant
Professor in Psychiatry*
B.A., 1934, Wellesley; M.A., 1935, Ph.D., 1943, Columbia University
- Leahy, Kathleen M., 1935 (1961), *Professor Emeritus of Public Health Nursing*
Diploma, 1921, Stanford School of Nursing; A.B., 1926, C.P.H.N., 1927, Oregon;
M.S., 1931, Washington
- Little, Dolores, 1951 (1958), *Assistant Professor of Medical-Surgical Nursing*
B.S.N., 1946, M.N., 1957, Washington
- Mansfield, Louise, 1951 (1952), *Assistant Professor of Medical-Surgical Nursing*
Diploma, 1937, Samaritan Hospital School of Nursing, Idaho; B.S., 1947, Ohio State;
M.A., 1951, Teachers College, Columbia University

- McConnell, Nola, 1957 (1960), *Instructor in Maternal-Child Nursing*
B.S.N., 1956, M.N., 1960, Washington
- Martin, Florence E., 1961, *Acting Instructor in Public Health Nursing*
B.S.N., 1956, M.N., 1962, Washington
- Midthun, Aline, 1957, *Instructor in Medical-Surgical Nursing*
Diploma, 1932, Tennessee; B.S., 1956, Oregon
- Murray, B. Louise, 1951 (1962), *Associate Professor of Maternal-Child Nursing*
B.S., 1938, Portland University; M.N., 1950, Washington; Ed.D., 1962, Columbia
- Nash, Shirley Ista, 1952 (1957), *Assistant Professor of Nursing*
Diploma, 1941, Virginia Mason Hospital School of Nursing; B.S., C.N.S., 1949, M.N., 1956, Washington
- Nehren, Jeanette Goodwin, 1959, *Assistant Professor of Psychiatric Nursing*
Diploma, 1945, St. Vincent's Hospital School of Nursing, Indiana; B.S., 1956, Indiana; M.S., 1958, Colorado
- Olcott, Virginia, 1931 (1945), *Associate Professor of Medical-Surgical Nursing*
Diploma, 1926, Peter Bent Brigham Hospital School of Nursing, Massachusetts; B.S., 1927, M.S., 1931, C.P.H.N., 1949, Washington
- Patrick, Maxine I., 1955 (1961), *Assistant Professor of Medical-Surgical Nursing*
B.S.N., 1948, Colorado; M.N., 1953, Washington
- Pedersen, Roma Kittelsby, 1953 (1961), *Associate Professor of Medical-Surgical Nursing*
B.S.N.E., 1943, Minnesota; M.N., 1955, Washington
- Pesznecker, Betty Hart, 1958 (1960), *Research Assistant Professor of Psychiatric Nursing*
Diploma, 1948, St. Luke's Hospital School of Nursing, Spokane; B.S., 1951, M.N., 1957, Washington
- Rose, Patricia, 1952 (1962), *Assistant Professor of Maternal-Child Nursing*
Diploma, 1946, St. Joseph's Hospital School of Nursing, Tacoma; B.S.N., 1949, M.N., 1958, Washington
- Schultz, Frances Koster, 1960, *Instructor in Psychiatric Nursing*
B.S., 1944, M.S., 1960, California
- Schumann, Delores M., 1961, *Instructor in Medical-Surgical Nursing*
Diploma, 1951, Miami Valley Hospital School of Nursing, Ohio; B.S., 1954, Ohio State; M.S., 1961, Boston

Diploma, 1931, Theda Clark Training Schools for Nurses, Wisconsin; B.A., 1949, San Francisco State College; M.S., 1961, California

APPENDIX

UNDERGRADUATE ADMISSION, EXCEPTIONAL CASES

An applicant whose preparation and previous scholarship do not clearly qualify him for admission may submit additional evidence in support of his application. This may include scores on nationally recognized tests of scholastic aptitude or achievement; letters from school administrators, teachers, or counselors; and other information which may assist the Board of Admissions in evaluating his probability of success in the University.

Students admitted by special action of the Board of Admissions will be expected to achieve and maintain a satisfactory scholastic average in their University work and to fulfill any conditions specified by the Board at the time of their admission.

A student thus admitted on probation will be subject to scholarship rules given on page 24.

Furthermore, he or she may not (1) be pledged or initiated into a fraternity or sorority, or engage in those other student activities in which his right to participate is restricted by the regulations of the Committee on Student Welfare; (2) engage in those athletic activities in which his right to participate is restricted by regulations of the University Intercollegiate Athletics Committee.

VETERANS INFORMATION

WORLD WAR I OR II VETERANS

Under certain conditions a veteran of World War I or II who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges. See page 52.

KOREAN VETERANS

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building.

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established. Educational allowance payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

Quarter Credit Requirements (Public Law 550)

14 credits.....	Full subsistence
10 to 13 credits.....	Three-fourths subsistence
7 to 9 credits.....	One-half subsistence
6 credits or less.....	Established tuition and fees
or credits \div 14 \times \$110.00, whichever is the lesser.	

Graduate Credit Requirements (Public Law 550) 500-level Courses or Above

9 credits.....	Full subsistence
7 to 8 credits.....	Three-fourths subsistence
5 to 6 credits.....	One-half subsistence
4 credits or less.....	Established tuition and fees
or credits \div 14 \times \$110.00, whichever is the lesser.	

If a graduate is combining 400-level courses with 500-level courses, he should consult with the Veterans Division, Safety Division Building, to determine the scale of pay.

Termination of Training

A veteran *eligible* under Public Law 550 must complete his training by *eight* years after his release from active service, or by January 31, 1965, whichever is earlier.

DISABLED VETERANS

A veteran with a disability may have benefits under Public Law 16, 894, or 815 and should make application to the nearest Veterans Administration Regional Office at least four weeks prior to registration.

CHILDREN OF DECEASED VETERANS

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for Education and Training issued to those eligible persons by the Veterans Administration is to be presented, along with the Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed.

Credit requirements for monthly subsistence for Public Law 634 students are the same as those listed for Public Law 550 students; however, Public Law 634 students may not be authorized for less than half-time subsistence.

WITHDRAWALS**WITHDRAWAL FROM A COURSE**

Official withdrawal from a course is made only under the following conditions: (1) during the first fifteen calendar days of a quarter, with the consent of the withdrawing student's adviser; (2) after the first fifteen calendar days of a quarter and before the end of the first six calendar weeks of a quarter, with the approval of the student's adviser, the instructor of the course from which withdrawal is sought, and of the dean of the college in which the withdrawing student is enrolled; and (3) after the first six calendar weeks of a quarter and before final examination week, only upon certification in writing to the Registrar by the dean of the college in which the withdrawing student is enrolled that, in the judgment of the dean, withdrawal is necessitated by the student's hardship. Withdrawals from courses accomplished by any other method are unofficial withdrawals which are entered on a student's record as EW, and are assigned the value of E in the

computation of the student's grade-point average. No official withdrawal may be made during final examination week.

Official withdrawals are entered on a student's record as follows: (1) a withdrawal within the first fifteen calendar days of a quarter, as W; (2) a withdrawal after the first fifteen calendar days of a quarter and before final examination week, as PW, if the student's work has been satisfactory, and as E, if the student's work has been unsatisfactory. Grades of PW and W are assigned no value in the computation of grade-point averages.

WITHDRAWAL FROM THE UNIVERSITY

The student should obtain at the office of the Dean, C303 Health Science Building, the Request for Withdrawal From the University form.

PHYSICAL EDUCATION ACTIVITIES

Men students may use credits earned in freshman or varsity sports to satisfy the activity course requirement.

Women students, in fulfilling the three-quarter requirement, may take a maximum of two credits in any of the following: (1) swim area; (2) dance area; (3) tennis and badminton; (4) any other specific individual, dual, or team activity.

The following students are exempt from the requirement of activity courses:

1. Students who have attained the age of twenty-five. A student who attains the age of twenty-five during a quarter in which he is registered for a required physical education activity course is held for the completion of that course. This rule is not retroactive in its application to students who entered prior to Spring Quarter, 1951, and were exempted from required physical education courses under previous rules.

2. Students who enter as sophomores, juniors, or seniors.

3. Special students.

4. Students registered for 6 credits or less.

5. Students who, because of physical condition, are exempted by the Graduation Committee upon the recommendation of the Dean of the College. Such action is taken only when the Dean has received a joint recommendation for exemption from the University Health Officer and the Executive Officer of the Department of Physical Education for Men or for Women, whichever is appropriate. All other students who are reported by the University Health Officer as physically unfit to join regular classes will be assigned by the Executive Officer of the Department of Physical Education for Men or for Women to special programs adapted to their needs.

6. Students who are veterans of military service. Complete exemption without credit is granted for one year or more of active duty. Veterans with less than one year of service receive no exemption.

7. Transfer students who present acceptable credit for physical education activity courses taken in other colleges. The amount of exemption depends on the number of quarters for which credit is transferred.

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration, except that new students must submit a \$50.00 advance payment of fees at the time they are admitted to the University. This advance payment is applied against the total tuition and fees collected from the student. In the event of failure to register, the \$50.00 advance payment is not refundable to the student. The University reserves the right to change any of its fees and charges without notice.

The fees schedules for resident and nonresident students, on pages 53 and 54, apply to the academic year (Autumn, Winter, and Spring Quarters). Summer fees are listed in the *Summer Quarter Bulletin*.

EXEMPTIONS

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges, provided they were citizens of the United States at the time of their enlistment and who are again citizens at the time of their registration in the University. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

EXTRA SERVICE CHARGES

A registration service charge of \$15.00 is assessed those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by In-Person Registration by action of the Registration Appeal Board. A late registration charge of \$15.00 is assessed any student granted permission to register after the last registration day before the opening of Autumn, Winter, or Spring Quarters by action of the Registration Appeal Board. A charge of \$5.00 is made Autumn, Winter, and Spring Quarters for each change of registration or change of section, or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University.

<i>Special Examination</i>	\$1.00
<i>Removal of an Incomplete</i>	2.00
<i>Washington Pre-College Testing Program</i>	5.00
<i>Athletic Admission Ticket</i> (optional for ASUW members)	3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter, \$3.50.	
<i>Military Uniform Rental</i>	25.00
Paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.	
<i>Breakage Ticket</i>	3.00
Required in some laboratory courses; ticket is returnable for full or partial refund.	
<i>Locker Rental, per quarter</i>	2.00
Required of men students taking physical education activities.	
<i>Quarterly Grade Report</i>	.50
One grade report is issued at the close of each quarter without charge; the charge, payable in advance, is made for each additional copy.	

Transcripts

1.00

One transcript is furnished without charge; the charge, payable in advance, is made for each additional copy.

Graduation Exercises Diploma

10.00

MUSIC PRACTICE ROOM, per quarter: piano practice, \$3.00, one hour a day; \$5.00, two hours a day; \$6.00, three hours a day. Organ practice, \$6.00, one hour a day; \$10.00, two hours a day; \$12.00, three hours a day. Practice rooms are available only to students taking music courses.

PHYSICAL EDUCATION ACTIVITIES, per quarter: bowling, \$5.00; canoeing, \$3.00; golf instruction, \$1.50.

REFUND OF FEES, CHARGES, AND RENTALS

All fees will be refunded in full if complete withdrawal is made during the first three calendar days of the quarter; one-half the amount will be refunded if withdrawal is made during the first thirty calendar days. Refunds are not made to students withdrawing under discipline.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund, if payment was made by check.

FEES FOR RESIDENT STUDENTS

A resident is one who has been domiciled in the state of Washington for at least a year immediately prior to registration. (See page 17.)

Examples of Autumn, Winter, and Spring Quarter Fees for Various Types of Registration

Type of Registration	Tuition Fee	Incidental Fee	Other Fees* Autumn, Winter, and Spring Quarters	Total Fees Autumn, Winter, and Spring Quarters
Full-time students (undergraduate and graduate except in Medical and Dental Schools)	\$35.00	\$56.50	\$8.50	\$100.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	35.00	39.00	†	74.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time		56.50	8.50	65.00
Part-time (max. 6 credits)§		39.00	†	39.00
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (nonthesis)		56.50	†	56.50

* Other fees consist of Student Activities, \$2.50; ASUW Bond Redemption, \$3.50; HUB Bond Redemption, \$1.00; Building Fund, \$1.50.

† Optional; if membership in ASUW is desired, Other Fees should be added to the total fee as shown for this type of registration.

‡ See Exemptions, page 52, to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by the Graduate School.

FEES FOR NONRESIDENT STUDENTS

Prospective students are classified as nonresidents when their credentials come from schools outside the state of Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

Examples of Autumn, Winter, and Spring Quarter Fees for Various Types of Registration

Type of Registration	Tuition Fee	Incidental Fee	Other Fees* Autumn, Winter, and Spring Quarters	Total Fees Autumn, Winter, and Spring Quarters
Full-time students (undergraduate and graduate) except in Medical and Dental Schools)	\$105.00	\$86.50	\$8.50	\$200.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC) §	105.00	69.00	†	174.00
Ex-service personnel of World Wars I and II ‡ (Chapter 46, Laws of 1945)				
Full-time	52.50	86.50	8.50	147.50
Part-time (max. 6 credits) §	52.50	69.00	†	121.50
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (nonthesis)		56.50	†	56.50

* Other fees consist of Student Activities, \$2.50; ASUW Bond Redemption, \$3.50; HUB Bond Redemption, \$1.00; Building Fund, \$1.50.

† Optional; if membership in ASUW is desired, Other Fees should be added to the total fee as shown for this type of registration.

‡ See Exemptions, page 52, to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by the Graduate School.

BULLETIN • UNIVERSITY OF WASHINGTON

COLLEGE OF PHARMACY

1961-1963

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter Bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

CALENDAR

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in the following Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

WINTER QUARTER, 1961

REGISTRATION PERIOD

- | | |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OCT. 24-Nov. 18 | Advance Registration only for students in residence Autumn Quarter, 1960. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter. |
| DEC. 27-29 | In-Person Registration for students in residence Autumn Quarter, 1960, who did not complete Winter Quarter, 1961, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office. |
| DEC. 27-29 | In-Person Registration for former students not in residence Autumn Quarter, 1960. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 9.</i> |
| DEC. 2 | Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission. |
| DEC. 20 | Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years. |
| DEC. 27-29 | In-Person Registration for ALL new students. |
| DEC. 29 | Last day to register for Winter Quarter, 1961. Note application deadlines above. |
| JAN. 3-9 | Change of registration by appointment only. |

SPRING QUARTER, 1961

REGISTRATION PERIOD

- | | |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| JAN. 23-FEB. 17 | Advance Registration only for students in residence Winter Quarter, 1961. A service fee of \$15.00 will be assessed any student eligible for Advance Registration |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|

	who fails to participate and then applies for In-Person Registration for that quarter.
MAR. 21-23	In-Person Registration for students in residence Winter Quarter, 1961, who did not complete Spring Quarter, 1961, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
MAR. 21-23	In-Person Registration for former students not in residence Winter Quarter, 1961. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is March 10.</i>
MAR. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
MAR. 15	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
MAR. 21-23	In-Person Registration for ALL New students.
MAR. 23	Last day to register for Spring Quarter, 1961. Note application deadlines above.
MAR. 27-31	Change of registration by appointment only.

ACADEMIC PERIOD

MAR. 27—MONDAY	Instruction begins for all students
MAR. 31—FRIDAY	Last day to add a course
MAY 12—FRIDAY	Last day to submit applications for advanced credit examinations
MAY 27—SATURDAY	Advanced credit examinations
MAY 30—TUESDAY	Memorial Day holiday
JUNE 4—SUNDAY	Baccalaureate Sunday
JUNE 2-8	Final examinations
JUNE 8—THURSDAY	Quarter ends
JUNE 10—SATURDAY	Commencement

SUMMER QUARTER, 1961**REGISTRATION PERIOD**

General In-Person for ALL students (*by appointment only*):

June 1, 2, 5
June 12-16

Registration may be delayed if new student Applications for Admission or former student Applications for Appointment or Permit to register are received after May 15.

Students in the Schools of Law, Dentistry, Medicine, Social Work, and the Hos-

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

pital Division of the School of Nursing must file an Application for Registration Permit, although no appointment date is necessary.

Registration Appointments or Permits will be issued as follows:

Students in residence Spring Quarter, 1961:

Registration Appointments or Permits to register will be issued according to class, *only upon presentation of ASUW card in person*, at the Registrar's Office as follows:

Seniors and Graduates.....	Monday, April 17, 8 a.m. to 5 p.m.
Juniors	Tuesday, April 18, 8 a.m. to 5 p.m.
Sophomores	Wednesday, April 19, 8 a.m. to 5 p.m.
Freshmen	Thursday, April 20, 8 a.m. to 5 p.m.

Former Students not in residence Spring Quarter 1961, may obtain an Application for Appointment or Permit by writing to, or calling in person, at the Registrar's Office, Room 109, Administration Building, or telephoning LAkeview 4-6000, Extension 2551, beginning April 17 and preferably *no later than May 15*. Application for Registration Appointment must be received before registration materials can be processed. *New (entering) Students* will receive Registration Appointments with their Official Notice of Admission.

ACADEMIC PERIOD

JUNE 19—MONDAY	Instruction begins
JUNE 20—TUESDAY	Last day to add a course for the first term
JUNE 23—FRIDAY	Last day to add a course for the full quarter
JUNE 30—FRIDAY	Last day to submit applications for advanced credit examinations for first term
JULY 4—TUESDAY	Independence Day holiday
JULY 15—SATURDAY	Advanced credit examinations
JULY 19—WEDNESDAY	Final examinations and first term end
JULY 20—THURSDAY	Second term begins
JULY 21—FRIDAY	Last day to add a course for the second term
JULY 28—FRIDAY	Last day to submit applications for advanced credit examinations for second term
AUG. 12—SATURDAY	Advanced credit examinations
AUG. 18—FRIDAY	Final examinations and second term end

AUTUMN QUARTER, 1961

REGISTRATION PERIOD

MAY 1-26	Advance Registration only for students in residence Spring Quarter, 1961. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 5-22	In-Person Registration for students in residence Spring Quarter, 1961, who did not complete Autumn Quarter, 1961, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
SEPT. 5-22	In-Person Registration for former students not in residence Spring Quarter, 1961. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is September 15.</i>

AUG. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
SEPT. 1	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
SEPT. 7-22	In-Person Registration for ALL new students.
SEPT. 22	Last day to register for Autumn Quarter, 1961. Note application deadlines.
SEPT. 25-29	Change of registration by appointment only.

ACADEMIC PERIOD

SEPT. 25—MONDAY	Instruction begins for all students
SEPT. 29—FRIDAY	Last day to add a course
NOV. 1—WEDNESDAY	Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1962, due at Registrar's Office
NOV. 11—SATURDAY	State Admission Day holiday
NOV. 17—FRIDAY	Last day to submit applications for advanced credit examinations
NOV. 22-27	Thanksgiving recess (6 p.m. to 8 a.m.)
DEC. 2—SATURDAY	Advanced credit examinations
DEC. 6-12	Final examinations
DEC. 12—TUESDAY	Quarter ends

WINTER QUARTER, 1962**REGISTRATION PERIOD**

OCT. 23-Nov. 17	Advance Registration only for students in residence Autumn Quarter, 1961. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
DEC. 26-28	In-Person Registration for students in residence Autumn Quarter, 1961, who did not complete Winter Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
DEC. 26-28	In-Person Registration for former students not in residence Autumn Quarter, 1961. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 8.</i>
DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

DEC. 20	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
DEC. 26-28	In-Person Registration for ALL new students.
DEC. 28	Last day to register for Winter Quarter, 1962. Note application deadlines above.
JAN. 2-8	Change of registration by appointment only.

ACADEMIC PERIOD

JAN. 2—TUESDAY	Instruction begins for all students
JAN. 8—MONDAY	Last day to add a course
FEB. 16—FRIDAY	Last day to submit applications for advanced credit examinations
FEB. 22—THURSDAY	Washington's Birthday and Founder's Day holiday
MAR. 3—SATURDAY	Advanced credit examinations
MAR. 9-15	Final examinations
MAR. 15—THURSDAY	Quarter ends

SPRING QUARTER, 1962**REGISTRATION PERIOD**

JAN. 22-FEB. 16	Advance Registration only for students in residence Winter Quarter, 1962. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
MAR. 20-22	In-Person Registration for students in residence Winter Quarter, 1962, who did not complete Spring Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
MAR. 20-22	In-Person Registration for former students not in residence Winter Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is March 9.</i>
MAR. 1	Deadline for ALL new students to submit Applications for admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
MAR. 15	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
MAR. 20-22	In-Person Registration for ALL new students.
MAR. 22	Last day to register for Spring Quarter, 1962. Note application deadlines above.
MAR. 26-30	Change of registration by appointment only.

