PRESIDENT'S MESSAGE

A university is a community of scholars and artists, a place where faculty and students pursue truth and enrich human understanding. Universities have been regarded as essential attributes of civilized societies for hundreds of years, providing training for the professions and more general educational opportunities in scientific and humanistic studies.

The University of Washington has become one of the finest universities in the country, richly combining its research, instructional, and public service missions. It is an exciting place to be, and its contributions to the state and the nation will continue to grow as we all face the formidable challenges of the late twentieth century.

A handwritten signature in dark ink, reading "W.P. Gerberding". The signature is fluid and cursive, with a long, sweeping underline.

William P. Gerberding, President

University of Washington
(Name of office and location)
Seattle, Washington 98195

The University of Washington, as a standing policy, does not discriminate on the basis of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran. Any discriminatory action can be a cause for disciplinary action. This policy applies to all University programs and facilities, including, but not limited to, admissions, educational programs, employment, and patient and hospital services. Such discrimination is prohibited by Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, Age Discrimination in Employment Act Amendments of 1978, Vietnam Era Veterans' Readjustment Assistance Act of 1974, other federal and state statutes and regulations, and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is under the direction of the Equal Employment Officer, Dr. Helen Remick, 126 Brooklyn Building, 4045 Brooklyn Ave. N.E., JA-08, University of Washington, Seattle, Washington 98195, telephone (206) 543-1830, VTDD.

Additional information concerning the equality of opportunity and affirmative action policies and procedures including grievance procedures are in the *Operations Manual*, D45.4, D45.5, D46.2 and the *UW Handbook*, Vol. IV, p. 44.

Distributed free to enrolled undergraduate students, prospective and enrolled graduate students, and to high schools, colleges, universities, libraries, and educational agencies in the state of Washington.

Copies may be purchased from the University Book Store, 4326 University Way Northeast, Seattle, Washington 98105.

University of Washington Bulletin
(USPS 078-680)
General Series No. 1251
June 1990

Published six times per year, in January, February, June, July, and twice in September, at Seattle, Washington, by the University of Washington. Second-class postage paid at Seattle, Washington 98195.

Postmaster: Send address changes to University of Washington Bulletin, 3900 Seventh Avenue Northeast, Seattle, Washington 98195.

* If enrollment quotas are filled before the application closing date, it may not be possible to offer enrollment, although an applicant may be scholastically eligible for admission.

Dates in this calendar are subject to change without notice. A detailed calendar with the latest information on registration is printed in each issue of the quarterly *Time Schedule*.

USING THE GENERAL CATALOG

The material in this catalog has been compiled and organized to provide the reader with a comprehensive overall view of the programs and courses at the University of Washington—Seattle. It includes academic requirements and procedures necessary for admission and graduation. Information on programs, faculty, and courses is usually arranged in alphabetical order following departmental structure within each school or college.

Because curriculum revisions and program changes usually occur during the two-year period the *General Catalog* is in circulation, students should assume the responsibility of consulting the appropriate academic unit or adviser for more current or specific information. The quarterly *Time Schedule* gives information on courses offered, class hours, and classroom locations, and has the latest calendar dates, fees, and details on registration.

All announcements in the *General Catalog* are subject to change without notice and do not constitute an agreement between the University of Washington—Seattle and the student.

Founded in 1861, the University of Washington is the oldest state-assisted institution of higher education on the Pacific coast. From its original site on a ten-acre tract of wooded wilderness that is now located in downtown Seattle, the campus has grown to comprise 680 acres of trees, landscape, and buildings. Located between the shores of Lake Washington and Lake Union, it is in a residential section of the city that long has been considered one of the most attractive in the nation.

Enrollment at the University in Autumn Quarter 1989 was 32,925, of which 24,129 were undergraduates and the balance were in professional and graduate programs. Approximately ninety percent of the undergraduates enter as freshmen from Washington high schools or as transfer students from Washington community colleges or other colleges and universities in the state. The grade-point average for the regularly admitted freshman class entering in Autumn Quarter 1989 was 3.51. In 1989, the full-time teaching faculty of the University numbered 2,702 members.

The University recognizes as one of its highest educational priorities the need to increase the number of qualified minorities in certain academic fields and professions to which they have been historically denied access or have been traditionally underrepresented. Special educational support services are provided through the Office of Minority Affairs and the Graduate School's Minority Education Division to facilitate the entry of persons from underrepresented minorities and to enhance their likelihood of success while attending the University.

Accreditation

The University is accredited by the Northwest Association of Schools and Colleges and is a member of the Association of American Universities. Individual schools and colleges are members of the various accrediting associations in their respective fields.

Academic Sessions

University instruction is offered during Autumn, Winter, and Spring quarters, each lasting approximately eleven weeks. The nine-week Summer Quarter is divided into two 4½-week terms.

Branch Campuses

The University offers bachelor's degree programs at two branch campuses designed to provide additional educational opportunities principally for residents of the Central Puget Sound region. The academic program offered at the branch campuses, an upper-division course of study leading to a Bachelor of Arts in Liberal Studies, enrolls students who have already completed two years (90 quarter credits) of college study. Further information is provided in the University Branch Campuses section of this catalog.

Evening Degree Program

A new College of Arts and Sciences Evening Degree program in General Studies will start in Autumn Quarter 1990. The upper-division program serves transfer students with an interdisciplinary program leading to the baccalaureate degree. Classes are scheduled to begin after 4:30 p.m. Formal admission to the University is required for the Evening Degree program. Transfer to the day program requires separate application. For information or application materials, telephone (206) 543-2320.

Evening Classes

Opportunities for evening study at the University are varied to serve individual students' interests and academic goals. Matriculated students may enroll in day or evening courses listed in the quarterly *Time Schedule*. For nonmatriculated (not formally admitted) students, UW Extension offers an evening credit program and noncredit evening programs, which are described in the UW Extension section of this catalog. Matriculated students enrolling in courses listed only in the UW Extension catalog will pay separate extension course fees.

Certificate Programs

UW Extension offers carefully planned certificate programs of study in several areas. The Studies in the Humanities program is a twelve-course noncredit study of the classics. Other programs focus on specific careers and industries. The programs offer specialized training that supplements other education and work experience. In some certificate programs, students earn academic credit; in others, they earn certificates of completion. To accommodate working professionals, UW Extension schedules classes to meet evenings or weekends. Course fees and admission requirements vary, and enrollment in all certificate programs is limited. More information may be obtained by consulting the quarterly UW Extension catalog, available by telephone, 543-2320.

Summer Quarter

During Summer Quarter, a wide selection of courses in most major fields is available to graduate and undergraduate students pursuing degree programs on a year-round basis as well as to summer-only students seeking to broaden, intensify, or refresh their subject-matter competence. Summer-only students can apply for admission as nonmatriculated students, and can earn credits toward a degree at another college or enroll in UW classes even if they are not pursuing a UW degree. This status also accommodates teachers and school administrators who take special interest courses to earn additional university credits and post-baccalaureate students who do not desire formal admission to a graduate, or second undergraduate, program. Freshman students entering from high school are encouraged to begin their college work in the summer. Through the Office of Admissions, enrollment in

summer courses may be arranged for specifically qualified students who have not yet completed high school.

Credits earned during Summer Quarter are evaluated as residence credits; and, with the exception of separate fee schedules for medical and dental students, Summer Quarter fees closely parallel those of the other quarters. Nonresidents and residents pay the same fees during the summer.

A complete listing of Summer Quarter courses is published in the Summer Quarter bulletin, available on request from the University of Washington, Office of Summer Quarter, GH-24, Seattle, Washington 98195, telephone (206) 543-2320.

University Libraries

The University Libraries, with almost 5-million volumes, consist of the Suzzallo Library and the Allen Library, Odegaard Undergraduate Library, Health Sciences Library and Information Center, East Asia Library, and seventeen branch libraries. In addition to books and periodicals, the libraries' holdings include archival materials and manuscripts, maps, newspapers, microforms, research reports, media materials, and government publications. The on-line catalog is a fully integrated, computerized system, that provides information and circulation status for the cataloged holdings of the University Libraries. Computer-based reference services offer access to over five hundred data bases in business, in the sciences, and in the humanities and social sciences. Special facilities and equipment for persons who are disabled are provided in the Suzzallo and Odegaard Undergraduate libraries.

The Suzzallo and Allen Libraries, a combined facility, house the system's major social sciences and humanities collections. The Suzzallo Library serves as the central acquisitions and processing unit of the campus libraries' system and contains Government Publications, Microforms-Newspapers, Reference and Research Services, and Periodicals. Reference assistance is available most hours the library is open. The Allen Library houses the Natural Sciences Library, the Special Collections and Preservation Division, which includes the Pacific Northwest Collection, and Manuscripts and University Archives. The libraries' administrative offices are also located in Allen.

The Odegaard Undergraduate Library (OUGL) collection supports the undergraduate curriculum and is interdisciplinary, with an emphasis on materials in the social sciences and the humanities. The primary reserve unit for non-health sciences subjects is in OUGL. Media services and materials for both course-related and recreational usage are provided in the OUGL Media Center. Almost all study materials needed by undergraduates may be found in this library.

The Health Sciences Library and Information Center collection includes materials on dentistry, medicine, nursing, pharmacy, public health, and related behavioral, biological, and quantitative sciences. This library serves as the collection and operations base for the Pacific Northwest Regional Health Sciences Library Services and houses the King County Medical Society Library Services and the Drug Information Services.

The East Asia Library is one of the major resource centers of its kind in the United States and is an international leader in the provision and development of automated services for its subject areas. The collections are especially strong in anthropology, art, business, communications, languages, literature, law, music, and political science with respect to the cultures of China, Japan, Korea, Inner Asia, and Southeast Asia.

Henry Art Gallery

The Henry Art Gallery, the art museum of the University, brings to the campus and the community special exhibitions of contemporary and historical work in all media. The offerings include exhibitions, lectures, symposia, and an active publishing program. The University's permanent collection includes a large research collection of ethnic textiles and Western dress as well as a small but distinguished collection of European and American paintings, prints, drawings, photographs, and contemporary American ceramics and Japanese folk pottery. The collections are available for viewing by appointment to students, classes, and researchers. The Henry Gallery Association offers membership to students, faculty members, and the community for the purpose of supporting this multifaceted program. Open six days each week, the gallery is closed on Mondays and some holidays. UW students are admitted free.

Museum

The Thomas Burke Memorial Washington State Museum is an educational and cultural center whose function is to collect, preserve, research, exhibit, and interpret natural and cultural objects from the Pacific Northwest and from the islands and mainland shores of the Pacific Ocean. The museum holds in excess of 1 million specimens in its scientific divisions of anthropology, geology, and zoology. Its public galleries are open every day of the year except some holidays. Admission is free.

Graduate training in the museum includes a program that leads to a Master of Arts degree in anthropology with a specialization in museology. The museum is accredited by the American Association of Museums.

The museum celebrated its centennial in 1985-86.

University Theatres

The School of Drama operates three theatres: the Glenn Hughes Playhouse, with a thrust stage; the Penthouse Theatre, the first theatre-in-the-round built in America; and Meany Studio Theatre, which seats approximately three hundred and contains a proscenium stage. Faculty- and student-directed plays drawn from the full range of world dramatic literature are presented throughout the year.

The school also mounts annual productions in the two theatres of Meany Hall, and it gives technical and design support to opera and dance productions of the School of Music.

Language Learning Center

The Language Learning Center (LLC), located in the daylight basement of Denny Hall, is a pooled resource within the College of Arts and Sciences that provides support in areas related to the teaching, learning, and research of languages and cultures. Services directly available to students include free-study listening/recording facilities, duplication of LLC audio materials onto user audio cassettes, sale of some audio tape materials, and facilities for viewing materials from tape, laserdisc, cable, and satellite. There are several electronic classrooms equipped with audio, video, cable TV, and slide equipment that instructors may reserve for class use. A computer-assisted instructional lab is being implemented. A language and culture room is available for small groups of students to gather and practice speaking other languages and to participate in other cultural activities.

English As A Second Language Center

The English As A Second Language Center offers a variety of courses to nonnative speakers of English from many different countries. Additional information appears in the University Extension section of this catalog.

Women's Information Center

The Women's Information Center, located in Imogen Cunningham Hall, provides information on women for both the campus and off-campus communities. Services include a resource and referral file, a re-entry program, a library, and the publication of a monthly calendar of events and a quarterly newsletter. The center offers numerous classes, programs, and events throughout the year.

Computing & Communications

A wide variety of computers, facilities and support services is available to the University of Washington community, from centralized organizations as well as individual schools, colleges and departments, providing for the diverse computing needs of many different instructional and research groups.

The central UW organization for computing and networking, called Computing & Communications (C&C), offers an array of computing options and services that

include microcomputers, workstations and a number of multi-user mainframe and mini computers. C&C computer labs, open to all students, faculty and staff members, provide opportunities for use of Macintoshes, PC's and NeXT computers. In addition, electronic mail services and convenient access to resources throughout the country, such as supercomputing and numerous library catalogs, are available on the campus network, which is part of the "Internet," an international collection of computer networks.

All members of the UW community are entitled to basic computer services at no charge under the C&C Uniform Access system. This scheme allows students, faculty and staff members to create their own accounts on any of the C&C multi-user computers, maintained by University Computing Services (UCS).

C&C public terminal areas and general-access micro-computer and workstation labs are provided for use by faculty, students and staff members. Distributed access to UNIX, VM/CMS and VMS computing services is available at a variety of sites on the UW campus. Terminal sites are jointly managed by the host departments and C&C.

Through the Micro/Workstation Acquisition Program (MAP), members of the UW community can purchase selected products at substantially discounted prices. A wide range of hardware and software products can be previewed and tested in the C&C Micro/Workstation Showroom.

Several computing library-associated services are managed by C&C. Projects are being developed jointly with the UW Libraries that will allow for user access to several major bibliographic databases. The C&C Computing Information Center (CIC) contains thousands of computer-related books, as well as current journals, technical reports and directories for evaluating hardware and software.

For convenience in registering and making course changes each quarter, students can use the computerized voice-response Student Telephone Assisted Registration (STAR) system.

C&C provides many computing-associated services, such as individual consulting, microcomputer and workstation support, training, education, administrative

systems support, publications and online documentation.

C&C services are described in detail in the *Guide to Computing at the University of Washington*. Course schedules, registration information and descriptions of all C&C classes are given in the *Training and Education Catalog*.

To obtain a copy of the *Guide* or the current catalog, or to find out further information about C&C, stop by the Computing and Networking Information (CNI) office, located at 3737 Brooklyn Avenue NE, or send email to help@cac.washington.edu.

University Research Facilities

In addition to the campus facilities previously described, the University has numerous educational and cultural resource centers. Academic or research activities and facilities that are of general significance in all or many fields of knowledge throughout the University are listed in the Graduate School section of this catalog; others are described in individual school or college sections.

University-Owned Housing

Residence Halls

The University of Washington provides housing for about 4,400 students in seven residence halls. All are located within easy walking distance of classrooms and other campus facilities. Food service is available to residence hall students at locations throughout the campus through the use of À La Carte™ Plus, a debit card system. Students live in an environment of responsible freedom, and a residential life staff enhances

the University experience through a variety of educational, cultural, and social programs.

Interest houses in the residence halls are available for students seeking a particular learning experience. These special living environments include Freshman House, Outdoor House, International House, and Russian House.

To obtain more information on residence halls, call 543-4074 or write to Housing Assignments Office, 301 Schmitz, PC-50, Seattle, Washington 98195.

Single-Student Apartments

The University also has a limited number of apartment spaces available for single students. Stevens Court houses three hundred students in four- and six-bedroom apartments, which have private bedrooms and share a common kitchen, living room, and bathroom. Studio apartments are available in other locations.

An application form or additional information on residence halls and single-student apartments may be obtained by writing to the Housing Assignments Office, 301 Schmitz, PC-50, Seattle, Washington 98195, or calling 543-4059.

Family Housing

Convenient and economical apartment housing is available for about six hundred student families. Community programs for adults, as well as special children's activities, are presented by the Family Housing Resident Services Office. To obtain information about housing facilities, eligibility requirements, and application procedures, write to 301 Schmitz, PC-50, Seattle, Washington 98195, or call 543-4074.

Food Service

University Food Services operates dining facilities throughout the campus. The diverse schedules and dietary preferences of the campus community are accommodated by providing full meal service and à la carte menu items and by keeping ample hours of operation.

Food may be purchased through the À La Carte™ program at all University Food Services facilities and two on-campus convenience stores. This program, required for residence hall students and available to the entire campus community, offers prepaid meal service through use of a debit card. The À La Carte™ program provides the flexibility for purchase of food at any of nine locations on campus. For more information on the À La Carte™ program, call 543-7222.

Parking

Parking for students on the campus is limited. The University endorses and promotes alternative modes of transportation, such as transit (subsidized passes), carpooling (ride-match services provided), and bicycling.

A few parking permits are available to commuter students on a first-come-first-served basis the first day of school each quarter. University Housing will provide students with information on resident hall and family housing parking accommodations.

Additional information may be obtained by writing to the Parking Division, ND-05, 3901 University Way Northeast, Seattle, Washington 98195.

Student Services

Office of the Vice President for Student Affairs

The Division of Student Affairs assists the University in fulfilling its academic mission by providing a broad range of services and programs designed to further the educational and personal development of students. The division consists of eight units: Admissions and Records, Counseling Center (including Disabled Student Services and International Services Office), Housing and Food Services, Placement Center, Recreational Sports Programs, Student Financial Aid, Student Publications, and Student Activities and Union Facilities.

Students are encouraged to contact the Office of the Vice President for Student Affairs, 543-4792, 476 Schmitz, for information concerning various aspects of extra-class life at the University.

Childcare Program

The Childcare Program provides eligible student-parents with direct financial assistance to purchase services at licensed childcare facilities in the Seattle-King County area. To apply, students must submit the Financial Aid Form (FAF) to the College Scholarship Service and a Childcare Request Application to the Childcare Office, 466 Schmitz. Brochures describing the program are available at 466 Schmitz, 543-1041.

Counseling Center

All full-time students at the University may make use of the services of the Counseling Center and its staff of psychologists and vocational counselors to discuss educational progress, personal adjustment, or career goals. Psychological tests, when necessary, are provided as part of the center's counseling service. A library of reference materials on occupations and career opportunities is available for student use. Also available is a computer-assisted career guidance system with which students can work independently.

Other services of the center include the provision of various group programs directed toward concerns and skills of interest to students in their efforts to adapt to the University.

Students are not charged for the first appointment, which is provided to determine if the Counseling Center's services are needed. Individual appointments after the first visit cost \$9 each. Fees for entrance to group programs range from \$15 to \$40. For students financially unable to pay the fee, efforts are made to find other alternatives. The center is located on the fourth floor of Schmitz Hall.

Disabled Student Services

The University provides program access to students with either permanent or temporary disabilities through a variety of services, equipment, and publications. Disabled Student Services (DSS) coordinates many of these special services. To the maximum extent possible, disabled students are integrated into the general student population and their problems are solved through the usual channels.

In those instances that a person requires a special accommodation as a result of a disability, DSS works with individuals to define and coordinate specific adaptation. Services available include preadmission interviews, counseling and referrals, priority registration,

classroom relocation, classroom testing accommodations, tape-recording and reader referral service for print-handicapped students, mediation when necessary, and other services for mobility-limited or sensory-impaired students, which are arranged on an individual basis. Specialized equipment of many types is available for on-campus use or checkout; equipment lists may be obtained from DSS. Publications include *Access: UW* (a guidebook showing classroom access, ramps, curb cuts, parking, accessible restrooms, etc.), a wheelchair map and a braille map of campus, *Faculty Guide for Working With Disabled Students*, and a newsletter entitled *ACCESSory*.

Various other departments offer additional services: Transportation Department provides free on-campus transportation on Dial-a-Ride, a van with a wheelchair lift (telephone 545-1511), and Parking Division offers disability parking permits and a battery recharge station for electric wheelchairs (545-1543). Other departments that offer services include Housing and Food Services (543-4059) and Hall Health Center (545-1011), as does an ASUW-affiliated student group, the Disabled Students Commission, 302A HUB (543-7503 or TTY 543-8725).

Additional information is available from Disabled Student Services, 482 Schmitz, PB-07, 543-8924 (Voice/TTY).

Early Entrance Program

A unique UW program provides early University entry to exceptionally bright, highly motivated adolescents who are ready for college-level work by age fourteen, the usual age of entering high school. A transition school provides an intensive, one-year bridge to regular, full-time University enrollment; counseling support and a "home base" are also provided to full-time students. Information is available from the Center for the Study of Capable Youth, Guthrie Annex II, 543-4160.

Office of Educational Assessment

Testing and educational evaluative services for University departments and individual students are available at the Office of Educational Assessment. Of particular interest to prospective and entering students are the center's programs for admissions testing, including the Scholastic Aptitude Test (SAT), and for placement testing in mathematics and foreign languages. For the University student approaching graduation, the center administers tests required for admission to graduate, law, medical, and other professional schools, as well as those tests often requested by prospective governmental or private employers. The center has its offices on the fourth floor of Schmitz Hall.

Foreign Study Office

The Foreign Study Office coordinates more than forty international study programs for eligible University students. It provides information, orientation, and counseling services for language and area studies programs, professional programs, and a broad range of direct enrollment opportunities overseas. The office assists University departments in the establishment of exchange agreements and administers a scholarship program for minority students on overseas programs. The Foreign Study Office reference library provides information on exchange programs through other U.S. and foreign universities as well as work, teaching, and internship opportunities abroad. The office is located on the fifth floor of Schmitz Hall, 543-9272.

Hall Health Center

The University provides outpatient health and medical care for students through the Hall Health Center. Located on campus, the center is staffed by physicians and nurse practitioners and is accredited by the Accreditation Association for Ambulatory Health Care.

Services include preventive care, health education, and diagnosis and treatment of illness or injury.

The following specialties are represented: chest disease, endocrinology, dermatology, family planning, family practice, general and hand surgery, gynecology, internal medicine, orthopaedics, physical therapy, psychiatry, and sports medicine. Common conditions in other specialties also may be treated.

All graduate and undergraduate students, registered for full- or part-time courses and paying student fees, are eligible for health service upon presentation of a current University student identification card.

There is no charge for professional consultation by physicians or nurses. Moderate fees are charged for x-rays, physical examinations, mental-health visits, physical therapy, allergy injections, and a few other services. Students must pay for outside laboratory and medical services and for prescriptions filled at the pharmacy.

Student health insurance, available through the University of Washington, *should not be confused* with services through Hall Health Center. A student may use Hall Health Center services without having student insurance. For major surgery and the occasional illness of exceptional severity that require treatment elsewhere, the student should protect himself or herself against the expense by obtaining student health insurance. A low-cost medical-surgical-hospital policy, designed to meet those specific needs, may be purchased at the time of registration.

The Hall Health Center is open Monday through Friday from 8:00 a.m. to 5:00 p.m., during Autumn, Winter and Spring quarters. (Summer Quarter service hours are 8:00 a.m. to 12:00 p.m. and 1:00 p.m. to 5:00 p.m.) Emergency service is available at the Urgent Problem

Clinic weekdays from 5:00 p.m. to 7:00 p.m.; Saturday, Sunday and holidays, from 10:00 a.m. to 6:00 p.m., during the regular school year. (Saturday, 9:00 a.m. to 12:00 p.m., during Summer Quarter.)

Additional information may be obtained from University of Washington, Hall Health Center, GS-10, Seattle, Washington 98195, (206) 545-1011.

Student Health Insurance Program

An accident and sickness insurance plan is available to regularly enrolled University students and their dependents on a voluntary basis. A student may enroll in the plan at the time of registration each quarter. The appropriate premium must be paid by the quarterly tuition due date. The plan provides coverage for accidents and illnesses that require treatment or hospitalization. Brochures describing the insurance eligibility, coverage, and costs are available at the Office of the Vice President for Student Affairs, 466 Schmitz, Hall Health Center, HUB, and information window in Schmitz Hall.

The University also sponsors a field-trip sickness and accident insurance plan. Application forms may be requested from the Risk Management Office, 270 Administration, AG-76, telephone (206) 543-0183.

Insurance for Foreign Students

All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, of which proof must be furnished to the International Services Office and for which an insurance waiver must be obtained. If registration is not to be canceled, the Cashier's Office must have either full payment of tuition and fees and an insurance waiver on file or full payment of tuition and fees and insurance by the tuition due date.

International Services Office

The International Services Office provides assistance to international students, including such matters as general orientation of new students to the campus and community; advice and counsel for educational, financial, and personal problems; dissemination of important information through newsletters; and assistance in meeting United States Immigration and Naturalization Service regulations on such matters as extensions of stay, change of status, transfer of schools, and work permits. The office is located in 459 Schmitz, 543-0840.

Office of Minority Affairs

Under the Office of the Vice President for Minority Affairs, the Educational Opportunity Program (EOP) provides a variety of services to students from minority and economically disadvantaged backgrounds. These services include recruitment, admissions, academic advising, tutoring, personal and career counseling, housing and financial aid advising, and other assistance. Included in the programs administered by the Office of Minority Affairs are three Department of Education TRIO Grant Programs: Upward Bound, Talent Search and Student Support Services. Upward Bound and Talent Search operate as precollege assistance programs for low-income and first generation disadvantaged students within the Seattle area while Student Support Services (SSS) provides advising and tutorial support for University undergraduates from the same background.

The Office of Minority Affairs operates the Instructional Center, which provides assistance in reading, composition, mathematics, sciences, and basic study skills as well as tutorial support for courses offered at the University.

The Early Identification Program (EIP) provides enrichment activities to prepare minority undergraduate

students interested in earning postbaccalaureate degrees. The activities include early exposure to research processes, faculty mentors, seminars, and advising, as well as assistance with the graduate school application process.

The Ethnic Cultural Center (ECC) is a complex that houses a library of ethnic literature, multipurpose rooms, student lounge, and offices for use by minority students. Minority students, faculty, and community groups use the facilities for a variety of purposes, including meetings, study, social, and cultural events.

The Ethnic Cultural Center Theatre is the home of Seattle's only ethnic acting company, The Group. A recipient of outstanding reviews for its performances of contemporary plays, The Group serves as a cultural link with the broader and off-campus community.

The Office of Minority Affairs is located on the third floor of Schmitz Hall.

Placement Center

The University's Placement Center, which includes a Minority Placement Program, offers career information and services to assist undergraduates, graduate students, and degree- or certificate-holding alumni (1) to make a viable connection between their academic backgrounds and their career or long-range employment objectives, (2) to develop effective job-seeking strategies, and (3) to find suitable employment upon leaving the University or to change employment thereafter.

Office of Special Services

The Office of Special Services, 460 Schmitz, assists students eligible for veterans' educational benefits, including tuition or fee reductions; advises students who must meet English As A Second Language requirements; and oversees undergraduate tuition reciprocity agreements between Washington State and other localities.

Office of Student Financial Aid

The Office of Student Financial Aid, 105 Schmitz, administers several federal, state, and private financial aid programs created to help students pay for their educations. Assistance is offered in the form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. An information packet describing the different programs, eligibility criteria, and application procedures may be obtained by telephoning, (206) 543-6101.

Both undergraduate and graduate students may apply for aid through the Office of Student Financial Aid; graduate student assistance is generally limited to long-term loans and work opportunities. Information on graduate fellowships, scholarships, and teaching and research assistantships may be obtained from the graduate program coordinator in the individual department or program (see Graduate School section of this catalog).

To be eligible for financial aid, an individual must be a citizen or permanent resident of the United States and be admitted to the University as a matriculated, degree-seeking student. First consideration is given to full-time students who are pursuing their first degree at any level (first baccalaureate, first master's, etc.). Priority consideration is also given to students who apply before the University's financial aid application deadline, which is generally March 1 of the preceding year (e.g., March 1, 1990, for the year beginning in September 1990).

The Office of Student Financial Aid also administers the Student Employment Service, 172 Schmitz, telephone (206) 543-1840, an employment referral service that lists a wide variety of part-time jobs on and off

campus throughout the year. The office, 180 Schmitz, also administers short-term emergency loan programs for full-time students who find themselves in temporary, severe financial difficulty. University students may take advantage of the Student Employment Service and of the short-term emergency loan programs without applying for financial aid.

Student Legal Services

Student Legal Services provides legal advice, counseling, negotiating, and court representation in many non-criminal legal matters. All currently enrolled undergraduate and graduate students are eligible for a free initial consultation. If additional services are needed, there is an hourly charge of \$10, plus a minimal supply fee and court costs, if any. The office is staffed by third-year law students supervised by licensed attorneys, including a staff attorney. Students may telephone 543-6486 or visit the office, 31 Brooklyn Building, JA-16, 4045 Brooklyn Avenue Northeast, to make an appointment or to learn more about the office's services.

Student Union Facilities

The Student Union facilities, the Husky Union Building and the South Campus Center, are the principal centers of student activities and programs on the campus.

STUDENT UNION BUILDING

The Husky Union Building (HUB) houses a variety of facilities and services for students, faculty and staff members. These include a 478-seat auditorium, a multipurpose ballroom, a barber and hair styling shop, a branch of the University Book Store, several retail food operations, a recreation and amusement games area, a lost-and-found office, a ticket sales office, a newsstand, a self-service post office, and a limited-service bank, two cash machines, and a microcomputer laboratory. Meeting rooms accommodating from 10 to 175 persons are available for registered student organizations.

SOUTH CAMPUS CENTER

The South Campus Center offers services and activities similar to those in the HUB primarily to students in the health and marine sciences. In addition to student offices, conference rooms, a student art gallery, and recreation facilities, the center offers indoor and outdoor dining. A newsstand, a University Book Store branch, a barber and hair styling shop, a microcomputer laboratory, and a twenty-four-hour cash machine are also available.

Student Activities and Organizations

Student Activities Office

The services provided by the Student Activities Office (SAO) staff include assisting students in understanding University policies and procedures, providing technical help in the planning and conduct of student events, and furnishing information and assistance to student groups or organizations in order that they may represent themselves and their interests in an effective manner. Advisers are available to assist students involved in group activities with budget and program planning, advertising, orientation to campus resources, and leadership and organizational skill development. Underlying the SAO service functions is a desire to provide an environment in which students can learn from their experiences in extracurricular activities as a supplement to their classroom experiences. Additional information about the services is available from the Student Activities Office, 207 HUB, telephone 543-2380.

Student Organizations

Students at the University are encouraged to become active in at least one of the campus's approximately 300 voluntary student organizations, which include

honorary, professional, and social organizations; service and coordinating clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, 207 HUB, telephone 543-2380.

Associated Students; University of Washington

The Associated Students, University of Washington (ASUW), is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW has an annual budget of approximately \$1 million, supported by the services and activities fee paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of control elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include lecture notes, a poster printing service, Experimental College, and a bicycle repair shop. Questions regarding the ASUW and its services should be directed to either the ASUW office, 204L HUB, telephone 543-1780, or the Student Activities Office, 207 HUB, telephone 543-2380.

Graduate and Professional Student Senate

The Graduate and Professional Student Senate (GPSS) serves primarily as an advocate for the academic welfare of graduate and professional students. It is composed of representatives elected from each graduate and professional degree-granting unit. Funded from student services and activities fees, GPSS dedicates a portion of its budget each year to direct allocations for departmental student groups and for special programs benefiting students from many departments. GPSS publishes informational bulletins, monitors legislative issues of impact to graduate students, maintains graduate student representation on University administrative committees, assists with personal or academic grievances and, in general, seeks to represent graduate student issues and concerns within the University community. Questions regarding the GPSS should be directed to either the GPSS office, 300 HUB, 543-8576, or the Student Activities Office, 207 HUB, 543-2380.

Student Publications

Student publications at the University include the *Daily*, the *Tyee* (yearbook), and the *Student Directory*. The *Daily* is published Monday-Friday mornings throughout the academic year and is distributed on campus without charge. During Summer Quarter, the *Daily* is published once a week. Any student with an interest in journalism may serve on the *Daily* or *Tyee* staffs.

Intercollegiate Athletics

The Department of Intercollegiate Athletics operates an integrated program for men and women. Intercollegiate competition is limited to full-time students.

There are nine women's teams: cross-country, volleyball, gymnastics, basketball, swimming, track and field, tennis, golf, and crew. Women's competition is in the ten-team Pacific-10 Conference (PAC-10) and is affiliated with the National Collegiate Athletic Association (NCAA).

Ten sports are offered for men's competition: baseball, basketball, crew, cross-country, football, golf, soccer, swimming, tennis, and track and field. Men's teams compete on a full Pacific-10 Conference schedule, as well as with other institutions locally, regionally, and nationally. The University is a member of the National Collegiate Athletic Association.

Facilities available to intercollegiate athletic teams are Hec Edmundson Pavilion, Pavilion Addition, Husky Stadium, Graves Baseball Field, Chavelle Track and Field Complex, Conibear Shellhouse and other crew facilities on Lake Washington at the eastern boundary of the campus, the Lloyd Nordstrom Tennis Center, and a variety of golf courses throughout the greater Seattle area.

Recreational Sports

The Department of Recreational Sports Programs provides a comprehensive program of 60 sports and fitness activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities (IMA) Building, Golf Driving Range, Waterfront Activities Center, outdoor facilities (Denny Field and Tennis courts) swimming pool and locker rooms at Hutchinson Hall, and the Practice Climbing Rock. A varied program of intramural sports, corecreational activities, sports skill classes, sports clubs, special events, and general recreation is open to every student (modifications available for disabled participants as needed) with a valid student identification card.

Non-credit instruction is offered in aerobics, archery, badminton, conditioning, dance (jazz), fencing, golf, gymnastics, hydro-aerobics, judo, kayaking, karate, mountaineering, pickleball, racquetball, roller skating, ski conditioning, skin diving and SCUBA, soccer, springboard diving, squash, swimming, tae kwon do, tennis, volleyball, weight training, and yoga.

Sport clubs exist for aikido, archery, badminton, climbing, fencing, gymnastics, ice hockey, judo, karate, kayaking, kendo, kung fu, lacrosse, racquetball, rowing, rugby, sailing, synchronized swimming, skiing, skin diving and SCUBA, soccer, squash, tae kwon do, volleyball, water polo, and weight lifting.

Intramural sports are offered for men, women, and men and women combined (Co-Rec) in a variety of activities, including basketball, bowling, flag football, handball, innertube basketball, racquetball, soccer, softball, squash, swimming, tennis, track and field, ultimate frisbee, and volleyball, as well as a variety of special events. More information regarding these programs may be obtained by telephoning Intramural Sports, 543-8558; Sport Clubs, 543-9499; Instruction, 543-2571; IMA Building, 543-4590, Waterfront Activities Center, 543-9433; or the Golf Range, 543-8759.

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in, and the graduation from, the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students will follow the University regulations and procedures as they are stated in the *General Catalog*. Appeals may be filed with the student's Dean or with the Vice President for Student Affairs in nonacademic matters.

Registration

The University provides registration services through a touchtone telephone registration system referred to as STAR (Student Telephone Assisted Registration). This system allows students to register at the University from any touchtone telephone. Registering, adding sections, and dropping sections may be accomplished through STAR.

Detailed information and procedures pertaining to registration and withdrawal are outlined in the quarterly *Time Schedule*.

Registration Period I

Designed to accommodate currently registered matriculated students, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students registering for Autumn Quarter do so in Spring Quarter.

Registration Period II

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this phase.

Registration Period III

Students who have been admitted may register late, but are charged a late registration fee.

Registration Period IV

Period IV is open for dropping courses through the seventh week of the quarter. No adds or registrations are accepted. A \$20 change fee will be assessed for all drops occurring during the same day.

Faculty/Staff Tuition Exemption

Eligible faculty and staff may enroll for limited credits each quarter under the tuition exemption program. Because such students are registered on a space-available basis, they must register after other students. The quarterly *Time Schedule* lists registration dates and hours during which the faculty and staff members may register. Eligibility information may be obtained from either the Staff Personnel Office or the Registrar's Office.

"Access" Program for Older Adults

The University of Washington allows Washington residents sixty years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit and do not complete laboratory work or take examinations.

Change of Registration to Drop or Add Courses

1. Registered students may add and drop classes before the quarter begins. Instructions are available in the quarterly *Time Schedule*.

2. All students may add and drop courses through the second week of the quarter and drop courses through the seventh week of the quarter by following instruction in the quarterly *Time Schedule*. A \$20 change fee is assessed for any number of add/drop transactions processed during a given day beginning the sixth class day of the quarter. No adds are accepted after the tenth class day of the quarter.

Adding Courses/Permission Guidelines

For reasons of public safety and instructional quality, it is important to limit course enrollment to no more than the approved classroom capacity. Toward this end, the Offices of the Registrar will monitor course enrollment and will accept student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, departments may choose to overload courses up to 115% of the room capacity to offset expected student course drops and withdrawals as demonstrated by past experience.

Students must secure entry codes from instructors or departments and use STAR for adding closed courses. However, if enrollment is at 115% of room capacity, registration requests will be denied. Students should be informed when receiving entry codes to overload courses, that registration is not guaranteed if enrollment exceeds 115% of room capacity.

If centralized room capacity records do not correctly reflect the actual seating capacity, notification should be made to Room Assignments in the Office of the Registrar.

2. Generally, course adds will not be accepted after the second week of the quarter. However, situations may arise that necessitate an exception, such as a student needing a course to graduate in the current quarter.

In this case, students must present a "Late Add Authorization" card to both the instructor and the department chair for signatures, and proceed to the Registration Office for transaction processing. Department chairs should in no case approve a late add after the second week of the quarter if the class is enrolled at 100% of room capacity.

3. An audited course may not be changed to or from credit registration after the first two weeks of the quarter.

Dropping a Course

Undergraduates dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript except notice of withdrawal from the University. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh week of the quarter will be recorded on an undergraduate student's transcript with a W grade and a number designating the week of the quarter in which the course drop was transacted.

A student who drops a course unofficially (i.e., only through the instructor, adviser, etc.) is given a grade of 0.0.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz, telephone 543-6101, before dropping a class because it may affect their eligibility.

Complete Withdrawal From the University for a Registered Quarter

Once registered, a student must officially withdraw if he or she later chooses not to attend the University for the

registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To be official, a withdrawal from the University must be turned in at the Registration Office, 225 Schmitz. Withdrawal forms are available at advising offices and the Registration Office. An official withdrawal is effective the day it is received in the Registration Office, or if submitted by mail, the effective date of the postmark.

2. Submission of a graduate On-Leave application does not constitute official withdrawal from the University.

3. Refer to grading section in the Undergraduate Study or the Graduate School: Graduate Study and Research sections.

4. A recipient of veterans' benefits should immediately notify the Office of Special Services of withdrawal.

5. A student with a scholarship or loan awarded through the University should notify the Student Accounts and Scholarships Office or the Student Loan Office.

Credits Required for Full- or Half-Time Status Requirements

Some agencies require that a student have full-time status to receive maximum benefits or to retain a certain privileged status. To be classified as a full-time student by the University, an undergraduate or professional student must register for and complete at least 12 credits per quarter and a graduate student must register for and complete at least 9 credits per quarter. To be classified as a half-time student by the University, an undergraduate or professional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

Address Change

Students are responsible for notifying the Registrar's Office when their address changes. Call the Address Change Telephone Service at (206) 543-3868 24 hours a day, seven days a week or visit the Registration Office in 225 Schmitz to keep your address current. *The mailing of notices to the last address on record constitutes official notification.*

Restrictions on Attending Classes

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered.

An instructor may allow a student to attend his or her class only if the student's name is on the official class list from the Registrar's Office.

Student Identification

Each student is issued an identification card after registering at the University each quarter. This card is the student's means of establishing entitlement to the rights and privileges that normally accrue to students.

Students whose identification cards have been lost or stolen can have them replaced through the end of the first week of the quarter without charge. Beginning the second week, students can have them replaced by paying a nonrefundable fee at the University Student Accounts and Scholarships Office. Replacement of cards made invalid by changes in students' names or of cards rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Registrar's Office. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved. The incident may be referred to the Office of the Vice President for Student Affairs for appropriate University action.

Transcripts

Official copies of student academic records at the University of Washington must bear the official embossed seal of the University, the signature of the Registrar, and the date of issue.

Transcript Fee

A charge of \$3, payable to the Transcript Office in advance, is required for each transcript. Partial transcripts are not issued. Each transcript will include all course work taken at the University of Washington.

Transcripts From Other Schools

A transcript covering a student's previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

Estimated Expenses

The cost of a student's education at the University varies, the amount depending on his or her classification, status as resident or nonresident, and field of study. In computing college costs, a student should consider such additional expenses as insurance coverage, books, and laboratory supplies. Personal expenses (e.g., clothing, laundry, recreation, and transportation), which vary with each individual, as well as between-quarter expenses, should not be overlooked.

Prepared by the Office of Student Financial Aid, the following figures reflect modest, but adequate, probable costs for students attending the University during the nine-month academic year. They should be used only as a guide in determining the year's expenses.

	Lives with parents		Traditional	Non-traditional	
	Undergraduate	Graduate		Undergraduate	Graduate
Books	\$ 519	\$ 549	\$ 519	\$ 519	\$ 549
Room and board	1,686	1,686	3,918	4,974	4,974
Transportation	636	687	636	687	687
Miscellaneous personal expenses	1,098	1,194	1,401	1,500	1,500
Total	\$3,939	\$4,116	\$6,474	\$7,680	\$7,710

Traditional budget: For all undergraduate students, without a spouse or children, who are living away from the parental home.

Nontraditional budget: For all graduate and professional students and for undergraduate students who are married or have dependents.

	Resident tuition and fees	Nonresident tuition and fees
Undergraduates	\$1,953	\$5,433
Graduate students	3,033	7,578
Medical and dental students	4,926	12,513

Tuition and fees are subject to change.

Tuition, Fees, and Special Charges

Enrollment Confirmation Deposit

A new or returning former student or continuing student in a new classification (e.g., undergraduate, postbaccalaureate [fifth-year], graduate) is required to confirm his or her intention to enroll by paying a nonrefundable \$50 enrollment confirmation deposit (not required of students admitted Summer Quarter). The \$50 is applied toward tuition and fees assessed for the quarter for which the student is determined to be admissible and subsequently enrolls. A student who pays the fee for a given quarter but does not register in that quarter is not entitled to refund except in the situations listed below:

1. A new or returning matriculated student who is unable to obtain courses that are applicable to the requirements for the degree or certificate program to which the student has been admitted, and who does not enroll in or attend other courses, is refunded the \$50 enrollment confirmation deposit upon written request to the Registrar. Petitions should include a statement from an appropriate academic adviser certifying that no such courses are available. Petitions must be submitted by Friday of the second week of the quarter.

2. A new or returning matriculated student who, after meeting with an appropriate academic adviser or receiving a University *General Catalog*, determines that the program for which admission was granted differs substantially from what the student was led to expect based upon earlier available information, is refunded the \$50 enrollment confirmation deposit upon written request to the Registrar. Such a request for refund must be submitted before the student registers for courses and in no case later than the first day of the quarter for which admission has been granted.

3. A new or returning student who applies by the prescribed deadline for financial aid administered by the University's Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University, is refunded the \$50 enrollment confirmation deposit upon application to the Registrar no later than two weeks after receipt of notice of the financial aid award.

4. A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or into civil duty, is refunded the amount, if any, by which the enrollment confirmation deposit exceeds the amount of tuition and fees assessed at the time of withdrawal. Requests for refund must be submitted in writing to the Student Accounts and Scholarships Office by the last day of the quarter for which the student was determined admissible and for which the enrollment confirmation deposit has been paid. Appropriate documentation is required.

Fee Payment

An obligation to pay tuition and fees in United States dollars is incurred when a student registers. A fee statement is mailed to the student's address on file in the Registrar's Office.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in: (1) charge of \$10 to \$30 for late payment, if payment is received within the one-week late payment period; (2) cancellation of registration, if payment is not made by the end of the fourth week. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The Summer Quarter bulletin should be consulted for fees and fee payment schedule applicable to Summer Quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany the payment. In the absence of instructions, the University makes a reasoned interpretation of the student's intent and accounts for the funds accordingly. The student number must be specified on all payments.

Quarterly Tuition Rates Effective Autumn Quarter 1990

Undergraduate (Including nonmatriculated and fifth-year)

	Resident	Nonresident
Additional fee per credit for more than 18 credits.	\$ 58	\$ 174
Full time (more than 9 through 18 credits)	651	1,811
Part-time: 9 credits	586	1,630
8 credits	521	1,449
7 credits	456	1,268
6 credits	391	1,087
5 credits	326	906
4 credits	261	725
3 credits	196	544
2 credits	131	363

Graduate and Law

Additional fee per credit for more than 18 credits.*	134	351
Full time (more than 6 through 18 credits)	1,011	2,526
Part-time: 6 credits	867	2,165
5 credits	723	1,804
4 credits	579	1,443
3 credits	435	1,082
2 credits	291	721

Medical and Dental

Full time (more than 12 credits)	1,642	4,171
Part-time: 12 credits	1,516	3,850
11 credits	1,390	3,529
10 credits	1,264	3,208
9 credits	1,138	2,887
8 credits	1,012	2,566
7 credits	886	2,245
6 credits	760	1,924
5 credits	634	1,603
4 credits	508	1,282
3 credits	382	961
2 credits	256	640

* Does not apply to candidates for the J.D. (law) degree.

Fees are subject to change without notice.

Tuition rates for resident and nonresident students apply to the academic year (Autumn, Winter, and Spring quarters). Summer Quarter tuition is listed in the Summer Quarter bulletin. Except for students in the Schools of Dentistry or Medicine, nonresident students are charged resident tuition during Summer Quarter.

Veterans: A special exemption program is available for "resident" veterans who served in Southeast Asia (see section on residence requirements). Under certain conditions, veterans who are not eligible for Department of Veterans Affairs benefits may be partly exempt from tuition. Information concerning these exemptions may be obtained from the Office of Special Services, 460 Schmitz.

Special Course and Laboratory Fees

The amounts listed above normally cover University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

Other Fees

Auditors: There is no reduction in fees for auditors.

Admission Application Fees: Undergraduate, \$25; Graduate, \$35; Law, Medicine, Dentistry, \$35. Former students returning in the same classification, \$25.

On-Leave Registration Fee: This fee of \$35, charged graduate students only, provides for a maximum On-Leave registration period of four successive academic quarters or any part thereof and is not refundable.

Late Registration/Reregistration Fees: A late registration service charge of \$25 is assessed a student granted permission to register after the last scheduled day of Period II registration and through the tenth day. Students registering after the tenth day pay a \$75 late registration fee. A student who must reregister as a result of a cancellation for nonpayment of tuition must also pay a \$75 fee. Waiver or refund of the registration service charge may be petitioned in the Registrar's Office. Waiver or refund of the \$75 reregistration fee may be petitioned in the Student Accounts and Scholarships Office.

Change of Registration Fee: A charge of \$20 is made for any number of add and/or drop transactions processed during a given day beginning the second week of the quarter.

Transcript Fees: A charge of \$3, payable to the University's Transcript Office in advance, is required for each transcript.

Thesis and Dissertation Fees: Publication binding fee, \$35; abstract-only fee, \$25; copyright service fee, \$25.

Replacement Fees: Duplicate diploma, with paper folder, \$10; teaching certificate (typed copy), \$1; student identification card, \$5.

Credit by Examination Fee: In order to obtain credit for independent study, a student may take an examination prepared by the department concerned. The fee is \$25 per examination. Appropriate forms must be obtained from the Grade Recording Information Office, Schmitz Hall.

All fees are subject to change without notice.

Cancellation of Tuition

Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

CONTINUING STUDENTS

1. A student who withdraws on or before the fifth class day does not pay tuition.
2. A student who withdraws after the fifth class day through the thirtieth calendar day of the quarter must pay one-half tuition.
3. A student who withdraws after the thirtieth calendar day must pay full tuition.

NEW AND RETURNING STUDENTS

1. A student who withdraws on or before the fifth class day forfeits the \$50 enrollment confirmation deposit but does not pay the regular tuition.
2. A student who withdraws after the fifth class day through the thirtieth calendar day of the quarter must pay one-half tuition. The \$50 enrollment confirmation deposit is applied toward payment of tuition.
3. A student who withdraws after the thirtieth calendar day of the quarter must pay full tuition. The \$50 enrollment confirmation deposit is applied toward payment of tuition.

FEE FORFEITURE

A student who does not completely withdraw but is dropping one or more courses may be eligible for lower tuition, depending on the total number of credits remaining after the course drop and on the time period when the drop was made. Tuition for students making

PROCEDURES AND FEES

a course drop on or before the fifth class day is determined by the total credits remaining. Tuition for students making a course drop after the fifth class day through the thirtieth calendar day of the quarter is computed on the total credits remaining plus one-half the difference between the old tuition and the new tuition. There is no cancellation or reduction in tuition for courses dropped after the thirtieth calendar day of the quarter.

FEE REFUND

When a fee payment is made by check, a waiting period is required before a refund can be authorized. An application for refund may be refused, unless it is made during the quarter in which the fees apply. A student who withdraws for disciplinary reasons forfeits all rights to refund or cancellation of any portion of his or her fees.

Residence Classification Requirements

Residence classification information is available from the Registrar's Office, 209 Schmitz.

Veterans and Children of Totally Disabled Veterans and Personnel in the Armed Forces

Information on educational benefits and special exemption programs for veterans and their dependents is available at the Office of Special Services, 460 Schmitz.

Veterans and members of the armed forces who apply for admission to the University are subject to the same minimum requirements as regular students and are expected to enroll in accordance with University requirements.

The University complies with the standards of progress as required by the Department of Veterans Affairs and the State Approving Agency. A copy of those standards, as approved, is available for review at the Registrar's Office.

Financial Obligations

The Comptroller is authorized to place a hold (administrative) on the records of any student who fails to pay amounts due the University.

Until this hold is cleared, the University (1) does not re-

lease the student's record or any information based upon the record, (2) does not prepare transcripts or certified statements, and (3) denies registration as well as graduation from the University.

In cases of serious financial delinquency, the Comptroller, with the consent of the Registrar, may order that a student's registration be canceled and that privileges of attendance be withdrawn.

Tuition and fees not paid by the end of the academic quarter are subject to an interest charge of 1 percent per month, or a fraction thereof (12 percent APR), beginning the month following the end of the quarter.

An administrative hold or cancellation also may occur when a student has not complied with other University rules, procedures, or obligations. The hold may be placed on the student's record by the authorized University office responsible for enforcement of the rule, procedure, or obligation involved. The student is not permitted to register for any subsequent quarter or to obtain a transcript of his or her record or a certified statement except on the written release of the office that placed the hold.

Tuition Exemptions

The following categories of students may be exempted from all or part of tuition. Students in these categories may contact the offices shown either for information on the exemption or to obtain the appropriate form to apply for the exemption. Most of the exemptions must be renewed each quarter and should be renewed before the beginning of the quarter. The various categories of exemptions are established by legislative mandate and may be revoked by the legislature at any time.

Category	Contact office
Veterans who have fully utilized federal benefits	Office of Special Services, 460 Schmitz
Children of persons who were POWs or MIAs	Office of Special Services, 460 Schmitz
Children of a Washington law enforcement officer or firefighter who lost his life or became totally disabled in the line of duty	Office of Special Services, 460 Schmitz
Veterans who served in Southeast Asia during the period of August 5, 1964-May 7, 1975	Office of Special Services, 460 Schmitz
Students participating in the WICHE Program	Student Accounts and Scholarships Office, 129 Schmitz
Undergraduate residents of British Columbia, Idaho, or Oregon	Office of Special Services, 460 Schmitz
Graduate residents of British Columbia, Idaho, or Oregon	Graduate School, 201 Administration

Student Rights and Responsibilities

Student Conduct Code

The University Board of Regents has adopted a *Student Conduct Code*, which applies to both academic and nonacademic conduct for students while in attendance at the University. The code specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due process. Interested students may obtain copies through either their advisers or the Office of the Vice President for Student Affairs, 476 Schmitz.

University Policy on Student Education Records

A copy of the University's policy on a student's right to inspect his or her education records and the University's responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available at the Registrar's Office, Schmitz Hall.

Sexual Harassment Grievance Procedure

Students and members of the faculty and staff who wish to file a complaint regarding sexual harassment may contact either of two offices: Ombudsman for Sexual Harassment, 543-0283, or Human Rights Office, 4045 Brooklyn Avenue Northeast, 543-7217. Personnel in these offices are available to discuss and provide assistance in resolving such complaints.

Areas of Study

At the undergraduate level, the freshman or transfer student generally enrolls in the college that offers his or her chosen major. If admission to the selected major is restricted, or if the student has not yet selected a major, the student enters the College of Arts and Sciences as a premajor. The premajor category is also provided in certain other colleges for those students who have not made a definite choice of major in the college. Undergraduates preparing for professional study in such fields as architecture, business administration, dentistry, education, engineering, medical technology, medicine, occupational therapy, pharmacy, physical therapy, prosthetics and orthotics, and social welfare complete preliminary work in the preprofessional programs offered within the College of Arts and Sciences.

Foreign Study Programs

The Foreign Study Office administers and cooperates in more than forty international study programs in Latin America, Europe, the Middle East, Africa, and Asia. Qualified undergraduate and graduate students are enrolled concurrently at the University and in the foreign study program, earning UW credit and maintaining residency and financial aid eligibility. Quarter, semester, and academic year programs are offered. Opportunities for study include language and liberal arts courses (in English) in Avignon, Cologne, Guadalajara, Jerusalem, London, and Siena; advanced language programs requiring two to three years college-level language preparation in Beijing, Cairo, Leningrad, Mexico City, Nantes, Rennes, and Seville; and specialized professional programs in Denmark, England, Finland, and Japan. The University also has reciprocal exchange agreements with major research institutions abroad, including universities in Tokyo, Mexico City, Strasbourg, Tashkent, and Tübingen and the Institut d'Etudes Politiques in Paris. These arrangements allow qualified UW students to enroll in regular courses at the foreign university and maintain full UW standing.

Many overseas programs are supported by scholarships from private endowments. Additional scholarship support is available to underrepresented minority students.

Program information and counseling are available in the Foreign Study Office, 572 Schmitz, PA-10; telephone (206) 543-9272.

Undergraduate Degrees

The University of Washington grants the following degrees upon satisfactory completion of appropriate programs of study in the departments, schools, and colleges:

Bachelor of Arts	B.A.
Bachelor of Arts in Business Administration	B.A.B.A.
Bachelor of Clinical Health Services	B.C.H.S.
Bachelor of Fine Arts	B.F.A.
Bachelor of Landscape Architecture	B.L.Arch.
Bachelor of Music	B.Mus.
Bachelor of Science	B.S.
Bachelor of Science in Aeronautical and Astronautical Engineering	B.S.A.&A.
Bachelor of Science in Building Construction	B.S.B.C.

Bachelor of Science in Ceramic Engineering	B.S.Cer.E.
Bachelor of Science in Chemical Engineering	B.S.Ch.E.
Bachelor of Science in Civil Engineering	B.S.C.E.
Bachelor of Science in Computer Engineering	B.S.Comp.E.
Bachelor of Science in Electrical Engineering	B.S.E.E.
Bachelor of Science in Engineering	B.S.E.
Bachelor of Science in Fisheries	B.S.Fish.
Bachelor of Science in Forest Resources	B.S.F.
Bachelor of Science in Industrial Engineering	B.S.I.E.
Bachelor of Science in Mechanical Engineering	B.S.M.E.
Bachelor of Science in Medical Technology	B.S.Med.Tech.
Bachelor of Science in Metallurgical Engineering	B.S.Met.E.
Bachelor of Science in Nursing	B.S.Nurs.
Bachelor of Science in Occupational Therapy	B.S.Occ.Thery
Bachelor of Science in Pharmacy	B.S.Pharm.
Bachelor of Science in Physical Therapy	B.S.Phys.Thery

Admission

The Undergraduate Admissions Office is responsible for admitting matriculated freshmen, transfer, evening degree, and postbaccalaureate students to the University. Nonmatriculated summer only students also apply through the Admissions Office. Applications and information, including admissions counseling, are available at the Office of Admissions, PC-30, 320 Schmitz Hall, 1400 NE Campus Parkway, Seattle, Washington 98195; telephone: (206) 543-9686.

Other special admission categories such as Educational Opportunity Program students, nonmatriculated students, auditors, and returning former students should contact those program offices, listed under Special Categories of Admission, for further information.

Campus Visits

Students and their parents are encouraged to call, write, or visit the campus personally. Free campus tours are available without reservations every week-day, except holidays, at 2:30 p.m. Additionally, the Office of Admissions Student Visitation Program offers prospective freshmen and transfer students the opportunity to be a student for a day, stay overnight in a residence hall, meet with an admissions counselor or an academic adviser and take a guided tour of the campus. Contact the Office of Admissions at least 3 weeks in advance for further details.

General Admission Policy

Eligibility for admission is determined by the Higher Education Coordinating Board and the University faculty. In general, admission is competitive, which means that there are more qualified applicants than the University can accommodate. Applicants are evaluated on two principal criteria:

- completion of high school subject requirements and
- academic performance as measured by grade-point average (GPA) and test scores.

Although exceptions are made (see below, Special Admissions and the Appeal of Admission Decisions), the University's policy is to offer admission to those applicants who have completed the subject requirements and who rank the highest in academic performance. A complete discussion of each admission criterion follows.

High School Subject (Core) Requirements

The first major admission criterion ensures that freshmen and transfer students entering the University have an introduction to the liberal arts and are adequately prepared to succeed in their college careers. All applicants are required to complete a minimum level of preparation in five academic subjects, known as the high school subject (or core) requirements. Almost all applicants satisfy these requirements through high school courses. Because these are *admission*—not graduation—requirements, however, they must be completed before enrolling at the University.

The chart on page 20 summarizes the number of years of high school study required in each core subject. If a student's high school preparation was insufficient in any subject, there are several ways to make up a high school core requirement before enrolling at the University. Students may present college equivalents or may combine course work at the high school and college level to satisfy a core requirement. *In general, five quarter credits (or three semester credits) at the college level count as the equivalent of one year of high school study.*

Request *Undergraduate Admissions Pamphlet #1* from the Office of Admissions if you plan to make up any core requirement through college course work.

If you have taken or are planning to take a course in high school that is not mentioned here but you believe may apply to one of the core requirements, contact the Office of Admissions for advice.

Academic Performance

The second major admission criterion is the applicant's academic performance on grades earned in courses and scores on national admission tests. To be considered for admission, applicants must have achieved a minimum, cumulative, grade-point average of 2.00. However, competitive applicants must present GPA's well above 2.00 to be admitted. Grades are combined with test scores to yield an Admissions Index which is used to select the most qualified applicants.

Freshman Admission

In general, a freshman is anyone who has not attempted college course work *after leaving high school.*

Admission Index

Admission is based on each student's probability for academic success at the University. Applicants are ranked on the Admission Index (AI) scale ranging from 0 to 100. Those with higher probabilities of success are assigned higher index numbers as determined by a combination of grade-point average and test scores (from one of the tests listed below). The minimum AI ranking required for admission varies from quarter to quarter, depending on the number of applicants and the University's enrollment level. Because the Admission Index combines grades with test scores and because the minimum AI varies from quarter to quarter, it is impossible to state precisely what GPA or test scores a freshman applicant needs to be admissible.

Applicants needing more information are encouraged to contact the Office of Admissions for counseling.

Test Scores

Applicants for freshman admission are required to submit scores from one of the following tests:

- Scholastic Aptitude Test (SAT)
- American College Test (ACT)
- Washington Pre-College Test (WPCT).

WPCT must be taken by June 1, 1989 to be used for admission purposes. However, any student who took the WPCT by June 1, 1989 may submit these test scores at any time thereafter and the scores will be accepted for purposes of an admission decision, regardless of when the student applies for admission. *Students who did not take the WPCT by June 1, 1989 must submit scores from the SAT or ACT.*

If an applicant submits more than one set of scores from the same test, or scores from different tests, the highest combined score from a single test date will be used. (The best mathematics score from one test date will not be combined with the best verbal score from another test date.)

Freshman Review Committee

The University recognizes that factors other than school grades and admission test scores can be important in assessing a student's likelihood of success in college. Consequently, the files of those students whose academic records are close to the standards set for routine admission are submitted to the Freshman Review Committee for more detailed evaluation before a decision is reached. The Committee is interested in any evidence of academic strength that would not be reflected in the overall GPA, such as:

- a pattern of grade improvement during the high school years,
- stronger performance in some academic areas than in others,
- completion of a substantial number of academic courses beyond the required minimum,

UNDERGRADUATE STUDY

Years of study required of applicants entering UW before Autumn 1992	HIGH SCHOOL SUBJECT REQUIREMENTS	Years of study required of applicants entering UW Autumn 1992 or later
3	<p>ENGLISH</p> <p><i>Before Autumn 1992:</i> Any course that can be applied toward the high school English graduation requirement counts toward this requirement. Courses in composition or literature are strongly recommended. (For students applying through the Educational Opportunity Program, courses in English as a Second Language do not count.)</p> <p><i>Autumn 1992 or later:</i> At least three of the four years of English study must be in composition and literature. One of the four years may be satisfied by courses in drama as literature, public speaking, debate, journalistic writing, business English, or a course in English as a Second Language (ESL). Courses that are not generally acceptable include those identified as remedial or applied, e.g., developmental reading, remedial English, basic English skills, review English, yearbook/annual, newspaper staff, acting, library.</p>	4
3	<p>MATHEMATICS</p> <p>Three years of mathematics study are required, at least at the level of algebra, geometry, and advanced (second-year) algebra. Preferably, the second year of algebra should include a component of introductory trigonometry, but this is not mandatory. More advanced mathematics courses such as mathematical analysis, elementary functions, and calculus are strongly recommended for mathematics or science majors. Arithmetic, pre-algebra, and business mathematics courses will not count toward this requirement. An algebra course taken in the eighth grade may satisfy one year of the requirement if second-year algebra is completed in high school.</p>	3
2	<p>FOREIGN LANGUAGE</p> <p>Two years of study in a single foreign language are required. The two years must be devoted to a single foreign language and must be in sequence, with no repetition of any prior terms of study. Any natural language that has been formally studied may be used, including languages no longer spoken, such as Latin and Greek, and American Sign Language (AMESLAN, the language of the deaf community). However, other forms of deaf signing, and "computer languages," are not acceptable. A language course taken in the eighth grade may satisfy one year of the requirement if the second-year course is completed in high school.</p> <p>The foreign language requirement will be considered satisfied for students from non-English-speaking countries who entered the United States educational system at the eighth grade or later.</p>	2
2	<p>SOCIAL STUDIES</p> <p>Courses that count toward this requirement include anthropology, civics, contemporary world problems, economics, geography, government, history, philosophy, political science, psychology, sociology. Credit awarded for student government, leadership, community service, or any other applied study or activity courses do not count.</p>	3
1	<p>SCIENCE</p> <p><i>Before Autumn 1992:</i> Study must be in a laboratory science, preferably biology, chemistry, or physics.</p> <p><i>Autumn 1992 or later:</i> One full year of basic principles of biology, chemistry, or physics must be completed with laboratory experience, and both semesters must be in the same field. The second year of science may be completed in any course that will satisfy the high school graduation requirement in science. Two years of agricultural science equal one year of science.</p>	2
0	<p>FINE, VISUAL, OR PERFORMING ARTS</p> <p><i>Autumn 1992 or later:</i> The fine, visual and performing arts include study in art appreciation, band, ceramics, choir, dance, dramatic performance and production, drawing, fiber arts, graphic arts, metal design, music appreciation, music theory, orchestra, painting, photography, pottery, printmaking, and sculpture.</p>	½
3	<p>ELECTIVES</p> <p><i>Before Autumn 1992:</i> Additional study in any of the first five subjects described above will count.</p> <p><i>Autumn 1992 or later:</i> One-half year of study is required in any of the six subjects defined above.</p>	½
14	TOTAL	15

■ enrollment in Advanced Placement or honors courses,

■ exceptional talent in an artistic field, or

■ persistent evidence of an unusually stringent grading system in the high school.

Using these criteria, the committee offers admission to the best qualified applicants. Applicants whose files are evaluated by the Freshman Review Committee will be notified of a decision slightly later than other applicants, but in time to respond to offers of admission from other colleges or universities.

Transfer Admission

In general, a transfer applicant is someone who has attempted college credit *after leaving high school*. Please see chart on page 21.

Admission Index

Except for those qualifying for admission under the Direct Transfer Agreement (see page 22), admission is based on each student's probability for academic success at the University. Applicants are ranked on an Admission Index (AI) scale ranging from 0 to 100. Those with higher probabilities of success are assigned higher index numbers as determined by a combination of grade-point average and test scores (obtained from one of the admission tests listed below). The minimum AI ranking required for admission varies from quarter to quarter, depending on the number of applicants and the University's enrollment level. Because the Admission Index combines grades with test scores and because the minimum AI varies from quarter to quarter, it is impossible to be more precise about what GPA or test scores a transfer applicant needs to be admissible. Applicants needing more information are encouraged to contact the Office of Admissions for counseling.

Applicants needing more information are encouraged to contact the Office of Admissions for counseling.

Test Scores

Applicants for transfer admission, except for those qualifying under the Direct Transfer Agreement, are required to submit scores from one of the following tests:

■ Scholastic Aptitude Test (SAT)

■ American College Test (ACT)

■ Washington Pre-College Test (WPCT). WPCT must have been taken by June 1, 1989 to be used for admission purposes.

In some cases, it is possible to be admitted to the UW without submitting test scores. As shown in the chart at

right, applicants with 75 or more transferable credits and high grade-point averages may be *considered* for admission without test scores. But simply having 75 or more credits will not guarantee admission to the University. Because the minimum admission criteria vary from quarter to quarter, it is not possible to state here exactly what college GPA would qualify a student for admission.

When students submit scores from more than one test or multiple scores from the same test, the Office of Admissions always uses the *highest combined score from a single test date*. (The best mathematics score from one test date will not be combined with the best verbal score from another test date.)

The UW's Office of Educational Assessment (OEA) offers a locally-scored SAT for transfer applicants, either those who did not take a pre-college test while in high school or those who wish to improve their score. The test schedule is published annually and is available upon request from the Office of Admissions. Space is limited and students are urged to register early for the desired test date. The nonrefundable test fee is \$20.

Two caveats are offered: (1) the OEA will not forward scores to institutions besides the UW, and (2) students planning to participate in NCAA sports may *not* use locally-scored tests to qualify for eligibility. If one of these situations applies, an applicant must taken the SAT on a national testing date.

What's Included in the Transfer GPA?

What follows are *general* guidelines for understanding the Admissions Office's policy on the transfer admission GPA, which is used in computing both the Admission Index and the cumulative GPA for Direct Transfer applicants. It must be emphasized, however, that these guidelines cannot address the many idiosyncratic cases and nuances in grading practices that the Admissions staff encounters when reviewing transcripts. In addition, it should be remembered that these policies pertain only to the transfer GPA for purposes of *determining general admissibility to the University*. Some undergraduate programs at the University, such as business administration or engineering, have selective admission policies. When they review transcripts, they may calculate GPA differently; for example, some departments use only courses in the major field or the GPA earned in the last 45 credits.

In calculating the transfer admission GPA, the Office of Admissions uses:

- All *transferable* academic courses, from all colleges student has attended, in which student has received grades between 0.0 and 4.0 on a 4.0 grading scale. Within this grading scale, Admissions uses the grade assignments of the home institution, whether 3.1 or 3.0 for "B." Although the UW uses a decimal scale for grading students in its own courses, transfer grades are not converted to a uniform decimal scale.

- Repeated courses. Beginning Winter 1983, UW policy states that any course may be repeated once and both grades are used in the GPA. Grades earned in subsequent repeats are not used at all.

- All transferable academic credit from two-year colleges, even if the student has earned more than 90 transferable credits from two-year colleges. (See Transfer Credit, Notable Restrictions on Transfer Credit.)

The Office of Admissions does *not* include in the transfer GPA:

- Courses considered to be below college level

- Math courses equivalent to MATH 101 (intermediate algebra) or 104 (trigonometry)

"How Many Credits Do I Need to Transfer to the UW?"

Transfer students often want to know if they must complete a minimum number of credits before transferring. As the chart below demonstrates, they can transfer with any number of credits, but the basis for the admission decision will vary with the number of transfer credits completed.

If an applicant has, by the application closing date, submitted transcripts showing the completion of:	Then an admission decision will be based on:
0-14 transferable ¹ quarter credits	the applicant's high school record. High school GPA + test scores must meet minimum Admission Index for freshmen. Student must achieve minimum cumulative GPA of 2.00 for transferable college course work, but college GPA is not otherwise considered.
15-39 transferable ¹ quarter credits	the applicant's high school and college record. High School GPA + test scores must meet minimum Admission Index for freshmen <i>and</i> college GPA + test scores must meet minimum Admission Index for transfers.
40-74 transferable ¹ quarter credits (30 credits must be graded ²)	the applicant's college record. College GPA + test scores must meet minimum Admission Index for transfers. High school GPA is not considered.
75 or more transferable ¹ quarter credits (60 credits must be completed and graded ²)	the applicant's college record. College GPA + test scores must meet minimum Admission Index for transfers. High school GPA not considered. Applicants with high college GPAs may not need to submit test scores, but because the minimum Admission Index (and therefore the minimum college GPA) varies from quarter to quarter, all applicants are urged to submit test scores.
academic associate degree from a Washington community college	terms of the Direct Transfer Agreement with Washington Community Colleges for residents of the State.

¹ *Transferable quarter credits: credits earned for college-level academic courses completed at regionally accredited colleges and universities. Quarter credits are those earned at institutions on a quarter system; one semester credit = 1.5 quarter credits. Transferable college credit includes credits attempted but not completed, i.e., those for which a grade of "F" (0.0) was earned. A maximum of 15 credits earned in vocational-technical program may be accepted in transfer but will not be used in the transfer GPA.*

² *Graded credit: Credit taken for a grade (not pass/fail or satisfactory/not satisfactory) in college-level academic courses at regionally accredited institutions. Credits earned in vocational-technical programs do not count as graded credit.*

Application Closing Dates

Quarter	Freshmen	Transfers and Post-baccalaureates	International Students ³	
			Freshmen	Transfers and Postbaccalaureates
Autumn	February 1	July 1	February 1	March 1
Winter	November 1	November 1	Applications not accepted	
Spring	February 1	February 1	Applications not accepted	
Summer/Autumn ¹	February 1	May 15	February 1	March 1
Summer Only ²	All categories of applicants: June 1 is the closing date for mail-in application and registration. In-person registration required after June 1.			

¹ Summer/Autumn is for applicants seeking to matriculate in Summer and continue in Autumn.

² Summer Only is a nonmatriculated status. Applicants admitted for Summer Only cannot continue in Autumn Quarter.

³ Use *Undergraduate International Admission Application*.

■ Certain religion courses that teach from a particular doctrinal perspective or that teach preparation for a ministry

■ Developmental or remedial courses

■ Courses in study skills

■ Lower-division military science courses

■ English as a Second Language

■ Vocational/technical courses

■ Courses recorded with a grade of "Incomplete" (unless changed to "F" at home instruction)

■ Courses recorded with a grade of "Pass" or "Satisfactory"

■ PE activity credits in excess of 3 quarter credits

Direct Transfer Agreement with Washington Community Colleges

The Direct Transfer Agreement is an admission policy for applicants who do not qualify for admission on the basis of their Admission Index. It ensures that Washington community college students can complete an academic transfer associate degree with the assurance that they will have access to a four-year institution upon completion of the program.

To qualify for admission under the Direct Transfer Agreement, an applicant must:

■ be a resident of Washington State,

■ transfer directly from a Washington community college,

■ complete all core subject requirements by the time of matriculation at the UW (i.e., the point at which the student enrolls for the purpose of earning a degree),

■ complete an approved academic associate degree at a Washington community college, and

■ have a 2.75 GPA in all transferable academic course work at the time the associate degree was completed and/or at the time of admission. No admission test scores are required or used.

If the associate degree is projected to be completed prior to matriculation at the UW, no more than one quarter of course work may be outstanding (excluding summer quarter). For example, an applicant for Autumn Quarter 1991 who expects to complete the associate degree in spring 1991 must submit transcripts through winter 1991. If the applicant in January 1991 submits an application and an initial set of transcripts showing grades through autumn 1990, an updated transcript showing winter 1991 grades will have to be sent to Admissions in March or early April. Nonetheless, early application is encouraged.

If an applicant continues to enroll at a community college or enrolls at a four-year college or university as a nonmatriculated student after the associate degree is completed, the Direct Transfer Agreement requires that the student's GPA in transferable course work does not drop below 2.75.

An applicant will *not* qualify for admission under the Direct Transfer Agreement if:

■ the applicant *matriculates* at a four-year institution after obtaining the associate degree.

■ the GPA is below 2.75 at the time the associate degree is completed.

■ the GPA drops below 2.75 for transfer work taken after obtaining the associate degree.

The transfer agreement ensures admission to pre-major status in the College of Arts and Sciences but *does not* promise admission to any other school or college nor to any particular major or professional field of study within the University. (See below, Transfer Credit, Associate Degree Agreement with Washington Community Colleges.)

Postbaccalaureate Admission

Because of enrollment limitations at the University, only a small number of applicants are admitted every quarter as postbaccalaureate (fifth-year) students. Postbaccalaureate is a *matriculated* status at the University of Washington, reserved for students who are working toward a second bachelor's degree, completing teacher certification, or preparing for entrance to graduate or professional school. A student who is not admissible as a postbaccalaureate may still take advantage of the many educational opportunities at the University by enrolling as a *nonmatriculated* student.

A portion of the postbaccalaureate applicants are admitted on the basis of GPA alone; the minimum GPA selected will depend on the number of applicants and the number of spaces available for a particular quarter. The remainder will be evaluated using information provided by the student in a supplemental application statement.

The Office of Admissions will inform applicants with undergraduate GPAs below the established quarterly minimum that if they wish to be considered further, they will be required to submit a supplemental statement to the Postbaccalaureate Review Committee (PRC). It is expected that supplemental statements will be required from applicants with GPAs below 3.25-3.50; the exact GPA will vary by quarter. (In calculating the cumulative undergraduate GPA, the Office of Admissions uses only those grades earned at four-year colleges and universities toward the first bachelor's degree.) Students whose educational needs can be met through one or more nonmatriculated options or by completing course work at a community college or another four-year college or university most likely will not be admitted.

An applicant may submit the supplemental statement at any time in the application process, but no later than the date specified in the letter that will be sent after the initial review of the applicant's file. Postbaccalaureate decisions are made on a rolling basis; applicants whose supplemental files are completed early will receive priority. Supplemental statements should be typed or written on stationery or plain white paper; there is no special form. The student will be notified in writing of the final decision after evaluation of the supplemental statement.

Evidence of the following kind will be considered:

■ a clearly defined statement of purpose for postbaccalaureate study, including the specific courses required at the UW in cases of intended short-term study;

■ a demonstrated need to enroll at the University of Washington at this stage of your educational career;

■ a probability or assurance of admission to a degree program. If you are seeking admission to a competitive undergraduate program, your written statement must be accompanied by a letter of support from the department/program;

■ a record of high academic performance in postbaccalaureate study when that study is relevant to your academic plans at the UW;

■ an explanation of circumstances that might make the cumulative undergraduate GPA an unreliable indicator of your academic potential;

■ affirmative action goals of the desired degree program;

■ contributions you can make to the desired degree program and to the University;

■ for students seeking to prepare for graduate study: evidence of counseling from a graduate adviser and, preferably, a letter of departmental support.

Admission Process

Nonresident Applicants

Applicants who are not Washington State residents are expected to meet admission standards substantially higher than those required of residents. If evidence of Washington residency is not submitted, the University assumes the applicant is not a Washington resident, particularly if transcripts are received from schools in other states. Applicants who are uncertain of their status as Washington State residents should contact the Residence Classification Office.

Students From Other Countries

The University believes its greatest contribution to international education can be made in the area of graduate study.

Because of limited University facilities and departmental restrictions, only a small number of foreign undergraduate applicants are accepted directly from abroad. Foreign undergraduate applicants are considered for admission only for Summer Quarter or Autumn Quarter and must present academic records well above the average to be competitive for admission. Such students also must present evidence of English language proficiency by providing scores from the Test of English as a Foreign Language (TOEFL). The only exceptions are native-born citizens of Australia, Canada, Great Britain, Ireland, and New Zealand. More information on the TOEFL appears under English As A Second Language (ESL) Center in the UW Extension section of this catalog.

Specific information on admission of foreign undergraduates accompanies the special application form for foreign applicants.

ENGLISH PROFICIENCY REQUIREMENT FOR STUDENTS FROM NON-ENGLISH-SPEAKING COUNTRIES

Immigrant, refugee, or foreign students from non-English-speaking countries who have been attending high school or college in the United States before applying for admission to the University must satisfy the same admission requirements as other applicants. In certain cases, however, a native language other than English can be used to satisfy the foreign-language requirement. Evidence of English language competency is required of all students from non-English-speaking countries, and students may be required to take English As A Second Language courses if their competency in English is below the 580 level on the TOEFL. Specific information on this requirement may be obtained from the Office of Admissions or, for admitted students, from the Office of Special Services.

Special Admissions and the Appeal of Admission Decisions

Special admission procedures are available to applicants who, because of special circumstances, are unable to meet the above requirements for routine admission but are able to submit additional evidence indicating that they will significantly benefit from or contribute to the University's undergraduate programs. This non-routine avenue of admission is maintained to ensure the fair evaluation of all applicants.

An applicant who wishes to appeal the original decision and be considered under special admission procedures may do so by writing a letter of petition to the Committee on Admissions and Academic Standards. Applicants submitting such a letter may do so with the assurance that any additional evidence in support of the application will be carefully reviewed. An applicant who is accepted by the committee will be expected to comply with any requirements outlined by the committee at the time of admission. Letters to the Committee on Admissions and Academic Standards should be written or typed on plain paper—there is no special form—and sent to the Office of Admissions.

Applicants with disabilities are encouraged to enclose with their application a statement describing the disability. If appropriate, certain admission requirements may be waived or substitutions authorized. For more assistance, please contact the Office of Admissions or Disabled Student Services.

Filing an Application

Prospective students may obtain the University of Washington undergraduate application form from the Office of Admissions by calling the 24 hour voice mail recording at (206) 543-5150 or by writing to the Office of Admissions. Departmental applications for those programs with special admission requirements (see following section) must be obtained directly from the department. High school students within Washington State are encouraged to obtain the Uniform Undergraduate Application Form from their high school counselors.

Applicants in all categories are advised to apply early since limited availability of space may necessitate closure of admission prior to the closing dates. Transfer and postbaccalaureate applicants should plan to submit all required documents at least one month before the published closing date or departmental deadline; applicants for Autumn Quarter often begin applying in February/March. High school and all international applicants are encouraged to apply in December for Summer or Autumn quarters.

A complete application file consists of the following materials:

■ Application

■ Application fee of \$25. This fee is nonrefundable and must be submitted each time you apply.

■ Official high school transcript showing grades through the junior year (grades 9-11). If, by the appropriate filing date, you submit an updated transcript showing grades for the first half of the senior year, your cumulative GPA and Admission Index will automatically be recalculated.

A transcript is official if it is (a) sent directly by your school to the Office of Admissions or (b) sealed by the school and mailed or delivered to Admissions by you. If you open the envelope, the transcript is no longer official.

■ Test scores from SAT or ACT. Scores from WPCT are acceptable if you took the exam by June 1, 1989.

Test scores are official if they are (a) sent directly from the testing agency to the UW or (b) recorded on your high school transcript. It is preferable that test scores be sent directly from the testing agency.

Students who expect to participate in intercollegiate athletics are required to submit scores from ACT or SAT (WPCT not acceptable for eligibility), and these scores must be sent directly from the testing agency.

■ Two official transcripts from each college attended, if applicable.

An application file that is incomplete on the application closing date is not considered further unless space availability permits an extension of the deadline. The \$25 application fee cannot be returned or used for a future application. To be considered for a future quarter, it is necessary to submit a new application, a \$25 application fee and current documents. Any documents that were submitted in support of an application are retained for twelve months and are transferred to a new application if they are the most current records available.

An application is good only for the specific quarter requested. You will have to reapply and pay another application fee if you file an application for one quarter and (1) you are accepted but would like to enroll for a later quarter (delayed or deferred enrollment is not an option), (2) you are not accepted and wish to apply for a future quarter, (3) you have submitted an application and application fee but later decide not to complete your application file.

Other Application Forms

APPLICATION FOR FINANCIAL AID

Application for financial aid is a process entirely separate from application for admission. Interested students should contact the University's Office of Student Financial Aid or the counselors at their own school for information about financial aid availability.

RESERVATIONS FOR UNIVERSITY HOUSING

Admission to the University does not automatically reserve residence hall space. Because housing arrangements must be made separately, students do not need to wait until they are admitted to the University before applying for a room in the residence halls. Additional information on student housing appears in The University section of this catalog.

Academic Programs with Special Admission Requirements

Fulfilling the above admission requirements does not guarantee admission to a specific department or program. The departments listed below have admission requirements in addition to the general University requirements. Applicants to these departments should submit a completed application form to the Office of Admissions at least four weeks prior to the appropriate departmental deadline to allow time for the department to request any supplementary information from the applicant.

If a supplemental application form is required, it will be sent to the applicant by the department. Transfer applicants who meet the general admissions standards in effect for the quarter for which they are applying but are not accepted by the program of their choice will be offered admission to the University as premajors. Complete information on departmental admission requirements and procedures may be obtained from the appropriate department.

Special Categories of Admission

Educational Opportunity Program Students

The University of Washington is committed to increasing the number of qualified ethnic minority and economically disadvantaged student at all levels of its educational programs. American Indian, Asian and Pacific Islanders, Black, Chicano/Hispanic, and economically disadvantaged White students who

- plan to enroll as matriculated undergraduate students,
- are U.S. citizens or permanent residents, and
- may not qualify for routine admission

are urged to apply to the University through its Educational Opportunity Program (EOP), which is administered by the Office of Minority Affairs. Once they enroll at the University, EOP students are provided special services—counseling, testing, academic advising, tutoring, and special instruction—to help them pursue their studies successfully. Students who are interested in receiving consideration for admission through this program should print EOP at the top of their application forms. For more information, contact the Educational Opportunity Program.

Returning Former Students

A returning former student who has been away for one quarter or more or a graduate student returning from official leave status is required to complete and file a Former Student Enrollment Application. An undergraduate is required to pay a \$25 application fee by the closing date. Returning former students who have been away from the University less than two quarters have the highest priority for readmission. A student previously enrolled in an academic program with restricted enrollment and/or special admission requirements should consult his or her adviser about procedures for readmission. Returning nonmatriculated students are enrolled as space permits.

A returning student must pay a nonrefundable enrollment confirmation deposit of \$50 by the date indicated in the offer of readmission.

The Procedures and Fees section of this catalog contains additional information on registration, tuition, and fees.

Nonmatriculated Students

Matriculated status at the University of Washington is reserved for students who meet competitive admission standards and who are enrolled primarily for the purpose of earning a degree. However, many students will find their educational needs met through nonmatriculated enrollment.

Although a student enrolled at the UW in a nonmatriculated status cannot earn a degree in that status, a grade is earned and full credit is awarded and recorded on a UW transcript. (Exception: see section on the Access program below.) The credits earned by a nonmatriculated student usually transfer to other institutions. If a student is later accepted into a matriculated status at the UW, courses earned as a nonmatriculated student may be applied to undergraduate degree requirements, with some restrictions; a maximum of 90 credits earned through correspondence and/or extension programs may be applied towards the bachelor's degree, and the last 45 credits of a baccalaureate degree must be earned as a matriculated student in residence at the UW.

UW Extension

UW Extension brings the University's resources to the community by providing many of the educational programs described below. Moreover, because the University does not allow nonmatriculated enrollment during Autumn, Winter, or Spring quarters—except for those using faculty/staff tuition benefits—Extension fills a critical need. No formal admission procedures or academic credentials are required to register for Extension programs, with the exception of graduate nonmatriculated students. Tuition is charged by the credit hour (about \$300 for a 5-credit undergraduate course, \$600 for a graduate course), and nonresidents pay the same fees as Washington State residents.

Summer Quarter: Includes a nine-week academic session, as well as two terms, each four and one-half weeks long, and special intensive classes and workshops. All of these programs are offered for credit. Because the UW has no enrollment ceiling during the summer, all qualified applicants are welcome, and all pay the same tuition as Washington State residents (about \$600 for full-time enrollment.) Admission as a nonmatriculated student in Summer Quarter does not permit you to continue in this status Autumn Quarter. To obtain a free bulletin, telephone (206) 543-2320, or write to UW Summer Quarter, GH-24, 5001 25th Avenue N.E., Seattle, Washington 98195.

Non-degree Evening Credit Program: Each quarter, Extension offers a variety of credit courses, most of which are scheduled to begin after 4:00 p.m. all evening credit classes are taught by regular University fac-

ulty members and approved extension lecturers. Students will find introductory and upper-division course offerings in English, foreign languages, mathematics, chemistry, physics, and many other subjects. The quarterly Extension catalog is available by telephoning (206) 543-2320, or writing to UW Extension, GH-24, Seattle, Washington 98195.

Placement in University courses: Extension arranges the placement of students in regular UW courses on a space-available basis; enrollment, however, is limited to one course each quarter. You may begin the paper work for this arrangement anytime before the quarter begins by telephoning (206) 543-6160.

Access Program for Older Adults: The UW waives tuition for Washington residents sixty years or older who wish to audit classes on a space-available basis. Students enrolling under the Access program are limited to two courses per quarter. A registration fee is charged. As auditors, Access students do not receive credit and are not expected to do laboratory work or to take examinations. A UW transcript is not maintained. Registration may be completed in person. For additional information on the program or on mail-in registration specifically, telephone UW Extension at (206) 543-2300.

Distance Learning: (Independent Study by Correspondence): Distance Learning offers approximately 130 courses through independent study by correspondence. The guidance of a qualified instructor who normally teaches the course on campus is combined with the convenience of studying at one's own pace. Courses typically consist of assigned texts, study guides, assignments, and examinations, and such supplementary materials as audiocassettes, records, slides, and laboratory kits. Special arrangements can be made for independent study students to take some University courses not currently listed in the correspondence curriculum. Distance Learning also offers certain noncredit courses required for University admission, such as Math 101 (Intermediate Algebra). Students may register at any time and have one calendar year in which to complete their work. Students are charged \$51 per credit, plus additional instructional costs for some courses. To obtain a bulletin listing, independent study courses, telephone (206) 543-2350, or write to Distance Learning, UW Extension, GH-23, Seattle, Washington 98195.

Faculty/Staff Tuition Exemption

With the approval of their departmental administrator, full-time UW faculty and staff members who have been

employed six months or more may take up to 6 credits per quarter under the tuition exemption program. According to legislative action, all registrations must be on a space-available basis after other matriculated students have registered. Faculty/staff members seeking to enroll as matriculated students must comply with all the regular application procedures and must meet the admission standards in effect for the quarter for which they apply. However, those wishing nonmatriculated status may apply through the mail before the application closing date (no transcripts or other documents are required) or in person after the closing date. The regular \$25 application fee is charged, and a registration fee will be billed after the quarter begins. For further information, please consult the Office of Admissions, PC-30, 320 Schmitz Hall; telephone (206) 543-9686.

Auditors

Individuals who wish to audit University courses should apply for admission with nonmatriculated standing. Attendance in courses as an auditor is by consent of the instructor involved and is conditioned by the extent to which space is available. Permission to audit is ordinarily granted for lecture classes only. An auditor may not participate in class discussion or laboratory work, and his or her registration may be canceled at the discretion of the instructor. No record of audited courses is kept. Regular tuition and fees are charged. To receive credit for an audited course, the student must register for the class for credit in a subsequent quarter.

Academic Credit

Transfer Credit

The Office of Admissions awards transfer credit according to the guidelines listed below. It reserves the right to accept or reject credits earned at other institutions of higher education. In general, it is University policy to accept credits earned at institutions fully accredited by the regional accrediting association, provided that such credits have been earned through university-level courses (see exceptions below) appropriate to the student's degree program at the University.

It is University policy to grant credit for course work on the basis of the University's acceptance at the time the course was taken. Courses taken at a community college during the 1989/90 and 1990/91 academic years will be accepted at the University according to the evaluation listed in the section entitled "Community College Courses/UW Equivalencies" of the 1989-91 *Transfer Guide* regardless of when the student transfers to the University of Washington.

Appeal Procedure

If not all courses transfer and the student questions a decision, the student should consult the admission specialist who completed the transfer evaluation. Further appeal can be directed to the UW Transfer Officer in the Admissions Office or the Transfer Officer at the student's former Washington college or university.

Adviser's Worksheet

The Office of Admissions completes a course-by-course evaluation of transfer credits *after the student confirms enrollment by payment of the \$50 enrollment confirmation deposit and shortly before the student's advising/registration date*. The enrollment confirmation deposit is deducted from the first quarter's tuition but is not refundable if the student does not enroll. (Students admitted for Summer/Autumn quarter are not required to pay an enrollment confirmation deposit and therefore, will automatically receive the evaluation shortly before they register.) One copy of the Worksheet is sent to the student; a second copy is sent to the student's academic advising office.

The information recorded on the Adviser's Worksheet—including the transfer of credits and the transfer GPA—becomes a part of the student's permanent record at the University. If a student applies to an academic program with special admission requirements, transfer course work and the transfer GPA will be considered. However, the Adviser's Worksheet is not an official transcript. The official UW transcript—which is sent out to other institutions—will not include the transfer GPA or a detailed listing of the transfer credit the UW awarded; it merely lists the other colleges the student has attended and the total number of transfer credits awarded. After the student enrolls at the UW, transfer grades are not included in the University GPA.

Applicability of Transfer Credit to Degree Requirements

Before a student first registers for classes at the University, he/she will meet with an academic adviser to plan a program of study. The adviser will determine how the transfer credits shown on the Adviser's Worksheet may be used in meeting degree requirements at the UW. Although Admissions may award a student 100 transfer credits, for example, it might be that only 70 of those credits can be applied toward the various graduation requirements for a student's degree program.

Class Standing

A student's class standing is determined by the total number of transfer credits awarded by the University of Washington, not by the number of years of college study or completion of an associate degree.

The following table lists the required credits for each class:

Freshman	0-44
Sophomore	45-89
Junior	90-134
Senior	135 or more

Students should note that satisfying UW graduation requirements depends not only on the number of credits completed (a minimum of 180) but also on completion of all college and major requirements.

Advanced Placement Program

Students who engaged in college-level study in high school can obtain credit toward a UW degree, or placement in advanced courses, or both, on the basis of their performance in the Advanced Placement Program of the College Board. In many departments, credit and/or placement is awarded for scores of 3 or higher. In some cases, students must consult an appropriate departmental adviser after arriving at the University. For a full complete statement of the University's AP credit policy, see pages 27-28.

Notable Restrictions on Transfer Credit

COMMUNITY COLLEGE CREDIT

A maximum of 90 credits from community college course work may be applied toward the credits required for the bachelor's degree. *All* of the courses transferred from two-year colleges may be used toward graduation requirements, but a student must still complete at least 90 credits of course work at the UW or at another baccalaureate granting institution (see senior residency requirement, below.) Think of transfer courses as a "bank" from which to draw. All of a student's transferable courses remain in the bank to be applied toward specific degree requirements, but 90 additional credits must be earned.

ECONOMICS COURSES

No credit is awarded for ECON 100 if ECON 200 or ECON 201 was previously taken. A student will be awarded transfer credit for only one of ECON 311 and STAT 311.

EXTENSION CREDIT FROM OTHER SCHOOLS

Extension credit earned at other schools may not exceed 45 credits. Military credit, discussed below, is included in the 45 extension credit limit.

GUIDANCE/PERSONAL DEVELOPMENT

A maximum of 3 credits is awarded for courses in this area as part of the 15 credits allowed for vocational/technical courses.

LANGUAGE COURSES

For students entering college autumn 1987 or later, no credits is awarded for an entry-level language course if it was previously taken in high school for two full years and therefore used to meet the UW admission requirement. For example, a student who studied Spanish in high school for two years and enrolled in SPAN 101 at the UW or another college would not receive credit for the class.

LIMITATION ON ROTC CREDITS

Credits earned in first- and second-year military training courses may not be counted in the basic 180 credits that are required for graduation. Some third- and fourth-year courses may count, depending on the student's college or school.

MATHEMATICS COURSES

For Business Administration majors only: Credit is usually not allowed for MATH 156 if taken after MATH 157; for MATH 105 if taken after MATH 124; or for MATH 157 if taken after MATH 124.

MILITARY CREDIT

Credits earned in Armed Forces Training Schools (AFTS) and through USAFI and DANTES may not exceed 30 credits and are included in the 45 extension credit limit. Official transcripts or DD-214 or DD-295 forms must be submitted, and credit will not be awarded until after the student has enrolled. Scores received in such course work are not included in the transfer GPA.

OUT OF SEQUENCE COURSES

Credit is not awarded for prerequisite courses completed after a more advanced-level course has been completed. For example, students will not be awarded credit for SPAN 102 if it was taken after SPAN 103.

PHYSICAL EDUCATION

No more than 3 quarter credits will be allowed for physical education activity courses.

PHYSICS COURSES

A student will be awarded transfer credit for only one from each of the following pairs if taken Autumn Quarter 1982 or later: PHYS 114 or 121; PHYS 115 or 122; PHYS 116 or 123; PHYS 117 or 131; PHYS 118 or 132; PHYS 119 or 133.

STATISTICS COURSES

A student will be awarded transfer credit for only one course among the following: STAT 220, 301, 311, or ECON 311.

VOCATIONAL-TECHNICAL COURSES

A maximum of 15 transfer credits will be awarded for a wide range of college-level courses that are vocational-technical, rather than academic, in content, for example, bookkeeping, electronics, physical therapy technician. These credits may apply only to the elective credit components of a baccalaureate degree and only with departmental approval.

Courses Receiving No Credit

Courses receiving no transfer credit include (but are not limited to):

- courses below college level (usually numbered below 100)
- repeated or duplicate courses

■ course work taken at an institution that is not accredited by the regional association

■ courses that give instruction in a particular religious doctrine

■ mathematics courses considered below college level, including basic math, business math, beginning and intermediate algebra, and trigonometry

■ any course in the following categories:

Aeronautics/Aviation/Pilot Training
Air Conditioning/Heating/Refrigeration
Allied Health (Optics)
Auto Mechanics
Beginning Typing
Carpentry/Construction Methods
Cooking/Baking
Cosmetology
Custodial Training/Maintenance
Diesel Mechanics
Fire Science
Graphics Reproduction
Horseshoeing/Farriery
Military Science (lower-division)
Remedial English/Reading
Replacement Parts
Stationary Steam Engineering
Study Skills
Water Science Technology

■ College-Level Examination Program (CLEP): The University does not accept or award credit for College-Level Examination Program (CLEP) general or subject examinations. Any such credit awarded by other institutions, or through independent testing, will not be transferred to the University.

Transferring from Washington Community Colleges

The University of Washington subscribes to the statewide Policy on Inter-College Transfer and Articulation Among Washington Public Colleges and Universities

endorsed by the public colleges and universities of Washington and the State Board for Community College Education, and adopted by the Higher Education Coordinating Board. The policy deals with the rights and responsibilities of students and the review and appeal process in transfer credit disputes.

The Associate Degree Agreement with Washington Community Colleges

Many community college students who plan to transfer to the University ask about the advantage of earning an associate degree before they transfer. There are two separate agreements that may benefit such students.

One of these, the Direct Transfer Agreement, assures students of admission to the UW (see above). The other agreement, called the Associate Degree Agreement, has to do with how courses from the community college apply toward graduation requirements at the UW. It was approved by the community colleges and the UW College of Arts and Sciences, but some of the other colleges of the University (namely, Education and Social Work) also honor it. The agreement concerns students with any academic-transfer associate degree from a Washington community college, beginning with those who transferred in autumn of 1985. To qualify for the agreement, a student must complete all the requirements for the associate degree before regular admission to UW; earlier enrollment as a nonmatriculated student in summer quarter or UW Extension, or in UW correspondence courses, however, is allowed.

Students commonly believe that the completion of an associate degree ensures that the "first two years' requirements" at the UW have been satisfied. This is a misperception. The College of Arts and Sciences does not have any "first two years' requirements." Its requirements are grounded in the assumption that general education continues throughout the entire college career.

Nevertheless, students entering Arts and Sciences with an associate degree do earn two benefits that make planning easier. The primary benefit is that the

College of Arts and Sciences will count transfer courses toward the same distribution category as the community college did, even if the courses are not on the University distribution list or are not listed as distribution courses in the *UW Transfer Guide for Community Colleges in Washington*. There are three caveats, however: courses in the student's major may not be counted for distribution; courses such as first-year foreign language that are needed for proficiency requirements may not also be used for distribution; and a course that does not transfer for credit (e.g., intermediate algebra) may not be counted toward general education requirements. In addition, most students will have fewer than 20 credits in each of these three distribution areas, and those students will probably finish their general education requirements after transfer to the UW.

The second benefit is that students with associate degrees do not have to be concerned about subcategories (Part A and Part B) within the humanities and social sciences, even if they are finishing their distribution requirements after transferring. On the other hand, they are *not* exempted from completing:

- a set of linked or related courses in the sciences and, in most cases, also in the humanities/social sciences; and

- additional writing courses, known as W-courses.

Some community colleges have an associate degree option that allows the student to follow the requirements of a program at a four-year school. Lacking that option (and depending on the likelihood of being admitted without recourse to the Direct Transfer Agreement), a student may be better off not earning the associate degree, particularly for programs outside the College of Arts and Sciences, such as business, engineering, and pharmacy, that have very specific prerequisites and therefore do not honor the Associate Degree Agreement.

In order to finish a bachelor's degree within the shortest time, some students should consider transferring to the University before completing an associate degree. For example, students planning a major in certain languages may need to transfer early in order to start course work available only at the University. Also, students in the pre-professional programs such as pre-medicine or pre-dentistry should follow suggested course work listed in the *Transfer Guide* and talk with a UW adviser late in their freshman year.

Required Major Declaration

All students are expected to declare a major by the time they have earned 105 credits. Transfer students entering with more than 105 credits can register as pre-majors their first quarter but must see an adviser to declare a major or to request an extension of their pre-major status by the end of their first quarter in residence at the University. Students who have neither declared a major nor arranged for an extension by the time they have completed 105 credits will be unable to register the following quarter until they have clarified their degree plans with an adviser.

Earning Credit by Special Examination

Regularly admitted and currently enrolled students may take special examinations, sometimes known as challenging a course, in subject matter offered by the University to gain credit without being enrolled in specific courses. Credit may be granted—

1. For independent study.
2. For work completed with private teachers.
3. For work completed in unaccredited institutions if a formal examination is deemed necessary by the Chairperson of the concerned department(s). (In some cases, credit may be validated without an examination. Students who wish to validate credit must make arrangements with the Office of Admissions.) The following restrictions apply:

- a. No one may take a credit examination for a course in which he or she has received prior credit.
- b. All credits earned by examination are counted as extension credit and are included in the 90-extension-credit maximum that may be applied toward the baccalaureate degree. No credit is allowed by examination if the grade earned is less than 2.0. Grades earned are not included in the grade-point average.
- c. No student shall receive credit by examination for a course for which the student would not be eligible to receive credit if the course were taken in residence.
- d. No student is permitted to repeat any examination for credit.
- e. No student shall receive credit by examination for lower-division courses in the student's native language.

guage. (Some language departments have more restrictive policies. Consult the individual language department for details.)

f. Credit by examination is not acceptable for application toward an advanced degree in the Graduate School.

A student who wishes to qualify for credit by examination must apply to the Grade Recording Information Office for a certificate of eligibility no later than Friday of the second week of the quarter. The student presents it for signed approval to an instructor responsible for the course in which the examination is to be taken, to the Chairperson of the department concerned, and/or to the Dean of the college or school concerned. It is then returned to the Grade Recording Information Office. Signed certificates and payment of \$25 per examination to be challenged must be accomplished by Friday of the second week of the quarter.

Examinations are administered by the Office of Educational Assessment during the fifth week of the quarter.

No student is permitted to take more than two examinations in 3-, 4-, or 5-credit courses, or more than three examinations in 1- or 2-credit courses in one day. Should the student plan to take more examinations in a given quarter, an additional day may be permitted and arrangements made with the Office of Educational Assessment.

Advanced Placement (College Board)

Students who do college-level work in high school can receive appropriate credit or placement, or both, at the University on the basis of performance in the Advanced Placement Program (AP) of the College Board.

Listed below are departmental policies on granting placement or credit for AP examinations. Grades range from a high of 5 to a low of 1; in most departments, credit and/or placement is awarded for grades of 3 or higher. In some cases, the student must consult the appropriate departmental adviser after arriving at the University.

Art Art History	AP-5	ART H X (10 credits). See departmental adviser for placement. Credits may apply to humanities fine arts requirement.
	AP-4	ART H X (5 credits). See departmental adviser for placement. Credits may apply to humanities fine arts requirement.

UNDERGRADUATE STUDY

Studio Art		No credit. See departmental adviser for placement.	Economics		No credit will be given. See departmental adviser for placement.	Romance Languages Language	AP-5	FREN (SPAN) 201, 202, 203 (15 credits)
Biology	AP-5 } AP-4 }	See biology adviser for credit and placement. A minimum of 5 credits awarded after conference with adviser; up to 10 credits possible. "BIOL X" AP credit may be counted toward natural science distribution.	English	AP-5 } AP-4 } AP-3 }	ENGL 111 (5 credits) For students with AP-5, -4, or -3 scores on either the language and composition examination or the composition and literature examination.		AP-4	FREN (SPAN) 201, 202 (10 credits)
Chemistry		No credit will be given. For Engineering, students who are exempt must take additional courses to meet the minimum chemistry requirement.		AP-5 } AP-4 } AP-3 }	ENGL 111, 131 (10 credits) For students with AP-5, -4, or -3 scores on both the language and composition examination and the composition and literature examination.	Literature	AP-3	FREN (SPAN) 201 (5 credits)
	AP-5	Exemption from CHEM 140, 141, 150, 151, 160 granted upon successful completion of CHEM 231 or 335; consult chemistry adviser.	German Language	AP-5	GERM 201, 202, 203 (15 credits)		AP-5	FREN (SPAN) X (15 credits)
	AP-4	Exemption from CHEM 140, 141, 150, 151 granted upon successful completion of CHEM 160 or 164; consult chemistry adviser.		AP-4	GERM 201, 202 (10 credits)		AP-4	FREN (SPAN) X (10 credits)
	AP-3	Exemption from CHEM 140, 141, granted on successful completion of CHEM 150; consult chemistry adviser.	Literature	AP-3	GERM 201 (5 credits)		AP-3	FREN (SPAN) X (5 credits)
Classics Latin Lyric	AP-5 } AP-4 }	LAT 305, 306 (10 credits)			See departmental adviser for exact courses and placement. Any AP-3, -4, or -5 score satisfies the Arts and Sciences foreign-language proficiency requirement.			
Vergil	AP-5 } AP-4 }	LAT 103 (10 credits)	Government and Politics American Comparative	AP-5	(12 credits)			
Latin Lyric and Vergil	AP-5 } AP-4 }	LAT 305, 307 (10 credits)	History American	AP-4	(9 credits)			
Computer Science A Exam	AP-5 } AP-4 } AP-3 }	LAT 103 (5 credits)	European	AP-5 } AP-4 }	(6 credits)			
	AP-5 } AP-4 }	LAT 305, 306, 307 (15 credits)	Mathematics AB Examination	AP-5	MATH 124, 125 (10 credits)			
	AP-3 }	CSE X (5, 4, 3 credits, respectively). With permission of the instructor, a student scoring AP-5, 4, or 3 may skip CSE 210 and begin with CSE 211. If the student successfully completes CSE 211, the CSE X units may be converted to 5 credits of CSE 210. If a student does not complete CSE 211, the CSE X credits may count as electives toward a degree, but not toward requirements for a major in computer science.	BC Examination	AP-4 } AP-3 }	MATH 124 (5 credits)			
AB Exam	AP-5 } AP-4 }	CSE X (3 credits). Credits may count as electives toward a degree, but not toward requirements for a major in computer science.	Music Appreciation	AP-5 } AP-4 }	MATH 124, 125 (10 credits)			
			Theory	AP-3	MATH 124 (5 credits)			
			Physics	AP-5 } AP-4 }	See departmental adviser for placement and possible credit.			
					No credit. See departmental adviser for placement.			
					No credit. Exemption from PHYS 121, 122 for Physics C examination, or from PHYS 114, 115, 116 for Physics B examination. For Engineering, students who are exempt must take additional courses to meet the minimum physics requirement.			

Advanced Placement Credit

A student who begins college study in the third quarter of the second-year University language sequence may receive 5 credits for the second quarter of the second-year course, provided the third-quarter course is successfully completed. Similarly, a student who begins college study with an upper-division course in a language (other than courses in English translation or in conversational practice) may be granted 10 credits for the second- and third-quarter courses of the second-year sequence, provided that course is successfully completed.

A student who is placed by examination at the level of MATH 125 or higher receives additional credits upon completion of the advanced course. If the student's first University mathematics course is MATH 125, credit for MATH 124 is given. A student whose first mathematics course is MATH 126 is given credit for both MATH 124 and 125.

A student must apply for advanced placement credits at the Grade Recording Information Office of the Registrar's Office after having completed the advanced course.

International Baccalaureate

Students who complete the International Baccalaureate diploma in high school can receive college credit at the University in their Higher Level subjects. Five quarter credits are granted to holders of the IB diploma (but not IB certificates) for each Higher Level subject in which a grade of 5 or higher is earned.

University Placement Tests

Information concerning mathematics, chemistry, and foreign language placement tests is included with the offer of admission or in the leaflet on registration instructions, which is mailed to applicants upon receipt of their enrollment confirmation. Additional information on recommended tests may be obtained from the appropriate college or departmental advising office. Testing information is also available at the Office of Educational Assessment in Schmitz Hall.

Grades and Progress

Satisfactory Progress

Students admitted to the University to pursue baccalaureate degrees are expected to make satisfactory progress toward the attainment of that degree and are expected to enter a major and to graduate after completion of a reasonable number of credits.

By the time undergraduate students have completed 105 credits, they either must be accepted in their major or have their premajor status extended temporarily by an adviser.

Students who do not declare a major by the time they have earned 105 credits, or who have exceeded the graduation credit limits, or who have not been accepted in a major as fifth-year or postbaccalaureate students, will have a "hold" placed against registration beginning the following quarter.

Students must graduate with their first baccalaureate degree by the time they have completed 30 credits beyond the credits required for the first degree or concurrent degrees. Departmental advisers may grant extensions beyond the 30-credit limit.

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree, or working toward a certificate. Students admitted as "postbaccalaureate undeclared" must declare a major by the time they have earned 30 credits beyond their last degree, and once a degree objective has been declared, must make progress toward that degree as evidenced by the courses they have completed satisfactorily. College

advisers may grant extensions beyond the 30-credit limit.

The Committee on Admissions and Academic Standards may terminate a student's enrollment if the student demonstrates lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. The student may be reinstated with the approval of the student's college and the committee. EOP students will be allowed to be reinstated in consultation with the Office of Minority Affairs.

Grading System

The University of Washington uses a numerical grading system with certain exceptions in the schools of Dentistry, Law, and Medicine. Instructors may report grades from 4.0 to 0.7 in 0.1 increments and the grade 0.0. The number 0.0 is assigned for failing work or unofficial withdrawal. Grades in the range 0.6 to 0.1 may not be assigned. Grades reported in this range will be converted by the Registrar's Office to 0.0. Numerical grades may be considered equivalent to letter grades as follows:

A	4.0-3.9
A-	3.8-3.5
B+	3.4-3.2
B	3.1-2.9
B-	2.8-2.5
C+	2.4-2.2
C	2.1-1.9
C-	1.8-1.5
D+	1.4-1.2
D	1.1-0.9
D-	0.8-0.7
E	0.0

Lowest passing grade.

Failure or Unofficial Withdrawal.
No credit earned.

Additional information on grades and scholarship rules may be obtained from the Grade Recording Information Office, 248 Schmitz.

The following letter grades also may be used:

N No grade. Used only for hyphenated courses (courses not completed in one quarter) and courses numbered 600, 601, 700, 750, and 800.

I Incomplete. An Incomplete is given only in case the student has been in attendance and has done satisfactory work until within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control. To obtain credit for the course, an undergraduate student must convert an Incomplete into a passing grade no later than the last day of the next quarter. The student should never reregister for the course as a means of removing the Incomplete. An Incomplete grade not made up by the end of the next quarter will be converted to the grade of 0.0 by the Registrar unless the instructor has indicated, when assigning the Incomplete grade, that a grade other than 0.0 should be recorded if the Incomplete work is not completed. The original Incomplete grade is not removed from the permanent record.

An instructor may approve an extension of the Incomplete removal deadline. Such an extension must be received, in writing, at the Grade Recording Information Office no later than the last day of the quarter following the quarter in which the Incomplete grade was assigned. Extensions, which may be granted for up to three additional quarters, must be received before the Incomplete has been converted into a failing grade.

In no case can an Incomplete received by an undergraduate be converted to a passing grade after a lapse of one year.

S Satisfactory grade for courses taken on a satisfactory/not satisfactory basis. An *S* grade is automatically converted from a numerical grade of 2.0 or above for undergraduates. The grade *S* may not be assigned directly by the instructor, but is a grade conversion by the Registrar's Office. Courses so graded can only be used as free electives and cannot be used to satisfy a University, college, or department course requirement. *S* is not computed in the grade-point-average calculation.

NS Not-satisfactory grade for courses taken on a satisfactory/not satisfactory basis. A grade less than 2.0 for undergraduates will be converted to *NS*. *NS* is not included in the grade-point-average calculation. No credit is awarded for courses in which an *NS* grade is received.

CR Credit awarded in a course offered on a credit/no credit basis only or in courses numbered 600, 601, 700, 750, and 800. The minimum performance level required for a *CR* grade is determined, and the grade is awarded directly, by the instructor. *CR* is not computed in the grade-point-average calculation.

NC Credit not awarded in a course offered on a credit/no credit basis only or in courses numbered 600, 601, 700, 750, and 800. The grade is awarded directly by the instructor and is not included in a grade-point-average calculation.

W Official withdrawal or drop from a course from the third through the seventh week of the quarter for undergraduates. A number designating the week of the quarter will be recorded with the *W* when a course is dropped. It is not computed in grade-point-average calculation.

HW Grade assigned when an undergraduate is allowed a hardship withdrawal from a course after the seventh week of the quarter. It is not computed in grade-point-average calculation.

Nontraditional Grading Options

CREDIT/NO CREDIT-ONLY AS A COURSE OPTION

With appropriate departmental review and approval, a course may be offered on a credit/no credit-only basis. The standard for granting credit in credit/no credit-only courses under this option is the demonstration of competence in the material of the course to the instructor's satisfaction.

SATISFACTORY/NOT SATISFACTORY GRADING OPTION

Certain students are eligible to choose that a limited number of their courses be graded satisfactory/not satisfactory rather than with regular numerical grades. Any student who wishes to register for a course on a satisfactory/not-satisfactory basis should check first with his or her adviser to determine restrictions and eligibility, because colleges and departments vary in their rules concerning this grading option (e.g., students in the College of Arts and Sciences may not take courses *S/NS* until they have earned 45 or more college credits). In no case is a student allowed to register for more than 6 credits (or for one course, if that course is offered for more than 6 credits) on a satisfactory/not-satisfactory basis in a given quarter. No more than 25 satisfactory/not-satisfactory credits may be applied to a four-year undergraduate degree. Such courses may not be used to satisfy University, college, or departmental course requirements (i.e., may be applied only to the elective component of a degree).

Generally, a student may not switch to or from satisfactory/not-satisfactory grading for a particular course after the first week of the quarter. Only students in good academic standing (i.e., not on academic warning or probation) are eligible for the *S/NS* grading option. Veterans should check with the Office of Special Services before requesting *S/NS* grading option.

It should be noted that the possibility of future objective evaluation of the student's total academic record is reduced by the extent to which the record includes course work that is evaluated by a grading system other than the numerical system. A student should be aware that he or she may jeopardize future educational opportunities, particularly for graduate or postbaccalaureate study, when other systems of performance evaluation are used.

Grade-Point Average

The University's cumulative grade-point average is based solely on courses taken in residence at the University of Washington; this includes some, but not all, courses taken through UW Extension. The UW transcript reflects grades for UW Extension course work that is not residence credit, and the grades for credit by examination. These latter grades do not affect the University cumulative grade-point average.

Computation of Grade-Point Average

The grade-point average for graduation is computed by dividing the total cumulative grade points by the total credits attempted for courses taken in residence at the University. Grade points are calculated by multiplying the number of credits by the numeric value of the grade for each course. The sum of the grade points is then divided by the total credits attempted. Courses elected on an *S/NS* basis are counted as follows: Satisfactory grades are printed on the permanent record as an *S* and do not count in the quarterly or cumulative grade-point average, but they do count as credits earned toward graduation. Not-satisfactory grades, *NS*, do not count in the quarterly and cumulative grade-point averages and do not count as credits earned toward graduation.

EXAMPLE 1

Course	Credits	Grade	Grade points
CLAS 205	3	CR	
OCEAN 101	5	2.7	= 13.5
HST 111	5	4.0	= 20.0
SCAND 100	2	3.3	= 6.6

Total credits earned toward graduation	15	
Total graded credits attempted	12	40.1

$$\text{Grade-point average} = 40.1 \div 12 = 3.34$$

The total graded credits attempted, not the credits earned toward graduation, are used in computing the grade-point average.

EXAMPLE 2

Course	Credits	Grade	Grade points
ENGL 121	5	2.3	= 11.5
OCEAN 101	5	0.0	= 0.0
SPHSC 100	3	2.7	= 8.1
ART 105	5	I	= 0.0

Total credits earned toward graduation	8	
Total graded credits attempted	13	19.6

$$\text{Grade-point average} = 19.6 \div 13 = 1.51$$

The student attempted 18 credits, but only 13 are graded, because the *I* is not computed in the grade-point average. The 0.0 for OCEAN 101 is computed in the grade-point average, but no credit is awarded toward graduation.

If the work in ART 105 is not made up by the end of the next quarter, the *I* will convert to a numeric grade and the grade-point average will be recomputed.

Repeating Courses

With the approval of the academic department offering the course, an undergraduate may repeat a course once. Both the original grade and the second grade will be computed in the grade-point average but credit will be allowed only once. Veterans receiving benefits must receive approval from the Office of Special Services before a course is repeated.

Grading Procedures

Change of Grade

Except in case of error, no instructor may change a grade that he or she has turned in to the Registrar. A student who finds administrative omissions or errors in a grade report must make application to the Registrar for a review not later than the last day of the student's next quarter in residence, but in no case after a lapse of two years. Grades used to meet graduation requirements cannot be changed after the degree has been granted. Time spent in military service is not counted as part of the two-year limitation. Students are not automatically notified of grade changes posted after the first of the quarter.

Grade Appeal Procedure

A student who believes he or she has been improperly graded first discusses the matter with the instructor. If

the student is not satisfied with the instructor's explanation, the student may submit a written appeal to the Chairperson of the department, or in a nondepartmental college, to the Dean, with a copy of the appeal also sent to the instructor. The Chairperson, or Dean, consults with the instructor to ensure that the evaluation of the student's performance has not been arbitrary or capricious. Should the Chairperson believe the instructor's conduct to be arbitrary or capricious and the instructor declines to revise the grade, the Chairperson (or the Dean in a nondepartmentalized school or college), with the approval of the voting members of his or her faculty, shall appoint an appropriate member, or members, of the faculty of that department to evaluate the performance of the student and assign a grade. The Dean and Provost should be informed of this action.

Once a student submits a written appeal, this document and all subsequent actions on this appeal are recorded in written form for deposit in a department or college file.

Grade Reports

Grade reports are mailed to all students, except those in the School of Medicine, at the close of each quarter. The grade reports are sent to the mailing address on file in the Registrar's Office. To ensure delivery of grades, changes in the mailing address should be reported to the Registrar's Office by the last day of instruction. Copies of the quarterly grade reports are also sent to each student's Dean and major department.

Scholarship

Low Scholarship

Academic Warning

An undergraduate student whose grade-point average falls below 2.00 in his or her first quarter at the University receives an academic warning. If a cumulative grade-point average of at least 2.00 for courses earned in residence at the University is not achieved by the end of the next quarter, he or she is placed on academic probation.

Probation and Dismissal for Low Scholarship

An undergraduate student is placed on academic probation at the end of any quarter (except for the first quarter at the University, when an academic warning is issued) in which his or her cumulative grade-point average falls below 2.00. Once on probation, the student must attain at least a 2.50 for each succeeding quarter's work until the cumulative grade-point average is raised to a 2.00, or the student is dropped for low scholarship.

Reinstatement

A student who has been dropped under low-scholarship rules will be readmitted to the University only at the discretion of the Dean of the school or college to which readmission is sought. A student readmitted after being dropped under these rules reenters on academic probation. The student's grade-point average is the same as when dropped from the University, and the student may not use grades from other colleges or universities to raise his or her UW grade-point average. A readmitted student is dropped if he or she fails to attain either a 2.50 grade-point average for the following quarter's work or a cumulative UW grade-point average of 2.00 at the end of that quarter. The student is removed from probation at the end of the quarter in which a cumulative grade-point average of 2.00 or better is reached.

Senior in Final Quarter

A senior who has completed the required number of credits for graduation, but whose work in what would normally be his or her final quarter places him or her on probation, does not receive a degree until removed from probation. A senior who has completed the required number of credits for graduation, but whose work in his or her last quarter results in his or her being dropped for low scholarship, does not receive a degree until readmitted and removed from probation.

High Scholarship

Quarterly High-Scholarship List

The quarterly high-scholarship list includes the names of matriculated undergraduate students who have attained a quarterly grade-point average of 3.50 in the final grades for at least twelve graded credits. Appropriate high-scholarship entries are made on the student's permanent academic record.

Yearly Undergraduate Honors

The yearly award for high scholarship is recorded on the academic transcript of students who have achieved the following:

A cumulative grade-point average of 3.50 in at least three quarters of the academic year (Summer, Autumn, Winter, Spring)

12 graded credits or more for each of the three quarters, exclusive of Satisfactory/Not Satisfactory (S/NS) and Credit/No Credit-only (C/NC) courses

Students who have attended the UW four quarters of the school year (Summer through Spring) must have a grade-point average of 3.50 for each of any three quarters, a minimum of 12 graded credits (exclusive of S/

NS and C/NC courses) for each of the three quarters, and a cumulative GPA of 3.50 for the four quarters.

Certificates of High Scholarship

Certificates of high scholarship are awarded to students in the sophomore, junior, and senior classes who have high scholastic records for their freshman, sophomore, or junior years, respectively. The Honors Committee determines the grade-point average required for the awarding of certificates.

Baccalaureate Honors

Baccalaureate honors (*summa cum laude*, *magna cum laude*, *cum laude*) are awarded only to recipients of a first baccalaureate degree. These honors are earned by those students who have completed no fewer than 90 residence credits at this institution. At least 60 of the 90 credits must have been acquired on a graded basis.

The University's Honors Committee determines annually the grade-point requirement for each baccalaureate honor. In recent years, approximately nine percent of the students have been awarded baccalaureate honors. Credits earned by correspondence courses are not counted toward honors eligibility.

Sophomore Medal, Junior Medal, President's Medal

Annually, the junior having the most distinguished academic record for the first two years of his or her program receives the sophomore medal from the President of the University. The senior having the most distinguished academic record for the first three years of his or her program receives the junior medal from the President of the University.

The President's Medal, which is conferred at commencement, recognizes the graduating senior who has the most distinguished academic record. Only students who have earned at least 90 credits in residence at the University may be considered.

Graduation

Filing an Application for Baccalaureate Degree

A student should file with the Graduation Office, in Schmitz Hall, a written application for his or her degree three quarters before the expected date of graduation. The absolute deadline for filing an application is Friday of the third week of the quarter the student intends to graduate (Tuesday of the third week for College of Arts and Sciences students, who file their applications at B10 Padelford).

It is the student's responsibility to apply for a degree and/or certificate, because degrees are not automatically awarded when requirements have been satisfied. Application forms and diploma cards are available at the Graduation Office and in the major departments.

The signature of the department head or of an authorized adviser must appear on the application in the space provided for "Signature of major adviser." The student is also required to sign the application. The student leaves the application (and any supporting documents) at the college Dean's office (B10 Padelford for Arts and Sciences) for signature after obtaining the adviser's signature.

After the application is reviewed, the second and third copies are sent to the department or college office and the original is retained in the Graduation Office. If a problem regarding the application arises, the Graduation Office notifies the student. Departmental advisers should notify the Graduation Office if a course listed on the graduation application is substituted.

If an applicant is ineligible to graduate because of a deficiency, the Graduation Office notifies the student.

University Requirements for Baccalaureate Degree

To graduate, a student must meet University, college or school, and departmental requirements. Only University requirements are listed in this section. Requirements of colleges, schools, and departments appear in the section pertaining to the college, school, or department concerned.

Scholastic Standards Required

To be eligible for the baccalaureate degree, a student must earn a cumulative grade-point average of 2.00 for all work done in residence at the University.

The *graduation* grade-point average is computed when the student has completed all work for the degree and includes only credits earned while in residence at the University.

Credits Required

To be eligible for graduation from the University with the baccalaureate degree, a student must satisfy all other specific requirements and must offer a minimum of 180 academic credits.

University General Education and Proficiency Requirements

The University has adopted minimum general education and proficiency requirements. Individual schools and colleges may establish general education and proficiency requirements in excess of University requirements. Consult the undergraduate program section of each school or college for specific graduation requirements.

The University Distribution List, from which general education courses are to be selected, appears on page 33.

Limitation on ROTC Credits

Credits earned in first- and second-year military training courses cannot be counted in the basic 180 credits required for graduation. Some third- and fourth-year courses may count, depending on the student's college or school.

Limitation on Physical Education Activity Credits

No more than 3 physical education activity credits can apply toward a degree.

Final-Year Residence Requirement

To be recommended for a first or subsequent baccalaureate degree, a student must complete the final 45 credits as a matriculated student in residence at the University. The granting of exceptions to this rule is the responsibility of the Dean of the college or school awarding the degree. If an exception is granted, the student still must present a minimum of 45 credits taken in residence as a matriculated student to be awarded a UW degree.

Catalog for Graduation Requirements

In general, a student graduates under the requirements of the current catalog. A student may, however, fulfill graduation requirements of the catalog in effect at the time he or she entered the school or college from which he or she is to graduate, provided that (1) not more than ten years have elapsed since the student's entry and (2) the school or college and department agree that the student may graduate under the earlier requirements.

If the student graduates more than ten years after enrolling in the school or college, the current catalog must be used for graduation purposes. Exceptions to this rule cannot be made without official University and college approval.

The above provisions do not apply to the requirements prescribed by the College of Education for teaching certificates.

Waiver of Graduation Requirements

A request for waiver of college or University graduation requirements is petitioned to the college graduation committee, which refers the petition to the Committee on Admissions and Academic Standards if an all-University requirement is involved. These petition forms are available at the Graduation Office or the advisory office and should be filed with the application for

degree or as soon as possible after the need arises. A student should see his or her academic adviser to initiate a petition. Because the Committee on Admissions and Academic Standards meets only quarterly, petitions involving University requirements should be filed early in the quarter.

An exemption from an all-University graduation requirement that is granted by the Committee on Admissions and Academic Standards becomes void at the end of two calendar years from the date such exemption is granted if all degree requirements have not been completed within that period.

Graduation Requirements for ROTC Students

As a prerequisite for graduation from the University, students accepted for the third- and fourth-year advanced ROTC program must complete the advanced program unless excused or dismissed from this requirement by regulations prescribed by the Secretary of the Army, the Navy, or the Air Force, whoever has the authority in the individual case.

Two Majors or Two Degrees

Second Baccalaureate Degree

A second baccalaureate degree may be granted, but a student must earn a minimum of 45 credits beyond the number required for the first baccalaureate degree. These credits usually must be earned in residence, with the granting of exceptions to the residency rule being the responsibility of the college or school awarding the degree. The student must achieve no less than a 2.00 cumulative grade-point average in the credits required for the second degree.

Students working for a second baccalaureate degree are not registered in the Graduate School, but in the academic division of the University with jurisdiction over the degree sought.

Degrees with Two Majors

Some colleges allow a baccalaureate degree with two majors. The student's application for such a degree must show both majors and be approved by the advisers of both departments. Both majors appear on the transcript.

Two Baccalaureate Degrees Concurrently

Two baccalaureate degrees, associated with different majors, may be granted at the same time, but the total number of academic credits earned must reach a minimum of 45 credits in excess of the number required for the first baccalaureate degree.

Requirements for Teaching Certification

The College of Education offers professional programs approved by the State Board of Education leading to teaching and other certificates. Additional information appears in the College of Education section of this catalog, or the student may write to the College of Education advisory office, 211 Miller.

Commencement

Formal commencement exercises are conducted at the close of Spring Quarter. During April of each year, commencement information is sent to each student entitled to participate the following June (i.e., those who graduate the previous August, December, or March and those who anticipate graduating in the current June and August).

Diploma Distribution

Diplomas are available twelve weeks after the end of the quarter in which they are earned. Diplomas are mailed if requested by the student.

University Distribution List

Note: Some schools/colleges do not accept all courses shown on the list below. Others require certain patterns of courses to fulfill the general education requirement. Consult an adviser in the Arts and Sciences Advising Office, B10 Padelford, or in the college/school concerned.

Scandinavian Languages and Literature: SCAND 360, 484.

* Language instruction courses, except those designed primarily for conversational practice, may be used for language and literature distribution credit at the second-year level and beyond. First-year language courses in a language that is not being used to meet the foreign-language proficiency requirement can be used for distribution (except in the College of Engineering), but only if the student completes the third-quarter course. All literature courses taught in a foreign language, except independent study projects (e.g., FREN 499), may be used for language and literature credit.

‡ Each MUSAP or MUSEN course can be counted toward distribution requirements for a maximum of six credits; each MUSEN course must be taken for at least two credits to be counted.

Dale E. Johnson

Acting Associate Dean for Minority Education

Robert D. Crutchfield

Assistant Dean for Graduate Student Services

Elizabeth L. Feetham

Director, Graduate Admissions

Josie Croteau

In 1885, the University of Washington awarded its first graduate degree, a Master of Arts in the field of classical languages. In 1914, the University awarded its first Doctor of Philosophy degree, in the field of chemistry. The University has conferred more than forty-five thousand master's degrees and nine thousand doctoral degrees, exclusive of medical, dental, and first legal doctorates.

The Graduate School was created in 1899 and was established permanently in 1910. Its purposes are to exercise leadership for the University of Washington in matters pertaining to graduate education, to facilitate the performance of research by its faculty and students, and to foster the integration of education and research to the benefit of both. Through graduate programs, the University fulfills several functions vital to a healthy society: by fostering research, it advances human knowledge; by educating scholars and teachers, it preserves and transmits our cultural heritage; by training professionals, it makes information and help available to the various sectors of the public; and, by virtue of all of these, it contributes to the resolution of the problems and needs of society.

Graduate study and research is guided by the Dean of the Graduate School and a Graduate Faculty of two

thousand members, selected for their scholarly and research qualifications and their concern with graduate education. More than seven thousand graduate students are now in residence, working toward master's or doctoral degrees; several hundred postdoctoral students and appointees also are in residence. Programs in the Graduate School leading to master's and doctoral degrees are offered in eighty-four departments or other organizational units of the University. The Graduate School directly sponsors five interdisciplinary degree programs by organizing Graduate School groups of interested faculty members and assisting them in developing such programs. It also administers the Graduate School of Library and Information Science and its degree program, as well as a small Special Individual Ph.D. program for approved uniquely interdisciplinary dissertations.

Usually focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships, and participation in research. Graduate programs leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees emphasize the development of the student's ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many master's and all doctoral programs culminate in the presentation of a thesis or dissertation conveying the results of the independent study and research carried out by the student. A master's thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student's field, be presented in scholarly form, and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems. The student must defend the doctoral dissertation in a Final Examination conducted by a fac-

ulty committee and open to all other Graduate Faculty members. A member of the Graduate Faculty from some other discipline participates as an official representative of the entire Graduate Faculty in all aspects of the student's program, including various major evaluations such as the General Examination and Final Examination.

Acting through an elected council that advises the Dean, the Graduate Faculty establishes Graduate School policies. Each degree-offering unit within the University appoints a graduate program coordinator, who serves as an important link between the unit and the Graduate School. Students are advised to seek the help of the graduate program coordinator when questions concerning Graduate School and departmental degree requirements arise.

In addition to its primary concern with graduate students, Graduate Faculty, and programs leading to advanced degrees, the Graduate School has been given a number of responsibilities that relate to its primary ones. It promotes research throughout the University by administering the Graduate School Research Fund, which is composed of institutional funds and is available to support faculty and student activities. It coordinates all requests to outside agencies for the support of research and advanced training. It awards certain graduate fellowships and assistantships. It also administers a number of centers, institutes, and laboratories for advanced study, as well as such central facilities as the University of Washington Press. A particularly significant responsibility is the selection of scholars to occupy the Walker-Ames and the Jessie and John Danz distinguished visiting professorships.

The University has obligated itself to promote greater access to advanced study by women and members of ethnic minority groups. Within the Graduate School, the Minority Education Division actively solicits applications for admission, facilitates their review, and helps with various procedures related to the enrollment of minority graduate students. The division offers financial aid to students who need such help. In addition to a special appropriation of funds by the Washington State

Legislature to encourage the recruitment and retention of ethnic minority students in areas of underrepresentation, the division administers several federal and private scholarship programs which provide financial aid and contribute to the overall environment of support for minority graduate students.

Graduate Degree Programs Offered

Graduate degree programs are reviewed by the Graduate School on a ten-year cycle, or at predetermined shorter intervals. For further information, see Graduate School Memorandum No. 7, Periodic Review of Existing Degree Programs, or contact the Academic Programs Office in the Graduate School.

Academic Unit	Graduate Degrees Offered
College of Architecture and Urban Planning	
Architecture	M.Arch.
Landscape Architecture	M.L.A.
Urban Design and Planning	M.U.P., Ph.D.
College of Arts and Sciences	
Anthropology	M.A., Ph.D.

School of Nursing	M.N., M.S., Ph.D.
College of Ocean and Fishery Sciences	
Fisheries	M.S., Ph.D.
Marine Studies	M.M.A.
Oceanography	M.S., Ph.D.
School of Pharmacy	M.S., Ph.D.
(Includes the departments of Medicinal Chemistry and Pharmaceutics)	
Graduate School of Public Affairs	M.P.A.
School of Public Health and Community Medicine	
Biostatistics	M.S., Ph.D.
Environmental Health	M.P.H., M.S., Ph.D.
Epidemiology	M.P.H., M.S., Ph.D.
Health Services	M.P.H.
Pathobiology	M.S., Ph.D.
School of Social Work	M.S.W.
Social Welfare	Ph.D.

Because the following professional doctoral degrees offered by the University are not considered to be graduate degrees, they are not administered through the Graduate School.

School of Dentistry	D.D.S.
School of Law	J.D.
School of Medicine	M.D.
School of Pharmacy	Pharm.D.

Graduate Admissions

The Graduate School is responsible for determining the requirements for admission to graduate study. Within the limit imposed on overall graduate enrollment in the University, admission to a specific graduate degree program is limited to the number of students for whom faculty, staff, and facilities can provide graduate instruction and research guidance of high quality. Each graduate student must be admitted into a specific graduate program; the Graduate School does not permit general graduate enrollment.

Admission Procedure

Admission to the Graduate School is granted by the Dean of the Graduate School. Application for admission is made to the Office of Graduate Admissions. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or its equivalent from a foreign institution. Each applicant must submit a completed University of Washington application form and arrange for the receipt of scores on the Graduate Record Examination, or an alternative test approved by the Graduate School Council, and official transcripts from all previously attended colleges, universities, and institutes. Each department or other unit authorized to offer a graduate degree program maintains a Graduate Admissions Committee consisting of not fewer than three Graduate Faculty members. The committee receives from the Office of Graduate Admissions all completed applications for admission to the unit. The Admissions Committee is responsible for the fair and complete evaluation of applicants and for recommending to the Dean of the Graduate School the names of applicants who are considered to be qualified for admission.

Priority for admission of applicants into a graduate degree program is based upon the applicant's apparent ability, as determined by the University, to complete the program expeditiously with a high level of achievement and also upon the applicant's promise for success in his or her subsequent career. In addition, Graduate School admission policy requires that:

No practice may discriminate against an individual because of race, color, national origin, handicap, sex, age, religious preference, or background, or status as disabled veteran or Vietnam era veteran, and that:

Sustained efforts shall be made to recruit qualified students who are members of groups that have been subject to discrimination or are underrepresented in certain disciplines.

In developing a pool of qualified applicants for admission to the Graduate School, the following factors may be taken into account by a degree-offering unit:

1. Undergraduate grades, especially for subjects in, or closely related to, the field of the applicant's proposed graduate work (at least a B, or 3.00 grade-point, average is expected).
2. The applicant's consistency in proceeding through an undergraduate degree program.
3. Scores on the Graduate Record Examination verbal, quantitative, and analytical tests, and on the GRE advanced test or other tests related to the applicant's field and on other aptitude tests that may be required.
4. Personal interviews of the applicant by the department admissions committee.
5. The career objectives of the applicant and the extent to which the graduate degree program may be expected to prepare him or her for those objectives.
6. Written and oral recommendations from persons who are qualified to evaluate the applicant's academic record and promise.
7. The applicant's degree objective (i.e., master's degree, doctoral degree, or a master's degree followed by a doctoral degree).

Weights given to these factors may vary among academic units.

Admission to the Graduate School usually signifies admission into a program of graduate study leading to a master's degree or the equivalent, or into post-master's study if the student admitted already has received a master's degree or has successfully completed equivalent graduate study. Admission does *not* imply acceptance of a graduate student into a program of study leading to a doctoral degree. A student becomes a candidate for the doctoral degree only on the completion of specific requirements intended to demonstrate to the satisfaction of the student's unit and the Graduate School the apparent ability of the student to progress satisfactorily through the doctoral degree program.

Counseling and Financial Assistance

To assist in attracting individuals from low-income families into the qualified applicant pool, the Graduate School offers certain kinds of financial assistance and works with other University offices to arrange for counseling and financial aid.

Enrollment Limitation

Total Graduate School enrollment is determined by the University administration in furtherance of University intent to maintain proportions of graduate students and other categories of students appropriate to the role of the University in its particular setting. The Dean of the Graduate School, after consultation with other University officers and faculty, assigns enrollment targets to the graduate-degree-offering units. These targets are based on the combined judgment of these parties as to the demand for the program and the resources available to it.

First preference in enrollment is given to continuing graduate students (i.e., those who already have been admitted into a graduate program, who are in good standing, and who have maintained continuous enrollment as in-residence, *in absentia*, or On-Leave students). After continuing graduate students are accommodated, the remaining places are available for the enrollment of new students or the reenrollment of former students who have not maintained continuous enrollment.

Visiting Graduate Students

A student who wishes to enroll in the Graduate School at the University of Washington and who intends thereafter to return to the graduate school in which he or she is working toward an advanced degree may be admitted as a visiting graduate student. This admission is contingent on available space and facilities.

Such a student must have been officially admitted to another recognized graduate school and be in good standing and currently pursuing a graduate program. The student need not submit a full transcript of credits, but must apply for admission, pay a \$35 application fee, and furnish certification of status on a special form entitled Visiting Graduate Student—Certificate of Status, which may be obtained by writing to the University of Washington, Office of Graduate Admissions, AD-10, Seattle, Washington 98195.

Applications must be filed in accordance with instructions on the application form prior to the following dates: July 1 for Autumn Quarter, November 1 for Winter Quarter, February 1 for Spring Quarter, and May 15 for Summer Quarter.

Admission to the University of Washington as a visiting graduate student *does not guarantee* admission to any particular course of study. A visiting graduate student is permitted to register only in those courses for which he or she is judged to be eligible by a faculty adviser or the instructor in the course and if space is available to accommodate registration.

If at any later time the student wishes to apply for admission to the Graduate School of this university to work toward a degree, he or she must make formal application and submit complete credentials. If a visiting graduate student is later given formal admission and begins work toward a degree at the University of Washington, he or she may petition the Dean of the Graduate School for allowance of credit for courses taken as a visiting graduate student to be applicable toward the graduate program.

How to Apply

Requests for the form Application for Admission to the Graduate School should be addressed to the graduate program coordinator of the department in which the student expects to pursue a program of study or to the

Office of Graduate Admissions. Other correspondence relative to admission procedures should be addressed to the University of Washington, Office of Graduate Admissions, AD-10, Seattle, Washington 98195.

Each applicant for admission to the Graduate School as a regular graduate student or as a visiting graduate student must pay an application fee of \$35. Payment, in United States currency only, must accompany the application. This fee is not refundable and is not credited against any other fees charged by the University.

REGULAR GRADUATE STUDENTS

The application for admission, the required transcripts in duplicate, and the \$35 application fee must be filed, in accordance with instructions appearing on the application form, prior to the following dates: July 1 for Autumn Quarter, November 1 for Winter Quarter, February 1 for Spring Quarter, and May 15 for Summer Quarter (these dates are subject to change by the University). Early application is advised, because some departmental targets are filled well in advance of these dates.

The foregoing dates apply to new students as well as to former students of the University who have not attended since receiving their baccalaureate degrees. A former student must apply as a new student for admission to the Graduate School or for admission to an undergraduate college as a postbaccalaureate student. In some cases, departments suggest that applications be submitted earlier than the dates herein set forth.

When the required application, official credentials, and \$35 application fee have been received, an evaluation is made and the applicant is notified of his or her admission status.

All records become a part of the official file and can be neither returned nor duplicated for any purpose. A student should obtain an additional copy of his or her official credentials to keep for advisory purposes. Failure to submit complete and accurate credentials may result in permanent dismissal from the University.

General information and instructions for registration are mailed to new students with the notice of admission. In the event of a discrepancy, these instructions supersede those found in earlier publications. *The University assumes no responsibility for students who come to the campus before they have been officially notified of their admission. The offer of admission is valid only for the quarter indicated. Applicants who wish to be considered for a different quarter must file a new application and \$35 fee with the Office of Graduate Admissions.*

The admissions credentials of applicants who do not register for the quarter to which they have been admitted are normally retained in the Office of Graduate Admissions for a period of one year from the date of application. At the end of this period, credentials on file are discarded unless the applicant has notified the Office of Graduate Admissions of a continued interest in attending the University.

University of Washington students who are within 6 credits of completing their undergraduate work and who have met the requirements for admission to the Graduate School may register the quarter immediately preceding admission to Graduate School for up to 6 credits in 500-level courses in addition to the last 6 credits they require of undergraduate work. This registration and these arrangements must be approved by the graduate program that the student will enter; however, students concerned are not reclassified as graduates until the baccalaureate degree has been granted and after their official admission to the Graduate School. At that point, it is necessary to petition the Graduate School to transfer the 6 credits. Only under these circumstances may graduate work taken as an undergraduate be applied toward an advanced degree.

Further registration for graduate work is contingent upon completion of the requirements for the baccalaureate degree.

INTERNATIONAL STUDENTS

Students from abroad are expected to meet the same general requirements as applicants educated in American schools. The admission application, official credentials, and \$35 application fee must be received in the Office of Graduate Admissions at the University of Washington before the closing dates for domestic graduate students. In addition, applicants must demonstrate a satisfactory command of English and must have sufficient funds available in the United States to meet their expenses. The \$35 fee, which must accompany the application, must be payable in United States currency in the form of an international postal money order, a draft on a United States bank, or a traveler's check.

ENGLISH LANGUAGE COMPETENCE

Prospective international, immigrant, and permanent resident students whose native language is other than English and who have not received degrees from institutions in countries where English is the native language are required to submit their scores on the Test of English as a Foreign Language (TOEFL), or the Michigan Test. In addition, scores on the Test of Spoken English (TSE) should be presented by international students who are applying for teaching assistantships. International students who are offered teaching or nonspecific assistantships, but are unable to take the TSE, must take the Speaking Proficiency English Assessment Kit (SPEAK).

Students who are admitted with TOEFL scores below 580, or Michigan Test scores below 90, are required to take the University-administered diagnostic English test upon matriculation, and must take the English as a Second Language (ESL) courses identified as required. Students who have been offered teaching or nonspecific assistantships with scores on the TSE or SPEAK below 230 must enroll in English 102B, a special course for international teaching assistants.

Those accepted for Autumn Quarter admission prior to May 15 may register for intensive English through the Language Learning Center for the Summer Quarter. Information may be obtained from the graduate program coordinator.

Graduate Nonmatriculated Students

Under certain conditions, departments, schools, or colleges may choose to offer enrollment in their graduate courses to graduate nonmatriculated students (GNM). The purpose of GNM enrollment is to allow qualified students to earn limited graduate credit in a particular area of need. Applicants who meet graduate admission standards may be enrolled as GNM students and may apply up to a maximum of 18 credits earned while so enrolled toward graduate degree requirements if later accepted into a graduate degree program. (For additional information, see Graduate School Memorandum No. 37.)

The Application to Graduate Nonmatriculated Status form should be completed and filed with the graduate academic unit to which the student is applying.

The student should request the registrars of all collegiate institutions attended to forward official transcripts to the graduate unit. Only transcripts received directly from these institutions can be considered official.

Complete application and credentials should be received prior to September 5 for Autumn Quarter, December 5 for Winter Quarter, March 5 for Spring Quarter, and May 21 for Summer Quarter.

Graduate Student Registration

A regular graduate student: (1) has been granted regular admission to the Graduate School; (2) has developed a current program of studies satisfactory to the graduate program coordinator; and (3) has completed all of the required steps for registration, including the depositing of registration materials at Sections and the payment of tuition and fees.

Visiting graduate students follow regular registration procedures.

Graduate students are required to maintain continuous enrollment from the time of their first registration until completion of the advanced degree (see section on Continuous Enrollment).

All students currently attending the University who wish to attend a succeeding quarter should participate in preregistration. If this is not possible, students can register during in-person registration. Fee statements are mailed to students and must be paid by the stated deadline. Students are held responsible for knowing and observing the registration procedures, dates, and deadlines that appear in this catalog, in official notices in the University of Washington *Daily*, and in the quarterly *Time Schedule*.

After new students are notified of their admission, the Registration Office sends them a request for a \$50 enrollment confirmation deposit to confirm their intention to register. The fee, which is nonrefundable, will apply toward their tuition. If the payment is received by the date specified, the Registration Office will mail the new student registration information and instructions. The \$50 enrollment confirmation deposit is not required of Summer Quarter students.

Advising

After notification of admission and before registration, the student should confer with the departmental graduate program coordinator about the program for current registration. It is primarily to the graduate program coordinator in the department that the student must look for individual counsel, guidance, and instruction in the scholarly study and research that characterize graduate work.

Financial Aid for Graduate Students

Students applying for fellowships, traineeships, and assistantships or associateships must make certain that complete transcripts and other credentials are on file by February 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program coordinator of the appropriate department.

Fellowships, Traineeships, and Scholarships

A limited number of fellowships, traineeships, and scholarships are available through the Graduate School or through individual departments to outstanding students in fields of study leading to advanced degrees. Application forms may be obtained from the graduate program coordinators in the departments or from the Fellowship and Assistantship Division in the Graduate School.

The Graduate School also provides computer searches to assist enrolled graduate students, faculty, and staff in locating fellowships, grants, and other sources of funding. The data base contains over three thousand awards from foundations, government agencies, associations, and other non-University organizations. These awards are made on a national competitive basis, and application must be made directly to these foundations or organizations.

Graduate Student Service Appointments

The University provides for the employment of many graduate students as teaching, research, and staff assistants, predoctoral associates, predoctoral instructors, and predoctoral lecturers. Approximately two thousand such appointments were made during the past year.

The University's policy regarding these appointments is set forth in detail in Executive Order 28. Copies of this statement are available from the graduate program coordinator or the Graduate School. Some of the information is provided below.

Appointments are granted only to graduate students who have carefully defined educational goals and who exhibit the highest intellectual competence and attain-

ment. Succeeding appointments may be made if the student maintains high scholarship and continues to make satisfactory progress toward the degree.

Graduate appointments are granted to graduate students only. An initial appointment may be offered to a student before being admitted formally to the Graduate School, but the appointment is contingent upon admission to graduate status before the beginning of the appointment.

1990-91 GRADUATE STUDENT SERVICE APPOINTMENTS

Students holding these appointments for at least 20 hours per week and for five of the six pay periods of an academic quarter will receive a waiver of the operating fee portion of "tuition and fees" and will be required to pay \$106 tuition per quarter.

Salary for Half-time Service (20 hours per week)

Effective September 15-December 31, 1990 (a salary increase is expected to be effective January 1, 1991)

\$1,109*

Title	Monthly salary	Academic year salary
Teaching Assistant	\$ 886	\$7,974
Predocutorial Teaching Associate I	950	8,550
Predocutorial Teaching Associate II	1,025	9,225
Predocutorial Instructor	1,025	9,225
Predocutorial Lecturer	1,025	9,225
Research Assistant	886	7,974
Predocutorial Research Associate I	950	8,550
Predocutorial Research Associate II	1,025	9,225
Predocutorial Researcher	1,025	9,225
Graduate Staff Assistant	886	7,974
Predocutorial Staff Associate I	950	8,550
Predocutorial Staff Associate II	1,025	9,225

* Minimum.

Graduate students appointed to the beginning level of graduate teaching appointments are not permitted to be in overall charge of a course, but are given an appropriate degree of responsibility and supervision of laboratory or classroom work so that they may be introduced to teaching activities gradually and effectively.

Student appointees may also serve as assistants in research activities for which a faculty member is responsible.

Two special categories for teaching appointments and one for research appointments are provided above the predoctoral associate level: predoctoral instructor, for the graduate student who has achieved Candidate status and is ready for increased teaching responsibility; predoctoral lecturer, for a mature and competent graduate student who, though he or she need not be a Candidate, has had exceptional previous teaching or other professional experience; and predoctoral researcher, for the student who has special skills or qualities obtained outside of his or her experience as a graduate student or who carries major responsibilities in relation to research activities. For the 1990-91 academic year these appointments carry a minimum stipend of \$1,025 per month (half-time) with no designated maximum so that the stipend may be adjusted to a level appropriate to the appointee's experience and his or her teaching and research responsibilities.

International students with teaching appointments (teaching assistant, predoctoral teaching associate I and II, predoctoral instructor, predoctoral lecturer) must meet a spoken-English requirement before they may be given classroom duties.

An additional series of appointments titled Graduate Staff Assistant and Predocutorial Staff Associates I and II is provided for University service activities that are not appropriately described as teaching or research but are closely related to the student's field of advanced study. Appointments of specific graduate students to these positions may not be made until after the position itself has been specifically approved.

Students who hold any of the above appointments are required to render twenty hours of service per week to the University. The appointments may be on a nine-month basis and ordinarily cover the period from September 16 through June 15. Some of these appointments may be extended to eleven or twelve months. Graduate student appointments do not provide for paid vacations or sick leave. Students who accept these University service appointments normally confine their employment to such appointments.

A graduate student service appointee must register for, and carry throughout each quarter except Summer Quarter, a minimum of 9 credits in formal courses or in research, thesis, or dissertation work. These credits must be in courses that are applicable toward an advanced degree.

Work Study Graduate Assistantships

Graduate students who are eligible for the need-based college work study program may qualify for work study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the March 1 deadline to be considered for these positions. Information is available from the Office of Student Financial Aid.

Employment Opportunities

The campus offers other job opportunities for graduate students. Students may apply directly to the Chairperson of the department in which they hope to work or to the Student Employment Office. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs.

Advisory positions in University residence halls paying room and board are available for single graduate students, both men and women. Additional information may be obtained from the Director of Residence Halls Programs, 301 Schmitz.

The University offers a number of full- and part-time employment opportunities for spouses of married stu-

dents. These positions offer pay comparable to the prevailing salaries in the community, and some carry such fringe benefits as vacations, sick leave, and opportunities to enroll in University courses. Inquiries may be directed to the Staff Employment Office, 1320 Northeast Campus Parkway, Seattle.

Loans

Long-term educational loans are available to graduate students through the Perkins Direct Student Loan and the Stafford Student Loan programs.

The Perkins Direct Student Loan Program usually provides a maximum annual loan to graduate students of \$3,000 and bears an interest rate of five percent. There are certain cancellation provisions in the Perkins Direct Student Loan Program for combat-zone veterans and teachers of the disadvantaged. Loan application forms for this program are available in the Office of Student Financial Aid, PE-20, 105 Schmitz, telephone (206) 543-6101. The application deadline is March 1 for the following Autumn Quarter.

Students should meet the application deadline even if they have not yet been admitted to the Graduate School.

The Stafford Student Loan Program is based on the student's financial need and provides for a long-term bank loan in which the graduate student can borrow up to a maximum of \$7,500 per year, depending on individual lending institutions' policies. This loan currently bears an eight percent interest rate. Nonresident students may obtain application forms at the student's bank. Washington residents must obtain application forms from the Office of Student Financial Aid. Lending institutions establish their own application deadlines and policies for making Stafford student loans. An early inquiry to the student's bank is advisable. Nonresidents should check with the lending institutions in their home states. Three months are usually required to process this loan.

Short-term emergency loan funds also are available through the Office of Student Financial Aid. Several different types of short-term loans are possible, from \$200 interest-free loans to approximately \$600 loans at six percent interest. In an emergency, students may also borrow the amount equal to resident graduate tuition or a twenty-five percent advance on a Stafford student loan. More information is available from the Office of Student Financial Aid.

Financial Aid for Minority Graduate Students

Fellowships and assistantships based on need and on merit are open to men and women whose ethnic origin is either American Indian, Asian American, Black, or Hispanic American. These awards are generally made through the nomination and support of the department in which the student is enrolled. Supplemental fellowships ranging from \$250 to \$1,000 are also awarded by

the Minority Education Division of the Graduate School, based upon an evaluation of the student's need as established by the Office of Student Financial Aid.

Financial assistance from individual departments also may be available, and prospective students should apply directly to the Chairpersons of the departments in which they intend to do their graduate work.

Also available are a limited number of tuition scholarships for minority Washington State residents. Students may also apply for loans through the National Student Loan programs. Additional information can be obtained by writing the University of Washington, Graduate School, Minority Education Division, AG-10, Seattle, Washington 98195.

All awards are contingent upon the student's admission to the University of Washington Graduate School.

Graduate Degree Policies

The following sections contain detailed information concerning policies and procedures relating to admission into, and completion of, graduate degree programs. Students are advised to verify this information with the graduate program coordinator and the supervisory committee.

Graduate Program Coordinator

The graduate student's initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the Graduate Faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

Graduate Courses

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate nonmatriculated students, and are given numbers from 500 through 800. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only. Courses at the 300 level are not included in the calculation of grade-point average and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master's or doctoral degree. Approved 400-level courses are accepted as part of the major as well as minor or supporting fields. Courses numbered 498 and entitled Special Topics or Special Projects normally are not applicable to a graduate degree program if addressed primarily to introductory content and undergraduate students. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum No. 36 offers additional information on graduate courses. With the exception of Summer, students are limited to a maximum of 9 credits per quarter of any combination of courses numbered 600, 700, or 800.

Grading System for Graduate Students

In reporting grades for graduate students, units that offer graduate degrees use the system described herein. Grades are entered as numbers, the possible values being 4.0, 3.9, . . . and decreasing by one-tenth until 1.7 is reached. Grades below 1.7 are recorded as 0.0 by the Registrar and do not count toward residency, total credit count, or grade and credit requirements. A minimum of 2.7 is required in *each course* that counts

toward satisfying the Graduate School requirement for 18 hours of course work numbered 500-700 at the master's level and for half of the course work at the 500-800 level for the doctoral degrees. A minimum grade-point average of 3.00 is required for graduation.

Correspondence between number grades and letter grades is as follows:

Numeric grade-point equivalent	Letter grade	Numeric grade-point equivalent	Letter grade
4.0	A	2.8	B-
3.9		2.7	
3.8	A-	2.6	
3.7		2.5	
3.6		2.4	C+
3.5		2.3	
3.4	B+	2.2	
3.3		2.1	
3.2		2.0	C
3.1		1.9	
3.0	B	1.8	
2.9		1.7	
		1.6-0.0	E

Repeating Courses

Graduate students may repeat any course. Both the first and second grades will be included in the cumulative grade-point average. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once.

The following letter grades also may be used:

I Incomplete. An incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control. A written statement giving the reason for the incomplete and indicating the work required to remove it must be filed by the instructor with the head of the unit in which the course is offered.

To obtain credit for the course, a student must successfully complete the work by the last day of the next quarter in residence. This rule may be waived by the Dean of the college in which the course is offered. In no case may an incomplete be converted into a passing grade after a lapse of two years or more. An incomplete received by a graduate student does not automatically convert to a 0.0 but will remain a permanent part of the student's record.

N No grade. Used only for hyphenated courses and courses numbered 600 (Independent Study or Research), 601 (Internship), 700 (Master's Thesis), 750 (Internship), or 800 (Doctoral Dissertation). An N grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or supervisory committee chairperson should change the N grade(s) to one reflecting the final evaluation.

S/NS Satisfactory/not satisfactory. A graduate student, with the approval of the graduate program coordinator or supervisory committee chairperson, may elect to be graded S/NS in any numerically graded course for which he or she is eligible. The choice must be indicated at the time of registration or by the fifth day of the quarter; only in very unusual cases may S/NS grades be converted to numeric grades or vice versa. The instructor submits a numeric grade to the Registrar's Office for conversion to S (numeric grades of 2.7 and above) or NS (grades lower than 2.7).

CR/NC Credit/no credit. With the approval of the faculty in the academic unit, any course may be designated for grading on the credit/no credit basis by notice in the appropriate *Time Schedule*. For such courses, the instructor submits a grade of CR or NC to be recorded by the Registrar's Office for each student in the class at the end of the quarter. All courses numbered 600, 601, 700, 750, and 800 may be graded with a decimal grade, a CR/NC, or N at the instructor's option.

W Withdrawal. Official withdrawal from a course during the first ten class days of a quarter is not entered on the permanent academic record. After the first two weeks and through the seventh week of the quarter, a graduate student may withdraw from a course by filing a form with the Registrar's Office. A grade of W is recorded. No official withdrawal is permitted after the seventh week of the quarter except under the conditions described under Withdrawal Policy.

HW Hardship withdrawal. Grade assigned when a graduate student is allowed a hardship withdrawal from a course after the seventh week of the quarter. It is not computed in the grade-point-average calculation.

Unofficial withdrawal from a course shall result in a grade of 0.0.

The grade W counts neither as completed credits nor in computation of the grade-point average.

Of the minimum number of credits required for a graduate degree, a graduate student must show numerical grades in at least eighteen quarter hours of course work taken at the University of Washington. These numerical grades may be earned in approved 400-level courses and 500-level courses.

The student may petition the Dean of the Graduate School to modify the procedures described above. The petition should be accompanied by comments and recommendations from the graduate program coordinator or supervisory committee chairperson.

Scholarship

A cumulative grade-point average of 3.00 or above is required to receive a degree from the Graduate School. A graduate student's grade-point average is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of S, NS, CR, NC, and N are excluded, as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 grade-point average, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School. Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

See Graduate School Memorandum No. 16 for additional information.

Withdrawal Policy

1. During the first two weeks of the quarter, graduate students may withdraw from a class for any reason by filing an appropriate form with the Registrar. No entry is made on the student's record.

2. After the first two weeks and throughout the seventh week of the quarter, a graduate student may withdraw from a course by filing an appropriate form with the Registrar. A grade of W is recorded.

3. No official withdrawal is permitted after the seventh week of the quarter, except as follows: A student may petition the Registrar. The Registrar grants such a petition with the concurrence of the Graduate School if in his or her judgment (a) the student is unable to complete the course in question due to a severe mental or physical disability, or (b) unusual and extenuating circumstances beyond the student's control have arisen that prevented him or her from dropping by the end of the seventh week. Petitions must be filed promptly after the occurrence of the event. The Registrar shall enter the grade of HW (Hardship Withdrawal) for all courses approved for drop by petition.

4. The withdrawal schedule shown above applies to quarters of the regular academic year. The deadlines for Summer Quarter are established by the Dean of Summer Quarter.

5. Unofficial withdrawal from a course results in a grade of 0.0.

Language Competence Requirements and Examinations

Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly and research-oriented programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy. It is assumed that students from English-speaking countries who are admitted to the Graduate School are competent in the English language; students from non-English-speaking countries must dem-

onstrate a satisfactory command of English, both for admission and for appointment as teaching assistants.

Requirements for foreign-language competence are established by the Graduate Faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may have special significance to the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign-language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University's language competence requirements in French, German, and Spanish may be satisfied by successful completion of the standardized examinations given by the Educational Testing Service (ETS). These examinations are given at the University and elsewhere throughout the United States on published dates. For other foreign languages, examinations are given at the University of Washington on the day before scheduled ETS examinations.

Residence

The residence requirement for the master's degree is one year (three full-time quarters). For the doctoral degree it is three years (nine full-time quarters), two of them at the University of Washington. One of the two years must be spent in continuous full-time residence (three out of four consecutive quarters). The residence requirement for the doctoral degree cannot be met solely with summer or part-time study. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study other than the continuous full-time year of study.

Once a student is admitted to a graduate degree program, a full quarter of residence is granted for any quarter in which at least 9 credits in graduate course, research, thesis, internship, or dissertation work are satisfactorily completed.

With the exception of the three out of four consecutive full-time quarter requirement for the doctoral degree, students registered for fewer than 9 credits per quarter

may add part-time quarters together to achieve the equivalent of one full-time quarter (9 or more credits) to be applied toward fulfilling residence requirements. However, excess credits beyond 9 may not be subtracted from one quarter and added to another.

Only courses numbered 400, 500, 600, 700, and 800 can be applied to residence or course credit in the major field for advanced degrees (please see Graduate Courses earlier in this section regarding courses numbered 498 and 499). Courses numbered 300 are not applicable to residence or course credit toward advanced degrees except when applied by permission of the graduate program coordinator or supervisory committee toward the graduate minor or supporting courses. Courses numbered below 300 are not applicable to residence or course credit for advanced degrees.

Final Quarter Registration

A student must maintain registration as a full- or part-time graduate student at the University for the quarter the master's degree, the Candidate certificate, or doctoral degree is conferred.

A student who does not complete all degree requirements by the last day of the quarter must be registered for the following quarter.

Continuous Enrollment and Official On-Leave Requirement

POLICY

To maintain graduate status, a student must be enrolled on a full-time, part-time, or On-Leave basis from the time of first enrollment in the Graduate School until completion of all requirements for the graduate degree. This includes making application for the master's degree, the passing of the master's final examination or doctoral general or doctoral final examinations, the filing of the thesis or dissertation, and the awarding of the degree. Summer Quarter On-Leave enrollment is automatic for all graduate students who were either registered or On-Leave the prior Spring Quarter. Failure to maintain continuous enrollment constitutes evidence that the student has resigned from the Graduate School.

A student's petition for On-Leave status must be approved by the departmental graduate program coordi-

nator or alternate and submitted to the Registrar's office no later than the fifth day of the quarter. To be eligible for On-Leave status, the student must have registered for, and completed, at least one quarter in the University of Washington Graduate School and have been registered or On-Leave for the immediate past quarter (excepting Summer). An On-Leave student is entitled to use the University library and to sit for foreign-language competence examinations, but is not entitled to any of the other University privileges of a regularly enrolled and registered full- or part-time student. The student pays a nonrefundable fee to obtain On-Leave student status covering four successive academic quarters or any part thereof. An On-Leave student returning to the University on or before the termination of the period of the leave must file a Former Student Enrollment Application (available at 225 Schmitz) by the deadline stated on the form and register in the usual way as a full- or part-time student (see Graduate School Memorandum No. 9 for procedures). Please note: Periods spent On-Leave are included as part of the maximum time periods allowed for completion of a graduate degree.

READMISSION

A student previously registered in the Graduate School who has failed to maintain graduate student status but who wishes later to resume studies must file an application in person or by mail for readmission to the Graduate School by the regularly published closing dates. If the student is readmitted, registration will occur during the usual registration period. If the student has attended any other institution during the period when not registered at the University of Washington, official transcripts in duplicate of the student's work must be submitted. An application for readmission carries no preference and is treated in the same manner as an application for initial admission, including the requirement of payment of the application fee of \$35.

The Graduate School normally allows six years to complete requirements for a master's degree and ten years for a doctoral degree. Periods spent On-Leave or out of status are included.

Master's Degree

SUMMARY OF GRADUATE SCHOOL REQUIREMENTS

It is the responsibility of each master's candidate to meet the following Graduate School *minimum* requirements:

1. Under a thesis program, a minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis) must be presented. Under a non-thesis program, a minimum of 36 or more quarter credits of course work is required.
2. At least 18 of the minimum 36 quarter credits for the master's degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 must be course credits and 9 may be for 700, Master's Thesis.)
3. Numerical grades must be received in at least 18 quarter credits of course work taken at the University of Washington. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative grade-point average of 3.00 is required for a graduate degree at the University.
4. A minimum of three full-time quarters of residence credit must be earned. Part-time quarters may be accumulated to meet this requirement (see detailed information under Residence).
5. In a thesis degree program, a thesis, approved by the supervisory committee, must be prepared. A student must register for a minimum of 9 credits of thesis (700). With the exception of summer, students are limited to a maximum of 9 credits per quarter of thesis (700).

6. A final master's examination, either oral or written, as determined by the student's supervisory committee, must be passed.

7. Any additional requirements imposed by the graduate program coordinator in the student's major department or by the student's supervisory committee must be satisfied. A master's degree student usually takes some work outside the major department. The graduate program coordinator in the major department or the student's supervisory committee determines the requirements for the minor or supporting courses.

8. The graduate student must make application for the master's degree at the Graduate School within the first two weeks of the quarter in which he or she expects the degree to be conferred, in accordance with Application for the Master's Degree, as described below.

9. The graduate student must maintain registration as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

10. All work for the master's degree must be completed within six years. This includes quarters spent On-Leave or out of status and applicable work transferred from other institutions (see detailed information under Transfer Credit).

11. A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.

A second master's degree may be earned at the University of Washington by completing an additional set of requirements. Please refer to Concurrent Degree Programs later in this section and to Graduate School Memorandum No. 35 (revised September 25, 1989) for more specific information.

TRANSFER CREDIT

A student working toward the master's degree may petition the Dean of the Graduate School for permission to transfer to the University of Washington the equivalent of a maximum of 12 quarter credits of *graduate level* course work taken while a registered graduate student in another recognized graduate school. These credits may not have been used to satisfy requirements for another degree. The petition must be accompanied by a written recommendation from the graduate program coordinator and an official transcript indicating completion of the course work.

Approved transfer credits are not to exceed the equivalent of 12 quarter credits and are applied toward total credit count for the master's degree only. (Transfer credits are not applicable toward a doctoral degree.) The minimum residence requirement of three quarters at the University of Washington, the 18 quarter credits of numerically graded course work, and 18 quarter credits of 500-level-and-above course work may not be reduced by transfer credit.

Credit by either independent study through correspondence or advanced credit examinations is not acceptable.

THESIS PROGRAM

The master's thesis should be evidence of the graduate student's ability to carry out independent investigation and to present the results in clear and systematic form. Two copies of the thesis, normally written in the English language, along with the appropriate forms signed by the members of the supervisory committee from the student's graduate program, must be deposited in the Graduate School by the end of the quarter in which degree requirements are completed. The faculty in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly before the student begins writing the thesis. Thesis advisers are available in the Graduate School for consultation during the thesis preparation process.

A \$17 binding fee is payable at 129 Schmitz before the thesis is submitted to the Graduate School.

NONTHESIS PROGRAMS

The faculty in some graduate programs has arranged programs of study for the master's degree that do not require the preparation of a thesis. These nonthesis programs normally include a more comprehensive plan of course work for more extensive examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

FINAL EXAMINATION FOR MASTER'S DEGREE

As soon as is appropriate, the faculty in the student's graduate program appoints a supervisory committee, ordinarily consisting of two or three members but not more than four (see Graduate School Memorandum No. 13). The committee chairperson arranges the time and place of the final examination, the results of which

must be reported to the Graduate School by the last day of the quarter in which degree requirements are met. The examination may be oral or written, and all members of the supervisory committee must certify its results. If the examination is not satisfactory, the committee may recommend to the Dean of the Graduate School that the student be allowed to take another examination after a period of further study.

APPLICATION FOR MASTER'S DEGREE

The student must make application for the master's degree at the Graduate School *within the first two weeks of the quarter in which he or she expects to complete degree requirements*. The filing of the application is the responsibility *solely of the student*. When the application is received, the student's record is reviewed in the Graduate School. All requirements for the degree must be met by the end of the current quarter if the application is to be approved. If this is not possible, the applicant is notified of deficiencies by the Graduate School. Once approved, the application is forwarded to the appropriate graduate program. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application is voided and a new one must be submitted at the appropriate time.

Master's degree applications are valid for *two consecutive quarters*, and if requirements for the degree are not completed during the quarter of the initial application, the student's application may be retained by the graduate program coordinator for the quarter *immediately* following (e.g., Autumn to Winter, Winter to Spring, Spring to Summer, Summer to Autumn) and returned to the Graduate School by the end of the second quarter. Thereafter, the application is void and the student must file a *new* application for the degree in the Graduate School during the first two weeks of the quarter in which work for the degree is to be completed.

Upon completion of departmental requirements, the master's degree application is signed by the Supervisory Committee and returned to the Graduate School. It must be received by the last day of the quarter if the degree is to be conferred that quarter. If all requirements are completed after this deadline, registration for the following quarter is required.

The student and the graduate program coordinator should be thoroughly acquainted with the requirements for the particular degree.

MASTER OF ARTS FOR TEACHERS

Master's degree programs for experienced teachers, which focus upon the fields of knowledge normally taught in the common school and the community college, have been established at the University. These programs provide alternatives to the research-oriented Master of Arts and Master of Science degree programs, which emphasize particular fields of knowledge. Programs leading to the M.A.T. degree are offered in Biology Teaching and English.

Doctoral Degree

The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

SUMMARY OF REQUIREMENTS

In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School *minimum* requirements:

1. Completion of a program of study and research as

planned by the graduate program coordinator in the student's major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.

2. Presentation of a minimum of three academic years of resident study (see detailed information under Residence), two of them being at the University of Washington with at least one year in continuous full-time residence. The continuous year may be satisfied with three out of four consecutive full-time quarters being completed at the University of Washington and must be completed prior to the General Examination. Residence requirement for the doctoral degree cannot be met solely by part-time study. A minimum of two academic years of resident study must be completed prior to scheduling the General Examination.

3. Numerical grades must be received in at least 18 quarter credits of course work taken at the University of Washington prior to scheduling the General Examination. The Graduate School accepts numerical grades in approved 400-level courses accepted as part of the major, and in all 500-level courses. A minimum cumulative grade-point average of 3.00 is required for a graduate degree at the University.

4. Creditable passage of the General Examination. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

5. Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. *The Candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters.* At least one quarter must come after the student passes the General Examination and before a warrant is authorized for the Final Examination. With the exception of Summer, students are limited to a *maximum* of 9 credits per quarter of dissertation (800).

6. Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.

7. Completion of all work for the doctoral degree within ten years. This includes quarters spent On-Leave or out of status as well as applicable work from the master's degree from the University of Washington or a master's degree from another institution, if applied toward one year of resident study other than the continuous full-time year of study.

8. Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

9. A student must satisfy the requirements that are in force at the time the degree is to be awarded.

APPOINTMENT OF DOCTORAL SUPERVISORY COMMITTEE

A Supervisory Committee is appointed by the Dean of the Graduate School to guide and assist a graduate student working toward an advanced degree and is expected to evaluate the student's performance throughout the program. The Supervisory Committee must be appointed no later than four months prior to the General Examination. Appointment of the Supervisory Committee indicates that the Graduate Faculty in the student's field finds the student's background and achievement a sufficient basis for admission into a program of doctoral study and research. "Preliminary" examinations, if required, should be completed prior to

the request for appointment of the Supervisory Committee. If "preliminary" examinations are not an academic unit's requirement, it is appropriate to request appointment of the Supervisory Committee during the student's first year of study (see Graduate School Memorandum No. 13, Supervisory Committees for Graduate Students).

ADMISSION TO CANDIDACY FOR DOCTORAL DEGREE

At the end of *two years of graduate study*, the chairperson of the Supervisory Committee may present to the Dean of the Graduate School, for approval, a warrant permitting the student to take the General Examination for admission to candidacy for the doctoral degree. This means that, in the opinion of the committee, the student's background of study and preparation is sufficient to justify the undertaking of the examination. The warrant is approved by the Dean of the Graduate School only after the prescribed requirements of residence and study have been met and any specified language requirement has been fulfilled. The warrant must be received at least three weeks prior to the proposed examination date. Written and other examinations prior to the oral are the responsibility of the graduate program and do not need Graduate School approval. During the oral examination, the chairperson, the Graduate Faculty representative, and at least two additional examining committee members must be present. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

If the student's performance is judged by the Supervisory Committee to be satisfactory, the signed warrant certifying successful completion of the General Examination is filed in the Graduate School. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School.

Thereafter, the student is identified and designated as a *Candidate* for the appropriate doctoral degree and is awarded the Candidate's certificate. After achieving Candidate status, the student ordinarily devotes his or her time primarily to the completion of research, writing of the dissertation, and preparation for the Final Examination.

The Candidate certificate and the doctoral degree may not be awarded the same quarter.

CANDIDATE'S CERTIFICATE

The Candidate's certificate gives formal recognition of the successful completion of a very significant step toward the doctoral degrees awarded through the Graduate School: Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts. Students who have passed the Graduate School General Examination and who have completed all requirements for the degree except the dissertation and the Final Examination are awarded the Candidate certificate.

DISSERTATION AND FINAL EXAMINATION

The Candidate must present a dissertation demonstrating original and independent investigation and achievement. The dissertation should reflect not only mastery of research techniques but also ability to select an important problem for investigation and to deal with it competently. Normally the dissertation is written in the English language. However, if there are circumstances that warrant the dissertation be written in a foreign language, approval must be received from the Dean of the Graduate School. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly *before* the student begins writing the dissertation. Thesis advisers are available in the Graduate School, and students are encouraged to consult with them throughout the dissertation preparation process.

When the Supervisory Committee agrees that the doctoral Candidate is prepared to take the Final Examination, the Dean of the Graduate School should be informed of the decision and asked to designate a Reading Committee from among the members of the Supervisory Committee.

Once the Reading Committee is established officially with the Graduate School, a Request for Final Examination (signed by the Supervisory Committee chairperson and the members of the Reading Committee) is presented to the Graduate School three weeks prior to the Final Examination date, and if the Candidate has met all other requirements, a warrant authorizing the Final Examination is issued by the Graduate School.

The Reading Committee prepares a report briefly summarizing the distinctive achievements of the research, the methods used, and the results. One copy of the report with the original signatures of the Reading Committee must be submitted to the Graduate School after the Final Examination.

If the Final Examination is satisfactory, the Supervisory Committee signs the warrant and returns it to the Graduate School by the last day of the quarter in which the degree requirements are completed. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School. If the examination is unsatisfactory, the Supervisory Committee may recommend that the Dean of the Graduate School permit a second examination after a period of additional study.

PUBLICATION OF DOCTORAL DISSERTATIONS

Part of the obligation of research is publication of the results, and in the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all of the dissertation and provides worldwide distribution of the work. The Candidate signs the publication agreement when the dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

The following fees for microfilming the doctoral disser-

tation are paid at the Student Accounts Office, 129 Schmitz (all fees are subject to change):

Microfilming the entire dissertation, \$47; *optional* copy-right fee (applicable only when the entire dissertation is microfilmed), \$25;

or

Microfilming of only the abstract, \$45. *These fees are in addition to the \$17 binding fee.*

SPECIAL INDIVIDUAL PH.D. PROGRAMS

The Graduate School maintains the Special Individual Ph.D. (SIPh.D.) Program for exceptionally able students whose objectives for study are so truly interdisciplinary that they cannot be met within one of the University units authorized to grant the Ph.D. degree. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. degree. It is not intended as a mechanism for offering the Ph.D. degree within units that do not have their authorized own Ph.D. programs.

A graduate student may apply to the SIPh.D. Program when he or she has completed the master's degree, or has been admitted to the Graduate School and has completed at least three quarters of full-time work at the University of Washington, and has carefully planned an appropriate program of studies.

Proposals, including GRE scores, are due by December 15 of each year, and decisions on admission are made by May 15 of the following year. Graduate School Memorandum No. 25, Special Individual Ph.D. Programs (revised May 15, 1985), contains additional information, proposal forms, and instructions and may be obtained from the Graduate School.

CONCURRENT DEGREE PROGRAMS

Concurrent programs are defined as a pair of programs that may be taken at the University of Washington by a postbaccalaureate student resulting in the satisfaction of the requirements for either two graduate degrees or a graduate and a professional degree. Rather than sequentially completing first one and then the other degree, the student's time and the University's resource allocations may sometimes be conserved by providing arrangements that permit the student to proceed in a coordinated way toward completion of the degree objectives.

To earn two master's degrees, a student must complete two separate sets of minimum Graduate School degree requirements of 36 credits each for a total of 72 credits. If a program requires more than 36 credits for the master's degree, a graduate student, with prior approval of both graduate programs, may apply a maximum of 12 credits beyond 36 earned in one program toward the master's degree in the second program. Thus, the minimum number of additional credits for the second degree, with these 12 approved credits, is 24. Up to 12 credits earned toward a Ph.D. degree may be counted toward a master's degree in another program with the approval of both degree-granting units.

Graduate School Memorandum No. 35, Concurrent Degree Programs (revised November 19, 1985), contains additional information and is available from the Academic Programs office in the Graduate School.

Research and Scholarly Activities

Research is an essential part of graduate education in the University, and its furtherance is one of the primary concerns of the Graduate School. Grant and contract support of University activities is coordinated by the Graduate School. Additionally, the Graduate School

administers certain public and private funds made available to encourage the research activities of faculty and students by support of their research and by securing the services of outstanding visitors to the campus.

External Support for Research and Training

The University of Washington is one of the nation's leading research institutions, receiving more than \$310 million annually in grant and contract support of a wide array of research and training programs. Since 1969, the University has ranked among the top five institutions in the United States with respect to receipt of federal awards. About eighty-four percent of the University's grant and contract funds comes from federal agencies, most of the remainder coming from foundations, industry, and other private sources. These funds are awarded in response to faculty-initiated, University-approved proposals for funds to support specific projects in accord with the University's educational goals and are apart from legislative appropriations for the basic operation of the University. Grant- and contract-supported programs employ about 4,500 FTE employees and provide significant opportunities for graduate students who work with faculty members in the conduct of research as a vital component of graduate education.

In addition, private gifts to the University, which amount to more than \$40 million a year, add significantly to the opportunities of students and faculty to pursue scholarly interests.

Institutional Support for Research and Training

The objective of the *Graduate School Research Fund* (GSRF) is to support research as an integral part of the mission and graduate academic programs of the University. Support may be provided for (1) initiation or completion of faculty research projects, (2) purchase of equipment, (3) seminars or graduate student travel, (4) graduate student recruitment, (5) book publication, or (6) special initiatives.

GSRF revenues come from (1) state funds provided in the University's biennial budget; (2) federal grants to the University that permit discretionary support of research programs; (3) private donations; (4) institutional allowances provided with fellowships and traineeships; (5) patent, invention, and copyright royalties accruing to the University.

GSRF policies and procedures are available from the Graduate School, 201 Administration, AG-10, telephone 545-2628.

Special Professorships and Lectureships

The *Walker-Ames Fund* was established in the 1930s through a bequest from the estates of Maud Walker Ames and her husband, Edwin Gardner Ames. Its stated purpose is to enable the University of Washington "to guarantee to the state of Washington the scholarly and educational services of the most distinguished minds available in this and other countries."

Chaired by the Dean of the Graduate School, a committee of University faculty members considers nominations from their colleagues and makes recommendations to the President for the appointment to Walker-Ames Professorships of distinguished scholars of national and international reputation.

Since 1936, when the first Walker-Ames Visiting Professor was appointed, nearly three hundred scholars and members of the professions have come to the University as temporary members of the faculty, enriching the intellectual life of the University community and the state.

The *Jessie and John Danz Fund* was established in 1961 by a gift and bequest from John Danz; an additional gift was made to the Danz fund in 1969 by his wife, Jessie Mohr Danz. The Danz fund is intended primarily to enable the University to bring to the campus each year two "distinguished scholars of national and international reputation who have concerned themselves with the impact of science and philosophy on man's perception of a rational universe."

Nominations and appointments for the Danz lectureships are made in the same manner as the Walker-Ames professorships. Since 1961 when the lectureship was established there have been 68 appointed lectureships. Other arrangements compatible with the Danz bequest (e.g., the publicizing of the Danz Lectures) may be made upon approval of the committees involved.

Questions pertaining to the Walker-Ames Fund and the Jessie and John Danz Fund may be directed to the Dean of the Graduate School.

Special Programs and Facilities

In addition to regular academic offerings, the University maintains a wide range of programs and facilities that provide special opportunities for graduate study and research. The following units are administered by the Graduate School:

CENTER FOR LAW AND JUSTICE

Joseph G. Weis, Director
117 and 119 Savery, DK-40

The Center for Law and Justice is a multidisciplinary research center established in 1975. Its goals are to engage in research, to contribute to the education and training of students, to offer consultation, and to provide liaison to the community in the areas of law and justice. To achieve these goals the center: (1) apprises faculty members of research opportunities and assists in the development of proposals; (2) involves students from different disciplines in research training and education and sponsors biweekly colloquia; (3) provides consultation to the criminal justice system and responds to the broader informational needs of the community; and (4) sponsors conferences and functions as the University's planning unit for the allocation of funds from the Law Enforcement Assistance Administration's state planning agency.

FRIDAY HARBOR LABORATORIES

A. O. Dennis Willows, Director
Friday Harbor, Washington 98250

University Office: 208 Kincaid, NJ-22

The Friday Harbor Laboratories facility is the principal marine science field station of the University of Washington. Its faculty comprises members from various academic units of the University, including botany, fisheries, oceanography, and zoology, as well as visiting faculty members from other institutions.

The laboratories, located approximately eighty miles north of Seattle near the town of Friday Harbor on San Juan Island, offers a biological preserve of 484 acres of wooded land with about two miles of shoreline. The island is one of the largest of the 172 that make up the San Juan Archipelago, located in the northwest section of the state of Washington between Vancouver Island and the United States mainland. In addition to the Friday Harbor site, the laboratories' administration has the responsibility for overseeing biological preserves leased or owned by the University on San Juan Island (False Bay and Argyle Lagoon), Shaw Island (uplands adjacent to Point George and Parks Bay; Cedar Rock Biological Preserve), and Lopez Island (Point Colville and Iceberg Point). Goose and Deadman Islands, biological preserves owned by the Nature Conservancy, are under the stewardship of the laboratories.

The laboratories are close to seawaters that range from oceanic to those highly diluted by streams, some with depths to a thousand feet, others with bottoms varying from mud to rock, and water movements ranging from those of quiet bays and lagoons to those of swift tideways. The waters about the San Juan Archipelago abound in varied marine flora and fauna.

During spring, summer, and autumn, the laboratories offer opportunities for independent and supervised research, as well as a varied program of instruction for graduate and undergraduate students. Throughout the year, use of the laboratories' facilities for research in various areas of marine science is encouraged.

INSTITUTE FOR ETHNIC STUDIES IN THE UNITED STATES

John P. Keating, Chairman, Steering Committee
217 Guthrie, NI-25

The institute was established in 1981 to encourage multiethnic and cross-ethnic interdisciplinary research in generic problems of ethnicity, with particular refer-

ence to minority groups living in the Pacific Northwest. Its thrust is toward generating significant scholarly publications and other scholarly activity.

JOINT INSTITUTE FOR STUDY OF THE ATMOSPHERE AND OCEAN

John M. Wallace, Director
402 Atmospheric Sciences-Geophysics, AK-40

Established by an agreement between the University of Washington and the National Oceanic and Atmospheric Administration, the institute is intended to facilitate and strengthen cooperation between the two organizations in research and other collaborative efforts in the oceanographic and atmospheric sciences. To the campus it will bring scientists from NOAA laboratories and from other nations to join with University faculty and students in research projects initially directed toward mechanisms of climate change and studies of estuarine processes.

OFFICE OF SCHOLARLY JOURNALS

Kathryn E. Shuman, Administrator
4045 Brooklyn Avenue Northeast, JA-15

The Office of Scholarly Journals provides assistance to members of the faculty who have editorial responsibilities for the publication of scholarly journals originating in, or associated with, the University of Washington.

NORTHWEST CENTER FOR RESEARCH ON WOMEN

Angela B. Ginorio, Director
111 Cunningham, AJ-50

A multidisciplinary center with regional responsibilities, the center is designed to encourage and facilitate research on women and on gender-related issues. NWCROW aims to respond to the concerns of feminist researchers and women faculty at the University of Washington and in the Puget Sound region, and to increase the scope of projects on women.

A new focus on research, "Women, Science, and Technology," is being developed to address concerns of women scientists as well as to explore the impact of science and technology on women's lives.

QUATERNARY RESEARCH CENTER

Stephen C. Porter, Director
19 Johnson, AK-60

Quaternary research focuses on the processes presently shaping the environment and those that have operated on it for the past several million years. To foster such study, the Quaternary Research Center was established at the University in 1967. Cooperating faculty members come from anthropology, atmospheric sciences, botany, chemistry, civil engineering, forest resources, geography, geological sciences, geophysics, oceanography, and zoology. They have in common a commitment to linking the past, present, and future through interdisciplinary study and research. The result is a broad spectrum of interdisciplinary study possibilities.

In addition to various geophysical laboratories, the Quaternary Research-Geophysics Building includes laboratories for palynology, potassium-argon dating, radiocarbon dating research, oxygen isotope research, and periglacial studies.

OFFICE OF TECHNOLOGY TRANSFER

Donald R. Baldwin, Assistant Provost for Research
201 Administration, AG-10

The Office of Technology Transfer (OTT) promotes the early identification of inventions and new technology and helps to facilitate their transfer to the private sector. To achieve this, OTT encourages the faculty, staff, and students to be alert to the commercial potential of their research. Policy dictates that the University share any income from new technologies with the inventor and the inventor's school and department. OTT assists in copyrighting, patenting, and/or licensing the technologies produced by research, safeguarding University and inventor interests while promoting the broadest use of these technologies as part of the University's tradition of public service.

TREATY RESEARCH CENTER

Edmond Mignon, Acting Director
Graduate School of Library and Information Science,
FM-30

Opening in 1964 as an interdisciplinary research project, the Treaty Research Center was formally established in 1968 through a major grant from the National Science Foundation. The center created and maintains the world's first and largest computerized data base on international treaties. The data base is the foundation of the center's major publication, the *World Treaty Index*. The 1984 edition of *Index* is a five-volume set of over four thousand pages covering forty-five thousand

treaties in fifty languages and is available worldwide in major research libraries. The center also provides treaty information for teaching and research, occasionally sponsors visiting scholars, cooperates with treaty specialists worldwide, and explores new ways of using computers to store information and generate ideas in the field of international law and politics.

UNIVERSITY OF WASHINGTON PRESS

Donald R. Ellegood, Director
4045 Brooklyn Avenue Northeast, JA-20

The University of Washington Press, the book-publishing division of the University, has more than nine hundred titles in print, with special emphasis on art, anthropology, Asian studies, biology, ethnology, history and government, language and literature, oceanography, and regional subjects. The press publishes about fifty new books each year by members of the University faculty, as well as by scholars outside the University. In addition, the press has a paperback reprint series, entitled Washington Paperbacks, and an import program that makes known important books in English published abroad. It produces and distributes phonograph records and films, most of which grow out of original research on campus.

In addition to the Graduate School units described above, the following programs and facilities concerned with graduate education and research are administered by other University units:

CENTERS, INSTITUTES, AND INTERCOLLEGE PROGRAMS

Aerospace and Energetics Research Program. An interdepartmental and interdisciplinary program within the College of Engineering.

Alcohol and Drug Abuse Institute. Coordination of research and training in the fields of alcoholism and drug abuse; provides community consultation.

Applied Physics Laboratory. A research and development organization with capabilities in ocean and environmental sciences and engineering, arctic technology, energy resource research, biosystems engineering, and forest engineering.

Center for Bioengineering. Program of the College of Engineering and the School of Medicine that applies the concepts and techniques of engineering to problems of biology and medicine.

Center for Process Analytical Chemistry. A facility, funded by the National Science Foundation and private industrial firms, to develop analytical tools that will improve the productivity of industrial processes.

Center for Quantitative Science in Forestry, Fisheries, and Wildlife. A broad program in applied mathematics and in mathematical services concerned with quantitative descriptions of the management of both aquatic and terrestrial ecosystems.

Center for Research in Oral Biology. Assists in the national effort to reduce the toll of oral disease and to promote the general level of oral health.

Center for Social Welfare Research. Offers policy and practice research in such areas as health and mental health, child welfare, income maintenance, individual and family adjustment, corrections, and gerontology.

Center for Urban Horticulture. Offers research, education, and public service problems in the utilization of plants to create, maintain, and enhance the quality of urban environments. In addition to its research and teaching programs at the Union Bay facility, the center manages the *Washington Park Arboretum*, a 200-acre living laboratory within Seattle devoted to the study of woody plants.

Child Development and Mental Retardation Center. Provides facilities for teaching and research programs related to mental retardation and child development.

Fisheries Research Institute. Conducts research in fisheries biology and aquatic ecology in the Pacific Northwest and Alaska.

Institute on Aging. A multidisciplinary educational and research unit designed to focus attention on the social, health, psychological, political, and economic issues of human aging.

Institute for Environmental Studies. An interdisciplinary educational unit established to develop environmentally related programs in teaching, research, and public services.

Institute of Forest Resources. The research, continuing education, and information branch of the College of Forest Resources.

Institute for Public Policy and Management. Coordinates and promotes the efforts of other University units

to deal with problems of public policy and administration in the state of Washington and the Pacific Northwest.

Regional Primate Research Center. One of seven throughout the nation; provides opportunities in biomedical research on nonhuman primates.

Washington Mining and Mineral Resources Research Institute. Established at the University in 1980, the institute's purpose is to promote and conduct research in fields related to mining and mineral resources, and by doing so to promote the education and training of engineers and scientists in these fields. Departments and individuals from this university and two other state universities are eligible to participate in institute programs. The institute is administered by an interinstitutional and interdisciplinary policy board and technical steering committee.

Washington Sea Grant Program. Fosters the wise use of the sea and its resources through a regional program of research, education, and advisory services.

Washington Technology Center. Designed as a statewide resource to conduct joint industry-university research in new and emerging technology, resulting in the transfer of commercially applicable technology to industrial companies in Washington State. It is structured to facilitate participation by a wide range of the state's industrial companies and research universities. Current research areas include: microprocessors and integrated optics/circuits, biotechnology, plant genetic engineering, computer systems and software, manufacturing engineering and robotics, and advanced materials.