ACADEMIC PERIOD

MAR. 26—MONDAY	Instruction begins for all students
MAR. 30—FRIDAY	Last day to add a course
MAY 11—FRIDAY	Last day to submit applications for advanced credit examinations

MAY 26—SATURDAY	Advanced credit examinations
MAY 30—WEDNESDAY	Memorial Day holiday
JUNE 3—SUNDAY	Baccalaureate Sunday
JUNE 1-7	Final examinations
JUNE 7—THURSDAY	Quarter ends
JUNE 9—SATURDAY	Commencement

SUMMER QUARTER, 1962

REGISTRATION PERIOD

General In-Person Registration for ALL students (*by appointment only*):

May 31-June 2, 4
June 11-15

Registration may be delayed if new student Applications for Admission or former student Applications for Appointment or Permit to register are received after May 15.

Students in the Schools of Law, Dentistry, Medicine, Social Work, and the Hospital Division of the School of Nursing must file an Application for Registration Permit, although no appointment date is necessary.

Registration Appointments or Permits will be issued as follows:

Students in residence Spring Quarter, 1961:

Registration Appointments or Permits to register will be issued according to class, *only upon presentation of ASUW card in person*, at the Registrar's Office as follows:

Seniors and Graduates.....	Monday, April 16, 8 a.m. to 5 p.m.
Juniors	Tuesday, April 17, 8 a.m. to 5 p.m.
Sophomores	Wednesday, April 18, 8 a.m. to 5 p.m.
Freshmen	Thursday, April 19, 8 a.m. to 5 p.m.

Former Students not in residence Spring Quarter, 1962, may obtain an Application for Appointment or Permit by writing to, or calling in person at the Registrar's Office, Room 109, Administration Building, or telephoning LAkeview 4-6000, Extension 2551, beginning April 17 and preferably *no later than May 15*. Application for Registration Appointment must be received before registration materials can be processed. *New (entering) Students* will be mailed Registration Appointments with their Official Notice of Admission.

ACADEMIC PERIOD

JUNE 18—MONDAY	Instruction begins for all students
JUNE 19—TUESDAY	Last day to add a course for the first term
JUNE 22—FRIDAY	Last day to add a course for the full quarter
JUNE 29—FRIDAY	Last day to submit applications for advanced credit examinations for first term
JULY 4—WEDNESDAY	Independence Day holiday
JULY 14—SATURDAY	Advanced credit examinations
JULY 18—WEDNESDAY	Final examinations and first term end
JULY 19—THURSDAY	Second term begins
JULY 20—FRIDAY	Last day to add a course for the second term
JULY 27—FRIDAY	Last day to submit applications for advanced credit examinations for second term

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

AUG. 11—SATURDAY	Advanced credit examinations
AUG. 17—FRIDAY	Final examinations and second term end

AUTUMN QUARTER, 1962

REGISTRATION PERIOD

APR. 30-MAY 25	Advance Registration only for students in residence Spring Quarter, 1962. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 10-28	In-Person Registration for students in residence Spring Quarter, 1962, who did not complete Autumn Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
SEPT. 10-28	In-Person Registration for former students not in residence Spring Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is September 1.</i>
JULY 15	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointments will be mailed with Official Notice of Admission.
SEPT. 1	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
SEPT. 12-28	In-Person Registration for ALL new students.
SEPT. 28	Last day to register for Autumn Quarter, 1962. Note application deadlines.
OCT. 1-5	Change of registration by appointment only.

ACADEMIC PERIOD

OCT. 1—MONDAY	Instruction begins for all students
OCT. 5—FRIDAY	Last day to add a course
NOV. 1—THURSDAY	Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1963, due at Registrar's Office
NOV. 12—MONDAY	State Admission Day holiday
NOV. 21—WEDNESDAY	Last day to submit applications for advanced credit examinations
NOV. 21-26	Thanksgiving recess (6 p.m. to 8 a.m.)
DEC. 8—SATURDAY	Advanced credit examinations
DEC. 12-18	Final examinations
DEC. 18—TUESDAY	Quarter ends

WINTER QUARTER, 1963

REGISTRATION PERIOD

OCT. 29-Nov. 27	Advance Registration only for students in residence Autumn Quarter, 1962. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
-----------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

JAN. 2-4	In-Person Registration for students in residence Autumn Quarter, 1962, who did not complete Winter Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
JAN. 2-4	In-Person Registration for former students not in residence Autumn Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 1.</i>
DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
DEC. 20	Deadline for return to Student Health Center of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
JAN. 2-4	In-Person Registration for ALL new students.
JAN. 4	Last day to register for Winter Quarter, 1963. Note application deadlines.
JAN. 7-11	Change of registration by appointment only.

ACADEMIC PERIOD

JAN. 7—MONDAY	Instruction begins for all students
JAN. 11—FRIDAY	Last day to add a course
FEB. 21—THURSDAY	Last day to submit applications for advanced credit examinations
FEB. 22—FRIDAY	Washington's Birthday and Founder's Day holiday
MAR. 9—SATURDAY	Advanced credit examinations
MAR. 15-21	Final examinations
MAR. 21—THURSDAY	Quarter ends

For further information concerning subsequent quarters inquire at the Registrar's Office.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered in the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

ADMINISTRATION

BOARD OF REGENTS

JOSEPH DRUMHELLER, <i>President</i>	Spokane
MRS. A. SCOTT BULLITT, <i>Vice-President</i>	Seattle
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
ALBERT B. MURPHY	Everett
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima

HELEN E. HOAGLAND, *Secretary*

OFFICERS OF ADMINISTRATION

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
FREDERICK P. THIEME, Ph.D.	<i>Provost of the University</i>
GLENN H. LEGGETT, Ph.D.	<i>Vice-Provost of the University</i>
ETHELYN TONER, B.A.	<i>Registrar</i>
HAROLD A. ADAMS, M.S.	<i>Director of Admissions</i>
DONALD K. ANDERSON, B.A.	<i>Dean of Students</i>
JACK E. ORR, Ph.D.	<i>Dean of the College of Pharmacy</i>
LOUIS FISCHER, Ph.D.	<i>Associate Dean of the College of Pharmacy</i>
FOREST J. GOODRICH, Ph.D.	<i>Dean Emeritus of the College of Pharmacy</i>

BOARD OF HEALTH SCIENCES

CHARLES E. ODEGAARD, Ph.D.	<i>President of the University</i>
GEORGE N. AAGAARD, M.D.	<i>Dean of the School of Medicine; Chairman of the Board</i>
PAUL C. CROSS, Ph.D.	<i>Professor of Chemistry; Executive Officer of the Department of Chemistry</i>
J. THOMAS GRAYSTON	<i>Professor and Executive Officer of Public Health and Preventive Medicine</i>
MAURICE J. HICKEY, M.D., D.M.D.	<i>Dean of the School of Dentistry</i>
SOLOMON KATZ, Ph.D.	<i>Dean of the College of Arts and Sciences</i>
JOSEPH L. MCCARTHY, Ph.D.	<i>Dean of the Graduate School</i>
JACK E. ORR, Ph.D.	<i>Dean of the College of Pharmacy</i>
MARY S. TSCHUDIN, R.N., M.S.	<i>Dean of the School of Nursing</i>

MARY ADAMS, *Secretary*

FACULTY AND STAFF, COLLEGE OF PHARMACY

The first date following a name indicates the beginning of service in the University. When two dates are given, the second, in parentheses, is the date of promotion to present academic rank.

- BRADY, LYNN R., 1959, *Assistant Professor of Pharmacognosy*
B.S., 1955, M.S., 1957, Nebraska; Ph.D., 1959, Washington
- FISCHER, LOUIS, 1926 (1945), *Professor of Pharmaceutical Chemistry; Associate Dean; Chairman of the Department of Pharmaceutical Chemistry*
B.S., 1926, Ph.C., 1926, M.S., 1928, Ph.D., 1933, Washington

- GOODRICH, FOREST J., 1914 (1959), *Professor Emeritus of Pharmacognosy; Dean Emeritus, College of Pharmacy*
Ph.C., 1913, B.S., 1914, M.S., 1917, Ph.D., 1927, Washington
- HALL, NATHAN A., 1952 (1956), *Associate Professor of Pharmacy*
B.S., 1939, Ph.D., 1948, Washington
- HAMMARLUND, E. ROY, 1960, *Associate Professor of Pharmacy*
B.S., 1944, M.S., 1949, Ph.D., 1951, Washington
- HUITRIC, ALAIN C., 1955 (1960), *Associate Professor of Pharmaceutical Chemistry*
B.S., 1950, Loyola; M.S., 1952, Ph.D., 1954, California
- KRUPSKI, EDWARD, 1944 (1955), *Associate Professor of Pharmaceutical Chemistry*
B.S., 1939, M.S., 1941, Ph.D., 1949, Washington
- MCCARTHY, WALTER C., 1949 (1957), *Associate Professor of Pharmaceutical Chemistry*
B.S., 1943, Massachusetts Institute of Technology; Ph.D., 1949, Indiana
- ORR, JACK E., 1956, *Professor of Pharmacy; Dean of the College of Pharmacy; State Chemist*
B.S., 1940, Purdue; Ph.D., 1943, Wisconsin
- PLEIN, ELMER M., 1938 (1951), *Professor of Pharmacy; Coordinator of Pharmaceutical Services*
Ph.C., 1929, B.S., 1929, M.S., 1931, Ph.D., 1936, Colorado
- RISING, L. WAIT, 1934 (1936), *Professor of Pharmacy; Chairman of the Department of Pharmacy and Pharmacy Administration; Coordinator of Pharmacy Extension Services*
Ph.G., 1924, B.S., 1924, Oregon State; M.S., 1926, Ph.C., 1928, Ph.D., 1929, Washington
- TYLER, VARRO E., JR., 1957, *Associate Professor of Pharmacognosy; Chairman of the Department of Pharmacognosy; Director of the Drug Plant Gardens*
B.S., 1949, Nebraska; M.S., 1951, Ph.D., 1953, Connecticut

Research Appointments

- BENEDICT, ROBERT G., 1960, *Research Assistant Professor of Pharmacognosy*
B.S., 1936, Michigan State; M.S., 1938, Virginia Polytechnic; Ph.D., 1942, Wisconsin
- GROEGER, DETLEF O., 1961, *Research Instructor in Pharmacognosy*
Dr. Rer. Nat., 1957, Martin Luther University, Halle

Clinical Appointments

- BREEN, PAUL E., 1961, *Clinical Instructor in Pharmacy; Chief Pharmacist, Veterans Administration Hospital*
B.S., 1941, Washington
- BUTTON, JAMES F., 1961, *Clinical Instructor in Pharmacy; Chief Pharmacist, Virginia Mason Hospital*
Ph.G., 1926, Washington State
- CARRATO, CARMEN A., 1961, *Clinical Instructor in Pharmacy; Chief, Pharmaceutical Service, U.S. Public Health Service Hospital*
B.S., 1940, M.S., 1947, Philadelphia College of Pharmacy
- ELLIOT, ELIZABETH, 1961, *Clinical Instructor in Pharmacy; Chief Pharmacist, Maynard Hospital*
B.S., 1940, Washington
- GALLENBERGER, DONALD M., 1960, *Clinical Instructor in Pharmacy; Chief Pharmacist, Student Health Service (Hall Health Center)*
B.S., 1948, B.S., 1952, Wisconsin
- HORIUCHI, ARTHUR W., 1961, *Clinical Instructor in Pharmacy; Chief Pharmacist, King County Hospital*
B.S., 1954, Washington
- KNIGHT, WILFRED T., 1961, *Clinical Instructor in Pharmacy; Chief Pharmacist, The Doctors Hospital*
B.S., 1944, Washington

MARSHALL, RICHARD L., 1961, *Clinical Instructor in Pharmacy; Director of Pharmacy, Children's Orthopedic Hospital*
B.S., 1951, Washington

SISTER ODILE, 1961, *Clinical Instructor in Pharmacy; Chief Pharmacist, Providence Hospital*
B.S., 1943, Seattle

TANIGUCHI, THEODORE, 1958, *Clinical Instructor in Pharmacy; Director of Hospital Pharmacy Service, University Hospital*
B.S., 1949, Washington; M.S., 1951, Michigan

TRUBSHAW, MARY, 1961, *Clinical Instructor in Pharmacy; Chief Pharmacist, Firland Sanatorium*
B.S., 1938, Oregon State

HAMMOND, MABEL, *Administrative Secretary*

JUE, WILLARD G., *Supervisor, Drug Plant Gardens*

MCCLURE, MARGARET A., B.A., *Pharmacy Library Clerk*

ROTH, WILLIAM, Ph.D., *Assistant State Chemist*

WESLEY, RICHARD G., *Stockroom Manager*

GENERAL INFORMATION

GENERAL INFORMATION

The College of Pharmacy of the University of Washington was founded by the Board of Regents in July, 1894, and instruction was begun that autumn. The first year of instruction was given on the old campus in what was known as the "metropolitan section" of Seattle, before the University was moved, during the summer of 1895, to its present campus between Lake Washington and Lake Union. A four-year curriculum leading to a bachelor's degree was established in 1904 and the present five-year curriculum was adopted in 1957. Graduate work was begun in 1912, with advanced study in preparation for the master's degree. Since 1925 the College has accepted candidates for the degree of Doctor of Philosophy with specialization in pharmaceutical chemistry, pharmacognosy, and pharmacy.

The College of Pharmacy is accredited by the American Council on Pharmaceutical Education. It is a member of the American Association of Colleges of Pharmacy.

THE OBJECTIVES OF THE COLLEGE OF PHARMACY

The objectives of the College of Pharmacy are twofold: (1) The preparation for professional service of men and women who are academically and technically proficient in the basic sciences and their pharmaceutical applications, and who are educated in the liberal arts so that they may enjoy their cultural heritage and contribute to the betterment of society. (2) The advancement of knowledge, professional practice, and service through research.

DIVISION OF HEALTH SCIENCES

The College of Pharmacy is a member of the Division of Health Sciences which was established in 1945. Included are the Schools of Dentistry, Medicine, and Nursing, the Student Health Service, and the University Hospital.

Each part of the Division of Health Sciences functions as an autonomous unit. The Division coordinates development, research, and teaching activities to strengthen and reinforce the work of each unit. For example, the Basic Sciences

departments meet the needs of the whole Division and of other departments of the University which are concerned with work in anatomy, biochemistry, microbiology, pathology, pharmacology, physiology and biophysics, and public health and preventive medicine.

The Health Sciences Building overlooks the Portage Bay Yacht Basin between Lake Washington and Lake Union. It houses the Schools of Dentistry, Medicine, and Nursing, the 320-bed University Hospital, and the Samuels Research Wing. Future plans include a west wing to house the College of Pharmacy. When this unit is completed, the University will have one of the finest Health Sciences units in the United States.

COLLEGE FACILITIES

Instruction in pharmacy is centered in Bagley Hall, which houses pharmacy, chemistry, and chemical engineering. This building was completed in 1937 and was named for one of the founders of the University, Rev. Daniel Bagley.

Among the College of Pharmacy facilities in Bagley Hall are laboratories for pharmacy, prescription practice, manufacturing pharmacy, pharmaceutical chemistry, pharmacognosy, drug assaying, and research; a branch library; a drug service department; and a stockroom.

CLINICAL TRAINING PHARMACIES

The University Hospital Pharmacy and the Student Health Center Pharmacy serve as clinical training facilities for the College. Senior students are assigned on a regular schedule to these pharmacies where they gain practical experience in compounding and dispensing prescriptions under the direction of staff pharmacists. The University Hospital Pharmacy and about ten other hospital pharmacies in Seattle serve as laboratories for the undergraduate and graduate programs in hospital pharmacy. The programs are directed by the Coordinator of Pharmaceutical Services, and laboratory instruction is given by the hospitals' chief pharmacists who hold the University rank of Clinical Instructors in Hospital Pharmacy.

DRUG PLANT GARDENS AND LABORATORY

The Drug Plant Gardens of the College comprise approximately three acres of garden area, including a laboratory building that contains five greenhouses; three research laboratories; drug drying, milling, and extraction equipment; a darkroom, and a preparation room. Several hundred species of pharmaceutically important plants are maintained in the gardens and greenhouses. One greenhouse is devoted to plants of tropical habitat; others are used for student instruction in methods of drug plant culture and for research in plant-growth regulators and the biosynthesis of plant constituents. An extensive seed exchange program is conducted with medicinal plant gardens throughout the entire world.

DRUG SERVICE DEPARTMENT

The drug service department manufactures specialized pharmaceutical preparations for the Schools of Medicine and Dentistry, the Student Health Service (Hall Health Center), the University Hospital, and other sections of the University. Much of the work done by this department is in formulation and product development of drugs and dosage forms to be used in clinical and experimental research.

STATE LABORATORY

The College maintains a laboratory for the analysis of food products submitted by the Office of the Director of the State Department of Agriculture, drugs submitted by the State Pharmacy Board, and alcoholic products for the State Liquor Control Board. The Dean of the College is the State Chemist.

ADMISSION TO THE UNIVERSITY

PRELIMINARY STATEMENTS

The Board of Admissions, which is appointed by the President, is responsible for the interpretation and administration of the regulations governing admission to the University.

The University recognizes high school diplomas, college credits presented for advanced standing, and college degrees earned in the following institutions: (1) high schools accredited by the Washington State Department of Public Instruction; (2) out-of-state high schools accredited by their state university and state department of public instruction, or by the regional accrediting association of the area; (3) colleges and universities accredited by their regional accrediting association.

Resident. Defined for purposes of admission and/or assessment of fees as an individual who has been domiciled in the state of Washington for one year immediately prior to his registration. The domicile of a minor is that of his parents or his legal guardian.

Nonresident. An applicant whose credentials are received from a school or college located outside the state of Washington. An applicant who believes himself eligible for resident status may apply for reclassification through the Office of Residence Classification which has final authority in determining such status.

Qualified Student. One whose scholastic standing and preparation meet the standards for admission to the University.

Regular Student. One who fulfills the following requirements: (1) has been granted unqualified admission to a college or school of the University; (2) whose current program of studies is satisfactory to the dean of his college or school; (3) has received medical clearance from the Student Health Service and has completed all of the required steps for registration, including the payment of tuition and fees, the filing of class cards, and the depositing of registration materials at Sections.

Grade-point averages. These are based on a four-point system in which A=4, B=3, C=2, D=1, E=0. An adjustment to this system is made as necessary in the computation of grade-point averages earned at other institutions.

ELIGIBILITY FOR ADMISSION WITH FRESHMAN STANDING

(Applicable to Residents of the State of Washington)

Undergraduate programs offered by the University lead to the baccalaureate degree; students, therefore, are admitted when, in the judgment of the University, they appear qualified to pursue a degree program with a reasonable probability of success. In making this judgment, the University's Board of Admissions considers the applicant's total record, including such factors as scholastic achievement in a college preparatory program, recommendations of the high school principal or counselor, rank in class, and scores on any nationally administered tests associated with college entrance.

Scholastic achievement is measured largely in terms of the criteria listed below. All students entering the University are expected to meet these criteria. Non-residents and students who enter with advanced standing will find additional admission criteria in subsequent sections.

SCHOLASTIC CRITERIA

1. Graduation with diploma from an accredited high school.
2. Achievement of an over-all high school grade-point average of at least 2.50 in courses completed after September, 1960, and a grade-point average of at least 2.00 in courses completed prior to September, 1960.
3. Completion of a college preparatory program of at least 16 units to include the following:

- | | |
|--------------------------------------|------------------|
| a. English | at least 3 units |
| b. One foreign language | at least 2 units |
| c. College preparatory mathematics | at least 2 units |
| d. One laboratory science | at least 1 unit |
| e. Social science | at least 2 units |
| f. Electives from the above subjects | at least 2 units |

Additional electives may be chosen from any subjects acceptable for high school graduation.

To insure normal progress in the pharmacy program, students must complete, while in high school, three semesters of algebra and two semesters of plane geometry. Although not required, one semester of trigonometry, a fourth semester of algebra, an additional unit of laboratory science, and typing are strongly recommended.

Because an appropriate choice of high school electives serves to strengthen a student's preparation, the University will give this part of a student's record the same careful attention it gives to other aspects of his qualifications.

ELIGIBILITY FOR ADMISSION WITH ADVANCED STANDING

(Applicable to Residents of the State of Washington)

A qualified student in good standing at an accredited institution may apply for admission with advanced standing. Such an applicant is expected to have the same high school preparation as the student who enters as a freshman, and to have a college grade-point average which meets the standards herein specified.

With fewer than 45 acceptable credits, an applicant must present a grade-point average of 2.50 in high school work completed after September, 1960; a 2.00 grade-point average in such work completed prior to this date; and a 2.00 cumulative average in all college work.

With 45 or more acceptable credits an applicant is expected to present a cumulative and last-term grade-point average of at least 2.00. See also section on transfer of advanced credit, page 21.

ADMISSION OF NONRESIDENTS TO UNDERGRADUATE STANDING

Applications from nonresidents will be considered, but first preference is given legal residents of the state of Washington, and sons and daughters of University of Washington alumni residing outside the state.

Nonresident applicants are selected on the basis of their preparation and scholastic standing. In general, a freshman applicant must be eligible to enter the university of his own state, and satisfy the foregoing scholastic criteria with a 3.00 (B) grade-point average or place in the upper 25 per cent of his graduating class.

An applicant for admission with advanced standing with fewer than 45 college credits must have a cumulative grade-point average of at least 3.00 in standard college courses as well as a high school grade-point average of at least 3.00 or have been in the upper fourth of his class. An applicant presenting more than 45 credits for advanced standing must present a 2.70 grade-point average in standard college courses.

Sons and daughters of University of Washington alumni are admitted according to resident standards but are required to pay the regular nonresident tuition fees. Applicants for admission to curricula in which the University serves on a regional basis will be accorded special consideration by the Board of Admissions.

ADMISSION OF SPECIAL STUDENTS AND AUDITORS

Non-high school graduates who are 21 or older and legal residents of Washington may apply to the Board of Admissions for admission with special standing. With their application they must submit all available records of secondary school and college study. Special students may register in and take for credit whatever courses the dean of the college permits, but may not participate in student

activities or receive degrees. By fulfilling conditions specified by the Board of Admissions, special students may change their status to that of regular students and may receive degrees.

Persons 21 or older may register as auditors in nonlaboratory courses or the lecture sessions of laboratory courses by obtaining the consent of the dean of the college and the instructors of the courses. Auditors do not participate in class discussion or laboratory work. They may receive credit for audited courses only by enrolling in them as regular students in a subsequent quarter.

ADMISSION OF FOREIGN STUDENTS AND STUDENTS EDUCATED ABROAD

Applicants for admission with graduate or advanced undergraduate standing are expected to meet the same general requirements as nonresidents of Washington educated in American schools. However, they must file their credentials before March 1 to be considered for admission Autumn Quarter or six months before the opening of another quarter in which they may wish to enroll. In addition, they must demonstrate a satisfactory command of the English language.

The official record of the Canadian student is the matriculation certificate or university admission certificate of his province. Canadian and foreign students who have been in University attendance must have official transcripts forwarded as required of all students. High School graduates and university transfer students must meet the scholarship requirements for nonresident students. See page 19.

ADMISSION OF VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Applications for and questions about government aid should be addressed to the Veterans Division Regional Office. See pages 23 and 24.

ADMISSION OF UNDERGRADUATE STUDENTS WHO DO NOT MEET THE ADMISSIONS STANDARDS

An applicant whose preparation and previous scholarship does not clearly qualify him for admission may submit additional evidence in support of his application. This may include scores on nationally recognized tests of scholastic aptitude or achievement; letters from school administrators, teachers or counselors; and other information which may assist the Board of Admissions in evaluating his probability of success in the University.

Students admitted by special action of the Board of Admissions will be expected to achieve and maintain a satisfactory scholastic average in their University work and to fulfill any conditions specified by the Board at the time of their admission.

A student thus admitted on probation will be subject to scholarship rules given on pages 19 and 20. Furthermore, he may not (1) be pledged or initiated into a fraternity or sorority, or engage in those other student activities in which his right to participate is restricted by the regulations of the Committee on Student Welfare; (2) engage in those athletic activities in which his right to participate is restricted by regulations of the University Intercollegiate Athletics Committee.

ADMISSION TO THE GRADUATE SCHOOL

Basic requirements for admission to the Graduate School are a bachelor's degree from an institution of recognized standing, a grade-point average of 3.00 in the senior year of college work, approval of the Graduate School, and approval of the department in which the work is to be taken. For complete information, see the *Graduate School Bulletin*.

TRANSFER OF ADVANCED CREDIT FROM OTHER INSTITUTIONS

The Board of Admissions reserves the right to determine the exact amount of transfer credit to be accepted.

1. The advanced standing for which an applicant's training appears to fit him is granted tentatively on admission. Definite advanced standing is not determined

before the end of the student's first quarter in the University. The maximum that may be accepted from other colleges and universities is 135 quarter credits or senior standing. Transfer credit will not be allowed in the senior year.

2. Transfer credits will be accepted for upper-division credit *only* when earned at an accredited four-year degree-granting institution.

3. Transfer credits from institutions accredited for less than four years will not be accepted in excess of the accreditation of the school concerned.

4. Transfer of junior college credit shall apply on the University freshman and sophomore years only. A student who has completed a portion of his freshman and/or sophomore years in a four-year college may not transfer junior college credit in excess of that necessary to completion of the first two years in the University. In no case shall the transfer of junior college credit to the University exceed 90 quarter credits exclusive of physical education activity credits.

5. The maximum number of credits obtainable by acceptance of Armed Forces training schools credits will be 30. All such credits will be counted as extension credits and will be included in the 90-credit maximum allowed toward the bachelor's degree, but none will apply toward the work of the senior year.

6. A maximum of 45 credits earned in extension and correspondence courses at other institutions may be transferred, but none of the credits can apply in the senior year. Extension and correspondence credits from schools that are not members of the National University Extension Association are accepted only after examination.

7. Credits earned in evening and extension classes or correspondence courses at this University are accepted after the student has satisfactorily completed 35 credits of work in residence (that is, registered in regular University classes). A maximum of 90 extension and/or correspondence credits is acceptable; the 90 credits may include the 45 extension and/or correspondence credits allowable from other institutions or may consist entirely of courses taken in this University's Division of Evening Classes or Division of Correspondence Study. All credits earned in advanced-credit examinations and all acceptable Armed Forces training schools credits must be counted in the 90 extension credit maximum. Up to ten evening class or correspondence course credits from this University can apply toward the work of the senior year.

8. For work done in unaccredited institutions, extended secondary programs in institutions whose standing is unknown, and for work with private teachers, University credit is granted only after examination. Applications for advanced-credit examinations must be filed during the first quarter in residence.

9. No credit will be granted for courses taken in another college while the student is in residence at the University, unless written permission to register for such courses is obtained by the student from the University department giving such instruction in the subject, from his major department, and from the dean of his college. The prescribed written permission is effective only if obtained before registration. Nothing in this rule makes mandatory the granting of any credit by the University.

ADMISSIONS PROCEDURE

Requests for Application for Admission forms and correspondence regarding admission to any college or school of the University should be addressed to the Office of Admissions, University of Washington, Seattle 5, Washington. Graduates of high schools in the state of Washington may obtain this form from their principals.

Applications and required transcripts must be filed with the Office of Admissions prior to the following dates in order to be assured of consideration for admission to the quarter for which application is being made: August 1 for Autumn Quarter, 1961, July 15 for subsequent Autumn Quarters; December 1 for Winter Quarter; March 1 for Spring Quarter; May 15 for Summer Quarter.

All records become a part of the official file and can neither be returned nor duplicated for any purpose. Failure to submit complete credentials will be considered a serious breach of honor, and may result in permanent dismissal from the University.

A leaflet giving general information and instructions for registration is mailed with the Notice of Admission. In the event of a discrepancy, instructions in the leaflet supersede those found in earlier publications. *The University assumes no responsibility for applicants who come to the campus before they have been officially notified of their admission.*

The admissions credentials of applicants who do not register for the quarter to which they have been admitted are normally retained in the Office of Admissions for a period of one year from the date of application. At the end of this period, credentials on file are discarded unless the applicant has notified the Office of his continued interest in attending the University or of his enrollment in the Evening Classes program. Should a student wish to renew his application after the one-year lapse, he must submit new credentials in advance of the date given above for the quarter desired.

FOR FRESHMAN STANDING

An application form, obtained from the University's Office of Admissions or from a Washington high school, should be completed according to instructions appearing on the form and returned to the Office of Admissions. Pages two and three of the same form should be given to the applicant's high school principal with the request that the scholastic record be entered and forwarded to the University's Office of Admissions as soon as possible.

Students may apply through their high schools on completion of the first semester of the senior year. Those who are qualified will be issued notices of early or conditional admission which become valid on graduation with a grade-point average of no less than 2.50 for the final semester. Others also will be notified of their admission status.

Scores on a nationally administered college aptitude test are not required. However, they may be helpful in evaluating a borderline student's probability of success.

FOR ADVANCED UNDERGRADUATE STANDING

An application form, obtained from the University's Office of Admissions or from a Washington junior college should be completed according to instructions appearing on the form and sent to the Office of Admissions. In addition, the applicant should request the principal of his high school and the registrar of each college he has attended to forward an official transcript of his record to the University's Office of Admissions. When these credentials have been evaluated, the applicant will be notified of his admission status.

FOR GRADUATE STANDING

An application form, obtained from the University's Office of Admissions, should be completed according to instructions appearing on the form and returned to the Office of Admissions. In addition an applicant should request the registrar of each college or university in which he has been enrolled as an undergraduate or graduate student to forward *two* official transcripts to the University's Office of Admissions. When these credentials have been evaluated, the applicant will be notified of his admission status. The student will find it convenient to have an additional copy of the record for reference.

WORLD WAR I OR II VETERANS

Under certain conditions a veteran of World War I or II who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges. See page 31.

KOREAN VETERANS

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building. Educational allowance payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

Korean Certificate

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety Division Building as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established.

Quarter Credit Requirements (Public Law 550)

14 credits	Full subsistence
10 to 13 credits.....	Three-fourths subsistence
7 to 9 credits.....	One-half subsistence
6 credits or less.....	Established tuition and fees
	or credits $\div 14 \times \$110.00$, whichever is the lesser.

Graduate Credit Requirements (Public Law 550) 500-level courses or Above

9 credits	Full subsistence
7 to 8 credits	Three-fourths subsistence
5 to 6 credits	One-half subsistence
4 credits or less	Established tuition and fees
	or credits $\div 14 \times \$110.00$, whichever is the lesser.

If a graduate is combining 400-level courses with 500-level courses, he should consult with the Veterans Division, Safety Division Building, to determine the scale of pay.

Termination of Training

A veteran *eligible* under Public Law 550 must complete his training by *eight* years after his release from active service, or by January 31, 1965, whichever is earlier.

DISABLED VETERANS

A veteran with a disability under Public Law 894 should contact a training officer in the nearest Veterans Administration Office approximately four weeks prior to registration.

CHILDREN OF DECEASED VETERANS

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for a Program of Education issued to those eligible persons by the Veterans Administration is to be presented to the Veterans Division, Safety Division Building, on the date of registration.

REQUIRED TESTS AND EXAMINATIONS**Washington Pre-College Differential Guidance Test**

This grade prediction test is required of all entering freshmen, including those transferring to the University with fewer than 45 credits. It is also required of transfer students who have not completed courses which are equivalent to English 101 (English composition) or Humanistics-Social Studies 265 (Techniques of Communication). High school seniors are advised to arrange through their high schools to take this test in the spring when it is offered throughout the state of Washington. Nonresidents of Washington may take the test at the time of their registration according to instructions mailed with the notice of admission. Sample copies are not available. Special, foreign, blind students, and auditors are exempted.

The several parts of this test have been selected because of their proven value for the prediction of grades most likely to be earned by a student. The results of the test are used by departmental advisers as an aid in assigning students to appropriate sections in English composition and other subjects. Therefore, it is advisable that the student bring a copy of the results with him when he comes for his first conference with his counselor or adviser.

Mathematics Placement Tests

One section of the Pre-College Differential Guidance Test evaluates a student's mastery of intermediate algebra and plane geometry. A satisfactory score on this section qualifies a student to enroll in Mathematics 104 (trigonometry) or Mathematics 105 (college algebra). Those who fail to qualify and wish to proceed to the study of more advanced mathematics courses may choose one of the following alternative plans:

1. Pass Mathematics 101 and then take 104, or 105 or both. Mathematics 101 is given only through the Division of Evening classes or the Division of Correspondence Study. No credit is given for Mathematics 101 to students who have completed the third semester of high school algebra.
2. Pass Mathematics 103, in which the first four weeks are devoted to a review of intermediate algebra and the last six weeks to the study of plane trigonometry equivalent to Mathematics 104. The satisfactory completion of this course qualifies the student to enroll in Mathematics 105 (college algebra).

Students who have studied trigonometry, fourth semester algebra, mathematical analysis, or similar subjects in high school, will be placed in the next appropriate course at the University according to their scores in additional placement tests given by the Department of Mathematics. It is advisable to review before taking these examinations. This generally applies to students entering such fields as engineering, architecture and urban planning, fisheries, forestry, pharmacy, mathematics, and the physical and marine sciences.

Medical Examination

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions, and to returning former students by the Registrar. This examination, which is required before a student may register, is taken at the student's expense. A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on the campus.

MISCELLANEOUS INFORMATION

Junior High School Courses. The University recognizes college preparatory courses given in the junior high school and assigns them the same value as equivalent courses offered by the high school. Students who elect these subjects in the junior high may subsequently achieve a superior degree of competence in related subject areas in high school.

Accelerated, Honors, and Advanced Placement Courses. The University encourages qualified students to extend themselves academically by taking advantage of advanced, accelerated, and honors courses offered by their schools. The degree of achievement attained by students in selected areas may be measured by their performance in College Entrance Examination Board Advanced Placement Examinations and by other means which are described briefly in the following paragraphs.

The University of Washington endorses the Advanced Placement Program of the College Entrance Examination Board and grants placement and/or credit at the discretion of the University department concerned on the basis of scores earned in College Entrance Examination Board Advanced Placement Examinations. Successful participation in such challenging opportunities assures superior academic preparation and serves to identify those students more likely to profit from University-level honors courses.

REGISTRATION

REGULAR STUDENT

See page 19.

PROCEDURE

ALL students, currently in school, who plan to register for a succeeding quarter (Summer Quarter excepted) must register by Advance Registration and pay fees by the stated deadline. Students are held responsible for knowing and observing registration procedures, dates, and deadlines which appear in the bulletins, in "Official Notices" in the *Daily*, and on campus bulletin boards.

New students are given appointments when they are notified of admission, and they receive complete directions for registering at the time of registration.

Students expecting to return to the University after an absence of a quarter or more (excluding Summer Quarter) must register by In-Person Registration. The required registration appointment may be obtained by writing to or telephoning the Registrar's Office at the same time specified in the Calendar.

ADVISING

After notification of admission, and before registration, new students should visit or write to the College for assistance in planning their course program. Academic and other counseling of pharmacy students is under the direction of the Associate Dean of the College.

REGISTERED CREDITS ALLOWED EACH QUARTER

Except with the consent of his dean, no student may be registered for less than 12 credits (or the equivalent) or more than 16 credits (or the equivalent) or the number called for in the prescribed curricula, exclusive of physical education activity courses and lower-division military, naval, or air science courses. In no case may a student be registered for, or receive credit for more than 20 credits (or the equivalent) of work, exclusive of physical education activity courses and lower-division military, naval, or air science courses. Work taken in noncredit courses or to remove entrance deficiencies, or concurrently in extension classes, by correspondence study, or in another collegiate institution, must be included in the computation of the total registered credits allowed.

CHANGES OF REGISTRATION

After students have registered, they cannot change their schedules except with permission of the Dean or Associate Dean of the College. No student is permitted to make a registration change that involves entering a new course after the first calendar week of the quarter. After that time no student may register without the consent of the Dean or Associate Dean and the instructor whose class the student wishes to enter.

WITHDRAWAL FROM A COURSE

Official withdrawal from a course is made only under the following conditions: (1) during the first fifteen calendar days of a quarter, with the consent of the withdrawing student's adviser; (2) after the first fifteen calendar days of a quarter and before the end of the first six calendar weeks of a quarter, with the approval of the student's adviser, of the instructor of the course from which withdrawal is sought, and of the dean of the college in which the withdrawing student is enrolled; and (3) after the first six calendar weeks of a quarter and before final examination week, only upon certification in writing to the Registrar by the dean of the college in which the withdrawing student is enrolled that, in the judgment of the dean, withdrawal is necessitated by the student's hardship. Withdrawals from courses accomplished by any other method are unofficial withdrawals which are entered on a student's record as EW, and are assigned the value of E in the computation of a student's grade-point average. No official withdrawal may be made during final examination week.

Official withdrawals are entered on a student's record as follows: (1) a withdrawal within the first fifteen calendar days of a quarter, as W; (2) a withdrawal after the first fifteen calendar days of a quarter and before final examination week, as PW, if the student's work has been satisfactory, and as E, if the student's work has been unsatisfactory. Grades of PW and W are assigned no value in the computation of grade-point averages.

WITHDRAWAL FROM THE UNIVERSITY

The student should obtain at the office of the dean of his school or college the Request for Withdrawal From the University form. The same system of grading applies as that prescribed under Withdrawal From a Course.

QUALIFICATIONS FOR GRADUATION**MINIMUM SUBJECT REQUIREMENTS**

For graduation, students must have a cumulative average of 2.00 (C) in the professional pharmacy courses and an over-all average of 2.00 (C) in all courses. To register in any professional course numbered 499, students must have a cumulative average of not less than 2.50 (C+).

The College of Pharmacy requirement for graduation is completion of the prescribed pharmacy curriculum. No more than 18 quarter credits in advanced ROTC courses and no more than 6 credits in professional courses numbered 499 may be applied toward graduation.

Only students enrolled in the College may register for professional pharmacy courses unless written permission is obtained from the Dean and the instructor.

SCHOLARSHIP

Grade points per credit are awarded on the following basis: a grade of A earns 4 points; B, 3 points; C, 2 points; D, 1 point. The grade of E or EW signifies failure and the grade point is 0. The quarterly and cumulative grade-point averages are computed by multiplying the grade point received in a course by the total number of credits the course carries, totaling these values, and dividing by the total number of credits the student attempted. Courses for which any of the following symbols are recorded are not considered in determining the grade-point

average: I, N, S, W, PW, X. Grade-point averages are calculated on the basis of all grades received in courses which carry academic credit, including courses repeated. Grades received in repeated courses do not cancel or replace any other grades. Only University of Washington residence credits will be used in these computations.

Any undergraduate student who has completed three or more quarters in the University and whose cumulative grade-point average is below 2.00 shall be placed on academic probation. Any undergraduate student who has completed not more than two quarters at the University shall be placed on probation when his cumulative grade-point average is below 1.80. The dean of the school or college in which the student is enrolled shall notify the student as soon as possible that he is on probation. Such action will be noted permanently on the student's official academic record.

Academic probation is essentially a warning to the student that he must show improvement if he is to remain in the University. University regulations regarding scholastic eligibility for participation in intercollegiate athletics and other student activities shall be recommended to the Senate by the Faculty Committee on Intercollegiate Athletics and the Faculty Committee on Student Welfare respectively.

An undergraduate student on academic probation will be removed from probation at the end of any quarter in which his cumulative grade-point average reaches 2.00 or better.

Any undergraduate student on academic probation will be dropped: (1) if he fails to attain at least a 2.00 for the following quarter's work; or (2) if he fails to attain a 2.00 cumulative average at the end of the two subsequent quarters. Any student dropped under this rule will be notified in writing of this action by the dean of the school or college in which he is enrolled.

Only under exceptional circumstances will a student dropped under low scholarship rules be readmitted to the University. Such a student will be readmitted only at the discretion of the dean of the school or college to which he seeks admission. A student readmitted after being dropped under these rules will enter on academic probation. Such a student will be dropped: (1) if he fails to attain a 2.00 for the following quarter's work; or (2) if he fails to attain a 2.00 cumulative average at the end of two quarters. He will be removed from probation at the end of the quarter in which his cumulative grade-point average reaches 2.00 or better.

A senior who has completed the required number of credits for graduation but whose work in what would normally be his final quarter places him on probation will not receive a degree until he has been removed from probation. A senior who has completed the required number of credits for graduation but whose work in his last quarter results in his being dropped for low scholarship shall not receive a degree until he has been readmitted and removed from probation.

SENIOR-YEAR RESIDENCE

Senior standing is attained when 135 credits, plus the required quarters of ROTC and physical education, has been earned. Of the work of the senior year (45 credits), at least 35 credits must be earned in three quarters of residence. The remaining 10 credits may be earned either in residence or in this University's evening classes or correspondence courses.

MILITARY TRAINING

The Departments of Air Science, Military Science, and Naval Science conduct the ROTC programs under agreements between the University and the United States Air Force, Army, and Navy. At the University, these programs are coordinated by the Dean of the College of Engineering.

The University requires male students who enter the University as freshmen or sophomores to complete six quarters of military training. (For exemptions, see below). The two-year basic programs offered by the Departments of Air Science and Military Science and the four-year program offered by the Department of

Naval Science, satisfy this requirement. For a complete list of courses offered by these Departments, see the *Yearly Time Schedule*. In addition to the basic programs, the Department of Air Science and the Department of Military Science each offers for selected students an advanced program which leads to commissioning in the Air Force or the Army. The four-year program of the Department of Naval Science, also for selected students, leads to commissioning in the Navy or Marine Corps.