SPECIAL FACILITIES (ON CAMPUS)

Academic Computer Center. Provides instructional and research computing services for the University.

Burke Memorial Washington State Museum. An educational and cultural center whose function is to collect, preserve, research, exhibit, and interpret the natural and cultural objects of the human environment, particularly the Pacific Ocean, its islands, and mainland shores.

Drug Plant Garden. Viable seeds and plants of medicinal and pharmaceutical interest are maintained for experimental purposes.

Henry Art Gallery. The art museum of the University of Washington.

John L. Locke, Jr., Computer. Provides computing services to the health sciences complex and to hospitals and clinics in the community for medical research, teaching, training, and patient-care programs.

KUOW Radio. Broadcasts programs of an educational, cultural, scientific, informational, and public affairs nature; communicates information on University activities to students, alumni, and the public.

Nuclear Physics Laboratory. Houses a Van de Graaf accelerator and a cyclotron for research in physics, chemistry, cancer therapy, nuclear medicine, radiation biology, and related fields.

Observatory. Houses a six-inch refracting telescope, open for public viewing as well as for study and research.

Oceanographic Research Vessels. Operated for field study and research in Puget Sound and the Pacific Ocean.

Speech and Hearing Clinic. Serves as a center for research in speech science, speech and language pathology, and audiology, and provides services to the public.

University of Washington Medical Center/Harborview Medical Center. The Health Sciences Center operates two major teaching hospitals: its own 420-bed University of Washington Medical Center and, under contract with King County, the 413-bed Harborview Medical Center.

University Libraries. With more than five million volumes, an equal number of microforms, several million items in other formats, and more than fifty-five thousand serial titles, the University of Washington Libraries house one of the top research collections in the country. The fully integrated, computerized Online Catalog provides bibliographic information and circulation status for the cataloged holdings of the Libraries. The Libraries also offer an extensive array of services in each of its twenty-two units. The Suzzallo and Allen Libraries, the Odegaard Undergraduate Library, the Health Sciences Library and Information Center, the East Asia Library, and the seventeen branch libraries each provide reference services and offer instruction in the use of library resources. Access to more than three hundred commercially produced data bases in science and technology, business and industry, and the humanities is available on a cost-per-search basis in a number of the campus libraries through Computer-Based Reference Services. Many CD ROM products are also available in various libraries for free and independent use.

SPECIAL FACILITIES (OFF CAMPUS)

Big Beef Creek Laboratory. Located at Seabeck, Washington; provides opportunities for research and instruction in the School of Fisheries.

Forest Resources. The College of Forest Resources maintains a variety of field facilities throughout the state that provide a general natural science laboratory for research and teaching of natural resource behavioral patterns and management.

Manastash Ridge Observatory (Kittitas County). A thirty-inch reflecting telescope and auxiliary equipment available for research in astronomy.

Primate Field Station (Medical Lake). A primate breeding facility maintained by the Regional Primate Research Center.

West Seattle Laboratories (Seattle). For research and instruction in electrical engineering and research in physics and medicine.

Research at the University of Washington

The University of Washington has built a reputation for excellence in research. It is one of a handful of research universities with noteworthy programs across the whole spectrum of intellectual disciplines in the sciences, arts, and humanities. For many years, the University has been among the leading institutions in the country in federal money received for research. Achievements of its faculty have been recognized in the form of numerous professional awards and fellowships.

The University of Washington is the major research university in the Pacific Northwest, a region encompassing one-third the landmass of the United States. Its location has led to the development of research programs dealing with regional concerns and has stimulated the growth of disciplines whose interests lie well beyond the nation's borders.

The climate of research excellence offers graduate students the opportunity of learning from, and participating in, research with the leading scholars in virtually every

field. Perhaps as important is the opportunity for collaborative ventures with outstanding researchers from related fields. The University's reputation also brings to campus many of the world's outstanding scholars to deliver seminars and lectures and to work with faculty members and graduate students. The University recognizes that graduate students are one of its primary assets, and its degree-granting units make every effort to attract the most promising graduate students from across the country. The quality of graduate students at the University has been acknowledged in reviews by granting agencies and continues to be a determining factor in attracting and retaining a renowned faculty.

The following sections contain brief descriptions of some interesting research under way at the University of Washington:

Earth, Ocean, and Atmospheric Sciences

UW geologists have a long tradition of concentrating on regional studies to learn more about the forces that continue to shape the Pacific Northwest. But studies ranging as far as the Amazon and Africa also form a regular part of the geological scientists' activity.

Recent work suggests that great earthquakes of magnitude 7 or 8 on the Richter scale have occurred in the Pacific Northwest in the not-too-distant past, and, because the forces are the same, are likely to recur at some time in the future.

A network of seismic stations, established to monitor activity in the vicinity of Mount St. Helens, has played an important role in helping scientists examine in detail the forces at work in the region.

Atmospheric scientists are engaged in a variety of research—global, regional, and local—to develop models of weather and climate prediction. Studies range from small-scale phenomena, such as storm cells, to long-term, slow changes in ocean and atmospheric circulation patterns.

Oceanographers, whose studies range worldwide, have made their own contributions to the unfolding story of the region's geological history. A University oceanography team traveling on a U.S. Geological Survey research vessel discovered active hydrothermal vents off the Washington-Oregon coast. Their existence was predicted by a University oceanographer nearly a decade ago. Photographs taken by a camera "flown" several feet from the ocean floor revealed plant and animal life flourishing near the vents. The unusual concentrations of living creatures and their ability to exist without sunshine suggest that they may be among the most ancient forms of life on earth.

UW scientists have long been interested in polar research, including both the arctic and the antarctic. The University is one of the major centers in the country for studies of ocean currents, ice formation, ice movement, and air-sea-ice interaction in these regions. UW personnel have developed unusual expertise for operation in polar regions. Principally through the Applied Physics Laboratory, UW investigators regularly conduct studies from bases sited on arctic pack ice and have deployed a series of weather buoys on the ice and in arctic waters that form part of a worldwide weather-forecasting system.

A group of researchers in atmospheric sciences has pioneered the study of clouds and weather systems by flying into the heart of storms approaching, or at, the Washington coast. Using one of the best equipped research airplanes in the country, they have developed techniques for examining the structure of these storms in detail. Their expanding base of knowledge will one day permit weather forecasting that is more precise than is possible with conventional tools.

A unique scientific resource for the University is Friday Harbor Laboratories. Located on one of the larger islands of the San Juan Archipelago, the laboratories draw researchers from all over the world, who use the pristine Puget Sound water pumped into the laboratories for sensitive studies of reproduction, physiology, and development. One of the most abundant and diverse sources of marine life is found in the surrounding waters; animals and plants that are characteristically found at the bottom of oceans are relatively close to the laboratories.

Physical Sciences

Basic research in the physical sciences is aided by exceptional research tools. The Department of Chemistry has acquired state-of-the-art equipment for studies involving magnetic resonance imaging (MRI), a sensitive probe for determining complex molecular structures. Besides being used to determine the rates of chemical reactions, MRI is used by health researchers studying complex biological processes, because it is one of the few tools that can analyze a reaction while it is taking place.

The Center for Process Analytical Chemistry is a joint University/industry effort to develop devices and techniques for continuous monitoring of chemical processes. It has been recognized as being one of the nation's most successful ventures of its kind.

The University has one of three nuclear physics laboratories located at American universities and supported by the Department of Energy. This laboratory recently added \$8 million to construct a superconducting booster to its accelerator, placing the nuclear physics research facility on a par with the best in the world. The Department of Physics experimental particle physics group and the Visual Techniques Laboratory are engaged in a number of studies at the frontiers of knowledge involving high-energy particles created both in laboratories and by nature.

In 1989, Physics Professor Hans Dehmelt won a Nobel Prize. Later that year, the University beat several other prestigious schools in a Department of Energy competition for the Institute for Nuclear Theory, which has made the University an international center for research in fundamental nuclear physics and associated problems in particle physics and astrophysics.

The University also has been a leader in the development and use of EXAFS, a sophisticated x-ray tool for determining the structure of materials that are not formed from crystals. The use of EXAFS is giving scientists an understanding greater than ever before of how catalysts work, and it is giving life scientists a new tool for exploring the structure of proteins on an atomic scale. EXAFS is also being used by a number of physi-

cists studying condensed matter. Experiments in this field employ the use of monolayer films just one atom in thickness, so that the complexity of interactions is reduced to two dimensions.

Astronomers at the University conduct research on planets in the solar system, such as studies of the meteorology of Mars. Besides helping scientists understand the formation of the universe, the studies are useful for examining aspects of weather forecasting on Earth. Astronomers also seek clues to understanding quasi-stellar objects, or quasars. Current theories advanced by research at the University and elsewhere tie their existence to black holes and suggest they were formed shortly after the universe began. UW astronomers and graduate students have been rewarded for their research excellence by being granted more time per capita on major national telescopes than any other university group in the country.

The University is part of a consortium that is constructing a telescope with a 140-inch mirror, making it one of the largest university-operated telescopes in the country. The telescope will use computer technology to permit remote control of the instruments from any participating institution; it also will allow rapid instrument changes from remote sites.

Applied Sciences

A multidisciplinary approach to the study of materials has led to important discoveries of how to design materials to meet specific needs. An early application of this work made important contributions to the space program. Currently, scientists and engineers are working on developing fundamental design principles for new types of ceramic-polymer composites. These materials have a wide range of applications, including in computer technology, the aerospace industry, and the medical field.

The Washington Technology Centers, established in 1983, were designed as a statewide resource to conduct joint industry-university research in new and emerging technology. The centers facilitate collaboration by a wide range of the state's industrial companies and research universities. Current research areas include microsensors and integrated optics/circuits, biotechnology, plant genetic engineering, computer systems and software, manufacturing engineering and robotics, and advanced materials.

Mechanical engineers work on a variety of problems, including the design of special devices to meet the needs of handicapped persons, underground coal-combustion methods, and studies of efficient burning methods for use in home wood stoves. The Aerospace and Energetics Research Laboratory conducts work on efficient heat-rejection systems for space vehicles, innovative methods for heat transfer in power plants, and the use of lasers for photographing and studying eye diseases.

Chemical engineers are studying polymers that may replace metals in many structures, including airplanes. They also are exploring more efficient ways for extracting the last drop of oil from existing wells. Several faculty members and graduate students also are studying processes that occur at the interface between two substances—work that has applications in making better paints and dyes, as well as in improving the technology of oil-spill cleanup.

Civil engineers are studying problems of air pollution and the technology to prevent it; problems of water pollution, acid rain, and lake restoration; methods of predicting the effects of earthquakes on man-made structures; transportation systems that take advantage of the latest advances in technology and computer modeling; and new materials for road surfaces that can replace petroleum-based products with no sacrifice in quality.

In the Center for Bioengineering, problems facing physicians in diagnosis and treatment are solved with the help of engineers from a variety of disciplines. The center is the home of pioneering work in diagnostic ultrasound, which enables physicians to study a patient's circulatory system in detail without surgery. The center's team also has developed a laser scalpel, a device that can markedly reduce blood loss during surgery, which can be an especially serious problem with burn patients. A renowned group of researchers has made important strides in understanding how to design man-made materials that are compatible with the human body. Such research is important in artificial-organ research as well as in other health-related work.

Life Sciences

A strong program in zoology includes research on the neurological basis of behavior and the origin of circadian rhythms, the physiology of insect development and the role of hormones in metamorphosis, and the ecology of intertidal communities. Understanding why and how certain creatures evolved as they did often requires multiple approaches, including field research, construction of physical models in the laboratory, and computer simulation.

Since its establishment more than thirty years ago, the UW Health Sciences Center has become well known for its teaching, research, and patient care. University physicians and staff members pioneered the first successful long-term kidney dialysis techniques, which have led to lifesaving treatments for tens of thousands of persons. Continuing research in this field has as one of its aims the production of more-portable and simpler devices for persons suffering kidney failure. Medic I, a system of rapid response for victims of accidents and heart attacks, is based at Harborview Medical Center, one of the University's two teaching hospitals. It has provided a national model for immediate prehospital care.

UW research in cancer continues to improve the prognosis for several forms of the disease. University physicians have been leaders in the development of bone-marrow transplantation, which offers the hope of curing several forms of leukemia. University programs explore the genetic basis of cellular abnormalities that occur in response to aging or to environmental insults. An active and recognized group of researchers explores the response of the immune system to cancerous cells.

The schools of the Health Sciences Center receive approximately half of all research money that comes to the University, which reflects their strength and diversity. Research programs in the study of heart disease, diabetes, and sexually transmitted diseases have achieved international recognition. The University's Child Development and Mental Retardation Center is recognized for its pioneering work in the causes, prevention, and treatment of diseases and disorders leading to mental retardation.

The School of Pharmacy has a growing program in pharmacokinetics, the study of how drugs are metabolized and the rate at which they affect target organs and are eliminated by the body. Research in this field is aimed at the scientific analysis and prediction of drug effects through the development of sophisticated mathematical models.

The rapidly expanding field of research made possible by genetic engineering techniques is found in the health sciences and in units within the College of Arts and Sciences. The Department of Genetics, a leader in understanding the genetics of yeast, has conducted basic research that could lead to cheaper methods for producing interferon, as well as antigens that are found in hepatitis vaccines. Other projects using recombinant

DNA include studies of the immune system and the expression of foreign genes in higher plants.

Social Sciences

Interactions among individuals and groups determine the texture of society. The study of these interactions is the province of social scientists, whose work ranges from basic research on perception to the effect of interest groups on public policy.

Nationwide attention has been given to UW investigators studying couples and the common factors that underlie successful relationships. In related research, several investigators are examining the processes of interaction in small groups, from families to work teams.

Important research in leadership and motivation, in human memory, and in alcoholism and addictive behavior is being carried on in a number of academic disciplines. Alcoholism studies range from physiological experiments to model counseling programs for pregnant women to participant-observer studies of addictive behavior. The focus for this effort is the Alcohol and Drug Abuse Institute.

Social scientists have performed provocative studies on the changing role of urban neighborhood organizations. Another group has concentrated on deviant behavior, receiving a major grant for the study of juvenile delinquency and possible prevention strategies. This grant is part of a larger effort by faculty members and graduate students to explore the ways that society's institutions react to deviant behavior.

Anthropologists are studying the changes in fertility, medical history, and cultural adaptation of the Japanese-American community in the Pacific Northwest, and the challenges facing immigrants from Vietnam and Laos. Other faculty members are pursuing problems in distant locales and times, such as the beginning of agriculture in the Nile Valley.

Geographers are studying regional issues, such as the economic linkages between the Pacific Northwest and other parts of the country, the design and financing of

efficient and equitable transit systems, the recent surge in population of nonmetropolitan areas and its policy implications, and the geography of access to health care.

Economists continue working on models to predict the results of federal monetary and fiscal policy. A group of researchers is breaking ground in a relatively unexplored area, the economics of natural resources, comparing the costs and benefits of different patterns of usage. These investigations are designed to help policymakers evaluate alternatives.

Social scientists at the University have a special interest in international relations. The University has been a pioneer in research concerning the Near and Far East, and this important role was emphasized with the establishment of the School of International Studies in 1978 (now the Henry M. Jackson School of International Studies), the culmination of more than sixty years of scholarly activity in area studies and international relations. Scholars in political science, anthropology, sociology, and the humanities study the role of culture in international affairs. Economists and geographers study development, resource management, and international economics. Historians complement the work of social scientists in exploring the basis of current thought, and scholars in languages and literature provide essential knowledge of original texts and the relationship of language to culture.

Humanities and the Arts

Research in the humanities often fulfills a primary mission of humanistic study—the preservation of the literary and artistic achievements of mankind. One aspect of this research is textual scholarship, involving the identification and authentication of original texts and artifacts. New knowledge is also generated through reassessment of earlier texts and works of art.

Texts that form part of Egypt's Nag Hammadi Library, found more than a quarter of a century ago but only recently translated from Coptic, may lead to a reinterpretation of early Christianity. Located near the upper Nile, the library contains documents from little-

known monastic groups, previously unknown Christian gospels, and both familiar and unfamiliar sayings of Jesus. A UW scholar studying these texts expects them to have as great an impact as the discovery of the Dead Sea Scrolls. The texts also will shed more light on the heretical Gnostic movement, which offers a radically different interpretation of Genesis.

A faculty member in the Department of English, working in the British Library, discovered several issues of a previously unknown periodical written by Henry Fielding, the famous eighteenth-century novelist. He is currently in the process of preparing annotated facsimiles of the issues, which should shed new light on aspects of Fielding's life, as well as adding some important material to the history of journalism.

Research often is meant to describe exclusively the generation of new knowledge, but in the humanities a growing number of faculty members explore the theoretical basis underlying our knowledge and the means of transmitting it. The focus for these studies is a colloquium in theory that involves faculty members and graduate students. Discussions on problems in the theory of narrative, for instance, may span literature, history, science, and psychoanalysis—in fact, wherever the written word is used. The colloquia have acted as catalysts for several scholarly articles and may lead to an expanded program encompassing other disciplines.

Theoretical studies also form an important component of research in the arts. The UW faculty in the School of Music conducts extensive research in the scientific analysis of sound, known as systematic musicology. Studies in this field include the influence of vibrato on judgments of vocal blend; context and time in musical perception; and rhythmic responses of preschool children. A number of faculty members are exploring new ways of creating music, including the use of computers.

The concept of scholarly achievement in the arts often is synonymous with performance or exhibition. The UW School of Music has on its faculty a number of nationally recognized composers, including two longtime recipients of research funds from the American Society of Composers, Authors, and Publishers (ASCAP). The awards are designed to encourage and assist writers of serious music. The School of Music also is home to one of the finest opera programs in the country.

The School of Art faculty includes a number of nationally and internationally known artists. The school also has pioneered the introduction of new forms of art to the Pacific Northwest. It contains the most extensive program in video art in the region and has been an innovator in the creation of performance films. Printmaking plays a prominent role in the school, which was among the first in the country to offer training in collagraphy, a technique using burnt-lacquer plates.

The UW School of Drama houses the famous Professional Actors' Training Program, which, besides teaching basic acting skills, provides an intensive introduction to the practice of the theatre arts. The program attracts dedicated students who work for demanding, scrupulous visiting directors from the commercial stage as well as for permanent faculty members with extensive professional experience. Graduate research in the history and practice of theatre forms an integral part of the school's diverse program, which now includes training for the aspiring playwright.

The University's program in creative writing is one of the oldest in the country. It achieved prominence in the 1950s and 1960s, when its faculty included Theodore Roethke, winner of the Pulitzer Prize in 1953. The tradition of excellence continues, with current University poets and authors receiving critical acclaim throughout the nation. This concentration of talent has made the University a center for literary activity in the Pacific Northwest.

UW Extension

*Vice Provost, Continuing Education,
UW Extension, and Summer Quarter*

Richard L. Lorenzen

Associate Vice Provost

Harry Norman

Assistant Vice Provost

David Szatmary

Established in 1912, UW Extension brings the University's resources to the community by providing quality educational programs to meet ongoing professional and personal needs.

This section describes the various programs currently part of UW Extension. The quarterly UW Extension catalog contains details of the program offerings. It is mailed without charge to residents of western Washington, who may receive it by telephoning (206) 543-2320 or by writing to UW Extension, GH-24, Seattle, Washington 98195.

Evening Degree Program

A new College of Arts and Sciences Evening Degree program in General Studies will start in Autumn Quarter 1990. The upper-division program serves transfer students with an interdisciplinary program leading to the baccalaureate degree. Classes are scheduled to begin after 4:30 p.m. Formal admission to the University is required for the Evening Degree program. Transfer to the day program requires separate application. For information or application materials, telephone (206) 543-2320.

Evening Credit Program

Each quarter a variety of credit courses is offered for those Puget Sound residents who cannot attend the University full-time. Formal admission to the University is not required for enrollment. The classes, funded primarily by student fees, are intended for traditional degree seekers as well as for postbaccalaureate individuals pursuing new skills and knowledge. All evening credit classes are taught by University faculty members and extension lecturers, approved by the appropriate academic unit. UW credit is awarded and the grades earned are included in grade-point-average calculations.

Graduate Nonmatriculated Program

Individuals who are seeking enrollment in graduate-level courses, but not admission to a graduate degree program, may apply directly to those academic departments that offer enrollment in their graduate courses to graduate nonmatriculated students. Application forms are available from participating departments, the Graduate School, or UW Extension. The Graduate School: Graduate Study and Research section of this catalog offers more details. Additional information may be obtained by telephone, (206) 543-6160, or by contacting individual departments.

Distance Learning

Distance Learning offers approximately 130 undergraduate courses through independent study by correspondence. Courses typically consist of assigned texts, study guides, assignments and examinations, and such supplementary materials as audiocassettes, computer diskettes, slides, and laboratory kits. University courses not currently listed by Distance Learning

may be taken through individual supervised study. Certain noncredit courses required for University entrance are available for those who wish to qualify for admission. Other courses provide subject matter for professional continuing education.

Courses are open to persons who, because of distance, work schedule, physical disability, or educational preference, require an alternative to on-campus classroom meetings. Resident University students often find correspondence study a convenient way to earn extra credits during summers or leaves of absence or a way of taking courses that would otherwise be unavailable due to schedule conflicts.

Formal admission to the University is not required for enrollment in Distance Learning. Students may register at any time and have one year in which to complete their work. As many as 90 credits earned through correspondence may be applied to a University baccalaureate degree. Upon successfully completing a course, the grade and number of credits earned are recorded on an official University transcript. Grades earned, however, are not computed in the University grade-point average, which is based solely on courses taken in residence.

A bulletin listing independent study courses may be obtained by telephone, (206) 543-2350, or by writing to Distance Learning, UW Extension, GH-23, Seattle, Washington 98195. (Include name, address, and social security number.)

English As A Second Language Center

The English As A Second Language (ESL) Center, 103 Lewis, provides nonnative speakers of English who are interested in improving language skills with the following services and resources:

Academic ESL courses for UW students. English is the language of instruction at the University, and many international students need additional English training to facilitate participation in regular University programs.

International students (whose native language is not English) admitted with TOEFL scores of at least 500 but below 580, or Michigan Proficiency Test scores of at least 80 but below 90, are required to take the University's ESL diagnostic test before matriculating. Students whose test results show their English to be adequate for full-time University study are excused from ESL course work. Others must take those ESL courses designated as required each quarter until the language requirement is completed.

During the academic year, the courses offered are designed for international students officially enrolled in a degree program at the University as either undergraduate or graduate students. These students take ESL courses along with their regular programs of study. En-

glish As A Second Language courses count the equivalent of 5 credits each for the purposes of satisfying visa requirements but do not count toward graduation. As they are special tuition courses, fees must be paid before students may register for them.

UW Extension ESL courses for all nonnative speakers. The ESL Center offers a separate series of noncredit courses that are open year-round to any adult nonnative speaker who would like to study English. These courses do not require formal admission to the University. Application may be made to the address below.

Additional information about ESL services, including complete listings and descriptions of current ESL course offerings at the University, is available at the ESL Center, 103 Lewis, telephone (206) 543-6242.

Noncredit Classes

UW Extension offers a broad range of courses, lecture series, workshops, and seminars for adults, students, and children. Some of these programs are open to resident students, faculty, and staff at a reduced fee. Noncredit classes offer opportunities for professional development and personal enrichment. Specific programs are announced quarterly in the UW Extension Catalog. Registration information is available at the extension office and by telephone, (206) 543-2310.

Career Development Services

Career Development Services provides individual counseling and testing for adults focusing their educational goals or considering a career change. Courses and seminars explore vocational and educational choices. For additional information, call (206) 543-2300, Ext. 422, or write Career Development Services, UW Extension, GH-21, Seattle, Washington 98195.

Conference Management

Conference Management offers initial planning and development advice, along with total administrative and logistical support for coordinating professional meetings, seminars, workshops, symposia, conferences and institutes of all sizes. Professional conference planners and support staff are available to University academic departments and administrative units, as well as for professional associations and community groups with University sponsorship. Services include personalized service, program planning advice, marketing support, financial management, facilities coordination, presentational support, food and housing arrangements, personnel management, professional support and post activity wrap-up. Additional information may be obtained by telephoning (206) 543-0888, or by writing to Conference Management, UW Extension, 5001 25th Avenue N.E., GH-22, Seattle, Washington 98195.

University Branch Campuses

Two branch campuses of the University, established by action of the Washington State Legislature in May 1989, enrolled their first students in the autumn of 1990. The branches were opened in order to provide new higher education opportunities principally for the residents of the Central Puget Sound region. The academic programs offered at the branches have been selected to respond to the identified needs of the regional population and economy. At present, students who have previously completed two years of college are able to enroll at either branch and complete a bachelor's degree in Liberal Studies. In the near future the University expects to add bachelor's degree programs in engineering, the sciences and business administration, and master's degree programs in business, engineering, nursing and education.

The campuses are housed in temporary facilities while the permanent sites and buildings are under development. The Tacoma-area campus is located in the Perkins Building, at 11th and A Streets; temporary housing for the Bothell-Woodinville-area campus is located in the Canyon Park Business Center. By 1995, after the addition of the other degree programs, the campuses are expected to grow from their opening size of approximately 400 students at each campus to about 1600 students at the Bothell-Woodinville-area campus and about 1800 at the Tacoma-area campus. The initial plan for the branches developed by the University, though subject to ongoing review by the state, pro-

posed a gradual increase of branch campus enrollments.

The Liberal Studies program, an upper-division course of study leading to the Bachelor of Arts, is an interdisciplinary curriculum combining the content, methods, materials and intellectual tools of a number of disciplines in the humanities and social sciences. Students engage in comparative studies of the arts, philosophies, beliefs, and social and economic patterns of diverse social and cultural groups in the United States and selected regions of the world. Liberal Studies majors select either Comparative United States Studies or Comparative International Studies as their principal concentration and complete the appropriate core course. Other courses are then selected from four interdisciplinary areas: (1) Cultural Expression, focusing on the literature and other arts of various societies; (2) Ideas, Beliefs and Cultural Patterns, dealing with philosophies, beliefs, concepts, cultural assumptions and practices, and histories; (3) Communities and Social Institutions, dealing with the ways families, communities, and work are organized in societies and other groups, under the influence of class, race, gender, region and other demarcations; (4) States and Markets, examining the economic, corporate and government forces by which societies and nations are related and changed. The program features special attention, in courses throughout the curriculum, to the development of student skills appropriate to upper-division level study: in writing, oral presentations, the analysis and assessment of information, and collaborative work.

To be eligible for admission to the Liberal Studies program at one of the branch campuses, applicants must have completed 90 transferable college credits, with a cumulative grade-point average (GPA) of at least 2.0 in all transferable academic courses. Completed study of a foreign language (two years in high school, or ten credits in college) is also required unless special exception is granted. An approved associate degree (academic transfer) from a Washington community college is the recommended preparation for admission.

Applicants who have not completed such an associate degree should ordinarily have completed a comparable course of studies in order to receive preference for admission. The preferred course of studies includes the following:

General Education courses: 45-60 credits, including 15-20 credits each in natural sciences, social sciences, and humanities;

English Composition: 5 credits, plus an additional writing course or two W-courses;

Quantitative/Symbolic Reasoning: 4 credits, above the level of intermediate algebra.

All eligible applicants will be evaluated on the basis of the following criteria:

- (1) appropriateness of academic preparation for the degree program
- (2) likelihood of success in the program
- (3) commitment to completion of the bachelor's degree
- (4) appropriate match of an applicant's plans and opportunities with the content and purpose of the program
- (5) contribution to the ethnic and cultural diversity of the student body.

Applicants who are admitted to a program may enroll and register for courses in that program only. Admission to other programs or courses, at one of the other campuses of the University, requires submission of an application specifically for that campus and program.

Further information regarding branch campus admissions, the Liberal Studies program, or related matters may be obtained by calling the Office of Branch Campuses in Seattle: 543-3540.

KEY TO SYMBOLS AND ABBREVIATIONS

The symbols and abbreviations below are used in the listings of faculty members and course descriptions. Colleges, schools, and departments are presented in alphabetical order. If you are unable to locate the department or program of your choice, consult the Index.

Faculty

Entries include year of appointment, graduate-level and professional degrees, dates, and institutions. Entries also may include Clinical or Affiliate (if formally appointed to the Graduate School faculty), Emeritus, Acting, or Research faculty (title indicated in parentheses); area of specialization; and the symbols below.

* Member of the Graduate School faculty.

† Joint appointment (other department name(s) indicated in parentheses).

‡ Adjunct faculty member (primary appointment department name indicated in parentheses).

Course Descriptions

Each course listing includes prefix, course number, title, and credits. Each listing also may include quarter(s) offered, names of instructor(s), description of the course, and prerequisite(s).

Specific information on courses offered in a particular quarter, including descriptions of courses approved since the publication of this catalog, appears in the quarterly *Time Schedule*.

Course Numbers

100-299 Lower-division courses primarily for freshmen and sophomores.

300-499 Upper-division courses primarily for juniors, seniors, and postbaccalaureate (fifth-year) students. Graduate students may enroll in 300- and 400-level courses. When acceptable to the major department and the Graduate School, approved 400-level courses may be applied as graduate credit in the major field and approved 300-level courses may be applied in the supporting field(s).

500- Restricted to graduate students. (Courses numbered in the 500 and 600 series with *P* suffix denote professional courses for students in the schools of Dentistry and Medicine, and such courses may not be applied as graduate credit in the Graduate School.) Undergraduate, postbaccalaureate, and nonmatriculated students who wish to register for 500-level courses must obtain permission from the instructor of the class, departmental Chairperson, or other designated person.

Graduate courses numbered 600, 601, 700, 750, or 800 are restricted to students in the Graduate School. They appear by number and title only where applicable under the departmental course listings in this catalog. Descriptions for these courses are listed below.

(PREFIX) 600 Independent Study or Research (*) Individual readings or study, including independent

study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser. Name of faculty members responsible for supervising the student should be indicated on program of studies.

(PREFIX) 601 Internship (3-9, max. 9) Internship required of students in a graduate degree program other than Doctor of Arts. Permission of Supervisory Committee chairperson or graduate program adviser is a prerequisite. Name of faculty member responsible for supervising the student should be indicated on program of studies.

(PREFIX) 700 Master's Thesis (*) Research for the master's thesis, including research preparatory or related thereto. Limited to premaster graduate students (i.e., those who have not yet completed the master's degree in their major field at the University of Washington). Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser. Name of faculty member responsible for supervising the student should be indicated on program of studies.

(PREFIX) 750 Internship (*) Internship required of all graduate students in the Doctor of Arts degree program.

(PREFIX) 800 Doctoral Dissertation (*) Research for the doctoral dissertation and research preparatory or related thereto. Limited to graduate students who have completed the master's degree or the equivalent, or Candidate-level graduate students. Premaster students initiating doctoral dissertation research should register for 600. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser. Name of faculty member responsible for supervising the student should be indicated on program of studies.

Credit Designation

ART 100 (5) 5 credits are received for the quarter.

ART 101-102 (5-5) Hyphenated course. Credit is earned, but may not be applied toward graduation until the entire sequence is completed. (An *N* grade may be given the first quarter and the final grade the second quarter.)

ART 100- (5-) Course may take longer than one quarter to complete. Repeated registration may be necessary. An *N* grade is received until the final grade is submitted.

ART 100 (2, max. 8) 2 credits per quarter; course may be repeated up to four times to earn a maximum of 8 credits.

ART 100 (1-5) Up to 5 credits may be taken in a given quarter. Specific number is determined in consultation with instructor or adviser.

ART 100 (1-5, max. 15) Up to 5 credits may be taken in a given quarter. Course may be repeated to a maximum of 15 credits.

ART 100 (*, max. 10) Credit to be arranged per quarter; course may be repeated to a maximum of 10 credits.

ART 100 (3 or 5) 3 or 5 credits are earned in a given quarter. Specific amount is determined by school or college offering the course. The *Time Schedule* may indicate 3 credits, 5 credits, or 3 or 5 credits. Credits may vary by section.

ART 100 (3 or 5, max. 15) 3 or 5 credits are earned in a given quarter. Course may be repeated to earn a maximum of 15 credits.

ART 700 (*) Credit is to be arranged with school or college offering the course. No maximum stated. Only 600-, 700-, and 800-level courses do not require a maximum.

May be repeated for credit. This statement can appear in the course description, giving permission for repetition of the course for credit.

Background Required

Prerequisites Courses to be completed or conditions to be met before a student is eligible to enroll in a specific course.

Quarters Offered

A,W,Sp,S Indicates the quarter(s) the course is offered. A = Autumn, W = Winter, Sp = Spring, S = Summer.

Examples:

ART 100 AWSp ART 100 offered Autumn, Winter, and Spring quarters.

ART 100, 101 A,W ART 100 offered Autumn Quarter. ART 101 offered Winter Quarter.

ART 100, 101 AW,WSp ART 100 offered Autumn and Winter quarters. ART 101 offered Winter and Spring quarters.

ACADEMIC PROGRAMS, FACULTY, AND COURSES

College of Architecture and Urban Planning

224 Gould

Dean

Gordon B. Varey

Associate Deans

Katrina Deines

James J. Donnette

The College of Architecture and Urban Planning comprises four departments that are directly concerned with the design and development of the physical environment: Architecture, Building Construction, Landscape Architecture, and Urban Design and Planning.

The college offers a variety of programs and degrees, including an undergraduate four-year degree that is interdisciplinary and preprofessional in nature, focusing on the environmental design disciplines within a liberal arts education. The undergraduate programs of the departments of Building Construction and Landscape Architecture, on the other hand, lead to the professional degrees that serve as the educational credentials for careers in their respective fields. Master's degrees are also offered in the college: Master of Architecture, Master of Urban Planning, and Master of Landscape Architecture. Master's students may elect to work toward the certificate in Urban Design or the certificate in Preservation Design. The Department of Urban Design and Planning also offers a doctoral program. All curricula encompass an appropriate level of design and technical understanding and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

The departments share mutual interests and responsibilities and present opportunities for interdisciplinary exchanges. All students share the specialized physical facilities and educational resources. As part of a major university and a major metropolis in the Pacific Northwest, the college is able to reinforce its program by using its setting as a laboratory for study. It works closely with its various professional communities to build curricula and a faculty attuned to the understanding and creation of an appropriate physical environment.

Center for Planning and Design

Judith Heerwagen, Acting Director

The Center for Planning and Design in the college was established to facilitate the interdisciplinary study of the environment and to integrate scholarly knowledge and field experience in meeting the needs of local and regional clients. It has three primary objectives:

1. To make available the expertise and services of col-

lege disciplines in a variety of specializations through consulting, research contracts, seminars, and workshops.

2. To develop opportunities for students to obtain practical professional experience by participating in field studies.

3. To assist faculty members of the college in their research, teaching, and community-service functions.

The center is a member of the Architectural Research Center Consortium (ARCC), which was organized by United States architectural and planning schools to contract for research to be performed by member schools and to furnish research and advisory services to governmental agencies and others. ARCC is, in turn, a member of the National Institute of Building Sciences and the International Council for Building Research, Studies, and Documentation. The center is thus able to obtain information on research and technology transfer from a broad community of interest while participating on a regional basis in research and related activities.

Urban Design Certificate Program

410 Gould

Anne Vernez Moudon, Director

The Department of Urban Design and Planning administers a special graduate program that leads to the Certificate of Achievement in Urban Design. Since 1970, this interdisciplinary program has provided a collective framework that allows students to specialize in the study and design of the urban environment as part of their professional education.

The ten-member faculty offers backgrounds in urban design as well as in architecture, landscape architecture, and urban planning. In addition, the communities of the Puget Sound region provide a unique learning laboratory for students to experience the issues and professional activities of urban design. A core curriculum and mandatory course work in four substantive areas provide the student with a firm grounding in theory, methods, and practical skills.

Students are eligible to participate in this certificate program, normally seven quarters in length, if accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning, and if they possess the necessary design abilities prior to enrollment in advanced studios.

International Programs

224 Gould

The departments of the college offer many opportunities for foreign study in which participants earn academic credit while studying abroad. Architecture in Rome I and II, Italian Hilltowns, and Landscape in Great Britain are sponsored on a regular basis. In addition, various study and exchange opportunities exist in such locations as Germany, the Scandinavian countries, People's Republic of China, Mexico, and Japan. Faculty exchanges with foreign institutions occur regularly.

Center for Italian Studies

95 Piazza del Biscione, Rome, Italy

Astra Zarina, Director

The college maintains a permanent year-round facility in Rome. Studio and classroom spaces, as well as lim-

ited living accommodations for visiting scholars, are provided in the Palazzo Pio on the Campo de' Fiori. A library shared with the Department of Classics, a substantial slide collection, and a resident support staff are accessible to students. The Palazzo Pio facilitates interaction among students from the University and other institutions, together with practicing professionals residing in or visiting Rome. Several major universities regularly share studio critics and lecturers.

Remote Sensing Applications Laboratory

12 Gould

Frank Westerlund and Arthur Grey, Co-Directors

The Remote Sensing Applications Laboratory (RSAL) is a facility for teaching, research, and public service applications of remote sensing and geoinformation technologies in environmental planning and design. Remote sensing includes aerial photography and such techniques as Landsat for recording earth surface data in image or digital form for subsequent interpretation by visual or computer techniques and incorporation into geographic information systems. Research applications have included land-use mapping, urban form and growth studies, development siting, natural resource inventories, and environmental analysis. The RSAL houses an extensive collection of air photo, satellite data, map, and documentary resources. In addition to optical photo interpretation equipment, the laboratory utilizes the NASA-developed VICAR software system for digital image processing. The RSAL shares in the use of the college's ARC/INFO geographic information system.

Computer Aided Design Center

424 Gould

Brian Johnson, Director

Several levels of computing facility are available to students of the college. Numerous graphics terminals and PCs permit access to centrally operated Digital Equipment (VAX) and Control Data (Cyber 855) computers used for research and instruction. Software supports perspective-drawing and rendering, thermal and lighting simulation, structural analyses, analysis and display of regional mapping data, and other applications. Located within the college are both MS-DOS and Macintosh microcomputer facilities, with eight computers each, used for instruction, studio work, and student projects. These facilities are made available to students for their own work during off hours, and the college library maintains a wide selection of commercial software, including business and computer-aided design (CAD) packages. For advanced course work and research, the college operates a MicroVax 3500 minicomputer with three high-performance graphics workstations, digitizers, a printer, and a plotter. This system acts as a host to both the RUCAPS building modeling (CAD) system and the ARC/INFO geographic information system, used both for instructional and research work. In addition, a micro lab, consisting of four PS/2 Model 50zs, is host to advanced energy, graphics, and simulation applications.

Facilities

Design Graphics Laboratory

The center for all graphics courses in the college provides video recording and playback facilities, a sixteen-foot drafting machine for demonstrations of drafting techniques, a light table, a rear-projection table, and diazo printers, in addition to other specialized drawing equipment available to students. The laboratory offers live and video-taped lectures on a wide variety of graphics subjects and is staffed for consultation during regularly scheduled hours.

Lighting Applications Laboratories

The Lighting Applications Laboratories include a variety of facilities for use by students and faculty mem-

bers in conjunction with lighting classes, design studio courses, and research work. Equipment in the lighting workshop includes lighting fixtures and lamps, model-building materials, an artificial sky, a direct-beam sunlight simulator, assorted light meters, and demonstration displays. The Lighting Simulation Laboratory contains dimmable task and ambient lighting, a simulated window, and computerized data-gathering facilities.

Environmental Measurement Facilities

The college and the Department of Mechanical Engineering have jointly created a series of facilities for studying energy usage in buildings. One facility is a pair of two-room test cells, one of which contains direct-gain and Trombe wall-passive solar test bays, while the other serves for the evaluation of alternative envelope insulation types. The second facility is an atmospheric radiation measurement station at which solar irradiance, daylight illuminance and luminance, and long-wave irradiance (from/to the sky) are recorded. The third facility is a group of four houses plus a large test cell, which are being used to compare the energy-efficiencies for houses built to standards (a) prevailing in Washington State in 1980 and (b) proposed as a Model Conservation Standard (for adoption in 1990). This project is funded under a contract arranged with the Washington State Energy Office.

Photography Laboratory

A photography laboratory is provided with studio and darkroom facilities for use by photography classes, design studio classes, special instruction, and independent activity.

Shop

A fully staffed and equipped wood-, plastic-, and metal-working shop provides students with an opportunity to design and build selected projects. The shop is used as an instructional facility in conjunction with studio, structures, and materials classes. Thesis and other individual activity also can be accommodated.

Library

The Architecture-Urban Planning Library in Gould Hall is the branch within the University system that has the primary collection of materials on the subjects of architecture, building construction, landscape architecture, and urban design and planning. It includes more than thirty thousand books and bound periodicals, 280 currently received serial titles, and five thousand microforms.

Audiovisual Center

This center is a fully equipped laboratory to serve the college. It houses slide projectors, screens, opaque and overhead projectors, light tables, and a collection of over sixty-five thousand slides covering architectural, landscape, planning, and construction subject matter. A photocopy setup provides faculty members and students of the college with new material for lectures and class projects and adds to the constantly growing slide collection. This service center also supervises an array of equipment for building science studies.

Student Organizations

Chapters of American Institute of Architects Students, American Society of Landscape Architects, Associated General Contractors, Planning Students Association, and the Historic Preservation Association provide opportunities for undergraduate and graduate students to meet informally and to participate in a variety of projects and events.

Sigma Lambda Chi and Tau Sigma Delta, national honorary societies, are represented in the college.

Admission Requirements

Admission to the college is highly competitive, and preference is given those applicants who, in the judgment

of the department or program concerned, are the best qualified to undertake its curriculum. As a participant in the University's affirmative action program, which is intended to increase the number of minority group members and women in education and in the professions, the college encourages their applying for admission.

Specific admissions requirements and application procedures are listed separately under each department.

Undergraduate Program

208 Gould

James J. Donnette, Director

The college administers a nondepartmental Bachelor of Arts degree program in interdisciplinary environmental design and planning in which undergraduates may major. Built on a firm liberal arts foundation, the program has a core curriculum of required course work comprising college courses with a CAUP prefix and regular departmental offerings. This is followed by a selection of departmental offerings that may be concentrated within one department to prepare a student to enter a professional program, or the selection may be made from several departments to meet special individual objectives that no single department can satisfy.

A student is admitted to the program as a major in the college and does not join a department. Courses with a CAUP prefix are taught by regular faculty members of the departments of the college.

The educational goal of this program is to provide the student with a balanced undergraduate learning experience encompassing the diverse range of knowledge represented by the college's professional programs in the departments of Architecture, Building Construction, Landscape Architecture, and Urban Design and Planning.

The three basic educational objectives are to provide:

- A well-balanced program of undergraduate studies in environmental design and planning for the student who has not yet made a career choice.
- A well-balanced program of undergraduate studies for the student planning to enter a graduate-level professional program in architecture, landscape architecture, urban design and planning, or other related professions.
- Undergraduate course offerings that accommodate the person interested in environmental design and planning processes, but who does not intend to pursue professional studies in these areas.

The program is a traditional four-year liberal arts education leading to the Bachelor of Arts degree. This program offers students many options and because the program is divided into two-year segments the students have different options for entry and exit. The courses taken during the first period are for breadth requirements: humanities, social sciences, natural sciences (including math) and electives to provide for some free exploration. These initial courses may be taken at the UW or at any other institution as long as they meet the transfer equivalent standards of the UW. For students uncertain of their plans, taking advantage of state and community colleges can reduce the cost considerably. The second two-year segment prepares them for a wide variety of professional programs. If the students choose and are admitted they may continue on into the third two-year segment terminating in one of a number of professional master's degrees.

Before applying to the College of Architecture and Urban Planning program, (the second two-year segment), it is necessary to take CAUP 200 at the UW. This course can be taken through the University Extension Program prior to gaining admission to the university proper, or can be taken in the sophomore year on campus.

Application to the CAUP B.A. program is made at the junior level with an expectation of two years or 90 additional credits taken before receiving the B.A. The College B.A. program provides the student with a sound basis for entry into the College's professional programs (the final two years). Also, because the minimum core program has been reduced to 45 credits, the remaining 45 credits can be organized at the student's discretion. In this way the student can prepare himself or herself for a much wider array of possible professional or master programs. The possibility of mixing courses, although they do not lead to any existing advanced program, allows students to establish a background for some as yet unheard of future combinations: Architecture and Marine Science, Urban Design and Horticulture, or M.B.A. and Design. With the completion of these 90 credits, the student receives the College's B.A. and can choose to apply to the last two year segment or to another program entirely.

The third two-year segment is necessary if the student is preparing for any of our current professional master degrees offered in the College.

The program requires the satisfactory completion of 180 credits of course work in the following three categories:

- Liberal Arts Background (90 credits)
- Interdisciplinary Core Program (45 credits)
- Pre-Professional Concentration (45 credits)

Liberal Arts Distribution

1. To be completed prior to admission to the College of Architecture and Urban Planning:

Credits	
5	English composition
20	Humanities
20	Social sciences (to include ENV S 205)
15	Natural sciences (to include ENV S 203)
15	Mathematics sciences (to include MATH 124 or 157)
<hr/> 75	

2. To be completed prior to graduation:

<hr/> 15	Additional liberal arts electives
90	

In fulfilling the requirements above, students must include the following:

2 courses from the University "W" list, for a minimum of 6 credits

2 or 3 linked sets from the Arts & Sciences list to include one natural science set, for 18 credits.

Admission Requirements

1. Junior standing (90 or more credits completed).
2. Course requirements.

Credits	
75	Liberal arts component (see above)
9	CAUP 200
6	Electives
<hr/> 90	

3. Acceptance by the Program Admissions Committee. While the cumulative grade-point average is an important admissions evaluation factor, the committee will place emphasis on evaluation of performance in those Bachelor of Arts core courses the student has taken. It is to the student's advantage to take as many of these courses as possible before applying. An application portfolio is required. Majors normally will be admitted in

Autumn and Spring quarters. (Application deadlines are January 15 for Spring Quarter and May 15 for Autumn Quarter.)

Interdisciplinary Core

This 45-credit component provides course work in introductory environmental design knowledge and beginning skills development. It comprises two parts:

Core courses. There are seven required courses for a total of 36 credits.

Core distribution electives. There are 9 credits required. They are distributed over two subject areas. The student must take a minimum of one course from each area.

A listing of short descriptions of the seven core courses follows, as does a list of core distribution electives identified by subject area.

Core Requirements

CAUP 200, 270, 300, 301, 340, 401, and 470.

Core Distribution Electives

History and theory (6 credits required): ARCH 350, 351, 352, 460; B CON 350; URBDP 410, 460, 461, 471; L ARC 352, 353, 361.

Policy, law, and professional roles (3 credits required): B CON 301, 480; CAUP 380, 475; ENV S 481; LAW 442; L ARC 473; URBDP 300, 340, 401, 481.

Preprofessional Studies

Professional Group Electives: This 45-credit component allows the student to pursue course work in areas of personal interest as well as to formulate a beginning program in chosen professional areas. Electives will be drawn from the various departmental offerings of the College of Architecture and Urban Planning and other departments as appropriate.

Current opportunities include majors in design and planning studies, architectural studies, planning studies, urban design studies, construction studies, facilities management studies, interior design studies, architectural history studies, and landscape studies.

Advising

Advising for program premajors will be done by the College of Arts and Sciences advising office, and advising for majors will be provided by the program director and program faculty adviser in the College of Architecture and Urban Planning.

Graduation Requirements

Satisfactory completion of 180 credits with a minimum grade-point average of 2.50 that include 90 liberal arts credits, 36 core credits, 9 core elective credits, and 45 credits in upper-division approved electives.

Preprofessional

Course Descriptions

CAUP 200 Introduction to Environmental Design and Planning (9) ASpS Laboratories, lectures, demonstrations introducing basic curricular elements. Development of basic skills in methods and graphic expression of design and planning process—analysis, synthesis, evaluation in building technology; simulation, modeling; person-environment relations; history; theory; policy; professional roles. Prerequisites: ENV S 204 and 205 or permission of program director.

CAUP 270 Computers in Environmental Design and Planning (3) AWSpS Laboratories, lectures, and demonstrations that introduce computing in environmental design and planning, as well as a survey of the

primary elements of computing in general. Basic skills development in text and word processing, data-base management; two- and three-dimensional graphics; land-use mapping and modeling; spread-sheet analysis, utilizing VAX, CDC, and microcomputer systems. Prerequisites: ENV S 204 and 205 or permission of program director.

CAUP 300 Environmental Design and Planning I: Visual (6) ASp Laboratories, lectures, and demonstrations in the perception of visual qualities, in the principles of visual structure and organization, and in the fundamentals of the design process. Prerequisites: 200 and 270 or permission of program director.

CAUP 301 Environmental Design and Planning II: Technology (6) AW Laboratories, lectures, and demonstrations in the technological foundations of the design and planning process. Prerequisite: 300 or permission of program director.

CAUP 340 People-Environment Relations (3) W Dynamics of people-environment interactions. An appropriate spectrum of environmental scales will be addressed, building on practical and empirical work of several faculty members in the college. Prerequisite: ENV S 205.

CAUP 380 Technology of Urban and Regional Development (3) Sp Lectures and demonstrations in the technological, economic, and social determinants of urban development patterns. Survey of basic knowledge and technology of physical infrastructure systems, urban public facilities, and community energy considerations. Prerequisites: ENV S 203, 205.

CAUP 401 Environmental Design and Planning III: Interdisciplinary (6) AW Laboratories, lectures, and demonstrations in the integration of the architecture, landscape architecture, and urban design and planning disciplines in a design studio problem-solving format. Prerequisite: satisfactory completion of pre-professional bachelor of arts program core course requirements or permission of program director.

CAUP 470 Society and Environmental Design and Planning Policy (3) W Historical evolution of national environmental policies. Institutional and legal frameworks, nature and value of policy, and process of community/society decision making at all scales. Faculty members from various departments. Prerequisites: ENV S 204, 205.

CAUP 475 The Environmental Design and Planning Professions (3) An analysis of the roles and mutual support of professions focusing on environmental design and planning, and relationships with other professions dealing with aspects of this activity. Competence and training needed by each of these, ethics that inform these professions, and typical careers of persons working in each of them. Guest lecturers include practicing professionals.

CAUP 486 Practical Experience (3-6, max. 6) AWSpS Unpaid work-study course in cooperation with local professional offices. On-location study of various aspects of professional practice under the supervision of a firm or agency involved in any aspect of environmental design, planning, management. Prerequisite: upper division standing.

CAUP 488 Special projects (1-12, max. 12) Instructor-initiated and college-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter. Entry code required.

Architecture

208 Gould

The Department of Architecture serves two roles at the University: it offers the Master of Architecture degree,

the only professional architectural degree, and it is a collaborator with other departments in the college undergraduate degree program. The professional program is based on the architect's need to be a generalist who is well-rounded in the liberal arts, who possesses a full command of the practical arts of the profession of architecture, and who can assume an enlightened, responsible, and creative role in society. The curriculum embodies a range of both broad and focused courses that cover the many and various aspects of architecture: design, graphics, structural engineering, building sciences, history, theory, ecology, sociology, psychology, law, and professional practice. The faculty comprises a large and diverse group of teachers, practitioners, scholars, and researchers, who represent a wide spectrum of background, experience, and viewpoints. Thirty-five permanent faculty members are supplemented by dozens of part-time professional practitioners from the region and around the country, as well as by exchange scholars and foreign institutions. A design graphics laboratory, photography laboratory, lighting application laboratory, and shop, which are described in the departmental brochure, are staffed by the department.

The department is responsible for a broad subject area, offering an intensive core of required courses, studios, and thesis and a wide array of elective courses. Seattle and its region serve as a laboratory for design and research in most studios, as well as in some lecture courses and seminars. In addition to this focus, there is a theme for each of the three years of the M.Arch. degree program. Year one is "the dwelling place"; year two, "the public realm"; and year three, "the rich panoply." Support courses in theory, building science, and person-environment relations are integrated with studio in year one. Support courses in preservation design, urban design, and interior design enrich a three-quarter studio sequence in these three subjects in year two. Elective studios and courses are offered in year three. These themes not only help to clarify the student's experience, but also to ensure a wide and coherent variety of design problems and instructors. Year three is followed by the master's thesis on a research or design topic of the student's choice, culminating in a public presentation to the faculty and guests.

Undergraduates preparing for a graduate professional architecture program here or elsewhere may apply for the undergraduate degree program offered by the college. Students interested in applying for two-year graduate professional architecture programs take most of their electives, including design studios, within the Department of Architecture.

The Master of Architecture (M.Arch.) degree is the only degree offered by the Department of Architecture. Completion of the requirements of this nationally accredited degree program satisfies the usual educational requirement for licensing (registration) as an architect. The program accommodates three groups of undergraduate-degree holders: (1) persons holding a preprofessional four-year degree, such as the college's Bachelor of Arts with a concentration in architectural studies, (2) persons holding an undergraduate degree in a field other than architecture, (3) persons holding a professional degree such as a five-year Bachelor of Architecture. The program varies in duration and specific course work required, depending on the student's prior academic and professional experience and whether the student elects to pursue a Certificate of Achievement in Urban Design or Preservation Design.

Candidates with a preprofessional four-year degree, such as Bachelor of Arts (in architecture) or the equivalent, usually undertake six full-time quarters of study plus completion of a thesis for the M.Arch. degree. This program typically requires 99 credits of course work, including 36 of design studio, 36 of approved core courses, 9 of thesis, and 18 of electives. Special interests and certificate programs often can be accommodated within the 18 credits of electives and design studio options. Students are reviewed for satisfactory

progress in their first year, and some may be required to take additional studio(s) or other course work.

Persons holding degrees in other fields normally undertake three quarters of preparatory course work to develop knowledge and skills equivalent to those of students who enter the program from undergraduate architecture programs. Some entering students are required to take courses during the summer quarters prior to matriculating as well as additional preparatory studio(s). Upon completion of preparatory course work, the students merge with students in the two-year program described above.

Persons holding a five-year Bachelor of Architecture professional degree (or M.Arch. degree) who desire to do postprofessional study or research may enroll with advanced standing in the Master of Architecture program. This program can usually be completed in four quarters and requires 45 credits, including thesis.

Students are admitted to the program in architecture only in Autumn Quarter. All application materials should be received by the department no later than the preceding January 1. Notices of admission are mailed in early April. The prospective applicant should note that Graduate Record Examination general test scores, three letters of recommendation, transcripts of previous degree programs and of additional academic study, a letter of intent, and a portfolio of work in some field or aspect of art, craft, or design are required as part of the application. Incomplete applications and those received after January 1, are not considered by the admissions committee.

The Certificate of Achievement in Urban Design, administered by the Department of Urban Design and Planning (see college description), is a specialized graduate-level option available to students in the Master of Architecture degree program. It is awarded to students who complete a required curriculum necessary for a firm grounding in history, theory, methods, case studies, and practical skills in urban design. The option emphasizes process and problem solving, including abilities to analyze problems and opportunities, to develop and evaluate alternative concepts, and to manage implementation strategies.

The department also offers a Certificate of Achievement in Preservation Design as a specialization within the Master of Architecture curriculum. This option is not only designed to promote an understanding of historic buildings but also to develop skills in designing new structures and adapting existing structures within historic districts. It seeks to prepare professionals skilled in dealing with historically important issues rather than restorations or historic preservationists *per se*.

The department offers the architecture in Rome program at the Palazzo Pio, described under Center for Italian Studies. Students may study for one or two quarters in Rome with departmental faculty members and guests. A summer program on Italian hill towns at Civita di Bagnoregio also is offered.

Financial Aid

Each Spring Quarter, the department awards many scholarships and assistantships that apply to the following academic year. These are more typically available to students already enrolled in the program in architecture at the time of the awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School Fellowship Division and the Financial Aid Office in Schmitz Hall.

Herrman, Arthur P., 1923, (Emeritus), B.Arch., 1921, Carnegie Institute of Technology.

Hildebrand, Grant,* 1964, (Drama), (Art), † M.Arch., 1964, Michigan; history, preservation design, design process.

Jacobson, Phillip L.,* 1962, (Urban Design and Planning), † M.Arch., 1969, Finnish Institute of Technology (Helsinki); design, professional practice.

Johnston, Norman J.,* 1960, (Emeritus), (Landscape Architecture, Urban Design and Planning), † M.C.P., 1959, Ph.D., 1964, Pennsylvania; urban design, history.

Kelbaugh, Douglas S.,* 1985, M.Arch., 1972, Princeton; design, energy conservation, professional practice, theory.

Kippenhan, Charles J.,* 1963, (Emeritus), ‡(Mechanical Engineering), M.S.M.E., 1946, Ph.D., 1948, Iowa; energy conservation in buildings, heat ventilating and air conditioning, heat transfer, fluid mechanics.

Kolb, Keith R.,* 1952, M.Arch., 1950, Harvard; design, professional practice.

Lovett, Wendell H.,* 1948, (Emeritus), M.Arch., 1948, Massachusetts Institute of Technology; design.

Moudon, Anne Vernez,* 1980, (Landscape Architecture, Urban Design and Planning), † Dr.èsSc., 1987, École Polytechnique Fédérale de Lausanne (Switzerland); urban design, city form and neighborhood studies, design research.

Nyberg, Folke E.,* 1969, (Scandinavian Languages and Literature), (Urban Design and Planning), † M.Arch., 1960, Yale; theory, urban design, professional practice.

Pundt, Hermann G.,* 1968, (Art), † M.A., 1960, Illinois; Ph.D., 1969, Harvard; history, historical preservation.

Schneider, Raymond C.,* 1964, (Emeritus), (Education), M.S., 1952, Kansas State; Ed.D., 1955, Stanford.

Seligmann, Claus A.,* 1964, Dipl.Arch., 1950, London Polytechnic Institute; design, design process, theory.

Small, Robert E.,* 1965, (Emeritus), (Landscape Architecture), † M.Arch., 1955, Oregon; design for elderly disabled, housing, site planning, design process.

Staub, Christian, 1967, (Emeritus), Certificate, 1944, Switzerland; photography.

Streissguth, Daniel M.,* 1955, (Emeritus), M.Arch., 1949, Massachusetts Institute of Technology; design process.

Thiel, Philip,* 1961, (Urban Design and Planning), † M.S.Nav.Arch., 1948, Michigan; visual design, design process, person-environment relations, experiential notation.

Varey, Gordon B.,* 1962, (Building Construction), † M.Arch., 1966, California (Berkeley); building technology and construction, professional studies, research.

Zarina, Astra,* 1964, (Urban Design and Planning), † M.Arch., 1955, Massachusetts Institute of Technology; design, foreign studies.

Associate Professors

Albrecht, Robert G.,* 1960, M.S.C.E., 1960, Massachusetts Institute of Technology; structures.

Alden, Richard S.,* 1961, M.Arch., 1960, Yale; Ph.D., 1971, Pennsylvania; design process, environment/behavior, research, photography.

Clausen, Meredith L.,* 1979, (Art History), † M.A., 1972, Ph.D., 1975, California (Berkeley); ethics and contemporary architecture.

Curtis, J. William,* 1962, (Emeritus), M.A., 1969, Washington; design process.

Deines, Katrina,* 1985, M.Arch., 1979, Washington; design, theory, foreign studies.

Donnette, James J.,* 1966, M.Arch., 1969, Washington; graphics, design.

Goldblatt, Steven M., 1982, ‡(Building Construction, Education, Civil Engineering), J.D., 1977, Golden Gate; law for architects.

Heerwagen, Dean R.,* 1975, M.S., 1967, B.Arch., 1971, Massachusetts Institute of Technology; environmental controls (passive and active).

Hill, Warren T.,* 1959, M.A., 1961, New York; interior design, design, history.

Kiyak, Asuman H.,* 1977, ‡(Oral and Maxillofacial Surgery, Psychology), M.A., 1974, Ph.D., 1977, Wayne State; gerontology, geriatric dentistry, behavioral aspects of health care.

LaTourelle, Elaine D.,* 1975, M.Arch., 1964, Yale; design, professional practice.

Lebert, Edgar A., 1967, M.S., 1967, Washington; structures.

Loveland, Joel E.,* 1985, M.Arch., 1980, California (Los Angeles); energy conservation, design, research.

Miller, David E., 1989, M.A., 1972, Illinois; design, professional practice.

Millet, Marietta S.,* 1976, M.Arch., 1972, Massachusetts Institute of Technology; illumination, environmental controls.

Minah, Galen F.,* 1970, M.Arch., 1968, Pennsylvania; design process, design, professional practice.

Pyatok, Michael, 1990, M.Arch., 1967, Harvard; design, low-income housing.

Rohrer, John A., 1948, (Emeritus), B.Arch., 1937, Washington.

Rolfe, George R.,* 1984, (Building Construction, Urban Design and Planning), † M.Arch., 1968, M.P.H., 1968, Pennsylvania; management, development, and history.

Rosner, Arnold S.,* 1966, M.S.C.E., 1949, California Institute of Technology; design process, building technology, computers.

Ryan, Dennis M.,* 1975, (Urban Design and Planning), † M.A., 1968, Ph.D., 1976, Pennsylvania; urban design and planning, community design principles and practice, urban change and continuity.

Sasanoff, Robert,* 1963, M.C.P., 1968, California (Berkeley); design process, person-environment relations.

Sproule, John, 1948, (Emeritus), B.Arch., 1934, Washington; architecture.

Streatfield, David C.,* 1971 (Landscape Architecture, Urban Design and Planning), † M.L.A., 1965, Pennsylvania; regional landscape planning, environmental history, landscape studies, preservation and theory.

Assistant Professor

Mohler, Richard E., 1986, M.Arch., 1984, Pennsylvania; design.

Lecturers

Ching, Francis D. K., 1985, (Landscape Architecture), B.Arch., 1966, Notre Dame; design.

Dee, Jennifer, 1985, M.Arch., 1984, Washington; theory, community design.

Johnson, Brian R., 1980, M.Arch., 1981, Washington; computer graphics, computer applications, CAD systems.

Ochsner, Jeffrey,* 1988, M.Arch., 1976, Rice; design, history, preservation.

Onouye, Barry S., 1969, M.S.C.E., 1969, Washington; structures, design.

Vanags, Andris, 1976, B.F.A., 1968, Washington; building science, design.

Williams, Roger B., 1976, M.Arch., 1969, Washington; design.

Wright, David, 1986, B.Arch., 1957, Washington; professional practice.

Zuberbuhler, Douglas R.,* 1968, M.Arch., 1968, Washington; graphics, design.

Course Descriptions

Some aspects of the program, including course numbers and content, may change after the printing of this catalog. The department may be contacted for updated information.

Courses for Undergraduates

ARCH 150, 151 Appreciation of Architecture I, II (2 or 3, 2 or 3) ASp,WS *Bosworth, Pundt* Historical survey of the architecture of Western civilization. For nonmajors.

ARCH 250 American Architecture and Urban Environments (2) *Pundt* Study and critical investigation of architecture and the problems of urban design in North America from colonial times to the present. For nonmajors.

ARCH 302 Architectural Design I (6) WSp *Dee, Delnes, Mohler* Studio problems in dwelling design, with emphasis on regionalist building typology and on design methodologies. Prerequisites: 310 and 311. Entry code required.

ARCH 303-304-305 Introduction to Architectural Design I, II, III (6-6-6) A,W,Sp Studio problems that develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design; emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields. Prerequisite: first-year student standing in three-year M.Arch. program. Entry code required.

ARCH 310 Graphic Visualization and Representation (3) AWSpS Lectures and laboratory exercises in concepts, conventions, and techniques of graphic visualization and representation in the design of professions: lettering, drafting, multi-view projection, axonometric projection, oblique projection, descriptive geometry, and topographical drawings. Entry code required.

ARCH 311 Graphic Simulation and Presentation (3) AWSpS Lectures and laboratory exercises in concepts and techniques of graphic simulation and presentation of design precepts: perspective projection and sun and shadow. Prerequisite: 310. Entry code required.

ARCH 312 Design Graphics Laboratory (3) AWSp Lectures and laboratory exercises as a continuation of the design graphics laboratory with emphasis on advanced graphics specific to particular design majors. Prerequisite: 311. Entry code required.

ARCH 313 Introduction to Architectural Photography (2) AWSpS Basic elements and processes of architectural photography to include: camera controls, exposure technique, and photo processing. Student must provide own camera with lens, shutter, and aperture controls.

ARCH 314 Introduction to Architectural Drawing (2) AWS Skill development in conceptualization of forms and their relationships through observation and recording in freehand graphic manner. The course deals with proportion, scales, light effect, value texture, and various perspective techniques. Entry code required.

ARCH 315 Architectural Sketching (2) Skill development in conceptualization of forms and their relationships through observation and recording in freehand graphic manner. Deals with proportion, scales, light effect, value, texture, and various perspective techniques. Prerequisites: 314 and permission of instructor.

ARCH 320 Introduction to Structures I (3) *Albrecht, Lebert, Onouye, Ratti* Statics and strength of materials. Entry code required.

ARCH 321 Introduction to Structures II (3) Design of structural elements in timber and steel.

ARCH 322 Introduction to Structures III (3) Building framing systems; wind and seismic loads, long-span structures.

ARCH 330 Construction Materials and Techniques I (3) *Vanags* Fundamentals of building construction with emphasis on wood structures. Laboratory exercises designed to develop student intuition and understanding of how tools, materials, and structure interact in building design and construction.

ARCH 340 People-Environment Interactions (3) Lecture/discussion on the dynamics of people-environment interactions. A spectrum of environmental scales and cultural contexts addressed. Builds on the theoretical and empirical work in the field and relates to studio design work in 305.

ARCH 350 Architecture of the Ancient World (3) A *Bosworth* Architectural history in the Western world from beginnings to A.D. 550.

ARCH 351 Romanesque, Gothic, and Renaissance Architecture (3) W *Hildebrand* Architectural history in the Western world from A.D. 550 to 1750.

ARCH 352 History of Modern Architecture (3) *Pundt* Architectural history in the Western world from 1750 to the present.

ARCH 360 Introduction to Architectural Theory (3) Function of architectural theory in comprehending and ordering various human purposes in architecture, types of architectural purpose, types of theories. Current concerns.

ARCH 400 Architectural Design II (6) ASp Various studio problems in nonresidential building design to develop basic skills in the synthesis and integration of building form. Prerequisite: 302.

ARCH 402 Architectural Design III (6) In this course, the student chooses from among many separate sections that introduce particular architectural design theories and methodologies. Focus and format vary. Prerequisite: CAUP 401.

ARCH 403 Architectural Problems (6) AWSpS Entry code required.

ARCH 409 Color at the Concept Level in Design (3) WSp *Hill* Simple processes of color presentation researched and developed for use as communication. Designed to make color available early in design development and make it integral with all other aspects of design.

ARCH 410 Architectural Working Drawings (2-3) Lectures and optional laboratory exercises focusing on the content, organization, and conventions commonly used in preparing working drawings for the building industry, specifically in relation to the other contract documents, construction practices, and legal considerations. Prerequisite: 310.

ARCH 411 Computer Graphics Applications (3) AWS *Johnson* Lectures and hands-on laboratory experience that focuses on learning to use general purpose graphics software, including VISIT, the MOVIE.BYU programs and AutoCAD.4. Prerequisite: CAUP 270.

ARCH 412 Architectural Illustration and Presentation (3) *Zuberbuhler* Issues, conventions, and techniques used in architectural renderings: line drawings, shaded drawings, use of color, composition, organization, advanced perspective, scale figures, entourage, reflections, and media. Prerequisite: 311.

ARCH 413 Architectural Photography Projects (2) AWSp Projects involving the study of illumination and perspective as related to the representation and perception of space, form, color, texture, pattern, and scale of architectural subjects. Student must provide own camera with lens, shutter, and aperture controls. Prerequisite: 313.

ARCH 414 Freehand Drawing (3) *Thiel* Introduction, emphasizing accurate observation of visual qualities of a variety of forms and an experimental approach to their coherent freehand representation using uncorrected contour line.

ARCH 415 Architectural Sketching (3) Exercises in freehand representational drawing using charcoal, graphite, and conte crayon with emphasis on line, proportion, values, composition. Studies progress from geometric to nongeometric forms.

ARCH 418 Watercolor Drawing (3) ASp Introduction to the principles and practice of using transparent watercolor for the naturalistic representation of objects, people, and interior and exterior space. Prerequisite: 414.

ARCH 420 Structural Design I (4) A Reinforced concrete fundamentals. Prerequisite: 322.

ARCH 421 Structural Design II (4) W Design of steel structures.

ARCH 422 Structural Design III (4) Sp Design of reinforced concrete structures.

ARCH 426 Structural Unit Masonry (3) S *Lebert* Structural behavior and design of reinforced brick, tile, and unit masonry structures. Joint with CESM 487. Entry code required.

ARCH 430 Materials and Processes (3) A *Vanags* Lectures, field trips, and laboratory sessions directed toward the nature, potentials, and limitations of a variety of materials (wood, metal, plastics, inorganic cementing materials, minerals, rocks, and clay) and the processes involved with their production, fabrication, and system compatibility. Entry code required.

ARCH 431 Environmental Controls (3) A *Heerwagen, Loveland* Description of thermal comfort needs and the means by which buildings can be designed to satisfy those needs. Consideration of how climate determines building forms, site analysis and planning vis-à-vis the local climate, basic heat transfer mechanisms, and design strategies for overcoming heat loss through the building envelope. Entry code required.

ARCH 432 Construction Materials and Techniques II (3) *Schneider* Survey of construction materials and techniques of steel, masonry, and concrete buildings. Prerequisite: 330 or CAUP 301. Entry code required.

ARCH 433 Active Control Systems for Building Operation (3) *Heerwagen* Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings; descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and other short cuts for anticipating system design and use. Prerequisite: 431.

ARCH 435 Principles and Practices of Environmental Lighting (3) *Millet* Perception-based approach to the principles of natural and artificial lighting; practical considerations of lighting involving environmental evaluations, calculations and the use of lamps and fixtures; sketch and model studies for applications; impact of lighting design on energy conservation; relation of lighting design process to architectural design concepts. Prerequisite: 431.

ARCH 436 Building Acoustics (3) *Heerwagen* Description of principles and practices for manipulating and enhancing sound in buildings. Information about sound behavior and the organization of architectural elements (deployment of design features, including various geometries and materials) for the control of sound in enclosed spaces and between adjacent spaces. Entry code required.

ARCH 437 Passive Thermal Controls (3) *Heerwagen* Devices for achieving energy-efficient buildings, analytic methods for evaluating likely thermal performances of buildings and building envelopes, resistance and capacitance of building materials, air flow through and around buildings, energy codes and industry standards, and strategies for integrating analytic techniques and guidelines into architectural design process. Prerequisite: 431.

ARCH 439 Light Frame Building Assemblies (3) *Vanags* Fundamentals of light-frame construction from soils examination, foundation systems to framing systems, and the integration of electrical, plumbing, and heating/cooling into the structure. Prerequisite: College of Architecture and Urban Planning major or permission of instructor.

ARCH 443 Experiential Design Notation (3) *Thiel* Lectures, seminars, and studio/field studies in philosophy, theory, and practice of intervention in the physical environment for socially preferred human experiences. Entry code required.

ARCH 445 Environmental Design Research Through Photography (3) *Alden* Photographic approach to collection, analysis, and presentation of visual information relevant to design and evaluation of built environments. Case studies, lectures, and class discussions on technical, social, psychological, and visual aspects of environmental design problems, followed by individual and team photographic projects resulting in completed visual or audiovisual presentations.

ARCH 447 Physical Structure and Human Interactions (3) *Sasanoff* Effect of physical structure on human interaction.

ARCH 449 Designing Environments for the Elderly (3) Introduces students of design disciplines to gerontology and considerations necessary in designing for an aging population. Entry code required.

ARCH 452 Characteristics of Puget Sound Architecture and Towns (3) *Hildebrand* Puget Sound architectural and town environment in terms of its historical development, but specifically including recent and pending changes affecting this environment in significant ways. Entry code required.

ARCH 454 Greek Architecture (3) *Sp Langdon* Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Joint with ART H 446 and CL AR 446. Entry code required. (Offered alternate years.)

ARCH 455 Special Studies in Gothic Art and Architecture (3) *Hildebrand* Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Joint with ART H 455. Entry code required.

ARCH 458 South Asian Architecture (3) Introduction to South Asian architecture, its generating forces,

parameters, and consequent environments. Entry code required.

ARCH 460 Design Theory and Analysis (3) *Dee, Minah, Seligman* Problematical nature of philosophies of architecture; interaction of philosophical concepts and architectural form and expression. Fundamentals of architectural criticism. Entry code required.

ARCH 461 Recent Developments in Architectural Theory (3) Concentrates particularly on developments that spring from recent work in the epistemology of science and in philosophy. Entry code required.

ARCH 478 Architectural CAD Systems (4) *WSP Johnson* Development, use, and limitations of architectural computer-aided design systems in the professional office. Lectures, readings, and exercises utilizing the college's CAD system as well as other computers. Prerequisites: 411 and CAUP 270.

ARCH 488 American Architecture (3) *Clausen* American architecture from the seventeenth-century colonial period to the present. Emphasis on architects and buildings, including feature of urban development. Joint with ART H 488.

ARCH 493 Rome Preparation Seminar (2) Seminar dealing with history, culture, topography, and customs of Rome, Italy. Required for students enrolling in 495, 496, or 497.

ARCH 495 Architectural Studies Abroad (9) Urban history and development of the city of Rome through first-hand studies of its topography and morphology. City's more recent quarters become subject of group research relative to problems and potentials of growth and future development. Students may be registered concurrently in an appropriate studio section. Prerequisite: 493. Entry code required.

ARCH 496 Architectural Studies Abroad (9) Studio-oriented projects and application of experience gained during preceding program. Seminars held in collaboration with Italian students, professionals, and educators. Prerequisite: 495.

ARCH 497 Italian Hilltowns (9) *S Zarina* Introduction to origins and development of built forms prevalent in the hilltowns of central Italy, a comparative analysis of domestic architecture in the agricultural context of the confluence zone of Tuscany, Umbria, and Latium and a historical survey of fortresses, castles, palaces, villas, and gardens of upper Latium. Prerequisite: 493. Entry code required.

ARCH 498 Special Projects (1-12, max. 12) *AWSPs* Instructor-initiated and department-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter. Entry code required.

ARCH 499 Undergraduate Research (1-6, max. 6) *AWSPs* Entry code required.

Courses for Graduates Only

ARCH 500-501-502 Architectural Design Studio (6-6-6) *A,W,Sp* Architectural design, with emphasis on development of professional skills in design synthesis. Specific focus on preservation design (500), urban design (501), and interior design (502). Prerequisite: 305. Entry code required.

ARCH 503-504-505 Architectural Design Studio Options (6-6-6) *A,W,Sp,S* Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: 502.

ARCH 506 Advanced Architectural Studies (6) *AWSPs* Advanced experimental studies dealing with significant architectural relationships that involve scholarly investigation, development, and presentation of results. Entry code required.

ARCH 520 Advanced Wood Structures Design (3) *Albrecht* Design methods related to wood structures. Nature of wood as a building material, plywood, glued laminated wood structures, timber piles and pile foundations, pole buildings and conventional wood building framing. Entry code required.

ARCH 521 Structural Design Through Model Studies (3) *Albrecht* Theory of models, dimensional analysis, direct model analysis; studies employing specific materials, techniques of testing and measurement. Joint with CESM 477. Entry code required.

ARCH 522 Skin-Resistant Structures (3) *Albrecht* Resistance mechanisms, structural systems employing plates, folded plates, shells, and membranes with applications to the structural design process. Entry code required.

ARCH 535 Graduate Seminar, Study Topics in Environmental Lighting (3) *Millet* Focus on individual student projects involving research and design for lighting. Entry code required.

ARCH 551 Scandinavian Architecture of the Nineteenth and Twentieth Centuries (3) *Nyberg* Introduction to the contribution of Scandinavian architecture to early functionalism with emphasis on its relationship to neoclassicism and vernacular architecture.

ARCH 553 Special Studies in Architecture in the Ancient World (3) *Bosworth* Study and critical analysis of a selected topic from classical or preclassical periods. Prerequisite: 350.

ARCH 554 Special Studies in Modern Architecture (3) *Pundt* Study and critical analysis of a selected number of distinguished professionals (architects, planners, educators, critics) and their contributions to the evolution of modern and contemporary architectural practice and thought. Entry code required.

ARCH 556 History of Chicago School Architecture (3) *Pundt* Study and critical investigation of the contribution of major architects in Chicago, the Midwest, and the West Coast from circa 1870 to 1920. Entry code required.

ARCH 557 Neoclassicism and Romanticism in Europe and America (3) *Pundt* Study and critical investigation of European and American architecture and urban design from 1750 to 1850. Entry code required.

ARCH 558 Seminar in Twentieth-Century Architecture (3 or 5) Specific focus changes from quarter to quarter. Joint with ART H 591. Prerequisite: graduate standing with background in architecture, architectural history, or permission of instructor.

ARCH 559 American Utilitarian Architecture (3) *Hildebrand* Significant American environmental design efforts arising from utilitarian needs (e.g., factories, bridges, skyscrapers, and associated technical building innovations). Entry code required.

ARCH 560 Graduate Seminar on Architectural Theories (3) *W Dee, Nyberg, Seligmann* Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism. Entry code required.

ARCH 561 Urban Design Theory (3) *Nyberg* Theories of nineteenth- and twentieth-century urban design; closely parallels directions in architecture and urban planning. Theoretical premises of these movements related to current practices of urban design in various sociopolitical contexts, European and American. Evolutionary nature of theory. Prerequisite: previous classes in environmental history or permission of instructor.

ARCH 571 Project Feasibility (3) *Wright* Social, political, and economic factors affecting the location, design, financing, construction, and marketing of buildings.

ARCH 572 Specifications and Contracts (3) *Brown* Detailed organization and composition of contracts, specifications, and related contract documents.

ARCH 573 Professional Practice (3) Sp *Ochsner* Operation of an architectural office and professional practice. Entry code required.

ARCH 574 Law for Architects and Engineers (3) *Sp Goldblatt* Legal issues facing architects and engineers, focusing on liability avoidance. Topical areas include basic doctrines, the design professional/client relationship, the construction process, and professional practice problems. Entry code required.

ARCH 577 Design Development (3) Lectures and drafting room practice emphasizing development phase of contract documents. Entry code required.

ARCH 580 History of Historic Preservation in Europe (3) *Pundt* European achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

ARCH 581 Historic Preservation of Architecture, U.S.A. (3) *Pundt* American achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

ARCH 582 Technical Issues in Preservation Design (3) *Murphy* Issues, practices, and procedures involved in preservation and reuse of old and historic buildings; technical and esthetic means by which practicing professionals approach analysis, interpretation, and resolution of problems such work creates. Recent and local projects and related experiences. Entry code required.

ARCH 593 Residential Design: Methods and Practices (3) Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods and practices. Joint with URBPD 574.

ARCH 594 Health Facilities Planning (3) Examination of the organization and execution of the total planning process for health-care facilities, with individual parallel studies in selected topics. Entry code required.

ARCH 596 Fieldwork in Professional Practice (*, max. 9) *Donnette, Kelbaugh, Loveland, Zuberbuhler* On-location study under the supervision of a practicing professional involved in an aspect of environmental design. Offered on credit/no credit basis only. Entry code required.

ARCH 598 Special Topics for Graduate Students (1-6) AWSp Systematic study and offering of specialized subject matter. Topics vary and are announced in the preceding quarter. May be repeated for credit. Entry code required.

ARCH 600 Independent Study or Research (*) AWSps Offered on credit/no credit basis only. Entry code required.

ARCH 700 Master's Thesis (*) AWSps Offered on credit/no credit basis only. Entry code required.

Building Construction

116 Architecture

The goal of the Department of Building Construction is to provide education that will prepare individuals (1) to be motivated, well-rounded, responsible citizens and (2) to assume technical positions, senior levels of management, or business ownership in construction, development, and related industries.

The educational program focuses on four areas: (1) courses providing the broader perspectives of humanities and social and natural sciences, (2) course work that develops self-discipline and analytical and reasoning skills, (3) courses that develop technical skills necessary to define and solve practical construction problems, and (4) course work to build the managerial skills necessary to make sound decisions and to implement those decisions on prudent, timely, and legal bases. An ability to communicate clearly and concisely, with sensitivity to human relations, is essential to the successful completion of this academic program.

The core curriculum is concentrated in the upper division during a typical student's junior and senior years. The combination of courses provides a unique interdisciplinary experience with proven effectiveness in educating managers to be dynamic leaders.

The department's faculty comprises an unusual mix of permanent members with part-time professional practitioners. Including many firms' principals, these contractors, architects, engineers, attorneys, and others also serve as advisers to the department and help shape the program to respond to a changing society.

Founded in 1968, the department is a member of the Associated Schools of Construction.

Undergraduate Program

Bachelor of Science in Building Construction Degree

Because the number of applicants is large and the department's resources are limited, the process of admission is very selective. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation.

Full-time students receive priority over part-time students. The department strongly urges ethnic minorities and women to apply for admission.

Applicants must contact the department to obtain its individual application form and prospectus, which contain details of requirements for admission and continuation. Closing date for receipt of applications by the department is April 1; however, the University admissions application form and its accompanying material must be filed separately at the admissions office much earlier than the department's closing date. Selection for acceptance into the program, which begins Autumn Quarter, is made each year by early May, and all applicants are notified of the admissions committee decision shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year.

The first two years of the program can be completed at the University as a premajor in the College of Arts and Sciences or at other four-year institutions or community colleges. Consult the departmental prospectus for details about prerequisite courses.

The program is fully accredited by the American Council for Construction Education.

Graduation Requirements

The Bachelor of Science in Building Construction degree program requires completion of the four-year curriculum with (1) a minimum of 188 applicable credits, (2) a minimum of 2.50 cumulative grade-point average in required upper-division core courses, and (3) a minimum of 2.30 cumulative grade-point average in a student's final six quarters. The last 45 credits must be earned as a matriculated student in residence at the University. Consult the departmental prospectus for details.

Enriched Undergraduate Program

Students are encouraged to explore the major through an alternative, "enriched" program built on a stronger

foundation of liberal arts and environmental design and planning. By initially completing the college's Bachelor of Arts degree program and gaining admission to the department, a student can complete the B.S.B.C. degree program in one additional academic year. Having earned no fewer than 225 applicable credits, a student can graduate with both degrees at the end of five years. Consult the departmental prospectus or the B.A. degree program prospectus for details.

Construction Practice

Although an internship is not required for completion of the degree program, every student is encouraged to seek summer employment in the building industry. This work experience lends reality to later, practice-oriented courses and sharpens the student's perceptions of developing perspectives. Part-time positions during the academic year often are available to those students who also meet class-related responsibilities.

The department offers to a limited number of its qualified students a formal work/study program with participating contractors. A student receives upper-division elective credits for successfully completing B CON 496 (Construction Practice) during the Summer Quarter following at least one academic year in the program.

Correspondence and Information

116 Architecture, AL-15

Faculty

Chairperson

Steven M. Goldblatt

Professor

Varey, Gordon B.,* 1962, (Architecture),† M.Arch., 1966, California (Berkeley); history of construction.

Associate Professors

Goldblatt, Steven M., 1982, (Architecture, Education, Civil Engineering), J.D., 1977, Golden Gate; construction accounting, labor relations, and law.

Rolfe, George R.,* 1984, (Architecture, Urban Design and Planning),† M.Arch., 1968, M.C.P., 1968, Pennsylvania; development, finance, history.

Torrence, Gerard R., 1954, (Emeritus), M.S., 1950, Massachusetts Institute of Technology; structural design.

Assistant Professor

Adams, Cassandra S., 1988, M.Arch., 1980, Washington; project management, scheduling, equipment, and temporary structures.

Lecturers

Aaronson, Barry L., 1980, M.Arch., 1981, Washington; construction technology.

Clark, Christopher L., 1986, B.A., 1971, Whitman; building industry.

Harrison, José, 1977, M.S., 1965, Borocourt Institute (England); construction safety.

Hopkins, James W., 1971, M.Arch., 1970, Virginia Polytechnic Institute; construction technology.

Le Tourneau, Michael W., 1985, B.S., 1975, California Polytechnic State; estimating and productivity.

Lewis, William L., 1984, M.S.C.E., 1975, Stanford; project management.

Modawell, Mark A., 1987, B.S.B.C., 1983, Washington; computer applications.

Ossinger, Thomas C., 1978, B.S.B.C., 1976, Washington; construction estimating and computer applications.

Raftery, M. Christopher, 1987, M.S.C.E., 1978, Stanford; project management.

Ratti, Dean B., 1987, M.S.C.E., 1952, Washington; structural design.

Rowley, Louis B., 1984, studied at California (Los Angeles); construction communications.

Siqueland, Herman S., 1975, LL.B., 1960, Michigan; construction law.

Twelker, Neil H., 1979, A.M., 1954, Ph.D., 1958, Harvard; soils engineering.

Course Descriptions

Courses for Undergraduates

B CON 301 Building Industry (3) A Clark Organization and functioning of the building industry: legal, ethical, business, and management aspects. Entry code required.

B CON 330, 331, 332 Building Technology I, II, III (3,3,3) A,W,Sp Aaronson, Hopkins Introduction to the functional and constructional characteristics of building components: electrical distribution, lighting, heating, air conditioning, plumbing, fire protection, walls, floors, roofs. Entry code required.

B CON 350 History of Building (3) Sp Rolfe Historical survey of building techniques and materials as conditioned by environmental, technical, and social influences. Entry code required.

B CON 370 Construction Accounting (3) A Goldblatt Introduction to accounting for the contractor, placing emphasis on the analysis and use of financial statements and a job cost accounting system. Entry code required.

B CON 390 Construction Labor Relations (3) W Goldblatt Introduction to construction labor topics, including labor-management organization, legislation and regulation, collective bargaining, and job site administration. Entry code required.

B CON 395 Construction Safety (3) Sp Harrison Explanation of the requirements of the Occupational Safety and Health Act and other related federal and state legislation, as applied to the building construction industry. Standards for accident prevention and responsibility for compliance are emphasized. Entry code required.

B CON 401 Building Estimating I (5) AW Ossinger Introduction to residential and commercial cost estimating: principles of building costs, estimating, and construction cost control. Entry code required.

B CON 402 Building Estimating II (3) Sp Ossinger Estimating the major CSI divisions of work for large-scale projects. Labor rates, specifications, budget estimating, assembling bids, use of estimating manuals, and estimating change orders. Prerequisite: 401. Entry code required.

B CON 403 Computer Applications in Construction (2) Sp Modawell, Ossinger Introduction to microcomputer applications in construction industry. Discussion of available hardware and software is combined with practical assignments using estimating and scheduling programs designed for contractors, architects, and developers. Entry code required.

B CON 405 Heavy Estimating Techniques (3) Sp Le Tourneau Introduction to principles and techniques of estimating and bidding heavy construction/highway projects. Prerequisite: 401. Entry code required.

B CON 440 Soils and Foundations (3) A Twelker Origin, classification, and physical properties of soil as used in engineering and construction applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Entry code required.

B CON 453 Introduction to Urban Economics and Development (4) Sp Frerichs Introduction to urban economics and impacts on real estate development with emphasis on land allocation, location, theory, rent/value theory, factors affecting growth and decline of cities, and the role of governmental regulation/policy/finance in controlling real estate development. Joint with URBDP 453. Entry code required.

B CON 454 Introduction to Real Estate Development Processes (4) A Rolfe Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Joint with URBDP 454. Recommended: completion of 453. Entry code required. (Formerly 415).

B CON 455 Introduction to Real Estate Finance (4) W Rolfe Introduction to the financing of real estate development projects including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Joint with URBDP 455. Recommended: 454. Entry code required. (Formerly 420).

B CON 456 Real Estate Investment Seminar (3) Sp Rolfe Analysis of private and public real estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in 453, 454 and 455. Joint with URBDP 456. Prerequisites: 454 and 455. Entry code required.

B CON 460 Construction Communications (2) W Rowley Communication skills for the contractor. Developing those communication skills necessary to manage multimillion-dollar projects. Entry code required.

B CON 470 Project Management (3) Sp Adams Systematic study of management functions in the building industry: planning and scheduling, organization, time and equipment utilization, monitoring and expediting, project administration, cost control. Entry code required.

B CON 480 Law and the Contractor (3) Sp Siqueland Basic legal aspects of construction of private and governmental projects. Survey of general principles relating to rights and liabilities of the contractor and other parties under construction contracts, including union-labor agreements. Major statutory and regulatory requirements affecting the contractor, including lien laws, environment, and minority hiring practices. Entry code required.

B CON 485 Using Contract Documents (3) Sp Rolfe Introduction to the organization and uses of architectural/engineering drawings and specifications as components of construction contract documents, role they play in communicating among participants in the construction process, and how that role varies depending on the form of contract for construction. Entry code required.

B CON 490 Field Productivity (3) W Le Tourneau Influences that affect field productivity in construction. Such management factors as job organization and motivation. Fieldwork in production analysis techniques, including time-lapse photography and activity sampling. Entry code required.

B CON 496 Construction Practice (3) S Goldblatt Integration of classroom theory with practical experience through direct, on-the-job application for one summer. For majors in building construction with 135 credits completed. Applicants are selected under competitive application during Spring Quarter. Offered on credit/no credit basis only. Entry code required.

B CON 498 Special Topics (1-10, max. 20) AWSp Systematic study of specialized subject matter. Topics vary each quarter. Entry code required.

B CON 499 Undergraduate Research (*, max. 12) AWSp Individual or small-group studies in which students may select topics with approval of faculty sponsor and department. Entry code required.

Landscape Architecture

348 Gould

Increasing concern for the wise use of America's natural resources and for the quality of design in the built environment has resulted in expanded roles and opportunities for landscape architects. In response to these trends the landscape architecture program teaches technical and analytical skills and conducts research which balances human needs with the requirements of a healthy natural environment.

Undergraduate Program

Bachelor of Landscape Architecture Degree

The Bachelor of Landscape Architecture is a professional program accredited by the American Society of Landscape Architects. The program includes studio and lecture courses which introduce students to a wide range of design situations from urban to rural. Studio work develops analytical and design skills and encourages students to develop their own individual creative capabilities.

Lecture courses within the department cover history, design theory, landscape design and planning, computer use in design, construction, and professional practice. Additional required courses include geology, soils, plant identification, ecology, urban design, and environmental legislation.

Graduates of the program may work as landscape architects in public agencies, practice in private offices, or enter the fields of design-build and construction.

Applicants complete the first two years of the five-year program in the College of Arts and Sciences, or equivalent course work in a junior college, college, or university. Applicants must have a minimum cumulative grade-point average of 2.50. Students may apply for major status upon completion of a minimum of 75 university- or college-level credits, including departmental prerequisites. However, the department strongly recommends that students complete 90 credits before entering the program. Departmental applications are due March 1, and students are admitted into the program in the following Autumn Quarter.

Students with prior design experience may be admitted with advanced standing into the fourth or fifth year of the program and continue toward completion of the 225 credits required for the degree.

Individuals with prior degrees may apply to either the undergraduate or graduate program. Advising is available regarding which program best suits individual needs. Contact the department for additional information about prerequisites, application requirements, procedures, and scheduling.

Graduate Program

Master of Landscape Architecture Degree

The Master of Landscape Architecture is an accredited professional program that balances design and research, encompassing a spectrum of landscapes that extend from the center of metropolitan areas into the surrounding countryside. The Pacific Northwest offers unparalleled opportunities for design case studies and research in a rich diversity of landscape settings.

The M.L.A. curriculum is designed to meet the needs of graduates from B.L.A. programs, other environmental design programs, and students with nondesign backgrounds. All students complete a core curriculum emphasizing design and research. Students with no design or science background are required to complete additional foundation course work in the deficiency area. Students then concentrate in a special area of study or practice. Students with professional experience or expertise may propose a specialized course of study toward the M.L.A. degree. Students desiring additional specialization in urban situations may pursue an M.L.A. degree with certification in urban design.

Students are admitted to the graduate program primarily in Autumn Quarter, and all application materials should be received by the preceding February 1. Prospective applicants should note that Graduate Record Examination scores, three letters of recommendation, transcripts of previous degree programs, and a departmental questionnaire application are required. Contact the department for application forms and additional information.

Professors

Buchanan, Robert T.,* 1970, (Emeritus), M.L.A., 1956, Harvard; design, graphic communications, landscape aesthetics, environmental art.

Cole, Dale W.,* 1960, ‡(Forest Resources), M.S., 1957, Wisconsin; Ph.D., 1963, Washington; soils and land-use planning, nutrient cycling in forest ecosystems, effects of forest management operations.

del Moral, Roger,* 1968, ‡(Botany, Environmental Studies), M.A., 1966, Ph.D., 1968, California (Santa Barbara); plant ecology, competition, succession, vegetation management.

Haag, Richard, 1958, M.L.A., 1952, Harvard; theory and perception of design, reality of the practice.

Johnston, Norman J.,* 1960, (Emeritus), (Architecture, Urban Design and Planning), ‡ M.C.P., 1959, Ph.D., 1964, Pennsylvania; history of city development, urban design, landscape architecture.

Moudon, Anne Vernez,* 1980, (Architecture, Urban Design and Planning), ‡ Dr.èsSc., 1987, École Polytechnique Fédérale de Lausanne (Switzerland); urban design, city form and neighborhood studies, design research.

Small, Robert E.,* 1965, (Emeritus), (Architecture), ‡ M.Arch., 1955, Oregon; architecture and landscape architecture, theory and design of housing environments, environments for disabled and elderly.

Untermann, Richard K.,* 1971, (Environmental Studies), (Urban Design and Planning), ‡ M.L.A., 1967, Harvard; urban design and site planning, housing, nonmotorized circulation.

Associate Professors

Homer, Richard R.,* 1981, ‡(Civil Engineering), Ph.D., 1978, Washington; aquatic sciences.

Rice, Arthur R.,* 1981, (Russian and East European Studies), ‡ M.L.A., 1978, Harvard; natural processes, regional planning, computer applications in design, design theory, Soviet architecture and landscape architecture.

Robertson, Iain M.,* 1982, ‡(Urban Horticulture), M.L.A., 1975, Pennsylvania; planting design, landscape design.

Schauman, Sally,* 1979, M.S., 1971, Michigan; visual resource theory and assessment, landscape restoration, resource planning and conservation.

Streatfield, David C.,* 1971, (Architecture, Urban Design and Planning), ‡ M.L.A., 1965, Pennsylvania; regional landscape planning, environmental and landscape history, landscape studies, history of urban design, historic landscape preservation, landscape theory.

Assistant Professor

Heerwagen, Judith H.,* 1981, (Research), ‡(Architecture and Urban Planning), Ph.D., 1982, Washington; environmental aesthetics and preferences, children and the natural environment.

Lecturers

Austin, Gary D., 1985, M.L.A., 1981, California State Polytechnic; landscape construction, natural processes.

Einlicky, Gail, 1985, B.L.A., 1974, Minnesota; design, multimedia presentation techniques, historic restoration.

Nakano, Kenichi, 1973, M.L.A., 1973, Harvard; project design, multimedia presentation techniques, site planning.

Promer-Nichols, Sarah, 1987, M.L.A., 1982, Harvard; project design, site planning, graphics.

Course Descriptions

Courses for Undergraduates

L ARC 200 Landscape Architecture Field Trips (2) Five field trips introduce typical landscape architecture projects and demonstrate scope of the landscape architecture field. Visits to major projects in the Puget Sound region include city and county parks, river parks, harbors, downtown redevelopments, street-scapes, campus headquarters, and others. Open to nonmajors. Required for admission to department.

L ARC 300 Introductory Landscape Architecture Design Studio (6) AS Develops basic design and graphic skills. Studio, lectures, field trips, and one-day workshops. Students conduct site analyses and produce drawing to convey design concepts. Relationship of visual perception to drawing, role of values in design, verbal communication, and behavioral analysis of design process. Open to nonmajors. Required for admission to department.

L ARC 301 Site Planning (6) A Introduction to site planning and landscape design, covering the factors of site analysis and planning, resource utilization, site suitability related to specific programs and activities; and planning, design, construction, and behavioral studies for selected case study projects.

L ARC 302 Site Design in Urban Context (5) W *Robertson* Design of public use areas in the urban area. Project types for this course are waterfront development, commercial areas, campus and cultural centers, plazas and historical sites; recommendation for policy to be established as part of the design solution.

L ARC 303 Natural Processes Studio (5) Sp *Rice, Streatfield* Project design studies in areas of "critical concern," related to environmental restraints, natural systems, landscape character, and capacity of site to recover from human intervention. Generally deals with environmental issues in relation to federal, state, and local legislation and policies. Computer applications.

L ARC 310 Landscape Architecture Field Sketching (2) Introductory level sketching of landscape subjects: natural and urban sites, plants, animals, architectural elements. Emphasis on perspective. Various media, including pencil, charcoal, markers, ink wash, water color.

L ARC 311 Introduction to Design Graphics (2) A Introduction to communication techniques for various phases of the design process. Many techniques are introduced and their suitability and appropriateness for different purposes explored.

L ARC 322 Introduction to Planting Design (3) Sp *Robertson* Traditional ways plants are used in landscape design. Composition and design characteristics of plant materials. Technical considerations for selection, climate, cultural suitability, availability, costs, and maintenance. Open to nonmajors.

L ARC 331 Landscape Construction (4) A Basic course in site engineering, correlating the design and technical aspects of site development and suitability. Grading, drainage, circulation requirements and alignment, organization concepts relative to landscape resources, site evaluation, utilization and protection, and building and site program analysis and coordination.

L ARC 332 Landscape Construction (4) W Materials and structures in landscape construction. Design criteria and construction techniques for detail elements of landscape architecture. Working drawings, specifications, cost estimates, and procedures.

L ARC 341 Site Planning (3) A *Untermann* Introduction to site planning and landscape design, covering the factors of site analysis and planning; resource utilization; site suitability related to specific programs and activities; and planning, design, construction, and behavioral studies for selected case study projects. Open to nonmajors.

L ARC 352 History of Landscape Architecture (3) W *Streatfield* Analysis of the landscape as an art form and its relation to the culture of each period. Open to nonmajors.

L ARC 353 History of Modern Landscape Architecture (3) A *Streatfield* Development of profession and art of landscape architecture in the United States, Europe, South America, and Japan in relation to prevailing social, economic, political, and cultural factors. Relationships with other professions, especially architecture and urban planning, and other arts, such as painting and sculpture. Open to nonmajors.

L ARC 361 Theory and Perception of Landscape Architecture (3) AW *Haag* Reciprocal relationships of man/nature are explored, with particular attention given to the cultural variations and interpretations of aesthetics, landscape materials, and human behavior and their effects on site planning and project design. Landscape architecture philosophy related to the physical design problems and potentials of the Pacific Northwest. Open to nonmajors.

L ARC 362 Landscape Design in Urban Contexts (3) A Introduction to site design in context of urban setting. Discussion related to role of landscape architect as contributor to quality of urban environment. Case study material covers diversity of design concepts and vocabulary utilized in landscape design. Recommended: 341, 361.

L ARC 363 Natural Processes as Planning and Design Determinants (3) W *Rice, Streatfield* Introductory lecture course relating methods, procedures, and rationale for use of natural process information—soils, vegetation, hydrology, physiography, wildlife, and geology. The planning/design process covers areas of critical concern, environmental constraints, natural systems, landscape character, and capacity of site to recover from human intervention. Open to nonmajors.

L ARC 401 Urban Recreational Design (6) Sp *Untermann* Special studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages.

L ARC 402 Landscape Design Studio (6) W Large-scale site planning and design. Generally related to housing, new communities, and institutional development. Identification of landscape character, resources, and problems of site, cost factors, design alternatives and implications for architectural direction,

policy for land acquisition. Program development to maximize site utilization and preservation of natural attributes.

L ARC 403 Landscape Visual Assessment (6) A Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer's capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

L ARC 406 Individual Design Studio (6) AWSpS Senior projects in landscape architecture; projects vary according to the student's particular emphasis and needs.

L ARC 411 Landscape Graphics (3) A Delineation techniques for landscape perspectives, sections, rendering of plant materials. Historical and contemporary examples of landscape drawing.

L ARC 412 Landscape Communications (2) Sp Office presentation techniques for various phases of landscape architectural projects. Multimedia and video production techniques and presentation methods suitable for public hearings, citizen groups, design commissions, and private clients. Individual projects and case-study examples.

L ARC 423 Planting Design Studio (3) Sp Robertson Utilization of plants as design elements to manipulate space and modify the landscape for various activities and resolutions of site problems. Factors that determine the appropriate use and arrangement of plant materials in an urban context. Composition, plant selection, planting techniques, and maintenance requirements are major components of this class. Prerequisites: 322 and BOT 331 or equivalent.

L ARC 424 Advanced Planting Design Seminar (2) Sp Analyzes the complex relationship between plants, man, and environment and affords opportunity to explore methods of utilizing these relationships to plant and to design more responsive landscapes. Prerequisites: upper-division standing and permission of instructor.

L ARC 425 Advanced Planting Design Studio (5) Sp Robertson Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and esthetic principles for selecting plants to meet specific site conditions (e.g., problem soils, winds, waters). Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites. Prerequisites: upper-division standing and permission of instructor.

L ARC 433 Large-Scale Site Construction (4) W Includes studies of natural determinants and restraints on large-scale construction, development affected by service and utility systems, physiographic suitability of site, cost-benefit analysis, and critical path methodology for site construction projects. Prerequisites: 331, GEOL 313.

L ARC 450 History of Environmental Design in the Pacific Northwest (3) S Streatfield Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from nineteenth century to the present, with major emphasis on twentieth century. Open to nonmajors.

L ARC 451 History of Environmental Design on the West Coast (3) S Streatfield Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

L ARC 463 Urban Recreational Design (3) Sp Untermann Special recreational studies in metropolitan, urban, and neighborhood areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARC 470 Landscape Architecture Tutorial (2, max. 6) AWSpS Various aspects of project organization, programming, scheduling of work loads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planting and design. Prerequisites: fourth- or fifth-year standing and one quarter advance permission of instructor.

L ARC 473 Professional Practice (3) Sp Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

L ARC 474 Project Design (6) Sp Detailed design studies of small-to-medium-scale projects. General focus on public landscape areas and social/psychological uses of site: design master plan and details, planting and construction documents, and professional office presentation of material. Prerequisite: fifth-year standing in the department.

L ARC 476 Professional Operations (3-6, max. 6) AWSpS Practicum course for landscape architecture majors for internship and exposure to the profession with working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Prerequisite: permission of instructor.

L ARC 477 Landscape Architecture Consultancy Studio (3-6) AWSpS Simulation of the professional relationship of the landscape architect as a consultant to University students in other design planning and management disciplines. Focus is on site analysis, master planning, schematic designs and detailed design, working drawings, and planting plans associated with student projects. Prerequisite: fourth- or fifth-year standing in the department.

L ARC 495 Landscape Architectural Studies Abroad (1-10, max. 30) S Streatfield Studies conducted under faculty supervision in various locations outside the United States. Prerequisite: permission of instructor.

L ARC 498 Special Projects (1-10, max. 30) AWSpS Special projects as arranged. Open to nonmajors.

L ARC 499 Undergraduate Research (1-6) AWSpS Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues. Prerequisite: approval of application by a faculty sponsor.

Courses for Graduates Only

L ARC 501 Landscape Design and Planning I (6) A Enhances perceptual awareness and design sensitivity to natural and man-made landscapes. Basic skills necessary for more advanced course work required in the master of landscape architecture degree program (i.e., relationship between landscape perception, graphics, site analysis, and design). Examination of landscape environment through problem-solving techniques that acknowledge holistic approach to the environment. Prerequisite: permission of instructor.

L ARC 503 Landscape Design of Communities (6) Sp Untermann Studies methods and techniques for developing physical design solutions and implementation strategies in neighboring and small communities. Social, economic, political, and individual forces affecting community development and growth. Comparison of several communities, identifying pertinent landscape issues, potential design solutions, and methods for achieving design goals through the political process.

L ARC 504 Regional Landscape Planning (6) A Rice Studio in applied regional landscape planning in metropolitan regions to examine conflicting land-use pressures of urban/rural fringe. Ecosystematic approach emphasizes maintenance of landscape quality.

Computer applications in design. Open to nonmajors. Prerequisite: permission of instructor.

L ARC 505 Regional Landscape Design (6) W Theory/techniques of regional design to analyze, evaluate, plan, design, and manage the resources of the regional landscape continuum. Open to nonmajors. Prerequisite: permission of instructor.

L ARC 506 Landscape Visual Resources (6) Sp Schauman Survey of existing theory/techniques and the generation of new methods to analyze, evaluate, plan, design, and manage the visual resources of the landscape. Open to nonmajors. Prerequisite: permission of instructor.

L ARC 507 Landscape Art (6) Sp Public art placed in, or developed for, specific landscape settings. Various aspects and benefits of public art, including materials, technologies, philosophies of landscape imagery and meaning. General planning criteria for location for maximum public benefit and identification of objectives for a specific site and artwork. Open to nonmajors. Prerequisite: student standing in architecture, art, or landscape architecture or permission of instructor.

L ARC 511 Visual Learning (3) A Seminar/laboratory to develop visual learning processes and skills for applying these processes to landscape architecture. Related visualization concepts. Prerequisite: permission of instructor.

L ARC 523 Landscape Technology (6) A Schauman Studio on application of technologies and their appropriateness for rehabilitation, restoration, and creation of landscapes at site-specific scale. Examination of maintenance programs, implementation problems, and public policy. Open to nonmajors. Prerequisite: permission of instructor.

L ARC 550 History and Theory of Modern Landscape Architecture (3) A Streatfield Lecture/seminar on history and theory of landscape architecture from the eighteenth century to the present. Relation to theory in related environmental design disciplines such as architecture and urban planning and other disciplines such as geography. Open to nonmajors. Prerequisite: permission of instructor.

L ARC 561 Regional Landscape Planning and Design (2) A Streatfield Seminar on objectives, philosophy, history, and theory of regional landscape planning and design. Overview of the context of regional landscape planning, examination of critical issues in the Pacific Northwest, and opportunities and role of the landscape architect in addressing these issues. Open to nonmajors. Prerequisite: permission of instructor.

L ARC 562 Landscape Art (2) Sp Process of developing and placing artwork in specific landscape settings. Types of artwork and landscape settings; ways for artist and site designer to interpret, alter, and incorporate factors of landscape; viewer's perception and experience; examples of public and private support.

L ARC 570 Design Evaluation (3) W Rice Design evaluation as a means to improve results. Esthetic, behavioral, and environmental evaluation issues, addressing role of each in design context and discussing impact of divergent viewpoints in evaluation process. Purposes, methods, and inherent biases of design evaluation. Prerequisite: permission of instructor.

L ARC 590 Seminar in Landscape Architecture (1-3, max. 12) AWSpS Advanced topics in landscape architecture with focus on unpublished areas of research. Prerequisite: permission of instructor.

L ARC 598 Special Topics (1-6, max. 9) AWSpS Systematic study of specialized regional landscape subject matter, including history, technology, implementation, and other topics depending on current interest/needs. Topics vary and are announced in the preceding quarter. Prerequisite: permission of instructor.

L ARC 600 Independent Study or Research (*) AWSpS

L ARC 601 Internship (3-9, max. 9) AWSpS Offered on credit/no credit basis only. Prerequisite: permission of instructor.

L ARC 700 Master's Thesis (*) AWSpS

Urban Design and Planning

410 Gould

Urban planning is a field that deals with critical issues of human settlement and urban development requiring special knowledge and skills to provide communities with an informed basis for coordinated action. Urban planning and design constitutes a professional field of growing complexity to respond to the urban complexities of the twentieth century. The Department of Urban Design and Planning fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built environment; the financial, administrative, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas. The department is a participating partner in offering a Bachelor of Arts degree integrating architecture and urban planning, described under the college's Bachelor of Arts degree program.

The department administers the Remote Sensing Applications Laboratory (RSAL), which has as its primary mission the development of applications for information produced by remote sensing technology. This includes aerial photography and newer systems, such as Landsat. The college has recently acquired the ARC/INFO geographic information software system, which provides a vast array of techniques for the research and geographic educational activities in which the department is involved.

Graduate Program

The Department offers two graduate degrees: the Master of Urban Planning (M.U.P.) and the Doctor of Philosophy (Ph.D.). The M.U.P. is the professional degree, and the Ph.D. is for students planning to enter research and teaching positions in urban planning and design. A concurrent degree program is possible with the J.D. in the School of Law.

The graduate program focuses on the physical environment and its socioeconomic and political determinants. Students are encouraged to conduct research and studies in specializations such as urban design dealing with physical form, character, and quality issues; urban real estate development focusing on the public/private context of development processes, public policy, physical development and design, finance, and community development processes; and land-use planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects.

Master of Urban Planning Degree

The Master of Urban Planning degree is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms. It is a two-year, or six-quarter program, requiring a minimum of 72 credits.

Requirements for graduate-level study include a satisfactory academic record and undergraduate training in one of a variety of disciplines, including urban planning

and environmental design or in other appropriate fields, such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Students planning to enter the program should have completed at least one college-level course in each of the following areas: economics, mathematics, statistics, American government, environmental systems, and cultural diversity. Students without sufficient background should take these prerequisite courses concurrently with their graduate studies.

The primary objective is to educate professional planners with a broad range of competence in planning and design; a second objective is to provide opportunities for individual studies in selected professional areas. Core course requirements include 31 credits covering the history and theory of planning and urban design, profiles and resources for planning in the local context, urban form, communication methods, processes and methods of planning, planning law, research methods, and a first-year planning studio. 14 credits of restricted electives are required, including a course in advanced methods and a second studio; both may be in an area of specialization. In addition, a course in land use planning and in urban development economics is required. A 9 credit thesis or professional project is required upon completion of all other degree coursework. 18 credits of the 72 minimum required for the degree may be in open electives.

The core provides a foundation in urban design and planning for all students. A specialization in one area of planning is encouraged. Three major specialized areas offered in the department include physical land-use planning, urban real estate development, and urban design. Other opportunities include transportation planning with Civil Engineering, public policy and management with Public Affairs, environmental resource planning with Forest Resources, and environmental studies and coastal planning with Marine Studies.

Students are admitted to the M.U.P. program primarily in Autumn Quarter and all application material should be received by the department no later than the preceding February 15. Graduate Record Examination general test scores, three letters of recommendation, transcripts of previous degree programs and any additional academic study, and a statement of purpose are required.

Urban Design Certificate Program

The department includes a certificate program for those who desire extended work in urban design. The option emphasizes process and problem solving, including abilities to analyze problems and opportunities, to develop and evaluate alternative concepts, and to manage implementation strategies. The certificate is awarded to students who complete the specialized curriculum (see college description).

Doctor of Philosophy Degree

Attainment of the Doctor of Philosophy degree indicates scholarly abilities, long-term intellectual interests in the profession, and substantial achievements related to the discipline and practice of urban planning and design. Students in the program must demonstrate exceptional qualities and capabilities for independent work worthy of attention of their peers in the academic and professional planning communities.

Admission to the doctoral program (Autumn Quarter only) is similar to that for the master's, with the added understanding that the student is essentially interested in an academic or research career within the planning and design field and has demonstrated outstanding intellectual and academic competence. Most applicants will have completed the M.U.P. or other master's degrees. Persons whose native language is not English must be able to demonstrate command of English before enrolling. Applicants must submit an exhibit of their work which illustrates their interests and abilities

in areas of urban design, as well as a detailed biographical outline including publications and work experiences.

The program requires a comprehensive preliminary examination, normally taken after three quarters of preparatory study. A Supervisory Committee is then appointed to direct the student's individualized study and research in planning and design prior to the taking of the written and oral General Examination. Candidates are awarded the doctorate upon completion of the dissertation and satisfactory passing of the Final Examination. Contact the department for additional information concerning detailed degree requirements such as the research paper, coursework, and inside and outside fields of study.

Faculty

Professors

Amoss, Harold L.,* 1963, (Emeritus), M.A., 1947, New Mexico; Ph.D., 1951, California (Berkeley); planned social change, community development.

Bell, Earl J.,* 1966, (Fisheries, Quantitative Science), Ph.D., 1965, California (Berkeley); application of geographic information systems to urban and regional planning problems, quantitative methods, water resources.

Grey, Arthur L.,* 1963, (Emeritus), Ph.D., 1954, California (Berkeley); scope of urban planning, land and development policy, uses of remote sensing in urban planning, economics of land use, professional practice experience, use and need analysis.

Hancock, John L.,* 1969, (Environmental Studies), M.A., 1955, Minnesota; Ph.D., 1964, Pennsylvania; planning history, urban history, planning theory, social analysis and social evaluation methods, comparative urbanism.

Jacobson, Phillip L.,* 1962, (Architecture),† M.Arch., 1969, Finnish Institute of Technology (Helsinki); housing, neighborhood development.

Johnston, Norman J.,* 1960, (Emeritus), (Architecture, Landscape Architecture),† M.C.P., 1959, Ph.D., 1964, Pennsylvania; history of city development, urban design, landscape architecture.

Ludwig, Richard L.,* 1971, M.U.P., 1965, Washington; Ph.D., 1971, Pittsburgh; housing development planning, social factors in development planning.

Miller, Donald H.,* 1970, M.C.P., 1960, Ph.D., 1973, California (Berkeley); urban spatial structure, consumer behavior and demand for public services, planning theory and evaluation; urbanization processes.

Moudon, Anne Verez,* 1980, (Architecture, Landscape Architecture),† Dr.èSc., 1987, École Polytechnique Fédérale de Lausanne (Switzerland); urban design, city form and neighborhood studies, design research.

Nyberg, Folke E.,* 1969, (Scandinavian Languages and Literature), (Architecture),† M.Arch., 1960, Yale; urban design, commercial/residential, residential additions, institutional/industrial design.

Schneider, Jerry B.,* 1968, †(Civil Engineering, Environmental Studies), M.C.P., 1961, California (Berkeley); Ph.D., 1966, Pennsylvania; metropolitan and regional planning, transportation and land-use interrelationships, computer graphics, forecasting methods, futures research.

Seyfried, Warren R., 1956, (Emeritus), M.B.A., 1954, D.B.A., 1956, Indiana; urban economics, urban development.

Thiel, Philip,* 1961, (Architecture),† M.S.Nav.Arch., 1948, Michigan; architectural design.

Untermann, Richard,* 1971, (Environmental Studies), (Landscape Architecture),† M.L.A., 1967, Harvard; community design, site planning, landscape construction, implementation strategies.

Zarina, Astra,* 1964, (Architecture),† M.Arch., 1955, Massachusetts Institute of Technology; inner-city planning, architecture history.

Associate Professors

Norton, Thomas J.,* 1961, (Emeritus), M.U.P., 1960, Washington; urban community facilities, planning administration.

Rolfe, George R.,* 1984, (Architecture, Building Construction),† M.Arch., 1968, M.C.P., 1968, Pennsylvania; real estate; city planning and management.

Ryan, Dennis M.,* 1974, (Architecture),† M.C.P., 1968, Ph.D., 1976, Pennsylvania; urban design and physical planning, community design principles and practice, urban change and continuity.

Streatfield, David C.,* 1971, (Architecture, Landscape Architecture),† M.L.A., 1965, Pennsylvania; regional landscape planning, environmental history, history/landscape preservation, landscape theory.

Westerlund, Frank V.,* 1977, M.U.P., 1971, Ph.D., 1977, Washington; land use planning, remote sensing applications, geographic information systems, regional environmental planning, open space, natural hazards and energy conservation planning.

Assistant Professors

Dubrow, Gail L., 1989, B.Arch., M.A., 1980, Oregon; research methods, values, history and theory, preservation planning and design, social relations of gender, race, class and ethnicity in the built environment.

Kasprisin, Ronald J., 1968, B.Arch., 1966, Notre Dame; M.U.P., Washington; community design studios, town planning, planning/design communications, urban design principles, political process and implementation, bio-regionalism.

Pivo, Gary, 1987, M.R.P., 1979, Cornell; Ph.D., 1988, California (Berkeley); land use, physical and environmental planning, growth management.

Course Descriptions

Courses for Undergraduates

URBDP 300 Introduction to Urban Planning (3) **AWSp** *Grey* Principles and theories of urban structure and institutions. Concepts and logic of planning as a community process and a professional activity. Evolution of planning ideas in response to changing social, economic, and environmental conditions within the American political framework. Complementary nature of public and private responsibilities. Major procedures used by planners. Prerequisite: junior standing or permission of instructor.

URBDP 340 American Urban Problems (3) *Dubrow* Major trends and problems in urban America that grew out of our past or are developing today. A new topic and new materials are presented each quarter. Topics are selected for their contemporary importance, environmental (biocultural) impact, and planning implications. History is used as our chief record of the past, not as a blueprint of the present and future.

URBDP 370 Reading the City (3-5) **Sp** *Hancock, Moudon* Comprehending cities as reflections of individuals and societies. Students trained to read and analyze everyday, visible evidence of the city. Addresses interests of travelers as well as students wanting to become active participants in decisions affecting the quality of the urbanized environment. Field trips, readings, lectures, visual learning techniques.

URBDP 399 Future Patterns of Settlement (3) Study of possible future patterns of human use of the environment from apocalyptic to glorious. Review of landscape evolution. Problems of long-range regional and national planning. Joint with GEOG 399. Prerequisite: 340 or GEOG 207 or 277, or permission of instructor.

URBDP 407 Urban Planning Studio (5) **A** *Ryan* Synthesis of urban design and planning problems and methods in a laboratory section. Prerequisites: CAUP 300 and CAUP 301 or permission of instructor.

URBDP 410 Planning Theory (3) **A** *Norton* Synthesis of theories and theorizing drawn from several disciplines and applied to urban planning. Particular emphasis on explanatory concepts associated with a future-oriented rational decision process.

URBDP 420 Database Systems and Planning Analysis (3) **A** *Bell* Applications of relational database management systems in urban planning. Emphasis placed on the practical aspects of database design and use. Employs R:Base on a local area microcomputer network and uses actual urban databases. Students create and modify databases, enter and update data, create menus, and design databases.

URBDP 422 Geographic Information Systems in Planning (3) *Principles of geographic information systems applied to problems encountered in planning, landscape, architecture, and general land use. Emphasizes practical problem-solving using existing computer software (ARC/INFO, GRASS). Use of GIS for siting, environmental evaluation and wetlands inventories explored. Prerequisite: 420, which may be taken concurrently, or permission of instructor.*

URBDP 429 Computer-Aided Planning of Urban Systems (3) **W** *Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigation of hardware/software trade-offs; human factors in man-computer systems design theory as it relates to problem-solving activity. Joint with CETS 472.*

URBDP 446 Practical Experience (4, max. 8) **AWSp** *Norton, Ryan* Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects. Prerequisite: permission of instructor.

URBDP 451 Housing (3) **W** *Ludwig* Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 300 or permission of instructor.

URBDP 452 Urban Development and Spatial Structure (3) **Sp** *Miller* Physical and functional structure of urban areas, with major focus on locational decision making in households, firms, and other organizations, and space demands of these urban activities. Selected land-use models illustrating use of this theoretical understanding for forecasting competition, land-use conflicts, and the land-conversion process.

URBDP 453 Introduction to Urban Economics and Development (4) **Sp** *Frerichs* Introduction to urban economics and impacts on real estate development with emphasis on land allocation, location theory, rent/value theory, factors affecting growth and decline of cities, and the role of governmental regulation/policy/finance in controlling real estate development. Joint with B CON 453. Entry code required. (Formerly 350).

URBDP 454 Introduction to Real Estate Development Processes (4) **A** *Rolfe* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Joint with B CON 454. Recommended: completion of 453. Entry code required.

URBDP 455 Introduction to Real Estate Finance (4) *Rolfe* Introduction to the financing of real estate development projects including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Joint with B CON 455. Recommended: 454. Entry code required.

URBDP 456 Real Estate Investment Seminar (3) **Sp** *Rolfe* Analysis of private and public real estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in 453, 454, and 455. Joint with B CON 456. Prerequisites: 454 and 455. Entry code required.

URBDP 460 History of City Development (3) **A** *Dubrow, Hancock* Analysis of city forms and designs, emphasizing their relation to the culture of each period.

URBDP 461 History of Urban Planning in the United States (3) **W** *Hancock* Seminar in origins, development, and significance of the American planning movement and the profession that emerged from it, as defined by some of its seminal innovators, theories, practices, and achievements, and as evaluated by cultural realities thereby served.

URBDP 465 Land Use (3) **W** *Westerlund* Substantive presentation of land use as a focus for planning issues. Development of problems: consideration of analysis, programming, and implementation methods. Seminar and group project sections.

URBDP 467 Urban Planning Uses of Remote Sensing (3) **A** *Westerlund* Using aerial photographs, related data, and maps in urban planning. Urban change analysis, land-use classification systems, other planning applications. Scale and resolution considerations. Development of proficiency through laboratory exercises. Prerequisite: 300 or equivalent; recommended: 465.

URBDP 468 Land Use From Satellite Data (3) **W** *Westerlund* Digital data from Landsat, etc., are used to determine land-use and land-cover classification in urban and rural areas. Hands-on exercises on computer. Photo interpretation, statistics, land-use classification, and verification are incorporated. Prerequisite: 465, 467, or permission of instructor.

URBDP 470 Introduction to Urban Design (3) **A** *Kasprisin, Ryan* Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

URBDP 471 History of Urban Design (3) **Sp** *Streatfield* Aspects of form, pattern, and space that mark efforts of individuals and groups to express their values and goals in the design of their cities. Special attention given to both historical and modern examples.

URBDP 472 Graphic Communication in Urban Planning (3) **W** *Kasprisin* Use of graphics and other representational techniques as a means of conceptualizing and expressing ideas, and for recording, analyzing, and controlling environment. Covers use of drawing, diagrams, report writing, design and production, photography, desktop publishing, exhibit preparation, as tools for effective communication.

URBDP 479 The Urban Form (3) *Moudon, Nyberg* Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

URBDP 498 Special Topics (1-9, max. 15) **AWSpS** Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

URBDP 499 Special Projects (*, max. 6) **AWSpS** Independent/tutorial study for undergraduates. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty adviser most appropriate for the project proposed. A report on the purposes, procedures, and results of the study is required. Prerequisites: senior standing and permission of the supervising instructor.

Courses for Graduates Only

URBDP 500 Survey of Urban Planning (3) A *Dubrow, Miller* Concepts and logic of planning as a professional activity. Evolution of guiding ideas in relation to changing social, economic, and environmental conditions within the American political framework. Major procedures used by planners. Critical appraisal. Open to graduate students in urban design and planning and to graduate students in architecture seeking the urban design certificate.

URBDP 501 Resources for Urban Planning (2) A *Norton* Introduction to areas of specialized study in environmental planning and policy programming. Organization for planning in the Seattle region; range of activities and emphases, established and changing roles. Required of new graduate students.

URBDP 506 General Urban Planning (2-) W *Kasprisin, Pivo* Introduction to applied professional planning. Consideration of analysis, programming, and implementation methods in preparation for general urban planning laboratory. Prerequisites: 500, 501.

URBDP 507 General Urban Planning Laboratory (-5) Sp Laboratory exercise in applied professional planning, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process. Prerequisite: 506.

URBDP 508 Specialized Planning Laboratory (5, max. 10) A Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisites: 500, 501; some sections may have prerequisite urban planning lecture or seminar courses.

URBDP 510 Theories and Methodologies of Planning I (4) W *Pivo* Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate students in urban design and planning and to graduate students seeking the urban design certificate. Prerequisite: 500.

URBDP 512 Research Seminar (2) A *Dubrow, Hancock* Development and presentation of advanced topics of individual investigation.

URBDP 520 Quantitative Methods in Urban Design and Planning (4) W *Bell* Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival populations models with examples solved on microcomputers. Prerequisite: basic course in probability and statistics and college mathematics.

URBDP 525 Evaluation in Urban Planning (3) W *Miller* Methods and techniques for *a priori* assessment of physical improvement plans, program designs, public policies. Includes cost effectiveness and matrix or goal achievement, as well as more conventional cost-benefit and cost-revenue forms of analysis. Em-

phasis on understanding the reasoning and issues in evaluation, and gaining a working competence in at least one of the methods treated.

URBDP 529 Urban Region Geocoding and Land-Based Information Systems (3) *Bell, Westerlund* Multipurpose street network and land-based information systems. The U.S. census geocoding system, automated map overlay systems, and cadastral file information use. Applications to land surveying, urban and transportation planning, and geographic analysis. Joint with GEOG 529 and CETS 529.

URBDP 530 Land-Use/Transportation Models (3) A *Schneider* Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land-use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Joint with CETS 570.

URBDP 546 Practicum (4, max. 8) AWSp Off-campus experience under academic supervision in situations useful to the education of planners, such as planning offices, public bureaucracies, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects. Offered on credit/no credit basis only. Prerequisite: permission of instructor.

URBDP 550 Urban Planning: Financial Planning and Management (3) Practical application of benefit-cost methodology to the decision-making process for urban development. In a "workshop" format, benefit-cost analysis procedures are applied to urban development projects or programs, including urban renewal as defined by legislation. Theory or methodology is utilized as necessary to determine objectives, to identify and to measure benefits and costs, and to specify decision criteria in terms of the public interest.

URBDP 551 Allocation Processes in Urban and Regional Planning (3) A *Gray* General economic context of planning analysis and social decision making. Priorities and public budgets. Measurement of collective needs. Allocative processes applied to land use.

URBDP 552 Urban Development and the Real Estate Market (3) Topical survey of urban development. Provides substantive information, methodology, theory, and base for additional courses and seminars in area. Includes urban economy and determinants of land use, capital investment in urban development, land tenure, urban functions and public sector, urban development policy and strategy. Prerequisite: permission of instructor.

URBDP 553 Urban Real Estate Finance and Investment (3) W *Gray* Develops principles for evaluating opportunities to invest in urban real estate, discusses the question of determining the cost of capital for such investments, investigates some problems in the application of an appropriate investment criterion to specific types of opportunities, and explores some aspects of the urban renewal problem. Prerequisite: 552 or permission of instructor.

URBDP 554 Location Determinants of Urban Real Estate Investment (3) Advanced workshop on empirical methods to conduct and evaluate locational studies. Prerequisite: permission of instructor.

URBDP 557 Economics of Land-Use Regulation (3) *Gray* Taxation, subsidy, and other means to further public purposes in land utilization and development. Open space, transfer of development rights, tax allocation financing. Resource use, distributive and market effects of controls. Prerequisite: 551 or 552 or permission of instructor.

URBDP 570 Urban Design Process (3) *Kasprisin* The study of concepts, methods, and processes basic to planning, design, and effectuation. Offered on credit/no credit basis only. Prerequisite: specialization in urban design or permission of instructor.

URBDP 571 Research and Analytical Methods for Urban Design (3) *Moudon* Conceptual framework for an epistemology of urban design and physical planning. Review of relevant research in related fields and disciplines. Prerequisite: specialization in urban design or permission of instructor.

URBDP 572 Case Studies in Urban Design and Development (3) W Wide range of urban design and development projects recently completed. Effective urban design implementation, including design process, decision making, administration, management. Tools and techniques such as design analysis, policy making, regulation, design review, taxation, financing. Prerequisites: 510; 580 and/or permission of instructor.

URBDP 574 Residential Design: Methods and Practices (3) A *Moudon* Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods and practices. Joint with ARCH 593.

URBDP 580 Legal and Administrative Framework for Planning (3) S Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

URBDP 591-592-593 Doctoral Seminar I, II, III (4-4-4) A,W,Sp Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

URBDP 598 Special Topics (1-6, max. 15) AWSps Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

URBDP 600 Independent Study or Research (*) AWSps

URBDP 700 Master's Thesis (*) AWSps

URBDP 800 Doctoral Dissertation (*) AWSps

College of Arts and Sciences

Dean

Joe G. Norman, Jr.
B110 Padelford

Associate Deans

Frederick L. Campbell—Undergraduate Education
Joe S. Creager—Earth Sciences; Research, Facilities, and Computing
Arthur Grossman—Arts
James D. Nason—Social Sciences
Frederic Y. M. Wan—Natural Sciences
Thomas M. Scheidel—Humanities

The departments and schools of the College of Arts and Sciences offer nearly one hundred curricula leading to the degrees of either Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science, as well as graduate study leading to master's and doctoral degrees.

Undergraduate Study

Graduation Requirements

To be awarded a baccalaureate degree, a student in the college must fulfill a proficiency requirement, a writing-course requirement, a distribution requirement, and a major requirement. All required courses must be taken for a numerical grade. In addition, the student must present at least 90 credits outside the major department and must meet minimum grade-point-average requirements as specified below. Detailed information on graduation requirements is provided in the Bachelor's Degree Planbook, available from the College of Arts and Sciences Advising Office, B10 Padelford.

Proficiency Requirement

To receive a degree from the College of Arts and Sciences, students entering any college or university Autumn Quarter 1985, or thereafter, are required to satisfy minimum proficiency standards in all three of the following areas: English composition, quantitative and symbolic reasoning, and foreign language. English proficiency may be satisfied by successful completion of college courses. The foreign-language and the quantitative and symbolic reasoning proficiencies may be satisfied by successful completion of college courses or proficiency examinations.

Writing Requirement

Students who first entered college Autumn Quarter 1983, or thereafter, must complete a minimum of 10 credits of courses that emphasize the development of writing skills in the context of an academic discipline. These courses are designated *W* in the quarterly Time Schedule and are shown with a *W* prefix on transcripts. Writing courses, if they apply, may also count toward distribution or major requirements. The writing requirement is in addition to the English composition proficiency requirement mentioned in the preceding paragraph.

Distribution Requirement

The distribution requirement is the means by which the college seeks to develop a student's breadth of knowledge and appreciation for subjects different in content and method from the one in which the student will ma-

ajor. The college has identified courses especially suited for meeting this requirement. These courses are currently divided into three large fields of knowledge: humanities, social sciences, and natural sciences. Each student must select, from the University Distribution List, at least 20 credits in courses from each of the three fields. As an alternative, students may present as few as 15 credits in the distribution area under which the major falls as long as 60 credits are presented in the three areas combined. (For example, an English major could present 15 credits of humanities, 25 of social sciences, and 20 of natural sciences.) As another alternative, students may fulfill all or part of the distribution requirement by taking sequences in the College Studies Program (see below).

Humanities courses have been subdivided into Part A (Language and Literature) and Part B (Fine Arts). Social sciences courses have been subdivided into Part A (Social Sciences) and Part B (History, Philosophy, Civilization). In humanities and in social sciences, students must complete at least 5 credits from Part A and at least 5 credits from Part B. Courses that apply toward the distribution requirement are shown on the University Distribution List.

The University Distribution List may change. If a course changes distribution categories, students who took it before the change may use it for either the old category or the new, but students who take it after the change may use it only for the new category. (Courses are not likely to be removed from the University Distribution List altogether, unless they are being dropped from the curriculum.) It is recommended that students pick up an updated copy of the list once a year at B10 Padelford or at other advising offices on campus.

The University Distribution List that appears in the Undergraduate Study section of this catalog applies to students whose first enrollment in college, whether at the University or elsewhere, was in Autumn Quarter 1983 or later. Students who started college before autumn 1983 (or before autumn 1984 if entering the UW with an academic-transfer associate degree from a community college in Washington) may choose to follow an earlier distribution list, available at B10 Padelford.

The College of Arts and Sciences allows returning students who entered the UW as freshmen at any time before autumn 1980, or who entered the College of Arts and Sciences with transfer credits at any time before autumn 1982, regardless of length of absence, to use a still earlier (and more liberal) distribution list, also available at B10 Padelford.

Linked Sets

Students using the University Distribution List shown on page 33 must include a linked set as part of their 20-credit natural science requirement. Students who begin college at the UW in Autumn Quarter 1985, or after (and students who begin college anywhere in autumn, 1985, or after, and who transfer to the UW in Autumn Quarter 1987, or after) must complete a second linked set in either the humanities, the social sciences, or a combination of humanities, social sciences, and/or natural sciences. Linked sets are listed in the *Bachelor's Degree Planbook*, available in B10 Padelford.

All courses composing the linked sets are also on the University Distribution List and may be counted for distribution as well as for the linked-set requirement. Courses in the major and courses used for proficiency requirements may not be used for distribution or for linked sets.

College Studies Program

Students may fulfill all or part of the general education requirement by selecting sequences from the College Studies Program. The following options are available:

(1) Students may take three College Studies sequences—one each from humanities/fine arts, natural sciences, and social sciences—as an alternative to

the entire 60-credit Arts and Sciences distribution and linked-set requirement. A student who chooses the entire College Studies Program (i.e., who presents sequences in all three distribution areas) is allowed to use courses in the major toward the College Studies requirements.

(2) Students may take one or two College Studies sequences and complete the general education requirement by fulfilling the regular distribution requirement in the one or two areas not covered by College Studies sequences. For example, a student could complete College Studies sequences in humanities/fine arts and in social sciences, and take 20 credits of natural sciences distribution courses (including a linked set) to complete the general education requirements. For students who present one or two College Studies sequences instead of the regular distribution categories, the sequences, as well as the other distribution courses, must be outside the major department.

Linked sets—All College Studies sequences are considered linked sets. A student who takes three College Studies sequences (one in each of the three prescribed areas) automatically fulfills the linked set requirement. A student who takes two College Studies sequences, including one in natural sciences, will also have fulfilled the linked set requirement. A student who takes two College Studies sequences outside natural sciences will need a natural sciences linked set. And a student who takes one College Studies sequence will need an additional linked set, either in natural sciences or humanities/social sciences/crossovers, depending on the College Studies sequence taken.

A list of College Studies Program sequences appears below. Updated lists may be found in the Bachelor's Degree Planbook and the College Studies brochure, available in B10 Padelford and in the College Studies Program Office, A305 Padelford.

College Studies Program Sequences

Humanities/Fine Arts

Required: one sequence of 15 credits

Interpretation, Community, and Culture

C LIT 260 Interpretation as a Human Activity (5)

C LIT 360 Interpretation in Culture and Community (5)

C LIT 460 Interpretation in Humanistic Disciplines in the University (5)

Literature, Imagination, and Culture

three of the following:

ENGL 205 Method, Imagination, and Inquiry (5)

ENGL 306 Literature, Literary Study, and Society (5)

ENGL 307 Literature and the Age (5)

ENGL 346 Critical Practice (5)

ENGL 408 Literature and the Other Arts and Disciplines (5)

Aesthetics and the Arts

ART H 200 Ideas in Art (5)

MUSIC 384 Ideas in Music (5)

and one from the following:

PHIL 445 Philosophy of Art (5)

PHIL 446 Development of Aesthetic Theory (5)

How to Think about Moral Problems

one from the following:

PHIL 102 Contemporary Moral Problems (5)

PHIL 240 Introduction to Ethics (5)

and two from the following:

PHIL 241 Topics in Ethics (5)

PHIL 340 History of Ancient Ethics (5)

PHIL 342 History of Modern Ethics (5)

PHIL 344 History of Recent Ethics (5)

PHIL 345 Moral Issues of Life and Death (5)

PHIL 411/MHE 474 Justice in Health Care (5)

The Classics in Literature and Life
three of the following:

- CLAS 320 Greek and Roman Private and Public Life (5)
CLAS 322 Intellectual History of Classical Greece (5)
CLAS 410 The Classical Tradition (5)
CLAS 427 Greek and Roman Tragedy in English (5)
The Spectrum of Literature
C LIT 200 Introduction to Comparative Literature (5)
C LIT 370 The Scope of Literary History (5)
C LIT 400 Introduction to the Theory of Literature (5)

Argumentation in Society

- SPCH 334 Essentials of Argument (5)
and two from among:
SPCH 424 Rhetorical Perspective in Revolutionary Documents (5)
SPCH 426 American Public Address (5)
SPCH 428 British Public Address (5)
SPCH 434 Argumentation Theory (5)

Art in Public Places

- ART 275 A World History of Art in Public Places (5)
ART 276 Contemporary Directions, Art in Public Places (5)
ART 332 Intermediate Sculpture Composition (5, max. 15)

Social Sciences

Required: one sequence of 15 credits

Science in Civilization

- HST 311 Science in Civilization: Antiquity to 1600 (5)
HST 312 Science in Civilization: Science in Modern Society (5)
and either HST 313 Science in Civilization: Physics and Astrophysics Since 1850 (5)
or MHE 424 Modern Biology in Historical Perspective (5)

American Ethnic Studies

- AES 362/SOC 362 American Race and Ethnic Relations (5)
AES 363 Foundations of Ethnic Studies (5)
AES 364 American Ethnicity in the Twenty-first Century (5)

Political Economy

- POL S 270 Introduction to Political Economy (5)
POL S 370 Government and the American Economy (5)
POL S 475 Public Choice (5)

Evolution of Political Power

- POL S 273 The Concept of Political Power (5)
ANTH 373 Stateless Societies: An Ethnographic Approach to Noncentralized Political Systems (5)
POL S 411 Theories of the State (5)

People as Scientists of Themselves

- PHIL 460 Philosophy of Science (5)
PSYCH 464 Metacognition (5)
and either PSYCH 462 Human Memory (5)
or PSYCH 466 Psychological Aspects of Judgment and Decision (5)

American Political Culture

- ENGL 281/POL S 281 Introduction to American Political Culture (5)
and two from among:
ENGL 282 American Literature and Political Culture: Origins to 1865 (5)
ENGL 283 American Literature and Political Culture: 1865 to Present (5)
POL S 318 American Political Thought (5)
HSTAA 410 American Social History: The Modern Era (5)

Language and Society

- ANTH 203 Introduction to Linguistic Anthropology (5)
ENGL 465 Language and Social Policy (5)
ENGL 466 Language Variation and Language Policy in North America (5)

Medicine and Society

ANTH 475/HSERV 475 Comparative Systems of Healing (5)
MHE 440/PHIL 459 Philosophy of Medicine (5)

Natural Sciences

Required: one sequence of 15 credits

The Universe

- ASTR 210 Distance and Time: Size and Age in the Universe (5)
ASTR 211 The Universe and Change (5)
ASTR 212 Life in the Universe (5)

The Physical World

- PHYS 214 Light and Color (5)
PHYS 215 Order and Disorder (5)
PHYS 216 Time and Change (5)

Natural Science and the Environment

- ENV S 203 Introduction to Physical Sciences and the Environment (5)
ENV S 204 Introduction to Biological Sciences and the Environment (5)
ENV S 207 Introduction to Global Environmental Issues (5)

Biological Perspectives

- BIOL 150 Biology: The Organism (5)
BIOL 151 Biology: The Cell (5)
BIOL 152 Biology: Ecology and Evolution of Organisms (5)

Cognitive Science

- PSYCH 354 Introduction to Cognitive Science (5)
taken concurrently with
CSE 205 Introduction to Programming in LISP (3) (or background for CSE 415)
followed by
CSE 415 Introduction to Artificial Intelligence (5)
and one from the following:
PHIL 464 Philosophical Issues in the Cognitive Sciences (5)
ANTH 358 Culture and Cognition (5)
LING 442 Introduction to Semantics (4) and LING 499 Undergraduate Research (1)

Human Biology and Behavior

- PHY A 372 Evolutionary and Nonevolutionary Views of the Human Species (5)
taken concurrently with
PHY A 499 Undergraduate Research (1)
WOMEN 453/ANTH 483 Women in Evolutionary Perspective (5)
ZOO 409 Sociobiology (4)

Our Chemical World

- CHEM 100 Chemical Science (5)
CHEM 203 Chemistry and the Environment (5)
CHEM 205 Chemistry of Life (5)

Major Requirement

In fulfilling the requirements for a major, the student engages in thorough study of a discipline or subject, aimed at developing knowledge in depth. This part of the student's program is determined by the department, school, or faculty committee with which the major study is pursued. Measured in academic credits, the "major" required of each student consists of 50 or more prescribed credits in a department of the college or a closely related group of departments. Descriptions of major programs are printed below.

Credits Required Outside Major Department

So that the student will not be tempted to specialize prematurely, the college limits to 90 the number of credits from a single department that the student may elect to count in the 180 credits required for the baccalaureate degree. A department itself may require no more than 70 credits from courses within the department, and no more than 90 credits from within the department and related fields combined, as constituting its major program for the baccalaureate degree. These limits may be exceeded only by the amount that a department elects to require credits in addition to the 180 minimum for graduation. Exceptions to these restrictions may be granted by the Dean under very unusual circumstances.

Grade-Point Average Required for Graduation

To be eligible to receive the baccalaureate degree, the student must achieve at least a 2.00 cumulative grade-point average in the major (some departments prescribe a higher minimum grade-point average for the major), as well as a 2.00 cumulative grade-point average for all work done in residence at the University.

Applying for Graduation

Students should apply for the baccalaureate degree no later than the first quarter of their final year. They may choose to graduate under the graduation requirements of the *General Catalog* published most recently before the date of entry into the college, provided that no more than ten years have elapsed since that date and provided that approval of the major department has been obtained. As an alternative, a student may choose to fulfill the graduation requirements as outlined in the catalog published most recently before the anticipated date of graduation. All responsibility for fulfilling graduation requirements rests with the student concerned.

Limits on Physical Education and ROTC Courses Allowed Toward Graduation

A student graduating from the College of Arts and Sciences may count a maximum of three 1-credit, 100-level physical education courses taken at the University of Washington, or their equivalents at other collegiate institutions, as elective credits toward graduation. At present, physical education courses are not offered at the University. Up to 18 credits in upper-division ROTC courses also may be counted as elective credits toward graduation, but no lower-division ROTC credits may be counted.

Evening Degree Program

Students may earn a degree in General Studies, with an option either in humanities or social sciences, through the Evening Degree Program. Admission to the Program requires the following: 75 college credits, normally to include Arts and Sciences proficiency and W-course requirements (English composition, quantitative and symbolic reasoning, one year of a single foreign language, W/courses), and a substantial portion of the general education requirements (distribution courses and linked sets). Students who have only a few remaining prerequisite courses to complete may, under certain circumstances, be admitted as pre-majors.

Major requirements: Minimum 2.00 grade-point average for all courses taken in residence at the University of Washington and minimum 2.25 grade-point average for courses taken to satisfy the major requirements.

HUMANITIES OPTION—65 credits as follows: 15 credits of second-year foreign language (or 15 credits national literatures and civilizations); 10 credits language, linguistics, and rhetoric; 10 credits religion, philosophy, and intellectual history; 15 credits national literatures and civilizations; 10 credits history of the arts; 5 credits senior study.

SOCIAL SCIENCES OPTION—60 credits as follows: 15 credits as social science survey courses (e.g., ANTH 202, SOC 271, POL S 202); 25 credits from one of the following four tracks: social and ethical theory; law, politics, and the state; culture and ethnicity; economy and ecology; 15 credits track electives (selected from courses outside the principal track); 5 credits senior study.

Major requirements are to include not more than 15 credits in 200-level courses (excluding foreign language credits) and must include at least 20 credits in 400-level courses. For course lists, consult the Evening Degree Program adviser (housed in UW Extension, 5001 25th Avenue N.E.) or the Arts and Sciences Advising Office (B10 Padelford).

Certification for Teaching

Students following programs that lead to a baccalaureate degree in the College of Arts and Sciences may qualify for certification for public schools teaching in the state of Washington by including in their degree programs the courses required for certification as determined by the faculty of the College of Education.

Information on the requirements for certification and admission to the certification program is available in the College of Education section of this catalog and from an education adviser in 211 Miller.

Special Services and Programs for Undergraduates

Premajor and Preprofessional Advising

Director of Academic Counseling

Richard Simkins

Associate Director of Academic Counseling

Richard Newcomb

Academic Counselors

Kenneth Etzkorn
Louis Fox
Barbara Harnisch
Nancy Hennes
Janet Kime
Beret Kischner
Lindsay Michimoto
Kelli Jayn Nichols
Deborah Prince-Fenner

B10 Padelford

Students who do not make a definite choice of major when entering the University are designated premajor students. An adviser in the Arts and Sciences Advising Office will assist them in designing a program of studies that will meet the general requirements of the college and provide them with information about possible major fields. The Arts and Sciences Advising Office also provides the following: assistance in exploring academic options; information about degree programs; preprofessional advising for such areas as medicine, dentistry, law; options for students on academic probation; preliminary career counseling; a wide range of information on registration, course offerings, degree requirements, and administrative procedures. Premajor students must make a selection of major by the time they have earned 105 credits. Transfer to a department major from premajor status sometimes requires completion of prerequisite courses, attainment of a minimum specified grade-point average, or selection by the department from among a group of prospective majors.

College Honors Program

Director

Stevan Harrell

Associate Director

Randolph Y. Hennes
B10 Padelford

This four-year program features special counseling, honors courses, honors sections of regular courses, faculty/student colloquia, and opportunities for independent study. It provides expanded opportunities for undergraduate education to those students who show exceptional intellectual promise. For additional information, see Honors—Arts and Sciences section.

Graduate Study

Students who intend to work toward advanced degrees must apply for admission to the Graduate School and must meet the general requirements outlined in the Graduate School section of this catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree that are in force at the time the degree is to be awarded.

Afro-American Studies

See *American Ethnic Studies*.

American Ethnic Studies

B509 Padelford

Johnella E. Butler, Chairperson

The Department of American Ethnic Studies is a multicultural and multiracial research, teaching, and service unit dedicated to providing knowledge in the study of ethnicity and ethnic relations. Through the department's four programs—Afro-American, American Ethnic, Asian American, and Chicano Studies—students are provided with interdisciplinary, ethnic-specific, and comparative concepts, theories, and methods of inquiry, which shape the cultural, social, historical, economic, and political character of selected American ethnic communities.

Students may major in American Ethnic Studies (program subject to approval). In addition, the following culture-specific majors are offered: (1) Afro-American Studies and (2) General Studies with a concentration in Asian American Studies or Chicano Studies.

Undergraduate Programs

Afro-American Studies

B504 Padelford

Afro-American Studies is an interdisciplinary program that offers a variety of courses, often in cooperation with related traditional disciplines on campus, covering the numerous aspects of the Afro-American experience. The program is designed to provide students with a broad, in-depth understanding of the historical, linguistic, esthetic, social, political, and economic dimensions of Afro-American life and culture from a Black perspective. Special attention is given to theories of social change that have been offered by renowned thinkers in community development, the liberation of all oppressed peoples, and global humanitarianism.

Bachelor of Arts Degree

Major Requirements: 55 credits distributed as follows: 30 credits in core courses (AFRAM 105, 150, 201; 210 or 270; 330; ENGL 358 or MUSIC 319); 10 credits in one of three emphasis areas (history and cultural heritage, social/political analysis, arts and humanities)—course-option list available in B504 Padelford; 15 credits in advanced courses (AFRAM 430; 480; 440 or 490).

Faculty

Director

John C. Walter

Professors

Scott, Joseph W.,* 1985, (Sociology),† M.A., 1959, Ph.D., 1963, Indiana; political sociology, family sociology, race/ethnic relations.

Walter, John C., 1989, M.A., 1968, Bridgeport; Ph.D., 1971, Maine (Orono); history, political economy, Afro-American and Caribbean history, women's history.

Associate Professor

Butler, Johnella E.,* 1987, (American Ethnic Studies),† (English, Women Studies), M.A.T., 1969, Johns Hopkins; Ed.D., 1979, Massachusetts; Afro-American literature, multicultural education.

Lecturer

Black, Albert W., Jr., 1972, M.A., 1968, Wayne State; Ph.D., 1976, California (Berkeley); sociology.

Course Descriptions

Courses for Undergraduates

Afro-American Studies

AFRAM 105 The Sociology of Black Americans (5) Evaluates the sociocultural context of the Black person's environment and consequences of interaction with that environment. Joint with SOC 105.

AFRAM 150 Afro-American History (5) Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in Afro-American history. Joint with HSTAA 150.

AFRAM 200 Proseminar in Afro-American Studies (5) AWSp Interdisciplinary survey of Afro-American Studies, presenting the unique Black perspective on the relevant disciplines in arts and sciences.

AFRAM 201 Introduction to Black Studies (5) History, culture, religion, institutions, politics, economics, arts, and psychology of peoples of African descent as developed from experience in both the old and new worlds. Multidisciplinary analysis of social life from a Black perspective as illustrated in selected historical and contemporary writings. Not open for credit to students who have taken 100. (Formerly 100.)

AFRAM 210 Resources in Afro-American Research I (3) Compilation of annotated subject bibliography of Afro-American Studies topics, with emphasis on secondary sources, general reference sources, and social sciences. Not open for credit to students who have taken 230. (Formerly 230.)

AFRAM 211 Perspectives on African American Language (5) AWSp Aspects of the dialect spoken by the majority of Americans of African descent. History, linguistic description, and exploration of its artistic uses. Recommended: introduction to linguistics, Afro-American literature, and/or African literature. Not open for credit to students who have taken 210. (Formerly 210.)

AFRAM 212 Creative Expression for African-American Children (5) New and developing theories and practices of creative expression for African-American children. Students demonstrate techniques and practices learned. Not open for credit to students who have taken 280. (Formerly 280.)

AFRAM 250 The Afro-American and the U.S. Supreme Court (5) Laws passed by Congress, and the Constitution as interpreted by the Supreme Court, dealing with the conditions of Afro-Americans in the United States.

AFRAM 260 Black Male/Female and Family Relationships (5) The Black family in the United States as a social institution. Effects of residence in a race-conscious society on interpersonal relationships between Black men and women. Exploration of proposals for strengthening the Black family in the United States. Joint with SOC 260.

AFRAM 270 The Jazz Age (5) *Walter* Interdisciplinary study of the period after World War I to the Great Crash. Afro-American and Anglo-American currents and impulses that flowed together in the Roaring Twenties. Covers politics of "normalcy," economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz.

AFRAM 271 The Sixties in America: Conflict, Confrontation, and Concession (5) Afro-American and white politico-cultural movements that collided in "The Elvis Decade," 1960-1972. Includes politics of confrontation and civil disobedience, economics of "guns and butter," literature of conflict and angst, polarization of the arts, transformation of race relations, role of Rock, and influence of domestic politics on foreign relations.

AFRAM 272 History of the South Since the Civil War (5) Reconstruction and its aftermath, the Agrarian (Populist) revolt, disfranchisement and segregation, the effects of urbanization and subsequent depression, desegregation, and the struggle for civil rights. Examines the New South, the conflict of ideology with structural and material change, and the place of the South in contemporary America.

AFRAM 306, 307, 308 Basic Swahili (5,5,5) A,W,Sp Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty. Prerequisites: 306 for 307; 307 for 308.

AFRAM 320 Black Women in Drama (5) Character types of Black women as represented in plays by Black women. Some Black male playwrights are juxtaposed with Black female writers for comparative analysis. Playwrights include Georgia Douglas Johnson, Angelina Grimké, Alice Childress, Lorraine Hansberry, Ira Aldridge, LeRoi Jones. Prerequisites: 200, 212 or permission of instructor.

AFRAM 321 History of Afro-American Women and the Feminist Movement (5) "Feminist Movement" from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Joint with WOMEN 321.

AFRAM 323 African-American Women's History (5) W Survey of African-American women's experience in United States, 1600 to present. Includes: social, political, economic status of Black women in slavery, freedom, education, activism, Civil Rights, women's rights, other social movements. Explores individual and collective interactions with African-American men, white men and women, other people of color. Joint with WOMEN 323.

AFRAM 330 The Social Psychology of the Black Community (5) Internal dynamics of the African American community. Sociocultural factors influencing

psychological development of African Americans; social origins, institutional formation, and impact of white racism; social stratification in, and the political economy of, the African American community; structural and psychological characteristics of domination; social determinants for social transformations.

AFRAM 358 Literature of Black Americans (5) Selected writings—novels, short-stories, plays, poems—by Afro-American writers. The historical and cultural context within which they evolved. Differences between Afro-American writers and writers of the European-American tradition. Emphasis varies. Joint with ENGL 358.

AFRAM 370 Afro-American Political Thought (5) Political ideologies and philosophies of pivotal Afro-American historical figures and the conditions under which these ideologies are developed, rejected, and transformed. How ideologies relate to solution of Afro-American political problems. Prerequisites: SOC 362, PHIL 110, or permission of instructor.

AFRAM 401, 402, 403 Intermediate Swahili (5,5,5) A,W,Sp Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisites: 308 or equivalent for 401; 401 for 402; 402 for 403.

AFRAM 440 Community Practice (3-5, max. 15) Internship in various Seattle community service agencies (e.g., CAMP, Planned Parenthood). Students contribute their newly acquired skills and knowledge to the Afro-American community. Experience in working with professional community organizers. Not open for credit to students who have taken 301. Recommended: junior or senior standing. (Formerly 301.)

AFRAM 480 Contemporary Issues in Afro-American Studies (5) Five issues selected for their contemporary importance in Afro-American studies. Synthesis of different perspectives and approaches to the study of the Black experience. Prerequisites: senior standing and 201 or completion of Afro-American Studies core courses.

AFRAM 490 Research in the Black Community (1-5, max. 10) AWSp Identification and investigation of the problems and needs of the Black community. Methods and alternatives of approaching these problems and needs. Students designate their areas of interest and subsequently pursue research and problem solving. Prerequisite: permission of instructor.

AFRAM 492 Special Topics in Afro-American Studies (3-5, max. 15) Topics in which students and faculty have developed an interest as a result of work done in other classes or as a result of the need to investigate in greater depth Afro-American Studies issues. Topics vary. Prerequisite: 200 or permission of instructor.

American Ethnic Studies

B504 Padelford

Bachelor of Arts Degree

(Approval pending.)

Admission Requirement: 2.00 grade-point average required for consideration; 2.50 grade-point average, or higher, is indicative of motivation and academic skills needed for reasonable probability of success in program.

Major Requirements (proposed): 80 credits distributed as follows: (1) 35 credits in core courses—AES 150, 151, 250, 251, 362, 401, 495 (see departmental adviser for substitutions); (2) culture-specific courses (30 credits)—chosen from introductory offerings in Afro-American, American Indian, Asian American, Chicano, or American Ethnic Studies; (3) courses in a discipline outside the major (10 credits)—chosen in consultation with departmental adviser; (4) American Ethnic Studies writing course (5 credits)—chosen from among Ameri-

can Ethnic Studies writing courses other than AES 495; (5) minimum grade-point average of 2.50 in courses taken to satisfy (1) and (2), above.

Course Descriptions

Courses for Undergraduates

American Ethnic Studies

AES 150 Introductory History of American Ethnic Groups (5) *Gamboia, Salas* Survey of the history of African Americans, Asian Americans, Chicanos, and American Indians in the United States.

AES 151 Introduction to the Cultures of American Ethnic Groups (5) Survey of the cultures of Chicano, African American, Asian American, and American Indian communities of the United States. Each group's culture is examined in its isolation and in its interaction with mainstream culture.

AES 214 Survey of Afro-American Literature (5) *Butler* A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic criteria of Afro-American literature. Joint with ENGL 214.

AES 250 Race in the American University (5) Racial integration in American institutions of higher education. Entry to, and impact on, American universities by people of color. History of ethnic studies and its relation to other disciplines. Recommended: 150, 151.

AES 251 Politics of Institutional Change (5) Survey of ideologies, values, and structures of political and educational institutions. Emphasis on student experience in conceptualizing, designing, and implementing reforms in American political and educational institutions.

AES 275 Civil Rights (5) *Olguin* Examines the history of civil rights in the United States, focusing on efforts of the dispossessed to gain those rights. Questions considered include: (1) What are Civil Rights? (2) How is the content of civil rights determined? (3) What actions are open to groups excluded from those rights?

AES 322 Race and Gender: Historical Perspectives (5) Sp *Yee* The intersection of race and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, sexism, activism, sexuality, and interracial dynamics between women of color groups. Joint with WOMEN 322.

AES 350 Ethnic Minority Group Life in America (5) Examines the sociological characteristics of ethnic minority group life in America. Covers American ethnic minorities, such as Japanese, Chinese, Filipino, Pacific Islander, Black Americans, Mexican Americans, and Native Americans. Recommended: 250, 251.

AES 360 Political Economy of Race in the United States (5) *Olguin* Asks the question, "Why do people accept unequal status?" Introduces explanations of the political and economic inequality of third world people in the United States, the accuracy of these explanations, and how they help or hinder efforts of these communities to improve their condition.

AES 361 Ethnicity, Business, Unions, and Society (5) *Scott* The interrelationships of ethnicity, business, unions, and the larger society. Examines how the business and manufacturing sector is structured financially and sociologically, how this sector performs, and the consequences of these performances for selected ethnic groups in the United States. Prerequisites: Introductory course in ethnic studies, and either economics or sociology.

AES 362 American Race and Ethnic Relations (5) *Black, Kashima, Olguin, Scott* Interracial contacts and conflicts. Joint with SOC 362. Prerequisite: SOC 110.

AES 363 Intellectual Foundations of Ethnic Studies (5) *Olguin* Seeks to define the essence of a "discipline" and to locate ethnic studies on the spectrum of disciplines.

AES 384 American Ethnicity in the Twenty first Century (5) Through analysis of past and present literature and trends, examines the potential for extinction and/or preservation of ethnicity and ethnic American culture in twenty first century America. Recommended: 362, 363.

AES 401 Junior Seminar: Introduction to Research Techniques (5) Survey of research techniques current in the fields of sociology, political science, history, law, and in linguistic approaches to social knowledge. Prepares majors to write senior thesis. Prerequisites: 250, 251, and 362 which may be taken concurrently.

AES 461 Comparative Ethnic Race Relations in the Americas (5) Sketches the ethnoracial systems operating in American society. Studies these systems as systems, and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Joint with SOC 461.

AES 462 Comparative Race and Ethnic Relations (5) *Scott* Race and ethnicity are examined as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Joint with SOC 462. Recommended: AES/SOC 362.

AES 495 Senior Seminar: Senior Thesis (5) Focuses on the individual research topics of senior American Ethnic Studies majors. All students focus on a central comparative theme. Prerequisite: 401.

AES 498 Special Topics in American Ethnic Studies (1-5, max. 15) An interdisciplinary course, designed to provide the student an opportunity to concentrate on one specific aspect of American Ethnic Studies, with a comparative approach.

Asian American Studies

B501 Padelford

Asian American Studies is an interdisciplinary program designed to study and transmit the experience of persons of Asian descent in America. Instruction is offered in three areas: (1) a general survey and contemporary issues class on the history and culture of Asian Americans; (2) courses focused on specific Asian American groups; (3) special topics courses, as well as courses listed jointly with other departments. A General Studies degree in Asian American Studies and an Asian American Studies major and minor degree in education are available.

Faculty

Director

Tetsuden Kashima

Associate Professors

Kashima, Tetsuden,* 1976, (Sociology), M.A., 1968, San Francisco State; Ph.D., 1975, California (San Diego); sociology.

Wong, Shawn H.,* 1984, ‡(English), M.A., 1974, San Francisco State; creative writing, Chinese-American area studies.

Assistant Professors

Revilla, Linda A., 1989, M.A., 1984, Ph.D., 1989, California (Los Angeles); developmental psychology.

Tien, Liang, 1988, (Acting), M.A., 1978, Michigan; Ph.D., 1985, Denver; clinical psychology.

Course Descriptions

Courses for Undergraduates

Asian American Studies

AAS 205 Asian American Cultures (5) *A Kashima, Revilla, Wong* Asian American subcultures; evolution of Asian American cultures in the United States from 1850 to 1950—immigration patterns, evolution of subcultures, evacuation, interracial relations, assimilation, and signs of social disorganization. Not open to students who have taken GIS 305.

AAS 208 Contemporary Problems of Asian Americans (5) *W Revilla, Wong* Recent Asian American issues from 1950 to the present. Topics include ghetto communities, civil rights, identity problems and ethnicity, social organizations, political movements, and recent immigration.

AAS 220 Asian American Stereotypes in the Media (5) *A Wong* Asian stereotypes popularized by American literature, film, radio, and television and their effects on Asian American history, psychology, and community.

AAS 305 Asian American Cultures for Teachers (5) Specially designed for teachers who wish to learn more about the history, culture, and current concerns of Asians in the United States. Implications for elementary and secondary school are considered. Not open to students who have taken 205 or GIS 305. Prerequisite: permission of instructor.

AAS 350 Chinese American History and Culture (3) *Sp Wong* Experience of the Chinese in America from 1850 to the present. Transformation from an immigrant to Chinese American community: immigration patterns, anti-Chinese movements, ethnic sociopolitical and economic institutions, community issues, Chinese American culture. Prerequisite: 205 or equivalent or permission of instructor.

AAS 360 Filipino American History and Culture (3) *Sp Revilla* History and culture of the Filipino in America and the influence of an admixture of Filipino, Spanish, and American traditions on the Filipino immigrant and his or her descendants. Not open to students who have taken GIS 360. Prerequisite: 205 or equivalent or permission of instructor.

AAS 370 Japanese American History and Culture (5) *Sp Kashima* Historical roots and subsequent changes in the Japanese American group examined through an interdisciplinary approach. Topics include historical events, culture, values, social and community structures, institutions, occupations, and future orientations. Prerequisite: 205 or equivalent or permission of instructor.

AAS 375 The United States Supreme Court and Asian America (5) Covers relevant decisions of the United States Supreme Court related to Asian Americans, examines the effects of those decisions on that ethnic group. Includes evolving notions of equal protection, due process and relevant statutes such as the 1964 Civil Rights Act. Prerequisites: 205, 206, 370.

AAS 380 Asian American Communities and Social Policies (5) *WSp Kashima* History, culture, social organization, leadership patterns and interethnic relations of Asian American (Chinese, Filipino, Japanese, and Korean) communities. Origins and impact of social policies relevant to Asian American communities. Not open for credit to students who have taken 300. Prerequisite: 205 or equivalent or permission of instructor. (Formerly 300.)

AAS 385 Asian Americans: The Law and Immigration (5) Traces the evolution of United States immigration law and policy from the 19th Century to modern day, from free immigration to immigration restriction, through the elimination of race as a criterion, and culmination in the passage of the Simpson-Mezzoli bill. Prerequisites: 205, 206.

AAS 390 Asian American Family and Personality (5) *Tien* Examines the changes of Asian American family patterns through successive generations from the late 1800s to the present. The influence of Asian culture, Asian American experience, family patterns, and racial discrimination examined to understand their impact on the personality of Asian Americans. Prerequisite: 205 or 206.

AAS 392 Asian American Women (5) *Tien* History of and contemporary issues related to Asian American women in the United States. Joint with WOMEN 392. Prerequisite: 205 or 206.

AAS 401 Asian American Literature to the 1940s (5) *A Wong* Asian American literature from nineteenth century immigrants to the 1940s. Emphasis on Chinese, Japanese, and Filipino writings detailing the experience and sensibility of first generation immigrants. Early twentieth century writing focus on the development not only of Asian American community, but also of second generation American-born Asian American writers. Not open for credit to students who have taken 400. (Formerly 400.)

AAS 402 Contemporary Asian American Literature (5) *W Wong* Asian American literature from the 1940s to the present. Emphasis on the development of attitudes and identities in contemporary Asian American literature, the role of the writer in a minority culture, and the relationship of literature to self and society. Recommended: 401. Not open for credit to students who have taken 400. (Formerly 400.)

AAS 443 Undergraduate Field Experience (3-5, max. 15) *AWSpS Kashima* Faculty-supervised practicum experience in a variety of community settings and agencies dealing with Asian Americans. Prerequisites: 205 or 206, or equivalent, and permission of instructor.

AAS 490 Asian American Studies—Special Topics (3, max. 9) *AWSpS* Prerequisite: 205 or permission of instructor.

AAS 499 Undergraduate Independent Study (1-5, max. 10) *AWSpS* Prerequisites: 205 or equivalent and permission of instructor.

Chicano Studies

B525 Padelford

Chicano Studies offers an interdisciplinary curriculum that examines the historical and contemporary socioeconomic and political experience of people of Mexican descent in the United States. Emphasis is given to the student developing a broad understanding of the Chicano experience. In its approach, Chicano Studies strives to incorporate various disciplines, such as history, literature, political science, sociology, dance, and anthropology. The interdisciplinary nature of the curriculum prepares students for a wide range of advanced degrees or professional training in various fields.

Presently, a General Studies degree is available to students interested in following a program in this area. Additional information is available from the Chicano Studies adviser, B521 Padelford, or a General Studies adviser, B10 Padelford.

Friaz, Guadalupe M., 1989, Ph.D., 1989, California (Berkeley); economics, labor management.

Olguin, Rick A., 1986, M.A., 1982, Ph.D., 1986, Stanford; political theory, American minority political behavior, social science methodology.

Revilla, Linda, 1989, M.A., 1984, Ph.D., 1989, California (Los Angeles); developmental psychology.

Salas, Elizabeth, 1987, M.A., 1977, Ph.D., 1987, California (Los Angeles); United States women's history, Chicana history.

Chicano Studies

CHSTU 201 Introduction to Chicano Studies (5) *AWSp Gamboa* Selected themes in Chicano experience; studies in Chicano politics and Chicano socioeconomic concerns. Not open to students who have taken GIS 302 or CHSTU 102. (Formerly 102.)

CHSTU 202 Intermediate Chicano Studies (3) *AW Gamboa* Follows 201. Further understanding of selected themes in Chicano experience; studies in Chicano politics and Chicano socioeconomic concerns.

CHSTU 207 Chicano Consumer: Past and Present (3) Coordinates Chicano economic history with contemporary economic problems of Chicanos, emphasizing social, psychological, and financial aspects that deprive the Chicanos of their economic freedom. Not open to students who have taken GIS 207 or 208.

CHSTU 211 Beginning Mexican Folk Dance (3) *A* Fundamental technique course to increase appreciation and awareness of Mexican people and their culture through acquaintance with folk customs, historical backgrounds, costumes, and music. Expressive interpretation characteristic of regional dance forms. Regions include Oaxaca, Michoacan, Norte, and Jalisco. Not open for credit to students who have taken GIS 110 or CHSTU 110. (Formerly 110.)

CHSTU 212 Beginning/Intermediate Mexican Dance (3) *W* Regional Mexican folk dancing: dance, costumes, music, and customs, concentrating on the regions of Oaxaca, Michoacan, and Jalisco. Not open for credit to students who have taken GIS 111 or CHSTU 210. (Formerly 210.)

CHSTU 254 History of Chicanos in Washington State (5) *Sp Gamboa* History, extent, and results of the Chicano presence from earliest Spanish explorations to the present; contemporary problems of Chicanos in a broader national context. Not open for credit to students who have taken GIS 201 or CHSTU 204. (Formerly 204.)

CHSTU 255 Mexican Women: Past and Present (5) *Salas* Survey of women in Mexican society from Meso-American times to the 1940s.

CHSTU 256 Chicanas: Gender and Race Issues (5) *Salas* Contemporary issues in the Chicana movement since the 1940s. Issues range from feminism and Chicana political, educational, and social organizations, to work, family, health, and the arts.

CHSTU 280 Introduction to Chicano Politics (5) *Olguin* Surveys the political position and activities of Mexican-American peoples in the United States from two perspectives: (1) Chicanos as objects of the political process of United States life, (2) contributions of the Chicano people to United States politics.

CHSTU 310 Intermediate Mexican Folk Dance (3) *Sp* Expands the knowledge of Mexican folklore through research, dance, and music, enables students to create folk dance through the development of their own choreography. Prerequisite: 211 or 212 or equivalent.

CHSTU 330 Chicanos Themselves (5) *Olguin* Explores the issue of Chicano, or Mexican-American, identity. Examines statements of selfhood by Chicanos, studied in order to understand the relationship between individual and society in creating identity.

CHSTU 352 Mexican Immigration: A Comparative Analysis (5) *Gamboa, Salas* Examines and compares constant Mexican immigration with that of other immigrants to the United States as one of the most important issues confronting Chicanos and other Americans in the United States.

CHSTU 356 The Chicano Family (5) *Salas* The historical, psycho-social, and socio-cultural role of the Chicano family from Meso-American times to the present.

CHSTU 391 Independent Study (1-6, max. 10) *AWSp Friaz, Gamboa, Olguin, Salas* Students work individually or in teams. Prerequisite: permission of instructor.

CHSTU 405 Advanced Chicano Studies (3) *S Gamboa* Chicano culture as related to current values and health practices, Mexican labor and immigration in both historical and contemporary setting. Chicano politics 1848 to present. Recurrent problems of Chicanos in society; social movement for acceptance and for self-determination. Not open for credit to students who have taken 305. (Formerly 305.)

CHSTU 491 Special Topics in Chicano Studies (3-5, max. 10) *A Friaz, Gamboa, Olguin, Salas* Interdisciplinary course concentrating on one or more aspects of the Chicano experience.

American Indian Studies

C514 Padelford

The American Indian Studies Center, a division of the Department of Anthropology, offers courses focusing on American Indian cultures, perspectives, and problems, with the goal of enriching the liberal education of the general student. Courses are equally divided between the humanities and social sciences: Some survey Indian cultural developments in art, music, language, and literature and offer performance and studio experience; others explore the historical and contemporary interaction of Indians in American society and the application of social science theories to Indian societies and institutions. American Indians have been an integral part of the historical, cultural, and legal development of this country. These courses provide students with an opportunity to broaden their understanding of their own history, regardless of their ethnic origins.

A major emphasizing American Indian Studies is available through the Department of Anthropology. All AIS courses except AIS 102 may count toward that major. No more than 6 credits of any combination of AIS 253 and AIS 350 may be counted toward the major.

Faculty

Director

Marilyn G. Bentz

Professors

Hunn, Eugene S., 1972, M.A., 1969, Ph.D., 1973, California (Berkeley); cognitive anthropology, ethnobiology, cultural ecology and evolution, North American Indians.

Witherspoon, Gary J., 1987, M.A., 1968, Arizona State; M.A., 1969, Ph.D., 1970, Chicago; anthropological studies in religion, language, art, and history; American Indians, Navajo.

Associate Professor

Lane, Barbara, 1975, (Affiliate), M.A., 1948, Michigan; Ph.D., 1953, Washington; anthropological and ethnographical studies, American Indians.

Assistant Professors

Lomawaima, Kimberly Tsianina, 1988, M.A., 1979, Ph.D., 1987, Stanford; anthropological studies in institutions of cultural contact; education, ethnohistory and oral history; native North America.

Vangen, Kathryn W. S., 1985, (English), M.A., 1982, Ph.D., 1987, Washington; modern poetry, American and Native American literature, feminist theory.

Senior Lecturer

Bentz, Marilyn G., M.S.W., 1967, Illinois; Ph.D., 1984, Washington; anthropological studies in education, psychological studies of American Indians; social work and American Indians.

Lecturers

Barsh, Russel L., 1990, J.D., 1971, Harvard; indigenous peoples and international affairs; policy cycles in Native American history; contemporary Indian issues.

Fritzemeler, Barbara W., 1990, J.D., 1980, Hastings College of Law; Indian legal issues.

Oliver, Marvin E., 1974, M.F.A., 1973, Washington; Northwest coast Indian art.

Course Descriptions

Courses for Undergraduates

AIS 110 American Indian Song and Dance Traditions (3) *A* Vocal technique, instrumental accompaniment, and song and dance traditions from different cultural areas of native North America.

AIS 113, 114, 115 American Indian Language: Navajo (5,5,5) *Witherspoon* Conversation, reading, and writing in Navajo. Oral literature and other aspects of Navajo culture integrated into language study. Prerequisites: 113 for 114; 114 for 115.

AIS 151 Indian Art of Northwest Coast (3) *Sp Oliver* Studio course on Pacific Northwest coast Indian/Eskimo art. Traditional and contemporary forms; principles of form, style, and techniques; values that influence Indian/Eskimo art styles. Not open for credit to students who have taken ART 101.

AIS 170 Survey of North American Indian Art (5) Major Indian art traditions of North America. Precontact and early-contact-era traditions, and the evolution of Indian art forms in contemporary times. Design and techniques in Indian art.

AIS 201 Introduction: Ethnohistory of Native North America (5) *A Lomawaima* Survey of Native American cultural origins/histories from archaeological, historical, and native perspectives: presents traditional creation accounts and oral histories, archaeological and ethnohistorical evidence. Focus on cultural dynamics—change and continuity through prehistoric, protohistoric, colonial, and American periods. (Formerly 102.)

AIS 202 Introduction to Contemporary Experience in Indian America (5) *W Lomawaima* Survey of contemporary Native American cultures, issues, and lifestyles. Focus on understanding modern native cultures through the experiences and perspective of individuals. Readings include contemporary narrative, literature, and autobiographies. Secondary focus on relevant regional and national issues, e.g., water rights, land claims, education.

AIS 203 Introduction: Philosophical and Aesthetic Universes (5) *Sp Witherspoon* Social constructions of reality, aesthetic as well as imaginative, as conceptualized by approximately five traditional American Indian cultures from different regions of North America.

AIS 240 American Indian Women In Society (5) Sp Bentz Indian women in the social structure; historical and contemporary roles; changes in male-female relationships; problems and opportunities of contemporary women; the feminist movement and Indian rights.

AIS 253 Wood Design (3, max. 9) AWSp Oliver Studio course in wood sculpture utilizing Pacific Northwest Indian hand tools. Properties of woods and their uses.

AIS 311 North American Indians: Pacific Northwest (5) Lane Traditional societies of the Pacific Northwest from southern Alaska to northern California; significant areal features, such as rank, totemic crests, guardian spirits, the potlatch, fishing, and foraging illustrated by comparisons and by selected ethnographic sketches. Continuity between past and present. Prerequisite: ANTH 100 or 202 or permission of instructor.

AIS 312 Northern American Indians: The Intermountain West (5) Hunn Traditional cultures of Columbia and Fraser Plateau region and Great Basin: Interior Salish, Sahaptin and Nez Perce, Palute, and their neighbors. Regional features of language, ecology, social life, myth, religion. Contemporary issues of reservation life, government, ethnic conflict in historical perspective. Recommended: ANTH 100 or 202.

AIS 316 North American Indians: The Southeast to 1850 (5) Lomawaima Emphasis on prehistory, social organization, belief system, political alliances. European contact, effects of plantation slavery and slave trade on Indians, issues of ethnicity, and consequences of removal policies.

AIS 317 North American Indians: The Southwest (5) Witherspoon Overview of history and ethnography of the Southwest with emphasis on Apaches, Pueblos, and Pimans/Yumans. Social organization, religion, worldview, and expressive culture of such specific groups as Navajo, Hopi, Zuni, Tewa, and Papago. Prerequisite: ANTH 100 or 202.

AIS 330 United States-Indian Relations (5) Witherspoon Trends in interrelations of native Americans and European immigrants since 1500. Current problems in Indian-White relationships examined in historical context. Development of Indian policy and consequences of major legislative acts, including the Allotment Act, Indian Reorganization Act, termination and relocation. Implications for contemporary Indian education, religion, and health.

AIS 331 History of American Indian Education (5) Lomawaima Traditional and European-introduced methods of schooling, the federal role in Indian education, and contemporary Indian education issues. Special attention to Indian concepts of learning; boarding school education; the role of the Bureau of Indian Affairs; current trends in bilingual and bicultural education for Indians.

AIS 335 Legal Problems of the American Indian (5) Legal status of the American Indian with emphasis on the reservation; heirship, land ownership and use; mineral, water, fishing, and hunting rights; and problems related to self-determination. Not open for credit to students who have taken AIS 317.

AIS 340 Indian Children and Families (3) Bentz Psychosocial development of the Indian child and family. Historical changes in family structure; value orientations; and social adaptations to a bicultural environment.

AIS 350 Two-Dimensional Art of the Northwest Coast Indians (3, max. 9) WSp Oliver Studio course emphasizing principles of structure and style of two-dimensional art on the Northwest Coast; analysis of traditional pieces (painted storage boxes and chests, house panels, ceremonial screens, etc.).

AIS 377 Contemporary American Indian Literature (5) Vangen Creative writings—novels, short stories, poems—of contemporary Indian authors; the

traditions out of which these works evolved. Differences between Indian writers and writers of the dominant European/American mainstream. Joint with ENGL 377.

AIS 450 American Indian Song and Dance Tradition: Performance (3) Wapp Performance of various American Indian social dances, songs, and games. In-depth study of various American Indian vocal styles.

AIS 469 Special Studies in American Indians (3, max. 6) AWSpS Delineation and analysis of a specific problem or related problems in American Indian Studies. Offered occasionally by visitors or resident faculty. May be repeated for credit by permission. Prerequisite: permission of instructor.

AIS 475 Special Topics in Indian Studies (1-5, max. 15) AWSpS Current research and readings in American Indian Studies content areas.

AIS 499 Independent Study (1-5, max. 15) AWSpS Readings and/or research under faculty supervision.

Anthropology

M32 Denny

Anthropology is the study of the physical, cultural, and social development; comparative biology; and variation in the customs and beliefs of human beings. The primary fields within the discipline include archaeology, physical anthropology, and sociocultural anthropology, with anthropological linguistics being included in the latter. All of these fields are represented in the department's curriculum and in the faculty's research. Also offered is specialized degree training at the M.A. level in museology in cooperation with the Burke Museum.

Undergraduate Program

Advisers
405 Denny

Major Requirements: PHY A 201, ANTH 202, 203, ARCHY 205; one of the following: STAT 220, STAT 311, Q SCI 381, BIOST 472; 30 additional credits in anthropology selected from both upper- and lower-division courses, but excluding ANTH 100, AIS 102, and ARCHY 105, which may not be counted toward the major. No more than 6 credits from any combination of AIS 253 and AIS 350 may be counted toward the major. At least 25 credits in the major must be with the grade of 3.0 or above. Courses in which a grade of 1.9 or less is received may not be counted toward the 55 credits required. Transfer students must complete a minimum of 15 upper-division credits in anthropology at this university. Required courses in anthropology taken by transfer and returning students more than 10 years past must be repeated. Students who plan to undertake graduate work should elect one foreign language.

Graduate Program

Eric A. Smith, Graduate Program Coordinator

The department recognizes three principal subfields of anthropology within its faculty, programs, and curriculum: archaeology, physical anthropology, and sociocultural anthropology (including anthropological linguistics). The department offers three distinct Ph.D. programs within the subdisciplines, an M.A. program in physical anthropology, and a special M.A. program in museology. A Ph.D. program in sociocultural anthropology with emphasis in ethnomusicology is offered in cooperation with the School of Music. The M.A. degree may be earned within the Ph.D. programs as a thesis or nonthesis degree. Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies.

Admission Requirements

Applicants are admitted to begin study only during an Autumn Quarter and are advised to have their application materials completed by the beginning of the prior February. A complete application file includes the Graduate School Application, two official transcripts, the Supplementary Information Form, three recommendations, and scores from the Graduate Record Examination (GRE). Students applying from outside of North America are not required to take the GRE for admission, but it is recommended that they take the GRE if possible. Foreign students (except for those from English-speaking countries) are required to take the TOEFL exam.

Program Requirements

For each of the respective graduate programs, completion of the core requirements and a reading knowledge of one foreign language are required. The M.A. degree may be earned with completion of a thesis or with a nonthesis program. The student elects the subfield and the particular problems or areas within it to be emphasized. Under the guidance of a supervisory committee selected from this subfield, the student shapes an individual program. The major areas emphasized in the faculty and curriculum are: North America, Africa, South Asia, China, Southeast Asia, and Oceania. The M.A. programs usually require two years of graduate study; the Ph.D. programs usually require at least three years beyond the master's level, including a year of independent field research and a year to organize field materials and write a doctoral dissertation.

Financial Aid

Fellowships are awarded to a few outstanding entering students. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Modest travel grants are available for summer fieldwork under faculty grants and department-supported fellowships. Some students may be qualified for a few National Resource Fellowships for Language Studies. The Ronald J. Olson Fellowship provides one year of support for entering students with interests in Native North America. Work study positions in the anthropology division of the Burke Museum are also available for eligible graduate students.

Charles F. Keyes

Professors

Chrisman, Noel J.* 1973, ‡(Community Health Care Systems, Family Medicine), Ph.D., 1968, M.P.H., 1967, California (Berkeley); medical anthropology, urban anthropology, American culture, social support networks.

Dunnell, Robert C.* 1967, (Quaternary Research Center), Ph.D., 1967, Yale; archaeological theory, field methods, eastern North America.

Eastman, Carol M.* 1967, (Linguistics, Women Studies), Ph.D., 1967, Wisconsin; language and culture, anthropological linguistics, Bantu languages and literature (especially Swahili), Northwest languages (especially Haida).

Grayson, Donald K.* 1975, M.A., 1969, Ph.D., 1973, Oregon; North American prehistory, paleoecology, vertebrate faunal analysis, history of archaeology.

Harrell, C. Stevan,* 1974, (International Studies), † M.A., 1971, Ph.D., 1974, Stanford; family systems, demography, social evolution, religion, China, Taiwan.

Holm, Bill,* 1968, (Affiliate), (Art), M.F.A., 1951, Washington; Northwest coast, plains, and plateau art.

Hunn, Eugene S.,* 1972, M.A., 1969, Ph.D., 1973, California (Berkeley); cognitive anthropology, ethnobiology, cultural ecology and evolution, North American Indians.

Keyes, Charles F.,* 1965, Ph.D., 1965, Cornell; interpretive anthropology, religion and politicoeconomic change, ethnic group relations, sociology of Theravada Buddhism, mainland Southeast Asia.

Krieger, Alex D., 1961, (Emeritus), M.A., 1939, Oregon; D.Sc., 1954, Universidad Nacional de Mexico; anthropology.

Nason, James D.,* 1970, M.A., 1967, Ph.D., 1970, Washington; sociocultural anthropology, museology, culture change, material culture, Micronesia, North America.

Neuman, Daniel M.,* 1978, ‡(Music), Ph.D., 1974, Illinois; ethnomusicology, South Asia, social organization, cultural anthropology.

Newell, Laura L.,* 1972, (Orthodontics), M.A., 1957, Northwestern; Ph.D., 1967, Washington; primatology growth and development, human biology, evolutionary aspects of dermatoglyphics.

Newman, Marshall T., 1966, (Emeritus), M.A., 1935, Chicago; Ph.D., 1941, Harvard; anthropology.

Nute, Peter E.,* 1972, Ph.D., 1969, Duke; genetics and evolution.

Osborne, Oliver H.,* 1969, ‡(Psychosocial Nursing), M.A., 1960, New York; Ph.D., 1968, Michigan State; cross-cultural health, mental health, nursing, social/cultural anthropology, Africa.

Ottenberg, Simon,* 1955, (Emeritus), (Political Science), Ph.D., 1957, Northwestern; art, esthetics, politics, law, ethnicity.

Quimby, George I.,* 1937, (Emeritus), M.A., 1937, Washington; museology, culture history, North America, archaeology, historical archaeology.

Read, Kenneth E.,* 1958, (Emeritus), M.A. 1946, Sydney (Australia); Ph.D., 1948, London; social structure and organization, Oceania.

Sakata, Hiromi Lorraine,* 1977, ‡(Music), M.A., 1968, Ph.D., 1976, Washington; ethnomusicology.

Schiffman, Harold F.,* 1967, ‡(Asian Languages and Literature, Linguistics), M.A., 1966, Ph.D., 1969, Chicago; Dravidian linguistics, Tamil sociolinguistics, language policy.

Swindler, Daris R.,* 1968, M.A., 1952, Ph.D., 1959, Pennsylvania; primate dentition, anatomy and growth development.

van den Berghe, Pierre,* 1965, ‡(Sociology), M.A., 1953, Stanford; Ph.D., 1960, Harvard; kinship, ethnic relations, human sociobiology, Africa, Latin America.

Watson, James B.,* 1955, (Emeritus), M.A., 1945, Ph.D., 1948, Chicago; social/cultural anthropology, economic anthropology, Oceania, New Guinea, exchange theory.

Wenke, Robert J.,* 1975, M.A., 1972, Ph.D., 1975, Michigan; archaeology of Egypt, the Middle East, and quantitative methods.

Winans, Edgar V.,* 1965, M.A., 1954, Ph.D., 1959, California (Los Angeles); politics, economics and law, Africa, the developing world.

Witherspoon, Gary,* 1987, M.A., 1968, Arizona State; M.A., 1969, Ph.D., 1970, Chicago; ethnology, anthropological linguistics, North America, Southwest.

Associate Professors

Atkins, John R.,* 1964, (Emeritus), A.M., 1954, Pennsylvania; kinship, mathematical anthropology, culture and cognition.

Eck, Gerald G.,* 1974, (Quaternary Research Center), M.A., 1974, Ph.D., 1977, California (Berkeley); physical anthropology, paleontology, primatology.

Horn, Beverly M.,* 1976, ‡(Community Health Care Systems), M.N., 1962, Ph.D., 1975, Washington; cross-cultural nursing, Native American Indian groups, adolescence.

Jacobs, Sue-Ellen,* 1974, ‡(Women Studies), M.A., 1966, Ph.D., 1970, Colorado; sociocultural and applied anthropology, anthropological studies of women, ethnohistory, North America.

Leonetti, Donna L.,* 1976, (Research), M.A., 1967, Ph.D., 1976, Washington; biological and sociocultural interactions in population adaptation, social epidemiology, Japanese Americans.

Miller, Marc L.,* 1979, ‡(Marine Studies, Fisheries), M.A., 1972, California (San Diego); Ph.D., 1974, California (Irvine); work and occupations, natural resource management, tourism and leisure, maritime anthropology.

Muecke, Marjorie A.,* 1979, ‡(Community Health Care Systems, Health Services), M.A., 1968, New York; M.A., 1972, Ph.D., 1976, Washington; community health nursing, refugee health, fertility and health, cross-cultural healing.

Rhodes, Lorna A.,* 1984, (Health Services), M.A., 1971, Ph.D., 1973, Cornell; medical anthropology, symbolic anthropology, South Asia, religion, psychiatry.

Smith, Eric A.,* 1980, M.A., 1976, Ph.D., 1980, Cornell; ecology, evolutionary theory, hunter-gatherers, demography, Native Americans, Canadian Inuit.

Spain, David H.,* 1968, (Psychiatry and Behavioral Sciences, Social Work), M.A., 1962, Ohio State; Ph.D., 1969, Northwestern; psychocultural anthropology, African studies, research methods.

Stein, Julie K.,* 1980, (Quaternary Research Center), M.A., 1976, Ph.D., 1980, Minnesota; New World archaeology, Northwest coast archaeology, geoarchaeology, shell middens.

Assistant Professors

Bentley, G. Carter,* 1987, M.A., 1976, Ph.D., 1982, Washington; cultural anthropology, legal anthropology, political economy, ethnicity, nationalism, Southeast Asia, Philippines.

Kahn, Miriam,* 1986, M.A., 1974, Ph.D., 1980, Bryn Mawr; museology, ecology, agricultural development, food symbolism, gender relations, Melanesia and Oceania.

Lomawaima, Kimberly Tsianina, 1988, M.A., 1979, Ph.D., 1987, Stanford; institutions of cultural contact, educational anthropology, ethnohistory and oral history, native North America.

Senior Lecturer

Bentz, Marilyn,* 1979, (American Indian Studies), ‡ M.S.W., 1967, Illinois; Ph.D., 1984, Washington; American Indians, psychological anthropology, applied anthropology, educational anthropology, social change.