Students enrolling in Naval ROTC, and those who take the advanced program of Air Force or Army ROTC must agree in writing to complete the course of training and accept a commission in the service for which they are trained. *The honoring of this commitment is a condition of graduation from the University.*

The basic program of the Department of Air Science consists of three quarters of military classroom instruction on the Foundations of Air Power. These are offered in the spring quarter of the first year and the autumn and winter quarters of the second year. During each of the other three quarters, the student must substitute an approved University course in lieu of Air Science. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*. Leadership Laboratory is required each of the six quarters of the basic program and is conducted one hour each week.

The basic program (freshmen and sophomores) of the Department of Military Science requires drill one hour each week. Classroom military studies for freshmen are not required in the Autumn Quarter. One hour per week is required in the Winter Quarter, and two hours of classroom work are required in Spring Quarter. As a substitute for these classroom hours in Autumn Quarter of the freshman year, registration is required in a selected three-credit or five-credit course in another department. The list of courses which are authorized as substitute courses is printed in the *Yearly Time Schedule*. Sophomores are required to attend two hours per week of classroom military studies throughout the academic year.

Information concerning the Naval Science ROTC program can be found in the bulletins of the College of Arts and Sciences, the College of Business Administration, and the College of Engineering.

Exemptions from the military requirement are granted to:

1. Students who are twenty-three or over at the time of original entry into the University.
2. Students who enter as juniors or seniors.
3. Special students.
4. Students registered for 6 credits or less.
5. Students who are not citizens of the United States.
6. Students who, because of physical condition, are exempted by the University Health Officer.
7. Students who have equivalent military service. Complete or partial exemptions, depending on length of service, are granted for previous active service in the Armed Forces or Coast Guard.
8. Students who are active members or reserve officers of the Armed Forces or Coast Guard, or commissioned officers of the National Guard.
9. Students who are active enlisted members of the National Guard or of the Organized Reserve of the Armed Forces or Coast Guard.
10. Transfer students who present acceptable credit for military training taken in other colleges. The amount of exemption depends on the amount of previous training. Transfer students are required to take military training only for the number of quarters they need to achieve junior standing by a normal schedule.
11. Students who seek exemption on grounds other than specified above, and whose petitions for exemption are first processed by the Office of the Dean of Students, and then approved by the Dean of the College after consultation with the appropriate ROTC commander.

Those who are exempted under paragraph 5 or 11 must arrange at the time of initial entrance to substitute equivalent extra credits in other University courses to equal the number of credits they would have been required to earn in military training courses.

PHYSICAL AND HEALTH EDUCATION

Activity Courses. Students who enter the University as freshmen are required to complete one physical education activity course each quarter for the first three quarters of residence. In fulfilling the foregoing requirement, *all* students must pass a swimming test or satisfactorily complete one quarter of swimming. In fulfilling the three-quarter requirement, no activity course may be repeated for credit.

Men students may use credits earned in freshman or varsity sports to satisfy the activity course requirement.

Women students, in fulfilling the three-quarter requirement, may take a maximum of two credits in any of the following: (1) swim area; (2) dance area; (3) tennis and badminton; (4) any other specific individual, dual, or team activity.

The following students are exempt from the requirement of activity courses:

1. Students who have attained the age of twenty-five. A student who attains the age of twenty-five during a quarter in which he is registered for a required physical education activity course shall be held for the completion of that course. This rule shall not be retroactive in its application to students who entered prior to Spring Quarter, 1951, and were exempted from required physical education courses under previous rules.

2. Students who enter as sophomores, juniors, or seniors.

3. Special students.

4. Students registered for 6 credits or less.

5. Students who, because of physical condition, are exempted by the Graduation Committee upon the recommendation of the Dean of the College. Such action will be taken only when the Dean has received a joint recommendation for exemption from the University Health Officer and the Executive Officer of the Department of Physical Education for Men or for Women, whichever is appropriate. All other students who are reported by the University Health Officer as physically unfit to join regular classes will be assigned by the Executive Officer of the Department of Physical Education for Men or for Women to special programs adapted to their needs.

6. Students who are veterans of military service. Complete exemption is granted for one year or more of active duty. This exemption does not grant credit. Veterans with less than one year of service receive no exemption.

7. Transfer students who present acceptable credit for physical education activity courses taken in other colleges. The amount of exemption depends on the number of quarters for which credit is transferred.

Health Courses. All men students who enter the University as freshmen are required to take Health Education 175, a course in personal health, within the first three quarters of residence. The health education course requirement may be satisfied by passing a health-knowledge examination. Successfully passing this test exempts the student from the requirement but does not grant credit for Health Education 175. Veterans with one year or more of active service are exempt from this requirement. This exemption does not grant credit.

Women students who enter the University as freshmen are required to take Health Education 110 within the first three quarters of residence. *Women* entering the University for the first time may satisfy this requirement by passing a health-knowledge examination given during the Autumn Quarter registration period. Successfully passing this test exempts the student from the requirement, but does not grant credit for Health Education 110.

TUITION AND FEES

All tuition and fees are payable at the time of registration. The University reserves the right to change any of its fees without notice.

Principal fees for each quarter (Autumn, Winter, and Spring) are listed below. Summer fees are listed in the *Summer Quarter Bulletin*.

Tuition

Resident students, per quarter \$35.00

A resident student is one who has been domiciled in Washington for at least a year immediately prior to registration. The domicile of a minor is that of his parents.

Nonresident students, per quarter 105.00

Prospective students are classified as nonresidents when their credentials come from schools outside Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

Auditors per quarter 39.00

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

Incidental Fee, per quarter

Full-time resident students 56.50

Part-time resident students (registered for 6 credits or less, exclusive of ROTC) 39.00

Full-time nonresident students 86.50

Part-time nonresident students (registered for 6 credits or less, exclusive of ROTC) 69.00

ASUW Fees

Membership, per quarter 8.50

Optional for auditors and part-time students.

Athletic admission ticket (optional for ASUW members) 3.50-6.50

Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50; Spring Quarter only, \$3.50.

Military Uniform Deposit 25.00

Paid by students in Army and Air Force ROTC; refundable when uniform is returned in good condition. Limitation on refund will be explained during registration.

Breakage Ticket Deposit 3.00

Required in some laboratory courses; ticket returnable for full or partial refund.

Locker Fee, per quarter 1.50

Required for men students taking physical education activities.

Grade Report Fee .50

One grade report will be issued each quarter without charge; the fee, payable in advance, is charged for each additional copy.

<i>Transcript Fee</i>	1.00
One transcript is furnished without charge; the fee, payable in advance, is charged for each additional copy.	

<i>Graduation Fee</i>	10.00
-----------------------	-------

SPECIAL FEES

A registration service fee of \$15.00 is charged those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by In-Person Registration by action of the Registration Appeal Board. A late registration fee of \$15.00 is charged any student granted permission to register after the last registration day before the opening of Autumn, Winter, and Spring Quarters by action of the Registration Appeal Board. A fee of \$5.00 is charged for a late medical examination; and \$1.00 for a late X ray. A fee of \$5.00 is charged Autumn, Winter, and Spring Quarters for each change of registration or change of section or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University. The fee for a special examination is \$1.00 and for removal of an incomplete, \$2.00. A fee of \$5.00 is charged each student entering with less than 45 credits who has not previously taken the required Washington Pre-College Differential Guidance (Grade Prediction) Test.

PHYSICAL EDUCATION ACTIVITY FEES, per quarter are: bowling, \$5.00; canoeing, \$3.00; golf instruction, \$1.50 per quarter.

REFUND OF FEES

All major fees will be refunded in full if complete withdrawal is made during the first three calendar days of the quarter; one half the amount will be refunded if withdrawal is made during the first thirty calendar days. Fee refunds are not made to students withdrawing under discipline.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund of fees, if payment was made by check.

ESTIMATE OF YEARLY EXPENSES

The figures given below are minimum estimates for an academic year, which includes Autumn, Winter, and Spring Quarters. Living costs and personal expenses vary widely with the needs of the individual student.

Tuition, Incidental, and ASUW Membership Fees

Full-time resident student	300.00
Full-time nonresident student	600.00

<i>Athletic Admission Ticket</i> (optional)	6.50
---------------------------------------------	------

<i>Health and Accident Insurance</i> (optional)	16.50
-------------------------------------------------	-------

<i>Special Fees and Deposits</i>	38.50
----------------------------------	-------

Military uniform deposit, breakage ticket, and locker fees.

<i>Books and Supplies</i>	90.00
---------------------------	-------

Board and Room

Room and meals in Men's Residence Halls	675.00
-----------------------------------------	--------

Room and meals in Women's Residence Halls	615.00-720.00
-------------------------------------------	---------------

Room and meals in fraternity or sorority house	670.00-760.00
------------------------------------------------	---------------

(Including dues and social fees.)

Initial cost of joining is not included; this information may be obtained from the Interfraternity Council or Panhellenic Council.

<i>Personal Expenses</i>	300.00
--------------------------	--------

STUDENT ACTIVITIES AND SERVICES

ASSOCIATED STUDENTS

Membership in the Associated Students of the University of Washington, the central organization which conducts all student activities, is required of all regularly enrolled students. Through the ASUW Board of Control and its various committees and boards, students assume major responsibility in the government of student life. The ASUW helps to finance the programs of athletics, debates, concerts, lectures, and many other activities and facilities, including the University of Washington *Daily* and the Student Union Building.

AMERICAN PHARMACEUTICAL ASSOCIATION

The American Pharmaceutical Association, which was established in 1852, maintains student branches so that students in the various colleges of pharmacy may join the national organization. The campus branch meets monthly during the academic year and sponsors lectures, social functions, and field trips. All students in the College are eligible for membership.

Upon graduation, affiliation with the organization may be continued on a full-membership basis. There are many active chapters, located in various parts of the country, in which the member may continue his association. One of these, the Puget Sound Branch of the American Pharmaceutical Association, has its headquarters in Seattle.

HONORARY AND FRATERNAL SOCIETIES

Election to membership in Rho Chi, the pharmaceutical honor society, is on the basis of high scholarship and professional promise. Rho Chi was founded in 1908 at the University of Michigan as the Aristolochite Society, and in 1922 the name was changed and a charter granted giving permission to expand to other colleges. There are now sixty-three collegiate chapters. Rho Chapter, at the University of Washington, was established in 1932. Students who have completed 60 per cent of the credit hours required for graduation in pharmacy with a grade-point average of at least 3.00 are eligible for membership. The purpose of Rho Chi is to promote the scientific advancement of pharmacy and to encourage high academic attainments.

Kappa Psi is a national professional pharmaceutical fraternity dedicated to the promotion of industry, mutual fellowship, high ideals, and high scholarship among its members, and to fostering pharmaceutical research. The University of Washington chapter, Beta Omicron, is one of fifty collegiate chapters and sends delegates to the Grand Council, which meets biennially. The campus chapter meets twice a month in alternate business and social meetings.

Lambda Kappa Sigma, the oldest and largest pharmaceutical sorority in the world, promotes the profession of pharmacy among women. There are now thirty-seven collegiate and seventeen alumnae chapters. Chi Chapter, at the University of Washington, participates in many activities. New members are selected during the first professional year on the basis of character, scholarship, and personality.

VISITS TO PHARMACEUTICAL PLANTS

Various pharmaceutical manufacturing companies encourage pharmacy students to visit their plants and to become acquainted with their facilities. To induce students to take advantage of these tours, the companies provide hotel facilities and meals during the visits. Every other year a group of students from the College of Pharmacy, with a faculty adviser, makes a trip of about ten days, spending a day or two with each company. These tours enable students to observe pharmaceutical manufacturing in some of the world's largest and most modern plants.

SCHOLARSHIPS, GRANTS-IN-AID, AND LOANS

The University offers a number of awards for outstanding academic achievement. Some are given by the University and others are supported through the

generosity of friends and alumni. Information concerning the list of current awards and loans may be obtained from the Office of the Dean of Students.

The University of Washington awards 100 tuition scholarships each academic year to worthy students from other countries. There are no scholarships available for the Summer Quarter. These awards are made on the basis of the academic record of the student, recommendations from his professors, his need for such assistance, and the availability of such openings in his department at the University. These scholarships cover tuition only and are administered by the Foreign Exchange Scholarship Committee, Foreign Students Office, University of Washington, Seattle 5, Washington, U.S.A. Application for these scholarships must be made by March 1 for the following year.

Awards established especially for pharmacy students include scholastic recognition awards sponsored by the Rho Chi Honorary Society, Kappa Psi Fraternity (Grand Council Scholarship Key, H. A. Langenhan Memorial), Lambda Kappa Sigma Sorority (Heath Memorial), Linton Memorial, Merck-Sharp and Dohme, Johnson and Johnson, Rexall Drug Company, and Bristol Laboratories. Other scholarships, fellowships, and grants are:

AMERICAN FOUNDATION FOR PHARMACEUTICAL EDUCATION SCHOLARSHIPS, \$200. Two available, awarded to upper-division students who have a 3.00 grade-point average, are in the upper 25 per cent of their class, and need financial assistance.

L. D. BRACKEN SCHOLARSHIP AWARD, \$300. Awarded to an undergraduate student on the basis of professional scholarship, professional attitude, and need. Funds are derived from a \$10,000 gift to the College of Pharmacy which was made in 1956 by Mrs. L. D. Bracken and Mr. Jim L. Bracken in memory of L. D. Bracken, prominent Seattle pharmacist.

NED HENDERSON STUDENT AID TRUST FUND SCHOLARSHIP, \$150. Awarded to an undergraduate student on the basis of superior scholarship and need. Funds are derived from gifts to the Washington State Pharmaceutical Association in memory of its long time executive secretary, the late H. E. "Ned" Henderson, '13.

LAMBDA KAPPA SIGMA INSPIRATIONAL AWARD (Charles Willis Johnson Memorial), \$25. Awarded to a student who shows unusual leadership and helpful student influence.

McKESSON AND ROBBINS SCHOLARSHIP, \$100. Awarded to the fourth-year student with the highest grade-point average.

JOHN B. QUICK ENDOWMENT SCHOLARSHIP, amount varies. A bequest of \$25,000 was made to the College of Pharmacy in the will of the late Mrs. Edna J. Quick in memory of her husband, one of the early pharmacists of Seattle. Income from this endowment is to be awarded to worthy and deserving students in pharmacy. Three, full-tuition scholarships are awarded each spring to high school seniors for prepharmacy study at the University.

STATE OF WASHINGTON REXALL CLUB SCHOLARSHIP, \$250. Awarded to an outstanding high school senior for prepharmacy study at the University.

LOUIS AND GERTRUDE RUBENSTEIN MEMORIAL FUND. A \$400,000 estate bequest to the College of Pharmacy was announced upon the death, in October, 1952, of Mrs. Louis Rubenstein, the widow of a pioneer Seattle pharmacist. Under the terms of this fund, undergraduate scholarships and graduate fellowships will be established for worthy and deserving students.

WASHINGTON STATE PHARMACEUTICAL ASSOCIATION SCHOLARSHIPS AND GRANTS, \$100. Three awarded to deserving upper-division students showing unusual interest in retail pharmacy as a career.

WOMEN'S AUXILIARY OF THE WASHINGTON STATE PHARMACEUTICAL ASSOCIATION SCHOLARSHIPS AND GRANTS, amount varies. Several awarded by the state auxiliary and its Seattle, Spokane, Pierce County, and Whatcom County units to students showing excellent scholarship and/or needing assistance.

AMERICAN FOUNDATION FOR PHARMACEUTICAL EDUCATION FELLOWSHIPS. Up to \$2,400 a year is available upon approval of the Foundation to graduate students who are preparing for careers in pharmaceutical education or industry.

TEACHING ASSISTANTSHIPS. Six assistantships are awarded each year by the College of Pharmacy to qualified graduate students. These assistantships carry a stipend of \$225 a month for nine months. Recipients may carry a maximum of 12 credits each quarter in addition to their work as teaching assistants.

RESEARCH ASSISTANTSHIPS. Several of these assistantships are awarded each year to graduate students depending upon the availability of research grants. Stipends and work loads correspond to those for teaching assistants.

In addition to the scholarships, assistantships, fellowships, and awards listed above, various loan funds are available to students in need of financial assistance. These include:

WOMEN'S AUXILIARY OF THE AMERICAN PHARMACEUTICAL ASSOCIATION. The Women's Auxiliary of the American Pharmaceutical Association maintains a student loan fund for junior and senior women pharmacy students. The amount of the loan varies according to need of the student and is repayable after graduation.

JOHN B. DARGAVEL FOUNDATION. Loans are available to pharmacy students from Foundation funds which are administered by the National Association of Retail Druggists. Repayment is made after graduation.

NED HENDERSON STUDENT AID TRUST FUND. In addition to the scholarship described above, loans are available subject to limitations of the Fund.

PHARMACISTS AND RETAIL CLERKS UNION, LOCAL 330, LOAN FUND. Funds are available from a grant made to the University by the union for use by fifth-year students in pharmacy. Loans are repayable after graduation.

HUGH R. TENNANT MEMORIAL LOAN FUND. Gifts in memory of the late Hugh R. Tennant, '25, provide funds for loans to pharmacy students. Repayment may be made after graduation.

Further information about undergraduate and graduate awards in pharmacy may be obtained by writing to the Dean of the College. Application forms are available from the Director of Student Financial Aids, Room 333 Student Union Building.

OFFICE OF THE DEAN OF STUDENTS

The Office of the Dean of Students is concerned with the general welfare of students and welcomes correspondence and conferences with both parents and students. This Office works closely with the advisory system of the colleges and schools of the University; it directs students to faculty advisers, the Counseling Center, and other persons or agencies offering information and assistance with personal and social problems. The Dean of Students Office also has current information on Selective Service regulations.

The Foreign Students Office operates through the Office of the Dean of Students. The Foreign Student Adviser and his staff offer guidance on all nonacademic problems to students from other countries. Questions about immigration regulations, housing, social relationships, personal problems, finances, minimum course requirements, and employment should be referred to this Adviser. Students who are interested in study abroad may obtain from him information about schools in other countries and about Fulbright and other scholarships.

COUNSELING CENTER

The Counseling Center in Lewis Hall Annex offers vocational and educational counseling to students who need help in their adjustments to college. The staff of the Center, which includes vocational counselors and psychologists, works closely with other student services and supplements the academic advisory program.

HOUSING

Information and applications for residence in University-owned housing for single persons may be obtained by writing to the Manager, Men's Residence Halls, 1201 Campus Parkway, Seattle 5, or to the Manager, Women's Residence Halls, University of Washington, Seattle 5. Preference in assignment to vacancies is given to students under twenty-one years of age until August 1; thereafter assignments are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

University regulations require that women students under twenty-one who do not live at home must live in approved group residences such as the Women's Residence Halls, sororities, and church-sponsored living groups. Other types of living arrangements must be reported to the Dean of Women and be approved by the student's parents or guardian.

Information about fraternities or sororities may be obtained by writing to the Interfraternity Council or the Panhellenic Council, Student Union Building, University of Washington, Seattle 5.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings must, however, be consulted in person.

Teaching and research assistants and other part-time subfaculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 23 Administration Building, for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

HEALTH SERVICES

The University maintains a health service and infirmary to help guard against infectious diseases and incipient ill health.

The infirmary receives bed patients at any hour and provides nursing care, medicines, and the attendance of a staff doctor up to one week each quarter free of charge. For a period longer than one week a charge of \$2.00 a day is made. At their own expense, infirmary patients may consult any licensed physician in good standing.

Health and Accident Insurance for Students is available at the time of registration.

EMPLOYMENT

Part- and full-time work off campus may be obtained at the University Placement Office. Applications are accepted from students or graduates of the University and from the wives or husbands of University students. Applications must be made in person after residence in Seattle has been established. Placement in jobs on the campus is handled by the Personnel Department and the ASUW Personnel Office.

A list of positions open in retail and hospital pharmacies is maintained by the College of Pharmacy.

THE PROGRAMS IN PHARMACY

THE PROGRAMS IN PHARMACY

THE COLLEGE OF PHARMACY offers courses leading to the degrees of Bachelor of Science in Pharmacy, Master of Science, and Doctor of Philosophy. The programs in pharmacy are designed to give both the scientific training and the professional ability necessary to qualify graduates to meet the various needs of their chosen profession. Of the numerous specializations possible in this field, retail pharmacy attracts the greatest number of graduates. Other opportunities are available for pharmacists in hospital and clinic dispensaries; as personnel in wholesale drug distribution; as medical representatives for pharmaceutical concerns; as production, control, and research pharmacists in the manufacture of medicinal and pharmaceutical products; as food- and drug-control chemists or laboratory personnel in local, state, and federal health laboratories; and as pharmacists in the United States Public Health Service, the Veterans Administration, the Armed Forces, and other government departments. Teaching and research careers in colleges of pharmacy and in industry are available after the completion of graduate study.

LICENSURE

In order to be admitted to the practice of pharmacy as a registered pharmacist in the state of Washington, the candidate must graduate from a recognized college of pharmacy, complete one year of internship, and pass the licensing examinations.

The year of internship (2,080 hours) leading to registration in the state of Washington must be gained in a Class A pharmacy which fills a minimum of twenty-five prescriptions a day. Part-time work during the school term may not be counted as experience. Experience obtained in another state must be accompanied by a letter from the Board of Pharmacy of that state showing that the experience gained was in a pharmacy accepted by that state as one entitled to train interneers. The applicant must have been registered in an accredited school or college of pharmacy or in a college whose credits are transferable to an accredited school or college of pharmacy before being eligible to begin counting internship hours.

Further information about licensure requirements may be obtained from the State Board of Pharmacy, 417 General Administration Building, Olympia.

BACHELOR OF SCIENCE IN PHARMACY

Students working toward the bachelor's degree in pharmacy must meet certain general requirements of the University and the College as well as the particular course requirements of the pharmacy curriculum. These general requirements include military training, physical education, scholarship and minimum credits, and senior-year residence.

Students should apply for bachelor's degrees during the first quarter of the senior year. If not more than ten years have elapsed since the date of a student's entry into the school or college in which he is to graduate, he may choose to graduate under the requirements set out in either the bulletin published by the appropriate school or college most recently prior to the date of his entry, or that published most recently prior to his anticipated date of graduation; provided, that when, in the opinion of the faculty of the school or college or a departmental executive officer or a dean acting for such faculty, substantial changes have been made in the curriculum since the student's entry, the student's choice shall be subject to the approval of the appropriate faculty, executive officer, or dean. Disapproval of the student's choice shall be by faculty action and subject to the procedures of the Faculty Code. As outlined in this bulletin, a student must complete 233 credits plus the ROTC and physical education activity requirements for graduation. All responsibility for fulfilling graduation requirements shall rest with the student concerned. No student whose standing is in any way provisional can have an application for degree accepted.

ADVANCED DEGREES

Students who intend to work toward a Master of Science or Doctor of Philosophy degree must apply for admission to the Graduate School and meet the requirements outlined in the *Graduate School Bulletin*. *Graduate students must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.* For graduate study, the approval of both the College of Pharmacy and the Graduate School is necessary.

The basic requirements for admission to graduate study in the pharmaceutical sciences are met by an undergraduate degree in pharmacy. Students with undergraduate majors in the biological or physical sciences may also be admitted, but they will be required to complete courses basic to their chosen field of study during their graduate careers. Applicants must demonstrate above average scholastic ability and promise.

Undergraduates who have decided to pursue graduate work may expedite their programs by selection of pertinent electives. Although the choice of electives will vary with the identity of the student's selected field in the pharmaceutical sciences, it should be emphasized that graduate studies in the College of Pharmacy require adequate preparation in the physical and biological sciences, mathematics, and foreign language. Students who have not completed certain desired courses during their undergraduate work may be permitted to do so during their graduate programs.

Specialization is offered in pharmaceutical chemistry, pharmacognosy, pharmacy, and hospital pharmacy. Graduate study toward an advanced degree in pharmacology is directed by the Department of Pharmacology of the School of Medicine. The hospital pharmacy program may include a hospital pharmacy internship or residency if desired by the student.

Graduate programs of study vary with the specialization selected, and although they are flexible and are adapted to the needs of the individual student, certain general recommendations may be made. For majors in pharmacy and pharmaceutical chemistry, courses in physical chemistry (calculus is a prerequisite), biochemistry, qualitative organic chemistry, and statistical methods are basic to all programs in addition to courses in the major fields. These may be supplemented by advanced courses in the physical or biological sciences.

For hospital pharmacy majors, courses in the basic medical sciences including biochemistry, microbiology, and pharmacology are necessary in addition to the specialized courses in hospital pharmacy and manufacturing pharmacy.

For pharmacognosy majors, courses in organic chemistry, biochemistry, and plant physiology are basic to most programs. These are generally best supplemented in the biological areas by courses in plant anatomy, taxonomy, microbiology, and mycology. In the physical area, specialized courses in organic chemistry, analytical chemistry, and physical chemistry are utilized.

All graduate students are encouraged to pursue additional courses in the pharmaceutical sciences other than their fields of specialization. Specific recommendations based upon individual interests, and information concerning courses may be obtained from the chairman of the department concerned or from the Dean, College of Pharmacy.

MASTER OF SCIENCE. The candidate must present at least 27 credits of course work, exclusive of thesis and nonthesis research. He must complete a research project, prepare an acceptable thesis, and pass a final examination. He must present a certificate of proficiency in one foreign language.

DOCTOR OF PHILOSOPHY. The candidate must present a minimum total of 56 credits of course work, exclusive of thesis and nonthesis research. The credits earned for the master's may be applied toward the doctor's degree. The candidate must pass a general examination for admission to candidacy for the doctor's degree, complete a research project, prepare an acceptable thesis, and pass a final examination. The research for the doctor's degree must be done at the University of Washington (applicable to candidates beginning their graduate studies after September, 1958). The candidate must present a certificate of proficiency in two foreign languages (one in addition to the Master of Science requirement).

For more detailed information concerning graduate studies, see the *Graduate School Bulletin*.

COURSE-NUMBERING SYSTEM

Courses numbered from 100 through 299 are lower-division courses, for freshmen and sophomores; those numbered from 300 through 499 are upper-division, for third-, fourth-, and fifth-year students.

Courses numbered 500 and above are intended for and restricted to graduate students. Some courses numbered in the 300's and 400's are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the College of Pharmacy and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only; approved 400-level courses are accepted as part of the major. For a listing of approved 300- and 400-numbered courses, consult the *Graduate School Bulletin*.

The number in parentheses following the course title indicates the amount of credit each course carries. In most lecture courses a credit is given for each class hour a week during a quarter; laboratory courses generally carry less credit than the work time required. An asterisk in place of a credit number means that the amount of credit is variable. Hyphens between course numbers mean that credit is *not* granted until the series of courses is completed.

Courses to which the letter J is appended are joint courses in two or more departments and as such grant credit in one of the departments.

Not all of these courses are offered every quarter. Final confirmation of courses to be offered, as well as a list of times and places of class meetings, is given in the *Yearly Time Schedule*.

PHARMACEUTICAL SCIENCES

PHARMACEUTICAL CHEMISTRY

Chairman: LOUIS FISCHER, 300 Bagley Hall

The Department of Pharmaceutical Chemistry offers, for undergraduate students, courses which deal with the application of chemistry to the study of substances used in pharmacy and medicine. Advanced courses covering specialized techniques in pharmaceutical chemistry, medicinal products, and plant chemistry are presented at the graduate level.

Students who have been admitted for work toward a Master of Science or Doctor of Philosophy degree should contact the Chairman of the Department before registration.

COURSES

- 237, 238, 239 Organic Pharmaceutical Chemistry (3,3,3)** Huitric
The chemistry of the carbon compounds. Prerequisite, Chemistry 170.
- 248, 249 Organic Pharmaceutical Chemistry Laboratory (3,3)** Huitric
Laboratory study of the reactions and the identification of organic compounds. Prerequisites, 238 for 248, which may be taken concurrently and 239 for 249, which may be taken concurrently.
- 301 Bibliography Technique (2)** McCarthy
Use of scientific literature, preparation of abstracts, and assignments in selected pharmaceutical topics.
- 325 Quantitative Pharmaceutical Analysis (5)** McCarthy
Principles of volumetric analysis with special emphasis on medicinal compounds. Prerequisite, Chemistry 170.
- 326 Quantitative Pharmaceutical Analysis (5)** McCarthy
Principles of gravimetric and colorimetric analysis applied to medicinal compounds. Prerequisite, 325.
- 327 Quantitative Pharmaceutical Analysis (3)** McCarthy
Physicochemical methods used in pharmaceutical analysis. Prerequisite, 326.
- 395, 396 Pharmaceutical Chemistry (3,3)** Fischer
The chemistry of pharmaceuticals and their constituents with respect to the physical and chemical methods used in standardization. Prerequisite, 326.
- 430 Inorganic Medicinal Products (3)** McCarthy, Orr
Classification, nomenclature, physical and chemical properties of inorganic medicinal compounds; and a discussion of radioactive medicinal products. Prerequisite, Chemistry 170.
- 440, 441, 442 Organic Medicinal Products (3,3,3)** Fischer, Krupski
Nomenclature, classification, synthesis, properties, structure, and activity of medicinal products. Prerequisite, 239.
- 480 Advanced Organic Medicinal Products Laboratory (3)** Huitric
Synthesis of important medicinal products and isolation of active principles from natural sources. (Offered every other year; offered 1962-63.)
- 497 Toxicology (3)** Fischer
A study of poisons, their action, and the treatment of conditions produced by them. Prerequisite, 239.
- 499 Undergraduate Research (1-5)** Fischer, Huitric, Krupski, McCarthy
Research problems in pharmaceutical chemistry. Open to qualified juniors and seniors.

COURSES FOR GRADUATES ONLY

- 511, 512, 513 Advanced Pharmaceutical Chemistry (3,3,3)** Krupski
pH determination and buffer systems, fluorometry, and gasometric methods of analysis, chromatography, ion exchange, and the use of various instruments for scientific investigations and vitamin determinations. (Offered every third year; offered 1961-62.)
- 520 Seminar (1, maximum 5)** Staff
Graduate students attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed.
- 521, 522 Advanced Organic Medicinal Products (3,3)** Huitric
Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems and recent advances in drug design. Prerequisites, Chemistry 357, 531, and Biochemistry 482, or permission. (Offered every other year; offered 1962-63.)
- 531, 532, 533 Plant Chemistry (3,3,3)** McCarthy
Alkaloids, volatile oils, steroids, and glycosides, including methods of isolation, proof of structure and configuration, and synthesis, with emphasis on materials of pharmaceutical interest. (Offered every third year; offered 1962-63.)
- 600 Research (*)** Fischer, Huitric, Krupski, McCarthy
- 700 Thesis (*)** Staff

PHARMACOGNOSY

Chairman: VARRO E. TYLER, JR., 303 Bagley Hall

Pharmacognosy deals with the systematic study of natural drug products employed as pharmaceuticals and medicinals. The Department of Pharmacognosy offers courses in the general aspects of plant and animal drug principles, including their sources, separation, biosynthesis, identification, and uses. Other courses of

advanced nature include the subjects of hormones, sera, vaccines, allergens, and problems in drug plant cultivation. These courses are also available to qualified students from related science areas.

The Department directs the activities of the Drug Plant Gardens and Laboratory. An extensive collection of living drug plants is maintained for experimental use.

Students who have been admitted for work toward a Master of Science or Doctor of Philosophy degree should communicate with the Chairman of the Department before registration.

COURSES

- 312-313-314, 315 General Pharmacognosy (4-4-4,3)** **Tyler, Brady**
The study of natural products of plant and animal origin as important pharmaceuticals. Sources, processes of isolation and general fundamental properties are described. Prerequisite, Pharmaceutical Chemistry 239, Botany 111 and Zoology 112 or an equivalent course in biology, Microbiology 301, Biochemistry 361.
- 405 Advanced Pharmacognosy (3)** **Tyler**
A laboratory course covering advanced techniques in pharmacognosy.
- 406 Medicinal Plants (2)** **Tyler**
Problems in drug plant cultivation and commerce, with considerable field work in the Drug Plant Gardens. Emphasis is placed upon alkaloid-, glycoside-, and oil-yielding plants. Weedicides and insecticides are included. Prerequisite, -314 or permission.
- 411 Hormones and Glandular Products (2)** **Brady**
An advanced study of pharmaceutical products derived from animal exocrine and endocrine glands, with emphasis upon hormones and their chemical and physiological role as drugs. Prerequisites, 315, and Physiology and Biophysics 360 or equivalent.
- 412 Immunological Agents (2)** **Brady**
Production, quality, and use of serum, vaccine, virus, and allergenic products currently employed in the prevention and treatment of disease. Prerequisite, 315.
- 499 Undergraduate Research (1-5)** **Brady, Tyler**
Research problems in pharmacognosy. Open to qualified juniors and seniors.

COURSES FOR GRADUATES ONLY

- 520 Seminar (1, maximum 5)** **Staff**
Graduate students must attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed.
- 581 Topics in Pharmacognosy (1, maximum 2)** **Tyler**
Discussions and readings of topics of current interest in the field of pharmacognosy. Subject matter changes from year to year. Prerequisite, reading knowledge of German.
- 600 Research (*)** **Brady, Tyler**
- 700 Thesis (*)** **Staff**

PHARMACY AND PHARMACY ADMINISTRATION

Chairman: L. WAIT RISING, 306 Bagley Hall

The Department of Pharmacy and Pharmacy Administration teaches the courses directly concerned with professional orientation, fundamental pharmaceutical procedures, prescription compounding, hospital pharmacy, manufacturing, and management. Graduate work is available leading to the Master of Science and Doctor of Philosophy degrees in the various fields of pharmacy. The Department also offers several service courses to nonmajors in other divisions of the University.

Students who have been admitted for work toward a Master of Science or Doctor of Philosophy degree should communicate with the Chairman of the Department before registration.

COURSES

- 115 Home Remedies (2)** **Rising**
A helpful review of the preparations commonly used at home for maintaining health and good appearance. Medicines for the treatment of everyday conditions, such as colds, headaches, sore throats, and minor infections, are studied from the standpoint of composition, intelligent use, safety, and effectiveness. Cosmetics and related preparations are included. For nonmajors.

- 204 Orientation and History (2)** **Orr**
A study of the profession of pharmacy, its development and its literature.
- 261 Pharmacology and Therapeutics (3)** **Staff**
General study of the action and uses of drugs. For students in the School of Nursing.
- 318 Pharmaceutical Accounting (5)** **Lorig**
Basic principles of accounting as used in pharmacy, with emphasis on state and federal taxes and deductions, and on fiscal reports for comparing business trends under accepted business procedures.
- 331-332 Pharmaceutical Preparations (5-5)** **Hammarlund**
A study of pharmaceutical dosage forms including processes, physical principles and metrology involved in their preparation. Prerequisites, Physics 102 and 108, Microbiology 301, and Pharmaceutical Chemistry 239.
- 352 Pharmacy and Therapeutics for Dental Hygienists (3)** **Staff**
Principles of pharmacy; mathematics of pharmacy; pharmacological and therapeutic action of drugs pertaining to dentistry.
- 407-408-409 Dispensing Pharmacy (5-5-5)** **Hall**
Principles of prescription compounding and dispensing, including study of some commercially-prepared modern pharmaceuticals. Prerequisite, 332.
- 410 Clinical Dispensing Pharmacy (1)** **Plein**
Compounding and dispensing of prescriptions originating in the Student Health Service (Hall Health Center) and University Hospital. Laboratory work is under direct supervision of Student Health Service pharmacist and University Hospital pharmacists.
- 420 Manufacturing Pharmacy (3)** **Plein**
A study of the techniques and equipment in preparing pharmaceutical products on a small plant scale basis. Prerequisites, 332 and fifth-year standing.
- 450 Pharmacy Laws (3)** **Rising**
A study of the laws regulating the practice of pharmacy. These include federal, state, and municipal laws, and professional ethics. Prerequisite, fifth year standing.
- 451 Specialized Pharmaceutical Practice (3)** **Rising**
A study of several areas of specialized practice in pharmacy. Important examples are veterinary pharmacy, dental pharmacy, pediatric pharmacy, ophthalmologic pharmacy and podiatric pharmacy. Prerequisite, fifth-year standing.
- 452 Professional Management (3)** **Rising**
A study of the special problems involved in the management of the professional phases of pharmacy at the retail or manufacturing level. Their integration with over-all managerial procedures is stressed. Prerequisite, fifth-year standing.
- 473 Cosmetic Manufacturing (3)** **Rising**
Preparation of many types of cosmetics and study of their physical, chemical, and physiological properties. Prerequisite, Pharmaceutical Chemistry 239.
- 483 Hospital Pharmacy (3-5)** **Plein**
Principles and techniques of hospital dispensing and dispensary management. Prerequisite, permission.
- 499 Undergraduate Research (1-5)** **Hall, Plein, Rising**
Research problems in manufacturing and dispensing pharmacy. Open to qualified juniors and seniors.

COURSES FOR GRADUATES ONLY

- 520 Seminar (1, maximum 5)** **Staff**
Graduate students must attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed.
- 540 Pharmaceutical Emulsions (2)** **Rising**
Problems in preparation of emulsions in pharmaceutical manufacturing. Prerequisites, Pharmaceutical Chemistry 239 and Chemistry 357 or equivalent.
- 550 Solvents and Solvent Extraction (2)** **Plein**
Theories of solvent extraction and the use of solvents applied to pharmaceutical manufacturing. Prerequisite, permission.
- 600 Research (*)** **Hall, Plein, Rising**
- 700 Thesis (*)** **Staff**

OTHER COURSES FOR PHARMACY STUDENTS

BIOCHEMISTRY

- 361 Biochemistry (3)** **Staff**
An introductory one-quarter course in general biochemistry covering basic principles, including the structure and metabolism of biologically important compounds. For students in dentistry, home economics, medical technology, pharmacy, and others. Prerequisite, Chemistry 102 or 232.

BOTANY

- 111 Elementary Botany (5)** **Staff**
Structure, physiology, and reproduction of seed plants. Open for only 3 credits to those who have had Botany 105.

BUSINESS COMMUNICATIONS

- 301 Written Business Communications (3)** **Staff**
Analysis of principles, including psychological factors, and actual business letters in terms of fundamentals. Prerequisite, English 103. No credit if Business Writing 310 has been taken.

CHEMISTRY

- 100 Chemical Science (5)** **Staff**
Atoms, molecules, and chemical reactions. A survey of principles fundamental to the science of chemistry. Designed both as a terminal course for nonscience majors and as an introductory course for those who wish to continue with Chemistry 101 or 140. No credit given to those who have had one unit or more of high school chemistry.
- 140 General Chemistry (3)** **Staff**
For science, engineering, and other majors who will take chemistry 200 courses or higher. The structure of matter, atomic and molecular theory, the elements, valence, and quantitative relationships. Prerequisite, high school chemistry or 100, and qualification for Mathematics 103, 104, or 105.
- 150 General Chemistry (3)** **Staff**
Chemical calculations, solutions, and equilibrium theory. Prerequisite, 140 and concurrent registration in 151.
- 151 General Chemistry Laboratory (2)** **Staff**
Concurrent registration in 150 required.
- 160 General Chemistry (3)** **Staff**
Periodic System, phase equilibria, metals and non-metals, metallurgy, and nuclear reactions. Prerequisite 150.
- 170 Qualitative Analysis (3)** **Staff**
Semi-micro qualitative analysis for common cations and anions; separation and identification procedures. Prerequisite, 160, which may be taken concurrently.

ECONOMICS

- 200 Introduction to Economics (5)** **Staff**
Organization, operation, and control of the American economy; consideration of problems of inflation, unemployment, taxation, the public debt, monopoly, trade unions, and international trade. American capitalism compared with communism and socialism. Open to freshmen.

ENGLISH

- 101, 102, 103 Composition (3,3,3)** **Staff**
Fundamentals of effective exposition; collecting, organizing, and evaluating materials for writing; reading contemporary writings for meaning and form.

MARKETING

- 381 Retailing (5)** **Staff**
Store location, layout, organization, policies, and systems; principles of buying, stock control, pricing, inventory methods, personnel management; profit planning and business control; coordination of store activities. Prerequisite, 301.
- 441 Retail Sales Promotion (3)** **Staff**
Store design and layout, display, advertising, publicity, personal salesmanship, promotional budget, and coordination of promotional activities.

MATHEMATICS

- 101 Intermediate Algebra (5)** **Staff**
Similar to third term of high school algebra. Not open for credit to students who have taken one and one-half years of algebra in high school. Offered by Division of Evening Classes and Division of Correspondence Study only. Prerequisite, one year of high school algebra.
- 103 Intermediate Algebra and Trigonometry (3)** **Staff**
Meets five hours per week. First four weeks, review of intermediate algebra. After this review, students must pass qualifying test to continue in 103. Those failing the test will be registered in 101, for which they will receive no University credit. Last six weeks, plane trigonometry, equivalent to 104. Not open for credit to students who have taken trigonometry in high school. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, and one year of plane geometry.
- 104 Plane Trigonometry (3)** **Staff**
Trigonometric functions, identities, graphs, logarithms, and solution of triangles. Not open for credit to students who have taken trigonometry in high school. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, and one year of plane geometry.

105 College Algebra (5)**Staff**

Functions and graphs; linear and quadratic equations; complex numbers; theory of equations; determinants and matrices. Prerequisites, one and one-half years of high school algebra and qualifying test, or 101, or 103.

MICROBIOLOGY**301 General Microbiology (5)****Staff**

Microorganisms and their activities. A survey course for students of pharmacy, nursing, home economics, education, and others with minimal training in chemistry. Prerequisite, two quarters of general chemistry.

PHARMACOLOGY**301, 302 General Pharmacology (3,5)****Staff**

The action of drugs on physiological function, with special reference to the use of drugs in the therapeutic treatment of disease. Toxicological manifestations of excessive doses of drugs; management and treatment of these poisonous effects. Laboratory experiments and demonstrations.