Course Descriptions

Courses for Undergraduates

General

ANTH 100 Introduction to Anthropology (5) AWSp Introduction to the subfields of archaeology, physical anthropology, and sociocultural anthropology through the examination of selected problems in human physical, cultural, and social evolution. Not recommended for students who have had other courses in anthropology, archaeology, or physical anthropology. May not be counted toward the 55 credits required for the major in anthropology.

Sociocultural Anthropology

ANTH 202 Principles of Sociocultural Anthropology (5) Comparison of lifeways of various non-Western and Western peoples. Introduction to basic theories and methods used in the field.

ANTH 203 Introduction to Linguistic Anthropology (5) A Eastman Linguistic approaches, methods, and theories used within anthropology. Descriptive and structural linguistics, comparative method, language change, ethnosociology, language and culture, sociolinguistics, language and culture classification, animal communication, study of social dialects (e.g., language and sex, class, geographical area).

ANTH 216 Oceania (3) Contemporary and traditional life in the Pacific Basin.

ANTH 230 Comparative Tribal Religion (5) World's "folk" or "little traditions" of religious belief and practice. Cosmologies, eschatologies, notions of causality and of human nature. "Little traditions" as examples of man's imaginative attempts to create a relatively closed, knowable, and more-or-less manageable cosmos.

ANTH 301 Human Nature and Culture (3) Comparison of various anthropological perspectives on the sources of variation in customs, values, and beliefs of human groups, including non-Western peoples and contemporary Americans.

ANTH 302 Plants, Animals, and People (3) Hunn Emphasis on the knowledge of, and attitudes toward, plants and animals of non-Western peoples. Role of resource species as food and medicine and in tool manufacture, myth, and ritual. Hunters and gatherers, fishermen, pastoralists, and agriculturalists studied in comparison with contemporary Western societies.

ANTH 305 Anthropology of the Body (5) Biosociocultural approach to the human body as universal object—and agency—for human minds. How cross-cultural contrasts in ways of construing the body affect self-regard and social interaction. Body shapes, sizes, colors, exordia, signals, symbolism, esthetics, metaphysics, rituals, lore, and politics.

ANTH 310 Native North American Societies (5) W Smith Traditional cultures of America north of Mexico, emphasizing diversity of North American Indian and Eskimo societies. Origins of Native Americans' culture areas and language groupings; subsistence systems; levels of social organization; European conquest and colonialism; and description of representative cultures from the ten culture areas. Recommended: 100 or 202.

ANTH 313 Peoples of Africa (5) Spain, Winans Survey of the many cultures of pre- and post-colonial sub-Saharan Africa. Appreciation of the adaptability, strength, and creativity of African peoples. Recommended: 100 or 202. (Formerly 213.)

ANTH 314 Societies and Cultures of Insular Southeast Asia (5) Bentley Cultural, political, economic traditions of insular Southeast Asia, Indonesia, Malaysia, Philippines. Early Indianized states; growing influences of Islam; Western European conquests; developed colonial societies, their legacies; modern nationalism, problems faced by new independent states; important cultural continuities. Joint with SISSE 314. Prerequisite: one 200-level course in either anthropology or International Studies.

ANTH 315 Southeast Asian Civilization: Buddhist and Vietnamese (5) Keyes Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos, and Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Joint with SISSE 315. (Formerly 235.)

ANTH 316 South Asia (3) Major cultural features of the Indian and Pakistan subcontinent.

ANTH 318 Peoples and Cultures of the Islamic Middle East (3) Survey of cultures and peoples of Islamic Middle East and North Africa. First half of the course emphasizes the integration of peasant, urban,

and nomadic societies in the traditional culture and economy; the second half concentrates on the transformation of the traditional life styles through the process of westernization and modernization.

ANTH 331 Northwest Coast Indian Arts (5) Introduction to arts of Indians of the Pacific Northwest from precontact to present. Themes explored include diversity of artistic expression, cultural contexts, styles, artists' responses to foreign trade and settlement, and ways in which art may reflect historical developments in the lives of the Indians. Joint with ART H 331.

ANTH 350 Ecological Anthropology: Civilized and Primitive (3) Evolution of culture and society with emphasis on ecology. Development of urban life in light of common and distinctive character of cities, peasantries, and tribal groups or bands. Process of urbanization, disappearance of truly primitive peoples, emergence of peasant, rise of a world system. Selected case studies, past and present.

ANTH 352 Buddhism and Society: The Theravada Buddhist Tradition in South and Southeast Asia (5) *Keyes* Introduction to the religious tradition of Theravada Buddhism (as practiced in Sri Lanka, Burma, Thailand, Laos, and Cambodia) and examination of the variations in ethical orientations developed through Theravada Buddhist ideas. Joint with RELIG 350. Recommended: RELIG 202 or knowledge of one Eastern religious tradition.

ANTH 353 Anthropological Studies of Women (5) *Jacobs* Cross-cultural and comparative survey of the varieties of women's cultural experiences, statuses, and roles in cultural context and the anthropological theories used to account for them. Topics include biological factors, studies of primates, woman the gatherer, work in preindustrial and industrial societies, women in folklore and music, patriarchy and matrilineal kinship, childbirth, and women's roles in economic development. Joint with WOMEN 353. Prerequisites: 202 and WOMEN 200, or permission of instructor.

ANTH 354 The Comparative Study of Societies (3) *van den Berghe* Compares entire societies at various levels of technological complexity to explore problems of their development and structural organization. Examines both historical and contemporary, and Western and non-Western societies. Joint with SOC 354. Prerequisite: 202 or SOC 110.

ANTH 355 Aging in Cross-Cultural Perspective (3) Survey of strategies for dealing with the fact of aging in various sociocultural systems. Relates the varieties of cultural solutions to the theories on aging, drawn from psychology and medicine, with emphasis on non-Western societies. Prerequisite: 202 or permission of instructor.

ANTH 356 Visual Anthropology (3) The place of photography and films in ethnography; their use in the documentation and interpretation of cultural and social systems.

ANTH 358 Culture and Cognition (5) Surveys anthropological theories and research on the relationship between language, thought, and behavior. Examines the influence of cultural inheritance on perception, classification, inference, and choice. Describes relevant cross-cultural research methods and evaluates theoretical models used by cognitive anthropologists. Prerequisite: 202 or 203 or PSYCH 355 or permission of instructor.

ANTH 359 Linguistic Ethnography (5) *Eastman* Language use in cultural contexts. How language reflects world view. Language use in culturally significant settings. Analyzes sets of culturally specific terms in semantic domains. Includes projects demonstrating application of theory and method to data addressing specific problems. Workshop format.

ANTH 360 Ecological Anthropology: Introduction to Cultural Ecology (5) Survey of anthropological research on interaction between human societies and

their environments. Logic of different subsistence systems; intensification and transformation of subsistence strategies; population regulation; ecological aspects of human nutrition, disease, spatial organization, ethnicity, social stratification, conflict, and cooperation; historical roots of current ecological crisis. Prerequisite: permission of instructor.

ANTH 371 Political Anthropology (3) *Winans* Theories of the development of political forms and of the social structural analysis of political organization. Authority, power, and concepts of politics and administration. Prerequisite: 202.

ANTH 372 Anthropology of Law (3) *Winans* Major theories and studies in legal anthropology. Dispute settlement, juridical processes, and concepts of law and legal activities. Prerequisite: 202.

ANTH 373 Stateless Societies: An Ethnographic Approach to Noncentralized Political Systems (5) *W Winans* Comparative examination of modes of governance in noncentralized societies. Forms of decision making, competition for supports, resolution of conflicts, and boundary maintenance with adjacent groups. Cases discussed in the context of alternative theories of the development of politics. Prerequisites: 202 and POL S 273.

ANTH 401 West African Societies (3) *Spain* Social and cultural features of coastal and interior West African societies, including the Western Sudan. Detailed study of selected societies. Prerequisite: 202 or permission of instructor.

ANTH 402 Societies of Eastern and Southern Africa (5) *Winans* Historical background and contemporary life of cultural groups in eastern and southern Africa with special study of selected cases of political and economic organization and cultural change. Prerequisite: 202 or permission of instructor.

ANTH 403 Traditional Chinese Society (5) *Harrell* Late traditional (Ming-Qing) China as a social system. Systematic analysis of temporal and spatial variation in family, kinship, local organization, social class, government, and antigovernment activity. Joint with SISEA 443. Prerequisite: 202, HSTAS 454, graduate standing, or permission of instructor.

ANTH 404 South America (5) Survey of anthropological research among the traditional peoples of South America. Historical background and contemporary life of cultural groups of the Amazonian Basin. Transformation of traditional life-styles through the process of European conquest and the aftermath of colonialism. Detailed study of selected societies. Prerequisite: 100 or 202. (Formerly 322.)

ANTH 405 Peoples of the Soviet Union (5) *W* Traditional culture and social organization of Russians and some other USSR peoples, including larger nationalities (e.g., Ukrainians, Estonians) and some smaller ethnic groups in Siberia. Role of traditional culture in shaping contemporary lifestyles in multiethnic, diversified setting. Joint with SISRE 405. Prerequisite: 202 or permission of instructor.

ANTH 408 New Guinea Societies (5) Peoples and cultures of coastal and interior New Guinea and adjacent islands. Deals intensively with selected general problems of ethnographic method and ethnological and sociological interpretation. Character of small autonomous societies in Melanesia: ecology, economics, gender, systems of exchange, social organization, magic and ritual, warfare. Prerequisite: 202 or permission of instructor.

ANTH 409 Micronesian Societies (3) Comparative social anthropology of the social systems of high islands and coral atolls of Micronesia. Intensive treatment of the kinship, religion, ecology, and politics in both traditional and contemporary periods. Prerequisites: 202, and either 216 or permission of instructor.

ANTH 412 South Asian Social Structure (5) Caste dynamics, political control, economic organization, and religion in Hindu-village India. Prerequisite: 202 or permission of instructor.

ANTH 415 Applied Ethnography (3) *Sp* Examines the social context of applied cultural anthropology and prepares students for nontraditional uses of anthropological theory, knowledge, and training. Rationale for applied ethnographic research, professional training, the research proposal/contract, social change, applied anthropology, the research product.

ANTH 418 Indian Heritage of Central America (5) *Hunn* Indian civilization of Mexico and Guatemala, their origins and ecological foundations. Contemporary communities of Mexico and Guatemala, focusing on creative adaptation of pre-Columbian traditions to modern national realities. Prerequisite: 202 or permission of instructor.

ANTH 419 Peoples and Cultures of the Iranian Plateau (3) Survey of the cultural features of the Iranian Plateau with particular attention to modern problems of cultural change. Prerequisite: permission of instructor.

ANTH 421 Belief, Ritual, and the Structure of Religion (5) Systematic survey of concepts, models, and theories that characterize the anthropological study of religion. Consideration of the human universal basis of religion and of diverse ways in which religions are constructed and related to social experience. Prerequisites: 202 or 321, or RELIG 201 and 202.

ANTH 422 Religious Systems (5) Intensive examination of selected type of religious system with reference to the anthropological approach to study of religious phenomena. Type of system chosen for study varies. Prerequisite: 421 or RELIG 380 or permission of instructor.

ANTH 424 Hunter-Gatherer Societies (4) Comparative examination of human foraging societies, emphasizing ethnographic cases and socioecological analysis. Foraging and human evolution; rationality of foraging societies; population and reproductive strategies; variability in social organization and land use; power relations between the sexes; ritual and belief; contemporary status of hunter-gatherer populations. Prerequisite: 202 or permission of instructor.

ANTH 425 Ethnicity and Nationality in the USSR (5) *Sp Plotkin* Creation of the Soviet Union: Leninist and Stalinist approaches to the "national question." Contemporary processes of ethnic assimilation and dissimilation. Formation of national elites, rise of various forms of nationalism, position of religion in national cultures. Specific cases include Russian nationalism, Islam in Central Asia. Joint with SISRE 425.

ANTH 426 Peasant Culture and Society (5) Place of peasants in state, civilization, and global economy, especially as seen from peasants' perspective. Consideration of cases drawn from anthropological studies. Prerequisite: 202 or permission of instructor.

ANTH 427 Anthropology in Urban Settings (3) *Sp Chrisman* Cross-cultural examination of theoretical issues in anthropology as studied in urban places. Focuses on ethnic identity and the formation of urban ethnic groups; migration and its rural and urban consequences; family and kinship organization as an adaptation to urban complexity; the nature of urban voluntary associations; law and politics; and the developments in anthropological method. Prerequisite: 202 or permission of instructor.

ANTH 428 Anthropological Perspectives on Ethnicity (3) *Bentley, Keyes* Anthropological approaches to ethnicity and ethnic group relations, with reference to other models including race, caste, class, regional groupings, nations, religion, and stratification. Data drawn from precolonial, colonial, and postcolonial periods. Prerequisite: 202 or permission of instructor.

ANTH 429 Expressive Culture (5) Anthropological view of one expressive aspect of culture: plastic-graphic arts, myth and folktale, music, dance, humor and tragedy, or play and games. Prerequisite: 202 or permission of instructor.

ANTH 430 The Anthropology of Music (3) *Ellingson, Waterman* Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation (e.g., evolutionist, diffusionist, historical particularist, structuralist, functionalist, symbolist, semiotic) through detailed examination of seminal texts. Joint with MUSIC 480. (Offered alternate years.)

ANTH 431 Oral Traditions (3) *Smith* Oral traditions and verbal expression, examined anthropologically and in relation to student interests. Critical examination of relevant theories and methods of analysis. Prerequisite: 100 or 202.

ANTH 432 Sociolinguistics (3) *Sp Eastman, Schiffman, Williams* Social variation in phonology, morphology, syntax, lexicon of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, the ethnography of speaking, pragmatics, and language attitudes. Joint with LING 432. Prerequisite: LING 400; recommended: concurrent registration in LING 451 or permission of instructor.

ANTH 434 Comparative Morals and Value Systems (3) Moral basis of human society and comparison of value systems based on anthropological studies. Prerequisite: 202 or permission of instructor.

ANTH 435 Economic Anthropology (5) Chief features of nonmonetary and simple monetary economies. Impact of central or metropolitan market economy and industrial technology as peripheral systems, especially of small-scale and limited monetary circulation. Development and application in anthropology of economic concepts, including Marxian. Prerequisites: 202 or permission of instructor.

ANTH 436 Comparative Family Organization (5) *Harrell* Function and structure of family developmental processes in band, tribal, peasant, and modern societies. Illustrates inter- and intrasocietal variation and provides data for construction of formal models of process and variation in family systems. Prerequisite: 202.

ANTH 437 Political Anthropology and Social Change (5) *Winans* Anthropological studies of local-level politics in colonial, modernizing, and encapsulated societies. Processual approaches to the study of political change. Prerequisites: 202, 371, or permission of instructor.

ANTH 438 The Analysis of Kinship Systems (5) Data, theories, and analytical technique used in the study of kinship systems, including our own, from around the world. Prerequisite: 202 or permission of instructor.

ANTH 439 Law in Changing Societies (5) Anthropological viewpoints on legal aspects of colonial, modernizing, and encapsulated societies. Problems of plural legal systems and of conflicts in judicial systems. Prerequisites: 202, 372, or permission of instructor.

ANTH 440 Child-Rearing, Culture, and Health (3) Cross-cultural study of the child-rearing practices, cultural norms, and health behavior of children and adolescents in different societies. Comparative approaches, diverse theoretical postures, and empirical research findings are used. Joint with CHCS 495. Recommended: courses in child development or introductory anthropology.

ANTH 441 Psychological Anthropology (5) *Spain* Assessment of mutual relevance of cultural and psychological variables in anthropology. Historical development of principal topics (e.g., cognition, national character, enculturation, personality and social

change, cross-cultural psychiatry, sex and temperament, deviance, and psychoanalytic studies of culture). Prerequisite: 202 or introductory psychology or personality theory or permission of instructor.

ANTH 442 Anthropological Aspects of Communication (5) Introduction to communicational aspects of culture. Prerequisite: 202.

ANTH 443 Anthropological Rhetoric (5) Ethnographic writing as literature; the understanding of cultures different from one's own by means of textual analysis and critique from Herodotus through Geertz. Methodology of anthropological persuasion. Prerequisite: upper-division standing or permission of instructor.

ANTH 444 Contemporary Chinese Society (5) *Harrell* Analysis of society in the People's Republic of China as a product of traditional Chinese society and the changes wrought upon it by the impact of the West and by the revolutionary policies and practices of the Chinese Communist Party. Joint with SISEA 444. Prerequisite: 403 or SISEA 443 or another acceptable course on Chinese society, or permission of instructor.

ANTH 445 Quantitative Methods in Anthropology (5) Basic statistical techniques useful for anthropologists. Elementary computer processing of anthropological data. Intended for students of anthropology. Prerequisites: 202, ARCHY 205 or PHY A 201 and STAT 301 or 311 or permission of instructor.

ANTH 446 Structural Anthropology (3) Contributions of Levi-Strauss and others to anthropology, with concentration on the holistic analysis of culture through myth, ritual, society, and cosmology. Prerequisite: 202 or permission of instructor.

ANTH 447 Religion in China (5) *Sp Harrell* Place of religion in Chinese society, examining the doctrines, practices, and social consequences of the eclectic folk religion, the elite Confucian, Taoist, and Buddhist traditions, syncretistic sects, and imported Christianity. Joint with SISEA 445. Prerequisite: one course in Chinese society, politics, or history, or permission of instructor.

ANTH 451, 452, 453 Phonology I, II, III (4,4,4) *A,W,Sp Brame, Contreras, Kaisse* Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology. Joint with LING 451, 452, 453. Prerequisite: LING 200 or 400, either of which may be taken concurrently, or permission of instructor.

ANTH 454 Women, Words, Music, and Change (5) *Sp Jacobs* Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women's status and roles; cross-cultural analysis of planned change and development. Joint with WOMEN 454. Prerequisite: 353 or permission of instructor.

ANTH 455 Areal Linguistics (3, max. 6) *Eastman* Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Borrowing vocabulary specialization, lexical change, language death and revival. Joint with LING 455.

ANTH 460 History of Anthropology (5) *Keyes* Sources and development of leading concepts, issues, and approaches in anthropology. Findings of anthropology in relation to scientific and humanistic implications and to practical application. Main contributors to field; their work and influence. Past, present, and future perspectives, including anthropology of modern life. Prerequisites: 202 and 15 additional credits in anthropology.

ANTH 461, 462, 463 Syntax I, II, III (4,4,4) *Newmeyer* Study of the structural properties of language; introduction to generative transformational syntax.

Joint with LING 461, 462, 463. Prerequisite: LING 200 or 400, which may be taken concurrently, or permission of instructor.

ANTH 464 Language Policy and Cultural Identity (3) *Eastman, Schiffman* Decision making regarding language in sociopolitical contexts. Language and ethnicity, educational policy, and use of language in developing nations. Plans to modernize, purify, standardize, reform, and revive language. Language loyalty and motives for second-language acquisition. Joint with LING 433. Prerequisite: LING 200 or 400.

ANTH 469 Special Studies in Anthropology (3-9, max. 9) Delineation and analysis of a specific problem or related problems in anthropology. Offered occasionally by visitors or resident faculty. May be repeated for credit by permission. Prerequisite: 202 or permission of instructor.

ANTH 475 Comparative Systems of Healing (5) *S* Medical anthropology. Ways in which and extent to which "health" and "sickness" are culturally constituted. Epistemological, as well as pragmatic, limitations of the organism-centered, cartesian, biomedical approach to sickness, medicine, and health. Joint with HSERV 475.

ANTH 480 Introduction to Museology (3) *Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics.* Prerequisite: upper-division standing or permission of instructor.

ANTH 481 Museum Collection Management: Ethnology (3) *Lecture and work experience in museum collection management in the ethnology collections of the Burke Memorial Washington State Museum, including identification, cataloging, fumigation, storage, cleaning, inventory, and specimen preparation for exhibition of archival and nonarchival museum specimens from North America, the Pacific, and Pacific Rim areas.* Prerequisite: 480 or permission of instructor.

ANTH 482 Museum Conservation (5) *Lecture and laboratory work in the recognition and treatment of museum conservation problems for specimens of wood, fiber, stone, metal, and bone. Application of basic principles to specific conservation and restoration problems faced by curatorial personnel.* Prerequisites: 480, 481 or permission of instructor.

ANTH 483 Women in Evolutionary Perspective (5) *W* Critical appraisal of major theories accounting for evolution of sex and gender roles and status differences; cross-cultural testing for sociobiological, biocultural, cultural materialist, structural, and symbolic explanations for "female power and male dominance." Joint with WOMEN 453. Prerequisite: 353 or permission of instructor.

ANTH 486 Human Family Systems: Biological and Social Aspects (3) *van den Berghe* Biological bases for human mating and reproduction, and an examination of the range of cross-cultural variability in human systems of kinship and marriage; comparisons among a wide range of human and nonhuman species, and between Western and non-Western human societies; interplay of biological, ecological, and sociocultural factors in determining the structure and function of human family systems. Joint with SOC 486. Prerequisite: 100 or PHY A 201 or SOC 110.

ANTH 488 Advanced Topics in Museology (3) *Selected current topics in museology.* Prerequisite: 480 or permission of instructor.

ANTH 489 Anthropology Practicum (3-9, max. 15) *AWSpS* Faculty-supervised off-campus internships in organizations utilizing anthropological skills in nonacademic settings. Establishing educationally valuable individual projects for internships with faculty sponsor. Organizations include museums, social service and other governmental agencies, and private nonprofit service agencies. Prerequisites: major in anthropology and permission of instructor.

ANTH 490 Problems in Social Structure (3, max. 6) Selected current problems in the study of social structure. Prerequisites: 202, 20 additional credits in anthropology, and permission of instructor.

ANTH 492 Anthropology of Refugees (3) W Muecke The refugee phenomenon, its emergence in the postcolonial world, and the structure of the life history of refugees. Ethnic change, involuntary deculturation, and acculturation as they occur in refugee life histories. Joint with CHCS 492. Prerequisite: 202 or permission of instructor.

ANTH 493 Advanced Topics in Expressive Culture (3, max. 6) Analysis and testing of special domains of esthetic expression, such as graphic arts, oral literature, dance, and humor among non-Western peoples. Prerequisites: 202, 429, or permission of instructor.

ANTH 494 Problems in the Anthropology of Law and Politics (3, max. 6) Winans Seminar in the interrelationships of law and politics. Political aspects of procedural and substantive law. Law as a basis of political power and authority. The intertwining of political and legal processes. Prerequisites: 371 or 439 and 372 or 437, or permission of instructor.

ANTH 495 Advanced Problems in Ethnology (3, max. 6) Current problems in ethnology. Seminar format. Prerequisites: 25 credits in anthropology and permission of instructor.

ANTH 496 Problems in Psychological Anthropology (3, max. 6) Problem areas and new approaches to the study of culture and personality. Prerequisite: 441 or permission of instructor.

ANTH 499 Undergraduate Research (*, max. 12; max. 18 for honors students only) Prerequisite: permission of instructor.

Archaeology

ARCHY 105 World Prehistory (5) W Stein, Wenke Prehistoric human ancestors from three million years ago: their spread from Africa and Asia into the Americas, survival during ice ages, development of civilizations. Well-known archaeological finds (e.g., Olduvai Gorge; Neanderthals; Jericho; Egyptian pyramids; Mexican temples; Mesa Verde; Ozette, Washington). May not be counted toward the 55 credits required for the major in anthropology.

ARCHY 205 Principles of Archaeology (5) AWSpS Techniques, methods, and goals of archaeological research. Excavation and dating of archaeological materials. General problems encountered in explaining archaeological phenomena.

ARCHY 270 Field Course in Archaeology (12) S Introduction to field acquisition of archaeological data through survey and excavation. On-going field projects; recovery and recording techniques. Prerequisite: permission of department.

ARCHY 303 Old World Prehistory (3) Old World prehistory from beginnings of human culture to rise of civilizations. First tools made by humans, spread of humans out of Africa, origins of agriculture, rise of state society. Africa, Near East, Egypt, China, India, Europe.

ARCHY 304 New World Archaeology (3) History of earliest Americans, beginning with crossing of land bridge between Asia and North America and eventual spread over the Americas. Highlights prehistory and best examples of western hemisphere's civilizations. Mexico, Yucatan, Peru, southwestern and eastern United States, Washington.

ARCHY 320 Prehistory of the Northwest Coast (5) Origin, development, and variation of Pacific Northwest cultures from early migrations to nineteenth century. Adaptation to maritime and interior environments; artifacts and art.

ARCHY 371 Analysis of Archaeological Data (5) A Stein Analyzing archaeological data by measuring and describing such artifacts as stone tools and ceramics. Analysis of such environmental data as bones, plant remains, and sediments. Prerequisite: 205, or permission of instructor.

ARCHY 468 Issues in Cultural Resource Management (1) Sp Dunnell, Grayson, Nason Review of federal and state cultural resource management policies and the effects of these policies on the conduct of projects that may impact cultural resources on public lands. Survey of related issues in museum management. Prerequisite: 205, ANTH 202, or permission of instructor.

ARCHY 469 Special Studies in Archaeology (3, max. 6) Consideration in detail of specific archaeological topics, either methodological or substantive in content, of current interest. Offered occasionally by resident, new, or visiting faculty. For advanced undergraduates and graduate students. Prerequisites: 205 and permission of instructor.

ARCHY 478 Prehistoric Cultures of North America: Western North America (5) W Grayson Ecological account of prehistoric cultural developments in North America west of the Rocky Mountains. Cultural and environmental change from appearance of people in New World to collapse of indigenous cultural systems. Prerequisite: 304 or permission of instructor.

ARCHY 479 Prehistoric Cultures of North America: Eastern North America (5) Sp Dunnell Ecological and evolutionary account of prehistoric cultural developments in North America east of the Rocky Mountains. Cultural and environmental change from appearance of people in New World to collapse of indigenous cultural systems. Prerequisite: 304 or permission of instructor.

ARCHY 480 Advanced Archaeological Analysis: Tools (6) W Dunnell, Wenke Combination of lecture and practical laboratory instruction in the presentation of archaeological data for analysis, emphasizing stylistic and functional analyses of lithic, ceramic, and other artifacts, attribute recognition, and standard techniques for data manipulation. Theoretical bases for techniques and their uses and limitations in cultural, historical, and processual accounts. Prerequisite: 371 or permission of instructor.

ARCHY 481 Advanced Archaeological Analysis: Faunal Remains (6) A Grayson Seminar on techniques and methods employed in analysis of faunal remains from a wide range of Pleistocene and Holocene settings, including archaeological sites, coupled with a laboratory focusing on identification of faunal remains from these settings. Prerequisite: 371 or permission of instructor.

ARCHY 482 Advanced Archaeological Analysis: Geoarchaeology (8) Sp Stein Identification, analysis, and interpretation of sediments and soils associated with archaeological remains. Laboratories deal with sediment description and chemical analysis; field trips and student projects focus on archaeological applications of these subjects. Prerequisite: 371 or permission of instructor.

ARCHY 483 Advanced Archaeological Analysis: Floral Remains (6) Provides a theoretical framework for examining prehistoric floral remains. Also provides training in analyzing and interpreting macrobotanical remains from archaeological sites. Prerequisites: 371 and ANTH 302 or permission of instructor.

ARCHY 495-498 Quantitative Archaeological Analytic Techniques (3-3) A Wenke Introduction to quantitative approaches to archaeological problems; data screening, numeric methods of classification and identification, graphical and computer-based seriation techniques, and the analysis of spatial patterning in artifact distributions. Prerequisites: 205, an introductory descriptive statistics course, and permission of instructor.

ARCHY 497 Archaeological Method and Theory I: Formal Theory (5) A Dunnell Examination of theoretical constructs in the analysis of archaeological data. Terminology, typologies, and interregional comparisons. Prerequisites: 205, 20 additional credits in anthropology, and permission of instructor.

ARCHY 498 Archaeological Method and Theory II: Explanatory Theory (5) W Dunnell Conceptual frameworks employed by archaeologists in obtaining explanation in the three major areas of culture history, cultural reconstruction, and explanatory prehistory, considering the nature of explanation as conceived in these areas, the basic assumptions employed in achieving these aims, and an introduction to the methods employed. Prerequisites: 205, 497.

ARCHY 499 Undergraduate Research (*, max. 12; max. 18 for honors students only) Prerequisite: permission of instructor.

Physical Anthropology

PHY A 201 Principles of Physical Anthropology (5) AWSpS Evolution and adaptation of the human species. Evidence from fossil record and living populations of monkeys, apes, and humans. Interrelationships between human physical and cultural variation and environment; role of natural selection in shaping our evolutionary past, present, and future.

PHY A 370 Introduction to Primates (5) Eck, Newell, Swindler Origins, major evolutionary trends, and modern taxonomic relationships of the nonhuman primates. Their distribution and habitat in relation to behavioral and morphological adaptations and their status as endangered species. Prerequisite: 201.

PHY A 371 Evolutionary Perspectives on the Human Condition (4) Newell The human species—past, present, and future. Biological uniqueness of the human species; its role in biological and cultural extinctions. Conceptions and misconceptions of species behavior. Evidence for ongoing human evolution evaluated in relation to present population redistribution and reorganization.

PHY A 372 Evolutionary and Nonevolutionary Views of the Human Species (5) Views of human biology and behavior as they have changed since Darwin published his theory of evolution. Challenges to Darwinism, "myths" of human origins and biological determinism as exemplified in the eugenics movement, racism, and studies of human physiognomy. Recommended: 201.

PHY A 375 Biology of Human Race (3) Sp World-wide distribution of variation in human biology: shape, size, skin color, body composition, human performance. Natural selection, historical factors, random biological events. History of attempts to classify people into racial groups and problems associated with such efforts. Prerequisite: 201 or permission of instructor.

PHY A 382 Human Population Biology (3) A Nute Human population biology with reference to capacity for growth in population size. Interaction of human biology, population structure, and culture in promoting such growth. Effects of economic, demographic, medical, and ecological factors.

PHY A 387 Ecological Anthropology: Ecological and Biological Adaptation in Human Populations (5) A Biological adaptability derived from our history as hunter/gatherers. Biological consequences of our past examined by studying how living populations respond to environmental stress. Relationships between biological and behavioral responses. Application of theoretical models derived from evolutionary and ecological approaches. Prerequisite: 201 or permission of instructor.

PHY A 388 Human Fossils and Evolution (5) W Eck Evolution of human anatomy and behavior. Human fossils: their geological context, age, ecological setting. Use of this information to reconstruct early hu-

man history. Changes in anatomical and behavioral characteristics as adaptations to environment. Prerequisite: 201, or BIOL 201, 202, 203.

PHY A 469 Special Topics in Physical Anthropology (3, max. 6) *Eck, Newell, Nute, Swindler* Delineation and analysis of a specific problem or a more general area in physical anthropology. Offered occasionally by visitors or resident faculty. Prerequisite: permission of instructor.

PHY A 473 Biological Adaptability of Human Populations (5) W Mechanisms enabling humans to maintain homeostasis in extreme environments: high altitude, heat, cold, nutritional deficiency, radiation. Adaptive process operating at levels of physiology, metabolism, and population, including the strategies of fertility and birth spacing. Prerequisites: 201 and physiology, or permission of instructor.

PHY A 476 Sociocultural Ecology and Health (3) Sociocultural ecology of health/disease, focusing on humans as bioculturally integrated beings and on populations as biocultural units of adaptation. Examples of research on disease (infectious, chronic) and patterns of morbidity and mortality (infant, maternal, old age) with particular attention to situations of sociocultural changes.

PHY A 478 Dental Anthropology (5) *Swindler* Intensive survey of the dentitions of primates from tree shrews to man. Emphasis placed on the range of metric and morphologic variability existing in the teeth of these animals, both in fossil and living groups. Environmental and genetic factors are considered within this ontogenetic and phylogenetic framework. Prerequisite: 201.

PHY A 480-481 Primate Anatomy: Structure and Function (5-5) W, Sp *Swindler* Anatomy of various primates studied in detail with special reference to structural and functional relationships. The evolution and present ecology of primates as they relate to the total anatomical picture. The laboratory consists of dissection of a specified primate and a study of the dentition and osteology. Prerequisite: 201 or permission of instructor.

PHY A 482 Human Population Genetics (5) Sp *Nute* Micro-evolutionary changes in human populations. Effects of mutation, selection, inbreeding, gene flow, and genetic drift as causes of evolutionary change. Mathematics beyond high school not required. Prerequisite: 201 or permission of instructor.

PHY A 483 Human Genetics, Disease, and Culture (5) *Nute* Considers relationships among genetic aspects of human disease, cultural behavior, and natural habitat for a wide variety of conditions. Also considers issues of biological versus environmental determinism, adaptive aspects of genetic disease, and the role of cultural selection. Prerequisite: 201; a general background in biology.

PHY A 484 Human Life Cycle (5) Sp *Newell* Human growth and physical/social development: fetal life to old age. Cultural, ecological, and evolutionary aspects of the life cycle—population differences in age and sex related to morbidity and mortality. Prerequisite: 201 or permission of instructor.

PHY A 485 Research in Growth and Development (2, max. 8) *Newell* Discussion and research on topic relating to primate growth and development, using either published materials or data from on-going studies at this university. Prerequisites: 484, which may be taken concurrently, and permission of instructor.

PHY A 486 Primate Socioecology (3) Focus on the variety of social systems exhibited by nonhuman primates and adaptive significance of these societies; social systems in terms of the present ecology and evolutionary past of the species; the function of communicatory gestures and vocalizations, tradition, kinship, and social roles in maintaining and structuring

groups over generations; the relationship among mating systems, foraging strategies, ranging patterns, and ecological separation/resource partitioning and their contribution to species-typical social organization. Prerequisite: 201.

PHY A 487 Human and Comparative Osteology (3) *Swindler* Introduction to the vertebrate skeleton. The skeleton is described in detail, and various methods of determining age and sex are presented, as well as osteometry and modern statistical methods for handling such data. Prerequisite: permission of instructor.

PHY A 488 Primate Evolution (5) *Eck* Major trends in nonhominid primate evolution through the Cenozoic. Discussion of the specimens, geological context, and age of the fossil taxa and their relationship to modern taxa. Practical experience in analyzing fossil material. Prerequisite: 201 or permission of instructor.

PHY A 489 Early Evolution of the Hominidae (5) A *Eck* Data and interpretations basic to the Pliocene and early Pleistocene evolution of the family Hominidae. Presentation of the geological contexts, ages, faunal associations, and fossil and cultural remains of the hominid lineages. Practical experience with the hominid fossil material, and explanation of the morphological and contextual similarities and differences. Prerequisite: 201 or permission of instructor.

PHY A 490 Later Evolution of the Hominidae (3) W *Eck* Data and interpretations basic to the middle and late Pleistocene evolution of the family Hominidae. Presentation of the geological contexts, ages, faunal associations, fossil and cultural remains of the hominid lineages. Practical experience with the hominid fossil material and explanation of the morphological and contextual similarities and differences. Prerequisite: 201 or permission of instructor.

PHY A 499 Undergraduate Research (*, max. 12; max. 18 for honors students only) AWSpS Prerequisite: permission of instructor.

Courses for Graduates Only

General

ANTH 600 Independent Study or Research (*) *AWSpS*

ANTH 700 Master's Thesis (*) Offered on credit/no credit basis only.

ANTH 800 Doctoral Dissertation (*) Offered on credit/no credit basis only.

Sociocultural Anthropology

ANTH 500 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the analysis and comparison of social and cultural systems. Not open to graduate students in the sociocultural anthropology program.

ANTH 503 Preceptorial Reading in Linguistic Anthropology (6) For beginning graduate students who have not had prior training in the problems, principles, and methods involved in linguistic anthropology. See also course description for 203. Not open to graduate students in the linguistics program.

ANTH 507, 508 Current Issues in Sociocultural Anthropology (2,2) A,W Biweekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

ANTH 510 Seminar on North American Indians (3) Advanced comparative treatment of selected aspects of the Indian cultures and societies of North America.

ANTH 514 Regional Seminar (3, max. 12) Comparative treatment of selected aspects of cultures and societies of a particular region or area.

ANTH 517 Seminar on South Asia (3) Advanced analysis of selected problems in South Asian ethnology and social structure. Prerequisite: 412.

ANTH 520 Ecology, Evolution, and Anthropological Theory (3-5) *Smith* Critical examination of models and theories from evolutionary ecology, sociobiology, and ecological anthropology. Potential and actual utility of such models in explaining aspects of human social behavior, cultural evolution, and cross-cultural variation in strategies of production and reproduction.

ANTH 521 Seminar on the Anthropological Study of Religion (3, max. 9) Advanced seminar in the anthropological study of religion designed for students who have a background in the theory and applications of theory developed in the anthropological study of religion. Seminar topics vary each quarter. Prerequisites: 422 and graduate standing; permission of instructor for graduate students in Comparative Religion.

ANTH 522 Seminar on South American Indians (3) Sp Advanced comparative treatment of selected aspects of the Indian cultures and societies of South America.

ANTH 525 Seminar in Culture Processes (3, max. 6) The concept of process and its application to the study of culture.

ANTH 527 Acculturation and Ethnicity (3) Systematic analysis of psychological, social, and cultural implications of the contact of peoples.

ANTH 529 Seminar in Expressive Culture (3) Detailed study of selected topics in expressive culture from an anthropological point of view. Prerequisite: 429 or permission of instructor.

ANTH 530 Dialectology (3) Principles of dialect deviation as related to linguistic structure and usage. Joint with LING 530. Prerequisite: 452 or permission of instructor.

ANTH 534 Cultural Influences Upon Parenting (3) Sp Data from several cultures to compare cross-cultural similarities and differences in definitions of ideal parenting; socializations into a parent role; social support for, and controls upon, parenting. Analyses of additional effects of changes in ideology, technology, and demography upon cultural parenting roles. Joint with PCN 534. Prerequisite: permission of instructor.

ANTH 536 Seminar in Visual Anthropology (3) A Significance of anthropological cinema and photography placed in historical perspective. Screening of films to determine the role of the anthropologist as filmmaker, as well as the role of the filmmaker as anthropologist.

ANTH 537 Political Anthropology and Law (3, max. 6) Seminar on special topics in politics and law and their interrelationships. Prerequisites: 437, 439, or permission of instructor.

ANTH 541 Seminar in Psychological Aspects of Culture (3, max. 9) Selected problems in the relation of culture and personality types. Prerequisite: 441 or permission of instructor.

ANTH 542 Seminar in Cognitive Anthropology (3) Hunn Examines the intellectual history of cognitive anthropology; assesses its major findings in kinship, folk biology, color classification, and decision and planning theory. Replicates key studies, using cognitive anthropological methods. Evaluates influences from linguistics, psychology, and artificial intelligence research. Practical applications and future prospects. (Formerly 497.)

ANTH 553 Analysis of Linguistic Structures (3, max. 6) Syntactic, semantic, or phonological analysis. Languages to be analyzed vary. Joint with LING 553. Prerequisite: permission of instructor.

ANTH 554 Field Techniques in Ethnography (5) Techniques of collecting, ordering, and utilizing ethnographic data in the field. Problems of rapport, elicitation, observation, interpretation, and ethics.

ANTH 555 Techniques of Network Analysis (5) Theory and technique in analysis of social networks and other relational structures as formal nets or diagrams, with applications to anthropological problems. Key concepts and experience in using APL to analyze relational matrices. No prior background in computers or advanced mathematics assumed.

ANTH 556 The Evolution of the Family (3) Sp van den Bergh Geological evolution of species-specific behaviors; forms of sociality linked to human mating, reproduction, parenting. Cultural evolution of human systems of kinship, marriage as fitness-maximizing adaptations to wide range of habitats. Joint with SOC 556. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior.

ANTH 558 Types and Techniques of Transcription (3) Analysis of aims and problems in the written symbolization of structured data. Emphasis on field transcription of human movement, music, and language. Prerequisite: 202 or permission of instructor.

ANTH 559 Seminar in Language and Culture (3, max. 9) Theoretical and methodological problems in language and culture.

ANTH 561 Seminar in Methods and Theories (3, max. 9)

ANTH 562 Clinically Applied Anthropology (3) Sp Chrisman Anthropology as it relates to interdisciplinary delivery of health care. Cultural variation in illness beliefs and behavior, types of healing practice, illness prevention, and social support networks. Joint with CHCS 562. Prerequisites: graduate standing and permission of instructor.

ANTH 564 Formal Methods of Analysis for Social Anthropology (3) Seminar on selected nonstatistical mathematical methods and models of relevance to various problems in social anthropology.

ANTH 565, 566, 567 Theory of Sociocultural Anthropology (5,5,5) Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisites: graduate standing in anthropology or permission of instructor; 565 for 566; 566 for 567.

ANTH 571 Communicational Anthropology (3-9) Introduction to communicational aspects of culture. Prerequisite: permission of instructor.

ANTH 575 Cultural Construction of Illness: Seminar in Medical Anthropology (5) Sp Historical and comparative examination of depression, neurasthenia, somatization, hypochondriasis, and hysteria. Anthropology of psychosomatics and psychiatry, including cultural analysis of selected biomedical, indigenous folk medical, and popular common-sense conceptualizations of illness.

ANTH 590 Seminar in Museum Theory (3) Fundamental theoretical issues involved in current museum administrative and operations work, including administrative structure, organizational conflicts, museum-community relations, and museum educational programming. Prerequisite: permission of instructor.

ANTH 591 Seminar in Museum Operations (3) Designing hypothetical museums and creating a first year of operations. Design elements include architectural plan, staffing plan, initial and recurring budgets, security system, records system, educational plan, and policy making. Prerequisite: 590 or permission of instructor.

ANTH 592 Seminar in Museum Specimen Documentation (3) Seminar discussion of museum specimen documentation research approaches, including technological and raw material analyses, contextual studies, and esthetic studies. Documentation of a collection and reference work. Prerequisites: 590, 591, or permission of instructor.

Archaeology

ARCHY 501 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the reconstruction of prehistory. Not open to graduate students in the archaeology program.

ARCHY 560 Seminar in Archaeological Methods (5, max. 20) Basis, limitations, and applications of a particular archaeological analytical method, or closely related set of methods. Prerequisite: permission of instructor.

ARCHY 570 Seminar in Archaeological Theory (3, max. 12) Detailed consideration of a particular archaeological theory or closely related set of theories, including their methodological and epistemological bases. Prerequisites: 497, 498.

ARCHY 571 Field Course in Archaeology (5) S Introduction to field acquisition of archaeological data through survey and excavation. Ongoing field projects; instructional emphasis on recovery and recording techniques and on management of field projects. Prerequisite: permission of department.

ARCHY 572 Seminar in North American Archaeology (3, max. 6) Selected problems in the archaeology of America north of Mexico. Prerequisite: permission of instructor.

ARCHY 575 Archaeological Field Research Design (6) Sp Dunnell Nature of the archaeological record, and methods and techniques of field research, to illustrate range of data sources and modern techniques of general applicability. Practical experience in mapping, map interpretation, sampling design, remote sensing, photogrammetry, and research proposal writing. Prerequisite: permission of instructor.

ARCHY 591 Advanced Field Course in Archaeology (6-9) For students with previous field experience and graduate work in archaeology. Emphasis on decision making in field and project management. Prerequisites: 497, 498, 571, 575, or permission of instructor.

ARCHY 600 Independent Study or Research (*) Prerequisite: permission of instructor.

ARCHY 601 Internship (3-9, max. 9)

Physical Anthropology

PHY A 502 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the study of primate principles, and methods involved in the study of evolution, human genetics, and the evolution of modern populations. Not open to graduate students in the physical anthropology program.

PHY A 569 Demographic Analysis of Biological and Social Anthropology (3) Demographic analysis of human populations to measure adaptive processes at the social and biological levels. Demographic studies of small populations and urban communities, using data from local surveys, genealogical methods, and other sources.

PHY A 570 Principles of Primate Taxonomy (3) Problems in primate classification involving consideration of living and fossil forms and the extent to which application of taxonomic principles can aid in both the definition and solution of these problems. Prerequisite: 488 or 489 or permission of instructor.

PHY A 583 Topics in Growth and Development (3, max. 9) Newell Seminar on various topics of human or nonhuman primate growth and physical/behavioral development. Subject matter varies by quarter. Prerequisite: 484 or permission of instructor.

PHY A 584 Topics in Ecology and Adaptation (3, max. 9) Seminar dealing with various aspects of ecology and adaptation. Topics vary each quarter. Prerequisite: permission of instructor.

PHY A 588 Topics in Primate Evolution (3) Eck Emphasis on fossil taxa and their importance in understanding the morphologies and distributions of members of modern taxa. Prerequisites: 488 and permission of instructor.

PHY A 589 Topics in Hominid Evolution (3) A Eck Emphasis on the fossil taxa and their importance in understanding the evolutionary history of the modern genus. Prerequisites: 489 and permission of instructor.

PHY A 590 Current Issues in Human and Non-Human Primate Evolution (2, max. 18) Biweekly presentation by participants and guest lecturers of current literature and ongoing research in topics pertaining to human and nonhuman primate evolution, biology, anatomy, genetics variation, and behavior. Prerequisite: graduate standing in physical anthropology or permission of instructor.

PHY A 600 Independent Study or Research (*) AWSps Prerequisite: permission of instructor.

Applied Mathematics

408 Guggenheim

The Department of Applied Mathematics is concerned with mathematical modeling and analysis of problems from the physical, biological, and social sciences and from engineering. The department offers upper-level undergraduate and graduate courses for all interested students in the University, as well as degree programs for graduate students in applied mathematics. Students interested in an undergraduate curriculum in applied mathematics are advised to enter the mathematical sciences option for the Bachelor of Science degree in the Department of Mathematics and to elect the applied mathematics concentration. They are encouraged to consult the Chairperson of Applied Mathematics for counseling.

Graduate Program

The Department of Applied Mathematics offers graduate programs of study leading to the degrees of Master of Science and Doctor of Philosophy. These programs involve (1) broad training in those mathematical methods and techniques that have been found useful in applications, (2) in-depth study in at least one field of application, and (3) opportunities to explore various specialized aspects of applied mathematics.

Master of Science, Doctor of Philosophy Degrees

Admission Requirements: Prospective students for the Master of Science program should hold an undergraduate degree either in mathematics with a strong background in applications or in physical, engineering, biological, or social science with a strong background in applications-oriented mathematics. Students who wish to apply to the doctoral program need to show evidence of completion of course work equivalent to that described for the master's degree, with at least a 3.40 grade-point average. In addition, admission to the doctoral program is contingent upon passing a qualifying examination and indication of the ability or potential to perform independent research.

It is required that the Graduate Record Examination be taken and the results be sent to Graduate Admissions.

Three letters of recommendation are required in support of each application; they should be sent directly to the department. After receiving notification of admission to the Graduate School and a registration appointment, the student should contact the department. (On the Application for Graduate School Admission form, the student should be sure to indicate the desire to enter the Department of Applied Mathematics, rather than Mathematics.)

Master of Science Degree

The M.S. degree program is designed to provide the student with a working knowledge of several basic areas of applied mathematics, together with exposure to at least one specific area of application. The applied mathematics areas include complex variables, ordinary and partial differential equations, applied linear algebra, numerical analysis, optimization, and applied probability and statistics. In addition, M.S. students must take the department course offering in mathematical modeling and must acquire some experience in high-speed computation before receiving a degree. The specific area of application is chosen by the student from a broad range of outside fields, including engineering; the physical, biological, and certain areas of the medical sciences. After fulfilling the basic course requirements, the student can obtain the M.S. degree by additional course work to complete the required 40 credits for the degree. Students may elect to do an M.S. thesis in lieu of a maximum of 6 additional course credits. Detailed requirements for the M.S. degree are listed in the Applied Mathematics graduate program guidelines.

Doctor of Philosophy Degree

The Doctor of Philosophy degree in applied mathematics is primarily a research degree, not conferred as a result of course work alone. The granting of the degree is based on general proficiency and attainment in applied mathematics, together with a demonstrated ability to carry out an independent investigation, which is described in a doctoral dissertation. Proficiency and attainment in applied mathematics is demonstrated by passing the General Examination, which tests the student's ability to probe a new area of research and to exercise critical judgment on a technical issue of current importance in the chosen field of research. The doctoral dissertation must exhibit original mathematical contributions in a significant area of application. The Final Examination and defense of the dissertation is a research seminar presentation open to the public. The detailed requirements for the doctoral degree are listed in the Applied Mathematics graduate program guidelines.

Financial Aid

Both research and teaching assistantships are available to full-time students who qualify. In addition, fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.

Research Facilities

Students in applied mathematics have access to a departmental network of 15 VaxStation and DecStation computers served by a central file server. Available disk storage exceeds 3GB. Available software includes Mathematica, SMP, Matlab, S, NAG and other libraries, TeX and extensive utilities. Students also have access to other campus computing resources as well as supercomputer facilities around the nation.

Professors

Baker, Marshall,* 1962, ‡(Physics), Ph.D., 1958, Harvard; theoretical physics.

Criminale, William O.,* 1968, (Oceanography, Geophysics), † Ph.D., 1960, Johns Hopkins; fluid dynamics, mathematical physics, nonlinear mechanics, stability theory.

Faaland, Bruce H.,* 1971, ‡(Management Science), M.S., 1968, Ph.D., 1971, Stanford; integer and network programming, manufacturing management, forest products, service operations.

Ishimaru, Akira,* 1956, ‡(Electrical Engineering), Ph.D., 1958, Washington; wave propagation and scattering.

Kevorkian, Jirair,* 1964, (Aeronautics and Astronautics), † M.S., 1956, Georgia Institute of Technology; Ph.D., 1961, California Institute of Technology; partial differential equations, perturbation theory.

Murray, James D.,* 1988, ‡(Zoology), Ph.D., 1956, St. Andrews (England); M.A., 1961, D.Sc., 1968, Oxford (England); reaction-diffusion phenomena, bifurcation, mathematical biology, epidemic theory, mathematical ecology.

Pearson, Carl E.,* 1965, (Aeronautics and Astronautics), † Ph.D., 1949, Brown; fluid dynamics, numerical analysis, optimization.

Riley, James J.,* 1983, ‡(Mechanical Engineering), Ph.D., 1971, Johns Hopkins; fluid mechanics, especially transition and turbulence, geophysical fluid mechanics.

Rockafellar, R. Tyrrell,* 1966, (Mathematics), † M.S., 1959, Marquette; M.S., 1960, Ph.D., 1963, Harvard; optimization, control theory, network programming.

Tung, Ka Kit,* 1989, Ph.D., 1977, Harvard; large-scale atmospheric dynamics; modeling of stratospheric transport, geophysical fluid dynamics.

Vagners, Juris,* 1967, (Aeronautics and Astronautics), † M.S., 1963, Ph.D., 1967, Stanford; optimal control and estimation theory.

Wan, Frederic Y. M.,* 1983, (Mathematics), † S.M., 1963, Ph.D., 1965, Massachusetts Institute of Technology; mathematical modeling, asymptotic and variational methods in elasticity, biomechanics and resource economics.

Associate Professors

Adams, Loyce M.,* 1985, (Computer Science), M.S., 1978, Ph.D., 1983, Virginia; numerical algorithms for parallel computers.

Bretherton, Christopher S.,* 1984, (Atmospheric Sciences), Ph.D., 1984, Massachusetts Institute of Technology; complex behavior in geophysical systems, especially moist atmospheric convection.

LeVeque, Randall J.,* 1985, (Mathematics), † Ph.D., 1982, Stanford; numerical analysis and solution of nonlinear partial differential equations.

Storti, Duane W.,* 1983, ‡(Mechanical Engineering), M.S., 1981, Ph.D., 1983, Cornell; nonlinear dynamics and vibrations, perturbation theory.

Assistant Professor

Kot, Mark,* 1990, Ph.D., 1987, Arizona; mathematical ecology, population biology.

Course Descriptions

Courses for Undergraduates and Graduates

AMATH 341 Computer Applications of Numerical Methods (3) AWSpS Development and application of numerical methods and algorithms to solve problems in engineering. Simultaneous equations, curve fitting, root-finding algorithms, Taylor series analysis, numerical integration, ordinary differential equations. Joint with ENGR 341. Prerequisites: ENGR 141 or equivalent and MATH 307 or AMATH 351, which may be taken concurrently.

AMATH 351, 352 Quantitative Methods I, II (3,3) A,W Applications of mathematical techniques to problems in the sciences and engineering. Emphasis on formulation, solution, and interpretation of results. 351: ordinary differential equations. 352: approximate methods; Fourier series; partial differential equations; boundary-value problems. Joint with OCEAN 351, 352 and MATH 351, 352. Prerequisites: one year of physics and MATH 126 for 351; 351 or MATH 307 for 352.

AMATH 381, 382, 383 Introduction to Mathematical Modeling (3,3,3) A,W,Sp Simple discrete and continuous models of diverse natural and social phenomena with particular reference to the unity of the tools of mathematical analysis useful in their study. 381: discrete methods; 383: continuous methods; 382: a mixture. Mathematical topics and phenomena. Joint with MATH 381, 382, 383. Prerequisites: MATH 126 and either MATH 205 or MATH 308 for 381 and 382; either AMATH 351 or MATH 307, and MATH 328 for 383.

AMATH 400 Methods of Engineering Analysis (3) A Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Joint with CH E 400. Prerequisites: MATH 205, MATH 307 or AMATH 351, MATH 328 or permission of instructor.

AMATH 401 Methods in Applied Mathematics I (4) ASp Emphasis on acquisition of solution techniques; ideas illustrated, specific example problems arising in science and engineering. Applications of vector differential calculus, complex variables. Line, surface integrals; integral theorems; Taylor and Laurent series, contour integration. Joint with ENGR 401. Prerequisites: MATH 205; MATH 328 or A A 370, and AMATH 351 or MATH 307 or permission of instructor.

AMATH 402 Methods in Applied Mathematics II (4) AW See 401. Applications of ordinary differential equations; review of elementary concepts for first and second order equations; power series and Frobenius solutions. Laplace transforms; systems of differential equations, eigenvalues. Joint with ENGR 402. Prerequisites: MATH 205; MATH 328 or A A 370; and AMATH 351 or MATH 307 or permission of instructor.

AMATH 403 Methods in Applied Mathematics III (4) WSp See 401. Application of partial differential equations; linear and quasilinear first order equations, characteristics; classification of linear second order equations; basic solution techniques for parabolic, elliptic, and hyperbolic equations; Green's functions and integral methods. Joint with ENGR 403. Prerequisite: 402 or permission of instructor.

Courses for Graduates Only

AMATH 500 Special Studies in Applied Mathematics (*, max. 12) AWSpS Lectures and discussions of topics of current interest in applied mathematics. May not be offered every quarter; content may vary from one offering to another. Prerequisite: permission of instructor.

AMATH 501 Seminar in Applied Mathematics (1, max. 6) AWSp Special topics and selected problems of current interest in applied mathematics. Offered on credit/no credit basis only.

AMATH 502 Applied Mathematics Clinic (1-2) AWSp The clinic provides consulting service for problems from different academic units requiring assistance in formulation, analysis, and interpretation of mathematical models. Students learn to delineate sources of difficulties, identify or devise a method of solution, and effectively communicate it to clients. Prerequisites: 568, 569, and 584.

AMATH 503 Mathematical Biology I (3) Mathematical modeling in biomedical sciences (mainly ecology, epidemiology, physiology, and zoology). Topics

covered include modeling (continuous and discrete), population interactions, dynamic diseases, reaction kinetics, biological oscillators, oscillator generated wave phenomena, epidemics, and the dynamics of infectious diseases. Prerequisites: 402 or equivalent and knowledge of ordinary differential equations.

AMATH 504 Mathematical Biology II (3) Mathematical modeling in the biomedical sciences (mainly ecology, epidemiology, and zoology). Topics include spatial spread of populations, travelling wave phenomena in biology, reaction diffusion theory, biological pattern formation mechanisms, mechanochemical theory of morphogenesis, spatial spread of epidemics. (May be taken independently of 503.) Prerequisites: 402, 403 or equivalents; ordinary, partial differential equations.

AMATH 506 Applied Probability and Statistical Inference (4) Sp Overview of probability models, random variables, independence and conditional probability, Markov chains, stationary time series, statistical inference, estimation and testing. Joint with STAT 506. Prerequisite: some advanced calculus and linear algebra.

AMATH 507, 508 Calculus of Variations I, II (3,3) A,W Necessary and sufficient conditions for a weak and strong extremum. Legendre transformation, Hamiltonian systems. Constraints and Lagrange multipliers. Space-time problems with examples from elasticity, electromagnetics, and fluid mechanics. Sturm-Liouville problems. Approximate methods. Joint with MATH 507, 508. Prerequisites: 351 or MATH 307; MATH 328, 329 for 507; 507 for 508; recommended: 402, 403, or MATH 428, 429.

AMATH 509 Theory of Optimal Control (3) Sp Trajectories obtained from ordinary differential equations with control variables. Controllability, optimality, the maximum principle. Relaxation and the existence of solutions. Techniques of nonsmooth analysis. Joint with MATH 509. Prerequisites: real analysis on the level of MATH 426; background in optimization corresponding to 507 or 515. (Offered even-numbered years.)

AMATH 514 Networks and Combinatorial Optimization (3) A Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Joint with MATH 514. Prerequisites: MATH 308 and 328 or equivalents.

AMATH 515 Fundamentals of Optimization (3) W Maximization and minimization of functions of finitely many variables subject to constraints. Basic problem types and examples of applications; linear, convex, smooth, and nonsmooth programming. Optimality conditions. Saddlepoints and dual problems. Penalties, decomposition. Overview of computational approaches. Joint with MATH 515. Prerequisites: MATH 309, 328, or equivalents.

AMATH 516 Numerical Optimization (3) Sp Methods of solving optimization problems in finitely many variables, with or without constraints. Steepest descent, quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic programming. Cutting planes and nonsmooth optimization. Joint with MATH 516. Prerequisite: 515.

AMATH 517 Optimization Under Uncertainty (3) A Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications to optimal stopping, inventory control, resource management. Joint with MATH 517. Prerequisites: 506 (or an introduction to basic concepts of probability such as STAT 390 or 394, 395), MATH 308 and 328.

AMATH 518 Topics in Applied Optimization (3) Sp Problems and techniques in special areas of optimization, such as engineering design, resource manage-

ment, stochastic programming, games, variational inequalities, and parameter identification in mathematical modeling. Joint with MATH 518. Prerequisite: 515 or permission of instructor. (Offered odd-numbered years.)

AMATH 519 Tensor Analysis (3) A Cartesian tensors; motivation, manipulation, applications. Riemannian space; Christoffel symbols, geodesics, covariant differentiation. Curvature tensor, geodesic deviations, flat space. Special local coordinate systems. Applications to classical mechanics, continuum mechanisms, electromagnetism, relativity. Special topics. Joint with MATH 519. Prerequisite: 401 or MATH 328, or permission of instructor. (Offered odd-numbered years.)

AMATH 520 Mathematical Modeling (3) W Processes used in physical, biological, and economic sciences, as well as in engineering, for providing mathematical descriptions of various problems pertinent to these disciplines. Emphasis on the modeling rather than on the solution. Students must have an undergraduate background in one or more mentioned areas.

AMATH 530 Parallel Numerical Algorithms (3) Sp Characteristics of parallel architectures, design and complexity analysis of parallel algorithms (communication, speedup, execution time, problem decomposition, problem ordering, problem mapping issues), parallel methods for elliptic PDEs, parallel methods for parabolic and hyperbolic PDEs, case studies of applications on current parallel machines. Prerequisite: 584 or equivalent.

AMATH 550 Mathematical Topics in Analytical Dynamics (3) Sp In-depth study of one or more aspects of current interest in analytical dynamics, such as the stability of many body systems, resonance and passage through resonance, exact and adiabatic invariants. Prerequisites: 403, others depending on topics; recommended: basic graduate course in analytical dynamics.

AMATH 551 Mathematical Topics in Solid Mechanics (3) Sp Topics vary and include: foundations of plate theories; structure of linear shell theory, static-geometric duality; asymptotic solutions for nonlinear plate and shell problems; bifurcation theory and solution methods; wave propagation and stability problems in random environments. Prerequisites: 403; graduate-level course in mechanics; and others, depending on topics.

AMATH 552 Mathematical Topics in Fluid Dynamics (3) Sp Mathematical development and foundations in fluid dynamics; topics selected from boundary layers, stability theory, turbulence, rotating-stratified fluid motion, gas dynamics. Prerequisites: 403, others depending on topics; recommended: graduate-level course in fluid dynamics.

AMATH 563, 564 Methods of Partial Differential Equations II, III (3,3) A,W First-order partial differential equations: characteristics, conservation laws, shocks, applications to geometrical optics and Hamilton-Jacobi theory. Elliptic equations: fundamental solution, Green's functions, conformal mapping, boundary-value problems. Parabolic equations. Hyperbolic equations: characteristics, shocks, examples from fluid dynamics, approximate methods. Post-master's sequence. Prerequisite: 569. (Offered odd-numbered years.)

AMATH 567 Analysis in Engineering and Science I (3) A Complex variable and associated topics. Branch cuts, series and product expansions. Contour integration, numerical implications. Harmonic functions. Complex potential (and singularities) in physical problems. Conformal mapping; applications and examples. Fourier and Laplace transforms and applications. Joint with A 567. Recommended: 401 or equivalent.

AMATH 568 Analysis in Engineering and Science II (3) W Survey of practical solution techniques for ordinary differential equations. Linear systems of equa-

tions including nondiagonalizable case. Linear difference equations. Nonlinear systems; stability phase plane analysis. Poincaré maps. Asymptotic expansions. Regular and singular perturbations. Some computer work may be assigned. Joint with A 568. Recommended: 402 or equivalent.

AMATH 569 Partial Differential Equations (3) Sp Analytical solution techniques for linear partial differential equations, discussion of how these arise in engineering and science. Transform and Green's function methods. Classification of second-order equations, theory and applications of method of characteristics. Joint with A 569 and MATH 569. Prerequisite: 403, 568 or MATH 428 or permission of instructor.

AMATH 577, 578 Perturbation Theory I, II (3,3) A,W Basic concepts of asymptotic expansions with applications to linear partial differential equations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions, the methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonance phenomena, nonlinear wave propagation in fluid, solid and particle mechanics. Post-master's sequence. Prerequisites: 567, 568, 569, or equivalent. (Offered even-numbered years.)

AMATH 584 Applied Linear Algebra and Introductory Numerical Methods (3) A Applied linear algebra: matrix operations, linear systems, matrix factorization, eigenvalues, numerical methods, applications to optimization, circuits, differential equations. Survey of numerical methods: nonlinear systems, curve fitting, ordinary differential equations, quadrature, basic ideas in partial differential equations. Joint with A 584.

AMATH 585, 586 Approximate and Numerical Analysis II, III (3,3) W,Sp Advanced topics in numerical analysis. More detailed consideration of topics in 584. Emphasis on methods for partial differential equations, integral equations, finite elements, stability and accuracy, mesh generation, adaptive meshes, sparse matrices, variational methods. Post-master's sequence. Joint with A 585, 586. Prerequisites: 567, 584, 568, and 569, which may be taken concurrently.

AMATH 587 Asymptotics and Transcendental Functions (3) A Origin and properties of higher transcendental functions; theoretical basis and applications of Laplace, Fourier, Bessel, Mellin transforms; asymptotic analysis, including methods of steepest descent and stationary phase, WKB. Prerequisite: 567, 568, 569, or equivalent.

AMATH 588 Green's Functions and Integral Equations (3) W Review of Sturm-Liouville theory. Green's functions and integral representation of solution of PDE. Applications in science and engineering. Integral equations. Fredholm and Hilbert-Schmidt theories. Dual integral equations. Prerequisites: 567, 568, 569, or equivalent.

AMATH 589 Advanced Topics of Applied Analysis (3) Sp Numerical treatment of Fredholm and Volterra equations. Singular integral equations: transform approach and complex variables methods; Wiener-Hopf and other special techniques; the Hilbert problem. Nonlinear integral equations. Prerequisite: 588 or permission of instructor.

AMATH 594, 595, 596 Numerical Analysis (3,3,3) A,W,Sp Error analysis, linear systems, LU, QR and SVD factorizations, eigenvalues, least squares, iterative methods for linear and nonlinear systems, optimization, interpolation, approximation, splines, Fourier series, FFTs. Joint with MATH 594, 595, 596. Prerequisite: 584 or MATH 465 or permission of instructor.

AMATH 597, 598, 599 Numerical Solutions of Differential Equations (3,3,3) A,W,Sp Numerical quadrature and solution of ordinary differential equations, initial- and boundary-value problems, solution of partial differential equations by finite difference and finite ele-

ment methods, stability analysis and boundary conditions, solution of large sparse linear systems. Joint with MATH 597, 598, 599. Prerequisite: 584 or MATH 466 or permission of instructor.

AMATH 600 Independent Research or Study (*) AWSpS Offered on credit/no credit basis only.

AMATH 700 Master's Thesis (*) AWSpS Offered on credit/no credit basis only.

AMATH 800 Doctoral Dissertation (*) AWSpS Offered on credit/no credit basis only.

Art

102 Art

The School of Art is concerned with the practice, history, and teaching of the graphic and plastic arts. It offers undergraduate programs in ceramic art, fiber arts, graphic design, industrial design, metal design, painting, photography, printmaking, sculpture, and general art. In addition, the school offers graduate programs leading to the degrees of Master of Fine Arts in studio disciplines and Master of Arts and Doctor of Philosophy in art history.

Undergraduate Program

Adviser
L. Elizabeth Anderson
104 Art

Admission Policy for Initial-Degree-Seeking Applicants

The Office of Admissions admits entering freshmen as art majors. Transfer students indicating an art major are admitted initially as premajors in the College of Arts and Sciences. Those with a minimum grade-point average of 2.50 are accepted as art majors during the first meeting with an art adviser.

So that placement within art programs can be determined, transfer students with college-level art experience must submit representative examples of studio work in slide or photograph form with transcripts to the School of Art advisory office at least two weeks before the initial advisory appointment. Art majors may follow the General Art curriculum without further review of work or record of accomplishment if a minimum grade-point average of 2.00 is maintained. All other studio majors are subject to the continuation policies appropriate to their major options.

Admission Policy for Postbaccalaureate Applicants

Postbaccalaureate art applicants must file an application through the Office of Admissions by the regular quarterly deadlines.

A supplementary information form is provided by the School of Art. By the above deadlines this form and slides of studio work must be submitted by studio art applicants to the School of Art advisory office for an admission review. Following the review, applicants are notified by the Office of Admissions regarding their admission.

Postbaccalaureate applicants who hope to transfer to art from other schools, departments, or colleges on the campus may pick up a supplementary information form from the School of Art advisory office. For an applicant to be considered for admission, this supplementary form, a complete academic record, and slides of studio work are required and may be submitted to the School of Art advisory office at any time.

Bachelor of Arts Degree

MAJOR REQUIREMENTS

General Art: ART 105, 106, 109, 110; ART H 201, 202, 203; 54 credits chosen from the following optional

fields so that one option includes no more than 20 credits and the others no more than 15 credits each: all undergraduate art history courses; ART 201, 202, 353, 250, 252, 255, 330, 340, 405; 265, 325; 258, 357, 358, 359, 457, 458, 459; 256, 257, 259, 260, 307, 360; 230, 370, 371, 372; 345, 347, 348, 349, 450, 452, 453, 454; 253, 272, 274, 332.

Bachelor of Fine Arts Degree

A minimum of 198 credits is required for graduation with a Bachelor of Fine Arts degree.

MAJOR REQUIREMENTS

Ceramic Art: ART 105, 106, 109, 110, 201, 202, 353 (15 credits); 485 (15 credits); 486 (15 credits); 15 credits selected from the following: ART 255, 258, 272, 335, 337, 357; 22 studio art or related elective credits. ART H 201, 202, 203; 3 elective credits.

Fiber Arts—Surface Design Option: ART 105, 106, 109, 110, 215, 250 (10 credits); 252, 253, 255, 259, 330, 340 (10 credits); 425 (15 credits); 29 studio art or related elective credits including 15 credits from 201 or 202, 230, 258, 348, 349, 405. ART H 201, 202, 203; 3 elective credits.

Fiber Arts—Weaving Construction Option: ART 105, 106, 109, 110, 215, 250, 252, 253, 255 (10 credits); 259, 330, 340, 405, 425 (15 credits); 29 studio art or related elective credits including 15 credits from 201 or 202, 230, 258, 348, 349. ART H 201, 202, 203; 3 elective credits.

Graphic Design: ART 105, 106, 109, 111, 113, 205, 206, 207, 230, 366, 367, 368, 376, 377, 378, 466, 467, 468, 478, 479, 480; 9 studio art or related elective credits. ART H 201, 202, 203; 3 elective credits.

Industrial Design: ART 105, 106, 109, 110, 254, 261, 262, 263, 316, 317, 318, 321, 322, 422, 445, 446, 447, 24 studio art or related elective credits. ARCH 310, 311; CAUP 270; SPCH 220; PHYS 110, 111. ART H 201, 202, 203; 3 elective credits.

Metal Design: ART 105, 106, 109, 110, 258, 357, 358, 359, 457, 458, 459, 460 (15 credits); 15 credits from: 201, 202, 255, 272, 335, 337; 27 studio art or related elective credits. ART H 201, 202, 203; 3 elective credits.

Painting: ART 105, 106, 109, 110, 265 (15 credits); 256, 257, 307 (10); 360 (10); 463 (10); 15 credits from 259, 260, 309, 325, 361, 463, 464, 22 studio art or related elective credits. ART H 201, 202, 203, 391, any twentieth-century art history course.

Photography: ART 105, 106, 109, 110, 230, 370, 371, 372, 411 (15 credits); 412, 413, 414, 415 (10 credits); 32 studio art or related elective credits. ART H 201, 202, 203, 232.

Printmaking: ART 105, 106, 109, 110; 345, 347, 348, 349, 350; 30 credits from 450, 452, 453, 454, 455; 256, 257, 265 (10 credits); 17 studio art or related elective credits. ART H 201, 202, 203; 3 elective credits.

Sculpture: ART 105, 106, 109, 110, 253, 272, 274, 332 (15 credits); 335, 337, 436 (15 credits); 265, 345 or 347; three courses selected from 201, 202, 252, 255, 258, 357; 14 studio art or related elective credits. ART H 201, 202, 203; 3 elective credits.

Graduate Program

Charles W. Smith, Graduate Program Coordinator

Students accepted for admission into the Master of Fine Arts degree program in ceramic art, fiber arts, graphic design, industrial design, metal design, painting, photography, printmaking, or sculpture will be required to complete a minimum of 63 credits of scheduled class work and 9 credits of thesis for a total of 72 credits for the degree. No foreign language is required or the Graduate Record Examination. The thesis is in the nature of a studio project, such as a series of paintings, prints, ceramic objects, or sculptures.

A selection of the student's thesis work must be included in the annual studio master's exhibition of the School of Art.

Graduate students may participate in the School of Art's study abroad program.

Admission Requirements

Graduate standing is granted only on presentation of credentials from art schools or university art departments whose standards are recognized by this school. Samples of work done in these schools or art departments also must be presented by applicants for admission to the Master of Fine Arts degree program.

Students who desire to pursue a course of study leading to the master's degree must have a grade-point average of 3.00 or better in the undergraduate art major and must have completed the equivalent of the undergraduate degree requirements in the School of Art, University of Washington. Undergraduate work beyond the basic minimum may be required if it is necessary to make up deficiencies.

Financial Aid

The studio divisions offer several scholarship and financial aid programs for students who qualify. These programs include endowments and organizational and privately supported scholarships. Information concerning scholarships is available from the graduate program coordinator. Also available to graduate students are teaching assistantships, usually awarded to a limited number of candidates after the first quarter in residence.

Professors

Alps, Glen E., * 1947, (Emeritus), M.F.A., 1947, Washington; printmaking.

Anderson, Frederick N., * 1947, (Emeritus), M.F.A., 1954, Minnesota; painting.

Arnold, Richard R., * 1977, M.F.A., 1948, Cranbrook Academy of Art (Michigan); photography.

Berger, Paul E., * 1978, M.F.A., 1973, State University of New York (Buffalo); photography.

Carraher, Ronald, * 1967, M.A., 1961, San Jose State; photography.

Celentano, Francis M., * 1968, M.A., 1957, Institute of Fine Arts (New York); painting, drawing.

Dahn, Richard F., * 1965, M.F.A., 1959, Yale; graphic design.

Dailey, Michael D., * 1963, M.F.A., 1963, Iowa; painting, drawing.

DuPen, Everett, 1945, (Emeritus), B.F.A., 1937, Yale; sculpture.

Erickson, John W., 1956, (Emeritus), M.F.A., 1951, Illinois; painting.

Hixson, William J.,* 1950, M.F.A., 1950, Oregon; painting, drawing.

Hu, Mary L.,* 1980, M.F.A., 1967, Southern Illinois; metal design.

Johnson, Pauline, 1941, (Emeritus), D.F.A. (Hon.), 1968, Moore; art education.

Jones, Robert C.,* 1960, M.S., 1959, Rhode Island School of Design; painting, drawing.

Kehl, Richard L.,* 1968, M.F.A., 1961, Kansas City Art Institute; painting.

Lawrence, Jacob A.,* 1971, (Emeritus), D.F.A. (Hon.), 1981, Carnegie-Mellon; painting, drawing.

Lundin, Norman K.,* 1964, M.F.A., 1963, Cincinnati; painting, drawing.

Marshall, John C.,* 1970, M.F.A., 1968, Syracuse; metal design.

Mason, Alden C., 1946, (Emeritus), M.F.A., 1947, Washington; painting.

Moseley, Spencer A.,* 1948, M.F.A., 1952, Washington; painting, drawing.

Penington, Ruth E., 1928, (Emeritus), M.F.A., 1929, Washington; metal design.

Pizzuto, Eugene C.,* 1957, M.F.A., 1951, Cranbrook Academy of Art (Michigan); painting, drawing.

Smith, Charles W.,* 1956, M.F.A., 1956, Cranbrook Academy of Art (Michigan); sculpture.

Solberg, Ramona,* 1968, (Emeritus), M.F.A., 1957, Washington; art education, metal design.

Spafford, Michael C.,* 1963, M.A., 1960, Harvard; painting, drawing.

Sperry, Robert,* 1954, (Emeritus), M.F.A., 1955, Washington; ceramics.

Tsutakawa, George, 1946, (Emeritus), M.F.A., 1950, Washington; sculpture.

Wadden, Douglas J.,* 1970, M.F.A., 1970, Yale; graphic design.

Warashina, Patricia,* 1970, M.F.A., 1964, Washington; ceramics.

Whitehill-Ward, John,* 1975, M.S., 1974, Institute of Design (Chicago); graphic design.

Associate Professors

Anderson, Judy M.,* 1988, M.A., 1977, California (Berkeley); graphic design.

Ball, Ralph,* 1988, M.Des.RCA, 1980, Royal College of Art; industrial design.

Fuller, Steven, 1946, (Emeritus), M.F.A., 1948, Washington; art education.

Goldsmith, Layne,* 1983, M.F.A., 1979, Cranbrook Academy of Art (Michigan); fiber arts.

Hennessey, James M.,* 1980, M.F.A., 1971, California Institute of the Arts; industrial design.

Koenig, Hazel L.,* 1967, M.F.A., 1950, Washington; fiber arts.

Pawula, Kenneth J.,* 1965, M.A., 1962, California (Berkeley); painting, drawing.

Praczkowski, Edward L.,* 1965, M.F.A., 1965, Cranbrook Academy of Art (Michigan); painting, drawing.

Proctor, Richard M.,* 1962, M.A., 1962, Michigan State; fiber arts.

Taylor, Norman J.,* 1968, M.A., M.F.A., 1967, Iowa; sculpture.

Weiman, Valentine S.,* 1954, (Emeritus), M.F.A., 1954, Colorado; painting, drawing.

Young, John T.,* 1984, M.F.A., 1978, Rhode Island School of Design; sculpture.

Assistant Professors

Ganz, Karen J.,* 1988, M.A., 1987, M.F.A., 1988, Iowa; painting.

Labitzke, Curt W.,* 1984, M.F.A., 1984, Notre Dame; printmaking.

Scheler, Shirley E.,* 1986, M.F.A., 1985, Wisconsin (Madison); printmaking.

Walker, James S., 1989, M.F.A., 1983, Rhode Island School of Design; ceramics.

Art History Faculty

Professors

Bliquez, Lawrence J.,* 1970, (Classics),† M.A., 1965, Ph.D., 1968, Stanford; Greek and Roman.

Bravmann, Rene A.,* 1968, M.A., 1965, Ph.D., 1971, Indiana; African, Oceanic.

Christofides, Constantine G.,* 1966, (Drama), (Comparative Literature, Romance Languages and Literature),† M.A., 1949, M.A., 1950, Ph.D., 1956, Michigan; Romanesque.

Hildebrand, Grant,* 1964, (Drama), (Architecture),† M.Arch., 1964, Michigan; architectural history.

Holm, Bill,* 1968, (Affiliate), (Anthropology),† M.F.A., 1951, Washington; Northwest coast Indian.

Kingsbury, Martha,* 1968, M.A., 1963, Ph.D., 1969, Harvard; nineteenth and twentieth centuries.

Opperman, Hal N.,* 1967, M.A., 1963, Ph.D., 1972, Chicago; seventeenth- and eighteenth-century European.

Pascal, Paul,* 1953, ‡(Classics), Ph.D., 1953, North Carolina; Roman.

Pundt, Hermann,* 1968, (Architecture),† M.A., 1960, Illinois; Ph.D., 1969, Harvard; architectural history.

Silbergeld, Jerome,* 1975, M.A., 1967, Stanford; M.A., 1972, Oregon; Ph.D., 1974, Stanford; Chinese.

Associate Professors

Clausen, Meredith L.,* 1979, (Architecture),† M.A., 1972, Ph.D., 1975, California (Berkeley); modern architectural history.

Karlonis, Anna D.,* 1983, (Comparative Religion), M.A., 1968, Ph.D., 1982, Institute of Fine Arts (New York); early Christian, medieval, Byzantine.

Langdon, Merle K.,* 1976, (Classics),† Ph.D., 1972, Pennsylvania; Greek.

Snow-Smith, Joanne,* 1981, M.A., 1968, Arizona; Ph.D., 1976, California (Los Angeles); Italian Renaissance.

Assistant Professors

Berry, Paul Allan, 1988, M.A., 1977, Hawaii; Ph.D., 1985, Michigan; Japanese.

Falling, Patricia, 1990, M.A., 1974, California (Berkeley); contemporary art history/art criticism.

Reed, T. Gervais, 1952, B.A., 1949, Yale; American, film.

Wright, Robin K., 1990, M.A., 1977, Ph.D., 1985, Washington; Native American.

Lecturer

Ishikawa, Chiyo L., 1990, M.C., 1983, Ph.D., 1989, Bryn Mawr; northern Renaissance/northern Baroque.

Course Descriptions

Courses for Undergraduates

ART 102 Introduction to Painting (3) Painting from still life or landscape. Use of oil paints and acrylics. Painting methods and procedures, visual and artistic considerations. For nonmajors only.

ART 105, 106, Drawing (5,5) Perspective, light and shade, composition. Prerequisites: 105 for 106.

ART 109, 110 Design (3,3) Organization of line, space, and color. Art structure as the basis for creative work. Prerequisite: 109 for 110.

ART 111 Basic Visual Analysis (3) Symbolic representation of forms and ideas. Investigative drawing and varied photomechanical manipulation as fundamental components in visual analysis. Prerequisite: 109.

ART 113 Basic Color Theory and Form (3) Fundamental investigations into the synthesis of basic two- and three-dimensional design principles. Color theory and analysis for pre-design majors. Prerequisites: 111, which may be taken concurrently, and 109.

ART 201 Ceramic Art: Handbuilding (5) Introduction to handbuilding; kiln firing and glazing processes. Contemporary sculpture in clay. Prerequisites: 106, 110.

ART 202 Ceramic Art: Wheel Throwing (5) Introduction to wheel throwing, glazing, and kiln firing processes. Contemporary vessel form in clay. Prerequisites: 106, 110.

ART 204 Graphic Design: Context, Formulation, Performance (3) Lectures and assignments exploring graphic design and its function in the context of specific visual situations. Primarily for nonmajors.

ART 205, 206 Graphic Design (5,5) Problem solving in basic graphic design, consisting of a sequence of applied visual projects intended to present a wide range of design experiences. Prerequisites: 106, 113 for 205; 205 for 206.

ART 207 Typographic Design: Methods and Processes (5) Operational typographic and reproduction methods as a foundation for two-dimensional design and laboratory assignments. Computerized phototypesetting, offset lithography, and photomechanical techniques as they relate to the design process. Prerequisite: 206.

ART 215 Principles of Dyes and Dyeing (5) History of dyes and dyed textiles from ancient use through current industrial practices. Dye studio practices and practical application of various dyes for accuracy and safety. Fiber preparation, dye fixation, and record-keeping of dye tests.

ART 230 Introductory Photography (5) Introduction to theory, techniques, and processes of still photography. Darkroom procedures and camera use. Visual and creative potential of the medium. Students must provide a camera with lens, shutter, and aperture controls. Prerequisite: art major standing.

ART 250 Design and Materials: Surface Design for Fabric (5, max. 15) Techniques include block printing, batik, tie and dye, discharging. Prerequisites: 106, 110.

ART 252 Fiber Arts: Introductory Weaving (5) Basic techniques and processes of four-harness loom woven structures. Fundamentals of drafting, loom design and operation, including study of fiber technology and dye chemistry. Prerequisites: 106, 110.

ART 253 Design and Materials: Wood (3) Shaping and forming of wood. Lamination and fabricating techniques. Usage of hand and power tools. Prerequisites: 106, 110.

ART 254 Design and Materials: Metal (3) Basic techniques in manipulation and construction of metals. Prerequisites: 106, 110.

ART 255 Design and Materials: Fabric Construction (5, max. 15) Knotting, hooking, stitching, and other nonwoven constructional techniques with a variety of textile fibers. Prerequisites: 106, 110.

ART 256 Painting (5) Beginning oil painting. Prerequisites: 106, 110.

ART 257 Painting (5) Oil painting. Prerequisite: 256.

ART 258 Jewelry Design (5) Introduction to jewelry design and construction through techniques of sawing, filing, soldering, forging, and casting in silver, copper, bronze, and brass, as well as simple stone setting. Prerequisites: 106, 110.

ART 259 Water-Soluble Media (5, max. 15) Prerequisites: 106, 110.

ART 260 Art Works on Paper (5, max. 15) Combines experiments and projects in various techniques of drawing, assemblage, and painting on paper. Prerequisite: 257.

ART 261, 262, 263 Introduction to Environmental Design (5,5,5) A,W,Sp Design methodology, structures, graphics, materials. Prerequisites: permission of Art advisory office for 261; 261 for 262; 262 for 263.

ART 265 Intermediate Drawing (5, max. 15) Prerequisites: 106, 110.

ART 272 Beginning Sculpture Composition (5) Fundamentals of composition in the round and in relief. Prerequisites: 106, 110.

ART 274 Life Sculpture (5, max. 15) Work in clay from the posed model. Prerequisites: 106, 110.

ART 275 A World History of Art in Public Places (5) Historical introduction to, and overview of, the placement of art in the public domain, examining major visual and conceptual developments in the history of art. Examples of how various public artworks have manifested or been affected by elements of these developments.

ART 276 Contemporary Directions, Art in Public Places (5) Contemporary directions in public art focusing on innovative public artworks, artists, and art programs of Washington State. Prerequisite: 275.

ART 307 Intermediate Painting (5, max. 10) Prerequisite: 257.

ART 309 Portrait Painting (5, max. 10) Prerequisite: 10 credits in 307.

ART 316, 317, 318 Design for Industry (5,5,5) Product design, working drawings, models, presentation drawings, product analysis, display, marketing. Prerequisites: junior standing in industrial design for 316; 316 for 317; 317 for 318.

ART 321 Furniture Design (5) Design of a furniture piece. Methodologies and construction, types of hardware, special shop techniques, scale modeling and full-scale functional designs. Prerequisite: junior standing in industrial design.

ART 322 Industrial Design Materials and Methods (3) Product form development of current design practice examined in the context of new materials and processes. Prerequisite: junior standing in industrial design.

ART 325 Advanced Drawing (5, max. 15) Study at an advanced level involving history, practice, and theory of drawing as an art form. Prerequisite: 15 credits in 265.

ART 330 Intermediate Weaving (5) Introduction to weaver-controlled structures and tapestry weaving. Alternative weaving tools and loom construction; studio dyeing processes. Development of original textile forms. Prerequisite: 252.

ART 332 Intermediate Sculpture Composition (5, max. 15) Advanced work in various media and techniques. Prerequisite: 272.

ART 335 Metal Casting (5, max. 15) Foundry techniques as applied to fine arts casting of ferrous and nonferrous material. Prerequisite: 272.

ART 337 Welding (5, max. 10) Study and application of welding methods as a sculpture technique making use of oxyacetylene, electric arc, and hellarc. Prerequisite: 272.

ART 340 Design for Printed Fabrics (5, max. 15) Hand-block and silk-screen printing; mass-production design. Prerequisite: 250.

ART 345 Intaglio (5) Traditional and contemporary etching and intaglio methods. Prerequisites: 106, 110.

ART 347 Lithography (5) Traditional and contemporary methods. Prerequisites: 106, 110.

ART 348 Relief (5) Traditional and contemporary methods. Prerequisites: 106, 110.

ART 349 Serigraphy (5) Traditional and contemporary methods. Prerequisites: 106, 110.

ART 350 Printmaking Special Projects (5) Prerequisite: permission of instructor.

ART 353 Intermediate Ceramic Art (5, max. 15) Ceramic design and construction, stoneware, clay bodies, glazes. Prerequisites: 201, 202, and permission of instructor.

ART 357 Holloware (5) Processes of raising, soldering, forging in copper, pewter, silver. Prerequisites: 106, 110.

ART 358 Jewelry Design (5) Intermediate jewelry design, such as etching, reticulation, makume, electroforming, repousse, chasing, and advanced stone-setting methods. Prerequisite: 258.

ART 359 Enameling (5) Enamel design for metal work or jewelry, Champleve, Plique-a-jour, Limoges, cloisonne on copper, silver, or gold. Prerequisite: 357 or 358.

ART 360 Life (5, max. 10) Drawing and painting from the model. Prerequisites: 257 and 15 credits in 265.

ART 361 Art Techniques (5, max. 15) Study of the materials and techniques of the artist and their application to painting and drawing. Prerequisite: 257.

ART 366 Graphic Design (5) Visualizations: non-applied problems requiring expression, illustration, or manipulation of ideas in any visual medium, with emphasis on innovative image development. Prerequisites: 207, 230.

ART 367 Graphic Design (5) Basic three-dimensional design: translation of form into three dimensions. Problems in packaging, requiring analysis of material and form, and product identification. Prerequisite: 366.

ART 368 Graphic Design (5) Persuasive communications: applied problems exploring the potential for persuasive verbal/visual communications. Responsibility of the designer to analyze and influence audience response, especially in the area of public service. Prerequisite: 367.

ART 370 Intermediate Photography I (5) Individual projects in photography combining technical and conceptual objectives. Emphasis on visual organization and contemporary photographic directions. Prerequisites: 230 and photography major priority.

ART 371 Intermediate Photography II (5) The photo essay. Thematic investigation of time and space, using the photographic image. In-depth treatment of a single topic. Prerequisites: 230 and photography major priority.

ART 372 Intermediate Photography III (5) Detailed investigation of the negative and print in black-and-white photography. Emphasis on creative application of exposure, development, and printing techniques. Includes preparation of prints for exhibition. Prerequisites: 230 and photography major priority.

ART 376 Graphic Design (5) Fundamentals of typography: functions and procedures, including the study of legibility, proportions, typesetting, and grid formulation. Prerequisites: 207, 230.

ART 377 Graphic Design (5) Two-dimensional composition: problems in typographic, symbolic, and pictorial composition that explores two-dimensional relationships and organizational principles. Prerequisite: 376.

ART 378 Graphic Design (5) Intermediate visual communications: specific applied design projects incorporating basic elements of printed communications. Prerequisite: 377.

ART 405 Advanced Weaving (5, max. 10) Loom- and weaver-controlled structures. Topics may include warp patterning, warp painting, printing and dyeing, ikat, multiple-harness weaves, and selected design problems for architectural textiles, utilitarian textiles, or experimental interpretation of traditional structures and materials. Prerequisite: 330.

ART 411 Advanced Photography (5, max. 15) Topics in advanced photography, including: color printing, large-format photography, artificial lighting, and photographic image transformation. Prerequisites: 370, 371, 372, and photography major priority.

ART 412 Extended Photographic Processes (5) Creative use of extended photographic processes such as high-contrast, infrared, and recording film. Prerequisites: 370, 371, 372, and photography major priority.

ART 413 Documentary Photography (5) Projects in photographic documentation involving either large- or small-format photography. Technical, conceptual, and historical considerations in documentary photography. Prerequisites: 370, 371, 372, and photography major priority.

ART 414 Color Photography (5) Theory and technique of color printing, manual and machine processing, with emphasis on C-41 and Type C chemistry. Prerequisites: 370, 371, 372, and photography major priority.

ART 415 Senior Thesis in Photography (5, max. 10) Development of a coherent photographic theme or topic over two consecutive quarters resulting in a finished thesis portfolio. Prerequisites: 411 and senior standing in photography.

ART 422 Industrial Design Computer Graphics I (3) Utilizes the microcomputer as a tool for the industrial designer's development of graphic solutions to two- and three-dimensional problems. Prerequisite: senior standing in industrial design.

ART 423 Industrial Design Computer Graphics II (3) Continuation of 422. Includes utilization of microcomputer intelligent products and robotics for effective design problem solving. Prerequisite: 422.

ART 425 Advanced Individual Projects in Fiber Arts (5, max. 15) Specialized investigation involving surface design and/or fabric structures. Prerequisite: upper-division standing in fiber arts.

ART 436 Sculpture Composition (5, max. 15) Individual compositions in various media in large scale. Prerequisites: 15 credits in 332.

ART 445, 446, 447 Advanced Industrial Design (5,5,5) Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance. Prerequisites: 318 for 445; 445 for 446; 446 for 447.

ART 450 Advanced Intaglio (5, max. 15) Prerequisite: 345.

ART 452 Advanced Lithography (5, max. 15) Prerequisite: 347.

ART 453 Advanced Relief (5, max. 15) Prerequisite: 348.

ART 454 Advanced Serigraphy (5, max. 15) Prerequisite: 349.

ART 455 Advanced Printmaking (5) Prerequisites: 256, 265, 345, 347.

ART 457 Advanced Holloware (5) Individual problems in metal design and construction. Prerequisite: 357.

ART 458 Advanced Jewelry Design (5) Individual problems in jewelry design and construction. Prerequisite: 358.

ART 459 Advanced Enameling (5) Individual problems in enameling. Prerequisite: 359.

ART 460 Advanced Metal Design (5, max. 15) Advanced individual projects in metal design. Prerequisite: upper-division standing in metal design.

ART 463 Advanced Painting (5, max. 15) Development of individuality in painting through creative exercises. Prerequisites: 10 credits each in 307 and 360 and senior standing in painting.

ART 464 Advanced Painting/Drawing (5, max. 15) Advanced problems in composition. Prerequisite: 15 credits of 463.

ART 466 Graphic Design (5) Advanced two-dimensional design: integration of design elements in complex applied problems. Uses publications as the primary means of aesthetic and organizational investigations. Prerequisites: 368, 378.

ART 467 Graphic Design (5) Exhibition design: fundamental problems of communications through environmental installations. Prerequisite: 466.

ART 468 Graphic Design (5) Independent study. Prerequisite: 467.

ART 478 Graphic Design (5) Information design I: investigations into the components of information design, with emphasis on signs, maps, charts, and diagrams. Prerequisites: 368, 378.

ART 479 Graphic Design (5) Information design II: objective transmittal of complex information in structured communications situations. Prerequisite: 478.

ART 480 Graphic Design (5) Design programs: a comprehensive presentation by the student requiring the analysis of a large-scale identity, institutional, or environmental problem. Prerequisite: 479.

ART 485 Advanced Ceramic Art (5, max. 15) Pottery design and construction, stoneware, clay bodies, glazes. Prerequisites: 15 credits in 353 and permission of instructor.

ART 486 Advanced Individual Projects in Ceramics (3-5, max. 15) Emphasis on pottery, sculpture, kiln building; historical and contemporary directions in clay. Prerequisite: 15 credits in 485.

ART 495 Graphic Design Seminars (5, max. 15) Independent and group work in graphic design theory. Prerequisites: senior standing in graphic design and permission of instructor.

ART 498 Individual Projects—Painting/Sculpture (3 or 5, max. 15) Prerequisite: permission of Art advisory office.

ART 499 Individual Projects—Design (3 or 5, max. 15) Prerequisite: permission of Art advisory office.

Courses for Graduates Only

ART 512 Graduate Seminar (3, max. 9)

ART 513 Contemporary Studio Theories and Problems (3)

ART 515 Photography (3-15, max. 60)

ART 520 Seminar in Painting and Printmaking (1) Designed as a forum for the presentation and criticism of student work as well as for discussion of contemporary directions in visual art.

ART 522 Sculpture (3-15, max. 60)

ART 540 Fiber Arts (3-15, max. 60)

ART 547 Industrial Design (3-15, max. 60)

ART 550 Printmaking (3-15, max. 60)

ART 553 Ceramic Art (3-15, max. 60)

ART 558 Metal Design (3-15, max. 60)

ART 583 Painting (3-15, max. 60)

ART 580 Graphic Design (3-15, max. 60)

ART 600 Independent Study or Research (*)

ART 700 Master's Thesis (*)

Art History

209 Art

Art history is the study of the creation and meaning of works of art in relation to the artists and societies that produce them. Comparative in nature, the history of art involves the interaction of styles, techniques, and ideas from different centers over long periods of time; hence, its study requires many different skills, including languages, bibliography, connoisseurship, and historic, iconographic, and stylistic analysis. Art History is a division of the School of Art.

Undergraduate Program

L. Elizabeth Anderson, Adviser
104 Art

Bachelor of Arts Degree

Admission Requirements: The Office of Admissions admits entering freshmen and transfer students into art history. Postbaccalaureate applicants must file an application to the Office of Admissions and complete the supplementary information form provided by the School of Art advisory office by the regular quarterly deadlines.

Major Requirements: ART H 201; 47 additional art history credits, including at least 5 upper-division credits in each of the following areas: Asian; African, Native American, and Oceanic; Classical; Medieval; Renaissance; Baroque-Rococo; and Nineteenth-Twentieth Centuries; plus one of the following options: (1) ART 105, 106, 109, 110; or (2) 15 upper-division credits in one of the following (exclusive of courses offered jointly with Art History): Ancient and Medieval History, Anthropology, Asian Languages and Literature, Classics, Comparative Literature, English literature, Germanics, History of the Americas, History of Asia, Modern European History, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Languages and Literature, or Slavic Languages and Literature.

Graduate Program

Hal N. Opperman, Art History Graduate Program Coordinator

Admission to the Master of Arts program requires: (1) Bachelor of Arts degree with major in the history of

art, or equivalent (students whose backgrounds are adjudged insufficient may be required to satisfy deficiencies before or after entering the program); (2) three letters of recommendation; (3) statement of professional objectives in the field; and (4) samples of the applicant's written work. Taking the Graduate Record Examination is not required. Graduation requirements are: (1) in the thesis track, 55 credits in art history courses numbered 400 or above, of which 45 are course credits and 10 are thesis credits, and in the nonthesis track, 65 credits in art history courses numbered 400 or above, of which 55 are course credits and 10 are practicum credits; 10 credits in related fields in courses at the 300 level and above may be approved to replace 10 credits in art history; (2) at least 5 credits each must be taken in four of these areas: African, Native American, and Oceanic; East Asian; Ancient, Classical, and Medieval; Renaissance and Baroque; eighteenth-twentieth-century Western; (3) 15 credits in 500-level seminars, including two designated methodology seminars to be taken within the first year of residency, one in Western and the other in non-Western art; (4) a reading knowledge of German or French, or of Chinese or Japanese if appropriate, as well as a research capability in a second language adjudged appropriate to the student's area of study. Language requirements may be satisfied either by passing the Graduate School Foreign Language Test (available in German, French, Spanish, and Russian only) with a minimum score of 550 or by passing a reading examination administered by the faculty; (5) students in the thesis track must take 10 thesis credits in Art History 700 in preparation for the written presentation and oral defense of a thesis that demonstrates familiarity with sources and a capacity for synthesis and critical evaluation; students in the nonthesis track must take 10 practicum credits in Art History 588, a practical or theoretical program designed in conjunction with the faculty and defended by means of a final written report and oral examination.

Admission to the Doctor of Philosophy program requires: (1) prior sound preparation at a general level, which usually means having acquired the Master of Arts degree in the history of art; students whose backgrounds are judged insufficient may be required to satisfy deficiencies before or after entering the program; (2) three letters of recommendation; (3) statement of professional objectives in the discipline; and (4) samples of written research work in art history. Taking the Graduate Record Examination is not required. Graduation requirements are a minimum of 90 credits, which include: (1) 60 credits in art history courses numbered 400 and above, beyond the Master of Arts degree or equivalent, and exclusive of dissertation credits; a maximum of 20 credits in related fields in numerically graded courses numbered 300 and above may be approved for credit in place of art history courses; a minimum of 10 credits must be in areas other than those tested by the General Examination; at least 30 credits must be in 500-level seminars; (2) a reading knowledge of German or French, or of Chinese or Japanese if appropriate; a research capability in a second language adjudged appropriate to the student's area of study; a knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied either by passing the Graduate School Foreign Language Test (available in German, French, Spanish, and Russian only) with a minimum score of 550 or by passing a reading examination administered by the faculty; (3) a General Examination, written and oral, taken prior to enrollment for dissertation credits; this examination covers three specific fields of art history chosen from the following general areas: African, Native American, and Oceanic; East Asian; Ancient; Medieval; Renaissance; Baroque and eighteenth century; Modern; no more than two fields may be selected from the same area; (4) 30 additional credits at the 800 level taken after the General Examination in preparation and defense of the dissertation. These credits must be distributed over a minimum of three quarters.

Financial Aid

The Art History division offers certain funds, as well as teaching assistantships, for art history graduate students. A limited number of grants are awarded to outstanding entering students, but it is otherwise a policy to award financial aid and assistantships only to students who have completed at least one year of graduate study.

Course Descriptions

Courses for Undergraduates

200-level courses in the history of art are intended for nonmajors, although they are also open to majors. They are designed to give an introduction to the subject matter of broad areas and to the history of art as a humanistic study. There are no prerequisites; each course is completely independent.

ART H 200 Ideas in Art (5) Selected monuments of art and architecture in the Western tradition, from the Greeks to the twentieth century, studied in relation to the intellectual background of the ages and civilizations that produced them. Slide lectures accompanied by discussion of assigned readings in philosophical, religious, scientific, political, literary, and artistic texts.

ART H 201 Survey of Western Art—Ancient (5) Major achievements in painting, sculpture, architecture, and the decorative arts in Europe, the Near East, and North Africa, from prehistoric times to the beginnings of Christianity.

ART H 202 Survey of Western Art—Medieval (5) The arts of the Byzantine Empire, Islam, and Western Christendom through the fifteenth century.

ART H 203 Survey of Western Art—Modern (5) European art and its extensions from 1500 to the present.

ART H 204 Survey of Asian Art (5) Origins and interplay of major movements of South and East Asian art.

ART H 205 Survey of Tribal Art (5) Arts of Sub-Saharan Africa and Oceania from prehistoric times to the present and to the pre-Columbian arts of the Americas.

ART H 230 Afro-American Art (3) History of Afro-American art from colonial times until the present, the African background and its extensions into the West Indies, Brazil, and Surinam.

ART H 232 Photography: Theory and Criticism (3) Art traditions of photography from its origins in the nineteenth century to the present. Emphasis on photographic traditions and photographers of the twentieth century.

300-level courses cover narrower times, spaces, and types of art than 200-level surveys and constitute the core curriculum for majors (although most enrollees come from other majors). Good basic university preparation (equivalent to upper-division standing) is needed. Relevant 200-level courses, although not required, may provide helpful background.

ART H 305 Introduction to Islamic Art and Civilization (5) Islamic art and civilization as represented by five court cities (Cairo, Cordova-Granada, Istanbul, Isfahan, Delhi-Fatehpur-Sikri) and the art and architecture, literature, religious expression, and social modes characteristic of each. Field trips to various local collections.

ART H 306 Indian Art of South Asia (5) Development of Indian art from its origins to the medieval period. Spread of Indian religions and related art forms in Tibet and Southeast Asia briefly introduced.

ART H 311 Chinese Art (5) Overview of the arts of China. Emphasis on the role of the arts in Chinese culture and on the traditional styles and techniques associated with each of the major media—painting, ceremonial bronzes, architecture, sculpture.

ART H 315 The Buddhist Art of East Asia (5) Buddhist painting and sculpture of China, Korea, and Japan. Its religious meaning, artistic development, and historical significance. Examples from the sixth to the seventeenth centuries, along with paintings and contemporary carvings.

ART H 316 Japanese Painting (5) Japanese painting traditions from earliest times to the present. Examples illustrated and discussed in the context of Japanese cultural history. Analysis of painting styles as well as of the roles artists have played and the meaning their works have had in Japanese society.

ART H 317 Chadō: Japanese Aesthetics (4) History, theory, and practice of *chadō*, or "Way of Tea," a Zen-inspired art that has had notable effects on Japanese society. Lectures on aesthetics and cultural history supplemented by participation in *chadō*, with the goal of developing sufficient understanding and skill to continue *chadō* as a discipline.

ART H 321 Arts of Japan (5) The spectrum of Japanese art from prehistory to modern times. Examines the interrelationship of the major media for each historical period. Central theme: the appreciation of the varied aesthetics active in the development of Japanese painting, architecture, sculpture, and ceramics.

ART H 330 Tribal Art and Philosophy (5) Philosophical inquiry and thought in African, Ameri-Indian, and Pacific Island societies as expressed through the visual, musical, choreographic, and oral arts. Natural, moral, and ethical ideas as expressed in the arts.

ART H 331 Northwest Coast Indian Arts (5) Introduction to arts of Indians of the Pacific Northwest from precontact to present. Themes explored include diversity of artistic expression, cultural contexts, styles, artists' responses to foreign trade and settlement, and ways in which art may reflect historical developments in the lives of the Indians. Joint with ANTH 331.

ART H 332 Native American Art: Prehistory to Twentieth Century (5) Native American art north of Mexico, the prehistoric and historic periods. Regional examination of types and styles, with emphasis on aesthetics, cultural function, and factors of change.

ART H 337 African Art and Society (5) Explores the ideas and notions expressed visually in sculpture, painting, ceramics, textiles, and architecture and describes their relationships to man and culture in Africa.

ART H 340 Pre-Classical Art and Archaeology (3) Art and the other material remains of the civilizations in the Aegean from the Neolithic period to the end of the Bronze Age, with special emphasis on Minoan Crete and the Mycenaean kingdoms of mainland Greece; illustrated by slides. The history, techniques, and results of significant excavations. Joint with CL AR 340.

ART H 341 Greek Art and Archaeology (3) Material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the Geometric to the Hellenistic periods; illustrated by slides. Principal sites and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Joint with CL AR 341.

ART H 342 Roman Art and Archaeology (3) Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Joint with CL AR 342.

ART H 343 Hellenistic Art and Archaeology (3) Art of Greece and the eastern Mediterranean from the time of Alexander the Great to the Roman conquest. Principal sites with their sculpture, painting, mosaics, and minor arts examined in lectures with slides. Joint with CL AR 343.

ART H 350 The City of Cairo (3) Development of Fustat and Cairo, 600-1800, with special emphasis on art and architecture. Economic, social, and geographic influences on the creation of the distinctive Egyptian styles of Islamic art. Joint with N E 350.

ART H 351 Early Medieval and Byzantine Art (5) Christian art and architecture of the Roman and Byzantine empires and of western Europe through the eighth century.

ART H 352 High and Late Medieval Art (5) Art and architecture of western Christendom from the time of Charlemagne to the Renaissance.

ART H 361 Italian Renaissance Art (5) Sculpture, painting, and architecture from 1300 to 1600.

ART H 371 Baroque Art (5) Arts and architecture of Europe from the end of the sixteenth century to the first years of the eighteenth century.

ART H 372 Rococo to Romanticism (5) Mainstream of European art and architecture from about 1710 to about 1830. Attention is also given to central and eastern Europe, Scandinavia, and the colonial Americas.

ART H 380 Nineteenth- and Twentieth-Century Art (5) Arts and architecture of Europe and America from Realism to the present, with emphasis on stylistic and thematic changes in painting.

ART H 381 Art Since World War II (5) Art of Europe and the United States in the decades since World War II: painting, sculpture, and architecture, multiplication of new forms (video, performance pieces, land and installation pieces, etc.), changing context of patronage, publicity, and marketing.

ART H 382 Theory and Practice of Art Criticism (3) Major issues in art and architectural criticism: nature of art criticism, aims of the critic, differences between art and architectural criticism. Works by major critics and artists, mostly twentieth century.

ART H 384 American Art (5) Major achievements in painting, sculpture, printmaking, the decorative arts, architecture, urban design, and folk art in the United States from about 1600 to the present.

ART H 385 Survey of Early Film History (5) Origins and development of the motion picture from *circa* 1890 to *circa* 1950; major works in documentary, avant-garde, and animated film, as well as theatrical film, are shown and studied from art-historical and critical standpoints.

ART H 386 Art of Washington and the Pacific Northwest (5) History of painting, sculpture, printmaking, and decorative arts from mid-nineteenth century to present. Emphasis on Seattle and the Puget Sound region. Major developments in Oregon and British Columbia.

ART H 391 Painting Since the Renaissance (3) Illustrated lectures. Prerequisite: 203.

ART H 396 Study Abroad: Art in London (3-5, max. 15) Advanced or specialized work in art history based on materials available in the museums, private collections, libraries, and buildings of London, conducted through lectures, reading and research projects. Specific course content is determined by the assigned faculty member and is announced in Study Abroad bulletins. Prerequisite: permission of undergraduate adviser.

ART H 398 Study Abroad: Art in Provence (5, max. 15) Monuments in and around Avignon. Emphasis on Roman and Romanesque architecture and sculpture, later medieval French painting, great works of all periods and countries in regional museums, and the Provençal landscape of Cézanne, Van Gogh, and Gauguin. Prerequisite: permission of undergraduate adviser.

ART H 399 Study Abroad: Individual Projects (3-10, max. 20) For participants in Study Abroad programs. Prerequisite: permission of undergraduate adviser.

400-level courses are intensive, quite narrow in scope, and addressed to current scholarly problems. A relatively high level of sophistication is needed. In general, sound prior humanistic training and knowledge of at least one of the following are required: art of the period or region at a general level (such as that provided by the relevant 200- or 300-level course); social or cultural history of the subject area; literature and thought of the area; or an appropriate foreign language. 400-level courses are available for both undergraduate and graduate credit. Each 400-level course is accompanied by two units of ART H 599, required of graduate majors.

ART H 400 Art History and Criticism (2-5, max. 10) Courses on special topics, frequently by visiting faculty, which cannot be offered on a continuing basis. Consult Art History office for subjects offered.

ART H 410 Chinese Figure Painting (3) Styles, content, and cultural role of Chinese figure painting, from historical narratives to religious icons.

ART H 411 Traditional Chinese Architecture (3) Introduction to Chinese architecture (palaces, homes, temples, tombs), urban planning, and gardens; techniques of production, visual styles, historical development, and relationship to traditional Chinese cultural values.

ART H 413 Selected Topics in Chinese Art (3, max. 9) Specific theme or area of Chinese art, such as the art of Bronze Age China or Chinese painting under Communist rule.

ART H 414 Early Chinese Painting: Neolithic Period to Five Dynasties (3) Emergence and development of Chinese painting, its styles, esthetic theories, and cultural content, from earliest times through the tenth century A.D.

ART H 415 Chinese Painting: The Sung Period (3) "Golden age" of Chinese painting, emphasizing the monumental, romantic, and Zen Buddhist landscape painting traditions of the tenth through thirteenth centuries.

ART H 416 Chinese Painting: The Yuan Period (3) Chinese painting under Mongol rule, in the fourteenth century: a period of political and social crisis that gave rise to a revolution in painting styles.

ART H 417 Later Chinese Painting: Ming, Ch'ing, and Modern Periods (3) Major masters and traditions, esthetic attitudes, and social role of Chinese painting from the fifteenth century to the present day.

ART H 418 Political Aspects of Chinese Painting (3) Examination of the close link between painting and politics in China, focusing on such aspects as imperial patronage and propaganda, paintings by Chinese courtiers and the arts of political protest and lament, Chinese painting under Communist rule.

ART H 419 Japanese Architecture (3) Survey of Japanese architecture from its origins to modern times. Although Shinto architecture, tea houses, gardens, and modern developments are discussed, the primary focus is on the development of Japanese Buddhist architecture.

ART H 420 Art of the Japanese Print (3) Foundations of Ukiyo-e in Japanese genre from the twelfth through mid-seventeenth centuries; woodblock technique from the Heian period through the early Edo period. Emphasis on the changing styles and subject matter in Ukiyo-e Hanga from Moronobu through Kuniyoshi.

ART H 421 The Yamato-e Tradition (3) Oldest (twelfth-to-fourteenth-century) narrative handscrolls and their descendants, the paintings of Tosa and other court artists from the fifteenth century onward, and the art of the Rimpa movement from Koetsu and Sotatsu (seventeenth century) to the present.

ART H 422 The Kan-ga Tradition (3) Ink paintings of Japanese Zen priests from the fourteenth century onward, and the works of professional artists belonging to those families (Kano, Hasegawa, Unkoku, and Kaiho) in which Chinese academic painting has been the principal inspiration, from the sixteenth century to the present.

ART H 423 Japanese Genre Painting (3) Various types of "popular" painting in Japan, including the *Namban-e* and townsman-painter art of the sixteenth and seventeenth centuries, the entire spectrum of *ukiyo-e*, and the "realistic" art of the Maruyama-Shijo school, from the eighteenth century to the present.

ART H 424 The Nanga Tradition (3) Works of painting and calligraphy by Japanese artists who have been part of the Chinese scholar-painting tradition from the late seventeenth century to the present.

ART H 425 Modern Japanese Painting (3) Painting of the Meiji, Taisho, and Showa eras (1868 to the present) by artists working in the modern idiom of either *Yoga* or *Nihonga*.

ART H 426 Japanese Sculpture (3) Survey of Japanese sculpture from prehistory to modern times. Although the main theme is Buddhist sculpture, Shinto sculpture, folk sculpture, and modern trends are also introduced. Examines style, religious meaning, construction techniques, and placement within architectural settings.

ART H 427 Japanese Ceramics (3) Discusses Japanese ceramics from prehistory to the twentieth century with regard to manufacturing process and differing sense of design. Relation of form to use also considered, especially in connection with tea ceramics.

ART H 428 East Asian Calligraphy (3, max. 9) Classical calligraphy tradition of China and Japan in history and practice. Prerequisite: permission of undergraduate adviser.

ART H 429 Japanese Cinema (3) Eleven masterpieces of Japanese cinema, studied in the context of what they reveal about Japanese culture and the art of the film.

ART H 431 Pre-Columbian Art (3) Arts of pre-Columbian cultures of Central and South America from prehistoric times to European contact.

ART H 432 Oceanic Art (3) Arts of Oceania, studied through cultures of Polynesia, Micronesia, Melanesia, and Australia.

ART H 436 Arts of Sub-Saharan Africa I (3) Traditional arts of the Western Sudan and the Western Guinea coast with their archaeological antecedents.

ART H 437 Arts of Sub-Saharan Africa II (3) Traditional arts of the Central Guinea coast, Nigeria, Cameroon, and Gabon, from precontact times to the present.

ART H 438 Arts of Sub-Saharan Africa III (3) Arts of Zaire, Angola, the Swahili coast, and southern Africa.

ART H 442 Greek and Roman Painting (3) Painted decoration on Greek vases, and Roman wall painting, with emphasis on the historic and stylistic development of each. Joint with CL AR 442. (Offered alternate years; offered 1990-91.)

ART H 444 Greek and Roman Sculpture (3) History and development of Greek sculpture and sculptors, their Roman copyists, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century B.C. Joint with CL AR 444. (Offered alternate years; offered 1990-91.)

ART H 446 Greek Architecture (3) Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Joint with CL AR 446 and ARCH 454. (Offered alternate years; offered 1990-91.)

ART H 451 Topics in Early Christian and Byzantine Art and Architecture (3, max. 9) Specific theme or area of early Christian and Byzantine art and architecture, such as early Christian and Byzantine mosaics or the art of Constantinople.

ART H 452 Art, Religion, and Politics in the Early Christian Period, 300-700 A.D. (3) *Karsonis* Evolution of the art of the early Christian period (300-700 A.D.) in the context of contemporary religious, political, and cultural developments. Joint with RELIG 442.

ART H 453 Art, Religion, and Politics in Byzantium, 700-1453 A.D. (3) *Karsonis* Evolution of the art of Byzantium (700-1453 A.D.) in the context of contemporary religious, political, and cultural developments. Joint with RELIG 443.

ART H 454 Romanesque Art (3) Western European art in the eleventh and twelfth centuries, focusing on monuments along the pilgrimage roads to Compostela in France and Spain.

ART H 455 Special Studies in Gothic Art and Architecture (3) Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Joint with ARCH 455.

ART H 456 Art of the Medieval West: Carolingian and Ottonian Art, 750-1050 A.D. (3) *Karsonis* Examines the development of the arts during the Carolingian and Ottonian periods in the Medieval West.

ART H 461 Early Renaissance Painting in Italy (3) Painting of the fourteenth and fifteenth centuries in central and northern Italy.

ART H 462 High Renaissance Painting in Italy (3) Painting in central and northern Italy, from about 1480 to about 1530: Leonardo, Raphael, the early Michelangelo, Sarto, Correggio, Bellini, Giorgione, and the early Titian.

ART H 463 Italian Renaissance Sculpture (3) From Nicola Pisano to Giambologna.

ART H 464 Late Renaissance Painting in Italy (3) Painting in central and northern Italy, from about 1515 to about 1580: Pontorno, Rosso, Parmigianino, Boccioni, the later Michelangelo, Vasari, Bronzino, Salvati, the later Titian, Tintoretto, and Veronese.

ART H 465 Italian Renaissance Architecture (3) From the cathedral of Florence to St. Peter's in Rome: the style, symbolism, and theory of architecture.

ART H 466 High Renaissance Painting in Venice (3) Painting in Venice, circa 1480 to circa 1580: Bellini, Carpaccio, Giorgione, Titian, Lotto, del Piombo, Tintoretto, and Veronese.

ART H 470 English Art, 1500-1800 (3) English art, principally painting, and, to a lesser extent, architecture. Emphasis on patronage, on the conditions that produced the decided peculiarities of English art, and on the final triumph of the native tradition.

ART H 471 Rome in the Seventeenth Century (3) Painting, sculpture, and architecture; concentration on Caravaggio, Bernini, Poussin, and Borromini.

ART H 472 French Art—Seventeenth Century (3) Painting, sculpture, and prints. Special attention given to relations with Italy and the lowlands.

ART H 473 Age of Rembrandt and Vermeer (3) Art of the Dutch Republic in the late sixteenth and seventeenth centuries, concentrating on painting, prints, and drawings.

ART H 474 Studies in American Colonial Art (3, max. 6) Architecture, town design, painting, sculpture, and decorative arts in the eastern and southwestern colonies from original European settlement until the Revolutionary War. Key figures and developments in English art and architecture. Content varies from quarter to quarter.

ART H 476 French Art—Eighteenth Century (3) Painting, sculpture, and prints; emphasis on the successive phases of Rococo style and iconography and the emergence of Neoclassicism.

ART H 481 Romanticism (3) Romantic tendencies of the late eighteenth and early nineteenth centuries, with emphasis on stylistic and iconographic study of painting in Spain, England, Germany, France, and the United States to about 1830.

ART H 482 Realism and Impressionism (3) Art and the world, 1830-80: high Romanticism through Realism and Impressionism, with emphasis on painting in France.

ART H 483 Post-Impressionism to 1918 (3) Post-Impressionism and the great revolution of early twentieth-century art, with emphasis on painting. From the first revisions of Impressionism around 1880 to Fauvism, Cubism, Futurism, the Blaue Reiter, and Dadaism.

ART H 484 Thematic Studies in Modern Art (3, max. 9) Approach to art of the nineteenth/twentieth centuries through thematic content. Focus varies from year to year (e.g., development of landscape painting; treatment of the figure; woman in art; the crisis in portraiture).

ART H 485 Italian Futurism, Dada, Surrealism (3) Survey of three European early modern art movements whose ultimate objective was the collapse of bourgeois culture. Central issues: the role of art and artists in catalyzing social change, strategies for destroying public faith in logic, integration of verbal and visual signs and nonaesthetic conceptions of art.

ART H 486 Abstract Expressionism: History and Myth (3) Thematic and chronological survey of abstract expressionism, including major genres of critical interpretation, social and art-historical context, and revisionist scholarship. Recommended: 381.

ART H 487 American Art From the Revolution to the Civil War (3) Painting, sculpture, and architecture during the federal and early industrial periods. Developments in printmaking, the decorative arts, and folk art.

ART H 488 American Architecture (3) American architecture from the seventeenth-century colonial period to the present. Emphasis on architects and buildings, including features of urban development. Joint with ARCH 488.

ART H 489 Washington Architecture (3) History of architecture in Washington State from pioneer days to the present. Broad perspective includes vernacular (popular, industrial, commercial) as well as fine architecture. Field trips encouraged.

ART H 491 Twentieth-Century Architecture (3) Traces the roots of today's architectural conflict: the pull of the past *versus* the allure of postmodernism. Major trends in twentieth-century architecture in this country and abroad.

ART H 492 Alternative Art Forms Since 1960 (3) Survey of "post-studio" art developed in the 1960s and early 1970s by artists who did not equate making visual art with making aesthetic objects. Topics include happenings, Fluxus, mail art, land projects, body art, video, artists' books, performance, and site works. Recommended: 381.

ART H 498 Art and Sexual Imagery (3) Themes and symbols of sexuality in art in a range of world cultures and time periods investigated through readings that illumine the contextual meaning of the works. Religious, political, psychological, and economic interpretations employed to understand the widespread existence and importance of these topics.

ART H 499 Individual Projects (2-5, max. 10) Prerequisite: permission of undergraduate adviser.

Courses for Graduates Only

Most 500-level courses are specialized seminars oriented to new research, intended for graduate students in art history, but open to others who possess the necessary qualifications. Since specific content varies, all students must obtain the permission of the instructor or the art history graduate coordinator.

ART H 500 Methods of Art History (5) Introduction to the specialized bibliography of art historical research and to the wide variety of approaches to art historical problems of all periods and regions.

ART H 501 Seminar in the General Field of Art (5, max. 15)

ART H 502 Methodology Seminar: Western Art History (5) Introduction to the professional study of European and American art history; each quarter focuses on one aspect of study, such as connoisseurship, iconography, art history, or the social history of art.

ART H 503 Methodology Seminar: Non-Western Art History (5) Introduction to the professional study of non-Western art history, including Asian, African, Native American, and Oceanic; each quarter focuses on one aspect of study, such as traditionalism in art, problems of field research, or issues in the cross-cultural study of art.

ART H 511 Seminar in Chinese Art (5, max. 15) Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of China.

ART H 515 Seminar in Japanese Art (5, max. 15) Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of Japan.

ART H 531 Seminar in Tribal Art (5, max. 15) Methodological and cross-disciplinary problems in the visual arts of precolonial Africa, Oceania, and America. Specific content varies.

ART H 533 Seminar in North American Indian Art (5, max. 15) Problems in North American Indian visual arts. Content varies.

ART H 541 Seminar in Greek and Roman Art (3) *Langdon* In-depth study of selected topics and problems of the art of ancient Greece and Rome. Joint with CL AR 541.

ART H 551 Seminar in Early Christian, Byzantine, and/or Medieval Art and Architecture (5, max. 15) Problems in early Christian, Byzantine, and medieval art and architecture. Content varies. Prerequisite: permission of instructor.

ART H 561 Seminar in Italian Renaissance Art (5, max. 15) Problems and in-depth study of selected topics of the art of the Italian Renaissance.

ART H 566 Seminar in North European Art (5, max. 15) Deals with problems of style and iconography of the northern European masters of the fourteenth through seventeenth centuries.

ART H 577 Seminar in Baroque Art (5, max. 15) Iconographic and stylistic problems of the art of the Baroque period, with emphasis on the principal research methods, theories, and types of literature dealing with the art of the seventeenth and eighteenth centuries in Europe.

ART H 581 Seminar in Modern Art (5, max. 15) Art historical problems of the nineteenth and twentieth centuries.

ART H 590 Seminar in Criticism of Contemporary Art (5, max. 15) Contemporary art and appropriate critical methodology.

ART H 591 Seminar in Twentieth Century Architecture (3 or 5) Specific focus changes from quarter to quarter. Joint with ARCH 558. Prerequisites: graduate standing with background in art history, architecture, architectural history, or permission of instructor.

ART H 598 Master's Practicum (*, max. 15)

ART H 599 Reading and Writing Projects (2) Art historical issues, methods, and materials. Required of all graduate majors registered in 400-level art history courses. Open also to graduate nonmajors. May be repeated for credit.

ART H 600 Independent Study or Research (*)

ART H 700 Master's Thesis (*)

ART H 800 Doctoral Dissertation (*)

Asian Languages and Literature

223 Gowen

The Department of Asian Languages and Literature offers instruction in the principal languages and literatures of Asia, including East, Southeast, Central, and South Asian. Emphasis is placed on the roles of these languages within the cultures they serve as well as on linguistic, textual, and literary analysis. Several courses on Asian literature in English are offered for majors and nonmajors alike.

Undergraduate Program

Adviser
225 Gowen

Bachelor of Arts Degree

Admission Requirements: Minimum 20 credits college-level coursework or department-approved equivalent in intended primary language of concentration. The most recent course taken in the primary language must be completed at the University of Washington with a grade of 2.5 or higher. Completion of one writing (W-prefix) course in English with a grade of 2.0 or higher. Admission is possible with a cumulative grade-point average of 2.00, but the department strongly recommends that prospective majors present a cumulative grade-point average of 2.50 or higher. Applicants may submit materials in addition to transcripts clarifying any aspect of past coursework. Denied applicants may appeal.

Major Requirements: Chinese—55 credits in the language, 10 beyond third-year level, including CHIN 451; 10 credits in Chinese literature, excluding 499, 3 credits in Chinese linguistics, 5 credits in area-related humanities or social science courses. **Japanese**—45 credits in the language, 15 beyond second-year level; 30 credits in area-related humanities or social science courses, including a designated sequence in either Japanese literature or linguistics. **Korean**—45 credits in the language, 15 beyond second-year level; 30 credits in literature and area-related humanities or social science courses. **South Asian languages**—60 credits in languages, of which 45 are in the major language, 15 in the minor language; 15 credits in area-related humanities or social science courses to be chosen in consultation with adviser, including HSTAS 201 and ASIAN 401. If Tibetan is the major language: 42 major language credits, 15 minor language credits; 18 credits in area-related humanities or social science courses to be chosen in consultation with adviser, including HSTAS 201 and ASIAN 401. **Thai**—45 credits in the language, 15 beyond second-year level; 20 credits in area-related humanities or social science courses to be chosen in consultation with adviser. **Turkic**—55 credits in various Turkic languages; 10 credits beyond the second year including TKIC 301, 302, 303, 401, 402, 403, 411, 412, 413 (Uzbek), TKIC 304, 305, 306 (Kazakh), TKIC 341, 342, 343 (Uighur and/or Kirghiz and/or Tatar, etc.), TKISH 311, 312, 313; 20 credits in area-related humanities or social science courses, including 10 credits from literature, 10 credits from culture/history. Suggested courses: TKIC 363, SISRE 410, C LIT 496, SISRE 375, N E 210, HSTEU 439, HSTEU 444. Students intending to pursue graduate degrees should begin the study of Russian or German during their undergraduate programs.

Graduate Program

Michael C. Shapiro, Graduate Program Coordinator

The Department of Asian Languages and Literature offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees with specializations in Chinese, Japanese, Korean, Altaic languages (Turkic, Mongolian, and Manchu), and South Asian languages (Hindi, Sanskrit, Tamil, and Tibetan). Discipline concentrations include literary history and theory, linguistics, textual criticism and philology, and Buddhist studies. The department does not offer study in language pedagogy.

A full range of courses in other disciplines and aspects of Asian cultures and civilizations is available from other departments and schools of the University, such as the Departments of Anthropology, History, Linguistics, Comparative Literature, and Political Science, and the Henry M. Jackson School of International Studies. Students in the Department of Asian Languages and Literature are encouraged to avail themselves of these offerings to complement and supplement their language and literature studies.

Admission Requirements

Applicants for admission should present the equivalent of an undergraduate major in the language and literature of specialization. Students without such a background may be qualified for admission but will need initially to acquire the expected program prerequisites for graduate study.

Besides an application and two original sets of transcripts of prior postsecondary education, which are to be sent directly to Graduate Admissions, the department requires a statement of academic goals and three letters of recommendation addressed to the Graduate Program Coordinator.

Degree Requirements

The research component of the Master of Arts degree may be satisfied by the writing of either a thesis or two

research papers. The Doctor of Philosophy degree requires a dissertation. In addition to the language of specialization, reading knowledge of a second (usually Western) language is required for the Master of Arts degree, and of a third (usually Asian) language for the Doctor of Philosophy degree. Neither English nor, usually, the student's native language may be used to fulfill these additional requirements.

Faculty

Chairperson

David R. Knechtges

Professors

Chan, Hok-lam,* 1972, ‡(International Studies, History), M.A., 1963, Hong Kong; M.A., 1965, Ph.D., 1967, Princeton; late imperial Chinese history.

Cirtautas, Ilse D.* 1968, ‡(Near Eastern Languages and Civilization), Ph.D., 1958, Hamburg; Turkic language and literature.

Knechtges, David R.* 1972, A.M., 1965, Harvard; Ph.D., 1968, Washington; Han and Six Dynasties literature.

Miller, Roy A.* 1971, M.A., 1950, Ph.D., 1953, Columbia; historical linguistics, including Japanese, Altaic, and Sino-Tibetan.

Norman, Jerry,* 1971, M.A., 1965, Ph.D., 1969, California (Berkeley); Chinese language and linguistics, Altaic linguistics.

Poppe, Nicholas N., 1949, (Emeritus), M.A., 1923, Petrograd; Ph.D., 1934, Petersburg; Altaic.

Potter, Karl H.* 1971, ‡(International Studies, Philosophy), M.A., 1952, Ph.D., 1955, Harvard; South Asia.

Rubin, Jay,* 1975, Ph.D., 1970, Chicago; modern Japanese literature.

Schiffman, Harold F.* 1967, (Anthropology, Linguistics), M.A., 1966, Ph.D., 1969, Chicago; Dravidian language and literature, sociolinguistics, Tamil, language policy.

Serruys, Paul L.-M., 1965, (Emeritus), Ph.D., 1958, California (Berkeley); classical Chinese.

Shapiro, Michael C.* 1970, ‡(Linguistics), M.A., 1970, Ph.D., 1973, Chicago; Indo-Aryan languages and linguistics.

Shih, Vincent Y. C., 1945, (Emeritus), M.A., 1930, Yenching; Ph.D., 1939, Southern California; Chinese.

Wang, Ching-hsien,* 1971, (Comparative Literature), ‡ M.F.A., 1966, Iowa; M.A., 1969, Ph.D., 1971, California (Berkeley); Chinese poetry and comparative literature.

Wilhelm, Heilmut, 1948, (Emeritus), Ph.D., 1932, Berlin; Chinese.

Associate Professors

Boltz, William G.* 1981, M.A., 1969, Ph.D., 1974, California (Berkeley); classical Chinese.

Brandauer, Frederick P.* 1973, M.A., 1965, Pittsburgh; Ph.D., 1973, Stanford; traditional Chinese vernacular fiction and modern Chinese literature.

Cooke, Joseph R.* 1967, (Emeritus), Ph.D., 1965, California (Berkeley); Thai language and literature.

Entwistle, Alan W.* 1986, M.A., 1975, Ph.D., 1982, London; Hindi literature and Hinduism.

Lukoff, Fred,* 1964, (Linguistics), (International Studies), ‡ M.A., 1948, Ph.D., 1954, Pennsylvania; Korean language and linguistics.

Niwa-Kano, Tamako,* 1982, (Emeritus), M.A., 1948, Ph.D., 1956, Radcliffe; Japanese language.

Salomon, Richard G.* 1981, Ph.D., 1975, Pennsylvania; Sanskrit language and literature.

Suh, Doo Soo, 1955, (Emeritus), M.A., 1950, Ph.D., 1953, Columbia; Korean.

Tatsumi, Henry S., 1931, (Emeritus), M.A., 1935, Washington; Japanese.

Treat, John Whittier,* 1983, M.A., 1979, Ph.D., 1982, Yale; Japanese language and literature.

Yen, Isabella Y., 1960, (Emeritus), A.M., 1951, Michigan; Ph.D., 1956, Cornell; Chinese.

Yue-Hashimoto, Anne O.* 1980, M.A., 1963, Texas (Austin); Ph.D., 1966, Ohio State; Chinese language and linguistics and dialectology.

Assistant Professors

Brockett, Christopher J., 1990, Ph.D., 1990, Cornell; Japanese language and linguistics.

Cox, Collett D.* 1985, M.A., 1974, M.Phil., 1976, Ph.D., 1983, Columbia; Indian and Chinese Buddhist philosophy, history of religions.

Markus, Andrew L.* 1986, M.Phil., 1979, Ph.D., 1985, Yale; literature and culture of Tokugawa-period Japan.

van der Kuip, Leonard W.* 1987, M.A., 1976, Saskatchewan; Ph.D., 1979, Hamburg; Tibetan languages and literature, Buddhist studies.

Lecturers

Hasegawa, Mitsuko, 1987, M.A.T., 1979, Augustana College; Japanese language.

Hines, Naseem, 1986, M.A., 1983, Washington; Hindi and Urdu language and literature.

Hsia, Huang-yi, 1973, B.A., 1953, National Taiwan; Chinese language.

Kotas, Ann, 1989, M.A., 1983, Washington; Japanese language.

Norman, Stella C., 1983, M.A., 1957, National Taiwan; Chinese language.

Course Descriptions

Courses for Undergraduates

Altaic

ALTAI 401, 402, 403 Written Mongolian (3,3,3) A,W,Sp Norman Introduction to Mongolian written in the vertical script. Texts of different periods and genres. Prerequisite: permission of instructor. (Offered alternate years.)

ALTAI 405, 408, 407 Manchu (3,3,3) A,W,Sp Norman Introduction to Manchu, with principal focus on the structure of the language. Reading of texts of different genres. Prerequisite: permission of instructor. (Offered alternate years.)

ALTAI 415, 416, 417 Spoken Mongolian (5,5,5) A,W,Sp Norman Introduction to the modern spoken language of Mongolia. Emphasis on correct pronunciation and oral skills.

Asian

ASIAN 401 Introduction to Asian Linguistics (5) A Schiffman, Shapiro Linguistic analysis, with emphasis on the languages of east, southeast, south, and central Asia. Includes phonetics, phonemics, morphology, syntax, lexicography, historical reconstruction, linguistic typology, and comparative grammar. Survey of major languages and language families of Asia. Diverse Asian languages used as subjects of linguistic analysis. Prior knowledge of linguistics is not required. Prerequisite: two years of an Asian language or permission of instructor.

ASIAN 404 Writing Systems (3) Boltz, Salomon Origin, nature, and development of writing systems. Alphabets, syllabaries, and logographic systems; relation of writing systems to spoken languages; decipherment of previously undeciphered scripts. Prerequisite: 401 or equivalent or permission of instructor. (Offered alternate years.)

ASIAN 405 Advanced Problems in Asian Linguistics (3) *Schiffman, Shapiro* Advanced problems in the analysis of the languages of east, southeast, south, and central Asia. Includes phonology, morphology, syntax, lexicography, historical reconstruction, linguistic typology, and comparative grammar. Prerequisite: 401 or equivalent or permission of instructor. (Offered alternate years.)

ASIAN 498 Special Topics (1-5, max. 15) AWSp Offered occasionally by permanent or visiting faculty members. Topics vary.

Chinese

CHIN 111, 112, 113 First-Year Chinese (5,5,5) A,W,Sp Introduction to the standard language. Emphasis on learning correct pronunciation and basic structure. Drill in oral use of the language. No credit for 111, 112, 113 if 134 taken.

CHIN 121 Accelerated Chinese (10) A Covers same material as 111 and 112. In conjunction with 222 and 223, allows completion of two years' language study in one school year. No credit if 111, 112 taken.

CHIN 134 First-Year Intensive Chinese (15) S Equivalent of 111, 112, 113. Introduction to the standard language; correct pronunciation and basic structure; drill in oral use of the language. Especially recommended for students (particularly graduate students) who plan to devote more time to other subjects during the regular academic year. No credit if 111, 112, 113 taken. (Offered Summer Quarter only.)

CHIN 211, 212, 213 Second-Year Chinese (5,5,5) A,W,Sp Hsia Continuation of 111, 112, 113. Advanced grammar and vocabulary expansion stressed. Oral practice and structural drills continued. No credit for 211, 212, 213 if 234 taken. Prerequisite: 113 or equivalent.

CHIN 222 Accelerated Chinese (10) W Covers same material as 113 and 211. In conjunction with 121 and 223, allows completion of two years' language study in one school year. No credit if 113, 211 taken. Prerequisite: 121 or equivalent.

CHIN 223 Accelerated Chinese (10) Sp Covers same material as 212 and 213. In conjunction with 121 and 222, allows completion of two years' language study in one school year. No credit if 212, 213 taken. Prerequisite: 222 or equivalent.

CHIN 234 Second-Year Intensive Chinese (15) S Equivalent of 211, 212, 213. No credit if 211, 212, 213 taken. Prerequisite: 113 or equivalent. (Offered Summer Quarter only.)

CHIN 301, 302, 303 Situational Chinese (5,5,5) A,W,Sp Concentrated practice in the use of Chinese as spoken in everyday life. Oral comprehension and speaking skills. Readings selected to broaden the students' understanding of modern Chinese culture. Improving pronunciation and mastery of Chinese grammar. Prerequisite: 213 and permission of instructor.

CHIN 311, 312, 313 Third-Year Chinese (6,6,6) A,W,Sp Yue-Hashimoto Reading of unedited texts—newspaper articles, essays, short stories. Oral practice, composition, and listening comprehension. No credit if 334 taken. Prerequisite: 213 or equivalent.

CHIN 333 Intensive Business Chinese (15) Introduction to oral Chinese as employed in business contexts, illustrates the level of language common to a wide range of Sino-American business communication situations and to general situations in international trade. Prerequisite: 213 or equivalent.

CHIN 334 Third-Year Intensive Chinese (15) S Equivalent of 311, 312, 313. Reading of unedited texts—newspaper articles, essays, short stories. Oral practice and structural drill. No credit if 311, 312, 313 taken. Prerequisites: 213 or equivalent and permission of instructor.

CHIN 342 The Chinese Language (3) W Norman, Yue-Hashimoto (teaching alternate years) Nature and structure of the Chinese language, covering structural characteristics, genetic and typological affinity with other groups, sound system of standard Mandarin, Chinese writing system and language reforms, brief survey of the history of the Chinese language, and aspects of language in relation to culture. Prerequisite: 213 or equivalent.

CHIN 344 Intensive Chinese in Beijing (15) S Beijing University Teaching Staff Eight weeks of intensive instruction in modern Chinese, including readings in modern Chinese texts, oral conversation drill, an introduction to past and present Chinese culture, and weekly lectures on such topics as Chinese literature, art, economics, politics, and history. Informal visits with artists, writers, and scholars; weekend excursions to cultural and historic sites in and around Beijing; and a final two-week study tour of selected cities of north and east China. Prerequisite: permission of department.

CHIN 345 Spoken Chinese in Beijing (6, max. 18) AWSp Beijing University Teaching Staff Designed to increase active vocabulary, to enhance the student's understanding of Chinese grammar, to further the student's control of idiomatic Chinese, and, in general, to develop oral skills. Prerequisite: 313 or 344.

CHIN 346 Chinese Readings in Beijing (6, max. 18) AWSp Beijing University Teaching Staff General readings in textbooks prepared by Beijing University and specially selected readings in modern or traditional vernacular literature or in the social sciences. Prerequisite: 313 or 344.

CHIN 402 Advanced Readings (3) W Hsia Readings in contemporary Chinese literature. Development of oral and writing skills. Student discussions in Chinese. Prerequisite: 313 or equivalent.

CHIN 403 Advanced Readings (3) Sp S. Norman Readings in classical writings and related academic essays in modern Chinese. Topics vary and may include the Analects of Confucius and modern academic essays on the Analects. Prerequisite: 313 or equivalent.

CHIN 407 Chinese Reference Works and Bibliography (3) A Lo Introduction to the search of library information on Chinese studies through the use of basic reference works and modern library methods, with twenty-five percent of class time dealing with individual student's subject interest. Prerequisite: 313 or equivalent.

CHIN 415, 416, 417 Readings in Social Science Texts (5,3,3) A,W,Sp Yue-Hashimoto Readings of social science materials from contemporary China. Development of oral and writing skills. Student discussions. Prerequisite: 313 or equivalent.

CHIN 443 Structure of Chinese (3) Sp Yue-Hashimoto Outline of the major syntactic structures of Chinese. Focus on learning and teaching problems. Prerequisite: 313 or equivalent.

CHIN 451, 452, 453 First-Year Classical Chinese (5,5,5) A,W,Sp Boltz Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. To be taken in sequence. Prerequisite: 213 or equivalent for 451; 451 for 452; 452 for 453.

CHIN 481, 482, 483 Modern Chinese Literature (5,5,5) W Brandauer Modern literary texts in the original language, concentrating on the short story and the essay. Works studied come from May Fourth writers and from writers in the People's Republic of China and Taiwan. Literary, historical, and social significance with an introduction to bibliographic and reference resources. Prerequisite: 313 or equivalent.

CHIN 499 Undergraduate Research (3-5, max. 15) AWSps For Chinese language and literature majors. Prerequisite: permission of instructor.

Hindi

HINDI 311, 312, 313 Elementary Hindi (5,5,5) A,W,Sp Entwistle, Hines, Shapiro Modern literary Hindi. Reading, writing, and conversation. Introduction to Devanāgarī script.

HINDI 321, 322, 323 Intermediate Hindi (5,5,5) A,W,Sp Entwistle, Hines, Shapiro Systematic expansion of vocabulary and grammar. Intermediate-level prose and poetry readings. Oral drills. Prerequisite: 313 or equivalent.

HINDI 401, 402, 403 Advanced Hindi (5,5,5) A,W,Sp Entwistle, Hines, Shapiro Rapid reading of contemporary Hindi prose, poetry, and drama. Advanced conversation and composition. Prerequisite: 323 or equivalent.

HINDI 421, 422, 423 Survey of Modern Hindi Literature (3,3,3) A,W,Sp Entwistle, Hines, Shapiro Survey of Hindi literature from the late nineteenth century to the present. Readings from representative short stories (421), poems (422), and novels (423). Prerequisites: 403 or equivalent for 421; 421 or equivalent for 422; 422 or equivalent for 423.

HINDI 431 Advanced Conversational Hindi (2, max. 8) Conversational practice in contemporary Hindi. Prerequisite: 323 or equivalent or permission of instructor.

HINDI 499 Undergraduate Research (3-5, max. 15) AWSps Primarily for Hindi language and literature majors. Prerequisite: permission of instructor.

Indian

INDN 400 Practicum in South Asian Languages (3, max. 18) Introduction to any one of various South Asian languages (e.g., Kannada, Nepali, Punjabi, Sinhala, Marathi, Telugu, Urdu) not taught on a regular basis. Students may receive credit for more than one such language. Prerequisite: permission of instructor.

INDN 401, 402 Pall (3,3) W,Sp Cox Introduction to Pall language and literature. Prerequisite: SNKRT 403 or equivalent, or permission of instructor.

INDN 403 Introduction to Written Urdu (3) Hines, Shapiro Modern written Urdu for students with at least elementary knowledge of Hindi. Prerequisite: HINDI 313 or equivalent.

INDN 404 Readings in Urdu Literature (3, max. 18) Hines, Shapiro Readings in Urdu prose and poetry. Urdu prose composition. Prerequisite: 403 or equivalent.

INDN 499 Undergraduate Research (3-5, max. 15) AWSps Primarily for South Asian language and literature majors. Prerequisite: permission of instructor.

Japanese

JAPAN 111, 112, 113 First-Year Japanese (5,5,5) A,W,Sp Hasegawa Introduction to modern Japanese conversation and grammar. Script, including 150 Sino-Japanese characters, taught in 112 and 113. Not open for credit to students who have taken 134.

JAPAN 134 First-Year Intensive Japanese (15) S Equivalent of 111, 112, 113. Not open for credit to students who have taken 111, 112, 113. (Offered Summer Quarter only.)

JAPAN 211, 212, 213 Second-Year Japanese (5,5,5) A,W,Sp Kotas Reading and translation of modern Japanese. Extensive memorization of written characters and continued oral practice. Review and expansion of fundamental grammatical patterns. Not open for credit to students who have taken 234. Prerequisite: 113 or equivalent.

JAPAN 234 Second-Year Intensive Japanese (15) S Equivalent of 211, 212, 213. Not open for credit to students who have taken 211, 212, 213. Prerequisite: 113 or equivalent. (Offered Summer Quarter only.)

JAPAN 311, 312, 313 Third-Year Japanese (5,5,5) A,W,Sp *Rubin* Reading and translation of modern Japanese at a more advanced level, with oral practice based on written materials. Prerequisite: 213 or equivalent for 311, permission of instructor for 312 and 313.

JAPAN 405-406 History of the Japanese Language (3-3) W,Sp Introduction to the history of Japanese, including phonology, morphology, syntax, and lexicon. Prerequisite: ASIAN 401. (Offered alternate years.)

JAPAN 431, 432, 433 Readings in Modern Japanese Literature (5,5,5) A,W,Sp *Rubin* Reading and discussion of selected modern literary texts in the original language, concentrating on the short story and novel. Close attention to grammar and syntax. Prerequisite: 313 or equivalent. (Offered alternate years.)

JAPAN 471, 472 Classical Japanese Grammar (5,5) A,W *Markus* Introduction to classical grammatical forms and translation of classical literary texts. Prerequisites: 313 or equivalent for 471; 471 or equivalent for 472.

JAPAN 473 Readings in Classical Japanese Literature (5) Sp *Markus* Readings in prose, poetry, and drama, antiquity to nineteenth century. Prerequisite: 472 or equivalent.

JAPAN 499 Undergraduate Research (3-5, max. 15) AWSps For Japanese language and literature majors. Prerequisite: permission of instructor.

Korean

KOR 301, 302, 303 Introduction to Korean (5,5,5) A,W,Sp Fundamentals of the Korean language. Emphasis on Korean alphabet and spelling, pronunciation, and basic grammar.

KOR 304 Spoken Korean (10) S The Korean language as spoken in ordinary conversational situations. Phonetic accuracy and appropriateness of idiom. May be taken any summer after completion of first-year Korean. Prerequisite: 303 or permission of instructor. (Offered irregularly.)

KOR 311, 312, 313 Introduction to Korean Writing in Mixed Script (5,5,5) A,W,Sp Chinese characters as used in Korean mixed script. Systematic expansion of vocabulary and grammatical forms of standard Korean. Prerequisite: 303 or equivalent.

KOR 411, 412, 413 Readings in Contemporary Korean (5,5,5) A,W,Sp 411 completes the introduction to Korean writing in mixed script of 311, 312, 313. 412 and 413 provide experience in reading a variety of contemporary styles. Materials from published works include informal essays, short stories, one-act plays, academic essays, and newspaper editorials. Prerequisite: 313 or equivalent.

KOR 415 Social Science Literature in Korean (3) A Readings in selections from contemporary Korean publications in social science topics. Prerequisite: 413 or equivalent.

KOR 416 Korean Narrative and Dramatic Literature (3) W Linguistic features rather than purely literary qualities of modern Korean literature. Includes figures of speech and sophisticated linguistic expression. Prerequisite: 413 or equivalent.

KOR 417 Readings in Korean Journals (3) Sp Selections from Korean newspapers, news magazines, and other journals. Topics from international and domestic affairs, including politics, business, and problems of everyday life. Prerequisite: 413 or equivalent.

KOR 499 Undergraduate Independent Study (3-5, max. 15) AWSps For students who have completed 417 or equivalent. Prerequisite: permission of instructor.

Sanskrit

SNKRT 301, 302, 303 Introduction to Sanskrit (5,5,5) A,W,Sp *Salomon* Basic grammar and vocabulary of the classical language. Reading of elementary texts from the epic or Purāṇic literature.

SNKRT 401, 402, 403 Intermediate Sanskrit (5,5,5) A,W,Sp *Salomon* Advanced classical grammar; introduction to classical literature and Vedic language and texts. Prerequisite: 303.

SNKRT 411, 412, 413 Advanced Sanskrit (5, max. 15; 5, max. 15; 5, max. 15) A,W,Sp *Salomon* Reading and analysis of classical texts, chosen from the Śāstra or Kāvya literatures. Prerequisite: 403 or permission of instructor.

SNKRT 491, 492, 493 Vedic Studies (3,3,3) A,W,Sp *Salomon* Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture. Prerequisite: 303 or equivalent.

SNKRT 494 Readings in Religious Classics of India (5) Sp *Potter, Salomon* Introduction to the older religious literature, with emphasis on the Upaniṣads, the Dharmasāstras, and the Bhagavad Gītā. Rapid reading of the texts, plus content analysis of the developing religious forms. Prerequisite: 402.

SNKRT 495 Studies in Indian Thought (3, max. 9) A *Cox* Religious and philosophical traditions in South Asia. The original documents studied vary from year to year. Prerequisite: 402 or permission of instructor.

SNKRT 499 Undergraduate Research (3-5, max. 15) AWSps Primarily for Sanskrit language and literature majors. Prerequisite: permission of instructor.

Tamil

TAMIL 311, 312, 313 Elementary Tamil (5,5,5) A,W,Sp *Schiffman* Introduction to the modern spoken language; emphasis on basic sentence types and transformation drills. The writing system and literary dialect are introduced.

TAMIL 321, 322, 323 Intermediate Tamil (5,5,5) A,W,Sp *Schiffman* Intensified use of the modern spoken language, beginning with moderately difficult conversation and drills, and working up to more advanced materials. Continuation of work with written language. Prerequisite: 313 or equivalent.

TAMIL 401, 402, 403 Advanced Tamil (5,5,5) A,W,Sp *Schiffman* Readings in modern literary Tamil, including the modern novel and short story. Work with radio plays in spoken Tamil. Prerequisite: 323 or equivalent.

TAMIL 455 Topics in Dravidian Linguistics (3) Schiffman Selected topics in Dravidian linguistics. Phonological, morphological, syntactic, or historical linguistics of a selected Dravidian language or group of languages. Prerequisite: two years of a Dravidian language or permission of instructor.

TAMIL 499 Undergraduate Research (3-5, max. 15) AWSps Primarily for Tamil language and literature majors. Prerequisite: permission of instructor.

Thai

THAI 301, 302, 303 Basic Thai (5,5,5) A,W,Sp Introduction to modern spoken and written Thai. Emphasis on spoken language competence with additional skills in elementary reading and spelling.

THAI 401, 402, 403 Intermediate Thai (5,5,5) A,W,Sp Short stories; articles on Thai history, geography, culture, politics, economics, etc. Primary emphasis on reading, translation, comprehension, and grammar. Prerequisite: 303.

THAI 411, 412, 413 Readings in Thai (5,5,5) A,W,Sp Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: 403.

THAI 499 Undergraduate Research (3-5, max. 25) AWSps For Thai language and literature majors. Prerequisite: permission of instructor.

Tibetan

TIB 304, 305, 306 Colloquial Tibetan (5,5,5) A,W,Sp *Nomang* Introduction to phonology, morphology, and syntax of spoken Tibetan, Lhasa dialect. (Offered alternate years.)

TIB 307, 308, 309 Intermediate Colloquial Tibetan (5,5,5) A,W,Sp *Nomang* Instruction and drill in advanced colloquial sentence patterns and syntactical constructions. Prerequisite: 306 or equivalent. (Offered alternate years.)

TIB 311, 312, 313 Literary Tibetan (3,3,3) A,W,Sp *van der Kuip* Introduction to the phonology, grammar, and syntax of written Tibetan. Materials selected for rapid development of reading knowledge.

TIB 407, 408, 409 Advanced Colloquial Tibetan (5,5,5) A,W,Sp Advanced instruction and practice in colloquial Tibetan, Lhasa dialect, intended to build on previous oral-aural experience and increase fluency in the modern spoken language. Prerequisite: 309 or equivalent.

TIB 411, 412, 413 Readings in Tibetan (3,3,3) A,W,Sp *van der Kuip* Selections from various Tibetan materials. Prerequisite: 313 or equivalent.

TIB 415, 416, 417 Readings in Tibetan Literature (3,3,3) A,W,Sp *van der Kuip* Reading of selections from Tibetan philosophical literature. May be taken in any sequence. Prerequisite: 413 or permission of instructor.

TIB 499 Undergraduate Research (3-5, max. 15) AWSps For Asian languages and literature majors. Prerequisite: permission of instructor.

Turkic

TKIC 301, 302, 303 Elementary Uzbek (3,3,3) A,W,Sp *Cirtautas* Introduction to the modern written and spoken language. (No credit if 316 taken.) Joint with TKISH 301, 302, 303.

TKIC 304, 305, 306 Introduction to Kazakh (3,3,3) A,W,Sp *Cirtautas* Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from the Soviet Union and China (Xinjiang); exercises. (No credit if 317 taken.) Joint with TKISH 304, 305, 306.

TKIC 316 Intensive Elementary Uzbek (9) S Intensive study of grammar, with oral and written drill and reading of simple texts in Uzbek. Covers first year Uzbek. Offered summer quarter only. (No credit if 301, 302, 303 taken.) Joint with TKISH 316.

TKIC 317 Intensive Elementary Kazakh (9) S Intensive study of grammar, with oral and written drill and reading of simple texts in Kazakh. Covers first year Kazakh. Offered summer quarter only. (No credit if 304, 305, 306 taken.) Joint with TKISH 317.

TKIC 341, 342, 343 Introduction to Uighur (3,3,3) A,W,Sp *Cirtautas* Phonology, morphology, and syntax of Uighur. Joint with TKISH 341, 342, 343. Prerequisite: permission of instructor.

TKIC 383 Oral Literature of the Turkic Peoples of Central Asia I: The Heroic Epos (3) A *Cirtautas* Representative heroic poems of Central Asian Turkic peoples now living in the USSR and China. Origin of the heroic epos, its relation to the romantic epos and other oral literary genres. Art of the singer and his role in nomadic Turkic society. Emphasis on *Manas*, the monumental epos of the Kirghiz. Joint with N E 363.

TKIC 401, 402, 403 Intermediate Uzbek (3,3,3) A,W,Sp *Cirtautas* Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Joint with TKISH 405, 406, 407. Prerequisite: permission of instructor.

TKIC 404 Introduction to Turkic Studies (3) Cirtautas Bibliography, problems, and methods of research in the field of Turkic studies for advanced students of Turkish/Turkic languages, including readings in those languages on the languages, literatures, and ethnography of past and present Turkic peoples. Joint with TKISH 404. Prerequisite: permission of instructor.

TKIC 411, 412, 413 Introduction to Uzbek Literature (3,3,3) A,W,Sp *Cirtautas* Continuation of 401, 402, 403. Readings from selected Uzbek writers. Joint with TKISH 414, 415, 416. Prerequisite: permission of instructor.

TKIC 477 Intensive Kazakh Morphology and Syntax (9) Designed to allow graduate students to complete the first year of Kazakh during summer quarter. Joint with TKISH 477. Prerequisite: graduate standing.

TKIC 478 Intensive Uzbek Morphology and Syntax (9) Designed to allow graduate students to complete the first year of Uzbek during summer quarter. Joint with TKISH 478. Prerequisite: graduate standing.

TKIC 481, 482, 483 Uzbek Morphology and Syntax (3,3,3) A,W,Sp *Cirtautas* Introduces the student to a Turkic language, Uzbek. Designed for graduate students and intended to enable them to achieve competence at an accelerated pace. Joint with TKISH 481, 482, 483. Prerequisite: graduate standing.

TKIC 499 Undergraduate Research (3-5, max. 15) AWSps For Turkic language and literature majors. Prerequisite: permission of instructor.

Literature Courses in English

ASIAN 263 Great Works of Asian Literature (5) Sp Selected major works of Asian literature. Taught on a rotational basis with the literary traditions of China, Japan, India covered in successive years. Content varies depending on specialization and interest of instructor. Primary emphasis on literary values of works and their tradition; attention also given to historical and social contexts and the thought and value systems of the culture involved.

CHIN 280 The Chinese Novel in English (5) A Brandauer The Chinese novel from the Ming dynasty to the present. Readings in English translation. Literary values of works and their tradition. Historical and social contexts and thought and value systems of the Chinese.

CHIN 281 Literature in Modern China (5) A Brandauer Literature in China from the 1911 revolution to the present. May Fourth literature, Taiwan literature, and People's Republic of China literature. Readings in English translation.

INDN 420 Classical Indian Literature in English (5) Entwistle, Salomon Major classical works in Indian literature, both South and North, up to the thirteenth century: epics, dramas, and lyrics. Major themes, their philosophical and religious backgrounds, and correlation with music and the visual arts.

INDN 421 Modern Indian Literature in English (5) Entwistle Major works in Indian literature from the medieval period onward, considered against their cultural background.

JAPAN 321 Japan in Literature and Film: I (5) A Markus, Rubin Literary history of Japan from the eighth to the late twelfth centuries, with readings in *The Tale of Genji* and other major works of the imperial court, plus films reflecting the architecture, life, and natural milieu of classical Japan.

JAPAN 322 Japan in Literature and Film: II (5) W Markus Literary history of Japan from the thirteenth to early nineteenth centuries, with readings from Zen-influenced warrior culture, Edo townsman culture, plus films on the Nô, Bunraku puppet, and Kabuki theaters. Recommended: 321.

JAPAN 323 Japan in Literature and Film: III (5) Sp Treat Literary history of Japan in the modern period, with readings in the major novelists on the clash of cultures, the generational struggle, war, and the search for inner peace, plus films that portray these themes and reflect the variety of modern Japanese life. Recommended: 321, 322.

Courses for Graduates Only

Altaic

ALTAI 579 Comparative Altaic Linguistics (3) Norman Comparative phonology and morphology of Mongolian, Turkic, and other Altaic languages. Joint with LING 579. Prerequisite: permission of instructor.

Asian Languages and Literature

ASIAN 503 Seminar in Asian Linguistics (1-5, max. 15) AWSp Topics vary. Prerequisite: permission of instructor.

ASIAN 585 Seminar in Buddhism (3, max. 27) AWSp Cox, van der Kuip Systems and history of Buddhist thought. Original and secondary sources are used. Combines the methods of specialists in south, central, and east Asian Buddhism with those of historians of religion and philosophy. Prerequisite: permission of instructor.

ASIAN 600 Independent Study or Research (*) AWSps

ASIAN 700 Master's Thesis (*) AWSps

ASIAN 800 Doctoral Dissertation (*) AWSps

Chinese

CHIN 540 Seminar on Chinese Linguistics (3, max. 9) WSp Norman, Yue-Hashimoto Advanced topics in Chinese linguistics. Subject emphasis varies from year to year.

CHIN 541 Seminar in Chinese Grammar (3, max. 9) A Boltz, Norman, Yue-Hashimoto Problems of theory and analysis of Chinese grammar, both synchronic and diachronic, modern and classical. Prerequisites: ASIAN 401 and permission of instructor.

CHIN 542 Chinese Historical Phonology (3) W Norman Introduction to Chinese historical phonology; emphasis on the Middle Chinese period. Prerequisites: ASIAN 401 and permission of instructor.

CHIN 543 Texts in Ancient Script (3) Sp Boltz Current research in the origin and development of the Chinese writing system and the structure of Chinese characters. Readings in texts written in ancient scripts, with special attention to grammatical and phonological problems related to graph identification and analysis. Topics vary among *Shuo wen* studies, silk manuscripts, bronze inscriptions, and "oracle" bone inscriptions. Prerequisites: five quarters of classical Chinese, ASIAN 401, and permission of instructor. (Offered alternate years.)

CHIN 544 Chinese Dialectology (3, max. 9) Sp Norman, Yue-Hashimoto Methodology and theory of studying Chinese dialects. Among areas covered are fieldwork methods, dialect classification, and dialectal grammar. Prerequisites: 542, ASIAN 401, and permission of instructor.

CHIN 551, 552 Second-Year Classical Chinese (5,5) A,W Boltz Continuation of 451, 452, 453. Problems of textual criticism and grammar. 551: focus on early belletristic texts. 552: focus on early historical texts. Prerequisite: 453 or equivalent for 551; 551 for 552.

CHIN 553 Introduction to Chinese Philology (5) Sp Boltz Philological principles and methods in the study of Han and pre-Han texts. Specific texts vary. Prerequisites: five quarters of classical Chinese, ASIAN 401, and permission of instructor. (Offered alternate years.)

CHIN 554, 555, 556 Readings in Chinese Prose (5,5,5) A,W,Sp Knechtges 554: selected readings in the *fu* of the Han, Wei, Jin, and North-South Dynasties period. 555: selected readings in parallel prose (*pianti wen*). 556: selected readings in *guwen* prose of the Tang and Song periods. Recommended: 551, 552. (Offered alternate years.)

CHIN 560 Proseminar in Chinese (3-5) AWSp Knechtges Methods and materials in the study of Chinese texts. Problems in textual analysis and Chinese literary history. Prerequisites: 553 and one of 554, 555, and 556.

CHIN 561, 562, 563 Studies in Chinese Literature (5,5,5) A,W,Sp Wang 561: literature before Ch'in; 562: poetry of the T'ang and Sung periods; 563: literary theory and criticism. Prerequisite: permission of instructor.

CHIN 564, 565, 566 History of Chinese Literature (5,5,5) A,W,S Knechtges Methods and materials in Chinese literary history: 564: earliest times to Tang; 565: Tang through Song; 566: Yuan to nineteenth century. Recommended: 551, 552 for 564; 564 for 565, 565 for 566.

CHIN 567 History of Chinese Literature (5) Sp Brandauer Historical coverage of traditional vernacular literature (excluding drama) and modern literature, with emphasis on transformation texts and chantefable literature, short stories, Ming and Qing novels, and twentieth-century fiction and prose. Prerequisite: 564.

CHIN 573 Seminar in Chinese Poetry (5, max. 15) A Wang Directed study of selected works of poetry. Subject emphasis varies each year. Prerequisite: permission of instructor. (Offered alternate years.)

CHIN 575 Studies in Chinese Drama (5, max. 15) A Wang Readings and discussion of Chinese drama. Subject emphasis varies. Prerequisite: permission of instructor. (Offered alternate years.)

CHIN 580 Readings in Vernacular Chinese Fiction (5, max. 15) A Brandauer Readings and discussion of traditional vernacular texts. Emphasis on Sung, Yuan, and Ming short stories and on Ming and Ch'ing full-length novels. Prerequisite: permission of instructor.

CHIN 582 Seminar in Chinese Fiction (5, max. 15) W Brandauer Directed study of selected works of fiction, focusing on the vernacular short story and novel. Prerequisite: permission of instructor.

CHIN 583 Seminar in Modern Chinese Literature (5) Sp Brandauer Directed study of selected works of modern Chinese literature. Primary focus on the novel, short story, and essay. Recommended: 281, 482.

CHIN 591, 592, 593 Studies in the History of Chinese Thought (5,5,5) A,W,Sp Chan, Knechtges Directed readings in selected traditional philosophical texts. 591: Han through Tang; 592: Song and Yuan; 593: Ming and Qing. Prerequisite: permission of instructor.

Hindi

HINDI 501 Studies in Medieval Braj Literature (3, max. 9) A Entwistle Introduction to the Braj dialect of Hindi and its literature. Prose readings and selected poetry by Surda, Raskhan, Tulsidas, Ghananand, and Bihari. Prerequisites: 403 or equivalent.

HINDI 502 Studies in Medieval Avadhi Literature (3, max. 9) W Entwistle Introduction to the Avadhi dialect and its literature. Readings from *Ramcaritma-*

nas of Tulsidas and *Padmavat* of Muhammad Malik Jayasi. Prerequisite: 403 or equivalent.

HINDI 503 Studies In Medieval Sant Literature (3, max. 9) Sp *Shapiro* Introduction to the language and literature of Sant poets. Readings include Guru Nanak's *Japuji* and excerpts from Kabir's *Granthavali*. Prerequisite: 403 or equivalent.

HINDI 504 Studies In Medieval Rajasthani Literature (3) W *Entwistle* Introduction to Dingal, the literary language of Rajasthan. Reading of extracts from the prose chronicle (Khyat) of Nainasi followed by a representative selection of bardic poetry. Prerequisite: 403 or equivalent.

HINDI 510 Structure of Hindi (3) Shapiro Grammatical analysis of Hindi, phonology, syntax, and semantics. Readings from both Western and native grammarians. Prerequisite: 403 or permission of instructor. Recommended: course in linguistics.

Indian

INDN 530 Readings in Pall Literature (3, max. 18) AWSp Cox Reading and interpretation of intermediate and advanced texts in Pall. Prerequisite: 402 or equivalent.

Japanese

JAPAN 531, 532, 533 Advanced Readings in Modern Japanese Literature (5,5,5) A,W,Sp *Treat* Rapid reading of modern literary texts; discussion of style, content, and problems of literary translation. Prerequisite: 433 or equivalent.

JAPAN 540 Seminar on Japanese Linguistics (3, max. 9) Problems in the history and structure of the Japanese language. Topics vary each quarter, according to the needs and interests of the students. Prerequisites: 405-406 and permission of instructor.

JAPAN 571, 572, 573 Advanced Readings in Classical Japanese Literature (5,5,5) A,W,Sp Continued readings in classical literary texts. Prerequisite: 473 or permission of instructor.

JAPAN 590 Seminar in Japanese Literature (5, max. 15) AWSp Close examination of selected periods, writers, or genres, including problems of literary criticism in Japanese literature. Prerequisite: permission of instructor.

Korean

KOR 501, 502, 503 Seminar in Korean Linguistics (3-5,3-5,3-5) A,W,Sp Topics in Korean linguistics. For majors in Korean language and literature or linguistics. Prerequisites: background in linguistics and permission of instructor.

Sanskrit

SNKRT 550 Seminar on Sanskrit Literature (3, max. 9) Salomon Detailed study of selected authors, periods, or traditions, within the context of Indian literary history. Prerequisite: 403 or permission of instructor.

SNKRT 555 Seminar on Sanskrit Grammar (3, max. 6) Salomon Reading and critical study of traditional literature on grammar and language, including texts of Pāṇinian and other schools.

SNKRT 560 Readings in Philosophical Sanskrit (3, max. 9) AWSp Cox, Potter, Salomon Intensive reading and analysis of Hindu or Buddhist philosophical texts. Prerequisite: 494 or permission of instructor.

SNKRT 570 Seminar in Indian Epigraphy and Paleography (3, max. 6) Salomon Introduction to the study of inscriptions and other original documents

in Sanskrit and Prakrit languages and in Kharosthi, Brāhmī, and derived scripts. History of writing in India and development of Indic scripts. Methods of critical evaluation of inscriptions as sources of political and cultural history. Prerequisite: 403.

SNKRT 581, 582 Readings in Buddhist Texts (3, max. 9; 3, max. 9) W,Sp Cox Interpretation of original sources. Texts vary from year to year. Prerequisites: ability to study sources in the original languages, an introduction to Buddhist thought, and permission of instructor.

Tamil

TAMIL 501, 502, 503 Studies in Tamil Literature (3,3,3) A,W,Sp Schiffman Introduction to Tamil literature, beginning with Sangam poetry and culminating in modern post-independence fiction. Prerequisite: 403 or permission of instructor.

Tibetan

TIB 511, 512, 513 Advanced Literary Tibetan (3, max. 9; 3, max. 9; 3, max. 9) A,W,Sp van der Kuip Reading of manuscripts and xylographs with emphasis on biographical, historical, and geographical material. Prerequisite: 413 or equivalent.

TIB 531, 532, 533 Buddhist Tibetan (3, max. 9; 3, max. 9; 3, max. 9) A,W,Sp van der Kuip Reading and analysis of Tibetan Buddhist texts and associated literature. Selections vary each quarter and may be taken out of sequence. Prerequisite: 413 or permission of instructor.

Turkic

TKIC 542, 543 Comparative and Historical Grammar of Turkic Languages (3,3) Cirtautas Classification of the Turkic languages; alphabets used; phonology, morphology, and syntax; lexical composition; structure changing developments. Prerequisites: 303 and 404, or TKISH 313.

TKIC 546 Old Turkic (3) Cirtautas Introduction to Runic script; phonology, morphology, and syntax of the oldest form of Turkic; reading and translation of eighth-century inscriptions of historical and literary importance. Prerequisite: permission of instructor.

TKIC 547 Old Uighur (3) Cirtautas Introduction to script systems; phonology, morphology, and syntax. Reading and translation of mainly Buddhist texts in Uighur script, eighth through eleventh centuries. Prerequisite: background in a Turkic language or permission of instructor.

TKIC 561, 562 Middle Turkic (3,3) Cirtautas Introduction to the phonology, morphology, and syntax of the Middle Turkic languages; reading and translation of texts in Karakhanid, Khorazmian Turkic, Kipchak, and Chagatai. Prerequisite: permission of instructor.

TKIC 563 Seminar on Turkic Literature (5) Cirtautas Topics in oral and written literature. Prerequisite: permission of instructor.

Astronomy

260 Physics

Modern research in astronomy and astrophysics encompasses a large number of disciplines and specialties, and the faculty members of the Department of Astronomy are active in most of these areas. Research areas of the department include planetary astronomy, stellar structure and evolution, interstellar matter, x-ray sources, galactic structure, extragalactic astronomy, galactic dynamics, quasars and galactic nuclei, and

theoretical and observational cosmology. The department is part of a consortium of universities now completing the construction of a 3.5-meter optical/infrared telescope located on Sacramento Peak, New Mexico. Students also have access to a variety of national facilities, such as the Kitt Peak and Cerro Tololo observatories and the Very Large Array. A variety of research is conducted with such satellite instruments as the International Ultraviolet Explorer and the Hubble Space Telescope. The department operates a well-instrumented thirty-inch telescope at the Manastash Ridge Observatory, near Ellensburg. Data analysis and theoretical research are conducted on a local cluster of DEC/VAX computers, including a sophisticated digital image processing system. The University also is a member of a consortium operating a Cray computer, thereby having dedicated access to supercomputer facilities. Undergraduate majors often assist faculty members in acquisition, reduction, and interpretation of data.

Undergraduate Program

Paula Szkody, Adviser
219 Johnson

Bachelor of Science Degree

Major Requirements: 321, 322, 323, 421, 422, 423, or nine units of other astronomy 400- or 500-level courses; PHYS 121, 122, 123; 131, 132, 133; 224, 225, 227, 228; 321, 322, 334, 335; MATH 124, 125, 126; 307, 328; 9 additional credits in courses at the 300 level or above in physics (chosen from 323, 324, 327, 328, 331, 421, 422, 423, 431, 432, 433, 434) or engineering as approved by adviser. Junior year (survey) and senior year (research) papers recommended as ASTR 499 projects, with emphasis on the senior paper for students planning graduate work. No grade lower than 2.0 is acceptable in courses fulfilling the above requirements. Undergraduates interested in advanced work in astronomy may wish to take a double major in astronomy and physics. Undergraduates interested in immediate employment at an observatory or other scientific institution should include computing and electronics courses as part of their program.

Graduate Program

Karl-Heinz Bohm, Graduate Program Coordinator

Master of Science, Doctor of Philosophy Degrees

A series of graduate courses in solar system, stellar, galactic, and extragalactic astrophysics is offered. Because astronomy study depends on the fundamentals of physics, a minimum of 24 credits in physics is required for a doctorate. The student is allowed much flexibility in the planning of a program of study.

The heart of the graduate program is the collaboration of student and faculty members in research at the frontiers of current knowledge in astronomy. At first, the student usually works under the close supervision of a faculty member to develop the techniques and insight necessary for successful research. The student's thesis research may use observational material obtained by using the facilities of either the University of Washington or one of the national observatories, or the thesis preparation may involve analysis and interpretation of existing material. Alternatively, the student may do a purely theoretical thesis. Active research programs are being carried out in the area of stellar interiors, stellar atmospheres, planetary atmospheres and surfaces, theory of convection, x-ray sources, interplanetary dust, extragalactic astronomy, radio astronomy, interstellar matter, cosmology, and relativistic astrophysics.

Admission Qualifications

Entering students are not required to have a background in astronomy, although some knowledge of

general astronomy is expected of those to whom a teaching assistantship is to be offered. Undergraduates interested in graduate work in astronomy are urged to concentrate primarily on their preparation in physics and mathematics. One foreign language, usually German, French, or Russian, is required for the doctoral degree in astronomy.

Assistantships

A number of teaching assistantships, primarily in the elementary astronomy courses, fellowships, and research assistantships are available.

Professors

Adams, John B.,* 1975, ‡(Geological Sciences), M.S., 1958, Ph.D., 1961, Washington; planetology, remote sensing.

Balick, Bruce,* 1975, Ph.D., 1971, Cornell; radio astronomy, ionized nebulae, peculiar galaxies.

Bardeen, James M.,* 1976, ‡(Physics), Ph.D., 1965, California Institute of Technology; general relativity, theoretical astrophysics; cosmology.

Baum, William A., 1990, (Research), Ph.D., 1950, California Institute of Technology; galaxies, cosmology, planetary physics.

Bohm, Karl-Heinz,* 1967, M.S., 1951, Ph.D., 1954, Kiel (Germany); stellar atmospheres, star formation.

Bohm-Vitense, Erika H. R.,* 1967, M.S., 1948, Ph.D., 1951, Kiel (Germany); stellar atmospheres, pulsating stars, ultraviolet astronomy.

Boynton, Paul E.,* 1970, (Physics), ‡ Ph.D., 1967, Princeton; high-energy astrophysics, infrared astronomy, x-ray sources.

Brownlee, Donald E.,* 1971, Ph.D., 1971, Washington; origin of the solar system, comets, interplanetary dust.

Hodge, Paul W.,* 1965, Ph.D., 1960, Harvard; extragalactic astronomy.

Jacobsen, Theodor S., 1928, (Emeritus), Ph.D., 1926, California (Berkeley); astronomy.

Leovy, Conway B.,* 1968, ‡(Atmospheric Sciences, Environmental Studies, Geophysics), Ph.D., 1963, Massachusetts Institute of Technology; planetary atmospheres.

Margon, Bruce H.,* 1980, (Physics), M.A., 1971, Ph.D., 1973, California (Berkeley); galactic and extragalactic x-ray astronomy, optical counterparts of x-ray sources.

Peters, Philip C.,* 1964, ‡(Physics), Ph.D., 1964, California Institute of Technology; general relativity, theoretical astrophysics.

Sullivan, Woodruff T.,* 1971, Ph.D., 1971, Maryland; radio astronomy, galactic and extragalactic structure, history of astronomy.

Wallerstein, George,* 1965, M.S., 1954, Ph.D., 1958, California Institute of Technology; chemical composition of stars, peculiar stars, interstellar matter.

Wilkening, Laurel L.,* 1988, ‡(Geological Sciences), Ph.D., 1970, California (San Diego); geochemistry, planetary sciences.

Associate Professors

Hogan, Craig,* 1990, (Physics), Ph.D., 1980, Cambridge; astrophysics, cosmology.

Lake, George R.,* 1985, M.A., 1977, Ph.D., 1979, Princeton; extragalactic astronomy, dark matter, large-scale N-body simulations.

Nelson, George D.,* 1989, M.S., 1975, Ph.D., 1978, Washington; stellar atmospheres, hydrodynamics, solar physics.

Szkody, Paula,* 1975, (Research), M.S., 1972, Ph.D., 1975, Washington; cataclysmic variables, photometry, spectroscopy.

Assistant Professor

Anderson, Scott F.,* 1988, (Research), M.A., 1980, California (Los Angeles); Ph.D., 1985, Washington; quasars and active galaxies, x-ray astronomy.

Course Descriptions

Courses for Undergraduates

ASTR 101 Astronomy (5) Introduction to the universe, with emphasis on conceptual, contrasted with mathematical, comprehension. Modern theories, observations; ideas concerning nature, evolution of galaxies; quasars, stars, black holes, planets, solar system. Not open for credit to students who have taken 102 or 201; not open to upper-division students majoring in physical sciences or engineering.

ASTR 102 Introduction to Astronomy (5) For students who have had high school physics or the equivalent introduction to physics at the college level. No credit for students who have taken 101, 201, or 301. Prerequisites: one year of high school physics or PHYS 101-102 or PHYS 110, 111, 112.

ASTR 150 The Planets (5) For liberal arts and beginning science students. Survey of the planets of the solar system, with emphases on recent space exploration of the planets and on the relationship of man and his earth to the other planets.

ASTR 190 Modern Topics in Astronomy for Non-Science Majors (3) Topics of current interest, such as origin of chemical elements, novae and supernovae, white dwarfs, neutron stars, black holes, active galaxies, quasars, or interstellar medium and astrochemistry. Choice of topics depends on instructor and class interest. Prerequisite: 5 credits of astronomy courses at the 100 or 200 level or permission of instructor.

ASTR 201 The Universe and the Origin of Life (5) Sequel to 101 or 102, emphasizing modern views of the atomic and molecular evolution of the universe from the initial "big bang" through the formation of the solar system and the emergence of biologic forms on the earth. The latter part of the course considers questions about the existence of, and communication with, extraterrestrial intelligent life, and finally the ultimate fate of the cosmos. Prerequisite: 101 or 102, or PHYS 110 or 114 or 121.

ASTR 210 Distance and Time: Size and Age in the Universe (5) A Space and time as basic concepts in physical science. How we define and measure them, how the concepts have developed over the centuries, and how modern measurements allow us to determine the size and age of the universe.

ASTR 211 The Universe and Change (5) W Gravity as central to the form and evolution of the universe. Conceptual formulation of gravity from the Renaissance to Einstein. Its consequences from the falling of an apple to the slowing of the expansion of the universe. Prerequisite: 210.

ASTR 212 Life in the Universe (5) Sp Nature and origin of cosmic large numbers. Steps to the formation of life, formation of planets (stars, galaxies, a long-lived universe), the anthropic principle. Searches for other planetary systems and extraterrestrial life. Prerequisite: 101 or 211.

ASTR 301 Astronomy for Scientists and Engineers (3) Introduction to astronomy for students in the physical sciences or engineering. Topics similar to 101, but the approach uses more mathematics and physics. Prerequisite: PHYS 123.

ASTR 321 The Solar System (3) A Solar system; planetary atmospheres, surfaces and interiors, the moon, comets. The solar wind and interplanetary medium. Formation of the solar system. Prerequisites: PHYS 224, which may be taken concurrently.

ASTR 322 The Contents of Our Galaxy (3) W Introduction to astronomy. Basic properties of stars, stellar systems, interstellar dust and gas, and the structure of our galaxy. Prerequisites: PHYS 224, 225, which may be taken concurrently.

ASTR 323 Extragalactic Astronomy and Cosmology (3) Sp Galaxies, optical and radio morphology and properties. Clusters of galaxies, radio sources, and quasars. Observational cosmology. Prerequisites: 322 and PHYS 224, 225, 227, which may be taken concurrently.

ASTR 421 Stellar Observations and Theory (3) Observations and theory of the atmospheres, chemical composition, internal structure, energy sources, and evolutionary history of stars. Prerequisites: 322, and PHYS 224, 225, 227, 228.

ASTR 422 Interstellar Material (3) W Description and physics of the matter between the stars. Physical conditions, distribution, evolution, and motions of interstellar atoms, molecules, and dust grains. Exchange of energy and matter between stars and interstellar material. Prerequisites: 322, and PHYS 224, 225, 227, 228.

ASTR 423 High-Energy Astrophysics (3) Sp High-energy phenomena in the universe. Includes supernova, pulsars, neutron stars, X-ray and gamma-ray sources, black holes, cosmic rays, quasi stellar objects, active galactic nuclei, diffuse background radiations. Radiative emission, absorption processes, and models derived from observational data. Prerequisites: PHYS 224, 225, 227, 228, or equivalent, or permission of instructor.

ASTR 497 Topics in Current Astronomy (1-3) Recent developments in one field of astronomy or astrophysics. Prerequisite varies according to the subject matter.

ASTR 499 Undergraduate Research (*, max. 15) AWSp Special astronomical problems and observational projects, by arrangement with instructor. Prerequisite: permission of instructor.

Courses for Graduates Only

ASTR 500 Seminar in Elementary Astronomy Instruction (1, max. 5) Seminar in the preparation of lecture and workshop materials with emphasis on demonstration and visual aids, and on evaluation of students' progress.

ASTR 507 Physical Foundations of Astrophysics I (3) Thermodynamics from an astronomer's point of view: black body radiation, basic radiative transfer, equation of state, degenerate gases, crystallization at high density, introduction to hydrodynamics and radiation gas dynamics.

ASTR 508 Physical Foundations of Astrophysics II (3) Introduction to astronomical hydrodynamics and magnetohydrodynamics, basic theorems and application to stellar and interstellar magnetic fields. Introduction to plasma physics, waves in a plasma, and transport phenomena in astrophysics.

ASTR 511 Galactic Structure (3) Kinematics, dynamics, and contents of the galaxy. Spiral structure. Structure of other galaxies. Evolution of galaxies.

ASTR 512 Extragalactic Astronomy (3) Types of galaxies. Integrated properties, content, and dynamics. Extragalactic distance scale, groups and clusters. Radio sources. Observational cosmology.

ASTR 513 Cosmology (3) Homogeneous isotropic models. Microwave and X-ray background radiation. Nucleosynthesis, baryosynthesis, inflation, and galaxy formation. Dark matter.

ASTR 521, 522 Stellar Atmospheres (3,3) Theory of continuous radiation and spectral line formation. Applications to the sun and stars. Prerequisite: PHYS 421 or equivalent.

ASTR 523 Solar Physics (3) Sun as a star, solar photosphere and outer convection zone, granulation and related phenomena, solar chromosphere, and corona, solar activity (especially sunspots and solar flares), sun's radio emission, solar-terrestrial relations. Prerequisite: 521.

ASTR 531 Stellar Interiors (4) Physical laws governing the temperature, pressure, and mass distribution in stars. Equation of state, opacity, nuclear energy generation. Models of main sequence stars. Prerequisite: PHYS 421 or equivalent.

ASTR 532 Stellar Evolution (3) Theoretical and observational approaches to stellar evolution. Structure of red giants and white dwarfs. Prerequisite: 531.

ASTR 541 Interstellar Matter (3) Physical conditions and motions of neutral and ionized gas in interstellar space. Interstellar dust, magnetic fields, formation of grains, clouds, and stars. Prerequisite: modern physics or permission of instructor.

ASTR 555 Planetary Atmospheres (3) A Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Joint with ATM S 555 and GPHYS 555.

ASTR 556 Planetary Surfaces (3) Comparison of surface processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and the implied course of solar-system evolution. Analysis of data from Earth-based telescopes and manned and unmanned space missions. Joint with GEOL 556 and GPHYS 556.

ASTR 557 Origin of the Solar System (3) Nebular and nonnebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Joint with GEOL 557 and GPHYS 557.

ASTR 561 High Energy Astrophysics (3) Observed properties of supernovae, X-ray stars, radio sources, quasars. Theories explaining such objects. Origin of cosmic rays.

ASTR 575 Seminar in Astronomy (1-2, max. 20) Discussion of recent research in astronomy and astrophysics. Prerequisite: permission of department.

ASTR 576 Astronomy Colloquium (1, max. 20) Current research topics in astronomy and astrophysics. Prerequisite: permission of department.

ASTR 581 Techniques in Optical Astronomy (5) S Theory and practice of obtaining optical data. Astronomical photoelectric photometers, spectrographs, interferometers, CCDs, and infrared equipment. Data-reduction techniques with emphasis on statistical analysis using digital computers. Observations with MRO thirty-inch telescope.

ASTR 582 Techniques in Radio Astronomy (3) Theory and practice in use of radio telescopes and receivers. History, basic definitions, and place of radio astronomy; basics of Fourier transforms; general antenna theory; theory and practice of parabolic reflectors, other filled apertures, interferometers, aperture synthesis arrays, and very long baseline interferometry; microwave receiver systems.

ASTR 597 Topics in Observational Astrophysics (1-5, max. 20)

ASTR 598 Topics in Theoretical Astrophysics (1-5, max. 20)

ASTR 600 Independent Study or Research (*)

ASTR 700 Master's Thesis (*) AWSp

ASTR 800 Doctoral Dissertation (*) AWSp

Atmospheric Sciences

408 Atmospheric Sciences-Geophysics

At the undergraduate level, the department provides a curriculum that covers both theoretical and applied aspects of the field. Courses offered include dynamical meteorology, cloud physics, radiative transfer, turbulence, atmospheric chemistry, and weather analysis and prediction. The Bachelor of Science degree qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences. Students majoring in physical science, mathematics, or engineering who plan to pursue graduate study in atmospheric sciences may take a subset of the undergraduate courses (listed below) to aid in their preparation. Special arrangements are made for students opting for an honors curriculum. A degree in mathematical sciences with an atmospheric sciences option is offered by the Department of Mathematics.

Undergraduate Program

Clifford F. Mass, Adviser
622 Atmospheric Sciences-Geophysics

Bachelor of Science Degree

Admission Requirements: MATH 124, 125, 126; PHYS 121, 122, 123, 131, 132; and ATM S 301, with a grade of at least 2.5 in each of these courses (except for the two physics labs, which are offered credit/no credit). Special circumstances will be reviewed on a case-by-case basis.

Major Requirements: 301, 321, 340, 362, 370, 431, 441, 442, 450, 452 and 458; ENGR 141; MATH 124, 125, 126; MATH 307 or AMATH 351; MATH 328; PHYS 121, 122, 123, 131, 132; CHEM 140; and one course from the following: MATH 308, AMATH 341, A A 370, PHYS 224, 225; a grade of 2.0 or better in each of the required courses in atmospheric sciences, math, physics, engineering and chemistry; and an overall grade-point average in these courses of 2.50.

Pregraduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, 340, 441.

Graduate Program

Robert A. Houze, Jr., Graduate Program Coordinator

Master of Science, Doctor of Philosophy Degrees

Admission to the graduate program requires a baccalaureate degree in a physical science, engineering, or mathematics, or its equivalent, as well as the Graduate Record Examination. The program of graduate study varies with each individual.

During the first year of graduate study, most students concentrate on developing a strong background in the fundamentals that underlie the atmospheric sciences and on getting a broad understanding of the wide range of problems encountered in the atmosphere. A qualifying examination is given toward the end of the first year of graduate study as soon as possible after the student has completed 24 credits, including 12 credits in courses numbered 500 and above. All students desiring to proceed toward the Ph.D. degree must take this examination, and students desiring the Master of Science degree may elect to take it. This examination tests understanding of the fundamental aspects of the atmospheric sciences and of the relevant mathematics and physics. Physical reasoning, rather than factual information, is stressed. Those who pass the examination with distinction are encouraged to work toward the Ph.D. degree; those who pass at a lower level may continue toward the Master of Science degree. Alternatively, students whose objective is the Master of Science degree may elect to submit a written thesis proposal in lieu of the qualifying examination.

Research assistantships and a few teaching assistantships are available to full-time students. Applications are made through the department office.

Faculty

Professors

Badgley, Franklin I.,* 1950, (Emeritus), M.S., 1948, Ph.D., 1951, New York; turbulence.

Baker, Marcia B.,* 1971, (Geophysics),† M.S., 1960, Stanford; Ph.D., 1971, Washington; cloud physics.

Businger, Joost A.,* 1958, (Emeritus), (Geophysics),† M.S., 1950, Ph.D., 1954, Utrecht; energy transfer.

Charlson, Robert J.,* 1965, (Chemistry, Civil Engineering), (Environmental Studies, Geophysics),† M.S., 1959, Stanford; Ph.D., 1964, Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction.

Fleagle, Robert G.,* 1948, (Emeritus), M.S., 1944, Ph.D., 1949, New York; air-sea interaction.

Fritschen, Leo J.,* 1966, ‡(Architecture, Forest Resources), M.S., 1958, Kansas State; Ph.D., 1960, Iowa State; agricultural climatology, micrometeorology, instrumentation.

Hartmann, Dennis L.,* 1977, (Quaternary Research Center), M.A., 1973, Ph.D., 1975, Princeton; climate theory, low frequency weather fluctuation, earth radiation budget.

Hobbs, Peter V.,* 1963, (Geophysics), Ph.D., 1963, Imperial College (London); cloud/precipitation physics, atmospheric chemistry, air pollution, mesoscale meteorology.

Holton, James R.,* 1965, Ph.D., 1964, Massachusetts Institute of Technology; dynamic meteorology, stratospheric dynamics.

Houze, Robert A., Jr.,* 1972, M.S., 1969, Ph.D., 1972, Massachusetts Institute of Technology; mesoscale meteorology.

LaChapelle, Edward R.,* 1969, (Emeritus), (Geophysics),† Sc.D., 1949, Puget Sound; snow-cover geophysics.

Leovy, Conway B.,* 1968, (Astronomy), (Environmental Studies, Geophysics),† Ph.D., 1963, Massachusetts Institute of Technology; planetary atmospheres.

Parks, George K.,* 1971, ‡(Geophysics, Physics), Ph.D., 1968, California (Berkeley); magnetospheric geophysics.

Radke, Lawrence F.,* 1968, (Research), M.S., 1967, Ph.D., 1968, Washington; cloud and aerosol physics, optical and microwave remote sensing, airborne instrumentation.

Reed, Richard J., * 1954, Sc.D., 1949, Massachusetts Institute of Technology; synoptic meteorology, numerical prediction.

Rhines, Peter B., * 1984, (Oceanography), † Sc.M., 1964, Massachusetts Institute of Technology; Ph.D., 1967, Trinity College (Cambridge); theoretical physical oceanography, fluid dynamics, climate dynamics, global ocean circulation.

Sarachik, Edward S., * 1984, (Research), (Oceanography), † M.S., 1963, Ph.D., 1965, Brandeis; atmospheric dynamics, large-scale atmosphere-ocean interaction, equatorial dynamics, climate change.

Untersteiner, Norbert, * 1962, (Geophysics), † Ph.D., 1950, Innsbruck; Dozent, 1961, Vienna; air-sea-ice interaction, polar climatology.

Wallace, John M., * 1966, (Environmental Studies), Ph.D., 1966, Massachusetts Institute of Technology; atmospheric dynamics, large-scale motions.