PHYSICAL AND HEALTH EDUCATION**Health Education****110 Health Education (Women) (2)****Staff**

Health problems of freshman women. Required of all freshman women; exemption without credit by examination. See page 30.

175 Personal Health (Men) (2)**Staff**

Health information that affords a basis for intelligent guidance in the formation of health habits and attitudes. Required of all freshmen; exemption without credit by examination. See page 30.

PHYSICS**101, 102, 103 General Physics (4,4,4)****Staff**

Concurrent registration in 107, 108, 109 recommended with 101, 102, 103 and may be required by individual departments. 101: mechanics. Prerequisites, trigonometry and one year of high school physics or its equivalent by permission. 102: sound and electricity. No credit in 102 if 112 has been taken. Prerequisite, 101. 103: heat, light, and modern physics. No credit in 103 if 113 has been taken. Prerequisite, 102 or concurrent registration in 102.

107, 108, 109 General Physics Laboratory (1,1,1)**Staff**

107: mechanics laboratory to be taken concurrently with 101. 108: sound, electricity, and magnetism laboratory to be taken concurrently with 102. 109: heat and light laboratory to be taken concurrently with 103.

PHYSIOLOGY AND BIOPHYSICS**360 General Human Physiology (5)****Staff**

Lecture, laboratory, and laboratory conference instruction in the basic principles and basic laboratory techniques of physiology. For students of pharmacy. Prerequisites, Zoology 112, Pharmaceutical Chemistry 239, Physics 102 and 108, Microbiology 301.

ZOOLOGY**111, 112 General Zoology (5,5)****Staff**

Physical basis of life, structure, function, development, inheritance, evolution, and ecology of animals. 111: invertebrate phyla through molluscs. 112: annelids through chordates. 111 prerequisite for 112.

BULLETIN • UNIVERSITY OF WASHINGTON

SCHOOL OF SOCIAL WORK

1962-1964

BULLETIN, UNIVERSITY OF WASHINGTON is the title of the series of official announcements describing the University's programs. The series includes three general bulletins; bulletins of the colleges and schools; Summer Quarter bulletin; the bulletin of the Center for Graduate Study at Hanford; and bulletins of the Division of Correspondence Study and the Division of Evening Classes.

INTRODUCTION TO THE UNIVERSITY, one of the general bulletins, is especially prepared for new and prospective students. It lists all the University curricula, with their admission requirements, and presents information on other phases of student life, including services for students, student activities, and expenses. UNIVERSITY RULES AND REGULATIONS, the second general bulletin, contains complete statements of University rules and scholastic requirements. It is designed for administrators and officials as well as registered students. HANDBOOK OF SCHOLARSHIPS, the third general bulletin, lists the various scholarships available.

Curricula, courses, and scholarship requirements in each field of study are described in the college and school bulletins. Each of these bulletins also discusses services, organizations, and expenses as they relate to students in the particular college or school.

Requests for copies of any of the bulletins should be addressed to the Addressograph Service.

CALENDAR

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

AUTUMN QUARTER, 1962

REGISTRATION PERIOD

- APR. 30—MAY 25** Advance Registration only for students in residence Spring Quarter, 1962. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
- SEPT. 10-27** In-Person Registration for students in residence Spring Quarter, 1962, who did not complete Autumn Quarter, 1962, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
- SEPT. 10-27** In-Person Registration for former students not in residence Spring Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Appointments or Permits is September 1.*
- JULY 15** Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointments will be mailed with Official Notice of Admission.
- SEPT. 1** Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
- SEPT. 11-27** In-Person Registration for ALL new students.
- SEPT. 27** Last day to register for Autumn Quarter, 1962. Note application deadlines above.
- OCT. 1-5** Change of registration by appointment only.

ACADEMIC PERIOD

- OCT. 1—MONDAY** Instruction begins
- OCT. 5—FRIDAY** Last day to add a course
- NOV. 1—THURSDAY** Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1963, due at Registrar's Office
- NOV. 12—MONDAY** State Admission Day holiday
- NOV. 21—WEDNESDAY** Last day to submit applications for advanced credit examinations
- NOV. 21-26** Thanksgiving recess (6:30 p.m. to 7:30 a.m.)
- DEC. 8—SATURDAY** Advanced credit examinations
- DEC. 12-18** Final examinations
- DEC. 18—TUESDAY** Quarter ends

WINTER QUARTER, 1963**REGISTRATION PERIOD**

OCT. 29-Nov. 27	Advance Registration only for students in residence Autumn Quarter, 1962. A service fee of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
JAN. 2-4	In-Person Registration for students in residence Autumn Quarter, 1962, who did not complete Winter Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
JAN. 2-4	In-Person Registration for former students not in residence Autumn Quarter, 1962. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is December 1.</i>
DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
DEC. 20	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
JAN. 2-4	In-Person Registration for ALL new students.
JAN. 4	Last day to register for Winter Quarter, 1963. Note application deadlines above.
JAN. 7-11	Change of registration by appointment only.

ACADEMIC PERIOD

JAN. 7—MONDAY	Instruction begins for all students
JAN. 11—FRIDAY	Last day to add a course
FEB. 21—THURSDAY	Last day to submit applications for advanced credit examinations
FEB. 22—FRIDAY	Washington's Birthday and Founder's Day holiday
MAR. 9—SATURDAY	Advanced credit examinations
MAR. 15-21	Final examinations
MAR. 21—THURSDAY	Quarter ends

SPRING QUARTER, 1963**REGISTRATION PERIOD**

JAN. 28-FEB. 21	Advance Registration only for students in residence Winter Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
-----------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

- MAR. 26-28 In-Person Registration for students in residence Winter Quarter, 1963, who did not complete Spring Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
- MAR. 26-28 In-Person Registration for former students not in residence Winter Quarter, 1963. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Appointments or Permits is March 1.*
- MAR. 1 Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
- MAR. 15 Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
- MAR. 26-28 In-Person Registration for ALL new students.
- MAR. 28 Last day to register for Spring Quarter, 1963. Note application deadlines above.
- APRIL 1-5 Change of registration by appointment only.

ACADEMIC PERIOD

- APRIL 1—MONDAY Instruction begins
- APRIL 5—FRIDAY Last day to add a course
- MAY 10—FRIDAY Last day to submit applications for advanced credit examinations
- MAY 25—SATURDAY Advanced credit examinations
- MAY 30—THURSDAY Memorial Day holiday
- JUNE 7-13 Final examinations
- JUNE 9—SUNDAY Baccalaureate Sunday
- JUNE 13—THURSDAY Quarter ends
- JUNE 15—SATURDAY Commencement

SUMMER QUARTER, 1963

REGISTRATION PERIOD

General In-Person Registration for ALL students (*by appointment only*):

June 6-10

June 17-21

New students. Admission to the University is a prerequisite for registration in Summer Quarter classes. Complete credentials must be filed with the Office of Admissions by May 15 to be considered for admission with *Regular* standing. See *Summer Quarter Bulletin* regarding admission as a *nondegree* candidate with status *Summer Quarter Only*. New (entering) students will be mailed Registration Appointments with their Official Notice of Admission.

Students in residence Spring Quarter, 1963:

Registration Appointments or Permits to register will be issued according to class, *only upon presentation of ASUW card in person*, at the Registrar's Office as follows:

Seniors and Graduates.....	Monday, April 22, 8 a.m. to 5 p.m.
Juniors	Tuesday, April 23, 8 a.m. to 5 p.m.
Sophomores	Wednesday, April 24, 8 a.m. to 5 p.m.
Freshmen	Thursday, April 25, 8 a.m. to 5 p.m.

Former students not in residence Spring Quarter, 1963, may obtain an Application for Appointment or Permit by writing to, or calling in person at, the Registrar's Office, Room 109, Administration Building, or telephoning 543-5910, beginning April 22 and preferably *no later than May 15*. Registration may be delayed by later application. Registration materials cannot be prepared until an application is received. The application deadline for term "a" and full Summer Quarter is June 17.

All students in the Schools of Law, Dentistry, and Medicine must file an Application for Registration Permit, although no appointment date is necessary.

ACADEMIC PERIOD

JUNE 24—MONDAY	Instruction begins
JUNE 25—TUESDAY	Last day to add a course for the first term
JUNE 28—FRIDAY	Last day to add a course for the full quarter
JULY 3—WEDNESDAY	Last day to submit applications for advanced credit examinations for first term
JULY 4—THURSDAY	Independence Day holiday
JULY 20—SATURDAY	Advanced credit examinations
JULY 24—WEDNESDAY	Final examinations and first term end
JULY 25—THURSDAY	Second term begins
JULY 26—FRIDAY	Last day to add a course for the second term
AUG. 2—FRIDAY	Last day to submit applications for advanced credit examinations for second term
AUG. 17—SATURDAY	Advanced credit examinations
AUG. 23—FRIDAY	Final examinations and second term end

AUTUMN QUARTER, 1963**REGISTRATION PERIOD**

MAY 6-29	Advance Registration only for students in residence Spring Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 3-26	In-Person Registration for students in residence Spring Quarter, 1963, who did not complete Autumn Quarter, 1963, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

- SEPT. 3-26** In-Person Registration for former students not in residence Spring Quarter, 1963. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Appointments or Permits is August 15.*
- JULY 15** Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
- SEPT. 1** Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
- SEPT. 4-26** In-Person Registration for ALL new students.
- SEPT. 26** Last day to register for Autumn Quarter, 1963. Note application deadlines above.
- SEPT. 30-OCT. 4** Change of Registration by appointment only.

ACADEMIC PERIOD

- SEPT. 30—MONDAY** Intruction begins
- OCT. 4—FRIDAY** Last day to add a course
- NOV. 1—FRIDAY** Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1964, due at Registrar's Office
- NOV. 11—MONDAY** State Admission Day holiday
- NOV. 22—FRIDAY** Last day to submit applications for advanced credit examinations
- NOV. 27-DEC. 2** Thanksgiving recess (6:30 p.m. to 7:30 a.m.)
- DEC. 7—SATURDAY** Advanced credit examinations
- DEC. 11-17** Final examinations
- DEC. 17—TUESDAY** Quarter ends

WINTER QUARTER, 1964

REGISTRATION PERIOD

- OCT. 29-Nov. 22** Advance Registration only for students in residence Autumn Quarter, 1963. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
- DEC. 30-JAN. 2** In-Person Registration for students in residence Autumn Quarter, 1963, who did not complete Winter Quarter, 1964, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
- DEC. 30-JAN. 2** In-Person Registration for former students not in residence Autumn Quarter, 1963. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. *Deadline for applying for Registration Appointments or Permits is December 1.*

DEC. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
DEC. 20	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
DEC. 30-JAN. 2	In-Person Registration for ALL new students.
JAN. 2	Last day to register for Winter Quarter, 1964. Note application deadlines above.
JAN. 6-10	Change of Registration by appointment only.

ACADEMIC PERIOD

JAN. 6—MONDAY	Instruction begins
JAN. 10—FRIDAY	Last day to add a course
FEB. 21—FRIDAY	Last day to submit applications for advanced credit examinations
FEB. 22—SATURDAY	Washington's Birthday and Founder's Day holiday
MAR. 7—SATURDAY	Advanced credit examinations
MAR. 13-19	Final examinations
MAR. 19—THURSDAY	Quarter ends

SPRING QUARTER, 1964**REGISTRATION PERIOD**

JAN. 27—FEB. 21	Advance Registration only for students in residence Winter Quarter, 1964. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
MAR. 24-26	In-Person Registration for students in residence Winter Quarter, 1964, who did not complete Spring Quarter, 1964, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
MAR. 24-26	In-Person Registration for former students not in residence Winter Quarter, 1964. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is March 1.</i>
MAR. 1	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

MAR. 15	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
MAR. 24-26	In-Person Registration for ALL new students.
MAR. 26	Last day to register for Spring quarter, 1964. Note application deadlines above.
MAR. 30—APRIL 3	Change of registration by appointment only.

ACADEMIC PERIOD

MAR. 30—MONDAY	Instruction begins
APRIL 3—FRIDAY	Last day to add a course
MAY 8—FRIDAY	Last day to submit applications for advanced credit examinations
MAY 23—SATURDAY	Advanced credit examinations
MAY 30—SATURDAY	Memorial Day holiday
JUNE 5-11	Final examinations
JUNE 7—SUNDAY	Baccalaureate Sunday
JUNE 11—THURSDAY	Quarter ends
JUNE 13—SATURDAY	Commencement

SUMMER QUARTER, 1964**REGISTRATION PERIOD**

General In-Person Registration for ALL students (*by appointment only*):

June 1-4

June 11-19

New students. Admission to the University is a prerequisite for registration in Summer Quarter classes. Complete credentials must be filed with the Office of Admissions by May 15 to be considered for admission with *Regular* standing. See *Summer Quarter Bulletin* regarding admission as a *nondegree* candidate with status *Summer Quarter Only*. New (entering) students will be mailed Registration Appointments with their Official Notice of Admission.

Students in residence Spring Quarter, 1964. Registration Appointments or Permits to register will be issued according to class, *only upon presentation of ASUW card in person*, at the Registrar's Office as follows:

Seniors and Graduates	Monday, April 20, 8 a.m. to 5 p.m.
Juniors	Tuesday, April 21, 8 a.m. to 5 p.m.
Sophomores	Wednesday, April 22, 8 a.m. to 5 p.m.
Freshmen	Thursday, April 23, 8 a.m. to 5 p.m.

Former students not in residence Spring Quarter, 1964, may obtain an Application for Appointment or Permit by writing to, or calling in person, at the Registrar's Office, Room 109, Administration Building, or telephoning 543-5910 beginning April 20 and preferably *no later than May 15*. Registration may be delayed by later application. Registration materials cannot be prepared until an application is received. The application deadline for term "a" and full Summer Quarter is June 15.

All students in the Schools of Law, Dentistry, and Medicine must file an Application for Registration Permit, although no appointment date is necessary.

ACADEMIC PERIOD

JUNE 22—MONDAY	Instruction begins
JUNE 23—TUESDAY	Last day to add a course for the first term
JUNE 26—FRIDAY	Last day to add a course for the full quarter
JULY 3—FRIDAY	Last day to submit applications for advanced credit examinations for first term
JULY 18—SATURDAY	Advanced credit examinations
JULY 22—WEDNESDAY	Final examinations and first term end
JULY 23—THURSDAY	Second term begins
JULY 24—FRIDAY	Last day to add a course for the second term
JULY 31—FRIDAY	Last day to submit applications for advanced credit examinations for second term
AUG. 15—SATURDAY	Advanced credit examinations
AUG. 21—FRIDAY	Final examinations and second term end

AUTUMN QUARTER, 1964**REGISTRATION PERIOD**

MAY 4-29	Advance Registration only for students in residence Spring Quarter, 1964. A service charge of \$15.00 will be assessed any student eligible for Advance Registration who fails to participate and then applies for In-Person Registration for that quarter.
SEPT. 1-24	In-Person Registration for students in residence Spring Quarter, 1964, who did not complete Autumn Quarter, 1964, Advance Registration. ALL must pick up a Registration Appointment or Permit to register at the Registrar's Office.
SEPT. 1-24	In-Person Registration for former students not in residence Spring Quarter, 1964. Appointments and Permits to register may be obtained by writing to or calling at the Registrar's Office. <i>Deadline for applying for Registration Appointments or Permits is August 15.</i>
JULY 15	Deadline for ALL new students to submit Applications for Admission with complete credentials. Registration Appointment will be mailed with Official Notice of Admission.
AUG. 28	Deadline for return to Student Health Service (Hall Health Center) of the Health History and Physical Examination report form by all new students and former students who are returning after an absence of one or more calendar years.
SEPT. 2-24	In-Person Registration for ALL new students.
SEPT. 24	Last day to register for Autumn Quarter, 1964. Note application deadlines above.
SEPT. 28-OCT. 2	Change of Registration by appointment only.

Applications for Admission, Registration Appointments, or Permits received after the deadline for filing will not be considered for the quarter concerned.

Dates in this Calendar are subject to change without notice. Dates appearing in admission and registration instructions take precedence over those in this Bulletin.

ACADEMIC PERIOD

SEPT. 28—MONDAY	Instruction begins
OCT. 2—FRIDAY	Last day to add a course
OCT. 30—FRIDAY	Applications for bachelor's degrees and certificates to be conferred through Summer Quarter, 1965, due at Registrar's Office
NOV. 11—WEDNESDAY	State Admission Day holiday
NOV. 20—FRIDAY	Last day to submit applications for advanced credit examinations
NOV. 25-30	Thanksgiving recess (6 p.m. to 7:30 a.m.)
DEC. 5—SATURDAY	Advanced credit examinations
DEC. 8—TUESDAY	Final examinations begin
DEC. 15—TUESDAY	Quarter ends

For further information concerning subsequent quarters, inquire at the Registrar's Office.

OBSERVANCE OF UNIVERSITY RULES AND REGULATIONS

It is the University's expectation that a student will follow University rules and regulations as they are stated in the Bulletins. In instances where no appeal procedure is spelled out and the student is persuaded that a special set of circumstances makes appeal reasonable, he may appeal the application of specific rules or regulations to the Office of the Dean of the School or College in which he is enrolled in the case of an academic matter, or to the Office of the Dean of Students in the case of a nonacademic matter. These offices will either render a decision on the appeal or refer the student to the proper office for a decision.

CHANGES IN UNIVERSITY REGULATIONS

The University and its colleges and schools reserve the right to change the fees, rules, and calendar regulating admission and registration, instruction in, and graduation from the University and its various divisions, and to change any other regulations affecting the student body. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who at that time are matriculated in the University. The University also reserves the right to withdraw courses at any time.

A graduate student must satisfy the requirements for an advanced degree which are in force at the time the degree is to be awarded.

ADMINISTRATION**BOARD OF REGENTS**

MRS. A. SCOTT BULLITT, <i>President</i>	Seattle
ALBERT B. MURPHY, M.D., <i>Vice-President</i>	Everett
JOSEPH DRUMHELLER	Spokane
JOHN L. KING	Seattle
HERBERT S. LITTLE	Seattle
HAROLD S. SHEFELMAN	Seattle
ROBERT J. WILLIS	Yakima
HELEN E. HOAGLAND, <i>Secretary</i>	
DON H. WAGEMAN, <i>Treasurer</i>	

OFFICERS OF ADMINISTRATION

GENERAL INFORMATION

GENERAL INFORMATION

THE SCHOOL OF SOCIAL WORK was established in March, 1958, by the Board of Regents of the University of Washington. Prior to this date, instruction in social work was offered through the Graduate School of Social Work, a division of the Graduate School of the University.

Instruction in social work was first offered at the University in 1919 under the Department of Sociology. The Graduate Division of Social Work was established in 1934, and in 1939 it became the Graduate School of Social Work under the Graduate School. The School of Social Work was recognized as an independent professional school in 1958. It is fully accredited by the Accreditation Commission of the Council on Social Work Education.

PHILOSOPHY AND OBJECTIVES

The School of Social Work provides educational activities for: (1) an undergraduate curriculum in Social Welfare through affiliation with the Division of General Studies, College of Arts and Sciences; (2) a post-baccalaureate (graduate) professional curriculum preparing for positions of professional social work responsibility in public and private agencies; (3) a program of courses in the field of social welfare for graduate-level students in other units of the University; (4) a program of courses in the field of social welfare for students enrolled in the adult evening classes program; (5) a program of short courses, institutes, and workshops for professional practitioners who enroll in such postgraduate activities as the means to improve professional competence; (6) a program of courses, seminars, institutes, and workshops for staff members of social welfare agencies whose interests are allied to the professional practice of social work.

An on-going research program is conducted by members of the faculty and students.

The professional curriculum, one of the major program responsibilities for the School of Social Work, provides an educational experience which has been designed to prepare students:

- a. To help individuals, groups, or communities with what are to them or to society unsatisfactory social situations where:
 - (1) an individual, group, or community is dissatisfied with his or its performance;
 - (2) an individual, group, or community violates explicitly stated requirements of society.
- b. To expand the knowledge upon which social work practice is based.
- c. To record and impart social work knowledge pertinent to social welfare.

ADMISSION TO THE GRADUATE SCHOOL AND THE SCHOOL OF SOCIAL WORK

Admission to the graduate professional program of the School of Social Work requires formal admission to the Graduate School, as well as acceptance by the School of Social Work.

In general, properly qualified students who are graduates of the University of Washington or of other colleges or Universities of recognized rank may be admitted to the Graduate School.

The primary criterion for admission to the Graduate School is the applicant's apparent ability, as decided by the University, to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance and, ordinarily, the applicant should have at least a B or 3.00 grade-point average for the courses taken during the junior and senior years of his undergraduate study. He should also show completion of an undergraduate program appropriate as preparation for graduate study in his chosen field. Consideration will also be given to other evidence which may be available. In some cases, an applicant may give promise of making satisfactory progress in graduate work although his undergraduate grade average may be less than B or 3.00 or his undergraduate preparation may be inadequate; in these cases and other unusual cases, an applicant may be admitted to the Graduate School on the favorable written recommendation of the appropriate University of Washington executive officer with approval by the Dean of the Graduate School. The University will be able to grant admission only if sufficient faculty and facilities are available to provide for the applicant's program.

Ordinarily, only students who have been admitted to the Graduate School are permitted to enroll in courses numbered 500 or above and to gain credits applicable to the fulfillment of advanced degree programs.

Admission to the Graduate School provides the opportunity for continuance of graduate study and research only for the period during which the graduate student maintains satisfactory performance and progress toward completion of his graduate degree program along with a status of physical and mental health approved by the University. The Dean of the Graduate School may alter the status of a graduate student.

ADMISSIONS PROCEDURE

Admission to the School of Social Work is accomplished through:

- a. the filing of an application for admission to the Graduate School and credentials with the University's Office of Admissions, and
- b. the filing of a second special application form and other credentials with the School of Social Work, and
- c. arranging for an interview with a representative of the School of Social Work.

The necessary application forms, which are self-explanatory, may be obtained from the University's Office of Admissions and the School of Social Work, respectively. Complete credentials, as indicated, must be filed prior to the following dates in order to be assured of consideration for admission to the quarter for which application is being made: July 15 for Autumn Quarter; December 1 for Winter Quarter; March 1 for Spring Quarter; May 15 for Summer Quarter.

When the required application forms and credentials have been received and evaluated, the applicant will be notified of his admission status. Students wishing an unofficial evaluation of their transcripts and advanced information regarding their eligibility for admission may submit credentials in the spring term preceding graduation.

All records become a part of the official file and can neither be returned nor duplicated for any purpose. Failure to submit complete credentials will be considered a serious breach of honor, and may result in permanent dismissal from the University.

A leaflet giving general information and instructions for registration is mailed with the Notice of Admission. In the event of a discrepancy, instructions in the leaflet supersede those found in earlier publications. *The University assumes no responsibility for students who do not apply the information or observe the instructions given in the leaflet, or for applicants who come to the campus before they have been officially notified of their admission.*

The admissions credentials of applicants who do not register for the quarter to which they have been admitted are normally retained in the Office of Admissions for a period of one year from the date of application. At the end of this period, credentials on file are discarded unless the applicant has notified the Office of his continued interest in attending the University, or of his enrollment in the Evening Classes program. Should a student wish to renew his application after the one-year lapse, he must submit new credentials in advance of the date given above for the quarter desired.

A student entering the University for the first time is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The Office of Admissions will send new students the form and necessary instructions. See page 25.

ADMISSION OF UNIVERSITY OF WASHINGTON STUDENTS

University of Washington graduates apply for admission in the same manner and satisfy the same requirements as students completing their baccalaureate degrees at other schools. They may obtain the appropriate forms from the Office of Admissions and the School of Social Work.

University of Washington students who are within 6 credits of completing their undergraduate work, and who otherwise meet the requirements for admission to the Graduate School, may register the quarter just prior to admission to the Graduate School for as many as 6 credits in graduate courses. This is in addition to their 6 credits of undergraduate work. Although this dual registration must receive prior approval by the Graduate School, students concerned will not be reclassified as graduates until the bachelor's degree has been granted and after official admission to the Graduate School. Only under these circumstances may graduate work taken as an undergraduate be applied toward an advanced degree.

Former students of the University of Washington who were not in residence the preceding Spring Quarter are given until September 1 to file complete credentials for an application for Autumn Quarter, 1962, and until August 15 to file credentials for subsequent Autumn Quarter applications. However, *the special application form must be filed with the School of Social Work before August 1.*

ADMISSION OF FOREIGN STUDENTS AND STUDENTS EDUCATED ABROAD

Applicants for admission with graduate or advanced undergraduate standing are expected to meet the same general requirements as nonresidents of Washington educated in American schools. However, they must file their credentials before March 1 to be considered for admission Autumn Quarter, or six months before the opening of another quarter in which they may wish to enroll. In addition, they must demonstrate a satisfactory command of the English language, and must have sufficient funds available in the United States to meet their expenses.

The official record of the Canadian student is the matriculation certificate or university admission certificate of his province. Canadian and foreign students who have been in university attendance must have official transcripts forwarded as required of all students. High school graduates and university transfer students must meet the scholarship requirements for nonresident students. See above.

ADMISSION OF VETERANS

Veterans and children of deceased veterans should meet the general admission criteria and follow the general procedures outlined for all applicants. Applications for and questions about government aid should be addressed to the Veterans Administration Regional Office.

World War I or II Veterans

Under certain conditions a veteran who is not eligible for Veterans Administration benefits is fully or partly exempt from tuition charges. See page 27.

Korean Veterans

A Korean veteran under Public Law 550 should obtain admittance to the University prior to making application for a Certificate for Education and Training, thus eliminating the chance of obtaining a certificate valid for an incorrect degree. If the veteran has any questions regarding application for a certificate, he should consult the Veterans Division, Safety Division Building. Educational allowance payments are made directly to the veteran by the Veterans Administration after the veteran and institution submit a monthly attendance certification.

Korean Certificate

Application for this certificate should be made at least four weeks prior to the beginning of University instruction. If the veteran is eligible, the Veterans Administration will issue him a Certificate for Education and Training which must be presented, along with his Program of Studies, to the Veterans Division, Safety Division Building as soon as registration is completed. A Korean veteran should be prepared to meet all his own expenses as well as the cost of tuition, fees, and supplies for at least two months, because allowances are not made until after a full month's attendance has been established.

Quarter Credit Requirements (Public Law 550)

14 credits	Full subsistence
10 to 13 credits	Three-fourths subsistence
7 to 9 credits	One-half subsistence
6 credits or less	Established tuition and fees
	or credits $\div 14 \times \$110.00$, whichever is the lesser.

Graduate Credit Requirements (Public Law 550) 500-level Courses or Above

9 credits	Full subsistence
7 to 8 credits	Three-fourths subsistence
5 to 6 credits	One-half subsistence
4 credits or less	Established tuition and fees
	or credits $\div 14 \times \$110.00$, whichever is the lesser.

If a graduate is combining 400-level courses with 500-level courses, he should consult with the Veterans Division, Safety Division Building, to determine the scale of pay.

Termination of Training

A veteran *eligible* under Public Law 550 must complete his training by *eight* years after his release from active service, or by January 31, 1965, whichever is earlier.

Disabled Veterans

A veteran with a disability under Public Law 894 should contact a training officer in the nearest Veterans Administration Office approximately four weeks prior to registration.

Children of Deceased Veterans

Public Law 634 grants federal benefits to children of deceased veterans of World War I, World War II, or the Korean Conflict who died as a result of injury or disease incurred or aggravated while in the service. Information regarding eligibility under this law should be requested from a Veterans Administration Regional Office.

The Certificate for Education and Training issued to those eligible persons by the Veterans Administration is to be presented, along with the Program of Studies, to the Veterans Division, Safety Division Building, as soon as registration is completed.

MEDICAL EXAMINATION

A student entering the University for the first time, or returning to the University after an absence of more than one calendar year, or who has previously attended Summer Quarter classes but is entering regular University classes for the first time, is required to submit to the Student Health Service (Hall Health Center) a form containing his health history and a report of a physical examination by a physician. The form will be sent to new students by the Office of Admissions and to returning former students by the Registrar. This examination, which is required before a student may register, is taken at the student's expense. A chest X ray, also required of the above students, is given at the Student Health Service without charge.

With the exception of Canadian students, who will follow the above instructions, foreign students must take the required physical examination at the Student Health Service when they arrive on the campus.

REGISTRATION**REGULAR STUDENTS**

A regular student is a student who fulfills the following requirements: (1) he has been granted admission to the Graduate School and the School of Social Work; (2) his current Program of Studies is satisfactory to the Dean of the School of Social Work; (3) he has received medical clearance, and has completed his registration, including payment of tuition and fees, the filing of class cards, and the depositing of registration materials at Sections.

PART-TIME STUDENTS

Insofar as resources permit, the School of Social Work attempts to meet the needs of employed social workers in the community for part-time and/or continued study. Those persons meeting requirements for admission as regular students may take selected courses from the graduate curriculum for credit. Students who expect to use graduate credit accruing from part-time work must apply for admission and have admissibility established, to be assured that work satisfactorily completed may be credited toward degree requirements. Some of the advanced courses in the curriculum may be taken by graduates of schools of social work who wish "refresher courses."

Professional seminars are offered regularly for employed social workers. It is assumed that all who register for these seminars have completed the professional curriculum. Through the professional seminars, employed social workers may meet their need for continued study. Institutes and workshops on selected topics are regularly offered. In general, workshops and institutes are developed following requests from professional membership groups and/or employing agencies.

PROCEDURE

Each regular student will receive directions for registration from the Office of the School of Social Work. *Course programming and directions on registration in classes issued by the School of Social Work substitute for the registration appointment and directions incident thereto issued by the Registrar's Office. Directions pertaining to the payment of fees issued by the Registrar's Office are to be followed by social work students.*

REGISTERED CREDITS ALLOWED EACH QUARTER

A total of 15 credits per quarter is regarded as the maximum load in graduate work; 12 credits constitute a normal load. The programs of students employed in the University or elsewhere will be limited; such students must discuss their schedules with the Dean when they register. Students who are employed full time cannot register for more than 6 credits.

Only courses numbered 400, 500, and 600 in the major field can be applied to credit for advanced degrees. Courses numbered 300 are not applicable to credit toward advanced degrees, except when applied by permission toward the graduate minor, or as supporting courses.

CHANGES OF REGISTRATION

After students have registered, they cannot change their schedules except with permission of the School of Social Work and the Dean of the Graduate School. No student is permitted to make a registration change that involves entering a new course after the first calendar week of the quarter. After that time no student may register without the consent of the Dean of the Graduate School, the Office of the School of Social Work, and the instructor whose class the student wishes to enter.

WITHDRAWALS

WITHDRAWAL FROM A COURSE

Official withdrawal from a course is made only under the following conditions: (1) during the first fifteen calendar days of a quarter, with the consent of the withdrawing student's adviser; (2) after the first fifteen calendar days of a quarter and before the end of the first six calendar weeks of a quarter, with the approval of both the instructor of the course from which withdrawal is sought and of the dean of the college in which the withdrawing student is enrolled; and (3) after the first six calendar weeks of a quarter and before final examination week, only upon certification in writing to the Registrar by the dean of the college in which the withdrawing student is enrolled that, in the judgment of the dean, withdrawal is necessitated by the student's hardship. Withdrawals from courses accomplished by any other method are unofficial withdrawals which are entered on a student's record as EW, and are assigned the value of E in the computation of the student's grade-point average. No official withdrawal may be made during final examination week.

Official withdrawals are entered on a student's record as follows: (1) a withdrawal within the first fifteen calendar days of a quarter, as W; (2) a withdrawal after the first fifteen calendar days of a quarter, as PW, if the student's work has been satisfactory, and as E, if the student's work has been unsatisfactory. Grades of PW and W are assigned no value in the computation of grade-point averages.

WITHDRAWAL FROM THE UNIVERSITY

The student should obtain at the office of the Dean of the Graduate School the Request for Withdrawal From the University form.

SCHOLASTIC PERFORMANCE

Students are expected to make satisfactory progress toward degree requirements. Each student must present 72 quarter credits of passing work, of which 65 quarter credits must be of B work or better. Each student must maintain a grade-point average of B in all courses numbered 300 and above. If a grade of less than B is received in one of the prescribed or elective courses, the student is automatically issued an academic warning. If the student's record indicates that he is not making satisfactory progress toward the requirements enumerated above, he may be placed upon academic probation. If work in succeeding quarters is satisfactory, the student is automatically removed from probation. If the student is placed on probation in successive quarters, he may be dropped from the School of Social Work.

ADVISING

Each accepted applicant to the School of Social Work will be assigned a faculty adviser. Notification of adviser assignments is included with the registration materials forwarded to the student from the Office of the School of Social Work about September 1 preceding the opening of the Autumn Quarter.

FEES, EXTRA SERVICE CHARGES, AND RENTALS

All fees, extra service charges, and rentals are payable in United States dollars at the time of registration, except that new students must submit a \$50.00 advance payment of fees at the time they are admitted to the University. This advance

payment is applied against the total tuition and the fees collected from the student. In the event of failure to register, the \$50.00 advance payment is not refundable to the student. The University reserves the right to change any of its fees and charges without notice.

The fee schedules for resident and nonresident students, following, apply to the academic year (Autumn, Winter, and Spring Quarters). Summer fees are listed in the *Summer Quarter Bulletin*.

EXEMPTIONS

Veterans of World Wars I or II

Exemption from tuition charges is granted resident students who either (1) served in the United States Armed Forces during World War I and received honorable discharges; or (2) served in the United States Armed Forces during World War II at any time after December 6, 1941, and before January 1, 1947, and received honorable discharges, but are no longer entitled to federal educational benefits; or (3) are United States citizens who served in the armed forces of governments associated with the United States during World Wars I or II and received honorable discharges. Nonresident students who meet one of these requirements pay one-half of the nonresident tuition. This exemption is not granted to Summer Quarter students.

Proof of eligibility should be met as follows:

- (1) World War I veterans should present copy of discharge papers to Comptroller's Office, 203 Administration Building.
- (2) World War II veterans with Korean service or who have suffered disability should present a letter from the Veterans Administration Regional Office to the Veterans Division, Safety Division Building, stating they are no longer eligible for any federal educational benefits. (Excepted are those veterans who have had both World War II benefits and Korean benefits and have expired those benefits at the University of Washington.)
- (3) World War II veterans who have not suffered any disability or served in the Korean Conflict should present an 8½-inch x 11-inch photostat of discharge papers to the Veterans Division, Safety Division Building.

Exemption must be cleared prior to student's appointment day for registration in order to prevent personal payment.

EXTRA SERVICE CHARGES

A registration service charge of \$15.00 is assessed those students: (1) eligible for Advance (mail) Registration who fail to participate; or (2) who, after the established application deadline, are granted Appointments or Permits to register by In-Person Registration by action of the Registration Appeal Board. A late registration charge of \$15.00 is assessed any student granted permission to register after the last registration day before the opening of Autumn, Winter, or Spring Quarters by action of the Registration Appeal Board. A charge of \$5.00 is made Autumn, Winter, and Spring Quarters for each change of registration or change of section, or number of changes which are made simultaneously, except that there is no charge when the change is made on the initiative of the University.

Special Examination \$1.00

Removal of an Incomplete 2.00

Athletic Admission Ticket (Optional for ASUW members) 3.50-6.50
Autumn, Winter, and Spring Quarters, \$6.50; Winter and Spring Quarters, \$3.50;
Spring Quarter, \$3.50.

Breakage Ticket (required for Social Work 515 and Social Work 535)
(three quarters) 24.00

Thesis Only 56.50

Those registered for thesis only (for credit or final) must be certified by the Dean of the Graduate School and are required to pay this charge and any laboratory breakage charge.

Degree Final Only 56.50

Nonthesis students registered for degree final only must be certified by the Dean of the Graduate School and are required to pay this charge and any laboratory breakage charge.

Quarterly Grade Report .50

One grade report will be issued each quarter without charge; the charge, payable in advance, is made for each additional copy.

Transcripts 1.00

One transcript is furnished without charge; the charge, payable in advance, is made for each additional copy.

Thesis Binding and Publication 2.00

Master's degree candidates

The charge covers the cost of binding one copy for the University Library.

Diploma 5.00**FEES FOR RESIDENT STUDENTS**

A resident is one who has been domiciled in Washington for at least a year immediately prior to registration. The children of federal employees residing within the state of Washington and the children and spouses of staff members of the University are considered as residents for tuition purposes.

*Examples of Autumn, Winter, and Spring Quarter Fees for Various
Types of Registration*

Type of Registration	Tuition Fee	Incidental Fee	Other Fees* Autumn, Winter, and Spring Quarters	Total Fees Autumn, Winter, and Spring Quarters
Full-time students (undergraduate and graduate) except in Medical and Dental Schools	\$35.00	\$56.50	\$8.50	\$100.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	35.00	39.00	†	74.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time		56.50	8.50	65.00
Part-time (max. 6 credits)§		39.00	†	39.00
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (nonthesis)		56.50	†	56.50

* Other fees consist of Student Activities, \$2.50; ASUW Bond Redemption, \$3.50; Hub Bond Redemption, \$1.00; Building Fund, \$1.50.

† Optional; if membership in ASUW is desired, other fees should be added to the total fee as shown for this type of registration.

‡ See Exemptions (page 27) to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by the Graduate School.

PHYSICAL EDUCATION ACTIVITIES, per quarter: bowling, \$5.00; canoeing, \$3.00; golf instruction, \$1.50.

REFUND OF FEES, CHARGES, AND RENTALS

All fees will be refunded in full if complete withdrawal is made during the first three calendar days of the quarter; one-half the amount will be refunded if withdrawal is made during the first thirty calendar days. Refunds are not made to students withdrawing under discipline.

Applications for refund may be refused unless they are made during the quarter in which the fees apply.

At least two weeks must elapse between payment and refund, if payment was made by check.

FEES FOR NONRESIDENT STUDENTS

Prospective students are classified as nonresidents when their credentials come from schools outside Washington. If they believe they are residents, they may petition the Residence Classification Office, 205A Administration Building, for a change of classification.

*Examples of Autumn, Winter, and Spring Quarter Fees for Various
Types of Registration*

Type of Registration	Tuition Fee	Incidental Fee	Other Fees*	Total Fees
			Autumn, Winter, and Spring Quarters	Autumn, Winter, and Spring Quarters
Full-time students (undergraduate and graduate) except in Medical and Dental Schools	\$105.00	\$ 86.50	\$8.50	\$200.00
Auditors		39.00	†	39.00
Part-time (max. 6 credits exclusive of ROTC)§	105.00	69.00	†	174.00
Ex-service personnel of World Wars I and II† (Chapter 46, Laws of 1945)				
Full-time	52.50	86.50	8.50	147.50
Part-time (max. 6 credits)§	52.50	69.00	†	121.50
Students registered for thesis only (for credit or final)		56.50	†	56.50
Students registered for degree final only (nonthesis)		56.50	†	56.50

* Other fees consist of Student Activities, \$2.50; ASUW Bond Redemption, \$3.50; Hub Bond Redemption, \$1.00; Building Fund, \$1.50.

† Optional; if membership in ASUW is desired, other fees should be added to the total fee as shown for this type of registration.

‡ See Exemptions (page 27) to determine eligibility.

§ Load-hour equivalents of noncredit courses must be counted in the 6 credits.

|| Must be approved by the Graduate School.

ESTIMATE OF YEARLY EXPENSES

The figures given here are minimum estimates for an academic year, which includes Autumn, Winter, and Spring Quarters. Living costs and personal expenses vary widely with the needs of the individual student.

Tuition, Incidental, and Other Fees

Full-time resident student \$300.00

Full-time nonresident student 600.00

Athletic Admission Ticket (optional) 6.50

<i>Health and Accident Insurance (optional)</i>	17.25
<i>Breakage Tickets</i>	24.00
<i>Books and Supplies</i>	90.00
<i>Board and Room</i>	
Room and meals in Men's Residence Halls	720.00
Room and meals in Women's Residence Halls	660.00-765.00
Room and meals in fraternity or sorority house	670.00-760.00
(Including dues and special assessments.)	
Initial cost of joining is not included; this information may be obtained from the Interfraternity Council or Panhellenic Council.	
<i>Personal Expenses</i>	300.00

STUDENT ACTIVITIES AND SERVICES

STUDENT SOCIAL WORK CLUB

All students enrolled in the professional curriculum in social work are eligible for membership in the Student Social Work Club. Through participation in the Club program and committee work, students have an opportunity to participate in activities which are pertinent to their professional career interests. The Club serves as sponsor of several social events.

STUDENT SOCIAL WORK CONFERENCE

The Student Club of the School of Social Work, the Alumni Association, and the Puget Sound Chapter of the National Association of Social Workers annually plan a Student Social Work Conference to honor students who have written outstanding papers during the academic year. The conference provides an occasion for members of the professional group to welcome graduates to its ranks and to provide an opportunity for undergraduate students to learn about social work from students of the School.

Papers are presented in workshops or read at general sessions by students; representatives of agencies active in the topic area discuss practice implications. Students gain experience in planning, organizing, and operating a conference.

OFFICE OF THE DEAN OF STUDENTS

The Office of the Dean of Students is concerned with the general welfare of students and welcomes correspondence and conferences with both parents and students. The Office works closely with the advisory system of the colleges and schools of the University; it directs students to faculty advisers, the Counseling Center, and other persons and agencies offering information and assistance with personal and similar problems. The Dean of Students Office also has current information on Selective Service Regulations.