Zoller, William H., * 1984, ‡(Chemistry), Ph.D., 1969, Massachusetts Institute of Technology; atmospheric chemistry.

Associate Professors

Bretherton, Christopher S., * 1984, (Applied Mathematics), † Ph.D., 1984; Massachusetts Institute of Technology; mesoscale meteorology, climate theory.

Brown, Robert A., * 1971, (Research), (Applied Physics), M.S., 1962, California (Berkeley); Ph.D., 1969, Washington; planetary boundary layers, air-sea interaction, turbulence, remote sensing of winds.

Covert, David S., * 1988, (Research), ‡(Environmental Health), M.S., 1971, Ph.D., 1974, Washington; aerosol instrumentation, aerosol physics and chemistry, atmospheric chemistry.

Harrison, D. Edmunds, * 1985, (Affiliate), (Oceanography), † M.S., 1977, Ph.D., 1977, Harvard; ocean circulation, large-scale ocean-atmosphere interaction, ocean and climate dynamics.

Harrison, Halstead, * 1971, (Civil Engineering, Environmental Studies, Geophysics), Ph.D., 1960, Stanford; atmospheric chemistry.

Hegg, Dean A., * 1979, (Research), M.S., 1976, Ph.D., 1979, Washington; atmospheric chemistry, cloud physics.

Katsaros, Kristina B., * 1969, Ph.D., 1969, Washington; air-sea interaction, radiation, remote sensing.

Mass, Clifford F., * 1981, Ph.D., 1978, Washington; synoptic meteorology, mesoscale meteorology.

Overland, James E., * 1983, (Affiliate), M.S., 1971, Washington; Ph.D., 1973, New York; arctic meteorology and sea ice, marine meteorology.

Warren, Stephen G., * 1982, (Geophysics), † A.M., 1969, Ph.D., 1973, Harvard; atmospheric radiation, climatology, glaciology.

Assistant Professors

Durrant, Dale R., * 1987, M.A., 1975, California (Berkeley); Ph.D., 1981, Massachusetts Institute of Technology; atmospheric dynamics, mesoscale meteorology, numerical modeling.

Ferek, Ronald J., * 1985, (Research), M.S., 1978, Ph.D., 1982, Florida State; atmospheric chemistry, global tropospheric chemistry, acid precipitation.

Principal Research Associate

Maykut, Gary, * 1969, (Applied Physics), (Geophysics), † Ph.D., 1969, Washington; polar air-sea-ice interaction, radiative transfer in ice and snow.

Senior Research Associates

Grenfell, Thomas C., * 1972, (Applied Physics), M.S., 1968, Chicago; Ph.D., 1972, Washington; atmospheric radiation, radiative transfer, microwave remote sensing, sea-ice optics.

Tillman, James E., 1972, M.S., 1961, Massachusetts Institute of Technology; Mars meteorology, atmospheric surface layer, humidity and temperature instrumentation.

Course Descriptions

Courses for Undergraduates

ATM S 101 Weather (5) AWSpS The earth's atmosphere, with emphasis on weather observations and forecasting. Daily weather map discussions. Highs, lows, fronts, clouds, storms, jet streams, air pollution, and other features of the atmosphere. Physical processes involved in weather phenomena. Intended for nonmajors.

ATM S 102 Climate of the Earth and Other Planets (5) W A global view of the earth's atmosphere. Factors controlling the earth's climate, its changes from year to year, and through the ages. Natural climatic variations and human effects on the atmosphere. Atmospheres of other planets. Prerequisite: 101.

ATM S 301 Introduction to Atmospheric Sciences (5) A Composition and structure of the atmosphere. Clouds and weather phenomena. Thermodynamic processes. Solar and terrestrial radiation. Air motions. Daily weather discussions and forecasts. For majors and nonmajors. Prerequisites: PHYS 121, 122, 123 and MATH 124, 125, 126.

ATM S 319 Microclimatology (3) A Interaction of biological and meteorological processes with applications to forestry, recreation, wildlife, landscape design, and architecture. Surface energy balances in terms of evaporation, radiation exchange, air and soil temperature, wind speed, and humidity in the lower layer of the atmosphere. Joint with FPE 319. Prerequisite: 101 or 301, or permission of instructor.

ATM S 321 Physical Climatology (3) Sp Evolution and present state of earth's climate. Emphasis on physical processes determining the climate of the earth's atmosphere and surface: radiative transfer, energy balance, hydrologic cycle, atmospheric and oceanic energy transport. Factors controlling climate change. Prerequisite: 301.

ATM S 340 Introduction to Atmospheric Physics (5) Sp Thermodynamics and hydrostatics. Cloud and precipitation processes with emphasis on the microphysics. Prerequisite: MATH 126 or permission of instructor.

ATM S 362 Instruments and Observations (4) A Principles of operation of instruments for measuring pressure, temperature, humidity, wind, solar and infrared radiation, precipitation amounts and particle size, ozone and other chemicals, condensation, and ice nuclei. Methods of using these instruments, manipulation of output data to put them in usable format, including analog-to-digital converters, microprocessors, satellites. Prerequisites: MATH 126, PHYS 123.

ATM S 370 Atmospheric Structure and Analysis (3) W Atmospheric soundings. Thermodynamic diagrams. Diagnosis of circulation systems; general circulation, monsoons, extratropical cyclones and fronts, convective phenomena, tropical systems, mountain waves, and other small-scale phenomena. Scalar and streamline analysis. Applications of radar and satellite data. Prerequisite: 301 and 362. (Formerly 350.)

ATM S 390 Honors Tutorial in Atmospheric Sciences (*, max. 6) AWSpS Review and discussion of selected problems in atmospheric sciences. Introduction to research methods. Presentation of a research paper. Recommended: MATH 124, PHYS 123.

ATM S 408 Geophysics: The Atmosphere (3) Sp Phenomena of the lower atmosphere; simple applications of the principles of classical thermodynamics and fluid dynamics to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics. Joint with GPHYS 406. Prerequisite: GPHYS 404 or permission of instructor.

ATM S 431 Atmospheric Physics (5) A Energy transfer processes: solar and atmospheric radiation,

turbulence and boundary-layer structure, applications. Prerequisite: 340 or PHYS 224.

ATM S 441 Atmospheric Motions (5) W The basic equations governing atmospheric motions, and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Includes laboratory exercises. Prerequisites: 362, MATH 328.

ATM S 450 Atmospheric Data Analysis (4) W Statistical and other methods employed in atmospheric data analysis. Frequency distributions, sampling theory, linear correlation, elementary time-series analysis, objective map analysis. Prerequisites: 370, ENGR 141, or equivalent.

ATM S 452 Forecasting Laboratory (5) Sp Daily practice in map analysis and forecasting, using current weather data. Severe-storm forecasting. Statistical methods. Prerequisites: 370, 441, and 450.

ATM S 458 Introduction to Air Chemistry (4) A The atmosphere as a chemical system; analytical and physical chemistry of trace atmospheric constituents, both natural and manufactured. Joint with CHEM 458. Prerequisites: CHEM 140; CHEM 350 or 456 or ATM S 340.

ATM S 462 Sea-Air Transfer Processes (*, max. 6) S Classroom work and field observations relating to the physical processes occurring at the ocean-atmosphere boundary. Transfer of energy, momentum, and moisture and their effects on small- and large-scale phenomena, including fog formation, convection, modification of air masses. Prerequisite: 441 or permission of instructor. (Offered alternate years.)

ATM S 466 Air Quality Modeling (3) W Evaluation of air quality models relating air pollution emissions to environmental concentrations. Meteorological dispersion models and various "receptor" models based on chemical "fingerprinting" of sources. Current problems. Joint with CEWA 466. Prerequisite: 458 or CEWA 461 or permission of instructor.

ATM S 492 Readings in Meteorology or Climatology (*, max. 6) AWSpS Prerequisite: permission of instructor.

Courses for Graduates Only

ATM S 501 Fundamentals of Physical Meteorology (5) A Fundamentals of hydrostatics, thermodynamics, radiative transfer with application to planetary atmospheres, cloud physics and atmospheric chemistry. Prerequisite: concurrent registration in 502.

ATM S 502 Introduction to Dynamic and Synoptic Meteorology (4) A Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity, planetary boundary layer, general circulation, dynamics of midlatitude disturbances, analysis of surface and upper level synoptic charts and vertical cross-sections. Prerequisite: concurrent registration in 501.

ATM S 509 Geophysical Fluid Dynamics I (3) W Large-scale dynamics of rotating stratified fluids, introductory fluid mechanics. Observed properties of oceanic, atmospheric circulation. Development of geostrophic flow, thermal-wind balance, velocity spirals. Potential vorticity, instability of large-scale flows, Ekman layers. Gravity, inertial, Rossby waves; ray theory, equatorial waveguide. Action, energy principles. Joint with OCEAN 509.

ATM S 510 Physics of Ice (3) W Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from the vapor and liquid phases. Physical properties of snow. Joint with GPHYS 510. Prerequisite: permission of instructor. (Offered alternate years.)

ATM S 511 Formation of Snow and Ice Masses (3) A Snow climatology. Transport of snow by wind. Transfer of radiative, sensible, and latent heat at the

surface of snow and ice. Freezing of natural water bodies. Heat and mass budget of ice masses. Remote sensing of snow and ice. Theories of ice ages. Joint with GPHYS 511. Prerequisite: permission of instructor. (Offered alternate years.)

ATM S 512 Dynamics of Snow and Ice Masses (3) Sp Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Joint with GPHYS 512. Prerequisite: permission of instructor. (Offered alternate years.)

ATM S 513 Structural Glaciology (3) W *Raymond* Physical and chemical processes of snow and stratigraphy and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism from ice flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between structures and bulk physical properties. Joint with GPHYS 513. Prerequisite: permission of instructor. (Offered alternate years.)

ATM S 514 Ice and Climate Modeling (3) A Principles of global climate modeling. Modeling seasonal cycles of snow cover and sea ice. Ice-sheet mass balance and flow. Solar radiation anomalies due to changes in earth's orbit. Climate/ice-sheet models of Pleistocene ice ages. Joint with GPHYS 514. Prerequisite: permission of instructor. (Offered alternate years.)

ATM S 521 Seminar in Atmospheric Dynamics (*) AWSp Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor.

ATM S 523 Seminar in Cloud Physics (*) ASP See 521 for course description.

ATM S 524 Seminar in Boundary Layers and Remote Sensing (*) AWSp Directed at current research in boundary layers and remote sensing.

ATM S 532 Remote Sensing of the Atmosphere and Climate System (3) Sp Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications to research. Prerequisites: 533, 534.

ATM S 533 Atmospheric Radiation I (3) Sp Principles of radiative energy exchange in planetary atmospheres with emphasis on emission and absorption of infrared and microwave radiation. Applications to atmospheric and surface energy balance and remote sensing. Prerequisite: PHYS 225 or permission of instructor.

ATM S 534 Atmospheric Radiation II (3) W Principles of radiative transfer in planetary atmospheres with emphasis on single and multiple scattering of visible and infrared radiation. Applications to atmosphere and surface energy balance and remote sensing. Prerequisite: 533 or permission of instructor. (Offered alternate years.)

ATM S 535 Cloud Microphysics and Dynamics (5) W Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: 501 or permission of instructor.

ATM S 536 Mesoscale Storm Structure and Dynamics (3) Sp Techniques of observing storm structure and dynamics by radar and aircraft, observed structures of precipitating cloud systems, comparison of observed structures with cloud models. Prerequisite: 535.

ATM S 542 Dynamic Meteorology (3) Sp Quasi-geostrophic theory, baroclinic instability, planetary waves, wave-mean flow interaction, equatorial flows. Prerequisite: 509, AMATH 402, or equivalents.

ATM S 544 Numerical Modeling and Prediction (3) A Numerical methods for initial value and boundary value problems in atmospheric and fluid dynamics. Numerical weather prediction models. Objective analysis and initialization of forecast models. Prerequisite: 542 or permission of instructor.

ATM S 545 The General Circulation of Atmosphere (3) Sp Requirements of the global angular momentum, heat, mass, and energy budgets upon atmospheric motions as deduced from observations. A study of the physical processes through which these budgets are satisfied. Prerequisite: 509 or OCEAN 509 or permission of instructor.

ATM S 547, 548 Atmospheric Turbulence (3,3) W,Sp 547: turbulent flux of heat, momentum, and moisture in the layer of the atmosphere next to the earth; Richardson's stability criterion; free convection. 548: diffusion of matter in the atmosphere; application of Fickian and statistical theories of diffusion; use of Lagrangian and Eulerian correlation functions. Prerequisites: 502 and OCEAN 504 or permission of instructor.

ATM S 551 Atmospheric Structure and Analysis I: Synoptic Scale Systems (3) A Extratropical cyclones and cyclogenesis. Jet streams. Upper waves in the westerlies. Diagnosis of vertical motions. Fronts and frontogenesis. Prerequisite: 509 or OCEAN 509.

ATM S 552 Objective Analysis (3) W Review of objective analysis techniques commonly applied to atmospheric problems; examples from the meteorological literature and class projects. Superposed epoch analysis, cross-spectrum analysis, filtering, eigenvector analysis, optimum interpolation techniques. Prerequisite: FORTRAN programming. (Offered alternate years.)

ATM S 553 Atmospheric Structure and Analysis II: Non-Convective Mesoscale Circulation (3) W Thermally forced circulation systems, including sea/land breezes and mountain/valley winds. Topographic deflection, channeling and blocking in mesoscale flows. Analysis and forecasting of local mesoscale phenomena. (Offered alternate years.)

ATM S 555 Planetary Atmospheres (3) A Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all planetary atmospheres; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. For students interested in atmospheric processes or those specifically interested in planets. Joint with ASTR 555 and GPHYS 555. (Offered alternate years.)

ATM S 556 Middle Atmosphere Meteorology (3) Sp Composition and structure. Radiative processes. Extratropical and equatorial circulations. Sudden stratospheric warmings. Transport of trace constituents. Dynamics and chemistry of ozone layer. Prerequisites: 533, 542, and 558 or permission of instructor. (Offered alternate years.)

ATM S 558 Atmospheric Chemistry (3) Sp Photochemistry of urban, rural, and marine tropospheric air, and of the natural and perturbed ozone in the middle atmosphere. Unity of the chemistries in these apparently different regimes. Prerequisite: 458 or 501 or CHEM 457 or permission of instructor. (Offered alternate years.)

ATM S 564 Atmospheric Aerosol and Multiphase Atmospheric Chemistry (3) W Physics and chemistry of particles and droplets in the atmosphere. Statistics of size distributions, mechanics, optics, and physical chemistry of atmospheric aerosols. Brownian motion, sedimentation, impaction, condensation, and hygroscopic growth. Prerequisite: permission of instructor. (Offered alternate years.)

ATM S 565 Seminar in Atmospheric and Marine Science Policy (1-3) W Decision making and policy determination in major atmospheric and marine programs. Case studies of policy development relating to global observations, air and water quality, climate change. Individual study of selected topics, with emphasis on developing and evaluating alternate policies. Joint with IMS 565. Prerequisite: permission of instructor.

ATM S 571 Advanced Physical Climatology (3) A Physical processes that determine the climate of Earth and its past and future changes. Greenhouse effect. Climate Modeling. Radiative and dynamic feedback processes. 'Orbital parameter' theory. Critical analysis

of climate change predictions. Prerequisite: permission of instructor. (Offered alternate years.)

ATM S 591 Special Topics (1-4, max. 9) AWSp Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor.

ATM S 600 Independent Study or Research (*)

ATM S 700 Master's Thesis (*)

ATM S 800 Doctoral Dissertation (*)

Biochemistry

109 Bagley

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes. Since the study of any chemistry-based field requires an understanding of mathematics and physics, the Bachelor of Science degree in biochemistry requires introductory courses in mathematics, physics, chemistry, and biology as well as intermediate-level courses in chemistry. These courses prepare the student for junior and senior studies in biochemistry, molecular genetics, and molecular biology. Since the subject requires a very broad scientific foundation, the program requires 200 credits. At the advanced level the student has a choice of a wide range of courses in a variety of science departments.

Undergraduate Program

Bachelor of Science Degree

Major Requirements: MATH 124, 125, 126 (or 134, 135, 136); PHYS 121, 122, 123 (or 114, 115, 116); CHEM 145 (or 140); CHEM 155, 164 (or 150, 160); CHEM 157 (or 141, 151, 161); CHEM 335, 336, 337, 346, 347 (or 237, 238, 239, 241, 242); CHEM 455; CHEM 456, 457 (or 352) (or 350, 351); BIOL 201, 202; BIOC 440, 441, 442, 426; GENET 365 (or 360); 12 credits from among the following: MATH 307 (not if 134, 135, 136 taken), 205 (or 308), BIOL 203, 401, 402; MICRO 402, 410; CHEM 312, 317, 321, 416, 417, 419, 426, 435, 436, 460, 461, 462, 463, 464, 471, 399, 499; GENET 455; ZOOL 455, 456; BIOC 499. For all courses required by the degree program, a minimum grade of 1.7 and a grade-point average of 2.8. For graduation 200 credits are required with a cumulative grade-point average of 2.8 or better.

For faculty listing see Chemistry in the College of Arts and Sciences and Biochemistry in the School of Medicine. For course descriptions, see the appropriate department.

318 Hitchcock

Undergraduate Program

Advisers
318 Hitchcock

Undergraduate programs leading to a baccalaureate degree are offered by the departments of Botany, Microbiology and Immunology, and Zoology. An interdisciplinary program leading to a baccalaureate degree in biology is described below. Baccalaureate degree programs with a strong biological orientation are also offered by the Department of Psychology and the colleges of Forest Resources and Ocean and Fishery Sciences. In addition to the departments and colleges

already noted, courses in the biological sciences are offered by departments in the College of Arts and Sciences (e.g., Anthropology and Genetics) and in the schools of the health sciences (Dentistry, Medicine, Nursing, Pharmacy, and Public Health and Community Medicine). The departments of Botany and Zoology jointly offer a major in biology for students in the College of Education (additional information appears in the College of Education section of this catalog). Interdisciplinary study of biology is supervised by the director of the Biology Program.

Bachelor of Science Degree

Major Requirements: The program leading to a Bachelor of Science degree is in cellular and molecular biology. It is designed for students who wish to obtain undergraduate training that emphasizes the chemical and cellular aspects of biology. The program is particularly well suited to students who wish to pursue graduate work in the areas of genetics, biochemistry, microbiology, cellular physiology and anatomy, developmental biology, or molecular biology. The following courses are required: MATH 124, 125, and either MATH 126, STAT 311, or Q SCI 381; CHEM 140 or 145, 150 or 155; 160 or 164; 231, 232; CHEM 352; one chemistry laboratory; BIOL 201, 202, 203; BIOC 440, 441, and either 442 or GENET 455; GENET 365 (or GENET 360 for students who have not taken BIOL 210 or 201 at this university); and 15 credits of advanced biology course work selected in consultation with the biology adviser. PHYS 114, 115, 116 or 121, 122, 123 strongly recommended.

Faculty

Professor

Cleland, Robert E.,* 1964, (Botany),† Ph.D., 1957, California Institute of Technology; plant physiology.

Associate Professor

Piternick, Leonie K., 1972, (Emeritus), M.A., 1942, Ph.D., 1946, California (Berkeley); introductory biology.

Lecturers

Edwards, Ola, 1982, Ph.D., 1980, Washington; alpine ecology and biology for elementary teachers.

Mehary, Tekie, 1988, M.Sc., 1976, Washington State; Ph.D., 1981, Washington; applied entomology and environmental health.

Nicotri, M. Elizabeth, 1974, Ph.D., 1974, Washington; marine ecology and introductory biology teaching.

Russell, Millie L., 1974, (Community Health Care Systems),† M.S., 1979, Washington; kinesiology.

Course Descriptions

Courses for Undergraduates

The courses in biology listed below are administered by several departments. Other courses in biology are listed under such headings as *Biochemistry, Biological Structure, Botany, Microbiology, and Zoology*.

BIOL 100 Introductory Biology (5) AWSpS Biological principles and concepts and the application of biological knowledge to problems of human beings and society; development of an awareness of science. Autumn quarter concentrates on the organism; winter on the cell; and spring on ecology and the environment. For nonscience majors only.

BIOL 101-102 General Biology (5-5) A,W Principles of living systems as viewed at levels from the subcellular to the community. Emphasis on structural and functional analysis of biological organization—its adaptiveness, its genetic diversity, its energetics—leading to an evolutionary synthesis. The position of human beings in the biological world. For nonmajors and majors in biology-related fields who need a thorough two-quarter introduction to biology.

BIOL 103 Introduction to Biology (5) WSp Basic biological concepts within the context of human biology. For students in the Educational Opportunity Program. No credit allowed if 100 has been taken. Prerequisite: permission of instructor.

BIOL 104 Biology for Elementary School Teachers (5) AW Basic concepts of biology, with emphasis on background needed for confident use of the new science curriculum materials in the elementary school. Prerequisite: permission of instructor.

BIOL 110 Elementary Biology for Health Professions I (2) A Russell Elementary biomedical concepts. For Equal Opportunity Program students only. Prerequisite: permission of instructor.

BIOL 111 Elementary Biology for Health Professions II (2) W Russell Elementary human anatomy and physiology, including selected areas in laboratory medicine. For Equal Opportunity Program students only. Prerequisite: 110.

BIOL 112 Elementary Biology for Health Professions III (1-4) Sp Russell Field experience in a health profession. For Equal Opportunity Program students only. Prerequisite: 111.

BIOL 113 Biology Tutorial (1-3, max. 6) Independent study. Topics related to material taken in 201, 202, and 203. For Equal Opportunity Program students only. Prerequisite: permission of instructor.

BIOL 150 Biology: the Organism (5) A Fundamentals of living systems, with emphasis on organisms. Selected organisms, both animal and plant, examined in detail to explore how structure is related to function, and how the whole is integrated into a successful individual. For nonscience majors only.

BIOL 151 Biology: the Cell (5) W Fundamentals of living systems, with emphasis on cells. Cellular and molecular biology studied through concern for human health ecology, including AIDS as a virus, DNA, and cellular replication. For nonscience majors only.

BIOL 152 Biology: Ecology and Evolution of Organisms (5) Sp Fundamentals of living systems, with emphasis on the ecology and evolution of organisms. Considers diversity of organisms and the ways they are adapted to live in specific habitats. Studies forces which direct the evolution of organisms. For nonscience majors only.

BIOL 201, 202, 203 Introductory Biology (5,5,5) AWSp,WSp,ASp Introduction to phenomena of life for students intending to take advanced biology courses and preprofessional programs. Emphasis on features common to all living things: molecular and submolecular phenomena; cell structure, metabolism, and energetics; genetic basis of inheritance; structure, function, and development of whole organisms; principles of ecology and evolution. Prerequisites: CHEM 140, 150; 201 for 202, 202 for 203. (201 formerly 210; 202 formerly 212; 203 formerly 211.)

BIOL 213 Scientific Illustration (3) W Practical course designed to acquaint the science student with the techniques of illustrating. Accurate and selective interpretation of shape, texture, and consistency of biological materials, working in black and white and using a variety of illustration techniques. Students may choose objects of special interest to them. (Offered through University Extension only.)

BIOL 214 Scientific Illustration (3) Sp Continuation of 213. Further training techniques: tone, color, and working from the live animal. Exploration of specifications for ultimate use in projection or print. (Offered through University Extension only.)

BIOL 313, 314, 315 Advanced Scientific Illustration (3,3,3) Sweeney Intensive treatment of techniques. 313: five continuous-tone techniques, lighting, form, and texture rendition; 314: seven black-and-white techniques, reproduction, typesetting, pasteup, and layout; 315: color illustration techniques. Each includes historical perspective on the techniques under study and critique of published material. Prerequisites: 213, 214, and introductory biology. (Offered through University Extension only.)

BIOL 401 Cell Biology (4) Asp Structure and function of the cell. Prerequisites: 201, 202, 203 or equivalent; one upper-division course in a related area (embryology, histology, physiology, or biochemistry).

BIOL 402 Cell Biology Laboratory (3) AS Shellenbarger Practice in modern methods (restriction en-

zyme digestion, blotting, hybridization, immunochromatography, density gradient centrifugation, electrophoresis) and other methods currently used to study plant and animal cells, nucleic acids, and proteins. Includes practice in scientific style writing. Prerequisites: 401 which may be taken concurrently.

BIOL 449 Biology of Estuaries (4) W Williams Fundamentals of geological-chemical-physical environment, primary productivity, organism adaptation, nutrient cycling, and trophic structure of estuarine communities (plankton, seagrass, mudflat, salt marsh). Focus on importance of basic biology of coastal resource management. Joint with BOT 449. Prerequisite: course in ecology, oceanography, or fisheries, or permission of instructor. (Offered alternate years.)

BIOL 454 Evolutionary Mechanisms (3) Evolutionary change as determined by mutation, recombination, and selection. Effects of the genetic system, isolating mechanisms, hybridization, and polyploidy on speciation. Examples of microevolutionary and macroevolutionary changes from plant and animal kingdoms. For advanced undergraduate and graduate students in the biological sciences.

BIOL 460 Biology of Eukaryotic Microorganisms (5) Whisler Introduction to the comparative biology of the algae, fungi, and protozoa. Emphasis on the life history, physiology, and structure of protists most commonly used in contemporary biological research. Prerequisites: 201, 202, 203 or 101-102 or introductory microbiology. (Offered alternate years.)

BIOL 472 Principles of Ecology (4) WS Bliss, Kareiva, Odell, Orians, Paine Population biology, interactions between species in biological communities, relationship of community to environment, physiological ecology, principles of natural selection. Prerequisites: 15 credits in biological sciences and upper-division standing, or permission of instructor.

BIOL 473 Limnology (3) Biological, physical, and chemical features of lakes and other inland waters. Prerequisites: 15 credits in biological sciences, 10 credits in college chemistry, and upper-division standing, or permission of instructor.

BIOL 474 Ecology Laboratory (3) Students may be required to share a portion of the transportation costs of field trips. Prerequisites: 472 and permission of instructor.

BIOL 475 Limnology Laboratory (2) Examination of biota of fresh waters, survey of limnological methods, and analysis of data. Prerequisites: 473, which may be taken concurrently, and permission of instructor.

BIOL 476 Conservation Biology (5) Boersma, Orians Explores biological, managerial, economic, and ethical concepts affecting survival of species. Applications of ecology, biogeography, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Joint with ENV S 476. Prerequisite: 472 or ENV S 204 or equivalent.

BIOL 499 Independent Studies in Biology Instruction (1-5, max. 15) AWSpS Cleland Individual exploration and direct experience with modes of thought and activity in biology instruction. Prerequisite: permission of instructor.

Courses for Graduates Only

BIOL 501 Advanced Cytology (1-5, max. 5) Detailed study of the structure and function of the cell. Prerequisite: permission of instructor.

BIOL 508 Cell Biology (3, max. 6) Four to five topics of current interest in cell biology selected to meet the needs of the enrollees. Prerequisite: permission of instructor.

BIOL 530 Plant Biochemistry (3) Biochemistry of plants, with special emphasis on photosynthesis, secondary product biochemistry of plants, plant cell walls and nitrogen fixation. Emphasis on those aspects of biochemistry unique to plants. Recommended: a course in biochemistry and/or plant physiology.

BIOL 573 Topics in Limnology (2 or 3) Readings in the literature of limnology, with discussion of modern problems. May be repeated for credit. Prerequisite: permission of instructor.

BIOL 576 Megareserve Management (5) Field course held on Olympic Peninsula, Washington, and Tempisque Basin, Costa Rica, in alternate years. Provides graduate students with practical, hands-on experience in megareserve design and management, including: developing objectives, establishing boundaries, determining compatibility of proposed uses, funding and political feasibility. Joint with ENV S 575. Prerequisite: 476.

BIOL 577 Problem Solving in Conservation Biology (5) In-depth analyses of current issues in conservation biology and sustainable development. Emphasis on multidisciplinary efforts to address specific problems in both temperate and tropical regions. Joint with ENV S 576.

BIOL 578 Species Preservation, Captive Propagation, and Reintroductions (5) Offered with Woodland Park Zoo. Explores topics relevant to management of endangered species through lectures, seminars, and workshops. Focuses on the role of zoos in contributing to species survival plans; addresses techniques for decision analysis and conflict assessment. Captive propagation, reintroductions, translocation efforts evaluated. Joint with ENV S 578.

BIOL 581 Biology of Drosophila Seminar (1, max. 12) Weekly presentation by participants of classical literature, current literature, and research in the molecular biology, developmental biology, neurobiology, and genetics of *Drosophila*. Prerequisite: permission of instructor.

BIOL 586 Analysis of Development (3, max. 6) A Riddiford Analysis of structural, physiological, and molecular levels of developmental processes, including gametogenesis, fertilization, cell and tissue movements, induction, and cytodifferentiation. Prerequisites: ZOOL 456 and BIOC 442 or permission of instructor.

BIOL 587 Analysis of Development Laboratory (1-5, max. 5) Series of intensive workshops in developmental biology, each extending over three to five days. Each is based on problems under study in the laboratory of the instructors involved, using materials, methods, and approaches characteristic of that laboratory. Prerequisite: permission of instructor.

Botany

430 Hitchcock

Botany is concerned with the structure, ecology, physiology, classification, and evolution of plants, with emphasis on organismal as well as cellular and molecular biology. Special courses and programs in botany of the Pacific Northwest are shared with related departments.

Undergraduate Program

Advisers
318 Hitchcock

The Department of Botany offers two undergraduate degrees. The Bachelor of Arts degree is designed for students who wish to obtain a broad training in the biology of plants and plant-like organisms, but who do not plan to continue with further graduate training in the biological sciences. The Bachelor of Science degree includes a more extensive training in mathematics and chemistry and is designed for students who are planning to continue with graduate training in botany or other areas of biology.

Bachelor of Arts Degree

Major Requirements: Minimum of 59 credits as follows: BIOL 101-102 or BIOL 201, 202, 203; CHEM 100, 102

or 140, 150, 223; BOT 113, 371, 372, 441, 461; BOT 445 or 446; BOT 354 or BIOL 472; BOT 428 or 480. Minimum of four upper-division courses: two in botany and two from botany, zoology, microbiology, genetics, biology, and certain courses in forest resources, oceanography, and fisheries.

Bachelor of Science Degree

Major Requirements: Minimum of 85 credits as follows: BIOL 201, 202, 203 (or BIOL 101-102, 201, or equivalent); GENET 365; CHEM 140, 150; CHEM 223, 224 (or 237, 238, 239). One of the following laboratory courses in chemistry: CHEM 141 or 151 or 241 or 321. One of the following sequences: MATH 124, 125; Q SCI 291, 292; Q SCI 381, 482; or one quarter of calculus and one quarter of statistics. BOT 113, 371, 372, 441, 461; BOT 445 or 446. BOT 354 or BIOL 472; BOT 428 or 480. Minimum of 10 credits of upper-division courses (excluding courses without prerequisites) in botany, zoology, microbiology, genetics, biology, and certain courses in forest resources, oceanography, and fisheries.

Graduate Program

The Department of Botany offers programs of graduate study leading to the Master of Science and Doctor of Philosophy degrees. Each program of study is planned individually and takes into consideration the background and interests of the student.

Research Facilities

Special departmental facilities include electron microscopes, greenhouse, growth chambers for both higher plants and algal cultures, and herbarium. The Friday Harbor Laboratories on San Juan Island offer opportunities for the study of marine botany, and the great variety of habitats in the Pacific Northwest provide many opportunities for field investigations.

Special Requirements

A prospective graduate student is expected to have had the equivalent of an undergraduate major in biological science, with training in chemistry (at least through organic chemistry), general botany, plant physiology, and genetics. Calculus is recommended.

Financial Aid

A number of teaching and research assistantships are awarded to selected applicants in March of each year.

Professors

Ammirati, Joseph F.,* 1979, (Forest Resources), M.A., 1967, San Francisco State; Ph.D., 1972, Michigan; mycology, taxonomy and ecology of the fleshy fungi.

Bendich, Arnold J.,* 1970, (Genetics), Ph.D., 1969, Washington; nucleic acids as evolutionary indicators, DNA sequence organization in plants, plant cancer.

Bliss, Lawrence C.,* 1978, M.S., 1953, Kent State; Ph.D., 1956, Duke; physiological plant ecology, arctic, alpine environments.

Cattolico, Rose A.,* 1975, M.A., 1968, Temple; Ph.D., 1973, State University of New York (Stony Brook); plastid replication, nucleic acid biochemistry in synchronized unicellular algae.

Cleland, Robert E.,* 1964, Ph.D., 1957, California Institute of Technology; physiology, growth substances, cell wall, tissue culture.

del Moral, Roger,* 1968, (Environmental Studies, Landscape Architecture), M.A., 1966, Ph.D., 1968,

California (Santa Barbara); ecology, gradient analysis, community structure, phytosociology.

Denton, Melinda F.,* 1972, M.A., 1967, Ph.D., 1971, Michigan; Herbarium curator; systematics and evolution of vascular plants, phytogeography.

Halperin, Walter,* 1968, M.S., 1961, Southern Connecticut State; Ph.D., 1965, Connecticut; plant physiology, developmental anatomy, plant cancer, tissue culture.

Haskins, Edward F.,* 1966, M.A., 1962, Ph.D., 1965, Minnesota; cytology, ultrastructure of microorganisms, especially slime molds.

Kruckeberg, Arthur R.,* 1950, (Emeritus), Ph.D., 1950, California (Berkeley); evolution, biosystematics, edaphic ecology.

Leopold, Estella B.,* 1976, (Forest Resources, Geological Sciences, Quaternary Research Center), (Environmental Studies),† M.S., 1950, California (Berkeley); Ph.D., 1955, Yale; palynology, Quaternary environments and forest conservation.

Meeuse, Bastiaan J. D.,* 1952, (Emeritus), M.S., 1939, Leiden; Doctoral, 1943, Delft (Holland); plant physiology, algal physiology, metabolism, plant biochemistry.

Nester, Eugene W.,* 1962, ‡(Microbiology), Ph.D., 1959, Case Western Reserve; genetics and biochemistry of bacterial-plant cell interactions.

Tsukada, Matsuo,* 1969, (Geological Sciences, Quaternary Research Center), M.S., 1958, D.Sc., 1961, Osaka City (Japan); interpretation of Quaternary events from palynological and kindred data.

Waaland, J. Robert,* 1969, Ph.D., 1969, California (Berkeley); biology of algae, experimental, cytological, and ecological studies of marine algae, gas vacuoles of blue-green algae.

Walker, Richard B.,* 1948, (Emeritus), Ph.D., 1948, California (Berkeley); plant physiology, mineral nutrition, water relations.

Whisler, Howard C.,* 1963, Ph.D., 1961, California (Berkeley); mycology, aquatic fungi, slime-molds and phycomycetes, development.

Associate Professors

Comal, Luca,* 1989, M.S., 1978, Washington State; Ph.D., 1980, California (Davis); plant molecular biology, biochemistry and bacterial genetics.

Schemske, Douglas W.,* 1989, M.S., 1972, Ph.D., 1977, Illinois (Urbana); plant population biology, evolutionary significance of plant mating systems, genetic and ecological studies in temperate and tropical habitats.

Spaulding, W. Geoffrey,* 1979, (Research), (Quaternary Research Center), M.S., 1974, Ph.D., 1981, Arizona; paleobotany of North American deserts, late Quaternary phytogeography and climate history of the Southwest and Great Basin, macrofossil paleoecology.

Assistant Professors

Hamilton, Clement W.,* 1985, ‡(Center for Urban Horticulture), Ph.D., 1985, Washington (St. Louis); systematics of horticultural plants, plant population biology, tropical biogeography and conservation.

Mitchell-Olds, Thomas,* 1986, (Affiliate), Ph.D., 1985, Wisconsin (Madison); plant population ecology, ecological genetics, agricultural ecology and genetics.

Van Volkenburgh, Elizabeth,* 1985, Ph.D., 1980, Washington; analysis of growth mechanisms, leaf growth, photobiology.

Williams, Susan L.,* 1986, (Research), M.S., 1977, Alaska; Ph.D., 1981, Maryland; physiological ecology of marine plants, nutrient cycling.

Course Descriptions

Courses for Undergraduates

BOT 110 Introductory Plant Biology (5) AWSp
Ammirati, Bliss, del Moral, Haskins Basic concepts in plant biology for the nonmajor, with emphasis on plant

diversity and how plants grow and reproduce. Modern ideas concerning genetic engineering, ecology, agriculture, medicine, practical gardening, and conservation and environmental issues discussed. Laboratories include greenhouse and field studies.

BOT 113 Plant Identification and Classification (5) SpS Denton Plant classification; field study and laboratory identification of the common plant families and the conspicuous flora of western and central Washington. Two full-day field trips.

BOT 220 The Plant Kingdom (5) A Waaland Natural history of fungi, algae, and land plants, stressing ecological and structural diversity. Laboratories include plants native to western Washington. Prerequisite: one quarter of college biology or general botany or permission of instructor.

BOT 301 Plant Propagation (2) A Practical course in methods of plant propagation by seeds, cuttings, budding, layering, bulbs, divisions, and other special structures. Includes consideration of care and handling of plants in the home, garden, and greenhouse. Prerequisites: BIOL 101-102 or equivalent.

BOT 331 Landscape Plant Recognition (3) SpS Hamilton, Tsukada Field recognition of important groups of woody and herbaceous landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Joint with UHF 331. Recommended: 113.

BOT 350 Introduction to Plant Geography (4) W Tsukada Patterns of world vegetation distributions; the relationships between vegetation and climate; introduction to general theories of plant distribution. Emphasis on the affinities within vegetation in different parts of the world.

BOT 354 Introduction to Plant Ecology (5) Sp Bliss Basic concepts of plant ecology, including studies of the biotic environment, plant-environment interactions, communities, and ecosystems. Laboratory includes two field trips, laboratory and greenhouse experiments, and an introduction to ecological problem solving. Prerequisite: BIOL 101-102 or BIOL 203.

BOT 371 Elementary Plant Physiology (3) W Bendich, Cleland, Halperin, Van Volkenburgh Nutrition, assimilation, transport, growth, photosynthesis, and cellular respiration in plants. Prerequisite: BIOL 203 or equivalent or permission of instructor.

BOT 372 Plant Physiology Laboratory (2) W Laboratory experiments on the growth, nutrition, and metabolism of plants. Prerequisite: 371, which may be taken concurrently.

BOT 380 Economic Botany (3) A Tsukada Plants useful or harmful to man; their taxonomic and morphological characteristics and chemical constituents; history, distribution, production, usage, and roles in prehistoric and modern cultures and civilization. Prerequisite: 110 or 113 or 10 credits in biological sciences.

BOT 421 Bryology (5) Taxonomy, ecology, and general biology of mosses, liverworts, and hornworts. Emphasis on Pacific Northwest species. Prerequisites: ten credits of biological sciences or permission of instructor.

BOT 428 Molecular and Cellular Biology of Plants (3) W Bendich, Cattolico Structure of chloroplasts and mitochondria, nuclear and organelle gene-sequence arrangement and expression, genetic engineering and molecular evolution. Methods used in molecular biology such as cloning, DNA sequencing, electrophoresis, and hybridization. Prerequisites: BIOL 201, 202, 203.

BOT 433 Advanced Systematics (5) A Denton Analysis of characters and examination of evolutionary principles as they relate to systematic studies in vascular

plants. Prerequisite: 113 or equivalent. (Offered alternate years; offered 1988-89.)

BOT 435 Biology of Grasses and Allies (5) A Denton Biology, taxonomy, and evolutionary relationships of graminoid plants (Gramineae, Cyperaceae, and Juncaceae). Keying and recognition of families and genera in field situations. Prerequisite: 113 or equivalent. (Offered alternate years; offered 1989-90.)

BOT 441 Morphology and Anatomy of Land Plants (5) A Halperin Comparative morphology and anatomy of land plants. Derivation of morphological structures and basis for current classification schemes examined using living and fossil organisms. Laboratories emphasize live plants native to the Pacific Northwest. Prerequisite: BIOL 101-102 or BIOL 203 or equivalent.

BOT 443 Origins of Our Modern Floras (4) W Leopold Evolution and biogeographic development of our modern forest taxa and their associations. Late Cenozoic forests (last 60 million years) of western North America and their environments. Geologic and climatic shifts that have shaped temperate forest types from tropical vegetation during early Cenozoic Era. Prerequisite: 113 or equivalent. (Offered alternate years; offered 1989-90.)

BOT 445 Marine Botany (8) Asp Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Offered at Friday Harbor Laboratories. Prerequisites: appropriate credits in biological sciences, concurrent registration in ZOOL 430, and permission of the Director of Friday Harbor Laboratories.

BOT 446 Phycology (5) Sp Cattolico, Waaland Examination of algal phyla from the viewpoint of morphological and physiological characteristics important to their systematics. Emphasis on phylogeny of various lines of evolution in algae, relationships between algae and other parts of plant and animal kingdoms, algal geography and species of economic importance. Prerequisite: 220 or BIOL 211 or permission of instructor.

BOT 448 Marine Algal Ecology (3) W Waaland Marine environment in relation to requirements for algal life. Intertidal, subtidal, geographical, and seasonal distribution of marine algae. Functional aspects of algal form, structure, productivity, and energy economy of marine algal communities. Algal utilization and aquaculture. Prerequisite: 445 or 446, or permission of instructor. (Offered alternate years.)

BOT 453 Concepts and Methods in Paleobotany (4) A Brubaker, Leopold, Tsukada Conceptual framework and methods of study for interpretation of fossils in sediments; tree rings, sedimentary/geochemical evidence. Past dynamic changes in plant communities and species history evaluated in context of modern ecological theory. Joint with QUAT 422 and FRM 422. Prerequisite: 354. (Offered alternate years; offered 1988-89.)

BOT 455 Vegetation of Western Washington (5) AS del Moral Vegetation of western Washington, including mature, seral, and weedy vegetation. Recognition of landscape patterns, sight identification of common and indicator species, classification of major community types, and uses of native species in landscape design. Recommended: 113 or 354 or L ARC 483. (Offered alternate years; offered 1990-91.) (Formerly 356.)

BOT 456 Plant Community Ecology (5) A del Moral Development of plant community theory; theory of vegetation structure and type identification; numerical methods for vegetation description and pattern analysis; gradient analysis; competition and allelopathy in complex systems; vegetation dynamics; niche theory. Laboratory emphasizes sampling design and field and computer methods. Two weekend field trips required. Prerequisite: 354 or permission of instructor. (Offered alternate years; offered 1989-90.)

BOT 481 General Mycology (5) W Ammirati, Whisler General survey of the fungi with emphasis on life cycles, structure, physiology, economic importance. Prerequisite: 10 credits in biological science or permission of instructor. (Formerly 360.)

BOT 482 Mushrooms and Related Fungi (5) A Ammirati General biology, ecology, and classification of mushrooms, polypores, puffballs, and other related basidiomycetes. Emphasis on Pacific Northwest species. Prerequisite: 461 or permission of instructor. (Offered alternate years.)

BOT 480 Plant Cell Biology (3) W Haskins Analysis of structure and function of plant cells. Emphasis on the ultrastructure of plant cells and cell components. Prerequisites: 15 credits in biological science.

BOT 490 Undergraduate Seminar (1) Presentation and discussion of special topics in botany.

BOT 498 Special Problems in Botany (1-15) AWSp Students with suitable background in botany may enroll for special study in algology, anatomy, bryology, cytology, mycology, morphology, paleobotany, physiology, or taxonomy. Prerequisite: permission of instructor.

Courses for Graduates Only

BOT 501 Tutorial in Botany (1-5, max. 10) AWSp Small-group study and discussion of a specified topic in the plant sciences, largely in fields not covered by courses and existing special area seminars. Impetus for registration would come from two or more graduate students finding a faculty member who shares with them an interest in the topic. Prerequisite: permission of instructor.

BOT 502 Teaching Assistant Orientation (3) A Haskins Laboratory and lecture preparation, organization, and presentation for incoming botany graduate students. Two student presentations required; to be self-, instructor, and peer evaluated.

BOT 503 Quaternary Ecology and Biogeography of the American West (4) Focuses on the last 50,000 years of ecological and biogeographic change in interior western North America; techniques of reconstructing past environments from fossil record; plant community response to glacial/interglacial climatic oscillations. Review of the paleoecological record of arid and semiarid regions of North America. Joint with QUAT 503.

BOT 520 Seminar (1, max. 18) AWSp Prerequisite: permission of instructor.

BOT 521 Topics in Plant Physiology (1-3, max. 10) AWSp Bendich, Cleland, Halperin, Van Volkenburgh Modern trends and methods in plant physiology. Prerequisite: permission of instructor.

BOT 522 Seminar in Morphology and Taxonomy (1-3, max. 10) AWSp Denton Current research and trends in morphology and taxonomy of higher plants. Prerequisite: permission of instructor.

BOT 523 Selected Topics in Mycology (1-3, max. 10) AWSp Ammirati, Whisler Selected topics from all phases of mycology. Prerequisite: permission of instructor.

BOT 524 Topics in Phycology (1-3, max. 10) AWSp Cattolico, Waaland Topics from all phases of phycology. Prerequisite: permission of instructor.

BOT 525 Topics in Plant Ecology (1-3, max. 10) AWSp Bliss, del Moral, Leopold, Tsukada Selected topics from various phases of plant ecology. Prerequisite: permission of instructor.

BOT 526 Topics in Palynology (1-3, max. 6) AWSp Leopold, Tsukada Discussion and review of literature in pollen structure, disposition in sediments, and paleoecology. Prerequisite: permission of instructor.

BOT 527 Advanced Topics in Plant Molecular Systematics and Evolution (1-3, max. 10) *Cattolico* In-depth discussion of topics which emphasize molecular level systematics and evolution. Prerequisite: permission of instructor.

BOT 528 Plant Molecular Biology (3) A *Bendich* Current research and trends in plant nucleic acids, including such topics as plastid and nuclear genomes, regulation of organelle biogenesis, the cell cycle, and evolution. (Offered alternate years; offered 1989-90.)

BOT 545 Marine Phycology (9) S *Waaland* Morphology, life histories, systematics, and ecology of marine algae, with emphasis on the local flora. Prerequisite: 220 or permission of the Director of Friday Harbor Laboratories. (Consult Friday Harbor Laboratories bulletin for the year offered.)

BOT 549 Advanced Phycology (9) S *Waaland* Varied marine algal flora of the San Juan region. Topic changes from year to year. Individual research projects. Prerequisites: 545 or equivalent and permission of the Director of Friday Harbor Laboratories. (Consult Friday Harbor Laboratories bulletin for the year offered.)

BOT 552 Vegetation of North America (5) W *Bliss* Detailed analysis of the biomes of America north of Columbia, including principles of plant geography, floristics, climate, soils, ecophysiology, paleobotany, vegetation structure, and community patterns. Prerequisite: 350. (Offered alternate years; offered 1989-90.)

BOT 554 Palynology and Quaternary Phytogeography (5) A *Tsukada* Study of former vegetation and environments by relating the fossil pollen record to ecological principles; fundamentals and applications of pollen-spore morphology and pollen analysis. Two full-day (Friday and Saturday) field trips required. Prerequisites: 113; BIOL 472, or permission of instructor. (Offered alternate years; offered 1989-90.)

BOT 565 Marine Mycology (9) *Whisler* Taxonomy and morphology of aquatic fungi with emphasis on marine forms. Prerequisites: 461 or 20 credits in biology and permission of the Director of Friday Harbor Laboratories. (Consult Friday Harbor Laboratories bulletin for the year offered.)

BOT 575 Transport Processes in Plants (3) *Van Volkenburgh* Analysis of pathways and mechanisms of water, ion, and sugar transport in higher plants, from a biophysical understanding of membrane properties, water potential, and electrophysiology to whole plant control of water status, nutrient transport, and carbon allocation. Prerequisites: BIOL 210, 211, 371, 372, or permission of instructor; recommended: 441.

BOT 577 Plant Growth and Development (3) A *Cleland* Control of growth, development, and differentiation in higher plants by hormones. Prerequisite: permission of instructor. (Offered alternate years; offered 1988-89.)

BOT 579 Environmental Control of Plant Growth and Development (3) A *Cleland* Effects of light, temperature, and water stress on the growth, development, and metabolism of higher plants. Prerequisite: 371 or permission of instructor. (Offered alternate years.)

BOT 600 Independent Study or Research (*) **AWSp**

BOT 700 Master's Thesis (*) **AWSp**

BOT 800 Doctoral Dissertation (*)

Chemistry

109 Bagley

Chemistry is a branch of natural science that deals principally with the properties of substances, the changes they undergo, and the natural laws that describe these changes.

Undergraduate Program

Special options: Within the traditional degree programs below, elective study options are available in environmental chemistry in cooperation with the Institute for Environmental Studies.

Bachelor of Science Degree

Admission: Recommended high school preparation includes four years of college preparatory mathematics, one year of physics, one year of chemistry, and three years of German.

Major Requirements: MATH 124, 125, 126 and two courses above 200 (recommended, MATH 307 and either MATH 205 or MATH 308); [alternative MATH requirement: 134, 135, 136 and one course other than 307 (205 or 308 recommended)]; one year of physics including one credit of laboratory (PHYS 121, 122, 123, 132 recommended); CHEM 145 (or 140); CHEM 155, 164 (or 150, 160, 312); CHEM 157 (or 141, 151, 161); CHEM 317 and 321; CHEM 335, 336, 337, 346, 347 (or 237, 238, 239, 241, 242 with a grade-point average of 3.00 or higher or a passing score in the standard American Chemical Society examination); CHEM 416, 455, 456, 457; 14 credits of numerically graded CHEM 400 courses (not previously listed), which must include CHEM 461 and two more courses with laboratory (currently 426, 462, 463, 464); recommended, research credits in CHEM 399 and 499. Minimum grade-point average of 2.8 in chemistry courses and a minimum grade of 1.7 or better in all required chemistry courses. For graduation 192 credits are required with a cumulative grade-point average of 2.8 or better.

Bachelor of Arts Degree

Admission Requirements: Same as for the Bachelor of Science degree.

Major Requirements: MATH 124, 125, 126 (or MATH 134, 135, 136); one year of physics, including one credit of laboratory; CHEM 140 (or 145); CHEM 150, 160, 312 (or 155, 164); CHEM 141, 151, 161 (or 157); CHEM 321; CHEM 237, 238, 239, 241, 242 (or 335, 336, 337, 346, 347) [or (223, 224, or 237, 238), 241, 317, 416]; CHEM 455; CHEM 456, 457 (or 350, 351), (or 352); 5 credits of numerically graded CHEM 400 courses (not previously listed), which must include CHEM 461; minimum grade-point average of 2.00 in chemistry courses.

Graduate Program

The Master of Science and Doctor of Philosophy programs are designed to lead to positions of leadership and independent investigation with research institutes, industrial laboratories, and government agencies, and as teachers, researchers, or administrators in colleges and universities in chemistry or in fields having substantial chemistry content.

Placement examinations to assess knowledge and understanding of undergraduate material in four areas (analytical, inorganic, organic, and physical) are given to entering students as an aid to planning course programs and assigning the students to appropriate teaching assistant assignments.

Thesis research for the Master of Science degree and dissertation research for the Doctor of Philosophy degree should constitute an original contribution to knowledge worthy of report in the scientific literature.

Master of Science Degree

Admission Requirements: Baccalaureate degree with major in chemistry; Graduate Record Examination.

Graduation Requirements: *With Thesis*—36 approved credits with 18 in courses at the 500 level or above; 18 in courses at the 400 or 500 level taken for numerical grade; 9 credits in thesis research. *Without Thesis*—Same as with thesis, except that additional course work may be substituted for the required research. Grade-point average of 3.00 required for both degrees.

Doctor of Philosophy Degree

Admission Requirements: Same as for the Master of Science degree.

Graduation Requirements: 18-27 credits of approved courses at the 400 or 500 level, with a total grade-point average of 3.00; candidacy examinations covering area of specialization; dissertation; experience as a teaching assistant or predoctoral teaching associate.

Faculty

Chairperson

Thomas Engel

Professors

Andersen, Niels H., * 1968, Ph.D., 1967, Northwestern; bioorganic and biophysical chemistry, natural products structure elucidation, biorecognition phenomena, medicinal chemistry.

Anderson, Arthur G., Jr., * 1946, (Emeritus), M.S., 1942, Ph.D., 1944, Michigan; chemistry of nonclassical aromatic compounds and novel heterocycles.

Borden, Weston T., * 1972, M.A., 1966, Ph.D., 1968, Harvard; molecular orbital theory of organic molecules and reactions, synthesis of unnatural products.

Cady, George H., 1938, (Emeritus), A.M., 1928, Kansas; Ph.D., 1930, California; inorganic chemistry.

Callis, James B., * 1975, (Bioengineering), Ph.D., 1970, Washington; instrumentation development, process analytical chemistry, noninvasive clinical chemistry.

Charlson, Robert J., * 1965, ‡(Atmospheric Sciences, Environmental Studies, Geophysics), M.S., 1959, Stanford; Ph.D., 1964, Washington; atmospheric and cloud chemistry, aerosol physics.

Christian, Gary D., * 1972, M.S., 1962, Ph.D., 1964, Maryland; electroanalysis, flow injection analysis, optrodes, process control.

Eggers, David F., Jr., * 1950, Ph.D., 1950, Minnesota; rotation analysis of gas phase molecular spectra, infrared lasers.

Eichinger, Bruce E., * 1968, Ph.D., 1967, Stanford; physical chemistry and synthesis of macromolecules.

Engel, Thomas, * 1980, (Physics), M.A., 1964, Johns Hopkins; Ph.D., 1969, Chicago; surface chemistry and catalysis.

Eplotis, Nicolaos D., * 1972, M.A., 1967, Harvard; Ph.D., 1972, Princeton; applied quantum chemistry.

Floss, Heinz G., * 1987, (Biochemistry, Medicinal Chemistry, Microbiology), Ph.D., 1961, Technical University of Munich; bioorganic and natural products chemistry.

Gammon, Richard H., * 1989, (Oceanography), ‡ Ph.D., 1970, Harvard; atmospheric and marine chemistry, biogeochemical cycles, global climate change, general environmental chemistry.

Gouterman, Martin, * 1966, M.S., 1955, Ph.D., 1958, Chicago; electronic structure, spectra, luminescence of porphyrins, use of porphyrins as sensors.

Gregory, Norman W., * 1946, (Emeritus), M.S., 1941, Washington; Ph.D., 1943, Ohio State; structure and thermodynamic properties of inorganic substances, vaporization reactions.

Canadian Studies

See *International Studies*.

Hakomori, Sen-itiroh G.* 1967, ‡(Biochemistry, Microbiology, Pathobiology), M.D., 1951, D.Med.Sci., 1956, Tohoku (Japan); membrane biochemistry and glycoproteins.

Halsey, George D.* 1951, Ph.D., 1948, Princeton; absorption and interaction of rare gases with surfaces, solid solutions of rare gases, catalysis, colloids.

Heller, Eric J.* 1984, (Physics), † Ph.D., 1973, Harvard; semiclassical methods, photodissociation dynamics and spectroscopy, molecular spectroscopy, radiationless transitions in molecules, quantum mechanics of nonlinear systems, surface scattering.

Kowalski, Bruce R.* 1973, Ph.D., 1969, Washington; analytical chemometrics and computerized instrumentation for process monitoring and control.

Kwiram, Alvin L.* 1970, Ph.D., 1963, California Institute of Technology; molecular structure and dynamics in the solid state with emphasis on excited states, magnetic resonance (ESR, NMR, ENDOR, and optical detection methods).

Lingafelter, Edward C., 1939, (Emeritus), Ph.D., 1939, California (Berkeley); crystal and molecular structure of coordination compounds.

Norman, Joe G., Jr.* 1972, Ph.D., 1972, Massachusetts Institute of Technology; synthesis and structures of transition metal complexes, theoretical calculations on large molecules.

Pocker, Yeshayau,* 1961, M.Sc., 1949, Hebrew University of Jerusalem; Ph.D., 1953, D.Sc., 1960, London (England); organic reaction mechanisms, chemical and enzymatic catalysis, metalloenzymes.

Rabinovitch, B. Seymour,* 1948, (Emeritus), Ph.D., 1942, McGill; chemical dynamics, energy relaxation, properties of silver surfaces.

Raucher, Stanley,* 1975, Ph.D., 1973, Minnesota; new methods in synthetic organic chemistry, total synthesis of natural products.

Reid, Brian R.* 1980, (Biochemistry), † M.A., 1960, Cambridge (St. Johns); Ph.D., 1965, California (Berkeley); biophysical chemistry.

Ritter, David M., 1947, (Emeritus), Ph.D., 1937, Chicago; inorganic chemistry.

Robinson, Rex J., 1929, (Emeritus), M.S., 1927, Ph.D., 1929, Wisconsin; analytical chemistry.

Rose, Norman, J.* 1966, Ph.D., 1960, Illinois; design, synthesis, and study of coordination compounds of transition metals, including the lanthanides.

Ruzicka, Jaromir,* 1987, Ph.D., 1967, Charles (Prague); flow injection analysis, instrumental analysis, trace analysis.

Schomaker, Verner, 1965, (Emeritus), M.S., 1935, Nebraska; Ph.D., 1938, California Institute of Technology; crystal structures by x-ray diffraction, molecular-sieve catalysts.

Schubert, Wolfgang M.* 1947, (Emeritus), Ph.D., 1947, Minnesota; mechanism and steric course of organic reactions; substituent and solvent effects, acid-base catalysis.

Schurr, J. Michael,* 1966, Ph.D., 1965, California (Berkeley); physical chemistry of DNA and other biopolymers, photon correlation techniques, dynamics of Brownian motions and internal deformations, polyelectrolytes, macromolecular theory, structures and dynamics of supercoiled DNAs.

Slutsky, Leon J.* 1961, Ph.D., 1957, Massachusetts Institute of Technology; lattice dynamics, kinetics of conformational change, physical absorption.

Trager, William F.* 1972, ‡(Medicinal Chemistry), Ph.D., 1965, Washington; medicinal chemistry, bioanalytical chemistry drug metabolism.

Vandenbosch, Robert,* 1963, (Physics), Ph.D., 1957, California (Berkeley); nuclear studies, particularly fission and nuclear reaction mechanisms, heavy ion reactions.

Watts, Robert O.* 1986, Ph.D., 1968, Australian National; properties of small molecular clusters by theoretical and experimental investigations.

Zoller, William H.* 1984, (Atmospheric Sciences), Ph.D., 1969, Massachusetts Institute of Technology; analytical, environmental, and nuclear chemistry.

Associate Professors

Campbell, Charles T.* 1989, Ph.D., 1979, Texas (Austin); experimental surface physical chemistry and catalysis.

Crittenden, Alden L.* 1947, (Emeritus), Ph.D., 1946, Illinois; mass spectra, solid electrode polarography.

Drobny, Gary,* 1982, Ph.D., 1981, California (Berkeley); two-dimensional and multiple quantum studies in nuclear magnetic resonance.

Hopkins, Paul B.* 1982, Ph.D., 1982, Harvard; bioorganic chemistry, organic synthesis.

Macklin, John W.* 1968, Ph.D., 1969, Cornell; spectroscopic studies of materials in condensed phase and in solution.

Mayer, James M.* 1984, Ph.D., 1982, California Institute of Technology; inorganic and organometallic chemistry: synthesis and mechanism of reactions of transition metal compounds.

Robinson, Bruce H.* 1980, Ph.D., 1975, Vanderbilt; magnetic resonance, molecular dynamics, polymer dynamics, nonlinear response theory.

Sivertz, Victorian, 1926, (Emeritus), M.S., 1924, West Virginia; Ph.D., 1926, McGill; physical chemistry.

Stenkamp, Ronald E.* 1981, ‡(Biological Structures), Ph.D., 1975, Washington; crystallography, molecular biophysics, bioinorganic chemistry.

Woodman, Darrell J.* 1965, (Environmental Studies), A.M., 1965, Ph.D., 1965, Harvard; peptide synthesis, heterocyclic compounds, chemistry of ketoketenes.

Assistant Professors

Gelb, Michael H.* 1985, (Biochemistry), Ph.D., 1982, Yale; mechanistic enzymology, bioorganic and medicinal chemistry.

Imre, Dan G.* 1984, Ph.D., 1984, Massachusetts Institute of Technology; molecular dynamics and laser spectroscopy of the transition state.

Jónsson, Hannes,* 1988, Ph.D., 1985, California (San Diego); computer simulations and scattering calculations with applications to liquid, glass, and surface properties.

Klevit, Rachel E.* 1986, ‡(Biochemistry), D.Phil., 1981, Oxford; structure/function of proteins, 2D NMR.

Kovacs, Julia A.* 1988, Ph.D., 1986, Harvard; inorganic and bioinorganic chemistry: synthesis, reactivity, and structure of transition-metal clusters and complexes.

Sasaki, Tomikazu,* 1989, Ph.D., 1985, Kyoto (Japan); design and synthesis of protein mimetics, molecular recognition of synthetic enzymes.

Synovec, Robert E.* 1986, Ph.D., 1986, Iowa State; laser-based liquid chromatography detectors, separation theory, analytical instrumentation.

Course Descriptions

Courses for Undergraduates

No more than the number of credits indicated can be counted toward graduation from the following course groups: 140, 145 (4 credits); 150, 155, 160 (8 credits); 164, 312 (7 credits); 141, 151, 157, 161 (6 credits); 102, 223, 237, 335 (7 credits); 238, 336 (4 credits); 224, 239, 337 (4 credits); 241, 346 (3 credits); 242, 347 (3 credits); 350, 351, 352, 456 (6 credits).

CHEM 100 Chemical Science (5) AWSpS One quarter introduction to chemistry for nonscience majors or students with little or no chemistry background. Atoms and molecules, their interactions with energy, and their reactions; emphasizes impact of chemistry on everyday life. Can stand alone or be followed by 102; 140, 145, or 110, 140; 203, 205.

CHEM 102 General and Organic Chemistry (5) AWSpS Organic compounds; hydrocarbons, alcohols, aldehydes, ketones, ethers, acids, aromatics, fats and oils, proteins, and carbohydrates. Students who plan to take 223 or 237 should not take 102. Prerequisite: 100 or equivalent.

CHEM 110 Introduction to General Chemistry (3) AWSpS Supplements the material in 100 with methods for solving quantitative problems. For students with limited mathematics background, who have completed 100 and plan to take 140. Prerequisites: 100 and MATH 102 or equivalent. (Formerly 105.)

CHEM 140 General Chemistry (4) AWSpS For science, engineering, and other majors planning to take a year or more of chemistry courses. Atomic nature of matter, nuclear chemistry, stoichiometry, periodic table, quantum concepts, chemical bonding, gas laws. Prerequisites: high school chemistry and/or physics, or 100 and 110, and qualification for MATH 124; recommended: concurrent registration in 141.

CHEM 141 General Chemistry Laboratory (2) AWSpS Introduction to laboratory work, including experiments to illustrate analytic techniques, stoichiometry, and synthesis. Designed to complement 140. Prerequisite: prior completion of, or concurrent registration in 140 or 145.

CHEM 145 Honors General Chemistry (4) A Parallels 140. For science, engineering and other majors with a strong mathematics and science background in high school or a good performance in 105 and aptitude for study of science. Familiarity with differential calculus encouraged. Prerequisite: concurrent enrollment in MATH 124 or 125.

CHEM 150 General Chemistry (4) AWSpS Introduction to inorganic chemistry, solids, solutions, acid-base, chemical equilibrium. Prerequisite: 140 or 145; recommended: concurrent registration in 151.

CHEM 151 General Chemistry Laboratory (2) AWSpS Experiments to illustrate the chemistry of common metals, acid-base titration, and solubility products as well as qualitative analysis. Designed to complement 150. Prerequisites: 141 and prior completion of, or concurrent registration in 150 or 155.

CHEM 155 Honors General Chemistry (4) W Solutions, equilibrium, acids and bases, introduction to thermodynamics, kinetics, electrochemistry, and the solid state. Prerequisite: 145 or 140; recommended: concurrent registration in 157.

CHEM 157 General Chemistry, Honors Laboratory (3) W Introduction to chemistry laboratory techniques and data analysis for students with strong aptitude in science or previous laboratory experience. Provides experience in spectroscopy, thermodynamics, acid-base titrations, kinetics, synthesis and laboratory applications of computers. Designed to complement 155. Can replace 141, 151, 161 sequence for degree requirements.

CHEM 160 General Chemistry (4) AWSpS Introduction to thermodynamics, electrochemistry, chemical kinetics, organic chemistry, synthetic polymers, and biopolymers. Prerequisite: 150; recommended: concurrent registration in 161.

CHEM 161 General Chemistry Laboratory (2) AWSpS Introductory experiments in electrochemistry, thermochemistry, chemical kinetics, and organic synthesis. Designed to complement 160. Prerequisite: 151; recommended: prior completion of, or concurrent registration in 160 or 164.

CHEM 164 General and Introductory Environmental Chemistry (5) Sp Introduction to systematic inorganic chemistry: representative elements, metals, and nonmetals. Additional material emphasizes environmental applications of basic chemistry. Honors credit available. Prerequisite: 155 or equivalent or permission of instructor.

CHEM 198 Tutorial Study (1, max. 3) AWSpS For chemistry majors only. Small-group discussions of aspects of chemistry of current interest to undergraduates. May not be taken concurrently with 199. Prerequisites: permission of chemistry adviser and grade-point average of 3.00 for freshmen, 2.50 for sophomores.

CHEM 199 Special Problems (1, max. 6) AWSpS Research in chemistry. For chemistry majors only. Prerequisites: permission of chemistry adviser and chemistry grade-point average above 3.00.

CHEM 205 Chemistry of Life (5) Examination of the molecular basis of life. Study of the chemistry of organic molecules and biomolecules including proteins, nucleic acids (DNA and RNA), and enzymes. Intended for nonscience majors. Prerequisite: 100 or equivalent.

CHEM 223 Organic Chemistry—Short Program (4) AWS First of a two-quarter lecture series in organic chemistry, for majors in biology and related fields who elect not to complete the full year sequence. Introduction to structure, nomenclature, reactions, and synthesis of the main functional group families of organic compound. Prerequisite: 155 or 160.

CHEM 224 Organic Chemistry—Short Program (4) WSpS Continuation of the abbreviated coverage of the main functional group classes of organic compounds. Short introduction to biomolecules (lipids, carbohydrates, amino acids, proteins, and nucleic acids). Prerequisite: 223.

CHEM 237 Organic Chemistry (4) AWS First course for students planning to take three quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of the main types of organic compounds. Prerequisite: 155 or 160. (Formerly 231.)

CHEM 238 Organic Chemistry (4) WSpS Second course for students planning to take three quarters of organic chemistry. Further discussion of physical properties and transformations of organic molecules, especially aromatic and carbonyl compounds. Prerequisite: 237. (Formerly 235.)

CHEM 239 Organic Chemistry (3) ASpS Third course for students planning to take three quarters of organic chemistry. Polyfunctional compounds and natural products, lipids, carbohydrates, amino acids, proteins, and nucleic acids. Prerequisite: 238. (Formerly 236.)

CHEM 241 Organic Chemistry Laboratory (3) WSpS Preparation of representative compounds. Prerequisites: 157 or 161; 223 or 237.

CHEM 242 Organic Chemistry Laboratory (3) ASpS Preparations and qualitative organic analysis. Prerequisites: 224 or 238; 241.

CHEM 299 Special Problems and Report Writing (1, max. 6) AWSpS For chemistry majors only. Research in chemistry and/or study in the chemical literature. Requires writing a scientific report. Prerequisites: permission of chemistry adviser and a chemistry grade-point average above 3.00.

CHEM 303 Chemistry of Trace Materials: The Environmental Impact (3) A Nonmathematical examination of role of small amounts (traces) of chemicals in our bodies and in global, regional, and local environments. Traces of certain chemicals influence events leading to acid rain, smog, nuclear waste management, wastewater treatment. Intended for nonscience majors. Prerequisite: one quarter of college-level chemistry.

CHEM 312 Inorganic Chemistry (3) A The periodic table: chemistry of representative and transition elements, including discussion of environmental, biological, and everyday aspects of inorganic chemistry. For students who have completed 140, 150, and 160 (or 145 and 155, but not 164). Prerequisites: 155 or 160.

CHEM 317 Inorganic Chemistry Laboratory (3) W Experimental exploration of the periodic table to complement 312. Techniques of preparation and characterization of inorganic compounds. Prerequisites: 164 or 312; 157 or 161; 241 or 346.

CHEM 321 Quantitative Analysis (5) AWSpS Introduction to chemical analysis, including gravimetric, volumetric, spectrophotometric, and potentiometric analyses. Laboratory computer use included. Prerequisites: 155 or 160; 157 or 161.

CHEM 335, 336, 337 Honors Organic Chemistry (4,4,4) A,W,Sp For chemistry majors and otherwise qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Studies of biomolecules. Prerequisites: 160 or 155 for 335; 335 for 336; 336 for 337.

CHEM 346 Organic Chemistry Honors Laboratory (3) W Usually to accompany 336. Prerequisite: 336, which may be taken concurrently.

CHEM 347 Organic and Qualitative Organic Honors Laboratory (3) Sp Continuation of 346. Usually to accompany 337. Prerequisites: 337, which may be taken concurrently, and 346.

CHEM 350, 351 Elementary Physical Chemistry (3,3) W,Sp Survey of some major topics in physical chemistry with emphasis on thermodynamics. Equilibrium systems, solutions, electrochemistry, phase diagrams, and kinetics. Prerequisites: 155 or 160, PHYS 116, and MATH 125 (126 recommended) or MATH 157 for 350; 350 for 351.

CHEM 352 Physical Chemistry for Biologists (4) Sp General equilibrium thermodynamics and aspects of the theory transport properties, reaction kinetics, and electrochemical phenomena of particular relevance in the biological sciences. Prerequisites: 155 or 160 and differential calculus.

CHEM 399 Undergraduate Research (*, max. 12) AWSpS For chemistry majors only. Research in chemistry. Prerequisites: permission of chemistry adviser, chemistry grade-point average above 3.00, and junior standing in chemistry.

CHEM 410 Radiochemistry Laboratory (2) Sp Introductory general service course for students planning further work in nuclear or tracer applications. Safety procedures, detection and measurement of nuclear radiations, radiochemical and tracer techniques. Prerequisites: 155 or 160; 157, 161 or other laboratory work; 418.

CHEM 414 Chemistry of the Main Group Elements (3) The elements and their compounds in relation to the periodic system. Prerequisites: senior standing; 457; or 351 and 455. (Offered alternate years.)

CHEM 415 The Chemical Bond (3) W Nature of the chemical bond. Simple bonding theories, molecular orbital methods, symmetry, and group theory. Prerequisite: 455. (Offered alternate years.)

CHEM 416 Transition Metals (3) A Survey of selected key topics in the chemistry of the transition metals, including emphasis on the structure, bonding, and reactivity of major classes of compounds. Prerequisites: 164 or 312; 455, which may be taken concurrently.

CHEM 417 Organometallic Chemistry (3) Chemistry of the metal-carbon bond for both main group and transition metals. Structure and reactivity with applications to organic synthesis and catalysis. Prerequisites: 164 or 312; 224, 238, or 336; recommended: 416. (Offered alternate years.)

CHEM 418 Nuclear Chemistry (3) W Natural radioactivity, nuclear systematics and reactions, radioactive decay processes, statistical consideration of decay laws, applications of radioactivity. Prerequisite: 350, 352, or 455.

CHEM 419 Bioinorganic Chemistry (3) Sp Kovacs, Rose Description of transition metal-containing systems found in biology. Structural and electronic properties and reactivity of metalloproteins, metalloenzymes, and metalocofactors. Methods used to probe and model metal sites by spectroscopic and synthetic techniques. Prerequisites: 164 or 312; 224, 239, 337; recommended: 416.

CHEM 426 Instrumental Analysis (4) Sp Introduction to modern instrumental methods of chemical analysis, including chromatography, optical and mass spectroscopy, electrochemistry and flow injection analysis. Basic concepts of transducers, spectrometers, mass analysis, separation sciences, and computerized data acquisition and reduction. Prerequisite: 321.

CHEM 427 Sampling Methodology and Wet Chemical Analysis (3) A Includes sampling and sample dissolution, multiple chemical equilibria, solvent extraction, nonaqueous titrations, pH measurement, kinetic and enzyme assays. Prerequisites: 223 or 237 or 335; 321.

CHEM 429 Chemical Separation Techniques (3) W Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, electrophoresis, and field flow fractionation. Prerequisites: 224, 238, or 336; 241 or 346; recommended: 321.

CHEM 435 Introductory Biophysical Chemistry (3) W Survey of the statics and dynamics of biophysical and/or biochemical processes. Prerequisites: organic and physical chemistry. (Offered alternate years.)

CHEM 436 Bioorganic Chemistry of Enzymes (3) W Introduction to enzyme chemistry and inhibition. Includes modes of biological catalysis, chemistry of coenzymes, stereochemistry of enzymatic reactions, enzyme characterization and kinetics, and design and principles of enzyme inhibitors. Prerequisite: 236 or 337; recommended: BIOC 405 or 440. (Offered alternate years.)

CHEM 455 Physical Chemistry (3) ASpS Introduction to quantum chemistry and spectroscopy. Theory of quantum mechanics presented at an elementary level and applied to the electronic structure of atoms and molecules and to molecular spectra. Prerequisites: 155 or 160, MATH 126 (238 recommended), and college physics.

CHEM 456 Physical Chemistry (3) AWS Chemical thermodynamics. Laws of thermodynamics presented with applications to phase equilibria, chemical equilibria, and solutions. Joint with CH E 456. Prerequisites: 155 or 160, MATH 126 (238 recommended), and college physics. May be taken without 455.

CHEM 457 Physical Chemistry (3) AWSp Introduction to statistical mechanics, kinetic theory, chemical kinetics, and statistical thermodynamics. Other topics of physical chemistry not in 455 or 456 may be covered. Prerequisites: 455 and 456.

CHEM 458 Introduction to Air Chemistry (4) A The atmosphere as a chemical system; analytical and physical chemistry of trace atmospheric constituents, both natural and manufactured. Joint with ATM S 458. Prerequisites: 140 or 145; 350 or 456 or ATM S 340.

CHEM 480 Spectroscopic Molecular Identification (3) ASp Basic theory of spectral techniques—Infrared and ultraviolet/visible spectroscopy, NMR, and mass spectrometry—with emphasis on spectral interpretation skills needed for the elucidation of complex organic structures or conformations. Prerequisites: 224 or 238 or 336; recommended: 455.

CHEM 481 Physical Chemistry Laboratory (2-3) AWSp Physical measurements in chemistry. Vacuum and high-temperature techniques, calorimetry, spectroscopic methods, electrical measurements. Prerequisites: 455; 351 or 352 or 457, which may be taken concurrently.

CHEM 482 Techniques of Synthetic Chemistry (2-3) A Techniques of synthetic chemistry with examples from organic, inorganic, and biological chemistry. Vacuum line synthesis, low- and high-temperature techniques, high-pressure syntheses, photochemical reactions, gas phase reactions, etc. Chromatography and separation techniques. Prerequisite: 347 or 242; 460, which may be taken concurrently.

CHEM 483 Spectroscopic Techniques for Structural Identification (2) ASp Laboratory techniques of spectroscopic analysis for structural determination using UV, IR, NMR, mass spectroscopy. Prerequisite: 460, which may be taken concurrently.

CHEM 484 Computers in Data Acquisition and Analysis (3) W Introduction to use of the computer in the chemistry laboratory. Principles of microcomputers and their use for such problems as data acquisition, noise reduction, and instrument control. Prerequisites: 455, ENGR 141, MATH 205 or equivalent.

CHEM 470 Physical Chemistry of Macromolecules (3) Solution thermodynamics, chain dimensions, rubber elasticity, solid-state morphology, and viscoelastic behavior of high polymers. Prerequisites: 457 or 351 or 352, and FPE 488 or CH E 570. (Offered alternate years.)

CHEM 471 Physical Chemistry of Macromolecules (3) Classical hydrodynamic methods, and modern optical correlation and pulse techniques for studying dynamical motions and conformations of macromolecules, especially biopolymers, in solution. Cooperative thermal transitions, optical properties, and polyelectrolyte effects. Prerequisites: 457 or 351 or 352, and 455; recommended: 470. (Offered alternate years.)

CHEM 473 Workshop in Chemistry Teaching (*, max. 15) Individual or group study projects on the improvement of instruction in chemistry for secondary level teachers. Prerequisites: 100 or 140.

CHEM 490 Topics in Applied Chemistry (*, max. 3) A Applications of pure chemistry, as practiced in industrial and academic settings. Seminar topics vary and may include pulp and paper, petroleum, medicinal, environmental, and cosmetic chemistry, and biochemistry.

CHEM 498 Teaching Experience in Chemistry (1, max. 6) AWSpS Students are trained as assistants in laboratories and quiz sections. For chemistry majors, especially those planning graduate work or secondary education. Prerequisites: permission of instructor, grade-point average above 3.00, and upper-division standing.

CHEM 499 Undergraduate Research and Report Writing (*, max. 12) AWSpS For chemistry majors only. Research in chemistry and/or study in the chemical literature. Prerequisites: permission of chemistry adviser, chemistry grade-point average above 3.00, and junior standing in chemistry.

Courses for Graduates Only

CHEM 502 Practical NMR Methods for Biological and Organic Structure Elucidation (4) W Theory or NMR (rotating frame formalism, multi-pulse experiments, relaxation phenomena, 2D experiments) as applied to structural and dynamic problems in organic and biological chemistry. Provides basis for experiment selection and spectrum interpretation. A more advanced treatment of NMR than 460. Prerequisites: 224 or 239; recommended: 460 or equivalent, 435 or 455.

CHEM 508 Advanced Inorganic Chemistry (3, max. 9) Discussion of selected applications of physical techniques to the study of inorganic molecules. Topics include group theory, magnetic resonance spectroscopy (NMR and ESR), vibrational spectroscopy (IR and Raman), electronic spectroscopy, magnetism and electrochemistry.

CHEM 510 Current Problems in Inorganic Chemistry (3, max. 12) A For doctoral candidates in inorganic chemistry. Current topics (bioinorganic, advanced organometallic, materials and solid state, advanced inorganic spectroscopy).

CHEM 520 Current Problems in Analytical Chemistry (2, max. 12) AWSp For doctoral candidates in analytical chemistry. Current topics (e.g., electrochemistry, trace analysis, methods of data treatment, analytical instrumentation theory).

CHEM 521 Analytical Electrochemistry (3) Theory and practice of modern electrochemistry with emphasis on instrumentation and applications in chemical analysis. (Offered alternate years.)

CHEM 522 Atomic and Molecular Analytical Spectroscopy (3) Quantitative analysis of atomic and molecular species, using all forms of electromagnetic radiation, electrons, and gaseous ions. (Offered alternate years.)

CHEM 525 Process Analytical Chemistry (3) Chemical sensors and systems approach to chemical analysis as integral part of monitoring and controlling chemical, biological, and medical processes. (Offered alternate years.)

CHEM 526 Chemometrics (3, max. 9) Mathematical and statistical methods for experimental design, calibration, signal resolution, and instrument control and optimization. (Offered alternate years.)

CHEM 530 Advanced Organic Chemistry (3) A Fundamental aspects of organic structures and transformations. Structure and basicity of carbanions, substitution reactions, elimination reactions, nucleophilic addition and addition/elimination reactions, condensation reactions, structure and rearrangements of carbocations, electrophilic addition, electrophilic substitutions, neighboring group effects. Prerequisite: 337.

CHEM 531 Advanced Organic Chemistry (3) W Structure, mechanism, acidity and basicity, stereochemistry, kinetics and equilibria, reactive intermediates, and catalysis. Prerequisite: 530.

CHEM 532 Advanced Organic Chemistry (3) Sp Synthetic organic chemistry. Discussion of practical methods for the synthesis of complex organic molecules with an emphasis on synthetic strategy and the control of stereochemistry. Prerequisite: 531.

CHEM 533 Advanced Organic Chemistry (3) Sp Molecular orbital theory in organic chemistry. Woodward-Hoffmann rules, aromaticity, concerted reactions, photochemical transformations, and reactions of electron-deficient species. Prerequisite: 530.

CHEM 540 Current Problems in Organic Chemistry (3, max. 18) AWSp For doctoral candidates in organic chemistry. Discussions of topics of current interest and importance. See the department for instructor and topic during any particular quarter.

CHEM 541 Mass Spectrometry in Life Sciences (3) Principles of modern mass spectrometry: applications to problems in chemical, biological, and health sciences. Applications of mass spectrometric techniques to the structural determination and quantitative measurement of biologically important substances. Joint with MEDCH 541. Prerequisite: permission of instructor. (Offered alternate years.)

CHEM 550 Introduction to Quantum Chemistry (3) A Origins and basic postulates of quantum mechanics; solutions to single-particle problems; angular momentum and hydrogenic wave functions; matrix methods; perturbation theory; variational methods. Prerequisite: 455.

CHEM 551 Introduction to Quantum Chemistry (3) Sp Electronic structure of many-electron atoms and molecules; vibration and rotation levels of molecules; effects of particle exchange; angular momentum and group theory; spectroscopic selection rules. Prerequisite: 550.

CHEM 552, 553 Statistical Mechanics (3,3) A,W General theorems of statistical mechanics; relation of the equilibrium theory to classical thermodynamics; quantum statistics; theory of imperfect gases; lattice statistics and simple cooperative phenomena; lattice dynamics and theory of solids; liquids, solutions, and polymers; time-dependent phenomena and mechanisms of interaction. Prerequisites: 455 and 456 (concurrent registration permitted) or equivalent for 552; 552 for 553.

CHEM 560 Current Problems in Physical Chemistry (3, max. 9) ASp For doctoral candidates in physical chemistry. A discussion of topics selected from active research fields. See the department for instructor and the topic during any particular quarter.

CHEM 561 Macromolecules (3, max. 9) Physical chemistry of macromolecules and biopolymers. Topics include solution thermodynamics, hydrodynamic properties, molecular weight distributions, optical and electro-optic techniques, chain configuration statistics, cooperative phenomena, theory of rubber elasticity, polyelectrolytes. (Offered alternate years.)

CHEM 562 Surface and Membrane Chemistry (3, max. 9) Advanced treatment of multiphase equilibrium; chemisorption and contact catalysis; micelles, theory of membrane formation, potentials, and action; physical adsorption and surface-area measurement. Prerequisites: 456 or other courses in basic thermodynamics and MATH 307; recommended: 552.

CHEM 563 Magnetic Resonance Methods in Chemistry (3, max. 9) Magnetic resonance phenomena in molecular systems. Topics include the chemical shift and spin-spin splitting in proton and ¹³C NMR, quadrupole interactions in NQR, hyperfine interaction and zero field splittings in ESR. Applications of magnetic resonance to the study of molecular structures and dynamics, including electronic properties of excited states as revealed by optical detection of magnetic resonance.

CHEM 581 Topics in Inorganic Chemistry (3, max. 18) AWSp Open only to students accepted for doctoral work in chemistry.

CHEM 582 Topics in Analytical Chemistry (3, max. 18) AWSp Open only to students accepted for doctoral work in chemistry.

CHEM 583 Topics in Organic Chemistry (3, max. 18) AWSp Open only to students accepted for doctoral work in chemistry.

CHEM 585 Topics in Physical Chemistry (3, max. 18) AWSp Open only to students accepted for doctoral work in chemistry.

CHEM 590 Seminar in General Chemistry (1, max. 18) AWSpS For chemistry graduate students only.

CHEM 591 Seminar in Inorganic Chemistry (1, max. 18) AWSpS For chemistry graduate students only.

CHEM 592 Seminar in Analytical Chemistry (1, max. 18) AWSpS For chemistry graduate students only.

CHEM 593 Seminar in Organic Chemistry (1, max. 18) AWSpS For chemistry graduate students only.

CHEM 595 Seminar in Physical Chemistry (1, max. 18) AWSpS For chemistry graduate students only.

CHEM 600 Independent Study or Research (*) AWSpS Prerequisite: permission of coordinator.

CHEM 700 Master's Thesis (*) AWSpS Prerequisite: permission of coordinator.

CHEM 800 Doctoral Dissertation (*) AWSpS Prerequisite: permission of coordinator.

Classics

218 Denny

Classics embraces the ancient Greek and Roman civilizations from prehistoric times to the Middle Ages. The department is concerned with both the Greek and Latin languages and their literatures, including poetry, drama, history, philosophy, rhetoric, and political theory, as well as with classical art and archaeology.

Classics in Rome Program: During Spring Quarter, the department offers instruction in classics for advanced undergraduate majors and graduate students at the University's Center for Italian Studies in Rome, located in the Palazzo Pio on the Campo De' Fiori.

Undergraduate Program

Bachelor of Arts Degree

Major Requirements: Classical Studies: Greek or Latin through 307 or the equivalent; 36 additional credits chosen with department approval from courses in Greek and Latin at the 300 or 400 level (excluding LAT 300, 301, or GRK 300, 301), classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. Classical studies is especially suited to students not preparing for graduate study in classics but wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations.

Classics: 18 approved credits in Greek at the 400 level and 18 approved credits in Latin at the 400 level.

Greek: 27 approved credits in Greek at the 400 level plus 9 credits chosen with department approval from courses in Latin, Greek at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.

Latin: 27 approved credits in Latin at the 400 level plus 9 credits chosen with department approval from courses in Greek, Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.

CLAS 101, 205, and HST 111 may not be offered in fulfillment of major requirements for baccalaureate degrees in the Department of Classics.

Graduate Program

Michael R. Halleran, Graduate Program Coordinator

The Department of Classics offers programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The M.A. degree may be in Greek, Latin, or Classics (a combination of Greek and Latin). The Ph.D. degree requires both Greek and Latin.

The program of formal instruction has been designed to ensure comprehensive and thorough training in the basic disciplines needed for teaching and research. The department offers courses in the major writers and periods of literature, philosophy, and history, in classical art and archaeology, and in Greek and Latin linguistics. The courses in Greek and Latin literature include most works on the Ph.D. degree reading list. Seminars introduce research techniques through the study of more specialized topics, which vary from quarter to quarter. Students may include in their programs courses and seminars given by other departments in such subjects as ancient philosophy, ancient and medieval history, comparative literature, and linguistics. A brochure, *The Graduate Program in Classics*, available from the department, gives additional information.

The Suzzallo Library has an extensive classics collection. The department's seminar room in Denny Hall, which is available to graduate students for their study and research, contains an excellent noncirculating library with such reference works as Pauly-Wissowa, *L'Année Philologique*, the *Thesaurus Linguae Latinae*, the *Müller Handbuch* series, the Teubner and Oxford texts, commentaries on the classical authors, standard collections of inscriptions and fragments, and a number of important serials. The department also possesses an Ibycus scholarly computer and a license for the *Thesaurus Linguae Graecae* data base.

Applicants for admission to the M.A. program should present an undergraduate major or its equivalent in Greek, Latin, or Classics. Prospective aspirants for the Ph.D. degree should have had two years of upper-division study in both languages, but may be admitted with less preparation in one language if their preparation in the other language is exceptionally strong. Admission to the Ph.D. program may be granted after completion of the requirements for the M.A. degree.

M.A. degree requirements are a minimum of 27 credits in courses or seminars in Greek or Latin or both, and in related subjects approved by the department; a reading knowledge of French or German; either an acceptable thesis or 9 additional credits in approved graduate courses and seminars and a research paper.

Doctor of Philosophy degree requirements are a minimum of 72 credits in courses or seminars in Greek, Latin, and related subjects approved by the department; a reading knowledge of French and German; Greek and Latin prose composition; translation examinations on the Greek and Latin reading list; examinations in two special authors and one field of classical studies; an oral General Examination; dissertation and Final Examination. Graduate students must have teaching experience before completing requirements for their terminal degree.

A number of teaching assistantships are available. Assistants teach sections of an elementary course in Latin and Greek derivatives, hold discussion sections in classical literature in translation, or assist faculty members with other courses. The teaching load is four to five hours a week throughout the academic year.

Faculty

Chairperson

Daniel P. Harmon

Professors

Bilquez, Lawrence J.,* 1970, (Art),† M.A., 1965, Ph.D., 1968, Stanford; Greek oratory, Greek historiography and historians, Greek and Roman medicine.

Grummel, William C.,* 1950, (Emeritus), M.A., 1940, Washington (St. Louis); Ph.D., 1949, New York; Latin literature and philosophy, Roman historians.

Harmon, Daniel P.,* 1967, (Comparative Literature),† M.A., 1965, Ph.D., 1968, Northwestern; Latin poetry, Greek and Roman religion, classical linguistics, Roman topography.

MacKay, Pierre A.,* 1966, (Computer Science), (Near Eastern Languages and Civilization, Comparative Literature),† M.A., 1959, Ph.D., 1964, California (Berkeley); Greek literature, postclassical and Byzantine Greek literature, numismatics, computer typesetting and document preparation.

McDiarmid, John B.,* 1949, (Emeritus), Ph.D., 1940, Johns Hopkins; Greek literature and philosophy.

Pascal, Paul,* 1953, (Art), Ph.D., 1953, North Carolina; Latin literature, Roman archaeology, medieval Latin.

Associate Professors

Clauss, James J.,* 1984, M.A., 1976, Fordham; Ph.D., 1983, California (Berkeley); Latin poetry, Hellenistic literature, Roman topography.

Halleran, Michael R.,* 1983, A.M., 1978, Ph.D., 1981, Harvard; Greek tragedy, Greek epic, late republican and Augustan poetry.

Langdon, Merle K.,* 1976, (Art),† Ph.D., 1972, Pennsylvania; Greek archaeology, epigraphy, topography, history.

Assistant Professors

Colwell, Sheila M., 1990, B.A., 1979, Princeton; archaic poetry, postclassical tradition, Greek and Roman drama, comparative literature.

Connors, Catherine, 1990, M.A., 1986, Ph.D., 1989, Michigan; ancient novel, epic, Aeschylus.

Gowing, Alain M., 1988, M.A., 1981, Ph.D., 1988, Bryn Mawr; Latin and Greek historiography, Latin literature of the empire.

Whitlock Blundell, Mary,* 1985, M.A., 1981, Oxford (England); Ph.D., 1984, California (Berkeley); Greek and Roman philosophy and literature.

Course Descriptions

Courses for Undergraduates

Classics Courses in English

Upper-division classics courses in English (300 and 400 level) in the Department of Classics do not generally have prerequisites. Most 400-level courses deal with a single genre of literature or with a limited area of classical studies. The 300-level courses deal with broader subjects at a relatively advanced level. Both are primarily for juniors and seniors, but they are open to freshmen and sophomores with an interest or background in the subject of the course.

CLAS 101 Latin and Greek in Current Use (2) AWSpS Designed to improve and increase English vocabulary through a study of the Latin and Greek elements in English, with emphasis on words in current literary and scientific use. No auditors. Knowledge of Latin or Greek is not required.

CLAS 205 Bioscientific Vocabulary Building From Latin and Greek (3) AWSpS Designed to help the student master the scientific vocabulary of his or her particular field by a study of the Latin and Greek roots that are used to create the majority of scientific terms. No auditors. Knowledge of Latin or Greek is not required.

CLAS 210 Greek and Roman Classics in English (5) AWSp *Bilquez, Clauss, Gowing, Halleran, Harmon, Langdon, MacKay, Pascal, Whitlock Blundell* Introduction to classical literature through a study of the major Greek and Latin authors in modern translation.

CLAS 320 Greek and Roman Private and Public Life (5) A *Bilquez* Study of the civic and social practices and institutions of everyday Greek and Roman

private and public life, including the family, social classes, the courts and legal systems, military service and war, technology and the trades, money and banking, agriculture and rural life. Many lectures illustrated by slides.

CLAS 322 Intellectual History of Classical Greece (5) Sp *Whitlock Blundell* Development of Greek thought from mythic and poetic formulations to description, analysis, and systematic abstraction; based on the study of a variety of poetic, historical, and philosophical texts, from Homer to the Hellenistic age.

CLAS 324 Greek and Roman Athletics (3) Langdon Greek and Roman athletic festivals and events, and the place of athletes and sport in ancient society.

CLAS 410 The Classical Tradition (5) Harmon Study of the development of classical studies as a scholarly discipline and its interrelationship with the ethos of the various ages in which significant developments occurred.

CLAS 420 Roman Politics: The Rise and Fall of Political Freedom (3) Gowing The political theory of the Romans, the realities of republican power politics, and the tensions and conflicts that brought about the loss of political freedom. Special attention is given to contrasts and comparisons with our own political institutions as they were conceived by the framers of the Constitution and as they function today.

CLAS 424 The Epic Tradition (5) A Clauss, Halleran, MacKay Ancient and medieval epic and heroic poetry of Europe in English: the *Illad*, *Odyssey*, and *Aeneid*; the *Roland* or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies according to instructor's preference. Joint with C LIT 424.

CLAS 427 Greek and Roman Tragedy in English (5) W Halleran Study of the development of Greek and Roman tragedy, with extensive readings in representative plays of Aeschylus, Sophocles, Euripides, and Seneca.

CLAS 428 Greek and Roman Comedy in English (3) A or Sp Pascal Readings from the comedies of Aristophanes, Plautus, and Terence.

CLAS 430 Greek and Roman Mythology (3) AWSp Clauss, Gowing, Halleran, Pascal Principal myths found in classical and later literature.

CLAS 435 The Ancient Novel (3) W Pascal Study of the origins and growth of fiction and the novel in the Latin tradition.

CLAS 445 Greek and Roman Religion (3) A Harmon, Langdon Religion in the social life of the Greeks and Romans, with emphasis placed on their public rituals and festivals. Attention is given to the priesthods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Many lectures illustrated by slides. Joint with RELIG 445. Prerequisite: one course in ancient history, or classics, or religious studies; RELIG 201 preferred.

Classical Archaeology

CL AR 340 Pre-Classical Art and Archaeology (3) A Langdon Survey of the art and the other material remains of the civilizations in the Aegean from the Neolithic Age to the end of the Bronze Age, with special emphasis on Minoan Crete and the Mycenaean kingdoms of mainland Greece, illustrated by slides. The history, techniques, and results of significant excavations are examined. Joint with ART H 340.

CL AR 341 Greek Art and Archaeology (3) W Bliquez, Langdon Survey of the material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the geometric to the Hellenistic periods, illustrated by slides. Principal sites

and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Joint with ART H 341.

CL AR 342 Roman Art and Archaeology (3) Sp Pascal Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Joint with ART H 342.

CL AR 343 Hellenistic Art and Archaeology (3) Sp Langdon Survey of the art of Greece and the eastern Mediterranean from the time of Alexander the Great to the Roman conquest. Principal sites with their sculpture, painting, mosaics, and minor arts examined in lectures illustrated with slides. Joint with ART H 343.

CL AR 442 Greek and Roman Painting (3) A Langdon Study of painted decoration on Greek vases, and Roman wall painting, with emphasis on the historical and stylistic development of each. Joint with ART H 442. (Offered alternate years; offered 1990-91.)

CL AR 444 Greek and Roman Sculpture (3) W Langdon History and development of Greek sculpture and sculptors, their Roman copyists, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century B.C. Joint with ART H 444. (Offered alternate years; offered 1990-91.)

CL AR 446 Greek Architecture (3) Sp Langdon Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Joint with ARCH 454 and ART H 446. (Offered alternate years; offered 1990-91.)

Greek

GRK 101, 102, 103 Elementary Greek (5,5,5) A,W,Sp 101, 102: an intensive study of grammar, with reading and writing of simple Attic prose; 103: reading of selections from classical Greek literature. Prerequisites: 101 for 102, 102 for 103.

GRK 300, 301 Greek Language, Accelerated (5,5) W,Sp Intensive introduction to Attic Greek. Not accepted as upper-division credit toward a major in Greek or classics. Prerequisites: some previous experience in, or study of, a foreign language for 300; 300 for 301.

GRK 305, 306 Attic Prose (5,5) A,W Translation of selections from Attic prose; elementary exercises in Attic prose composition. Prerequisites: 103, 301, or equivalents.

GRK 307 Homer (5) Sp Translation of selections from the *Illad* or the *Odyssey*; Attic prose composition, metrics. Prerequisite: 306 or equivalent.

GRK 308 Introduction to Koine Greek Texts (3) Sp Williams Reading and discussion of selected religious and philosophical texts from Koine Greek. Prerequisite: 306.

Prerequisite for the following 400-level Greek courses: four years of high school Greek or 307 or permission of undergraduate adviser.

GRK 413 The Pre-Socratic Philosophers (3) A Whitlock Blundell See above. (Offered alternate years; offered 1990-91.)

GRK 414 Plato (3) W MacKay, Whitlock Blundell See above. (Offered alternate years; offered 1990-91.)

GRK 415 Aristotle (3) Sp MacKay, Whitlock Blundell See above. (Offered alternate years; offered 1990-91.)

GRK 422 Herodotus and the Persian Wars (3) A Bliquez, Langdon See above. (Offered alternate years; offered 1991-92.)

GRK 424 Thucydides and the Peloponnesian War (3) W Bliquez, Langdon See above. (Offered alternate years; offered 1991-92.)

GRK 426 Attic Orators (3) Sp Bliquez, Langdon, MacKay See above. (Offered alternate years; offered 1991-92.)

GRK 442, 443, 444 Greek Drama (3,3,3) A,W,Sp Halleran See above. (Offered alternate years; offered 1991-92.)

GRK 449 Greek Epic (3) A Halleran, MacKay See above. (Offered alternate years; offered 1990-91.)

GRK 451 Lyric Poetry (3) W Halleran, Whitlock Blundell See above. (Offered alternate years; offered 1990-91.)

GRK 453 Pindar: The Epinician Odes (3) Sp Halleran See above. (Offered alternate years; offered 1990-91.)

GRK 461 Early Greek Literature (3-5, max. 15) S Readings and discussion of selected authors of the early Greek period.

GRK 462 Literature of Classical Athens (3-5, max. 15) S Readings and discussion of selected authors of classical Athens.

GRK 463 Hellenistic Greek Literature (3-5, max. 15) S Clauss Readings and discussion of selected authors of the Hellenistic Age.

GRK 490 Supervised Study (*, max. 18) AWSp Special work in literary and philosophical texts for graduates and undergraduates. Prerequisite: permission of undergraduate adviser.

Latin

LAT 101, 102, 103 Elementary Latin (5,5,5) A,W,Sp 101, 102: an intensive study of grammar, with reading and writing of simple Latin prose; 103: reading of selections from classical Latin literature. Prerequisites: 101 for 102, 102 for 103.

LAT 300, 301 Latin Language, Accelerated (5,5) W,Sp Intensive introduction to classical Latin. Not accepted as upper-division credit toward a major in Latin or classics. Prerequisites: some previous experience in, or study of, a foreign language for 300; 300 for 301.

LAT 305 Introduction to Latin Literature (5) A Readings in prose and poetry from various Latin authors; elementary exercises in Latin prose composition. Prerequisite: 103 or 301 or equivalent.

LAT 306 Cicero and Ovid (5) Readings from the orations of Cicero and the poetry of Ovid; elementary exercises in Latin prose composition. Prerequisite: 305 or equivalent.

LAT 307 Vergil (5) Sp Selections from the first six books of the *Aeneid*; elementary exercises in Latin prose composition or metrics. Prerequisite: 306 or equivalent.

LAT 401 Medieval Latin Prose (3) Sp Pascal Readings and discussion of medieval Latin prose. Prerequisite: permission of instructor. (Offered alternate years; offered 1990-91.)

LAT 402 Medieval Latin Poetry (3) Sp Pascal Readings and discussion of medieval Latin poetry. Prerequisite: permission of instructor. (Offered alternate years; offered 1991-92.)

Prerequisite for the following 400-level Latin courses: four years of high school Latin, or 307, or permission of undergraduate adviser.

LAT 412 Lucretius (3) A Whitlock Blundell See above. (Offered alternate years; offered 1991-92.)

LAT 414 Seneca (3) Sp Whitlock Blundell See above. (Offered alternate years; offered 1991-92.)

LAT 422 Livy (3) A Clauss, Gowing See above. (Offered alternate years; offered 1990-91.)

LAT 423 Cicero and Sallust (3) W *Clauss, Gowing* See above. (Offered alternate years; offered 1990-91.)

LAT 424 Tacitus (3) Sp *Clauss, Gowing* See above. (Offered alternate years; offered 1990-91.)

LAT 447 Roman Lyric (3) A *Clauss, Harmon* See above. (Offered alternate years; offered 1991-92.)

LAT 449 Roman Elegy (3) W *Harmon* See above. (Offered alternate years; offered 1991-92.)

LAT 451 Roman Satire (3) Sp *Pascal* See above. (Offered alternate years; offered 1991-92.)

LAT 457 Roman Drama (3) A *Pascal, Whitlock Blundell* See above. (Offered alternate years; offered 1990-91.)

LAT 458 Roman Epic (3) W *Clauss, Harmon* See above. (Offered alternate years; offered 1990-91.)

LAT 461 Latin Literature of the Republic (3-5, max. 15) S Readings and discussion of selected authors from the era of the Roman Republic.

LAT 462 Latin Literature of the Augustan Age (3-5, max. 15) S Readings and discussion of selected authors from the Augustan era.

LAT 463 Latin Literature of the Empire (3-5, max. 15) S Readings and discussion of selected authors from the Roman Empire.

LAT 465 Roman Topography and Monuments (5, max. 10) Sp *Clauss, Harmon* Study of the material remains of ancient Rome from the archaic period through the imperial age. Reading of source materials and inscriptions in Latin. Conducted in Rome.

LAT 475 Improvement of Teaching: Latin (3) S *Clauss, Gowing* Examination and evaluation of the various methods of teaching Latin; audiovisual aids; testing materials; textbooks; relation of Latin to other languages; Latin derivatives in English vocabulary. Joint with EDC&I 438. (Offered Summer Quarter only.)

LAT 476 Caesar and Vergil for High School Teachers (3) S *Clauss, Gowing* Interpretation of the works of Caesar and Vergil, with special reference to the problems of high school teaching. Joint with EDC&I 439.

LAT 490 Supervised Study (*, max. 18) AWSp Special work in literary and philosophical texts for graduates and undergraduates. Prerequisite: permission of undergraduate adviser.

CLAS 800 Doctoral Dissertation (*)

Greek

GRK 500 Grammar and Composition (3) *MacKay, Whitlock Blundell* Translation of passages from English to Greek for the purpose of acquiring advanced knowledge of the grammar and the style of the classical tongue.

GRK 501 Homer (3) *Halleran* Readings from the *Iliad* or the *Odyssey*.

GRK 503 Aristophanes (3) *Bliquez* Select comedies.

GRK 504 Plato (3) *Whitlock Blundell* *The Republic* or other dialogues.

GRK 506 Aristotle (3) *Whitlock Blundell* *Politics* and/or *Ethics*.

GRK 508 Lysias and Demosthenes (3) *Bliquez, MacKay* Select speeches, oratorical theory, historical questions.

GRK 510 Greek Historians (3, max. 6) *Bliquez, MacKay* Selections from Herodotus, Thucydides, or Xenophon. May be repeated for credit with change in subject matter.

GRK 512 Greek Tragedy (3, max. 6) *Halleran, Whitlock Blundell* Aeschylus, Sophocles, and/or Euripides. May be repeated for credit with change in subject matter.

GRK 520 Seminar (3, max. 27) AWSp *Bliquez, Clauss, Halleran, Harmon, MacKay, Whitlock Blundell*

GRK 590 Supervised Study (*, max. 18) AWSp Prerequisite: permission of graduate program coordinator.

GRK 600 Independent Study or Research (*) AWSp

Latin

LAT 500 Grammar and Composition (3) *Clauss, Gowing* Translation of passages from English to Latin for the purpose of acquiring advanced knowledge of the grammar and style of the classical tongue.

LAT 501 Vergil (3) *Clauss, Harmon* *The Aeneid*.

LAT 502 Horace (3) *Clauss, Harmon* *Odes* and/or *Epistles*.

LAT 503 Plautus and Terence: Early Republican Literature (3) *Whitlock Blundell*

LAT 504 Philosophy at Rome (3) *Whitlock Blundell* Selected philosophical works of Cicero and other sources for Hellenistic and Roman philosophy.

LAT 506 Cicero (3) *Gowing* Select speeches, with attention to rhetorical theory and/or letters.

LAT 508 Silver Latin Literature (3) *Pascal* Selections from Martial, Lucan, and Petronius.

LAT 510 Roman Historians (3, max. 6) *Clauss, Gowing* Caesar, Livy, and/or Tacitus. May be repeated for credit with change in subject matter.

LAT 512 Augustan Poetry (3, max. 6) *Clauss, Harmon* Vergil's *Eclogues* and *Georgics*, Roman elegiac poetry, and/or Ovid's *Metamorphoses* and *Amores*. May be repeated for credit with change in subject matter.

LAT 520 Seminar (3, max. 27) AWSp *Clauss, Gowing, Halleran, Harmon, Pascal, Whitlock Blundell*

LAT 565 Seminar in Rome (5, max. 10) Sp *Clauss, Harmon* Study of selected topics and authors in Latin literature. Conducted in Rome.

LAT 590 Supervised Study (*, max. 18) AWSp Prerequisite: permission of graduate program coordinator.

LAT 600 Independent Study or Research (*) AWSp

Classical Archaeology

CL AR 513 Athenian Topography (3) *Langdon* Detailed consideration of the topography and monuments of ancient Athens from the beginning through the Roman period.

CL AR 515 Greek Epigraphy (3) *Langdon* Selected inscriptions from various Greek states and sanctuaries and evidence they provide for religious and social practices, literature, and political history. Classification and editing of inscriptions, and epigraphical techniques.

CL AR 541 Seminar in Greek and Roman Art (3) *Langdon* In-depth study of selected topics and problems of the art of ancient Greece and Rome. Joint with ART H 541.

Classical Linguistics

CL LI 501 Comparative Phonology of Greek and Latin (3) *Harmon* Phonological developments of Greek and Latin from Indo-European to the classical periods of both languages.

CL LI 503 History of the Greek Language (3) Morphological and syntactical development of the Greek language from Homer through the New Testament; the development of prose and poetic style.

CL LI 505 History of the Latin Language (3) *Harmon* Morphological and syntactical development of the Latin language; the development of Latin as a literary language.

CL LI 506 Italic Dialects (3) *Harmon* Principal remains of the non-Latin languages and dialects of ancient Italy.

CL LI 508 Greek Dialects (3) Non-Attic dialects of ancient Greek, based on a study of inscriptions and the literary remains.

Communications

127 Communications

Undergraduate Program

Adviser

118 Communications

The School of Communications offers undergraduate professional preparation in advertising, broadcast journalism, communications, and editorial journalism. Undergraduate majors are given training in communication skills and opportunities for practical experience in their fields. The undergraduate program requires additional course work in social sciences and literature.

Admission Requirements: 65 graded college-level credits but not more than 120 college-level credits; two courses from CMU 201, 202, 203 (or equivalents); no more than 20 credits in School of Communications courses; at least 15 graded credits earned at the University prior to application; two courses from the College of Arts and Sciences English composition proficiency list; at least 20 credits in courses selected from the three distribution groups—humanities, natural sciences, and social sciences—with at least one course from each group; a grade-point average in the past three quarters (or 45 credits), either at the University or at any other collegiate institution, at least .20 of a point above the preceding Spring Quarter all-University grade-point average. Satisfaction of these minimum requirements ensures consideration; it does not guarantee acceptance. Applications, which must include reasons for seeking admission to a specific sequence, are available in 118 Communications the first day of Autumn, Winter, and Spring Quarters.

Major Requirements: 10 credits from courses in literature; 35 credits in related social sciences (courses to be selected from anthropology, economics, geography, history, philosophy, political science, psychology, and sociology), including at least 20 credits in one department and 20 credits in courses at the 300 and 400 levels; core requirements of at least 50 credits within the school, to include the following: two courses from CMU 201, 202, 203; 315, 320; and three additional communications courses at the 400 level, one in each of these areas—theoretical, methodological, substantive (see adviser for specific listing for each category), with the exclusion of CMU 415, 449, 498; and one of the following sequences of study: Advertising—CMU 341, 344, 345; Broadcast Journalism—CMU 350, 354, 356, 358; Editorial Journalism—CMU 322, 328; Communications—This sequence provides four options: communication research, consumer behavior, interna-

tional communication, public communication. Each option is organized into a sequence to allow a student to explore communication research and its application in a range of settings.

To continue as a major in the school, a student must maintain an acceptable grade-point average for all courses in the school and an average no more than .30 of a point below the all-University average for all course work outside the school.

Internship Programs: Internship credit does not fulfill any specific course requirements, nor does it apply to the 50 communications credits that must be earned for graduation. The internship is designed to augment, not replace, the formal course offerings.

Graduate Program

Richard B. Kielbowicz, Graduate Program Coordinator

The School of Communications offers programs leading to the degrees of Master of Arts, Master of Communications, and Doctor of Philosophy.

The Master of Communications degree program offers the practicing professional journalist an opportunity to develop a substantive reporting specialty in conjunction with the academic study of communication.

The Master of Arts degree program provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. A thesis is required.

The Doctor of Philosophy degree program is designed to develop conceptual and methodological capabilities in a substantive area of communication. (Substantive scholarly interests represented in the school may be found in the faculty listing below.) Doctoral students are expected to apply these capabilities as apprentice scholars in the teaching and research functions of the school.

A foreign language, if appropriate to the student's program of study, may be required in the M.A. and Ph.D. programs.

Special Requirements

Students are admitted to programs in the Autumn Quarter. February 15 is the deadline for all applicants who wish to be considered for financial support. The deadline for initiating applications for Autumn Quarter admission is April 1.

An applicant for a program must submit: transcripts of all previous study; results of required tests (the Graduate Record Examination for all programs, plus the Miller Analogies Test for the M.A. and Ph.D. programs); a letter of intent linking the applicant's vocational objectives to an available graduate program; three letters of recommendation and, where applicable, evidence of fluency in English.

Financial Aid

Applications for teaching and research assistantships should be submitted to the department by February 15. Notices of financial aid are sent in most cases on or about April 1.

Research Facilities

The International Communications Center facilitates research abroad, issues publications, and organizes international conferences.

The editorial laboratory offers word-processing, text-editing, and computing capabilities to facilitate research and computer-assisted instruction. A remote station links the school to the University's three main-frame computers for statistical analysis, data-base management, and document preparation. The school has its own closed-circuit television laboratory. Access also is available to the University's radio (KCMU-FM and KUOW-FM) and television (KCTS-TV) stations.

Edward P. Bassett

Professors

Bassett, Edward P., 1989, M.A., 1955, Michigan; Ph.D., 1967, Iowa; history, law, international communications, media management.

Carter, Richard F.,* 1967, M.S., 1954, Ph.D., 1957, Wisconsin; conceptual analysis, communication theory, new methods for communication research, scientific perspectives on behavioral analysis.

Edelstein, Alex S.,* 1955, (Emeritus), M.A., 1948, Stanford; Ph.D., 1958, Minnesota; comparative communication research, public opinion, propaganda, international communication.

Giffard, C. Anthony,* 1978, M.A., 1964, Ph.D., 1968, Washington; international communication systems, media systems in South Africa, antecedents of the periodical press.

Lang, Gladys Engel,* 1984, (Emeritus), (Political Science, Sociology),† M.A., 1942, Washington; Ph.D., 1954, Chicago; public opinion, politics and the press, mass communication research.

Lang, Kurt,* 1984, M.A., 1952, Ph.D., 1953, Chicago; mass media and politics, international conflict, social movements.

Pember, Don R.,* 1969, M.A., 1966, Michigan State; Ph.D., 1969, Wisconsin; contemporary law and mass communication, First Amendment history, regulation of mass communication, press-government relations, contemporary media performance.

Shadel, Willard F., 1963, (Emeritus), M.A., 1935, Michigan; broadcasting.

Smith, Henry Ladd, 1955, (Emeritus), M.A., 1936, Ph.D., 1946, Wisconsin; history/editorial journalism.

Stamm, Keith R.,* 1973, M.S., 1965, Ph.D., 1968, Wisconsin; communities and newspapers, new media technology, dynamic models of communication behavior.

Yerxa, Fendall W.,* 1965, (Emeritus), A.B., 1936, Hamilton; journalism.

Associate Professors

Baldasty, Gerald J.,* 1978, M.A., 1974, Wisconsin (Madison); Ph.D., 1978, Washington; communications history and law, government-press relations, First Amendment philosophy and theory.

Bowen, Lawrence,* 1973, M.A., 1971, Ph.D., 1974, Wisconsin; advertising, media research, consumer information-seeking and -processing behaviors.

Bowes, John E.,* 1974, M.S., 1965, Syracuse; Ph.D., 1971, Michigan State; man-machine communication, public opinion, international communication.

Cranston, Pat,* 1954, (Emeritus), (Environmental Studies), M.A., 1954, Texas (Austin); broadcast journalism; history, writing, and production of docudramas.

Jackson, Kenneth M.,* 1974, M.A., 1968, Ph.D., 1970, Washington; institutional communications, media research, mass media and public policy.

Johnston, William F., 1969, (Emeritus), B.A., 1941, Idaho; editorial journalism.

Kielbowicz, Richard B.,* 1984, M.A., 1978, Ph.D., 1984, Minnesota; communications history/law, impact of technology on press and society.

Labunski, Richard,* 1984, M.A., 1977, Ph.D., 1979, California (Santa Barbara); communications law, broadcast journalism.

Roller, J. Reid, 1970, (Emeritus), M.B.A., 1940, Ohio; advertising.

Samuelson, Merrill,* 1962, (Emeritus), M.S., 1955, Oregon; Ph.D., 1960, Stanford; research methods, processes of reading, patterns in reader selection of news stories.

Simpson, Roger A.,* 1971, M.S., 1961, Wisconsin; Ph.D., 1973, Washington; communication history, law of communication, media economics, editorial journalism.

Assistant Professors

Larson, James F.,* 1984, A.M., 1976, Ph.D., 1978, Stanford; advertising, international communication.

Taylor, Gabriela A., 1986, M.A., 1976, Leicester (England); Ph.D., 1985, Brandeis; mass media, popular culture.

Underwood, Douglas M., M.A., 1974, Ohio State; editorial journalism.

Lecturer

Hucka, Judith M., 1990, B.A., 1975, Oregon; editorial journalism.

Course Descriptions

Courses for Undergraduates

CMU 201 History and Development of Communication and Journalism (5) History and development of communication from prehistoric times: social and technical inventions; political and economic contexts.

CMU 202 The Phenomena of Communicating (5) Types of communicating behaviors in progressively more complex situations, from individual cognition through interpersonal interactions to mass communicating.

CMU 203 Mass Communications and Society (5) Structure and functions of mass media communication systems; audiences and content; alternative structures; implications of new technologies.

CMU 300 Fundamentals of Applied Communication (5) Practice in communicating in variety of social relationships: intimate; employer-employee; instructor-student; client-helper; public organization. Problem areas include: cooperation, competition, instruction, and invention. Prerequisite: 202 or permission of instructor.

Journalism

CMU 304 The Press and Politics in the United States (5) Journalists' role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Joint with POL S 304.

CMU 315 Information Processing for Mass Media (5) Training in gathering information through interviews and observation, and from written records and other public sources. Practice in organizing and writing this information for presentation in a mass medium such as a newspaper or radio or television broadcast. Open only to majors. Prerequisite: ability to type.

CMU 320 Legal Aspects of Communications (5) Regulations governing publication and broadcast in the mass media. Open to nonmajors.

CMU 322 Reporting (4) News gathering and writing. Open only to majors. Prerequisite: 315.

CMU 323 Special Reporting Topics (4, max. 12) Topics vary with instructor. Open only to majors. Prerequisite: 322.

CMU 324 Critical Writing for the Mass Media (4) Editorials, commentaries, reviews. Prerequisite: 315.

CMU 325 Copy Editing (4) Training in the making of editorial judgments, writing of headlines, editing of copy, handling photos, and dummyming of pages. Open only to majors. Prerequisite: 322.

CMU 327 Legislative Reporting (12) W Full-time coverage of Washington legislature for a daily newspaper. Selected students live in Olympia, interview legislative delegations, report committee and floor sessions, gubernatorial and other press conferences. Open only to majors. Prerequisites: 315, 322, POL S 382, and permission of instructor.

CMU 328 News Laboratory (8) Consists of full-time work in school's King County News Laboratory, reporting for area's newspapers and radio stations, covering all county offices/services. Involves heavy writing schedule, deadlines, advanced reporting. Prerequisites: 315, 322, 323, or 327 for editorial journalism majors; 350 or 356 for broadcast journalism majors; permission of instructor.

CMU 391 Photography (3) Basic photojournalism, black-and-white processing and 35-mm. camera techniques, picture editing and layout, field assignments.

CMU 392 Advanced Still Photography (3) Photojournalism, introduction to color for publication, extensive field assignments for news and documentary, advertising, and free-lance photography.

CMU 399 Editorial Journalism Internship (2-6, max. 6) Supervised academic work done in connection with editorial internship. Designed to extend the student's knowledge of professional perspectives. Does not apply to required 50 credits in communications. Open only to majors. Prerequisites: 315, 320, 322, and permission of instructor.

CMU 425 Advanced Journalism Methods (5, max. 10) Reporting regional trends; analyzing and using aggregate data; news planning. Prerequisite: 322 and 328 or permission of instructor.

Public Relations

CMU 339 Problems in Public Relations (3) Group practice in applying techniques to problems of local businesses and agencies.

Advertising

CMU 340 Introduction to Advertising (5) Overview of the advertising industry, its history, structure, operations, and institutional role.

CMU 341 Beginning Advertising Copy and Layout (5) Writing effective copy; developing creative approaches. Specific approaches and strategies. Open only to majors. Prerequisite: 315.

CMU 342 Advanced Advertising Copy and Layout (3) Multimedia creative and writing experience. Open to majors only. Prerequisite: 341.

CMU 344 Advertising Media Planning (3) Characteristics of the media. Demographic, geographic, and psychographic factors in developing a target audience. Writing of local and national media plans. Open only to majors. Prerequisite: 315.

CMU 345 Advertising Campaigns (5) Preparation of an advertising plan for a product or service. Open only to majors. Prerequisites: 341, 344.

CMU 347 Advertising Internship (2-5, max. 6) Internships are assigned to qualified students through the cooperation of the industry working with the school. Open only to majors. Does not apply to required 50 credits in communications. Prerequisites: 341 or 344, depending on nature of internship; 120 credits completed.

CMU 348 Advertising Research (3) Problems relevant to advertisers, agencies, media, and syndicated services. Conceptualization in mass communication context. Review of literature. Open only to majors. Prerequisite: 315.

Broadcast Journalism

CMU 350 Writing and Reporting Broadcast News (5) Writing and producing news stories and newscasts for broadcasting. Open to majors only. Prerequisite: 315.

CMU 354 Basic Visual Communication (3) Basics common to all visual media, plus motion. Use of electronic and film materials in news and public affairs programming; emphasis on visual continuity and editorial judgment. Open only to majors.

CMU 356 News Broadcasting (3) Preparation and presentation of news broadcasts; editing radio news program; use of visuals; television newscast performance. Open only to majors. Prerequisites: 315, 350.

CMU 358 TV News Reporting and Editing (5) Preparation and presentation of news broadcasts, including reporting, scripting, and use of visuals. Prerequisites: 315, 350, 354.

CMU 367 Broadcast Internship (2-5, max. 6) Experience in the day-to-day operation of a broadcast station. Internship credit may not be applied to fulfill specific course requirements or to 50-credit requirement for a communications major. For majors only. Prerequisites: 315, 320, 350, and courses determined by faculty coordinator.

Courses for Undergraduate and Graduate Students

CMU 400 Communications Theory (3) Applicability of theory. Important communication phenomena and principles of communicating. Nature of communicating. Useful perspectives on communicating. Analysis of communicating and its effects. Prerequisite: 202 or permission of instructor.

CMU 405 Mass Communications Research (5) Sample surveys, content analysis, or experimental techniques, depending upon interests of class and instructor. Recommended: relevant courses in the social sciences. (Formerly 411.)

CMU 407 Content Analysis (3) Techniques used in the systematic study of messages.

CMU 408 Survey Research Methods in Communication (3) Practical exercises, readings, and discussion of survey research applications, including sampling theory, survey designs, measurement and questionnaire design, data collection and processing, data presentation and interpretation. Prerequisite: 405 or equivalent.

CMU 409 Experimentation in Communication (3) Techniques of experimentation in the study of communicating. Prerequisite: elementary statistics.

CMU 417 History and Communications (5) Development of mass communication in the United States. Journalism and its response to change in social, political, and ethical patterns. Individual research project. Prerequisite: 201.

CMU 418 Issues in Mass Communication (5) Topics vary. Recommended: background in social sciences.

CMU 419 Government and Mass Communications (5) The Anglo-American concept of freedom of communication; its evolution under federal and state constitutions. Tension areas, judicial decisions, statutes, and administrative regulations affecting publishing, broadcasting, etc. Individual research project.

CMU 420 Mass Communication and Popular Culture (5) Major theoretical and empirical approaches. History, institutions, textual analysis, and audiences for new network television in the United States. Comparative material from film, fiction, and music in the United States and the United Kingdom. Recommended: some background in social sciences and humanities.

CMU 421 Structure and Process of the Mass Media (5) Organization for information and enforcement. Consequences of public policy. Place in American political economy. Individual research project. Prerequisite: 201 or 203 or permission of instructor.

CMU 423 Journalism Ethics (5) Ethical issues in journalism; philosophical positions; historical context. Prerequisites: 315, 322.

CMU 446 Communication in International Markets (5) Advertising and closely related promotional practices used in international market development. Economic, social, and political aspects of such activities in different industries.

CMU 447 Communication and Consumer Behavior (3) Consumer information processing and buying behavior. Review of research. Prerequisite: 202 or permission of instructor.

CMU 463 Television Production Workshop for Teachers (5) Presentation of instruction through television. Open only to nonmajors.

CMU 470 Theory and Criticism of Broadcasting (3) Application of critical standards to the sociological functions and esthetic elements of broadcast media. Recommended: relevant courses in the social sciences or humanities.

CMU 471 National Systems of Broadcasting (3) Each quarter the course focuses on a broadcast system of a different country, comparing origins, development, and present operation with the U.S. system. Consult advising office for schedule of topical offerings each quarter. Open to nonmajors. Prerequisites: 201 and 203 or permission of instructor.

CMU 479 Propaganda (5) Analysis of selective information techniques and involuntary exposure of audience. Role of propaganda in countries other than the United States. Individual research project.

CMU 481 Public Opinion and Communication (5) Collective behavior and its methodology. Polls evaluated as referendums on government policies, as manipulative instruments, and as expressions of the commonality of thought. Role of the mass media. Individual research project. Recommended: relevant courses in political science, sociology, psychology, or communications.

CMU 483 International Communication Systems (5) Patterns, institutions, cultural influences, functions of the media in particular foreign areas. Problems of cultural compatibility and structural linkage.

CMU 484 Comparative Communication Research (5) Point of view and conceptual and methodological approaches to comparative communication research. Analyzes a large body of substantive research as a means of assessing its generality and utility for theory and practice.

CMU 485 History and Impact of Communications Technologies (5) Study of the power of select communication technologies from printing to computers and their interaction with societal institutions. Develops a framework for analyzing technology and change. Prerequisite: some background in social sciences and humanities.

CMU 486 Telecommunications Policy and Research (5) Considers new telecommunications technologies as they influence, and are influenced by, behavioral, social, economic, and policy matters. Discussion in lay terms of technologies *per se*. Prerequisite: major standing or permission of instructor.

CMU 498 Problems of Communications (1-5, max. 10) Research and individual study. Prerequisite: permission of instructor.

Courses for Graduates Only

CMU 500 Seminar in Theory of Communication (5) Procedures for analyzing concepts and theoretical material to provide basis for one's research. How to

make productive use of the literature. Procedures for theorizing about empirical findings and generalizations. Typologies, models, theories, laws, and working hypotheses. Prerequisite: permission of instructor.

CMU 501 Development of Mass Communication (5) Institutions of mass communication. Political and social roles.

CMU 502 Mass Communication Process and Its Effects (5) Analytic approach to conceptualization and research in the field since 1900.

CMU 503 Research Methods (5) Introduces and compares basic methods of research in communications.

CMU 505 Communication and Politics (3) Primary literature dealing with communication and American political behavior. Prerequisite: 421.

CMU 506 Critical Theory Applications in Mass Communication (5) Major approaches in critical theory: Marxism, psychoanalysis, structuralism, and semiotics. Synthesizes these approaches by viewing the "cultural studies" tradition. Assesses critical theory through empirical study of network television in the United States and the United Kingdom.

CMU 507 Computer Applications in Communication Research (3) Potential of the computer for use in behavioral science. Prerequisites: elementary programming, elementary statistics.

CMU 508, 509 Communication Research (5,5) Basic methodological questions in communication research. Foundations in history and philosophy of science. Prerequisite: permission of instructor.

CMU 511 Seminar in Communication Research (3, max. 15) Individual research projects undertaken collectively within a given area of study, under direction of faculty member. Prerequisite: permission of instructor.

CMU 515 Field Seminar in Communication History (5) Readings in communications history.

CMU 516 Communications History Research Methods (5) Development of the historical approach to communications research. Study of historical methods, bibliography, and criticism.

CMU 517 Seminar in Communications History (5) Topical research seminar in communications history.

CMU 519 Seminar in Government and Mass Communications (5) Legal problems of mass communication, institutions, and media operations.

CMU 521 Seminar in Media Structure (5) Directed independent research into structural aspects of American mass communications. Prerequisite: graduate standing.

CMU 543 Seminar in Advertising in Society (3) Interacting historical, social, economic, and legal influences shaping institutional character. Prerequisite: permission of instructor.

CMU 547 Seminar in Communication and Consumer Behavior (3) Directed reading and research in communication and consumer behavior. Emphasis on conceptualization and original research. Prerequisite: permission of instructor.

CMU 550 Advanced Communication Methods (1-3, max. 3) Directed individual projects at a level acceptable by print or broadcast media. Advanced techniques of research and production analyzed and applied. Open only to students seeking the Master in Communications degree.

CMU 570 Seminar in the Theory and Criticism of Broadcasting (3) Criticism of the function and performance of broadcasting. Use of primary sources, including systematic data gathering and analysis. Prerequisite: 470.

CMU 580 Seminar in Propaganda (5) Analysis of propaganda as historical and behavioral phenomena. United States and international perspectives. Interdisciplinary focus.

CMU 581 Seminar in Public Opinion and Communication (5) Conceptual and methodological approaches to public opinion and communication as historical and behavioral phenomena. United States and international perspectives. Recommended: appropriate background in the social sciences.

CMU 583 Seminar in International Communication Systems (3) International communications and contemporary issues that affect the functioning of global communication systems. Interdisciplinary focus.

CMU 584 Seminar in Regional Communication Systems (3, max. 6) Communication as a factor in economic, sociocultural, and political relations among nations of a region. Focus varies with specialization of instructor. Consult graduate secretary for details. Interdisciplinary focus.

CMU 585 Seminar in Comparative Methodologies (3) Conceptual and methodological approaches to comparative studies of international communication systems. Recommended: appropriate background in the social sciences.

CMU 586 Telecommunications Structure and Policies (3) Structures and policies governing the functioning of communication technologies and data flow: U.S. and international perspectives. Interdisciplinary approach.

CMU 597 Practicum in Communication Research (1-3, max. 6) Student participation in faculty-directed research projects.

CMU 598 Selected Readings (1-5, max. 10) Prerequisite: permission of supervisory committee chairperson.

CMU 600 Independent Study or Research (*) Prerequisite: permission of supervisory committee chairperson.

CMU 700 Master's Thesis (*)

CMU 800 Doctoral Dissertation (*)

Comparative History of Ideas

B531 Padelford

Comparative History of Ideas provides for the interdisciplinary study of intellectual history by bringing together thematically related courses from such fields as literature, history, anthropology, philosophy, the arts, and religious studies. Courses within the program have been chosen and designed to explore the history of specific ideas or themes, to examine the history of particular intellectual cultures (Western and non-Western), or to study comparatively the underlying assumptions and attitudes of different intellectual worlds. As a unique approach to liberal humanistic studies, the program provides a solid basis for postgraduate study in, for example, law, administration, medicine, education, journalism, or area studies.

Undergraduate Program

A Bachelor of Arts degree in the Comparative History of Ideas is offered through the Comparative Literature major.

Major Requirements: 55 credits with a 2.50 grade-point average, including colloquium in the history of ideas, six core courses distributed in three areas, and the re-

maining credits chosen among approved electives. At least half the credits presented for the major must be at the upper-division level. An optional senior thesis requiring an additional 15 credits is available.

Faculty Executive Committee

Chairperson

John E. Toews

Professors

Behler, Ernst H.,* 1965, (Comparative Literature, Germanics), Ph.D., 1951, Munich (Germany); romanticism, literary theory, history of criticism.

Collins, Douglas P.,* 1980, (Comparative Literature, Romance Languages and Literature), M.A., 1972, Ph.D., 1978, Missouri; nineteenth- and twentieth-century literature.

Opperman, Hal N.,* 1967, (Art History), M.A., 1963, Ph.D., 1972, Chicago; history of art.

Peck, Jeffrey M.,* 1979, (Comparative Literature, Germanics), M.A., 1974, Chicago; Ph.D., 1979, California (Berkeley); literary criticism and history, nineteenth- and twentieth-century literature.

Searle, Leroy F.,* 1977, (English), M.A., 1968, Ph.D., 1970, Iowa; twentieth-century literature, critical theory, American studies.

Toews, John E.,* 1979, (History), A.M., 1968, Ph.D., 1973, Harvard; modern intellectual history.

Webb, Eugene,* 1966, (Comparative Literature, English, International Studies), M.A., 1962, Ph.D., 1965, Columbia; modern English, French, and German literature, comparative religion.

Associate Professor

Mish'alani, James K.,* 1963, (Philosophy), M.A., 1958, Ph.D., 1961, Brown; ethics, philosophical psychology.

Assistant Professor

Whitlock Blundell, Mary T.,* 1985, (Classics), M.A., 1981, Oxford (England); Ph.D., 1984, California (Berkeley); Greek and Roman philosophy and literature.

Course Descriptions

Courses for Undergraduates

CHID 390 Colloquium in the History of Ideas (5) Basic theoretical issues in the comparative history of ideas as a disciplined mode of inquiry; examination of representative historical figures and problems. Primarily for majors; open to nonmajors by permission of program adviser.

CHID 491-492-493 Senior Thesis (5-5-5) 491: critical and methodological issues. **492-493:** research and writing of thesis under supervision of a faculty member. Required of candidates for an honors degree; available to others with permission of program adviser. Prerequisite: 390.

CHID 499 Undergraduate Independent Study or Research (1-5, max. 10) AWSP Supervised independent study for students who wish to pursue topics not available in regular course offerings. Prerequisite: permission of program adviser.

Comparative Literature

B531 Padelford

The Comparative Literature program transcends the confines of a national literature and explores the rela-

tionships among several literatures. In addition, the program is concerned with the relationship of literature to the arts and to such fields of knowledge as philosophy, religion, and political thought. Typical areas of inquiry include literary traditions and periods, motifs, genres; patterns of influence and reception of literary works among national cultures; and the general principles of literary theory and criticism.

Undergraduate Program

Willis Konick, Adviser
B524 Padelford

Bachelor of Arts Degree

Major Requirements: 50 credits, including the following courses: CLAS 210 or any upper-division literature course in classics; C LIT 300, 301, 302, and two additional courses in comparative literature at the 300 or 400 level; and at least one course in a literature, studied in the original tongue, other than the student's native literature. Remaining credits are to be earned, with few exceptions, in 300- and 400-level courses from among the offerings of Comparative Literature and the eight participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Languages and Literature, and Slavic Languages and Literature. Departmental courses in foreign literature in translation are listed under the respective departments.

Graduate Program

Breda Kapetanac, Graduate Program Coordinator

The Department of Comparative Literature offers a program of study with faculty members from the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Languages and Literature, and Slavic Languages and Literature. Study in this program leads to a Master of Arts or Doctor of Philosophy degree. Students concentrate on graduate courses in comparative literature and specialize in two or more national literatures of major interest to them, studied in the original language. With permission, a Ph.D. aspirant may choose as a third area of study a field outside of literature (e.g., philosophy, religion, art, political thought). On receiving the advanced degree, the student is qualified for teaching and research in comparative and general literature, as well as the language and literature of his or her specialization.

Special Requirements

Applicants for the M.A. program are required to have a B.A. degree in comparative literature, English, or any foreign literature, or an equivalent background; applicants for the Ph.D. program are required to have an M.A. in one of the above. M.A. students are required to demonstrate advanced competence in one foreign language and a basic reading knowledge of a second. Ph.D. students are required to demonstrate advanced competence in two foreign languages and a basic reading knowledge of a third. Advanced competence usually must be demonstrated upon admission to the program, and the reading knowledge is required before M.A. or Ph.D. examinations are administered. Language competence is evaluated by Comparative Literature faculty through departmental examinations or by evidence of completion of satisfactory advanced (400- or 500-level) course work in the language.

Ph.D. Program in Critical Theory

This is a joint-doctoral program with eight participating doctoral programs in literature (Asian Languages and Literature; Classics; Comparative Literature; English; Germanics; Romance Languages and Literature;

Scandinavian Languages and Literature; and Slavic Languages and Literature). The program combines the doctoral program in one of the participating departments with an *additional* set of courses in critical theory into an integrated course of study. The purpose is to broaden a student's perspective and to increase awareness of different critical approaches to literature. Study in this program leads to a Ph.D. in the respective literature and critical theory.

Admission Requirements

Applicants must have been admitted to one of the participating literature departments and have received a Master's degree in a literature represented by these departments or in a related field.

Degree Requirements

(1) Continued satisfactory work in the student's home department; (2) completion of six graduate courses from the program in critical theory; (3) completion of one colloquium in critical theory; (4) reading knowledge of two foreign languages, ancient or modern; (5) passage of the written Ph.D. examinations in the student's home department; (6) passage of the oral Ph.D. examination in the student's home department; (7) defense of a dissertation prospectus before a committee of three faculty members, two of whom are from the faculty in critical theory; (8) submission of a Ph.D. dissertation to a committee which includes one representative of the program in critical theory.

Financial Aid

Students working for advanced degrees in comparative literature are eligible to apply for teaching assistantships in the department(s) of language and literature relevant to their specialization. Comparative Literature has a very limited number of teaching assistantships available and they are usually awarded to advanced students.

Ernst H. Behler

Professors

Adams, Hazard S.,* 1977, (English),† M.A., 1949, Ph.D., 1953, Washington; literary theory, history of criticism.

Altieri, Charles F.,* 1975, (English),† Ph.D., 1969, North Carolina; nineteenth- and twentieth-century literature, literary theory.

Behler, Diana I.,* 1969, (Germanics),† M.A., 1966, Ph.D., 1970, Washington; romanticism, the novel, nineteenth century.

Behler, Ernst H.,* 1966, (Germanics),† Ph.D., 1951, Munich (Germany); romanticism, literary theory, history of criticism.

Brown, Jane K.,* 1988, (Germanics),† M.Phil., 1969, Ph.D., 1971, Yale; seventeenth- and eighteenth-century German literature, comparative literature.

Brown, Marshall J.,* 1988, (English),† M.Phil., 1969, Ph.D., 1972, Yale; comparative literature, eighteenth-century literature.

Christofides, Constantine G.,* 1966, (Drama), (Art, Romance Languages and Literature),† M.A., 1949, Ph.D., 1956, Michigan; seventeenth-century French literature, literature and art.

Harmon, Daniel P.,* 1967, (Classics),† M.A., 1965, Ph.D., 1968, Northwestern; Greek and Roman religion, Latin poetry, Greek tragedy.

Hruby, Antonin,* 1961, (Emeritus), (Germanics),† Ph.D., 1946, Prague; medieval European literature.

Jaeger, Stephen,* 1985, (Germanics),† Ph.D., 1970, California (Berkeley); German and Latin literatures of the Middle Ages, cinema studies.

Jones, Frank W., 1955, (Emeritus), (English, Drama),† M.A., 1955, Oxford (England); Ph.D., 1941, Wisconsin; translation, twentieth-century theatre, poetry.

Leiner, Jacqueline,* 1963, (Emeritus), (Romance Languages and Literature),† Dr. es Lettres, 1969, Strasbourg (Germany); nineteenth- and twentieth-century French, African literature.

Leiner, Wolfgang,* 1965, (Emeritus), M.A., 1951, Saarbrücken (West Germany); D.Phil., 1955, University de la Sarre; seventeenth- and twentieth-century French and Italian literature.

Mackay, Pierre A.,* 1966, (Computer Science and Engineering), (Classics, Near Eastern Languages and Civilization),† M.A., 1959, Ph.D., 1964, California (Berkeley); Greek and Arabic literature.

McKinnon, Richard N.,* 1951, (Emeritus), M.A., 1949, Ph.D., 1951, Harvard; Japanese literature.

Modiano, Raimonda,* 1973, (English),† Ph.D., 1973, California (San Diego); romanticism.

Reinert, Otto,* 1956, (Drama), (English),† M.A., 1948, Ph.D., 1952, Yale; modern European drama.

Rossel, Sven H.,* 1974, (Scandinavian Languages and Literature),† Magister, 1968, Copenhagen (Denmark); medieval literature, European preromanticism and romanticism, European symbolism, Danish.

Steene, Birgitta K.,* 1973, (Drama), (Scandinavian Languages and Literature),† M.A., 1955, Ph.D., 1960, Washington; Ph.D., 1966, Uppsala (Sweden); modern Scandinavian drama, Scandinavian film, comparative literature.

Wang, Ching-Hsien,* 1971, (Asian Languages and Literature),† M.F.A., 1966, Iowa; M.A., 1969, Ph.D., 1971, California (Berkeley); Chinese poetry, East-West literary relations.

Webb, Eugene,* 1966, (English), (International Studies),† M.A., 1962, Ph.D., 1965, Columbia; modern English and French, and German literature, comparative religion.

Ziadeh, Farhat J.,* 1966, (Emeritus), (Near Eastern Languages and Civilization),† LL.B., 1940, London; Arabic language and literature, Islamic law, Islamic institutions.

Associate Professors

Ammerlahn, Hellmut H.,* 1963, (Germanics),† M.A., 1960, Vermont; Ph.D., 1965, Texas; the age of Goethe, literary symbolism and psychology, West European literature and culture from seventeenth century to twentieth century.

Collins, Douglas P.,* 1980, (Romance Languages and Literature),† M.A., 1972, Ph.D., 1978, Missouri; nineteenth- and twentieth-century literature.

Elfrich, Robert J.,* 1964, (Emeritus), (Romance Languages and Literature),† M.A., 1953, Ph.D., 1960, Harvard; eighteenth-century European literature.

Kogoj-Kapetanac, Breda,* 1973, Litt.D., 1966, Zagreb (Yugoslavia); theories of comparative literature, theory of the novel, nineteenth- and twentieth-century European literature.

Konick, Willis A.,* 1961, (Slavic Languages and Literature, International Studies),† M.A., 1954, Ph.D., 1964, Washington; Russian literature, nineteenth-century European literature.

Kramer, Karl D.,* 1971, (International Studies, Slavic Languages and Literature),† M.A., 1957, Ph.D., 1964, Washington; late nineteenth-century Russian, American, and French literature, short story.

McLean, Sammy K.,* 1967, (Germanics),† M.A., 1957, Ph.D., 1963, Michigan; Western drama, twentieth-century poetry, psychoanalysis and literature, translation.

Peck, Jeffrey M.,* 1979, (Germanics),† M.A., 1974, Chicago; Ph.D., 1979, California (Berkeley); literary criticism and history, nineteenth- and twentieth-century literature.

Sehmsdorf, Henning K.,* 1967, (Scandinavian Languages and Literature),† M.A., 1964, Ph.D., 1968, Chicago; mythology and folklore, European romanticism.

Vaughan, Micael F.,* 1973, (English),† M.A., 1973, Ph.D., 1973, Cornell; medieval English literature.

Yarbro-Bejarano, Yvonne M.,* 1974, (Romance Languages and Literature),† M.A., 1971, Ph.D., 1976, Harvard; sixteenth- and seventeenth-century literature of Spain, Chicano theater.

Assistant Professor

Dornbush, Jean M.,* 1980, M.A., 1974, Ph.D., 1976, Princeton; medieval period, symbolist poetry, modern literary theory.

Course Descriptions

All Comparative Literature courses are taught in English unless otherwise indicated. It is recommended that students enrolling in 300- or 400-level courses have taken 10-15 credits in literature or general humanities courses. Content of many courses varies from quarter to quarter.

Courses for Undergraduates

C LIT 200 Introduction to Comparative Literature (3 or 5) Reading, understanding, and enjoying literature from various countries, in different forms of expression (e.g., dramatic, lyric, narrative, rhetorical) and of representative periods. Emphasis on the comparative study of themes and motifs common to many literatures of the world.

C LIT 240 Writing in Comparative Literature (5, max. 15) Comparative approach to literature and a workshop in writing comparative papers. Emphasis on cross-cultural comparison of literary masterpieces. Readings in English with an option to read selected texts in the original languages (French, German, Italian, Russian, Spanish, or a Scandinavian language—varies each quarter). Writing in English. Basic reading knowledge of one of the above languages recommended.

C LIT 260 Interpretation as a Human Activity (5) Introduction to the interpretive nature of all human activity, ways in which students participate in interpretation in their daily lives. Critical skills developed for not only "reading" the world around them, but also reflecting on what constitutes an interpretation and how their own perspectives shape understanding.

C LIT 270 The Visual Text: How to Read a Film (5) Introduction to film form, style, and techniques. Examples from silent film and from contemporary film. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 271 The Visual Text: Authors of Film (5) Introduction to authorship in the cinema. The work of a major director or directors. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 272 The Visual Text: Genre in Film (5) Introduction to study of film genre. Literary, mythic, and historic aspects of film genre. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 300 Comparative Literature: Genres (5) Major genres of world literature: poetry, fiction, drama. Readings, in English, from a wide selection of national literatures.

C LIT 301 Comparative Literature: Periods (5) Major periods of world literature. Readings, in English, from a wide selection of national literatures.

C LIT 302 Comparative Literature: Themes (5) Major themes of world literature. Readings, in English, from a wide selection of national literatures.

C LIT 310 The Concept of Revolution in Modern Literature and Thought (5) The idea of revolution, as it evolved in the wake of the American and French revolutions, in major works of Western literature and thought from the Enlightenment and the period of romanticism to contemporary treatments of the revolutionary theme.

C LIT 315 Literature of Absurdity (5) French, German, British, and American absurd novels and plays, 1940-65, including Sartre, Camus, Ionesco, Beckett, Albee, Pinter, and others. Background lectures in philosophy and literature.

C LIT 350 Themes in World Literature: Parents and Children (5) World literature, from the Renaissance to modern times, based upon the theme of "parents and children." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the motive of generational conflict.

C LIT 351 Themes in World Literature: Love, Sex, and Murder (5) World literature, from the Renaissance to modern times, based upon the theme of "love, sex, and murder." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the human potential for both great violence and extraordinary compassion.

C LIT 352 Themes in World Literature: Death and Transfiguration (5) Theme of death, transfiguration, and new life in world literature. Selections from Tolstoy, D. H. Lawrence, Celine, E. M. Forster, and other major writers.

C LIT 357 Literature and Film (3-5, max. 10) The film as an art form, with particular reference to the literary dimension of film and to the interaction of literature with the other artistic media employed in the form. Films are shown as an integral part of the course. Content varies.

C LIT 360 Interpretation in Culture and Community (5) How particular political, social, and cultural events, interests, and ideologies have constituted interpretive communities as well as the interpretations themselves.

C LIT 370 The Scope of Literary History (5) Raises the issue of literary history by discussing, through historical examples and theoretical issues, such questions as: What is the scope of written literary history? How do we set up the canon of literary history? How do we account for periodization and epochal change?

C LIT 375 Images of Women in Literature (5, max. 15) Comparative study of the ways women's image, social role, and psychology have been portrayed by writers of various nationalities and literary periods. Selection of theme varies from quarter to quarter. Works are read in English translation.

C LIT 396 Special Studies in Comparative Literature (3-5, max. 10) Offered by visitors or resident faculty. Content varies.

C LIT 400 Introduction to the Theory of Literature (5) A selection of major theoretical statements in the history of literary theory, with emphasis on fundamental issues of lasting concern and with attention to some recent emphases.

C LIT 401 Modern European Drama (5) Selected plays, read in English, by Ibsen, Strindberg, Chekhov, Pirandello, Brecht, Camus, Durrenmatt, the absurdists, and others, representing naturalism, expressionism, theatricalism, and other movements that have shaped the modern European theater.

C LIT 405 Romanticism (5) Literature, philosophy, esthetics, and culture of Western romanticism. Emphasis on literature and criticism and on historical and philosophical aspects of the romantic movement in Europe and the United States.

C LIT 407 Literary Impressionism (5) Selected novels, stories, poems, and plays by F. de Larosière, Chekhov, Crane, Conrad, James, Bunin, and Proust, which are frequently identified with the impressionist trend in Western literature from 1850 to 1920.

C LIT 410 Literary Motifs (3-5, max. 10) Important fictional figures, situations, and plots that, through their repeated recurrence in world literature, appear to have a profound and universal significance for the human imagination. Content varies.

C LIT 415 The Comic in Literature (5) Masterpieces of comic literature emphasizing various modes and uses of the comic.

C LIT 424 The Epic Tradition (5) A Ancient and medieval epic and heroic poetry of Europe in English: the *Iliad*, *Odyssey*, and *Aeneid*; the *Roland* or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies. Joint with CLAS 424. Literary background recommended.

C LIT 440 The Novel (3-5, max. 10) The novel as a genre. Material varies with individual faculty members who offer it, but, normally, the larger technical, social, and philosophical questions are illustrated through intensive study of novels by two or more writers from different national cultures.

C LIT 460 Interpretation in the Humanistic Disciplines in the University (5) How interpretation is shaped by the academic practices of research, learning, and pedagogy in which students participate but upon which they often do not reflect consciously. How different disciplines organize, disseminate, and validate knowledge; how particular disciplines define objects of inquiry and develop appropriate questions.

C LIT 472 Studies in Narrative (3-5, max. 10) Narrative styles and developments from antiquity to the present. Content varies.

C LIT 476 Comparative Approaches to Chinese Poetry and Poetics (5) Chinese poetry and poetics in context of world literature; emphasis on lyrical tradition. Investigation of essence, modes, conventions, imagery, and symbolism defined in three thousand years of continued, prolific developments. Relevant Western works are compared with Chinese subjects. All readings in English.

C LIT 480 Modern European Poetry (5) Selected works read, in English, by French, German, Italian, and Spanish poets from the romantic period to the present.

C LIT 490 Directed Study or Research (1-5, max. 10) AWSps Individual study of topics in comparative literature by arrangement with the instructor and the Comparative Literature office.

C LIT 493 Comparative Literature Honors Seminar (5, max. 15) Special topics in comparative literature. Required of honors students in comparative literature. Prerequisite: permission of honors adviser.

C LIT 495 Honors Thesis (4) Preparation of an honors thesis under the direction and supervision of a faculty member. Prerequisites: 493 and permission of honors adviser.

C LIT 496 Special Studies in Comparative Literature (3-5, max. 15) Offered occasionally by visitors or resident faculty.

Courses for Graduates Only

Consult the Comparative Literature office for information on the quarter and year the courses below will be

offered. Graduate-level course numbers merely distinguish courses and do not indicate ascending level of knowledge required to take the course. Reading knowledge of at least one foreign language recommended.

C LIT 500 The Theory of Literature I: The Literary Text (5, max. 15) An investigation into the nature of literature in contrast to other forms of writing and into essential features of literature such as genres, imagery, modes of communication, and structure.

C LIT 501 The Theory of Literature II: History of Literature (5, max. 15) An exploration of topics of literary history such as periods, traditions, the writing of literary history, and literary history in contrast to other histories.

C LIT 502 The Theory of Literature III: Literary Value (5, max. 15) An analysis of the function of literature in public and private life, the concept of literature in the context of the humanities, and the problem of evolution in literature.

C LIT 507 History of Literary Criticism and Theory I (5, max. 15) A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Joint with ENGL 507.

C LIT 508 History of Literary Criticism and Theory II (5, max. 15) Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Joint with ENGL 508.

C LIT 509 History of Literary Criticism and Theory III (5, max. 15) Literary Criticism and theory from Kant's *Critique of Judgment* to the mid-twentieth century and the work of Northrop Frye. Joint with ENGL 509.

C LIT 510 History of Literary Criticism and Theory IV (5, max. 15) A study of the major issues in literary criticism and theory since about 1965. Joint with ENGL 510.

C LIT 511 Literary Translation (5) Lectures on principles of translating literary works into readable English. Students present and comment on translations made by them and write seminar papers on problems of translation in theory and practice.

C LIT 516 Colloquium in Criticism (5, max. 15) Recent trends in literary criticism, taught by representatives from various literature departments, covering critical trends such as structuralism, poststructuralism, hermeneutics, reception theory, and sociological approaches to literature.

C LIT 517 Colloquium in Folklore (5) Recent trends in folklore studies, taught by representatives from various literature departments and disciplines in the social sciences.

C LIT 518 Colloquium in Medieval Studies (5) Salient literary aspects of the European Middle Ages, taught by representatives from various literature departments as well as from related disciplines, such as philosophy, art history, history, and comparative religion.

C LIT 519 Lectura Dante (3-5) Selected aspects of Dante's *Divina Commedia* (in English), conducted as a faculty-graduate student colloquium with representatives from various literature departments.

C LIT 522 Twentieth-Century Literature (3-5) Selected movements, schools, and trends of significance in twentieth-century literature of Europe and the Americas. Symbolism, surrealism, dada, expressionism, neorealism, existentialism, the *nouveau roman*, and the absurd may be considered. Texts in English, French, and German figure most prominently, but Spanish, Italian, Russian, and other materials may also be examined. Content and emphasis vary.

C LIT 525 The Baroque in Criticism and Literature (3-5, max. 15) Origins and history of the term as used in literary criticism, accompanied by a study of representative Baroque literature in various countries. Included are such works as *Don Quixote*, *Phedre*, and French, Spanish, Italian, and German poetry available in translation, but preferably to be read in the original.

C LIT 530 Literature and History of Ideas (5, max. 15) An exploration of either theorists, or schools and movements, or theories which are of relevance to the theory of literature.

C LIT 535 Hermeneutics and Culture (5, max. 15) A study of the main attempts to come to an understanding of the humanities and the nature of historical interpretation in a cultural context.

C LIT 545 Medieval Studies (3 or 5, max. 15) Literature, intellectual history, and sociology of the Middle Ages, 500-1200. Topics may include "renaissance" of the twelfth century; the educational ideal; rise of universities; philosophical concepts.

C LIT 546 Studies in the Renaissance (3-5, max. 10) Aspects of Western European literature during the Renaissance. Course content varies.

C LIT 547 Classical Tradition in Medieval and Renaissance Europe (3-5, max. 15) Intensive study of a single topic or genre. Course content varies.

C LIT 548 The Romantic Movement (3-5, max. 10) Chief authors, works, and/or themes of the romantic movement in Europe and America. Course content may vary.

C LIT 550 European Realism (3-5) European realism (Balzac, Flaubert, Turgenev, Dostoevsky, Tolstoy, the representative Victorians, and the writers of "poetic realism") in connection with various esthetic doctrines and subsequent critical appraisals.

C LIT 551 The Symbolist Movement (3-5, max. 10) The symbolist movement from its beginnings in nineteenth-century French poetry through later developments in European poetry, fiction, and drama. Related developments in philosophy, critical theory, and the other arts. Reading knowledge of French required.

C LIT 555 Studies in Irony (3-5) Irony in literary, philosophical, and satirical masterpieces from the classical period to contemporary literature.

C LIT 560 Classical Rhetoric and Literature (3-5) Influence and importance of classical rhetoric in European literary works of the seventeenth and eighteenth centuries. Texts and examples chosen in English, French, Italian, and German literatures.

C LIT 570 The Novel: Theory and Practice (3-5, max. 15) Study of the novel as a genre, examining two or more novels of varying national literatures. Course content varies.

C LIT 571 The Lyric: Theory and Practice (3-5, max. 15) Examination of central questions in the study of the lyric genre as approached from an international point of view. Course content varies.

C LIT 572 The Epic: Theory and Practice (3-5, max. 15) Examination of epic literature as exemplified by selected works chosen from various cultures and periods (e.g., French and German medieval courtly epic, the epic in Renaissance and baroque Europe, traditions of the mock epic). Course content varies.

C LIT 573 The Drama: Theory and Practice (3-5, max. 15) Examination of various aspects of the drama as a major literary genre, as approached from international and multilingual points of view. Course content varies.

C LIT 574 Literary Motifs (3-5, max. 10) Examination of important fictional figures, situations, and plots

that, through their repeated recurrence in world literature, appear to have a profound and universal significance for the human imagination. Course content varies.

C LIT 576 Seminar in East-West Literary Relations (3-5, max. 15) Comparative investigation of literary topics requiring the study of both Eastern and Western documents. Explores parallels and contradictions between the two, in concepts, ideas, and specific topics. A comparative paper on a chosen topic with qualified conclusions is required. Emphasis varies. Prerequisite: at least one East Asian language.

C LIT 580 Literature and Other Disciplines (3-5, max. 15) Seminar examining relationships or parallels between literature and other disciplines such as philosophy, psychology, sociology, anthropology, or political science. Course content varies.

C LIT 590 Thesis Colloquium (5, max. 15) Discussion of dissertation projects among participants in the program.

C LIT 596 Special Studies in Comparative Literature (3-5, max. 15) Offered occasionally by visiting or resident faculty. Course content varies.

C LIT 599 Special Seminar or Conference (1-9, max. 30) Group seminars or individual conferences scheduled to meet special needs. Prerequisite: permission of graduate program adviser.

C LIT 600 Independent Study or Research (*) AWSpS

C LIT 700 Master's Thesis (*) AWSpS

114 Sieg

A Bachelor of Science degree in Computer Science is offered by the Department of Computer Science and Engineering, and is administered through the College of Arts and Sciences. The department also offers a Bachelor of Science degree in Computer Engineering, and graduate degrees in Computer Science, both administered through the College of Engineering. More information concerning these programs can be found under Computer Science and Engineering in the College of Engineering section of this catalog.

Computer Science is the study of information and algorithms in the context of real and abstract computing devices. Computer scientists study: the representation and storage of information; programming and mathematical languages to express algorithms; and hardware and software processors to execute algorithms. These concerns lead both to theoretical investigations and to practical developments in computer technology and applications.

The objective of undergraduate education in computer science is to develop broadly educated and competent

graduates for professional careers or graduate studies. Especially important is a foundation that will endure as technology advances and changes.

The computer field has a broad base of industrial and governmental jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, technical salesperson, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers.

Undergraduate Programs

Bachelor of Science Degree in Computer Engineering

See *Computer Science and Engineering in the College of Engineering section.*

Bachelor of Science Degree in Computer Science

Alice Schwartz, Adviser
114F Sieg

Admission Requirements: 45 credits completed, including MATH 124, 125, 126; PHYS 121, 122, 123; and CSE 210, 211. A minimum 3.00 grade-point average for all courses at this or other universities. These conditions guarantee consideration, but not acceptance.

Major Requirements: (1) Preparatory Component (39 credits): MATH 124, 125, 126 and three courses selected from MATH 307, 308, 309, STAT 311, or any of the approved senior elective math or statistics courses (shown in the undergraduate handbook); PHYS 121, 122, 123; one of PHYS 334, EE 306, 310 or 355. (2) Inner Core Component (31 credits): 210, 211, 321, 322, 326, 341, 378. (3) Outer Core Component (minimum of 12 credits): Selected from 401, 421, 431, 451, 470, 473. (4) Elective Component (minimum of 8 credits): 400-level CSE courses (not including those used to satisfy the Outer Core), up to 6 credits of 498 (honors students must take exactly 9 credits), and courses chosen from the approved senior elective course list. (5) Recommended: 10 credits of natural science, business, or engineering beyond the requirements listed in (1) through (4), above.

Graduate Program

Dance

258 Meany

The dance program is designed as part of a liberal arts curriculum and provides students with a foundation for future advanced work in performance or movement-related work. The program offers two degree tracks. The Performance Track focuses on technique, choreography, and performance. The Movement Studies Track focuses on movement as an important component of personal, artistic, and cultural expression. It is recommended that majors supplement their dance studies

with work that will provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.

Undergraduate Program

Susanne Recordon, Adviser
258 Meany

Bachelor of Arts Degree

Admission Requirement: Students should complete a minimum of one quarter of basic dance technique at the University before applying for acceptance into the major program. Transfer students and out-of-town freshmen should consult the department for audition arrangements.

Performance Track

Major Requirements: Minimum 70 credits in dance to include 231, 232, or 233; 242, 344, 345, 351, 354, 360, 361, 365, 366, 367, 380, 390, 420; 470 (one crew required, at least 4 credits performing, for minimum of 8 credits of 470), 493; technique (17 credits minimum at 300 level; at least 8 in both ballet and modern). Minimum 10 credits from the following: ART H 200, 203; DRAMA 251, 252; MUSIC 257, 316, 317, 318, 330, 386, 429.

Movement Studies Track

Major Requirements: Minimum 70 credits in dance to include 231, 232, or 233; 242, 330, 344, 345, 350, 351, 354, 360, 361, 365, 366, 380, 390, 420, 470 (one crew minimum), 493; technique (minimum 9 credits each in ballet and modern). Minimum 10 credits from the following: ANTH 429; ART H 200; DRAMA 250; HST 113; PHIL 445; MUSIC 316, 317, 318; PSYCH 306, 310; and B STR 301.

An overall grade-point average of 3.00 in dance courses is required to maintain major status. Students must demonstrate consistent and acceptable progress in technique, performance, and academic areas toward the attainment of a degree.

Graduate Program

Hannah C. Wiley, Graduate Program Coordinator

The dance program offers graduate study leading to a Master of Fine Arts degree. This program is designed specifically for professional dance performers who are anticipating retirement and wish to prepare for a transition into college teaching careers. All graduate students will comprise the Chamber Dance Company and will hold teaching assistantships.

During the two-year program, a student must complete at least 73 credits, of which a minimum of 21 must be in an area of specialization, e.g., choreography/production, history/research/criticism, ethnology, Laban movement analysis, or Individually Designed Specialization (IDS). The master's project may be artistic or scholarly in nature.

Admission Requirements

(1) A letter of application and résumé; (2) an undergraduate degree; (3) a minimum of 8 years of professional performing experience; (4) the ability to demonstrate movement skills at a professional level in at least

one idiom; an in-person audition or performance video tape; (5) three letters of reference verifying success and responsibility in the professional dance arena. Neither a foreign language nor the Graduate Record Examination is required. Application deadline is January 15.

Financial Aid

All graduate students will receive tuition waivers and teaching assistant stipends.

Faculty

Professors

Boris, Ruthanna, 1965, (Emeritus), D.T.R., 1946; ballet technique and dance therapy.

Russell, Francia, 1988, (Affiliate); ballet.

Skinner, Joan, * 1967, (Emeritus), M.A., 1964, Illinois; dance composition, improvisation, and kinesthetic training.

Wiley, Hannah, 1987, M.A., 1981, New York; ballet, pointe, scientific aspects of dance, choreography.

Associate Professor

Green, Eve, 1967, (Emeritus), B.A., 1940, Barnard; ballet technique.

Assistant Professor

Vadino, John, 1989, (Affiliate); production, lighting design.

Lecturers

Geiger, Michael, 1989, M.A., 1978, Colorado; modern, jazz, repertory.

Whitener, William, 1989; ballet, modern, repertory.

Part-time faculty members drawn from professionals in the community.

Course Descriptions

Courses for Undergraduates

DANCE 101, 102, 103 Introduction to Dance (4, max. 8; 4, max. 8; 4, max. 8) Contemporary dance technique, ballet, and new approaches to movement training.

DANCE 104, 105, 106 Modern Technique (*, max. 8; *, max. 8; *, max. 8) Advanced beginning. Continued development of all beginning areas and expansion of movement vocabulary. Prerequisites: 103 or permission of instructor for 104; 104 or permission of instructor for 105; 105 or permission of instructor for 106.

DANCE 107, 108, 109 Ballet Technique I (*, max. 8; *, max. 8; *, max. 8) Advanced beginning. Continued development of all beginning areas. Expansion of ballet vocabulary. Prerequisites: 103 or permission of instructor for 107; 107 or permission of instructor for 108; 108 or permission of instructor for 109.

DANCE 133 Summer Dance Intensive I (1-4, max. 12) Dance technique, modern and ballet repertory, composition, and performance. Three weeks of day-long study.

DANCE 201, 202, 203 Ballet Technique II (*, max. 8; *, max. 8; *, max. 8) Intermediate. Expansion of ballet vocabulary. Prerequisites: 109 or permission of

instructor for 201; 201 or permission of instructor for 202; 202 or permission of instructor for 203.

DANCE 204, 205, 206 Contemporary Technique II (*, max. 8; *, max. 8; *, max. 8) Intermediate. Expansion of movement vocabulary. Prerequisites: 109 or permission of instructor for 204; 204 or permission of instructor for 205; 205 or permission of instructor for 206.

DANCE 223 Men's Special Techniques (1, max. 6) AWSp Specific areas of technique that emphasize strength, stamina, elevation, and all other elements in which the masculine principle prevails. Prerequisite: permission of instructor.

DANCE 231 Folk/Ethnic Dances of Western Cultures (1, max. 6) Folk dances of Western cultures (i.e., Irish, American square, Spanish, Scandinavian, or Scottish). See quarterly *Time Schedule* for specific offering.

DANCE 232 Folk/Ethnic Dances of Eastern Europe and Middle East (1, max. 6) Folk dances of Eastern Europe and the Middle East (i.e., Greek, Balkan, Russian, African). See quarterly *Time Schedule* for specific offering.

DANCE 233 Folk/Ethnic Dances of Eastern Cultures (1, max. 6) Folk dances of Eastern cultures (i.e., Korean, Japanese, East Indian, Cambodian). See quarterly *Time Schedule* for specific offering.

DANCE 242 Music in Relation to Dance (3) Fundamentals of music: rhythm, notation, terminology, form. Development of analytical skills for choreographers. Exploration of music literature and historical works.

DANCE 301, 302, 303 Ballet Technique III (*, max. 8; *, max. 8; *, max. 8) Advanced-intermediate level: continued development and expansion in all areas of technique. Prerequisites: permission of instructor for 301; 301 or permission of instructor for 302; 302 or permission of instructor for 303.

DANCE 304, 305, 306 Contemporary Dance Technique III (4, max. 8; 4, max. 8; 4, max. 8) Intermediate-advanced. Dance sequences of greater complexity. Prerequisites: permission of instructor for 304; 304 or permission of instructor for 305; 305 or permission of instructor for 306.

DANCE 322 Repertory (2, max. 8) Learning and performing pieces from professional dance repertoire, including reconstructions from notated scores. Prerequisites: permission of instructor and concurrent registration in a dance technique course.

DANCE 324 Partnering Techniques (1, max. 6) Study and practice in supported dance work.

DANCE 326 Jazz Techniques (2, max. 12) Study of dance specific to the idiom of jazz; emphasis on the characteristics of movement and music which constitute the fundamental elements of the style.

DANCE 330 Kinesthetic Training I (3) Skinner Knowledge gained through direct perceptual experience. Uses imagery to facilitate efficient functioning of the mind/body complex in an artistic task.

DANCE 333 Summer Dance Intensive II (4-10, max. 18) Dance technique, modern and ballet repertory, composition, and performance. Concentrated daylong study.

DANCE 340, 341, 342 Movement for Actors and Singers (2,2,2) Freedom of movement and voice through the release of excess tension-coordination, finding a natural grace. Assimilation of style and development of mood and character. Uses dy-

namic approach to energy and space to help enrich the theatrical statement. Prerequisites: 340 for 341; 341 for 342.

DANCE 344 Dance History (3) Study of the evolution of dance from ritual to a theatre art form.

DANCE 345 History of Dance (3) Roots of contemporary dance as an art form and its relationship to developments in ballet since the turn of the century.

DANCE 346 Twentieth-Century Dance History Through Style Analysis (3) Historical trends of dance in the twentieth century. A perspective for looking at movement concerns of choreographers through style analysis. Prerequisite: 354 or permission of instructor.

DANCE 350 Exploring the Articulate Body I (3) Hackney Basic body connections and joint articulations. Principles of dynamic body alignment, patterning efficient lines of muscular use, weight initiation, connections from lower-body support to upper-body freedom. Based on the Bartenieff fundamentals as developed by the Laban Institute of Movement.

DANCE 351 Dance/Movement Notation (3) Hackney Analyzing and recording the structural elements of movement as developed by Rudolph Laban.

DANCE 354 Laban Movement Analysis I (3) Hackney Laban's effort/shape concepts. What makes movement expressive, how to see movement textures clearly, how to broaden the dynamic range of one's movements.

DANCE 360, 361, 362 Improvisation (2,2,2) Spontaneous composition as an art and skill.

DANCE 365, 366, 367 Dance Composition (3,3,3) Study of dynamic forms that arise out of juxtaposition of movement elements in time and space; counterpoint.

DANCE 371 Choreographic Workshop (2) Performing experience for students in pieces choreographed by faculty members.

DANCE 380 Dance Major Seminar (1, max. 6) AWSp Discussion of topics pertinent to educating a dance artist including training techniques, current trends in choreography and performance, and issues relating to health, nutrition, and body image.

DANCE 385 Pointe Techniques (1) Pointe technique for intermediate and advanced dancers.

DANCE 390 Dance Teaching Methodologies (3) Wiley Introduction to dance pedagogy. Practical teaching experience. Prerequisite: dance major status or permission of instructor.

DANCE 401, 402, 403 Ballet Technique IV (*, max. 8; *, max. 8; *, max. 8) Advanced level. Prerequisites: 303 or permission of instructor for 401; 401 or permission of instructor for 402; 402 or permission of instructor for 403.

DANCE 404, 405, 406 Contemporary Dance Technique IV (4, max. 8; 4, max. 8; 4, max. 8) Advanced technical skills applied to longer dance sequences. Prerequisites: 306 or permission of instructor for 404; 404 or permission of instructor for 405; 405 or permission of instructor for 406.

DANCE 420 Dance Aesthetics (3) Skinner Philosophical investigation of the expressive elements of dance; reading and discussion of the concepts of beauty, style, and aesthetic theory.

DANCE 430 Kinesthetic Training II (3) Skinner Continuation of 330. Language of imagery developed to a more sophisticated level. Designed to enable the

student to experience integration of the mind/body complex in the creative process. Prerequisite: 330 or permission of instructor.

DANCE 450 Exploring the Articulate Body II (3) Hackney Movement fundamentals; further development of 350 course work. Prerequisites: 350 and permission of instructor.

DANCE 451 Advanced Dance/Movement Notation (3) Further development of 351 course work. Prerequisites: 351 and permission of instructor.

DANCE 454 Laban Movement Analysis II (3) Hackney Includes in-depth work in combinations of effort qualities (states and drives), space harmony, and phrasing of effort, shape, space, and body. Prerequisites: 354 and permission of instructor.

DANCE 455 Movement Observation (3) Hackney Practical techniques for developing skill in the use of Laban movement analysis for observing and describing movement. Overview of work of observers in various fields of research. Extensive work on location and in the studio observing movement, live and on film/video. Focuses on particular applications for diverse research needs. Prerequisites: 354 and permission of instructor.

DANCE 456 Seminar in LMA Applications (3) Hackney Theory, movement, and observation experiences integrated with an understanding of the history and applications of Laban movement analysis. Prerequisites: 454, 455, and permission of instructor.

DANCE 460 Advanced Improvisation (3) Improvisation as a performance form. Spontaneous composition of movement ideas and phrases shaped into a coherent whole by group ensemble work. Prerequisites: 360, 361, 362, or permission of instructor.

DANCE 466 Advanced Dance Composition (3) Explores a variety of approaches to personal creative process in dance composition. Prerequisites: 365, 366, 367, or permission of instructor.

DANCE 470 Dance Production Activities (1-3, max. 12) Participation in dance productions, either studio showings or public performances, conducted under faculty direction or supervision. Prerequisite: permission of instructor.

DANCE 472 Choreographic Workshop (2) Further development of 371 course work. Prerequisite: permission of instructor.

DANCE 480-481-482 Bartenieff Fundamentals* (3-3-3) SW,SW,SW Hackney Principles of movement initiation, weight shift, movement sequencing, spatial tensions, and breath support. Relationship of these principles to the understanding of anatomical concepts in body patterning for mobility and stability. Prerequisites: admission to the LMA program and 350, 354, and 493 or equivalents for 480-; 480- for 481-; 481- for 482-; recommended: 351 or equivalent for 480-.

DANCE 483-484-485 Seminar in Laban Movement Analysis (3-3-3) SW,SW,SW Implications, applications, and historical development of the Laban Movement Analysis system. Comparison of the LMA system to other research tools in nonverbal communication. Prerequisites: admission to the intensive LMA program and 350, 354, and 493 or equivalents for 483-; 483- for 484-; 484- for 485-; recommended: 351 or equivalent for 483-.

DANCE 486-487-488 Laban Movement Analysis Theory (3-3-3) SW,SW,SW Hackney The Laban Movement Analysis system as a framework for understanding the structural/body, spatial/shape, and dynamic concepts of movement. Exploration and broadening of one's own movement repertoire. Interrelationship of LMA vocabulary to the expressive and emotional nature of human movement experience. Prerequisites: admission to the intensive LMA program

and 350, 354, and 493 or equivalents for 488-; 488- for -487-; -487- for -488; recommended: 351 or equivalent for 488-.

DANCE 490 Special Studies in Dance. (1-3, max. 10) Special studies designed to address contemporary and historical concerns in the field of dance. Prerequisite: permission of instructor.

DANCE 493 Anatomy for Dance (4) Wiley Anatomy of the musculoskeletal system and its applications in dance movement.

DANCE 494-495-496 Movement Observation and Analysis (3-3-3) SW, SW, SW Hackney Observation and notation, both on location and in the studio, of structural and qualitative aspects of movement, utilizing effort, shape, and Laban notation symbols. Focuses on specific applications for students' research projects. Prerequisites: admission to the intensive LMA program and 350, 354, and 493 or equivalents for 494-; 494- for -495-; -495- for -496; recommended: 351 or equivalent for 494-.

DANCE 499 Undergraduate Independent Study (*, max. 6)

Drama

101 Hutchinson

The School of Drama is concerned with the whole continuum of acting, directing, designing, theatre history/theory, and dramatic forms through which the human dramatic imagination finds expression.

The school uses four theatres including the Glenn Hughes Playhouse, with a thrust stage; and the Penthouse Theatre, first theatre-in-the-round built in America. Faculty- and student-directed plays drawn from the full range of world dramatic literature are presented throughout the year. Additional productions are mounted in the two theatres of Meany Hall. Technical and design support is provided for opera productions of the School of Music and for programs of the dance division.

Undergraduate Program

Adviser
129 Hutchinson

Bachelor of Arts Degree

Major Requirements: A minimum of 61 credits in drama courses. Three quarters of acting: DRAMA 251, 252, 253 or 351, 352, 353 (with 350 series, 3 credits of DRAMA 298 or 498 also required). One quarter of child drama: DRAMA 432. Three quarters of technical theatre: DRAMA 210, 211, 212, 290, 291, 292. 25 credits in theatre history, dramatic literature, and criticism: DRAMA 302, 371. One of DRAMA 372, 374, 377, 378, 472; one of DRAMA 473, 475, 476; one of DRAMA 416, 494 (or substitution of additional course from two previously listed series). Electives at the 300-400 level to complete the balance. Majors are required to register for DRAMA 401 each quarter they are in residence.

Bachelor of Fine Arts Degree

A minimum of 243 credits is required for graduation with a Bachelor of Fine Arts degree. The Professional Actor Training Program course of study is for three years of intensive studio and performance work in acting, movement, voice, and speech.

Admission Requirements: Complete, or be in the process of final completion of, two years of general college study (90 credits). Entrance determined primarily by audition and interview. Students may enter only in Autumn Quarter. The student should contact the school for information about additional material required for application.

Major Requirements: In addition to the 90 credits required for admission, 45 credits in elective courses, plus three quarters each of DRAMA 457, 458, 459, and 555.

Graduate Program

The School of Drama offers programs of graduate study leading to the Master of Fine Arts and Doctor of Philosophy degrees. Areas of study for the M.F.A. degree are acting, playwriting, stage direction, scene design, lighting design, costume design, and technical direction. Most students should expect to spend three years to complete requirements for the M.F.A. degree.

The Ph.D. program provides students with training for scholarly research in theatre history, dramatic literature, theory, and criticism. The traditionally interdisciplinary nature of the degree program encourages students to conduct research in tutorial with faculty members in drama as well as with adjunct faculty from such disciplines as architecture, art, Asian languages and literature, Romance languages and literature, comparative literature, English, music, and Scandinavian languages and literature.

Admission Procedure

In the M.F.A. degree program, the Graduate Record Examination is required only for the directing option.

Acting: An audition is required; three letters of recommendation, statement of purpose, résumé, and picture.

Design (Costume, Lighting, and Scenery) or Technical Direction: Three letters of recommendation, résumé, statement of purpose for seeking the degree and career objectives, and a portfolio of designs, technical plots, or working drawings.

Directing: Three letters of recommendation, résumé, statement of purpose for acquiring a graduate degree, two directorial analyses (each not to exceed five typewritten pages, double spaced), one from each of the following two lists: 1. *Phaedra*, by Racine; *Baal*, by Brecht; *Hamlet*, by Shakespeare; *The Marquis of Keith*, by Wedekind; *Endgame*, by Beckett; *Measure for Measure*, by Shakespeare; *Kaspar*, by Handke. 2. *A Streetcar Named Desire*, by Williams; *Top Girls*, by Churchill; *The Seagull*, by Chekhov; *Execution of Justice*, by Mann; *Hedda Gabler*, by Ibsen; *Tales of the Vienna Woods*, by von Horvath; *A Patriot for Me*, by Osborne. The analysis should include interpretation of thematic and stylistic elements of the play; discussion of directorial problems involved in preparing the play for production; possibilities for solution of problems; ideas for style or scheme of production.

Playwriting: One full-length or three one-act plays, a résumé, a statement of purpose, and three letters of recommendation.

Doctor of Philosophy Degree: Three letters of recommendation; résumé, Graduate Record Examination scores, statement of purpose (educational and professional objectives), a piece of written work that represents the applicant's best. Students who enter the program are expected to have had some theatre experience, both practical and academic.

Course Descriptions

Courses for Undergraduates

DRAMA 101 Introduction to the Theatre (5) AWSp Quinn The theatre as an art form with emphasis on the play in production. The role of the various theatre artists: actors, directors, designers, and playwrights. Required attendance at one or more performances. Lecture and discussion groups. For nonmajors.

DRAMA 102 Text and Performance (5) S Analysis of plays. Introduction to genre and form in drama, both for the reader and practitioner. Illustrates historically the relationship between dramatic forms and theatrical production. For nonmajors.

DRAMA 200 Drama and the Child (3) Introduction to the use of drama and its related arts as a means of developing the processes of self-expression and communication basic to a child's general education.

DRAMA 201 Dramatic Action (5) Play structure through analysis of one-act plays in all genres, with special attention to plotting and the various means used to achieve a unity of action as the basis of all drama.

DRAMA 210, 211, 212 Theatre Technical Practice (4,4,4) Devin, Gates, Glerum Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. 210: technical procedures; 211: costumes; 212: stage lighting.

DRAMA 230 Introduction to Children's Drama (2) Valentinetti Survey of children's drama with an emphasis on philosophies and practices. Includes children's theatre, creative dramatics, and puppetry. Open to nonmajors.

DRAMA 250 Acting Skills for Everyday Life (4) S Introduction to acting techniques as tools for nonactors. Effective communication, relaxation, and stress reduction. Role playing, goal identification and achievement in public speaking, marketing presentations, courtroom persuasion, teaching situations. Skill development through theatre games, role playing, improvisation.

DRAMA 251, 252, 253 Acting (4,4,4) A,W,Sp Theory and practice of fundamentals. 251: development of fundamental aptitudes in acting (focus, recall, sense memory) through improvisation and basic scene work. 252: analysis and development of characterization. 253: advanced analysis, character rhythm, extended scene work. Prerequisites: 251 for 252; 252 for 253.

DRAMA 259 Performance Practicum (2-6, max. 12) S Special work in various aspects of performance technique.

DRAMA 290, 291, 292 Theatre Technical Practices Laboratory (1,1,1) AWSp,AWSp,AWSp Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Prerequisites: 210 for 290 or concurrent registration; 211 for 291 or concurrent registration; 212 for 292 or concurrent registration.

DRAMA 298 Theatre Production (1-2, max. 9) AWSp Laboratory course for students participating in School of Drama minor productions and projects. Prerequisite: being cast in a production or receiving a crew assignment.

DRAMA 302 Play Analysis (5) Analyses of plays, based on leading critical traditions. Illustrates variety of approaches to a play, criteria for choosing best approach for a given play, and ways in which criticism aids in understanding dramatic effect, for both reader and practitioner. Prerequisite: some theatre background. (Formerly 102.)

DRAMA 305 Computers in the Theatre (5) Computing and information systems as problem solving

tools for the theatre. Analysis of problems in theatre production and scholarship, with approaches to solutions through computing. Database, spreadsheet and CAD system applications in the practice and study of lighting and scenic design, theatre management, and research in theatre history and criticism.

DRAMA 313 Scenery Construction (3) Glerum

DRAMA 316 Theatrical Makeup (2) AWSp Basic principles, with intensive practice in application of makeup for use on proscenium and arena stages. Open to nonmajors.

DRAMA 331 Puppetry (3) AWSp Valentinetti Introduction to puppetry; construction and use of simple puppets as a visual aid in education, recreation, and therapy.

DRAMA 351, 352, 353 Advanced Acting (4,4,4) A,W,Sp Intensive course sequence in acting with integrated laboratory work in movement and voice. Improvisation, mime, scene analysis, and emphasis on realistic acting with introduction to styles and genres. Prerequisites: audition for 351; 351 for 352; 352 for 353.

DRAMA 371 Theatre and Society (5) Introduction to the history of the theatre from the Greeks to the present day. Development of the theatre as a social institution. Reading of major texts from each period.

DRAMA 372 Actors, Scenes, and Machines (5) Examines past and present productions of plays, musicals, operas, and related performances to understand the relationship between the performer, the playhouse, and scenic spectacle. Readings include selected plays and theoretical works. Recommended: 371.

DRAMA 373 Women in Theatre (5) Examines both the inclusion and exclusion of women by the cultural practice of theatre. Has two primary aims: to provide an historical overview of women to playwrighting, acting, directing and criticism, and to apply contemporary social issues to the practice, texts, and criticism of the stage. Recommended: 302.

DRAMA 374 History of the Greek Theatre and Its Drama (5) Wolcott Examination of the relationship of the physical theatre and the productions that took place within that theatre, with particular emphasis on the text performed, styles of acting, scenic elements, and the critical theories that influenced the theatre of the period. Prerequisite: 371 or permission of instructor.

DRAMA 377 History of the European Renaissance Theatre and Its Drama (5) Wolcott See 374 for course description. Prerequisite: 371 or permission of instructor.

DRAMA 378 History of the English Theatre and Its Drama: 1500-1700 (5) See 374 for course description. Prerequisite: 371 or permission of instructor.

DRAMA 391 Beginning Technical Practices (1-3, max. 9) Laboratory course involving specific production assignments, either in-shop or in-theatre, or both. Prerequisites: 290, 291, 292 or receiving a production assignment.

DRAMA 401 Drama Colloquium (0-0-1, max. 3) AWSp Weekly lectures by guest artists, presentations by faculty or students of works in progress. Required of all undergraduate and graduate drama majors each quarter in residence.

DRAMA 410 Advanced Theatre Technical Practices (2-4, max. 20) Production-related apprenticeship, in the areas of scene construction, scene painting, costume, or lighting. Prerequisites: 210, 211, 212, 418, or permission of instructor.

DRAMA 413 Advanced Scene Construction (3) A Special problems in scene construction materials and rigging. Prerequisites: 210, 212, 290, 292, 410 or equivalent practical experience, and 420.

DRAMA 414 Scene Design (3, max. 6) Dahlstrom, Forrester Theory, practice, and rendering of scene designs. Repeat of course involves intermediate designs, models, etc. Prerequisites: 210, ART H 203, or equivalent.

DRAMA 415 Stage Costume Design (3, max. 6) W Gates Theory, practice, and rendering of costume designs for the theatre. Repeat of course involves intermediate designs. Prerequisites: 211, ART 109 and ART H 203 or equivalent or permission of instructor; 416 for repeat of course.

DRAMA 416 History of Clothing and Costume (5) A Survey history of Western clothing and theatrical costume; emphasis on civil dress with attention to the distinctions in clothing for the stage. Open to nonmajors. Prerequisite: junior standing.

DRAMA 417 Stage Costume Patterning and Construction (3, max. 6) W Techniques of costume construction, including study of fabrics; emphasis on creating patterns by draping. Prerequisites: 211, 416, or permission of instructor.

DRAMA 418 Scene Painting (3, max. 6) Sp Forrester Lecture-laboratory with focus on techniques and principles of scene painting. Uses of various media and types of equipment as applicable to varied scenic pieces. Prerequisite: 210 or permission of instructor.

DRAMA 419 Stage Lighting (3) W Devin Theories and methods of lighting with emphasis on the design process and lighting plots. Laboratories consist of analysis of lighting instruments and control, color experiments, and basic circuitries. Prerequisite: 212 or equivalent.

DRAMA 420 Design and Technical Drafting (2, max. 4) A Laboratory and project critique covering stage design graphics and technical drawing; specifically: designer's elevations, ground plans, sections, detail drawing, transposition of design drawing information to technical drawings. Prerequisite: 210.

DRAMA 421 Drawing and Rendering Techniques for the Theatre (2) AWSp Forrester Weekly figure-drawing laboratories with live model and weekly field trips for laboratories in drawing natural phenomena and architectural detail. Studies in historical drawing styles. Practice in use of several media and techniques of expression. Prerequisites: 210, 211.

DRAMA 430 Improvisation Performance Practicum (3) Developing performance through improvisation in small ensembles. Creation of short plays for performance in local schools, emphasizing story theatre, participation-play formats, and the demands of child audiences. Improvement of improvisation skills. Prerequisite: 253 or permission of instructor.

DRAMA 431 Fundamentals of Puppetry (3, max. 9) Valentinetti Puppetry as a theatre art; construction and use of puppets and marionettes for formal presentations; basic principles of playwrighting and staging. Prerequisite: 331 or permission of instructor.

DRAMA 432 Child Drama (3) History and development, processes and products, and the place of child drama—including children's theatre, creative dramatics, film-radio-television, and puppetry—in contemporary society.

DRAMA 441 Beginning Playwriting (5, max. 10) Comtols Writing exercises and drafts of a one-act play provide first experience in writing for performance. Readings of representative one-act plays introduce genres and writing styles. Prerequisites: 253 or 353; 210, 211, 212; or practical theatre experience.

DRAMA 442 Intermediate Playwriting (5, max. 10) Comtols Two one-act plays rewritten for rehearsed reading. Readings of selected one-act plays address specific problems of playwright's craft. Prerequisite: 441 or practical theatre experience.

DRAMA 450 Rehearsal Laboratory (2, max. 6) Acting in projects directed by graduate directing students. Prerequisite: one year of acting and audition.

DRAMA 454 Projects in Acting (3, max. 9) Rehearsal and classroom performance of dramatic literature of various periods and styles. Prerequisite: audition.

DRAMA 457 Studio I (12, max. 36) AWSp Clay, Dixon, Moulton Skill development in acting, voice, speech, and movement necessary for professional training in acting. Prerequisite: admission to the Professional Actor Training Program.

DRAMA 458 Studio II (12, max. 36) AWSp Clay, Dixon, Moulton Continuation of 457. Prerequisites: 457 and completion of the first year of the Professional Actor Training program.

DRAMA 459 Studio III (8, max. 18) AWSp Clay, Dixon, Moulton Specialized and individualized work relating to the main curriculum of the third year of the Professional Actor Training Program. Prerequisites: 458 and completion of the second year of the Professional Actor Training Program.

DRAMA 460 Introduction to Directing (3) A Student is introduced to the art of the stage director. Prerequisites: 302; 253 or 353; 210, 211, 212; and permission of instructor.

DRAMA 461, 462 Elementary Directing (3,3) W,Sp Elementary study of the art of the stage director. Prerequisites: 460 and permission of instructor for 461; 461 and permission of instructor for 462.

DRAMA 466 Stage Management (2-5, max. 15) AWSp Devin Study and practice of stage management. Prerequisites: 210, 211, 212, 290, 291, 292, or permission of instructor.

DRAMA 472 History of the English Theatre and Its Drama: 1700-1900 (5) Witham Examination of the relationship of the physical theatre and the productions that took place within that theatre. Particular emphasis on the text performed, styles of acting, scenic elements, and the critical theories that influenced the theatre of the period. Prerequisite: 371 or permission of instructor.

DRAMA 473 Modern European Theatre and Drama (5) Sp Witham See 472 for course description. Prerequisite: 371 or permission of instructor.

DRAMA 475 Modern English Theatre and Drama (5) Witham Major trends in contemporary English theatre, post-World War II to the present. Performers, dramatists, and designers who shaped the course of the theatre following the "angry young rebellion" of the 1950s. Prerequisite: 371 or permission of instructor.

DRAMA 476 Modern American Theatre and Drama (5) Witham Major forces shaping modern American theatre, Eugene O'Neill to the present. Leading dramatists, directors, and designers of the post-World War II era. Experiments such as the federal theatre project, group theatre, and living theatre. Prerequisite: 371 or permission of instructor.

DRAMA 490 Special Studies in Acting-Directing (1-6, max. 6) AWSp Prerequisite: permission of instructor.

DRAMA 491 Special Studies in Design-Technical (1-6, max. 6) AWSp Prerequisite: permission of instructor.

DRAMA 492 Special Studies in Children's Drama (1-6, max. 6) AWSp Prerequisite: permission of instructor.

DRAMA 494 Special Studies in Theatre and Drama (5, max. 20) AWSp Witham, Wolcott Topics in drama, history, and criticism. See the quarterly *Time Schedule* for specific topic to be offered in a given quarter. Prerequisites: 302, 473, 476, or permission of instructor.

DRAMA 496 Stage Costume Problems (2, max. 8) Specific research problems of stage costume design and execution: accessories, masks, wigs, fabric modification, millinery or construction analysis for specialized costumes. Topics vary. Prerequisites: 211, 416, and permission of instructor.

DRAMA 497 Theatre Organization and Management (3) Sp Devin Theoretical and practical examination of the professional theatre organization and management: legal structures, funding, business practice, unions, and operational procedures. Open to non-majors.

DRAMA 498 Theatre Production (1-2, max. 9) AWSp Laboratory course for students participating in School of Drama major productions. Prerequisite: being cast in a production or receiving a crew assignment.