The Foreign Students Office operates through the Office of the Dean of Students. The Foreign Student Adviser and his staff offer guidance on all nonacademic problems to students from other countries. Questions about immigration regulations, housing, social relationships, personal problems, finances, minimum course requirements, and employment should be referred to this Adviser. Students who are interested in study abroad may obtain from him information about schools in other countries and about Fulbright and other scholarships.

COUNSELING CENTER

The Counseling Center in Lewis Hall Annex offers vocational and educational counseling to students who need help in their adjustments to college. The staff of the Center, which includes vocational counselors and psychologists, works closely with other student services and supplements the academic advisory program.

HOUSING

Information and applications for residence in University-owned housing for single persons may be obtained by writing to the Manager, Men's Residence Halls, 1201 N.E. Campus Parkway, Seattle 5, or to the Manager, Women's Residence Halls, University of Washington, Seattle 5. Preference in assignment to vacancies is given to students under twenty-one years of age until August 1; thereafter assignments are made in the order of application. Prospective students may apply for the residence halls prior to their acceptance by the University but not before April 15.

University regulations require that women students under twenty-one who do not live at home must live in approved group residences such as the Women's Residence Halls, sororities, and church-sponsored living groups. Other types of living arrangements must be reported to the Dean of Women and be approved by the student's parents or guardian.

Information about fraternities or sororities may be obtained by writing to the Interfraternity Council or the Panhellenic Council, Student Union Building, University of Washington, Seattle 5.

The Office of Student Residences maintains listings of off-campus rooms, rooms with board, housekeeping rooms, apartments, and houses which are available to University students. These listings must, however, be consulted in person.

Teaching and research assistants and other part-time sub-faculty personnel are given first priority for assignment to University-owned housing facilities for married students. Second preference for assignment to Union Bay Village or Sand Point Homes is given to graduate, medical, dental, and law students who have children. Prospective students are eligible to apply when they have been accepted for admission. Write to the Office of Student Residences, 23 Administration Building, for further information and application forms.

A complete statement of University housing policy appears in the *Student Handbook of University Rules and Regulations* and the *Housing Bulletin*.

HEALTH SERVICES

The University maintains a health service and infirmary to help guard against infectious diseases and incipient ill health.

The infirmary receives bed patients at any hour and provides nursing care, medicines, and the attendance of a staff doctor up to one week each quarter free of charge. For a period longer than one week, a charge of \$2.00 a day is made. At their own expense, infirmary patients may consult any licensed physician in good standing.

Health and accident insurance for students is available at the time of registration.

EMPLOYMENT

Information concerning part- and full-time work off campus may be obtained through the University Placement Office. Applications are accepted from students or graduates of the University and from the wives or husbands of University students. Applications must be made in person after residence in Seattle has been established. Placement in jobs on the campus is handled by the Personnel Department and by the ASUW Personnel Office.

Listings of part-time work in social agencies in the community are included in placement files within the School of Social Work. Faculty advisers are in a position to help students find part-time work.

SCHOLARSHIP AWARDS, FELLOWSHIPS, AND LOANS

Social work students are eligible to receive a number of awards for outstanding achievement. Awards are made on the basis of past academic record and professional promise. Financial need is a part of the Faculty Scholarship Committee's consideration, if the foregoing factors place the student in a competitive position

for an award. The School of Social Work participates with agencies and foundations in making many awards of varying amounts available to students who are in attendance at the School. Awards run from approximately \$300 per academic year to \$2,400 per academic year.

Scholarships and loans through the University are also available. Information may be obtained by writing to the Office of the Dean of Students, University of Washington.

The University of Washington also awards 100 tuition scholarships each academic year to worthy students from other countries. There are no scholarships available for the Summer Quarter. These awards are made on the basis of the academic record of the student, recommendations from his professors, his need for such assistance, and the availability of such openings in his department at the University. These scholarships cover tuition only and are administered by the Foreign Exchange Scholarship Committee, Foreign Students Office, University of Washington, Seattle 5, Washington, U.S.A. Application for these scholarships must be made by March 1 for the following year.

Social work students may apply for loans from the Mildred Buck Loan Fund and Family Counseling Service Student Loan Fund, which were established for social work students by friends of the School of Social Work.

Some of the awards annually made under the administration of the School of Social Work Faculty Scholarship Committee are:

CROWN ZELLERBACH FOUNDATION SCHOLARSHIP AND FELLOWSHIP AWARDS, \$1,200 and \$600.

NATIONAL INSTITUTE OF MENTAL HEALTH TRAINEESHIPS, from \$1,800 to \$2,000.

VOCATIONAL REHABILITATION SCHOLARSHIP AWARDS, from \$1,800 to \$2,000.

FLORENCE MARY HAMMOND MEMORIAL SCHOLARSHIP, at least one award of \$1,800.

Interest in applying for a scholarship award, fellowship, or training stipend should be indicated on the application form submitted to the School of Social Work or by letter to the Chairman of the Faculty Scholarship Committee. In turn, the interested student will receive a listing of available financial aids from the Chairman of the Committee. Scholarship awards are made annually about the middle of May.

PLACEMENT AFTER GRADUATION

Because of the critical shortage of professionally prepared social workers, employment opportunities for graduates are numerous. Position vacancies in agencies and organizations in the immediate geographical region are maintained in a placement file within the library of the School of Social Work. All agencies and organizations in the region are encouraged to list their vacancies with the School of Social Work. A file of announcements of position vacancies nationwide and in foreign countries is maintained as received through the initiation of the agencies-seeking staff. Representatives of major agencies visit the campus each year to recruit graduating students. Students are encouraged to interview agency representatives.

THE SOCIAL WORK PROGRAMS

THE SOCIAL WORK PROGRAMS

UNDERGRADUATE CURRICULUM IN SOCIAL WELFARE

The School of Social Work offers a program leading to an undergraduate major in Social Welfare in collaboration with the Division of General Studies of the College of Arts and Sciences. Students planning to undertake professional study in social work, students who are interested in appointment to social welfare positions which do not require professional education, and students who wish a liberal arts background with a concentration in the social sciences and social welfare, may fulfill their interests by enrollment in the Division of General Studies, College of Arts and Sciences. This program includes a pattern of study in the social sciences to achieve a broader and deeper understanding of man and society and the organization of social welfare institutions designed to meet human need. Depth of study is achieved through the advanced requirements in psychology and sociology and through the pattern of study in the social work courses and the senior thesis. These latter courses provide an integrative educational experience as well as an opportunity for extended study by which students may critically examine and systematically observe the system and structure of social welfare institutions. Educational advising for this curriculum is provided by staff of the Office of the Division of General Studies and/or the Director of the undergraduate curriculum in the School of Social Work. Members of the faculty of the School of Social Work are available to advise students on their career interests and career planning in professional social work.

COURSES

- | | | |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 300 | Survey of Social Service Programs (3)
Social welfare programs in the United States. Exploration of the principles and practices in the use of these programs to meet human needs. Prerequisite, upper-division standing. (Offered in Evening Classes and Summer Quarter only.) | Kelley, Lawrence |
| 391 | Supervised Study (2-6, maximum 6)
Specialized academic and field study in an agency of a selected social welfare problem. Prerequisite, permission. | Kelley, Lawrence |
| 400 | Field of Social Welfare (5)
The origin, development, and present status of social service programs, with particular emphasis on the relationship of program resources, human needs, and the methods through which services are provided. Prerequisite, upper-division standing. | Kelley, Lawrence |

401 Principles of Interviewing (2)

Kelley, Lawrence, Reiss

The interview as a basic method in helping people. Analysis from case records with objective of identifying processes and techniques of skillful interviewing; ways in which purpose and setting of the interview influence its nature and course. Prerequisite, upper-division standing.

COURSES ON CHILD CARE

Courses for child-care personnel are generally offered during the Summer Quarter only, however, 301, 302, and 303 are also offered in the Evening Classes program. These courses are specifically planned for child-care staff presently employed in children's institutions. Registration may be on a credit or noncredit basis. Applicants who wish University credit must have had at least two full years of undergraduate college work. Regular attendance and participation in these courses will be recognized with a certificate of attendance. Application for the Child-Care Courses must be made to the Dean, School of Social Work, University of Washington.

301 Child Care: Social Development (2)

Understanding of human growth and development in its continuum and developmental phases as related to the social development of children and youth. Prerequisite, permission.

302 Child Care: Care of Children in Groups (2)

Identification and analysis of roles and responsibilities of child-care staff in working with groups of children and youth. Prerequisite, permission.

303 Child Care: Play and Leisure-time Activities (2)

Introduction and assessment of relevancy of play and leisure-time activities associated with child-care function. Prerequisite, permission.

304 Child Care: Supervision of Child-care Personnel (2)

Introduction to roles and processes of supervision of personnel in residential child-care and treatment programs. Prerequisite, permission.

305 Child Care: Care and Treatment of Pathological Group Situations (2)

Study of a range of pathological group situations in the context of group living within institutional settings and application of such knowledge in dealing with these situations. Prerequisite, permission.

REFRESHER COURSES

Refresher courses are offered each Summer Quarter for students who have earned a professional degree, but for whom there has been a lapse in professional practice. These courses are specifically helpful to students who have completed one year of post-baccalaureate professional study in an accredited school of social work and who wish to return for continued study leading to the professional degree. For students whose previous social work education was completed six years before re-entry to full-time study, satisfactory completion of the refresher courses is one of the qualifications for admission as a degree candidate. Credits earned in refresher courses are not applicable toward degree requirements.

461 Refresher Course: Social Work Methods (2)

A review of the basic principles and concepts underlying professional practice of social work methods. Also, a review of recent professional literature and clinical materials.

462 Refresher Course: Human Growth and Behavior (2)

A review of knowledge pertaining to concepts of development and behavior as related to social behavior and social work practice.

463 Refresher Course: Social Services (2)

A review and analysis of organization and structure of social welfare services and programs.

Application Procedure: Application for the refresher courses must be made to the Dean, School of Social Work, University of Washington, Seattle 5, Washington. After the applicant has been accepted, a Summer Quarter Bulletin with instructions for registration will be mailed.

THE MASTER OF SOCIAL WORK PROGRAM

The program of professional social work education at the University of Washington is designed to prepare students for professional practice in social

work. It is a two-year program of study leading to the Master of Social Work degree. Among the areas of practice in which students are prepared to accept staff positions are the following: adoptions, foster home care, institutional care, child protection, child guidance, family counseling, probation and parole, medical social work, psychiatric social work, school social work, public assistance service, community center work, social group service programs.

The course of study is composed of courses concerned with the philosophy, organization, and administration of social service programs; the understanding of human growth and behavior; the use of professional social work methods, and the use of research methods. It is divided into five curriculum segments. Each student must present 8 credits of satisfactory work in the social welfare organization segment of the curriculum. Courses in this segment are included in those numbered from 502 through 504 and in the 520 seminar series. Courses in Sociology listed as 472, 473, 474, 571, 572, and 573, in the section, "Courses in Affiliated Departments" may be elected as equivalents to required social work seminars. A minimum of 11 credits of satisfactory work must be presented in the Human Growth and Behavior segment of the curriculum. These courses are included in those Psychiatry and Psychology courses indicated as "Courses in Affiliated Departments" and courses numbered 556 and 557. A total of 18 credits is required in the Social Work Methods sequence of the curriculum. Each student must satisfactorily complete the beginning course in Social Case Work, Social Group Work, and in Social Community Organization. In addition, the student must complete a course in Basic Values and Concepts in Social Work Method and a pattern of five sequential courses in one of the direct service methods. Research requirements in the curriculum include 2 credits in the beginning course in research (590) and satisfactory completion of a group research project (593-594-595) or a thesis (700).

Each student spends a portion of his time testing his developing knowledge and skill in a health, welfare, or group-service agency. This laboratory experience is under the supervision and instruction of carefully selected, professionally-prepared social workers. It provides students with an opportunity to develop skills in working with individuals and groups; to integrate classroom theoretical material with an actual work experience, and to develop professional attitudes and efficient methods of professional work. In addition to tuition costs and general fees, each student must plan for the costs of transportation to and from the field instruction agencies (approximately \$15.00 per month), and the payment of a special laboratory fee for the field instruction courses.

Requirements for the degree include: Completion of the prescribed curriculum, a minimum of three quarters in residence at this School, the equivalent of field instruction in six quarters, and completion of either an individual thesis or a group research project. Each student must present a total of 72 quarter credits of passing work and maintain a B average in all courses numbered 300 and above. In addition, the student must present a minimum of 65 quarter credits of B work or better. The degree is awarded on the basis of the student's competence in theory and practice, as evidenced through satisfactory completion of courses. The field work performance is a further test of competence. There is no foreign language requirement.

PROGRAM OPTIONS FOR THE MASTER OF SOCIAL WORK DEGREE

The University of Washington, School of Social Work, offers its degree program through two options. Under one, the student may enroll and complete his program on the Seattle campus. Under the second, he may complete a substantial part of his education through a field teaching program established in Spokane, Washington. The development of the Spokane Program has enabled us to utilize the excellent field instruction resources of eastern Washington.

Under each option, students receive comparable education. The course and field requirements are the same; the standards of instruction and performance are the same. Differences occur primarily in the sequential arrangement of the cur-

riculum. Under the Seattle campus plan, students begin immediately with field and classroom instruction which continues concurrently throughout the six quarters of work (excluding summers) required for graduation. These students remain in the Seattle area throughout this period of time. The normal quarter credit load is 12 credits.

Under the Spokane Program option, students begin in Seattle with classroom work only. This continues for two quarters, during which time they are grounded in basic knowledge and theory relevant to professional social work. Subsequently, they shift to Spokane for three consecutive quarters (including summer). Here, they also have a concurrent program, but primary emphasis is placed on the field experience. All field requirements are completed within these three quarters. One or two courses in methods or human growth and behavior are also taken each quarter. The student then shifts back to Seattle for a final two quarters of classroom work which particularly is focused on integration of learning experiences. The usual quarter-credit load under this plan is 10 credits. Students normally graduate at the same time as their peers enrolled in the Seattle program.

A regular member of the School of Social Work faculty is in residence in the Spokane area. Field instruction in agencies is provided by well-qualified social workers. Currently, field instruction settings related to work with families and children and to mental health problems are being utilized.

APPLICATION PROCEDURE

Information about application procedure for admission to the professional degree program is found under the heading, "Admission to the Graduate School and the School of Social Work" page 21.

COURSES

- 502, 503, 504 Social Welfare Organization (2,2,2)** **Parsons, Smith**
Historical origins of concepts, policies, and social welfare institutions, critical analysis of current public and private programs at all jurisdictional levels; use of social welfare concepts in planning.
- 508 Basic Values and Concepts in Social Work Method (2)** **Abrahamson, Maier, Walter**
An identification and analysis of basic value concepts and principles underlying social case work, social group work, and social community organization practice.
- 509 Readings in Social Work (*, maximum 6)**
Prerequisite, permission.
- 510 Social Case Work (2)** **Abrahamson, Burg, Reiss**
The case work process in a variety of settings through the analysis and discussion of case records; consideration of basic interviewing principles; development of understanding of motivations in human behavior and application of this understanding in case work. Prerequisite, permission.
- 511 Social Case Work (2)** **Abrahamson, Burg, Reiss**
Continuation of generic case-work theory, with emphasis on diagnosis and case-work treatment. Prerequisite, 510.
- 512 Social Case Work (2)** **Abrahamson, Burg, Reiss**
Elaboration and intensification of basic case-work concepts and their application in practice to various types of agencies. Prerequisite, 511.
- 515 Field Instruction (4-8, maximum 12)** **C. Macdonald**
Prerequisite, permission.
- 520 Seminar (*, maximum 6)**
Prerequisite, permission.
- 521 Social Group Work (2)** **DeNoon, Maier, Walter**
Professional social group work as a method and process; objectives, techniques, skills, and media of group work method, and criteria for evaluation of results. Prerequisite, permission.
- 522 Social Group Work (2)** **Maier**
Continuation of social group work study with emphasis on process in groups and identification of group goals.
- 523 Social Group Work (2)** **Walter**
Continuation of study in social group work with emphasis on method, skill, and analysis of the professional role.
- 524 Advanced Social Group Work (2)** **Walter**
Continued intensive study on social group work method with emphasis on the utilization of program media and the concept of program planning process.

- 525 Advanced Social Group Work (2)** **DeNoon**
Continued intensive study on social group work method with emphasis on structuring group situations, and application of the method to institutional settings.
- 526 Advanced Social Group Work** **Maier**
Continued intensive study of social group work method with emphasis on the integration of prerequisite course content and the analysis of issues and trends in social group work practice.
- 530 Advanced Social Case Work (2)** **Abrahamson, Hunt, Reiss, Takagi**
Intensive study of the case-work process to deepen and broaden the caseworker's knowledge and understanding of the dynamics of human behavior and to enable him to develop greater skill in interviewing. Prerequisite, permission.
- 531 Advanced Social Case Work (2)** **Abrahamson, Hunt, Reiss, Takagi**
Continuation of intensive study of case material, with emphasis on sound direction in case-work treatment. Prerequisite, 530.
- 532 Advanced Social Case Work (2)** **Abrahamson, Hunt, Reiss, Takagi**
Intensive drill in case analysis, seeing the case as a whole, achieving a balanced perspective on the relationship between inner and outer forces, and planning appropriate treatment. Prerequisite, 531.
- 533, 534 Trends in Social Case Work (2,2)** **Abrahamson, Hunt, Reiss**
Generic and differential factors in understanding and utilizing various administrative settings in social case-work practice. Study of developments and trends in social case-work practice. Prerequisite, permission.
- 535 Advanced Field Instruction (4-8, maximum 12)** **C. Macdonald**
Prerequisite, 515.
- 556 Social Aspects of Illness and Disability (2)** **R. Macdonald**
Physical growth and change of the individual as correlated with factors of emotional and social development; consideration of specific medical problems. Prerequisite, permission.
- 557 Social Work with Sick, Disabled, or Handicapped Persons** **R. Macdonald**
Application of select behavioral science concepts to social work practice with persons who are ill, handicapped, or disabled. Prerequisite, 556.
- 570 Administration of Social Agencies (2)** **Parsons**
Problems of administration that confront the administrator and his staff in any public or private agency; relations with board and staff; problems of finance and budget making, office management. Emphasis on dynamic principles of the administrative process. Prerequisite, permission.
- 572 Social Community Organization (2)** **Walter**
Problems of adjusting social welfare needs and resources; understanding the social forces of the community; methods used by public and private agencies to organize to meet social welfare needs; interpretation of agency programs to the community; the place of boards and committees. Prerequisite, permission.
- 573 Social Welfare Planning Process (2)** **Walter**
An examination of the process of promoting and sustaining an adjustment between social welfare resources and social welfare needs. Analysis of personal and social factors in specific community organization efforts and the nature of the professional worker's participation in them. Discussion based upon records of specific community situations. Prerequisite, 572.
- 580 Public Welfare (2)** **Parsons**
Care of needy under poor laws, emergency relief and modern public assistance programs; characteristics of state assistance plans; administration of work relief; federal grants-in-aid; adult probation and parole; vocational rehabilitation services. Prerequisite, permission.
- 586 Statistics in Social Work (2)**
Elementary statistical method applied to social welfare problems; sources for continuing statistical reports; interpretation and use of statistics in welfare administration. Prerequisite, permission.
- 587 Law and Social Welfare (2)** **Gronewold**
The basis of law, its philosophy and development, its broad principles, and the procedure by which it operates; specific aspects of law pertinent to social work orientation, including law in relation to the family, children, guardianships, and acts against society, and property laws. Prerequisite, permission.
- 590, 591, 592 Social Work Research (2,2,2)** **Stutsman, Northwood**
Methods used in the study of social work practice, program evaluation, and community needs and resources. Study of current social work research field practice through group research projects. Presentation and evaluation of research projects currently carried by students in the research program. Prerequisite, second-year graduate standing for 590; 590 for 591; 591 for 592.
- 593-594-595 Field Practice in Research (2-2-2)**
Field practice in a group project in lieu of an individual thesis. Includes development of research design, collection of data, tabulation and analysis, and report writing. Prerequisite, 590 or its equivalent.
- 700 Thesis (*)**
- 702 Degree Final (0)**
Limited to students completing a nonthesis degree program.

COURSES IN AFFILIATED DEPARTMENTS**PSYCHIATRY**

450 Principles of Personality Development (2)	Kaufman
451 Principles of Personality Development (2)	Heilbrunn
452 Clinical Psychiatry (2)	Schwartz
553 Psychodynamics and Psychopathology (2)	Heilbrunn
559 Child Psychiatry (2)	Kaufman

PSYCHOLOGY

599 Survey of Clinical Psychometrics (2)	Strother
------------------------------------------	----------

SOCIOLOGY

472 Juvenile Delinquency (5)	Hayner, Schrag
473 Corrections (5)	Hayner, Schrag
474 Probation and Parole (3)	Hayner
571 Correctional Communities (3)	Hayner
572 Analysis of Criminal Careers (3)	Hayner
573 Crime Prevention (3)	Hayner
574 Seminar in Methods of Criminological Research (3)	Schrag