DRAMA 499 Undergraduate Research (1-5, max. 15) AWSp Prerequisite: permission of instructor.

Courses for Graduates Only

DRAMA 502 Designer-Director Analysis (4) A Dahlstrom Methods of examining plays to make the collaboration of director and designer productive. Attempts to create a structural whole from visual and verbal approaches to analysis. Prerequisite: graduate standing in drama.

DRAMA 510 Design Studio I (3, max. 9) AWSp Dahlstrom, Forrester, Gates Three-quarter sequential investigation of space, light, texture, and color in total theatre design, concurrently stressing mastery of the media and methods of presentation and execution. Prerequisites: concurrent registration in 518 or 519 and permission of instructor.

DRAMA 511 Design Studio II (3, max. 9) AWSp Dahlstrom, Forrester, Gates Artistic principles and techniques as a basis for creative work in theatre design. Studio work in composition, color, line, space, and light and shade. Reports and outside reading may be required. Prerequisites: 510, 518, 519, and permission of instructor.

DRAMA 512 Advanced Stage Lighting Design (3, max. 6) A Devin Advanced work in design of lighting for drama, opera, and dance; color theory; laboratory experimentation with color, fabric, paint, texture, and light; discussion of School of Drama production lighting. Prerequisites: 419 and 420 or permission of instructor.

DRAMA 513 Technical Direction (3, max. 9) AWSp Glerum Practical experience in mounting scenery for a current production; study of materials, techniques, management, and equipment of technical theatre; theatre planning and programming. Prerequisites: 413 and permission of instructor.

DRAMA 514 Design and Technical Theatre Colloquium (1, max. 9) AWSp Discussion of work in progress or completed in production, centering on the conceptual work of the designer/director on the production and the methods of execution in the shops and on stage.

DRAMA 515 Structures Analysis for the Theatre (3) Glerum Principles of engineering statics as applied to scenery construction problems

DRAMA 516 Stage Rigging (3) Glerum Theory and practice of hemp, counterweight, and motorized rigging systems for the stage.

DRAMA 518, 519 Studies in Historic Design (3,3) Dahlstrom, Forrester, Gates Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods. Prerequisite: 518 for 519, or permission of instructor.

DRAMA 520 Advanced Theatre Practicum (1-5, max. 15) AWSp Professional student internship with professional theatres: scenery, lighting, scene paint-

ing, costume, acting, directing, stage management, theatre management. Prerequisite: permission of instructor.

DRAMA 541 Graduate Playwriting Seminar I (3-6, max. 18) Comtois Workshop for development of new plays. Playwriting students develop one-act and full-length plays, which continue through rewriting until ready for public reading. Readings of representative contemporary full-length plays address specific problems of playwright's craft.

DRAMA 542 Graduate Playwriting Seminar II (3-6, max. 18) Comtois Continuation of play development through classroom critique, rehearsed readings, and twenty-hour rehearsal workshop productions. Readings address more complex craft problems. Regular rewriting of each student's work.

DRAMA 551, 552, 553 Teaching of Acting (3,3,3) Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisites: permission of instructor and being a teaching assistant in acting.

DRAMA 555 Special Problems in Acting (6, max. 18) AWSp Clay, Dixon, Moulton Audition techniques, style problems, popular entertainment techniques. Prerequisites: 458 and completion of the second year of the Professional Actor Training Program.

DRAMA 560 Directing Apprenticeship (4, max. 12) Student works in close association with faculty and visiting directors for the entire rehearsal period in major productions of the School of Drama. Prerequisites: admission to the graduate directing program and permission of the instructor.

DRAMA 561 Directing Projects (4, max. 24) Directing practicum. One-act plays, scenes, or acts from full-length plays. Contemporary, experimental American and European drama. Prerequisite: graduate standing in the directing program.

DRAMA 563 Seminar in Directing (2, max. 18) AWSp Seminar discussion of current productions; examination of problems of the stage director at the advanced level. Prerequisites: graduate standing in drama and permission of instructor.

DRAMA 564 Advanced Directing—Rehearsal (2, max. 6) Rehearsal techniques that can be used in defining style in a variety of contemporary and historical plays. Prerequisite: completion of first year of graduate directing program.

DRAMA 571, 572, 573 Problems in Theatre History Research (3,3,3) A,W,Sp Witham, Wolcott Methods and techniques of research in theatre history. Relationship of theatre arts to other arts and society in major periods of theatre history. Prerequisites: 571 for 572; 572 for 573.

DRAMA 575, 576, 577 Seminar in Theatre History (3,3,3) A,W,Sp Witham, Wolcott Prerequisites: 571, 572, 573.

DRAMA 581, 582, 583 Analysis of Dramatic Literature (3,3,3) A,W,Sp Modes of analysis intended for graduate students in drama (design, directing, and theatre history). Intensive analytical work on a limited number of play texts selected from the classical Greek period to the present.

DRAMA 585, 586, 587 Seminar in Drama (3,3,3) A,W,Sp Seminar in the historical development of dramatic criticism and theory.

DRAMA 599 Advanced Studies in Theatre Arts (1-5, max. 10) AWSp Independent projects or group study of specialized aspects of theatre arts. Prerequisite: permission of instructor.

DRAMA 600 Independent Study or Research (*) AWSp

DRAMA 700 Master's Thesis (*) AWSp

DRAMA 800 Doctoral Dissertation (*) AWSp

East Asian Studies

See *International Studies*.

Economics

301 Savery

The Department of Economics is concerned with the analysis of the ways in which societies organize the production of goods and services and the distribution of these among groups and individuals. Applied fields of study available to the student include: money and banking, industrial organization, natural resource economics, labor economics, public finance, economic history, comparative systems and development, international trade, and econometrics.

Undergraduate Program

John Burke, Adviser
304G Savery

Bachelor of Arts Degree

Admission Requirements: (1) A minimum of 45 transferable credits, including ECON 200, 201, 311 (or STAT 311), MATH 124 (or MATH 157), and one 5 credit course in English composition; (2) a cumulative grade-point average for all prior college work of at least 2.80; (3) grade-point average for the five courses required for entrance must average at least 2.80 with a minimum of 2.0 for each course (students who have repeated any of these five courses starting Winter Quarter 1983 must include both grades in the average); (4) transfer students must be enrolled at the University before they may apply.

Major Requirements: (1) Admission to the major; (2) a minimum of 50 credits in economics, including ECON 200, 201, 300, 301, 311 (or STAT 311), and at least five other upper-division courses in economics, at the 400 level, excluding ECON 496, 497, and 499; (3) grades of 2.0 or better in ECON 300 and 301; (4) one calculus course (MATH 124, 134, 157, or equivalent) and any two courses from the following: MATH 125, 126, 135, 136; PHIL 120, 370, 470; and ACCTG 210 or equivalent (only one accounting course may be used for this requirement); (5) transfer students are required to complete a minimum of 25 upper-division credits in economics in residence at this university.

Graduate Program

The department offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. The academic programs in economics are designed to develop trained economists for a variety of stimulating careers in teaching, in private industry, in government, and with international agencies at home and abroad. Frequent seminars—led by distinguished visitors from around the United States and from abroad, as well as by resident faculty and students—are conducted as an integral part of the department's broad agenda.

Special Requirements

Students need not have a full economics major as an undergraduate in order to apply, but should have taken intermediate-level courses in microeconomics and macroeconomics. Applicants should also have taken at least one year of calculus, one term of linear algebra, and one term of statistics. Applicants are required to take the Graduate Record Examination General Test and are encouraged to take the Subject Test in Economics.

Graduate requirements for the M.A. degree include ECON 500, 501, 502, 503, 508, 580, 581, and 582. In addition to this core program, M.A. students must take at least seven elective courses in economics at the graduate level. At least two of these courses must be in the same area (the field of specialization), and at least three of the courses must be in applied areas. M.A. students also must complete 6 credits of a supervised internship. Well-prepared students should be able to complete the M.A. program in two years.

Graduate requirements for the Ph.D. degree include ECON 500, 501, 502, 503, 508, 509, 580, 581, and 582. Ph.D. students are required to pass core examinations in microeconomics and macroeconomics. In addition to this core program, Ph.D. students must take eight other courses in economics at the graduate level. Each Ph.D. student must satisfy the requirements for two fields of specialization. The fields of specialization include advanced macroeconomic theory, advanced microeconomic theory, comparative systems and development, econometrics, industrial organization, international trade, labor economics, natural resource economics, and public finance.

Doctoral students must complete a doctoral dissertation. A foreign language is not required. A student with the recommended background can complete the doctoral program in four years, but most students take about five years.

Financial Aid

A number of teaching assistantships are awarded each year to incoming and continuing graduate students.

Research Facilities

The Institute for Economic Research provides support for graduate student and faculty research. The Center for Social Science Computation and Research maintains an extensive set of computer programs specifically designed for economic research, and the Data-bank service maintains a comprehensive economics data bank.

Professors

Barzel, Yoram,* 1961, M.A., 1956, Hebrew; Ph.D., 1961, Chicago; price theory.

Brown, Gardner M., Jr.,* 1965, (Environmental Studies), Ph.D., 1964, California (Berkeley); resource economics.

Cartwright, Philip W., 1947, (Emeritus), M.A., 1942, Ph.D., 1950, Stanford; macroeconomics, state and local fiscal policy.

Crutchfield, James A., 1949, (Emeritus), (Marine Studies, Public Affairs),† M.A., 1942, California (Los Angeles); Ph.D., 1954, California (Berkeley); economics.

Gillingham, J. Benton, 1947, (Emeritus), M.A., 1941, Wisconsin; economics.

Halvorsen, Robert,* 1972, M.B.A., 1965, M.P.A., 1968, Ph.D., 1973, Harvard; natural resources, public finance.

Hartman, Richard C.,* 1971, M.A., 1971, Ph.D., 1971, California (Berkeley); economic theory.

Lardy, Nicholas R.,* 1983, ‡(International Studies), Ph.D., 1975, Michigan; economics, Chinese economy.

Mah, Feng-Hwa,* 1961, (Emeritus), (International Studies),† A.M., 1956, Ph.D., 1959, Michigan; Chinese economy and foreign trade.

McCaffree, Kenneth M.,* 1949, (Emeritus), M.A., 1942, Denver; Ph.D., 1950, Chicago; labor economics and the economics of medicine.

McGee, John S.,* 1968, Ph.D., 1952, Vanderbilt; industrial organization.

Morris, Morris D., 1949, (Emeritus), Ph.D., 1954, California (Berkeley); economic history and the economy of India.

Mund, Vernon A., 1932, (Emeritus), M.B.A., 1929, Washington; Ph.D., 1932, Princeton; economics.

Nelson, Charles R.,* 1975, (Statistics), M.A., 1967, Ph.D., 1969, Wisconsin; time series analysis, economic statistical analysis, macroeconomics.

North, Douglass C., 1950, (Emeritus), Ph.D., 1952, California (Berkeley); economic history.

Parks, Richard W.,* 1970, M.A., 1964, Ph.D., 1966, California (Berkeley); econometrics.

Silberberg, Eugene,* 1967, Ph.D., 1964, Purdue; price theory.

Thornton, Judith A.,* 1961, M.A., 1958, Ph.D., 1960, Radcliffe; comparative systems, Soviet economics.

Turnovsky, Stephen J.,* 1988, M.A., 1963, Ph.D., 1968, Harvard; macroeconomics, international economics.

Worcester, Dean A., Jr.,* 1946, (Emeritus), M.A., 1940, Nebraska; Ph.D., 1943, Minnesota; comparative systems, policy related to income distribution.

Yamamura, Kozo,* 1970, ‡(International Studies, Marketing and International Business), M.A., 1962, Ph.D., 1964, Northwestern; economic development and economic history of Japan, comparative economic history.

Associate Professors

Bassett, Lowell R.,* 1966, M.S., 1964, Ph.D., 1966, Purdue; mathematical economics.

Hadjimichalakis, Michael G.,* 1969, M.A., 1967, Ph.D., 1969, Rochester; monetary theory and policy, macroeconomics, growth.

Kochin, Levis A.,* 1972, Ph.D., 1975, Chicago; macroeconomics, industrial organization.

Leffler, Keith B.,* 1978, M.A., 1974, Ph.D., 1977, California (Los Angeles); industrial organization, microeconomics.

Lundberg, Shelly J.,* 1984, Ph.D., 1981, Northwestern; labor and applied microeconomics.

Madden, Carolyn J. Watts,* 1975, ‡(Health Services, Public Affairs), M.A., 1974, Ph.D., 1976, Johns Hopkins; regulation insurance, health policy.

Plotnick, Robert,* 1984, ‡(Public Affairs, Social Work) M.A. 1973, Ph.D. 1976, California (Berkeley); economics of poverty, labor and social welfare policy, public policy.

Poznanski, Kazimierz Z.,* 1987, ‡(International Studies) M.A. 1969, Ph.D., 1974, Warsaw; international trade, comparative economic systems, technological change.

Rao, Potluri M.,* 1971, M.A., 1963, Delhi (India); Ph.D., 1969, Chicago; econometrics, statistics.

Startz, Richard,* 1984, Ph.D., 1978, Massachusetts Institute of Technology; macroeconomics, econometrics.

Stokes, Robert L.,* 1975, ‡(Marine Studies) M.A. 1971, Ph.D., 1975, Washington; natural resource economics, marine policy economics.

Thomas, Robert P.,* 1963, (Environmental Studies), Ph.D., 1964, Northwestern; economic history.

Wong, Kar-Yiu,* 1983, M.Phil., 1979, Chinese University of Hong Kong; M.Phil., 1981, Ph.D., 1983, Columbia; international trade and commercial policy.

Zerbe, Richard O.,* 1976, ‡(Public Affairs), Ph.D., 1969, Duke; economics, economics of regulation and pollution-control strategies.

Assistant Professors

Cogley, Timothy W., 1988, Ph.D. 1988, California (Berkeley); macroeconomics, econometrics.

Deolalikar, Anil,* 1989, Ph.D. 1981, Stanford; economic development.

Ellis, Gregory M. 1988, Ph.D. 1989, California, (Berkeley); natural resource and environmental economics, industrial organization.

Farrow, Raymond J., 1987, (Acting), M.A., 1980, Ph.D., 1990, Princeton; microeconomic theory, games and incentives, finance.

Gritz, Robert M., 1987, Ph.D., 1987, Stanford; labor economics, public finance, econometrics.

Miyagiwa, Kaz F.,* 1987, Ph.D., 1985, Texas; international trade theory.

Senior Lecturers

Heyne, Paul T., 1976, M.A., 1957, Washington (St. Louis); Ph.D., 1963, Chicago; introductory economics, history of economic thought.

Turnovsky, Michelle H. L., 1988, M.B.A., 1965, Ph.D., 1978, Australia National; microeconomics, international and environmental economics, industrial organization.

Course Descriptions

Courses for Undergraduates

ECON 100 Principles of Economics (5) Fundamental concepts of economic analysis with application to contemporary problems. No credit if 200 or 201 have been taken.

ECON 200 Introduction to Microeconomics (5) AWSps Analysis of markets: consumer demand, production, exchange, the price system, resource allocation, government intervention. Recommended: 1½ years of high school algebra and passing score on placement test for MATH 105, or equivalent.

ECON 201 Introduction to Macroeconomics (5) AWSps Analysis of the aggregate economy: national income, inflation, business fluctuations, unemployment, monetary system, federal budget, international trade and finance. Prerequisite: 200; recommended: 1½ years of high school algebra and passing score on placement test for MATH 105 or equivalent.

ECON 260 Economic History of the Western World (5) Analysis of the sources of long-run economic change from Neolithic times to the present. Develops basic analytical concepts of economic change and applies them to human history. First half of the course deals with economic development up to settlement of the American colonies; last half deals with American economic development.

ECON 299 Study Abroad: Economics (5, max. 10) For participants in the Study Abroad program. Specific course content determined by assigned faculty member and announced in Study Abroad bulletins.

ECON 300 Intermediate Price Theory (5) AWSps Choice decisions of individuals and firms: consequences of these decisions in product and factor markets. Consumption production and cost, exchange. Prerequisites: 200 and MATH 157 or 124, or equivalent.

ECON 301 National Income Analysis (5) AWSps Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Prerequisites: 201 and 300.

ECON 311 Introduction to Economic Statistics (5) Statistical concepts and their application in economics. Students may receive credit for only one of 311 and STAT 220, 301, 311. Prerequisites: 200, MATH 105 or 158.

ECON 316 Urban Economics (5) Application of economic analysis to urban trends, problems, and prescriptions, such as changing urban form and function, urban public finance, housing and renewal, poverty and race, transportation, and environmental problems. Joint with GEOG 316. Prerequisite: 200 or equivalent.

ECON 340 Labor Economics (5) Analysis of labor markets; factors determining size and composition of the labor force, demand for labor services, job search and unemployment, wage differences including discrimination, impact of labor unions on wages and resource allocations. Analysis of public policy. Prerequisites: 200, 201.

ECON 346 Economics of Health Care (3) Economic analysis of the health-care sector of economy: organization, demand and supply factors, pricing practices, financing mechanisms—public versus private, impact of third party, insurance and prepayment, health and economic development. Prerequisite: 200 or equivalent.

ECON 347 Introduction to Population and Economic Dynamics (5) Relationship between population and economics. Historical record, focusing on Europe and Japan and developing countries since World War II; consequences of population growth with respect to income per capita and other measures of economic welfare; ways in which economic factors affect fertility, migration, and mortality; population policy. Prerequisites: 200, 201.

ECON 350 Public Finance (5) Elementary treatment of the theory of public finance. Theory of social welfare maximization, externalities and public goods, benefit-cost analysis, and evaluation of the distributional and allocational effects of alternative types of taxes. Prerequisites: 200 and 201 or equivalent.

ECON 370 Introduction to International Economics (5) The theory of international trade, commercial policy, balance of payments, and foreign exchange notes with applications. Prerequisites: 200 and 201. Highly recommended: 301.

ECON 391 Economic Development (5) Critical appraisal of theories and problems of growth with emphasis on the less-developed countries of the world today. Prerequisites: 200, 201.

ECON 400 Fundamentals of Microtheory (5) Application of elementary mathematical methods to microeconomics. Development of comparative statics relations used in production and consumption theory, including derivation of the Slutsky equation and duality results. Prerequisites: 300, MATH 124; recommended: MATH 126.

ECON 401 Fundamentals of Macrotheory (3) Emphasis on applications to public policy. Designed primarily for graduate students majoring in fields other than economics. No credit if 301 has been taken. Prerequisite: permission of undergraduate adviser. Recommended: 200 or equivalent.

ECON 403 The Economics of Property Rights (5) Property rights as constraints for individual competition and interaction in society. Implications of different property rights for affecting economic behavior and for resource allocation and income distribution. Costs of transactions as determinants of contractual and institutional arrangements in light of the recent advancement of the theory of economic organization. Prerequisite: 300.

ECON 404 Industrial Organization and Price Analysis (5) Competition, collusion, monopoly, and oligopoly in regulated and unregulated markets. Economics of firm management, market organization, sales practices, and the antitrust laws. Prerequisite: 300 or equivalent.

ECON 406 Undergraduate Seminar in Economics (5) Provides undergraduate student an opportunity to apply the tools of economic analysis in a critical examination of theoretical and empirical work. A list of topics is available in the departmental office. Enrollment preference is given to majors in their junior or sophomore year. Prerequisites: 200 and permission of instructor.

ECON 407 Development of Economic Thought (5) From the early modern period to the present, with some discussion of its relation to natural science and other social sciences. The main subjects treated are Adam Smith and the classical school, Karl Marx, the neoclassical reformulation and its critics, and the impact of J. M. Keynes. Prerequisites: 200, 201, or equivalent. (Formerly 306.)

ECON 409 Undergraduate Seminar in Political Economy (5) Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Joint with POL S 409. Prerequisites: 300, POL S 270 and permission of instructor.

ECON 421 Money, Credit, and the Economy (5) Role of money and the banking system in the U.S. economy. Relation of money to inflation, interest rates, and business fluctuations. Monetary policy and Federal Reserve System. Prerequisites: 300, 301 or B ECON 300, 301; or equivalent.

ECON 422 Investment, Capital, and Finance (5) Accumulation and allocation of wealth by individuals; investment in producer and consumer durables by firms and households; separation of ownership from operating decisions via corporations; determination of market value; dividend policies and optimal investment criteria; introduction to financial decisions under uncertainty; elements of portfolio theory and the capital asset pricing model. Prerequisite: 300.

ECON 430 The Mixed Economy of Modern America (5) Study of interrelated economic, social, political, legal, and demographic factors in contemporary America. Attempt to comprehend synthetically the nature of the modern economy, with special attention given to governments, large corporations, and socioeconomic problems. Prerequisites: 300, 301, or permission of instructor.

ECON 431 Government and Business (5) Economic effects of various governmental regulatory agencies and policies. Antitrust legislation as a means of promoting desired market performance. Observed economic effects of policies intended to regulate business practices, control prices, conserve resources, or promote competition. Prerequisite: 300 or equivalent.

ECON 435 Natural Resource Utilization and Public Policy (5) Special emphasis on elements of economic theory relating to resource-oriented industries. Case studies in the theory and practice of resource management dealing with both stock and flow resources. Benefit-cost analysis and the evaluation of multipurpose resource projects. Prerequisite: 200 or permission of instructor.

ECON 443 Labor Market Analysis (5) Alternate course to 340. Basic subject matter is the same, but the analysis is more rigorous. Prerequisites: 300 or equivalent and a statistics course.

ECON 444 Topics in Labor Market Analysis (5) In-depth analysis of special topics in the operation of labor markets and public policies affecting incomes and employment. Course content varies by instructor. Prerequisite: 443.

ECON 445 Income Distribution and Public Policy (5) Income distribution implications and economic effects of public policies toward unemployment, illness, industrial accidents, old age, poverty, and discrimination from age, sex, or race. Prerequisites: 200, 201.

ECON 450 Public Finance I (5) Economic analysis of governmental activity: public goods and externalities, collective choice, cost-benefit analysis, public welfare programs. Prerequisite: 300.

ECON 451 Public Finance II (5) Microeconomics of taxation: efficiency, incidence, effect on distribution

of income, personal and corporate income taxes, sales and consumption taxes, taxation of property and estates. Prerequisite: 300.

ECON 452 Economic Theory as Applied to the Political System (5) Explanation and evaluation of political system, using elementary economics theory. Alternative voting rules, political effectiveness of various types of groups, causes and consequences of log-rolling, and bureaucratic organizations. Joint with POL S 416. Prerequisite: 200 or equivalent.

ECON 453 State and Local Public Finance (5) Analysis of Washington state taxes. Considers equity and efficiency in recent tax changes. Examines major budgeted Washington state programs to determine beneficiaries, who bears the costs, and the income transfers that occur in these programs.

ECON 480 Economic History of Europe (5) Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Joint with HST 481. Recommended: 200, 201.

ECON 482 Economic History of the United States to the Civil War (5) Systematic study of the changing pre-Civil War economic conditions and the consequences of these changes for the American society. Prerequisites: 200, 201, or equivalent.

ECON 483 Economic History of the United States From the Civil War to the Present (5) Systematic study of the changing economic conditions since the Civil War and the consequences of these changes for the American society. Prerequisites: 200, 201, or equivalent.

ECON 486 Economic History of China: 1840-1949 (5) Study of the post-1840 Chinese economy, with a brief introduction to the socioeconomic background of the earlier period. Explanations of China's long economic stagnation, and analyses of the impact of external factors and the role of the government in China's economic development before 1949. Recommended: 200, 201.

ECON 488 China's Economic Reforms—Integration into World Economy (5) Systematic survey of China's economic reforms since 1978, including China's increasing integration into the world economy. Joint with SISEA 488. Prerequisite: 490 or 493 or permission of instructor.

ECON 471 International Trade (5) Theory of comparative advantage and different models of international trade. Trade and welfare; the theory and practice of commercial policy. Economic integration. Factor mobility and trade flows. The North-South debate. Prerequisites: 300, 301.

ECON 472 International Finance (5) Monetary problems in international trade and macroeconomics of the open economy. Features of different exchange-rate systems and their adjustment mechanisms. Money and international capital movements. Policies for internal and external balance. Prerequisites: 300, 301.

ECON 476 Economics of the European Economic Community (5) Analysis of economic issues relating to the European economic community. Explores the institutional aspects, the attempt to coordinate social and economic policies—welfare, employment, commercial, fiscal, and monetary—and the economic linkages between the EEC and the rest of the world. Prerequisites: 300, 301.

ECON 481 Introduction to Mathematical Statistics (5) Probability, generating functions, 8 method, Jacobians, Bayes theorem, maximum likelihoods, Neyman-Pearson efficiency, decision theory, regression, correlation, bivariate normal. Joint with STAT 481. Students receiving credit for either STAT 341 or 390 may not re-

ceive credit for 481. Prerequisites: 311, STAT 311, or equivalent; MATH 124, 125, 126; and a course in linear algebra, which may be taken concurrently.

ECON 482 Introduction to Regression Analysis (5) Specification and estimation of economic models, using regression analysis. Prerequisites: 300, 311, or STAT 311.

ECON 483 Econometric Modeling I (5) Availability of Washington State economic statistics, processing techniques, and econometric models. Build econometric models to meet stated assumptions to forecast regional economic variables. Prerequisites: 300, 311.

ECON 484 Econometric Modeling II (5) Applies computer-based econometric modeling techniques to the analysis of regional economic data. Prerequisite: 483.

ECON 490 Comparative Economic Systems (5) Study of resource allocation, growth, and income distribution in capitalist, market socialist, and centrally planned economies. Prerequisites: 300, 301. (Formerly 390.)

ECON 491 Issues in Economic Development (5) Examines major theories of economic development and the practical experience of developing countries. Prerequisites: 300, 301.

ECON 493 Economy of Modern China (5) Analytical survey of economic development of modern China, with special emphasis on the objectives, performance, and problems of the mainland Chinese economy under communism. Prerequisites: 200, 201, or permission of instructor.

ECON 494 Economic Growth of Japan Since 1850 (5) Analysis of the economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisites: 200 and 201, or permission of instructor.

ECON 495 The Economy of Soviet Russia (5) Analytical survey of techniques of planning and resource allocation in the Soviet economy. Criteria for evaluating economic performance, growth, and efficiency. Prerequisite: 300 or equivalent or permission of instructor.

ECON 496 Honors Seminar (5) W Honors and other superior students are given opportunity to develop research techniques, to pursue topics in breadth and depth, and to apply their tools of economic analysis to selected topics in economic theory and current issues of national and international economic policy. For seniors only. Prerequisite: permission of undergraduate adviser.

ECON 497 Honors Directed Study (5) Sp Students individually arrange for independent study of selected topics in economic theory and its application under the direction of a member of the economics faculty. The research paper, if accepted, is the student's senior thesis. Prerequisite: permission of undergraduate adviser.

ECON 499 Undergraduate Research (1-5, max. 10) AWSps May not be applied toward an advanced degree. Prerequisite: permission of undergraduate adviser.

Courses for Graduates Only

ECON 500 Microeconomic Analysis I (4) Consumer demand, cost, and supply and the theory of markets. Prerequisite: 300, or permission of instructor.

ECON 501 Microeconomic Analysis II (4) Production and factor demands, the supply factor. Factor markets and distribution of income. Capital theory and resource allocation over time. Prerequisite: 500.

ECON 502 Macroeconomic Analysis I (4) Analysis of theories of income, employment, and output under static conditions; quantity theory of money; relation of monetary and "real" theories; stability and instability of income over time; growth of the economy. Prerequisites: 300 and 301, or permission of instructor.

ECON 503 Macroeconomic Analysis II (4) Recent developments. Prerequisite: 502.

ECON 504 Economic History and Economic Development (3) Analysis of determinants of long-run development, emphasizing institutional, demographic, and technological changes; consideration of both theoretical and empirical studies. Prerequisite: 300 or equivalent.

ECON 505 Microeconomic Theory: Problems and Applications (3) Seminar for graduate students who have completed the basic core sequence in price theory. Designed to extend the student's analytic and problem-solving abilities by working systematically through a programmed set of readings and problems. The material includes both formal analytical techniques and applications of economic theory. Prerequisite: 501.

ECON 507 History of Economic Thought (3) Classical and neoclassical economics with emphasis on alternative conceptions of the nature and significance of economic science.

ECON 508 Microeconomic Analysis III (4) The role of time and uncertainty in microeconomic analysis. Prerequisites: 500, 501.

ECON 509 Macroeconomics III (4) Modern macroeconomic research models. Prerequisite: 503.

ECON 511 Advanced Microeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced microtheory. Selected topics of special interest and significance. Prerequisites: 500, 501.

ECON 512 Advanced Macroeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced macrotheory. Selected topics of special interest and significance.

ECON 513 Mathematical Economics: Linear Analysis (5) Theory and application of linear algebra and linear economic models. Prerequisites: 300, MATH 124, 125, 126.

ECON 514 General Equilibrium Analysis (3) Study of the existence, uniqueness, and stability of general equilibrium models under the assumptions of competition. Emphasis is on recent developments in the literature with consideration given to both positive and normative economics.

ECON 515 Special Topics in Mathematical Economics (3, max. 12)

ECON 517 Foundations of Economic Analysis (5) Sources of meaningful comparative statics theorems in economics, with special emphasis on extremum problems and qualitative analysis. Necessary mathematical concepts are developed. Prerequisites: 300, MATH 124, 125, 126.

ECON 520 The Economics of Property Rights (3) Application of standard economic theory to analyze various forms of property rights as constraints of competition; the costs associated with delineation and enforcement of rights; the costs of negotiating and enforcing contracts for right transfers; resource allocation and income distribution implied by different property right and transaction cost constraints. Prerequisites: 500 and 501, or permission of instructor.

ECON 530 Government Regulation of Business (3) Public policy in the United States with respect to industrial organization and business conduct. Economic issues in antitrust policy emphasized. Prerequisites: 500, 501.

ECON 531 Theory of Industrial Organization (3) The application of game theory to problems of strategic behavior that arise in the study of industrial organization. Topics include vertical integration, short- and long-run price competition, folk theorems, empirical tests of oligopoly pricing models, entry deterrence, research and development, and product differentiation. Prerequisites: 500, 501.

ECON 532 Economic Theory of Regulation (3) Develops a political-economy framework for analyzing regulations and regulatory reform. Influence of legal history. Theories of regulation and regulatory behavior. Joint with PB AF 532. Prerequisite: PB AF 516 or permission of instructor.

ECON 533 Price Policy and Industrial Organization (3) Advanced analysis of pricing, market structure, and industry performance. Recent empirical and theoretical literature emphasized. Prerequisites: 500, 501.

ECON 535 Economics of Natural Resources I (3) Pricing, allocation, and utilization of nonrenewable natural resources. Dynamic optimization, exploration, and technological relationships. Benefit-cost analysis and public investment criteria. Prerequisites: 500, 501, or permission of instructor.

ECON 536 Economics of Natural Resources II (3) The second of two-course sequence. Renewable resources, including fisheries and forestry. Externality theory and pollution-control policies. Prerequisite: 535.

ECON 537 Economic Aspects of Marine Policy I (3) Development of pertinent economic concepts and their application to selected topics in marine policy decision making. Joint with IMS 537. Prerequisite: IMS 500 or permission of instructor.

ECON 538 Economic Aspects of Marine Policy II (3) Development of pertinent economic concepts and their application to selected topics in marine policy. Joint with IMS 538. Prerequisite: 537 or permission of instructor.

ECON 539 Economics of Natural Resources Seminar III (3) Selected advanced topics in the economics of natural resources. Recent empirical and theoretical research. Active participation in ongoing research projects by students is essential. Prerequisites: 535, 536.

ECON 541, 542 Labor Economics (3,3) Selected topics in labor economics.

ECON 543 Population Economics (3) Economic determinants and consequences of population growth; emphasis on formal theoretical models and on empirical analysis. Introduction to: formal demography; welfare economics of population change, including analyses of population effects on consumption, savings, investment, and technical change; and determinants of mortality, fertility, and migration. Prerequisites: 500, 501, or permission of instructor.

ECON 546 Health Economics (3) Theoretical and empirical models of the demand for health and health care; supply of health care from physicians and hospitals; government programs that subsidize health care; occupational health; cost-benefit analyses of preventive health care and new medical technologies. Prerequisites: graduate-level microeconomics, HSERV 585, or permission of instructor.

ECON 547 Advanced Seminar in Health Economics (3) Selected topics in health economics, including risk and insurance, medical malpractice, the market for physician services, and industry regulation. Joint with HSERV 559. Prerequisites: 546 or HSERV 585, advanced-level microeconomic theory, or permission of instructor.

ECON 548 Economics of Labor and Human Resources (3) Economic analysis of policy-related topics in human resources. Topics include labor demand and supply, education and occupation, wage struc-

tures and income inequality, discrimination, and poverty. Joint with PB AF 548. Not open to economics majors.

ECON 550 Public Finance I (3) Theory of public finance with emphasis on public expenditures. Social welfare maximization, public goods and externalities, decreasing cost industries, theory of collective choice, second-best analysis, and benefit-cost analysis. Prerequisite: 500, 501, or permission of instructor.

ECON 551 Public Finance II (3) Theory of public finance with emphasis on taxation. Second-best analysis, optimal taxation, general equilibrium incidence analysis, issues in personal income taxation and corporate income taxation. Prerequisite: 500, 501, or permission of instructor.

ECON 553 Economic Analysis and Government Programs (3) Applications of economic analysis to public enterprises and programs.

ECON 554 Advanced Seminar in Cost-Benefit Analysis (3) Techniques of, and theoretical foundation for, cost-benefit analysis as applied to the public sector. Joint with PB AF 554. Prerequisite: PB AF 553.

ECON 556 Seminar in Urban Economics (3) Use of economic theory to explain land-use trends, transportation, housing and renewal, the ghetto, and the public economy in urban areas. Joint with GEOG 556. Prerequisites: 300, 301, or equivalent.

ECON 561 European Economic History (3) Economic growth of the Western world since the decline of the Roman Empire. Prerequisite: 504.

ECON 562 American Economic History (3) Analytical methods; sources and reliability of data; consideration of some major issues in current research. Prerequisites: 500, 504.

ECON 571 International Trade Theory (3) Application to international trade and investment of microeconomics, general equilibrium theory, and welfare economics. Prerequisites: 500, 501.

ECON 572 International Finance (3) Analysis of open economy macro models with emphasis on exchange rates and balance of payments determination. Prerequisites: 502, 503.

ECON 573 International Commercial Policy (3) Analysis of welfare aspects of international trade and factor mobility. Costs and benefits of protection; implications of different government policies. Important competition and response. Prerequisite: 571 or permission of instructor.

ECON 580, 581, 582 Econometrics I, II, III (4,4,4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: 580 for 581; 581 for 582.

ECON 583 Econometric Theory I (3) Estimation and testing in the classical linear regression model. Extensions of the model and applications to the analysis of economic data. Prerequisites: 580, 581, 582 or equivalent.

ECON 584 Econometric Theory II (3) Continuation of 583. Topics include serial correlation, distributed lag models, multiple equation models. Prerequisite: 583.

ECON 585 Topics in Econometric Theory (3) Explores advanced econometric problems that arise in current research and the techniques to handle them. Seminar format; examples from recent econometric literature. Topics vary. Prerequisite: 584.

ECON 590 Theory and Practice of Economic Planning (3) Analysis of incentives for, and methods of, government intervention in socialist and developing countries, with a focus on microeconomic issues.

ECON 591 Theoretical Issues in Economic Development (3) Analysis of issues in economic development with application to the less-developed countries of the world today. Prerequisites: 500, 501, or permission of instructor.

ECON 595 Analysis of Socialist Economies (3) Analysis of economic planning, resource allocation, and the performance of economic units in centralized and decentralized socialist economies. Prerequisite: permission of instructor.

ECON 600 Independent Study or Research (*)

ECON 601 Internship (3-9, max. 9)

ECON 602 Teaching Introductory Economics (1) Examines problems encountered in preparing and presenting courses in introductory economics and offers practice in classroom teaching.

ECON 800 Doctoral Dissertation (*)

English

A101 Padelford

Undergraduate Program

Mark Patterson
Director, Undergraduate Programs
A11 Padelford

Advisers
A2B Padelford

The Department of English offers courses in English, American, and related literature; literary history and criticism; expository and creative writing; and related subjects. Courses in the English curriculum cover a wide range of interests in the study of cultural and intellectual history, pertinent to many vocations and careers, on the premise that a knowledge of language and literature is fundamental to a university education. Department programs include a study abroad program in London each Spring Quarter, an honors program, and an internship program.

Bachelor of Arts Degree

MAJOR REQUIREMENTS

No credits in 100-level courses and only 15 credits in 200-level courses may be counted toward the major. Lists of approved courses referred to in the following descriptions are available from the English Advising Office, A2B Padelford.

Language and Literature: A minimum of 58 credits; 30 credits in approved literary period courses [including at least 5 credits in each of the following five periods and an additional 5 credits in period (1) or (2)]. (1) early period; (2) seventeenth- and eighteenth-century English literature; (3) nineteenth-century English literature; (4) American literature to 1917; (5) twentieth-century British and American literature; one approved course in other literature (a literature course taught in another department, not jointly listed with English, either in English translation or in the original language); and 25 elective credits in English courses. No more than 5 credits in expository or creative writing courses may be counted toward the major.

Creative Writing: A minimum of 61 credits; 25 credits in creative or expository writing courses, at least 15 of which must be at the 300-400 levels and must include course work in at least two forms (i.e., poetry, drama, short story, novel, expository writing); 30 credits distributed in approved literary period courses (see above under Language and Literature); one approved course in other literature (a literature course taught in another department, not jointly listed with English, either in English translation or in the original language); and one approved course in language study, literary theory, or practical criticism.

Teacher Certification: For major requirements for prospective elementary and secondary school teachers, see the College of Education section of this catalog. Detailed information on major requirements is available in the Department of English advising office, A2B Padelford.

Graduate Program

Miceal F. Vaughan, Graduate Program Coordinator

The Department of English offers a complete program of graduate courses and seminars designed to provide aspirants for the Master of Arts and Doctor of Philosophy degrees with a knowledge of literature and the necessary scholarship for training in literary criticism and theory, literary history, language study, and rhetoric and composition theory. The Master of Fine Arts program in creative writing emphasizes projects in imaginative writing, supported by courses in criticism and literary periods and types. A special degree program, the Master of Arts for Teachers, is offered for English teachers in secondary schools and community colleges and for those interested in teaching English as a second language. The graduate program permits completion of master's degree requirements in four quarters and doctoral degree requirements in five years. In a typical five-year program, a student is encouraged to complete course requirements (normally 75 credits) during the first three years, the General Examination for the doctorate in the fourth year, and the dissertation in the fifth year.

Financial Aid

The department annually awards approximately twenty new teaching assistantships. To be considered for the following autumn, applicants must submit an assistantship application and supporting materials and be admitted to the graduate program by February 1. A statement of purpose, three recommendations, the GRE general test, the GRE subject test (literature in English) and a critical writing sample are required.

Master of Arts Degree

Admission Requirements: Bachelor of Arts degree. Major in English equivalent to that awarded by the University of Washington preferred. Graduate Record Examination general test and subject test (literature in English). Two letters of recommendation. Statement of Purpose.

Graduation Requirements: Intermediate-level proficiency in a language other than English. 40 credits, including 30 credits in graduate English seminars. For students continuing to the doctoral program, a 10-credit master's essay. For a terminal master's degree, students may substitute 10 additional credits in graduate English seminars for the master's essay. A maximum of 5 credits may be transferred from an accredited graduate program elsewhere.

Master of Fine Arts Degree

Admission Requirements: Bachelor of Arts degree, Graduate Record Examination general test, two letters of recommendation, statement of purpose, and a writing sample (must be received two weeks before application deadline).

Graduation Requirements: Intermediate-level proficiency in a language other than English. 55 credits, including 20 credits in creative writing, 15 credits in graduate English seminars (5 credits must be from a seminar numbered 506-509), 5 elective credits, 15 thesis credits, annotated reading list. Final oral examination.

Master of Arts for Teachers Degree

Admission Requirements: Same as for the Master of Arts degree, but usually including prior teaching experience.

Graduation Requirements: 40 credits, including ENGL 535, 553, and 580, and of which 25 must be in courses numbered 500 or above; 15 of these may be taken outside the department in courses related to the teaching of English, subject to approval. A maximum of 5 credits may be transferred from an accredited graduate program elsewhere. Intermediate-level proficiency in a language other than English. A final comprehensive written examination.

Master of Arts for Teachers Degree (English as a Second Language)

Admission Requirements: Bachelor of Arts degree, Graduate Record Examination general test, statement of purpose, two letters of recommendation. Students without training in linguistic method and theory must take LING 400 as a prerequisite for 400-level linguistics courses.

Graduation Requirements: 46-49 credits, including ENGL 555, 556, 557, 558; LING 451, 461; 7 credits from LING 445, 447, 449, 452, 462; 5 credits from ENGL 441, 444, 504, 533, 535, 553; one course from approved list of electives; 3-6 credits of ENGL 560. Intermediate-level proficiency in a language other than English.

Doctor of Philosophy Degree

Admission Requirements: By petition to Graduate Studies Committee upon completion of the M.A. degree option in literature. Students with recent master's degrees from other institutions are admitted at the post-master's level following the guidelines for admission to the M.A. option in literature and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transferring with a master's degree from other institutions may be required to submit an equivalent to the master's essay. Students with writing M.F.A. or M.A.T. degrees from the University must complete course work and language requirements for the M.A. degree option in literature.

Graduation Requirements: 75 graded credits of electives in graduate English seminars as advised by the student's Supervisory Committee. Students with a recent master's degree from another university may count up to 30 credits from the master's program, upon approval of the director of graduate studies. Students with a master's degree from the University of Washington may count up to 40 credits in courses taken before admission to the doctoral program. Doctoral students may count up to three courses (400 level and above) taken in other departments toward fulfilling degree requirements. Fluency in at least one language other than English, plus whatever additional language study the Supervisory Committee advises. Written examinations in (1) historical period, (2) specialized field of study, (3) genre or second period; an oral General Examination on an individualized topic; 27 credits of ENGL 800 (Dissertation) and a Final Examination based on the dissertation.

Faculty

Chairperson

Richard J. Dunn

Professors

Adams, Hazard S.,* 1977, (Comparative Literature),† M.A., 1949, Ph.D., 1953, Washington; romanticism, history of literary theory, Anglo-Irish literature.

Adams, Robert P., 1947, (Emeritus), Ph.D., 1937, Chicago; Renaissance literature.

Alexander, Edward,* 1962, M.A., 1959, Ph.D., 1963, Minnesota; Victorian literature.

Altieri, Charles F.,* 1975, (Comparative Literature),† Ph.D., 1969, North Carolina; twentieth-century literature, critical theory, history of criticism.

Bentley, G. Nelson,* 1952, (Emeritus), M.A., 1945, Michigan; poetry writing.

Blake, Kathleen A.,* 1971, (Women Studies) M.A., 1967, California (Los Angeles); Ph.D., 1971, California (San Diego); Victorian literature, children's literature, women's studies.

Brown, Malcolm J., 1944, (Emeritus), Ph.D., 1946, Washington; Anglo-Irish literature (nineteenth and twentieth centuries).

Brown, Marshall J.,* 1988, (Comparative Literature),† M.Phil., 1969, Ph.D., 1972, Yale; comparative literature, eighteenth-century literature.

Burns, Wayne, 1948, (Emeritus), A.M., 1940, Harvard; Ph.D., 1946, Cornell; Victorian literature.

Dillon, George L.,* 1986, M.A., 1966, Ph.D., 1969, California (Berkeley); rhetoric, composition.

Dunn, Richard J.,* 1967, M.A., 1961, Ph.D., 1964, Western Reserve; Victorian literature, English novel.

Eby, E. Harold, 1927, (Emeritus), Ph.D., 1927, Washington; American literature.

Emery, Donald W., 1934, (Emeritus), M.A., 1928, Iowa; English grammar.

Fowler, David C.,* 1952, (Emeritus), M.A., 1947, Ph.D., 1949, Chicago; medieval literature.

Fray, Charles H.,* 1970, J.D., 1960, Harvard; Ph.D., 1971, Yale; Renaissance literature, Shakespeare.

Gerstenberger, Donna L.,* 1960, (Women Studies), M.A., 1952, Ph.D., 1958, Oklahoma; twentieth-century literature, Anglo-Irish literature, feminist criticism.

Harris, Markham, 1946, (Emeritus), M.A., 1931, Williams; fiction writing.

Heilman, Robert B., 1948, (Emeritus), M.A., 1930, Ohio State; M.A., 1931, Ph.D., 1935, Harvard; drama.

Irmscher, William F.,* 1960, (Emeritus), M.A., 1947, Chicago; Ph.D., 1950, Indiana; rhetoric and theory of composition.

Johnson, Charles R.,* 1976, M.A., 1973, Southern Illinois; fiction writing.

Jones, Frank W., 1955, (Emeritus), (Comparative Literature, Drama),† Ph.D., 1941, Wisconsin; M.A., 1955, Oxford (England); comparative literature.

Kartiganer, Donald M.,* 1964, M.A., 1960, Columbia; Ph.D., 1964, Brown; twentieth-century literature.

Korg, Jacob,* 1955, M.A., 1947, Ph.D., 1952, Columbia; Victorian, twentieth-century literature.

Lockwood, Thomas F.,* 1967, Ph.D., 1967, Rice; eighteenth-century literature.

Matchett, William H.,* 1954, (Emeritus), M.A., 1950, Ph.D., 1957, Harvard; Renaissance literature, Shakespeare.

McCracken, David,* 1966, M.A., 1962, Ph.D., 1966, Chicago; eighteenth-century literature.

McElroy, Colleen W.,* 1973, (Women Studies), M.A., 1963, Kansas State; Ph.D., 1973, Washington; Black literature, woman writers, poetry writing.

McHugh, Heather,* 1982, M.A., 1973, Denver; poetry writing, modern poetry.

Modiano, Raimonda,* 1973, (Comparative Literature),† Ph.D., 1973, California (San Diego); romanticism.

Pellegrini, Angelo M., 1930, (Emeritus), Ph.D., 1942, Washington; Shakespeare.

Posnock, Ross,* 1983, M.A., 1976, Ph.D., 1980, Johns Hopkins; American literature.

Reinert, Otto,* 1956, (Drama, Scandinavian Languages and Literature), (Comparative Literature),† M.A., 1948, Ph.D., 1952, Yale; comparative literature, eighteenth-century literature.

Russ, Joanna,* 1977, (Women Studies), M.F.A., 1960, Yale; fiction writing.

Sale, Roger H.,* 1962, M.A., 1954, Ph.D., 1957, Cornell; Renaissance literature.

Shulman, Robert P.,* 1961, M.A., 1954, Ph.D., 1959, Ohio State; American literature.

Simonson, Harold P.,* 1968, M.A., 1951, Ph.D., 1958, Northwestern; American literature.

Stevick, Robert D.,* 1962, M.A., 1951, Tulsa; Ph.D., 1956, Wisconsin; medieval language and literature.

Stirling, Brents, 1932, (Emeritus), Ph.D., 1934, Washington; Renaissance literature.

Streitberger, William R.,* 1973, M.A., 1971, Ph.D., 1973, Illinois; Renaissance literature, textual criticism, paleography.

Tollefson, James W.,* 1980, M.A., 1973, Purdue; Ph.D., 1978, Stanford; English as a second language, language planning.

Wagoner, David R.,* 1954, M.A., 1949, Indiana; twentieth-century literature, fiction and poetry writing.

Watkins, Evan P.,* 1982, Ph.D., 1972, Iowa; critical theory, modern and contemporary British and American literature.

Webb, Eugene,* 1966, ‡(Comparative Literature, International Studies), M.A., 1962, Ph.D., 1965, Columbia; modern English, French, and German literature, comparative religion.

Zillman, Lawrence J., 1931, (Emeritus), Ph.D., 1936, Washington; romanticism.

Associate Professors

Abrams, Robert E.,* 1971, Ph.D., 1973, Indiana; American literature.

Allen, Carolyn J.,* 1972, (Women Studies), M.A., 1966, Claremont; Ph.D., 1972, Minnesota; twentieth-century literature, woman writers, contemporary critical theory.

Altieri, Joanne S.,* 1977, M.A., 1964, Ph.D., 1969, North Carolina; Renaissance literature.

Bosworth, David,* 1984, B.A., 1969, Brown; fiction writing, modern fiction and poetry, American Puritans.

Brenner, Gerald J.,* 1966, M.A., 1960, San Francisco State; Ph.D., 1969, New Mexico; American literature, fiction writing.

Butler, Johnella E.,* 1987, ‡(American Ethnic Studies, Afro-American Studies, Women Studies), M.A.T., 1969, Johns Hopkins; Ed.D., 1979, Massachusetts; Afro-American literature, American ethnic literature, women studies.

Butwin, Joseph M.,* 1970, A.M., 1966, Ph.D., 1971, Harvard; Victorian literature.

Coldewey, John C.,* 1972, M.A., 1969, Northern Illinois; Ph.D., 1972, Colorado; Renaissance literature, medieval drama.

Duckett, Margaret R., 1947, (Emeritus), M.A., 1941, North Carolina; American literature.

Dunlop, William M.,* 1962, M.A., 1965, Cambridge; Shakespeare, nineteenth-century literature, poetry writing.

Fisher, Alan S.,* 1968, M.A., 1964, Ph.D., 1969, California (Berkeley); Renaissance, seventeenth- and eighteenth-century literature, history of literary criticism.

Gould, Florence J., 1948, (Emeritus), M.A., 1931, Oregon; creative writing.

Griffith, John W.,* 1968, Ph.D., 1969, Oregon; American literature.

Handwerk, Gary J.,* 1984, Ph.D., 1984, Brown; literary theory, English and Irish nineteenth- and twentieth-century narrative.

Hudson, Lois P.,* 1969, A.M., 1951, Cornell; D.Litt. (Hon.), 1965, North Dakota State; fiction writing.

Jeffords, Susan,* 1985, M.A., 1977, Ph.D., 1981, Pennsylvania; feminist and literary theory, novel.

Kaplan, Sydney J.,* 1971, (Women Studies), † M.A., 1966, Ph.D., 1971, California (Los Angeles); twentieth-century literature, woman writers, feminist criticism.

Kenney, Richard L.,* 1987, B.A., 1970, Dartmouth; poetry.

LaGuardia, Eric H.,* 1961, A.M., 1955, Columbia; Ph.D., 1961, Iowa; Renaissance literature.

Longyear, Christopher R.,* 1972, M.A., 1955, Ph.D., 1961, Michigan; linguistics.

Markley, Robert M.,* 1987, M.A., 1976, Ph.D., 1980, Pennsylvania; eighteenth-century English literature.

Mussetter, Sally A.,* 1978, M.A., 1962, Ohio State; Ph.D., 1975, Cornell; medieval language and literature.

Palomo, Dolores J.,* 1971, (Women Studies), M.A., 1968, Wayne State; Ph.D., 1972, State University of New York (Buffalo); Renaissance literature, woman writers.

Patterson, Mark R.,* 1981, Ph.D., 1981, Princeton; American literature.

Person, Henry A., 1937, (Emeritus), Ph.D., 1942, Washington; English language.

Pollak, Vivian R.,* 1986, M.A., 1961, Ph.D., 1969, Brandeis; nineteenth-century American literature, American woman writers, biography.

Searle, Leroy F.,* 1977, M.A., 1968, Ph.D., 1970, Iowa; twentieth-century literature, critical theory, American studies.

Shapiro, Steven,* 1984, M.A., 1977, M.Phil., 1978, Ph.D., 1981, Yale; contemporary literary theory, Romantic poetry, twentieth-century literature.

Silberstein, Sandra V.,* 1982, (Women Studies), M.A., 1971, Ph.D., 1982, Michigan; English as a second language, sociolinguistics.

Smith, Eugene H.,* 1960, (Emeritus), M.A., 1954, Ph.D., 1963, Washington; rhetoric and theory of composition.

Stanton, Robert B.,* 1956, (Emeritus), M.A., 1950, Kansas City; Ph.D., 1953, Indiana; American literature.

Toolan, Michael J.,* 1986, M.A., 1976, Edinburgh; Ph.D., 1981, Oxford; linguistics and literature.

van den Berg, Sara J.,* 1980, M.A., 1965, M.Phil., 1967, Ph.D., 1969, Yale; Renaissance and seventeenth-century literature.

Vaughan, Mical F.,* 1973, (Comparative Literature), † M.A., 1973, Ph.D., 1973, Cornell; medieval language and literature.

Webster, John M.,* 1972, M.A., 1969, Ph.D., 1974, California (Berkeley); Renaissance literature.

Yaggy, Elmer M., 1943, (Emeritus), M.A., 1939, Idaho; Ph.D., 1946, Washington; American literature, expository and fiction writing.

Assistant Professors

Cummings, Katherine,* 1985, M.A., 1979, Montclair State; Ph.D., 1985, Wisconsin (Madison); feminist, psychoanalytical, and literary theory, modern and contemporary literature.

Doyle, Anne E., 1987, (Acting), M.A., 1974, Boston College; composition, history of rhetoric.

Griffith, Malcolm A.,* 1986, M.A., 1962, Ph.D., 1966, Ohio State; twentieth-century literature, modern criticism, American literature.

Guerra, Juan C., (Acting), 1990, M.A., 1983, Illinois (Chicago); rhetoric and composition.

Remley, Paul G.,* 1988, M.A., 1985, Cambridge (England); Ph.D., 1989, Columbia; rhetoric and composition.

Riggenbach, Heidi R., 1990, M.A., 1982, Northern Iowa; Ph.D., 1989, California (Los Angeles); teaching English as a second language.

Rivenburgh, Viola K., 1944, (Emeritus), M.A., 1926, Hawaii; expository writing.

Shields, David J.,* 1988, M.F.A., 1980, Iowa; fiction writing.

Stygall, Gail, 1990, Ph.D., 1989, Indiana; rhetoric and composition.

Vangen, Kathryn W. S.,* 1985, (American Indian Studies), M.A., 1982, Ph.D., 1987, Michigan; modern poetry, American and Native American literature, feminist theory.

Wong, Shawn H.,* 1984, ‡(Asian American Studies), M.A., 1974, San Francisco State; creative writing, Chinese-American area studies.

Lecturers

Beyer, Catharine H., 1984, M.A., 1970, Michigan; expository and interdisciplinary writing.

Clemens, Lois D., 1950, (Emeritus), M.A., 1956, Washington; expository and fiction writing.

Graham, Joan A., 1977, Ph.C., 1968, Washington; expository and interdisciplinary writing.

Hatch, Deborah H., 1981, M.A., 1976, Ph.D., 1982, Massachusetts (Amherst); expository and interdisciplinary writing.

McNamara, Robert J., 1986, M.A., 1975, Colorado State; Ph.D., 1985, Washington; expository and interdisciplinary writing.

Shabetai, Karen J., 1984, M.A., 1982, Ph.D., 1984, California (San Diego); expository and interdisciplinary writing.

Wacker, Norman J., 1989, M.A., 1976, Ph.D., 1986, Washington; expository and interdisciplinary writing.

Willis, Leota S., 1943, (Emeritus), M.A., 1930, Ph.D., 1931, Pennsylvania; seventeenth-century literature.

Course Descriptions

Courses for Undergraduates

Upper-division courses are open to all undergraduate students and are intended for general education. The lists of names in the course descriptions for literature courses indicate the kind of material covered, but are neither inclusive nor exclusive of all significant figures covered.

Courses are listed below in numerical order. Courses include studies of historical periods, major authors, literary forms, and a diversity of topics.

Expository writing courses include: ENGL 111, 121, 131, 182, 271, 379, 421.

Creative writing courses include: ENGL 274, 277, 386, 388, 422, 425, 427, 430.

Language study courses include: ENGL 390, 391, 392, 393, 394.

Major authors, special topics, conference, and seminar courses include: ENGL 395, 396, 397, 398, 443, 444, 489, 490, 491, 492, 493, 494, 495, 499.

Courses primarily for teaching candidates include: ENGL 441, 442, 443, 444, 445.

Internships in English are offered under ENGL 496. See English advising office for details.

Introductory Courses

ENGL 100 Intermediate ESL for International Students (0) AWSpS Offered as two separate sections: one for reading and written grammar, sentence patterns, and paragraph coherence; the other for basic listening and conversation management skills related to academic situations. Sections may be taken concurrently. Special fee per section: \$265. Prerequisite: placement examination.

ENGL 101 High Intermediate ESL for International Students (0) AWSpS Offered as two separate sections: one for reading and essay-writing skills, particularly developing controlling idea and support; the other for listening and speaking skills related to academic lectures and class discussions. Sections may be taken concurrently. Special fee per section: \$265. Prerequisite: placement examination.

ENGL 102 Advanced ESL for International Students (0) AWSpS Offered as two separate sections: one for writing research papers, including library research skills and research paper format and organization; the other for speaking skills for international teaching assistants: language behaviors related to lecturing, classroom management, and teacher-student interaction. Special fee per section: \$265 (no special fee for international teaching assistants section). Prerequisite: placement examination.

ENGL 103 ESL for EOP Students (5) Improvement of reading comprehension and vocabulary; emphasis on organizing and developing ideas in various modes of expository prose. Prerequisite: placement examination.

ENGL 104-105 Introductory Composition (5-5) AWSp,AWSp Development of writing skills: sentence strategies and paragraph structures. Expository, critical, and persuasive essay techniques based on analysis of selected readings. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs.

ENGL 106 Practical Forms of Writing (5) Sp Instruction in writing essay examinations, reports, reviews, and research papers. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs. Prerequisites: 104-105, or special placement.

ENGL 111 Composition: Literature (5) Study and practice of good writing; topics derived from reading and discussing stories, poems, essays, and plays.

ENGL 121 Composition: Social Issues (5) Study and practice of good writing; topics derived from reading and discussing essays and fiction about current social and moral issues.

ENGL 131 Composition: Exposition (5) Study and practice of good writing; topics derived from a variety of personal, academic, and public subjects. (Formerly 181. Not available for credit to students who have taken 181.)

ENGL 182 The Research Paper (5) WSp Includes study of library resources, the analysis of reading materials, and writing preparatory papers as basic to writing a reference or research paper. Open to all undergraduates. Prerequisite: one of 111, 121, 131, or equivalent.

ENGL 197 Interdisciplinary Writing/Humanities (5, max. 15) Expository writing based on material presented in a specified humanities lecture course. Assignments include drafts of papers to be submitted in the linked course, and other pieces of analytical prose. Concurrent registration in the linked course required (see quarterly *Time Schedule* for lectures linked).

ENGL 198 Interdisciplinary Writing/Social Science (5, max. 15) Expository writing based on material presented in a specified social science lecture course. Assignments include drafts of papers to be submitted in the linked course, and other pieces of analytical prose. Concurrent registration in linked course required (see quarterly *Time Schedule* for lectures linked).

ENGL 199 Interdisciplinary Writing/Natural Science (5, max. 15) Expository writing based on material presented in a specific natural science lecture course. Assignments include drafts of papers to be submitted in the linked course, and other pieces of analytical prose. Concurrent registration in the linked course required (see quarterly *Time Schedule* for lectures linked).

Lower-Division Courses

ENGL 200 Reading Literature (5) Techniques and practice in reading and enjoying literature. Examines some of the best works in English and American literature and considers such features of literary meaning as

imagery, characterization, narration, and patterning in sound and sense. Emphasis on literature as a source of pleasure and knowledge about human experience.

ENGL 202 Great Books I (5) Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions to the Middle Ages.

ENGL 203 Great Books II (5) Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions from the Middle Ages to the eighteenth century.

ENGL 204 Great Books III (5) Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions from the eighteenth century to the present.

ENGL 205 Method, Imagination, and Inquiry (5) Examines ideas of method and imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature.

ENGL 206 Reading Fiction (5) Critical interpretation and meaning in fiction. Different examples of fiction representing a variety of types from the medieval to modern periods.

ENGL 207 Reading Poetry (5) Critical interpretation and meaning in poems. Different examples of poetry representing a variety of types from the medieval to modern periods.

ENGL 208 Reading Drama (5) Critical interpretation and meaning in plays. Study of different types of drama representing a variety of types from the medieval to modern periods.

ENGL 214 Survey of Afro-American Literature (5) A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic criteria of Afro-American literature. Joint with AES 214.

ENGL 221 Popular Literature (5) Investigations of themes, conventions, and world views of imaginative works having wide audience appeal. Discussion of their place in our shared cultural experience.

ENGL 223 Children's Literature Reconsidered (5) An examination of books that form a part of the imaginative experience of children, as well as a part of a larger literary heritage, viewed in the light of their social, psychological, political, and moral implications.

ENGL 231 Shakespeare (5) Survey of Shakespeare's career as dramatist. Study of representative comedies, tragedies, romances, and history plays.

ENGL 267 Introduction to American Literature (5) Survey of the major writers, modes, and themes in American literature, from the beginnings to the present. Specific readings vary, but often included are: Taylor, Edwards, Franklin, Poe, Hawthorne, Melville, Emerson, Thoreau, Whitman, Dickinson, Twain, James, Eliot, Stevens, O'Neill, Faulkner, Hemingway, Ellison, and Bellow.

ENGL 271 Intermediate Expository Writing (5) Writing papers communicating information and opinion to develop accurate, competent, and effective expression. Recommended: sophomore standing.

ENGL 274 Beginning Verse Writing (5) Intensive study of the ways and means of making a poem. Recommended: sophomore standing.

ENGL 277 Beginning Short Story Writing (5) Introduction to the theory and practice of writing the short story. Recommended: sophomore standing.

ENGL 281 Introduction to American Political Culture (5) Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Joint with POL S 281.

ENGL 282 American Literature and Political Culture, Origins to 1885 (5) American literature in its political and cultural context from the Puritan origins to the Civil War. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Prerequisite: 281.

ENGL 283 American Literature and Political Culture, 1885 to the Present (5) American literature in its political and cultural context from the Civil War to the present. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Prerequisite: 281.

Upper-Division Courses

ENGL 300 Critical Reading of Major Texts (5) Intensive examination of one or a few major works of literature. Classroom work to develop skills of careful and critical reading. Book selection varies, but reading consists of major works by important authors and of selected supplementary materials.

ENGL 303 English Literary Culture: To 1600 (5) British literature from Middle Ages to end of sixteenth century. Study of literature in its cultural context, with attention to changes in language, form, content, and style. (Formerly 301.)

ENGL 304 English Literary Culture: 1600-1800 (5) British literature in seventeenth and eighteenth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style. (Formerly 302.)

ENGL 305 English Literary Culture: After 1800 (5) British literature in the nineteenth and twentieth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 306 Literature, Literary Study, and Society (5) Relationship of literature to society with particular emphasis on literary education. What social values determine the educational importance of literature, what segments of society are trained to read and to write literature, and how literature is institutionalized as part of pedagogical methodology. Emphasis varies.

ENGL 307 Literature and the Age (5) Problems of literary periodization. Works by major and minor authors in the context of cultural history; critical and theoretical approaches that have led to the idea of periodization. Emphasis varies. Recommended: 300-level English course in the literary period being studied.

ENGL 309 The Bible as Literature (5) Introduction to the development of the religious ideas and institutions of ancient Israel, with selected readings from the Old Testament and New Testament. Emphasis on reading the Bible with literary and historical understanding.

ENGL 310 English Literature: The Middle Ages (5) Literary culture of Middle Ages in England, as seen in selected works from earlier and later periods, ages of *Beowulf* and of Geoffrey Chaucer. Read in translation, except for a few later works, which are read in Middle English.

ENGL 311 Chaucer (5) Chaucer's *Canterbury Tales* and other poetry, with attention to Chaucer's social, historical, and intellectual milieu.

ENGL 313 English Literature: The Age of Queen Elizabeth (5) The "golden age" of English poetry, with poems by Shakespeare, Spenser, Sidney, and others; drama by Marlowe and other early rivals to Shakespeare; prose by Sir Thomas More and the great Elizabethan translators.

ENGL 314 Shakespeare to 1603 (5) Shakespeare's career as dramatist before 1603 (including *Hamlet*). Study of history plays, comedies, and tragedies.

ENGL 315 Shakespeare After 1603 (5) Shakespeare's career as dramatist after 1603. Study of comedies, tragedies, and romances.

ENGL 321 English Literature: The Late Renaissance (5) A period of skepticism for some, faith for others, but intellectual upheaval generally. Poems by John Donne and the "metaphysical" school; poems and plays by Ben Jonson and other late rivals to Shakespeare; prose by Sir Francis Bacon and other writers.

ENGL 322 Milton (5) Milton's early poems and the prose; *Paradise Lost*, *Paradise Regained*, and *Samson Agonistes*, with attention to the religious, intellectual, and literary contexts.

ENGL 325 English Literature: The Augustan Age (5) Selections from wits and satirists; poems by John Dryden and Alexander Pope; plays by Dryden, William Congreve, and other wits; the great satires of Jonathan Swift, and the first stirring of the novel.

ENGL 326 English Literature: The Age of Samuel Johnson (5) Classic age of English prose. Essays, biography, and criticism by Samuel Johnson, Oliver Goldsmith, and others; comedies by Goldsmith and Richard Brinsley Sheridan; fiction by Henry Fielding and others; poetry by a variety of writers.

ENGL 327 Rise of the English Novel (5) Study of the development of this major and popular modern literary form in the eighteenth century. Readings of the best of the novelists who founded the form, and some minor ones, from Defoe to Fielding, Richardson, and Sterne, early Austen, and the gothic and other writers.

ENGL 328 Rise of American Fiction (5) A literary form in which America has found its distinctively American expression. Selected readings among important novelists from the beginnings until 1900, including Cooper, Hawthorne, Melville, Twain, Chopin, James, and Wharton.

ENGL 330 English Literature: The Romantic Age (5) Literary, intellectual, and historical ferment of the period from the French Revolution to the 1830s. Readings from major authors in different literary forms; discussions of critical and philosophical issues in a time of change.

ENGL 331 Romantic Poetry I (5) Blake, Wordsworth, Coleridge, and their contemporaries.

ENGL 332 Romantic Poetry II (5) Byron, Shelley, Keats, and their contemporaries.

ENGL 333 English Novel: Early and Middle Nineteenth Century (5) Studies in the novel in one of its classic phases. Authors include Austen, the Brontës, Dickens, Thackeray.

ENGL 334 English Novel: Later Nineteenth Century (5) Studies in the novel as it passes from a classic format to formats more experimental. Authors include George Eliot, Thomas Hardy, Joseph Conrad, and others.

ENGL 335 English Literature: The Age of Victoria (5) Literature in an era of revolution that also sought continuity, when culture faced redefinition as mass culture and found in the process new demands and creative energies, new material and forms, and transformations of old ones. Readings range from works of Tennyson, Browning, Arnold, Shaw, to Dickens, Eliot, Hardy.

ENGL 340 The Modern Novel (5) The novel on both sides of the Atlantic in the first half of the twentieth century. Includes such writers as Joyce, Woolf, Lawrence, Stein, Hemingway, Faulkner, and others.

ENGL 341 Modern Poetry (5) Poetry in the modernist mode, including such poets as Yeats, Eliot, Pound, Auden, and Moore.

ENGL 342 English Literature: The Early Modern Period (5) Experiments in fiction and poetry. Novels by Joyce, Woolf, Lawrence, and others; poetry by Eliot and Yeats and others.

ENGL 343 English Literature: Contemporary England (5) Return to more traditional forms in such writers as Bowen, Orwell, Waugh, Caryl Chessman, Drabble.

ENGL 344 Modern Anglo-Irish Literature (5) Principal writers in English of the modern Irish literary movement—Yeats, Joyce, Synge, Gregory, and O'Casey among them—with attention to traditions of Irish culture and history.

ENGL 348 Critical Practice (5) Exercise in interpretive practices; a consideration of their powers and limits. Survey of the varieties of critical and interpretive practice from the earliest interpreters of scripture and myth to present-day critics.

ENGL 347 History of Literary Criticism and Theory I (5) Literary criticism and theory from its beginnings in Plato through the early twentieth century. Philosophical and theoretical grounds for critical practice put forward by philosophers and critics.

ENGL 348 History of Literary Criticism and Theory II (5) Contemporary criticism and theory and its background in the New Criticism, structuralism, and phenomenology.

ENGL 351 American Literature: The Colonial Period (5) Responses to the New World and literary strategies in the literature of the colonies and the early republic. Works by Taylor, Edwards, Franklin, and others.

ENGL 352 American Literature: The Early Nation (5) Conflicting visions of the national destiny and the individual identity in the early years of America's nationhood. Works by Emerson, Thoreau, Hawthorne, Melville, and such other writers as Poe, Cooper, Irving, Whitman, Dickinson, and Douglass.

ENGL 353 American Literature: Later Nineteenth Century (5) Literary responses to an America propelled forward by accelerating and complex forces. Works by Twain, James, and such other writers as Whitman, Dickinson, Adams, Wharton, Howells, Crane, Dreiser, DuBois, and Chopin.

ENGL 354 American Literature: The Early Modern Period (5) Literary responses to the disillusionment after World War I, experiments in form and in new ideas of a new period. Works by such writers as Anderson, Toomer, Cather, O'Neill, Frost, Pound, Eliot, Cummings, Hemingway, Fitzgerald, Faulkner, Stein, Hart Crane, Stevens, and Porter.

ENGL 355 American Literature: Contemporary America (5) Works by such writers as Ellison, Williams, O'Connor, Lowell, Barth, Rich, and Hawkes.

ENGL 356 Classic American Poetry: Beginnings to 1917 (5) Poetry by Taylor, Whitman, Dickinson, and such others as Poe, Bradstreet, Crane, Robinson. The lineage and characteristics of lyric and epic in America.

ENGL 358 Literature of Black Americans (5) Selected writings—novels, short stories, plays, poems—by Afro-American writers. Study of the historical and cultural context within which they evolved. Differences between Afro-American writers and writers of the European-American tradition. Emphasis varies. Joint with AFRAM 358.

ENGL 359 Contemporary Novel (5) Recent efforts to change the shape and direction of the novel by such writers as Murdoch, Barth, Hawkes, Fowles, and Atwood.

ENGL 361 Contemporary Poetry (5) Recent developments by such poets as Hughes, Heaney, Rich, Kinnell, and Hugo.

ENGL 364 Dramatic Literature: Comedy (5) Studies of the comic mode that celebrates social life in all its variety. Emphasis on the romantic and satiric forms of comedy, or on the historical development of the types of comedy inherited from the Greeks and Romans, or on theories of the comic and the laughable. Emphasis on drama previous to the twentieth century.

ENGL 365 Dramatic Literature: Tragedy (5) Studies of the tragic mode as a universal pattern of experience. Emphasis on drama previous to the twentieth century.

ENGL 366 Twentieth-Century Dramatic Literature (5) Modern and contemporary plays by such writers as Shaw, Synge, O'Casey, O'Neill, Yeats, Eliot, Beckett, Pinter, and Albee.

ENGL 367 Studies in Short Fiction (5) The American and English short story, with attention to the influence of writers of other cultures. Aspects of the short story that distinguish it, in style and purpose, from longer fiction.

ENGL 368 The Art of Prose (5) Techniques and varieties of prose—autobiography, biography, personal essay, reflective and meditative writing, social and scientific inquiry, and persuasive writing. Special attention to use of poetic, fictional, and dramatic devices. Recommended: introductory literature course.

ENGL 369 Fiction and Film (5) Comparative study of technique and meaning in written narratives and films. Short stories and novels selected from American and English literature, and films that employ similar or contrasting techniques in constructing fiction.

ENGL 370 Fantasy (5) Nonnaturalistic literature, selected folktales, fairytales, fables, nonsense, ghost stories, horror stories, science fiction, and utopian literature—the supernatural and surreal, the grotesque, the fantastical. Readings and emphasis vary.

ENGL 371 Modern European Literature in Translation (5) Fiction, poetry, and drama from the development of modernism to the present. Works by such writers as Mann, Proust, Kafka, Gide, Hesse, Rilke, Brecht, Sartre, and Camus.

ENGL 372 Modern Jewish Literature in Translation (5) Survey of Jewish experience and its expression during the past hundred years. Includes selected writers from Yiddish literature (Sholom Aleichem, Peretz, I. B. Singer), European literature (Kafka, Babel, Wiesel), American literature (Bellow, Roth, Malamud, Ozick), and Israeli literature (Agnon, Appelfeld, Amichai).

ENGL 373 Pacific Northwest Literature (5) Concentrates in alternate years on either prose or poetry of the Pacific Northwest. Prose works examine early exploration, conflicts of native and settlement cultures, various social and economic conflicts. Pacific Northwest poetry includes consideration of its sources, formative influences, and emergence into national prominence.

ENGL 374 Study Abroad Program (5) This course, for students in the Study Abroad program, relates major works of literature to the landscape and activities of its setting.

ENGL 375 Women and the Literary Imagination (5, max. 15) Study of woman writers or ways various writers have portrayed woman's image, social role, and psychology.

ENGL 376 Women Writers (5, max. 15) Study of the work of women writers in English and American literature.

ENGL 377 Contemporary American Indian Literature (5) Creative writings—novels, short stories, poems—of contemporary Indian authors; traditions out of which they evolved. Differences between Indian writers and writers of the dominant European/American mainstream. Offered jointly with AIS 377.

ENGL 379 Advanced Expository Writing (5) Concentration on the development of prose style for experienced writers. Recommended: sophomore standing.

ENGL 382 The Novel: Special Studies (5, max. 10) Readings may be English or American and drawn from different periods, or they may concentrate on different types—gothic, experimental, novel of consciousness, realistic novel. Special attention to the novel as a distinct literary form. Specific topic varies from quarter to quarter.

ENGL 383 Poetry: Special Studies (5, max. 10) A poetic tradition or group of poems connected by subject matter or poetic technique. Specific topics vary, but might include poetry as a geography of mind, the development of the love lyric, the comic poem.

ENGL 384 Dramatic Literature: Special Studies (5, max. 10) Study of a particular dramatic tradition (such as expressionism or the absurd theatre) or character (the clown) or technique (play-within-a-play, the neoclassical three unities). Topics vary.

ENGL 386 Intermediate Seminar: Verse Writing (5, max. 10) Intensive study of the ways and means of making a poem. Further development of fundamental skills. Emphasis on revision. Recommended: 274.

ENGL 388 Intermediate Seminar: Short Story Writing (5) Exploring and developing continuity in the elements of fiction writing. Methods of extending and sustaining plot, setting, character, point of view, and tone. Recommended: 277.

ENGL 390 English Language Study (5) Wide-range introduction to the study of written and spoken English. The nature of language; ways of describing language; the use of language study as an approach to English literature and the teaching of English.

ENGL 391 English Syntax (5) Description of sentence, phrase, and word structures in present-day English. Prerequisite: 390 or LING 200 or equivalent.

ENGL 392 Language Variation in Current English (5) Examination of geographical, social, and occupational varieties of American English. Relationship between societal attitudes and language use.

ENGL 393 History of the English Language (5) Evolution of English sounds, forms, structures, and word meanings from Anglo-Saxon times to the present. Prerequisite: 390 or LING 200 or equivalent.

ENGL 394 The Language of Literature (5) Roles of explicitly describable language features in the understanding and appreciation of various verbal forms. Emphasis on literature, but attention also may be given to nonliterary prose and oral forms.

ENGL 395 American Writers: Studies in Major Authors (5, max. 15) Concentration on one writer or a special group of American writers.

ENGL 396 British Writers: Studies in Major Authors (5, max. 15) Concentration on one writer or a special group of British writers.

ENGL 397 Topics in American Literature (5, max. 15) Exploration of a theme or special topic in American literary expression.

ENGL 398 Topics in British Literature (5, max. 15) Themes and topics of special meaning to British literature.

ENGL 407 Literary Modernism (5) Various modern authors, from Wordsworth to the present, in relation

to such major thinkers as Kant, Hegel, Darwin, Marx, Nietzsche, Bergson, and Wittgenstein, who have helped create the context and the content of modern literature. Recommended: 305 or other 300-level course in nineteenth- or twentieth-century literature.

ENGL 408 Literature and the Other Arts and Disciplines (5, max. 10) Relationships between literature and other arts, such as painting, photography, architecture, and music, or between literature and other disciplines, such as science. Content varies.

ENGL 413 Arthurian Legends (5) Medieval romance in its cultural and historical setting, with concentration on the evolution of Arthurian romance.

ENGL 414 The Popular Ballad (5) The origin, development, and transmission of both texts and tunes of English and Scottish folk ballads in Great Britain and North America.

ENGL 415 Introduction to the Folktale Among Literate Peoples (3) Techniques of classification, geographic-historical distribution, theories of origin and interpretations, and related areas of investigation of the oral prose folk narrative of literate peoples.

ENGL 416 Introduction to American Folklore (5) Study of different kinds of folklore inherited from America's past and to be found in America today.

ENGL 421 Special Studies in Expository Writing (5) Individual projects in various types of nonfictional prose, such as biographical sketches, informational reports, literary reviews, and essays. Recommended: sophomore standing.

ENGL 422 Advanced Seminar: Verse Writing (5, max. 15) Intensive study of ways and means of making a poem. Recommended: 386.

ENGL 425 Advanced Seminar: Short Story Writing (5, max. 10) Experience with the theory and practice of writing the short story. Recommended: 388.

ENGL 427 Seminar: Novel Writing (5, max. 15) Experience in planning, writing, and revising a work of long fiction, whether from the outset, in progress, or in already completed draft.

ENGL 430 Seminar: Playwriting (5, max. 10) Experience in planning, writing, and revising a play, whether from the outset, in progress, or in already completed draft.

ENGL 441 The Composition Process (5) Consideration of psychological and formal elements basic to writing and related forms of nonverbal expression and the critical principles that apply to evaluation.

ENGL 442 Language Learning (5) Consideration of how an individual achieves psychological and esthetic grasp of reality through language; relates language development to reading skills, literary interpretation, grammar acquisition, oral fluency, discursive and imaginative writing.

ENGL 443 Current Developments in English Studies: Conference (5)

ENGL 444 Special Topics in English for Teachers (1-10, max. 10)

ENGL 445 Colloquium in English for Teachers (1-5, max. 10)

ENGL 465 Language and Social Policy (5) Examines the relationship between language policy and social organization; the impact of language policy on immigration, education, and access to resources and political institutions; language policy and revolutionary change; language rights.

ENGL 466 Language Variation and Language Policy in North America (5) Surveys basic issues of language variation: phonological, syntactic, semantic, and

narrative/discourse differences among speech communities of North American English; examines how language policy can affect access to education, the labor force, and political institutions.

ENGL 489 Special Studies in Literature (3 or 5, max. 10) Themes and topics offering special approaches to literature.

ENGL 490, 491 Major Conference (3,3) Individual study by arrangement with instructor. Prerequisite: permission of director of undergraduate education.

ENGL 492 Major Conference for Honors (5) Individual study (reading, papers) by arrangement with the instructor. Required of, and limited to, honors seniors in English.

ENGL 493, 494 Advanced Creative Writing Conference, Advanced Expository Writing Conference (3-5, max. 10; 3-5, max. 10) Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken. Prerequisite: permission of directors of respective programs.

ENGL 495 Major Conference for Honors in Creative Writing (5) Special projects available to honors students in creative writing. Required of, and limited to, honors students in creative writing.

ENGL 496 Internship (1-6, max. 12) Supervised experience in local businesses and other agencies. Open only to upper-division English majors. Offered on credit/no credit basis only. Prerequisite: 25 credits in English.

ENGL 499 Honors Seminar (5, max. 10) Seminar study of themes and topics offering special approaches to literature. Required of, and limited to, honors students.

Courses for Graduates Only

ENGL 500 Reading Medieval Literature (5) Special problems involved in the study and interpretation of medieval texts, selected examples drawn from the beginnings of English literature to 1500.

ENGL 501 The Renaissance and Literary Tradition (5) Examination of selected texts from 1500 to 1750, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written before 1750.

ENGL 502 Backgrounds of Modern Literature (5) Intensive study of selected issues in modern literature, concentrating on a few influential English and American texts written after 1750.

ENGL 504 Approaches to Teaching Composition (5) Readings in composition theory and discussion of practical classroom applications. Prerequisite: previous experience or concurrent assignment in teaching writing.

ENGL 505 Graduate English Studies (5)

ENGL 506 Studies in Literary Genres (5, max. 15)

ENGL 507 History of Literary Criticism and Theory I (5, max. 15) A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Joint with C LIT 507.

ENGL 508 History of Literary Criticism and Theory II (5, max. 15) Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Joint with C LIT 508.

ENGL 509 History of Literary Criticism and Theory III (5, max. 15) Literary criticism and theory from Kant's *Critique of Judgment* to the mid-twentieth century and the work of Northrop Frye. Joint with C LIT 509.

ENGL 510 History of Literary Criticism and Theory IV (5, max. 15) A study of the major issues in literary criticism and theory since about 1965. Joint with C LIT 510. (Formerly 582.)

ENGL 511, 512 The Renaissance and Spenser (5, max. 15; 5, max. 15)

ENGL 513 Shakespeare's Dramatic Contemporaries (5)

ENGL 515, 516 Chaucer (5,5)

ENGL 517, 518, 519 Shakespeare (5,5,5)

ENGL 521, 522, 523 Seventeenth-Century Literature (5, max. 15; 5, max. 15; 5, max. 15)

ENGL 524, 525, 526 American Literature (5, max. 15; 5, max. 15; 5, max. 15)

ENGL 527, 528 Studies in Medieval Literature (5, max. 15; 5, max. 15)

ENGL 530 The English Language (5)

ENGL 531 Introductory Reading in Old English (5)

ENGL 532 Advanced Reading in Old English (5)

ENGL 533 Foundations of American English (5)

ENGL 534 American English Dialectology (5)

ENGL 535 Comparative Grammars (5) Prerequisite: teaching experience.

ENGL 538, 539, 540 Early Nineteenth-Century Literature (5, max. 15; 5, max. 15; 5, max. 15)

ENGL 541, 542, 543 Victorian Literature (5, max. 15; 5, max. 15; 5, max. 15)

ENGL 544, 545, 546 Eighteenth-Century Literature (5, max. 15; 5, max. 15; 5, max. 15)

ENGL 547 Rhetoric (5)

ENGL 548, 549, 550 Twentieth-Century Literature (5, max. 15; 5, max. 15; 5, max. 15)

ENGL 553 Current Rhetorical Theory (5) Prerequisite: teaching experience.

ENGL 555 Colloquium in Teaching English as a Second Language (5, max. 10) Prerequisite: LING 445 or permission of instructor.

ENGL 556 Methods and Materials for Teaching English as a Second Language (5) Prerequisite: LING 445 or permission of instructor.

ENGL 557 Research Methods in Second-Language Acquisition (5) Prerequisite: 556, LING 449, or permission of instructor.

ENGL 558 Testing and Evaluation in English as a Second Language (5) Evaluation and testing of English language proficiency, including testing theory, types of tests, and teacher-prepared classroom tests. Prerequisites: 555 and 556 or permission of instructor.

ENGL 560 Practicum in Teaching English as a Second Language (3) Discussion and practice of second-language teaching techniques. Three hours per week teaching required in addition to regular class meetings. Prerequisite: 555 or permission of instructor.

ENGL 580 Critical Approaches to Literary Texts (5, max. 15)

ENGL 581 Textual Criticism (5) Introduction to paleography, codicology, analytical and descriptive bibliography; examination of the major contributions to textual theory in the nineteenth and twentieth centuries; practice in applying textual theory in editing literary works. Recommended: 505.

ENGL 584 Advanced Fiction Workshop (5, max. 15) Prerequisite: graduate standing.

ENGL 585 Advanced Poetry Workshop (5, max. 15) Prerequisite: graduate standing.

ENGL 586 Graduate Writing Conference (5)

ENGL 590-591 Master's Essay (5-6, max. 11) Two-quarter research and writing project under the close supervision of a faculty member expert in that field of study. Work is independent and varies; one quarter of the project used for background reading and research and the other quarter for presentation of an original thesis in written form.

ENGL 599 Special Studies in English (5, max. 15)

ENGL 600 Independent Study or Research (*)

ENGL 601 Internship (3-9, max. 9)

ENGL 700 Master's Thesis (*)

ENGL 800 Doctoral Dissertation (*)

Environmental Studies

201 Engineering Annex

The Institute for Environmental Studies is an interdisciplinary educational unit that offers students an opportunity to broaden their understanding of the complexity of many of today's environmental issues and concerns. The Institute's undergraduate introductory sequence includes a series of core courses that explore the contributions of the physical, biological, and social sciences to an understanding of environmental problems. At more advanced undergraduate levels, the institute offers a small number of courses aimed at integrating humanistic and scientific inquiry and exploring the framework of environmental law.

Undergraduate Program

Environmental Studies is one of several interdisciplinary programs whose degrees are granted through General Studies. A student must be admitted two years prior to graduation and must design an integrated program approved by faculty advisers. Although a 2.00 grade-point average is required for admission, a minimum 2.60 grade-point average is more indicative of the caliber of work required for success in the program. In addition to completing 50 credits of environment-related courses suitable to a student's particular interest, the student must complete 5 credits of a senior thesis and is encouraged to complete 5 credits of an internship. A complete list of requirements appears in the institute's brochure, *Undergraduate Program in Environmental Studies*. Either a Bachelor of Arts degree or a Bachelor of Science degree may be earned. Since most environmentally related careers require a thorough grounding in a traditional discipline, the institute encourages students to consider a double major or a double degree if the complementary area is outside the College of Arts and Sciences. Additional information is available from the institute's undergraduate adviser.

Faculty

Professors

Boersma, P. Dee,* 1974, (Zoology).† Ph.D., 1974, Ohio State; population ecology.

Brown, Gardner M., Jr.,* 1965, ‡(Economics), Ph.D., 1964, California (Berkeley); resource economics.

Campbell, Frederick L.,* 1966, ‡(Sociology), M.A., 1962, Ph.D., 1967, Michigan; population and ecology, social organization.

Charlson, Robert J.,* 1965, (Chemistry), (Atmospheric Sciences, Geophysics).† M.S., 1959, Stanford; Ph.D., 1964, Washington; air resources, geochemical cycles, environmental chemistry.

Crutchfield, James A., 1949, (Emeritus), (Economics, Public Affairs).† M.A., 1942, California (Los Angeles); Ph.D., 1954, California (Berkeley); natural resources economics, policy and management, especially marine and environmental resources.

del Moral, Roger,* 1968, ‡(Botany, Landscape Architecture), M.A., 1966, Ph.D., 1968, California (Santa Barbara); plant ecology, competition, succession, vegetation management.

Dunne, Thomas,* 1973, ‡(Geological Sciences, Quaternary Research Center), Ph.D., 1969, Johns Hopkins; geomorphology and hydrology.

Edwards, John S.,* 1967, (Forest Resources).† M.Sc., 1956, Auckland (New Zealand); Ph.D., 1960, Cambridge (England); arthropod neurobiology, insect physiology and development, tundra and alpine biology.

Franklin, Jerry F.,* 1986, ‡(Forest Resources), M.S., 1961, Oregon State; Ph.D., 1966, Washington State; structure and function of forest ecosystems, ecology of Pacific Northwest trees.

Hancock, John L.,* 1969, ‡(Urban Design and Planning), M.A., 1955, Minnesota; Ph.D., 1964, Pennsylvania; planning history, urban history, planning theory, social analysis and social evaluation methods, comparative urbanism.

Hunn, Eugene S.,* 1972, ‡(Anthropology), M.A., 1969, Ph.D., 1973, California (Berkeley); cognitive anthropology, ethnobiology, cultural ecology and evolution, North American Indians.

Jackson, W. A. Douglas,* 1955, ‡(Geography, International Studies), M.A., 1949, Toronto; Ph.D., 1953, Maryland; political systems, nature and culture, Soviet Union, Canada.

Johnson, Ralph W.,* 1955, ‡(Law), LL.B., 1949, Oregon; natural resources, legislation, Indian law.

Kohn, Alan J.,* 1961, ‡(Quaternary Research Center, Zoology), Ph.D., 1957, Yale; invertebrate zoology, ecology and functional morphology of maritime invertebrates, biology of mollusks.

Leopold, Estella B.,* 1976, (Forest Resources, Geological Sciences, Quaternary Research Center), (Botany).† M.S., 1950, California (Berkeley); Ph.D., 1955, Yale; palynology and Quaternary environments.

Leovy, Conway B.,* 1968, (Astronomy), (Atmospheric Sciences, Geophysics).† Ph.D., 1963, Massachusetts Institute of Technology; planetary atmospheres.

Morrill, Richard L.,* 1960, ‡(Geography).† M.A., 1957; Ph.D., 1959, Washington; spatial organization, migration, diffusion and population, regional planning and development, inequality.

Olstad, Roger G.,* 1964, ‡(Education), M.A., 1959, Ph.D., 1963, Minnesota; science education.

Orians, Gordon H.,* 1960, (Zoology).† Ph.D., 1960, California (Berkeley); ecology and ethology.

Rothberg, Joseph E.,* 1969, ‡(Physics), M.A., 1958, Ph.D., 1963, Columbia; experimental high-energy physics.

Schneider, Jerry B.,* 1968, ‡(Civil Engineering, Urban Design and Planning), M.C.P., 1961, California (Berkeley); Ph.D., 1966, Pennsylvania; metropolitan and regional planning, transportation and land-use interrelationships, computer graphics, forecasting methods, futures research.

Sleicher, Charles A.,* 1960, ‡(Chemical Engineering), S.M., 1949, Massachusetts Institute of Technology; Ph.D., 1955, Michigan; fluid mechanics, heat transfer.

Staley, James T.,* 1971, ‡(Microbiology), M.S., 1963, Ohio; Ph.D., 1967, California (Davis); microbial ecology, general microbiology.

Sternberg, Richard W.,* 1965, ‡(Oceanography), M.Sc., 1961, Ph.D., 1965, Washington; geological oceanography, marine sedimentation processes.

Taub, Frieda B.,* 1962, ‡(Fisheries), M.S., 1957, Ph.D., 1959, Rutgers; ecology.

Untermann, Richard K.,* 1971, ‡(Landscape Architecture, Urban Design and Planning), M.L.A., 1967, Harvard; urban design and site planning, housing, recreation, nonmotorized circulation.

Wallace, John M.,* 1966, ‡(Atmospheric Sciences), Ph.D., 1966, Massachusetts Institute of Technology; large-scale motions.

Welch, Eugene B.,* 1968, ‡(Civil Engineering), M.S., 1959, Michigan State; Ph.D., 1967, Washington; water resources and aquatic biology.

Woodruff, Gene L.,* 1965, ‡(Chemical Engineering, Nuclear Engineering), M.S., 1963, Ph.D., 1966, Massachusetts Institute of Technology; neutronics experiments, fusion reactor technology.

Wooster, Warren S.,* 1976, ‡(Fisheries, Marine Studies, Oceanography), M.S., 1947, California Institute of Technology; Ph.D., 1953, California (La Jolla); circulation and distribution of physical and chemical properties of the world ocean, application of such information to fishery problems, ocean affairs.

Zoller, William H.,* 1984, ‡(Atmospheric Sciences, Chemistry), Ph.D., 1969, Massachusetts Institute of Technology; analytical, environmental, and nuclear chemistry.

ZumBrunnen, Craig,* 1977, ‡(Geography), M.S., 1968, California Institute of Technology; Ph.D., 1973, California (Berkeley); natural resource management and conservation, environmental quality, methods of resource analysis, physical, Soviet Union.

Associate Professors

Eaton, David L.,* 1979, (Environmental Health), ‡ Ph.D., 1978, Kansas; hepatobiliary disposition of xenobiotics, biochemical and environmental toxicology.

Keating, John P.,* 1972, ‡(Psychology), M.A., 1962, Gonzaga; M.S.T., 1969, Santa Clara; M.A., 1971, Ph.D., 1972, Ohio State; communication media and attitude change, environmental psychology, emergency behavior.

Lee, Kai N.,* 1973, (Marine Studies, Public Affairs), (Political Science), ‡ Ph.D., 1971, Princeton; American government, politics and public policy.

Murray, James W.,* 1973, ‡(Oceanography), Ph.D., 1973, Massachusetts Institute of Technology; marine geochemistry, aquatic chemistry.

Thomas, Robert P.,* 1963, ‡(Economics), Ph.D., 1964, Northwestern; economic history.

Course Descriptions

Courses for Undergraduates

ENV S 101 Introduction to Environmental Studies (5) ASp Natural history and human modifications of the natural world. Evolutionary biology, physical geography, toxicology, energy, economics, law, public policy.

ENV S 203 Introduction to Physical Sciences and the Environment (5) A Leovy, ZumBrunnen Climate, water, geological, and soil processes essential to life. Broad picture of physical processes important in Earth's evolution. Not recommended for students with 15 or more credits of physical science. Joint with GEOG 205.

ENV S 204 Introduction to Ecology and the Biosphere (5) W Spaulding Introduction to ecology, evolutionary processes, and biogeography. Plant and animal communities, the structure and function of ecosystems, their distribution on the planet, interrelationships between living systems and the physical environment. Not recommended for students with 15 or more credits of biological science. Recommended: 203 or background in physical science.

ENV S 205 Social Sciences and the Environment (5) Sp Insights and approaches to environmental decision making from the standpoints of psychology, economics, and other social sciences.

ENV S 206 Laboratory in Environmental Problems (4) Sp Interface between science and democratic decision making. Processes and structure of ecosystems and conflicting uses made of these environments. Role and application of science. Field trips to natural and human-modified ecosystems; weekend field trips required. Prerequisite: 204 or equivalent.

ENV S 207 Introduction to Global Environmental Issues (5) Sp Application of principles of environmental science to global environmental problems arising from energy use and agricultural development. Problems range from climate change to species extinctions. Relationships between local and global problems. Alternative energy and agricultural options. Prerequisite: 203, 204.

ENV S 221 The Problem of Nuclear Arms I (3) W Leovy Properties and effects of nuclear weapons; delivery and command systems; interplay between technical and political factors in issues involving nuclear weapons systems, arms control, and proposals to reduce risk of nuclear war. Joint with SIS 221.

ENV S 222 The Problem of Nuclear Arms II (3) Sp Jones Military-political nuclear weapons policies of U.S.A., USSR, France, Britain, China, India, and potential nuclear powers. Bilateral and multilateral arms control agreements and ongoing negotiations. Strategic implications of ballistic missile defense. Joint with SIS 222. Recommended: 221.

ENV S 250 Environmental Pollution: Assessing Problems and Solutions (5) Sp Carlson, Welch Problems in air, water, land environment caused by increasing demands on resources; their definition, control or prospects for control from engineering viewpoint. Ecological cycles, quantity/quality of wastes, biological effects of pollutants, energy, legislation and policy. Joint with CIVE 250.

ENV S 305 Toxic Chemicals in the Environment (3) W Eaton, Omiecinski Basic principles governing the behavior and effects of toxic chemicals released into the environment; sources, distribution, and fate of toxic chemicals in the environment; chemicals and cancer; chemicals and birth defects; ecological effects of chemicals; government regulation of chemical hazards. Joint with ENVH 305. Prerequisites: BIOL 101-102 and CHEM 102, or equivalent.

ENV S 361 Environmental Values and Perceptions (5) S Benton How individual and cultural values affect our perception of, and relation to, the environment. Explores role of individual characteristics in perceptual acuity and value formation, conflicting values within and between societies, impingement of these conflicts on environmental problems, and possible methods of resolution with emphasis on American environmental experience.

ENV S 441 Methods for Environmental Policy Analysis (3) Sp Introduction to methods for quantifying trade-offs involved in environmental policy decisions. Widely used conceptual frameworks such as decision analysis, benefit-cost analysis, linear programming, and forecasting methods are introduced via specific applications, including fishery management, epidemiology, risk management, bargaining, and water resource policy. No specific background in mathematics is assumed.

ENV S 476 Conservation Biology (5) A Boersma, Orians Explores biological, managerial, economic, and ethical concepts affecting survival of species. Applications of ecology, biogeography, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Joint with BIOL 476. Prerequisite: 204 or BIOL 472 or equivalent.

ENV S 481 Environmental Law (5) W DuBey Legislative, administrative, and common law dealing with the environment. Introduces the student to the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, noise, energy policy and management, and land use. For nonlaw students. Prerequisite: permission of instructor.

ENV S 482 Special Topics in Environmental Law (3-5) Sp DuBey Examination of current environmental law issues. Topics to be announced. Prerequisite: 481.

ENV S 498 Special Topics in Environmental Studies (1-5, max. 10) Lecture, seminar, and/or team study of topics varying from quarter to quarter. Prerequisite: permission of instructor.

ENV S 499 Undergraduate Research (*, max. 20) Individual or team research of selected environmental topics. Prerequisite: permission of instructor.

Courses for Graduates Only

ENV S 508 Geochemical Cycles (4) Sp Charlson Descriptive and quantitative aspects of the earth as a biogeochemical system. Fundamental methods for study of equilibria, transport processes, chemical kinetics and biological processes and their application to the carbon, sulfur, nitrogen, phosphorus, and other elemental cycles. Emphasis on stability of biogeochemical systems and the nature of human perturbations of their dynamics. Joint with GPHYS 508. Prerequisites: CHEM 150, 350, MATH 307.

ENV S 515 Environmental and Occupational Toxicology (4) Sp Eaton Principles of toxicology, with emphasis on the biological fate and mechanisms of toxic action of chemicals encountered in the workplace and general environment. Joint with ENVH 515. Prerequisites: organic chemistry, introductory physiology and biochemistry, or permission of instructor.

ENV S 520 Seminar in Environmental Studies (1-3, max. 12) Study and research in advanced topics of environmental studies, with focus on unpublished areas of research; conducted by visiting professors and institute or department faculty. Prerequisite: permission of instructor.

ENV S 530 Science and Environmental Policy (4) W Boersma, Lee Role of science and scientists in formulating public policy related to the environment. Conceptualizes policy processes as a means of understanding opportunities for, and limits of, science in development and implementation of public policy. Prerequisites: concurrent registration in 531 and ECON 435 or equivalent.

ENV S 531 Science and Environmental Policy: Case Histories (3) W Boersma, Lee Examples of the use of scientific analysis in the development of environmental policies. Prerequisite: concurrent registration in 530.

ENV S 532 Internship Seminar (1) AWSp Lee, Wright Preparation for an analytical paper concerning the role of science in decision making. Focuses on the agency or firm in which the student served as an intern. Prerequisites: 530, 531.

ENV S 555 Lake Management (2) A Welch Application of recognized techniques/approaches to restore and manage eutrophic lakes. Includes critiques of restoration proposals. Joint with CEWA 555. Prerequisites: CEWA/FISH 434, BIOL 473, or permission of instructor.

ENV S 575 Megareserve Management (5) Field course held on Olympic Peninsula, Washington, and Tempisque Basin, Costa Rica, in alternate years. Provides graduate students with practical, hands-on experience in megareserve design and management, including: developing objectives, establishing boundaries, determining compatibility of proposed uses, funding and political feasibility. Joint with BIOL 576. Prerequisite: 476.

ENV S 576 Problem Solving in Conservation Biology (5) In-depth analyses of current issues in conservation biology and sustainable development. Emphasis on multidisciplinary efforts to address specific problems in both temperate and tropical regions. Joint with BIOL 577.

ENV S 577 Risk Assessment for Environmental Health Hazards (3) A. Faustman, Omenn Context, methodologies, types of data, uncertainties and institutional arrangements for risk assessment. Both qualitative and quantitative approaches to the identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Joint with ENVH 577, CEWA 577, and PB AF 577. Prerequisites: either 305 or 515 and BIOST 511, EPI 511, or permission of instructor.

ENV S 578 Species Preservation, Captive Propagation, and Reintroductions (5) Offered with Woodland Park Zoo. Explores topics relevant to management of endangered species through lectures, seminars, and workshops. Focuses on the role of zoos in contributing to species survival plans; addresses techniques for decision analysis and conflict assessment. Captive propagation, reintroductions, translocation efforts evaluated. Joint with BIOL 578.

ENV S 599 Special Topics in Environmental Studies (*) Research-level lectures, seminars, or discussions of topics of current interest in the area of environmental studies. Subject matter varies from quarter to quarter. Prerequisites: permission of the instructor and institute director.

General Studies

B10 Padelford

General Studies provides students with an opportunity to obtain an interdisciplinary degree. Students may pursue an individually designed "atypical major" or one of several organized interdisciplinary programs.

Undergraduate Program

Bachelor of Arts, Bachelor of Science Degrees

Admission Requirements: A written statement describing the proposed major and a list of 50 to 70 credits specifically related to the proposal. Approval of two faculty supervisors and the General Studies committee. Prospective majors should submit proposals to the General Studies committee for review at least three quarters prior to graduation.

Major Requirements: Completion of the approved curriculum and a 5-credit required senior study. Awarding of the Bachelor of Arts or Bachelor of Science degree depends on the content of each student's program.

Course Descriptions

Courses for Undergraduates

G ST 350 Independent Fieldwork (1-6, max. 18) AWSpS Off-campus independent fieldwork in community agencies, apprenticeships, internships, as approved for College of Arts and Sciences credit. Faculty supervisor is required. Prerequisites: permission of faculty supervisor and General Studies adviser.

G ST 391 Supervised Study in Selected Fields (*, max. 15) AWSpS Special supervised study in a field represented in the College of Arts and Sciences. Prerequisites: permission of faculty supervisor and General Studies adviser.

G ST 493 Senior Study (5) AWSpS For General Studies majors only. Prerequisites: permission of faculty supervisor and General Studies adviser.

Genetics

J205 Health Sciences

An undergraduate degree is not offered. Students who desire an undergraduate curriculum emphasizing subject matter in genetics are advised to refer to the cellular and molecular biology listing under Biology.

Graduate Program

Breck E. Byers, Graduate Program Coordinator

The Department of Genetics offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. A student may choose among a wide variety of research areas, while, at the same time, receiving a broad training in genetics. New graduate students join a research project in one of the faculty laboratories during each of the first three quarters in residence. New students thereby become acquainted with several different experimental approaches in research in genetics, and the projects help them choose an adviser for their thesis work at the end of the first year. In addition to graduate courses offered by the Department of Genetics, students can choose among a large number of courses in related departments to broaden their perspective. Graduate students also participate in undergraduate teaching after gaining expertise in pertinent areas. A General Examination is taken at the end of the second year to gain formal admittance to candidacy for the Ph.D. degree.

Applications for graduate work are invited from students who have emphasized biology, the physical sciences, or mathematics in their undergraduate careers. Applicants are asked to submit Graduate Record Examination scores and three letters of recommendation.

Financial Aid

The Department of Genetics offers financial support to promising students who wish to work toward the doctoral degree.

Research Facilities

The department is housed in a modern, well-equipped building shared with the Department of Biochemistry and the Howard Hughes Medical Institute. Students benefit from interdisciplinary research and teaching programs in collaboration with departments having related interests.

Professors

Bendich, Arnold J.,* 1970, ‡(Botany), Ph.D., 1969, Washington; nucleic acids as evolutionary indicators, DNA sequence organizations in plants, plant cancers.

Byers, Breck E.,* 1970, (Biochemistry), M.A., 1963, Ph.D., 1967, Harvard; cell biology: mitosis and meiosis, mechanisms of nuclear division and crossing-over in yeast.

Fangman, Walton L.,* 1967, Ph.D., 1965, Purdue; molecular genetics: regulation of replication of yeast chromosomes, and mitochondrial genome.

Felsenstein, Joseph,* 1967, (Statistics), Ph.D., 1968, Chicago; estimation of phylogenies, long-term evolutionary processes, theoretical population genetics.

Gallant, Jonathan A.,* 1961, Ph.D., 1961, Johns Hopkins; molecular genetics, control mechanisms in bacteria, accuracy of translation.

Gartler, Stanley M.,* 1957, (Medicine), † Ph.D., 1952, California (Berkeley); mammalian somatic cell genetics with emphasis on the mechanism of X-chromosome inactivation.

Hall, Benjamin D.,* 1963, (Botany), A.M., 1956, Ph.D., 1958, Harvard; molecular genetics of yeast and higher plants.

Hartwell, Leland H.,* 1968, Ph.D., 1964, Massachusetts Institute of Technology; genetic analysis of chromosome transmission and of the control of division by hormones in yeast.

Hawthorne, Donald C.,* 1958, (Emeritus), M.S., 1951, Ph.D., 1955, Washington; yeast genetics, chromosome mapping, suppressors.

Laird, Charles D.,* 1971, ‡(Zoology), Ph.D., 1966, Stanford; cell and developmental biology.

Martin, George M.,* 1957, ‡(Pathology), M.D., 1953, Washington; pathology.

Motulsky, Arno G.,* 1953, (Medicine), † M.D., 1947, Illinois; clinical population genetics and human biochemical genetics, delineation and mechanisms of disease susceptibility, pharmacogenetics.

Pious, Donald A.,* 1964, ‡(Pediatrics), M.D., 1956, Pennsylvania; pediatrics.

Schubiger, Gerold A.,* 1972, ‡(Zoology), Ph.D., 1967, Zurich (Switzerland); developmental biology of insects, embryonic determination in *Drosophila*, regeneration, transdetermination.

Stadler, David R.,* 1956, M.A., 1950, Ph.D., 1952, Princeton; mutation and genetic repair in *Neurospora*.

Young, Elton T.,* 1969, ‡(Biochemistry), Ph.D., 1967, California Institute of Technology; biochemistry.

Associate Professors

Brewer, Bonita J.,* 1983, (Research), Ph.D., 1979, Washington; replication origins in yeast chromosomes, coordination of DNA replication and RNA transcription.

Furlong, Clement E.,* 1977, (Research), (Medicine), † Ph.D., 1968, California (Davis); human biochemical genetics and biochemistry of membrane transport systems.

Sibley, Carol H.,* 1976, M.A., 1968, M.S., 1969, Rochester; Ph.D., 1974, California (San Francisco); mammalian cell genetics: function, structure, and regulation of cell membrane receptors in differentiation of normal cells and their tumor counterparts.

Assistant Professors

Berg, Celeste A., 1990, Ph.D., 1986, Yale; molecular genetics: analysis of genes involved in cell-cell communication and cell migration during *Drosophila* oogenesis.

Braun, Robert E., 1990, Ph.D., 1985, Tufts; mouse molecular genetics with emphasis on male germ cell development and the reprogramming of the paternal genome.

Manoil, Colin C.,* 1986, Ph.D., 1979, Stanford; molecular genetics, protein localization in bacteria.

Thomas, James H.,* 1988, Ph.D., 1984, Massachusetts Institute of Technology; development of *Caenorhabditis elegans*: genes involved in the determination of cell lineage and cell interactions that specify cell fate.

Course Descriptions

Courses for Undergraduates

GENET 351 Human Genetics: The Individual and Society (3) WSp Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering. Appropriate for non-science majors.

GENET 360 Introductory Genetics (5) Includes transmission of genes and chromosomes, recombination and linkage mapping, genetics of bacteria and viruses, biochemical and molecular genetics, gene regulation and development, population genetics and evolution. Not open for credit to students who have completed 365. Prerequisite: 10 credits in biological or physical sciences. (Formerly 451.)

GENET 365 General Genetics (4) Advanced course in general genetics for students who have been introduced to basic genetic concepts. Cytogenetics, microbial genetics, intragenic recombination, mutation and DNA repair, gene regulation in development, molecular basis of gene regulation. Not open for credit to students who have completed 360. Prerequisite: BIOL 201.

GENET 453 Genetics of the Evolutionary Process (3) W Felsenstein Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: 360.

GENET 455 Molecular Genetics (3) Sp Manoil The structure of genes and molecular mechanisms of gene expression. First part of the course draws upon information obtained with viruses and bacterial cells and serves as background for a study of eukaryotic cells in the second part. Prerequisites: 360, CHEM 237, or permission of instructor.

GENET 456 Genetic Mutation (3) W Stadler Measurement of mutation rates and dose-response relationships; analysis of mutational lesions; molecular mechanisms of mutation and DNA repair; mutation method for measurement of genetic size; hazard of environmental mutagens. Prerequisite: 360 or equivalent. (Offered alternate years.)

GENET 499 Undergraduate Research (*) AWSpS Prerequisite: permission of instructor.

Courses for Graduates Only

GENET 501 Introduction to Research Materials (3, max. 9) AWSp The student is assigned to one of the several research areas of the department to work with a research group for a quarter at a time. Prerequisite: graduate standing in the Department of Genetics or permission of graduate program coordinator.

GENET 520 Seminar (1, max. 15) AWSpS Prerequisite: graduate standing in the Department of Genetics or permission of graduate program coordinator.

GENET 531 Human Genetics (3) Sp General course in human genetics for graduate students. Areas covered: pedigree analysis, cytogenetics, biochemical genetics, and population genetics. Prerequisites: 360, BIOC 440, or equivalent. (Offered alternate years.)

GENET 551 Mutation and Recombination (3) A First course in a three-quarter sequence in molecular and microbial genetics: mutation rates; recombination analysis in phage, bacteria, and fungi; mechanism of recombination.

GENET 552, 553 Structure and Function of Genetic Material I, II (3,3) W,Sp Chromosome structure and DNA replication; formal genetics of gene expression; physical analysis of DNA; gene expression in relation to DNA structure, developmental genetics. Prerequisite: 551 or permission of instructor.

GENET 554 Topics in Genetics (2, max. 6) AWSp Current problems and research methods. Prerequisite: permission of instructor.

GENET 560 Chromosomal Behavior (3) W Properties of meiotic chromosomes with special emphasis on recombination and segregation. Prerequisite: permission of instructor. (Offered alternate years.)

GENET 562 Population Genetics (3) A Felsenstein Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor.

GENET 564 Molecular Cytogenetics (3) W Byers Cellular processes of gene transfer in mitosis, meiosis, and gametogenesis, with emphasis on ultrastructure and macromolecular mechanisms. Prerequisite: permission of instructor. (Offered alternate years.)

GENET 571 Immunogenetics (3) Sp Genetic approaches to the biology of cells of the immune system. Using the immune system as a model system, genetic, developmental and biochemical concepts and techniques are examined as they apply to eukaryotic cells. Cell-cell interactions, histocompatibility, host resistance to infectious disease, and evolution of the immune system. (Offered alternate years.)

GENET 575 Developmental Genetics (3) A Sibley, Thomas Genetic control of early development in a range of organisms, emphasizing systems in which cellular, genetic, and molecular approaches have combined to make significant contributions to understanding. Prerequisite: permission of instructor.

GENET 584 Genetic and Biochemical Analysis by Electron Microscopy (1-5) Byers Practical application of electron microscopic methods for determining cellular and macromolecular structure, with emphasis on genetic systems. Prerequisite: permission of instructor.

GENET 590 Population Genetics Seminar (1) AWSp Felsenstein Weekly presentation by participants of current literature and ongoing research in evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. May be repeated for credit. Prerequisite: 562 or permission of instructor.

GENET 600 Independent Study or Research (*) AWSpS

GENET 700 Master's Thesis (*) AWSpS

GENET 800 Doctoral Dissertation (*)

Geography

408A Smith

Geography is a small but lively discipline providing a distinctive spatial approach to many of today's societal problems and issues: regional economic inequality, growth of service activities, residential and educational segregation, health-care delivery, urban growth management, transportation efficiency, environmental and pollution problems, economic impacts of major investments or technological changes, spatial efficiency of industrial production, the activities of international corporations, and many more. Geography may be defined as the study of how individuals, groups, and societies use and organize their space. Geography seeks to understand the complex processes that result in observed patterns of settlement, location of economic activities, patterns of development, and the linkages and direction of trade and communication.

Individual undergraduate and graduate programs are built around four groups of faculty teaching competencies and research interests:

1. *Social and urban geography.* Human population distribution, activities, migration, settlements, and systems of cities. Geographic facets of ethnicity and race, wealth and poverty, and health and disease. Location of urban services, including health-care systems, urban transportation, housing, and neighborhoods. Urban spatial policies. Courses include: 200, 230, 277, 342, 365, 386, 442, 443, 445, 478.

2. *Economic geography.* Location, spatial-organizational structures, and economic interdependencies of industrial and commercial activities. Analysis of resource distribution and use, market areas, and patterns of technological change. Domestic and international trade; land, air, and water transportation networks and systems. Regional and "third world" economic development. Related policies, policy conflicts, regulations, and management. Courses include: 207, 302, 349, 350, 370, 433, 440, 441, 443, 447, 448, 449, 450, 466, 471, 478, 498.

3. *International relations and foreign areas.* Continental and global patterns of international relations and development. Application of geographic concepts in the regional context, with special emphasis on East Asia, the Soviet Union, Europe, Latin America, Canada, and the United States. Courses include: 230, 302, 304, 305, 308, 313, 333, 335, 336, 349, 375, 402, 404, 405, 410, 430, 433, 434, 435, 437, 466.

4. *Cartography and information systems.* Role and design of geographic information systems for research and planning. Use of computers in the collection, manipulation, and cartographic presentation of data. Courses include: 360, 370, 426, 443, 447, 458, 460, 463, 465, 471.

Special Research and Teaching Facilities

The University Libraries maintains separately the Edward L. Ullman Geography Library, which has subscriptions to 370 periodicals and a collection of atlases. Departmental facilities include the John C. Sherman Laboratory, which contains a variety of microcomputer and computer cartography/GIS workstations that are connected to the campus computer network. The Department of Geography is also a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.

Undergraduate Program

David Hodge, Richard Roth, Advisers

Bachelor of Arts Degree

Major Requirements: 55 credits in geography—(1) three courses from the following: 100 or 102 (but not both), 200, 207, 230, 277; (2) one course in physical geography (205 or equivalent). Courses taken as substitutes in other departments will satisfy major requirements, but will not be included in the 55-credit minimum, nor will they be counted toward the supporting fields requirement; (3) one upper-division course in cartography/geographic information systems; (4) one research methods course (326, 426 or equivalent); (5) one upper-division regional course; (6) a specialization track (20 credits) from the following: (a) area studies/international studies; (b) cartography/geographic information systems; (c) economic geography; (d) urban, social, and political geography. A minimum of 15 of these credits must be earned in one three-course cluster plus one related 400-level elective or in two two-course pairs. Track courses may overlap with other requirements.

25 credits in supporting fields, related to the student's area of specialization—courses will generally be outside geography and must include at least ten upper-division credits and no more than ten language study credits. Typical related course fields include: (1) economic geography—economics; business; urban planning; (2) social, political, and urban geography—urban planning and architecture; sociology; political science; history; economics; (3) international relations and foreign areas—international studies; history; international business; economics; political science; (4) cartography and geographic information systems—urban design and planning; environmental studies; civil engineering; geology.

Other requirements—(1) at least 15 credits from 400-level geography courses; (2) transfer students must complete a minimum of 25 upper-division geography credits at the University; (3) maximum 5 credits of 496 and 499; (4) minimum grade of 2.0 in each course and minimum cumulative grade-point average of 2.50 for all geography courses; (5) quarterly consultation with faculty supervisor on tracks, supporting fields and other recommended courses, and on internships, senior theses and independent study possibilities; (6) recommended: MATH 124; courses to improve writing skills; 494 (Senior Essay); and 496 (Internship).

Graduate Program

The Department of Geography has flexible programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees.

The aspirant to the Master's degree (thesis and non-thesis tracks) is expected to complete all work for the degree in four to six quarters. The aspirant to the doctoral degree is expected to undertake two years of post-master's study and must take a departmental diagnostic examination upon entry, pass the General Examination, attain an appropriate level of competence in a foreign language or cognate field of concentration, and successfully complete a dissertation. Normally, doctoral program students complete all degree requirements in three to four years.

Admission Requirements

Admission to the graduate program normally requires a minimum grade-point average of 3.00 (on a 4.00 scale), or B, during the junior and senior years. Students holding a master's degree must meet this minimum scholastic requirement, but also should have achieved a grade-point average higher than 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

Financial Aid

The department usually awards approximately thirteen teaching assistantships for the academic year. Most of the assistantships are for teaching quiz sections for a larger lecture class. A few of the more-advanced doctoral candidates may teach a class. Normally, several research assistantships are available.

Morgan D. Thomas

Professors

Beyers, William B.,* 1967, Ph.D., 1967, Washington; regional science, economic geography, location theory, regional analysis, environment of the Pacific Northwest.

Fleming, Douglas K.,* 1965, (Marine Studies), Ph.D., 1965, Washington; transportation geography (especially ocean and air), regional organization of western Europe.

Jackson, W. A. Douglas,* 1955, (Environmental Studies), (International Studies),† M.A., 1949, Toronto; Ph.D., 1953, Maryland; political systems, nature and culture, Soviet Union, Canada.

Krumme, Günter,* 1970, Diplom. oec. publ. 1962, Munich, (Germany); Ph.D., 1966, Washington; economic geography, regional economics, location theory, organization and decision theory, European regional development and planning.

Marts, Marion E.,* 1951, (Emeritus), M.A., 1944, Washington; Ph.D., 1950, Northwestern; water resources, conservation, resource policy.

Mayer, Jonathan D.,* 1977, (Family Medicine, Health Services), M.A., 1975, Ph.D., 1977, Michigan; urban geography (including historical), transportation, medical geography, geographic philosophy and methods.

Morrill, Richard L.,* 1961, (Environmental Studies),† M.A., 1957, Ph.D., 1959, Washington; spatial organization, migration, diffusion and population, regional planning and development, inequality.

Sherman, John C.,* 1942, (Emeritus), M.A., 1943, Clark; Ph.D., 1947, Washington; cartography, graphics communication, remote sensing.

Thomas, Morgan D.,* 1959, Ph.D., 1954, Queen's (Belfast); regional economics, regional development, technical innovation.

Veikonen, Joseph,* 1964, Ph.D., 1948, Rome (Italy); social and political geography, international migration, immigrants in America, eastern Europe.

Associate Professors

Chang, Kuei-sheng,* 1966, (Emeritus), M.A., 1950, Ph.D., 1955, Michigan; economic geography of China, historical geography of exploration, Third World development.

Hodge, David C.,* 1975, M.A., 1973, Ph.D., 1975, Pennsylvania State; urban social and political geography, mass transportation, spatial equity, research methods, computer cartography.

Kakiuchi, George H.,* 1957, (Emeritus), (International Studies),† M.A., 1953, Ph.D., 1957, Michigan; Japan, agriculture, internal migration, regional geography.

ZumBrunnen, Craig,* 1977, ‡(Environmental Studies), M.S., 1968, California Institute of Technology; Ph.D., 1973, California (Berkeley); natural resource management and conservation, environmental quality, methods of resource analysis, physical, Soviet Union.

Assistant Professors

Chan, Kam Wing, 1991, Ph.D., 1988, Toronto; economic development and urbanization in post-1949 China, Socialist urbanization, migration.

Chrisman, Nicholas R.,* 1987, Ph.D., 1982, Bristol (England); geographic information systems, computer-assisted cartography.

Jaros, Lucy, 1990, M.A., 1979, Wisconsin (Madison); Ph.D., 1990, California (Berkeley); rural development and agrarian change in the developing world, gender and household labor issues, environmental change and economic development, Africa.

Lawson, Victoria A.,* 1986, M.A., 1982, Ph.D., 1986, Ohio State; Third World development, migration, urbanization, Latin America.

Nyerges, Timothy L.,* 1985, M.A., 1976, Ph.D., 1980, Ohio State; geographic information systems, computer-assisted cartography.

Lecturer

Haney, Barbara B., 1984, Ph.D., 1971, Washington; USSR, historical geography.

Course Descriptions

Courses for Undergraduates

GEOG 100 Introduction to Geography (5) AWSp Jackson, Mayer Basic patterns of human occupancy of the earth; analysis of population, settlement, and resource-use problems; introduction to geographic theories pertaining to spatial organization, interaction, and environmental perception.

GEOG 102 World Regions (5) WSp Spatial study of world regions, based on historical, cultural, political, economic, and other factors. An attempt to understand the underlying forces that have led to the formation of regions and regional patterns.

GEOG 200 Introduction to Human Geography (5) Veikonen Patterns and systems of human occupancy of the world. Emphasis on cultural processes, dynamic change, functional relations, networks, and diffusion models.

GEOG 205 Introduction to Physical Sciences and the Environment (5) AS ZumBrunnen Major atmospheric, hydrologic, and geomorphic processes used to interpret the character, distribution, and human significance of different natural and human-altered environments. Includes laboratory exercises for science and non-science majors, geography majors and non-majors. Joint with ENV S 203.

GEOG 207 Economic Geography (5) ASp Beyers, Krumme, Thomas The changing locations and spatial patterns of economic activity, including: the location of production in agriculture, manufacturing, mining, and goods and services; the economics of transportation; regional economic development, and the diffusion of technological innovations.

GEOG 230 Urbanization in Developing Nations (5) A Lawson Cities in their cultural and economic contexts, geographical patterns of cities, and internal city structure. Problems facing these rapidly growing cities and selected policy solutions.

GEOG 258 Maps and Map Reading (3) W Categories of maps and aerial photographs and their special uses; map reading and interpretation.

GEOG 277 Geography of Cities (5) W Hodge Study of 1) systems of cities—their location, distribution, functions, and competition; and 2) their internal structure—the location of activities within urban areas. Particular emphasis on current urban problems—sprawl, housing, segregation, economic growth, and metropolitan transportation.

GEOG 300 Concepts of Regions (5) Historical development and application of the concept of region. Examines systematically how varied societies constitute parts of a total world order.

GEOG 301 Cultural Geography (5) Jackson Analysis of the role of culture in the formation of landscape patterns; components of culture that contribute not only to a "sense of place," but also to the mosaic of settlement patterns and occupancy that can be traced to culture. Recommended: 100 or equivalent.

GEOG 302 The Pacific Northwest (3) W Beyers Settlement pattern in the Pacific Northwest, emphasizing economic and historical factors, including the location of resource-oriented industries, policies regarding the use of public lands, and bases of the development of major urban areas in the region.

GEOG 303 Nature and Culture (3) Introduces the main theses of man's relationship to nature as expressed in Western and Asian geographic thought; emphasizing the sources of man-environmental dualism and dialectic leading to contemporary ecological discussion in geography. Serves as an introduction to the history of geographic thought. Prerequisites: 100, 205, or permission of instructor.

GEOG 304 Western Europe (5) A Fleming Physical and socioeconomic characteristics of western Europe. Contemporary political and economic integration trends in their regional context.

GEOG 305 Eastern Europe (5) S Veikonen Post-war social, economic, and political development of eastern European countries. Impact of political and institutional provisions on people and on spatial organization.

GEOG 308 Canada: A Geographic Interpretation (5) Jackson Study of Canada; emergence of a political-geographic and cultural entity and identity in North America that presents significant contrasts to the United States. Components that have helped shape Canadian earth-space and landscape. Joint with SISC 308.

GEOG 313 East Asia (5) Nature and geographic setting of East Asian civilization. Origins, development, and present outlines of settlement; cultures, resource use, and economic structures in China, Japan, and Korea.

GEOG 316 Urban Economics (5) Application of economic analysis to urban trends, problems, and prescriptions, such as changing urban form and function, urban public finance, housing and renewal, poverty and race, transportation, and environmental problems. Joint with ECON 316. Prerequisite: ECON 201 or equivalent.

GEOG 325 Historical Geography of the United States (5) *Haney, Morrill* Changing geography of the United States from the time of modern European contact to the early twentieth century. Emphasis on the evolving settlement, land use, landscape, and regional patterns.

GEOG 326 Introduction to Geographic Research (5) *W Chan* Approaches to geographic pattern solving. Topics include defining geographic problems; methods of analysis, seeking, organizing, and analyzing spatial data. Provides experience defining a geographic research problem, collecting and analyzing data, and drawing conclusions from that endeavor.

GEOG 333 Russia's Changing Landscape (5) *Jackson* Russian/Soviet landscape as it has been affected by migration and settlement, urbanization, collectivization, industrialization, and the growth of a transport network.

GEOG 335 Geography of the Developing World (5) *Haney* Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Joint with SIS 335. Prerequisite: 100 or equivalent.

GEOG 336 China (5) *Chan* China's physical environment. Human response to varied geographical conditions. Pattern and process of development in agriculture, manufacturing, and urbanization. Recommended: 100 or equivalent.

GEOG 342 Geography and Inequality in the United States (3) *Morrill* Geography of social and economic inequality. Spatial distribution of wealth and poverty and the possible causes. Geographic and other aspects of the alleviation of poverty. The geography of racial and ethnic discrimination, from Indian reservations to ghettos, as well as religious and age discrimination.

GEOG 349 Geography of International Trade (5) *Fleming* Processes and patterns of international commerce. Geographical dimensions of trade linkages. Emergence of trading blocs, problems of "north-south" trade arrangements, and role of multinationals in the global trading system.

GEOG 350 Urban-Regional and Market-Area Analysis (5) *W Krumme* Methods and concepts for analysis of small regions, market areas, and their economic development. Tools for population, employment, and consumer profiles. Industrial and service locations, trading patterns, commodity flows. Spatial constraints on behavior of producers, consumers. Economic impact analysis, feasibility studies. Recommended: 207 or 277 or permission of instructor.

GEOG 360 Principles of Cartography (5) *Chrisman, Nyerges* Origins, development, and methods of cartography. Principles of data representation and map design for thematic and topographic mapping. Introduction to the use of computers for mapping.

GEOG 370 Problems in Resource Management (5) *ZumBrunnen* Principles and practices of effective conservation and utilization of natural resources. Role

of technology in resource use. Physical, political, and economic aspects of resource management for food, population, land, water, air, energy, and timber resources. Recommended: 100 or equivalent.

GEOG 375 Geopolitics (5) *S Jackson* Spatial aspects of international politics, with attention to perceptions of national space, the way states organize territory, and the strategic use of geography to advance state goals. Joint with SIS 375. Recommended: 100 or equivalent.

GEOG 380 Geographical Patterns of Health and Disease (4) *Mayer* Geography of infectious and chronic diseases at local, national, and international scales; environmental, cultural, and social explanations of those variations; comparative aspects of health systems. Prerequisite: 100 or equivalent.

GEOG 402 United States (5) *Morrill* Spatial pattern of economic and social life in America—how it evolved, the role of the environment and resources; problems of regional inequality in development.

GEOG 404 Problems in the Geography of Western Europe (5) *Fleming* Problems stemming from contemporary political and socioeconomic changes under way in Europe. Topics include regional development, economic integration and patterns of trade.

GEOG 405 Problems of Eastern Europe (5) *A Vellikonja* Selected geographical aspects of eastern Europe. Migration and urbanization. Transformation of territorial problems in postwar period.

GEOG 410 Immigrants and the American West (5) *W Vellikonja* Historic-geographic appraisal of European and Asiatic immigration to the West. Geographic precondition and processes of immigrant settlement. Assessment of the role of ethnicity.

GEOG 426 Quantitative Methods in Geography (5) *Hodge* Quantitative methods for empirical research in geography. Emphasis on statistical analysis; use of geographic data bases like the U.S. Census; understanding special issues and problems associated with geographically ordered data; verbal and graphic presentation in a computer environment. Prerequisites: 326, a course in statistics, or permission of instructor.

GEOG 430 Contemporary Development Issues in Latin America (5) *W* Contemporary development issues in Latin America, seen from a spatial perspective. Concept of development; competing theories as related to various Latin American states. Economic structural transformation, migration, urbanization, regional inequality, and related policies.

GEOG 432 Soviet Population and Urbanization (5) *W ZumBrunnen* Historical background and evolution of Soviet population and urbanization processes and problems. Distinguishing demographic characteristics and recent trends in the growth of Soviet urban and rural populations. Analysis of problems of Soviet nationalities, ethnic tensions, regional-temporal labor supply, spatial-temporal patterns of well-being, and population policy initiatives.

GEOG 433 Soviet Resource Use and Management (5) *W Jackson, ZumBrunnen* Implications of Soviet industrial growth for resources; use of resources and associated problems; conservation in theory and practice.

GEOG 434 Southeast Asia: Conflict and Development (5) *Chan* Study of complexity of ethnic, cultural, and socioeconomic background in relation to division and rivalry in past; conflict and development in contemporary southeast Asia. Recommended: 100.

GEOG 435 Resources and Industrialization in China (5) Analysis of China's resources, foundations and development, population growth and control, major industrial bases, and international relations underlying programs of industrialization and modernization.

GEOG 437 Contemporary Japan (5) *Kakiuchi* Topical and regional study of Japan's physical, industrial, and agricultural geography. Analysis of contemporary spatial patterns, considering both cultural and environmental factors. Aspects of historical development are examined to provide time perspective.

GEOG 440 Regional Analysis (5) *Sp Beyers* Regional industrial structures and economic change. Application of shift-share, cohort, multiplier, input/output, and programming models to the analysis and projection of regional population and employment patterns, regional growth differentials, and regional impact analysis. Recommended: 207 and introductory macroeconomics.

GEOG 441 Technology and Industrial Change (5) *Thomas* The "technology factor" in the process of industrial change in a turbulent contemporary world. Restructuring the world economy, transnational corporations, industry strategies and government policies. Prerequisite: 207 or permission of adviser.

GEOG 442 Social Geography (5) *A Vellikonja* Review of concepts and methods of postwar social geography: historical roots and present orientations. Study of social spatial systems, their structures and functioning. Recommended: 200.

GEOG 443 Location and Movement Models (5) *Morrill* Application of models of optimum location and allocation; assignment, transportation, and spatial equilibrium; spatial interaction; geographic simulation; and spatial diffusion.

GEOG 445 Population Distribution and Migration (5) *Sp Lawson, Morrill* Relation of population distribution to environment, economic development, and culture. Frontier and rural settlement, urbanization, and suburbanization. Regional variation in age, ethnicity, fertility, and mortality. Causes and effects of migration from the world to the local scale. Recommended: 100 or 200 or SOC 331.

GEOG 447 The Geography of Air Transportation (3 or 5) *A Fleming* Geographic analysis of world air routes, passenger and cargo flows, and airport activities; consideration of physical, economic, political, and institutional determinants of routes and flows.

GEOG 448 Geography of Transportation (5) *Sp Mayer* Circulation geography, principles of spatial interaction emphasizing commodity flow, the nature and distribution of rail and water transport, the role of transport in area development.

GEOG 449 Geography of Ocean Transportation (5) *Sp Fleming* Geographic analysis of ocean trade routes, cargo and passenger flows, and port activities. Evaluation of the role of the transportation carrier in international trade.

GEOG 450 Theories of Location (5) *A Krumme* Systematic presentation of classical, neoclassical, and modern theories of location, land use, and spatial structure, including introduction to decision-making concepts. Location principles, patterns, and processes in the context of rural, commercial, industrial, residential, and recreational activities focusing on the effects of transportation, communication, uncertainty, and other factors. Prerequisite: 207 or 277 or 350 or permission of adviser.

GEOG 458 Map Sources and Errors (3) *W Chrisman* Analysis and appraisal of source materials for maps, production constraints of mapping agencies, coverage and quality. Focus on errors inherent in maps and map derived data; judgment of fitness for specific applications. Prerequisite: 360 or permission of instructor; recommended: CIVE 316 or CETS 414.

GEOG 460 Geographic Information Systems Analysis (5) *A Chrisman* Methods of Analysis provided by geographic information systems (GIS). Operations on map information including map overlay,

aggregation/disaggregation, and other spatial and attribute procedures. Exposure to raster and vector software. Review of capabilities of current available GIS software. Prerequisite: 360 or permission of instructor.

GEOG 463 Geographic Information Systems Workshop (3-5) *Chrisman* Practical experience applying geographic information system (GIS) tools to analyze spatial data. Workshop format requires student-motivated projects; diverse principles encouraged. Prerequisite: 460 or permission of instructor.

GEOG 465 Analytical Cartography (5) *W Nyerges* Algorithms and data structures for selected topics in computer-assisted cartography. Emphasis on point, line, area, and surface data representation, map design, generalization, and data transformations in a systems development context. Prerequisites: 360, CSE 210 and 211 or equivalent, ENGR 141 or equivalent, or permission of instructor.

GEOG 466 Regional Development (3 or 5) *W Thomas* The process of regional economic development. Theories and conceptualizations of economic growth and structural change, technological change and industrial development, spatial variation in economic activities and government policies. Prerequisite: 207 or ECON 200 or equivalent.

GEOG 471 Methods of Resource Analysis (5) *Sp ZumBrunnen* Economic and noneconomic criteria for resource analysis. Theory and methods of linear models of natural resource analysis. Includes materials-balance modeling, residuals management, constrained system optimization approaches to water quality analysis, land-use patterns and interregional energy use, and multiple objective planning techniques applied to natural resource problems. Prerequisite: 370 or permission of instructor.

GEOG 475 Geography of International Relations (5) *Jackson* Selected problems of spatial patterns and dynamic relationships. Geographical problems of regional, national, and international organization. Joint with SIS 475. Prerequisite: 375 or permission of department adviser.

GEOG 478 Intraurban Spatial Patterns (5) *Sp Hodge, Morrill* Geographic patterns and processes within metropolitan areas. Economic land-use patterns (commercial and industrial location), social land-use patterns (segregation, housing, and neighborhood change), urban political geography, analysis of urban infrastructure, and assessment of contemporary and future trends in urban development.

GEOG 490 Field Research: the Seattle Region (6) *S Hodge, Morrill* Field methods for contemporary urban research. Survey designs used in the analysis of transportation, land use, location of employment, shopping and housing, political fragmentation, and environmental degradation. Field report required, based on field work in the Seattle region.

GEOG 492 Library Research in Geography (2) Introduction to library research methods in geography. Review and assessment of geographical bibliographies and abstract services for monographs, periodicals, gazetteers, dictionaries, encyclopedias, government publications, and statistical sources.

GEOG 494 Senior Essay (3) Supervised individual research and writing of major paper during senior year. Prerequisites: senior standing and permission of faculty sponsor.

GEOG 495 Special Topics (*, max. 10) Topics vary and are announced in the preceding quarter.

GEOG 496 Internship in Geography (3 or 5, max. 12) Internship in the public or private sector, supervised by a faculty member. Prerequisites: sophomore standing or above in geography and permission of faculty sponsor and undergraduate adviser.

GEOG 497 Tutorial in Geography (1-3, max. 6) Intensive directed study and tutoring. Literature reviews, formulations of project outlines and research designs, orientation in contemporary geographic thought and trends. Directed writing. Required for honors students. Prerequisite: permission of instructor.

GEOG 498 Undergraduate Seminar in Economic Geography and Regional Science (3) *Krumme* Selected advanced topics and current problems in location theory and analysis as well as urban and regional-economic development, analysis and planning. Emphasis on conceptual frameworks and analytical tools does not preclude a problem-oriented selection of predominantly local and regional empirical research subjects. Prerequisite: permission of instructor.

GEOG 499 Special Studies (*, max. 15) Supervised reading programs, undergraduate and graduate library and field research; special projects for undergraduate honors students. Prerequisite: permission of instructor or department adviser.

Courses for Graduates Only

GEOG 500 Contemporary Geographic Thought (4, max. 8)

GEOG 503 Research Seminar: Eastern Europe (3, max. 6) *Velikonja*

GEOG 505 Research Seminar: China and North-east Asia (3, max. 6)

GEOG 506 Research Seminar: Southeast Asia (3, max. 6)

GEOG 507 Research Seminar: Canadian Problems (3, max. 6) Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potentials and relations with the United States, Japan, and other important trading partners. Joint with SISC 507. Prerequisite: 308 or permission of instructor.

GEOG 509 Research Seminar: Japan (3, max. 6) *Kakuchi*

GEOG 510 Research Seminar: Settlement and Urban Geography (3, max. 9) *Mayer*

GEOG 511 Contemporary Methodologies and Philosophies in Geography (4) *A Overview* of major philosophies and methodologies of contemporary geographic research; historical roots of contemporary geography; roles of positivism, behaviorism, and other philosophical schools in geography; the role of space and regions as unifying and explanatory concepts in geography.

GEOG 520 Geographic Information Representation (3) *Sp Nyerges* Current issues in geographic information representation for cartography and geographic information systems. Includes representations for visualization and databases. Prerequisites: 460 or 465 or equivalent and concurrent registration in 529 or 565 or permission of instructor.

GEOG 526 Advanced Quantitative Methods in Geography (4) *Morrill*

GEOG 529 Urban Region Geocoding and Land-Based Information Systems (3) Multipurpose land information systems. The United States census geocoding system and cadastral file information use. Applications to land surveying, urban and transportation planning, and geographic analysis. Joint with CETS 529 and URBDP 529.

GEOG 531 Latin American Development Seminar (3) *Sp Lawson* Evolution of development theory in Latin America from a spatial perspective. Theories and development issues, using case studies from Latin America. How geographers have conceptualized development problems and solutions. Prerequisite: 430.

GEOG 533 Research Seminar: Soviet Union (3, max. 6) *Jackson*

GEOG 538 Research Seminar: Geography of Transportation (3, max. 6) *W Fleming, Mayer*

GEOG 540 Research Seminar: Industrial Geography (3, max. 6) *A Beyers*

GEOG 542 Research Seminar: Social and Population Geography (3, max. 6) *Morrill, Velikonja*

GEOG 550 Research Seminar in Location Theory (3) *W Krumme* Selected research-oriented topics in classical, neoclassical, and behavioral location theory. Theoretical problems of locational analysis. Relationships between location theory and regional development and planning concepts. Location concepts for urban analysis.

GEOG 551 Location Strategies of Corporate Organizations (3) *Krumme* Geographic dimensions of organizational behavior. Emphasis on locational strategies of large corporations. Industrial location, organization, regional development, and interregional trade and investment as factors influencing spatial patterns and processes of multiregional and multinational corporations.

GEOG 555 Landscape Analysis (3) *Fleming, Jackson* Methods of landscape analysis; search for a sense of place, transformation of territory into meaningful landscape; science and significance of regions; concepts of landscape change.

GEOG 556 Seminar in Urban Economics (3) Use of economic theory to explain land-use trends, transportation, housing and renewal, the ghetto, and the public economy in urban areas. Joint with ECON 556. Prerequisites: ECON 300, 301, or equivalent.

GEOG 560 Geographic Information and Analysis (3, max. 6) *Chrisman* Current research topics in geographic information systems. Particular emphasis on analytical methods, and their use in practical circumstances. Prerequisite: graduate status in cartography or related field.

GEOG 563 Algorithms and Data Structures for Geographic Information Systems (5) *Sp Chrisman* Anatomy of a software package for geographic information processing. Emphasis on analysis of algorithmic complexity and software design techniques. Presents dynamic data structures, persistence of temporal data, and data flow algorithms. Prerequisites: 460, 465, and CSE 326 or 373.

GEOG 565 Geographic Information Systems and Expert Systems (5) *Sp Nyerges* Design considerations for expert systems related to geographic information systems. Geographic/cartographic knowledge structuring and reasoning in expert systems examined with the use of an expert system development environment. Prerequisites: 460 and 465 or equivalents, and permission of instructor; recommended: concurrent registration in 520.

GEOG 566 Regional Development Seminar (3) *Sp Thomas* Regional economic development theories and methodologies. The dynamic roles of social, economic, technical, and institutional factors in the process of regional development. Impacts of industry and firm strategies and government policies.

GEOG 567 Research Seminar: Geography and Industrial Development (3, max. 6) *A Thomas* Spatial and economic dimensions of contemporary restructuring of world economy. Explanatory roles of such factors as governments, technical change, complex corporations, capital markets, information costs, transfer costs, and international trade in this process of global restructuring.

GEOG 570 Research Seminar: Natural Resources Analysis (3, max. 6) *ZumBrunnen*

GEOG 575 Research Seminar: Geography in Politics and World Affairs (3, max. 6) Jackson Literature in political geography and related fields pertaining to state and interstate relationships. Prerequisites: 375, 475.

GEOG 577 Research Seminar: Internal Spatial Structure of Cities (3, max. 9)

GEOG 580 Medical Geography (3) W Mayer Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Joint with HSERV 586. Prerequisites: familiarity with social science research; health-related issues.

GEOG 581 Seminar in Medical Geography (3) W Mayer Research and methodologies in medical geography; critical analysis of readings in medical geography; interrelations of medical geography with (1) other geographical specialties, (2) other health sciences. Prerequisite: 580.

GEOG 588 Geography Colloquium (1, max. 3) Participation in, and critique of, student thesis and dissertation research, faculty research, and visitor contributions.

GEOG 600 Independent Study or Research (*)

GEOG 700 Master's Thesis (*)

GEOG 800 Doctoral Dissertation (*)

Geological Sciences

63 Johnson

The geological sciences include the collection and interpretation of field data as well as the application of principles of physics, chemistry, biology, and mathematics to the study of the earth, its environment, its origin, and the processes by which it has been transformed and reconstituted through time. The curriculum of the department provides a base of required courses for the undergraduate and contains a wide variety of more specialized upper-division courses that reflect the diversity of the geological sciences.

The department is well equipped with modern analytical and experimental facilities and has sizable research/teaching collections of rock, minerals, and fossils.

Undergraduate Program

Sara Caka, Adviser

Bachelor of Science Degree

The Department of Geological Sciences offers courses in all the major subdisciplines of geology, preparing students for graduate school and for careers in industry, government, and academe. Courses are also offered for nonmajors interested in understanding the processes responsible for the distribution of continents, the landscapes, the availability of natural resources, and the occurrence of such natural hazards as earthquakes and volcanism.

Major Requirements: GEOL 101 or 205, 306, 311, 320, 321, 340, 401 plus 13 (biology option) or 15 credits at the 400 level in geological sciences, excluding GEOL 401, 498 and 499; MATH 124, 125, and either 126 or STAT 311; CHEM 145 or 140, 155 or 150; PHYS 121, 122, 123. Recommended: MATH 307, 328, and PHYS 224, 225, 226, or BIOL 101-102 or two courses chosen from BIOL 201, 202, 203. (Biology option: PHYS 121; BIOL 101-102 or two courses chosen from BIOL 201, 202, 203 may substitute for PHYS 122, 123.) All required courses must be completed with grades not lower than 2.0.

Graduate Program

Bernard Evans, Graduate Program Coordinator

The Department of Geological Sciences offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. The department emphasizes a rigorous scientific approach to significant problems in the geological sciences. Study in virtually all branches of geology is possible; any emphasis on field, laboratory, or theoretical work is largely dictated by the nature of the research problem selected.

Research Facilities

Analytical, experimental, and computational research facilities include a wet chemistry laboratory with an atomic absorption spectrophotometer, a forty-eight-channel ICP unit for elemental analysis, a JEOL 733 four-channel microprobe with EDS/WDS, a thermal-ionization mass spectrometer and clean laboratory for separation of radiogenic and trace elements (Rb/Sr, Sm/Nd, U, Pb), two single-crystal X-ray diffractometers for crystal-structure studies at high pressure and temperature, a power X-ray diffractometer, a microcomputer laboratory, a Microvax 2 facility for geochemistry research, a VAX 750 facility for research in crystallography and mineral physics, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and gas-atmosphere-controlled furnaces. Additional facilities are provided by the Burke Memorial Washington State Museum with paleontological laboratory and collections (extensive reference collections of invertebrate, vertebrate, and plant fossils; petrologic and mineralogical collections) and the Quaternary Research Center (scanning and transmission electron microscopes, K-Ar dating, radiocarbon and oxygen-isotope research, palynology, snow and ice research, and periglacial laboratory).

Master of Science Degree

Graduation Requirements: With Thesis—36 credits, of which 18 must be in courses at the 500 level or above and up to 9 may be for thesis (GEOL 700). Final examination consists of oral presentation and defense of thesis. Without Thesis—45 credits, of which 18 must be in courses at the 500 level or above, which includes a 5-credit research paper (GEOL 600). Final examination is written or oral and is administered by the supervisory committee. All students must present approved field courses or other approved field experience. A maximum of 9 credits of field geology may be applied.

Doctor of Philosophy Degree

Admission Requirements: Either Master of Science or Master of Arts degree in geological sciences or related field.

Graduation Requirements: Credits variable; one-half total program, including dissertation, must be in courses at the 500 level or above; a minimum of 27 credits for thesis (GEOL 800); at least 18 credits completed with numerical grade in courses numbered 400 and 500. Completion of two years of graduate study, satisfaction of the Ph.D. entrance requirement, General Examination, and admission to candidacy; completion of acceptable dissertation and passage of Final Examination.

Financial Aid

The department awards annually a number of teaching assistantships, endowed scholarships, research assistantships, minority fellowships, and a museum curatorial assistantship. Industry-sponsored grants are also available. Qualified students are strongly encouraged to apply for National Science Foundation and other fellowships available through national and private agencies.

Darrel S. Cowan

Professors

Adams, John B.,* 1961, (Astronomy), M.S., 1958, Ph.D., 1961, Washington; planetology, remote sensing.

Bostrom, Robert C.,* 1964, (Emeritus), (Geophysics),† M.A., 1952, Ph.D., 1961, Oxford, (England); geophysics.

Cowan, Darrel S.,* 1974, Ph.D., 1972, Stanford; structural geology and regional tectonics.

Creager, Joe S.,* 1958, (Oceanography),† M.S., 1953, Ph.D., 1958, Texas A&M; marine geology.

Crosson, Robert S.,* 1966, ‡(Geophysics), M.S., 1963, Utah; Ph.D., 1966, Stanford; seismology.

Delaney, John R.,* 1977, ‡(Oceanography), M.S., 1967, Virginia; Ph.D., 1977, Arizona; geological oceanography, igneous petrology, properties and origin of the oceanic crust and upper mantle.

Dunne, Thomas,* 1973, (Environmental Studies, Quaternary Research Center), Ph.D., 1969, Johns Hopkins; geomorphology and hydrology.

Evans, Bernard W.,* 1969, Ph.D., 1959, Oxford (England); petrology and mineralogy.

Ghiorso, Mark S.,* 1980, M.A., 1978, Ph.D., 1980, California (Berkeley); geochemistry.

Ghose, Subrata,* 1972, (Geophysics, Materials Science and Engineering), M.S., 1959, Ph.D., 1959, Chicago; x-ray crystallography, mineralogy, applications of solid-state physics techniques to mineralogy.

Hallet, Bernard,* 1980, (Quaternary Research Center), Ph.D., 1975, California (Los Angeles); glaciology, permafrost studies, geomorphology.

Leopold, Estella B.,* 1976, ‡(Botany, Environmental Studies, Forest Resources, Quaternary Research Center), M.S., 1950, California (Berkeley); Ph.D., 1955, Yale; palynology and Quaternary environments.

Mallory, V. Standish,* 1952, (Emeritus), M.A., 1948, Ph.D., 1952, California (Berkeley); biostratigraphy, micropaleontology, paleoecology.

McCallum, I. Stewart,* 1970, Ph.D., 1968, Chicago; petrology.

Merrill, Ronald T.,* 1967, (Oceanography), (Geophysics),† M.S., 1961, Michigan; Ph.D., 1967, California (Berkeley); geomagnetism.

Porter, Stephen C.,* 1962, (Quaternary Research Center), M.S., 1958, Ph.D., 1962, Yale; Quaternary geology and geomorphology.

Raymond, Charles F.,* 1969, ‡(Geophysics, Quaternary Research Center), Ph.D., 1969, California Institute of Technology; glaciology.

Rensberger, John M.,* 1966, M.A., 1961, Ph.D., 1967, California (Berkeley); Cenozoic mammalian evolution, taxonomy, and biostratigraphy.

Smith, J. Dungan,* 1967, (Geophysics, Oceanography),† M.S., 1963, Brown; Ph.D., 1968, Chicago; oceanography, fluid mechanics, sediment transport processes.

Smith, Stewart W.,* 1970, ‡(Geophysics), M.S., 1958, Ph.D., 1961, California Institute of Technology; earthquake seismology.

Stuiver, Minze,* 1969, ‡(Botany, Quaternary Research Center),† M.S., 1953, Ph.D., 1958, Groningen (The Netherlands); geochronology, isotope geology.

Tsukada, Matsuo,* 1969, ‡(Botany, Quaternary Research Center), M.S., 1958, D.Sc., 1961, Osaka City (Japan); interpretation of Quaternary events from palynological and kindred data.

Ward, Peter D.,* 1985, (Zoology), M.S., 1973, Washington; Ph.D., 1976, McMaster; invertebrate paleontology, paleobiology.

Washburn, A. Lincoln, 1966, (Emeritus), Ph.D., 1942, Yale; geomorphology, periglacial processes and environments.

Wilkening, Laurel L.,* 1988, (Astronomy), Ph.D., 1970, California (San Diego); geochemistry, planetary sciences.

Associate Professors

Bergantz, George W., 1988, M.S., 1985, Georgia Institute of Technology; Ph.D., 1988, Johns Hopkins; physical petrology.

Bourgeois, Joanne,* 1980, Ph.D., 1980, Wisconsin; stratigraphy, sedimentation.

Brown, J. Michael,* 1984, ‡(Geophysics), M.S., 1978, Washington; Ph.D., 1980, Minnesota; experimental and theoretical mineral physics.

Cheney, Eric S.,* 1964, Ph.D., 1964, Yale; economic geology, application of light isotopes to ore deposits.

Stewart, Richard J.,* 1969, (Oceanography), Ph.D., 1970, Stanford; sedimentary petrology, diagenesis of sediments.

Vance, Joseph A.,* 1957, Ph.D., 1957, Washington; igneous and metamorphic petrology, general geology.

Assistant Professor

Nelson, Bruce K.,* 1986, M.S., 1980, Kansas; Ph.D., 1985, California (Los Angeles); isotope geochemistry.

Lecturer

Chernikoff, Stanley E., 1980, Ph.D., 1980, Minnesota; geomorphology.

Course Descriptions

Courses for Undergraduates

GEOL 100 Dinosaurs (2) A Rensberger Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested. Optional ten-day, postquarter field trip to dinosaur deposits offered when possible.

GEOL 101 Introduction to Geological Sciences (5) AWSpS Chernikoff Survey of the physical systems that give the earth its form. Emphasizes the dynamic nature of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms in the understanding of past events. A course with laboratory for nonscience majors. Not open for credit to students who have taken 205. Field trips.

GEOL 205 Physical Geology (5) Asp Stewart Introduction to the physical and chemical processes of the earth's surface and interior. Plate tectonics, earthquakes, volcanism, glaciation. Optional field trips to Cascades and Olympics. Background in geology not required but science background desirable. Not open for credit to students who have taken 101.

GEOL 300 Geology of the National Parks (5) Review of fundamental geological processes, using North American parks and monuments as examples of natural laboratories. Includes volcanism, glaciation, water and wind erosion, plate-tectonic forces as preserved in geologic exposures of National Parks. Specific topics explored in laboratory sessions and field trips. Prerequisite: 101 or 205 or equivalent.

GEOL 302 Great Ice Age (5) W Chernikoff Growth of mile-thick ice sheets, worldwide lowering of sea level, and other changes that accompany the harsh environments of a global ice age. Geology of the last three million years, focusing on the geological and ecological impact of our current ice age. Prerequisite: 101 or 205.

GEOL 306 Evolution of the Earth (5) W Earth and its physical and biological aspects through time. Origin of earth, its early history, and development of continents and ocean basins as chronicled by the rock and fossil record. Field trips required. Prerequisites: 101 or 205.

GEOL 308 Geology of the Northwest (5) SpS Chernikoff Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Two day-long weekend field trips required. Prerequisite: 101 or 205 or equivalent.

GEOL 311 Introductory Geomorphology (5) A Dunne, Hallet Processes that generate landscapes. Two one-day field trips. Prerequisites: 101 or 205, and prior or concurrent enrollment in PHYS 121.

GEOL 312 Volcanoes and Glaciers of the Pacific Northwest (3) S Irving Introduction to volcanic and glacial processes, emphasizing examples in the Pacific Northwest. Volcanic products, landforms, hazards, prediction, and history. Relationship to tectonics. Nature and distribution of present and former glaciers in Washington. Two all-day Saturday field trips to Cascade volcanoes required.

GEOL 313 Environmental Geology (4) A Dunne Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial processes, earthquake and volcanic hazard, and environmental aspects of the development of water, energy, and mineral resources. The laboratory/discussion section often is replaced by an afternoon or weekend field trip. Prerequisites: 101, 205, or permission of department.

GEOL 320 Mineralogy (5) W Ghiorso Introduction to mineralogy, including elementary crystallography (lattice types, external morphology, stereographic projection), elementary crystal physics (relationship of physical properties, including tensor properties to crystal symmetry), and elementary crystal chemistry (structures, bonding, etc.), especially of the silicates. Prerequisites: CHEM 101 or 140, MATH 124.

GEOL 321 Principles of Petrology (5) Sp Description, classification, and origin of igneous, metamorphic, and sedimentary rocks, with laboratory hand specimen study of rock specimens. Two one-day field excursions. Prerequisite: 320 or equivalent.

GEOL 340 Structural Geology (5) A Mechanics of rock deformation; description, classification, origin, and tectonic significance of common structures. Emphasizes interpretation and analysis of geologic maps and cross-sections. Prerequisites: MATH 124, PHYS 121.

GEOL 401 Field Geology (10) S Geologic mapping in diverse areas in the western United States. Development of skills in mapping, field interpretation, and report writing. Prerequisites: 101 or 205, 306, 320, 321, 340, and permission of department.

GEOL 403 Principles of Paleobiology (4) Sp Ward Fossil record and methods of analysis. Biologic systems in geologic time, including preservation, variation, population structure, adaptation, functional morphology, biostratigraphy, paleoecology, evolution, and biogeography. Prerequisites: 101 or 205, and 306.

GEOL 405 The Earth's Interior (3) Geophysical evidence as to the earth's interior regionalization and workings; development of the major surface features.

GEOL 409 Great Geological Issues (3) Sp Bourgeois History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Prerequisite: advanced standing in geological sciences or course work in history of science (e.g., HST 311, 312), or permission of instructor.

GEOL 410 Introduction to Geological Remote Sensing (4) A Adams Principles of image interpretation for geologists. Study of land forms, structure,

lithology, surface processes using aircraft and satellite data. Use of digital multispectral images and radar images for geological mapping. Prerequisite: 311.

GEOL 412 Fluvial Geomorphology (5) Sp Dunne Hydraulic, sedimentologic, and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Interpretation of fluvial sedimentary environments. Five field exercises emphasize the quantitative analysis of fluvial processes and channel forms and the acquisition of various skills, such as mapping, topographic surveying, and report writing. Prerequisites: 311, MATH 125, PHYS 121. (Offered odd-numbered years.)

GEOL 413 Hillslope Geomorphology (5) Sp Dunne Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Five field exercises emphasize the quantitative analysis of geomorphic processes and the acquisition of various skills, such as mapping, topographic surveying, and report writing. Prerequisites: 311, MATH 125, PHYS 121. (Offered even-numbered years.)

GEOL 414 Image Interpretation (4) W Adams Image interpretation in geological remote sensing. Analysis of aircraft and satellite images to solve field problems. Aerial stereo photography, digital multispectral images, thermal IR, radar images. Prerequisite: 410.

GEOL 415 Principles of Glaciology (3) A Hallet, Maykut, Porter, Raymond, Stuiver, Warren Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, ice Age theories. Joint with GPHYS 415. Prerequisite: permission of instructor.

GEOL 416 Glacial Geology (3) A Porter Interpretation of glacial environments and history through study of sediments and landforms; stratigraphic approaches, chronology, reconstructions, applications. Recommended: 311, 415.

GEOL 417 Quaternary Glacial Ages (3) A Porter Physical, biological evidence of climatic change during Quaternary Period; stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth's terrestrial, marine environments. Theories on causes of climatic variation. Joint with QUAT 417. Prerequisite: Introductory course in earth science and biological science.

GEOL 419 Glacial Landscapes and Deposits (3) Sp Hallet Development of steep-sided valleys, turquoise lakes, deep cirques, craggy peaks. Physics of glacial erosion and deposition. Geological and geotechnical properties of glacial sediments. Prerequisites: 311, 415.

GEOL 420 Advanced Mineralogy (3) Sp Ghose Dynamic aspects of mineral behavior and associated thermodynamic and other physical properties; lattice dynamics, phase transition, cation order-disorder and exsolution, ligand field theory, color and magnetic properties of transition metal-bearing minerals. Diffraction and spectroscopic techniques, such as infrared, Raman, Mossbauer, NMR, EPR.

GEOL 423 Optical Mineralogy (4) A Petrographic microscope and recognition of common minerals in thin section. Prerequisite: 320 or equivalent.

GEOL 424 Petrography and Petrology of Igneous Rocks (5) W McCallum, Vance Systematic study of igneous rocks and their origin, using the petrographic microscope. Prerequisite: 423 or equivalent.

GEOL 425 Petrography and Petrology of Metamorphic Rocks (5) Sp Evans Mineralogy, textures, and origins of metamorphic rocks; metamorphic facies and metamorphic phase equilibria; controls of metamorphism. Prerequisites: 423, 424, or equivalents.

GEOL 426 Petrology and Petrography of Sedimentary Rocks (5) W Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisites: 320, 423, or equivalents.

GEOL 430 Invertebrate Paleontology (5) W Ward Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Prerequisite: 306 or permission of instructor.

GEOL 432 Paleocology of Invertebrates (5) Properties of fossil populations and interpretation of habit and habitat in the geologic past; applications to interpretation of the stratigraphic record.

GEOL 435 Seismic Exploration (5) Sp Brown Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Joint with GPHYS 435. Prerequisites: 340, MATH 126, PHYS 123.

GEOL 437 Fossil Vertebrates (5) W Rensberger Highlights in evolutionary history of the fossil vertebrates, from early Paleozoic fishes through late Cenozoic mammals. Morphology, adaptations, relationships of the major groups. Bone structures and systematic relationships. Field trip. Prerequisite: 100 or BIOL 101 or equivalent. (Offered even-numbered years.)

GEOL 438 Fossil Mammals (5) Rensberger Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology, adaptations, extinctions, evolutionary patterns. Structures and relationships of most major groups. Field trip. Prerequisite: 100 or BIOL 101 or 437. (Offered odd-numbered years.)

GEOL 443 Tectonics (3) W Development of orogenic belts in space and time; critical evaluation of large-scale zones of deformation as geological expressions of plate interactions; characteristics of modern and ancient convergent plate boundaries. Prerequisite: 340.

GEOL 450 Techniques in Geophysics (3) W Bosstrom Geophysics of the solid earth, outlining instruments, techniques, and interpretation. Prerequisite: senior standing in geology or permission of instructor.

GEOL 452 Principles of Sediment Transport by Turbulent Flow (3) Sp J. D. Smith Theoretical and experimental techniques used in studying erosion, transportation, and deposition of sediment. Initial motion of sediments, bed-load motion, suspension of sediment by turbulent flows, erosion and deposition of sediments, and applications of sediment transport theory to problems of geological interest. Joint with GPHYS and OCEAN 452. Prerequisite: 455.

GEOL 455 Introduction to Geomechanics (4) W Basic principles of continuum mechanics, their application to flow of water, mud, magma; deformation of soil, rock, ice. Emphasis on sound physical understanding of these principles and use of elementary mathematics in their application to earth sciences problems. Joint with GPHYS 455. Prerequisites: MATH 126, PHYS 123, or equivalent.

GEOL 461 Stratigraphy (4) A Bourgeois Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biostratigraphy, magnetostratigraphy, seismic stratigraphy, subsurface analysis. Basin analysis, evolution of sedimentary basins and continental margins. Prerequisites: 306, 321, or equivalents.

GEOL 462 Depositional Environments (4) Sp Bourgeois Principles of sedimentary facies analysis, including survey of modern processes that produce sedimentary sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: 306 or equivalent historical geology; recommended: 311, 321.

GEOL 472 Introduction to Geochemistry (4) A Nelson Thermodynamics; practical application of thermodynamic data to geologic problems. Crystal chemistry. Phase equilibria and phase diagrams. Aqueous geochemistry. Organic geochemistry. Systematics of radiometric dating. Stable isotope equilibria. Prerequisites: 320, 321, CHEM 150 or 155, or permission of instructor.

GEOL 474 Introduction to X-ray Crystallography (3) W Ghose Point groups and space groups. Reciprocal lattice. Theory of x-ray diffraction from single crystals. Powder diffraction; identification of unknowns and determination of precise cell dimensions. Single crystal camera (precession and Weissenberg) techniques; determination of cell dimensions and space groups; study of exsolution and phase transformation in rock-forming silicates. Structure factor formula and the use of three-dimensional Fourier and Patterson series in the determination of crystal structures. Prerequisites: 320, PHYS 123.

GEOL 476 Isotope Geology (3) Sp Nelson, Stuiver Methods involving the application of radioactive isotopes in age dating (radiocarbon, lithium, potassium-argon dating, etc.), and of stable isotope variations in nature in determining the temperature history of the earth and igneous rock formations. Applications of global aspects of the hydrologic cycle, age dating in archaeology, and geochemical cycling of elements. Prerequisite: background in introductory mathematics.

GEOL 485 Principles of Economic Geology (5) A Cheney Principles of economic geology and exploration as illustrated by selected types of metallic and non-metallic ore deposits and coal. Prerequisites: 321, 340, and senior standing in geological sciences.

GEOL 488 Economic Field Geology (5) Sp Cheney Identification of hydrothermally altered rocks, oxidation, and supergene enrichment; principles of exploration, geochemistry and remote sensing. Four-to-eight-day trip to mining districts for field inspection of ore deposits. Two weekends (three days each) mapping mineral deposits. Prerequisites: 485 or equivalent and permission of instructor.

GEOL 490 Special Topics (2-5, max. 10) AWSps

GEOL 498 Undergraduate Thesis (5) AWSp The thesis must be submitted at least one month before graduation. Prerequisite: permission of department.

GEOL 499 Undergraduate Research (*, max. 15) AWSp Prerequisite: permission of department.

Courses for Graduates Only

GEOL 509 Great Geological Issues (3) Sp Bourgeois History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary material. Prerequisites: 409 and graduate standing in earth sciences, or in history of science, or permission of instructor.

GEOL 511 Seminar in Geomorphology and Hydrology (*) AWSp Dunne, Hallet, Porter Prerequisite: permission of instructor.

GEOL 512 Seminar in Quaternary Research (2) Porter Seminar with advanced readings and discussion stressing current problems in Quaternary research. Prerequisite: permission of instructor.

GEOL 518 Periglacial Geology (3) W Hallet Geomorphic features and fundamental processes active in areas subjected to subfreezing temperatures. Geotechnical and environmental problems characteristic of periglacial areas. Prerequisites: 311 and prior or concurrent enrollment in 455; recommended: CHEM 350.

GEOL 519 Advanced Geological Remote Sensing (4) Sp Adams Critical examination of remote sensing methods that are used to determine chemistry,

mineralogy, and structure of the earth's surface and the surfaces of solar system bodies. Photographic and digital multispectral imagery, reflectance spectroscopy, thermal infrared spectroscopy, gamma ray spectroscopy, radar imagery, and other techniques. Emphasis on the application of satellite and aircraft measurements to terrestrial geologic problems. Prerequisite: 410 or equivalent. (Offered even-numbered years.)

GEOL 521 Metamorphic Minerals (5) A Evans Structures, compositions, optical properties, stability, occurrence, and paragenetic associations of rock-forming metamorphic minerals. Significance of these observations in the determination of metamorphic environments. Laboratory study using the polarizing microscope. Prerequisite: 425 or equivalent. (Offered alternate years.)

GEOL 522 Metamorphic Parageneses (5) A Evans Metamorphic parageneses and processes in the context of tectonic environment. Laboratory study of material from contrasting metamorphic belts. Prerequisite: 425 or equivalent. (Offered alternate years.)

GEOL 524 Petrogenesis of Igneous Rocks (3) Sp McCallum, Vance Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: 424 or equivalent. (Offered alternate years.)

GEOL 525 Theoretical Metamorphic Petrology (4) W Evans Theoretical treatment of metamorphic mineral assemblages and metamorphic processes. Prerequisites: 425, CHEM 456, or equivalent.

GEOL 526 Theoretical Igneous Petrology (4) A McCallum Review of thermodynamics, with emphasis on solutions. Crystal-liquid equilibria. Physical properties of silicate melts. Oxidation states of magmas. Magmatic gases. Quantitative treatment of fractionation, assimilation, and magma mixing. Trace elements and isotope ratios. Stable isotopes as tracers. Nucleation and crystal growth. Diffusion in melts. Cooling and crystallization models. Elementary fluid dynamics applied to magma flow. Prerequisites: 424, CHEM 456, or equivalents. (Offered alternate years.)

GEOL 527 Phase Equilibria in Silicate Systems (4) A McCallum Phase equilibria in 1-, 2-, 3-, 4-, and multi-component systems appropriate to igneous rocks. Geometrical aspects stressed. Effect of H₂O, CO₂, and variable oxidation states on phase equilibria. Application to the petrogenesis of common igneous rocks. Prerequisite: 424 or equivalent. (Offered alternate years.)

GEOL 531 Seminar in Paleontology (2-4) Advanced topics in paleontology and biostratigraphy, including paleobiology and evolution.

GEOL 533 Seminar in Vertebrate Paleontology (3, max. 9) A Rensberger Advanced topics in vertebrate evolution, morphology, classification, function, ecology, and stratigraphy. Subject to be chosen by class at beginning of quarter. Prerequisite: advanced standing in paleontology, vertebrate zoology, or physical anthropology.

GEOL 548 Tectonic Evolution of Western North America (4) Sp Cowan Survey of each of the major Mesozoic and Cenozoic tectonic provinces in western North America, emphasizing structural styles, tectonic framework, and plate-tectonic setting. Provinces include: Laramide, Rocky Mountain foothills, Basin and Range, Cordilleran core complexes, San Andreas, Sierran-Klamath, Franciscan-Great Valley, Vancouver Island-San Juan Islands-North Cascades. Prerequisites: 340, 443. (Offered alternate years.)

GEOL 549 Small-Scale Structures in Deformed Rocks (5) Sp Cowan Origin, geometry, tectonic significance of small-scale structures, including foliation, lineations, folding and boudinage, brittle and ductile fault zones; qualitative strain analysis and principles of

structural analysis. Includes work with deformed rocks in the field. Prerequisites: 340, 423. (Offered alternate years.)

GEOL 550 Theoretical Structural Geology (4) *Bruner* Analysis of finite deformation; elastic, plastic, and viscous behavior; dislocations and crystal deformation; deformation mechanisms and flow laws for rocks; formation of folds, boudinage, and mullions; tensile fracture and the growth of joints, dikes, and veins; mechanics of faulting; large-scale crystal deformation. Prerequisites: 340, 455, or equivalents.

GEOL 556 Planetary Surfaces (3) Comparison of surface processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and on the implied course of solar-system evolution. Analysis of data from Earth-based telescopes and from manned and unmanned space missions. Joint with ASTR 556 and GPHYS 556. (Offered odd-numbered years.)

GEOL 557 Origin of the Solar System (3) Nebular and nonnebular theories of the origin of the solar system; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; examination of the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Joint with ASTR 557 and GPHYS 557.

GEOL 560 Mechanics of Erosion and Sediment Transport (3) *A. J. D. Smith* Physics of transportation of sediment by turbulent flows. Use of theoretical fluid mechanics to formulate and solve problems of bed-load and suspended-load transport. Joint with GPHYS and OCEAN 560. Prerequisites: 455 or MATH 329, and 452. (Offered odd-numbered years.)

GEOL 561 Seminar in Geological Fluid Mechanics (3) *W. J. D. Smith* Reading and discussion of topics of current interest in geological fluid mechanics. Course work includes a report on a specialized topic. Joint with OCEAN 561 and GPHYS 561. Prerequisite: permission of instructor.

GEOL 562 Mechanics of Sediment-Transporting Flows (3) *A. J. D. Smith* Mechanics of turbulent near-bottom flows responsible for erosion and transportation of sediment. How bed-load and suspended load transport modify characteristics of these flows. Joint with GPHYS and OCEAN 562. Prerequisites: 455 or MATH 329, and 452. (Offered even-numbered years.)

GEOL 564 Sedimentology of Carbonate Rocks (2-4) *Bourgeois* Petrographic and environmental interpretation of carbonate sediments and rocks. Hand-specimen and thin-section studies, with references to modern and ancient carbonate environments. (Offered even-numbered years.)

GEOL 565 Interpretation of Sedimentary Structures (2-4) Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required. Recommended: 452.

GEOL 571 Transport Theory and Applications in Geology (3) *W. Bergantz* Introduction to the quantitative treatment of transport phenomena with applications to igneous processes and metamorphism, magma and mantle convection, flow and reaction in regional and contact metamorphism. Emphasis on the governing equations of heat transfer, fluid and porous media flow, rheology, and analytical, numerical, and scaling solutions. Prerequisite: AMATH 402.

GEOL 572 Solution Geochemistry (4) *W. Ghiorso* Solution chemistry and thermodynamics as applied to solid and liquid silicates and aqueous fluids. Modeling configurational entropies in solids, activity coefficients and complexes in aqueous solution, and modeling chemical mass transfer in geologic systems. Prerequisite: 472 or equivalent.

GEOL 573 Electron Beam Microanalysis (4) *W. Kuehner* Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems.

GEOL 574 Advanced X-ray Crystallography (4) *Sp. Ghose* Theory of x-ray diffraction; determination of crystal structures with special emphasis on minerals and inorganic compounds, through the application of three-dimensional Patterson function, Fourier series, and direct methods; structure refinement; determination of cation distribution, exsolution, and antiphase domain structure through x-ray diffraction. Prerequisite: 474 or permission of instructor.

GEOL 575 Physics and Chemistry of the Mantle (3) *A. Brown, Irving* Constitution and large-scale chemical, physical evolution of mantle. High-pressure phase transitions; lateral and vertical heterogeneities from seismological observations; influence of fluids on rheology and melting; metasomatism, other mass transport processes; trace element/isotopic characteristics of mantle samples and mantle-derived magmas. Joint with GPHYS 575.

GEOL 576 Geochronometry (4) *A. Nelson, Stuiver* Principles, methods, and applications of dating rocks and organic materials.

GEOL 579 Magma Physics (3) *Sp. Bergantz* The quantitative treatment of magmatic processes: thermomechanical state of the lithosphere, solidification, convection, conjugate heat transfer, crystal settling, magma mixing, diapirism and melt extraction, hydrothermal convection. Emphasis on continental lithosphere. Prerequisites: 571, AMATH 403.

GEOL 582 Seminar in Sedimentology (2-4) *Sp. Bourgeois* Selected problems of current interest; extended field trips to classic sedimentologic localities.

GEOL 586 Economic Geology of Sedimentary Rocks (5) *W. Cheney* Description and origin of metallic and nonmetallic ore deposits indigenous to regoliths, sediments, and sedimentary rocks. Prerequisite: 485 or equivalent or permission of instructor. (Offered even-numbered years.)

GEOL 587 Economic Geology of Igneous and Metamorphic Rocks (5) *W. Cheney* Description and origin of metallic and nonmetallic ore deposits formed in igneous and metamorphic rocks or by igneous and metamorphic processes. Prerequisite: 485 or equivalent or permission of instructor. (Offered odd-numbered years.)

GEOL 590 Special Topics (2-5, max. 10) *AWSpS*

GEOL 600 Independent Study or Research (*) *AWSpS*

GEOL 700 Master's Thesis (*) *AWSpS*

GEOL 800 Doctoral Dissertation (*) *AWSpS*

Geophysics

202 Atmospheric Sciences-Geophysics

Geophysics is an interdisciplinary physical science concerned with the makeup, behavior, and planetary environment of the earth. The techniques of physics, mathematics, and chemistry are applied to the structure and dynamic behavior of the earth and other planets. Included in this interdisciplinary area are a large number of complex and interrelated natural processes ranging from heat transfer in the earth's core to electron precipitation in the magnetosphere, with a wide variety of possibilities in between. An undergraduate degree is not offered.

Graduate Program

The Geophysics Program offers graduate study leading to the Master of Science and Doctor of Philosophy degrees. These degrees cover a broad range of topics in which the analytic techniques of physics and mathematics are brought to bear on problems of the earth and its environment. Major areas of interest are the internal and surface structures of planets, dynamical processes within the earth, oceans, and atmosphere, and the associated environmental applications of these processes.

The required curriculum is flexible so as to permit pursuit of the wide variety of scientific disciplines that may be necessary for approaching a specific geophysical problem. However, a core curriculum of basic physics and mathematics and a sequence of courses dealing with some of the important problems encountered in space, the atmosphere, the oceans, and the solid earth are required. Additional specialized course work necessary before embarking on a thesis project is handled on an individual basis by the student and a faculty committee.

Special Requirements

A written qualifying examination is given once each year in the late spring. Normally, students take this examination at the end of their first year. A grade of pass with distinction is required if the student is to continue study for a Ph.D. degree.

Financial Aid

Most financial aid is provided through graduate research assistantships that enable students to work with individual faculty members on important research projects. However, two teaching assistantships also are awarded each year.

Research Facilities

Research facilities available include a variety of paleomagnetic equipment including a cryogenic magnetometer, field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including x-ray machine, ruby fluorescence pressure measuring system, laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent statewide seismic network; a portable telemetered seismic network for studying volcanoes and active faults in western North America; a cold laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical fluids laboratory; a space physics laboratory for preparing balloon, rocket, and satellite experiments; and a laboratory for the development of optical high-resolution instrumentation. Computer facilities include a Pyramid 90X as a main computer in a local area network linking various laboratory workstations and peripheral devices via Ethernet. This local net is connected to a campuswide fiber-optic ring that provides access to other campus computers and national networks. Many of the geophysics faculty members also have laboratories or access to laboratories in other departments, thus making possible a wide diversity of research opportunities. This is particularly valuable in such fields as aeronomy, tropospheric aerosols, radioactive age dating, and geophysical fluid mechanics. In addition to laboratory work, field programs are carried out at a number of remote sites, particularly in the Washington Cascades and Olympics. In marine geophysics, joint geophysics/oceanography projects provide opportunities for studying the earth's structure and tectonic processes on the sea floor. Facilities for heat-flow determination, reflection profiling, long-range seismic refraction, and magnetic and paleomagnetic measurements are available.

Professors

Baker, Marcia B.,* 1971, (Atmospheric Sciences),† M.S., 1960, Stanford; Ph.D., 1971, Washington; atmospheric geophysics.

Booker, John R.,* 1971, (Atmospheric Sciences), M.S., 1965, Ph.D., 1968, California (San Diego); geomagnetism, fluid mechanics, inverse theory.

Bostrom, Robert C.,* 1964, (Emeritus), (Geological Sciences),† M.A., 1952, Ph.D., 1961, Oxford (England); geotectonics.

Businger, Joost A.,* 1958, (Emeritus), (Atmospheric Sciences),† M.S., 1950, Ph.D., 1954, Utrecht; energy transfer, air-sea interface.

Charlson, Robert J.,* 1965, (Chemistry), (Atmospheric Sciences, Environmental Studies),† M.S., 1959, Stanford; Ph.D., 1964, Washington; air chemistry.

Clark, Kenneth C.,* 1948, (Physics),† A.M., 1941, Ph.D., 1947, Harvard; spectroscopy of upper atmosphere.

Criminale, William O., Jr.,* 1968, (Applied Mathematics, Oceanography),† Ph.D., 1960, Johns Hopkins; geophysical fluid dynamics.

Crosson, Robert S.,* 1966, (Geological Sciences), M.S., 1963, Utah; Ph.D., 1966, Stanford; seismology.

Ghose, Subrata,* 1972, ‡(Geological Sciences, Materials Science and Engineering), M.S., Ph.D., 1959, Chicago; X-ray crystallography, mineralogy, applications of solid-state physics techniques to mineralogy.

Hobbs, Peter V.,* 1963, ‡(Atmospheric Sciences), Ph.D., 1963, London; cloud precipitation physics, atmospheric chemistry, air pollution.

LaChapelle, Edward R.,* 1968, (Emeritus), (Atmospheric Sciences),† D.Sc. (Hon.), 1957, Puget Sound; snow-cover geophysics.

Leovy, Conway B.,* 1968, (Astronomy), (Atmospheric Sciences, Environmental Studies),† Ph.D., 1963, Massachusetts Institute of Technology; planetary atmospheres.

Lewis, Brian T. R.,* 1970, (Oceanography),† Ph.D., 1970, Wisconsin; marine geophysics.

Lord, Jere J.,* 1952, ‡(Physics), M.S., 1948, Ph.D., 1950, Chicago; cosmic rays, experimental elementary-particle physics.

Malone, Stephen D.,* 1972, (Research), Ph.D., 1972, Nevada; seismicity of Cascade volcanoes, computer applications in seismic network analysis.

Merrill, Ronald T.,* 1967, (Oceanography), (Geological Sciences),† M.S., 1961, Michigan; Ph.D., 1967, California (Berkeley); geomagnetism and paleomagnetism.

Parks, George K.,* 1971, (Atmospheric Sciences, Physics), Ph.D., 1966, California (Berkeley); magnetospheric and space plasma physics.

Raymond, Charles F.,* 1969, (Geological Sciences, Quaternary Research Center), Ph.D., 1969, California Institute of Technology; glaciology.

Smith, J. Dungan,* 1967, (Geological Sciences, Oceanography),† M.S., 1963, Brown; Ph.D., 1968, Chicago; geophysical fluid dynamics, sediment transport mechanics.

Smith, Stewart W.,* 1970, (Geological Sciences), M.S., 1958, Ph.D., 1961, California Institute of Technology; earthquake seismology.

Untersteiner, Norbert,* 1962, (Atmospheric Sciences),† Ph.D., 1950, Innsbruck; Dozent, 1961, Vienna; glaciology, arctic sea ice.

Associate Professors

Brown, J. Michael,* 1984, (Geological Sciences), M.S., 1978, Washington; Ph.D., 1980, Minnesota; experimental and theoretical mineral physics.

Harrison, Halstead,* 1971, ‡(Atmospheric Sciences, Civil Engineering, Environmental Studies), Ph.D., 1960, Stanford; atmospheric chemistry.

Holzworth, Robert H. II,* 1982, (Physics), M.A., 1974, Ph.D., 1977, California (Berkeley); space physics and electrical fields.

Warren, Stephen G.,* 1982, (Quaternary Research Center), (Atmospheric Sciences),† A.M., 1968, Ph.D., 1973, Harvard; radiation and climate, glaciology.

Assistant Professors

Creager, Kenneth C.,* 1986, Ph.D., 1984, California (San Diego); global seismology and geophysical inverse theory.

Schultz, Adam,* 1985, (Research), ‡(Oceanography), Ph.D., 1985, Washington; marine electrical conductivity, magnetotellurics, computer systems.

Principal Research Associates

Hernandez, Gonzalo,* 1989, Ph.D., 1962, Rochester; aeronomy and optics.

Maykut, Gary A.,* 1969, (Atmospheric Sciences),† Ph.D., 1969, Washington; sea-air interaction, sea ice, climate.

Senior Research Associates

Ely, John T. A.,* 1969, Ph.D., 1969, Washington; cosmic rays, magnetospheric physics.

Qamar, Anthony,* 1984, M.A., 1968, Ph.D., 1971, California (Berkeley); earthquake seismology and internal structure of the earth.

Sato-Sorensen, Yosiko S.,* 1983, M.S., 1970, Ph.D., 1973, Tokyo (Japan); experimental high-pressure geophysics.

Research Associates

Jay, David A.,* 1987, Ph.D., 1987, Washington; estuarine physics.

McCarthy, Michael P., 1989, M.S., 1980, Ph.D., 1988, Washington; space plasma physics.

Mercer, James A.,* 1989, Ph.D., 1982, Washington; ocean acoustic tomography, ocean dynamics, global climate.

Waddington, Edwin D.,* 1984, M.Sc., 1973, Alberta; Ph.D., 1981, British Columbia; glacier and ice sheeting modeling.

Werden, Scott H., 1989, Ph.D., 1988, Washington; magnetospheric physics.

Course Descriptions

GP HYS 401 Geophysical Continuum Mechanics (3) A Analysis of stress. Finite and infinitesimal strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the earth's crust. Creep of solids and flow of geological materials. Prerequisites: MATH 307 and 308 or equivalent.

GP HYS 402 Seismology (3) W Introduction to theoretical and observational seismology. Basic theory of elastic plane wave propagation through homogeneous and stratified media. Surface waves and eigenvibrations. Ray theory. Structure of the earth's mantle and core. Seismicity distributions, earthquake focal mechanisms and their relationship to tectonics. Prerequisite: 401 or permission of instructor.

GP HYS 403 Geophysics: The Earth (3) Sp The earth and its interior; gravity, magnetism, heat flow, seismology. Earth's outer structure, studied through the unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Prerequisites: 402 and PHYS 322 or permission of instructor.

GP HYS 404 Geophysics: The Ocean (3) A Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from dynamical oceanography. Prerequisites: MATH 307 and 308 or equivalent and PHYS 323, or permission of instructor.

GP HYS 405 Geophysics: Space (3) W Survey of various phenomena occurring in the outer regions of the earth's atmosphere, the ionosphere, the magnetosphere, and the Van Allen radiation belts. Behavior of charged particles in the geomagnetic field and simple concepts of plasma and magnetohydrodynamic waves. Prerequisite: PHYS 323 or equivalent.

GP HYS 406 Geophysics: The Atmosphere (3) Sp Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics and fluid dynamics to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics. Joint with ATM S 406. Prerequisite: 404 or permission of instructor.

GP HYS 415 Principles of Glaciology (3) A Hallet, Maykut, Porter, Raymond, Stuvier, Warren Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow and erosion, ice sheets, sea ice, frozen ground, methods of paleoclimate reconstruction, ice age theories. Joint with GEOL 415. Prerequisite: permission of instructor.

GP HYS 431 Seismology and Earthquake Engineering (3) A Evans, S. Smith Overview of earthquake processes and details of the characteristics of destructive ground motion; effects of such motion on engineering structures; current practice in estimating earthquake hazards for important structures such as nuclear power plants. Joint with CESM 431. Prerequisite: MATH 307 and 308 or permission of instructor.

GP HYS 432 Applied Seismology (2) W Interpretation methods in seismology. Seismogram interpretation, including body and surface waves. Seismic instrumentation. Earthquake location, magnitude, and fault-plane solutions. Seismic reflection and refraction methods. Measurement and interpretation of strong ground motion near the epicenter of large earthquakes. Prerequisite: concurrent registration in 402, or permission of instructor.

GP HYS 435 Seismic Exploration (5) Sp Brown Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Joint with GEOL 435. Prerequisites: MATH 126, PHYS 123, GEOL 340.

GP HYS 452 Principles of Sediment Transport by Turbulent Flow (3) Sp J. D. Smith Theoretical and experimental techniques in studying erosion, transportation, and deposition of sediment. Initial motion of sediments, bed-load motion, suspension of sediment by turbulent flows, erosion and deposition of sediments, applications of sediment transport theory to problems of geological interest. Joint with GEOL 452 and OCEAN 452. Prerequisite: 455

GP HYS 455 Introduction to Geomechanics (4) W J. D. Smith Basic principles of continuum mechanics, their application to flow of water, mud, magma; deformation of soil, rock, ice. Emphasis on sound physical understanding of these principles and use of elementary mathematics in their application to earth sciences problems. Joint with GEOL 455. Prerequisites: MATH 126, PHYS 123 or equivalent.

GP HYS 480 Special Topics In Geophysics (2-6, max. 12) AWSp Intensive treatment of a selected geophysical topic presented through faculty lectures, guest lectures, and student reports. For students in geophysics and related fields. Subject varies from year to year. Prerequisites: one year each of physics and calculus, and permission of instructor.

GPYS 499 Independent Study for Undergraduates (1-5, max. 10) AWSp Prerequisite: permission of instructor.

Courses for Graduates Only

GPYS 501 Earth Potential Fields (3) A Lister Basic potential theory, with emphasis on qualitative understanding of theorems. Application to gravity and geoid anomalies, mention of comparable results in magnetism where appropriate. Extension of potential theory to thermal problems, with examples drawn from measurement of the earth's heat flow. Prerequisite: 403 or equivalent.

GPYS 502 Geophysics of Solids (3) W Brown, Merrill Applications of solid-state physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor. (Offered odd-numbered years.)

GPYS 504 Geophysical Data Collection and Analysis (3) A Crosson Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system.

GPYS 505 Geophysical Inverse Theory (3) Sp Booker Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Prerequisites: 504 and permission of instructor. (Offered odd-numbered years.)

GPYS 506 Physics of Marine Geologic Processes (5) AW Lister, Sempere Thermomechanics of hot material upwelling at spreading centers and formation of characteristic physical structures; lithosphere thickening with age and related geophysical observables; mechanics of subduction zones; fate of sinking slabs and deep mantle recycling; geometry of plate tectonics on a sphere; causes of vertical motions at the earth's surface. Joint with OCEAN 506. Prerequisite: permission of instructor.

GPYS 508 Geochemical Cycles (4) Sp Descriptive and quantitative aspects of the earth as a biogeochemical system. Fundamental methods for study of equilibria, transport processes, chemical kinetics and biological processes and their application to the carbon, sulfur, nitrogen, phosphorus, and other elemental cycles. Stability of biogeochemical systems and the nature of human perturbations of their dynamics. Joint with ENV S 508. Prerequisites: CHEM 150, 350, MATH 307 and 308.

GPYS 510 Physics of Ice (3) W Raymond Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from the vapor and liquid phases. Physical properties of snow. Joint with ATM S 510. Prerequisite: permission of instructor. (Offered odd-numbered years.)

GPYS 511 Formation of Snow and Ice Masses (3) A Warren Snow climatology. Transport of snow by wind. Transfer of radiative, sensible, and latent heat at the surface of snow and ice. Freezing of natural water bodies. Heat and mass budget of ice masses. Remote sensing of snow and ice. Theories of ice ages. Joint with ATM S 511. Prerequisite: permission of instructor. (Offered even-numbered years.)

GPYS 512 Dynamics of Snow and Ice Masses (3) Sp Raymond Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and

motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Joint with ATM S 512. Prerequisite: permission of instructor. (Offered odd-numbered years.)

GPYS 513 Structural Glaciology (3) W Raymond Physical and chemical processes of snow stratigraphy and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism from ice flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between structures and bulk physical properties. Joint with ATM S 513. Prerequisite: permission of instructor. (Offered even-numbered years.)

GPYS 514 Ice and Climate Modeling (3) A Warren Principles of global climate modeling. Modeling seasonal cycles of snow cover and sea ice. Ice-sheet mass balance and flow. Solar radiation anomalies due to changes in earth's orbit. Climate/ice-sheet models of Pleistocene ice ages. Joint with ATM S 514. Prerequisite: permission of instructor. (Offered odd-numbered years.)

GPYS 520 Seminar (1-2) AWSp Review of current literature in geophysics and graduate student research with faculty participation.

GPYS 532 Atmospheric Electrical Dynamics (3) A Holzworth Global and local dynamical electric field models, including upper atmospheric and tropospheric sources as modified by propagation delays, orographic features, and transient phenomena. Radiation and plasma waves along with microphysics of corona discharge and charge separation mechanisms. Prerequisites: 405 and 406, or permission of instructor.

GPYS 533 Introduction to Solar-Terrestrial Physics (3) Sp Holzworth Introduces the student to several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisites: PHYS 321, 322, 323 or permission of instructor.

GPYS 537 Magnetosphere I (3) Sp Parks Formation by interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: 405 or permission of instructor.

GPYS 538 Magnetosphere II (3) A Parks Plasma waves. Propagation of very-low-frequency and hydromagnetic waves in the magnetosphere. Interactions between plasma waves and particles. Prerequisite: 537.

GPYS 541, 542 Theoretical Seismology I, II (3,3) Sp, A Creager, Crosson Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisites: 401, 402, and PHYS 424, or permission of instructor for 541; 541 for 542. (Offered even-numbered years.)

GPYS 545 Thermomechanics and Mechanisms in Hydrothermal Systems (3) A Lister Thermal balance of hot material injected at a plate divergence; heat transport capability of fluid convection through cracks compared to thermal conduction; theory of hydrothermal penetration into hot rock by thermal contraction cracking; development history of a hydrothermal system; effects of rock/water chemical interaction and mineral deposition; mineral stills. Joint with OCEAN 545. Prerequisite: permission of instructor. (Offered odd-numbered years.)

GPYS 555 Planetary Atmospheres (3) A Leovy, Warren Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements com-

mon to all planetary atmospheres; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar-system objects in the context of comparative planetology. Joint with ASTR 555 and ATM S 555. (Offered even-numbered years.)

GPYS 556 Planetary Surfaces (3) Sp Adams Comparison of surface processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and the implied course of solar-system evolution. Analysis of data from earth-based telescopes and manned and unmanned space missions. Joint with ASTR 556 and GEOL 556. (Offered odd-numbered years.)

GPYS 557 Origin of the Solar System (3) W Brownlee Nebular and nonnebular theories of solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Joint with ASTR 557 and GEOL 557.

GPYS 560 Mechanics of Erosion and Sediment Transport (3) A J. D. Smith Physics of transportation of sediment by turbulent flows. Use of theoretical fluid mechanics to formulate and solve problems of bed-load and suspended load transport. Joint with GEOL 560 and OCEAN 560. Prerequisites: 455 or MATH 328, and 452. (Offered odd-numbered years.)

GPYS 561 Seminar in Geological Fluid Mechanics (3) W J. D. Smith Reading and discussion of topics of current interest in geological fluid mechanics. Course work includes a report on a specialized topic. Joint with GEOL 561 and OCEAN 561. Prerequisite: permission of instructor.

GPYS 562 Mechanics of Sediment Transporting Flows (3) A J. D. Smith Mechanics of turbulent near-bottom flows responsible for erosion and transportation of sediment; how bed-load and suspended-load transport modify characteristics of these flows. Joint with GEOL 562 and OCEAN 562. Prerequisites: 455 or MATH 328, and 452. (Offered even-numbered years.)

GPYS 570 Petroleum Exploration (3) W Bosrom The search for sediment basins and reservoirs. Financial and political considerations. Prerequisite: permission of instructor.

GPYS 571 Gravity and Geomagnetic Interpretation (3) A Lewis Power of the numerical Fourier transform to compute potential fields; gravity and magnetic fields of source bodies of arbitrary shape; application of the techniques to a real problem on the computer. Joint with OCEAN 571. Prerequisites: MATH 328, PHYS 323, or equivalent or permission of instructor.

GPYS 572 Geodynamics (3) A Lister Driving forces of plate tectonics and of other large-scale motions. Critical review of measured data, energy balances, and the basic properties of low Reynolds number flow. Emphasis on the qualitative physics of the processes and on order-of-magnitude calculations, rather than on complex mathematical theory. Critiques of some hypotheses. Joint with OCEAN 572. (Offered even-numbered years.)

GPYS 573 Geomagnetism (3) W Merrill Advanced aspects of earth magnetism intended for specialists in this field. Extensive discussion of origin theories and their implications; physical basis and theories of magnetism in rocks; paleomagnetic techniques and results. Joint with OCEAN 573. Prerequisite: permission of instructor. (Offered even-numbered years.)

GPYS 575 Physics and Chemistry of the Mantle (3) A Brown, Irving Constitution and large-scale chemical, physical evolution of mantle. High-pressure

phase transitions; lateral and vertical heterogeneities from seismological observations; influence of fluids on rheology and melting; metasomatism and other mass transport processes; trace element/isotopic characteristics of mantle samples and mantle-derived magmas. Joint with GEOL 575. (Offered odd-numbered years.)

GPYS 580 Special Topics in Geophysics (2-6, max. 12) AWSp Intensive treatment of a selected topic in geophysics presented by lectures or seminars for students in geophysics and related special fields. Subject is selected from all areas in geophysics and varies from year to year. Prerequisite: permission of instructor.

GPYS 600 Independent Study or Research (*) AWSps

GPYS 700 Master's Thesis (*) AWSps

GPYS 800 Doctoral Dissertation (*) AWSps

Germanics

340 Denny

The Department of Germanics is concerned with the German language, literature, and civilization, with emphasis on present-day Germany, its history, literature, and philosophy and their role in Western civilization, and with linguistic analysis, especially historic, of the Germanic languages. The department offers some courses conducted in English on well-known authors and topics, designed especially for the nonmajor.

Undergraduate Program

Charles Barrack, Adviser
347 Denny

Bachelor of Arts Degree

Major Requirements: German Language and Literature—52 credits (1) 21 to 35 credits to include: 311, 312, 313; 411 or 412; three courses from 421, 422, 423, 490, 495; (2) 17 to 31 credits of electives in upper-division Germanics (which may include 210 but not more than four credits of 395 and/or 396); (3) one course from 401, 402, 403 (which may count as one of the electives) or high performance on a senior-level language skills test. Specialization in linguistics: Student must take 404, 405 as part of the 52 credits and may, with the adviser's permission, count relevant courses outside Germanics among electives.

German Area Studies—45 credits: (1) 321, 322, 323; three courses chosen from 210, 411, 412, 421; (2) remaining credits to be earned in upper-division Germanics courses or, with the permission of the adviser, in courses relevant to German culture and civilization offered outside Germanics; (3) senior thesis. Only four credits earned in 395 and/or 396 may be counted toward the German Area Studies major.

Graduate Program

Joseph B. Voyles, Graduate Program Coordinator

The Department of Germanics offers a closely integrated program leading to the Master of Arts and to the Doctor of Philosophy degrees. The doctoral curriculum serves the needs of the future professors at universities and colleges, stressing scholarship and research. The master's curriculum requires a minimum of 36 credits, a final comprehensive examination, and a master's thesis or two papers. The study period of the doctoral program is two years (minimum number of post-master's credits is 54). The completion of the necessary course work is followed by general written and oral examinations. A third doctoral year is reserved for the writing of the dissertation.

The M.A. program demands concentration on German literature, civilization, and philosophical traditions, with supplementary course work in at least one of the following three areas: philology and linguistics; methodology and pedagogy; related courses outside the Department of Germanics.

The curriculum for the Ph.D. program during the final two years of graduate study (minimum of 54 credits) allows the choice of one of two areas of concentration: either (1) "Literature and Civilization" and "German Philosophical Traditions," or (2) "Philology and Linguistics" and "Literature and Civilization"—plus supplementary course work in other areas (philology and linguistics; German philosophical traditions; methodology and pedagogy; related courses outside the Department of Germanics). The doctoral dissertation must be an original contribution to scholarship and must demonstrate mastery of the pertinent methods of investigation.

The Department of Germanics also participates in the joint-doctoral program in literature and critical theory. Study in this program leads to a Ph.D. in Germanics and Critical Theory. For details see the program description under Comparative Literature.

Special Requirements

Aspirants for advanced degrees in German must have the equivalent of an undergraduate major in German. A reading knowledge of one foreign language (usually German) is a prerequisite for the M.A. degree. Reading knowledge of a second language is required before the student is admitted to the Ph.D. General Examination. The languages chosen are subject to approval by the department.

Financial Aid

A limited number of teaching assistantships are available. The teaching load consists of a five-hour course on the first- or second-year level. The teaching assistants are supervised by experienced staff members.

Professors

Behler, Diana I.,* 1969, (Comparative Literature),† M.A., 1966, Ph.D., 1970, Washington; romanticism, nineteenth century, comparative literature.

Behler, Ernst H.,* 1966, (Comparative Literature),† Ph.D., 1951, Munich (Germany); history of ideas and comparative literature.

Brown, Jane K.,* 1988, (Comparative Literature),† M.Phil., 1969, Ph.D., 1971, Yale; seventeenth- and eighteenth-century German literature, comparative literature.

Hertling, Gunter H.,* 1961, M.A., 1957, Ph.D., 1963, California (Berkeley); eighteenth- and nineteenth-century literature.

Hruby, Antonin,* 1961, (Emeritus), (Comparative Literature),† Ph.D., 1946, Prague; medieval literature.

Jaeger, C. Stephen,* 1985, (Comparative Literature),† M.A., 1965, Ph.D., 1970, California (Berkeley); medieval literature.

Rey, William H., 1950, (Emeritus), Ph.D., 1937, Frankfurt; nineteenth- and twentieth-century German literature.

Rieckmann, Jens,* 1981, Staatsexamen, 1971, Göttingen (West Germany); Ph.D., 1975, Harvard; twentieth-century German literature (fiction, turn of the century, Thomas Mann).

Voyles, Joseph B.,* 1965, (Linguistics), M.A., 1962, Ph.D., 1965, Indiana; Germanics and linguistics.

Associate Professors

Ammerlaan, Helmut H.,* 1963, (Comparative Literature),† M.A., 1960, Vermont; Ph.D., 1965, Texas; classicism and comparative literature.

Barrack, Charles M.,* 1968, M.A., 1966, Ph.D., 1969, Washington; Germanic linguistics.

Buck, George C.,* 1950, (Emeritus), M.A., 1948, Ph.D., 1954, Yale; eighteenth-century and modern German literature.

McLean, Sammy K.,* 1967, (Comparative Literature),† M.A., 1957, Ph.D., 1963, Michigan; twentieth-century (poetry, Bertolt Brecht, Franz Kafka) and comparative literature.

Peck, Jeffrey M.,* 1979, (Comparative Literature),† M.A., 1974, Chicago; Ph.D., 1979, California (Berkeley); nineteenth- and twentieth-century German literature, literary theory, comparative literature.

Rabura, Horst M.,* 1963, (Emeritus), M.A., 1966, Washington; German language and methodology.

Sauerlander, Annemarie M., 1947, (Emeritus), M.A., 1930, Buffalo; Ph.D., 1936, Cornell; Germanics.

Wilkie, Richard F., 1937, (Emeritus), M.A., 1936, Washington; Ph.D., 1953, California (Berkeley); Germanics.

Assistant Professors

Bansleben, Manfred, 1988, D.Phil., 1979, Vienna; language pedagogy and T.A. coordinator, twentieth-century German literature and cultural history.

Taubeneck, Steven A., 1987, M.A., 1983, Ph.D., 1987, Virginia (Charlottesville); twentieth-century German literature, literary theory, comparative literature.

Wilke, Sabine, 1989, Ph.D., 1986, Mainz; contemporary German literature and theater, philosophy, critical theory.

Course Descriptions

Lists of names under various literature courses indicate the kind of material covered but are neither comprehensive nor exclusive of other significant figures. Detailed descriptions of courses are published by the Department of Germanics prior to registration each quarter.

Courses for Undergraduates

GERM 100 Intensive First-Year German (15) S
Barrack Accelerated first-year German. Speaking and listening. Secondary objectives are reading and writing. (Formerly 115.)

GERM 101, 102, 103 First-Year German (5,5,5) AWS, AWSps, AWSps The methods and objectives are primarily audiolingual, with emphasis on speaking and listening. Secondary objectives are reading and writing. (See credit note following 104.)

GERM 104 Individualized First-Year German (1-15) AWSps Individualized approach to elementary German instruction. Students progress at their own pace. Credits vary. Depending upon amount of material mastered, any number of credits up to 15 may be earned per quarter. Students must register initially for 5 credits and must pay for at least 5 credits even if fewer credits are earned. (See credit note following 104.)

Students may receive credit for only one course in each of the following: 101 and the first 5 credits of 104; 102 and the second 5 credits of 104; 103 and the last 5 credits of 104. They may, however, receive credit for courses in different first-year sequences if the courses are taken in progressively more advanced order (e.g., the first 5 credits of 104 followed by 102 and 103). 100 is the equivalent of 101, 102, 103, or 15 credits of 104.

GERM 121, 122 First-Year Reading German (5,5) AS, WS Special beginning course devoted exclusively to the reading objective; 122 continuation of 121.

GERM 150 Conversational German Through Films (2, max. 6) AWSp Conversational practice in small groups based on films. Because series progresses through the year, beginners may enroll only Autumn Quarter. May be taken concurrently with other Germanics courses. No credit if 250 has been taken.

GERM 200 Intensive Second-Year German (15) S Accelerated second-year German. Systematic review of German grammar. Intensive practice in conversation, reading and writing. Prerequisite: 103 or equivalent.

GERM 201, 202, 203 Second-Year German (5,5,5) Systematic review of German grammar. Intensive practice in conversation, reading, and writing. Prerequisites: 103 for 201; 201 for 202; 202 for 203; or equivalent.

GERM 230 Conversational German (5) S Intensive conversational German. Prerequisite: 103 or equivalent.

GERM 250 Advanced Conversational German Through Films (2, max. 6) AWSp Conversational practice in small groups based on films. May be taken concurrently with other Germanics courses.

GERM 299 Supervised Study (1-5, max. 10) AWSpS Prerequisite: permission of department adviser.

GERM 300 Studies in Germanics (3 or 5) Topics or figures of German literature or language. German texts. Prerequisite: 15 credits in second-year German or equivalent.

GERM 301, 302, 303 Conversation and Writing Skills (3-5, max. 5; 3-5, max. 5; 3-5, max. 5) AW, WSp, Sp Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Prerequisite: 203 or diagnostic exam.

GERM 307 Third-Year Composition (3-5, max. 5) S For participants in special summer programs only.

GERM 311 Critical Approaches to German Literature (3-5, max. 5) A Introduction to literary terminology. Diverse interpretive strategies, ranging from close reading to biographical and sociological approaches. Characteristics of different genres (poetry, prose, drama). Readings primarily from twentieth-century literature. Prerequisite: second-year German or equivalent or permission of instructor. (Formerly 310.)

GERM 312 Historical Approaches to German Literature (3-5, max. 5) W German literature from the Middle Ages to the present: Medieval Courtly period, Baroque, Enlightenment, *Sturm und Drang*, Classicism, Romanticism, Realism, Neoromanticism, Expressionism. Prerequisite: reading knowledge of German.

GERM 313 Major Figures of German Literature (3-5, max. 5) Sp Focus on major figure such as Goethe, Schiller, Kleist, Fontane, Thomas Mann, Kafka. Emphasis on his/her cultural and sociopolitical contexts. Literary and nonliterary texts, including film, art, political, historical, and philosophical texts. Prerequisite: second-year German or equivalent or permission of instructor. (Formerly 312.)

GERM 321 Introduction to German Studies (3-5, max. 5) German quest for national identity and the conflict of unity and division. Readings from literature, history, politics, and anthropology. Prerequisite: reading knowledge of German.

GERM 322 Institutions and Their Ideas (3-5, max. 5) Analysis of central institutions of contemporary Germany in their historical development. Prerequisite: reading knowledge of German.

GERM 323 Culture and Its Artifacts: the Shaping of German Consciousness (3-5, max. 5) Introduction to the major artistic and intellectual achievements of the German speaking countries. Prerequisite: reading knowledge of German.

GERM 330 Conversational German (3-5, max. 5) S For participants in special summer programs only.

GERM 395 Proctoring of First-Year German Film Course (1-2, max. 6) AWSp Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups of participants in 150. Discussion group leaders (proctors) may participate in this program one or two hours per week and receive 1 credit for each hour in class. 6 credits may be earned by proctors for participating in three quarters of 150, which runs the entire year under a different format each quarter. (Formerly 393.)

GERM 398 Proctoring of Second-Year German Film Course (1-2, max. 6) AWSp Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups of participants in 250. Discussion group leaders (proctors) may participate in this program one or two hours per week and receive 1 credit for each hour in class. 6 credits may be earned by proctors for participating in three quarters of 250, which runs the entire year under a different format each quarter. (Formerly 394.)

GERM 401, 402, 403 Advanced Writing and Conversation (3-5, max. 5; 3-5, max. 5; 3-5, max. 5) A, W, Sp Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Prerequisite: 303 or diagnostic exam.

GERM 404 History of the German Language (3-5, max. 5) A From early Germanic to the present. Prerequisite: third-year German or permission of instructor.

GERM 405 Linguistic Analysis of German (3-5, max. 5) Sp Prerequisite: third-year German or permission of instructor.

GERM 407 Advanced Composition (3-5, max. 10) S For participants in special summer programs only. Not open for credit to those who have had 401, 402, 403.

GERM 411 Survey of Older German Literature and Culture: Medieval (3-5, max. 5) A Medieval literature—German literature from 750 to 1400, with esthetic and historical consideration of works from the Carolingian Periods, Court Epic, Heroic Epic, the *Spielmannsepic*, the *Minnesang*, poetry of the epigones who followed the Age of High Chivalry, and German Mystics. Prerequisite: 15 credits in third-year German or permission of instructor. (Formerly 413.)

GERM 412 Survey of Older German Literature and Culture: Reformation and Baroque (3-5, max. 5) W Literature of the sixteenth, seventeenth, and early eighteenth centuries—esthetic and historical consideration of authors and works such as the *Ackermann aus Böhmen*, *Erasmus*, *Luther*, *Hans Sachs*, the *Historia von Dr. Faustus*, Baroque poetry and the literature of the early Enlightenment. Prerequisite: 15 credits in third-year German, or permission of instructor. (Formerly 414.)

GERM 421 Survey of Modern Literature and Culture: Eighteenth Century (3-5, max. 5) A Literature of the eighteenth century—esthetic and historical consideration of works by Lessing, Schiller, and Goethe, with attention to the historical background and development of German classicism. Prerequisite: 15 credits in third-year German or permission of instructor. (Formerly 415.)

GERM 422 Survey of Modern Literature and Culture: Nineteenth Century (3-5, max. 5) W Nineteenth century German literary, critical, and philosophi-

cal texts with some attention to historical and artistic developments. Narrative, dramatic, and lyric modes of expression. Problems and period designations (romanticism, *biedermeier*, young Germany, poetic realism, naturalism). Prerequisites: completion of the 300-level literature series in Germanics or equivalent.

GERM 423 Survey of Modern Literature and Culture: Twentieth Century (3-5, max. 5) Sp The twentieth century—literature from 1890 to 1945, with esthetic and historical consideration of works by Hauptmann, Kaiser, Brecht, Kafka, Mann, Rilke, Trakl, Stadler, Stramm, van Hoddiss, and others. Prerequisite: 15 credits in third-year German or permission of instructor. (Formerly 412.)

GERM 430 Advanced Conversational German (3-5, max. 10) S For participants in special summer programs only. Not open for credit to those who have had 401, 402, 403.

GERM 473 Teaching of College-Level German (1, max. 9) AWSp For teaching assistants only.

GERM 479 Special Topics in the Teaching of Foreign Languages (3, max. 9) S Intensive workshop for in-service and preservice teachers of all foreign languages on some aspect of foreign-language teaching methodology. Prerequisite: foreign-language teaching experience or participation in a previous foreign-language methods course.

GERM 490 Contemporary German Literature (3-5, max. 5) Interpretation of selected works by contemporary German authors.

GERM 494 Studies in German Poetry (3-5, max. 5) Introduction to various methods of interpretation and to their practical application. (Formerly 491.)

GERM 495 Proseminar in German Literature (3-5, max. 15) Special topics, the subject matter and depth of which are not included in other literature courses, arranged through consultation among students and faculty members. Prerequisite: 15 credits in third-year German or permission of instructor.

GERM 496 History of Germanic Philology (3-5, max. 5) Introduction to the works of outstanding scholars in the field of Germanics. (Formerly 492.)

GERM 497 Studies in German Literature (1-6, max. 15)

GERM 498 Studies in the German Language (1-6, max. 15)

Courses in English

GERM 210 Classics of German Literature and Thought (5) Sp Introduction to major figures of German culture from the Reformation to the present, their contribution to the intellectual life of the Western world. Luther, Kant, Goethe, Schopenhauer, Marx, Freud, Nietzsche, Kafka, Brecht, and Mann.

GERM 340 Friedrich Nietzsche in English (3-5, max. 5) Analysis of Friedrich Nietzsche's chief works and the discussion of his position within modern German literature and thought.

GERM 341 Franz Kafka in English (3-5, max. 5) Short stories and novels of Franz Kafka; emphasis on philosophical relevance and esthetic significance.

GERM 345 Bertolt Brecht in English (3-5, max. 5) Brecht's life and work, particularly his plays and writings on theatre, and some poems and short prose pieces to provide additional perspective on his life and work as a whole. The development of his writing and of his ideas and attitudes.

GERM 346 The Contemporary German Novel in English (3-5, max. 5) Major novels of the postwar period (1945 to present), discussed in their historical context. Contrasts between West and East German writers, such as Mann, Frisch, Grass, Böll, Lenz, Wolf, and Plenzdorf.

GERM 349 Goethe in English (3-5, max. 5) Selected major works (especially Faust) of Goethe, whose literary, philosophical, and scientific achievements are examined as integral parts of his quest for meaning, wholeness, and universality, and whose impact on Western thinking is traced up to Thomas Mann and C. G. Jung.

GERM 350 The German Drama in English (3-5, max. 5) German drama from the eighteenth to the twentieth centuries. German history and culture as reflected in the plays. Discussion of major themes.

GERM 351 Vienna 1900 in English (3-5, max. 5) Interdisciplinary study of Vienna at the turn of the century. Discussion of literary texts with emphasis on other intellectual and cultural trends of this very rich and complex period.

GERM 352 Literature and Society in Weimar and National Socialist Germany in English (3-5, max. 5) Literature, theater, and film, with adjunct consideration of art and architecture, in relation to the German social and cultural situation *circa* 1918 to *circa* 1947.

GERM 353 Germany: East and West—Literature and Culture in English (3-5, max. 5) Postwar development and present-day character of the literature and the cultural, social, and political life in the German Democratic Republic and the Federal Republic of Germany. Readings include works by Böll, Grass, Wolf, Plenzdorf, and nonliterary texts devoted to culture and everyday life in the two German states.

GERM 355 German Literature and Film in English (3-5, max. 5) Relationship between literature and film in the German tradition. Content varies; focus may be on a particular time period, director, or theme. Special attention paid to critical and analytical skills required for interpreting the two mediums.

GERM 356 Pagan Germany: Myth, Religion, Folklore in English (3-5, max. 5) *Jaeger* History and culture of the German peoples before and during the conversion to Christianity. Readings include Tacitus's *Germania* and other historical sources, *Beowulf*, *Nibelungenlied*, *Grimm's Fairy Tales*, and German legends. Treatment of archaeological finds and a variety of materials that bear on religion, prophecy, magic, folk customs, and festivals.

GERM 390 Germanic Studies in English (3 or 5, max. 15) Topics or figures of German literature or language.

Courses for Graduates Only

GERM 500 Literary Theory, Methodology, and Bibliography (3) A Historical survey and analysis of criticism (*Methodengeschichte*) and modern trends in contemporary theory. Methods of research and bibliography, as well as theoretical aspects of practical interpretation.

GERM 503 Contemporary German Literature (3) Seminar analyzing the esthetic movements and thought of contemporary West, as well as East German literature, the social and political problems dealt with in the works of representative authors, and major experimental concepts. Some previous exposure to the German literature and civilization after 1945 is expected.

GERM 504 Special Studies in Literary Criticism and Theory (3, max. 9) Literary criticism and theory, focusing on special topics proposed by the instructor. Taught in English. Prerequisite: 500 or equivalent.

GERM 513 Proseminar in German Literature of the Eighteenth Century (3) A Discussion and critical evaluation of representative topics selected from the German literature of the eighteenth century. Prerequisite: permission of department or departmental coordinator.

GERM 515 Proseminar in German Literature of the Nineteenth Century (3) W Discussion and critical evaluation of representative topics selected from the German literature of the nineteenth century. Prerequisite: permission of department or departmental coordinator.

GERM 517 Proseminar in German Literature of the Twentieth Century (3) Sp Discussion and critical evaluation of representative topics selected from the German literature of the twentieth century. Prerequisite: permission of department or departmental coordinator.

GERM 521 Seminar in the Literature of the Reformation and Renaissance (3)

GERM 522 Seminar in Baroque (3)

GERM 525 Seminar in Romanticism (3)

GERM 526 Seminar in Nineteenth-Century Drama (3)

GERM 527 Seminar in Nineteenth-Century Prose (3)

GERM 528 Nineteenth-Century Poetry (3) Representative selections from Hölderlin, the late Goethe, and from prevalent trends in nineteenth-century poetry, such as romanticism, "Young Germany," poetic realism, and the experimental poetry of naturalism.

GERM 533 Seminar in Eighteenth-Century Literature (3) Study of one or more of the literary movements: Enlightenment, sentimentalism, anacreontics, storm and stress, classicism, early romanticism, and works by principal authors such as Gottsched, Bodmer, Gellert, Lessing, Wieland, Klopstock, Herder, Lenz, Goethe, Schiller, Jean Paul.

GERM 534 Storm and Stress (3) Extensive investigation of poetological and esthetic concepts advanced by initiators and exponents of German storm and stress. Analyses of narrative and dramatic works of storm and stress reveal reflections and implementations of the new theoretical concepts.

GERM 535 Classicism: Goethe, Schiller (3)

GERM 540 Twentieth-Century Poetry (3) Development of German poetry from Rilke, Hofmannsthal, and George through Trakl, Benn, the Expressionists and the Dadaists, Brecht, and Enzensberger, to such contemporaries as Eich, Heissenbüttel, the concrete poets, Celan, and Bachmann.

GERM 541 Twentieth-Century German Drama (3) Selection from modern German drama representative of the concern with the human condition, of social criticism, and of experimentation with the new dramatic forms.

GERM 542 Twentieth-Century Prose (3) Selected modern German novels, short novels, and short stories by representative authors dealing with the social and political problems of Germany as well as with individual problems of existence and identity.

GERM 550 Gothic (3)

GERM 551 Seminar in Germanic Philology and Linguistics (3) Topics vary. Prerequisites: basic knowledge of German and at least one elementary linguistics course.

GERM 552 Old High German (3)

GERM 555 Old Saxon (3)

GERM 556 Middle High German (3)

GERM 558 Middle High German Literature (3)

GERM 560 Modern Dialects (3)

GERM 565 Seminar in Courtly Epic (3) Aspects and methods of literary analysis pertaining to the study of medieval courtly epics.

GERM 567 Minnesang (3) In-depth study of medieval German lyrics in the context of German and European literary and intellectual development. Poems of the period from Kurenberger through Walther are analyzed with stress on grammatical, formal, stylistic, and ideological interpretation. Prerequisite: adequate knowledge of Middle High German.

GERM 568 Seminar in Heroic Epic (3) Literary and historic problems of the German heroic epic, with special emphasis on the *Nibelungenlied* and the *Dietrichsepik*.

GERM 575 Teaching of German Literature and Civilization (3) Teaching of German language and literature on the advanced level in secondary schools and colleges.

GERM 576 Modern Methods and Materials in Teaching German (3) The audiolingual method and its application; current developments in foreign-language teaching; evaluation of teaching materials.

GERM 580 Seminar in German Literature (3 or 5, max. 15) Open topics seminar with varying content.

GERM 581 Seminar in Poetry (3 or 5, max. 15) Open topics seminar with varying content.

GERM 582 Seminar in Drama (3 or 5, max. 15) Open topics seminar with varying content.

GERM 583 Seminar in Prose (3 or 5, max. 15) Open topics seminar with varying content.

GERM 590 German Mysticism of the Late Middle Ages (1-5)

GERM 591 German Idealism and Materialism (3)

GERM 592 German Existentialism and Neomarxism (3)

GERM 600 Independent Study or Research (*) AWSpS

GERM 700 Master's Thesis (*) AWSpS

GERM 800 Doctoral Dissertation (*) AWSpS

History

315 Smith

History undertakes the study of human affairs in a manner that seeks to understand change and development rather than the state of things at a given moment, taking into account societies in diverse parts of the world from the earliest times for which written records exist to the present.

Undergraduate Program

Advisers
206A Smith

Bachelor of Arts Degree

Admission Requirements: 10 credits in history with a minimum 2.50 grade-point average; 10 credits in composition/writing with a minimum grade of 2.0 in each course.

Major Requirements: 55 credits in history with a minimum grade-point average of 2.25 in all history courses and a minimum grade of 2.0 in all history courses taken to fulfill requirements for the major. At least 5 credits each of ancient, medieval, modern European, and

United States history (HST 111, 112, 113, and HSTAA 201 or upper-division courses in the same subject areas; adviser must approve substitutions for the basic courses) plus an additional 5 credits in the history of some area or nation outside Europe, the United States, and Canada. At least 25 upper-division credits. One undergraduate seminar or colloquium is required, and each history degree candidate must write at least one major paper in an upper-division course. Beyond the required subjects, the student may or may not specialize, depending upon personal interests and career plans. In addition to all courses with the prefix HST, the history major may include approved courses offered outside the Department of History. A short list of these courses is maintained by undergraduate advisers. Transfer students are required to complete a minimum of 25 upper-division credits in history at the University.

History and Science Emphasis: 55 credits in history with a minimum grade-point average of 2.25 in all history courses and a minimum grade of 2.0 in all history courses taken to fulfill requirements for the major. Requirements include 15 credits of HST 311, 312 and one additional approved course in the history of science, technology, and medicine; 5 credits for junior colloquium; 10 credits for senior thesis; of the remaining 25 credits in history at least 20 must be in courses outside the history of science and must include at least one course each in European history, American history, and an area or nation outside Europe, the United States, and Canada; 35 credits of natural science to include at least 20 credits above the 100 level in the same natural science. Science courses are to be chosen from anthropology, astronomy, atmospheric sciences, biology, botany, chemistry, computer science, geological sciences, mathematics, physics, psychology, and zoology.

Graduate Program

George K. Behlmer, Graduate Program Coordinator

The Department of History offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in a large number of fields within the discipline. Two pathways, one a general M.A. and the other a preparation for the Ph.D. program are offered. Students in the programs can prepare for careers as college or secondary-school teachers or as members of university faculties who combine teaching with scholarship and professional writing, for positions as archivists, librarians, or editors. A few graduates enter government service, college administration, or publishing. The M.A. program is normally completed in four or five full academic quarters or their equivalent. The Ph.D. program requires at least three years of full-time work beyond the M.A. degree. Graduate training at both levels includes (1) course work or independent study leading to examinations in special historical fields, and (2) sustained investigation and interpretation of historical problems in seminars involving the writing of essays and a thesis.

Special Requirements

Admission to the graduate program requires a sound undergraduate major in history or in one of the basic disciplines related to history completed within a college of liberal arts and sciences. The department also requires evidence of the applicant's ability to write coherently and lucidly and to interpret historical data.

Financial Aid

Beginning graduate students may qualify for a very limited number of readerships. Students with, or who expect to receive, the M.A. degree by the time they begin their duties may apply for an appropriate level of teaching assistantships and may, with continued satisfactory scholarly progress, expect reappointment for a total of three years, provided adequate funds are available.

Jere L. Bacharach

Professors

Alden, Dauril,* 1959, (International Studies),† M.A., 1952, Ph.D., 1959, California (Berkeley); Latin American history, comparative colonial history.

Bacharach, Jere L.,* 1967, M.A., 1962, Harvard; Ph.D., 1967, Michigan; history of the Near East.

Bergquist, Charles,* 1989, M.A., 1968, Ph.D., 1973, Stanford; modern Latin American history.

Bestor, Arthur, 1962, (Emeritus), M.A., 1956, Oxford (England); Ph.D., 1938, Yale; history.

Boba, Imre,* 1962, (International Studies),† Ph.D., 1962, Washington; medieval history and East European studies.

Bridgman, Jon,* 1961, Ph.D., 1960, Stanford; modern European history (especially military).

Burgess, Charles O.,* 1964, ‡(Education), M.S., 1958, Ph.D., 1962, Wisconsin; history of education.

Burke, Robert E.,* 1957, M.A., 1947, Ph.D., 1950, California (Berkeley); American political and social history in the twentieth century.

Butow, Robert J. C.,* 1960, (Emeritus), A.M., 1948, Ph.D., 1953, Stanford; history of modern history.

Carstensen, Vernon, 1964, (Emeritus), M.A., 1932, Ph.D., 1936, State University of Iowa; history.

Chan, Hok-lam,* 1972, ‡(Asian Languages and Literature, International Studies), M.A., 1963, Hong Kong; M.A., 1965, Ph.D., 1967, Princeton; late traditional China.

Conlon, Frank F.,* 1968, (International Studies),† M.A., 1963, Ph.D., 1969, Minnesota; history of India.

Ellison, Herbert J.,* 1968, (International Studies),† M.A., 1952, Washington; Ph.D., 1955, London; modern Russian history.

Ferrill, Arthur L.,* 1964, M.A., 1961, Ph.D., 1964, Illinois; ancient history.

Fowler, Wilton B.,* 1969, M.A., 1962, Ph.D., 1966, Yale; American history (especially diplomatic).

Freidel, Frank, 1981, (Emeritus), M.A., 1939, Southern California; Ph.D., 1942, Wisconsin (Madison); history.

Griffiths, Gordon, 1959, (Emeritus), M.A., 1946, Oxford (England); Ph.D., 1942, California (Berkeley); history.

Hankins, Thomas L.,* 1964, M.A.T., 1958, Harvard; Ph.D., 1964, Cornell; history of science.

Hanley, Susan B.,* 1972, ‡(International Studies), M.A., 1964, Ph.D., 1971, Yale; premodern Japanese history.

Kirkendall, Richard S.,* 1988, M.S., 1953, Ph.D., 1958, Wisconsin.

Levy, Fred J.,* 1960, A.M., 1956, Ph.D., 1960, Harvard; history of England in the sixteenth and seventeenth centuries, English historiography.

Palais, James B.,* 1968, (International Studies),† M.A., 1960, Yale; Ph.D., 1968, Harvard; modern Korean history.

Pease, Otis A.,* 1966, Ph.D., 1954, Yale; United States in the twentieth century.

Pinkney, David H.,* 1966, (Emeritus), A.M., 1937, Ph.D., 1941, Harvard; history.

Pressly, Thomas J.,* 1949, (Emeritus), M.A., 1941, Ph.D., 1950, Harvard; history.

Pyle, Kenneth B.,* 1965, (International Studies),† Ph.D., 1965, Johns Hopkins; modern Japanese history.

Rorabaugh, William J.,* 1976, M.A., 1970, Ph.D., 1976, California (Berkeley); United States social history.

Saun, Lewis O.,* 1965, M.A., 1959, Ph.D., 1962, Missouri (Columbia); American intellectual history.

Sugar, Peter F.,* 1959, (Emeritus), M.A., 1956, Ph.D., 1959, Princeton; history.

Thomas, Carol G.,* 1964, M.A., 1961, Ph.D., 1965, Northwestern; ancient history.

Toews, John E.,* 1979, A.M., 1968, Ph.D., 1973, Harvard; modern European intellectual history.

Treadgold, Donald W.,* 1949, (International Studies),† M.A., 1947, Harvard; D.Phil., 1950, Oxford (England); modern Russia.

Ullman, Joan C.,* 1966, M.A., 1953, Ph.D., 1963, Bryn Mawr; modern Spain.

Associate Professors

Behlmer, George K.,* 1979, A.M., 1972, Ph.D., 1977, Stanford; modern English history.

Bell, Aldon D.,* 1969, D.Phil., 1961, Oxford (England); modern Britain, empire and commonwealth.

Benson, Keith R.,* 1981, ‡(Medical History and Ethics), M.A., 1973, Ph.D., 1979, Oregon State; history of modern American biology, marine biology, evolutionary biology.

Dull, Jack L.,* 1963, (International Studies),† M.A., 1960, Ph.D., 1966, Washington; early Chinese history.

Emerson, Donald E.,* 1946, (Emeritus), A.M., 1938, Columbia; Ph.D., 1942, Johns Hopkins; history.

Gill, Carlos B.,* 1974, (American Ethnic Studies),† M.A., 1963, Georgetown; Ph.D., 1975, California (Los Angeles); Latin America and history of the Chicano people.

Guy, R. Kent,* 1980, (International Studies),† M.A., 1974, Ph.D., 1981, Harvard; modern Chinese history.

Johnson, Richard R.,* 1972, M.A., 1965, Ph.D., 1972, California (Berkeley); United States colonial history.

Kleval, Hillel J.,* 1980, (International Studies),† A.M., 1975, Ph.D., 1981, Harvard; modern Jewish history, central and eastern Europe.

Leiren, Terje I.,* 1977, ‡(Scandinavian Languages and Literature), M.A., 1970, California State (Los Angeles); Ph.D., 1978, North Texas State; Scandinavian history.

Lytle, Scott H.,* 1949, (Emeritus), Ph.D., 1948, Cornell; history.

O'Neil, Mary R.,* 1980, M.A., 1971, Ph.D., 1982, Stanford; Renaissance and Reformation history, early modern Europe.

Ramet, Pedro,* 1983, ‡(International Studies), M.A., 1974, Arkansas; Ph.D., 1981, California (Los Angeles); Soviet and East European studies.

Waugh, Daniel C.,* 1972, (International Studies),† A.M., 1965, Ph.D., 1972, Harvard; medieval Russian history.

Assistant Professors

Felak, James R., 1989, M.A., 1985, Ph.D., 1989, Indiana; Eastern European history.

Findlay, John M.,* 1987, M.A., 1978, Ph.D., 1982, California (Berkeley); American West, public history.

Hevly, Bruce W.,* 1989, Ph.D., 1987, Johns Hopkins; history of science and technology.

Jonas, Raymond A.,* 1986, M.A., 1980, California (Davis); Ph.D., 1985, California (Berkeley); modern France.

McKenzie, Robert Tracy,* 1989, M.A., 1984, Ph.D., 1988, Vanderbilt; nineteenth-century United States history, Civil War and Reconstruction.

Sears, Laurie J.,* 1989, M.A., 1977, Arizona; Ph.D., 1986, Wisconsin (Madison); Southeast Asian history.

Stacey, Robert C.,* 1989, M.A., 1982, Oxford (Worcester College); Ph.D., 1983, Yale; high and late medieval Europe.

Stacey, Robin Chapman,* 1989, M.Litt., 1982, Oxford (Corpus Christi); Ph.D., 1986, Yale; early medieval Europe.

Course Descriptions

Upper-division courses (300 and 400 levels) in the Department of History do not generally require prerequisites. Most 400-level courses deal with a single nation during a limited period. The 300-level courses deal with broader subjects at a relatively advanced level. Both are primarily for juniors and seniors, but they are open to freshmen and sophomores with an interest or background in the subject of the course.

Courses for Undergraduates

General History

HST 111 The Ancient World (5) A *Bridgman, Ferrill, C. Thomas* Origins of Western civilization to the fall of Rome.

HST 112 The Medieval World (5) *Bacharach, Boba, Bridgman* Political, economic, social, and intellectual history of the Middle Ages. No credit toward a history major for students who have taken HSTAM 331 or 332 or 333.

HST 113 The Modern World (5) Sp *Bridgman* Political, economic, social, and intellectual history of modern Europe. No credit toward a history major for students who have taken HSTEU 302 or 303.

HST 140 Russia from the Tenth Century to the Present (5) *Waugh* Russian political, social, and economic history from the tenth century to the present. Joint with SISRE 140.

HST 192 The Historian as Detective (5) Examples illustrate how "clues" from the past are used by historians to build inferential "cases"; collection, analysis, and interpretation of evidence as a historical method. Open to all students; recommended for history honors students.

HST 204 Europe and America in the Era of the World Wars (5) *Bridgman, Burke* Declining role of Europe in the world and rise of the United States from 1914 to 1945.

HST 207 Introduction to Intellectual History (5) *Toews* Ideas in historical context. Comparative and developmental analysis of Western conceptions of "community," from Plato to Freud.

HST 215 The History of the Atomic Bomb (5) *Hankins* History of the atomic bomb from the beginning of nuclear physics to the security hearing of J. Robert Oppenheimer. Includes a study of the scientific achievements that made the bomb possible, the decision to deploy the bomb, the moral misgivings of the scientists involved.

HST 250 The Jews in Western Civilization (5) *Kleval* Jewish historical experience in the Mediterranean and European world from ancient Greece to modern-day Israel. Condition of Jewish life in the larger societies of which Jews have always formed a part. Areas of contact between the Jewish and the gentile worlds. Joint with SISJE 250.

HST 261 Survey of the Muslim Near East (5) *Bacharach* The Middle East (the Arab countries, Israel, Turkey, Iran, and Afghanistan) from the emergence of Islam in A.D. 622 to the present: culture, economics, politics.

HST 283 Introduction to Women's History (5) Includes units on American, European, and Third World

women that examine centers of women's activities (convents, women's clubs), women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Joint with WOMEN 283.

HST 294 Honors Historiography (5) *Levy* Readings in the great historians, from the earliest time to the beginning of the twentieth century. Investigates how perception of the human past has altered our times. Recommended for students in the department's honors program, but also open to nonhonors students.

HST 307 History of Christianity (5) *Treadgold* Christian religion, including doctrine, practice, church organization, and culture, from the time of Jesus Christ to the present. No attempt to avoid the controversial aspects of the topic is made, but the necessity of founding argument on knowledge is stressed.

HST 309 Marx and Nietzsche: The Assault on Bourgeois-Christian Civilization (5) *Toews* Major dilemmas and conflicts of modern Western consciousness through historical analysis of Marx, Nietzsche, and the movements they spawned. Emphasis on the relationship between sociocultural change, biography, and ideological innovation. Recommended: 113 or 207.

HST 310 Science and Religion in Historical Perspective (5) *Hankins* Scientific and religious ideas have been two of the major forces shaping our modern view of the world. Often regarded as being in conflict, they can equally well be seen as complementary and interdependent. Study of the relationship between scientific and religious ideas with focus on particular episodes of history from ancient to modern times.

HST 311 Science in Civilization: Antiquity to 1600 (5) *Hankins, Hevly* From preclassical antiquity to the end of the Middle Ages, stressing the growth of scientific ideas, the cultural context in which they take shape, and their relationship to other movements of thought in the history of civilization.

HST 312 Science in Civilization: Science in Modern Society (5) *Hankins* Growth of modern science since the Renaissance, emphasizing the scientific revolution of the seventeenth century, the development of methodology, and the emergence of new fields of interest and new modes of thought.

HST 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) *Hankins, Hevly, Sullivan* Organization and pursuit of the physical and astrophysical sciences, focusing on the major unifying principles of physics and the social and cultural settings in which they were created.

HST 314 The Psychoanalytic Revolution in Historical Perspective (5) *Genesis* and evolution of Freudian theory in context of the crisis of liberal-bourgeois culture in central Europe and parallel developments in philosophy, literature, and social theory. Emergence and division of the psychoanalytic movement. Transformation of psychoanalysis as it was absorbed into British, French, and especially American cultural traditions. Recommended: 207 and 113 or HSTEU 303.

HST 315 History of Technology to 1940 (5) *Hevly* Technology since the Middle Ages, in its social and historical contexts. From the medieval foundations of metal working, its social consequences and the establishment of a class of engineering practitioners, to the transformation of American rural life, domestic technology, and industry before World War II.

HST 335 The United States and Vietnam (5) American involvement in Vietnam, including: the complex of negotiations; strategies and objectives of both sides; military, political, and economic operations of the United States; efforts at pacification; impact of Vietnam on American affairs.

HST 345 War and Society (5) *Bridgman* Analysis of the techniques of war from the Renaissance to the present with consideration of the social, political, and economic consequences of war in the Western world.

HST 361 Slavery in History: A Comparative Study (5) *Bacharach* Slavery as a universal historical phenomenon lending itself to a comparative analysis is studied in terms of its philosophical justifications, economic importance, and local practices. The following historical periods are surveyed: the ancient Near East, Greece, Rome, Islam, Africa, Latin America, and North America.

HST 363 Wars in the Modern Near East (3) *Bacharach* The Middle East, scene of some of the most significant military events in modern world history, with focus on the repercussions for participants in terms of political and psychological changes. Resident military specialists supplement the historical approach by analyzing the battles and wars on these terms.

HST 370 History of the Expansion of Islam (5) *Bacharach, Conlon* Comparative perspective on the expansion of the religion and community of Islam from its origins to the modern age. Patterns and processes of expansion, conversion, and social and cultural assimilation in a number of world regions (e.g., the Arab World, Iberia, Anatolia, West Africa, Iran, India, and Southeast Asia). Specific case studies of Islam in its regional setting (e.g., South Asia).

HST 390 Colloquium in History and Science (5) *Hankins* Study in the history of science to bridge the gap between the natural sciences and the humanities. Students should have a strong background both in history and in a natural science. Prerequisite: permission of instructor or adviser.

HST 395 Modern Historical Writing, Honors Seminar (5) *Levy* New types of problems examined by historians and new techniques that have evolved for solution. Brief historiographical introduction, reaching back to the "scientific" historians of the mid-nineteenth century, then continues by examining the impact on historians of new disciplines such as psychology, sociology, and economics, and of new techniques such as statistics and prosopography. Readings are in the theorists and in those who followed their lead. Admission by departmental invitation only.

HST 412 Science and the Enlightenment (5) *Hankins* The role of science in relation to intellectual, social, economic, and religious forces in the eighteenth century, and growth of the international community in science during the same period.

HST 425 History of the British Empire and Commonwealth Since 1783 (5) *Bell* Britain in the Caribbean, Africa, India, Southeast Asia, and the Pacific; and the settlement, economic development, and political evolution of Canada, Australia, New Zealand, and South Africa.

HST 448 Franklin D. Roosevelt and His World, 1882-1945 (5) Sp *Butow* Life and times of the thirty-second President of the United States, with emphasis on American foreign relations—especially the role he played in the emergence of the United States as a world power. Joint with SIS 448.

HST 461 History of the Middle East: 622-1300 (5) *Bacharach* Political and economic analysis of the period circa A.D. 600, preliminary to rise of Islam, to arrival of the Turks. Muhammad's teaching and impact; Islamization and Arabization.

HST 462 History of the Middle East: 1258-1798 (5) *Bacharach* Conquests by successors of Ghengis Khan; creation in Egypt, Syria, and Iran of cavalry-based states; domination of political, social, and economic history by Ottoman and Safavid empires. The Napoleonic invasion.

HST 463 History of the Middle East Since 1789 (5) *Bacharach* Critical issues and themes in the changing Middle East, including Westernization, growth of na-

tionalism, Arab-Israeli dispute, Iranian revolution, and the role of Islam.

HST 487 Nations and States in the Modern World (5) *Treadgold* Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by new nationalism, spreading into East Central Europe, Russia, Ibero-America, Asia, and Africa. Joint with SIS 467.

HST 481 Economic History of Europe (5) Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Joint with ECON 460. Recommended: ECON 200, 201.

HST 491-492 Honors Historical Method (5-5) W,Sp The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

HST 496-497 Public and Local History (5-5) *Findlay* Reviews the nonacademic applications of history (museums, parks, business, archives, planning, policy-making, popular media). Includes directed research and writing on local topics in one applied setting. Students ordinarily undertake a lengthy research project in an internship-like role. Prerequisite: permission of instructor.

HST 498 Colloquium in History (3-5, max. 15) Each seminar examines a different subject or problem. A list of the seminars and their instructors is available in the Department of History office. Students must have the permission of the instructor of the seminar in which they plan to enroll.

HST 499 Undergraduate Research (1-5, max. 15) AWSp

History of the Americas

HSTAA 135 The American People and Their Culture in the Modern Era: A History of the United States Since 1940 (5) *Kirkendall, Pease* Through study of documents, personal testimony, and other source materials, through written reports on historical problems, and through discussions, lectures, films, and audiovisual presentations, students are encouraged to examine evidence and to think "historically" about persons, events, and movements within the memory of their own generation and that immediately preceding theirs. Primarily for first-year students.

HSTAA 150 Afro-American History (5) Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Provides some general knowledge and serves as a basic introductory course for a sequence of lecture courses and seminars in Afro-American history. Joint with AFRAM 150.

HSTAA 180 History of the Chicano People to 1848 (5) *Gil* Historical survey of the Chicano people from pre-Hispanic times to the war between the United States and Mexico.

HSTAA 181 History of the Chicano People Since 1848 (5) *Gil* Historical survey of the Chicano people since the war between the United States and Mexico. Recommended: 180.

HSTAA 201 Survey of the History of the United States (6) AWSp Supplies the knowledge of American history that any intelligent and educated American citizen should have. Objective is to make the student aware of his heritage of the past and more intelligently conscious of the present.

HSTAA 202 Makers of American Foreign Policy, 1776 to the Present (5) *Fowler* Survey of the history of American foreign relations. Focus on the individuals responsible for initiating new foreign policies or for realigning old ones.

HSTAA 203 American Presidents in the Twentieth Century (3 or 5) American presidents and the presidency in the twentieth century. Problems and policies in domestic and foreign affairs, from the administration of Theodore Roosevelt through that of Richard Nixon.

HSTAA 212 The Military History of the United States From Colonial Times to the Present (5) A Development of American military policies, organizational patterns, tactics, and weaponry, from beginnings as a seventeenth-century frontier defense force to the global conflicts and military commitments of the twentieth century. Interaction and tension between need for an effective military force and concept of civilian control of that force.

HSTAA 218 Americans and Revolutions, Seventeenth-Twentieth Centuries (5) Experiences and attitudes of Americans with respect to revolutions at home and abroad, from the seventeenth century to the present.

HSTAA 281 Introduction to Latin American History: From Columbus to Castro (5) Survey of political, economic, and social history of Latin America from the Iberian conquest to the present. Lectures, discussions, and films focus on developing understanding of Latin America's current problems through study of their historical roots. Designed for the beginning student and the nonspecialist.

HSTAA 301 Foundations of American Civilization (5) *Johnson* Early America from the sixteenth century to the end of the American Revolution: the founding years, social and religious development, race relations, development of the Atlantic world, origins and legacy of American independence.

HSTAA 302 American Civilization: The First Century of Independence (5) *McKenzie, Rorabaugh, Saum* Establishment of the constitutional system; national expansion; intellectual and cultural development; internal conflicts, the Civil War, and Reconstruction.

HSTAA 303 Modern American Civilization From 1877 (5) *Burke, Pease* Emergence of modern America, after the Civil War; interrelationships of economic, social, political, and intellectual developments.

HSTAA 333 The American South Since the 1920s (5) *Fowler* Political, social, and economic developments in the eleven states of the former Confederacy. Special attention to the questions of race relations, civil rights, and cultural distinctiveness. Recommended: 201.

HSTAA 351 Formation of the American Constitution to 1840 (3) *Johnson* English constitutionalism and its meaning for the colonies; the American Revolution; constitution making in the states; the Articles of Confederation and the Constitution of 1787; inauguration of the new government and adoption of the Bill of Rights; constitutional decisions of John Marshall; Jacksonian democracy and its constitutional implications. Credit cannot be received for both 351 and 451.

HSTAA 352 American Constitutional History, 1860 to the Present (3) Sp *Johnson* Modern American constitutional development since the Civil War; the Supreme Court and the shift from economic issues to civil rights; Congress, the presidency, and the Constitution.

HSTAA 385 The History of the American Film (5) American films and film-making technology; the film industry and its financing and marketing strategies. Cultural, social, political, and economic impact of films upon American Society.

HSTAA 373 Social History of American Women (5) W "Ordinary" women, colonial times to present: work at home, charitable activities, entrance into labor force. "The lady" ideology. Feminist movements—nineteenth century and post-World War II. Not open for credit if GIS 210, 383, 483, or 490 taken. Joint with WOMEN 383. Prerequisite: 201 or WOMEN 200 or 283 or permission of instructor.

HSTAA 377 History of Canada (5) General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present; Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West.

HSTAA 381 Latin America: The Early Colonial Period (5) *Alden* Discovery and founding of Spanish and Portuguese empires in the New World and their development until the eighteenth-century reorganizations.

HSTAA 382 Latin America: Late Colonial and Early National Periods (5) *Alden* Imperial reforms, the struggle for independence; the founding of new nations.

HSTAA 383 Modern Latin America (5) Analysis of economic problems, political and social changes, and intellectual trends in major Latin American republics since the late nineteenth century.

HSTAA 384 Latin America: Inter-American and Intra-Continental Relations (5) Inter-American relations, focusing on the United States' diplomatic and military responses to the problems of Latin America since 1776. Intra-Latin American relations and regional organizations (e.g., the Organization of American States).

HSTAA 401 American Revolution and Confederation (5) *Johnson* Causes of separation of the United States from the British empire; political theory of the Revolution; its military history; diplomacy of the Revolution; the Revolution as a social movement; intellectual aspects; readjustment after independence; the formation of the American union; the Constitution.

HSTAA 404 New England: From the Foundings to the Civil War (5) *Johnson* New England from colonial beginnings to the region's emergence to national leadership in the mid-nineteenth century. Emphasis on Puritanism, the New England town, adjustment to empire, revolution and constitution making, the growth of party, abolitionism, the flowering of a regional culture, and the personalities who embodied these key themes and periods.

HSTAA 409 American Social History: The Early Years (5) *Rorabaugh* Survey of American society and institutions from the colonial era through the Civil War, with special attention to reform, labor, immigration, education, law enforcement and the city.

HSTAA 410 American Social History: The Modern Era (5) *Rorabaugh* Survey of American society and institutions from Reconstruction to the present with special attention to reform, poverty, social mobility, immigrant and ethnic groups, the city and law enforcement.

HSTAA 411 The United States During the Era of Civil War and Reconstruction (5) *McKenzie* Conflicting interests, ideologies, and ways of life in the United States from the 1840s to the 1870s.

HSTAA 412 The Westward Movement, 1700-1850 (5) *Findlay* Anglo-American advance into interior of continental United States culminating in occupation of Far West. Rivalry with New France and New Spain in colonial period; role of federal government in westward expansion; land policy and land distribution; migration, settlement, and the pioneering experience; federal Indian policies and implementation; political evolution, urbanization, and economic development of trans-Appalachian West; shaping of national character and institutions.

HSTAA 413 History of the Trans-Mississippi West (5) *Findlay* Anglo-American exploration, conquest, occupation, and exploitation of the trans-Mississippi West, with emphasis on economic development into the twentieth century. Considers wide range of developmental themes (social, political, cultural) in historiography of American West. Recommended: 412.

HSTAA 426 American Urban History Since 1870 (3 or 5) Development of American cities for the past century. Topics include physical development, immigration, politics, and changes in society and culture.

HSTAA 431 American Politics and Society Since 1920 (5) *Burke, Pease* Political, social, economic, and intellectual developments in the United States from 1920 to the present.

HSTAA 432 History of Washington and the Pacific Northwest (5) *Findlay, Saum* Exploration and settlement; economic development; growth of government and social institutions; statehood.

HSTAA 436 American Jewish History Since 1885 (5) *Kieval* Political, social, economic, and religious history of the American Jewish community from the period of the great eastern European migration until the present. The integration of the immigrant community into the general American community; the rise of nativism; the development of American socialism; World War I and World War II; and the reactions of the American Jews to these events.

HSTAA 450 American Labor History (5) *Burke* American workers and their efforts to organize and bargain collectively with their employers. Post-Civil War period. Radical movements and trade unions.

HSTAA 451 Constitution Making in America, 1776-89 (5) *Johnson* Intensive study of the framing of the Articles of Confederation, the state constitutions, the territorial ordinances, the U.S. Constitution of 1787, and the Bill of Rights. Class discussions and term paper, in addition to required attendance at lectures offered in 351, which cover the English and colonial backgrounds and developments to 1840. Credit cannot be received for both 351 and 451.

HSTAA 454 The Intellectual History of the United States (5) *Saum* Lectures and discussions devoted to the development of the American mind, from historical beginnings to the present.

HSTAA 456 The American Character (5) *Pease* Explores prevailing explanations for the American character and tries to assess its historical consequences. Lectures, discussion, reading, reports. Recommended: two college-level courses in history, including study of the American people and of the people of at least one other modern nation or society.

HSTAA 458 History of American Education to 1885 (3) *Burgess* Development of American education in cultural context: colonial period, influence of enlightenment, and common school movement. Joint with EDPGA 458.

HSTAA 459 History of American Education Since 1885 (3) *Burgess* Development of American education in cultural context: progressive education, recent criticism, continuing issues and trends. Joint with EDPGA 459.

HSTAA 481 Diplomatic History of the United States, 1776-1901 (5) *Fowler* Foreign policy of the United States government prior to the twentieth century. Emphasis on international wars, territorial expansion, and the peculiarities of the American position in world politics. Prerequisite: 202 or graduate standing.

HSTAA 482 Diplomatic History of the United States, 1901-Present (5) *Fowler* Foreign policy of the United States government during the twentieth century. International wars and the other major episodes in diplomacy are emphasized. Prerequisite: 202 or graduate standing.

HSTAA 470 Colloquium in American History: the Progressive Era, 1900-1917 (5) *Burke* The principal problems and themes of the Progressive Era, emphasizing political, economic, social, and cultural aspects.

HSTAA 471 Colloquium in American History: the 1920s in America (5) *Burke* Achievements and issues of the New Era; causes and consequences of the stock-market crash and Great Depression, with emphasis on political, economic, social, and cultural analysis.

HSTAA 472 Colloquium in American History: Franklin D. Roosevelt and the New Deal (5) *Burke* Analysis of the key political, economic, social, and cultural factors in the New Deal, including the role played by President Roosevelt. Prerequisite: permission of instructor.

HSTAA 473 Colloquium in History: the American Experience in World War II (5) Problems and policies of the people of the United States and their government in World War II; the role of the United States in winning the war; impact of the war on American society. Prerequisite: permission of instructor.

HSTAA 482 The History of Brazil: Colonial Period to the Present (5) *Alden* Colonial foundations; the first and second empires; the old and new republics; current problems; prospects for the future.

HSTAA 483 Southern South America (5) *AWSpS* History of the four countries that form southern South America: Argentina, Uruguay, Paraguay, and Chile, focusing on economic, social, and political change in the nineteenth and twentieth centuries. Governments of Juan Perón in Argentina and Salvador Allende in Chile. Relations of the four countries with Europe and the United States.

HSTAA 485 Social Revolution in Twentieth-Century Latin America: A Comparative Approach (3) Analyzes and compares major Latin American social revolutions, including Mexico (1910-20) and Cuba (since 1959). Backgrounds and causes; the impact of revolutionary change; relationships between United States and revolutionary and postrevolutionary governments.

HSTAA 486 History of Mexico: Colonial Origins to 1822 (5) *Gil* Political, social, and economic history of Mexico from its discovery by the Spanish to its independence from Spain.

HSTAA 487 History of Mexico: 1822 to the Present (5) *Gil* Political, social, and economic history of Mexico from its independence from Spain to the present. Recommended: 486.

HSTAA 488 History of the Caribbean and Central America (5) *Gil* Political, social, and economic history of principal countries in the Caribbean and Central America from their discovery to the present.

Ancient and Medieval History, Including Byzantine

HSTAM 201 Ancient History (5) *Ferrill, Thomas* Development and characteristics of ancient Greek civilization from the Bronze Age to the Roman conquest. Emphasizes interaction of cultures of the eastern Mediterranean.

HSTAM 202 Ancient History (5) *Ferrill, Thomas* Political, social, economic, and cultural development of Rome from the beginnings in the eighth century B.C. to the beginning of the Middle Ages.

HSTAM 203 Introduction to the Middle Ages: Medieval People (5) *Stacey* Introduction to the Western Middle Ages through a study of social roles and statuses as seen through documents and imaginative literature. The groups studied are rulers, aristocracy, peasants, townspeople, clergy, outcasts, and outsiders.

HSTAM 205 Military History of the Ancient World (5) *Ferrill* Military history from prehistoric times to the fall of the Roman Empire, with special emphasis on the Greco-Roman period and the campaigns of Alexander the Great, Hannibal, Scipio Africanus, and Julius Caesar.

HSTAM 331 Early Middle Ages (5) *Stacey* The Dark Ages, feudalism, emergence of the medieval order of civilization, and the development of Romanesque culture.

HSTAM 332 Central Middle Ages (5) *Stacey* Europe in the central Middle Ages: culture of cathedrals and universities, formation of national states, development of urban society.

HSTAM 333 Late Middle Ages (5) *Stacey* Disintegration of the medieval order under the impact of the national state, the secularization of society, and the decline of the church. Movements of reform and revolution. The culture of late gothic Europe.

HSTAM 336 The Humanist Ideal: From the Greeks to the Renaissance (3) *Ferrill, O'Neil, Thomas* Students read certain ancient, medieval, and Renaissance texts, selected to show the continuity and the transformations of the humanistic tradition, and write periodic essays on their reading as well as a term paper. Intended to supplement courses on the history of the respective periods.

HSTAM 351 Medieval Italy (5) Italy, from the barbarian invasions to the Renaissance, considered in the framework of European and Mediterranean cultures.

HSTAM 360 Medieval Christianity (5) *Stacey* Development of Christianity in the medieval west circa 400 to 1500. Emphasis on the forms of religious life: monasticism, the papacy, friars, hermits, mystics, and reformers; and on the emergence of new modes of piety, both lay and clerical.

HSTAM 401 Early Greece (5) *Ferrill, Thomas* Bronze and Dark Age Greece: realities of the heroic age of ancient Greece.

HSTAM 402 Classical Greece (5) *Ferrill, Thomas* The classical civilization of ancient Greece, with special emphasis on the legacy of Greece to Western civilization.

HSTAM 403 Alexander the Great and the Hellenistic Age (5) *Ferrill, Thomas* Rise of Macedonia, conquest of Near East by Alexander, and division into lesser kingdoms after Alexander's death. Special emphasis on fusion of cultures and change from city-state to world-state.

HSTAM 405 Topics in Ancient History (3, max. 6) *Ferrill, Thomas* An umbrella course that makes it possible to treat a special topic in the history of the ancient world during the period from the Bronze Age to the fall of the Roman Empire. One topic is studied in depth during the quarter. Prerequisite: permission of instructor.

HSTAM 411 The Early Roman Republic (3) *Ferrill* Political, social, economic, and cultural history, with emphasis on the development of the constitution and territorial expansions.

HSTAM 412 The Late Roman Republic (3) *Ferrill* Political, social, and cultural history, with special emphasis on the period of Cicero and Caesar.

HSTAM 413 The Early Roman Empire (3) *Ferrill* Political, social, economic, and cultural history, with emphasis on the Julio-Claudians.

HSTAM 414 The Late Roman Empire (3) *Ferrill* Political, social, economic, and cultural history, with emphasis on the decline of ancient civilization.

HSTAM 421 The Byzantine Empire (5) *Waugh* Political, social, economic, and cultural history of the eastern Roman Empire from the fourth to fifteenth centuries.

HSTAM 431 Topics in Medieval History, 500-1000 (5) *Boba, Stacey* Study in depth of one or more topics in the history of Europe during the early Middle Ages. Prerequisite: a course in medieval history.

HSTAM 443 Kievan and Muscovite Russia: 850-1700 (5) *Waugh* Development of Russia from earliest times to the reign of Peter the Great.

HSTAM 448 Medieval Russian Chronicles (5) *Waugh* History of Russian chronicle writing; study of the chronicles as literature and as historical sources, with emphasis on the latter. Prerequisites: reading knowledge of Russian and permission; recommended: 443.

HSTAM 460 Medieval England, 1042-1485 (5) *Stacey* Upper level survey of English history from the Norman conquest until 1485. Emphasis on political, social, and economic history, with special attention to the peculiarities of English development as these had emerged by 1485.

HSTAM 472 Intellectual and Religious History of the Later Middle Ages (5) Sp *Stacey* Selected topics in intellectual and religious history, 1250 to 1550. Concentration on Europe north of the Alps and on philosophical and theological issues rather than on "humanism" and the history of scholarship. Most reading in original sources in translation. Prerequisite: appropriate background in medieval history or intellectual history.

History of Asia

HSTAS 201 Ancient Indian Civilization (5) *Conlon* Religions, literature, philosophy, politics, arts, and history of India from earliest times to the Mughal empire.

HSTAS 202 Modern Indian Civilization (5) *Conlon* The Islamic impact, British conquest, and contemporary India. Emphasis on the rise of nationalism, social organization, and contemporary life and history.

HSTAS 211 History of Chinese Civilization (5) *Dull* Intensive survey of Chinese civilization from earliest times to today. Introduces all students, including East Asian history majors, to the general sweep of Chinese history. Social, cultural, and intellectual developments.

HSTAS 212 History of Korean Civilization (5) *Palais* From earliest times to the present. Development of Korean society and culture in terms of government organization, social and economic change, literature, and art. Joint with SISEA 212.

HSTAS 221 History of Southeast Asia (5) *Sears* Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth and twentieth century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Joint with SISSE 221.

HSTAS 348 Alternative Routes to Modernity (5) A *Guy* Routes to modernity followed by non-Western societies between 1600 and 1900. Historical experiences of non-Western societies seen in the contexts of European history and of development theory. Primary sources and techniques for posing theoretical questions of historical data. Joint with SIS 348.

HSTAS 401 History of Ancient India (5) *Conlon* India in ancient times; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 402 History of Medieval and Mughal India (5) *Conlon* Medieval India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 403 History of Modern India to 1900 (5) *Conlon* Modern India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 404 History of Twentieth-Century India (5) *Conlon* Analysis of the problems in the fields of social life, international and domestic politics, education, economics, and other areas that confront India today.

HSTAS 422 History of Tokugawa Japan (5) *Hanley* Background to the unification of Japan in 1600; establishment of the Tokugawa political structure; and the social, economic, and cultural history of the period 1600-1868.

HSTAS 423 History of Modern Japan (5) *Pyle* Political, social, economic, and cultural development of Japan from the late Tokugawa period to the present with special emphasis on the cultural impact of the West.

HSTAS 431 Tibetan History (3) Tibet from earliest times to the present. Emphasis on the status and relations of Tibet in Asian affairs and on the evolution of the political institutions of a lama-ruler state. Recommended: 211 or equivalent. (Offered alternate years.)

HSTAS 451 Chinese History: Earliest Times to 221 B.C. (5) *Dull* Preimperial China.

HSTAS 452 Chinese History: 221 B.C. to A.D. 908 (5) *Dull* Development of the imperial Chinese state.

HSTAS 453 Chinese History: A.D. 908 to 1840 (5) *Chan, Dull* The Wu, Tai, Sung, Yuan, Ming, and early Ch'ing periods.

HSTAS 454 History of Modern China (5) *Guy* Political, economic, social, and intellectual history of China from 1800 to the present. Processes of modernization and revolution and relationship between them.

HSTAS 462 Southeast Asian History to 1800 (5) *Sears* Absorption and modification of cultures (Indian and Chinese), religions (Islam, Buddhism, Catholicism), and peoples (northern European) by island- and mainland-Southeast Asians. Main themes are cultural contact and the growth of states and peoples.

HSTAS 463 Southeast Asian History from 1800 to the Present (5) *Sears* Post-eighteenth century history of the present countries of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Singapore, Brunei, Indonesia, and the Philippines. Deals with colonial rule, emerging nationalism, and political independence. Investigates broad themes of social, economic, and cultural history.

HSTAS 465 The Vietnam Wars (5) *Sears* Analyzes Vietnamese, Cambodian, and Laotian wars fought in Southeast Asia from 1946 to present. Examines how the Vietnamese managed to defeat both the French and Americans. Questions whether these wars were wars of independence, civil wars, or "proxy wars" in which local forces served the interests of great powers.

HSTAS 481 History of Traditional Korea: Earliest Times to the Nineteenth Century (5) *Palais* Korean history from earliest times to the modern period.

HSTAS 482 History of Modern Korea: 1860 to the Present (5) *Palais* Traditional institutions and society, Japanese colonial rule, liberation and the Korean War, early Korean communist movement, and North Korea and South Korea since 1945.

Modern European History

HSTEU 275 Life in England (5) AW *Behlmer, Bell, Levy* Social history of England from the Norman conquest to the present, seen through letters, autobiographies, novels, and plays of the time. Life of the ordinary inhabitant—in the village and the manor house.

HSTEU 301 Early Modern European History: 1450-1648 (5) *Bridgman, Levy* Political, social, economic, and cultural history from the late Renaissance to the Peace of Westphalia.

HSTEU 302 Modern European History: 1648-1815 (5) *Bridgman, Hankins, O'Neil* Political, social, economic, and cultural history from the Peace of Westphalia to the fall of Napoleon.

HSTEU 303 Contemporary European History Since 1815 (5) *Bridgman, Ellison* Political, social, economic, and cultural history from the fall of Napoleon to the present.

HSTEU 305 European Witch Trials (5) *O'Neil* Witchcraft and magical beliefs in Europe considered as a problem in intellectual, social, and legal history. Medieval background, systematization of witchcraft theory in fifteenth century; comparison of learned and popular beliefs; mechanisms of witch trials and inquisitorial procedure; the Faust legend; growth of skepticism and decline of witchcraft in seventeenth century.

HSTEU 369 The Destruction of European Jewry, 1933-45 (3 or 5) *Kieval* History of anti-Semitism; dimensions of the Holocaust; the Holocaust organization and the victims' responses; reactions of world to events in Europe, allied policies, refugee policy, and American actions. Legal, historical, and sociological questions raised by these events. Joint with SISJE 369.

HSTEU 370 The Vikings (5) *Leiren* The Vikings at home in Scandinavia and abroad, with particular emphasis on their activities as revealed in archaeological finds and in historical and literary sources. Joint with SCAND 370.

HSTEU 378 The Making of Contemporary France (5) Historical origins and subsequent development of nine contemporary problems and characteristics of French government and politics, economy, and society. Prerequisite: FREN 203 or 222 or equivalent.

HSTEU 380 History of Scandinavia to 1521 (3) *Leiren* Survey of Scandinavian history from the Viking age to 1521, with emphasis on the efforts at unification between Iceland, Denmark, Norway, and Sweden, and their relationship to the European continent. Joint with SCAND 380.

HSTEU 381 History of Scandinavia to 1809 (3) *Leiren* Scandinavian history from 1521 to 1809, with special emphasis on the Lutheran Reformation, the Thirty Years' War, and the Napoleonic Wars. Joint with SCAND 381.

HSTEU 382 History of Scandinavia From 1809 to the Present (3) *Leiren* Scandinavian history from 1809 to the present, with major emphasis on the political, social, cultural, and economic development of the Scandinavian countries. Joint with SCAND 382.

HSTEU 401 The Reformation (5) *O'Neil* Origins of the disunity of Europe in the crisis of the sixteenth century with emphasis on the relations between religion and politics.

HSTEU 405 European Intellectual History: Eighteenth Century (5) *Toews* Development of the social sciences, moral theory, political theory, and religious thought in eighteenth-century Europe. Rationalism, empiricism, utilitarianism, and the sources of idealism.

HSTEU 406 European Intellectual History: Nineteenth Century (5) *Toews* Selected topics in intellectual history up to 1890. The philosophical consequences of the French Revolution, the development of idealism, conservatism, romanticism, and early socialist theory; positivism, the problems of historicism, new forms of Christian apologetics, utilitarianism in decline, liberalism as philosophy, the early Marx.

HSTEU 407 European Intellectual History: Twentieth Century (5) *Toews* Selected topics in intellectual history of the late nineteenth and early twentieth centuries. The aftermath of Darwinism, the problems of methodology in modern social science, historicism and moral relativism, irrationalism in philosophy and social theory, revisionism in secular and orthodox religions.

HSTEU 410 The Renaissance (1300-1560) (5) *O'Neil* Conditions of Renaissance culture: Italian republics and despots, humanism, the classical ideal of

the arts, Machiavelli and the foundations of modern political thought; the end of an era. Prerequisite: 301 or HST 112.

HSTEU 411 Europe: 1814-70 (5) *Bridgman* Development of Europe during the age of Metemich, the revolutions of 1848, and the emergence of new national states.

HSTEU 412 Europe: 1870-1914 (5) *Bridgman* Impact of population increase and technological change on European society; stresses and strains in European life and outlook.

HSTEU 413 Europe: 1914-45 (5) *Bridgman* Politics and society of Europe in the age of the concentration camp.

HSTEU 414 Europe Since 1945 (5) *Ullman* Political, economic, and military developments in Europe under the impact of the Cold War.

HSTEU 415 Europe in the Six Years' War (1939-45) (5) Inquiry to discover what the war of 1939-45 was about and what it did to the more than five hundred million Europeans.

HSTEU 421 France: 1429-1789 (5) *Jonas* Political and cultural history, from Joan of Arc to the eve of the French Revolution. Villon, Rabelais, Montaigne, Molière, Voltaire, Rousseau, de Tocqueville.

HSTEU 422 The French Revolution and Napoleon: 1789-1815 (5) *Jonas* Transformation of France under the Revolution of 1789; the Reign of Terror and Napoleon; the impact of the revolution and Napoleon upon Europe.

HSTEU 423 France Since 1814 (5) *Jonas* Political, economic, and social history since the Congress of Vienna. Special emphasis upon the continuity of the revolutionary tradition.

HSTEU 431 Germany: 1848-1914 (5) *Bridgman* Society, economy, and political problems of central Europe from the Thirty Years' War to World War I, with particular emphasis on the nineteenth century.

HSTEU 432 Germany: 1914-45 (5) *Bridgman* Politics and society from the collapse of the Bismarckian empire to the collapse of Hitler's empire.

HSTEU 433 Central Europe: the Habsburg Monarchy, 1740-1918 (5) *Kieval* Social, political, cultural history of Europe's second-largest state, from the reign of Maria Theresa to the dissolution of the empire at the end of World War I. Topics include: state formation, nineteenth century revolutions, nationality conflicts, political radicalism and anti-Semitism, and literature and the arts.

HSTEU 435 World War I (5) *Bridgman* European society on the eve of the war. War experience of the Europeans. Long term consequences of the war on European social, political, and economic institutions. Impact of the war on non-European world. The war in European literature.

HSTEU 439 Soviet Union Since World War II (5) *Ellison* Domestic and foreign policy; political, economic, social, and cultural developments.

HSTEU 440 History of Communism (5) *Ellison* Communism from its origins in the Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Joint with SIS 440. Prerequisites: two courses in modern European history or politics.

HSTEU 444 Imperial Russia: 1700-1900 (5) *Treadgold, Waugh* Development of Russia from Peter the Great to Nicholas II.

HSTEU 445 Twentieth-Century Russia (5) *Ellison, Treadgold* Russia and the USSR from Nicholas II to the present.

HSTEU 451 East-Central Europe Since 1342 (5) *Felak* Focus on the lands of today's Poland, Czechoslovakia, Hungary, and East Germany from the time they were great powers to the present. Traces the major changes in the fortunes of these lands in both local and international settings.

HSTEU 452 Eastern Europe Since 1918 (5) *Felak* Poland, Czechoslovakia, Hungary, Romania, Yugoslavia, Bulgaria, and Albania, from the end of World War I to the present. Prerequisite: 451 or permission of instructor.

HSTEU 453 History of the Balkans, 1400 to the Present (5) *Felak* Centuries of Ottoman rule that produced a new basis for the reemergence of independent states in the nineteenth and twentieth centuries; history of these new states until the present.

HSTEU 461 Formation of the Spanish Nation: to 1700 (5) *Ullman* Major political, economic, and cultural events leading to the creation of the Spanish nation under Ferdinand and Isabel.

HSTEU 462 Spain: 1700 to the Present (5) *Ullman* Political, economic, and cultural attempts of Spain to adjust to capitalism, liberalism, and secularism.

HSTEU 464 The Jews in Spanish History (3 or 5) *Ullman* Sephardic Jews in Spanish politics, economy, and culture, emphasizing the medieval Golden Age and the Inquisition. Joint with SISJE 464.

HSTEU 465 The Jews of Eastern Europe (5) *Kieval* Jewish society in Poland, Russia, the Hapsburg Lands, and Romania from the late Middle Ages to the Holocaust. Joint with SISJE 465. Recommended: introductory course in European or Jewish history.

HSTEU 467 Medieval Jewish History (5) Social and intellectual history of the Jews in western Europe to the fifteenth century. Jews under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Joint with SISJE 467.

HSTEU 468 Early Modern Jewish History, 1492-1789 (5) *Kieval* Jews in the early-modern period. The Spanish expulsion in 1492 to the onset of political and social emancipation in western Europe and America. Joint with SISJE 468. Recommended: introductory course in European or Jewish history.

HSTEU 469 Modern Jewish History, 1770-1948 (5) *Kieval* History of the Jews from the era of the Enlightenment and the French Revolution to the founding of the state of Israel. Joint with SISJE 469. Recommended: introductory course in European or Jewish history.

HSTEU 470 The Jacobethan Age: England, 1580-1630 (5) *Levy* Emphasis on arts and society instead of the traditional kings, battles, and politics; the way people at all levels of society lived, in towns and in the countryside, within the bounds of the royal court or outside in the political wilderness. Classes on poetry, drama, music, architecture, painting, interior decoration, and some of the minor arts, as well as on demography and some of the traditional historical subjects. Not open for credit to students who have taken 471 or 472.

HSTEU 471 England in the Sixteenth Century (5) *Levy* Political, administrative, and social history from Henry VII to Elizabeth I, with emphasis on the Reformation and its effects and on conditions of life in Elizabethan England. Not open to students who have taken 470.

HSTEU 472 England in the Seventeenth Century (5) *Levy* Political, administrative, and social history from the accession of James I to the Glorious Revolution. Not open to students who have taken 470.

HSTEU 474 England in the Nineteenth Century (5) *Behlmer, Bell* Political, social, and cultural development; the agrarian, industrial, and French revolutions;

the rise of parliamentary democracy; the Victorian age; political thought from utilitarianism to Fabianism; Irish home rule.

HSTEU 475 England in the Twentieth Century (5) *Behlmer, Bell* From the Boer War to the present; conservatism, liberalism, and socialism; England in two world wars; the decline of British Imperialism.

HSTEU 476 Modern Irish History (5) *Behlmer* Political and social history from 1800 to the present; the Irish Question after the Act of Union; development of Irish nationalism in the Home Rule and Sinn Féin periods; the Irish Free State and Northern Ireland since 1921; current problems in Northern Ireland.

HSTEU 480 European Socialism (5) *Jonas* Origins and development of socialist theory and practice in Europe since the French Revolution. Socialism as a political movement. Prerequisite: at least one course in the history of Europe since 1789.

HSTEU 482 Fascism in Europe (5) History of the fascist era in modern Europe from 1919 to 1945. A study of the principal examples of national fascism and fascist-like movements coupled with a general theoretical consideration of the phenomenon. Recommended: introductory course in the history of modern Europe.

HSTEU 485 Italy Since 1860 (5) History of politics and society in Italy from unification to the present. Liberal Italy and the great war, fascism and World War II, resistance and the Italian republic, social and economic changes since 1945, communism and Christian democracy. Special emphasis on political culture and traditions.

Courses for Graduates Only

General History

HST 501 Ancient Greece and Rome: Writings and Interpretations (3-6) *Thomas* Study of historians, development of historical study as a distinct pursuit, focus of attention in historical scholarship in the ancient world and comparison with modern interpretation of antiquity.

HST 502 Medieval Europe: Writings and Interpretations (3-6) *O'Neill, Waugh* Study of historians, schools of history, and interpretations of medieval European history.

HST 503 Modern Europe: Writings and Interpretations (3-6) *Sp* Study of historians, schools of history, and interpretations of modern European history.

HST 511 History of Science (3-6) *Hankins*

HST 512-513-514 Seminar in the History of Science (3-6)-(3-6)-(3-6) *A,W,Sp Hankins*

HST 524 British Empire History (3-6) *Bell*

HST 543 American Diplomacy and the Far Eastern Crisis, 1931-41 (3-6) *Butow* Field course in the diplomacy of the decade preceding American entry into World War II, with emphasis on the Far Eastern crisis. Prerequisite: permission of instructor.

HST 544 Seminar in American Diplomacy and the Far Eastern Crisis, 1931-41 (3-6, max. 12) *Butow* Diplomacy of the decade preceding American entry into World War II, with emphasis on the Far Eastern crisis. Prerequisite: permission of instructor.

HST 551 Field Course in African History (3-6) Systematic examination of key historical writings and interpretive controversies in African history, with special attention to the growth of multidisciplinary approaches to historical reconstruction and the evaluation and use of oral historical data. Prerequisites: reading knowledge of one of the following: French, German, Portuguese, Arabic, or other African language.

HST 561 Islamic History (3-6) *Barachar* Field course. Introduction to advanced study in the major periods and problems of Islam. Bibliographical guidance is stressed.

HST 562 Ottoman History (3-6) Field course. Introduction to the major periods and problems of Ottoman history, 1300-1914, by acquainting the student with the major works in at least two languages. An attempt is made to teach some use of Ottoman materials. A minor problem is investigated in detail by every student. Prerequisite: knowledge of at least one major language besides English (French, German, Russian, or other).

HST 563 Modern Near East (3-6) *Barachar* Field course introducing the student to the major periods and problems of Near Eastern history, 1798 to the present. Prerequisite: permission of instructor.

HST 571 Orientation to an Academic Career in History (3) AS Course for prospective college and university history instructors, preparing them for the nonacademic aspects of their duties. Prerequisite: Master of Arts degree in history or permission of instructor.

HST 600 Independent Study or Research (*) AWSpS

History of the Americas

HSTAA 501 American History: Early (3-6) *Johnson*

HSTAA 503 Seminar in American History: Early (3-6, max. 12) *Johnson*

HSTAA 512 American History: Western (3-6)

HSTAA 521 American History: Writings and Interpretations, 1770-1870 (4-6) A *McKenzie, Rorabaugh*

HSTAA 522 American History: Writings and Interpretations Since 1870 (4-6) W *Burke, Fowler, Pease*

HSTAA 524 American Social History Before 1880 (3-6) Field course. Survey of major problems and literature in American social history before 1880.

HSTAA 532-533-534 Seminar in American History: Recent Period (3-6, max. 12)-(3-6, max. 12)-(3-6, max. 12) A,W,Sp *Burke, Pease*

HSTAA 554 American History: Intellectual (3-6) *Saum*

HSTAA 555-556 Seminar: American Intellectual History (3-6)-(3-6) *Saum* Develops research and writing competence in American intellectual history. Prerequisite: permission of instructor or graduate program coordinator.

HSTAA 561 History of American Foreign Policy (3-6) *Fowler*

HSTAA 562-563 Seminar in American Diplomatic History (3-6)-(3-6) *Fowler*

HSTAA 577 History of Canada (3-6) Canadian historiography and bibliography from the foundation of New France to the present.

HSTAA 581 Latin American History: Colonial Period (3-6) *Alden*

HSTAA 582 Latin American History: National Period (3-6) *Alden, Gil*

HSTAA 583-584-585 Seminar in Latin American History (3-6, max. 12)-(3-6, max. 12)-(3-6, max. 12) *Alden, Gil* Problems of historical research in the history of Latin America from colonial beginnings to the present.

Ancient and Medieval History, Including Byzantine

HSTAM 501 Greek History (3-6) *Thomas* Problems in the history of the Athenian constitution.

HSTAM 511 Roman History (3-6) *Ferrill* Roman history, 31 B.C.-A.D. 37.

HSTAM 512-513 Seminar in Ancient History (3-6)-(3-6) *Ferrill, Thomas* Detailed study of special topics in ancient history. Prerequisite: permission of instructor or graduate program coordinator.

HSTAM 530 Early Middle Ages (3-6) Field course. Survey of early European history through the times of tribal migrations and invasions from Asia. Problems and methods of research. Prerequisite: permission of instructor or graduate program coordinator.

HSTAM 531 Medieval European History (3-6)

HSTAM 532, 533 Medieval European Seminar (3-6,3-6) AWSp Prerequisite: reading knowledge of French or German or Latin.

History of Asia

HSTAS 501 Indian History (3-6) *Conlon* Prerequisite: permission of instructor.

HSTAS 502, 503 Seminar: History of India (3-6, max. 12; 3-6, max. 12) *Conlon* Seminar on selected topics and problems in the history of medieval and modern India. Prerequisites: 501 and permission of instructor.

HSTAS 520 Premodern Japanese History (5) *Hanley* Field course; Japanese history prior to 1868. Prerequisites: 421 and 422, or SISEA 441 and 541, or permission of instructor.

HSTAS 521 Modern Japanese History (3-6) *Pyle* Field course. Prerequisites: 422, 423, or permission of instructor.

HSTAS 551 Field Course in Chinese History: Pre-Sung Period (3-6) *Dull* Introduces Western language materials on traditional China in order to give the students bibliographical and other assistance in preparing for examinations in this field of history.

HSTAS 552-553-554 Seminar in Chinese History: Pre-Sung Period (3-6, max. 12)-(3-6, max. 12)-(3-6, max. 12) A,W,Sp *Dull* Prerequisite: reading knowledge of Chinese.

HSTAS 560- Field Course in Chinese History, Sung to Early Ch'ing (3-6) *Chan* First quarter of a two-quarter field course in Chinese history. Covers the Sung to Yüan period, 960-1368. Introduces Western materials on the history of this period to prepare graduate students for examinations in this field.

HSTAS 561 Field Course in Chinese History, Sung to Early Ch'ing (3-6) *Chan* Second quarter of a two-quarter field course in Chinese history. Covers the Ming to the early Ch'ing period, 1368 circa seventeenth century. Introduces Western materials on the history of this period to prepare graduate students for examinations in this field.

HSTAS 562-563-564 Seminar in Chinese History: Sung to Modern (3-6)-(3-6)-(3-6) A,W,Sp *Chan* Professional writing seminar in Chinese history from Sung to modern times. Prerequisite: reading knowledge of Chinese.

HSTAS 571-572 Chinese History: Modern Period (3-6)-(3-6) W,Sp *Guy* Field course in modern Chinese history, emphasizing extensive reading in the secondary literature on modern China.

HSTAS 573-574-575 Seminar in Chinese History: Modern Period (3-6, max. 12)-(3-6, max. 12)-(3-6, max. 12) A,W,Sp *Guy* Research seminar in modern Chinese history. Training in the materials and methods of research, and preparation of extended research papers. Prerequisites: 571-572 or permission of instructor and reading knowledge of Chinese.

HSTAS 581 Modern Korean History (3-6) Sp *Palais* Field course. Prerequisite: permission of instructor.

HSTAS 582-583-584 Seminar in Korean History (3-6)-(3-6)-(3-6) A,W,Sp *Palais* Selected topics in Korean history and historiography.

Modern European History

HSTEU 501 Renaissance Field Course (3-6) *O'Neill* Topics in the cultural, political, and social history of the Renaissance era.

HSTEU 502 Reformation Field Course (3-6) *O'Neill* Topics in the religious, political, and social history of the Reformation era.

HSTEU 515 Modern European Intellectual History (3-6)

HSTEU 516-517 Seminar: European Intellectual History (3-6)-(3-6)

HSTEU 521 Modern European History: France (3-6) *Jonas*

HSTEU 531 Modern European History: Germany (3-6) *Bridgman*

HSTEU 532-533-534 Seminar in Modern European History: Germany (3-6)-(3-6)-(3-6) A,W,Sp *Bridgman*

HSTEU 544 Modern Russian History (3-6) *Treadgold*

HSTEU 545-546-547 Seminar in Modern Russian History (3-6)-(3-6)-(3-6) A,W,Sp *Ellison, Treadgold* Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 548 Field Course in Soviet History (3-6) *Ellison* Specialized course for graduate history students in the scholarly literature of Russian history since 1917. Intended for graduate students preparing for M.A. or Ph.D. field examination in Russian history of the Soviet period.

HSTEU 551 History of Eastern Europe: 1772-1939 (5) Study of the east-central European region: Poland, Czechoslovakia, Hungary, Romania, and the Balkan countries, from their rebirth to World War II. Prerequisite: reading knowledge of German, French, Russian, or one East European language.

HSTEU 552 History of Eastern Europe: 1939 to the Present (5) Prerequisite: reading knowledge of one major European or one East European language.

HSTEU 553-554-555 Seminar in Modern East European History (3-6)-(3-6)-(3-6) A,W,Sp Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 563 Modern Spanish History (3-6) *Ullman* Problems in the history of Spain, 1500 to the present.

HSTEU 571 English History: Tudor and Stuart (3-6) *Levy*

HSTEU 572 English History (3-6) *Bell*

HSTEU 573-574 Seminar in Modern English History (3-6)-(3-6) *Behlmer*

HSTEU 575-576 Seminar in Tudor-Stuart History (3-6)-(3-6) *Levy* History of England under the Tudors and the Stuarts. Prerequisite: 571 or permission of instructor.

History of Science, Technology, and Medicine

See under History: History and Science Emphasis.

Honors—Arts and Sciences

B10 Padelford

The honors program offers outstanding students a special curriculum featuring small classes, challenging instruction, and close contact with faculty and other honors students. An emphasis on writing is incorporated into the honors core curriculum and honors seminars. Directed and independent study are particularly encouraged for upper-division students, commonly leading to a senior honors thesis or project.

Undergraduate Program

Randolph Hennes, Adviser
B25B Padelford

Admission Requirements: To be considered for admission to the College Honors Program at entrance, students must apply during their final high school semester to the Director of Honors. Selection is based on high school records, test scores, and recommendations from the secondary school. Students also may seek admission based on superior academic performance during their freshman year at the University.

Graduation Requirements: The College Honors curriculum consists of two parts: a general education component and a component in the student's major department. The general education component, which satisfies distribution requirements, consists of three sequences of courses, each lasting three quarters. One of these sequences is taken in Western Civilization, one in World Civilizations, and one in Natural Sciences. Each sequence carries 15 credits total. In addition, students must complete one honors writing link (5 credits) and 5 additional credits of honors courses.

The second component begins when a student, usually by the junior year, is accepted into a department that offers an honors curriculum. Such a student is graduated "With College Honors" in the appropriate discipline. A student who is not a member of the college honors program but who demonstrates superior abilities in a particular field of study may, at the invitation of that department, participate in a departmental honors curriculum and receive a degree "With Distinction" in the major field.

An honors degree can be earned through the following departments and programs within the College of Arts and Sciences: Anthropology, Asian Languages and Literature, Atmospheric Sciences, Chemistry, Classics, Comparative History of Ideas, Comparative Literature, Comparative Religion, Computer Science and Engineering, Economics, English, General Studies, Geography, Germanics, History, International Studies, Japanese Regional Studies, Mathematics, Microbiology, Music, Near Eastern Languages and Civilization, Philosophy, Physics, Political Science, Psychology, Romance Languages and Literature, Russian and East European Studies, Scandinavian Languages and Literature, Slavic Languages and Literature, Sociology, Speech and Hearing Sciences, Speech Communication, Women Studies, Zoology.

By special arrangement, it is possible for students to complete a degree "With College Honors" in departments not offering a formal honors option.

Course Descriptions

Courses for Undergraduates

H A&S 220, 221, 222 Science for Honors Students I, II, III (5,5,5) Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For college honors students only.

H A&S 251, 252, 253 Western Civilization I, II, III (5,5,5) Introduction to ideas and society in Western civilization.

H A&S 261, 262, 263 World Civilization I, II, III (5,5,5) Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section.

H A&S 300 Introduction to the Professions (2-5, max. 15) Studies oriented toward professional work (law, medicine, public affairs, etc.). For college honors students only. Prerequisite: permission of honors office.

H A&S 350 Honors Seminar (2, max. 20) Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For college honors students only. Prerequisite: permission of honors office.

H A&S 396 Interdisciplinary Special Topics—Natural Science (1-5, max. 10) AWSp Special courses drawn from interdisciplinary groups in the natural sciences. Content varies. Prerequisite: one sequence of honors core courses.

H A&S 397 Interdisciplinary Special Topics—Social Science (1-5, max. 10) AWSp Special courses drawn from interdisciplinary groups in the social sciences. Content varies. Prerequisite: one sequence of honors core courses.

H A&S 398 Interdisciplinary Special Topics—Humanities (1-5, max. 10) AWSp Special courses drawn from interdisciplinary groups in the humanities. Content varies. Prerequisite: one sequence of honors core courses.

International Studies

111 Thomson

The Henry M. Jackson School of International Studies organizes and supports interdisciplinary teaching and research in international affairs. The school consists of a group of interdisciplinary language and area studies programs on major world regions. It also incorporates topical and comparative programs for the purpose of studies that transcend national and regional boundaries.

Undergraduate Program

Students may concentrate on a major world area within the context of the humanities and social sciences, specialize in topical studies, or pursue a more general course of study within the major in International Studies. For all the programs listed below except Comparative Religion, the student receives a Bachelor of Arts degree with a major in International Studies.

Canadian Studies

W. A. Douglas Jackson, Chairperson

Canadian Studies offers a program that provides a broad understanding of Canadian society, culture, historical development, and contemporary problems.

Bachelor of Arts Degree

Major Requirements: (1) Background component (25 credits)—SIS 200, 201, 202; ECON 200, 201; (2) Canadian Studies component (24-26 credits)—SISCA 356; three courses from the following: ART H/ANTH 331, SISCA 490, ANTH 488, ENV S 481, GEOG 308, HSTAA 377, POL S 341; 6 credits from SISCA 498, 499; (3) foreign language component (up to 30 credits)—French through second year (FREN 203).

Chinese Regional Studies

Hok-Lam Chan, Chairperson

Chinese Studies offers a program that provides a broad understanding of the Chinese people and their culture, historical development, and contemporary problems. The program has particular strength in history and the social sciences.

Bachelor of Arts Degree

Admission Requirements: Two quarters Chinese language; HSTAS 211; one upper-division course applicable to the major; 10 credits applicable to the major taken at the University; minimum 2.00 overall grade-point average. Admission is competitive, based on grade-point average (emphasis on grades in courses related to program) and writing sample. Application deadline is the third Friday of each quarter; admission occurs on the sixth Friday of each quarter.

Major Requirements: 30 credits or equivalent Chinese language training; additional training recommended. HSTAS 211, 212, 213 or SISEA 241; SISEA 455; 25 credits in 300- and 400-level courses on China, including HSTAS 454, one course in premodern China, and one course in Chinese arts and literature. Specialization (at least three courses) in one of the three fields of modern China, premodern China, and Chinese arts and literature. Minimum 25 credits in upper-division required courses, including HSTAS 454, taken at the University of Washington. Minimum 2.00 grade-point average for each of the following: required language courses; all other required courses.

Comparative Religion

Michael Williams, Chairperson

The Comparative Religion program offers four possible curriculum tracks leading to the Bachelor of Arts degree: History of Religions, Western Emphasis; History of Religions, Eastern Emphasis; Religion and Society; and Religion in Symbolic Expression.

Bachelor of Arts Degree

Major Requirements: RELIG 201, 202, 360; 35 credits in additional courses appropriate to each of the four tracks.

International Studies

Joel S. Migdal, Chairperson

The major in International Studies gives students a comprehensive and interdisciplinary perspective on world problems, plus an ability to analyze the subtle interactions of politics, economics, and culture within the global system.

Bachelor of Arts Degree

Admission: Admission is competitive, based on overall grade-point average, grades in social science courses, a written statement of goals, language background, and any international experience. Before applying, students must complete either ECON 200 or 201; in addition, they are strongly urged to complete SIS 200, 201, or 202. Grades in these courses will be given special consideration. Applications must be submitted April 1-12 for autumn admission and October 1-21 for winter admission. Sophomore standing is preferred.

Major Requirements: Foreign-language competency through end of second-year college level; SIS 200, 201, 202, 401, 495, 498; three or four upper-division courses in an approved track; three interdisciplinary courses in International Studies. Majors are required to maintain a grade-point average of at least 2.50, both overall and in the program.

Japanese Regional Studies

Kozo Yamamura, Chairperson

The Japan program combines language training with interdisciplinary study. Courses to an advanced level

are offered in interdisciplinary studies, economics, business, political science, geography, all periods of Japanese history, art, literature, and language.

Bachelor of Arts Degree

Admission Requirements: Two quarters Japanese language; SISEA 241/HSTAS 213; one upper-division course applicable to the major; 10 credits applicable to the major taken at the University; minimum 2.00 overall grade-point average. Admission is competitive, based on grade-point average (emphasis on grades in courses related to program) and writing sample. Application deadline is the third Friday of each quarter; admission occurs on the sixth Friday of each quarter.

Major Requirements: Two years Japanese language training at UW or equivalent (additional training recommended); HSTAS 211; HSTAS 213 or SISEA 241; SISEA 451; 25 credits of 300- and 400-level courses in Japanese Studies, to include: one course in history; one SISEA course on post-war Japan; a third course, either HSTAS or SISEA; and 10 additional credits on Japan. 15 of the 25 credits must form an approved specialization in Japanese studies. One additional background course (5 credits) in a field other than Japan Studies, to be approved by the adviser. Minimum 25 credits in upper-division required courses, including SISEA 451, taken at the University of Washington. Minimum 2.00 grade-point average for each of the following: required language courses; all other required courses.

Jewish Studies

Hillel J. Kieval, Chairperson

Jewish Studies brings the major disciplines of the humanities and the social sciences to bear on the history and culture of the Jewish people. Courses in history, both modern and premodern, comparative religion, and Near Eastern languages and civilization enable the student to study the history of the Jewish people, their rich and varied culture, and the influence of this culture upon world civilizations.

Bachelor of Arts Degree

Major Requirements: 55 credits, to include SISJE 490 Major Seminar (5) (required), and RELIG 210 (5) and SISJE 250 (5) (highly recommended); 25-35 credits of other courses in the Jewish Studies curriculum. Hebrew language through the second year (30 credits). Up to 15 credits of Hebrew language study may be applied to the 55-credit non-language requirement stated above.

Korean Regional Studies

James B. Palais, Chairperson

The Korean program combines language instruction with history, society, and interdisciplinary area training for students interested in the culture and history of Korea. The program focuses on Korea within the broader context of East Asia.

Bachelor of Arts Degree

Major Requirements: 30 credits or equivalent Korean language training; additional training recommended. HSTAS 211, 212; 213 or SISEA 241; HSTAS 481, 482; 25 credits in 300- and 400-level courses on East Asia.

Russian and East European Regional Studies

Daniel Chiot, Chairperson

The Russian and East European regional program is designed for students who wish to pursue concentrated study of these regions within an interdisciplinary framework. The curriculum covers most aspects of the historical and contemporary development of Russia, the Soviet Union, and Eastern Europe.

Bachelor of Arts Degree

Major Requirements: *Russian Option:* 30 credits or equivalent Russian language; SISRE 243, 324, 343, 457; 15 credits in 300- and 400-level courses in selected discipline of the area; 15 credits in 300- and 400-level courses on Russia in social sciences and humanities, approved by the program advisers. *East European Option:* 30 credits or equivalent in one East European language (Bulgarian, Czech, Hungarian, Polish, Romanian, or Serbo-Croatian); SISRE 220, 344, 458; 15 credits in 300- and 400-level courses in selected discipline of the area; 20 credits in 300- and 400-level courses on eastern Europe in social sciences and humanities as approved by the program adviser.

South Asian Studies

Richard G. Salomon, Chairperson

The South Asian Studies program combines language instruction with history and interdisciplinary area training for students interested in Bangladesh, India, Nepal, Pakistan, Sri Lanka, or Tibet.

Bachelor of Arts Degree

Major Requirements: 30 credits or equivalent in one of the languages of South Asia (Hindi, Sanskrit, Tamil, or Tibetan); HSTAS 201, 202; SISSA 498; 30 credits in the area in one of the following disciplines—anthropology, comparative religion, economics, history, linguistics, philosophy, or political science.

Southeast Asian Regional Studies

Charles F. Keyes, Chairperson

The Southeast Asian Studies program provides interdisciplinary area training and language instruction for students interested in the countries of Thailand, Vietnam, Indonesia, Malaysia, the Philippines, Burma, Laos, Cambodia, Singapore, and Brunei. The program emphasizes social science approaches to the study of Southeast Asian history, culture and society.

Bachelor of Arts Degree

Major Requirements: 30 credits or equivalent in a Southeast Asian language; at least one course from SIS 200, 201, 202; SISSE 221, 314, 315, 490; 15 credits from among ANTH 352/RELIG 350, HST 335, POL S 343, POL S 433, GEOG 434, SISSE 499; 5 credits from an approved options list.

Graduate Program

School of International Studies

The Jackson School offers four regional programs that lead to a Master of Arts in International Studies. These include East Asian Studies (Japan, China, or Korea), Middle Eastern Studies, Russian and East European Studies, and South Asian Studies. Specific requirements vary from one program to another, but all stress interdisciplinary study within the context of the historical cultures, contemporary situations, and languages of the four world areas.

The Jackson School also offers a general program in International Studies that concentrates on the interaction of international economic, political, and cultural processes with states and societies around the world. In addition, the Jackson School offers a program in comparative religion for the Master of Arts in International Studies degree. Within this program it is possible to develop major concentrations in Buddhism, Hinduism, Islam, Christianity, or religion and culture. In addition to a required core of more general courses and the possibility of minor concentrations in Greco-Roman religions, Judaism, and East Asian indigenous traditions.

Admission Requirements: Applicants must meet the requirements of the Graduate School. An undergraduate grade-point average of 3.00 in the junior and senior

years is normally a prerequisite for admission. Submission of the scores of the aptitude section (verbal and quantitative) of the Graduate Record Examination is required.

Graduation Requirements: Students must meet Graduate School requirements for the Master of Arts in International Studies degree.

Financial Aid: Financial support is available in the form of Title VI Foreign Language and Area Studies Fellowships. Graduate students are also eligible for a limited number of teaching or research assistantships and readerships through discipline departments.

Comparative Religion

Michael A. Williams, Chairperson

The Comparative Religion program leading to the Master of Arts in International Studies offers an interdisciplinary curriculum in the study of religion, with several choices for areas of concentration. The required core seminars focus on methodology and comparative perspective in the study of religion. For the remaining course requirements, primary and secondary curricular concentrations are available in: Buddhism, Hinduism, Judaism, Islam, Christianity, and religion and culture, and further secondary curricular concentrations are available in Greco-Roman religions, and East Asian indigenous traditions. Most students should expect the program to require two years, due to language requirements. Students who enter the program having already completed more advanced language training may be able to complete the degree within one year.

Admission Requirements

See above under School of International Studies. The Comparative Religion faculty reserve the right to determine in each case whether an applicant has sufficient language preparation and background in the study of religion for acceptance into the program.

Graduation Requirements

All general Graduate School requirements; completion of the third year in a language of the primary sources in the chosen concentration, and elementary reading knowledge of a secondary foreign language necessary for reading published research (e.g., German, French); certification of basic competency in the history of world religions; final research paper; a comprehensive examination, including both written and oral segments; course work consisting of three core courses, a series of at least four to five courses in the chosen major, and two in the chosen minor.

Correspondence and Information

Graduate Program Coordinator
436 Thomson, DR-05

East Asian Studies

Hok-Lam Chan, Chairperson, Chinese Regional Studies

Kozo Yamamura, Chairperson, Japanese Regional Studies

James B. Palais, Chairperson, Korean Regional Studies

The East Asian Studies program is offered by faculty members from a number of disciplines cooperating within the Jackson School. Two-year regional programs in China, Japan, and Korea lead to the Master of Arts in International Studies degree. These programs are designed to prepare students with Bachelor of Arts degrees in a discipline for careers in government, journalism, business, or teaching, or as a transition to a doctoral program. Programs are structured to permit each student a maximum of individual faculty guidance plus group participation with other graduate students.

Admission Requirements

See above under School of International Studies.

Graduation Requirements

Chinese Regional: Chinese language training through the third year; 26 credits, of which 8 must be at the 500 level or above; SISEA 521-522; two seminar papers or a thesis; comprehensive oral examination.

Japanese Regional: Japanese language training through the third year (15 credits minimum training at this university); 26 credits, of which 8 must be at the 500 level or above; SISEA 555 and 559; essay of distinction; comprehensive oral examination.

Korean Regional: Korean language through the third year of instruction; through the second year of instruction if the student is admitted with no previous knowledge; 36 credits, of which 18 must be at the 500 level or above, including HSTAS 481, 482, and one graduate seminar in Korean Studies (either SISEA 585 or HSTAS 582-583-584); two seminar papers; comprehensive oral examination.

Financial Aid

Foreign Language and Area Studies Fellowships offering tuition and a stipend are available for all East Asian programs. Japan Endowment and Tamaki Fellowships for Japanese Studies and Gowen Fellowships, Hsiao Fellowships, Fritz Fellowships, and Jackson Fellowships for Chinese Studies also offer scholarship assistance. Research assistantships and teaching assistantships are occasionally available through individual members of the program faculty.

Research Facilities

Research and training facilities include the East Asia library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. The University is affiliated with the Inter-University Program for Chinese Language Studies in Taipei, language programs in the People's Republic of China sponsored by the Council on International Educational Exchange, and the Inter-University Center for Japanese Language Studies in Yokohama, which provide intensive language training for advanced undergraduate and graduate students. The school has ongoing projects on China, Japan, and Korea in which advanced graduate students and recognized scholars from the United States and foreign institutions regularly participate.

Correspondence and Information

Graduate Program Coordinator
111 Thomson, DR-05

International Studies

Joel S. Migdal, Chairperson and Graduate Program Coordinator

The Master of Arts in International Studies degree program provides students with broad knowledge and skills in analyzing international affairs. Designed for students entering a variety of professional fields, the program trains them in international and comparative studies in a multidisciplinary setting. Students are prepared to undertake sophisticated analyses of international affairs and typically will hold positions after graduation with the international divisions of federal and state governments, international divisions of banks, trading companies, policy study institutes, corporations with international operations, and international development and educational organizations. The program usually entails concurrent enrollment in a graduate professional degree program and adds approximately one year to the student's course of study (see admission requirements below).

Admission Requirements

In addition to meeting the requirements of the Jackson School of International Studies, candidates are preferred who demonstrate previous professional experience and education or who enroll concurrently in another graduate or professional degree program.

Arrangements have been made with the Graduate School of Business Administration, the Graduate School of Public Affairs, the Institute for Marine Studies, the College of Forest Resources, the School of Law, and School of Public Health and Community Medicine for such concurrent degrees. Applicants must have completed introductory-level micro- and macroeconomics courses and, preferably, an intermediate-level economics course. Prior study of a foreign language is highly recommended.

Graduation Requirements

36 credits, of which 18 must be at the 500 level or above. Students are required to take a series of core courses (SIS 500, 501, and 502—9 credits total), and complete two other fields (three classes of at least 3 credits each) from the following areas: a regional studies field, a functional field, or a special topics field. A practicum course in international studies (6 credits), which involves writing formats, document location and analysis, and methodologies in the study of international affairs, also is required, as is a graduate course in economic theory (3 credits). Students take an oral examination emphasizing the three fields of specialization; each student also must submit two seminar papers in program courses, which will be presented to the Master of Arts examining committee. All students must demonstrate a practical proficiency in a relevant modern language. Depending on the choice of language, this constitutes two to three years of college-level course work. Credit received from language courses is not counted toward satisfaction of degree requirements. Students in concurrent graduate degree programs also must meet Graduate School requirements for the second degree (please see Graduate School Memorandum No. 35, "Concurrent Degree Programs").

Correspondence and Information

Graduate Program Coordinator
111 Thomson, DR-05

Middle Eastern Studies

Jere L. Bacharach, Chairperson

The Middle East program is designed for students who wish to study the region within an interdisciplinary framework, focusing especially on the social, political, economic, and legal structure of the Middle East. A student is normally expected to complete the program in two years and one summer. Students interested in the M.A. in International Studies degree emphasizing literature and other humanistic aspects of the Middle East should inquire about the program in the Department of Near Eastern Languages and Civilization.

Admission Requirements

Admission requirements include a statement of purpose; a sample of written work; three letters of recommendation, of which at least two must attest to scholarly ability. Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had at least the equivalent of one year's study of the language in which they plan to concentrate. Students with no language training may wish to begin their language program in an intensive summer program.

Graduation Requirements

The Graduate School requires a minimum of 36 credits. The Middle Eastern Studies program requires at least two 5-credit or three 3-credit language courses beyond the second-year level (native as well as non-native speakers); N E 210 or HST 261 as a 400-level reading course if neither was taken while an undergraduate; three courses on Middle East, with at least two of the following disciplines represented—history, political science, international studies; N E 430/RELIG 430, N E 432/LAW B 543 or an advanced course related to modern literature, culture, or religious developments; one approved SIS-prefix course; two courses in

one social science discipline or two courses in a professional school other than courses taken for preceding requirements; SISME 530, 531, and 532 or a program-sponsored seminar; 1 credit per quarter of N E 600. *Thesis option:* 9 credits of SISME 700. *Examination option:* submission of two seminar papers and a four-hour examination to be set by the supervisory committee.

Russian and East European Studies

Daniel Chivot, Chairperson and Graduate Program Coordinator

The Russian and East European Studies programs may be completed in two years. Designed primarily for students with B.A. degrees in a discipline, the programs offer a background for professional pursuits in government, journalism, business, or teaching, or for those who plan to take advanced graduate study leading to the Ph.D. degree in a discipline. The program includes language training, a concentration of study in a chosen discipline, and a combination of courses in other disciplines that focus on the region.

Admission Requirements

See above under School of International Studies. Also *Russian Studies*—six quarters in Russian language (the equivalent of 30 credits); *East European Studies*—six quarters (equivalent of 30 credits) in one foreign language, either an East European language or one appropriate to the student's area interest (Russian, German, Ottoman Turkish, or French).

Graduation Requirements

39 credits in interdisciplinary course work (other than language) as follows: 15 or 20 credits in area-oriented courses in the discipline(s) or topic of concentration (at least 9 credits at the 500 level or above); 10 or 15 credits in at least two additional disciplines; 9 credits of thesis. Written examination; oral interdisciplinary examination on the area of specialization; thesis. *Russian Regional Option.* Instruction in Russian through the fourth year (30 credits required for admission). *East European Option.*—The equivalent of two years of UW language courses (30 credits) in either of the following ways: (a) If the language requirement for admission was satisfied by work in a major European language, the additional language study is to be in an East European (not Russian) language. (b) If the language requirement for admission was satisfied by work in an East European language, the additional language study is to consist either of two additional years of that language (if available) or of two years in a language relevant to the student's area of interest, but preferably another East European language.

Research Facilities

The University of Washington is one of the major centers for research in Russia and eastern Europe. In addition to extensive holdings in Russian language materials, the library has works in all major languages of eastern Europe.

South Asian Studies

Richard G. Salomon, Chairperson and Graduate Program Coordinator

The South Asian Studies program has been designed for (1) students who have completed the Bachelor of Arts degree and are qualified to pursue graduate study, whose career objectives involve teaching and re-

search, who plan to specialize in a traditional discipline but whose geographical area of interest lies within South Asia (i.e., India, Pakistan, Sri Lanka (Ceylon), Bangladesh, Nepal, and Tibet); (2) students planning to enter certain professional training programs at the graduate level (e.g., education, business administration, journalism, law, or public affairs) and whose career objectives are oriented toward South Asia; (3) students planning a career in government service (e.g., the diplomatic corps) and who wish to acquire a special understanding of the South Asia area. Through a cooperative program with the University of British Columbia, students may participate in South Asia courses offered by the UBC graduate faculty.

Admission Requirements

See above under School of International Studies.

Graduation Requirements

Training in a South Asia language through the third year. In addition, 45 credits of other academic instruction: SISSA 510 and 511 (5 credits each); 18 credits directly related to the study of South Asia chosen in consultation with adviser; electives: 10 credits. Up to 7 of the language credits at the 400 level may be applied toward fulfillment of the M.A. degree requirements. Two seminar papers in lieu of a master's thesis. Comprehensive oral examination.

Research Facilities

The University of Washington library holds an extensive collection of books and serials relating to South Asia. The library is a participant in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka (Ceylon). The library is also a member of the South Asian Microfilm Program of the Center for Research Libraries, which provides access to a large collection of microfilm newspapers, journals, and documents on South Asia.

Jack L. Dull

Professors

Alden, Dauril,* 1959, (History),† M.A., 1952, Ph.D., 1959, California (Berkeley); Latin American history, comparative colonial history.
Augerot, James E.* 1969, (Linguistics), (Slavic Languages and Literature),† M.A., 1959, New Mexico Highland; Ph.D., 1968, Washington; Slavic linguistics, Romanian, Bulgarian.
Beckmann, George M.,* 1969, Ph.D., 1952, Stanford; modern East Asian history.
Boba, Imre,* 1962, (History),† Ph.D., 1962, Washington; Russian and East European history.
Brass, Paul R.,* 1965, (Political Science),† M.A., 1959, Ph.D., 1964, Chicago; South Asia.
Butow, Robert J. C.,* 1960, (History),† A.M., 1948, Ph.D., 1953, Stanford; East Asian diplomatic history.
Chan, Hok-lam,* 1972, (Asian Languages and Literature, History), M.A., 1963, Hong Kong; M.A., 1965, Ph.D., 1967, Princeton; late imperial Chinese history.
Chirot, Daniel,* 1974, (Sociology),† Ph.D., 1973, Columbia; modernization, political sociology, peasant societies.
Conlon, Frank F.,* 1968, (History),† M.A., 1963, Ph.D., 1969, Minnesota; South Asia.
Ellison, Herbert J.,* 1968, (History),† M.A., 1952, Washington; Ph.D., 1955, London; modern Russian history.

Haney, Jack A. V.,* 1967, (Slavic Languages and Literature),† M.A., 1971, D.Phil., 1971, Oxford (England); medieval Russian literature, Slavic folklore.

Hanley, Susan B.,* 1972, (History), M.A., 1964, Ph.D., 1971, Yale; premodern Japanese history.

Harrell, C. Stevan,* 1974, (Anthropology),† M.A., 1971, Ph.D., 1974, Stanford; Chinese anthropology and society.

Hellmann, Donald C.,* 1967, (Political Science),† M.A., 1960, Ph.D., 1964, California (Berkeley); Japanese politics and international relations.

Jackson, W. A. Douglas,* 1955, (Environmental Studies), (Geography),† M.A., 1949, Toronto; Ph.D., 1953, Maryland; Russian geography.

Kapetanac, Davor,* 1972, (Slavic Languages and Literature),† M.A., 1954, D.Sc., 1972, Zagreb (Yugoslavia); Serbo-Croatian language, Yugoslavian literature.

Lardy, Nicholas R.,* 1983, (Economics), Ph.D., 1975, Michigan; economics, Chinese economy.

Legters, Lyman H.,* 1966, (Education), M.A., 1956, Boston; Ph.D., 1958, Free University (Berlin); Russian and East European studies.

Mah, Feng-hwa,* 1961, (Emeritus), (Economics),† A.M., 1956, Ph.D., 1959, Michigan; Chinese economy and foreign trade.

Micklesen, Lew R.,* 1966, (Linguistics), (Slavic Languages and Literature),† Ph.D., 1951, Harvard; Slavic linguistics.

Migdal, Joel S.,* 1980, (Political Science), M.A., 1968, Ph.D., 1972, Harvard; political science, international political economy.

Palais, James B.,* 1968, (History),† M.A., 1960, Yale; Ph.D., 1968, Harvard; modern Korean history.

Perry, Elizabeth J.,* 1978, (Political Science), M.A., 1971, Washington; Ph.D., 1978, Michigan; peasants and politics of China.

Potter, Karl H.,* 1971, (Asian Languages and Literature), (Philosophy),† M.A., 1952, Ph.D., 1955, Harvard; South Asia.

Pyle, Kenneth B.,* 1965, (History),† Ph.D., 1965, Johns Hopkins; modern Japanese history.

Sugar, Peter,* 1959, (Emeritus), M.A., 1956, Ph.D., 1959, Princeton; political and economic history of eastern Europe and Near East since the eighteenth century.

Taylor, George E., 1939, (Emeritus), M.A., 1928, D.Litt., 1957, Birmingham (England); East Asian studies.

Townsend, James R.,* 1968, (Political Science),† M.A., 1957, Ph.D., 1965, California (Berkeley); Chinese government and politics.

Treadgold, Donald W.,* 1949, (History),† M.A., 1947, Harvard; D.Phil., 1950, Oxford (England); modern Russian and Chinese history.

Webb, Eugene,* 1966, (English), (Comparative Literature),† M.A., 1962, Ph.D., 1965, Columbia; comparative literature, comparative religion.

Wittfogel, Karl A., 1947, (Emeritus), Ph.D., 1928, Frankfurt (Germany); Chinese history.

Yamamura, Koza,* 1970, (Economics, Marketing and International Business), M.A., 1962, Ph.D., 1964, Northwestern; economic development and economic history of Japan, comparative economic history.

Associate Professors

Coats, Herbert S.,* 1968, (Linguistics), (Slavic Languages and Literature),† M.A., 1964, Fordham; Ph.D., 1970, Illinois; Russian phonology and syntax, Slavic accentuation.

Dull, Jack L.,* 1963, (History),† M.A., 1960, Ph.D., 1966, Washington; early imperial Chinese history.

Guy, R. Kent,* 1980, (History),† M.A., 1974, Ph.D., 1981, Harvard; modern Chinese history.

Jaffee, Martin S.,* 1987, ‡(Near Eastern Languages and Civilization), M.A., 1974, Florida State; Ph.D., 1980, Brown; Judaism in late antiquity.

Jones, Christopher R.,* 1984, M.A., 1969, Ph.D., 1975, Harvard; political science, Soviet foreign policy.

Kakiuchi, George H.,* 1957, (Geography),† M.A., 1953, Ph.D., 1957, Michigan; geography of Japan.

Kieval, Hillel J.,* 1980, (History),† A.M., 1975, Ph.D., 1981, Harvard; modern Jewish history, Central and East European history.

Konick, Willis A.,* 1961, (Comparative Literature, Slavic Languages and Literature),† M.A., 1954, Ph.D., 1964, Washington; modern Russian literature and language.

Kramer, Karl D.,* 1971, (Comparative Literature, Slavic Languages and Literature),† M.A., 1957, Ph.D., 1964, Washington; late nineteenth-century Russian prose.

Pozmanski, Kazimierz Z.,* 1987, ‡(Economics), M.A., 1969, Ph.D., 1974, Warsaw; international trade, comparative economic systems, technological change.

Ramet, Pedro,* 1983, (History), M.A., 1974, Arkansas; Ph.D., 1981, California (Los Angeles); political science, Soviet and East European studies.

Swayze, E. Harold,* 1963, (Slavic Languages and Literature),† M.A., 1954, Ph.D., 1959, Harvard; Soviet literature.

Waugh, Daniel C.,* 1972, (History),† A.M., 1965, Ph.D., 1972, Harvard; medieval Russian history.

West, James D.,* 1972, (Slavic Languages and Literature),† M.A., 1969, Ph.D., 1970, Cambridge; Russian and Soviet poetry and prose, Russian translation.

Williams, Michael A.,* 1976, M.A., 1970, Miami; Ph.D., 1977, Harvard; early Christianity and religions of antiquity.

Assistant Professors

Anchordoguy, Marie,* 1989, M.B.A., 1982, Ph.D., 1986, California (Berkeley); Japanese politics and economic policy.

Glassman, Debra,* 1989, M.S., 1979, Ph.D., 1980, Wisconsin; international economics, econometrics.

Kasaba, Resat,* 1985, (Sociology), M.A., 1979, Ph.D., 1985, State University of New York (Binghamton); political economy of the world system and the Middle East.

Lavelly, William R.,* 1985, (Sociology),† M.A., 1977, California (Berkeley); Ph.D., 1982, Michigan; demography, family, Chinese society.

Sorensen, Clark,* 1989, (Anthropology), M.A., 1974, Ph.D., 1981, Washington; Korea, economic anthropology, peasants.

Lecturer

Lerner, Lawrence W., 1981, M.A., 1969, Southern California; Ph.D., 1976, Washington; Russian history.

Course Descriptions

Courses for Undergraduates

General

SIS 200 States and Capitalism: The Origins of the Modern Global System (5) A Kasaba, Migdal Origins of the modern state system and of the world market in Europe. Interacting forces of politics and economics around the globe from the sixteenth century until World War II.

SIS 201 Introduction to International Political Economy (5) W Glassman, Migdal International political economy through the examination of major facets of the post-World War II era. Analyzes the new postwar economic order and its crises in the 1970s and 1980s, North-South relations, the postwar political order and its East-West rivalry.

SIS 202 Cultural Interactions in an Interdependent World (5) Sp *Guy, Harrell, Perry* Cultural interaction among societies and civilizations, particularly Western versus non-Western. Intellectual, cultural, social, and artistic aspects; historical factors.

SIS 221 The Problem of Nuclear Arms I (3) Jones Properties and effects of nuclear weapons; delivery and command systems, interplay between technical and political factors in issues involving nuclear weapons systems, arms control, and proposals to reduce risk of nuclear war. Joint with ENV S 221.

SIS 222 The Problem of Nuclear Arms II (3) Jones Military-political nuclear weapons policies of U.S.A., USSR, France, Britain, China, India, and potential nuclear powers. Bilateral and multilateral arms control agreements and ongoing negotiations. Strategic implications of ballistic missile defense. Joint with ENV S 222. Recommended: 221.

SIS 301 War (5) Origins and conduct of war; readings from anthropology, political science, economics, and history, as well as novels and some recent works on the arms-control controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Joint with SOC 301.

SIS 302 Intercultural Relations (5) Webb Perspectives on foreign cultures through literary example. Interdisciplinary approaches to the study of culture as such and problems of intercultural relations. Prerequisite: 202 or ANTH 202.

SIS 330 Political Economy of Development (5) Deolalikar, Poznanski Growth, income distribution, and economic development in less-developed countries today. Policies concerning trade, industrialization, the agricultural sector, human resources, and financing of development. Prerequisites: ECON 200, 201.

SIS 332 Political Economy of International Trade and Finance (5) Poznanski Theoretical and historical analysis to explore the causes and effects of the rise and decline of four major international trade and monetary regimes. Foundations and emerging features of the new international trade and monetary regime and its implications for the world economy.

SIS 335 Geography of the Developing World (5) Haney Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization, and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Joint with GEOG 335.

SIS 340 Comparative Communism (5) Ramet Nature of politics under communism, focusing on Soviet Union, China, Yugoslavia, and one other communist country. Relates communism to the broader subject of revolutionary transformation. Prerequisite: one previous course in international studies, political science, or history.

SIS 348 Alternative Routes to Modernity (5) Guy, Waugh Routes to modernity followed by non-Western societies between 1600 and 1900. Historical experiences of non-Western societies seen in the context of European history and of development theory. Emphasizes primary sources and techniques for posing theoretical questions of historical data. Joint with HSTAS 348.

SIS 355 Social Change in Latin America (5) Van den Bergh Problems of development and dependency in Latin America. Relations of power and production between social classes and ethnic groups, with special emphasis on Mesoamerica (Mexico, Guatemala) and the Andes (Peru, Bolivia). Joint with SOC 355. Prerequisite: introductory course in sociology, anthropology, political science, economics, or international studies.

SIS 375 Geopolitics (5) Jackson Spatial aspects of international politics, with attention to perceptions of national space, the way states organize territory, and the strategic use of geography to advance state goals. Joint with GEOG 375. Prerequisite: GEOG 100 or an introductory course in international studies.

SIS 380 Political Economy of Industrialized Nations (5) Theoretical bases of various political-economic systems of industrialized nations. Several major issues these political economies currently face; usefulness and limits of economic analyses within broader perspective of political economy. Prerequisites: ECON 200, 201.

SIS 397 Junior Honors Seminar (5) Sp Intensive consideration of major works in international studies, with emphasis on the development of critical reading and writing skills. Required of honors candidates. Prerequisite: admission to honors program in international studies.

SIS 401 International Political Economy (5) A Glassman, Poznanski Establishment, maintenance, and decay of the post-1945 international economic order. Political economy of international trade, monetary relations, inflation, and North-South relations. Prerequisites: 330 or 332, or ECON 370 or 391, or both ECON 300 and 301.

SIS 405 Political Economy of Religious Institutions (5) Dull Comparative study of Buddhist, Taoist, Christian, and Islamic religious institutions as political and economic phenomena. Impact of wealth and power on religious institutions or religious ideas. Temporal coverage from the formative period to the present. Prerequisite: one course on China, Japan, Middle East, or Europe.

SIS 421 National Security and International Affairs (5) Jones Major military aspects of contemporary international politics. Uses and limitations of military capabilities for sustaining a stable international order and national security. Processes by which states detect and assess threats to their security; practice of deterrence; transfer of arms among states; pursuit of arms control. Recommended: course work in international relations.

SIS 422 The United States in the Contemporary International System (5) Hellmann United States in the world: ways in which international circumstances shape the political-strategic, economic, and cultural dimensions of America's policy. Case studies from post-1945 period. Recommended: background course work in international relations or American foreign policy.

SIS 426 World Politics (5) Modelski Nation-state system and its alternatives; world distributions of preferences and power; structures of international authority; historical world societies and their politics. Joint with POL S 426.

SIS 440 History of Communism (5) Ellison, Ramet Communism from its origins in Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist status. Joint with HSTEU 440. Prerequisites: two courses in modern European history or politics.

SIS 444 Peasants in Politics (5) Perry Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly independent world. Rebellion and revolution, impact of the international market, agricultural development. Joint with POL S 446.

SIS 448 Franklin D. Roosevelt and His World, 1882-1945 (5) Butow Life and times of the thirty-second President of the United States, with emphasis on American foreign relations—especially the role he played in the emergence of the United States as a world power. Joint with HST 448.

SIS 450 Political Economy of Women and Family in the Third World (5) Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Joint with SOC 450.

SIS 455 Industry and the State (5) Builds on states and markets approach of 200 and 201 through specific examination of effects of industry and industrial structure on political outcomes and roles of state. Emphasis on late-developing and newly developing economies. Prerequisites: 200, 201.

SIS 456 State-Society Relations in Third World Countries (5) Kasaba, Migdal, Townsend Relationships among political, social, and economic changes in Asia, Africa, and Latin America. Problems of economic and political development, revolution and reform, state-society relations; imperialism and dependency. Joint with POL S 450.

SIS 465 Deeply Divided Societies (5) Migdal Ethnic conflict seen from two perspectives: 1. the study of theoretical approaches as a means of understanding deeply divided societies; 2. a focus on one or more specific conflicts (e.g., Arabs and Jews). Conflicts studied vary depending on instructor. Prerequisite: 201 or POL S 204.

SIS 467 Nations and States in the Modern World (5) Treadgold Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by the new nationalism and its spread into East Central Europe, Russia, Ibero-America, Asia, and Africa. Joint with HST 467.

SIS 475 Geography of International Relations (5) Jackson Selected problems of spatial patterns and dynamic relationships. Geographical problems of regional, national, and international organization. Joint with GEOG 475. Prerequisite: GEOG 375 or permission of instructor.

SIS 480 The Catholic Church in World Politics (5) Ramet Acquaints students with the self-identity, theology, ecclesiology, and political role of the Catholic Church in the contemporary era, with emphasis on its role in the United States, the U.S.S.R., China, Eastern Europe, and Latin America. Prerequisites: two courses in either world politics or comparative religion.

SIS 490 Special Topics (1-5, max. 15) AWSp Content varies from quarter to quarter. Prerequisite: permission of instructor.

SIS 491- Senior Honors Seminar (5-) A Study of issues related to students' thesis topics. Develops thesis-writing skills. Open only to international studies honors students.

SIS -492 Senior Honors Seminar (-5) W Students write a senior thesis working with their individual writing advisers.

SIS 495 Task Force (5) W Small-group seminars address current problems in international affairs, each focusing on one specific policy question and producing a joint task force report. Restricted to senior majors in international studies. Prerequisites: 200, 201, 202, 401.

SIS 498 Readings in International Studies (5) Reading and discussion of selected works of major importance in interdisciplinary international studies. Prerequisites: 200, 201, 202 and acceptance as a major in international studies.

SIS 499 Undergraduate Research (3-5, max. 15) AWSp Prerequisite: permission of instructor.

African Studies

SISAF 444 African Studies Seminar (3, max. 9) Sp Interdisciplinary seminar focusing upon one particular aspect of the African continent. Emphasis may be hu-

manistic, social scientific, or historical. African Studies faculty and visiting scholars lecture on areas of their own expertise.

SISAF 490 Special Topics (1-5, max. 15) AWSp Content varies. Prerequisites: three courses in the area.

SISAF 499 Undergraduate Research (3-5, max. 15) AWSp Beaumann, Eastman, Ottenberg, Van den Bergh, Winans Prerequisite: permission of instructor.

Canadian Studies

SISCA 308 Canada: A Geographic Interpretation (5) Jackson Study of Canada; emergence of political-geographic and cultural entity and identity in North America that presents significant contrasts to the United States. Components that have helped shape Canadian earth-space and landscape. Joint with GEOG 308.

SISCA 341 Government and Politics of Canada (5) Goddard Critical analysis of parliamentary institutions, political parties, and the federal system in Canada. Joint with POL S 341.

SISCA 356 Canadian Society (5) Jackson Origins to the present in its North American setting; political development, cultural evolution, and emergence of multinationalism; economic base; arts and literature; problems of the environment; Canadian foreign relations. (Formerly SIS 356.)

SISCA 490 Special Topics (1-5, max. 15) Jackson Content varies.

SISCA 498 Seminar: Canadian Problems (5) Jackson Major issues pertaining to Canadian society, government, and economic development.

SISCA 499 Undergraduate Research (3-5, max. 15) Prerequisite: permission of instructor.

Chinese Regional Studies

SISEA 101 Contemporary China (5) Survey of the land and peoples, history, politics and foreign relations, economy, society, and culture of the People's Republic of China. Particular emphasis on current issues and policies. Designed for students with little or no background on China.

SISEA 234 Man, Morality, and the State in Chinese History (5) Concepts of Chinese civilization in its various stages from Confucius's time to the present. Morally based political philosophy of Confucianism with other conflicting or complementary views of man and state (e.g., Taoism, Chinese Marxism).

SISEA 240 Chinese Civilization (5) Sp Dull China's material civilization—including fine arts, literature, religion, and thought—in relation to general development of Chinese society.

SISEA 330 The United States in Eastern Asia, 1784-1945 (5) A Butow The United States in eastern Asia from the arrival of the first American vessel at Canton to the end of the war in the Pacific, with emphasis on the Far Eastern policy of the United States during the first four decades of the twentieth century. Joint with HST 330.

SISEA 419 Asian Marxist Thought (3) Theory and practice of Marxist-Leninism in Asia from 1920 to present. Emphasizes the relation of Asian Marxist thought to the specific domestic and international conditions of the time and to the classical ideas of Marx and Lenin. Prerequisite: one course from either the nineteenth- or twentieth-century Marxism series or a course in modern Asian politics or history.

SISEA 424 Perspectives on East Asia for Teachers (3, max. 6) Substantive concepts, resources, and materials employed in teaching about East Asia. Requirements may vary in relation to the background of participants.

SISEA 443 Traditional Chinese Society (5) A Harrell Late traditional (Ming-Qing) China as a social system. Systematic analysis of temporal and spatial variation in family, kinship, local organization, social class, government, and antigovernment activity. Joint with ANTH 403. Prerequisite: ANTH 202, HSTAS 454, graduate standing or permission of instructor.

SISEA 444 Contemporary Chinese Society (5) W Harrell Society in the People's Republic of China as a product of traditional Chinese society and the changes wrought upon it by the impact of the West and by the revolutionary policies and practices of the Chinese Communist Party. Joint with ANTH 444. Prerequisite: 443 or ANTH 403 or permission of instructor.

SISEA 445 Religion in China (5) Sp Harrell Religion in Chinese society, doctrines, practices, and social consequences of the eclectic folk religion, the elite Confucian, Taoist, and Buddhist traditions, syncretistic sects, and imported Christianity. Joint with ANTH 447. Prerequisite: one course in Chinese society, politics, or history, or permission of instructor.

SISEA 446 Political Development in East Asia (5) Perry Comparative examination of political development in Japan and China from the nineteenth century to the present. Emphasis on theories of development and their applicability to the East Asian context. Prerequisite: one course in Chinese or Japanese history or in political development, or permission of instructor.

SISEA 455 Undergraduate Colloquium on China (5) Topics and readings vary but are usually drawn from interdisciplinary studies of modern China. Required for senior majors in Chinese regional studies and open to other students with comparable backgrounds. (Nonmajors should consult the instructor before enrolling.)

SISEA 484 Contemporary Society in the People's Republic of China (5) Separate development of rural and urban social institutions in the People's Republic of China since 1949 from a sociological perspective. Family and marriage, social control, educational institutions. Dilemmas of contemporary China and reasons for institutional change. Joint with SOC 484.

SISEA 468 China's Economic Reforms: Integration into World Economy (5) Lardy A systematic survey of China's economic reforms since 1978, including China's increasing integration into world economy. Joint with ECON 468. Prerequisite: ECON 493 or permission of instructor.

SISEA 490 Special Topics (1-5, max. 15) AWSp Course content varies. Prerequisites: three courses in the area.

SISEA 499 Undergraduate Research (3-5, max. 15)

Comparative Religion

RELIG 201 Introduction to World Religions: Western Traditions (5) Jaffee, Webb, Williams History of religions, concentrating on religious traditions that have developed west of the Indus. Primary attention to the Semitic religions (Judaism, Christianity, Islam) and to their ancient world background with emphasis on basic conceptual and symbolic structures.

RELIG 202 Introduction to World Religions: Eastern Traditions (5) Conlon, Cox History of religions, concentrating on religions that have developed in South Asia and East Asia. Primary attention to Hinduism and Buddhism; other important Asian religions are discussed in relation to them, with emphasis on basic conceptual and symbolic structures.

RELIG 210 Introduction to Judaism (5) Jaffee, Kieval Basic ideas and motifs of Judaism: God, Covenant, Law, Life Cycle (birth, marriage, family life, sexual laws, role of women, death); Cycle of the Year (Sabbath, holidays, festivals); Holy Land, prayer, Messianism.

RELIG 211 Islam (5) Zysow Religious and cultural milieu of Arabia before Muhammad; Muhammad's call and struggles to establish the new faith; Qur'anic content and style; Western and Muslim scholarship and the Qur'an; place of traditions in the Islamic edifice; Muslim political and religious thought; sources of Muslim religious law; and modern Muslim movements. In English. Joint with N E 211. (Formerly 430.)

RELIG 212 Qur'an in English (3) Zysow Survey of the contents of the sacred scripture of Islam, regarded by Muslims throughout the world as the literal word of God. Treats Qur'anic narrative, law, theology, and ethics. Some attention also given to the Qur'an as an historical document and to Qur'anic scholarship by non-Muslims. Joint with N E 212.

RELIG 220 Introduction to the New Testament (5) Williams Modern scholarly methods of research and analysis in dealing with New Testament books and their interpretation. Genres of various books (gospel, epistle, sacred history, apocalypse); problems of the relationships among author, material, and intended audience; relationships between theme and image.

RELIG 240 Introduction to the Bible (Old Testament) (5) Jaffee Introduction to the Hebrew Bible in English. Results of modern critical studies on the Bible and the ancient Near East. Concentrates on the meaning of Biblical records in their own time and environment. Joint with N E 240.

RELIG 301 Religious Thought Since the Middle Ages (5) Webb Development of religious thought in the West from the Middle Ages to the twentieth century. History of focal ideas: God, man, knowledge, and authority during this period and the relation of changes in these ideas to the ways in which basic issues in religious thought have been conceived. Recommended: 201.

RELIG 310 Scripture in Judaism (5) Jaffee Explores the phenomenon of religious interpretation of sacred books by attending to the destiny of the Bible as read within Judaism. Begins with the canonization of the biblical text itself and continues into the rationalist and mystical interpretive innovations of the Middle Ages. Recommended: 201, 210 and/or SISJE 250.

RELIG 313 Jewish Mystical Traditions: Kabbalah and Its Influence (5) Jaffee Jewish esoteric thought from Rabbi Moses Cordovero. Emergence of Safed as a center of this thought. The thought of Isaac Luria and its immense influence in Jewish history through other movements—specifically the mystical messiah, Sabbetai Sevi, and the rise of Hasidism. Recommended: 201 or 210.

RELIG 320 The World of the Early Church (5) Williams Early Christian church within the context of the Greco-Roman sociopolitical, philosophical, and religious environment. Covers the period from about A.D. 100 to 300. Christian thinkers and documents studied include both the classical "orthodox" and the "heretical." Recommended: 201 or 220, or HST 307.

RELIG 321 The Age of St. Augustine (5) Williams Christian church in the fourth and fifth centuries as a major institution in the Roman Empire. Great figures of patristic theology, such as Athanasius, Gregory Nazianzus, Gregory of Nyssa, and Augustine. Recommended: 201 or 320, or HST 307.

RELIG 322 The Gospels and Jesus of Nazareth (5) Williams Gospel material from early Christianity, including both canonical and noncanonical gospels. Relation of gospels to analogous literature from the Hellenistic-Roman period. Recommended: 220 or ENGL 309.

RELIG 327 Eastern Christian Traditions (5) Ramet, Webb Eastern Christian traditions, with principal focus on Eastern Orthodox tradition in Byzantium and Russia from time of the Council of Nicea to the twentieth century. Considers significant differences be-

tween eastern and western Christianity and their doctrinal and cultural origins; explores distinctive features of eastern tradition. Prerequisite: 201 or HST 307.

RELIG 350 Buddhism and Society: The Theravada Buddhist Tradition in South and Southeast Asia (5) *Keyes* Religious tradition of Theravada Buddhism (as practiced in Sri Lanka, Burma, Thailand, Laos, and Cambodia). Variations in ethical orientations developed through Theravada Buddhist ideas. Joint with ANTH 352. Recommended: 202 or knowledge of one Eastern religious tradition.

RELIG 352 Hinduism (5) *Entwistle* Varieties of Hindu religious practice; the diverse patterns of religious thought and action among contemporary Hindus. Includes ritual behavior, village Hinduism, tantrism, sadhus, yoga, sects, the major gods and their mythologies, religious art, and the adjustments of Hinduism to modernity. Recommended: 202 or other study of South Asian culture.

RELIG 354 Buddhism (3) *Cox* Buddhism as a religious way and as a way of thinking; the forms of Buddhism known in South Asia (India, Sri Lanka, etc.) and those introduced from there to Tibet and other parts of Central Asia. Includes the "Three Jewels" (i.e., the Buddha or Awakened Person, the Teaching [Dharma], and Community [Sangha]) around which Buddhism is traditionally articulated. Recommended: 202 or other study of Asian culture.

RELIG 380 The Nature of Religion and Its Study (5) *Jaffee, Webb* Study of religion as a general human phenomenon. Manner in which different methods of inquiry (phenomenology, anthropology, sociology, psychology, literary criticism, archaeology, philosophy, theology, etc.) illuminate different aspects of religion and help to shape our conceptions of its nature. Recommended: 201 or 202 or other course in the history of religious traditions.

RELIG 410 Law in Jewish Experience (5) *Jaffee* Place and function of law in Jewish social and personal experience. Discusses the various ideological justifications of the law in biblical and rabbinic literature, examines representative texts, and explores theological reflection on law by medieval and modern thinkers. Prerequisite: 210; recommended: 310 or 313.

RELIG 415 Modern Jewish Thought (5) *Jaffee, Kieval* Major trends in Jewish religious thought since the European Enlightenment, focusing on encounters between Judaism and the modern world. Includes Hasidism; varieties of religious reform and accommodation; Zionism; socialism; the philosophy of Rosenzweig, Buber, and Kaplan; and theological responses to the Holocaust. Prerequisite: 210 or HST/SISJE 250 or HSTEU/SISJE 469. (Formerly 315.)

RELIG 426 Gnosticism and Early Christianity (5) *W or Sp Williams* Impact of Gnosticism on the development of Christianity and several other religious groups of that period. Readings dating from the first through the third centuries A.D. Recommended: 201 or 220, or HST 307.

RELIG 428 Modern Christian Theology (5) *Webb* Modern Protestant and Catholic thought since the nineteenth century: Kierkegaard, Barth, Bultmann, Rahner, Lonergan, and other major figures. Prerequisite: 301.

RELIG 442 Art, Religion, and Politics in the Early Christian Period, 300-700 A.D. (3) *Kartsonis* Evolution of the art of the early Christian period (300-700 A.D.) in the context of contemporary religious, political, and cultural developments. Joint with ART H 452.

RELIG 443 Art, Religion, and Politics in Byzantium, 700-1453 A.D. (3) *Kartsonis* Evolution of the art of Byzantium (700-1453 A.D.) in the context of contemporary religious, political, and cultural developments. Joint with ART H 453.

RELIG 445 Greek and Roman Religion (3) *Harmon, Langdon* Religion in social life of Greeks and Romans; emphasis on their public rituals and festivals. Priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Joint with CLAS 445. Prerequisite: one course in ancient history, classics, or religious studies; 201 preferred.

RELIG 449 Religious Movements: The Sociology of Cults and Sects (3) *Stark* Understanding religion, what it is and what it does. Examines the formation of new religious movements, cults, and sects and the conditions under which they succeed or fail. Joint with SOC 445. Prerequisite: SOC 110. (Formerly 349.)

RELIG 452 Topics in the Buddhism of Tibet (3) *van der Kuip* Topics in the development of Buddhism of Tibet. Includes the relationship between reasoning and religious thought; the concept of a person; the formation of the different schools of Tibetan Buddhism; the notion of lineage; the master-disciple relationship in the tantric tradition. Prerequisite: 354 or permission of instructor.

RELIG 490 Special Topics (1-5, max. 15) Topics vary with each offering. Prerequisites: 380 and permission of instructor.

RELIG 491 Seminar: Topics and Issues in Judaism (5) *Jaffee* Topics vary. Recommended: 210.

RELIG 492 Seminar: Topics in Early Christianity (5) *Williams* Topics vary. Recommended: one course in early Christian history or literature.

RELIG 499 Undergraduate Research (1-5, max. 15) Primarily for comparative religion majors and majors in the School of International Studies. Prerequisite: permission of instructor.

Japanese Regional Studies

SISEA 241 Japanese Civilization (5) *Hanley* Japan's civilization, including fine arts, literature, economic institutions, legal system, material culture, social organization, religions, and government, in relation to the development of Japan as a society and nation.

SISEA 440 The Emergence of Postwar Japan (5) *A Pyle, Yamamura* The making of modern Japan; World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power.

SISEA 441 Economic and Social History of Japan to 1900 (5) *A Hanley, Yamamura* Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and disintegration of the *shoen* system, the rise of commerce, the development of the monetary system, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. (Taught with 541.)

SISEA 442 Political Economy of Postwar Japan (5) Political and economic problems of Japan since 1945. Utility of competing theoretical approaches to analysis of government and economy of Japan. Policy-making processes and effects of policies adopted. Some knowledge of postwar Japan desirable. Recommended: 440.

SISEA 448 Political Development in East Asia (5) *Perry* Comparative examination of political development in Japan and China from the nineteenth century to the present. Theories of development and their applicability to the East Asian context. Prerequisite: one course in Chinese or Japanese history or in political development, or permission of instructor.

SISEA 451 Undergraduate Seminar on Japan (5) *Anchoroguy, Yamamura* Senior seminar. Discussion of advanced readings; writing of senior thesis. Prerequisite: fulfillment of most of program course requirements.

SISEA 473 Institutions in Contemporary Japan (5) *Anchoroguy* Introduction to institutions, policies, and trends in contemporary Japan, with background on origins of modern Japanese state and impact of occupation. Examines policy making process and various interest groups. Prerequisite: 241 or equivalent.

SISEA 475 Japanese Society (5) *Hanley* Discusses rapidly changing Japanese society and history of its unique aspects. Readings and lectures in sociology, anthropology, economics, and politics; emphasis on Japanese search for cultural identity and prevalent interpretations of Japanese society and behavior. Prerequisite: 241, or background in Japan studies.

SISEA 476 Development of Modern Japanese Culture (5) *Beckmann* Interdisciplinary study of Japanese culture from 1600 to the present. Focuses on development of thought, law, religion, education, literature, and art with emphasis on the cultural synthesis that emerged through interaction of Westernization and tradition. Prerequisite: one course on Japan in Arts and Sciences.

SISEA 478, 479 Readings in the Social Sciences in Japanese (3-5, 3-5) *Yamamura* Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313 or equivalent, and permission of instructor.

SISEA 490 Special Topics (1-5, max. 15) *AWSp* Topics vary.

SISEA 499 Undergraduate Research (3-5, max. 15) *AWSp*

Jewish Studies

(See also Comparative Religion and Near Eastern Languages and Civilization.)

SISJE 250 The Jews in Western Civilization (5) *Kieval* Introduction to the history of the Jews from late antiquity to the present. Examines the relationship between Jewish communities and the larger societies in which they are found. Joint with HST 250.

SISJE 369 The Destruction of European Jewry, 1933-45 (3 or 5) *Kieval* History of anti-Semitism; dimensions of the Holocaust; the Holocaust organization and the victims' responses; reaction of world to events in Europe, allied policies, refugee policy, and American actions. Legal, historical, and sociological questions raised by these events. Joint with HSTEU 369.

SISJE 464 The Jews in Spanish History (3 or 5) *Ullman* Sephardic Jews in Spanish politics, economy, and culture, emphasizing the medieval Golden Age and the Inquisition. Joint with HSTEU 464.

SISJE 465 The Jews of Eastern Europe (5) *Kieval* Jewish society in Poland, Russia, the Habsburg Lands, and Romania from the late Middle Ages to the Holocaust. Joint with HSTEU 465. Recommended: introductory course in European or Jewish history.

SISJE 467 Medieval Jewish History (5) *Stacey* Social and intellectual history of the Jews in Western Europe to fifteenth century. Jews under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Joint with HSTEU 467.

SISJE 468 Early Modern Jewish History, 1492-1789 (5) *Kieval* Jews in the early-modern period. The Spanish expulsion in 1492 to the onset of political and social emancipation in western Europe and America. Joint with HSTEU 468. Recommended: introductory course in European or Jewish history.

SISJE 469 Modern Jewish History, 1770-1948 (5) *Kieval* History of the Jews from the era of the Enlightenment and the French Revolution to the founding of

the state of Israel. Joint with HSTEU 469. Recommended: introductory course in European or Jewish history.

SISJE 490 Special Topics (1-5, max. 15) AWSp Content varies.

SISJE 499 Undergraduate Research (3-5, max. 15) AWSp Prerequisite: permission of instructor.

Korean Regional Studies

SISEA 212 History of Korean Civilization (5) From earliest times to present. Development of Korean society and culture in terms of government organization, social and economic change, literature, art. Joint with HSTAS 212.

SISEA 424 Perspectives on East Asia for Teachers (3, max. 6) Examination and evaluation of substantive concepts, resources, and materials employed in teaching about East Asia. Requirements may vary in relation to the background of participants.

SISEA 439 Politics of Korea (5) Korean politics in the twentieth century, treating political legacy of ancient regime, colonial period, Korean War, and the politics of North and South Korea. Comparative treatment of both Koreas in light of the Chinese and Japanese experience. Includes the America-Korea relationship. Joint with POL S 439. Recommended: 210 or equivalent. (Taught occasionally by visiting faculty.)

SISEA 490 Special Topics (1-5, max. 15) Topics vary. Prerequisites: three courses in the area.

SISEA 499 Undergraduate Research (3-5, max. 15)

Middle Eastern Studies

SISME 210 Introduction to Islamic Civilization (5) A Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Joint with N E 210.

SISME 430 Economic Development of the Middle East (5) *Kasaba* Comparative examination of economic development in the Middle East. Includes population growth, agrarian change, industrialization, foreign trade, capital flows, and fiscal and monetary policies.

SISME 431 Political Economy of Middle Eastern Petroleum (5) *Kasaba* Role of Middle Eastern oil-exporting countries, international oil companies, and major oil-consuming nations in determination of supply and demand in the world petroleum market. Impact of oil upon economies of oil-exporting countries and the world economy.

SISME 432 The Middle East and the World Economy (5) *Kasaba* Early nineteenth century to the 1980s. Production and export of agricultural and raw materials, extension of loans and investments by Europeans, commercial exploitation and export of oil as major phases of economic interaction. These phases and their political repercussions; their significance and consequences.

SISME 490 Special Topics (1-5, max. 15) Content varies.

Russian and East European Regional Studies

RUSSIAN PROGRAM

SISRE 140 Russia From the Tenth Century to the Present (5) *Waugh* Russian political, social, and economic history from the tenth century to the present. Joint with HST 140.

SISRE 243 Russian Civilization (5) *Lerner, Waugh* Russia's civilization, including fine arts, literature, religion, and history; political, social, and legal institutions and thought in relation to the general development of Russian society from early times to 1917.

SISRE 248 Multiethnic States in the Soviet Union and Eastern Europe (5) *Boba* Nationality and multiethnic problems in the Soviet Union and East European states. Relevance and irrelevance of Marxist theory as applied to this problem.

SISRE 324 Soviet Society (5) *Ellison, Lerner* Political, economic, and social institutions, and the literature and fine arts of the Soviet Union.

SISRE 327 Dissent in the Soviet Bloc (5) *Legters* Phenomenon of widespread dissent in the USSR and countries of eastern Europe. Sources of dissident sentiment and the overall significance of dissent, both for states of the Soviet bloc and the world at large. Contemporary scene; historical antecedents.

SISRE 343 Interdisciplinary Seminar on Russia (5) Bridges the two basic requirements of the Russian Regional Studies baccalaureate program. Study in depth of two short periods in Russian history. Prerequisites: 243, two years of Russian language, and permission of Russian and East European undergraduate adviser.

SISRE 375 Turkic Peoples of the Soviet Union (3) *Cirtautas* History of the Turkic peoples, A.D. 552 to present. Emphasis on current status of Turkic peoples in USSR. Geographical distribution, demographic data, reactions and adaptations to changes resulting from the 1917 revolution. Turkic viewpoint on past and present developments. Joint with N E 375.

SISRE 378 Russia and Asia (3) *Waugh* Russian expansion into Central Asia. Russian and Soviet policies toward nationalities and relations with adjacent Asian countries.

SISRE 401, 402, 403 History of Marxist Thought (5,5,5) A,W,Sp *Legters* 401, 402: teachings of Marx and Engels in the nineteenth century. Analysis of Marxism as a doctrine. 403: developments in Marxist thought since 1917. Emphasis on neo-Marxist theory in Europe. Prerequisite: permission of instructor.

SISRE 405 Peoples of the Soviet Union (5) W Traditional culture and social organization of Russians and some other USSR peoples, including larger nationalities (e.g., Ukrainians, Estonians) and some smaller ethnic groups in Siberia. Role of traditional culture in shaping contemporary lifestyles in a multiethnic, diversified setting. Joint with ANTH 405. Prerequisite: ANTH 202 or permission of instructor.

SISRE 410 Writers and Intellectuals of Soviet Central Asia (3) Covers modern native writers and intellectuals of Soviet central Asia and compares them with writers educated before the revolution. Prerequisite: 375 or permission of instructor.

SISRE 415 Soviet Marxism (5) *Legters* Social and intellectual process leading to a Soviet variant of Marxism; reception of Marxism in Russia and the revolutionary movement formed in its wake. Relationship between the revolution and the major spokesmen for Soviet Marxism. Prerequisite: 401, 402, or 403.

SISRE 416 Soviet Asia (5) Population, settlement, resource-use problems, agriculture, and industrialization of Soviet Asia, and the USSR's relations with its Asiatic neighbors.

SISRE 418 Eastern Europe: the Political Economy of the Region (5) Recent economic developments in the Soviet Union and Eastern Europe. Includes the debt problem, economic slowdown, technological and equilibrium gaps, integrated price flexibility. Analysis of current institutional reforms, including changes in the Council of Mutual Economic Assistance (COMECON) rules and Soviet-East European relations. Prerequisite: ECON 200.

SISRE 424 The Soviet Military at Home and Abroad (5) Sp *Jones* Red army in Civil War of 1918-21, federal organization of USSR (1922-38), collectivization and industrialization. Soviet military as in-

strument for political socialization of Russian and non-Russian populations, and as factor in Soviet economy and research and development. Internal and external functions of Soviet military alliance system in Europe and the Third World.

SISRE 425 Ethnicity and Nationality in the USSR (5) Creation of the Soviet Union: Leninist and Stalinist approaches to the "national question." Contemporary processes of ethnic assimilation and dissimilation. Formation of national elites, rise of various forms of nationalism, position of religion in national cultures. Specific cases include Russian nationalism, Islam in Central Asia. Joint with ANTH 425.

SISRE 450 Survey of the Cultures of the Turkic Peoples of the Soviet Union (3) Nomadic and sedentary cultures of the Turkic peoples under Soviet dominance. Emphasis on language, literature, and adherence to traditional modes of life. Joint with N E 450.

SISRE 455 Marine Resource Policy of the Soviet Bloc (3) A *Kaczynski* Criteria applied by communist states in developing a strategy of ocean resource use and management. Problems and choices influencing communist ocean policy; areas of conflict with other ocean interests, including those of the West and developing countries. Joint with IMS 455. Prerequisites: understanding of communist bloc economic and political systems and approval of instructor.

SISRE 457 Undergraduate Colloquium on Russia (5) Interdisciplinary study of Russia, with emphasis on the historical period. Required of all undergraduate Russian Regional Studies majors. Prerequisite: permission of instructor.

SISRE 490 Special Topics (1-5, max. 15) AWSp Topics vary. Prerequisites: three courses in the area.

SISRE 499 Undergraduate Research (3-5, max. 15) AWSp

EAST EUROPEAN PROGRAM

SISRE 220 Introduction to East European Studies (5) Geographic setting, ethnic composition, religions, cultural patterns, economic problems, social and political institutions of eastern Europe in the past and present.

SISRE 248 Multiethnic States in the Soviet Union and Eastern Europe (5) *Boba* Nationality and multiethnic problems in the Soviet Union and East European states. Relevance and irrelevance of Marxist theory as applied to this problem.

SISRE 344 Interdisciplinary Seminar on Eastern Europe Today (5) Development of eastern Europe since 1948, responses of an economically and culturally diverse group of states to the imposition of the Soviet political and social system.

SISRE 445 Governments of Eastern Europe (5) W *Ramel* Survey of the Communist regimes of Poland, Hungary, Czechoslovakia, East Germany, and the Balkans. Joint with POL S 445. Prerequisite: one previous course in European politics or history. (Formerly 347.)

SISRE 458 Undergraduate Colloquium on East Europe (5) Interdisciplinary study of eastern Europe. Prerequisite: permission of instructor.

SISRE 490 Special Topics (1-5, max. 15) Topics vary. Prerequisites: three courses in the area.

SISRE 499 Undergraduate Research (3-5, max. 15) AWSp

South Asian Studies

SISSA 210 Introduction to Indian Thought (5) Three major themes in Indian thought—time, truth, and temptation—as expressed in classical Hindu and Buddhist texts, and in traditional and modern art and drama. Field trips, films.

SISSA 386 Introduction to the Philosophical Systems of India (5) A Potter Fundamental views of classical Indian philosophical schools on epistemology and metaphysics through readings in translation of basic works. Nyaya, Vaisheshika, Samkhya, Yoga, Jain philosophy, Vijnanavada and Madhyamika Buddhism, Advaita Vedanta, and later developments. Joint with PHIL 386. Prerequisite: 210 or one course in philosophy.

SISSA 417 Political Economy of India (5) Brass Analysis of relationships among processes of economic change, political institutions, and structures of political power in contemporary India. Includes contrasting approaches to Indian economic development, land reform, radical and agrarian political movements, and role of foreign aid. Joint with POL S 417.

SISSA 434 International Relations of South Asia (5) Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Joint with POL S 434.

SISSA 450 Food Production, Poverty, and Famine (5) Examines the distribution of food in its complex relationship with production in South Asia and Africa. Focuses on the paradox of poverty amidst plenty, the factors that lead to famine, and the long-term ecological consequences of new agricultural technology. Joint with ANTH 450.

SISSA 490 Special Topics (1-5) Topics vary. Prerequisites: three courses in South Asia area or permission of instructor.

SISSA 498 Undergraduate Colloquium on South Asia (5) Interrelationship of the various social science disciplines in the study of South Asian history and culture. Prerequisite: permission of instructor.

SISSA 499 Undergraduate Research (3-5, max. 15) AWSp

Southeast Asian Studies

SISSE 221 History of Southeast Asia (5) Guy Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth and twentieth century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Joint with HISTAS 221.

SISSE 314 Societies and Cultures of Insular Southeast Asia (5) Bentley Cultural, political, economic traditions of insular Southeast Asia, Indonesia, Malaysia, the Philippines. Early Indianized states; growing influence of Islam; Western European conquests; developed colonial societies, their legacies; modern nationalism, problems faced by newly independent states; important cultural continuities. Joint with ANTH 314. Prerequisite: one 200-level International Studies or anthropology course.

SISSE 315 Southeast Asian Civilization: Buddhist and Vietnamese (5) Keyes Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos, and Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Joint with ANTH 315. (Formerly SISEA 235.)

SISSE 490 Special Topics in Southeast Asian Studies (3-5, max. 15) Content varies. Prerequisites: three courses in area or permission of instructor.

SISSE 499 Undergraduate Research (1-5, max. 15) Prerequisite: permission of instructor.

Vietnamese

VIET 111, 112, 113 First-year Vietnamese (5,5,5) A,W,Sp Introduction to modern Vietnamese conversation and grammar. Emphasis on correct pronunciation and basic structure.

VIET 211, 212, 213 Second-year Vietnamese (5,5,5) A,W,Sp Continuation of 111, 112, 113. Review of Vietnamese grammar, development of conversational skills (listening and speaking), reading literary and cultural materials, writing compositions. Prerequisite: 113 or permission of instructor.

VIET 490 Special Topics in Vietnamese (5, max. 15) Nguyen Content varies. Prerequisite: permission of instructor.

Courses for Graduates Only

General

SIS 500 Seminar: Origins of the Modern Global System (3) A Kasaba, Migdal Development of global interdependence from the fifteenth century to World War II. Interrelationship of politics and economics. International political economy from contextual, institutional, and historical perspectives.

SIS 501 Seminar: International Political Economy (3) W Lardy, Poznanski Institutional and historical perspective on the international political economy, focusing on the developing interrelationship of politics and economics. Prerequisites: ECON 200, 201.

SIS 502 Seminar: Change and Stability in International Affairs (3) Sp Jones Examines major differences in the nature of cultural and economic adaptation to the challenge of the West, as well as the tensions these differences have generated within particular societies. Regional phenomena in the context of powerful international forces.

SIS 511-512 Practicum: Methods in International Studies (3-3) W,Sp Glassman, Kasaba Assumptions underlying leading methodologies for comparative study of societies and other large-scale social entities. Quantitative and nonquantitative methods illustrated by recent research. Recommended: course in introductory statistics.

SIS 522 Special Topics in Ethnicity and Nationalism (3, max. 6) Sp Topics vary, but always focus on ethnic group relations and nationalism viewed from a broad, comparative, interdisciplinary perspective. Emphasis is heavily cross-cultural, and the geographical coverage world-wide. Prerequisite: graduate standing in any social science or education, or by permission of instructor.

SIS 590 Special Topics (2-5, max. 10) AWSp Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SIS 600 Independent Study or Research (*) AWSps

Canadian Studies

SISCA 507 Research Seminar: Canadian Problems (3, max. 6) Jackson Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potentials and relations with the United States, Japan, and other important trading partners. Joint with GEOG 507. Prerequisite: GEOG 308 or permission of instructor.

Chinese Regional Studies

SISEA 521-522 Seminar: Introduction to the Interdisciplinary Study of China (5-5) W,Sp Harrell, Perry, Townsend

SISEA 530 Seminar on China (3, max. 6) AWSp Chan, Dull, Harrell Problems of Chinese history. Prerequisite: permission of instructor.

SISEA 531 Chinese History: Research Methods and Bibliographic Guides (3, max. 6) Chan Introductory research seminar dealing with the methodological and bibliographical problems concerning all periods and aspects of Chinese history from the earliest times to the nineteenth century. Prerequisite: two years of classical or modern Chinese.

SISEA 543 Law in East Asia: China (3) Introduction to the basic institutions and processes of the Chinese legal system. Development and role of law in both the traditional and contemporary periods. Joint with LAW B 541.

SISEA 553 Chinese Legal Tradition (3) A Chan, Haley, Liu Concepts and principles of the legal tradition in China. Draws on primary and secondary sources in English and, for students with Chinese language competence, traces the concept and development of Chinese law as well as legal institutions in Chinese society. Joint with LAW B 553.

SISEA 564 Demographic Issues in Asia (3-5) Hirshman, Lavelly, Wolf Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. Addresses a set of these issues by focusing on the demography of one or more countries in Asia. Joint with SOC 534.

SISEA 590 Special Topics (5, max. 10) AWSp Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SISEA 600 Independent Study or Research (*) AWSp

SISEA 700 Master's Thesis (*) AWSp

Comparative Religion

RELIG 501 Approaches to the Study of Religion (5) Major approaches employed by modern scholarship in the study of religion, including historical, phenomenological, anthropological, sociological, and psychological. Prerequisite: admission to the comparative religion M.A. track or permission of instructor.

RELIG 502 Religion in Comparative Perspective (5) Analysis of selected theme or symbol(s) in relation to several different religious traditions. Topics vary. Prerequisite: admission to the comparative religion M.A. track or permission of instructor.

RELIG 520 Seminar On Early Christianity (5) Williams Problems in the history and literature of early Christianity.

RELIG 600 Independent Study or Research (*)

Japanese Regional Studies

SISEA 540 Law in East Asia: Japan (3) Haley Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Joint with LAW B 540.

SISEA 541 Economic and Social History of Japan to 1900 (5) A Hanley, Yamamura Analyses of land-holding systems. The rise of commerce, demographic changes, urbanization, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken 441.

SISEA 548 Japanese Administrative Law (3) Haley Japanese public law system. Organization and role of bureaucracy in formulating, carrying out national policy; legal principles governing procedural, decision-making aspects; role of judiciary, judicial review. Introduces students with Japanese to basic sources for legal research. Open to students without Japanese. Joint with LAW B 548.

SISEA 551 International Relations of Northeast Asia (5) Hellmann, Pyle Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on the Soviet Union, Japan, China, and the United States. A multidisciplinary approach placing contemporary problems in historical context drawing on modern social science theories. In particular, the connections between defense and economics are examined. Prerequisite: permission of instructor.

SISEA 555 Introduction to Modern Japanese Studies (3-6) *Hanley* Interdisciplinary introduction to the study of Japan, with emphasis on historical development. Required seminar for first-year graduate students.

SISEA 558 Readings on Japan in the Social Sciences (5) *Yamamura* Seminar discussing articles in English and Japanese in economics, history, political science, and other social sciences. Students frame central hypotheses for their essays of distinction. Assignments from major Japanese monthlies and academic works. Prerequisites: JAPAN 313 or equivalent, and permission of instructor.

SISEA 559 Interdisciplinary Seminar on Japan (5) *Yamamura* Advanced readings in English and Japanese in history and the social sciences. Required paper is basis for Master's essay. Prerequisite: permission of instructor.

SISEA 575 Seminar on Japanese Society (5) *Hanley* Interdisciplinary seminar with class-led discussions on readings from anthropology, history, sociology, and nondiscipline-specific articles on Japanese society. Prerequisite: background on Japan. Not open to students who have taken 475.

SISEA 590 Special Topics (5, max. 10) AWSp Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SISEA 600 Independent Study or Research (*) AWSp

SISEA 700 Master's Thesis (*) AWSp

Korean Regional Studies

SISEA 585 Research Seminar: Modern Korea (3-6) *Palais* Advanced instruction in problems and methods of research in Korean history. Foreign language not required. Prerequisite: permission of instructor. (Formerly HSTAS 585.)

SISEA 600 Independent Study or Research (*) AWSp

SISEA 700 Master's Thesis (*) AWSp

Middle Eastern Studies

SISME 530, 531, 532 Reading Seminar on Middle East Studies (2,2,2) *Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East.*

SISME 590 Special Topics (3-5, max. 10) Content varies.

SISME 600 Independent Study or Research (*)

SISME 700 Master's Thesis (*)

Russian and East European Regional Studies

RUSSIAN PROGRAM

SISRE 500 Interdisciplinary Research Seminar (*) Contemporary problems in the societal, political, and economic development of Russia and East Europe. Seminars are devoted to specific topics, such as comparative cultures and ethnic minorities; economic development and environmental degradation; comparative communism; and problems of a similar interdisciplinary nature. Prerequisite: permission of instructor.

SISRE 508 Seminar: Problems in the Study of Marxism (3-5, max. 15) AWSp *Logters* Investigation of the deeper and more complex historical and philosophical problems encountered in understanding Marxist thought of the nineteenth and twentieth centuries. Prerequisites: 401, 402, 403, or equivalent in other departments.

SISRE 555 Soviet Ocean Policy (3) W *Kaczynski* Problems of Soviet ocean policy and challenge of Soviet ocean expansion. How Soviet navy, fishing fleet, merchant marine, ocean research capability, and network of overseas land support bases have put USSR in front rank of military powers. Joint with IMS 555. Prerequisite: permission of instructor.

SISRE 590 Special Topics (5, max. 10) AWSp Course content varies. Offered occasionally by visitors or resident faculty.

SISRE 600 Independent Study or Research (*) AWSp

SISRE 700 Master's Thesis (*) AWSp

EAST EUROPEAN PROGRAM

SISRE 500 Interdisciplinary Research Seminar (*) Contemporary problems in the societal, political, and economic development of Russia and East Europe. Seminars are devoted to specific topics, such as comparative cultures and ethnic minorities; economic development and environmental degradation; comparative communism; and problems of a similar interdisciplinary nature. Prerequisite: permission of instructor.

SISRE 504 Approaches to East European Politics (3-5) W Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Joint with POL S 537. Prerequisite: permission of instructor.

SISRE 505 Seminar: Problems of Social and Political Development in Eastern Europe (3-6) Research seminar dealing with selected problems of continuity and change in eastern Europe. Prerequisite: some previous course work on eastern Europe.

SISRE 600 Independent Study or Research (*) AWSp

SISRE 700 Master's Thesis (*) AWSp

South Asian Studies

SISSA 510 Introduction to Interdisciplinary Study of South Asia (5) Examines work done in the various disciplines focusing on South Asia.

SISSA 511 Seminar on South Asia (5) Interdisciplinary seminar for graduate students in which research and writing on individual research topics are critically developed. Designed to provide each student with an opportunity to synthesize his or her studies on South Asia. Prerequisite: 510 or permission of graduate program coordinator.

SISSA 590 Special Topics (5, max. 10) AWSp Seminar. Course content varies. Offered occasionally by visitors or resident faculty.

SISSA 600 Independent Study or Research (*) AWSp

SISSA 700 Master's Thesis (*) AWSp

Latin American Studies

The Latin American Studies major combines language study in Spanish and Portuguese with work in history, the humanities, and the social sciences. It provides a comprehensive, interdisciplinary understanding of this major world region, emphasizing themes such as economic development, popular movements, and cultural analysis. At the same time, it gives students the option to develop their own particular interests within the broad scope of Latin American offerings at the University of Washington.

Undergraduate Program

Charles Bergquist, Coordinator
122 Thomson

Bachelor of Arts Degree

Major Requirements: (1) Language—45 credits college-level language, or equivalent, to include either two years Spanish/one year Portuguese or two years Portuguese/one year Spanish. (2) Core Courses—30 credits, to include 10 each from the following: (a) history; (b) literature and arts; (c) economic development; political development; social/cultural development. For (c), students choose 5 credits from each of two different areas of development. (3) Electives—10 credits from a selected list. (4) Interdisciplinary seminar—5 credits. (5) Senior thesis—5 credits. See adviser for course lists to fulfill requirements (2) and (3), above. Students are awarded a Bachelor of Arts degree in General Studies with a concentration in Latin American Studies.

Linguistics

A210 Padelford

Linguistics is the scientific study of language, which is one of the most characteristic human attributes. In contrast with other disciplines concerned with languages, linguistics deals with languages from the point of view of their internal structure as cognitive systems. Courses provide training in the method and theory of language analysis and description, as well as studies of language change and genetic relationships.

Undergraduate Program

Sharon Hargus, Adviser
A210E Padelford

Bachelor of Arts Degree

Major Requirements: LING 200, 201, or 400; 451, 452; 442 or 453 or 463; 461, 462; at least one year of a non-Indo-European language; at least one year of an Indo-European language; 20 credits of courses in linguistics or of related courses in other departments as listed in the Department of Linguistics office.

Graduate Program

Eileen Kaisse, Graduate Program Coordinator
A210 Padelford

The Department of Linguistics offers programs of studies for graduate students leading to the degrees of

Master of Arts and Doctor of Philosophy. The program is administered by the departmental faculty.

The major interest of the core faculty lies in theoretical linguistics: syntax, semantics, and phonology. One of the core faculty members is the Supervisory Committee chairperson for each doctoral candidate.

In addition to syntax, phonology, semantics, and historical linguistics, some course work is available in various cooperating departments. Among those fields represented outside the department are anthropological linguistics; applied linguistics; computational linguistics; Chinese, English, Germanic, Japanese, and Korean linguistics; sociolinguistics; linguistic philosophy; psycholinguistics; Romance linguistics; Scandinavian linguistics; Semitic linguistics; Slavic linguistics; Southeast Asian linguistics; and speech and phonetics.

Admission Requirements: At least one previous course in linguistics is highly recommended, as is proficiency in one language other than the student's native language. Three letters of recommendation. Graduate Record Examination scores are required for all applicants. Doctoral degree applicants should send the department a copy of their master's thesis or a paper of high quality, or both.

Master of Arts Degree

Two courses each in syntax and phonology, one each in semantics and historical linguistics. Three more courses at the 400 or 500 level in other areas. Demonstrated ability to read the linguistic literature in some language other than English. An M.A. exam in areas in which the grade-point average is below 3.3. A short M.A. thesis.

Doctor of Philosophy Degree

Direct admission to the Ph.D. program will be considered on an individual basis for applicants holding a degree from a comparable M.A. thesis program in linguistics or a closely related field. Some applicants may be granted admission directly into the Ph.D. program, with the stipulation that they make up one or more M.A.-level deficiencies.

Requirements for the Ph.D. degree are: 27 credits of course work beyond the M.A., at least 18 credits of which must be at the 500 level and be completed before the General Examination. A year's study of an "exotic" language. Two linguistics papers delivered at a colloquium or conference. A General Examination, involving the writing of two papers in different areas of linguistics and an oral examination, in which the candidate is questioned on the papers. A dissertation suitable for publication and a Final Examination, in which the candidate defends the dissertation.

Frederick J. Newmeyer

Professors

Augerot, James E.* 1969, ‡(Slavic Languages and Literature, International Studies), M.A., 1959, New Mexico Highlands; Ph.D., 1968, Washington; Slavic linguistics, Romanian, Bulgarian.

Brame, Michael K.* 1971, Ph.D., 1970, Massachusetts Institute of Technology; syntax, phonology, structure of Arabic and English.

Contreras, Heles.* 1964, (Romance Languages and Literature), M.A., 1959, Ph.D., 1961, Indiana; structure of Spanish, syntax and logical form.

Eastman, Carol M.* 1967, ‡(Anthropology, Women Studies), Ph.D., 1967, Wisconsin; language and culture, sociolinguistics, and language planning.

Emonds, Joseph E.* 1979, M.A., 1964, Kansas; Ph.D., 1970, Massachusetts Institute of Technology; syntax, structure of English and French.

Micklesen, Lew R.* 1966, ‡(International Studies, Slavic Languages and Literature), Ph.D., 1951, Harvard; Slavic linguistics.

Newmeyer, Frederick J.* 1969, M.A., 1967, Rochester; Ph.D., 1969, Illinois; syntax, structure of English, language and society, history of linguistics.

Saporta, Sol.* 1960, (Romance Languages and Literature), ‡ M.A., 1952, Ph.D., 1955, Illinois; language and society, sociology of science, Spanish linguistics.

Schiffman, Harold F.* 1967, ‡(Anthropology, Asian Languages and Literature), M.A., 1966, Ph.D., 1969, Chicago; Dravidian language and linguistics, sociolinguistic and language policy, phonetics.

Voyles, Joseph B.* 1965, ‡(Germanics), M.A., 1962, Ph.D., 1965, Indiana; general and historical Germanic linguistics.

Associate Professors

Coats, Herbert S.* 1968, ‡(International Studies, Slavic Languages and Literature), M.A., 1964, Fordham; Ph.D., 1970, Illinois; Slavic linguistics.

Dale, Philip S.* 1968, ‡(Psychology, Speech and Hearing Sciences), M.A., 1964, M.S., 1966, Ph.D., 1968, Michigan; psycholinguistics, language development and disorder, cognitive development.

Kaisse, Ellen M.* 1976, Ph.D., 1977, Harvard; phonology, ancient and modern Greek, syntax-phonology interface.

Lukoff, Fred.* 1964, ‡(Asian Languages and Literature), M.A., 1948, Ph.D., 1954, Pennsylvania; Korean language and linguistics.

Shapiro, Michael C.* 1970, ‡(Asian Languages and Literature, International Studies), M.A., 1970, Ph.D., 1974, Chicago; Indo-Aryan languages and linguistics.

Assistant Professor

Hargus, Sharon.* 1988, Ph.D., 1985, California (Los Angeles); phonology, morphology, Native American languages of the Northwest, lexicography.

Course Descriptions

Courses for Undergraduates

LING 200 Introduction to Linguistic Thought (5) Language as the fundamental characteristic of the human species; diversity and complexity of human languages; phonological and grammatical analysis; dimensions of language use; language and writing; impact of historical linguistics on contemporary theory. Not open for credit to students who have taken 400.

LING 201 Introduction to Linguistic Theory and Analysis (5) Background and scope of modern linguistics; behaviorist versus rationalist theories of language; universal and cognitive aspects of language structure; interplay of genetic and social factors in language formation; linguistic analysis. Not open for credit to students who have taken 400.

LING 333 Linguistics and Society (3) Newmeyer, Saporta Interaction of language, culture, and society, and the relationship of linguistic theory to societal problems. Ethical and political considerations involved in the application of linguistic theory.

LING 400 Survey of Linguistic Method and Theory (4) Major linguistic theories in phonology, syntax and semantics; linguistic analysis and argumentation. Intended for students who plan to pursue further linguistic or language-related study; not open for credit to students who have taken 200 or 201.

LING 401 The Linguistic, Philosophical, and Political Thought of Noam Chomsky (3) Relation of current work in Chomskyan linguistics to philosophical, psychological, political, and educational thought.

LING 402 Survey of the History of Linguistics (3) Sp Newmeyer, Shapiro Main trends in linguistic theory and philosophy of linguistics from ancient times through advent of transformational-generative grammar. Includes nineteenth-century comparative and historical grammar, Prague school grammar, American structuralist grammar, major concerns of linguistics today. Prerequisite: one linguistics course or permission of instructor.

LING 404, 405, 406 Indo-European (3,3,3) Voyles Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 432 Sociolinguistics (3) Sp Eastman, Schiffman Social variation in the phonology, morphology, syntax, lexicon of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, ethnography of speaking, pragmatics, and language attitudes. Joint with ANTH 432. Prerequisite: 400; recommended: prior or concurrent registration in 451 or permission of instructor.

LING 433 Language Policy and Cultural Identity (3) Eastman, Schiffman Decision making regarding language in sociopolitical contexts. Language and ethnicity, educational policy, use of language in developing nations. Plans to modernize, purify, standardize, reform, and revive language. Language loyalty and motives for second-language acquisition. Joint with ANTH 464. Prerequisite: 200 or 400.

LING 442 Introduction to Semantics (4) ter Meulen Semantic analysis and theory of meaning and interpretation of language. Relation of semantics to syntax and phonology, psycholinguistics, and language acquisition. Comparison of various linguistic theories of meaning. Prerequisite: 200 or 400.

LING 443 Philosophy and Linguistics (3) Philosophical problems that arise in the attempt to understand current linguistic theories and the implications of linguistics for philosophy. Joint with PHIL 443.

LING 444 Philosophy of Language—Pragmatics (3) Potter Language as communicative activity. Speech act theory in Austin, Grice, and contemporary writings. Applications to problems of reference, presupposition, metaphor, relativism. Joint with PHIL 444.

LING 445 Descriptive Aspects of English as a Foreign Language (3) W Emonds Linguistic analysis as a basis for the teaching of English as a foreign language; language as rule-governed behavior. Prerequisite: 200 or 400 or permission of instructor.

LING 446 Descriptive Aspects of English: Phonology and Morphology (3) Hargus, Kaisse Descriptively oriented analysis of English phonology and morphology; dialect differences. Prerequisites: 200, 400 or permission of instructor.

LING 447 Language Development (4) A Dale First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Joint with PSYCH 457. Prerequisites: 400 or PSYCH 306, and senior or graduate standing.

LING 449 Second-Language Learning (3) Sp Issues related to the psychological aspects of second-language learning. Prerequisite: 200 or 400 or permission of instructor.

LING 451, 452, 453 Phonology I, II, III (4,4,4) A,W,Sp Contreras, Hargus, Kaisse, Saporta Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Joint with ANTH 451, 452, 453. Prerequisite: 200 or 400, either of which may be taken concurrently with 451.

LING 454 Methods in Comparative Linguistics (3) *Klausenburger, Shapiro, Voyles* Method and theory of historical and comparative linguistics. Problems of phonological, morphological, syntactic, and semantic change and reconstruction. Prerequisite: 400 or permission of instructor, undergraduate adviser, or graduate program coordinator.

LING 455 Areal Linguistics (3, max. 6) *Eastman* Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Processes such as borrowing, vocabulary specialization, lexical change, language death and revival. Joint with ANTH 455.

LING 461, 462, 463 Syntax I, II, III (4,4,4) A,W,Sp *Brame, Contreras, Emonds, Newmeyer* Study of the structural properties of language; introduction to generative transformational syntax. Joint with ANTH 461, 462, 463. Prerequisite: 200 or 400 or permission of instructor.

LING 476 Philosophy of Language (5) Current theories of meaning, reference, predication, and related concepts. Joint with PHIL 453. Recommended: PHIL 120.

LING 479 Formal Semantics and Natural Language (3) Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Typical topics: Tarskian definitions of truth; "truth theory" and theory of meaning; possible world semantics; Montague semantics; generative semantics; Chomsky on syntax and semantics. Joint with PHIL 479. Recommended: PHIL 120 or 370.

LING 481 Introduction to Morphology (4) *Brame, Kaisse, Newmeyer* Structure of words and the processes by which they are formed. Morphological processes in a wide variety of languages. Prerequisites: 451, 461.

LING 489 Undergraduate Research (1-5) AWSpS

Courses for Graduates Only

LING 501, 502, 503 Linguistic Analysis Laboratory (3,3,3) Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisites: 453, 463, or permission of instructor.

LING 504 Indo-European Comparative Phonology (2) *Kaisse* Sound systems of the principal families of Indo-European and the relation of these to a hypothetical parent tongue. Prerequisite: 406 or permission of instructor. (Offered alternate years.)

LING 505 Indo-European Comparative Grammar (2) Systematic treatment, with extensive surveys of individual language groups. Prerequisite: 504.

LING 514 Seminar in Comparative Linguistics (3) *Kaisse* Nineteenth- and twentieth-century theories of phonological change. Prerequisite: 404 or permission of instructor.

LING 519 Mathematical Models of Grammar (3) *Brame* Study of some mathematical models of language recognition, emphasizing context-free and context-sensitive grammars. Prerequisite: graduate standing in mathematics, linguistics, or psychology, or permission of instructor.

LING 522 Topics in the History of Linguistics (3) *W Newmeyer* Intensive investigation of the main trends in the history of linguistics, concentrating on the development of nineteenth-century historical linguistics, the various schools of structural linguistics, and transformation-generative grammar. Prerequisites: 451, 461.

LING 524 Seminar in Theoretical Linguistics (4, max. 8) Individual and joint research on selected topics in theoretical linguistics. Topics change each quarter.

Typical topics are semantics, generative grammar, phonological theories. Prerequisites: 453, 463.

LING 525 Seminar in Theoretical Phonology (4, max. 12) Individual and joint research on selected topics in theoretical phonology. Topics vary. Typical offerings include phonology and the lexicon, syntax and phonology, phonological representations. Prerequisite: 453.

LING 530 Dialectology (3) *Schiffman* The principles of dialect deviation as related to linguistic structure and usage. Joint with ANTH 530. Prerequisite: 452 or permission of instructor.

LING 540 Phonological Development (3) Selected topics in the developmental sequence of phonological systems in normal-speaking children. Relationships between possible phonological inventories and rule systems in different languages. Joint with SPHSC 540. Prerequisites: 451, 452, or permission of instructor.

LING 541 Syntactic and Semantic Development (3) *A Dale* Selected topics in the study of child language (e.g., cognitive basis of language, early semantic systems, development in language-handicapped children). Topics vary. Joint with SPHSC 541. Prerequisites: one course in child language development and permission of instructor.

LING 550, 551, 552 Advanced Phonology (3,3,3) *A,W,Sp Hargus, Kaisse* Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisites: 451, 452, 453.

LING 553 Analysis of Linguistic Structures (3, max. 6) Syntactic, semantic, and/or phonological analysis. Languages to be analyzed vary. Joint with ANTH 553. Prerequisite: permission of instructor.

LING 561, 562, 563 Advanced Syntax (3,3,3) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisites: 461, 462, 463.

LING 565 Contrastive Linguistics (3) The attempt to look across linguistic systems for comparable and contrastive classes and subclasses. Problems of subcategorization and universal grammar. Three conceptually distinct models: structural, transfer grammar, generative. Prerequisites: 452, 463.

LING 579 Comparative Altaic Linguistics (3) Comparative phonology and morphology of Mongolian, Turkic, and other Altaic languages. Joint with ALTA 579. Prerequisite: permission of instructor.

LING 580 Problems in Linguistics (3, max. 12) Advanced study in current theories of syntax, semantics, phonology, or morphology. Prerequisite: permission of instructor.

LING 599 Linguistics Colloquium (1, max. 6) *AWSp* Seminar attended by faculty and graduate students to discuss research in progress and topics of general interest. Attendance is required for a minimum of two quarters during the student's residence. Prerequisite: permission of instructor.

LING 600 Independent Study or Research (*) *AWSpS*

LING 700 Master's Thesis (*) *AWSpS*

LING 800 Doctoral Dissertation (*) *AWSpS*

Mathematics

C138 Padelford

Mathematics is the basic language of physical science, with applications in engineering and business as well

as the natural and social sciences. The department has introduced a Mathematical Sciences option in its Bachelor of Science degree program for those students who want to prepare for careers in industry, business, or graduate study in applied mathematics or natural science. For students who want to study mathematics as a discipline in its own right, the department continues to offer the Pure Mathematics option of the B.S. degree. The Bachelor of Arts degree is intended for those students who do not wish to continue studies in either mathematics or a mathematical science.

Undergraduate Program

James Morrow, Director
Sandra Murray, Assistant Director
Tina Vicia, Academic Counselor
C36 Padelford

In all options, 2.0 or higher grades must be obtained in all mathematics courses presented to satisfy the mathematics requirement, and a grade-point average of 2.00 or higher must be obtained in all mathematics courses taken.

Bachelor of Arts Degree

Admission Requirements: MATH 124, 125, 126, and at least one 200- or 300-level mathematics course required for the degree; 2.00 minimum cumulative grade-point average; 2.00 minimum grade-point average in all mathematics courses. Application to the program should be made at the end of the sophomore year.

LIBERAL ARTS OPTION

Major Requirements: A minimum of 50 approved credits in mathematics, including MATH 124, 125, 126; 307; 205 or 308; 328 and 26 additional credits at the 300 level and above. Minimum 2 credits of computer courses chosen from ENGR 141; CSE 210, 211; or MATH 187 (1 credit only), 387 (1 or 2 credits), 487 (1 or 2 credits), 464.

TEACHER PREPARATION OPTION

Major Requirements: 50 approved credits in mathematics, including MATH 124, 125, 126; 205 or 308; 411, 412; 444, 445; STAT 341, 342; minimum 2 credits of computer courses chosen from ENGR 141; CSE 210, 211; or MATH 187 (1 credit only), 387 (1 or 2 credits), 487 (1 or 2 credits), 464.

Bachelor of Science Degree

Admission Requirements: A minimum of 45 credits completed, including MATH 124, 125, 126 (or MATH 134, 135, 136); 307, and one other 300-level math course; PHYS 121, 122, 123. Application to the program should be made at the end of the sophomore year.

MATHEMATICAL SCIENCES OPTION

Major Requirements: Option has two components, mathematics and science. **Mathematics Component** (minimum of 54 credits): must include the core (30 credits), a track (12 credits), and electives (12 credits). [1] Core: must include MATH 124, 125, 126 (or 134, 135, 136); 307, 308, 309; 328, 329 (or 334, 335, 336). [2] Track: any two of the following sequences: MATH 394, 395 Probability; 402, 403 Modern Algebra; 424, 425 Fundamental Concepts of Analysis; 427, 428 Topics in Applied Analysis. [3] Electives: 12 credits of mathematics courses numbered 301 or higher, excluding 351, 352, 353; 411, 412; 420; 444, 445; 498, and including at least one two-quarter sequence separate from the sequences taken for the track and core requirements. **Science Component:** must include [1] PHYS 121, 122, 123 (12 credits); [2] minimum 2 credits of computer courses chosen from ENGR 141; CSE 210, 211; or MATH 187 (1 credit only), 387 (1 or 2 credits), 487 (1 or 2 credits), 464; [3] 15 approved credits (at the 300 level or above) in the student's chosen area of concentration (must be in an area of natu-

ral or social science). Suggested areas of concentration include astronomy, atmospheric sciences, computer science, economics, geophysical sciences, physics, physical chemistry, and statistics. If the computing requirement is satisfied by taking anything other than CSE 210, 211, then 15 approved credits (at the 300 level or above) in an area of the natural or social sciences are required. If the computing requirement is satisfied by taking CSE 210, 211 then 12 approved credits (at the 300 level or above) in an area of the natural or social sciences are required. If computer science is the chosen area of concentration, then the computing requirement must be satisfied with CSE 210, 211, and the courses of the area of concentration requirement must include CSE 373, 410, and either 413 or 415. Students contemplating the mathematical sciences option should seek academic advice in C36 Padelford early in the sophomore year or immediately upon transferring to the University. In particular, students who plan to continue with graduate studies will need advice.

PURE MATHEMATICS OPTION

Major Requirements: (1) A minimum of 66 credits in mathematics. Courses must include MATH 124, 125, 126 (or 134, 135, 136); 307, 308, 309; 328, 329 (or 334, 335, 336); 402, 403, 404; 424, 425, 426, 427; 9 credits, including at least one two-quarter sequence chosen from the following: 394, 395; 407, 408; 414, 415; 428, 429; 441, 442, 443; 461, 462, 464, 465, 466. (2) PHYS 121, 122, 123. (3) Minimum 2 credits of computer courses chosen from ENGR 141; CSE 210, 211; or MATH 187 (1 credit only), 387 (1 or 2 credits), 487 (1 or 2 credits), 484.

Graduate Program

Lutz Bungart, Graduate Program Coordinator

The degrees of Master of Arts, Master of Science, and Doctor of Philosophy are offered. Opportunities are available within the department for study of pure and applied mathematics for each of these degree programs. The two master's degrees are equivalent in rigor and quality, but they serve students with different needs. The Master of Arts degree is appropriate for students who need a broad background in advanced mathematics and who expect to continue working with mathematics of approximately the same level in their careers. The Master of Science degree is appropriate for students who expect to be working with more specialized mathematics of increasing order of complexity in their careers. The Doctor of Philosophy degree is the highest professional degree in mathematics. It is appropriate for students who plan on a career of research and/or teaching of mathematics at the highest levels.

Master of Arts Degree

Admission Requirement: Bachelor of Arts degree with major in mathematics or equivalent background (minimum of 45 quarter credits, or 30 semester credits of mathematics beyond college algebra).

Graduation Requirements: *With Thesis*—36 credits, including 9 credits of thesis; a minimum of 27 approved credits in courses at the 400 or 500 level with at least 9 credits in courses numbered 500-599. The total credits should include at least 6 credits each in algebra, analysis, and one other field. Demonstration of proficiency in one of three languages—French, German, Russian. Thesis is defended in an oral examination.

Without Thesis—36 credits in courses at the 400 or 500 level, of which 18 must be in courses at the 500 level or above. At least 6 credits each in algebra, analysis, and one other field. The 18 credits in courses numbered 500-599 should be distributed over no more than three sequences. Language requirement same as the thesis option. Oral examination in area of specialization in a topic agreed upon by the student and the chairperson of the examining committee.

Master of Science Degree

Admission Requirement: Bachelor of Science degree with major in mathematics, Bachelor of Arts degree with strong major in mathematics or equivalent background.

Graduation Requirements: *With Thesis*—36 credits, including 9 credits of thesis; a minimum of 27 approved credits in courses numbered 400-599, with at least 18 credits in courses numbered 500-599. The courses must include at least 6 credits each in analysis, algebra, and one other field. Demonstration of proficiency in one of three languages—French, German, or Russian. Thesis, which is defended in an oral examination, should contain original research.

Without Thesis—36 credits from MATH 402, 403, 404; 424, 425, 426; 427, 428, 429; any 500-level mathematics course, AMATH 584, 585, 586; 569. Courses to include 18 credits from MATH 504, 505, 506; 524, 525, 526; 534, 535, 536, and one other three-quarter sequence of advanced 500-level mathematics courses in an area of specialization approved by the graduate program coordinator and the chairperson of the student's examining committee. Demonstration of proficiency in one of three languages—French, German, Russian. Oral examination in area of specialization in a topic agreed upon by the student and the chairperson of the examining committee. The General Examination for the doctorate may be substituted.

Numerical Analysis/Optimization Option—36 credits from MATH 424, 425, 426; 427, 428, 429; 438, 439; 461, 462; 491, 492; AMATH 584, 585, 586; 569, any 500-level mathematics course. Courses to include 18 credits at the 500 level with at least 12 credits from 594-599 (Numerical Analysis Option) or 514, 518; 509 (Optimization Option). Oral examination in a special topic agreed upon by the student and the chairperson of the student's examining committee. There is no language requirement.

Doctor of Philosophy Degree

Admission Requirement: Mathematical training equivalent to a master's degree in mathematics.

Graduation Requirements: Completion of Graduate School requirements to include satisfactory performance in MATH 504, 505; 524, 525; 534, 535; a set of preliminary exams on basic graduate material; General Examination on a special topic; demonstration of proficiency in two of the following languages: French, German, Russian; dissertation that is an original piece of work; and Final Examination.

Research Facilities

An excellent library and access to computing facilities are located in the same building as the department. The mathematics research library has an outstanding collection of over 33,000 monographs and subscribes to nearly all journals of significance to the mathematics community. The departmental computing facilities include 22 networked VAX workstations, two VAX 3500s acting as file servers, a VAX 3200 and several MAC II cxs. In addition, the University maintains several large mainframe computers which are available to faculty and students.

Financial Support

Most of the graduate students in mathematics are supported by fellowships and teaching assistantships. The workload of teaching assistants allows ample time for graduate courses and thesis work.

Correspondence and Information

Graduate Program Coordinator
C36 Padelford, GN-50

Faculty

Chairperson

Edgar Lee Stout

Professors

Arsove, Maynard G.,* 1951, (Emeritus), M.S., 1948, Ph.D., 1950, Brown; potential theory, complex function theory, theory of bases.

Bass, Richard F.,* 1977, Ph.D., 1977, California (Berkeley); probability theory (Markov processes) and statistics.

Beaumont, Ross A.,* 1940, (Emeritus), M.S., 1937, Michigan; Ph.D., 1940, Illinois; algebra (group theory).

Birnbaum, Z. William,* 1939, (Emeritus), (Statistics),† Ph.D., 1929, John Casimir (Lwow, Poland); statistics.

Blumenthal, Robert M.,* 1956, Ph.D., 1956, Cornell; probability.

Brownell, Francis H.,* 1950, (Emeritus), M.S., 1947, Yale; Ph.D., 1949, Princeton; differential equations, applied mathematics.

Corson, Harry H.,* 1958, M.A., 1954, Ph.D., 1957, Duke; topology, functional analysis.

Curjel, Caspar R.,* 1964, Dr.Sc., Math., 1960, Eidg. Techn. Hochschule, Zurich (Switzerland); algebraic topology, algebra.

Curtis, Edward B.,* 1970, M.A., 1962, Ph.D., 1962, Harvard; algebraic topology.

Dubisch, Roy, 1961, (Emeritus), M.S., 1940, Ph.D., 1943, Chicago; mathematical education.

Erickson, K. Bruce,* 1973, M.S., 1966, Georgia Institute of Technology; Ph.D., 1970, Wisconsin; probability theory.

Folland, Gerald B.,* 1973, M.A., 1970, Ph.D., 1971, Princeton; partial differential equations.

Gangoli, Ramesh A.,* 1962, Ph.D., 1961, Massachusetts Institute of Technology; probability.

Goldstein, Allen A.,* 1964, M.A., 1952, Ph.D., 1954, Georgetown; approximation theory, nonlinear programming, control theory, calculus of variations.

Greenberg, Ralph,* 1978, Ph.D., 1970, Princeton; number theory.

Grunbaum, Branko,* 1966, M.A., 1954, Ph.D., 1958, Hebrew University; geometry.

Hain, Richard,* 1985, M.Sc., 1977, Australian National; Ph.D., 1980, Illinois (Urbana); topology, geometry.

Hewitt, Edwin,* 1948, (Emeritus), M.A., 1941, Ph.D., 1942, Harvard; harmonic analysis on groups, measure theory functional analysis.

Irving, Ronald S.,* 1980, Ph.D., 1977, Massachusetts Institute of Technology; representation theory; ring theory.

Jans, James P.,* 1957, M.A., 1950, Ph.D., 1955, Michigan; ring structure and homological algebra.

Klee, Victor L.,* 1953, (Computer Science), Ph.D., 1949, Virginia; convex sets, analysis of algorithms, linear programming, combinatorics, functional analysis.

Koblitz, Neal I.,* 1979, Ph.D., 1974, Princeton; algebraic number theory.

Kottwitz, Robert E.,* 1979, Ph.D., 1977, Harvard; representation theory.

Le Veque, Randall J.,* 1985, (Applied Mathematics),† Ph.D., 1982, Stanford; numerical analysis.

Lind, Douglas A.,* 1975, M.A., 1971, Ph.D., 1973, Stanford; ergodic theory.

Marshall, Donald E.,* 1976, M.A., 1972, Ph.D., 1976, California (Los Angeles); functional analysis.

McFarlan, Lee H., 1927, (Emeritus), M.A., 1921, Ph.D., 1924, Missouri; calculus of variations.

Michael, Ernest A., * 1953, M.A., 1948, Harvard; Ph.D., 1951, Chicago; topology.

Morrow, James A., * 1969, Ph.D., 1967, Stanford; complex analysis.

Namioka, Isaac, * 1963, M.A., 1953, Kansas; Ph.D., 1956, California (Berkeley); algebraic topology, functional analysis.

Nunke, Ronald J., * 1958, M.S., 1951, Ph.D., 1955, Chicago; category theory, Abelian groups.

Osborne, M. Scott, * 1975, Ph.D., 1972, Yale; representation theory.

Phelps, Robert R., * 1962, Ph.D., 1958, Washington; convexity, functional analysis, geometry of Banach spaces.

Pyke, Ronald, * 1960, M.Sc., 1955, Ph.D., 1956, Washington; statistics (nonparametric inference).

Ragozin, David L., * 1969, A.M., 1963, Ph.D., 1967, Harvard; approximation theory.

Rockafellar, R. Tyrrell, * 1966, (Applied Mathematics), † M.S., 1959, Marquette; Ph.D., 1963, Harvard; convexity, linear programming.

Sarason, Leonard, * 1965, M.Mus., 1949, Yale; Ph.D., 1961, New York; partial differential equations.

Segal, Jack, * 1960, M.S., 1957, Miami; Ph.D., 1960, Georgia; topology.

Shorack, Galen R., * 1966, ‡(Statistics), M.A., 1962, Oregon; Ph.D., 1965, Stanford; mathematical statistics (distribution-free statistics).

Stout, Edgar Lee, * 1969, M.A., 1961, Ph.D., 1964, Wisconsin; complex analysis.

Sullivan, John B., * 1973, Ph.D., 1971, Cornell; algebraic groups.

Uhlmann, Gunther, * 1984, Ph.D., 1976, Massachusetts Institute of Technology; partial differential equations.

Wan, Frederick Y. M., * 1983, (Applied Mathematics), † S.M., 1963, Ph.D., 1965, Massachusetts Institute of Technology; mathematical problems in shell theory, elasticity, resource and land economics, forest management and biomechanics, computational aspects of stochastic PDE and first exit time problems.

Warner, Garth W., * 1966, Ph.D., 1966, Michigan; analysis.

Westwater, M. John, * 1970, Ph.D., 1967, Cambridge; mathematical physics.

Associate Professors

Arms, Judith M., * 1980, M.A., 1974, Ph.D., 1977, California (Berkeley); mathematical physics.

Avann, Sherwin P., 1946, (Emeritus), M.S., 1940, Ph.D., 1942, California Institute of Technology; lattice theory.

Bube, Kenneth P., * 1986, M.S., 1976, Ph.D., 1978, Stanford; numerical analysis, partial differential equations.

Bungart, Lutz L., * 1966, Ph.D., 1962, Princeton; several complex variables.

Burdzy, Krzysztof, 1988, Ph.D., 1980, California (Berkeley); probability theory.

Collingwood, David, * 1987, Ph.D., 1983, Utah; representation theory of Lie groups and Lie algebras.

Dekker, David B., 1948, (Emeritus), (Computer Science), † M.S., 1943, Illinois Institute of Technology; Ph.D., 1948, California (Berkeley); computers.

DuChamp, Thomas E., * 1979, M.S., 1969, Ph.D., 1976, Illinois; differential geometry, foliations, characteristic classes, calculus of variations.

Goerss, Paul, 1989, Ph.D., 1983, Massachusetts Institute of Technology; algebraic topology.

Graham, C. Robin, * 1984, M.A., 1976, Rice; Ph.D., 1981, Princeton; several complex variables, partial differential equations.

King, James R., * 1974, M.A., 1967, Ph.D., 1969, California (Berkeley); several complex variables.

Kingston, J. Maurice, * 1940, (Emeritus), M.A., 1936, Ph.D., 1939, Toronto; mathematical education.

Lee, John M., * 1986, Ph.D., 1982, Massachusetts Institute of Technology; partial differential equations.

Mitchell, Stephen A., * 1985, Ph.D., 1981, Washington; algebraic topology.

Monk, G. Stephen, * 1964, Ph.D., 1966, Minnesota; algebra.

Moore, Robert T., * 1968, Ph.D., 1964, Princeton; operator theory and group representation.

Smith, S. Paul, * 1986, M.Sc., 1978, London (England); Ph.D., 1981, Leeds (England); algebra.

Sylvester, John, * 1987, Ph.D., 1980, Courant; partial differential equations.

Tuncel, Selim, * 1986, M.Sc., 1979, Ph.D., 1981, Warwick; ergodic theory and dynamical systems.

Assistant Professors

Burke, James, * 1985, Ph.D., 1983, Illinois (Urbana); optimization.

Ozols, Vilnis, * 1986, M.A., 1965, Ph.D., 1967, California (Berkeley); Lie groups, Riemannian geometry.

Sylvester, Donna, 1988, (Acting), Ph.D., 1988, Duke; fluid dynamics, partial differential equations.

Lecturers

Warfield, Virginia M., 1973, M.A., 1965, Ph.D., 1971, Brown; probability and remedial mathematics.

Zuckerman, Helen C., 1935, (Emeritus), M.S., 1935, Washington; mathematics.

Course Descriptions

Courses for Undergraduates

Mathematics

MATH 100, 102 Algebra (5,5) AW, AWSp Similar to the first three terms of high school algebra. Assumes no previous experience in algebra. Open only to specially admitted students: [1] Educational Opportunity Program students, or [2] students admitted with an entrance deficiency in mathematics; not open to regularly admissible students.

MATH 101 Intermediate Algebra (0) Intermediate algebra equivalent to third semester of high school algebra. Instruction provided by community colleges on UW campus. Extra fee required.

MATH 103 Introduction to Elementary Functions (3) AWSp Continues the study of algebra begun in 100 and 102 with emphasis on functions (polynomial, rational, logarithmic, exponential, and trigonometric). Open only to specially admitted students (see definition under 100) who have completed 102.

MATH 105 Precalculus (5) AWSpS Polynomial, rational, exponential, and trigonometric functions. For students needing preparation for 124; not advised for students who will not take 124. Does not satisfy natural science distribution or Q/SR proficiency requirement; does not count toward B.S. or B.A. degree. Prerequisites: two years high school algebra and placement test or equivalent.

MATH 107 Mathematics: A Practical Art (5) WSp For students not planning to take additional mathematics. The exponential function; how it applies to a wide variety of phenomena. Elementary probability and statistics; their use in a variety of applications. Prerequisites: 1½ years high school algebra and placement test, or equivalent.

MATH 124 Calculus with Analytic Geometry I (5) AWSpS Differentiation, applications of derivative, integration. Calculus for natural sciences and engineering students. Prerequisites: four years of college preparatory mathematics or equivalent (normally including precalculus or mathematical analysis and normally with grades of B or better) and placement test or 105 or equivalent.

MATH 125 Calculus with Analytic Geometry II (5) AWSpS Applications of integration, transcendental functions, methods of integration and improper integrals, introduction to first order ordinary differential equations. Prerequisite: 124.

MATH 126 Calculus with Analytic Geometry III (5) AWSpS Vectors and vector functions in space, functions of several variables and applications, multiple integrals. Prerequisite: 125.

MATH 134, 135, 136 Accelerated (Honors) Calculus (5,5,5) A,W,Sp Covers the material of 124, 125, 126; 307, 308. First year of a two-year accelerated sequence. May receive advanced placement (AP) credit for 124 after taking 134, and for 125 after taking 135. May not receive credit for both 126 and 136. For students with above average preparation, interest, and ability in mathematics. Prerequisites: one year of high school calculus and AP score of 4 or more, or equivalent.

MATH 156 Application of Algebra to Business and Economics (5) AWS Use of graphs and algebraic functions as found in business and economics. Algebraic and graphical manipulations to solve problems. Exponential and logarithm functions; various applications to growth of money. Prerequisites: one and a half years of high school algebra and placement test, or equivalent.

MATH 157 Application of Calculus to Business and Economics (5) AWSpS Rates of change, tangent, derivative, accumulation, area, integrals in specific contexts, particularly economics. Techniques of differentiation and integration. Application to problem solving. Optimization. Credit does not apply toward a mathematics major. Prerequisite: 156 for day sections; 105 for evening sections.

MATH 170, 171 Mathematics for Elementary School Teachers (3,3) AWS, Sp Development of the systems of whole numbers, integers, and rational numbers; measurement; basic geometric concepts; functions; elementary probability and statistics. Ordinarily, credit may not apply toward a major in mathematics. Prospective elementary education students are required to take 170. Offered on credit/no credit basis only. Prerequisites: 1½ years of high school algebra and one year of geometry for 170; 170 for 171.

MATH 205 Elementary Linear Algebra (3) AWSpS Systems of equations, vector spaces, matrices, linear transformations, characteristic vectors. Not open for credit to students who have taken 308. Prerequisite: 124 or 157.

MATH 301 Elementary Number Theory (3) AWS Brief introduction to some of the fundamental ideas of elementary number theory. Prerequisites: 126 or 136.

MATH 307 Linear Analysis I (3) AWSpS Taylor series, first and second order ordinary differential equations. Prerequisite: 125; recommended: 126.

MATH 308 Linear Analysis II (3) AWSpS Linear algebra (matrices and linear equations, the vector space \mathbb{R}^n , eigenvalues), systems of first order linear ordinary differential equations. Prerequisite: 307; recommended: 126.

MATH 309 Linear Analysis III (3) AWSpS Linear algebra (inner products, projections), Fourier series and Laplace transform with applications to partial differential equations. Prerequisites: 126, 307, 308.

MATH 328 Advanced Calculus I (3) AWSpS Vector and scalar fields, line integrals, surface and volume integrals, theorems of Green, Gauss, and Stokes. Prerequisite: 126.

MATH 329 Advanced Calculus II (3) AWSpS Infinite series (tests, absolute convergence, uniform convergence), power series (interval of convergence, real analytic functions), improper integrals and functions defined by integrals. Prerequisites: 126 and 307.

MATH 334, 335, 336 Accelerated (Honors) Advanced Calculus (5,5,5) A,W,Sp Introduction to proofs and rigor, uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Covers essentially the same material as 309, 328, 329, 427, but with a higher level of rigor. Second year of an accelerated two-year sequence which prepares students for senior level mathematics courses. Prerequisites: either 136 or 126, 307 and either 308 or 205.

MATH 340 Abstract Linear Algebra (3) Sp Linear algebra from a theoretical point of view. Abstract vector spaces and linear transformations, bases and linear independence, matrix representations. Jordan canonical form, linear functionals, dual space, bilinear forms, and inner product spaces. Prerequisite: 308 or 205. (Formerly 304.)

MATH 351, 352 Quantitative Methods I, II (3,3) A,W Applications of mathematical techniques to problems in the sciences and engineering. Emphasis on formulation, solution, and interpretation of results. 351: ordinary differential equations. 352: approximate methods; Fourier series; partial differential equations; boundary-value problems. Joint with OCEAN 351, 352 and AMATH 351, 352. Prerequisites: one year of physics and 126 for 351; 351 or 307 for 352.

MATH 381, 382, 383 Introduction to Mathematical Modeling (3,3,3) A,W,Sp Simple discrete and continuous models of diverse natural and social phenomena, with particular reference to the unity of the tools of mathematical analysis useful in their study. 381 devoted to discrete methods; 383, continuous methods; 382, a mixture. Mathematical topics and phenomena. Joint with AMATH 381, 382, 383. Prerequisites: 126 and either 205, or 308 for 381, 382; 328 and either 307 or AMATH 351 for 383.

MATH 390 Probability and Statistics in Engineering and Science (4) AWSpS Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Joint with STAT 390. Students may not receive credit for both 390 and STAT 481. Prerequisites: 307 or 328, and 205 or 308.

MATH 394 Probability I (3) AWS Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson, and normal distributions. Joint with STAT 394. Prerequisite: 328.

MATH 395 Probability II (3) WSpS Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Joint with STAT 395. Prerequisite: 394.

MATH 396 Probability III (3) Sp Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Joint with STAT 396. Prerequisite: 395 or STAT 511.

MATH 402, 403, 404 Introduction to Modern Algebra (3,3,3) AS,WS,Sp Algebraic systems; elementary theory of groups, rings, and fields; polynomials; topics in linear algebra; reductions of forms. Prerequisites: 308 or 336 for 402; 402 for 403; 403 for 404.

MATH 407 Linear Optimization (3) AWS Maximization and minimization of linear functions subject to constraints consisting of linear equations and inequalities; linear programming and mathematical modeling. Simplex method, elementary games and duality. Prerequisite: 308.

MATH 408 Nonlinear Optimization (3) WSp Maximization and minimization of nonlinear functions, constrained and unconstrained; nonlinear programming problems and methods. Lagrange multipliers; Kuhn-Tucker conditions, convexity. Quadratic programming. Prerequisites: 329 or 336; 407 and ENGR 141, or CSE 210, 211, or equivalent programming experience.

MATH 409 Discrete Optimization (3) Maximization and minimization problems in graphs and networks (shortest paths, minimum spanning trees, maximum flows, minimum cost flows); transportation and transshipment problems, NP-completeness. Prerequisite: 407.

MATH 411, 412 Introduction to Modern Algebra for Teachers (3,3) AS,WS Development of the number systems of elementary algebra; groups, rings, integral domains and fields; polynomials. Designed for teaching majors; not open for credit to students who have taken 402, 403. Prerequisites: 205 or 308 for 411; 411 for 412.

MATH 414, 415 Number Theory (3,3) W,Sp Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet's theorem on primes in an arithmetic progression, Chebyshev's theorem on distribution of primes, the partition function, equations over finite fields. Prerequisites: 301 for 414; 414 for 415. (Offered even-numbered years.)

MATH 420 History of Mathematics (3) S Survey of the development of mathematics from its earliest beginnings through the first half of the twentieth century. Prerequisite: 402 or 411, which may be taken concurrently.

MATH 424, 425, 426 Fundamental Concepts of Analysis (3,3,3) A,W,Sp Sets, real numbers, topology of metric spaces, normed linear spaces, multivariate calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Prerequisites: 329 or 336, and 309 or permission for 424; 424 for 425; 425 for 426.

MATH 427, 428, 429 Topics in Applied Analysis (3,3,3) AWS,WSpS,SpS Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; application. Prerequisites: 329 or 336 for 427; 307 and either 329 or 336 for 428; 427 and 428 for 429.

MATH 438 Introduction to Partial Differential Equations (3) A Integral curves and surfaces of vector fields, initial value problems for first-order linear and quasi-linear equations, Cauchy-Kovalevsky theorem, general Cauchy problem characteristics, special equations. Prerequisites: 205 or 308; 307 and 329 or 336. (Offered odd-numbered years.)

MATH 439 Introduction to Partial Differential Equations (3) W Continuation of 438. Laplace's equation and general elliptic equations, wave equation and general hyperbolic equations, heat equation and general parabolic equations. Initial value problems and Dirichlet problems. Green's functions. Maximum principle. Prerequisite: 438. (Offered odd-numbered years.)

MATH 441, 442 Advanced Geometry (3,3) A,W Selected topics from among projective geometry, differential geometry, advanced analytic geometry, algebraic geometry, algebraic topology, and the geometry of convex bodies. Prerequisites: 308 and 329 or 336 for 441; 441 for 442. (Offered even-numbered years.)

MATH 444, 445 Foundations of Geometry (3,3) AS,WS Axiomatic treatment of the foundations of Euclidean geometry. Introduction to non-Euclidean geom-

etry. Designed for teaching majors. Prerequisites: 126 or 136; 205 or 308 for 444; 444 for 445.

MATH 461, 462 Combinatorial Theory (3,3) WSp Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisites: at least one 300-level course in mathematics, statistics, or computer science for 461; 461 for 462. (Offered odd-numbered years.)

MATH 464, 465, 466 Numerical Analysis I, II, III (4,4,4) AS,W,Sp Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisites: 308 and 329 or 336, ENGR 141, or CSE 210, 211, or equivalent programming experience for 464; 464 for 465; 307 and 465 for 466.

MATH 491, 492 Introduction to Stochastic Processes (3,3) A,W Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queueing theory, stationary processes. Joint with STAT 491, 492. Prerequisites: 396 for 491; 491 for 492.

MATH 496 Honors Seminar (*, max. 9) AWSp Problem seminar for senior honors students and first-year graduate students. Prerequisite: permission of instructor.

MATH 497 Special Topics in Mathematics for Teachers (2-9) S Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Joint with ED&I 478.

MATH 498 Special Topics in Mathematics (2-5, max. 15) AWSpS Reading and lecture course intended for special needs of advanced students. Prerequisite: permission of instructor.

Courses for Graduates Only

Every year, additional courses are offered, and some of the courses listed are not offered every year. Inquiries about the currently offered courses should be addressed to the Graduate Secretary, Department of Mathematics.

MATH 504, 505, 506 Modern Algebra (3,3,3) A,W,Sp Theory of groups, rings, integral domains, and fields; polynomials; vector spaces, Galois theory, and theory of ideals. Prerequisites: 404 or equivalent for 504; 504 for 505; 505 for 506.

MATH 507, 508 Calculus of Variations I, II (3,3) A,W Necessary and sufficient conditions for a weak and strong extremum. Legendre transformation, Hamiltonian systems. Constraints and Lagrange multipliers. Space-time problems with examples from elasticity, electromagnetics, and fluid mechanics. Sturm-Liouville problems. Approximate methods. Joint with AMATH 507, 508. Prerequisites: 307 or AMATH 351, MATH 328, 329 for 507; 507 for 508; recommended 428, 429 or AMATH 402, 403.

MATH 509 Theory of Optimal Control (3) Sp Trajectories from ordinary differential equations with control variables. Controllability, optimality, maximum principle. Relaxation and existence of solutions. Techniques of nonsmooth analysis. Joint with AMATH 509. Prerequisites: real analysis on the level of 426; background in optimization corresponding to 515. (Offered even-numbered years.)

MATH 510 Seminar in Algebra (*, max. 5) AWSp Prerequisite: permission of graduate program coordinator.

MATH 511, 512, 513 Special Topics in Algebra (2-3, max. 15; 2-3, max. 15; 2-3, max. 15) A,W,Sp In recent years the following subjects have been covered: Abelian groups, algebraic function fields, algebraic number theory, classical groups, game theory, group extensions, lattice theory, Lie algebras, number theory, and structure of rings.

MATH 514 Networks and Combinatorial Optimization (3) A Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Joint with AMATH 514. Prerequisites: 308 and 328, or equivalent.

MATH 515 Fundamentals of Optimization (3) W Maximization and minimization of functions of finitely many variables subject to constraints. Basic problem types and examples of applications; linear, convex, smooth and nonsmooth programming. Optimality conditions. Saddlepoints and dual problems. Penalties, decomposition. Overview of computational approaches. Joint with AMATH 515. Prerequisites: 309, 328, or equivalents.

MATH 516 Numerical Optimization (3) Sp Methods of solving optimization problems in finitely many variables, with or without constraints. Steepest descent, quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic programming. Cutting planes and nonsmooth optimization. Joint with AMATH 516. Prerequisite: 515.

MATH 517 Optimization Under Uncertainty (3) A Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications such as to optimal stopping, inventory control, resource management. Joint with AMATH 517. Prerequisites: 308, 328 and an introduction to basic concepts of probability, such as 390 or 394, 395.

MATH 518 Topics in Applied Optimization (3) Sp Problems and techniques in special areas of optimization, such as engineering design, resource management, stochastic programming, games, variational inequalities and parameter identification in mathematical modeling. Joint with AMATH 518. Prerequisite: 515 or permission of instructor. (Offered odd-numbered years.)

MATH 519 Tensor Analysis (3) A Cartesian tensors; motivation, manipulation, applications. Riemannian space; Christoffel symbols, geodesics, covariant differentiation. Curvature tensor, geodesic deviations, flat space. Special local coordinate systems. Applications to classical mechanics, continuum mechanisms, electromagnetism, relativity. Special topics. Joint with AMATH 519. Prerequisite: 328 or AMATH 401, or permission of instructor.

MATH 521, 522, 523 Advanced Probability (3,3,3) A,W,Sp Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Joint with STAT 521, 522, 523. Prerequisite: 426.

MATH 524, 525, 526 Real Variable (3,3,3) A,W,Sp Metric spaces; general measures and integration; differentiation of set functions; real valued functions on the line; Banach spaces. Prerequisites: 426 or equivalent for 524; 524 for 525; 525 for 526.

MATH 530 Seminar in Analysis (*, max. 5) AWSp Prerequisite: permission of graduate program coordinator.

MATH 531, 532, 533 Special Topics in Analysis (2-3, max. 15; 2-3, max. 15; 2-3, max. 15) AS,WSp,S In recent years the following subjects have been covered: functional analysis, abstract harmonic analysis,

linear operations in Hilbert space, group representations, Fourier series and integrals, topological linear spaces, potential theory, and numerical analysis.

MATH 534, 535, 536 Complex Variable (3,3,3) A,W,Sp Complex numbers, analytic functions, contour integration, power series, analytic continuation, sequences of analytic functions, conformal mapping of simply connected regions. Prerequisites: 426 for 534; 534 for 535; 535 for 536.

MATH 541, 542, 543 Special Topics in Applied Mathematics (2-3, max. 15; 2-3, max. 15; 2-3, max. 15) A,W,Sp Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

MATH 544, 545, 546 Differential Geometry (3,3,3) A,W,Sp 544: differential analysis in R^n , inverse function theorem, vector fields. Stoke's theorem, existence theorems concerning differential equations. Prerequisite: graduate standing or permission of instructor. 545, 546: differentiable manifolds, differential forms, differential geometry in the large. Prerequisites: 544 for 545; 545 for 546.

MATH 547, 548, 549 Functional Analysis (3,3,3) A,W,Sp Review of Banach, Hilbert, and L_p spaces. Locally convex spaces (duality and separation theory, distributions, and function spaces). Operators on locally convex spaces (adjoints, closed graph/open mapping and Banach-Steinhaus theorems). Banach algebras (spectral theory, elementary applications). Spectral theorem for Hilbert space operators. Additional topics chosen by instructor. A working knowledge of real variables, general topology, and complex variables is assumed.

MATH 550 Seminar in Geometry (*, max. 5) AWSp Prerequisite: permission of graduate program coordinator.

MATH 551, 552, 553 Special Topics in Geometry (2-3, max. 15; 2-3, max. 15; 2-3, max. 15) A,W,Sp In recent years, the following subjects have been covered: Riemannian geometry, differentiable manifolds, complex manifolds, geometry of convex bodies.

MATH 554, 555, 556 Several Complex Variables (3,3,3) A,W,Sp Weierstrass preparation theorem and its immediate consequences. Analytic continuation, domains of holomorphy, pseudoconvexity, Cartan-Oka-theory of coherence, embedding theorems; CR-equations. Connections with algebraic geometry. Prerequisites: 534, 535.

MATH 557, 558, 559 Special Topics in Numerical Analysis (2-3, max. 15; 2-3, max. 15; 2-3, max. 15) A,W,Sp Such topics as linear systems, approximation theory, or the numerical solution of differential equations are covered.

MATH 561, 562, 563 General Topology (3,3,3) AS,W,SpS Theory of sets; metric spaces; topological spaces; compactness and other covering properties; function spaces; polyhedra; dimension theory. Prerequisites: 426 for 561; 561 for 562; 562 for 563.

MATH 564, 565, 566 Algebraic Topology (3,3,3) A,W,Sp Classical and modern approaches; complexes and their homology theory; applications. Fixed points, primary obstruction; products and Poincaré duality; axiomatic approach, covering spaces. Prerequisites: 506 for 564; 564 for 565; 565 for 566.

MATH 569 Partial Differential Equations (3) Sp Analytical solution techniques for linear partial differential equations, discussion of how these arise in engineering and science. Transform and Green's function methods. Classification of second-order equations, theory and applications of method of characteristics. Joint with A A 569 and AMATH 569. Prerequisites: A A 403, A A 568 or 428 or permission of instructor.

MATH 570 Seminar in Topology (*, max. 5) AWSp Prerequisite: permission of graduate program coordinator.

MATH 571, 572, 573 Special Topics in Topology (2-3, max. 15; 2-3, max. 15; 2-3, max. 15) A,W,Sp Special topics from general and algebraic topology.

MATH 574, 575, 576 Introduction to Partial Differential Equations (3,3,3) A,W,Sp Theory of distributions and the Fourier transform. Detailed study of main linear equations: wave equation, Laplace's equation, and the heat equation. Sobolev spaces and regularity of solutions of elliptic equations. Theory of pseudodifferential operators. Initial value problem for hyperbolic equations and methods of geometrical optics. Fourier integral operators. The Dirichlet problem and eigenfunction expansions for elliptic equations. Prerequisites: 424, 425, 426, or equivalent, including notion of Lebesgue integral.

MATH 590 Seminar in Probability (*, max. 5) AWSp Prerequisite: permission of instructor.

MATH 591, 592, 593 Special Topics in Probability (2-3, max. 15; 2-3, max. 15; 2-3, max. 15) A,W,Sp In recent years, the following subjects have been covered: advanced probability theory, stochastic processes, distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation).

MATH 594, 595, 596 Numerical Analysis (3,3,3) A,W,Sp Error analysis, linear systems, LU, QR, and SVD factorizations, eigenvalues, least squares, iterative methods for linear and nonlinear systems, optimization, interpolation, approximation, splines, Fourier series, FFTs. Joint with AMATH 594, 595, 596. Prerequisite: 465 or permission of instructor.

MATH 597, 598, 599 Numerical Solutions of Differential Equations (3,3,3) A,W,Sp Numerical quadrature and solution of ordinary differential equations, initial and boundary value problems, solution of partial differential equations by finite difference and finite element methods, stability analysis and boundary conditions, solution of large sparse linear systems. Joint with AMATH 597, 598, 599. Prerequisite: 466 or permission of instructor.

MATH 600 Independent Study or Research (*) AWSpS

MATH 700 Master's Thesis (*) AWSpS

MATH 800 Doctoral Dissertation (*)

Microbiology

G305 Health Sciences

Microbiology is a natural science that deals with cellular and acellular forms of life, including bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these entities, their effects on man and the environment, and how they can be exploited to provide useful products.

Undergraduate Program

Bachelor of Science Degree

Peg Powell, Adviser
G315 Health Sciences

Admission Requirements: Minimum 75 credits applicable to graduation, with an overall grade-point average of 2.25 in required chemistry and biology courses. Students should complete departmental requirements in biology and chemistry (inorganic and organic) before applying for admission.

Major Requirements: 45 credits in biological science: BIOL 201, 202, 203 (preferred) or an equivalent 10 to 15 credits in botany or zoology; a minimum of 30 credits in microbiology courses and approved electives, in-

cluding MICRO 410, 411, 412, 402, 431, 441, 442, 443, and 496 (MICRO 301, 302, 319 cannot be used). PHYS 114, 115, 116 or 121, 122, 123; CHEM 140, 150, 151, 160, and CHEM 223, 224 or 237, 238, 239 or 335, 336, 337 (three-quarter sequence preferred), CHEM 321; MATH 124 or 157 or Q SCI 381 or STAT 311. Microbiology majors must maintain a minimum grade-point average of 2.25 in all required and elective courses used towards graduation. Transfer students must complete at least 15 of the 30 credits of required microbiology courses at the University.

Students interested in majoring in microbiology should obtain the department undergraduate guide, available in G315 Health Sciences.

For faculty listing and course descriptions, see *School of Medicine* section.

Middle Eastern Studies

See *International Studies*.

Music

106 Music

The School of Music prepares students for careers as composers, performers, teachers, or researchers. It also offers general courses to nonmajors designed to enhance the student's understanding of the art of music.

Undergraduate programs include: four-year programs leading to either the Bachelor of Arts or Bachelor of Music and five-year programs leading to the concurrent Bachelor of Arts and Bachelor of Music double degrees.

Two undergraduate music-related degree programs, ethnomusicology and music technology, are offered through General Studies. See music or general studies adviser for details.

Graduate programs lead to the degrees of Master of Arts, Master of Music, Doctor of Musical Arts, and Doctor of Philosophy.

Undergraduate Program

Admission Requirements: All students must audition and qualify at the 300 level or better in their principal performance areas in order to be admitted as music majors and to receive private instruction.

CLARIFICATION OF MAJOR STATUS

Major status in performance areas is accorded when, after proper admission is acknowledged and the required School of Music audition is completed, the student commences Applied Music study in the major area with an approved faculty member of the School of Music. Such study must be undertaken during the first quarter of registration and during each subsequent quarter of registration until the minimum program requirements have been met. Applied Music study should continue as long as the student is registered and in residence until the final approved recital is given. Mere acceptance into a program does not constitute major status.

In academic areas and composition, the faculty members of the particular areas determine the status of individuals accepted. Any departure from the above requirements must have the recommendation of the appropriate divisional Chairperson and the written consent of the Director of the School of Music.

In order to retain major status, the student must make and demonstrate consistent and acceptable progress at the annual required jury. Participation in at least one School of Music ensemble is required each quarter in which a student receives Applied Music instruction. Also, basic piano proficiency is required for all majors. Non-keyboard majors must enroll in the MUSAP 133-235 series until appropriate proficiency is attained.

Core Requirements: The music theory-history core, required in each of the undergraduate curricula, is as follows:

Courses	Credits
MUSIC 110, 111, 112 First-Year Theory (3,3,3) . . .	9
MUSIC 113, 114, 115 Ear Training (1,1,1)	3
MUSIC 210, 211, 212 Second-Year Theory (3,3,3) . . .	9
MUSIC 213, 214, 215 Music After 1750 (3,3,3) . . .	9
MUSIC 310 Modal Counterpoint (3)	3
MUSIC 311 Tonal Counterpoint (3)	3
MUSIC 312 Twentieth-Century Techniques (3) . . .	3
MUSIC 313, 314 Music Before 1750 (3,3)	6
Music upper-division theory or history electives. . .	9-10
	54-55

Bachelor of Arts Degree

General Requirements: A minimum of 180 credits, of which 90 must be taken in departments other than the School of Music. All College of Arts and Sciences graduation requirements must be met. A grade-point average of 2.50 in music courses is required for graduation.

MUSIC THEORY-HISTORY OPTION

Major Requirements: Music theory-history core, plus 9 credits in vocal or instrumental instruction, and six quarters of ensembles, for a minimum of 69 credits.

VOCAL OR INSTRUMENTAL OPTION

Major Requirements: Music theory-history core (excluding the 9-10 credits in theory or history electives), 18 credits in vocal or instrumental instruction, and seven quarters in ensembles, for a minimum of 70 credits.

Bachelor of Music Degree

Admission Requirements: Intended for specially qualified students who wish to emphasize professional training in performance or composition within a four-year program. Students should see the undergraduate adviser regarding special admission procedures for this program. Admission during the sophomore year is recommended.

General Requirements: A minimum of 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including linked sets and W courses as they apply), except that students must fulfill the distribution requirement in only two of the following three areas: humanities, social sciences, and natural sciences. Of the remaining 120 credits, 100 may be in the major within the School of Music, but the additional 20 must be outside the primary area of the major (e.g., for Applied Music majors in nonperformance music areas).

Major Requirements: Applied music major requirements to include: Music theory-history core (54-55 credits), applied music (18-36 credits), recitals (1-2 credits), and ensembles (9-18 credits). See undergraduate adviser for requirements in each major area (piano, organ, strings, voice, orchestral instruments, and guitar).

Composition major requirements to include: Music theory-history core (54-55 credits), including MUSIC 487 and MUSIC 490 among upper-division electives; composition (36 credits), applied music (18 credits), ensembles (9-18 credits), and conducting (3 credits).

Jazz Studies major requirements to include: Music theory-history core (54-55 credits), applied music (24 credits), ensembles (15 credits), additional requirements (24 credits). See undergraduate adviser for special requirements in this program.

Piano proficiency at MUSAP 235 level and a grade-point average of 3.20 in music courses are required for graduation.

Bachelor of Arts and Bachelor of Music Degrees (Concurrent)

General Requirements: A minimum of 225 credits, of which 90 must be in areas other than music; all College of Arts and Sciences graduation requirements must be met. Of the remaining 135 credits, 115 may be in the major within the School of Music, but the additional 20 must be outside the primary area of the major (e.g., for Applied Music majors, in nonperformance music areas).

Major Requirements: 2.50 grade-point average in music courses and piano proficiency at MUSAP 235 level are required for graduation. See undergraduate adviser for special requirements in ensembles.

COMPOSITION MAJOR

Courses	Credits
Music theory-history core	54-55
MUSIC 191, 291, 391, 491 Composition (9,9,9,9)	36
MUSIC 487 Tonal Counterpoint (3)	3
MUSIC 490 Orchestration (3)	3
Vocal or instrumental instruction	18
MUSIC 380, 381, 382 Conducting (1,1,1) . . .	3
Ensembles	12-24
	129-142

MUSIC HISTORY MAJOR

Courses	Credits
Music theory-history core	54-55
5 credits from MUSIC 316, 317, 318	5
3 credits from MUSIC 400, 401, 402, 403 . . .	3
3 credits from MUSIC 404, 407, 410, 413, 417, 420	3
3 credits from MUSIC 405, 408, 411, 414, 418, 421	3
3 credits from MUSIC 406, 409, 412, 415, 419, 422, 423, 424, 425	3
Music history-literature electives	9
Music electives	9
Vocal or instrumental instruction	18-24
Ensembles	12-24
	119-138

Students who intend to pursue graduate studies are strongly advised to establish proficiency in German or French and to acquire some acquaintance with one or two additional foreign languages. For emphasis in ethnomusicology, consult the music adviser regarding suitable area studies other than music.

PIANO MAJOR

Courses	Credits
Music theory-history core	54-55
MUSAP 321 Private Instruction: Piano.	27
MUSAP 421 (two years) Private Instruction: Piano	18
MUSIC 326, 327, 328 Repertoire (2,2,2) . . .	6
MUSIC 434, 435, 436 Pedagogy (2,2,2) . . .	6
MUSIC 479 Senior Recital	1
Ensembles	15-30
	127-143

STRING INSTRUMENT MAJOR

Courses	Credits
Music theory-history core to include MUSIC 487 Tonal Counterpoint	54-55
MUSAP 324 through 326 Private Instruction: Violin-Viola, Violoncello, Contrabass	27
MUSAP 424 through 426 (two years) Private Instruction: Violin-Viola, Violoncello, Contrabass	18
MUSAP 301 Private Instruction: Piano or	

MUSAP 233, 234, 235 Secondary Piano (2,2,2)	6
MUSIC 380 Basic Principles of Conducting	1
MUSIC 434, 435, 436 Pedagogy (2,2,2)	6
MUSIC 479 Senior Recital	1
Ensembles	21-42
	134-156

(Orchestra is required during each quarter of Music Applied Instruction.)

Violinists should complete one quarter of viola.

VOICE MAJOR

Courses	Credits
Music theory-history core	54-55
MUSAP 320 Private Instruction: Voice	27
MUSAP 420 (two years) Private Instruction: Voice	18
MUSAP 301 Private Instruction: Piano or MUSAP 233, 234, 235 Secondary Piano (2,2,2)	6
MUSIC 302, 303 Music Theatre Technique (1,1)	2
MUSIC 380, 381, 382 Conducting (1,1,1)	3
MUSIC 326, 327, 328 Repertoire (2,2,2)	6
MUSIC 434, 435, 436 Pedagogy (2,2,2)	6
MUSIC 479 Senior Recital	1
Ensembles	15
	138-139

Voice majors should establish proficiency in French, German, or Italian and complete an additional 15 credits in a second language from this group as well as 5 credits in SPHSC 300 (Speech Science).

ORGAN MAJOR

Courses	Credits
Music theory-history core to include MUSIC 487 Tonal Counterpoint	54-55
MUSAP 322 Private Instruction: Organ	27
MUSAP 422 (two years) Private Instruction: Organ	18
MUSAP 301 Piano (2,2,2)	6
MUSIC 380, 381, 382 Conducting (1,1,1)	3
MUSIC 458, 459 Repertoire (3,3)	6
MUSIC 479 Senior Recital	1
Ensembles	15-30
	130-146

ORCHESTRAL INSTRUMENT MAJOR

Courses	Credits
Music theory-history core	54-55
MUSAP 327 through 337 Private Instruction MUSAP 427 through 437 (two years) Private Instruction	27
MUSAP 301 Private Instruction: Piano or MUSAP 233, 234, 235 Secondary Piano (2,2,2)	6
MUSIC 380, 381, 382 Conducting (1,1,1)	3
MUSIC 479 Senior Recital	1
Ensembles	21-42
	130-152

GUITAR MAJOR

Courses	Credits
Music theory-history core to include MUSIC 487 Tonal Counterpoint	54-55
MUSAP 338 Private Instruction: Guitar	27
MUSAP 438 (two years) Private Instruction: Guitar	18
MUSAP 301 Private Instruction: Piano or MUSAP 233, 234, 235 Secondary Piano (2,2,2)	6

MUSIC 380, 381, 382 Conducting (1,1,1)	3
MUSIC 326, 327, 328 Repertoire (2,2,2)	6
MUSIC 434, 435, 436 Pedagogy (2,2,2)	6
MUSIC 479 Senior Recital	1
Ensembles	12-18
	133-140

MUSIC EDUCATION MAJOR

Courses	Credits
Music theory-history core exclusive of MUSIC 310, but to include 12 credits in arranging, jazz, composition, and ethnomusicology	54
MUSIC 380, 381, 382 Conducting (1,1,1)	3
Two courses from the following	6
MUSIC 343 Musical Acoustics (3)	
MUSIC 344 Psychology of Music (3)	
MUSIC 345 Sociology of Music (3)	
18 credits from the following:	18
MUSIC 340 Music in General Education (3)	
MUSIC 440 Music in Early Childhood (3)	
MUSIC 432 The General Music Class (3)	
MUSIC 442 Instrumental Curriculum: Methods and Materials (3)	
MUSIC 443 Choral Curriculum: Methods and Materials (3)	
MUSIC 452 Ethnomusicology in the Public Schools (3)	
MUSIC 465 Introduction to Music Classroom Management (1-6, max. 6) or Major performance medium	22
Secondary performance medium(s) including MUSIC 389 (2-3), and analog or digital music synthesis (3)	18
Ensembles	12-24
	133-145

PRE-SYSTEMATIC MUSICOLOGY MAJOR

Courses	Credits
Music theory-history core to include MUSIC 316 or 317 or 318 Music Cultures of the World	55
MUSIC 380, 381, 382 Conducting (1,1,1)	3
MUSIC 343 Musical Acoustics	3
MUSIC 344 Psychology of Music	3
MUSIC 345 Sociology of Music	3
MUSIC 456 Musical Applications of Digital Signal Processing (3) or MUSIC 457 Audio Engineering (3)	3
MUSIC 488 Computer Applications to Music MUSIC 499 Undergraduate Research (Senior Project)	6
Music electives	9
Major performance medium	18
Secondary performance medium	8
Ensembles (12 quarters)	12-24
	126-138

JAZZ STUDIES MAJOR

Courses	Credits
Music theory-history core	54-55
exclusive of MUSIC 313, 314, but to include MUSIC 207, 208, 209, 425, and 9-10 credits of theory/history electives chosen from:	
MUSIC 216, 217, 218 Introductory Composition (2,2,2)	
MUSIC 313, 314 Music Before 1750 (3,3)	
MUSIC 316, 317, 318 Music Cultures of the World (5,5,5)	
MUSIC 367, 368, 369 Beginning Jazz Improvisation (1,1,1)	
MUSIC 423 Twentieth-Century Music: To 1945 (3)	
MUSIC 424 Twentieth-Century Music: After 1945 (3)	

Additional requirements	17-19
3-5 credits from the following:	
MUSIC 319 Afro-American Music (5) or MUSIC 317 Music Cultures of the World (5) or MUSIC 427 Music of Africa (3) or MUSIC 433 Music of Latin America (3)	

Remaining 14 credits to include:

MUSIC 336 Jazz Arranging (2)	
MUSIC 467, 468, 469 Advanced Jazz Improvisation (1,1,1)	
MUSIC 388 Jazz Pedagogy (2)	
MUSAP 301 Private Instruction: Piano or MUSAP 233, 234, 235 Secondary Piano (2,2,2)	
MUSIC 479 Senior Recital (1)	
Applied Instruction	39
MUSAP 321 through 328 Private Instruction MUSAP 421 through 438 (two years) Private Instruction	
MUSIC 464 Jazz Laboratory (9)	
Ensembles	21
21 credits from the following:	
MUSEN 340 Vocal Jazz Ensemble (1, max. 6)	
MUSEN 345 Jazz Workshop (1, max. 12)	
MUSEN 346 Studio Jazz Ensemble (1, max. 6)	
MUSEN 446 Advanced Studio Jazz Ensemble (1, max. 9)	
	131-134

Graduate Program

Graduate programs in the School of Music take into consideration the dual nature of music's subject matter. First, it is one of the creative arts, requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development. Advanced study presupposes an emphasis in one or the other direction without entirely neglecting the alternate aspect.

Special Requirements

Upon admission to the Graduate School as a music major, the student must further qualify for a specific area of specialization. See below.

Financial Aid

A limited number of teaching and staff assistantships are available in voice, theory and ear training, music history, ethnomusicology, piano teaching and accompanying, and choral conducting. Accompanists are also employed at hourly rates. Competitive auditions for performance scholarships for new and returning students are held each year. The School of Music office may be contacted for details.

Research Facilities

The Music Building contains the music library, an electronic composition laboratory, a listening center, a systematic musicology laboratory, ethnomusicology archives, and the usual studio, practice, and classroom facilities of a modern music department. Ensembles available for student participation include opera, Contemporary Group, Collegium Musicum, and several non-Western ensembles among the many traditional large and small choral and instrumental groups.

Master of Music, Doctor of Musical Arts Degrees

The programs with more creative emphasis lead to the degrees of Master of Music and Doctor of Musical Arts. Areas of specialization: performance (piano, organ, voice, strings, other orchestral instruments), instrumental conducting, choral conducting, composition, opera production; and, at the doctoral level, music education. With the exception of music education at the doctoral level, the Graduate Record Examination is not required for application to these graduate programs.

Master of Music Degree

Admission Requirements: Audition required for entrance to performance and composition. Entrance to other areas by permission. Details of requirements for each of the areas of specialization are available from the graduate program coordinator.

Graduation Requirements: 45 credits, of which 18 must be in courses at the 500 level or above. Demonstration of proficiency in one language from French, German, Italian, and Latin. *With thesis*—Program to include 9 credits in thesis. *Without thesis*—A final oral examination is required.

Doctor of Musical Arts Degree

Admission Requirements: Audition required for performance and composition. Entrance to other areas by permission. Details of requirements for each of the areas of specialization are available from the graduate program coordinator.

Graduation Requirements: Three academic years of study; dissertation: in lieu of a full-length dissertation, a thesis in three parts may be substituted, of which one must be a research paper and two may be additional research papers, or musical compositions, or documented public performances, or documented lecture demonstrations. Demonstration of proficiency in one language from among French, German, Italian, and Latin, as soon as possible, but, in any case, before taking the General Examination.

Master of Arts, Doctor of Philosophy Degrees

The research-oriented programs lead to the degrees of Master of Arts and Doctor of Philosophy. Areas of specialization: music theory, music history, ethnomusicology, systematic musicology, and, at the master's level, music education. The Graduate Record Examination is required for application to some of these graduate programs. Check individual program requirements.

Master of Arts Degree

Admission Requirements: Requirements vary for the different areas of specialization. Details of requirements for each of the areas of specialization are available from the School of Music graduate program coordinator.

Graduation Requirements: 45 credits, of which 18 must be in courses at the 500 level or above and 9 in thesis. Demonstration of proficiency in one language from among French, German, Italian, and Latin or another language as is necessary for research.

Doctor of Philosophy Degree

Admission Requirements: Requirements vary for the different areas of specialization. Details of requirements for each of the areas of specialization are available from the School of Music graduate program coordinator.

Graduation Requirements: Three academic years of study; dissertation. Demonstration of proficiency in two approved languages as soon as possible, but, in any case, before taking the General Examination.

Lishner, Leon, 1964, (Emeritus), B.S.S., 1937, City College (New York); voice.

Lundquist, Barbara R.,* 1966, M.S., 1959, Montana State; D.M.A., 1973, Washington; music education, systematic musicology, sociomusicology, music instruction, ethnomusicology in school.

McColl, William D., 1968, Graduate, 1955, State Academy of Music (Vienna); clarinet.

Moore, John T.,* 1948, (Emeritus), M.Mus., 1941, Illinois; piano.

Munro, Kathleen, 1929, (Emeritus), M.A., 1927, Columbia; Ph.D., 1937, Washington; music history and literature.

Neuman, Daniel M.,* 1978, (Anthropology), † Ph.D., 1974, Illinois; ethnomusicology.

O'Doan, Neal D.,* 1966, M.Mus., 1961, University of the Pacific; Post Graduate Diploma, 1962, Juilliard; piano.

Rahn, John,* 1975, M.F.A., 1972, Ph.D., 1974, Princeton; theory/composition.

Sakata, Hiromi Lorraine,* 1977, M.A., 1968, Ph.D., 1976, Washington; ethnomusicology.

Siki, Bela,* 1966, dipl. de Virtuosity, 1948, Conservatoire de Musique (Switzerland); piano.

Skowronek, Felix E.,* 1968, B.Mus., 1956, Curtis; flute.

Smith, William O.,* 1966, (Emeritus), M.A., 1952, California (Berkeley); theory/composition.

Sokol, Vilem,* 1948, (Emeritus), Grad. Cert., 1939, Conservatory of Music (Prague); M.Mus., 1946, Oberlin; violin, viola.

Staryk, Steven S.,* 1987, studied at the Royal Conservatory of Music (Toronto); violin.

Storch, Laila,* 1968, Diploma, 1945, Curtis; B.A., 1964, Wilkes; oboe.

Terry, Miriam, 1930, (Emeritus), M.A., 1948, Washington; music history and literature.

Thome, Diane D.,* 1977, M.A., 1966, Pennsylvania; M.F.A., 1970, Ph.D., 1973, Princeton; theory/composition.

Tufts, Paul D., 1958, (Emeritus), M.A., 1951, Washington; theory/composition.

Verrall, John W., 1948, (Emeritus), Cert. of Mus., 1932, Liszt Conservatory (Budapest); theory/composition.

Zsigmondy-Liedemann, Denes, 1972, (Emeritus), Masterclass, 1943, Liszt Academy (Budapest); violin.

Associate Professors

Alavedra, Montserrat,* 1978, Diploma, 1973, Escuela Superior de Canto (Spain); voice.

Bauman, Thomas A.,* 1989, M.A., 1973, Ph.D., 1977, California (Berkeley); music history and literature.

Benshoof, Kenneth W., 1963, M.A., 1963, San Francisco State; theory/composition.

Bernard, Jonathan,* 1987, M.A., 1973, M.Phil., 1975, Ph.D., 1977, Yale; theory.

Bozarth, George S., Jr.,* 1978, M.F.A., 1973, Ph.D., 1978, Princeton; music history and literature.

Campbell, Patricia Shehan,* 1989, M.M., 1975, Akron; Ph.D., 1981, Kent State; music education.

Cooper, Elneta A.,* 1972, M.Ed., 1959, Wayne State; D.Ed., 1971, Oregon; music education.

Ellingson, Ter,* 1981, M.A., 1970, Chicago; Ph.D., 1979, Wisconsin (Madison); ethnomusicology.

Geissmar, Else Johanna-Marie, 1947, (Emeritus), M.Mus., 1944, Michigan; piano.

Jussila, Clyde F.,* 1971, (Emeritus), (Education), M.S., 1951, Kansas State; music education.

Kappy, David L., 1979, M.M., 1971, Wisconsin; horn.

Liotta, Vincent J.,* 1983, (Drama), M.S., 1975, Indiana; opera stage production.

McCabe, Robin L.,* 1987, M.Mus., 1973, Washington; D.M.A., Juilliard; piano.

Rosinburn, Ralph R.,* 1948, (Emeritus), M.A., 1948, Washington; opera production.

Saks, Toby,* 1976, M.S., 1966, Juilliard; violoncello.

Salzman, Timothy,* 1987, M.Mus., 1979, Northern Illinois; wind ensembles.

Starr, Lawrence,* 1977, Ph.D., 1973, California (Berkeley); music history and literature.

Terry, Carole R.,* 1979, M.Mus., 1973, Eastman School of Music (Rochester); D.M.A., 1977, Stanford; organ, harpsichord.

Assistant Professors

Berendsen, Emilie,* 1988, M.A., 1963, Washington; voice.

Karpen, Richard,* 1989, M.A., 1986, D.M.A., 1989, Stanford; theory/composition.

Keefe, Douglas H.,* 1984, M.S., 1977, Illinois Institute of Technology; Ph.D., 1981, Case Western Reserve; systematic musicology.

Michaelian, Patricia,* 1984, Graduate Diploma, 1970, Curtis Institute of Music; piano.

Seales, Marc, 1987, B.A., 1978, Western Washington; jazz studies, keyboard.

Taricani, JoAnn,* 1980, M.A., 1977, Ph.D., 1986, Pennsylvania; music history and literature.

van den Toorn, Pieter,* 1989, M.A., 1984, Harvard; Ph.D., 1988, California (Berkeley); theory/composition.
 Waterman, Christopher A.,* 1985, M.A., 1981, Ph.D., 1986, Illinois; ethnomusicology.

Senior Artist in Residence

Erös, Peter,* 1989, Diploma, 1956, Franz Liszt Academy.

Lecturers

Bissell, William E., 1970, M.S., 1956, Illinois; marching band.

Brockman, Michael, 1987, M.Mus., 1982, New England Conservatory; saxophone.

Collier, Thomas, 1980, B.A., B.Mus., 1971, Washington; percussion.

Cummings, Roy M., 1970, B.A., 1961, Washington; trumpet, jazz.

Davis, Raymond J., 1989, Diploma, 1959, Juilliard; violoncello.

Duisberg, Robert A., 1988, M.M., 1977, D.M.A., 1980, M.S., 1982, Ph.D., 1986, Washington; systematic musicology.

Herbolzheimer, Bern H., 1984, M.Mus., 1973, Washington; vocal coaching.

Kauffman, William H., 1989, M.A., 1983, Ph.D., 1986, Washington.

Morgan, Michael G., 1988, Diploma, 1970, Curtis Institute; string bass.

Novacek, Stephen, 1984, B.Mus., 1975, California State (Northridge); guitar.

Porter, Neal, 1986, M.Ed., 1971, Seattle University; music education.

Schwede, Walter J., 1989, M.M., 1974, Catholic University of America; violin.

Seibert, Peter, 1971, M.A.T., 1958, Harvard; M.A., 1965, Rutgers; recorder.

Shumsky, Eric G.,* 1988, Diploma, 1975, Juilliard.

Vinikow, Peter N., 1989; electric bass, jazz studies.

Vokolek, Pamela C., 1988, M.Mus., 1965, Cleveland Institute; harp.

Course Descriptions

Courses for Undergraduates

Music

MUSIC 110, 111, 112 First-Year Theory (3,3,3) A,W,Sp *Benshoof, Karpen* Study of basic musical concepts and terminology through a program of listening, analysis, and keyboard practice. To be taken concurrently with 113, 114, 115. Required for music majors.

MUSIC 113, 114, 115 Ear Training (1,1,1) A,W,Sp Development of aural skills through an emphasis on dictation, using sight-singing and keyboard skills as adjuncts. Development of ability to hear melodic, rhythmic, and harmonic elements of music accurately, and to commit them to notation. To be taken concurrently with 110, 111, 112.

MUSIC 116, 117, 118 Elementary Music Theory (2,2,2) A,W,Sp For nonmusic majors. 116: For people with no hands-on music experience. Rudiments of music; notation of time, pitch small structures (e.g., some scales, chords, rhythmic patterns), some analysis. 117: For students who can read music having some performance experience. 118: For students who read music, have some performance experience, are familiar with scales, chords, intervals. Includes analysis composition in various styles. Prerequisites: some music training including ability to read music or 116 for 117; familiarity with scales, chords, intervals or 117 for 118.

MUSIC 119 Music Fundamentals (2) Course emphasizes the development of aural perception using musical examples from music cultures of the world. Primarily for non-majors.

MUSIC 120 Survey of Music (5) AWSp Studies in listening with emphasis on the changing components of Western art music. Illustrated lectures, laboratory section meetings, and presentations by guest artists.

MUSIC 121 The Orchestra (2) Development of the orchestra and its literature.

MUSIC 122 The Opera (2) An introduction to opera through selected masterworks, from Monteverdi to the present. Primarily for non-majors.

MUSIC 137, 138, 139 Class Instruction: Voice (1,1,1) A,W,Sp Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Designed primarily for Music Education majors. Prerequisite: ability to sight read.

MUSIC 160 Anglo-American Folk Music (5) W Genres and styles from earliest roots to the 1960s; Anglo-American ballads, dance music, French and other European immigrant groups.

MUSIC 161 American Musical Theater (5) Historical and stylistic study of the development of the American musical theater. European roots in opera and operetta. Contributions from jazz and popular music. Selected musicals studied.

MUSIC 162 American Popular Song (5) AWSp Historical, social, and stylistic study of popular idioms from the late 19th century to the present. Most attention to contemporary idioms (rock, country-western, soul, disco). Various facets of the industry examined to learn how they influence taste and musical style.

MUSIC 191 Composition (3, max 9) AWSp One-hour private instruction and one-hour laboratory session each week. Intended to develop skill in creative musical expression. For composition majors only.

MUSIC 200 Music and the Child (3) AWSp Introductory orientation to music designed to acquaint the student with the structural and esthetic elements in music and those music-related processes of self-expression and communication basic to a child's education. Prerequisite to the course in instructional methodology.

MUSIC 207, 208, 209 Second-Year Ear Training (1,1,1) A,W,Sp To be taken concurrently with 210, 211, 212. Prerequisites: 112 and 115.

MUSIC 210, 211, 212 Second-Year Theory (3,3,3) A,W,S *Beale, Benshoof, Bernard, Karpen, Thome, van den Toorn* Practical writing and analytic experience in diatonic and chromatic harmony as it was used during the eighteenth and nineteenth centuries. To be taken concurrently with 213, 214, 215. Prerequisites: 112 and 115.

MUSIC 216, 217, 218 Introductory Composition (2,2,2) A,W,Sp *Benshoof* For students not majoring in composition. Prerequisite: 112.

MUSIC 237 Secondary Class Instruction: Voice (2, max. 8) AWSp Continuation of basic fundamentals of good singing: breathing, diction, voice focus and repertoire. Designed for students not yet prepared for private instruction. For music majors only. Prerequisite: 139.

MUSIC 270 World Popular Music (3) *Waterman* A global survey of popular music, including Latin America, Africa, Eastern Europe, the Middle East, Asia, and the Pacific. Emphasis on students' ability to recognize styles and to analyze the social and historical processes that have shaped them.

MUSIC 291 Composition (3, max. 8) AWSp One-hour private instruction and one-hour laboratory session per week. Prerequisite: 191.

MUSIC 300 Music of Greater Mexico (3) Regional styles of Mexico; consideration of pre-Hispanic Indian origins and the music of Chicanos in the American Southwest.

MUSIC 301 Piano Technology (3) Evolution of the piano; intonation and temperament theory; principles of tuning, voicing, regulating, and evaluating pianos. Prerequisite: permission of instructor.

MUSIC 310 Medieval/Renaissance Counterpoint (3) A *Bernard, Karpen, Thome, van den Toorn* Intensive study in the discipline of some contrapuntal style from the Medieval or Renaissance periods. Prerequisites: 212 and 215 or equivalent; to be taken concurrently with 313.

MUSIC 311 Tonal Counterpoint (3) W *Beale, Bernard, Karpen, Thome, van den Toorn* Basic techniques of baroque counterpoint and introduction to the fugue. Prerequisites: 212 and 215; to be taken concurrently with 314.

MUSIC 312 Twentieth-Century Techniques (3) Sp Practical writing and analytical study of twentieth-century composition techniques from Debussy to the present.

MUSIC 316, 317, 318 Music Cultures of the World (5,5,5) A,W,Sp 316: Near East, Central Asia, Far East, South and southeast Asia, Indonesia, and the Philippines. 317: Music of sub-Saharan Africa, Americas, and Oceania. 318: Folk and popular music in western and eastern Europe and the Americas.

MUSIC 319 Afro-American Music (5) Centers on Black music in the United States, but also clarifies the relationship of this music to the musics of other Afro-American cultures as well as to their African roots.

MUSIC 326, 327, 328 Repertoire (2,2,2) A,W,Sp For music majors.

MUSIC 331 History of Jazz (3) Survey of the major periods and styles of jazz, New Orleans jazz to the avant-garde and popular jazz of today. Studies the main characteristics of each style.

MUSIC 334 Band Arranging (2) W Prerequisite: 212.

MUSIC 336 Jazz Arranging (2) A Writing in jazz style for various instrumental combinations. To be able to arrange for modern jazz orchestra. Prerequisite: 212.

MUSIC 338 Baroque Ornamentation (2) *Terry* Musical ornamentation in France, Spain, England, Italy, and Germany from 1608 to 1800, with special reference to the harpsichord.

MUSIC 340 Music in General Education (3) AW An orientation to the broad scope of issues regarding music in the schools (K-12), including curriculum, the development of instructional strategies, and evaluation techniques.

MUSIC 343 Musical Acoustics (3) A *Keefe* How musical instruments function and interact with acoustics of rooms, with particular emphasis upon musical aspects of acoustics.

MUSIC 344 Psychology of Music (3) W *Carlson* Human response to musical phenomena, with particular emphasis on perception, learning, measurement, and functional applications.

MUSIC 345 Sociology of Music (3) Sp *Lundquist* Interrelationships between music and its social context. Specific musical phenomena and the social factors influencing their development.

MUSIC 350, 351, 352 Choral Conducting (1,1,1) A,W,Sp *Kaplan* Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for

music and music education majors. Prerequisite: 212 for 350; 350 for 351; 351 for 352, or permission of instructor; to be taken concurrently with MUSEN 307, 507.

MUSIC 366 Cylinders to Platters—A Survey of Recorded Music Since 1888 (3) A Music as reflected through the influences of the recording industry and the development of related technologies. Examines social and artistic impacts that the recording age has brought to American and European musical cultures. Recommended: 120 and/or 162.

MUSIC 367, 368, 369 Beginning Jazz Improvisation I, II, III (1,1,1) A,W,Sp Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: 212 or permission of instructor.

MUSIC 379 Junior Recital (1) AWSp For participants in the Bachelor of Music degree program only.

MUSIC 380, 381, 382 Instrumental Conducting (1,1,1) A,W,Sp Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques and score study. Prerequisites: 212 or permission of the instructor.

MUSIC 384 Ideas in Music (5) Taricani Examines selected sources and compositions of music from the Western tradition (from the tenth through the twentieth centuries), in relation to the intellectual background of the periods and countries that produced them. Musical studies accompanied by assigned readings in philosophical, religious, literary, and artistic texts in addition to the primary readings in musical history.

MUSIC 386 Multimedia Music (3) W Dempster Survey tracing the development of multimedia music since 1950 (experimental combinations of music with other art forms in unfamiliar circumstances).

MUSIC 388 Jazz Pedagogy (2) Stylistic and aesthetic developments in the performance of jazz. Key musical ingredients in the evolution of jazz as an art form and the skills commensurate with teaching these. Designed for music majors

MUSIC 389 World Music (2-3, max. 18) AWSp World music traditions taught by visiting native artists. Consult ethnomusicology staff for current offerings. (Formerly MUSAP 489.)

MUSIC 391 Composition (3, max. 9) AWSp One-hour private instruction and one-hour laboratory session each week. Prerequisite: 291.

MUSIC 395 Compositions with Synthesizers (3, max. 9) Karpen Musical composition using special-purpose hardware music synthesizers, which may be interfaced to microcomputers in a music workstation system. Prerequisite: permission of instructor.

MUSIC 425 Jazz History and Analysis (3) W Collier Major eras and styles of jazz with emphasis on technical aspects of jazz music: composition, arranging, improvisation practices. Prerequisite: music major or permission of instructor.

MUSIC 427 Music of Africa (3) Music cultures of sub-Saharan Africa. Traditional styles and more recent developments. Open to all students with an interest in the area. Prerequisite: 317 or permission of instructor.

MUSIC 428 Music of North India (3) Classical music of North India, the Hindustani tradition with emphasis on the Dhrupad and Khyal styles. Recommended: some background in either ethnomusicology or South Asian Studies.

MUSIC 430 Organology (3) Systematic study of musical instruments, involving the history, acoustical phenomena, and physical topologies of instruments from around the world, with emphasis on non-Western music. Prerequisite: ethnomusicology major or permission of instructor.

MUSIC 431 The Curriculum in Music Education (3, max. 6) Principles and practices of curriculum design applied to the development of the music curriculum. Individual or group work on elementary and secondary school music curriculum projects. Prerequisite: music teaching, student teaching, or permission of instructor.

MUSIC 432 The General Music Class (3) Sp Lundquist The teaching of music and its literature in music classes other than traditional ensembles from grade four through adults.

MUSIC 433 Music of Latin America (3) The Indian, African, and European music of the Spanish-, French-, and Portuguese-speaking New World countries. Prerequisite: 318 or permission of instructor.

MUSIC 434, 435, 436 Pedagogy (2,2,2) A,W,Sp Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 438 Problems in Contemporary Music Performance (3, max 9) AWSp An active course examining and solving problems relevant to the successful performance of 20th-century music. Preparation for complex rhythms, odd groupings, new notation, and extended performing techniques. Prerequisite: permission of instructor.

MUSIC 439 Music of Indonesia and the Philippines (3) Includes the gong culture traditions of Sumatra, Sunda, Java, Bali, Sunda Islands, and the Philippines. Open to students in music and to students with an interest in the area. Prerequisite: 316 or permission of instructor.

MUSIC 440 Music in Early Childhood (3) A Identification and selection of appropriate objectives, materials, teaching strategies and evaluation techniques used in teaching music from birth through grade 3, with consideration of various approaches (e.g., Delcroze, Kodaly, Orff) for early childhood development in music.

MUSIC 442 Instrumental Curriculum: Methods and Materials (3) Study of the organization and administration of school instrumental music; the selection and use of materials and teaching strategies from beginning to advanced levels of instrumental instruction.

MUSIC 443 Choral Curriculum: Methods and Materials (3) W Conlon, Lundquist Study of the organization and administration of school choral music; the selection and use of materials and teaching strategies from beginning to advanced levels of choral instruction. Prerequisites: 340 and permission of instructor.

MUSIC 444 Music of the Near East (3) Sakata Classical and folk musical traditions of Iran, Turkey, and the Arab world. Prerequisite: 316 or permission of instructor.

MUSIC 445 Selected Topics in Ethnomusicology (3, max 9) AWSp Deals with topics not covered by regular courses in ethnomusicology. Frequently taught by visiting lecturers. Content varies with different instructors. Prerequisite: permission of instructor.

MUSIC 447 Music of Southern India (3) Classical music of South India, the Karnatic tradition, with emphasis on the concert repertoire. Recommended: background in either ethnomusicology or South Asian Studies.

MUSIC 448 Instrumental Music of China (3) Instrumental traditions of China from the earliest times to the present. Confucian philosophies that relate to music, theory, scale systems, cosmology. Recommended: background in either ethnomusicology or East Asian Studies.

MUSIC 449 Vocal and Dramatic Music of China (3) Vocal and dramatic traditions of China from the earliest times to the present, including the relationship of music and language. Recommended: background in either ethnomusicology or East Asian Studies.

MUSIC 452 Ethnomusicology in the Public Schools (3) W Lundquist Issues, teaching materials, and techniques involved in incorporating music cultures of United States and related world music repertoires in K-12 classroom instruction.

MUSIC 453 Approaches to Classroom Instruction: K-12 (2) Examines such major instructional approaches as MMCP, Orff, Kodaly, and Delcroze. Included are the philosophy of each and the methods, materials, and instructional skills needed for classroom application. Prerequisite: 340 or permission of instructor.

MUSIC 454 Organ Pedagogy (3) Terry Pedagogical approaches to organ techniques and performance practice, provides opportunity for practical application by means of student teaching.

MUSIC 455 Choral Arranging (3) Sp Primarily for choral conductors who need to modify, arrange or compose material to suit the capabilities of specific choral groups and performance situations. Prerequisite: senior standing or permission of instructor.

MUSIC 456 Musical Applications of Digital Signal Processing (3) Duisberg Digital signal processing applied to scientific investigations of musical systems, computer music, and digital audio. Applications using the music workstation. Prerequisites: 485 or 488 or programming competency and MATH 126.

MUSIC 457 Audio Engineering (3) Duisberg Acoustical and electrical circuit analysis. Audio instrumentation: physical models, computer-aided testing procedures, and audio applications. Prerequisite: MATH 126.

MUSIC 458 Organ Repertoire: Middle Ages through Baroque (3) Terry Analysis and performance practices of organ literature, Middle Ages through baroque period. Development of the organ as musical instrument. Prerequisites: one 400-level history course, pre-1750, in addition to history core.

MUSIC 459 Organ Repertoire: Bach to Present (3) Terry Analysis and performance practices of organ literature, classical period through the twentieth century. Development of the organ as a musical instrument. Prerequisites: one 400-level history course, post 1750, in addition to history core.

MUSIC 460 Advanced Vocal Repertoire: Pre-Nineteenth Century Art Songs (2, max. 6) Professional preparation of pre-nineteenth century songs with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: 326, 327, 328 or permission of instructor.

MUSIC 461 Advanced Vocal Repertoire: Nineteenth Century Art Songs (2, max. 6) Professional preparation of works from the literature of nineteenth-century German lieder, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: 326, 327, 328 or permission of instructor.

MUSIC 462 Advanced Vocal Repertoire: Twentieth Century Art Songs (2, max. 6) Preparation of works from the twentieth-century repertoire of French, German, Italian, Spanish, and English songs, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: 326, 327, 328 or permission of instructor.

MUSIC 464 Jazz Laboratory (1, max. 9) Forum for testing new technical skills, improvisational techniques, and jazz compositions and/or arrangements in a formal laboratory setting. Prerequisite: concurrent enrollment in MUSAP 400 or higher, or permission of instructor.

MUSIC 465 Introduction to Music Classroom Management (1-6, max. 6) Observation and analysis of teaching skills and management of music classes. Prearranged assignment includes 20 hours of observation for each credit. Supervised teaching participation required when appropriate. Prerequisite: 340 or permission of instructor.

MUSIC 467, 468, 469 Advanced Jazz Improvisation I, II, III (1,1,1) A,W,Sp Collier Performance techniques in jazz improvisation for the advanced student. Prerequisite: 369, 467 for 468; 468 for 469; or permission of instructor.

MUSIC 470 Contemporary Theories I: Tonal Music (3) Recent tonal theories, including an introduction to the various developments of the theories of Heinrich Schenker; not restricted to music written before 1900. Prerequisites: 215 and 312, or permission of instructor.

MUSIC 471 Contemporary Theories II: Non-Tonal Music, 1900-1950 (3) Includes both "free atonal" and "classical serial" music. Systematic analysis of works of Schoenberg, Webern, Berg and others. Prerequisites: 215 and 312, or permission of instructor.

MUSIC 472 Contemporary Theories III: Seminar in New Music (3, max. 6) Continuation of 471. Emphasis on the many organizational systems aspiring to extend or replace tonality: late Stravinsky and other semiserial matrix systems; "total serialism" and "systematic serialism" developed by and from Milton Babbitt; recent developments in non-serial "pitch-centric" and "set-centric" systems. Prerequisite: 471 or permission of instructor.

MUSIC 473, 474 Keyboard Harmony and Transposition (3,3) A,W Terry Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: 312 for 473; 473 for 474, or permission of instructor. (Offered alternate years.)

MUSIC 475 Figured Bass Realization (3) Sp Terry Various styles of continuo realization for keyboardists, emphasizing Bach cantatas, Haydn symphonies, and Mozart operas. Prerequisite: 473 or permission of instructor. (Offered alternate years.)

MUSIC 476 Advanced Vocal Repertoire: Seventeenth and Eighteenth Centuries (2) A Opera repertoire, 1600 to the Bel Canto era (Bellini, Rossini, Donizetti); style, traditions, embellishments in Italian, French, and German arias. Prerequisites: 326, 327, 328 or permission of instructor.

MUSIC 477 Advanced Vocal Repertoire: Nineteenth Century (2) W Opera repertoire, the post Bel Canto era through Verdi, Puccini and verismo, and significant German, French, and Slavic repertoire. Prerequisites: 326, 327, 328 or permission of instructor.

MUSIC 478 Advanced Vocal Repertoire: Twentieth Century (2) Sp Opera repertoire, twentieth-century opera literature (Barber, Menotti, Bartok, Dvorak); understanding of style, character and overall artistic and musical needs of the present. Prerequisites: 326, 327, 328 or permission of instructor.

MUSIC 479 Senior Recital (1) AWSp

MUSIC 480 The Anthropology of Music (3) Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation (e.g., evolutionist, diffusionist, historical particularist, structuralist, functionalist, symbolist, semiotic) through detailed examination of seminal texts. Joint with ANTH 430. Prerequisite: ethnomusicology major or permission of instructor.

MUSIC 481 Choral Repertoire: Sixteenth and Seventeenth Centuries (3) Conlon Sacred and secular choral literature from the Renaissance through the early baroque, covering Europe and England. Various

genres and styles of major composers, including performance practice, rehearsals, and conducting. Prerequisite: senior standing or above, or permission of instructor.

MUSIC 482 Choral Repertoire: Eighteenth Century (3) Conlon Sacred and secular choral literature of the baroque, covering mainland Europe and England. Choral works of Bach, his predecessors, and contemporaries. Stylistic analysis and study of performance practice. Prerequisite: senior standing or above or permission of instructor.

MUSIC 483 Choral Repertoire: Nineteenth Century (3) Conlon Sacred and secular choral literature of the nineteenth century, covering mainland Europe and England. Analysis of accompanied and a cappella choral works by major composers with implications for conducting and programming of literature. Prerequisite: senior standing or above or permission of instructor.

MUSIC 484 Choral Repertoire: Twentieth Century (3) Conlon Choral literature of the twentieth century, covering America, England, and mainland Europe. Various genres and styles, including score study and teaching strategies. Prerequisite: senior standing or above or permission of instructor.

MUSIC 485 Computer Music Seminar (3, max 9) AWSp Karpen, Rahn Use of computers in musical composition, software digital sound synthesis, score generation, theoretical investigations. Prerequisites: 212 or 456 or PHYS 207 or programming experience; permission of instructor.

MUSIC 487 Tonal Counterpoint (3) Sp Beale, Karpen, Rahn, van den Toorn Evaluation of fugal practices from the baroque era to the present. Prerequisite: 311.

MUSIC 488 Computer Applications to Music (3, max. 9) Duisberg Music workstation applications using microcomputers, music synthesizers, and analog-to-digital converters: music editing and score production, transcription, waveform and spectral analysis, and introduction to programming.

MUSIC 489 Special Topics in Music Theory (3, max. 9) Prerequisites: 312, 314.

MUSIC 490 Orchestration (3) Study of the instruments of the orchestra and practical experience in combining them; to enable the student to score for various instrumental combinations. Ideally to be taken before band arranging or jazz arranging, but is not a prerequisite. Prerequisite: music major or permission of instructor.

MUSIC 491 Composition (3, max. 18) AWSp One-hour private instruction and one-hour laboratory session each week. Prerequisite: 391.

MUSIC 492, 493 Opera Direction and Production (4, 4) A,W Liotta Practical experience with problems of the theater. Prerequisite: permission of instructor.

MUSIC 494 Music of Japan Until 1700 (3) Gagaku, Biwa, shakuhachi, koto, and Noh genres. Open to students in music and East Asian area studies. Prerequisite: 316 or permission of instructor.

MUSIC 495 Music of Japan After 1700 (3) Shamsen, Bunraku, Kabuki, and Sanjyoku traditions. Open to students in music and East Asian area studies. Prerequisite: 316 or permission of instructor.

MUSIC 496 Special Topics in Music Education (1-3, max 10) S Special studies designed to reflect contemporary emphases and concerns in the music education profession.

MUSIC 499 Undergraduate Research (*, max. 6) AWSp

Courses for Graduate Students Only

MUSIC 501, 502, 503 Seminar in Musical Analysis (3,3,3) 501: Chant to middle baroque. **502:** High baroque through nineteenth century. **503:** Impressionists to present.

MUSIC 511 Seminar in Field and Laboratory Methods (3) Methodology of research in ethnomusicology along with practical experience in recording and processing field and laboratory materials. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 512 Seminar in Ethnomusicology (3, max. 18) Study of methodological procedures in ethnomusicology applied to specific research problems. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 514 Proseminar in Systematic Musicology (3) Carlsen Examination of the principal research literature in the areas of systematic musicology.

MUSIC 521 Seminar in Music Perception (3, max. 9) Carlsen Current state of research in the aural perception of musical sounds in context. Prerequisite: 344 or 544 or permission of instructor.

MUSIC 523 Seminar in Music and Socialization (3, max. 9) Lundquist The socialization process and music, including the interaction whereby music culture is learned. Prerequisite: 345 or 545 or permission of instructor.

MUSIC 524 Seminar in Music Education (3) Special problems in the teaching and supervision of music in the elementary grades. Prerequisite: one year of teaching experience.

MUSIC 525 Seminar in Music Education (3) Special problems in the teaching and administration of music in the secondary school and community college. Prerequisite: one year of teaching experience.

MUSIC 526, 527, 528 History of Theory (3,3,3) 526: Ancient, medieval, early Renaissance. **527:** Renaissance, baroque, early classic. **528:** Classic, romantic, twentieth century.

MUSIC 529 Aural Analysis (3) Formal structural and stylistic analysis of music based on the aural rather than the printed form of music. Develops and uses a vocabulary of stylistic features for identification of musical examples, which are drawn from various parts of the world.

MUSIC 530 Seminar in Music Cognition (3, max. 9) Carlsen Study of research literature in cognition and music cognition, particularly as it relates to nonverbal musical experience. Prerequisite: 344 or 544 or permission of instructor.

MUSIC 531 Proseminar in Ethnomusicology (3) Theoretical and methodological practices in ethnomusicology based on existing major writings. Critical evaluations of works with a broad view toward developing ethnomusicological research. Prerequisite: permission of instructor.

MUSIC 532 Opera Direction and Production (4 or 6, max. 12) AWSp Liotta Practical experience with problems of the opera theatre.

MUSIC 533, 534, 535 Preceptorial Readings in Ethnomusicology (5,5,5) A,W,Sp Significant ethnomusicological literature on the major music cultures. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 536 Transcription and Analysis (3) Study of practice in different notational analytical systems used in non-Western music. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 537 Seminar on Opera (3, max. 6) Seminar in music history, providing a complement to history of opera series (420, 421, 422). Prerequisite: 500.

MUSIC 541 Seminar in Music and Society (3, max. 9) *Lundquist* Examination of human needs and prototypes of trends in current society and the potential of music to satisfy those needs. Prerequisite: 345 or 545 or permission of instructor.

MUSIC 542 Comparative Music Education (3) A transcultural examination of philosophy and practice of music instruction.

MUSIC 543, 544, 545 Preceptorial Readings in Systematic Musicology I, II, III (3,3,3) A,W,Sp *Keefe, Carlsen, Lundquist* Examines the significant research literature on acoustical, psychological, and social systems operating in music.

MUSIC 551 Practicum in Music Instruction (3, max. 9) AWSp Practical application and validation of results of investigation in curriculum, music teaching and learning, performance and theoretical studies. Prerequisite: teaching experience or permission of instructor.

MUSIC 555 Systematic Methods of Music Research (3) *Carlsen* Seminar in problem identification and definition, theory development, research design, data analysis and interpretation; an examination of the philosophy of science in music research.

MUSIC 556 Seminar in Music Acoustics (3, max. 9) *Keefe* Current research issues selected from acoustics of rooms and instruments, subjective musical acoustics, and computer applications to music research. Prerequisite: permission of instructor.

MUSIC 559 Master's Recital (3) AWSp Public performance for students in the Master of Music degree program.

MUSIC 561 Seminar in Theories of Music Instruction (3, max. 9) *Carlsen, Lundquist* Theories of music instruction, with special attention to curriculum, instructional procedures, and assessment of learning. Prerequisite: 555 or permission of instructor.

MUSIC 570 Seminar in Tonality (3, max. 9) *Bernard, Rahn, van den Toorn* Advanced theoretical and analytical work in triadictonal music and related systems. Prerequisite: 470.

MUSIC 571 Seminar in Serialism (3, max. 9) *Bernard, Rahn, van den Toorn* Advanced theoretical and analytical work in serialism and other nontonal systems. Prerequisite: 471 or equivalent.

MUSIC 575 Seminar in Theory (3, max. 18) *Bernard, Rahn, van den Toorn* Development and discussion of current student and faculty research in compositional/analytical theory and metatheory.

MUSIC 580, 581, 582 Advanced Conducting (3, max. 9; 3, max. 9; 3, max. 9) A,W,Sp

MUSIC 583 Advanced Choral Conducting (3, max. 27) *Kaplan*

MUSIC 589 World Music Laboratory (3, max. 18) AWSp World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Required of all graduate students in ethnomusicology. (Formerly MUSAP 589.)

MUSIC 590 Doctoral Recital (2-6, max. 18) AWSp Public performance for students in the Doctor of Musical Arts degree program.

MUSIC 591 Graduate Composition (*) AWSp *Beale, Bernard, Benshoof, Karpen, Rahn, Thorne, van den Toorn*

MUSIC 595, 596, 597 Seminar in Systematic Field and Laboratory Research (3, max. 9; 3, max. 9; 3, max. 9) A,W,Sp Various methodologies of research in systematic musicology, state of the science in specific musical problems. Practical experience in data collection and analysis for seminar presentations. Prerequisite: 555, which may be taken concurrently.

MUSIC 599 Readings in Music (3, max. 9) Selected readings on current issues and problems in music. Prerequisite: permission of a supervising music faculty member.

MUSIC 600 Independent Study or Research (*) AWSp

MUSIC 700 Master's Thesis (*) AWSp

MUSIC 800 Doctoral Dissertation (*) AWSp

Courses for Undergraduates

Music History

Courses 400 through 424—Prerequisite: 314.

MUHST 213, 214, 215 Music After 1750 (3,3,3) A,W,S In-depth survey of music from the Enlightenment to the present, through study of the major figures and characteristic genres of the following three periods: 213: The age of Haydn, Mozart, and Beethoven; 214: Romanticism in nineteenth-century music; 215: twentieth-century music. Introduction to the study of music history on the college level, with development of appropriate listening, analytical, and critical skills. Prerequisites: 112, 115 for 213; 213 for 214; 214 for 215. Taken concurrently with 210, 211, 212. For nonmajors, 120 and the ability to follow a score.

MUHST 260 Orchestral Music (5) Orchestral music from its beginnings in the seventeenth century through recent developments; evolution of the symphony.

MUHST 262 Introduction to Twentieth-Century Music (3) *Starr* Listener's survey of important composers and trends from Debussy through electronic music. Prerequisite: 120 or permission of instructor.

MUHST 313, 314 Music Before 1750 (3,3) A,W 313: Sacred and secular music of the Middle Ages and Renaissance; 314: Music in the Baroque era, from Monteverdi to Bach, and its relationship to contemporary artistic, cultural, and political trends. Prerequisites: 212, 215 for 313; 313 for 314; to be taken concurrently with 310, 311.

MUHST 330 Music in the United States (5) Contribution of music to the development of American culture.

MUHST 332 Music in European Society: Antiquity to 1700 (5) Music and its relationship to aspects of European culture and society—philosophy, politics, social conditions, and the visual arts from antiquity to 1700. Prerequisite: 120 or equivalent background.

MUHST 333 Music in European Society: 1700 to Present (5) Sp Music as related to other aspects of modern European culture and society—philosophy, politics, social conditions, and the visual arts. Prerequisite: 120 or equivalent.

MUHST 339 Opera (5) W Contributions of music, text, and staging; study of representative works concentrating on problems of combining these elements into a composite work of art.

MUHST 400 Medieval Music: To 1400 (3) Gregorian chant through Machaut and Landini.

MUHST 401 Early British Music: 1300-1700 (3) Examines the history of British music from its earliest polyphony through the music of Purcell. Stylistic features of English music studied, including medieval polyphony, Tudor music, Elizabethan music, and 17th-century music through Purcell.

MUHST 402 Late Renaissance Secular Music: 1525-1630 (3) The madrigal in Italy, England, and Germany. The Chanson, Jannequin through Lassus.

MUHST 403 Late Renaissance Sacred and Instrumental Music: 1525-1630 (3) Latin church music. Willaert through G. Gabrieli; early Reformation church music, Walther through Gibbons; instrumental music, Cabezon, the English virginal school, and Sweelinck.

MUHST 404 Baroque Keyboard Music (3) Forms and styles: Frescobaldi through J.S. Bach and C.P.E. Bach.

MUHST 405 Orchestral Music: 1620-1760 (3) Corelli through the Mannheim School

MUHST 406 Baroque Choral Music (3) Monteverdi through Handel.

MUHST 407 Baroque Opera (3) Opera of the Baroque period.

MUHST 408 Keyboard Music: 1760-1830 (3) Haydn through Schumann.

MUHST 409 Chamber Music: 1760-1830 (3) Haydn through Schubert.

MUHST 410 Orchestral Music: 1760-1830 (3) Haydn through Berlioz.

MUHST 412 Choral Music: 1750-1830 (3) Large works for chorus and orchestra. Haydn through Berlioz.

MUHST 413 Opera: 1750-1830 (3) Gluck through Bellini.

MUHST 414 Keyboard Music: 1830-1915 (3) Liszt through Debussy.

MUHST 415 Chamber Music: 1830-1915 (3) Schumann through Ravel.

MUHST 416 Orchestral Music: 1830-1915 (3) Liszt and Brahms through early Schoenberg and Stravinsky.

MUHST 417 Art Song: 1830-1915 (3) *Bozarth* The Lieder of Schumann, Brahms, Wolf, Strauss, Mahler, and Schoenberg.

MUHST 418 Choral Music: 1830-1915 (3) Selected choral masterpieces. Brahms through Britten.

MUHST 419 Opera: 1830-1915 (3) Wagner through Puccini.

MUHST 420 Authenticity and Performance (3) *Bauman* The practical and philosophical issues raised by historically informed performance of early music on period instruments.

MUHST 421 Music Criticism (3) *Starr* Study of the various forms of music criticism, with an emphasis on the writing of valid examples and evaluation of one's own work along with that of others—classmates, journalists, and academic critics.

MUHST 423 Twentieth-Century Music: to 1945 (3) *Starr* Intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of this century.

MUHST 424 Music Since 1945 (3) *Starr* Diversity of the contemporary musical scene. Vocabularies appropriate for the description and understanding of the new music, developed through study of representative composers and works, and appropriate readings.

MUHST 426 American Popular Music (3) *Starr* An in-depth consideration of American popular music styles and repertoire from about 1920 to the present day. Analysis of representative pieces; consideration of critical and aesthetic issues relating to popular music; relationship of popular music to "art" music and to American culture and society. Prerequisites: 312, 314.

MUHST 429 Music, Literature, and the Arts (3) Literary and visual art works that include musical subject matter and forms; musical genres that incorporate such other arts as opera and ballet. Related philosophical writings. Includes works of a particular time period or investigation of a specific problem in comparative arts. Prerequisite: major in one of the arts, comparative arts, or related humanities field, or permission of instructor.

MUHST 497 Special Topics in Music History (1-3, max 6) Topics vary each quarter.

Courses for Graduate Students Only

MUHST 500 Seminar in Methods of Music Research (3) AW Explores various critical approaches to research in music at the graduate level, examining specialized bibliographical resources, controversial arguments about musical issues, and other matters of musical criticism required to begin advanced study of music. Prerequisite for all graduate music history courses except 515.

MUHST 504 Seminar in Medieval Music (3, max. 6) Prerequisite: 500.

MUHST 505 Seminar in Renaissance Music (3, max. 6) Prerequisite: 500.

MUHST 506 Seminar in Baroque Music (3, max. 6) Bozarth Prerequisite: 500.

MUHST 508 Seminar in the Viennese Classical Period: 1760-1830 (3, max. 6) Starr Prerequisite: 500.

MUHST 509 Seminar in Nineteenth-Century Music: 1830-1890 (3, max. 6) Bozarth Prerequisite: 500.

MUHST 510 Seminar in Music Since 1890 (3, max. 6) Starr Prerequisite: 500.

MUHST 515 Seminar in Medieval and Renaissance Notation (5) Gregorian chant through sixteenth-century prints.

MUHST 519 Seminar in Modern Editorial Procedures (5) Bozarth Study of modern procedures for preparing critical editions. Related areas of study may include analysis of musical style and historical and performance problems inherent in works being edited.

MUHST 520 Seminar in American Music (3, max 6) Starr Research in the life, works, and times of composers in the United States from colonial days to the present. Prerequisite: 500 and undergraduate work in the history and analysis of twentieth century music.

Music Ensemble

MUSEN 100 is open to all students without audition. All other ensembles are open to majors and nonmajors with an audition or permission of instructor. Graduate students should register for the 500-level ensemble courses.

MUSEN 100 University Singers (1, max. 15) AWSp

MUSEN 300, 500 University Symphony Orchestra (1, max. 15 for 300; 1, max. 9 for 500) AWSp

MUSEN 301, 501 Wind Ensemble (1, max. 15 for 301; 1, max. 9 for 501) AWSp Salzman

MUSEN 302, 502 Symphonic Band (1, max. 10 for 302; 1, max. 6 for 502) WSp Salzman

MUSEN 303, 503 Marching Band (2, max. 10 for 303; 2, max. 6 for 503) A Blissell

MUSEN 304, 504 Percussion Ensemble (1, max. 12 for 304; 1, max. 9 for 504) AWSp Collier

MUSEN 305, 505 Brass Ensemble (1, max. 12 for 305; 1, max. 9 for 505)

MUSEN 306, 506 Woodwind Ensemble (1, max. 12 for 306; 1, max. 9 for 506)

MUSEN 307, 507 University Oratorio Chorus (1, max. 15 for 307; 1, max. 9 for 507) AWSp Kaplan

MUSEN 325, 525 Accompanying (2, max. 30 for 325; 2, max. 18 for 525) AWSp Michaelian

MUSEN 340, 540 Vocal Jazz Ensemble (1, max. 6 for 340; 1, max. 9 for 540) AWSp

MUSEN 345, 545 Jazz Workshop (1, max. 12 for 345; 1, max. 9 for 545) AWSp Collier

MUSEN 346, 546 Studio Jazz Ensemble (1, max. 6 for 346; 1, max. 9 for 546) AWSp Cummings

MUSEN 347, 547 Opera Chorus (1, max. 12 for 347; 1, max. 9 for 547) AWSp

MUSEN 350, 550 University Chorale (1, max. 12 for 350; 1, max. 9 for 550) AWSp Conlon

MUSEN 351, 551 Madrigal Singers (1, max. 15 for 351; 1, max. 9 for 551) AWSp Conlon

MUSEN 361, 561 Piano Ensemble (1, max. 3 for 361; 1, max. 9 for 561) AWSp O'Doan Study and performance of works for four hands at one or two pianos. Designed for upper-level piano majors or students with equivalent ability. Prerequisite: permission of instructor.

MUSEN 368, 568 Harp Ensemble (1, max. 12 for 368; 1, max. 9 for 568) AWSp Vokolek

MUSEN 369, 569 Baroque Chamber Ensemble (1, for 369; 1, max. 9 for 569) AWSp Terry Prerequisite: permission of instructor.

MUSEN 375, 575 Opera Workshop (1, max. 6 for 375; 1, max. 9 for 575) AWSp Preparation of music theatre repertoire. Intended for the mature voice student. Prerequisite: permission of instructor.

MUSEN 380, 580 Sinfonietta (1, max. 6 for 380; 1, max. 9 for 580) AWSp

MUSEN 381, 581 Chamber Music (1, max. 18 for 381; 1, max. 9 for 581) AWSp Prerequisite: student is at MUSAP 300 level or above.

MUSEN 382, 582 Opera Theatre (2, max. 6 for 382; 2, max. 18 for 582) AWSp Public performance of roles in opera.

MUSEN 383, 583 Collegium Musicum (1, max. 6 for 383; 1, max. 9 for 583) AWSp

MUSEN 384, 584 Contemporary Group (1, max. 6 for 384; 1, max. 9 for 584) AWSp Dempster Exploration of notation and performance problems in today's music; preparation for public performance.

MUSEN 448 Advanced Studio Jazz Ensemble (1, max. 9) AWSp Cummings Preparation and performance of material appropriate to large jazz ensemble concerts, clinics, and radio and television broadcasts. Prerequisite: permission of instructor. Recommended: three quarters of 348.

MUSEN 485, 486, 487 Duo-Sonata Repertoire (2,2,2) A,W,Sp 485: the classical period; 486: the romantic period; 487: the twentieth century. Prerequisite: undergraduate piano performance degree or permission of instructor.

Music Applied

Open to majors and nonmajors by audition. Courses 300-319 are private instruction for nonmajors. Courses 500-519 are private instruction for graduate nonmajors and graduate performance majors who have not yet been formally admitted by jury examination to the 520-539 level. (Please note that graduate students must advance to the 520-539 level within the first three quarters of study or withdraw from the program.)

MUSAP 133, 134, 135 Basic Keyboard (2,2,2) Keyboard harmony and simple keyboard pieces. Private instruction. Prerequisites: ability to read notes (treble and bass clefs).

MUSAP 136 Basic Jazz Keyboard (2, max 6) Basics of jazz and pop chord voicings, reading lead sheets, basic accompanying in various jazz and pop styles. Prerequisites: Audition and basic knowledge of music theory.

MUSAP 205 String Techniques (2, max. 12) AWSp Designed to prepare music education students to teach beginning and intermediate strings in the public schools.

MUSAP 210 Wind Techniques (2, max. 12) AWSp Designed to prepare music education students to teach beginning and intermediate woodwinds and brass in the public schools.

MUSAP 217 Percussion Techniques (2, max. 4) A Collier The study of basic percussion techniques as they apply to music in the public schools. Acquaints the prospective music education major with percussion performance and teaching techniques. Prerequisite: music education major.

MUSAP 218 Guitar Techniques (1, max. 3) AWSp Novacek Includes exercises to develop a good basic technique emphasizing correct position and movement of both hands, basic folk song accompaniments including a variety of strums, finger picking patterns, hammering on and bass runs, reading guitar music, classical pieces, special effects, and access to other styles.

MUSAP 219 Recorder Techniques (1) W Seibert

MUSAP 220 MIDI Systems Techniques (2) Overview of MIDI (Musical Instrumental Digital Interface) technology and practical applications of other music technologies in the school environment. Primarily for music education majors.

MUSAP 233, 234, 235 Secondary Piano (2,2,2) Focus is on advanced keyboard skills and piano repertoire. Prerequisite: 135 for 233; 233 for 234; 234 for 235. Consists of a half-hour private lesson every week.

MUSAP 239 Secondary Piano (2, max. 8) Intermediate level keyboard repertoire. Private instruction. Prerequisite: 235.

MUSAP 300, 500 Private Instruction: Voice (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Alavedra, Berendsen, Curtis-Verna

MUSAP 301, 501 Private Instruction: Piano (2-3, max. 45; 2-3, max. 45) AWSp, AWSp McCabe, Michaelian, O'Doan, Seales, Sild

MUSAP 302, 502 Private Instruction: Organ (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Terry

MUSAP 303, 503 Private Instruction: Harpsichord (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Terry

MUSAP 304, 504 Private Instruction: Violin-Viola (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Schwede, Shumsky, Staryk

MUSAP 305, 505 Private Instruction: Violoncello (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Davis, Saks

MUSAP 306, 506 Private Instruction: Double Bass (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Morgan, Vinikow

MUSAP 307, 507 Private Instruction: Flute (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Skowronek

MUSAP 308, 508 Private Instruction: Oboe (2-3, max. 45; 2-3, max. 45) AWSp, AWSp Storch

MUSAP 309, 509 Private Instruction: Clarinet (2-3, max. 45; 2-3, max. 45) AWSp, AWSp McCall

MUSAP 310, 510 Private Instruction: Bassoon (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Grossman*

MUSAP 311, 511 Private Instruction: Saxophone (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Brockman*

MUSAP 312, 512 Private Instruction: Horn (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Kappy*

MUSAP 313, 513 Private Instruction: Trumpet (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Cummings*

MUSAP 314, 514 Private Instruction: Trombone (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Dempster*

MUSAP 315, 515 Private Instruction: Tuba (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Salzman*

MUSAP 316, 516 Private Instruction: Harp (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Vokolek*

MUSAP 317, 517 Private Instruction: Percussion (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Collier*

MUSAP 318, 518 Private Instruction: Guitar (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Novacek*

MUSAP 319, 519 Private Instruction: Viola da Gamba (2-3, max. 45; 2-3, max. 45) AWSp, AWSp *Tindemans*

Courses 320-339, 420-439 are private instruction for undergraduate music majors.

MUSAP 320, 420 Private Instruction: Voice (2-3, max. 27; 2-3, max. 27) AWSp, ASWp *Alavedra, Berendsen, Curtis-Verna*

MUSAP 321, 421 Private Instruction: Piano (2-3, max. 27; 2-3, max. 27) AWSp, ASWp *McCabe, Michaelian, O'Doan, Seales, Siki*

MUSAP 322, 422 Private Instruction: Organ (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Terry*

MUSAP 323, 423 Private Instruction: Harpsichord (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Terry*

MUSAP 324, 424 Private Instruction: Violin-Viola (2-3; max. 27; 2-3, max. 27) AWSp, AWSp *Schwede, Shumsky, Staryk*

MUSAP 325, 425 Private Instruction: Violoncello (2-3; max. 27; 2-3, max. 27) AWSp, AWSp *Davis, Saks*

MUSAP 326, 426 Private Instruction: Double Bass (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Morgan, Vinikow*

MUSAP 327, 427 Private Instruction: Flute (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Skowronek*

MUSAP 328, 428 Private Instruction: Oboe (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Storch*

MUSAP 329, 429 Private Instruction: Clarinet (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *McColl*

MUSAP 330, 430 Private Instruction: Bassoon (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Grossman*

MUSAP 331, 431 Private Instruction: Saxophone (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Brockman*

MUSAP 332, 432 Private Instruction: Horn (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Kappy*

MUSAP 333, 433 Private Instruction: Trumpet (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Cummings*

MUSAP 334, 434 Private Instruction: Trombone (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Dempster*

MUSAP 335, 435 Private Instruction: Tuba (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Salzman*

MUSAP 336, 436 Private Instruction: Harp (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Vokolek*

MUSAP 337, 437 Private Instruction: Percussion (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Collier*

MUSAP 338, 438 Private Instruction: Guitar (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Novacek*

MUSAP 339, 439 Private Instruction: Viola da Gamba (2-3, max. 27; 2-3, max. 27) AWSp, AWSp *Tindemans*

Courses 520-539 are private instruction for graduate performance majors in the M.Mus. degree program. Courses 570-589 are private instruction for graduate performance majors who have been formally admitted by jury examination to the D.M.A. degree program.

MUSAP 520, 570 Private Instruction: Voice (3, max. 18; 3, max. 27) AWSp, AWSp *Alavedra, Berendsen, Curtis-Verna*

MUSAP 521, 571 Private Instruction: Piano (3, max. 18; 3, max. 27) AWSp, AWSp *McCabe, Michaelian, O'Doan, Siki*

MUSAP 522, 572 Private Instruction: Organ (3, max. 18; 3, max. 27) AWSp, AWSp *Terry*

MUSAP 523, 573 Private Instruction: Harpsichord (3, max. 18; 3, max. 27) AWSp, AWSp *Terry*

MUSAP 524, 574 Private Instruction: Violin-Viola (3, max. 18; 3, max. 27) AWSp, AWSp *Shumsky, Staryk*

MUSAP 525, 575 Private Instruction: Violoncello (3, max. 18; 3, max. 27) AWSp, AWSp *Saks*

MUSAP 526, 576 Private Instruction: Double Bass (3, max. 18; 3, max. 27) AWSp, AWSp *Morgan*

MUSAP 527, 577 Private Instruction: Flute (3, max. 18; 3, max. 27) AWSp, AWSp *Skowronek*

MUSAP 528, 578 Private Instruction: Oboe (3, max. 18; 3, max. 27) AWSp, AWSp *Storch*

MUSAP 529, 579 Private Instruction: Clarinet (3, max. 18; 3, max. 27) AWSp, AWSp *McColl*

MUSAP 530, 580 Private Instruction: Bassoon (3, max. 18; 3, max. 27) AWSp, AWSp *Grossman*

MUSAP 531, 581 Private Instruction: Saxophone (3, max. 18; 3, max. 27) AWSp, AWSp *Brockman*

MUSAP 532, 582 Private Instruction: Horn (3, max. 18; 3, max. 27) AWSp, AWSp *Kappy*

MUSAP 533, 583 Private Instruction: Trumpet (3, max. 18; 3, max. 27) AWSp, AWSp *Cummings*

MUSAP 534, 584 Private Instruction: Trombone (3, max. 18; 3, max. 27) AWSp, AWSp *Dempster*

MUSAP 535, 585 Private Instruction: Tuba (3, max. 18; 3, max. 27) AWSp, AWSp *Salzman*

MUSAP 536, 586 Private Instruction: Harp (3, max. 18; 3, max. 27) AWSp, AWSp *Vokolek*

MUSAP 537, 587 Private Instruction: Percussion (3, max. 18; 3, max. 27) AWSp, AWSp *Collier*

MUSAP 538, 588 Private Instruction: Guitar (3, max. 18; 3, max. 27) AWSp, AWSp *Novacek*

MUSAP 539, 589 Private Instruction: Viola da Gamba (3, max. 18; 3, max. 27) AWSp, AWSp *Tindemans*

Near Eastern Languages and Civilization

229B Denny

Undergraduate Program

The program focuses on the languages and civilizations of the Islamic and Semitic Near East, with an emphasis on the ancient and medieval roots of these civilizations as well as more recent cultural developments. Each of the languages offered represents a major literary tradition. Arabic, Persian, Turkish, and Central Asian Turkic are the languages of the most significant literary manifestations of Islamic civilization, while Hebrew is the language of the Old Testament and Judaism. The languages are taught in conjunction with their sociocultural context, so that linguistic skills will be formed and enhanced by a broad and sympathetic understanding, and a firm foundation will be laid for both intellectual exploration and practical experience.

Bachelor of Arts Degree

Major Requirements: An approved program of 30 credits, excluding language courses, in courses offered by the department or courses on the Near East offered by other departments, or both, plus at least 9 credits in literature courses at the 400 level in the major language for which courses numbered 311, 312, 313, and 321, 322, and 323 are usually prerequisites. Study opportunities in the Near East and in Central Asia are available on a competitive basis for a limited number of students.

Graduate Program

Master of Arts Degree

The Department of Near Eastern Languages and Civilization offers a graduate program of studies leading to the Master of Arts degree. The program is designed to provide students with advanced training in at least one Near Eastern language and in a specific field of specialization. Students may concentrate in Arabic, Hebrew, Persian, or Turkish and Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended not only for those students who wish to continue their studies at the doctoral level but also for students who wish to pursue careers in government or business.

Doctor of Philosophy Degree

The Department of Near Eastern Languages and Civilization has submitted a proposal to establish a Ph.D. degree program. Approval of the proposal is pending.

Research Facilities

The University of Washington libraries hold an extensive collection of books and materials in the languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. Candidates for the master's degree as well as doctoral students will find in the collection adequate resources for their research.

For many years the library participated in the PL 480 program, mandated by the Congress for the use of foreign currency to purchase books for U.S. libraries.

Currently, the library participates in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials.

The library staff includes Near East and Central Asia specialists responsible for acquiring and cataloging the collection.

The library maintains book exchanges with the Soviet Central Asian Republics, some of these beginning as early as 1961. They are handled through the Slavic Section of the University's Suzzallo Library. Among its staff are an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the Far East Library.

Admission Requirements

Statement of purpose; a sample of written work; three letters of recommendation, of which at least two must attest to scholarly ability. Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years' study of the language in which they plan to concentrate.

Graduation Requirements

Departmental requirements, in addition to those required by the Graduate School for the Master of Arts degree, include a reading knowledge of French or German, or, with the prior approval of the student's M.A. Committee, any other language pertinent to the research in the student's field of study; a seminar paper representing the student's best work; a written examination consisting of four parts: (1) on the general culture of the Near East, (2) on the student's field of specialization, (3) on the student's language of concentration, (4) on a second Near Eastern language related to the language concentration.

Fulfillment of these requirements will normally entail the completion of two years of study.

Financial Aid

Teaching assistantships are available for graduate students in the department who are fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

Exchange Agreements

The University of Washington and the Department of Near Eastern Languages and Civilization maintain exchange agreements for graduate students and faculty with the following universities: American University in Cairo, Egypt; CASA (Intensive Arabic held at American University, Cairo); Hebrew University of Jerusalem—Israel; Tashkent University—USSR; Central National Institute, Beijing; Dokuz Eylül University, Izmir, Turkey (pending); Mimar Sinan University, Istanbul, Turkey (pending).

In addition, the Department maintains a direct exchange agreement with Xinjiang University in Urumchi.

Professors

Andrews, Walter G.,* 1968, M.A., 1963, M.A., 1965, Ph.D., 1970, Michigan; Turkish language and literature, Ottoman Turkish.

Cirtautas, Ilse D.,* 1968, (Asian Languages and Literature), Ph.D., 1959, Hamburg; Turkic languages and literatures.

Heer, Nicholas L.,* 1965, (Emeritus), Ph.D., 1955, Princeton; Arabic language and literature, Islamic theology and philosophy.

Mackay, Pierre A.,* 1966, (Computer Science), (Classics, Comparative Literature),† M.A., 1959, Ph.D., 1964, California (Berkeley); topography of the Near East, Ottoman Turkish and classical Arabic literatures.

Ziadeh, Farhat J.,* 1966, (Emeritus), LL.B., 1940, London; Arabic language and literature, Islamic law, Islamic institutions.

Assistant Professors

Karimi-Hakkak, Ahmad,* 1985, M.A., 1974, Missouri; M.A., 1977, Ph.D., 1979, Rutgers; Persian language and literature.

Sokoloff, Naomi B.,* 1985, M.A., 1979, Ph.D., 1980, Princeton; modern Hebrew language and literature.

Zysow, Aron,* 1988, Ph.D., 1984, J.D., 1984, Harvard; Arabic language and literature, Islamic law, Islamic institutions.

Course Descriptions

Courses for Undergraduates

Arabic

ARAB 311, 312, 313 Elementary Arabic (5,5,5) A,W,Sp Intensive study of grammar, with oral and written drill and reading of simple texts. (No credit if 315 taken.) Prerequisites: 311 for 312; 312 for 313.

ARAB 315 Intensive Elementary Arabic (15) S Intensive study of grammar, with oral and written drill and reading of simple texts. (No credit if 311, 312, 313 taken.)

ARAB 321, 322, 323 Intermediate Arabic (5,5,5) A,W,Sp Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisites: 313 for 321; 321 for 322; 322 for 323; or equivalent.

ARAB 401 Adab Prose: Jahiz (3) A Readings in early Arabic prose, especially the writings of Jahiz. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 402 Maqamat (Assemblies): Hamadhani, Hariri (3) W Mackay Reading of several *maqamat* (essays in rhymed prose) of al-Hamadhani and al-Hariri. Examination of the *maqamat* genre as a whole. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 403 Historians: Tabari (3) Sp Readings in Arab historians with particular reference to al-Tabari and his school of historical writing. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 404 Qur'an and Tafsir (3) A Zysow Reading of various sections from the Qur'an with the relevant exegetical writings on religious, philological, and grammatical points. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 405 Hadith and Law (3) W Zysow Selected readings from the traditions (*hadith*) of Muhammad, and from works on jurisprudence and law based on the holy texts. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 406 Islamic Political Theorists (3) Sp Readings from the main political theorists: al-Baghdadi, al-Mawardi, and Ibn Khaldun. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 407 Arabic Grammatical Texts (3) Zysow Introduction to the concepts and terminology of traditional Arabic grammar. Readings in the grammatical literature supplemented by instructor's lectures and written exercises. Prerequisites: good command of Arabic, permission of instructor.

ARAB 411 Desert Poetry: Pre-Islamic and Umayyad (3) A Reading and analysis of selected poems from pre-Islamic and Umayyad times. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 412 Urban Poetry: The New 'Abbasid Poetry (3) W Reading of the new poetry of the 'Abbasid period and studying of the social and political factors that gave rise to it; al-Mutanabbi and al-Ma'arri. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 413 Modern Poetry (3) Sp Neoclassical poetry of the nineteenth and twentieth centuries, and the development of modern verse. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 414 Islamic Philosophical Literature (3) A Reading of selected texts by representative Islamic philosophers. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 415 Islamic Theological and Mystical Literature (3) W Reading of selected texts representative of Islamic theological and mystical schools. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 416 Modern Prose (3) Sp Modern essays, fiction, and ideological writings. Prerequisite: 323 or equivalent. (Offered alternate years.)

ARAB 431, 432, 433 Advanced Arabic (3,3,3) A,W,Sp Designed to impart to the student an active knowledge of Arabic structure and syntax and to increase his or her vocabulary power through supervised composition, translation into Arabic, and précis of expository writings. Particular emphasis is placed on journalistic articles and editorials. Prerequisite: 323 or equivalent.

ARAB 470 Intensive Arabic Morphology and Syntax (15) S Allows students in the graduate programs of the Department of Near Eastern Languages and Civilization and other departments to complete the first year of Arabic during Summer Quarter. Primarily for graduate students.

ARAB 471, 472, 473 Arabic Morphology and Syntax (5,5,5) A,W,Sp Allows students with knowledge above the elementary level in one Near Eastern language other than Arabic to begin study of Arabic. Primarily for graduate students.

ARAB 474, 475, 476 Arabic Texts (5,5,5) A,W,Sp Readings in Arabic texts. Primarily for graduate students. Prerequisites: 473 for 474; 474 for 475; 475 for 476; or equivalent.

ARAB 490 Supervised Study (1-6, max. 18) AWSp Special work in literary texts for graduates and undergraduates. Prerequisite: 323 or equivalent and permission of instructor.

ARAB 499 Undergraduate Research (1-6, max. 18) AWSp Prerequisite: permission of instructor.

Coptic

COPTIC 411 Introduction to Coptic (3) A Williams Elements of grammar of the Sahidic dialect of the Coptic language.

COPTIC 412, 413 Readings in Coptic (3,3) W,Sp Williams Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi Gnostic texts.

Hebrew

HEBR 311, 312, 313 Elementary Modern Hebrew (5,5,5) A,W,Sp Sokoloff Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (No credit if 315 taken.) Prerequisites: 311 for 312; 312 for 313; or equivalent.

HEBR 315 Intensive Elementary Modern Hebrew (15) S Intensive study of grammar, with oral and written drill and reading of simple texts. Summer quarter only. (No credit if 311, 312, 313 taken.)

HEBR 321, 322, 323 Intermediate Modern Hebrew (5,5,5) A,W,Sp Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar and syntax. Prerequisites: 313 for 321; 321 for 322; 322 for 323; or equivalent.

HEBR 401, 402, 403 Introduction to Hebrew Literature (3,3,3) A,W,Sp Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts—short poetry, fiction, and essays—with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: 323 or permission of instructor.

HEBR 470 Intensive Hebrew Morphology and Syntax (15) S Designed to allow graduate students to complete the first year of Hebrew during Summer Quarter. Prerequisite: graduate standing.

HEBR 471, 472, 473 Hebrew Morphology and Syntax (5,5,5) A,W,Sp Allows students with knowledge above the elementary level in one Near Eastern language other than Hebrew to begin study of Hebrew. Primarily for graduate students. Prerequisite: 471 for 472; 472 for 473; or equivalent.

HEBR 474, 475, 476 Hebrew Texts (5,5,5) A,W,Sp Readings in Hebrew texts. Primarily for graduate students. Prerequisites: 473 for 474; 474 for 475; 475 for 476.

HEBR 490 Supervised Study (1-6, max. 18) AWSp Special work in literary texts for graduates and undergraduates. Prerequisite: 323 or equivalent.

HEBR 499 Undergraduate Research (1-6, max. 18) AWSp

Persian

PRSAN 311, 312, 313 Elementary Persian (5,5,5) A,W,Sp Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisites: 311 for 312, 312 for 313; or equivalent.

PRSAN 321, 322, 323 Intermediate Persian (5,5,5) A,W,Sp Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisites: 313 for 321, 321 for 322, 322 for 323; or equivalent.

PRSAN 401 Introduction to Persian Literature (3) A Karimi-Hakkak Selected texts from modern and classical Persian poetry and prose. Provides insights into Iranian culture and its past and present achievements in literature. Prepares the student for a more comprehensive and critical study of Persian literature. Prerequisite: 323 or equivalent proficiency in Persian language.

PRSAN 402 Modern Persian Literature: A Survey (3) W Karimi-Hakkak Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Ali-e Ahmad, Nima, Seppehri, and Forugh. Prerequisite: 323 or equivalent proficiency in Persian.

PRSAN 403 Classical Persian Literature: A Survey (3) Sp Karimi-Hakkak History of Persian literature from Rudaki to Hafiz. Studies epic, lyric, and mystical traditions placed in historical settings. Covers the most important genres such as the Qasida, the Ghazal, the Ruba'i and the Masnavi. Prerequisites: 323 or equivalent proficiency in Persian.

PRSAN 411 The Epic Tradition in Iran (3) A Karimi-Hakkak Focuses on the *Shahnameh* of Firdaws: explores the ancient legends that gave rise to it and follows the fortunes of epic poetry after Firdaws, touching on the rise, development, and decline of romance in classical Persian literature. Prerequisite: 401 or equivalent.

PRSAN 412 The Persian Ghazal (3) W Karimi-Hakkak The Ghazal as the leading medium for lyrical expression in classical Persian tradition. Follows this genre from conception to culmination in the poetry of Hafiz. Conventions and devices of the Ghazal. Development placed in historical and social context. Prerequisite: 401 or equivalent.

PRSAN 413 Sufism: Thought and Expression (3) Sp Karimi-Hakkak Dynamics of mystical thought and expression as evolved in the writings of the great Sufi masters and reflected in the poetry of Sana'i, Attar, Rumi, and others. The fundamental unity of the mystical vision, with special attention to the peculiarities of individual style and expression. Prerequisite: 401 or equivalent.

PRSAN 471, 472, 473 Persian Morphology and Syntax (5,5,5) A,W,Sp Allows students with knowledge above the elementary level in one Near Eastern language other than Persian to begin study of Persian. Primarily for graduate students. Prerequisites: 471 for 472; 472 for 473; or equivalent.

PRSAN 474, 475, 476 Persian Texts (5,5,5) A,W,Sp Readings in Persian texts. Primarily for graduate students. Prerequisites: 473 for 474; 474 for 475; 475 for 476; or equivalent.

PRSAN 490 Supervised Study (1-6, max. 18) AWSp Special work in literary texts for graduates and undergraduates. Prerequisite: 313 or equivalent.

PRSAN 499 Undergraduate Research (1-6, max. 18) AWSp

Turkish

TKISH 301, 302, 303 Elementary Uzbek (3,3,3) A,W,Sp Cirtautas The modern written and spoken language. (No credit if 316 taken.) Joint with TKIC 301, 302, 303. Prerequisite: 301 for 302; 302 for 303; or equivalent.

TKISH 304, 305, 306 Introduction to Kazakh (3,3,3) A,W,Sp Cirtautas Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from the Soviet Union and China (Sinkiang); exercises. (No credit if 317 taken.) Joint with TKIC 304, 305, 306. Prerequisite: permission of instructor.

TKISH 311, 312, 313 Elementary Turkish (5,5,5) A,W,Sp Andrews Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. Prerequisites: 311 for 312; 312 for 313; or equivalent.

TKISH 316 Intensive Elementary Uzbek (9) S Cirtautas Intensive study of grammar, with oral and written drill and reading of simple texts in Uzbek. Covers first year Uzbek. Offered summer quarter only. (No credit if 301, 302, 303 taken.) Joint with TKIC 316.

TKISH 317 Intensive Elementary Kazakh (9) S Cirtautas Intensive study of grammar, with oral and written drill and reading of simple texts in Kazakh. Covers first year Kazakh. Offered summer quarter only. (No credit if 304, 305, 306 taken.) Joint with TKIC 317.

TKISH 321, 322, 323 Intermediate Turkish (5,5,5) A,W,Sp Andrews Introduction to modern Turkish literature. Prerequisites: 313 for 321; 321 for 322; 322 for 323; or equivalent.

TKISH 341, 342, 343 Introduction to Uighur (3,3,3) A,W,Sp Cirtautas Phonology, morphology, and syntax of Uighur. Joint with TKIC 341, 342, 343. Prerequisite: permission of instructor.

TKISH 401 Readings in Turkish Literary History I: Modern (3) A Andrews The development of modern Turkish literature and its ties to, and divergence from, the Ottoman tradition. Readings in modern and Tanzimat poetry, short story, drama, and novel. Prerequisite: permission of instructor. (Offered alternate years.)

TKISH 402 Readings in Turkish Literary History II: Literature of the Ottoman Empire (3) W Andrews The parallel development of the classical high-culture literature and the popular literatures of the Ottoman Empire. Readings in poetry, history, travel-literature, drama, and popular narrative forms. Prerequisite: 323 or equivalent. (Offered alternate years.)

TKISH 403 Ottoman Travelers and Geography (3) Sp MacKay Introduction to the geographic literature of Ottoman Turkish: readings from traditional cosmographies, travel journals, sailing instructions (portulans), ambassadorial and secret service reports, etc. Prerequisite: 413 or permission of instructor. (Offered alternate years.)

TKISH 404 Introduction to Turkic Studies (3) Cirtautas The bibliography, problems, and methods of research in the field of Turkic studies for advanced students of Turkish/Turkic languages. Readings in those languages on the languages, literatures, and ethnography of past and present Turkic peoples. Joint with TKIC 404. Prerequisite: permission of instructor.

TKISH 405, 406, 407 Intermediate Uzbek (3,3,3) A,W,Sp Cirtautas Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Joint with TKIC 401, 402, 403. Prerequisite: permission of instructor.

TKISH 411 Turkish Literary Genres: Prose (3) A Andrews Major genres, styles, and themes of Turkish art-prose from Ottoman times to present; creation of stylistic and critical norms. Prerequisite: 323 or equivalent. (Offered alternate years.)

TKISH 412 Turkish Literary Genres: Poetry (3) W Andrews Poetic traditions of Turkey with a focus on the development of peculiarly Turkish aspects of style and structure. Social functions of poetry and the poetic milieu. Prerequisite: 323 or equivalent. (Offered alternate years.)

TKISH 413 Introduction to Ottoman Turkish (3) Sp Andrews Introduction to Turkish in Arabic characters to cover the peculiar grammatical and syntactical problems of Ottoman. Prerequisite: permission of instructor.

TKISH 414, 415, 416 Introduction to Uzbek Literature (3,3,3) A,W,Sp Cirtautas Readings from selected Uzbek writers. Content varies. Joint with TKIC 411, 412, 413. Prerequisite: permission of instructor.

TKISH 471, 472, 473 Turkish Morphology and Syntax (5,5,5) A,W,Sp Andrews Allows students with knowledge above the elementary level in one Near Eastern language other than Turkish to begin study of Turkish. Primarily for graduate students. Prerequisite: 471 for 472; 472 for 473; or equivalent.

TKISH 474, 475, 476 Turkish Texts (5,5,5) A,W,Sp Andrews Readings in Turkish texts. Primarily for graduate students. Prerequisite: 473 for 474; 474 for 475; 475 for 476; or equivalent.

TKISH 477 Intensive Kazakh Morphology and Syntax (9) Cirtautas Designed to allow graduate students to complete the first year of Kazakh during summer quarter. Joint with TKIC 477. Prerequisite: graduate standing and permission of instructor.

TKISH 478 Intensive Uzbek Morphology and Syntax (9) S Cirtautas Designed to allow graduate students to complete the first year of Uzbek during summer quarter. Joint with TKIC 478. Prerequisite: graduate standing.

TKISH 481, 482, 483 Uzbek Morphology and Syntax (3,3,3) Cirtautas Introduces the student to a Turkic language, Uzbek. Designed for graduate students and intended to enable them to achieve competence at an accelerated pace. Prerequisite: graduate standing; 481 for 482; 482 for 483; or equivalent.

TKISH 490 Supervised Study (1-6, max. 18) AWSp Special work in literary texts for graduates and undergraduates. Prerequisite: 323 or equivalent and permission of instructor.

TKISH 499 Undergraduate Research (1-6, max. 18) AWSp Prerequisite: permission of instructor.

Near Eastern Courses in English

N E 210 Introduction to Islamic Civilization (5) A Siddiq Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Joint with SISME 210.

N E 211 Islam (5) Zysow Religious and cultural milieu of Arabia before Muhammad; Muhammad's call and struggle to establish the new faith; Qur'anic content and style; Western and Muslim scholarship and the Qur'an; place of traditions in the Islamic edifice; Muslim political and religious thought; sources of Muslim religious law; and modern Muslim movements. Joint with RELIG 211. (Formerly 430.)

N E 212 Qur'an in English (3) Zysow Survey of the contents of the sacred scripture of Islam, regarded by Muslims throughout the world as the literal word of God. Treats Qur'anic narrative, law, theology, and ethics. Some attention also given to the Qur'an as an historical document and to Qur'anic scholarship by non-Muslims. Joint with RELIG 212.

N E 230 Themes in Near Eastern Literature (5) Sp Significant and interesting aspects of Near Eastern culture and society as represented by literary themes. Aspects of Near Eastern life and art such as women, minority groups, mysticism, and modern literature. Content varies.

N E 240 Introduction to the Bible (Old Testament) (5) S Jaffee Introduction to the Hebrew Bible in English. Results of modern critical studies on the Bible and the ancient Near East. Concentrates on the meaning of Biblical records in their own time and environment. Joint with RELIG 240.

N E 250 Iranian Culture and Civilization (3) Karimi-Hakkak Explores the culture and civilization of this Middle Eastern society through a multi-disciplinary approach that includes such manifestations as architecture, carpet-weaving, story-telling, and the composition of poetry.

N E 260 The Middle East in Film (3) Sp Albright The cinema of Egypt, Iran, Israel, Turkey, and other Middle Eastern nations; compares and contrasts the films with Middle Eastern literature from the twentieth century. Both films and literature illustrate how Middle Easterners view the world: their concepts of self versus society, religion, art, and politics.

N E 325 Modern Hebrew Literature in English (3) W Sokoloff Major developments in Hebrew literature from the Enlightenment to the current Israeli literature. Examines the development of modern Hebrew thought and literary style.

N E 350 The City of Cairo (3) MacKay Development of Fustat and Cairo, 600-1800, with special emphasis on art and architecture. Consideration of the economic, social, and geographical influences on the creation of the distinctive Egyptian styles of Islamic art. Joint with ART H 350.

N E 383 Oral Literature of the Turkic Peoples of Central Asia I: the Heroic Epos (3) Cirtautas Representative heroic poems of Central Asian Turkic peoples now living in the USSR and China. Origin of the heroic epos, its relation to the romantic epos and other oral literary genres. Art of the singer and his role in nomadic Turkic society. Emphasis on Manas, the monumental epos of Kirghiz. Joint with TKIK 363.

N E 375 Turkic Peoples of the Soviet Union (3) Cirtautas History of the Turkic peoples, A.D. 552 to present. Emphasis on current status of Turkic peoples in USSR. Geographical distribution, demographic data, reactions and adaptations to changes resulting from the 1917 revolution. Turkic viewpoint on past and present developments. Joint with SISRE 375.

N E 420 Islamic Theological Literature in English (3) A Readings from Murazilite and Ash'arite works and from traditionalist works opposed to theology.

N E 421 Islamic Mystical Literature in English (3) W Readings from the works of principal Sūfī writers and poets.

N E 422 Islamic Philosophical and Scientific Literature in English (3) Readings in philosophy, the physical sciences, and medicine.

N E 425 Current Trends in Modern Near Eastern Literature and Criticism (3) Modern literary tradition of the Near East with emphasis on major literary movements and/or genres and literary criticism in the modern period. The literatures of the Arab world, Persia, Turkey, and Israel are considered in alternate quarters.

N E 432 Islamic Literature on Jurisprudence and Law in English (3) Sp Zysow The origins of the *shari'ah*, its development throughout the Islamic period, and the modern reform of this law. Joint with LAW B 543.

N E 434 Modern Near East Fiction in Translation (3) Andrews Literary genres; literary theory; principal literary authors of Arabic, of Persian, and of Turkish and their works. From the beginnings to the modern period.

N E 435 Major Trends in Modern Arabic Fiction (3) Sp Development of the Arabic novel from the end of the nineteenth century to the present.

N E 440 Calligraphy in Islamic Culture (3) W Andrews Survey of the esthetics, uses, interpretations of artistic writing in Islamic culture with a "hands on" approach to recognizing, appreciating, and creating Arabic script calligraphy. Students need not know Arabic script nor have calligraphic talents, although some familiarity with Islamic civilization is helpful.

N E 450 Survey of the Cultures of the Turkic Peoples of the Soviet Union (3) Cirtautas Nomadic and sedentary cultures of the Turkic peoples under Soviet dominance. Emphasis on language, literature, and adherence to traditional modes of life. Joint with SISRE 450.

N E 490 Supervised Study (1-6, max. 18) AWSp Special work in Near Eastern studies for graduates and undergraduates. Prerequisite: permission of instructor.

N E 496 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) Offered occasionally by visitors or resident faculty. Content varies.

N E 499 Undergraduate Research (1-6, max. 18) AWSp Prerequisite: permission of instructor.

Peace and Strategic Studies

B10 Padelford

The program in Peace and Strategic Studies enhances the student's understanding of the problem of global nuclear war and also contributes to society's capacity for coping with this problem. Students have access to the experience of those working both with peace and conflict studies and with strategic studies. Offered as an option under General Studies, the program is intended to serve primarily as part of a double major with, for example, political science, psychology, or physics. See a General Studies adviser for requirements.

Philosophy

345 Savery

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the

basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, esthetics, philosophy of science, philosophy of language, philosophy of law, and philosophy of religion.

Undergraduate Program

Bachelor of Arts Degree

Major Requirements: 50 credits in philosophy, which must include: (1) at least 25 credits at the University of Washington; (2) at least four courses at the 400 level or above, excluding transfer credits and reading courses (PHIL 484 and 584), which normally cannot be used to satisfy this requirement; (3) PHIL 120 or 370; and (4) PHIL 320 and 322 (or upper-division courses in the same areas; undergraduate adviser must approve substitutions).

Graduate Program

Master of Arts, Doctor of Philosophy Degrees

The Department of Philosophy offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees, the regular M.A. program option serving as the initial stage of the Ph.D. program. (In addition to the regular M.A. program, described here, the department offers an M.A. program option designed for, and restricted to, persons not interested in becoming professional philosophers. Details on this alternative M.A. program are available from the Graduate Program Coordinator.)

The regular Master of Arts program option is a two-year nonthesis program. The student must take twelve courses in philosophy, satisfy a logic requirement, and, at the end of the second year, submit three research papers for evaluation by the graduate faculty of the department. The courses and the papers must satisfy a distribution requirement. The departmental evaluation of the student's papers and course work determines whether an M.A. degree is awarded and also whether admission to the Ph.D. program is granted. The Ph.D. program, which normally requires at least two years of study beyond the M.A., has five general requirements: (1) presentation of a paper at a philosophy colloquium, (2) teaching experience as a teaching assistant, (3) General Examination, (4) dissertation, and (5) Final Examination.

Doctor of Philosophy Degree (Philosophy and Medical Ethics)

Students who have completed the Master of Arts in Medical History and Ethics or who have satisfied the written portion of the General Examination requirement for a Ph.D. in Philosophy may be admitted to this program. Following admission to the program, students from Medical History and Ethics are required to submit two research papers (in the areas of history of philosophy and metaphysics/epistemology) for evaluation by the graduate faculty of the Philosophy Department in fulfillment of the written portion of the General Examination. Additional requirements for all students include: completion of nine philosophy courses (satisfying a distribution requirement) and four specified medical history and ethics courses; an oral examination devoted at least in part to the student's dissertation proposal; a doctoral dissertation; and a final examination. The student's supervisory committee must include representatives from both the Department of Philosophy and the Department of Medical History and Ethics, all of whom must be members of the Interdisciplinary Committee in Philosophy and Medical Ethics.

Research Facilities

The department maintains its own research library. This library of more than fifteen thousand volumes contains nearly all of the material needed for any philosophical research.

Special Requirements

An undergraduate major in philosophy is not required for admission to the M.A. program. An applicant's philosophical potential is assessed primarily on the basis of a sample of his or her written work in philosophy and secondarily on the basis of his or her undergraduate record, Graduate Record Examination scores, and letters of recommendation. A reading knowledge of at least one foreign language is strongly recommended.

Financial Aid

A number of teaching assistantships are available each year to new graduate students. At present, eleven students of a total enrollment of thirty-three hold teaching assistantships.

Chairperson

Karl H. Potter

Professors

Boler, John F.,* 1960, M.A., 1952, St. Louis; Ph.D., 1960, Harvard; medieval philosophy.

BonJour, Laurence A.,* 1977, Ph.D., 1969, Princeton; epistemology.

Coburn, Robert C.,* 1971, M.A., 1958, Ph.D., 1958, Harvard; metaphysics, social philosophy.

Cohen, S. Marc,* 1973, Ph.D., 1967, Cornell; ancient philosophy, metaphysics, philosophy of mind.

Dietrichson, Paul,* 1955, (Scandinavian Languages and Literature), Ph.D., 1955, Yale; philosophy of religion, ethics, metaphysics.

Keyt, David,* 1957, M.A., 1953, Ph.D., 1955, Cornell; ancient and contemporary philosophy.

Marks, Charles E.,* 1966, Ph.D., 1972, Cornell; contemporary philosophy, British empiricism and continental rationalism.

Potter, Karl H.,* 1971, (Asian Languages and Literature), (International Studies),† M.A., 1952, Ph.D., 1955, Harvard; Indian philosophy, epistemology.

Richman, Robert J.,* 1961, (Emeritus), M.A., 1950, Ph.D., 1953, Harvard; ethics, epistemology.

Associate Professors

Clatterbaugh, Kenneth C.,* 1966, (Psychology, Women Studies), Ph.D., 1967, Indiana; philosophy of science, ancient philosophy, continental rationalism.

Mish'alani, James K.,* 1963, M.A., 1958, Ph.D., 1961, Brown; ethics, philosophical psychology.

Moore, Ronald M.,* 1979, Ph.D., 1971, Columbia; philosophy of law, esthetics.

Assistant Professor

Marl, Genovaeva,* 1987, M.A., 1983, Ph.D., 1989, Stanford; philosophy of language, metaphysics.

Course Descriptions

Courses for Undergraduates

PHIL 100 Introduction to Philosophy (5) AWSp Major philosophical questions relating to such matters as ethics, the existence of God, the foundations of knowledge, and the nature of reality. Problems studied and works read vary.

PHIL 101 Philosophical Classics (5) Selected works of some of the major philosophers, such as Plato, Aristotle, Descartes, Hume, Kant. The philosophers studied vary.

PHIL 102 Contemporary Moral Problems (5) BonJour, Richman Philosophical consideration of some of the main moral problems of modern society and civilization, such as abortion, euthanasia, war, sexual morality, governmental paternalism, reverse discrimination, and capital punishment. Topics vary.

PHIL 104 Ideas in the Western Tradition—Ancient (5) Keyt Philosophy of the ancient world, primarily the views of man and the universe in selected works of Greek and Roman thought.

PHIL 105 Ideas in the Medieval and Renaissance Periods (5) Boler Major ideas in Christian, Jewish, and Islamic thought from late antiquity to the beginnings of the modern period.

PHIL 108 Ideas in the Western Tradition—Modern (5) Coburn Basic ideas about man and the world since the Renaissance. Content and emphasis vary.

PHIL 110 Introduction to Social and Political Philosophy (5) Clatterbaugh, Coburn Examination of such ideals as liberty, distributive justice, democracy, peace, and human survival. Problems involved in achieving social change also considered. Content varies.

PHIL 114 Philosophical Issues in the Law (5) Moore Analysis and critical assessment of various philosophical issues in law and legal reasoning. Material drawn from actual law cases, as well as writings by contemporary philosophers of law and lawyers. Topics include criminal responsibility, civil disobedience, abortion, reverse discrimination, enforcement of morals. Special legal or philosophical training not required.

PHIL 115 Practical Reasoning (5) Introduction to logic emphasizing concepts and methods useful for practical analysis of arguments in everyday contexts. Meaning, syllogisms, logical diagrams, inductive and statistical inference, informal fallacies, argument structure, perhaps some beginning symbolic logic. A wide variety of examples, including logical puzzles, considered.

PHIL 120 Introduction to Logic (5) AWSp Elementary symbolic logic. The development, application, and theoretical properties of an artificial symbolic language designed to provide a clear representation of the logical structure of deductive arguments.

PHIL 160 A Historical Introduction to the Philosophy of Science (5) Clatterbaugh Study of how scientific theories are justified and why they are accepted, using selected examples from the history of science.

PHIL 200 Types of Philosophy (3-5) Introductory philosophy. The content of the course is entirely at the discretion of the instructor.

PHIL 208 Philosophy of Feminism (5) Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, its relation to racial liberation, and ethical issues. Joint with POL S 212 and WOMEN 206.

PHIL 230 Philosophic Issues in World Affairs (3) Coburn Moral problems that arise in connection with such topics as affluence, hunger, and overpopulation; global environmental degradation; war and weaponry; restructuring the international order.

PHIL 240 Introduction to Ethics (5) Richman Critical study of some typical views of the basis and presuppositions of morality and of moral knowledge. Custom, theology, human nature, and happiness as standards of moral judgments. Consideration of such topics as free will and responsibility, ethical relativism, and the problem of evil.

PHIL 241 Topics in Ethics (5) *Mish'alani* Introduction to ethics through in-depth study of one or more selected topics (e.g., limits of moral community, moral education, conscience, shame and guilt, virtue and vice, purity, saintliness and heroism, friendship, veracity, manners and morals, freedom, rights, collective responsibility). Topics vary.

PHIL 267 Introduction to Philosophy of Religion (5) *Dietrichson, Mish'alani* Study of religious thought. Examination of the problem of evil, of the nature of mysticism, atheism, and theism, and of the relationship between religion and morality.

PHIL 320 Ancient Philosophy (5) *A. Cohen, Keyt* Survey of the history of ancient Greek philosophy. The metaphysical and epistemological theories of Plato, Aristotle, and the Atomists, their origins in the thought of Socrates and the pre-Socratics, and their development by the Stoics, Skeptics, Epicureans, and Plotinus.

PHIL 321 Medieval Philosophy (5) *Boler* Development of main lines of philosophical thought in the Latin West from 400 to 1400, with emphasis on Augustine, Anselm, Abelard, Aquinas, and Occam. Recommended: 320.

PHIL 322 Modern Philosophy (5) *W. BonJour, Clatterbaugh* Examination of metaphysical and epistemological problems from the works of Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant.

PHIL 325 Nineteenth-Century Philosophy (5) Examination of post-Kantian thinkers through the end of the nineteenth century considering such major themes as idealism, romanticism, positivism, historicism, naturalism, existentialism, and pragmatism.

PHIL 327 American Philosophy (5) *Boler, Potter* Study of several of the major American philosophers: Peirce, Royce, Dewey, William James, C. I. Lewis, Goodman, Quine. Recommended: at least one course in philosophy.

PHIL 330 History of Ancient Political Philosophy (4) *Keyt* Political philosophy of fourth- and fifth-century Greece, especially the Sophists, Plato, and Aristotle, stressing the connection between the political philosophy and the underlying philosophical system of each philosopher. Recommended: at least one course in philosophy.

PHIL 331 History of Medieval Political Philosophy (4) *Boler* Political philosophy in the Middle Ages, especially the major figures (Augustine, Aquinas, Occam), with special emphasis on the setting of their political thought in the context of their general philosophical positions. Recommended: at least one course in philosophy.

PHIL 332 History of Modern Political Philosophy (5) Examination of major political philosophies from the sixteenth century to the nineteenth century, with attention to the underlying philosophical methods and foundations.

PHIL 334 Philosophy of Marxism (3) *Clatterbaugh* Philosophy of Marx and the Marxist tradition with attention to the philosophical method and foundation of Marxism.

PHIL 338 Philosophy of Human Rights (3) *Coburn* Theories of human rights and the bearing of these theories on such issues of public policy as the legitimacy of war and terrorism, whether people have rights to a clean environment or a welfare floor, and whether future generations have rights.

PHIL 340 History of Ancient Ethics (5) *Keyt, Richman* Development of moral thought from Socrates through the Stoics. Particular emphasis on the ethical writings of Plato and Aristotle. Recommended: one course in philosophy.

PHIL 342 History of Modern Ethics (5) *Richman* Development of moral thought from Hobbes through Nietzsche, with particular emphasis on the ethical writings of Hume, Kant, and John Stuart Mill. Recommended: one course in philosophy.

PHIL 344 History of Recent Ethics (5) *Richman* Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition. Recommended: one course in philosophy.

PHIL 345 Moral Issues of Life and Death (5) *Coburn* Examination of such topics as war and murder, famine relief, capital punishment, high-risk technologies, abortion, suicide, and the rights of future generations. Prerequisite: one course in philosophy or junior standing.

PHIL 346 Personal Values and Human Good (3) *Coburn* Examination of the idea of a good human life. Emphases differ from year to year. Typical topics include happiness and prudence, rationality and life plans, personal values and the meaning of life, autonomy and false consciousness, self-respect and self-esteem, honesty and self-deception, faith and "vital lies." Prerequisites: two previous courses in philosophy.

PHIL 347 Philosophy in Literature (3) *Marks, Mish'alani* Study of philosophical ideas expressed in works of literature.

PHIL 350 Introduction to Epistemology (4) *BonJour* Theory of knowledge. Nature, definition, and possibility of knowledge. Problems about our knowledge of the external world, the past, other minds, mathematics, etc. Prerequisites: two previous courses in philosophy.

PHIL 353 Introduction to the Philosophy of Language (5) *Marti* Philosophical theories about the nature of language. Topics include meaning, reference, truth, propositions, relations between language and thought and between language and logic, relation of philosophy of language to linguistics and psychology. Recommended: 120.

PHIL 363 Introduction to the Philosophy of Mind (5) *Marks* Various theories of the nature of mind, the relationship between mind and body, the self, memory, the unconscious, introspection, and knowledge of other minds. Recommended: one course in philosophy.

PHIL 370 Intermediate Logic (5) *A* Study of first-order predicate calculus, plus philosophically significant applications and extensions. Elementary meta-theory, including soundness and completeness. Recommended: 120.

PHIL 372 Introduction to Set Theory (5) Historical development and basic concepts of set theory. Set-theoretical paradoxes and their proposed solutions.

PHIL 386 Introduction to the Philosophical Systems of India (5) *A. Potter* The fundamental views of classical Indian philosophical schools on epistemology and metaphysics through readings in translation of basic works. Nyaya, Vaisheshika, Samkhya, Yoga, Jain philosophy, Vijnanavada and Madhyamika Buddhism, Advaita Vedanta and later developments. Joint with SISSA 386. Prerequisite: SISSA 210 or one course in philosophy.

PHIL 410 Social Philosophy (3) *Coburn* Examination of social ideals such as liberty and justice, and of social problems associated with current and prospective technological developments. Emphases vary each year.

PHIL 411 Justice in Health Care (5) *Sp. Jecker* Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Joint with MHE 474. Recommended: some previous background in philosophy or medical ethics.

PHIL 412 Indian Philosophy (5) *Potter* Historical survey of the major systems and the traditional problems of philosophy in India. Readings in Buddhism, Nyaya, Samkhya, and Vedanta. Recommended: 100 or 386.

PHIL 413 Studies in Indian Philosophy (3, max. 9) *Potter* One or more individual figures or problems in Indian philosophy selected by the instructor. Prerequisite: 412.

PHIL 414 Philosophy of Law (3) *Moore* Nature and function of law. Relation of law to morality. Legal rights, judicial reasoning. Recommended: 110 or 114 or 240.

PHIL 415 Chinese Philosophy (5) Development of Chinese philosophy from the sixth century B.C. to modern times. Emphasis on Confucianism, Mohism, Taoism, Legalism, the Dialecticians, Buddhism, and Neo-Confucianism; reevaluation of them in the light of new trends of thought after contact with the West.

PHIL 416 Neo-Confucianism (5) Systematic study of Neo-Confucianism, its background and development with emphasis on the Rationalistic school of Ch'eng-Chu and the Idealistic school of Lu-Wang. Prerequisite: 415 or permission of instructor.

PHIL 418 Indian and Tibetan Buddhist Philosophy (3) Topics from Buddhist thought, both Sravakayana and Mahayanist, touching on the following areas: epistemology, theory of liberation, metaphysics and the theory of the absolute, cosmology, and ethics. Readings in translation. At least one course in Indian philosophy or Hinduism or Buddhism recommended.

PHIL 421 Studies in Medieval Philosophy (3, max. 9) *Boler* Detailed study of an individual figure or problem in medieval philosophy (of the Latin West) selected by the instructor. Recommended: 321.

PHIL 422 Studies in Continental Rationalism (3, max. 9) *Clatterbaugh, Marks* Study of one or more of the major continental Rationalists: Descartes, Spinoza, Leibniz. Recommended: 322.

PHIL 426 Twentieth-Century Philosophy (5) *Marti* Birth and development of contemporary analytic philosophy, the revolt against idealism and the linguistic turn in philosophy. Topics and authors include: common sense philosophy and the rejection of British Idealism; Frege's conceptual notation and the analysis of language; logical positivism; the logical atomism of Russell and Wittgenstein. (Formerly 326.)

PHIL 431 Philosophy of Plato (3, max. 6) *Cohen, Keyt* Study of selected middle and late dialogues. Recommended: 320.

PHIL 433 Philosophy of Aristotle (3, max. 6) *Cohen, Keyt* Study of several major Aristotelian treatises. Recommended: 320.

PHIL 434 Philosophy of Thomas Aquinas (3) *Boler* Examination of the major philosophical positions of Thomas Aquinas in the theory of knowledge, metaphysics, and ethics. Recommended: 321.

PHIL 436 British Empiricism (3) *BonJour, Marks* Examination of the metaphysical and epistemological views of Locke and Berkeley, with perhaps some attention also to Hume. Recommended: 322.

PHIL 437 Philosophy of Hume (3) *Marks, Richman* Study of the principles and methods employed by Hume in his analyses of knowledge, the passions, and morals. Recommended: 322.

PHIL 438 Philosophy of Kant (5) *BonJour, Dietrichson* Systematic study of *The Critique of Pure Reason* or of one or more other major works of Kant. Recommended: one course in philosophy (other than logic) beyond the introductory level.

PHIL 439 The Later Philosophy of Wittgenstein (3) *Coburn, Marks* Detailed study of topics in the later philosophy of Wittgenstein, with particular attention to the *Philosophical Investigations*. Recommended: 322.

PHIL 440 Ethics (3) *Coburn, Richman* Critical examination of the concepts and judgments of value, including an analytical treatment of the notions of good and bad, right and wrong, and obligation. Recommended: 240.

PHIL 443 Philosophy and Linguistics (3) Study of philosophical problems that arise in the attempt to understand current linguistic theories and of the implications of linguistics for philosophy. Joint with LING 443.

PHIL 444 Philosophy of Language—Pragmatics (3) *Potter* Language as communicative activity. Speech act theory in Austin, Grice, and contemporary writings. Applications to problems of reference, presupposition, metaphor, relativism. Joint with LING 444.

PHIL 445 Philosophy of Art (5) *Moore* Critical examination of various accounts of the nature of art, artistic activity, the esthetic experience. The philosophy of criticism, the role of the critic, and problems in interpretation and evaluation of works of art.

PHIL 446 Development of Esthetic Theory (5) *Moore* Historical development of esthetics, emphasizing such major figures as Plato, Aristotle, Hume, Kant, Hegel, and Goodman. Recommended: 100 or 445.

PHIL 447 Philosophy of Literature (3) *Mish'alani* Investigation of philosophical questions about literature: What is literature? Why write? Must literature be interpreted? What is interpretation? Literature and ideology; criticism of literature and society.

PHIL 450 Epistemology (5) *BonJour* Systematic study of some of the main problems of the theory of knowledge, such as: the definition of "knowledge"; *a priori* knowledge; perception and knowledge of the external world; memory knowledge; theoretical knowledge; knowledge of other minds; and whether knowledge has or requires a foundation. Recommended: 350 or 322.

PHIL 453 Philosophy of Language (5) *Marti* Current theories of meaning, reference, predication, and related concepts. Joint with LING 476. Recommended: 120.

PHIL 456 Metaphysics (5) *Coburn* Examination of issues and problems that arise in connection with such topics as freedom of the will, the nature of persons and personal identity, the existence of God, time, necessary truth, and universals. The emphases vary from year to year. Recommended: 120 and 322 or equivalents.

PHIL 459 Phenomenology (5) *Mish'alani* The contribution of phenomenology to selected topics in the theory of meaning, philosophy of mind, ontology, and epistemology.

PHIL 459 Philosophy of Medicine (3) *Jecker* Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Joint with MHE 440. Prerequisites: some prior course work in philosophy, the history of science, or the history of medicine.

PHIL 480 Philosophy of Science (5) *BonJour, Clatterbaugh* Critical study of different theories about the nature of scientific theory. Topics include the relation of theory to observation, the use of mathematics, how theories change, the requirements for the meaningfulness of a theory, and the relation between theory and methodology.

PHIL 481 Philosophical Anthropology (5) *Mish'alani* Investigation of the question, "What is human reality?" Philosophical significance of this question and its relation to the human sciences. Typical answers. Implications of those answers for culture, religion, morals, and politics. Recommended: 100, 206, 240, or 410.

PHIL 483 Philosophy of Mind (3) *Marks* Examination of current theories of the nature of the mind and mental processes. Recommended: 363 or permission of instructor.

PHIL 484 Philosophical Issues in the Cognitive Sciences (5) *Marks* Philosophical problems connected with research in psychology, artificial intelligence, and other cognitive sciences. Topics vary. Readings from both philosophical and scientific literature. Accessible to nonphilosophers with suitable interests and backgrounds.

PHIL 485 Philosophy of History (3) *Mish'alani* Analyses of basic concepts employed in historical interpretation, and study of some of the principal philosophers of history, such as Plato, Saint Augustine, Hegel, Marx, Spengler, Toynbee.

PHIL 486 Philosophy of the Social Sciences (3) *Coburn* Examination of fundamental issues in the methodology and the interpretation of the social sciences. Particular emphasis on value orientation and objectivity, functionalism, reductionism, and the status of idealized models. Recommended: 120 or 160 or 460, or course beyond introductory level in a social science.

PHIL 487 Philosophy of Religion (5) *BonJour, Dietrichson* Study of selected topics and problems in the philosophy of religion, such as: arguments for the existence of God; the problem of evil; atheism; faith; religious experience and revelation; the attributes of God; miracles; immortality; and the relation between religion and morality. Readings from historical and contemporary authors. Recommended: one course in philosophy, other than logic, beyond the introductory level.

PHIL 489 Existentialist Philosophy (3) *Dietrichson* Critical examination of major ideas in Kierkegaard's philosophy and in Sartre's or Heidegger's philosophy. Recommended: one course in philosophy, other than logic, beyond the introductory level.

PHIL 470 Advanced Logic (5) Advanced treatment of predicate calculus and associated first-order theories. Decision problem, soundness, completeness, compactness, Skolem-Löwenheim theorem, Tarski's indefinability theorem, Gödel's first incompleteness result. Recommended: 370 or equivalent.

PHIL 472 Axiomatic Set Theory (5) Development of axiomatic set theory up to and including the consistency of the Axiom of Choice and Continuum Hypothesis with the Zermelo-Fraenkel Axioms. Recommended: 370 or permission of instructor.

PHIL 473 Philosophy of Mathematics (5) Traditional accounts of the nature of mathematical entities and mathematical truth given by logicism, intuitionism, and formalism, and the impact of Gödel's incompleteness theorems on these accounts. Recommended: some background in mathematics and formal logic.

PHIL 474 Modal Logic (5) *Marti* Notions of necessity and possibility, using the classical systems T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems. Recommended: 370.

PHIL 479 Formal Semantics and Natural Language (3) Introduction to formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and its relation to formal syntax. Typical topics: Tarskian definitions of truth; "truth theory" and theory of meaning; possible world semantics; Montague semantics; generative semantics; Chomsky on syntax and semantics. Joint with LING 479. Recommended: 120 or 370.

PHIL 484 Reading in Philosophy (1-5, max. 15) **AWSp** Reading of approved philosophical works. Prerequisite: permission of instructor.

Courses for Graduates Only

PHIL 500 Proseminar in Philosophy (5) Development of oral skills in the presentation, criticism, and discussion of philosophical problems and arguments. Student presentations and responses to criticism on a variety of basic philosophical issues. Recommended for all first-year graduate students.

PHIL 510 Seminar in Social Philosophy (5) Topics vary. Generally offers either an in-depth examination of the writings of a particular social philosopher or an examination of some contemporary problem in social philosophy. Prerequisite: 410 or equivalent.

PHIL 514 Seminar in Legal Philosophy (5, max. 20) *Moore*

PHIL 520 Seminar in Ancient Philosophy (5, max. 20) *Cohen, Keyt*

PHIL 521 Seminar in Medieval Philosophy (5, max. 20) *Boler*

PHIL 522 Seminar in Modern Philosophy (5, max. 20) *Clatterbaugh*

PHIL 525 Seminar in Nineteenth-Century Philosophy (5, max. 20)

PHIL 526 Seminar in Recent Philosophy (5, max. 20) *Keyt, Marks*

PHIL 540 Seminar in Ethics (5, max. 20) *Coburn, Keyt, Richman*

PHIL 545 Seminar in the Philosophy of Art (5, max. 20) *Moore*

PHIL 550 Seminar in Epistemology (5, max. 20) *BonJour*

PHIL 553 Seminar in Philosophy of Language (5, max. 20) *Marti* Topics may vary, but emphasis on contemporary research in field. Sample topics: truth; intensionality and actuality; treatments of quantification; semantics for psychological verbs.

PHIL 556 Seminar in Metaphysics (5, max. 20) *BonJour, Coburn*

PHIL 560 Seminar in the Philosophy of Science (5, max. 20) *BonJour, Clatterbaugh*

PHIL 563 Seminar in the Philosophy of Mind (5, max. 20) *Marks*

PHIL 565 Seminar in the Philosophy of History (5, max. 20) *Mish'alani*

PHIL 566 Seminar in Philosophy of the Social Sciences (5)

PHIL 567 Seminar in the Philosophy of Religion (5, max. 20) *Dietrichson*

PHIL 570 Seminar in Logic (5, max. 20)

PHIL 584 Reading in Philosophy (1-4, max. 12) **AWSp** Intensive reading in philosophical literature. The name of the staff member with whom research will be done *must* be indicated in registration. Prerequisite: permission of graduate program coordinator.

PHIL 586 Seminar in Indian Philosophy (5, max. 20) *Potter* Prerequisite: 412.

PHIL 587 Contemporary Analytic Philosophy (5, max. 20)

PHIL 600 Independent Study or Research (*) **AWSp** Prerequisite: permission of graduate program coordinator.

PHIL 700 Master's Thesis (*) **AWSp**

PHIL 800 Doctoral Dissertation (*) **AWSp**

Physics

215 Physics

Physics is the study of the fundamental structure of matter and the interaction of its constituents, as well as the basic natural laws governing the behavior of matter.

Undergraduate Program

Bachelor of Science Degree

Admission: Recommended preparation includes four years of college preparatory mathematics, one year of physics, and one year of chemistry.

Major Requirements: (1) Core courses—PHYS 121, 122, 123, 131, 132, 133, 224, 225, 227, 228, 321, 322, 334, 335; (2) 3 credits selected from upper-division lecture courses in modern physics; (3) 3 credits selected from upper-division physics laboratory courses; (4) 8 credits selected from approved upper-division physics courses or approved courses in cognate subjects; (5) MATH 124, 125, 126, 307, 328 or MATH 134, 135, 136, 334, 335, 336; (6) 9 credits selected from physical or biological sciences other than physics or mathematics, or from the history or philosophy of science, in addition to any courses in these fields taken to satisfy requirement (4); (7) at least 12 credits of the physics courses presented to satisfy requirements (1) through (4) shall be in physics courses numbered 300 or above taken at the University of Washington. Grades of 2.0 or better are required in all courses presented in fulfillment of requirements (1) through (4). Students who plan graduate study in physics are strongly advised to complete, in addition to courses listed in requirement (1), the following: PHYS 323, 324, 325, 328, 331, 421, 422, 423, 424, 425, 426, 431, 432, 433, and AMATH 401, 402, 403.

Progress Requirement: In each academic year, every undergraduate physics major who either has completed the required 200-level courses in physics or has begun physics courses beyond the 200 level must (1) complete at least 15 credits of course work acceptable in fulfillment of the departmental degree requirements exclusive of credits earned by repeating courses in which acceptable credit has been earned previously, or (2) complete satisfactorily an approved part-time program of study. Students who do not satisfy the above requirement will be dropped as physics majors unless exempted explicitly by the Physics Undergraduate Affairs Committee. Students dropped for this reason may petition the committee for readmission to the major.

Graduate Program

The Department of Physics offers studies leading to the degrees of Master of Science and Doctor of Philosophy. The department has a permanent faculty of fifty-five members and a research, visiting, and cooperating faculty that normally numbers about thirty-five. About thirteen Ph.D. and twenty-nine M.S. degrees in physics have been awarded annually in recent years.

Research Facilities

The department is well equipped, both in staff and facilities, for instruction and research in a discipline that emphasizes fundamental problems in understanding the physical universe. Areas of research available to the Ph.D. student include astrophysics, nuclear physics, elementary-particle physics, low-temperature and condensed-matter physics, general relativity, atomic physics, and physics education. Members of the nuclear physics group are involved in studies using the facilities of the Nuclear Physics Laboratory on campus,

as well as facilities at Los Alamos, while the high-energy experimental groups are heavily engaged in experiments with the large accelerators at SLAC, BNL, and Fermilab. Experimental work on atomic physics using radiofrequency spectroscopy, laser techniques, and trapping of single ions, and condensed matter-low temperature work on thin films, matter under high pressure, and various properties of materials are under way within the physics building itself. Synchrotron radiation from facilities at SLAC and Brookhaven are being used to study molecules and solids. On the theoretical side, members of the department are concerned with problems in the theories of elementary particles and quantum fields, nuclear and high-energy reactions, phase transitions and statistical mechanics; and condensed-matter physics, atomic physics, general relativity, and astrophysics. Students in physics are encouraged to pursue appropriate interdisciplinary interests and research in applied physics with faculty members in other departments.

Departmental facilities are housed in Physics Hall, Guggenheim Annex, and the Nuclear Physics Laboratory. Contained therein are offices, classrooms, research and instructional laboratories; machine, glass, and electronics shops; computers; and an extensive physics branch library. The main facility at the Nuclear Physics Laboratory is a three-stage FN tandem electrostatic accelerator and a superconducting booster, equipped with computers for on- and off-line data analysis and with a variety of special ion sources and detection apparatus.

Master of Science, Doctor of Philosophy Degrees

Admission Requirements: Undergraduate preparation to include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics to include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions. Admissibility is determined by the applicant's undergraduate program, undergraduate grades, Graduate Record Examination aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

Master of Science Degree

Graduation Requirements: Department requirements include standard Graduate School requirements. In addition, 3 credits must be in PHYS 600 and at least 12 other credits in physics graduate courses. A final examination is required. A thesis or foreign-language study is not required.

Master of Science Degree (Applications of Physics)

Admission Requirements: This option is designed for students who are currently employed and whose backgrounds are in physical science, engineering, or mathematics. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of specialization offered in the physics department.

Graduation Requirements: In addition to the standard Graduate School requirements, students are expected to complete the sequence of core courses PHYS 441, 541, and 543 and to select appropriate specialized courses. Students are expected to undertake an independent study project in consultation with a faculty member. This project may be carried out at the University or at the student's place of employment. Students must take at least 3 credits of PHYS 600 and at least 12 in other physics graduate courses. A final examination is required. A thesis or foreign-language study is not required.

Doctor of Philosophy Degree

Graduation Requirements: The student is expected to obtain here, or elsewhere with a master's degree, a background in physics equivalent to that contained in

the following sequences of basic graduate courses: PHYS 505, 506; 513, 514, 515; 517, 518, 519, 520; and 524, 525; and in specialized courses appropriate to each student's interests. The student is required to pass, successively, a written qualifying examination (in the autumn of the second year), an oral General Examination for admission to candidacy, and an oral Final Examination. In order to take the General Examination, the student must have been accepted by a graduate faculty member as a research student and have completed the graduate studies outlined above. This examination covers the area in which the dissertation research is planned. Teaching experience is required of all candidates. Foreign-language study is not required.

Financial Aid

Most graduate students are supported by fellowships and assistantships. Application for these should be made along with the application for admission.

Professors

Adelberger, Eric G.,* 1970, Ph.D., 1967, California Institute of Technology; experimental nuclear physics.

Arons, Arnold B., 1968, (Emeritus), M.S., 1940, Stevens Institute of Technology; Ph.D., 1943, Harvard; physical oceanography, physics education.

Baker, Marshall,* 1962, (Applied Mathematics), Ph.D., 1958, Harvard; field theory, theoretical elementary-particle physics.

Bardeen, James M.,* 1976, (Astronomy), Ph.D., 1965, California Institute of Technology; general relativity, theoretical astrophysics.

Bodansky, David,* 1954, M.A., 1948, Ph.D., 1950, Harvard; experimental nuclear physics.

Boulware, David G.,* 1965, M.A., 1960, Ph.D., 1962, Harvard; field theory, theoretical elementary-particle physics, general relativity.

Boynton, Paul E.,* 1970, (Astronomy),† Ph.D., 1967, Princeton; high-energy astrophysics, astronomy.

Brown, Frederick C.,* 1987, M.S., 1947, Ph.D., 1950, Harvard; use of synchrotron radiation in experimental solid-state physics.

Brown, Lowell S.,* 1968, A.M., 1958, Ph.D., 1961, Harvard; field theory, theoretical elementary-particle physics.

Burnett, Thompson H.,* 1975, Ph.D., 1968, California (San Diego); experimental elementary-particle physics.

Clark, Kenneth C.,* 1948, (Geophysics),† A.M., 1941, Ph.D., 1947, Harvard; optical spectroscopy, upper atmosphere.

Cook, Victor,* 1963, Ph.D., 1962, California (Berkeley); experimental high-energy physics.

Cramer, John G., Jr.,* 1984, M.A., 1959, Ph.D., 1961, Rice; experimental nuclear physics.

Dash, J. Gregory,* 1960, M.A., 1951, Ph.D., 1951, Columbia; low-temperature condensed-matter physics.

Dehmelt, Hans G.,* 1955, M.S., 1949, Ph.D., 1950, Goettingen; radio-frequency spectroscopy.

Ellis, Stephen D.,* 1975, Ph.D., 1971, California Institute of Technology; theoretical elementary-particle physics.

Engel, Thomas,* 1980, ‡(Chemistry), M.A., 1964, Johns Hopkins; Ph.D., 1969, Chicago; surface chemistry and catalysis.

Fain, Samuel C.,* 1969, M.S., 1966, Ph.D., 1969, Illinois; experimental condensed-matter physics, surface physics.

Farwell, George W.,* 1948, (Emeritus), Ph.D., 1948, Chicago; experimental nuclear physics.

Fortson, E. Norval,* 1963, Ph.D., 1964, Harvard; radio-frequency spectroscopy, experimental atomic physics.

Geballe, Ronald,* 1946, (Emeritus), M.S., 1940, Ph.D., 1943, California (Berkeley); atomic and molecular collisions.

Gerhart, James B.,* 1956, M.A., 1952, Ph.D., 1954, Princeton; experimental nuclear physics, physics education.

Halpern, Isaac,* 1953, Ph.D., 1948, Massachusetts Institute of Technology; experimental nuclear physics.

Haxton, Wick,* 1984, M.S., 1973, Ph.D., 1976, Stanford; theoretical nuclear physics.

Heller, Eric J.,* 1984, (Chemistry),† Ph.D., 1973, Harvard; molecular spectra and dynamics.

Henderson, Joseph E., 1929, (Emeritus), Ph.D., 1928, Yale; physics.

Henley, Ernest M.,* 1954, Ph.D., 1952, California (Berkeley); theoretical nuclear physics, theoretical elementary-particle physics.

Ingalls, Robert L.,* 1966, M.S., 1960, Ph.D., 1962, Carnegie Institute of Technology; experimental condensed-matter physics.

Lord, Jere J.,* 1952, M.S., 1948, Ph.D., 1950, Chicago; cosmic rays, experimental elementary-particle physics.

Lubatti, Henry J.,* 1969, M.S., 1963, Illinois; Ph.D., 1966, California (Berkeley); experimental elementary-particle physics.

Margon, Bruce,* 1980, ‡(Astronomy), M.A., 1971, Ph.D., 1973, California (Berkeley); x-ray astronomy, counterparts of x-ray sources.

McDermott, Lillian C.,* 1967, M.A., 1956, Ph.D., 1959, Columbia; physics education.

McDermott, Mark N.,* 1962, M.A., 1956, Ph.D., 1959, Columbia; radio-frequency spectroscopy.

Miller, Gerald A.,* 1975, S.M., 1968, Ph.D., 1972, Massachusetts Institute of Technology; theoretical nuclear physics.

Mockett, Paul M.,* 1972, (Research), Ph.D., 1965, Massachusetts Institute of Technology; experimental elementary-particle physics.

Parks, George K.,* 1971, ‡(Atmospheric Sciences, Geophysics), Ph.D., 1966, California (Berkeley); particles and waves in auroral, magnetospheric, and interplanetary space plasma phenomena.

Pelzer, Sir Rudolf E., 1974, (Emeritus), Ph.D., 1929, Leipzig; physics.

Peters, Philip C.,* 1964, (Astronomy), Ph.D., 1964, California Institute of Technology; general relativity, theoretical astrophysics.

Puff, Robert D.,* 1962, Ph.D., 1960, Harvard; many-body theory, statistical physics.

Rehr, John J.,* 1974, Ph.D., 1972, Cornell; theoretical condensed-matter physics.

Riedel, Eberhard K.,* 1975, Ph.D., 1966, Munich Technical (Germany); theoretical condensed-matter physics.

Rothberg, Joseph E.,* 1969, (Environmental Studies), M.A., 1958, Ph.D., 1963, Columbia; experimental high-energy physics.

Rutherford, John P., 1976, Ph.D., 1968, Cornell; experimental high-energy physics.

Schick, Michael,* 1969, M.S., 1964, Ph.D., 1967, Stanford; theoretical condensed-matter physics.

Schmidt, Fred H.,* 1946, (Emeritus), M.A., 1940, Buffalo; Ph.D., 1945, California (Berkeley); experimental nuclear physics.

Snover, Kurt A.,* 1972, (Research), M.S., 1968, Ph.D., 1969, Stanford; experimental nuclear physics.

Stern, Edward A.,* 1966, Ph.D., 1955, California Institute of Technology; experimental condensed-matter physics.

Storm, Derek, W.,* 1983, (Research), Ph.D., 1970, Washington; theoretical elementary-particle physics.

Streib, John F.,* 1947, (Emeritus), Ph.D., 1941, California Institute of Technology; physics.

Thouless, David J.,* 1980, Ph.D., 1958, Cornell; theoretical condensed-matter physics.

Vandenbosch, Robert,* 1963, ‡(Chemistry), Ph.D., 1957, California (Berkeley); nuclear studies and spectroscopy.

Van Dyck, Robert S., Jr.,* 1971, Ph.D., 1971, California (Berkeley); experimental atomic physics.

Vilches, Oscar E.,* 1988, Doctor en Física, 1966, Univ. Nac. de Cuyo (Argentina); low-temperature condensed-matter physics.

Vlases, George C.,* 1973, ‡(Aeronautical and Astronautical Engineering, Nuclear Engineering), M.S., 1959, Ph.D., 1963, California Institute of Technology; nuclear engineering.

Weitkamp, William G.,* 1964, (Research), M.S., 1961, Ph.D., 1965, Wisconsin; experimental nuclear physics.

Wilets, Lawrence,* 1958, M.A., 1950, Ph.D., 1952, Princeton; theoretical nuclear and atomic physics.

Williams, Robert W.,* 1959, M.A., 1943, Princeton; Ph.D., 1948, Massachusetts Institute of Technology; experimental high-energy physics, cosmic rays.

Young, Kenneth K.,* 1967, Ph.D., 1965, Pennsylvania; experimental high-energy physics.

Associate Professors

Chaloupka, Vladimir,* 1980, Ph.D., 1975, Geneva (Switzerland); experimental elementary-particle physics.

den Nijs, Marcel,* 1983, Ph.D., 1979, Katholieke University (Netherlands); theoretical condensed-matter physics.

Heckel, Blayne,* 1983, M.A., 1978, Ph.D., 1981, Harvard; experimental atomic physics.

Hogan, Craig,* 1990, (Astronomy), Ph.D., 1980, Cambridge; astrophysics, astronomy, cosmology.

Nagourney, Warren,* 1977, (Research), Ph.D., 1972, Columbia; experimental atomic physics.

Sorensen, Larry B.,* 1983, M.S., 1974, Ph.D., 1980, Illinois; experimental condensed-matter physics.

Trainor, Thomas A.,* 1973, (Research), Ph.D., 1973, North Carolina; experimental nuclear physics.

Wilkes, Richard J.,* 1974, (Research), Ph.D., 1974, Wisconsin; high-energy physics and space science.

Yaffe, Laurence, G.,* 1988, Ph.D., 1980, Princeton; theoretical elementary-particle physics.

Assistant Professors

Gossett, Cynthia,* 1983, (Research), M.S., 1979, Ph.D., 1983, Wisconsin (Madison); experimental nuclear physics.

Holzworth, Robert,* 1982, ‡(Geophysics), M.A., 1974, Ph.D., 1977, California (Berkeley); space physics and electrical fields.

Hyde-Wright, Charles,* 1986, Ph.D., 1984, Massachusetts Institute of Technology; experimental nuclear physics.

Mir, Ronan,* 1986, (Research), Ph.D., 1986, Weizmann Institute; experimental high-energy physics.

Sharpe, Stephen R.,* 1988, Ph.D., 1983, California (Berkeley); theoretical elementary-particle physics.

Vella, Eric,* 1985, (Research), Ph.D., 1981, California (Berkeley); experimental high-energy physics.

preparation in science is weak and who plan to take standard college science courses. Also provides background needed by teachers for effective use of science curriculum materials in the schools. Prerequisites: 101-for-102; -102 for 103.

PHYS 104 Introduction to Mechanics (3) Problem-solving techniques applicable to elementary Newtonian mechanics. Prerequisite: concurrent registration in 103.

PHYS 110, 111, 112 Liberal Arts Physics (5,5,5) AS,W,Sp Basic concepts of physics presented with emphasis on their origin and their impact on society and the Western intellectual tradition. Primarily for students in the arts, humanities, and social sciences. Prerequisites: 110 for 111; 111 for 112.

PHYS 114, 115, 116 General Physics (4,4,4) AWSp,AWSp,AWSp Basic principles of physics presented without use of college-level mathematics. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Concurrent registration in 117, 118, 119 strongly recommended. 114: mechanics and sound. 115: heat and electromagnetism. 116: light and modern physics. Prerequisites: working knowledge of algebra and trigonometry, one year of high school physics; 114 for 115; 115 for 116.

Credit is not given for both 114 and 121, 115 and 122, 116 and 123, 117 and 131, 118 and 132, 119 and 133.

PHYS 117, 118, 119 General Physics Laboratory (1,1,1) AWSp,AWSp,AWSp 117: mechanics laboratory, to be taken concurrently with 114. 118: heat and electromagnetism laboratory, to be taken concurrently with 115. 119: sound, light, and modern physics laboratory, to be taken concurrently with 116.

The courses 121, 122, 123, 224, 225 plus appropriate laboratory together make up the general physics sequence for science and engineering students.

PHYS 121 Mechanics (4) AWSp Basic principles of mechanics. Concurrent registration in 131 strongly recommended. Prerequisites: one year of high school physics or permission of academic adviser, concurrent or previous MATH 124 or 134.

PHYS 122 Electromagnetism and Oscillatory Motion (4) AWSp Basic principles of electromagnetism, the mechanics of oscillatory motion. Concurrent registration in 132 strongly recommended. Prerequisites: 121; MATH 125 or 135, either of which may be taken concurrently.

PHYS 123 Waves (4) AWSp Electromagnetic waves, optics, and waves in matter. Concurrent registration in 133 strongly recommended. Prerequisites: 122, concurrent or previous MATH 126 or 136.

PHYS 131, 132, 133 Experimental Physics (1,1,1) Experimental topics in physics for science and engineering majors. Prerequisites: concurrent or previous enrollment in 121 for 131; 122 for 132; 123 for 133.

PHYS 205 Concepts of Physical Science (3) The nature, origin, and use of selected concepts of the physical sciences.

PHYS 207 The Physics of Music (3) The nature of sound; vibrations; traveling and standing waves; response of the ear to sound; production of musical sounds.

PHYS 210, 211, 212 Intermediate Physics for Teachers and Students in Liberal Arts (5,5,5) A,W,Sp Individualized study of selected topics emphasizing depth of understanding and development of skills essential to the scientific process. Useful as background for teaching physical sciences. Prerequisites: at least two quarters of physics at the 100 level; 210 strongly recommended prior to 211.

Course Descriptions

Courses for Undergraduates

PHYS 101-102, 103 Introductory Physics (5-5,5) A,W,Sp Basic concepts of physics presented in a laboratory setting. Useful for students whose high school

PHYS 214 Light and Color (5) A Compares past explanation of certain familiar natural phenomena with present understandings. Lamps and lighting, outdoor light, optical devices, color vision, perspective, paints, and pigments. Quantitative comparison critical to the course, but college-level mathematics background not required. Intended for nonscience students.

PHYS 215 Order and Disorder (5) W Includes symmetry in biological systems and in inanimate nature, relation of structure to size, and micro- and macrostructure of universe, systems in chaos. Quantitative comparison critical to course, but college-level mathematics background not required. 214, 215, 216 may be taken independently or in any order. Intended for nonscience students.

PHYS 216 Time and Change (5) Sp Includes miracles and magic, how and why things move, basic forces in nature, quantum mechanics, relativity, past and future of the universe. Quantitative comparison critical to course, but college-level mathematics background not required. 214, 215, 216 may be taken independently or in any order. Intended for nonscience students.

PHYS 224 Thermal Physics (3) AWSp Introduction to heat, thermodynamics, elementary kinetic theory, and the physics of continuous media. Prerequisites: 122, which may be taken concurrently, and MATH 126.

PHYS 225 Modern Physics (3) AWSp Special theory of relativity; phenomena of modern physics with emphasis on photons, electrons, and atoms; introduction to quantum physics. Prerequisites: 123, concurrent or previous MATH 126 or 136.

PHYS 227, 228 Elementary Mathematical Physics (3,3) W,Sp Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Prerequisites: 123, MATH 307; 227 for 228.

PHYS 311 Relativity and Gravitation (3) Special theory of relativity, Newtonian gravity, and relativistic effects of gravitation, including black holes, gravitational waves, and applications to cosmology. Prerequisite: 123, MATH 126.

PHYS 321, 322, 323 Electromagnetism (3,3,3) A,W,Sp Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisites: 123, 228, MATH 328, which may be taken concurrently, for 321; 321 for 322; 322 for 323.

PHYS 324, 325 Quantum Mechanics (3,3) A,W Introduction to nonrelativistic quantum mechanics. Prerequisites: 225, 228, MATH 328 for 324; 324 for 325.

PHYS 327 Introduction to Nuclear Physics (3) Nuclear structure, including nuclear reactions, fission, particle accelerators, and nuclear instrumentation; applications of nuclear phenomena in atomic energy and astrophysics. Prerequisite: 225 or permission of instructor.

PHYS 328 Statistical Physics (3) Sp Elements of statistical mechanics and their applications. Prerequisites: 224, 225, 227, 324 or a similar introduction to quantum mechanics; MATH 328.

PHYS 331 Optics Laboratory (3) Sp Optical and spectroscopic measurements.

PHYS 334, 335 Electric Circuits Laboratory (3,3) W,Sp Basic elements of DC, AC, and transient circuits; electronic devices; electrical measurements. Prerequisites: 123, MATH 126 or 136 for 334; 334 for 335.

PHYS 341 Energy: Consumption Patterns, Fossil Fuels, and Conservation (3) Survey of energy use, especially in the United States. Fossil fuels, with emphasis on resource availability, and on greenhouse ef-

fect and other environmental consequences. Methods for reducing consumption through conservation. Prerequisites: 121, 122, 123.

PHYS 342 Energy: Nuclear and Solar Power (3) Technology of nuclear power, especially fission power, and of the major forms of solar power, including hydroelectric power, photovoltaic power, wind power, and biomass. Consideration given to the factors limiting the utilization of these sources. Joint with NUC E 342. Prerequisites: 121, 122, 123, or equivalent; recommended: 341.

PHYS 343 Environmental Radioactivity (3) Sources of radioactivity in the environment, including both natural sources, especially radon, and manmade sources, especially nuclear power and nuclear explosions. Emphasis given to methods for determining radiation doses from the significant sources. Joint with NUC E 343 and RAD S 343. Prerequisites: 121, 122, 123, or equivalent.

PHYS 401, 402, 403 Special Problems (*,*,*) Supervised individual study.

PHYS 405-406 Physical Science for Teachers (2-5, max. 6)-(2-5, max. 6) Individualized study of selected topics emphasizing depth of understanding and development of skills essential to scientific process. Useful as background for teaching physical science.

PHYS 407, 408, 409 Physics for Teachers (5,5,5) Individualized study of selected topics in basic physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Prerequisite: permission of instructor. Strongly recommended: 407 taken prior to 408.

PHYS 410 Physical Science for In-service Teachers (1-2, max. 10) A "hands-on" inquiry-oriented course designed to train in-service teachers in the use of the physical science content of any of several science programs that might be selected by a school or school district. Prerequisite: in-service teacher in co-operating school district.

PHYS 411, 412, 413 Physical Science for Lead Teachers (1-4, max. 4; 1-4, max. 4; 1-4, max. 4) For preservice and in-service teachers. Extends the physical science content covered in previous courses and helps prepare lead teachers to train their colleagues in the use of the physical science content of any of several science programs that might be selected by a school or school district. Prerequisites: 101-102 or 400 or 405-406.

PHYS 421 Atomic and Molecular Physics (3) A Survey of the principal phenomena of atomic and molecular physics. Prerequisites: 323 and 325, or permission of instructor.

PHYS 422 Nuclear and Elementary-Particle Physics (3) W Survey of the principal phenomena of nuclear and elementary-particle physics. Prerequisites: 323 and 325, or permission of instructor.

PHYS 423 Solid-State Physics (3) Sp Survey of the principal phenomena of solid-state physics. Prerequisites: 323 and 325, or permission of instructor.

PHYS 424, 425, 426 Mathematical Physics (3,3,3) A,W,Sp 424: advanced classical mechanics. 425, 426: mathematical techniques of particular use in physics, including partial differential equations. Prerequisites: 323 and 325, or permission of instructor for 424 or 425; 425 for 426.

PHYS 427 Applications of Physics (1-3, max. 12) Current applications of physics to problems in the sciences and technology.

PHYS 428 Selected Topics in Physics (1-3, max. 12)

PHYS 431, 432, 433 Modern Physics Laboratory (3,3,3) A,W,Sp 431, 432: measurement in modern atomic, molecular, and solid-state physics. 433: techniques in nuclear and elementary-particle research. Prerequisites: 30 credits in physics or permission of instructor for 431, 432; 327 or 422 or permission of instructor for 433.

PHYS 434 Application of Computers to Physical Measurement (3) Laboratory giving specific instruction and experience in interfacing a minicomputer to laboratory equipment. Prerequisite: junior standing or permission of instructor.

PHYS 441 Quantum Physics (4) A Methods of quantum mechanics and applications to physical systems. Examples from such fields as atomic and molecular systems, atomic collisions, nuclear physics, solid-state physics. Students are helped to make up deficiencies in physics background and mathematics proficiency. Typical preparation: 30 credits in physical science or engineering.

PHYS 485, 486, 487 Senior Honors Seminar (1,1,1) A,W,Sp

Courses for Graduates Only

PHYS 505, 506 Mathematical Methods of Physics (3,3) A,W Mathematical techniques discussed in the context of the physics problems where they arise. Differential and integral equations with boundary conditions applied to conduction and diffusion, hydrodynamics, acoustics, classical and quantum mechanics.

PHYS 507 Physical Applications of Group Theory (3) Applications of finite and continuous groups, representation theory, symmetry, and conservation laws to physical systems.

PHYS 513, 514, 515 Electromagnetism and Relativity (4,4,4) A,W,Sp Properties of electric and magnetic fields in free space and material media; boundary-value problems; radiation from accelerated charges and electromagnetic waves; the theory of special relativity leading to a relativistic formulation of electromagnetism and particle dynamics.

PHYS 517, 518, 519 Quantum Mechanics (4,4,4) A,W,Sp The uncertainty principle and the interpretation of quantum mechanics; solutions of the Schrödinger equation in three dimensions; Dirac notation and matrix formulation; angular momentum; Wigner-Eckart theorem; elementary collision theory; density matrix; approximation methods; atomic structure; semiclassical radiation theory; introduction to group theory and symmetry.

PHYS 520 Advanced Quantum Mechanics (4) A Second quantization; applications to the many-body problem; Dirac equation; Klein-Gordon equation; radiation theory; elementary meson theory. Prerequisite: 519.

PHYS 524, 525 Thermodynamics and Statistical Mechanics (3,3) A,W Statistical mechanical basis for the fundamental thermodynamical laws and concepts; applications of thermodynamic reasoning to selected physical problems; classical statistical distribution functions; quantum statistical mechanics; introduction to equilibrium many-body problems. Prerequisite: 517, which may be taken concurrently.

PHYS 527, 528 Current Problems in Physics (1,1) Introduction to current research topics for beginning graduate students.

PHYS 530 Physics Colloquium (*)

PHYS 531 Seminar in High-Energy Physics (*)

PHYS 532 Seminar in Atomic Collisions and Spectroscopy (*)

PHYS 533 Seminar in Relativistic Astrophysics (*)

PHYS 534 Seminar in Coherent Spectroscopy (*)

PHYS 535 Seminar in Nuclear Physics (*)**PHYS 536 Seminar in Low-Temperature and Solid-State Physics (*)****PHYS 537 Seminar in Theoretical Physics (*)****PHYS 538 Seminar in Cosmic Ray Physics (*)****PHYS 539 Seminar in Problems of Physics Education (*)**

PHYS 541 Applications of Quantum Physics (4) Sp Techniques of quantum mechanics applied to lasers, quantum electronics, solids, and surfaces. Emphasis on approximation methods and interaction of electromagnetic radiation with matter. Prerequisite: 421 or 441 or equivalent.

PHYS 542 Numerical Methods in Physics (4) Numerical methods for analysis and computation in physics. Topics include: interpolation, approximation, integration, differential and difference equations, transcendental equations, optimization. Emphasis on physical applications, eigenvalue and scattering problems, modeling.

PHYS 543 Electromagnetic Waves (4) Principal concepts of electromagnetism and classical mechanics. Boundary-value problems. Electromagnetic waves with applications in materials, optics, wave guides. Special relativity and electromagnetism. Prerequisite: 30 credits in physical sciences or engineering.

PHYS 544 Electromagnetic Theory and Plasma Physics (4) Review of electromagnetic theory in terms of Maxwell's equations. Basic fluid mechanics and kinetic theory. Magnetohydrodynamics and plasma physics with the aim of providing an understanding of the principles underlying fusion reactors and other applications.

PHYS 545 Contemporary Optics (4) Coordinated lecture and laboratory treatment of topics in contemporary optics. Subjects include Fourier optics, lens systems, interferometry, laser optics, holography, polarization, crystal optics, birefringence, laser and conventional light sources, optical detectors. Prerequisite: 543 or equivalent.

PHYS 546 Condensed-Matter Physics (4) Experimental techniques for investigating surface geometrical and electronic structure, surface composition, and surface thermodynamics. Auger electron spectroscopy, photo-electron spectroscopy, low-energy electron diffraction, ion sputtering. Prerequisite: 441 or equivalent.

PHYS 547 Electronics for Physics Research (4) Electronic techniques as applied in physics research. Topics include noise, control-system analysis, operational amplifiers, lock-in amplifiers, precision power supplies and metering, data transmission, microprocessors. Several integrated measurement systems are examined in the context of specific research problems. Prerequisite: elementary electronics.

PHYS 548 Nuclear Instrumentation (4) Techniques of nuclear particle detection and radiation detection; position detection; signal preparation and amplification; signal transmission and termination; noise suppression; pulse height discrimination; analog signal processing; fast logic; fast and slow timing; time-to-amplitude conversion; pile-up rejection; singles pulse height analysis; multiparameter pulse height analysis; computer-based data collection; interfacing. Prerequisites: 334 and 335 or equivalents.

PHYS 549 Low-Temperature Physics and Cryogenics (4) Condensed-matter physics at low and ultralow temperatures. Production of low temperatures; liquefaction of gases, dilution refrigeration, magnetic and compressional cooling. Macroscopic quantum effects: superconductivity, superfluidity. Applications of superconductors. The ultralow temperature frontier.

PHYS 550, 551 Atomic Physics (3,3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: 519.

PHYS 552 Introduction to Cosmic Ray Physics (3) The nature and cosmological significance of cosmic ray photons and particles. The motion and confinement of particles in the geophysical, interplanetary, and interstellar medium. Theories of the processes involved in the high-energy interaction of cosmic rays, including shower theory. Methods of measurement and current problems. Prerequisite: introductory quantum mechanics.

PHYS 557, 558, 559 High Energy Physics (3,3,3) High-energy kinematics; phenomenology of high-energy collisions. Second quarter is devoted to strong interactions, and the third quarter discusses weak interactions. Experimental results are emphasized. Prerequisite: 519.

PHYS 560, 561, 562 Theoretical Nuclear Physics (3,3,3) Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: 519.

PHYS 564, 565 General Relativity (3,3) General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: 515.

PHYS 567, 568, 569 Theory of Solids (3,3,3) A,W,Sp A three-quarter course covering the fundamentals of solid-state physics. Various topics in solid-state physics are covered in considerable detail, bringing knowledge up to the current literature. Prerequisite: 519.

PHYS 570, 571 Quantum Field Theory (3,3) Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Prerequisite: 520.

PHYS 572 Modern Quantum Field Theory (3) Advanced topics in quantum field theory. Prerequisites: 570, 571.

PHYS 576 Selected Topics in Experimental Physics (*)

PHYS 578 Selected Topics in Theoretical Physics (*)

PHYS 580 Laser Physics (4) Physics underlying laser design and operation in the context of common laboratory systems. Topics may include continuous and pulsed lasers; solid, liquid, and gas gain media; Q-switching, mode-locking, resonator theory, nonlinear optics, and others. Prerequisites: basic quantum mechanics, electromagnetism, and optics; recommended: 541.

PHYS 581 Fluid Mechanics (4) Mechanics of ideal and viscous fluids. Topics may include turbulence, thermal conduction and diffusion, shock waves, and others.

PHYS 582 Liquid Crystal Devices (4) Physics of liquid crystals and applications to practical display devices. Phases, phase transitions, optical and dielectric properties, molecular and device "engineering," future prospects.

PHYS 600 Independent Study or Research (*) Study or research under the supervision of individual faculty members. Prerequisite: permission of supervisor.

PHYS 800 Doctoral Dissertation (*) Prerequisite: permission of Supervisory Committee chairperson.

Political Science

101 Gowen

Students of political science examine the theory and practice of government and politics. They acquire knowledge of political institutions and processes and learn to think critically about public policies and their consequences. They learn how to evaluate individual, group, and mass behavior in political settings. Because of their understanding and interest in political systems, students who major in political science enter such career fields as government service, law, journalism, politics, public policy analysis, and education.

The department is organized into four major fields of study: political theory, American government and politics, international relations, and comparative politics. Several subfields—such as law and public policy, political culture, and political economy—cut across these main areas and provide focused specializations for both undergraduate and graduate students. The department has long been renowned in comparative and international politics, especially in the study of Asian political phenomena and in American government and politics. Recently, the department has augmented its faculty strength in political and feminist theory as well as in political economy.

Undergraduate Program

Students begin their concentration by choosing three basic courses that define the discipline and its major fields of interest, then advance to more specialized study in the field areas. The undergraduate program is designed to provide broad knowledge of the discipline, to emphasize the acquisition of research skills to students who will seek advanced degrees, and to offer practical experience through internships and fieldwork courses to students who will seek employment after completing the baccalaureate degree.

Bachelor of Arts Degree

Admission Requirements: Successful completion of three of the following: POL S 101, 201, 202, 203, 204, 205 (or equivalents). Minimum of 45 credits completed. Cumulative University of Washington grade-point average of 2.00 or higher. Admission is competitive, based on academic progress, performance in political science introductory courses, and additional study/internships demonstrating interest in the major. Deadlines for submitting admission applications: April 21 for summer and autumn; October 21 for winter; January 21 for spring.

Major Requirements: 50 credits in political science, including (1) 15 credits from POL S 101, 201, 202, 203, 204, or 205 and (2) 35 credits from the following fields: political theory, comparative politics, international relations, American politics, and research methods with at least one course from each of three different fields. Majors must maintain a 2.25 cumulative grade-point average in political science. Transfer and fifth-year students must meet all major requirements and complete a minimum of 10 upper-division credits in political science at this university.

Political Economy: The department also offers a political economy focus, a specialized program of study that combines political science and economics, emphasizing rational choice theory. Students who wish to pursue this interdisciplinary concentration should consult with a political science adviser. A list of recommended course work is available.

Internships: In order to prepare students for career opportunities, the department offers three internship programs that range from part-time, 5-credit assignments to full-time, 15-credit programs. Students can elect to work in local agencies (POL S 496), in the state legis-

lature during Winter Quarter (POL S 497), and in Washington, D.C. (POL S 498). Students in all majors may apply for the Washington Center Program, which places students in Washington, D.C., during every academic quarter. Additional information is available from departmental advisers in 115 Gowen.

Graduate Program

Master of Arts Degree

The M.A. program is made flexible in order to serve the needs both of students who are intending to go on to the Ph.D. and of students with more immediate goals. Approximately two-thirds of the program is made discretionary. M.A. aspirants must submit an essay of distinction and pass comprehensive oral examinations in two fields. One of these fields must be chosen from four general fields: political theory, international relations, comparative politics, and American politics. The second field may be chosen from outside the discipline of political science or may be tailored to the specialized needs of the student. The M.A. degree requires the completion of 46 credits, of which 23 must be at the 500 level or above. One course in foundations of political analysis is required.

Doctor of Philosophy Degree

The doctoral program is built around the four general fields, with each student required to select at least one of these fields. Two additional fields may be selected from more specialized offerings within the department or from outside the discipline. Comprehensive written examinations must be completed in each of the three fields, an essay of distinction must be presented at the time of those examinations, and a dissertation must be defended in the Final Examination. Two courses in quantitative political analysis and an elective methodology course are required. Competence in a foreign language is required only if deemed appropriate by the student's Supervisory Committee. The doctoral degree requires the completion of a total of 124 graduate credits, of which at least 58 must be at the 500 level or above. 36 credits are allowed for the dissertation.

The department has long been outstanding in comparative and international politics, especially in the study of Asian political phenomena. Recently, the department has augmented its faculty strength in American politics, political economy, public policy, and methodology. Graduate students can pursue studies in other campus units, such as the Institute for Marine Studies, the Graduate School of Public Affairs, the Henry M. Jackson School of International Studies, the Institute for Environmental Studies, and the School of Law.

Research Facilities

The University library system, the largest research library in the Pacific Northwest, has a collection of four million volumes, with specialized collections for the Pacific Northwest, Near East, South Asia, and Slavic and East European areas. A separate Political Science Library serves the specialized needs of the department. Interactive and batch-processing computing is available through several large computers. Specialized access to these facilities and access to extensive data holdings are available through the Center for Social Science Computation and Research. The University is a member of the Inter-University Consortium for Political and Social Research.

Admission and Financial Aid

Admission and financial aid decisions are based on the applicant's academic transcript, Graduate Record Examination scores, three letters of reference, and a statement of purpose. Foreign students are required to submit TOEFL scores. Application deadline is January 15; students are admitted for Autumn quarter only.

Two types of financial assistance are available. Several J. Allen Smith fellowships in political science are

awarded annually to outstanding first-year students. Teaching and research assistantships, which may include residency status, are also available to qualified students. Applications for financial aid are due by January 15.

Professors

Bennett, W. Lance,* 1974, M.Phil., 1973, Ph.D., 1974, Yale; American politics, political psychology.

Blalock, Hubert M.,* 1971, ‡(Sociology), M.A., 1953, Brown; Ph.D., 1954, North Carolina; methodology.

Bone, Hugh A., 1948, (Emeritus), M.A., 1936, Wisconsin; Ph.D., 1937, Northwestern; American government and politics.

Brass, Paul R.,* 1965, (International Studies), † M.A., 1959, Ph.D., 1964, Chicago; comparative government, international relations.

Caporaso, James,* 1988, M.A., 1965, Villanova; Ph.D., 1968, Pennsylvania; international relations, political theory and methodology.

Cassinelli, C. W.,* 1960, (Emeritus), A.M., 1950, California (Berkeley); Ph.D., 1953, Harvard; comparative government (Latin America).

Gerberding, William P.,* 1979, M.A., 1956, Ph.D., 1959, Chicago; political science.

Gore, William J.,* 1966, (Emeritus), M.P.A., 1950, Ph.D., 1952, Southern California; public policy, public administration.

Heilmann, Donald C.,* 1967, (International Studies), † M.A., 1960, Ph.D., 1964, California (Berkeley); comparative government, international relations.

Hitchner, Dell G., 1947, (Emeritus), M.A., 1937, Missouri; Ph.D., 1940, Wisconsin; political science.

Kroll, Morton,* 1958, (Emeritus), (Public Affairs), † Ph.D., 1952, California (Los Angeles); comparative administration, public policy.

Lang, Gladys Engel,* 1984, (Communications, Sociology), † M.A., 1942, Washington; Ph.D., 1954, Chicago; press and politics, public opinion, mass communication.

Lev, Daniel S.,* 1970, Ph.D., 1964, Cornell; comparative politics (Southeast Asia).

Levi, Margaret A.,* 1974, (Women Studies), Ph.D., 1974, Harvard; American government and politics, political economy.

Lujan, Herman D.,* 1978, M.A., 1960, California (Berkeley); Ph.D., 1964, Idaho; American government and politics, public administration.

Lyden, Fremont J.,* 1962, ‡(Public Affairs), M.P.A., 1952, Ph.D., 1960, Washington; public policy and administration.

Matthews, Donald R.,* 1976, (Scandinavian Languages and Literature), M.A., 1951, Ph.D., 1953, Princeton; American government and politics.

McCrone, Donald J.,* 1979, Ph.D., 1966, North Carolina (Chapel Hill); American politics, political economy.

Migdal, Joel S.,* 1980, ‡(International Studies), M.A., 1968, Ph.D., 1972, Harvard; international political economy.

Modelski, George,* 1987, Ph.D., 1954, London; international relations, international political economy.

Olson, David J.,* 1974, M.A., 1966, Ph.D., 1971, Wisconsin; American government and politics.

Ottenberg, Simon,* 1955, ‡(Anthropology), Ph.D., 1957, Northwestern; comparative politics (Africa), political theory and methodology.

Perry, Elizabeth J.,* 1979, ‡(International Studies), M.A., 1971, Washington; Ph.D., 1978, Michigan; comparative politics (China, Japan), political theory.

Reshetar, John S.,* 1957, (Emeritus), M.A., 1946, Ph.D., 1950, Harvard; comparative government (Soviet Union), international relations.

Scheingold, Stuart A.,* 1969, M.A., 1959, Ph.D., 1963, California (Berkeley); American politics (public law).

Taylor, Michael,* 1985, M.Sc., 1965, Ph.D., 1975, Essex; political economy, political theory, empirical theory.

Townsend, James R.,* 1968, (International Studies), † M.A., 1957, Ph.D., 1965, California (Berkeley); comparative government (China), politics of development.

Associate Professors

Gottfried, Alex, 1950, (Emeritus), A.M., 1948, Ph.D., 1952, Chicago; American government and politics.

Hartsoc, Nancy C. M.,* 1984, (Women Studies), † M.A., 1967, Ph.D., 1972, Chicago; political and feminist theory.

Horowitz, Ruth L.,* 1971, M.A., 1969, Ph.D., 1972, Washington (St. Louis); political theory and methodology.

Keeler, John T. S.,* 1980, M.A., 1975, Ph.D., 1978, Harvard; comparative government (Western Europe), international relations.

Lee, Kai N.,* 1973, (Marine Studies, Public Affairs), (Environmental Studies), † Ph.D., 1971, Princeton; American government and politics, political economy.

Majeski, Stephen J.,* 1984, M.A., 1975, New Hampshire; Ph.D., 1981, Indiana; international relations, foreign policy, peace and conflict resolution.

May, Peter J.,* 1979, M.P.P., 1976, Ph.D., 1979, California (Berkeley); public policy, political economy, methodology.

McCann, Michael,* 1982, M.A., 1976, Ph.D., 1983, California (Berkeley); American government and politics, public law, political theory.

Pool, Jonathan R.,* 1977, M.A., 1968, Ph.D., 1971, Chicago; comparative government, methodology, political economy, political psychology.

Riley, Walter L., 1946, (Emeritus), M.A., 1935, Stanford; Ph.D., 1957, Washington; political science.

Rohn, Peter H.,* 1958, (Emeritus), M.A., 1953, Ph.D., 1958, Washington; international relations, international law.

Assistant Professors

Amato, Timothy, 1989, M.A., 1986, M.S., 1988, Ph.C., 1989, North Carolina (Chapel Hill); American politics, political economy, political theory and methodology.

DiStefano, Christine,* 1985, Ph.D., 1984, Massachusetts (Amherst); political and feminist theory.

Goldberg, Ellis,* 1985, M.A., 1970, Ph.D., 1983, California (Berkeley); comparative politics, Mideast politics.

Hanson, Stephen E., 1990, (Acting), M.A., 1986, Ph.D., 1990, California (Berkeley); comparative politics (Soviet).

Stokes, Susan, 1988, M.A., 1985, Ph.D., 1988, Stanford; comparative politics, Latin American politics.

Thomson, Janice, 1988, M.A., 1983, Arizona State; Ph.D., 1988, Stanford; international relations, Latin American politics.

Wilkerson, John D., 1990, (Acting), M.A., 1989, Ph.D., 1990, Rochester; American politics.

Course Descriptions

Most upper-division courses (300- and 400-level) do not require prerequisites. However, because these

courses generally offer more advanced subject matter, they are recommended for juniors and seniors. Freshmen or sophomores who wish to enroll in upper-division courses may do so, but they should consult with the instructor or the departmental adviser first.

Courses for Undergraduates

POL S 101 Introduction to Politics (5) AWSpS Political problems that affect our lives and shape the world around us. Recommended for nonmajors, for students who are thinking about political science as a major, and for political science majors who haven't decided on an area of specialization.

POL S 201 Introduction to Political Theory (5) Philosophical bases of politics and political activity. Provides an introduction to the study of politics by the reading of a few books in political philosophy. Organized around several key political concepts, such as liberty, equality, justice, authority, rights, and citizenship.

POL S 202 Introduction to American Politics (5) AWSpS Institutions and politics in the American political system. Ways of thinking about how significant problems, crises, and conflicts of American society are resolved politically.

POL S 203 Introduction to International Relations (5) AWSp The world community, its politics, and government.

POL S 204 Introduction to Comparative Politics (5) Political systems in a comparative framework. Traditional and contemporary approaches to the study of governments and societies in different countries.

POL S 205 Political Science as a Social Science (5) Methodological perspectives of the various social science disciplines: commonalities and differences in assumptions, values, and paradigms. Current issues from the multiple perspective of social sciences; limits of the social sciences in resolving key social issues. Recommended: introductory course in one or more social science.

POL S 210 Ethnic Minorities and American Politics (5) Ethnic groups in American politics, minorities in urban society, sources of tension and frustration, historical relationship of minorities to the political process, protest as political activity, urban services and urban politics, the effect of national politics and policies on urban minorities. Each quarter focuses on one minority group.

POL S 211 The Future of American Minorities (5) Alternatives open to different minority groups in the United States; their development and place in American politics, the possibilities of community formation, integration, separatism, competitive economic structures, coalitions, etc. Prerequisite: 210 or permission of instructor.

POL S 212 Philosophy of Feminism (5) Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, its relation to racial liberation, and ethical issues. Joint with PHIL 206 and WOMEN 206.

POL S 270 Introduction to Political Economy (5) Political economy as a tool for understanding and evaluating the political world. Combines theory, methods, and insights derived from economics and political science and applies them to a range of substantive issues.

POL S 273 The Concept of Political Power (5) How to understand and explain relationships of power. Readings from Marxism, Weberian sociology, anarchism, classical political philosophy, and contemporary political science. May also include works of fiction.

POL S 281 Introduction to American Political Culture (5) Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Joint with ENGL 281.

POL S 290 Introduction to Quantitative Political Science (5) Skills of analytical reasoning and scientific methods applied to social problems. Reading graphs and tables, discovering fallacies in arguments, evaluating the evidence for an assertion, and determining which of several decisions would be optimal. Students learn to do elementary operations on a computer.

POL S 300 Practical Political Research (5) Techniques for research and report writing in practical politics (e.g., election campaigns, public interest groups, government agencies, political analyses for business). Supervised group research in the computer analysis of current political data. For a sequence in political statistics, students may also take 290 and/or 491.

POL S 301 Special Topics in Political Theory (5, max. 10) Selected contemporary political issues. Political principles as reflected in concrete political problems. Topics might include: women's rights, civil disobedience, national health care, affirmative action, environmental protection, privacy, human rights, and redistribution of property. Recommended: introductory course in political science at the 100 or 200 level.

POL S 302 Field Experience in Politics (5, max. 10) Analysis of political theory and of methods of political research, combined with extensive field research in contemporary problems of government and politics experienced by people of the Seattle community.

POL S 303 Public Policy Formation in the United States (5) Policy decision making with emphasis on: how issues arise, the way they become part of the policy agenda of the executive and the legislature, how these institutions organize to handle policy issues, and the roles of the legislature, the executive, and the bureaucracy. Public policy literature and familiarization with key aspects of policy decision making at the national, state, and local levels.

POL S 304 The Press and Politics in the United States (5) Journalists' role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Extensive off-campus experience included. Joint with CMU 304.

POL S 305 The Politics of Mass Communication in America (5) Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics.

POL S 308 The Western Tradition of Political Thought, Ancient and Medieval (5) Origin and evolution of major political concepts from ancient Greece to the medieval period, from Thales through Aquinas. Recommended: 201.

POL S 309 The Western Tradition of Political Thought, Pre-Modern (5) Continuation of 308, treating materials from the fifteenth through eighteenth centuries, Machiavelli through Rousseau. Recommended: 201.

POL S 310 The Western Tradition of Political Thought, Modern (5) Continuation of 308 and 309, focusing on material from the eighteenth through twentieth centuries, from Rousseau through Lenin. Recommended: 201.

POL S 313 Women in Politics (5) Political theory, historical and contemporary, including writings of the

women's liberation movement on the political role of women in society. Empirical studies of the "apolitical" woman, and on the process of political socialization in various cultural contexts. Joint with WOMEN 313. Prerequisite: WOMEN 200 or political science course.

POL S 318 American Political Thought I (5) Major thinkers and themes in American political and cultural development from Puritan origins to the Civil War.

POL S 319 American Political Thought II (5) Major thinkers and themes in American political and cultural development from the Civil War to the present.

POL S 321 American Foreign Policy (5) Constitutional framework; major factors in formulation and execution of policy; policies as modified by recent developments; the principal policymakers—President, Congress, political parties, pressure groups, and public opinion. Recommended: 101 or 202.

POL S 324 Europe in World Politics (5) Independent and coordinated efforts of Britain, France, and West Germany to adapt to the post-World War II global system. Creation and development of the Atlantic alliance. Relations with the Soviet bloc. Decolonization and the evolution of relations with the Third World. The movement for European integration. Prerequisite: 203 or equivalent.

POL S 325 The Arab-Israeli Conflict (5) The politics of conflicting ideologies: Zionism and Arab nationalism; formation of the state of Israel; development of Palestinian nationalism; Arab-Israeli wars. Reemergence of Palestinian activism; domestic sources of foreign policy; the role of the superpowers.

POL S 326 Scandinavia in World Affairs (5) Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressure of interdependence. Joint with SCAND 326.

POL S 328 The United Nations and Specialized Agencies (5) The structure and functions of the United Nations and specialized agencies, accomplishments, proposals for strengthening, relations of regional bodies and member states.

POL S 331 Government and Politics in the Middle East and North Africa (5) Breakdown of traditional society and the problems of building modern political systems.

POL S 340 Government and Politics of South Asia (5) Comparison of problems of national integration and political development in India, Pakistan, and Ceylon.

POL S 341 Government and Politics of Canada (5) Critical analysis of parliamentary institutions, political parties, and the federal system in Canada. Joint with SISC 341.

POL S 342 Government and Politics of Latin America (5) Analysis of the political dynamics of change in Latin America comparing various national approaches to the political problems of modernization, economic development, and social change.

POL S 343 Government and Politics of Southeast Asia (5) Government and politics in the countries of Southeast Asia, with attention given to the nature of the social and economic environments that condition them.

POL S 348 Governments of Western Europe (5) Modern government and politics of Great Britain, France, Germany, and Italy.

POL S 349 Communism, Literature, and the Movies (5) Film and literature as media of social and political commentary in communist societies. The role of the cultural intellectual under conditions of political

constraint. Emphasis is on materials from eastern Europe, although in some years attention will be given to selected Soviet works. Joint with SISRE 360.

POL S 350 Government and Interest Groups in the United States (5) Agrarian, labor, professional, business, and ethnic interest in politics; impact on representative institutions and governmental processes. Recommended: 101.

POL S 351 The American Democracy (5) Democratic theory; constitutional theory; the Presidency; Congress; the Supreme Court; civil rights and civil liberties. Designed for nonmajors. Recommended: 202 or equivalent.

POL S 352 American Political Parties (5) Theories of American parties, campaigns and voting behavior; party leadership; political socialization and participation. Recommended: 101 or 202.

POL S 353 U.S. Congress (5) Organization and procedure of Congress, state legislative politics, lobbying, legislative roles, theory and practice of representative government. Prerequisite: 101 or 202.

POL S 354 Elections and Voting in the United States (5) Electoral institutions and processes of the United States: the idea and practice of elections, the electoral system, individual voting behavior, collective voting behavior, and the impact of elections on policy. Recommended: 101 or 202.

POL S 355 The American Presidency (5) The American presidency; its evolution, its occupants, and its place within the American system. Topics include presidential character, war, elections, Watergate, the economy, and the Constitution.

POL S 356 Society and Politics (5) Focus on the causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Joint with SOC 356.

POL S 360 Introduction to United States Constitutional Law (5) Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects.

POL S 361 United States Courts and Civil Liberty (5) Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1937.

POL S 365 Lawyers in American Politics (5) Influence of lawyers on American politics. Official and unofficial political roles, lawyers as lobbyists, as legislators, in the bureaucracy, politics of the American Bar Association. Includes study of legal education, professional values, and avenues of political access.

POL S 370 Government and the American Economy (5) Economic and political aspects of the regulation of business, budgetary policy, and tax policy. Processes of policy formulation, policy conflicts, role of private interests and their effects, and strategies for policy change.

POL S 381 Introduction to Large City Government and Politics in the United States (5) Contemporary large-city politics. Social, economic, and political trends that have shaped characteristics of large American cities. Distribution and use of economic and political power at national and local levels. Future of large cities and politics of change. Recommended: 101 or 202.

POL S 382 State Government (5) Focus on the structures, processes, and policy outputs of state governments in the United States.

POL S 383 Environmental Politics and Policy in the United States (5) Interrelation between technological and environmental change and policy formation.

Consideration of political behavior related to these phenomena and the capacity of urban public organizations to predict change and to formulate policies that can take future states into account.

POL S 398 Honors Seminar (5, max. 15) AWSp Intensive and advanced studies in various aspects of political science. Open only to participants in the departmental honors program.

POL S 401 Advanced Special Topics in Political Theory (5, max. 10) Topics can include, but are not limited to, analytical theory pertaining to justice, exploitation, and freedom; revolution and social changes; collective choice and action; sexuality and politics; critical theory; Marxist theory; post-structuralism. Content varies. Prerequisite: 201.

POL S 405 American Politics Seminar (5, max. 10) Intensive reading and research in selected problems or fields of political analysis. Recommended: 202.

POL S 406 Marxian Political Economy (5) Explores the relationship between social classes, the state, and political power in advanced capitalist societies. Investigates this relationship primarily by means of the tools of Marxian political economy and, in the process, evaluates these tools. Emphasis on theoretical perspectives, although the reading list has a few empirical applications as well. Prerequisite: 201.

POL S 407 International Conflict (5) Many forms of international conflict, including global wars, local wars, antigovernment wars, military interventions, and international crises. Several political, social, and anthropological explanations for conflicts and examination of alternative world futures.

POL S 408 Problems of Peace and Conflict Resolution (5) Factors involved in conflict and conflict resolution; application to international and other problems. Lectures, discussions, and readings in social psychology, political science, and economics. Suitable for nonmajors. Recommended: 290 or 300.

POL S 409 Undergraduate Seminar in Political Economy (5) Seminar in political economy with focus on Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Joint with ECON 409. Prerequisites: 270, ECON 300, and permission of instructor.

POL S 410 Technology, Politics, and the State (5) Relationships between politics, technological change, and development of multinational corporations. Considers whether the relations between political and economic systems of industrial societies have been fundamentally altered by the increased importance and interdependence of government, experts, and new technological possibilities for intervention in social life.

POL S 411 Theories of the State (5) Topics may include origins and development of the state; arguments about the necessity, desirability, and proper role of the state; the nature and operation of modern states and the international state system; the legitimacy of modern state power.

POL S 413 Contemporary Political Theory (5) Analysis of political theorists, exploring contemporary theories of humanity and society that form the basis for differing political ideas.

POL S 414 Chinese Political Thought (5) Theories of the Oriental state as exhibited in the writings of diplomats and philosophers.

POL S 416 Economic Theory as Applied to the Political System (5) Explanation and evaluation of the political system, using elementary economics theory. Topics include alternative voting rules, the political effectiveness of various types of groups, causes and consequences of logrolling; and bureaucratic organizations. Joint with ECON 452. Prerequisite: ECON 200 or 400 or equivalent.

POL S 417 Political Economy of India (5) Relationships among processes of economic change, political institutions, and structures of political power in contemporary India. Contrasting approaches of Indian economic development, land reform, radical and agrarian political movements, and role of foreign aid. Joint with SISSA 417.

POL S 418 Multinationals and World Order (5) Multinational corporations as a problem for world order. MNCs and the global political economy; theories of multinational activity; governance and regulation; international organizations, world politics, and MNCs. Prerequisites: Introductory courses in international relations and international studies.

POL S 420 Foreign Relations of the Soviet Union (5) Ideological, historical, and strategic components of Soviet foreign policy; Comintern, Cominform, and international communist movement; Soviet policy in foreign trade, in international law and organization, and in specific geographic areas.

POL S 421 Relations Among Communist States (5) Major disputes and types of relationships among different communist states and ruling parties, attempts at integration and methods of alliance maintenance, tensions and contradictions in relations. Nature of the socialist commonwealth and the communist state system.

POL S 423 International Law (5) Origin and present status of efforts to make rules of conduct for sovereign states; simulation of a treaty-drafting conference, with students playing roles of legal advisers to foreign governments. Recommended mainly for seniors with prior courses in international relations.

POL S 424 International Courts (5) Earlier models, establishment, and operation to date of the World Court in the context of international law and politics; simulation of a court case, with students playing roles of judges and attorneys. Recommended mainly as a sequel to 423.

POL S 425 International Law Seminar (5) Team research on a student-selected topic in international law; quantitative methods, computer applications, and writing skills. Prerequisite: 423 or 424 or permission of instructor.

POL S 426 World Politics (5) A The nation-state system and its alternatives, world distributions of preferences and power, structure of international authority, historical world societies and their politics. Joint with SIS 426.

POL S 428 Military Intervention (5) Historical and theoretical analysis of military intervention in the post-World War II era. Considers how and why interventions occur and evaluates intervention as a foreign-policy response.

POL S 431 International Relations in the Middle East (5) Study of domestic sources of foreign policy in the Middle East; politics of oil; the East-West rivalry in the arena; and conflict and collaboration among the local powers.

POL S 433 International Relations in Southeast Asia (5) Analysis of the problems affecting relations among the countries of Southeast Asia. Prerequisites: 101, 343, or permission of instructor.

POL S 434 International Relations of South Asia (5) Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Joint with SISSA 434.

POL S 435 Japanese Government and Politics (5) Government and politics of Japan with emphasis on the period since 1945.

POL S 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) Provides a broad theoretical base, both descriptive and analytical, for the com-

parative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Prerequisite: junior standing.

POL S 437 Politics in Scandinavia (5) Twentieth-century politics in Scandinavia. How Scandinavian countries have been governed. Costs and consequences of their governmental style and its uncertain future. Optimal size of polities, problems of mature welfare states, process of leadership and representation in multiparty systems, decline of political parties. Joint with SCAND 437.

POL S 438 Politics in France (5) Study of contemporary France. Structures of government in the Fifth Republic; nature of French voting behavior and evolution of the bipolarized political party system; behavior of political interest groups; training of France's administrative elite and functioning of the state bureaucracy; dynamics of policy-making.

POL S 439 Politics of Korea (5) Korean politics in the twentieth century, treating political legacy of ancient regime, colonial period, Korean War, and the politics of North and South Korea. Comparative treatment of both Koreas, in light of the Chinese and Japanese experience. Includes the American-Korean relationship. Joint with SISEA 439. Recommended: SISEA 210 or equivalent.

POL S 440 European Fascism (5) Analysis of fascism as revolutionary movement and type of political system in post-World War I Europe: Hitler's Third Reich, Mussolini's Italy, and Vichy France. Consideration of dynamics of resistance, policies that produced Holocaust, and questions raised at trials of fascist leaders in Nuremberg and elsewhere. Prerequisite: permission of instructor.

POL S 441 Government and Politics of the Soviet Union (5) A Ideological and historical bases of Soviet politics, Leninism-Stalinism, Communist Party structure and functions, administrative agencies, the police and military, law and the judiciary, Soviet federalism and nationality policy.

POL S 442 Government and Politics of China (5) Post-1949 government and politics, with emphasis on problems of political change in modern China. Prerequisite: junior standing.

POL S 443 Comparative Political Societies (5) W Analyses of modern and premodern types of stable political society; special attention to contemporary representative democracy.

POL S 444 Revolutionary Regimes (5) Analysis of the several types of political regimes concerned with effecting fundamental social change; emphasis on the twentieth century.

POL S 445 Governments of Eastern Europe (5) Survey of the communist regimes of Poland, Hungary, Czechoslovakia, East Germany, and the Balkans. Joint with SISRE 445. Prerequisite: one previous course in European politics or history. (Formerly 347.)

POL S 446 Peasants in Politics (5) Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly interdependent world. Rebellion and revolution, impact of the international market, agricultural development. Joint with SIS 444.

POL S 447 Comparative Politics Seminar (5, max. 10) Selected comparative political problems, political institutions, processes, and issues in comparative perspective. Strongly recommended: 204.

POL S 448 Comparative Political Organizations (5) Dynamics of political organizations (political parties and interest groups) and the roles they play in the political processes of democratic polities. Theories of organizational behavior are tested through consideration of selected cases drawn primarily from the United States and western Europe.

POL S 449 Politics of Developing Areas (5) Comparative study of problems of national integration and political development in the new states of Asia and Africa. Prerequisite: junior standing.

POL S 450 State-Society Relations in Third World Countries (5) Relationships among political, social, and economic changes in Asia, Africa, and Latin America. Problems of economic and political development, revolution and reform, state-society relations, imperialism and dependency. Joint with SIS 456.

POL S 452 Political Processes and Public Opinion in the United States (5) The foundations and environment of opinion; organization and implementation of opinion in controlling government and public opinion as a force in the development of public policy; public relations activities of government agencies.

POL S 453 The State Legislature (5) Study of American state legislatures, with special reference to Washington State Legislature. Student must spend several Fridays in Olympia when the legislature is in session. Those desiring a more extensive involvement with the legislature should enroll in the political internship. Prerequisites: upper-division standing and permission of instructor.

POL S 455 Analytical Models of American Politics (5) Presents several analytic models of American politics and uses computer simulations to demonstrate their differences. Resolution of conflict, leadership, legislative processes, mass politics. Prerequisites: introductory courses in American government; 202 and at least two 300- or 400-level courses in the area of American government.

POL S 462 The Supreme Court in American Politics (5) Introductory public law course that examines the interplay of constitutional law and American politics with particular attention to the role of the Supreme Court in the formulation and implementation of public policy in such matters as criminal-law enforcement, civil rights political expression, and economic regulation.

POL S 463 Political Analysis of United States Social Programs (5) Social problems in the United States and policy responses. National policies concerning poverty, health, welfare, manpower, and the Social Security system. Examination of subgovernments that cluster around each policy area.

POL S 464 The Politics of American Criminal Justice (5) Political forces and value choices associated with the enforcement of criminal law. Distribution of resources among participants in the criminal justice system (e.g., police, attorneys, defendants, and judges). Understanding and evaluation of the interaction of criminal justice processes with the political system. Prerequisite: junior or senior standing.

POL S 465 Law and Public Policy in the United States (5) Relationship between law and public policy, with particular attention to problems of social, economic, and political change. Considers legal and constitutional processes as they relate to such problems of public policy as race relations, the environment, and the economy. Prerequisite: junior or senior standing.

POL S 467 Comparative Law in Society (5) Legal systems around the world as they actually work in their respective political, social, and economic contexts. Emergence and development of European legal systems, legal customs at variance with those of Europe, problems of legal processes in the modern state.

POL S 470 Public Bureaucracies in the American Political Order (5) Growth, power, and roles of governmental bureaucracies in America; conflict and conformity with American political thought, other political institutions, and the public.

POL S 471 Administrative Processes (5)

POL S 475 Public Choice (5) Problems and prospects for collective action in a political democracy. Designing rules and institutions for effective central authority and effective constraints on governmental power. Social choice theory and game theory. Prerequisite: 270 or 370.

POL S 480 Introduction to Urban, Suburban, and Metropolitan Political Systems (5) Causes and consequences of variations in urban form and political structure. Social, economic, and cultural characteristics of different urban forms, and processes by which they have developed; emphasis on suburbanization and metropolitanism. Joint with URBDP 480. Recommended: 101 or 202.

POL S 485 Problems in Urban Political Analysis (5, max. 10) Advanced undergraduate course in urban politics. Opportunity for more independent and intensive analysis of particular problems or lines of inquiry. Prerequisites: 101 or 202 and 480 or 381.

POL S 487 Intergovernmental Relations (5) Analysis of the content and dynamics of the relations between federal, state, and local governments, with emphasis upon patterns in these relationships that reflect program structures.

POL S 488-489 Honors Senior Thesis (5-5) A,W Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student's senior thesis. Students meet periodically as a group to discuss research in progress. Prerequisites: 15 credits in 398, senior honors standing, and permission of instructor.

POL S 490 Foundations of Political Analysis (5) Fundamental issues pertaining to research in political science: "logics of inquiry," problems of concept formation, and development of research methods. Positivist, postempiricist, and other arguments about the nature of scientific knowledge.

POL S 491 Political Research Design and Analysis (5) Major quantitative methods of empirical research in political science. Primary emphasis on research design, data collection, data analysis, and use of computers. Prerequisite: 290 or equivalent or graduate standing or permission of instructor.

POL S 492 Politics and Culture (5) How people interpret and shape the political world around them through the use of such cultural resources as language, symbolism, myth, and ritual. The various uses of these cultural elements establish the place of the individual in society, influence the perception of political events, and create opportunities for individual and mass political responses. Prerequisite: junior or senior standing.

POL S 493 Language and Politics (5) Language as a political phenomenon, a tool of political power, and a source of political problems. Includes the effects of "public doublespeak," the role of language in racism and sexism, and the search for ways to overcome national and international language barriers in several parts of the world. Primarily for students in political science, languages, and area studies. Prerequisite: permission of instructor.

POL S 495 Psychology in American Politics (5) Contributions of cognitive psychology, social psychology, and psychoanalysis to the understanding of politics. Topics include psychological analysis of leadership, mass political behavior, voting and public opinion, group conflict, and decision making in executive, judicial, legislative, and bargaining institutions.

POL S 496 Undergraduate Internship (5, max. 15) Students serving in approved internships. Prerequisites: sophomore standing or above and permission of undergraduate adviser.

POL S 497 Political Internship in State Government (5, max. 20) Students serving in approved internship program with state government agencies. Pre-

requisites: junior standing or above and permission of undergraduate adviser.

POL S 498 Washington Center for Learning Alternatives Internship (15) AWSpS Full-time academic internship with the Washington Center in Washington, D.C. Includes internship activities, academic seminar, assemblies, and related activities. Prerequisites: 202, junior standing or above; one year at this university; application and acceptance into program; permission of undergraduate adviser.

POL S 499 Individual Conference and Research (2-5, max. 20) Intensive study with faculty supervision. No more than one registration in 499 under same instructor. Prerequisites: junior or higher standing and permission of undergraduate adviser.

Courses for Graduates Only

POL S 501 Survey of American Government (3) Conceptual perspectives toward American government. Alternative ways of considering policy issues. Focuses on such models as legal-constitutional, pluralistic competition, political economy, public interest, and conflict resolution. For graduate students outside political science.

POL S 505 Comparative Politics (5) Core course. Modern theories, approaches, and methods in the study of comparative politics.

POL S 506 Contemporary Problems, Domestic and Foreign (3, max. 6)

POL S 509 Political Theory: Core (5) Introduction to the works of major political theorists, past and present. Enduring controversies in political thought and on contemporary political theory literature.

POL S 511 Seminar in Ethical and Political Theory (5) Ethical writings of major political philosophers. Coherent themes arising from these works and assessment of their impact on concepts of politics. Recommended: background in political philosophy.

POL S 512 Seminar in Epistemology and Political Theory (5) Study of the theories of perception and knowledge of major political philosophers. Recommended: background in political philosophy.

POL S 513 Issues in Feminist Theory (5) Contemporary issues in feminist theory as they affect studies of women, politics, and society.

POL S 514 Selected Topics in Political Theory (3-5) Selected topics, historical and conceptual, national, regional, and universal. Prerequisite: permission of instructor.

POL S 515 Scope and Methods in Political Science (5) Inquiry into the philosophic foundations of various approaches in political science and their possible contributions to an understanding of politics. Recommended: substantial background in philosophy, as well as in political science.

POL S 516 Special Topics in American Political Thought (3 or 5) Special topics or themes in the development of American political culture.

POL S 517 Marxism and Critical Theory (5) Works of Marx and Engels as well as selected works of twentieth-century Marxist and critical theorists. Themes such as Marx's method, twentieth-century interpretations of Marx, and relationship of twentieth-century theorists to their eighteenth- and nineteenth-century forebears.

POL S 520 Seminar on the Foreign Policy of the Soviet Union (3) Selected topics in the development, methods, and objectives of the foreign policy of the Soviet Union. Prerequisite: permission of instructor.

POL S 521 International Relations I: Theory and Method (5) Part one of the core course in the field of international relations. Reviews contemporary theory, research, and methodology in the study of world politics.

POL S 522 International Relations II: Organization and Politics (5) Part two of the core course in the field of international relations. Reviews basic literature on diplomacy and world organization, history of world politics, and selected special fields, including foreign policies of major powers, international political economy, and global problems.

POL S 523 World System Analysis (4) Evolution of the world system. Historical-structural approaches to world politics: neo-realism; long cycles; world economy. Prerequisite: 521.

POL S 525 International Law I: Policy (3) Inputs of international law into the decisional process in foreign policy. Effect of policy on law. Relevant roles of individuals and institutions in routine and crisis situations. Prerequisite: 423 or permission of instructor.

POL S 529 Problems of American Foreign Policy (3) Critical analysis of the historical foundations and contemporary problems of foreign-policy making, with attention given to selected foreign-policy decisions. Prerequisite: 321 or permission of instructor.

POL S 532 The Chinese Political System (3) Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor.

POL S 533 Seminar on Contemporary Chinese Politics (3) Research on selected problems in contemporary Chinese politics. Prerequisite: 532 or permission of instructor.

POL S 534 American Foreign Policy (3) American foreign policy viewed whole, including defense policy, the relationships of foreign policy to domestic policies and priorities, and the full range of historical, constitutional, institutional, political, and theoretical questions related to the formation and execution of foreign policy in this broad sense. Joint with PB AF 534.

POL S 535 International Relations of Modern China (3-5) Foreign policy of the People's Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor.

POL S 536 Ethnic Politics and Nationality Formation (3) Seminar on analysis and theoretical understanding of two interrelated processes: ethnic group persistence and change over time; and the transformation of ethnic groups into politically self-conscious and influential nationalities. The readings and discussions deal with these two processes in the contexts of both developing societies and advanced industrial societies.

POL S 537 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Joint with SISRE 504. Prerequisite: permission of instructor. (Offered alternate years.)

POL S 538 Government and Politics in the Middle East and North Africa (3) Political change in the area within the context of comparative politics; breakdown of traditional political systems; new range of choice expressed in competing ideologies; governmental and nongovernmental instrumentation of change; and problems of international relations and regional conflict and integration.

POL S 540 Problems in South Asian Politics (3) Research problems in contemporary Indian politics.

POL S 541 The Soviet Political System (4) Critical appraisal of the principal research: methods, theories, and types of literature dealing with the government and politics of the Soviet Union. Prerequisite: permission of instructor.

POL S 543 Seminar on British Government (3) Advanced studies in British parliamentary government.

POL S 544 Problems in Comparative Government (3, max. 9) Selected problems in the comparative analysis of political institutions, organizations, and systems.

POL S 545 Seminar on Japanese Government and Diplomacy (3, max. 6)

POL S 546 Seminar on Problems of Soviet Politics (3) Selected problems of Soviet domestic politics. Prerequisite: 541 or permission of instructor.

POL S 548 Comparative Political Parties (3) Role of political parties in the modern state. Similarities and differences in origins and development of political parties and functions they perform, both in established democracies and in developing countries.

POL S 549 Problems of Political Development (5) Concepts of development and modernization, with particular attention to their political dimensions and their application to various historical and contemporary cases.

POL S 550, 551 American Politics I, II (5,5) Core course in American government and politics. Systematic survey of the literature. 550 focuses on national politics, 551 on subnational politics. Prerequisites: undergraduate courses in American government and politics.

POL S 553 Public Opinion (3) Selected problems in opinion formation, characteristics, and role of public opinion in policy-making process. Prerequisite: 452.

POL S 554 Legislative Politics (3, max. 6) Selected problems in legislative processes and leadership, state and national.

POL S 561 Law and Politics (5) Points and levels at which law and politics intersect. What is distinctive about legal forms; how these legal forms influence, and are influenced by, politics. Conceptions of law, courts and public policy, law and bureaucracy, civil and criminal justice, and the legal profession.

POL S 562, 563, 564 Public Law (3,3,3) Constitutional and legal concepts governing governmental authority and institutions and the conduct of governmental activities.

POL S 566 Problems in Comparative Legal Institutions (3) Social science inquiry in comparative legal institutions. Worldwide scope, with attention to both theory of law in society and development and practice of legal institutions.

POL S 567 Public Policy, Administration, and Political Theory (3) Meaning of democracy in the context of American public policies and administration. Perspective of individual and group participation in the policy process, individual's role in organizations, functions of the public servant in the making of policy decisions, and realities of policy formulation in relation to political values. Joint with PB AF 556.

POL S 570 Public Policy and Administration (3) Interaction between the bureaucracy and those institutions, organizations, and groups involved in the policy process. Analyses of current policy problems. Joint with PB AF 501.

POL S 571 The Administrator and the Policy Process (3) Context of public administration from the perspective of the administrator. Case and research materials; field inquiries and interviews. Roles and functions of the administrator, particularly in relation to the process of implementing, making, and changing public policy. Joint with PB AF 502.

POL S 575 Public Policy Processes (5) Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and normative perspectives concerning role of governmental entities.

POL S 576 Political Culture (5) Values, beliefs, and rituals that guide political action in society. Some approaches emphasize symbolic sphere of value and belief over material conditions of power and economic production. Other approaches emphasize material relations. Reconciliation of symbolic and materialist approaches that explain intervention of the modern state in cultural processes.

POL S 579 Comparative Administrative Systems (3) Methodological problems of research in comparative administration. Theoretical and substantive aspects of administrative systems in urban-industrial and developing nations. Joint with PB AF 551.

POL S 581 Politics of Economic Policy Making (4) Determinants of American economic policy with particular attention paid to competing theories of government growth, to political business cycle theory, to incrementalist and other budgetary theories, to effects of party control, and to theories of class control. Interrelationships of monetary, tax, and expenditure policies.

POL S 582 The Political Economy of Social Change (3 or 5) Social change and property rights theory. Exploration of long-term secular change through works whose approaches derive from neoclassical economics and analytical Marxism. Evolution and transformation of property rights over land, labor, and capital and the consequences of the property rights structure for political and economic institutions.

POL S 583 Economic Theories of Politics (3-5) Problems of public goods provision and collective action. Collective action theories and applications as well as critical review of the concept of rationality.

POL S 584 Approaches to Subnational Government (3) Analysis of current approaches and concepts in the study of subnational government—urban, state, and regional public organization.

POL S 585, 586 Local, State, and Regional Politics and Administration (3,3) Exploration and analysis of political and organizational behavior at the local, state, and regional levels of government, with emphasis upon methodology and field research.

POL S 587 Politics of Urban Reform (3) Interpretations of urban reformers at turn of this century and during 1960s and 1970s. Historical and political science literature on the subject. Prerequisites: graduate student standing and permission.

POL S 589 Special Topics in Political Economy (3, max. 9) Evaluating research in political economy as well as developing research problems. Topics vary with instructor and with current problems in the literature. Prerequisites: 406, 416, ECON 400, and permission of instructor.

POL S 590 Seminar in Political Behavior (3, max. 6) Analysis of behavioral research in selected fields of political science.

POL S 593 Theories of Decision Making (5) Explanation of political decisions using models of such theoretical processes as preference formation, learning, heuristics, noncooperative games, collective action, agenda manipulation, and coalition formation. Examination of competing notions of political rationality and irrationality and criteria for their evaluation. Strategies for design of decision research. Prerequisite: 491 or permission of instructor. (Formerly 519.)

POL S 595 Seminar in Political Psychology (3) Fields of psychology and their applications to political analysis. Established and emerging theoretical orientations in political psychology, drawing upon cognitive, sociopsychological, and psychoanalytic perspectives to account for a variety of political phenomena, such as individual and mass political action, small-group behavior, and performance of organizations. Prerequisite: some undergraduate background in psychology.

POL S 588 Independent Writing I (3-5) Supervised research and writing for graduate students completing the M.A. essay of distinction.

POL S 599 Independent Writing II (3-5) Supervised research and writing for graduate students completing the Ph.D. essay of distinction.

POL S 600 Independent Study or Research (*)

POL S 700 Master's Thesis (*)

POL S 800 Doctoral Dissertation (*)

Psychology

119 Guthrie

Psychology involves the scientific study of behavior and its causes and the understanding of human behavior in a variety of settings. Psychology is studied either as a natural science, which stresses physical and biological causes of behavior, or as a social science, which stresses the effects of the social setting on human behavior. Major areas of emphasis are human cognition, animal behavior, physiological and sensory bases of behavior, quantitative techniques, personality and clinical psychology, developmental psychology, and social psychology. The department does not have formal programs in educational, school, or counseling psychology (see the College of Education section of this catalog), engineering psychology, or industrial psychology.

Undergraduate Program

Advisers
114 Guthrie

Admission Requirements: (1) One English composition course selected from the Arts and Sciences proficiency list; (2) MATH 105, or 124, or 156 or 157; (3) minimum 15 graded credits in psychology to include 101 or 102; 209; at least one core course (200, 205, 222, 305, 306, 333, 345, 355); and other psychology courses (excluding 497-499); (4) minimum 2.5 grade-point average in all psychology courses taken; (5) minimum 2.0 University of Washington cumulative grade-point average. Admission is competitive, based on preparation for a major in psychology as indicated by grades earned in courses required for application; grade-point average, with an emphasis on psychology grades, particularly in experimental design and statistics; personal statement reflecting an interest in and commitment to psychology; and other evidence of a commitment to becoming a psychology major.

The application deadline is the first Friday of each quarter, including Summer Quarter. Admission date is the sixth week of the same quarter. Applicants denied admission may submit written petitions requesting reconsideration. Applications and additional information are available at 114B Guthrie.

Bachelor of Science Degree

The Bachelor of Science program is intended to prepare students for doctoral programs in psychology, leading to careers in teaching, research, or clinical psychology. It may also provide desirable preparation for some health-related professions. The program emphasizes laboratory/research experience, a strong background in related fields and mathematics, and requires a high grade-point average.

Major Requirements: 60 credits in psychology courses—101 or 102; 209; 217 and 218; 200, 222, or 333; 306, 345, or 355; 205 or 305; 232, 233 or 419; 231 or 361; 499; 15 graded credits of upper-division electives (excluding 497-499) with at least one course at the 400-level; and additional psychology electives to

total 60 credits. 30 credits in other disciplines, to include MATH 105 and 124 (or 156 and 157); 5 credits of biology, zoology, or genetics; and 15 additional credits selected from computer science, upper-division biology, zoology, genetics, sociology, anthropology, or political science. 3.00 cumulative grade-point average in courses completed at the University of Washington and 3.30 grade-point average in all psychology courses. Transfer students must meet all the above requirements and are required to complete at least 15 graded credits at the 300 and 400 level at the University of Washington.

Bachelor of Arts Degree

The Bachelor of Arts program is intended to provide a general background in psychology for students seeking employment at the baccalaureate level, wanting to apply the principles of psychology in other disciplines, or preparing for many master's-level graduate programs.

Major requirements: 50 credits in psychology courses—101 or 102; 209; 213 (or 217 and 218); 200, 222 or 333; 205, 305, 306, 345, or 355; one additional core course from 200, 222, 333, 205, 305, 306, 345, or 355; 231, 232, 233, 361, or 419; 15 graded credits of upper-division electives (other than 497-499) with at least one course at the 400 level; additional electives to total 50 credits; and MATH 105, 124, 156, or 157; 2.0 cumulative grade-point average in all courses completed at the University of Washington; 2.5 cumulative grade-point average in all psychology courses. Transfer students must meet all the above requirements and are required to complete at least 15 graded credits at the 300 and 400 level at the University of Washington.

A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Graduate Program

Graduate work in psychology is organized primarily as preparation for the Doctor of Philosophy degree. The optional Master of Science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into several content areas: adult clinical, child clinical, developmental, social psychology and personality, cognition and perception, psychology and society, animal behavior, physiological, quantitative, and conditioning and motivation.

The program in clinical psychology is accredited by the American Psychological Association and provides scientific and professional training.

The Physiology-Psychology Group of the Graduate School, composed of faculty from the departments of Psychology and of Physiology and Biophysics, offers an interdisciplinary program leading to the Doctor of Philosophy degree in physiology-psychology.

Master of Science Degree (Optional)

Graduation Requirements: Completion of first-year graduate program (same as for Doctor of Philosophy degree) and an appropriate research program, including a research thesis. Foreign-language study is not required.

Doctor of Philosophy Degree

Graduation Requirements: Completion of course work in major and minor areas and breadth requirements in two other areas; completion of required course work in statistics and general methodology; independent research; General Examination; dissertation; Final Examination. Minimum 3.00 grade-point average overall must be maintained; 3.0 grade required for all courses used to satisfy breadth and minor requirements. *First-year requirements:* Demonstrate competence in statis-

tics and experimental design; complete two of the area breadth requirements; complete at least 3 credits of independent predoctoral research and report that research at the department's annual Research Festival.

Special Research Facilities

Facilities for research and graduate instruction include: teaching laboratories; machine, electronic, and carpentry shops; microprocessor room; animal vivarium; darkroom; remote-access console to computer center; and approximately sixty small, specialized laboratory research rooms.

Admissions Qualifications

Undergraduate degree in psychology is not required; some preparation in biological or social sciences is strongly advised. Applicants are judged on a number of criteria, often including their academic and research backgrounds, Graduate Record Examination aptitude scores, and written evaluations submitted by former professors or supervisors. Students with little training in psychology may be required to complete preliminary work in undergraduate courses. Admission of new students usually occurs in Autumn Quarter only. The deadline for receipt of admissions material is January 15.

Assistantships, Fellowships, or Traineeship Opportunities

Research and teaching assistantships are available to qualified graduate students. Additional traineeships and fellowships are also available.

Professors

Atneave, Carolyn L.,* 1975, (Emeritus), M.A., 1947, Ph.D., 1952, Stanford; family counseling, therapy and research, American Indian population.

Barash, David P.,* 1973, M.A., 1968, Ph.D., 1970, Wisconsin; sociobiology, psychological aspects of the arms race and nuclear war, peace studies.

Barnard, Kathryn,* 1963, ‡(Parent and Child Nursing), M.S., 1962, Boston; Ph.D., 1972, Washington; parent and child interaction, child rearing, prevention of developmental dysfunction, preventive intervention.

Beach, Lee Roy,* 1966, (Management and Organization), M.A., 1959, Ph.D., 1961, Colorado; decision processes, cognition, organizational.

Becker, Joseph,* 1965, (Psychiatry and Behavioral Sciences), † M.A., 1952, George Washington; Ph.D., 1958, Duke; clinical personality psychopathology.

Beecher, Michael D.,* 1978, M.A., 1965, Ph.D., 1970, Boston; animal communication, animal behavior.

Bernstein, Ilene L.,* 1972, M.A., 1967, Columbia; Ph.D., 1972, California (Los Angeles); physiological mechanisms involved in appetite; developmental and genetic influences on taste function.

Boiles, Robert C.,* 1966, M.S., 1949, Stanford; Ph.D., 1956, California (Berkeley); animal learning and motivation, behavior theory, history.

Butterfield, Earl C.,* 1981, ‡(Education, Engineering), Ph.D., 1963, Peabody (Vanderbilt); cognitive development, metacognition.

Carlson, James C.,* 1967, ‡(Music), M.A., 1958, Washington; Ph.D., 1962, Northwestern; systematic musicology, music education, psychology of music, musical perception.

Carr, John E.,* 1963, (Psychiatry and Behavioral Sciences), † M.A., 1958, Ph.D., 1963, Syracuse; phobic disorders, therapy outcome, cross-cultural psychopathology; bio-behavioral interactions in stress.

Chapman, C. Richard,* 1971, ‡(Psychiatry and Behavioral Sciences, Anesthesiology), M.A., 1968, Ph.D., 1969, Denver; human pain measurement, psychophysiology, sensation and perception, chronic pain.

Dawson, Geraldine,* 1985, Ph.D., 1979, Washington; developmental disabilities, autism, and psychophysiology of emotion.

Doerr, Hans O.,* 1967, (Psychiatry and Behavioral Sciences), † M.S., 1962, Ph.D., 1965, Florida State; psychophysiology of central and autonomic nervous systems, neuropsychology.

Edwards, Allen L.,* 1944, (Emeritus), M.A., 1938, Ohio State; Ph.D., 1940, Northwestern; personality assessment and measurement, attitudes, statistics, and experimental design.

Fiedler, Fred E.,* 1969, (Management and Organization), A.M., 1947, Ph.D., 1949, Chicago; leadership and group effectiveness; social, industrial, and organizational psychology.

Fields, Paul E., 1953, (Emeritus), A.M., 1927, Ohio Wesleyan; Ph.D., 1930, Ohio State; teaching of psychology, psychology examinations.

Gottman, John M.,* 1986, M.S., 1964, Massachusetts Institute of Technology; M.A., 1967, Ph.D., 1971, Wisconsin; development of children's friendships, marriage and family, observational research techniques.

Greenberg, Mark T.,* 1977, M.A., 1976, Ph.D., 1978, Virginia; infant and preschool social and personality development, development of deaf children, developmental psychopathology, prevention of mental disorders in childhood.

Greenwald, Anthony G.,* 1986, M.A., 1961, Ph.D., 1963, Harvard; social cognition, attitudes, self and self-esteem, methodology, unconscious cognition.

Guralnick, Michael J., 1986, Ph.D., 1967, Lehigh; developmental disabilities, peer relations, social and language development, early intervention programs, evaluation systems.

Horst, A. Paul, 1947, (Emeritus), Ph.D., 1931, Chicago; prediction of personal adjustment factor analysis measurement techniques.

Hunt, Earl B.,* 1966, Ph.D., 1960, Yale; cognition, individual differences in cognition, human information processing, artificial intelligence.

Hutton, Robert S.,* 1971, M.S., 1964, California (Los Angeles); Ph.D., 1969, Southern California; neural basis of motor control, acute and chronic neuromuscular adaptations to use/disuse.

Jacobson, Neil S.,* 1979, Ph.D., 1977, North Carolina; behavior marital therapy, depression, family therapy.

Kiyak, Asuman H.,* 1977, ‡(Architecture, Oral and Maxillofacial Surgery), M.A., 1974, Ph.D., 1977, Wayne State; social and environmental psychology, gerontology, health psychology.

Kuhl, Patricia K.,* 1976, ‡(Speech and Hearing Sciences, Otolaryngology), M.A., 1971, Ph.D., 1973, Minnesota; infant speech perception, auditory development, theories of perception.

Latham, Gary P.,* 1975, ‡(Management and Organization), M.S., 1969, Georgia Institute of Technology; Ph.D., 1974, Akron; industrial-organizational psychology, human motivation, selection staffing, performance appraisal, training and motivation.

Linehan, Marsha M.,* 1977, (Psychiatry and Behavioral Sciences), M.A., 1970, Ph.D., 1971, Loyola (Chicago); behavioral assessment and therapy, suicide and parasuicide, behavior therapy with women, borderline personality disorder.

Lockard, Joan S.,* 1962, M.S., 1961, San Diego State; Ph.D., 1963, Wisconsin (Madison); primate social behavior, animal behavior, sociobiology, human ethology, neurobehavior.

Loftus, Elizabeth F.,* 1973, (Law), M.A., 1967, Ph.D., 1970, Stanford; cognition, long-term memory, eye-witness testimony, psychology and law.

Loftus, Geoffrey R.,* 1972, Ph.D., 1971, Stanford; perception, memory, cognitive processes, information processing, computer control of experimentation.

Loh, Wallace D.,* 1974, ‡(Law), M.A., 1968, Cornell; Ph.D., 1971, Michigan; J.D., 1974, Yale; contracts, constitutional criminal procedure, criminal justice reform, psychology and law.

Lunneborg, Clifford E.,* 1962, (Statistics), † M.S., 1957, Ph.D., 1959, Washington; psychometrics, multivariate models, individual differences in cognition.

Mariatt, G. Alan,* 1972, Ph.D., 1968, Indiana; cognitive-behavior therapy and assessment, addictive behaviors, relapse prevention, health psychology.

Martin, Joan C.,* 1972, ‡(Psychiatry and Behavioral Sciences), M.S., 1962, Ph.D., 1965, Florida State; behavioral teratology, effects of drugs *in utero* on behavior, behavioral factors in laboratory safety.

Meltzoff, Andrew N.,* 1977, (Psychiatry and Behavioral Sciences), Ph.D., 1976, Oxford (England); perceptual, cognitive, and social development in infants, concept formulation and memory in infants.

Mitchell, Terence R.,* 1969, (Management and Organization), † M.A., 1967, Ph.D., 1969, Illinois; organizational behavior, leadership, group processes, motivation.

Nelson, Thomas O.,* 1971, M.A., 1966, Ph.D., 1970, Illinois; human memory, metacognition, research methodology, philosophy of science.

Robinson, Nancy M.,* 1974, ‡(Psychiatry and Behavioral Sciences), M.A., 1953, Ph.D., 1958, Stanford; accelerated development.

Rubel, Edwin W.,* 1986, ‡(Otolaryngology, Neurosurgery, Physiology and Biophysics), Ph.D., 1969, Michigan State; auditory systems development, developmental neurobiology, influence of experience on brain and behavior development.

Sackett, Gene P.,* 1970, M.A., 1961, Ph.D., 1963, Claremont; primate behavior, early experience and development.

Sarason, Barbara R.,* 1976, M.A., 1954, Iowa; Ph.D., 1956, Indiana; social support, stress anxiety, cognitive coping skills, personality variables.

Sarason, Irwin G.,* 1956, M.A., 1953, Iowa State; Ph.D., 1955, Indiana; personality, social support, stress and anxiety.

Sax, Gilbert,* 1966, (Education), † M.A., 1956, California (Los Angeles); Ph.D., 1958, Southern California; measurement, evaluation, research design, statistics.

Simpson, John B.,* 1975, M.A., 1972, Ph.D., 1973, Northwestern; neural and endocrine controls of body fluid homeostasis, behavioral endocrinology.

Smith, Moncrieff H.,* 1949, (Emeritus), M.A., 1941, Missouri; Ph.D., 1947, Stanford; psychophysics, pathology of human memory, biological motivation.

Smith, Ronald E.,* 1969, M.A., 1965, Ph.D., 1968, Southern Illinois; clinical, personality, sport psychology.

Smoll, Frank L.,* 1970, M.S., 1966, Ph.D., 1970, Wisconsin; psychological correlates of motor development, sport psychology, leadership behaviors in youth sports.

Stottand, Ezra,* 1957, (Emeritus), M.A., 1949, Ph.D., 1953, Michigan; empathy, criminal justice, stress.

Strother, Charles R., 1947, (Emeritus), (Psychiatry and Behavioral Sciences), † M.A., 1932, Washington; Ph.D., 1935, Iowa; mental retardation, psychopathology, speech pathology.

Teller, David Y.,* 1965, (Physiology and Biophysics), † Ph.D., 1965, California (Berkeley); vision, color vision, visual development in infants.

Townes, Brenda D.,* 1961, ‡(Anesthesiology, Psychiatry and Behavioral Sciences), M.A., 1958, Mills; Ph.D., 1970, Washington; clinical neuropsychology, birth-planning decisions.

Vitaliano, Peter P.,* 1977, ‡(Psychiatry and Behavioral Sciences), M.S., 1973, Ph.D., 1975, Syracuse; stress and coping, gerontology, behavioral medicine, methodology.

Weinstein, Philip,* 1972, ‡(Dental Public Health Science, Pediatric Dentistry), M.S., 1968, Ph.D., 1971, Kentucky; behavioral medicine, management of anxiety and fear, preventive medicine and dentistry, psychopharmacology.

Woodburne, Lloyd S., 1950, (Emeritus), M.A., 1930, Ph.D., 1932, Michigan; neural basis of behavior, neurophysiology of learning.

Woods, Stephen C.,* 1972, (Medicine), Ph.D., 1970, Washington; physiological and conditioned drug effects, neural control of endocrine system.

Associate Professors

Armstrong, Hubert E., 1966, ‡(Education, Psychiatry and Behavioral Sciences), Ph.D., 1963, Syracuse; clinical psychology.

Bell, Cecil H., Jr.,* 1968, ‡(Management and Organization), Ph.D., 1970, Boston; organization development, organizational psychology, management theory and practice.

Broedel, John W.,* 1967, (Education), ‡ M.S., 1956, Indiana State; Ed.D., 1958, Illinois; counseling, early adulthood, object relationship theory.

Buck, Steven L.,* 1979, (Research), M.A., 1974, Ph.D., 1976, California (San Diego); human visual psychophysics, perception, human and animal learning.

Cauce, Ana Mari,* 1986, M.S., 1979, Ph.D., 1984, Yale; social support and networks, at-risk adolescents, community psychology, minority populations.

Clatterbaugh, Kenneth C.,* 1966, ‡(Philosophy), (Women Studies), Ph.D., 1967, Indiana; philosophy of science, causality, continental rationalism, social philosophy, marxism, gender and masculinity.

Culbert, Sidney S.,* 1947, (Emeritus), Ph.D., 1950, Washington; perception, psycholinguistics, intercultural communication.

Dale, Philip S.,* 1968, (Linguistics, Speech and Hearing Sciences), M.A., 1964, M.S., 1966, Ph.D., 1968, Michigan; language and cognitive development in normal and exceptional children.

Diaz, Jaime,* 1978, M.A., 1972, Ph.D., 1975, California (Los Angeles); brain development, developmental psychopharmacology.

Dong, Willie K.,* 1976, (Research), ‡(Anesthesiology), Ph.D., 1974, California (Berkeley); somatosensory and trigeminal neurophysiology, pain.

Donovan, Dennis M., 1989, (Psychiatry and Behavioral Sciences), Ph.D., 1980, Washington; cognitive-behavioral factors in the etiology, maintenance and treatment of substance abuse and addictive behaviors; drinking-driving (DWI) and high-risk driving; relationship between alcohol use and anger problems.

Douglas, Robert J.,* 1968, M.A., 1961, Ph.D., 1964, Michigan; neuropsychology of learning and memory, aging and inhibition.

Gillmore, Gerald M.,* 1982, (Affiliate), M.A., 1969, Ph.D., 1970, Michigan State; educational measurement theory, instructional evaluation, evolution of educational programs.

Katon, W. J., 1985, ‡(Psychiatry and Behavioral Sciences), M.D., 1976, Oregon Health Sciences.

Keating, John P.,* 1972, (Environmental Studies), M.A., 1962, Gonzaga; M.S.T., 1969, Santa Clara; M.A., 1971, Ph.D., 1972, Ohio State; communication media and attitude change, environmental psychology, emergency behavior.

Kenney, Nancy J.,* 1976, (Women Studies), ‡ M.A., 1972, Ph.D., 1975, Virginia; neural and endocrine controls of food and fluid intake, physiological basis of motivation.

Kerr, F. Beth,* 1974, M.S.P.E., 1969, North Carolina; M.S., 1973, Ph.D., 1974, Oregon; cognition, human motor control, and learning, attention.

Kohlenberg, Robert J.,* 1968, M.S., 1963, Wisconsin; Ph.D., 1968, California (Los Angeles); clinical behavior modification, learning, biofeedback, psychotherapy.

McMahon, Robert J.,* 1987, M.S., 1977, Ph.D., 1979, Georgia; social learning-based treatment of conduct-disordered children and their families; developmental psychopathology; behavioral assessment, family interaction, pediatric psychology.

Pagano, Robert R.,* 1965, M.S., 1963, Ph.D., 1965, Yale; stress management, health psychology, clinical psychophysiology, physiological psychology.

Rose, Richard M.,* 1966, M.A., 1961, Ph.D., 1964, Pennsylvania; stochastic models, psychophysics, sleep.

Samson, Herman H.,* 1977, (Research), ‡(Psychiatry and Behavioral Sciences), M.A., 1965, McMaster; Ph.D., 1968, Waterloo; behavioral pharmacology, addictive processes.

Verhulst, Johan, 1978, ‡(Psychiatry and Behavioral Sciences), M.D., 1964, Louvain (Belgium); clinical psychology, marital therapy.

Vitiello, Michael V.,* 1977, ‡(Psychiatry and Behavioral Sciences), Ph.D., 1980, Washington; sleep, aging, psychopharmacology, depression.

Assistant Professors

Brenowitz, Elliot A.,* 1987, (Zoology), Ph.D., 1982, Cornell; animal behavior, neuroethology, neuroendocrinology, animal communication.

Brown, Jonathon D.,* 1989, Ph.D., 1986, California (Los Angeles); self-concept and social behavior, self-concept, stress, and health.

Duncan, S. Wayne,* 1988, Ph.D., 1984, Minnesota; children's emotional development, developmental psychopathology, transition to parenthood, parent-child relations, cognitive assessment of children.

Fenner, Robert H., 1968, ‡(Education), M.A., 1962, Ph.D., 1965, Colorado; individual and group psychotherapy, personality theory, counseling.

Gonzalez, Richard D., 1990, Ph.D., 1990, Stanford; judgment and decision making, psychology and law, mathematical modeling and statistics.

Kivlahan, Daniel R., 1984, ‡(Psychiatry and Behavioral Sciences), Ph.D., 1983, Missouri; secondary prevention with high-risk drinkers, assessment of substance-abuse disorders, alcoholism treatment outcome evaluation.

Lee, Thomas W.,* 1983, (Management and Organization), Ph.D., 1984, Oregon; organizational behavior and human resources management.

Miyamoto, John M.,* 1984, M.A., 1978, Ph.D., 1985, Michigan; mathematical psychological, psychophysical measurement, utility and value, inductive inference.

Olavarria, Jaime F., 1990, Ph.D., 1984, California (Berkeley); neurobiology.

Palmer, John C.,* 1984, Ph.D., 1984, Michigan; visual perception and psychophysics, memory and attention, mathematical models.

Speltz, Matthew L., 1984, (Psychiatry and Behavioral Sciences), Ph.D., 1980, Missouri (Columbia); developmental psychotherapy, family therapy, pediatric behavioral medicine.

Thompson, Leigh L.,* 1988, Ph.D., 1988, Northwestern; social psychology, negotiation theory and behavior, social memory, interpersonal decision making.

Lecturer

Fagan, Corey, 1989, Ph.D., 1987, Massachusetts; clinical psychology, individual and family therapy for adults and adolescents.

Course Descriptions

Courses for Undergraduates

PSYCH 101 Psychology as a Social Science (5) Keating, Sackett Behavior from a social-science viewpoint. Emphasizes personality, individual differences,

attitudes, and social behavior and influence. Includes related aspects of cognition, behavior disorders, states of awareness, motivation and emotion, learning, development, and research methods.

PSYCH 102 Psychology as a Natural Science (5) Douglas, Sackett, Woods Behavior from a biological-science viewpoint. Emphasizes sensation and perception, brain and behavior, evolution, and animal behavior. Includes related aspects of cognition, behavior disorders, states of awareness, motivation and emotion, learning, development, and research methods.

PSYCH 200 Comparative Animal Behavior (5) AWSpS Barash, Beecher, Brenowitz Research methods and findings of comparative animal behavior and their importance to an understanding of human behavior; rationale for study of behavioral differences and similarities between animal species, behavior viewed as part of the adaptation of each species to its natural habitat. Prerequisite: 102 or BIOL 201.

PSYCH 205 Introduction to Personality and Individual Differences (4) AWSpS Cauce, Linehan, Marlett Basic concepts, methods, and background for more intensive study. Prerequisite: 101 or 102, or equivalent.

PSYCH 208 Psychosocial Aspects of Nuclear War (3) A Barash Introduction to basic issues of nuclear war, including its effects, weaponry, and history of the arms race. Primary focus on the psychologic underpinnings of deterrence, relations between nations, and the personal and social forces operative in the arms race and peace movements.

PSYCH 209 Fundamentals of Psychological Research (4) AWSpS Kerr, Miyamoto, Nelson, Smoll Psychological research methodology and techniques. Topics include the logic of hypothesis testing, experimental design, fundamentals of scientific writing, research strategies and techniques, ethical issues in psychological research. Required for all psychology majors. Prerequisite: 101 or 102 or equivalent.

PSYCH 210 Introduction to Human Sexuality (4) AWSpS Broad survey of biological, psychological, and social determinants of human sexuality and sexual behavior: empirical data (e.g., survey data, experimental findings) and major theoretical approaches.

PSYCH 213 Elementary Psychological Statistics (6) Lunneborg, Pagano Applied statistics in psychology. Data, probability theory, stating and testing hypotheses in psychology. More commonly used inference tests. Required for majors registered in the psychology Bachelor of Arts degree program. Prerequisites: 209 and 1½ years of high school algebra or permission of instructor.

PSYCH 217 Introduction to Probability and Statistics for Psychology (4) AWSpS G. Loftus, Rose Probability theory as a model for scientific inference. Probabilistic variables and experimental outcomes, conditional probability, binomial and related distributions, experiments as samples, statistics and sampling distributions, the normal distribution, problems of estimation from experiments. Prerequisites: 209 and MATH 157 or 124, or permission of instructor.

PSYCH 218 Statistical Inference in Psychological Research (4) AWSp G. Loftus, Rose Hypothesis testing and its probabilistic and statistical basis. Development and application of statistical inference techniques employed in psychological research: t-test, analysis of variance, correlation and regression, and nonparametric statistics. Nature and control of experimental and inferential error in research. Required for majors in the psychology Bachelor of Science degree program or in the psychology honors or distinction programs. Prerequisite: 217.

PSYCH 222 Survey of Physiological Psychology (3) AWS Diaz, Douglas, Simpson The nervous system and how it works. Learning, memory, sleep, the

senses, and the emotions. For students who do not intend to specialize in physiological psychology. Prerequisite: major standing in a biological science or either 101 or 102.

PSYCH 231 Laboratory in Human Performance (3) AWSps Hunt Selected aspects of human learning, perception, and performance. Prerequisites: 209 and 213 or 217.

PSYCH 232 Laboratory in Animal Learning (3) AWSps Bolles Selected aspects of animal learning emphasizing operant techniques with the rat. Prerequisite: 209.

PSYCH 233 Laboratory in Animal Behavior (5) AWSp Barash Experience with a variety of animal species and experimental procedures and instrumentation. Prerequisites: 101 or 102, 209, and 200 or BIOL 202, or equivalents.

PSYCH 240 Behavior Modification (4) A Jacobson, Kohlenberg, Linehan, Mariatt, Pagano, R. Smith Survey of behavior modification application for students who plan careers in human services. Behavioral approach and associated research on such topics as sexual dysfunction, stress, athletic performance, phobias and anxieties, depression, marital discord, weight control, energy conservation, pollution, health, addictions, interpersonal relationships, creativity, industrial safety. Prerequisite: introductory psychology.

PSYCH 250 Racism and Minority Groups (4) Problems of racism and their effects upon minority groups, with emphasis on the conditions related to the development of mental health. Emphasis on the situation of the Black, Chicano, American Indian, and Asian groups.

PSYCH 257 Psychology of Sex Differences (5) A Kenney Major psychological theories of sex-role development; biological and environmental influences that determine and maintain sex differences in behavior; roles in children, sex differences in aggression, cognitive abilities, achievement motivation, affiliation, and sexuality. Joint with WOMEN 257. Recommended: 101 or 102. Not open for credit to students who have taken GIS 244.

PSYCH 260 Psychological Aspects of Poverty and Affluence (4) Experience of poverty in various United States and world situations; psychological and socioeconomic causes of poverty; attitudes and motives of both the poor and the more affluent; psychological and socioeconomic factors in world hunger and poverty in developing nations. Recommended: 101 or 345.

PSYCH 304 Issues and Concepts in Community Psychology (4) Community mental health, epidemiology, program evaluation, and social ecology; research, theory, and practice in community settings; the influence of community-environmental factors in individual functioning and their utilization to promote mental health. Prerequisite: 10 credits in psychology.

PSYCH 305 Abnormal Psychology (5) Duncan, Linehan, McMahon, Smith An overview of major categories of psychopathology, including description and classification, theoretical models, and recent research on etiology and treatment. Prerequisites: 10 credits in psychology, to include 101 or 102 or equivalent.

PSYCH 308 Developmental Psychology (5) AWSps Dale, Greenberg, Meltzoff Analysis of psychological development of the child in relation to biological, physical, and sociological antecedent conditions from infancy to adolescence. Prerequisite: 101 or 102, or equivalent.

PSYCH 310 Motor Development (4) W Smoll Analysis of motor development from infancy through adolescence with emphasis on relationships between biophysical and psychosocial development of children and youth. Prerequisite: 101 or 102 or equivalent.

PSYCH 322 Introduction to Drugs and Behavior (3) A Diaz Basic concepts of drug action emphasizing the behavioral consequences of the intake of a variety of drugs. Prerequisite: 222.

PSYCH 333 Sensory and Perceptual Processes (4) Beecher, Buck, Palmer Perception and processing by each of the senses with emphasis on behavioral studies and their relationship to underlying structure. Prerequisite: 101 or 102 or equivalent, or permission of instructor.

PSYCH 335 Human Factors Psychology (4) Kerr Consideration of human performance factors in the design of tools/equipment, tasks/jobs, and work and living environments. Emphasis on the importance of human perception, memory, attention, and motor control for understanding ways to optimize the relationship between people and technology. Prerequisite: 101 or 102 or equivalent.

PSYCH 345 Social Psychology (5) AWSps Brown, Greenwald, Keating, Thompson Effects of the social environment upon the formation of individual attitudes, values, and beliefs, and upon individual and group behavior; major theoretical approaches; field and experimental research findings. Prerequisite: 101 or 102, or equivalent.

PSYCH 350- Honors Research Seminar in Psychology (2-, max. 6) AWSp Teller Presentations by professors and advanced honors or distinction students concerning the rationale, methodology, and progress of their research projects. Required quarterly for all junior honors and distinction candidates in conjunction with 498 and 499. Prerequisite: permission of departmental honors adviser.

PSYCH 354 Introduction to Cognitive Science (5) Hunt Discusses and compares approaches to cognition taken by psychology, computer science (artificial intelligence), philosophy, linguistics, and anthropology. Relevant basic material in the neurosciences also presented. Prerequisite: Introductory course in one of the disciplines listed above.

PSYCH 355 Survey of Cognitive Psychology (5) AW Hunt, E. Loftus Current theory and research in perception, attention, memory and learning, attitudes, thinking and decision making, and language. For the student who wishes a survey or who intends additional work in any of the above content areas. Prerequisite: 8 credits in psychology, including an introductory course.

PSYCH 357 Psychobiology of Women (5) W Kenney Physiological and psychological aspects of women's lives; determinants of biological sex; physiological and psychological events of puberty; menopause; sexuality; contraception, pregnancy, childbirth, and lactation; role of culture in determining psychological response to physiological events. Not open for credit to students who have taken GIS 357. Joint with WOMEN 357. Prerequisite: 101 or 102 or 257 or WOMEN 257 or WOMEN 200.

PSYCH 361 Laboratory in Social Psychology (5) Brown, Keating Practice and discussion of methods of systematic observation, content analysis, laboratory and field experimental manipulation in social psychology; individual research projects. Prerequisites: 209, 213 or 217, 345, and major standing.

PSYCH 400 Learning (5) Sp Bolles Experimental research and basic theories primarily in animal learning. Prerequisite: 101 or 102.

PSYCH 401 Psychobiological Responses to Exercise/Disuse (5) Hutton Adaptive responses to prolonged increased or decreased use of organ systems. Induction mechanisms, exercise, and human behavior. Prerequisite: 222 or ZOOL 118. (Formerly 318.)

PSYCH 402 Infant Behavior and Development (3 or 5) Sp Meltzoff Psychological development in the first two years of life. Basic and advanced techniques

for assessing psychological development in infancy. Classic theories of human infancy and examination of a wide range of new experiments about infant behavior and development. Prerequisite: upper-division or graduate standing.

PSYCH 403 Motivation (5) WSp Bolles Theory and research on reinforcement, punishment, frustration, preference, instinctual mechanisms, and other factors controlling animal behavior. Prerequisite: 101 or 102.

PSYCH 405 Advanced Personality: Theory and Research (5) I. Sarason Intensive survey of theoretical concepts and detailed review of experimental methods and experiments in the field of personality. Prerequisite: 205 or equivalent.

PSYCH 407 History of Psychology (5) W Bolles Historical and theoretical background of the basic assumptions of modern psychology, including such doctrines as behaviorism, determinism, and associationism and the scientists who developed them. Prerequisite: 400 or equivalent.

PSYCH 409 Sociobiology (4) WSp Barash, Beecher Biological bases of social behavior, emphasizing evolution as a paradigm: individual *versus* group selection, kin selection, altruism, group *versus* individual living, mating systems, parental care of offspring, and competitive strategies. Joint with ZOOL 409. Prerequisites: 200 or BIOL 202 and 203, or equivalent.

PSYCH 410 Child and Adolescent Behavior Disorders (5) Duncan, McMahon Introduction to psychopathology in children and adolescents, and an overview of principal modes of intervention. Particularly for students interested in advanced work in clinical psychology, social work, or special education. Prerequisites: 305, 306, or equivalents.

PSYCH 411 Perceptual Development (5) Origins and development of perception; nature-nurture controversy applied to perceptual development. Topics from visual, auditory domains. Development of object and face perception; auditory pattern perception; speech perception; categorization; perception of three-dimensional space; cross-modal relations between touch, vision, audition. Joint with SPHSC 411.

PSYCH 413 Developmental Psychobiology (3) W Bernstein Neural basis of behavioral development in normal and abnormal manifestations; relationship between structure and function in the nervous system; brain development and effects of prenatal and postnatal experiences on the brain and behavior. Prerequisite: 222 or 421 or 422 or equivalent.

PSYCH 414 Cognitive Development (5) Asp Dale Key theoretical approaches to cognitive development from infancy through adolescence. Object permanence, language development, imitation, logical reasoning, moral development, intelligence and educational implications. Prerequisite: 306.

PSYCH 415 Personality Development of the Child (5) Greenberg Socialization theory and research, infant attachment and social relationships, development of aggressive and altruistic behaviors, sex-role development, moral development, parent and adult influences. Applied issues in social development and policy. Prerequisite: 306.

PSYCH 416 Animal Communication (5) Beecher Evolution and mechanisms of animal communication and related processes of perception, thinking, and social behavior. Prerequisite: 200 or 233 or 10 credits in biology or zoology.

PSYCH 417 Human Behavior as a Natural Science (5) W Lockard Evolution of human social behavior and the adaptive significance of communication systems from a sociobiological and anthropological perspective. Prerequisite: 102 or an introductory zoology or anthropology course.

PSYCH 418 Primate Social Behavior (5) W Lockard Social behavior, ecology, and group structure of monkeys and apes from an evolutionary, sociobiological, and anthropological perspective. Prerequisite: 102 or an introductory zoology or anthropology course.

PSYCH 419 Behavioral Studies of Zoo Animals (4, max. 8) AWSpS Lockard Observational studies of behavior of zoo animals to expand basic knowledge of animal behavior, conservation of endangered species, and research methodology with discussions and tours focusing on zoo philosophy and operations. Offered in cooperation with Woodland Park Zoo. Recommended: 200; or 231, 232, 233; or 361; or equivalent.

PSYCH 420 Drugs and Behavior (3) W Diaz Animal and clinical research on the behavioral consequences of drug intake. Prerequisite: 322 or permission of instructor.

PSYCH 421 Neural Basis of Behavior (5) ASP Diaz, Simpson Anatomical and physiological principles and resultant behavior involved in the integrative action of the nervous system. Prerequisites: 101 or 102, and 10 credits in biology or zoology.

PSYCH 422 Physiological Psychology (5) WSp Douglas Physiological mechanisms in behavior, including those basic to emotion, fatigue and sleep, learning, and memory. Prerequisite: 101 or 102, or equivalent.

PSYCH 423 Sensory Basis of Behavior (5) Sp Sensory and perceptual phenomena; sensory equipment; theories of sense-organ function. Prerequisite: 333 or permission of instructor.

PSYCH 424 Vision and Its Physiological Basis (5) A Teller Phenomena of human vision: color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of human visual functioning with known optical, biochemical, physiological, and anatomical substrates. Joint with P BIO 424. Recommended: some background in physical or biological science or engineering.

PSYCH 425 Surgical and Histological Techniques (5) Sp Woods Practicum in basic and advanced surgical and histological techniques used in psychophysiological experimentation. Prerequisites: 421 and permission of instructor.

PSYCH 426 Neural Basis of Motor Behavior (5) Hutton Motor systems with emphasis on human motor behavior. Neuromuscular subsystems in motor control; spinal sensorimotor circuitry; propriospinal interlimb connections and regulation; supraspinal regulation of lower motor neurons to include motor and sensory cortex, cerebellum, and basal ganglia. Prerequisites: 101 or 102, and 10 credits in biology or zoology.

PSYCH 427 Behavioral Endocrinology (5) W Woods The endocrine system and how its secretions influence and are influenced by behavior; relationships between the nervous and endocrine systems. Prerequisites: 421 and two quarters of zoology, or permission of instructor.

PSYCH 428 Human Motor Control and Learning (5) W Kerr Current theory and research in human motor performance and skill acquisition. Prerequisite: 101 or 102 or equivalent.

PSYCH 429 Brain Anatomy for the Behavioral Scientist (1) ASP Diaz Detailed review of the neuro-anatomical features of the sheep brain with laboratory demonstrations. Prerequisites: 421 or equivalent, or concurrent registration in 421, and permission of instructor.

PSYCH 431 Neural Basis of Behavior (5) Diaz, Simpson Anatomical and physiological mechanisms in behavior, including those basic to emotion, fatigue and sleep, learning, and memory. Prerequisite: 421.

PSYCH 434, 435 Laboratory in Vision (2,3) Buck Techniques of research in visual psychophysics: alignment and calibration of basic optical systems; replication of some classical vision experiments and/or design and completion of original vision experiments. Prerequisites: 424 and permission of instructor for 434; 434 and permission of instructor for 435.

PSYCH 436 Developmental Aspects of Sport Competition (4) SpS Small Biophysical and psychosocial influences of sport participation on growth and development of children and youth. Competition readiness, injuries, stress, aggression, roles and responsibilities of parents and coaches. Prerequisite: 101 or 102 or equivalent.

PSYCH 437 Applied Sport Psychology (3) R. Smith Application of psychological theories, research, and intervention strategies to sport settings. Stress and emotional control; attention control and concentration skills; mental rehearsal techniques; goal-setting strategies; leadership skills; psychological factors in injuries and rehabilitation; cognitive pain-control procedures. Participation in various psychological training procedures. Prerequisite: 101 or 102.

PSYCH 438 Social Psychology of Sport I (4) A Small Reciprocal effects of interpersonal and group influence processes. Social facilitation, behavior modification, observational learning, individual versus group performance, group cohesion, leadership, aggression. Prerequisite: 101.

PSYCH 439 Social Psychology of Sport II (4) Sp Small Current issues and research. Anxiety and arousal, competition, achievement motivation, personality, attitudes, individual differences in motor performance.

PSYCH 440 Environmental Psychology (3) W Keating Research and methods of environmental psychology; development of research strategies to study psychological implications of environmental issues. Prerequisites: 101 or 102, and 345, or equivalent.

PSYCH 441 Perceptual Processes (5) Sp Palmer Theory and findings in perception with a focus on visual perception in humans. Discrimination and constancy for simple judgments, segregation and identification of visual objects, and specific areas of investigation such as reading and computer vision. Prerequisite: 333 or equivalent.

PSYCH 442 Measurement and Design in Attitude Research (5) A or W Major problems of research design and measurement in studies of attitude formation and change; design of procedures for laboratory and field experiments employing both traditional and more recent approaches to measurement of attitudes, beliefs, etc. An attitude-measurement or -change project required. Prerequisites: 213 or 218, and 345, or equivalents.

PSYCH 443 Evaluation of Social Programs: Psychological Perspectives (3) Major issues involved in the evaluation of social programs from the areas of mental health, education, law and justice, and family planning; formulation of program goals, selection of research designs, measurement of outcomes, and interpretation and utilization of research findings. Prerequisites: 213 or 217; upper-division and graduate students only.

PSYCH 444 Attitude Change and Persuasive Communication (3) Factors that influence attitude change; message variables in persuasive communications and experiments to measure their effects on opinions, attitudes, and associated behavior. Development of skills to interpret, criticize, and apply experimental results. Prerequisites: 345 and 209 or 213, or equivalents.

PSYCH 445 Theories of Social Psychology (5) W Keating Evaluation of the major theories of human social behavior supported by the empirical literature;

theories of social cognition and thought; major theories of social interaction, group processes, and social learning. Prerequisites: 345 or equivalent.

PSYCH 446 Objective Assessment of Personality (3) A R. Smith Measurement of personality variables in clinical psychology, personality research, and social psychology. Theoretical conceptions underlying various clinical and experimental scales and an assessment of their construct validity and behavioral correlates. Planning of research involving the use of objective measures of personality.

PSYCH 447 Psychology of Language (5) Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: 101 or 102, or equivalent.

PSYCH 448 Seminar in Psychology (1-15) AWSpS Selected research topics of contemporary interest. May be repeated for credit. Quarterly listings of specific offerings are available at departmental advisory office. Prerequisites: major standing and permission of instructor.

PSYCH 449 Organizational and Industrial Psychology (3) W Fiedler Research and methods in industrial-social psychology; application of social psychology to the understanding and management of individuals in large organizations and their subunits. Prerequisite: one course in elementary statistics or equivalent.

PSYCH 450- Honors Research Seminar in Psychology (2-, max. 6) AWSp Teller Design, execution, and writing of honors thesis, supervised by faculty sponsor and departmental honors adviser. Required quarterly for all senior honors and distinction candidates in conjunction with 498 and 499. Prerequisite: permission of departmental honors adviser.

PSYCH 455 Developmental Social Psychophysiology (2-5) A Gottman Fundamentals of psychophysiology, emotion, and social interaction in developmental research. Laboratory and lectures emphasize skills in the study of basic biological process in the social context of the developing person. Prerequisites: 101 or 102, 213, 306, 422, upper-division standing, or permission of instructor.

PSYCH 457 Language Development (4) A or Sp Dale First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Joint with LING 447. Prerequisite: 306 or LING 400.

PSYCH 461 Human Learning (5) Current theoretical and experimental literature.

PSYCH 462 Human Memory (5) Nelson Current theoretical and experimental literature.

PSYCH 463 The Pathology of Human Memory (5) Sp Effects of brain damage on human memory; comparison of observed kinds of losses with current theories of memory: amnesia and other impairment of intellectual functions (aphasia, agnosia, apraxia) as they relate to memory. Prerequisite: 421; recommended: 461 or 462.

PSYCH 464 Metacognition (5) W Nelson Self-monitoring and self-control of an individual's own cognitive processes. Metacognitive aspects of memory and judgment under uncertainty. Methodology and findings of empirical research on metacognition. Prerequisite: 462 or PHIL 460; recommended: 462.

PSYCH 465 Intelligence in Psychology (3) Hunt Historical and contemporary treatments of the concept of intelligence by psychology, evolution and validity of techniques for assessment, biological and environmental issues in assessment, intelligence and personality, experimental and psychometric indicators of the future role of intelligence in psychology. Prerequisite: 15 credits in psychology, including one statistics course.

PSYCH 466 Psychological Aspects of Judgment and Decision (5) *Beach, Miyamoto* Cognitive underpinnings of human judgment and decision making. Processes that shape judgment and decision, and their relationship to prescriptive models from other disciplines. Prerequisites: 464, PHIL 460, and permission of instructor; recommended: introductory statistics.

PSYCH 467 Eyewitness Testimony (3) *W. E. Loftus* Perception, memory, and retrieval of real world events. The eyewitness in the legal system. Psychologists as expert witnesses regarding eyewitness accounts. Prerequisites: introductory psychology plus eight additional credits in psychology.

PSYCH 468 Information Processing (4) *Hunt* Human thought as a phenomenon to be described by formal models. Current theories and experimental studies of rational information processing; emphasis on how man notices, recognizes, remembers, and recalls information used in rational problem solving; theoretical models of attention, memory, and recall; cognitive models of rational problem solving. Prerequisite: 231 or 355, or equivalent.

PSYCH 469 Psychology of Reasoning (4) *Miyamoto* Cognitive processes in deductive and inductive reasoning. Psychological theories of syllogistic, conditional, causal, and correlational reasoning. Heuristics and biases in intuitive statistical reasoning. Induction of category properties. Relationship between normative and descriptive theories of inference. Prerequisite: 354 or 355, or graduate standing.

PSYCH 475 Computing in Behavioral Sciences (5) *Hunt, G. Loftus* Application of computers to research problems in the behavioral and social sciences; functional and performance characteristics of batch processing, interactive and control systems; computing languages; methods of data processing, control of experiments, and automated instruction. Prerequisites: upper-division or graduate standing in behavioral or social sciences, some knowledge of statistics and computer programming, or permission of instructor.

PSYCH 489 Clinical Psychology (3) Basic issues, methods, and research: professional issues, psychological assessment, and approaches to psychotherapy and behavioral change. Prerequisites: 205 and 305, and upper-division major standing.

PSYCH 490 Stress Management (3) *Pagano* Nature of stress. Physiological responses to stress and relaxation. Techniques of stress management with training in relaxation, biofeedback, meditation, cognitive restructuring, exercise, nutrition, interpersonal communication skills, and time management. Prerequisite: 101 or 102 or equivalent.

PSYCH 495 Introduction to Law: A Social Science Perspective (4) *Sp. Loh* Uses and limits of social science in the law-making process on appeal and the fact-finding process at trial. Critical perspectives on the role of social science, especially social psychology, in adjudication. Instruction by use of case method, Socratic questioning, and discussion. Readings in judicial opinions, jurisprudential essays, and empirical research reports. Joint with LAW 495. Prerequisite: upper-division or graduate standing.

PSYCH 497 Undergraduate Fieldwork (1-3, max. 18) *AWSpS* Individual consultation with faculty member and supervised practicum experience in a broad range of community settings and agencies dealing with psychological problems. An overall maximum of 18 credits in 497, 498, and 499 may apply toward a baccalaureate degree. Prerequisites: junior or senior major standing and permission of instructor.

PSYCH 498 Readings in Psychology (1-3, max. 18) *AWSpS* Readings in special interest areas under supervision of departmental faculty. Discussion of reading in conference with the instructor. An overall maximum of 18 credits in 497, 498, and 499 may apply toward a baccalaureate degree. Prerequisite: permission of a supervising psychology faculty member.

PSYCH 499 Undergraduate Research (1-3, max. 18) *AWSpS* Design and completion of individual research projects. An overall maximum of 18 credits in 497, 498, and 499 may apply toward a baccalaureate degree. Prerequisites: 213 or 217, and permission of a supervising psychology faculty member.

Courses for Graduates Only

PSYCH 500 Laboratory in Statistical Computation I (2) *Miyamoto* Techniques of statistical computation using statistical software on personal computers and mainframe computers. Organization of data files, transformations of variables, graphical representations of data, descriptive statistics, elementary inferential statistical analyses. Prerequisites: at least one undergraduate course in statistics or probability and concurrent enrollment in 513, or permission of instructor.

PSYCH 501 Laboratory in Statistical Computation II (2) *Miyamoto* Techniques of statistical computation using statistical software on personal computers and mainframe computers. Multiple regression, analysis of variance and covariance. Planned and post hoc comparisons and confidence intervals. Data analytic diagnostics for violations of regression assumptions. Prerequisites: 500 and 513, concurrent enrollment in 514, or permission of instructor.

PSYCH 502 Negotiation Research and Theory (3) *Sp. Thompson* Examination of social psychological theory and empirical research and social conflict, negotiation, and bargaining. Focuses on interpersonal negotiation and factors such as judgment, motivation, goals, and experience that affect negotiator behavior. Critical evaluation of theories in light of current research. Prerequisite: 508 or 445, or equivalent, or permission of instructor.

PSYCH 503 Advanced Social Psychology (4) *A. Fiedler* Evaluation of current theories and research in social psychology, including attitude and opinion research; interpersonal perception and social relations; small-group and leadership processes; attribution theory. Prerequisites: 213, or equivalent and some background in social science. Advanced undergraduates with permission of instructor.

PSYCH 504 Biological Basis of Development (4) *A. Bernstein* Embryological, genetic, physiological, and evolutionary perspectives of human development; biological development in infancy; sensory development and its influence on the development of perception; primate models for human development. First quarter of a three-quarter proseminar required for graduate majors in developmental psychology. Prerequisite: graduate standing or permission of instructor.

PSYCH 505 Cognitive and Linguistic Development (4) *W. Meltzoff* Focus on the origins and early development of thought and language. Piagetian theory and modern-day revisions of it emphasized. In depth examination of historical and philosophical bases for current empirical research. Second quarter of a three-quarter proseminar, required for graduate majors in developmental psychology. Prerequisite: graduate standing or permission of instructor.

PSYCH 506 Personality and Social Development (4) *Sp. Greenberg* Theories and empirical literature in personality and social development throughout infancy, childhood, and adulthood. Third quarter of a three-quarter proseminar required for graduate majors in developmental psychology. Prerequisite: graduate standing or permission of instructor.

PSYCH 508 Research Methods in Social Psychology (4, max. 8) *A. Greenwald* Examination of methodological, practical, and communication problems associated with research on human behavior. Topics include: selecting research problems, use of theory, types of validity, common sense about statistics, when to replicate, dealing with unpredicted results, strategies for presentation and publication. Prerequisite: graduate standing or permission of instructor.

PSYCH 509 Leadership and Organizational Effectiveness (3) *Sp. Fiedler* A critical evaluation of current theories of leadership and management, and their implications for selection, assessment, performance, evaluation, training, task design, and the management of groups and organizations. Prerequisite: 213 or equivalent course in statistics; advanced undergraduates by permission of instructor.

PSYCH 510 Advanced Attitude Theory (5) *S. Greenwald* Theoretical, methodological, and empirical work on the concept of attitude and its practical applications. Topics include: definition of attitude, measurement of attitudes, information processing theories, functional theories, cognitive structure theories, the self as attitude object, unconscious attitudinal processes. Prerequisites: 444, 445, 503, and 514 or equivalent; or permission of instructor.

PSYCH 511 Personality: Motivation and Psychodynamics (3) *Sarason* Review of personality research. Roles of cognitive, motivational, and psychodynamic processes. Critical evaluation of current personality research as it relates to concepts of personality, its antecedents, and influences over behavior. Attention to role of personality variables in social relationships. Prerequisite: graduate or professional standing or permission of instructor.

PSYCH 513 Probability Theory and Nonparametric Statistics (4) *A. Rose* Basic concepts of measurement and probability as applied to design of psychological experiments. Statistical tests appropriate for simple experimental designs using ordinal, nominal, or interval data. Required for all first-year graduate students in psychology; may be challenged by examination at beginning of each academic year. Prerequisite: graduate standing or permission of instructor.

PSYCH 514 Experimental Design (4) *G. Loftus* Design of experiments and analysis of experimental data in the behavioral sciences. Required of all first-year graduate majors. Prerequisites: elementary statistics and 513 or permission of instructor.

PSYCH 515 Modeling Experimental and Observational Data (4) *Sp. Lunneborg* An introduction to statistical modelling; interactive data analyses; use of regression, ANOVA, logistic regression, and log-linear models in explanatory studies. Prerequisite: 514.

PSYCH 516 Educational and Psychological Measurement (3) Theory of measurement; examination of assumptions involved in test theory; errors of measurement, factors affecting reliability and validity, and norms and their use and development. Offered jointly with EDPSY 592. Prerequisites: 213 or 217, and permission of instructor.

PSYCH 517 Psychophysics and Fundamental Measurement (3) *Sp. Rose* Application of mathematics (drawn from set theory, finite mathematics, and probability theory) in the areas of measurement and psychophysics. Open to undergraduates with permission of instructor. Prerequisite: 514 or equivalent.

PSYCH 518 Single Subject Design and Research (3) *Sp. Kohlenberg* Single subject designs (reversal, multiple baseline, changing criterion) and their application to clinical cases. Prerequisite: graduate major standing in clinical psychology or permission of instructor.

PSYCH 519 Statistical Methods in Longitudinal Research (3) *Sp. Sackett* Those aspects of statistics and experimental design unique to, or heavily used in, developmental research; behavioral observation methods, analysis of variance and nonparametric techniques, and time series analysis methods. Prerequisites: 514 or equivalent, and graduate standing.

PSYCH 522 Cognitive Perception (3) *G. Loftus* Current topics in perception, psychophysics, sensory memory, pattern recognition, letter and word perception, and visual masking. Prerequisites: 441 and 517, or permission of instructor.

PSYCH 523 Cognition (5) Hunt Problem solving, concept learning, individual differences in cognition, attention, and pattern recognition; computer simulation and mathematical models of cognitive phenomena. Prerequisites: graduate standing and completion of departmental mathematical and statistical requirement through 514.

PSYCH 524 Cognitive Approaches to Human Memory (4) Nelson Theories and behavioral data base of perceptual memory; short-term memory; acquisition, organization, and retention of information in long-term memory; relation between reinforcement and memory. Prerequisites: 462 and 522, or equivalents.

PSYCH 525 Assessment of Intelligence (5) A Duncan Current theory and research on intelligence and intelligence testing; training in administration, scoring, and interpretation of major intelligence tests; ethical issues in assessment. Prerequisite: graduate major standing in child clinical or clinical psychology, or graduate minor standing in child clinical psychology.

PSYCH 526 Psychological Assessment of Children (5) W Dawson Assessment techniques appropriate to children, including those for infants, special problems of preschool and school-age children; projective tests, family interviews, and target observational assessment; training in administration of selected techniques. Prerequisites: 525 and permission of instructor.

PSYCH 527 Psychological Assessment of Adults (3) W Broedel Training in adult assessment and development of skills in administration, scoring, and interpretation of the Rorschach with some attention to other projective techniques. Prerequisites: 525 and permission of instructor.

PSYCH 528 Judgment and Decisions (5) Beach Examination of research on human judgment under uncertainty, expected value of decision making, and psychological models of decision making. Psychological aspects of judgment and decision, applied problems. Prerequisite: 218 or equivalent.

PSYCH 534 Foundations of Psychological Research (3) Nelson Interpretation of psychological research results, related issues from the philosophy of science, and nonstatistical pitfalls in psychological research. Prerequisite: 513, which may be taken concurrently.

PSYCH 535 Approaches to Psychological Assessment (4) Sp Problem-solving approach to psychological assessment; review of psychological tests and procedures and presentation of approaches to their clinical interpretation and use. Required for all graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology.

PSYCH 536 Behavioral Assessment (4) Linehan Research, theory, and technique in behavioral assessment. Emphasis on assessing for change and relationship between assessment and therapy. Interviewing, observational techniques, self-monitoring, simulated environments, and physiological, self-report, and imaginal procedures. Prerequisites: clinical psychology graduate standing and permission of instructor.

PSYCH 538 Systems of Psychotherapy (3) A Marlatt Theory and research of major systems of psychotherapy, including the psychodynamic, behavioral, cognitive, and humanistic/transpersonal schools as an introduction to subsequent practice in clinical psychology. Required for all graduate students majoring in clinical psychology. Prerequisites: graduate major standing in clinical psychology and permission of instructor.

PSYCH 539 Interviewing and Case Formulation (2, max. 6) W Carlin, Jacobson, Thorpe Emphasis on learning interviewing skills and content to adminis-

ter such recent psychodiagnostic procedures as DSM III and the research diagnostic criteria. Case formulation and presentation and treatment planning. For graduate students in psychology, nursing, social work, and anthropology, and for advanced medical students. Joint with PBSCI 539. Prerequisite: permission of instructor.

The content of each graduate seminar (numbered 540 through 560) offered by the department changes from quarter to quarter. A list of offerings is published each quarter and can be obtained from the Department of Psychology.

PSYCH 540 Seminar in Clinical Psychology (2) Broedel, Cauce, Dawson, Duncan, Jacobson, Kohlenberg, Linehan, Marlatt, McMahon, Sarason, R. Smith May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 541 Seminar in Cognitive Processes (2) Hunt, E. Loftus, G. Loftus, Nelson May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 542 Seminar in Animal Behavior (2) Barash, Beecher, Brenowitz, Lockard May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 543 Seminar in Developmental Psychology (2) Greenberg, Meltzoff, Sackett May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 544 Seminar in Experimental Psychology (2) May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 545 Seminar in Motor Control (2) Hutton, Kerr, Small Variable topics address neural, developmental, and behavioral processes underlying motor behavior. May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 546 Seminar in Learning (2) Bolles May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 547 Seminar in Motivation (2) Bolles May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 548 Seminar in Perceptual Processes (2) Palmer May be repeated for credit. Prerequisites: 441 and permission of instructor.

PSYCH 549 Seminar in Physiological Psychology (2) Bernstein, Diaz, Douglas, Kanney, Simpson, Teller, Woods May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 550 Seminar in Psycholinguistics (2) Dale May be repeated for credit. Prerequisites: 447 and permission of instructor.

PSYCH 551 Seminar in Psychophysics (2) Teller May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 552 Seminar in Quantitative Techniques (2) Hunt, C. Lunneborg, Nelson, Rose May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 553 Seminar in Social Psychology (2) Brown, Fiedler, Greenwald, Keating, Thompson May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 554 Seminar in Decision Processes (2) Beach May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 555 Seminar in Metacognition (2) W Beach, Butterfield, Nelson Prerequisite: permission of instructor.

PSYCH 559 Seminar in Current Research in Vision (1) AWSps Teller May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 560 Seminar (*) AWSp May be repeated for credit. Prerequisite: permission of instructor.

PSYCH 570 Child Clinical Psychology (4) A Cauce Issues and content of child clinical psychology, promotion of student's beginning work in research. Prerequisite: graduate major or minor standing in child-clinical psychology.

PSYCH 571 Child Psychopathology (5) W McMahon Broad survey of major categories of child and adolescent disorders. Emphasis on scientific, empirical approach to description, classification, and research literature on these disorders. Required for all graduate students majoring in child clinical psychology. Prerequisite: graduate standing in psychology or permission of instructor.

PSYCH 572 Approaches to Child Treatment (4) Sp Major approaches to child psychotherapy, including specific applications, issues in treatment, and research. Includes case assignment and supervision. Prerequisites: 526 and graduate major standing in child-clinical psychology, or permission of instructor.

PSYCH 575 The Family Process (3) Structures, relationships, and interactions within the family. Follows a developmental sequence based on the human life cycle, with two or more generations in synchrony. Prerequisites: second-year graduate major standing in clinical psychology and permission of instructor.

PSYCH 576 Intervention Techniques With Families (3) Theory and practice of principal methods of therapeutic intervention with families. Attention to clinical problems arising in a family context and use of family members and processes by the clinician. Prerequisites: 575, 592 and 593 or equivalent and permission of instructor.

PSYCH 577 Theory and Application of Social Network Intervention (3) Sp Interdisciplinary analysis of social networks and community mental health applications; natural support systems, cross-cultural implications and clinical interventions; practical considerations of program support and development; ethical issues; research design and participation. Prerequisites: advanced graduate standing in psychology or related disciplines; permission of instructor. Recommended: some background in family therapy.

PSYCH 578 Affective Disorders: Theory and Research (2) Jacobson Causes, sustainers, correlates, and consequences of affective disorders, including biological and psychosocial factors. Offered jointly with PBSCI 578. Prerequisite: graduate or professional student standing or permission of instructor; recommended: graduate course in psychopathology and personality.

PSYCH 579 Treatment of Affective Disorders: Methods and Evaluation (2) Jacobson Differential diagnosis of depression and depressive subtypes; emphasis on psychodynamic, cognitive-behavioral, and combined forms of psychological treatment of less severely incapacitated patients; biological approaches (i.e., antidepressant drugs, electroconvulsive therapy, etc.) as alternative or adjunctive treatments in severe, psychotic, and endogenous-like depressions. Joint with PBSCI 579. Prerequisites: 578, graduate or professional student standing or permission of instructor; recommended: graduate course in psychopathology and personality.

PSYCH 585 Research in Psychotherapy (5) Marlatt Research in psychotherapy, including process and outcome. Experience in research design. Prerequisites: graduate major standing and permission of instructor.

PSYCH 586 Clinical Personality Assessment (3) R. Smith Use of objective personality inventories in the description of normal and abnormal personality and use of such information in case conceptualization and treatment planning. Minnesota Multiphasic Personality Inventory, Millon Clinical Multiaxial Inventory. Prerequisite: clinical psychology graduate standing.

PSYCH 590 Practicum in Psychological Assessment (2) Sp Demonstration and practice of selected psychological test procedures and interviewing skills. Concurrent registration in 535 required. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisites: graduate major standing in clinical or child-clinical psychology and permission of instructor.

PSYCH 591 Issues in Clinical Psychology (1, max. 3) AWSp Personal and professional issues in clinical psychology. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology.

PSYCH 592, 593 Clinical Methods (1-6, max. 6; 1-6, max. 6) AWSpS, AWSpS Fagan, Kohlenberg, Linehan Advanced training in the application of psychological assessment and behavior change methods. Required for all second-year graduate majors in clinical psychology. Must be taken in sequence. Prerequisites: 591, graduate major standing, and permission of instructor.

PSYCH 594 Advanced Personality Theory (5) Linehan Conceptual models of behavioral functioning, cognition, emotion, and environment as organizers of behavior and other critical issues in personality theory. Opportunity to integrate previous courses, research, and practice, and arrive at a coherent theoretical framework. Required for graduate majors in clinical psychology. Prerequisite: third-year graduate standing.

PSYCH 595 Behavior Disorders (5) W I. Sarason Major types of behavior disorders, with emphasis on clinical manifestations, relevant research, and theoretical perspectives. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate major standing in clinical psychology or permission of instructor.

PSYCH 596 Psychology of Behavior Change (5) Sp Jacobson, Kohlenberg Behavioral theory and behavioral approaches to treatment. Prerequisites: 595 and permission of instructor.

PSYCH 597 Fieldwork in Clinical Psychology (1-5, max. 36) AWSpS Broedel, Dawson, Duncan, Jacobson, Kohlenberg, Linehan, Marlatt, McMahon, N. Robinson, I. Sarason, R. Smith Prerequisites: second-year graduate major standing and permission of departmental faculty.

PSYCH 598 Advanced Clinical Practicum (4) AWSpS Cauce, Dawson, Duncan, Jacobson, Kohlenberg, Marlatt, McMahon, I. Sarason, Smith Supervised psychotherapy involving several individual clients. Separate consultations with instructor for intensive supervision of each case. Occasional meetings in small groups of instructors and students to discuss case material. Assigned readings appropriate to each case with opportunities to discuss these with instructor. Prerequisites: clinical psychology graduate standing and permission of instructor.

PSYCH 599 Readings in Psychology (*) AWSpS Selected topics. Prerequisite: permission of a supervising psychology faculty member.

PSYCH 600 Independent Study or Research (*) AWSpS

PSYCH 700 Master's Thesis (*) AWSpS

PSYCH 800 Doctoral Dissertation (*) AWSpS

the Romance languages (French, Spanish, Italian, Portuguese) and to study Romance literatures, culture, and linguistics.

Undergraduate Program

Bachelor of Arts Degree

Adviser
C108 Padelford

MAJOR REQUIREMENTS

French: 59 credits beyond FREN 203. Required courses at the 300 level: FREN 301, 302, 303; 304, 305, 306; 350, 351, 352. Four approved electives in French at the 400 level: any four courses numbered 400-499 (except courses in translation) and ROM 401 may be used to satisfy this requirement. The department does not accept transfer courses at the 400 level or courses in translation.

Spanish: 50 credits in courses at the 300 and 400 levels, including SPAN 301, 302, 303, 321, 322, 323, plus two 300-level courses; 25 credits (none of which may be transfer credit) of courses numbered 400 or higher within a chosen emphasis of literature, culture, or linguistics. Courses in translation are not counted.

Italian: 50 credits in courses at the 300 and 400 levels, including ITAL 301, 302, 303; 6 credits of 327; 401; 404, 405, 406; 15 additional credits in literature courses at the 400 level. Students should consult Italian adviser about courses in translation.

Romance Linguistics: For admission, two college years (or equivalent) of study in each of two Romance languages. For graduation: 20 credits in third-year language courses in two Romance languages (recommended distribution: 10 credits each); 15 credits in literature, including a complete survey sequence at the 300 level; two 400-level courses in language structure; ROM 401 and 402; SPAN or FREN 474; a senior essay (2 credits). Recommended electives: general linguistics courses. Majors must begin course work in Romance and general linguistics by start of junior year.

Graduate Program

The Department of Romance Languages and Literature offers programs of graduate study leading to the degrees of Master of Arts and Doctor of Philosophy. Students may specialize in French, Italian, or Spanish languages and literature or in Romance linguistics.

The Master of Arts degree may be with thesis or without thesis and may have either of two main areas of specialization: language and literature or Romance linguistics.

Doctoral programs are offered in the following fields of specialization: Romance literature, Romance linguistics, and French or Spanish language and literature. Students specializing in a single Romance literature devote at least two-thirds of their course work to the field of specialization. In all programs, some training in basic principles of the nature of language and in bibliographic method is required.

The doctoral program in Romance literature allows a flexible combination of two or more Romance literatures. At least half the post-M.A. credits must constitute a major area within one of the departmental literary sections: French, Spanish, or Italian.

Special Requirements

Information on special requirements for the various degree programs is available upon request from the office of the graduate program coordinator.

Financial Aid

The department awards annually a number of teaching assistantships. The assistant normally participates in

teaching three classes during the academic year. Each class is limited to approximately twenty-five students and meets five hours a week for the ten weeks of the quarter. The supervisors of language instruction meet with the assistants separately and in groups to discuss matters of teaching.

Professors

Anderson, Farris F.,* 1967, M.A., 1962, Duke; Ph.D., 1967, Wisconsin; nineteenth- and twentieth-century Spanish literature.

Christofides, Constantine G.,* 1966, (Drama), (Art, Comparative Literature),† M.A., 1950, Ph.D., 1956, Michigan; seventeenth-century French literature, Romanesque art.

Contreras, Heles,* 1964, ‡(Linguistics), M.A., 1959, Ph.D., 1961, Indiana; Romance linguistics.

Creora, Alvin, 1940, (Emeritus), M.A., 1936, Rochester; Ph.D., 1939, Johns Hopkins; sixteenth-century poetry, phonetics, *chanson*.

Friedman, Lionel J.,* 1961, M.A., 1947, Ph.D., 1950, Harvard; medieval French literature.

Hanzeli, Victor E.,* 1957, (Emeritus), M.A., 1955, Ph.D., 1961, Indiana; Romance linguistics and eighteenth-century French literature.

Keller, Abraham C.,* 1948, (Emeritus), M.A., 1937, Ohio State; Ph.D., 1946, California (Berkeley); sixteenth-century French literature.

Klausenburger, Jurgen,* 1969, A.M., 1966, Ph.D., 1969, Michigan; Romance linguistics.

Leiner, Jacqueline,* 1963, (Emeritus), (Comparative Literature),† Dr. es Lettres, 1969, Strasbourg (Germany); modern French literature.

Nostrand, Howard L.,* 1939, (Emeritus), M.A., 1933, Harvard; Docteur, 1934, Paris; French culture and civilization.

Pace, Antonio, 1967, (Emeritus), M.A., 1937, Syracuse; Ph.D., 1943, Princeton; Italian language and literature.

Penuelas, Marcelino C.,* 1963, (Emeritus), M.Ed., 1940, M.A., 1945, Valencia (Spain); Ph.D., 1949, Madrid (Spain); eighteenth-century Spanish literature, contemporary Spanish literature.

Saporta, Sol,* 1960, (Linguistics),† M.A., 1952, Ph.D., 1955, Illinois; Romance linguistics.

Wilson, Clotilde M., 1929, (Emeritus), M.A., 1927, Ph.D., 1931, Washington; French language and literature.

Wilson, William C., 1926, (Emeritus), M.A., 1925, Ph.D., 1928, Washington; Spanish language and literature.

Associate Professors

Borch-Jacobsen, Mikkel,* 1986, Certificate de Maîtrise, 1972, Doctorate, 1981, Université des Sciences (Strasbourg); twentieth-century French literature.

Collins, Douglas P.,* 1980, (Comparative Literature),† M.A., 1972, Ph.D., 1978, Missouri; twentieth-century French literature.

Dale, Robert C.,* 1963, M.A., 1960, Ph.D., 1963, Wisconsin; nineteenth-century French literature, cinema.

Ellrich, Robert J.,* 1964, (Emeritus), (Comparative Literature),† M.A., 1953, Ph.D., 1960, Harvard; eighteenth-century French literature.

Romance Languages and Literature

C104 Padelford

The department offers a program designed to develop competence in the reading, speaking, and writing of

Flores, Lauro H.,* 1980, Ph.D., 1980, California (San Diego); Chicano literature, contemporary Latin-American literature (narrative).

Friedrich, Pia,* 1965, (Emeritus), Ph.D., 1946, Università degli Studi (Italy); pedagogy and twentieth-century Italian literature.

Geist, Anthony L.,* 1987, M.A., 1969, Ph.D., 1978, California; twentieth-century Spanish literature.

Petersen, Suzanne H.,* 1973, M.A., 1967, Ph.D., 1976, Wisconsin; medieval Spanish literature.

Shipley, George A.,* 1967, M.A., 1962, Ph.D., 1968, Harvard; Spanish Golden Age.

Steele, Cynthia,* 1986, M.A., 1979, Ph.D., 1980, California (San Diego); Mexican literature, Spanish-American writers.

Wortley, W. Victor,* 1965, M.A., 1961, Ph.D., 1964, Oregon; seventeenth-century French theatre and prose (nonfiction).

Yarbro-Bejarano, Yvonne M.,* 1974, (Comparative Literature),† M.A., 1971, Ph.D., 1976, Harvard; sixteenth- and seventeenth-century literature of Spain.

Assistant Professors

Herschensohn, Julia, 1986, M.A., 1970, California; Ph.D., 1976, Washington; Romance linguistics and French syntax.

O'Hara, Edgar, 1989, M.A., 1985, Ph.D., 1989, Texas; Latin American literature.

Sbraglia, Albert, 1989, M.A., 1983, Ph.D., 1988, California (Berkeley); modern Italian literature.

Strozer, Judith R., 1987, M.A., 1970, Ph.D., 1973, California (Los Angeles); Spanish linguistics.

Sugano, Marian Z.,* 1987, M.A., 1974, Middlebury; Ph.D., 1987, California; French literature.

Yowell, Donna,* 1988, M.A., 1982, Ph.D., 1987, California (Berkeley); early Italian literature.

Zagona, Karen T.,* 1987, Ph.D., 1982, Washington; Spanish linguistics.

Lecturer

Klausenberger, Lynn E., 1988, M.A., 1967, Ph.D., 1974, Michigan; second-year French programs.

Course Descriptions

Courses in English translation appear at the end of the listing of courses for undergraduates.

Courses for Undergraduates

Romance Linguistics and Literature, General and Comparative

ROM 401 Introduction to Romance Linguistics (5) *Hanzell, Klausenberger* Descriptive analysis of the phonological, morphological, and syntactical structures of the modern Romance languages. Prerequisite: the equivalent of two college years of a Romance language, or permission of instructor.

ROM 402 Introduction to Romance Linguistics (5) *Klausenberger* Comparative historical survey of the development of the principal Romance tongues. Prerequisite: 401 or permission of instructor.

ROM 490 Senior Essay (2) *Hanzell, Klausenberger* Essay on linguistic problem of student's choice written with faculty consultant.

ROM 499 Special Topics (1-5, max. 10) *AWSpS* Prerequisites: permission of instructor and undergraduate adviser or graduate program coordinator.

French

FREN 101, 102, 103 Elementary (5,5,5) AW, AWSp,AWSp Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite for 102: 101 or college equivalent, or placement; for 103: 102 or equivalent, or placement.

FREN 105 Elementary Reading (5) Prepares graduate students for the language reading examination. Credit granted only to students who have not received previous credit in French. Students receiving credit in 105 may not later register for credit in 101. Offered through Distance Learning by correspondence only. Prerequisite: graduate standing or permission of instructor.

FREN 107 First-Year Reading (5) A *Friedman* Development of vocabulary and skill in rapid reading of literary French. cursory presentation of French grammar in English. Students receiving credit for 107 may subsequently earn credit for 100-level French courses involving other skills, but students who have received credit for 103 may not receive credit for 107.

FREN 201, 202, 203 Intermediate (5,5,5) AW, AWSp,AWSp Systematic review of French grammar. Intensive practice in writing and conversation. Readings in literature, culture, and the sciences. Prerequisites: 103 or college equivalent or placement for 201; 201 or college equivalent or placement for 202; 202 or college equivalent or placement for 203.

FREN 207 Second-Year Reading (5) W *Friedman* Intermediate vocabulary building and reading of literary texts. Students receiving credit for 207 may subsequently earn credit for lower-numbered French courses involving other skills. Prerequisite: 107 or 103.

FREN 237 Foreign Study Conversational French (2-8, max. 8) For participants in the Foreign Study Program. Prerequisites: 103 or college equivalent and permission of Foreign Study Office.

FREN 297 Foreign Study French Civilization (3 or 6) For participants in the Foreign Study Program. Literary tradition, social and cultural values as reflected in literature. Paper (in English) and higher degree of participation for 6 credits. In English. Prerequisites: two years of college-level French and permission of Foreign Study Office.

FREN 301, 302, 303 Advanced French (5,5,5) Prerequisites: 203 or college equivalent or placement for 301; 301 for 302; 302 for 303.

FREN 304 Survey of French Literature: Origins to 1600 (5) Sp Thematic and formal developments in literature of the period with emphasis on movements and texts in relation to cultural background. Desirable preparation: at least one course in either the 301, 302, 303 series or the 350, 351, 352 series.

FREN 305 Survey of French Literature: 1600-1789 (5) A Emphasis on literary movements and texts in relation to cultural background. Desirable preparation: at least one course in either the 301, 302, 303 series or the 350, 351, 352 series.

FREN 306 Survey of French Literature: 1789 to the Present (5) W Development of modern literature through its most important writers and movements. Desirable preparation: at least one course in either the 301, 302, 303 series or the 350, 351, 352 series.

FREN 307 Third-Year Reading (5) Sp *Friedman* Advanced vocabulary building and reading of literary texts. Students receiving credit for 307 may subsequently earn credit for lower-division French courses involving other skills. Prerequisite: 207 or 203.

FREN 308 Foreign Study Composition (3-5, max. 10) For participants in the Foreign Study Program. Compositions on topical subjects of intermediate difficulty relating to the civilization of the French-speaking countries of Europe. Grammar review as needed. Prerequisites: 203 or college equivalent and permission of Foreign Study Office.

FREN 327 Advanced Conversation (2, max. 8) AWSp Not open to students whose native language is French. Prerequisite: 203 or college equivalent or placement.

FREN 337 Foreign Study Conversational French (2-8, max. 8) For participants in the Foreign Study Program. Prerequisite: 203 or college equivalent.

FREN 350 Drama (3) W Generic study of French drama. Prerequisite: 203 or college equivalent or placement.

FREN 351 Poetry (3) A Generic study of French poetry. Prerequisite: 203 or college equivalent.

FREN 352 Fiction (3) Sp Generic study of French fiction. Prerequisite: 203 or college equivalent.

FREN 378 The Making of Contemporary France, Studied in French (5) Study of the historical origins and subsequent development of contemporary problems and characteristics of French government and politics, economy, and society. Prerequisite: 203 or equivalent.

FREN 390 Supervised Study (2-6, max. 20) Prerequisites: permission of the instructor and the undergraduate French adviser.

FREN 397 Foreign Study French Civilization (3 or 6) S For participants in the Foreign Study Program. Literary tradition, social and cultural values as reflected in literature. Paper (in French) and higher degree of participation for 6 credits. In French. Prerequisites: two years of college-level French and permission of Foreign Study Office.

FREN 400 The Syntactic Structure of French (5) Scientific study of the syntax of French: phrase structures and transformations (emphasis on passives, relativization, pronominalization, reflexive structures). Prerequisites: ROM 401 or LING 200 or 400, and two years of college-level French.

FREN 401 The Morphological Structure of French (5) Linguistic study of French morphology. Prerequisite: ROM 401 or LING 400.

FREN 402 The Phonological Structure of French (5) The phonological component of the generative grammar of French: representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisites: 409 or ROM 401 or LING 200 or 400, and two years of college French; or three years of college French.

FREN 403 Background of Modern French (5) *Klausenberger* Linguistic analysis of the important developments in the history of the French language from its Latin origin to contemporary speech. Prerequisite: the equivalent of two college years of French.

FREN 404 Old French (5) *Friedman* Designed for acquisition of reading facility in Old French through intensive study of selected texts. Prerequisite: ROM 401 or permission of instructor.

FREN 406 Advanced French Grammar (5) Problems of French grammar. Differences between forms and structures of French and English. Problems of effective teaching of French. For students with at least three years of college French and for beginning teaching assistants. Prerequisites: 301, 302, 303; and permission of instructor.

FREN 409 The Phonetics of French (5) Scientific study of the French sound system with special emphasis on "lower level" phonetic rules, with integral values. Focus on data from standard French as well as socio-economic and geographic variations. Prerequisites: ROM 401 or LING 200 or 400, and two years of college-level French.

Most of the following 400-level courses require as prerequisites FREN 303; 304, 305, 306; 350, 351, 352. See adviser for exceptions.

FREN 410 French Literature of the Sixteenth Century: Prose (5) Sixteenth-century literature, with emphasis on cultural and intellectual background. Prerequisites: See note above.

FREN 411 French Renaissance: Poetry (5) Sixteenth-century literature with emphasis on poetry and the general artistic ambience. Prerequisites: See note above.

FREN 412 Baroque Literature (5) The whole phenomenon of baroque literature, including prose, poetry, and theater. Prerequisites: See note above.

FREN 413 French Literature of the Seventeenth Century: Classicism (5) Wortley Seventeenth-century literature, with emphasis on the development of classicism. Prerequisites: See note above.

FREN 414 French Literature of the Eighteenth Century: Enlightenment (5) Ellrich Eighteenth-century literature, with emphasis on the development of the Enlightenment ideology. Prerequisites: See note above.

FREN 415 French Literature of the Eighteenth Century: Post-Enlightenment (5) Ellrich Eighteenth-century literature, with emphasis on the "dark side of the Enlightenment" and nascent romanticism. Prerequisites: See note above.

FREN 416 French Literature of the Nineteenth Century: Romanticism (5) Sugano Nineteenth-century literature, with emphasis on romanticism and the early manifestations of realism. Prerequisites: See note above.

FREN 418 French Literature of the Early Twentieth Century (5) Collins Twentieth-century literature, with emphasis on the period 1900-1939. Prerequisites: See note above.

FREN 419 French Literature Since World War II (5) Collins Twentieth-century literature, with emphasis on the period 1939 to the present. Prerequisites: See note above.

FREN 421 Fiction: 1660-1800 (5) Ellrich Prerequisites: See note above.

FREN 424 Fiction: 1800-1850 (5) Prerequisites: See note above.

FREN 425 Fiction: 1850-1900 (5) Prerequisites: See note above.

FREN 427 Fiction: Twentieth Century (5) Prerequisites: See note above.

FREN 444 Poetry: Romantic (5) Prerequisites: See note above.

FREN 445 Poetry: Parnassian and Symbolist (5) Prerequisites: See note above.

FREN 448 Poetry: Twentieth Century (5) Prerequisites: See note above.

FREN 451 History and Literature of the French Religious Wars (5) Major political, social, and religious movements and events of, and related to, the French religious wars of 1560 to the end of the century, along with the treatment of these in the prose, poetry, and drama of the period. For students receiving French credit, readings must be done in French. Prerequisites: See note above.

FREN 454 Nonfiction of the Classic Period (5) Wortley Prerequisites: See note above.

FREN 457 Twentieth-Century Nonfiction (5) Prerequisites: See note above.

FREN 461 Seventeenth-Century Drama (5) Wortley Prerequisites: See note above.

FREN 463 Nineteenth-Century Drama (5) Prerequisites: See note above.

FREN 465 Twentieth-Century Drama (5) Prerequisites: See note above.

FREN 470 Cinema (5) Major films and figures of French cinema from the beginnings to the present. Prerequisites: See note above.

FREN 474 Linguistics and the Teaching of French (5) Hanzell Areas of linguistics that can be particularly helpful to the French teacher. Prerequisites: See note above.

FREN 490 Honors Seminar (2-5, max. 10) AWSp Special studies in French literature. Required of candidates for honors and distinction in French. Open to others by permission of French honors adviser.

FREN 496 Poetry and Song as Elements in French Civilization (5) Relationship of poetry and music as expressed in the *chanson* in several periods of French culture. Emphasis on twentieth-century poet-composer-performers. Attention given to the medieval troubadours and to poet-musician collaboration in the Renaissance and later periods. Prerequisites: See note above.

FREN 499 Special Topics (1-5, max. 10) Topics to meet special needs. Prerequisites: See note above.

Italian

ITAL 101, 102, 103 Elementary (5,5,5) A,W,Sp Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisites: 101 or college equivalent or placement for 102; 102 or college equivalent or placement for 103.

ITAL 199 Foreign Study—Elementary (4-16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must pass University of Washington proficiency test, or take additional courses through 103.

ITAL 201, 202, 203 Intermediate (5,5,5) A,W,Sp Intensive speaking, reading, and writing. Functional review of grammar. Prerequisites: 103 or college equivalent or placement for 201; 201 or college equivalent or placement for 202; 202 or college equivalent or placement for 203.

ITAL 299 Foreign Study—Intermediate (4-16) Intermediate instruction in approved foreign study program. University of Washington proficiency test, or additional course work required to establish proficiency. Further University of Washington study at 200-level will depend on placement evaluation by the University of Washington Italian faculty adviser.

ITAL 301, 302 Advanced Syntax and Composition (3,3) A,W Prerequisites: 203 or college equivalent or placement for 301; 301 for 302.

ITAL 303 Italian Stylistics (3) Sp Functional grammar review; creative written and oral composition and reading, with special attention to problems of style. Prerequisite: 302.

ITAL 327 Advanced Conversation (2, max. 8) Not open to students whose native language is Italian. Prerequisite: 203 or college equivalent or placement.

ITAL 390 Supervised Study (2-6, max. 20) AWSp Prerequisites: permission of the instructor and the undergraduate Italian adviser.

ITAL 401 The Development of the Italian Language (5) Klausenburger Historical survey of Italian phonology, morphology, and syntax. Prerequisites: 301, 302, 303, or LING 400, or ROM 401, or permission of instructor.

ITAL 404, 405, 406 Survey of Italian Literature (5,5,5) A,W,Sp Prerequisite: 203 or college equivalent or placement test.

ITAL 413 Literature of the Renaissance: Quattrocento (5) The early Renaissance. Humanism; writings of Lorenzo de' Medici, Poliziano, Belcari, Alberti, Masuccio, Sannazzaro, Pulci, Bolardo.

ITAL 414 Literature of the Renaissance: Cinquecento (5) The high Renaissance. Bembo and the Petrarchans, Machiavelli, Guicciardini, Castiglione, Ariosto, Guarini, Tasso.

ITAL 423, 424 Eighteenth-Century Italian Literature (5,5) 423: poetry: the Arcadian movement, Parini, Monti, Foscolo. 424: drama: Metastasio, Goldoni, Alfieri.

ITAL 460 Verismo (5) Friedrich The development of Verismo with extensive readings from its main exponents—Capuana, Verga, Serao, Deledda, Fucini, and d'Annunzio.

ITAL 465 Contemporary Italian Narrative (5) Critical reading of selected modern exponents of the short story and novel.

ITAL 490 Proseminar in Italian Literature (3-5) Intended to help the student achieve a mature critical mastery of Italian literature. Required of Italian majors; others by permission of instructor.

ITAL 499 Special Topics (1-5, max. 10) Topics to meet special needs. Prerequisites: permission of the instructor and the undergraduate or graduate program adviser.

Portuguese

PORT 101, 102, 103 Elementary (5,5,5) A,W,Sp Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisites: 101 or college equivalent or placement for 102; 102 or college equivalent or placement for 103.

PORT 201, 202, 203 Intermediate (5,5,5) A,W,Sp Modern texts, compositions, conversation, and functional grammar. Prerequisites: 103 or equivalent or permission of instructor for 201; 201 for 202; 202 for 203.

PORT 301, 302 Advanced Syntax and Composition (3,3) A,W Students with advanced standing in Spanish courses may apply to instructor for permission to enter 301 after 103. Prerequisites: 203 or equivalent, or permission of instructor for 301; 301 for 302.

PORT 303 Portuguese Stylistics (3) Sp Functional grammar review; creative written and oral composition and reading with special attention to problems of style. Prerequisite: 302 or permission of instructor.

PORT 327 Advanced Conversation (2, max. 8) Prerequisite: 203 or equivalent or permission of instructor.

PORT 390 Supervised Study (2-5, max. 20) AWSp Prerequisites: permission of instructor and undergraduate Portuguese adviser.

Romanian

RMN 401, 402, 403 Elementary Romanian (5,5,5) A,W,Sp 401, 402: comprehensive introduction to both spoken and literary Romanian. 403: designed to increase the student's vocabulary and enhance knowledge of grammar through the reading of short fictional material in modern Romanian. Joint with ROMN 401, 402, 403.

RMN 404, 405, 406 Advanced Romanian (5,5,5) Continuation of 401, 402, 403. Joint with ROMN 404, 405, 406. Prerequisite: 403 or permission of instructor.

Spanish

SPAN 101, 102, 103 Elementary (5,5,5) AW, AWSp, AWSp Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisites: 101 or college equivalent or placement for 102; 102 or college equivalent or placement for 103.

SPAN 104 Spanish Grammar—Intensive (5) A Thorough review of the basics of Spanish grammar. Not open to students who have taken 102 or 103. Prerequisite: one year preuniversity Spanish, or 101, or permission of instructor.

SPAN 199 Foreign Study—Elementary (4-16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must pass University of Washington proficiency test, or take additional courses through 103.

SPAN 201, 202, 203 Intermediate (5,5,5) AWSp,AWSp,AWSp Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on selected pieces of Spanish literature. Prerequisites: 103 or college equivalent or placement for 201; 201 or college equivalent or placement for 202; 202 or college equivalent or placement for 203.

SPAN 204 Intensive Spanish Review—Intermediate (5) W Intensive review of grammar, reading composition, and oral/aural skills. For highly motivated students with at least one year of college Spanish, or equivalent. Synthesis of 201, 202, 203, and preparation for third-year work in language and literature. Prerequisites: 103, 104, or 201; or four years of high school Spanish.

SPAN 231 Chicano Expressive Culture (3) Flores The folk and popular traditions of people of Mexican culture, both within the present borders of Mexico and in the United States.

SPAN 299 Foreign Study—Intermediate (4-16) Intermediate instruction in approved foreign study program. University of Washington proficiency test, or additional course work required to establish proficiency. Further University of Washington study at 200-level will depend on placement evaluation by the University of Washington's Spanish faculty adviser.

SPAN 301, 302 Grammar and Lexicon (3,3) AW,WSp Prerequisites: 203 for 301; 301 for 302.

SPAN 303 Introduction to Stylistics Through Composition (4) ASP Prerequisite: 302.

SPAN 304 Survey of Spanish Literature: 1140-1498 (3) Masterpieces of Spanish literature from origins to 1498. Prerequisites: 203; completion of, or concurrent enrollment in, 321.

SPAN 305 Survey of Spanish Literature: 1498-1681 (3) Prerequisites: 203; completion of, or concurrent enrollment in, 321.

SPAN 306 Survey of Spanish Literature: 1681 to the Present (3) Prerequisites: 203; completion of, or concurrent enrollment in, 321.

SPAN 307 Introduction to Latin American Literature (3) Study of selected works of twentieth-century Latin American literature and their sociohistorical context. Development of reading and writing skills. Prerequisites: 203; completion of, or concurrent enrollment in, 321.

SPAN 321 Introduction to Hispanic Literary Studies (3) ASP Acquaints the third-year student with elementary techniques of literary analysis, as applied to examples of narrative, poetry and theater, within the context of the Spanish and Latin American literary traditions. Prerequisite: 203 or equivalent.

SPAN 322 Introduction to Hispanic Cultural Studies (3) AW Introduces students to elite, mass, and folk cultures of Spain, Latin America, and Hispanic peoples of the United States. Readings vary according to the faculty member's expertise and interests. Prerequisites: 203 or equivalent.

SPAN 323 Introduction to Spanish Linguistics (3) W Synchronic and diachronic linguistic analysis of Spanish, including Spanish phonetics and phonology, morphology, syntax, and evolution of the language. Prerequisite: 301.

SPAN 331 Themes in Mexican-American Studies (5) Flores Examination of significant historical and cultural themes of the Mexican-American experience. Prerequisite: speaking knowledge of Spanish.

SPAN 333 Latin American Film (3) Introduction to major issues in the study of Latin American cinema from various national contexts. The relationship of film to other types of narrative, and of film to society, specifically relations between class, gender, ethnicity, and artistic production, as well as between cinema and social change. Prerequisite: 203 or equivalent.

SPAN 337 Foreign Study Conversational Spanish (2 or 4 or 6) For participants in the Foreign Study Program. Prerequisites: 203 or equivalent and permission of Foreign Study Office.

SPAN 350 Drama (3) Generic study of Spanish drama. Prerequisite: 203 or college equivalent or placement.

SPAN 351 Poetry (3) Generic study of Spanish poetry. Prerequisite: 203 or college equivalent or placement.

SPAN 352 Fiction (3) Generic study of Spanish fiction. Prerequisite: 203 or college equivalent or placement.

SPAN 390 Supervised Study (2-6, max. 20) Prerequisites: permission of the instructor and undergraduate Spanish adviser.

SPAN 393 Foreign Study (2-10, max. 20) Study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisites: 301, 302, and approval of Foreign Study Office or undergraduate adviser.

SPAN 400 The Syntactic Structure of Spanish (5) Strozer, Zagana Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisites: 302 and 323.

SPAN 401 The Morphological Structure of Spanish (5) Strozer, Zagana Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisites: 302 and 323.

SPAN 402 The Phonological Structure of Spanish (5) Strozer, Zagana Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisites: 302 and 323.

SPAN 403 The Evolution of the Spanish Language (5) Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisites: 302 and 323.

SPAN 406 Advanced Spanish Grammar (5) Problems of Spanish grammar. Difference from English grammar. Techniques for the effective teaching of Spanish. Prerequisites: 302 and 323.

SPAN 408 Spanish Translation Workshop (5) Anderson Intensive practice in translation to and from Spanish. Texts include literary prose, poetry, expository writing, newspaper and magazine articles. Problems of standard *versus* colloquial language, transposition of cultural references, concept of fidelity in translation. Prerequisites: 303 and 323; recommended: 406.

SPAN 415 Spanish Literature: Nineteenth Century (5) Anderson Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 416 Spanish Literature: 1900-1936 (5) Spanish literature of the twentieth century prior to the Civil War (1900-1936). Concentration on Generations of 1898 and 1927. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 417 Spanish Literature From 1940 to the Present (5) Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 420 Spanish Poetry: Origins Through the Fifteenth Century (5) Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 423 Spanish Poetry: The Golden Age, Sixteenth Through Seventeenth Centuries (5) Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 424, 425, 426 Hispanic Poetry (5,5,5) Geist Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 433 Golden Age Prose (5) Shipley Representative, and outstanding, prose works of sixteenth- and seventeenth-century Spain. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 436 Spanish Novel of the Nineteenth Century (5) Anderson Representative works of Galdós, Clarín, Pereda, Valera, and Blasco Ibáñez. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 437 Spanish Novel: 1900-1936 (5) Spanish novel from the generation of 1898 to the beginning of the Civil War (1936). Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 438 Spanish Novel: 1939 to the Present (5) Prerequisites: 303, 321, plus one additional 300-level course beyond 303. (Offered alternate years.)

SPAN 439 Women Writers (5) Feminist analysis of selected texts by Chicana/Latina writers in the United States as well as by Spanish-American, Luso-Brazilian and/or Spanish women writers in their specific socio-historical contexts. Joint with WOMEN 439. Prerequisites: 303, 322, and one additional 300-level course beyond 303, or permission of instructor.

SPAN 440 Spanish Drama: 1150-1600 (5) From the beginning to Lope de Vega. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 441 Spanish Drama: 1600-1635 (5) Spanish theatre of the seventeenth century, with emphasis on Lope de Vega. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 445 The Modern Theatre in Spain, 1700-1900 (5) Anderson Literature and historical context of Spain's theatre in the eighteenth and nineteenth centuries. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 446 The Modern Theatre in Spain, 1900-1936 (5) Anderson Major currents and literature of Spain's theatre in this century, up to the Spanish Civil War in 1936. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 447 Spanish Theatre Since the Civil War (5) Works of Spain's major dramatists of the postwar period. Special attention given to the social and political context of the theatre in Spain under the Franco regime. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 449 Spanish Drama and Play Production (5, max. 10) Anderson Prerequisite: permission of instructor.

SPAN 453 Cervantes and His Times (5) Shipley Study of Cervantes and his moment in Spanish history, with special attention to his cultural and artistic environment. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 461 Cultural Background of Latin American Literature (5) Survey of ideas and art forms and their relationship to literature in four periods: pre-Columbian, colonial, early independence, and twentieth century. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 462 Early Spanish Civilization (5) Development of Spanish society and art forms from early times to 1700. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 463 Spanish Civilization Since 1700 (5) Spanish civilization and its major artistic products since 1700. Major moments in the development of Spanish society and intellectual life as reflected in music, painting, and especially literature. Taught in Spanish. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 465 Contemporary Chicano Literature (5) Examination of one or more problems, themes, and/or figures in the developing body of Chicano literature. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 466 Chicano Literature: Fiction (5) Nineteenth- and early twentieth-century fiction, as well as contemporary works, are examined in attempts to trace the development of Chicano fiction in the proper historical trajectory. Prerequisites: 303, 321 or 322, plus one additional 300-level course beyond 303.

SPAN 467 Spanish Women (5) Women's culture in Spain, focusing on women's experience during Civil War; persecution and censorship of women activists, artists, intellectuals during Franco years; changes in women's culture brought about by reintroduction of democracy; major issues addressed by contemporary Spanish feminists. Joint with WOMEN 467. Prerequisites: 303, 322, and one additional 300-level course beyond 303, or permission of instructor.

SPAN 468 Latin American Women (5) Issues in women's culture from various Latin American countries, social classes, ethnic groups. Includes female creativity, relationship between female artists and the male tradition, women's exploitation of women, relationship of middle-class to popular feminism, connections between feminism and social change. Joint with WOMEN 468. Prerequisites: 303, 322, and one additional 300-level course beyond 303.

SPAN 473 Latin American Fiction: Nineteenth Century (5, max. 15) Study of prose fiction in Latin America in the nineteenth century. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 474 Latin American Fiction: Twentieth Century (5) Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 475 Latin American Poetry: Colonial Through Nineteenth Century (5) Poetic movements of the seventeenth, eighteenth, and nineteenth centuries in Spanish American, Renaissance, baroque, neoclassicism, romanticism, and modernism. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 476 Contemporary Latin American Poetry (5) Evolution of Latin American poetry, from postmodernism and vanguardism to the most recent poetic expression. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 477 Latin American Essay (5) Literary expression of ideas in Latin American countries, nineteenth and twentieth centuries. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 478 Modern Latin American Theater (5) Study of the origin, development, and achievements of Latin American theater with an overview of its history prior to the twentieth century. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 480 Spanish Medieval Literature (5) Principal literary works of the Spanish Middle Ages in the context of evolving intellectual, spiritual, and artistic climates of the period. Covers the evolution of narrative and lyric prose and verse in both their traditional and learned manifestations. Prerequisites: 303, 321, and one additional 300-level course beyond 303. (Formerly 410.)

SPAN 481 Sixteenth-Seventeenth Century Spanish Literature (5) Spanish literature of the sixteenth and seventeenth centuries. Close study of key texts from all genres as well as their socio-historical contexts. Prerequisites: 303, 321, and one additional 300-level course beyond 303. (Formerly 412.)

SPAN 482 Eighteenth-Twentieth Century Spanish Literature (5) Survey of Spanish literature since 1700, and its historical context. Prerequisites: 303, 321, and one additional 300-level course beyond 303. (Formerly 414.)

SPAN 483 Latin American Literature: Origins to Independence (5) Principal literary movements of Latin America, fifteenth through nineteenth centuries: native American cultures, chronicles of the Spanish conquest and resistance, colonial Baroque, Independence movement, romanticism and naturalism. Includes the definition of genres and of American cultural identity within a dependent context. Prerequisites: 303, 321, and one additional 300-level course beyond 303. (Formerly 470.)

SPAN 484 Latin American Literature: Modernism to the Present (5) Principal literary movements of Latin America, late nineteenth century to the present, with particular emphasis on poetry and narrative: *modernismo*, *postmodernismo*, the vanguard, *nueva and novísima narrativa*. Includes essays and autobiographical writings to help place the literary works in socio-historical perspective. Prerequisites: 303, 321, and one additional 300-level course beyond 303. (Formerly 472.)

SPAN 490 Honors Seminar (2-5, max. 10) AWSp Special studies in Spanish literature. Required of candidates for Honors and Distinction in Spanish. Open to others by permission of Spanish honors adviser.

SPAN 491 Individual Authors and Special Topics in Spanish Literature (5, max. 10) Focus on an individual Spanish author or a special problem in Spanish literature. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 493 Foreign Study (2-10, max. 20) Advanced study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisites: 303, 321, and one 300-level course above 303.

SPAN 495 Study in Spain (12) Anderson One-quarter study group in Spain. Course content varies from year to year. Consult the Department of Romance Languages and Literature for availability and further requirements.

SPAN 499 Special Topics (1-5, max. 10) Topics to meet special needs. Prerequisites: permission of instructor and undergraduate adviser or graduate program coordinator.

ENGLISH TRANSLATION

These courses are recommended as appropriate supporting studies for students majoring in other departments. Courses in English translation are not applicable toward undergraduate or graduate major programs in the Department of Romance Languages and Literature. Majors may take any of these courses for credit as one of their electives.

French

FREN 458 French Art and Literature: Period Studies (5) Comparative studies of theme and technique in art and literature to illustrate major concerns of a particular period as expressed in these two media. Prerequisite: background in French literature or art history (the appropriate 300-level course in art history or the appropriate 400-level survey course in French literature).

FREN 481 Twentieth-Century French Novel in English (5)

FREN 482 French Poetry From Baudelaire to the Present in English (5) Analysis in English of the major trends and movements in modern French poetry with representative works, from Baudelaire to the poets of the 1950s.

FREN 483 Trends in Twentieth-Century Theatre in English (5) Study of the evolution of the French theatre from the turn of the century to the present. Special emphasis is given the French theatrical scene since World War II.

FREN 484 Rabelais and Montaigne in English (5) Reading and discussion of selected passages from the works of Rabelais and the essays of Montaigne. Background information through informal lectures and outside reading on the two figures as illustrative of the Renaissance in France.

FREN 485 Racine and Molière in English (5) Wortley

FREN 486 Literature of the Enlightenment in English (5)

FREN 487 Nineteenth-Century Fiction in English (5)

FREN 488 Women in French Literature in English (5) Masterpieces of French literature are read in an attempt to understand French attitudes toward women. From the sixteenth century, with a concentration on the twentieth century.

Italian

ITAL 318 Italian Literature in English (5)

ITAL 319 The Italian Short Story in English (5) The short story from the *Novellino* and Boccaccio to modern masters of the form. The translations are studied both as examples of narrative technique and as reflections of particular moments in Italian cultural history. Prerequisite: at least sophomore standing.

ITAL 384 Renaissance Literature of Italy in English (3)

ITAL 481 The Divine Comedy in English (5) Studies of Dante's *Divine Comedy* in English translation, with consideration of its background and influence.

ITAL 482 The Decameron in English (5) An integral reading of the *Decameron*, with some consideration of its place in world literature and as an expression of the culture of its time. Prerequisite: upper-division standing.

Spanish

SPAN 317 Spanish Masterworks in English Translation (5) Spanish literary masterpieces of the twelfth to sixteenth centuries, in English translation, with consideration of their background and influence.

SPAN 318 Spanish Masterworks in English Translation (5) Spanish literary masterpieces of the seventeenth to twentieth centuries, in English translation, with consideration of their background and influence.

SPAN 320 Contemporary Latin American Literature in English Translation (3) Flores, Steele Selected texts of contemporary Latin American literature, including examples of magical realism, the New Novel, and Central American poetry, in their sociohistorical context.

SPAN 339 Women Writers in English Translation (3) Feminist analysis of selected contemporary texts in English or English translation by Chicana/Latina writers in the United States; or by Spanish-American, Luso-Brazilian and/or Spanish women writers, in their specific socio-historical context. Joint with WOMEN 339.

SPAN 353 Cervantes' *Don Quixote* in English (5) *Shipley* Cervantes' *Don Quixote de la Mancha*: close study of this comic masterpiece, and the life, times, and works of its author. Consideration of the work's enduring influence and vitality.

Scandinavian Languages and Literature

318 Raitt

The Department of Scandinavian Languages and Literature is concerned with the study of languages, literatures, history, politics, and cultures of Denmark, Iceland, Norway, and Sweden. Emphasis is placed both on contemporary literature and culture and on their historical development. Although most courses designed for majors are taught in the original languages, a broad spectrum of courses designed primarily for nonmajors is offered in English.

Undergraduate Program

Lars Warne, Adviser
305Z Raitt

Bachelor of Arts Degree

Major Requirements—Danish, Norwegian, or Swedish: At least 60 credits, of which 30 are in upper-division courses. The 60 credits include 30 credits in first-, second-, and third-year training in the chosen Scandinavian language, three literature courses in the chosen language, one course in Scandinavian history, a course in history of Scandinavian languages, a course in Scandinavian literature in translation, and a senior essay.

Major Requirements—Scandinavian Area Studies: 60 credits, of which 30 are in upper-division courses. The 60 credits include 30 credits in the chosen Scandinavian language (normally first and second year), a minimum of one course from each of four area studies fields (Scandinavian folklore and popular culture, literature, history, society and politics), and a senior essay.

Graduate Program

Terje I. Leiren, Graduate Program Coordinator
Henning Sehmsdorf, Alternate

The Department of Scandinavian Languages and Literature offers graduate programs of study leading to the Master of Arts and Doctor of Philosophy degrees. For the M.A. degree, the emphasis may be placed on Old Icelandic (Old Norse), Danish, Norwegian, Swedish, or Scandinavian area studies. Each aspirant for the Ph.D. degree must complete one year's study of Old Icelandic and concentrate his or her studies primarily within one of four areas: Danish language and literature, Norwegian language and literature, Swedish language and literature, or Scandinavian philology and linguistics.

For the graduate student, the programs in Scandinavian languages and literature open several interesting areas of study: medieval, with extensive study of Old

Scandinavian languages and literature, particularly Old Icelandic; modern, including (1) the eighteenth century, represented by writers such as Holberg and Bellman; (2) romanticism; (3) Ibsen, Strindberg, and their contemporaries; and (4) the twentieth century, represented by such figures as Dinesen, Hamsun, and Lagerkvist. Major attention is paid to the history of the Scandinavian languages, prose fiction, drama, and poetry. Opportunities for supervised study and specialization also exist in such areas as Scandinavian cinema, history, politics, mythology, and folklore. There are also opportunities for comparative literature study.

Master of Arts Degree

For the M.A. degree, two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

1. An emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of the methods of philology and literary history, theory and analysis, plus study of one secondary area.

2. An emphasis on Scandinavian area studies includes the study of Scandinavian cinema, folklore, mythology, history, politics, and society, with an emphasis in one of these areas.

Admission Requirement: Bachelor of Arts degree with major in Danish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background.

Graduation Requirements: Minimum of 36 credits in courses or seminars in Scandinavian and related subjects approved by the department, of which at least 20 credits must be in courses numbered 500 and above; reading knowledge of French or German (another non-Scandinavian language may be substituted with faculty approval); written and oral examination; option between thesis and nonthesis program. Candidates in Scandinavian languages and literature must satisfy the departmental requirements in Old Icelandic.

Doctor of Philosophy Degree

For the Ph.D. degree, the student concentrates primarily on one of two areas: Scandinavian languages and literature or Scandinavian philology and linguistics, with an emphasis on the student's chosen target language. Major attention is given to the history of the Scandinavian languages, literary theory and genre study, and Scandinavian literary history. Opportunities for graduate work also exist in such areas as Scandinavian cinema, history, politics, mythology, and folklore.

Admission Requirement: Master of Arts degree with major in Scandinavian languages and literature or equivalent background.

Graduation Requirements: 36 credits beyond the master's degree in courses or seminars in Scandinavian languages and literature and related subjects approved by the department; one year's study of Old Icelandic; a reading knowledge of French and German (other non-Scandinavian languages may be substituted with faculty approval); General Examination for admission to candidacy; 27 credits of SCAND 800 (Dissertation) taken over at least three quarters and a Final Examination on the dissertation.

Financial Aid

Teaching assistantships in Danish, Norwegian, and Swedish are available, as well as occasional research assistantships.

SCAND 590 Special Topics in Scandinavian Literature (1-5, max. 12) AWSp

SCAND 600 Independent Study or Research (*) AWSp

SCAND 700 Master's Thesis (*) AWSp

SCAND 800 Doctoral Dissertation (*)

Slavic Languages and Literature

M253 Smith

The Department of Slavic Languages and Literature offers instruction in the principal eastern European languages and literatures and in Slavic linguistics, working closely with the School of International Studies. Languages include Bulgarian, Czech, Polish, Romanian, Russian, Serbo-Croatian, and Ukrainian.

Undergraduate Program

Adviser
Gretchen Kaapcke
M253 Smith

The Department of Slavic Languages and Literature offers undergraduate courses in Russian and other Slavic and East European languages and literatures. The courses are designed both for majors planning careers as language and literature specialists in teaching, translation, government service, the media, or business, and for all students wishing to acquire a knowledge of Slavic and East European parts of the world, as it relates to their major field, their ethnic heritage, or as a part of their general education.

The department sponsors the Russian House, where students are provided with an opportunity to enhance their knowledge of Russian in a Russian-speaking environment.

Bachelor of Arts Degree

RUSSIAN LANGUAGE AND LINGUISTICS OPTION

Major Requirements: RUSS 301, 302, 303, or the equivalent; RUSS 401, 402, 403, or the equivalent; RUSS 321, 322, 323; RUSS 451, 452; 5 credits from approved electives within the department.

RUSSIAN LANGUAGE AND LITERATURE OPTION

Major Requirements: RUSS 301, 302, 303, or the equivalent; RUSS 401, 402, 403, or the equivalent; RUSS 321, 322, 323; RUSS 461, 463; 5 credits from approved electives within the department.

RUSSIAN LANGUAGE AND HISTORY OPTION

Major Requirements: RUSS 301, 302, 303, or the equivalent; RUSS 401, 402, 403, or the equivalent; RUSS 321, 322, 323; HIST 443, HIST 444, 445.

EAST EUROPEAN LANGUAGES OPTION

Major Requirements: Two years of a principal eastern European language, or the equivalent; one year of an additional eastern European language or RUSS 201, 202, 203, or the equivalent; course work in the literatures of the cultures involved, and in Slavic philology; senior research project.

Graduate Program

The Department of Slavic Languages and Literature offers a complete program of courses and seminars leading to the Master of Arts and Doctor of Philosophy degrees in Russian and East European literatures or Slavic linguistics with a strong component of advanced language study. Languages taught in the department include Bulgarian, Czech, Old Church Slavonic, Polish, Romanian, Russian, Serbo-Croatian, and Ukrainian.

The graduate program is organized to permit completion of the master's degree in four or five quarters and the doctoral degree in three additional years. The duration of each program, however, will depend on the extent of the student's preparation upon entrance into the program.

Research Facilities

The Suzzallo Library holdings include some two hundred thousand titles in the languages of eastern Europe. While the majority of these titles are in Russian, the collection is well provided with resources in Bulgarian, Czech, Hungarian, Polish, Romanian, and Serbo-Croatian languages and literatures.

Admission Qualifications

For the Master of Arts program: Bachelor of Arts degree with major in Russian or eastern European languages and literatures or equivalent background.

For the Doctor of Philosophy program: Master of Arts degree with major in a Slavic literature or linguistics.

Assistantship Opportunities

The department regularly offers a number of teaching assistantships. In conjunction with the Henry M. Jackson School of International Studies, students in the department are eligible for several other types of fellowships.

Kapetanac, Davor,* 1972, (International Studies);† M.A., 1954, D.Sc., 1972, Zagreb (Yugoslavia); Serbo-Croatian language and Yugoslav literature, Slavic literary theory.

Micklesen, Lew R.,* 1953, (Linguistics), (International Studies);† Ph.D., 1951, Harvard; Slavic linguistics.

Associate Professors

Coats, Herbert S.,* 1968, (Linguistics), (International Studies);† M.A., 1964, Fordham; Ph.D., 1970, Illinois; Slavic linguistics, Russian phonology, Russian syntax, Slavic accentuation.

Gribanovsky, Paul V., 1960, (Emeritus), M.A., 1965, Ph.D., 1968, Washington; Russian language and literature.

Konick, Willis A.,* 1961, (Comparative Literature, International Studies);† M.A., 1954, Ph.D., 1964, Washington; Russian literature.

Kramer, Karl D., * 1970, (Comparative Literature, International Studies), † M.A., 1957, Ph.D., 1964, Washington; Russian literature.

Swayze, E. Harold, * 1963, (Emeritus), (International Studies), † M.A., 1954, Ph.D., 1959, Harvard; Soviet Russian literature.

West, James D., * 1972, (International Studies), † M.A., 1969, Ph.D., 1970, Cambridge (England); modern Russian literature.

Assistant Professor

Diment, Galya, * 1989, M.A., 1978, Claremont Graduate School; Ph.D., 1987, California (Berkeley); modern Russian literature.

Senior Lecturers

Gross, Vladimir, 1959, M.A., 1965, Washington; Russian language.

Holdsworth, Nora G., 1965, B.A., 1965, Washington; Russian language.

Polack, Zoya M., 1975, M.A., 1975, Washington; Russian and Ukrainian languages.

Course Descriptions

Courses for Undergraduates

LANGUAGE COURSES

Bulgarian

BULGR 401, 402, 403 Elementary Bulgarian (5,5,5) A,W,Sp 401, 402: introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. 403: reading of modern texts to increase command of grammar and vocabulary.

BULGR 404, 405, 406 Advanced Bulgarian (5,5,5) A,W,Sp Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisites: 403 for 404; 404 for 405; 405 for 406; or permission of instructor.

Czech

CZECH 401, 402, 403 Elementary Czech (5,5,5) A,W,Sp 401, 402: introduction to spoken and written Czech. 403: modern Czech prose, leading to a command of the language as a research tool and providing an adequate basis for further study.

CZECH 404, 405, 406 Advanced Czech (5,5,5) A,W,Sp Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisites: 403 for 404; 404 for 405; 405 for 406; or permission of instructor.

Polish

POLSH 401, 402, 403 Elementary Polish (5,5,5) A,W,Sp 401, 402: Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. 403: designed to enlarge general vocabulary by the reading of short texts selected from Polish authors of the nineteenth and twentieth centuries.

POLSH 404, 405, 406 Advanced Polish (5,5,5) A,W,Sp Continuation of 401, 402, 403. Selected readings of the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisites: 403 for 404; 404 for 405; 405 for 406; or permission of instructor.

Romanian

ROMN 401, 402, 403 Elementary Romanian (5,5,5) A,W,Sp 401, 402: comprehensive introduction to spoken and literary Romanian. 403: designed to increase vocabulary and enhance knowledge of grammar through readings in modern Romanian. Joint with RMN 401, 402, 403.

ROMN 404, 405, 406 Advanced Romanian (5,5,5) A,W,Sp Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Joint with RMN 404, 405, 406. Prerequisites: 403 for 404; 404 for 405; 405 for 406; or permission of instructor.

Russian

Undergraduate Russian language sequences: (A) RUSS 101 (5), 102 (5), 103 (5), 201 (5), 202 (5), 203 (5), 301 (5), 302 (5), 303 (5), 401 (5), 402 (5), 403 (5); (B) RUSS 150 (15), 250 (15), 350 (15), 450 (15).

Credit is not allowed for overlapping courses in two sequences (e.g., a student may receive a maximum of 15 credits for 101, 102, 103, and 150). Credit is allowed for courses in different sequences, though, if the courses are taken in progressively more advanced order (e.g., 150 followed by 201).

RUSS 101, 102 First-Year Russian (5,5) A,W Introduction to Russian. Emphasis on oral communication with limited vocabulary. Basic grammar; some reading. Conducted in Russian except for periodic lectures on pronunciation, grammar, and writing. See credit note preceding 101, 102.

RUSS 103 First-Year Russian (5) Sp Continued extensive oral practice with short readings and compositions. Prerequisite: 102 or 110 or permission of instructor. See credit note preceding 101, 102.

RUSS 150 Intensive First-Year Russian (15) S Covers material of 101, 102, 103 in one quarter. For students who want to acquire rapidly a considerable proficiency. Meets three to four hours daily. For continuation, see 250 or 201, 202, 203. See credit note preceding 101, 102.

RUSS 201, 202, 203 Second-Year Russian (5,5,5) A,W,Sp Complete review of Russian grammar with continuing oral practice and elementary composition. Prerequisites: 150 or 103 or permission of instructor for 201; 201 or 115 or permission of instructor for 202; 202 or permission of instructor for 203. See credit note preceding 101, 102.

RUSS 221, 222, 223 Russian for Reading and Research (5,5,5) A,W,Sp Provides students with no previous knowledge of Russian the essentials of grammar needed to read expository prose. 223: students assigned readings based on interests. Aural-oral and writing skills receive some attention.

RUSS 250 Intensive Second-Year Russian (15) S Continuation of 150. For Summer Quarter students who wish to complete a second 15 credits of Russian. Prerequisite: 150, 103, or permission of instructor. See credit note preceding 101, 102.

RUSS 301, 302, 303 Intermediate Russian (5,5,5) A,W,Sp Extensive practice in spoken and written Russian based on prose readings. Intensive review and supplementation of strategic grammatical concepts. One hour of grammar per week conducted in Russian and English, four hours per week of conversation in Russian. Prerequisite: 203, 210 or 250 or permission of instructor. See credit note preceding 101, 102.

RUSS 304 Reading and Translation (1, max. 3) Translation techniques with emphasis on development of vocabulary and reading skills. Primarily for Russian regional studies majors. Prerequisite: 203 or 210 or permission of instructor.

RUSS 350 Intensive Third-Year Russian (15) S Covers 301, 302, 303 in one quarter. For those desiring intensive review and supplementation of structural knowledge of Russian. Prerequisite: 210, 250, or 203, or permission of instructor. See credit note preceding 101, 102.

RUSS 351 Intermediate Russian Phonetics (3) A Systematic study of the Russian sound system, including phonetic transcription and intonational patterns. Instruction in correcting individual pronunciation errors. Conducted partly in Russian. Prerequisite: 203, 210, or 250.

RUSS 352 Intermediate Russian Morphology (3) W Examination of Russian morphology with emphasis on topics that help to prepare the student for advanced courses in Russian. Conducted partly in Russian. Prerequisite: 203, 210, or 250.

RUSS 381 Phonetics in Leningrad (2, max. 6) AWSps Systematic analysis of the Russian sound system as well as intonational patterns. Practical reading exercises. Special attention to correcting individual pronunciation errors. (2 credits for Summer Quarter program, 5 credits for semester program.) Prerequisite: 203 for Summer Quarter, 303 for semester.

RUSS 382 Advanced Syntax and Composition in Leningrad (2, max. 6) AWSps Class lectures on Russian syntactic structures. Oral drilling and written exercises and compositions. (2 credits are offered for the six-week Summer Quarter program, 5 credits for the fourteen-week semester program.) Prerequisite: 203 for Summer Quarter, 303 for semester.

RUSS 383 Conversation in Leningrad (4, max. 12) AWSps Designed to increase active vocabulary, to further the student's control of idiomatic Russian, and to develop oral skills. (4 credits are offered for the six-week Summer Quarter program, 8 credits for the fourteen-week semester program.) Prerequisite: 203 for Summer Quarter, 303 for semester.

RUSS 384 Soviet Culture in Leningrad (4, max. 12) AWSps Lectures on education, history, economics, law, the arts, ethnography, architecture; complemented by visits to places of cultural and historical interest and meetings with Soviet groups. 4 credits for summer program, 6 for semester program. Prerequisite: 203 for Summer Quarter, 303 for semester.

RUSS 401, 402, 403 Advanced Russian (5,5,5) A,W,Sp Class conversation and composition based on reading. Prerequisites: 303 for 401; 401 for 402; 402 for 403; or permission of instructor. See credit note preceding 101, 102.

RUSS 404 Russian Literary Translation (5) Intensive practical work in the translation of Russian literary texts. Specific problems associated with the translation of particular kinds of texts. Prerequisite: 303 or 350.

RUSS 450 Intensive Fourth-Year Russian (15) S Intensive practice in conversation, composition, and reading. Equivalent to 401, 402, 403. Prerequisite: 303, 350, or permission of instructor. See credit note preceding 101, 102.

RUSS 451, 452 Structure of Russian (5,5) A,W Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and elementary principles of syntax. Prerequisites: 303 or equivalent for 451; 451 for 452; or permission of instructor.

RUSS 461, 463 Introduction to Russian Literature in Russian (5,5) Analysis of original Russian literary texts representative of different varieties of Russian writing. Vocabulary of Russian literary analysis; typically Russian approaches to literature, some readings of secondary critical texts; discussion in Russian of passages studied. Prerequisite: four years of Russian or three years with current enrollment in fourth year.

RUSS 481 Russian Language in Leningrad (15) Daily work in phonetics, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 482 Research Project in Leningrad (12) Supervised research in student's selected area of concentration, combined with language instruction tailored to the student's field. Successful completion of course requires a 15-page term paper in Russian. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 483 Russian and Soviet Literature in Leningrad (5, max. 10) Selection of courses on specialized topics in Russian and Soviet literature; specific authors or periods. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 484 Russian and Soviet History in Leningrad (5, max. 10) Selection of courses on specialized topics in Russian and Soviet political, economic, social, cultural, or art history. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 485 Economics in Leningrad (5, max. 10) Selection of courses on topics relating to socialist economics and world economic issues. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 489 Directed Study or Research (1-5, max. 15) Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literature office. Prerequisite: permission of instructor and undergraduate adviser.

Serbo-Croatian

SER C 401, 402, 403 Elementary Serbo-Croatian (5,5,5) A,W,Sp 401, 402: comprehensive introduction to spoken and written literary Serbo-Croatian. 403: designed to increase vocabulary and enhance knowledge of grammar through the reading of short stories in the modern literary idiom.

SER C 404, 405, 406 Advanced Serbo-Croatian (5,5,5) A,W,Sp Continuation of 401, 402, 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns. Prerequisites: 403 for 404; 404 for 405; 405 for 406, or permission of instructor.

Slavic

SLAV 351 History of the Slavic Languages (5) Sp External and internal history of Slavic literary languages from the beginnings to the present time, including the development of writing systems, external attempts at reform, and the development of vocabulary.

SLAV 499 Directed Study or Research (1-5, max. 15) Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literature office. Prerequisite: permission of instructor and undergraduate adviser.

Ukrainian

UKR 401, 402, 403 Elementary Ukrainian (5,5,5) Introduction to spoken and written Ukrainian.

LITERATURE COURSES IN ENGLISH

Courses in this section usually do not require prerequisites. The 300-level courses generally deal with particular themes running through a body of literature or involve a comprehensive study of cultural history. The 400-level courses deal with Slavic literatures other than Russian or specific authors and periods in Russian literature. Both levels are primarily for juniors and seniors, but are open to freshmen and sophomores with an interest or background in the subject of the course.

Czech

CZECH 420 Modern Czech Literature in English (5) Representative works of Czech literature from the 1920s to the present in the context of earlier Czech and general European literary trends. Emphasis on prose and drama of major writers, including Hasek, Capek, Vancura; Skvorecky, Kundera, Vaculik, and Havel.

Polish

POLSH 420 Modern Polish Literature in English (5) Representative works by leading twentieth-century Polish writers. Presents modern Polish literature in a European context, stressing parallels in philosophy and art. Shows originality of Polish literature through acquaintance with the peculiar historical and political situation of twentieth-century Poland.

Russian

RUSS 321 Russian Literature and Culture to 1700 (5) A Literature as an element in Russian culture. Art, architecture, music, philosophy, and popular culture also treated. Periods covered include monumental simplicity, ornamentalism, Renaissance, Reformation, and baroque.

RUSS 322 Russian Literature and Culture 1700-1900 (5) W Literature as an element in Russian culture. Art, architecture, music, and philosophy also treated. Periods covered include the age of Peter the Great, romanticism, realism, and impressionism.

RUSS 323 Russian Literature and Culture of the Twentieth Century (5) Sp Literature as an element in modern Russian culture. Art, architecture, and music also treated. Periods covered include symbolism, revolution, postrevolution, Stalinist, the "thaw," and contemporary.

RUSS 324 Russian Folk Literature in English (5) Russian popular tradition, including paganism and its survival into modern times. Genres of the oral tradition, including the folktale, the epic, spiritual and historical songs, and legends. Special attention to modern theories and western European analogues.

RUSS 421 Russian Literature of the Soviet Period in English (5) Major Russian authors of the twentieth century. Selections from the works of Blok, Mayakovsky, Akhmatova, Babel, Pasternak, Solzhenitsyn, and others.

RUSS 422 Russian Literature in Emigration and Exile (5) Examines writers who have left the Soviet Union since the 1950s or who, though they reside in the USSR, publish through unofficial channels. Discussion of Akseyonov, Siniavsky, Voinovich, Zinoviev, and others.

RUSS 423 Russian Film and Fiction (5) Thematic and structural interrelationships of narrative in film and fiction in post-revolutionary Russia. Analysis of the work of film directors Eisenstein, Pudovkin, and Vertov and authors Bely, Pilnak, Zamyatin, Fedin, A. Tolstoy, Pasternak, and Solzhenitsyn.

RUSS 424 Songs and Singers of Soviet Underground (3) Works of major and lesser figures in the Soviet dissident song-poetry movement of the 1960s and 1970s. Vyotski, Galich, Okudzhava, Dol'ski, and Kim are among those discussed.

RUSS 426 Pushkin, Gogol, Turgenev in English (5) A Konick Selections include *Eugene Onegin* and *The Queen of Spades* by Pushkin, *Dead Souls* by Gogol, *Fathers and Sons* by Turgenev, and works of one or two of their contemporaries.

RUSS 427 Tolstoy in English (5) W Konick, Kramer *War and Peace* and *Anna Karenina*, particularly.

RUSS 428 Dostoevsky in English (5) Sp Konick *The Possessed* and *The Brothers Karamazov*, among others.

RUSS 429 Chekhov in English (5) Kramer Short stories and plays, as well as works of one or two of Chekhov's contemporaries.

RUSS 490 Studies in Russian Literature (3-5, max. 15) In either Russian or English. Topics vary.

Serbo-Croatian

SER C 420 Yugoslav Literature in Its European Context in English (5) Kapetanik Chief works of Yugoslav literature, in English translation. Yugoslav modifications of Renaissance genres as the comedy and pastoral drama; Yugoslav folk poetry and its impact on romantic movement in Europe; Yugoslav participation in general European movements of nineteenth and twentieth centuries; Yugoslav literature in the postwar period and its original and influential position in eastern Europe.

Courses for Graduates Only

Russian

RUSS 501 Russian Language for Graduate Students (2, max. 10) AWSp Develops skills of particular use to graduate students and students seeking employment using Russian language. Emphasis on rapid assimilation of a variety of written materials with sophisticated understanding and maximum retention of vocabulary, and an ability to discuss in Russian the more theoretical and abstract kinds of material. Prerequisites: 403 or equivalent.

RUSS 502 Russian Translation (3) Introduction to the theory of translation; translation to and from Russian of selected prose passages in a variety of styles, with emphasis on idiomatic accuracy and stylistic compatibility. Prerequisite: four quarters of 501, or the equivalent established by a diagnostic test.

RUSS 512 Russian Literary Criticism (3) A study of critical positions, problems, and literary values of major Russian literary critics from Belinski to the present.

RUSS 520 Seminar in Russian Poetry (5) Topics in Russian poetry and poetry criticism to be selected by the instructor and students. Some emphasis on recent theoretical approaches to poetry criticism that are current in the USSR and eastern Europe. For advanced M.A. and Ph.D. students.

RUSS 522 Russian Literature, 1800-1840 (5) Russian poetry and prose in the period 1800-1840. Readings cover prose from Karamzin to early Gogol, poetry from Zhukovsky to Lermontov with special emphasis on Pushkin.

RUSS 524 Russian Literature, 1840-90 (5) Russian poetry and prose in the period 1840 to 1890. Short prose works and excerpts from longer works, by Gogol, Turgenev, Leskov, Saltykov-Shchedrin, Pisemsky, Uspensky, Goncharov, and Dostoevsky; poetry by Tyutchev, Fet, and Nekrasov; plays by Gogol and Ostrovsky; and excerpted contemporary critical writings.

RUSS 525 Russian Literature, 1890-1917 (5) Survey of major trends in Russian literature around the turn of the twentieth century, based on texts and critical readings in Russian. Includes both the prose and the poetry of realists of the late nineteenth century, symbolists, acemists, and futurists.

RUSS 527 Seminar in Nineteenth-Century Russian Poetry (5) Selected topics in nineteenth-century Russian poetry to be investigated in depth and with some critical sophistication. For Ph.D. and advanced M.A. students.

RUSS 528 Seminar in Nineteenth-Century Russian Prose (5) Topic course devoted to one specific problem or theme in nineteenth-century Russian prose literature, seen in its widest possible dimensions. Students must read, in Russian, the literary works involved and become familiar with the social, historical, and philosophical backgrounds that inspired them.

RUSS 529 Seminar in Early Twentieth-Century Russian Literature (5) One specific problem or theme in twentieth-century Russian poetry and prose, seen in the widest possible dimensions. Students must read, in Russian, the literary works involved and become familiar with the social, historical, and philosophical backgrounds that inspire them.

RUSS 532 Pushkin (5) Reading, in Russian, of the major works of Alexander Pushkin and important critical works on him, and discussion of them in depth. Strongly recommended: 522.

RUSS 533 Chekhov (5) Detailed analysis of the plays and short stories of Anton Chekhov in Russian.

RUSS 534 Dostoevsky (5) Analysis of the works of Fyodor Dostoevsky in Russian.

RUSS 535 Tolstoy (5) Close analysis of one or two works by L. Tolstoy in Russian.

RUSS 541 Russian Literature, 1917 to Present (5) Study of Russian poetry and prose since 1917. From Blok and Plinyak to contemporary Soviet and Russian émigré authors.

RUSS 542 Seminar in Contemporary Russian Poetry (5) One specific problem or theme in contemporary Russian poetry, seen in its widest possible dimensions. Students must read, in Russian, the literary works involved and become familiar with the social, historical, and philosophical backgrounds that inspire them.

RUSS 543 Seminar in Contemporary Russian Prose (5) Analysis of Russian prose fiction of the post-1917 period. Selected authors and topics.

RUSS 550 Advanced Russian Morphophonology (3) Study of Russian phonological and morphological data, with detailed discussion and evaluation of methods of incorporating these data in scientific grammars. Prerequisite: 452.

RUSS 551 Advanced Russian Syntax (3) Presentation and structural analysis of various simple and complex sentence types in the Russian literary language and an evaluation of ways in which these structures may be described in formal grammars. Prerequisite: 550.

RUSS 554 History of the Russian Literary Language (5) Russian literary language from the eleventh through the twentieth centuries, with special attention to syntax and lexicon and to the development of notions of literary styles. Offered in Russian. Prerequisites: 555 or SLAV 555, or permission of instructor.

RUSS 555 History of the Russian Language (4) Brief review of the development of Russian from Indo-European to late Common Slavic, followed by a detailed account of grammatical and lexical developments of literary Russian from the earliest documents to the present. Prerequisite: SLAV 550 or permission of instructor.

RUSS 556 Readings in the History of the Russian Language (4) Reading, translation, and detailed grammatical analysis of selected texts from various literary genres and periods in the development of the Russian literary language. Prerequisite: 555.

RUSS 565 Russian Eighteenth-Century Literature (5) Discussion of representative works of poetry, prose, fiction, and criticism in the eighteenth century.

RUSS 574 Russian Literature to 1800 (5) Representative works of East Slavic, Muscovite, and Russian literature from the beginnings to 1800. Studies include a varied selection of primary texts. Intended as an introduction to the study of modern literature for beginning graduate students in Russian literature.

RUSS 575 Kievan Literature (5) Analysis of representative works of prose and poetry of Kievan Rus' from the beginnings to the end of the fourteenth century.

RUSS 576 Muscovite Literature (5) Analysis of representative works of prose and poetry of the Muscovite period from the end of the fourteenth century to the reign of Peter I.

RUSS 577 Russian Folk Literature (5) Analysis of representative works of the various genres of folk literature, including the *byliny*, *skazki*, historical and lyrical songs, and the spiritual *stikh*.

RUSS 578 Studies in Kievan Literature (4) Field course for students with a specialization in Kievan literature. Work with primary sources, textual tradition, and bibliography.

RUSS 579 Studies in Muscovite Literature (4) Field course for students with a specialization in Muscovite literature. Work with primary sources, textual tradition, and bibliography.

RUSS 588 Introduction to Literary Analysis (2) Russian literature, covering bibliographic materials, major critical problems, terms, schools, and genres.

RUSS 600 Independent Study or Research (*)

Slavic

SLAV 520 Slavic Literary Theory (3) Main works of the Russian, Czechoslovakian, and Polish theorists of the twentieth century, with special emphasis on formalist, structural, and semiotic schools.

SLAV 550 Historical Survey of Common Slavic (5) Slavic languages and their geographical and dialectal distribution; Slavic civilization throughout prehistoric and early historic periods; principal phonological and morphological features of Slavic as a subgroup of the Indo-European family of languages.

SLAV 552 History of the East Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the Ukrainian and Byelorussian literary languages. Prerequisite: 550 or permission of instructor.

SLAV 553 History of the West Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of literary Polish, Czech, Slovak, and Upper and Lower Sorbian languages. Prerequisite: 550 or permission of instructor.

SLAV 554 History of the South Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the South Slavic languages. Prerequisite: 550.

SLAV 555 Old Church Slavonic (4) Rise and development of earliest Slavic literary language and a descriptive study of its orthography, phonology, morphology, and syntax. Readings from normalized texts.

SLAV 556 Readings in Old Church Slavonic (4) Reading and grammatical interpretation of a selected group of canonical texts, as well as some examples of the various later recensions of Old Church Slavonic. Prerequisite: 555.

SLAV 557 Seminar on Slavic Linguistics (3) Investigation and discussion of special topics in Slavic linguistics. May be repeated for credit.

Society and Justice

203 Smith

A multi-disciplinary approach to the study of criminal behavior and the criminal justice process in American society. Students select from a wide range of course offerings and are provided with research and field experience opportunities.

Undergraduate Program

Bachelor of Arts Degree

Admission Requirements: One course from SOC 271, 371, or PSYCH 305; SOC 372; one research methods or statistics course; one writing (W) course; minimum 2.00 cumulative grade-point average, and minimum 2.50 grade-point average for courses taken to satisfy the above requirements. Admission is competitive, based on the following: grade-point average, with emphasis on grades received in courses required for admission (applicants accepted normally present cumulative grade-point averages considerably above a 2.50); personal statement representing the student's interest in and commitment to the study of society and justice; other evidence of a commitment to becoming a society and justice major. Admission is once a quarter (Autumn, Winter, Spring); application deadline is the first Friday of the admission quarter. Admission decisions are made by the end of the fifth week of the quarter.

Major Requirements: 320, 400, 405, 430, 473, 440; two research methods courses; SOC 271, 371, 372, PSYCH 305, POL S 360. Consult departmental adviser for additional requirements, currently under review.

Lecturers

Bock, R. Stewart, 1983, J.D., 1970, Oregon; criminal law.

Browne, John H., 1980, J.D., 1971, American University; criminal law.

Ehlert, Charles E., 1981, LL.B., 1963, Illinois; white-collar crime investigation.

Redkey, William H., 1981, J.D., 1977, Puget Sound; organized-crime investigation.

Schram, Donna, 1976, Ph.D., 1970, Washington; criminal justice.

Smith, Dale E., 1985, Ph.D., 1977, Florida; corrections.

Smith, David H., 1975, Ph.D., 1973, Washington; police.

Stotland, Ezra,* 1957, (Emeritus), M.A., 1949, Ph.D., 1953, Michigan; criminal justice.

Walsh, Marilyn E., 1982, M.A., 1970, Ph.D., 1974, State University of New York (Albany); organized crime.

Course Descriptions

Courses for Undergraduates

SO JU 310 Research in Society and Justice (1-5, Max. 15) AWSp Supervised introductory individual and/or seminar based research on some aspect of society and justice. Prerequisite: major standing.

SO JU 320- Field Experience in Society and Justice (5-) Participant observation in some public or private agency relevant to the system of justice. Prerequisite: major standing.

SO JU 400 Seminar in Society and Justice (3, max. 6) Aspects of the administration of justice. Prerequisite: major standing.

SO JU 405 Introduction to Organized and White Collar Crime (3) A Walsh Overview of organized and white collar crime. Exposure to definitional problems, distinctive characteristics, potential areas of overlap, and barriers to more effective social control. Addresses impediments resulting from inadequate conceptualizations, legal and operational difficulties in pursuing offenders, and effects of corruption and discretion in the justice system. Prerequisite: SOC 372.

SO JU 418 Methods for Investigating Institutionalized Crime (5) Investigative research methods in law enforcement, consumer protection, regulatory agencies, private security, the press, and public interest groups. Nature, location, acquisition, documentation, recording, organization, and dissemination of information. Legal, ethical, and public policy considerations. Prerequisites: SOC 110, POL S 101 or 202 or equivalent, or permission of director.

SO JU 425 Introduction to the American Court System (3) Philosophical and structural bases of the American court system; roles of attorneys, judges and the public in that system. Some focus also on current challenges to the courts posed by court congestion and alternative dispute resolution, and on future prospects for the courts. Prerequisite: SOC 372.

SO JU 430 The Police (5) Conceptual and empirical issues concerning multifaceted and changing roles of the American police. Prerequisite: POL S 101, 202 or 204; or SOC 110.

SO JU 440 Criminal Law and Procedure (4) Substantive and procedural criminal law for lay persons; analysis of the philosophy behind the law, with an emphasis on due process in adult and juvenile courts; case-analysis teaching technique. Recommended: POL S 464 or SOC 372 or permission of instructor.

SO JU 450 Special Topics in Society and Justice (1-5, max. 15) Examination of various current topics or issues concerning the criminal justice system in our society.

SO JU 470 Evaluation Research in Criminal Justice (5) Social science research methods relevant to criminal justice evaluation and operations research. Ethical considerations, formulation of goals and objectives, problem definition and research design, sources and methods of data collection, descriptive statistics, data interpretation, and utilizations of research results. Prerequisite: major standing or permission of director.

SO JU 473 Corrections (5) Analyzes research on diversionary methods, treatment of convicted offenders. Emphasis on program evaluation. Community treatment, fines, restitution, probation, parole, halfway houses, other alternatives to incarceration; correctional institutions. Organization of state, federal systems. Problems of administration. Subsidies, governmental control. Planning, public participation. Joint with SOC 473. Prerequisites: SOC 371, 372.

SO JU 499 Readings in Society and Justice (1-5, max. 10) Individual readings in society and justice. Prerequisite: major standing.

dedicated itself to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

Undergraduate Program

Stephanie Todd, Director of Student Services
210 Savery

Bachelor of Arts Degree

Admission Requirement: No fewer than 10 credits of course work in sociology, with a 2.50 grade-point average for all sociology courses earned at the time of declaring a sociology major. Special circumstances will be reviewed on a case-by-case basis.

Major Requirements: 50 credits in sociology, including: (1) SOC 328-329, to be fulfilled as soon as possible after declaration of a major in sociology; (2) one approved course in sociological theory (e.g., SOC 410, 411, 415, 416); (3) one senior seminar—SOC 401; (4) 30 credits of sociology electives to include at least 5 credits at the 400 level and at least 5 additional credits at the 300 level or above; (5) at least one course in each of four different areas of sociological study and a second course (at the 400 level) in at least one of the areas: the seven designated areas for this requirement are demography and ecology, deviance and social control, family, macrosociology, organizations and industrial sociology, social psychology, stratification and race relations; (6) minimum grade of 1.7 in any course used for the major; cumulative grade-point average of 2.50 or above in all sociology courses.

Graduate Program

Sociology seeks to explain population growth and distribution, social interaction, group behavior, deviance, organizations, and social change.

Emphasis is on empirical research aimed at testing theories and generating new principles. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered in various methods: statistical, survey, computer, demographic and ecological, interaction observation, experimental, case study, and historical. Students learn social research by participating in faculty projects or developing their own studies.

Graduate instruction is offered in the following fields: methodology, theory, social change, demography-ecology, social psychology, the family, organizations, stratification and ethnic relations, and criminology and deviant behavior.

The graduate program aims at completion of the Master of Arts degree in two calendar years and the Doctor of Philosophy degree in three years beyond the M.A. degree, although not all students finish in this time. A thesis is required for the M.A. degree. For the Ph.D. degree, the student must be certified in general methodology and in a major and a minor substantive area. An approved dissertation is also required.

Special Requirements

Applicants for admission to the Master of Arts program are evaluated on their undergraduate performance, Graduate Record Examination scores, statement of educational plans, and recommendations. For admission to the Ph.D. program, students are expected to have completed an M.A. degree in sociology in this department or elsewhere.

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

Lye, Diane, 1988, (Acting), M.A., 1985, Ph.D., 1989, Pennsylvania; demography, family studies.

Neuhouser, Kevin, 1990, (Acting), M.A., 1986, Indiana; political sociology, sociology of development, comparative/historical sociology.

Course Descriptions

Courses for Undergraduates

SOC 105 Sociology of Black Americans (5) Evaluates the sociocultural context of the Black person's environment and consequences of interaction with that environment. Joint with AFRAM 105.

SOC 110 Survey of Sociology (5) AWSp Human interaction patterns shaped by ecology, social structure, and culture. Communication, family processes, social differentiation, and formal organization as integrative mechanisms. Deviance, adaptation, social change. Course content may vary, depending upon instructor.

SOC 230 American Demographics (5) Lye Recent trends in American society from a demographic perspective. Topics include: fertility, mortality, migration, urbanization, marriage, family structure, aging, labor force, education, residential segregation, and income distribution. Discussion of how demographic change relates to changes in social, economic, political, and cultural life in the contemporary United States.

SOC 240 Introduction to Social Psychology: Perspectives on Individual Behavior (5) Howard, Schmitt Major theoretical perspectives on individual behavior in social settings. Social cognition, behaviorism, symbolic interaction, and attitudes. Ways people develop as social beings.

SOC 241 Introduction to Social Psychology: Perspectives on Social Interaction (5) Major perspectives on social interaction. Social exchange, cooperation and competition, group dynamics, social influence, leadership, altruism and aggression. Situational and personal variables that determine social interaction.

SOC 260 Black Male/Female Family Relationships (5) The Black family in the United States as a social institution. Effects of residence in a race-conscious society on the interpersonal relationships between Black men and women. Exploration of proposals for strengthening the Black family in the United States. Joint with AFRAM 260.

SOC 270 Social Problems (5) Processes of social and personal disorganization and reorganization in relation to poverty, crime, suicide, family disorganization, mental disorders, and similar social problems.

SOC 271 Introduction to the Sociology of Deviance (5) AWSp Bridges, Crutchfield, Weis Examination of deviance, deviant behavior, and social control. Deviance as a social process; types of deviant behavior (e.g., suicide, mental illness, drug use, crime, "sexual deviance," delinquency); theories of deviance and deviant behavior; nature and social organization of societal reactions; and social and legal policy issues.

SOC 301 War (5) Chirot Origins and conduct of war, readings from anthropology, political science, economics, and history, as well as two novels and some recent articles on the arms-control controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Joint with SIS 301.

SOC 320 Introduction to Sociological Research (5) Guest, McCann Basic methods of sociological research. Various research strategies such as participant observation, experimentation, and survey research presented; emphasis may vary across sections. Major problems in research design such as hypothesis formulation, sampling of subject population, data analysis, and report writing. Recommended: introductory course in sociology.

SOC 328-329 Methodology of Sociological Research (5-5) Logic of formulating, testing, and modifying hypotheses. Methods of producing social data (survey research, evaluation research, field observation) and utilizing stored data (census tapes, historical materials). Methods of quantitative data analysis techniques commonly used in contemporary sociological analysis. Not open for credit to students who have taken 320 or 323. Prerequisite: at least two prior courses in sociology.

SOC 330 Human Ecology (5) Campbell Factors and forces that determine the distribution of people and institutions.

SOC 331 Population and Society (5) Campbell, Guest, Lavelly, Lye, McCann Population growth and distribution, population composition, population theory, urbanization. Determinants and consequences of fertility and mortality trends and migration in economically developed and underdeveloped areas.

SOC 340 Symbolic Interaction (5) W Blumstein Role of language and culture in changing the human organism into a socialized human being; interpersonal processes and how they are shaped by the symbolic environment. Prerequisite: introductory course in social psychology.

SOC 341 Tutoring Sociology (2-4) Trains students to serve as tutors in designated courses. Teaches how to assist with writing assignments, explain course material, and lead group discussions. Prerequisites: 240, 241, or equivalents.

SOC 344 Cognitive Social Psychology (5) W Howard Cognitive structures and processes and their antecedents and consequences, both societal and individual. Reciprocal influences of social roles, social institutions, and social cognition. Prerequisite: 240 or equivalent or permission of instructor.

SOC 345 Collective Behavior (5) Behavior of large numbers in crowds, masses, publics, and social movements where institutional definitions for joint action are minimal and the collectivity seeks to define new patterns of collective action. Prerequisite: 240 or permission of instructor or adviser.

SOC 346 Group Processes (5) Cook, Schmitt Systematic analysis of social processes in small groups, including conformity, deviance, cooperation, competition, coalition formation, status and role differentiation, inequity, communication, and authority and power. A variety of methods of research are considered: field studies, field experiments, laboratory studies, and the simulation of social processes. Prerequisite: 240 or equivalent.

SOC 347 Socialization (5) How social systems control the behavior of their constituent groups and persons through the socialization process, sanctions, power, allocation of status, and rewards.

SOC 350 Contemporary American Institutions (5) Guest Origins and development of major social institutions. Sociology of economic structure, political organization, religion, education, recreation, and other institutionalized patterns.

SOC 352 The Family (5) Schwartz The family as a social institution. Historical changes and societal variation in family patterns. Changes over the life cycle. Alternative family forms.

SOC 353 The Family in Cross-Cultural Perspective (5) Form, content, and functions of families through case studies of different countries. Family organization, including family structure, inheritance, sexual division of labor, and socialization with attention given to life-cycle stages. Case studies include Taiwan, Indonesia, Japan, and early industrialized Britain. Prerequisite: 110.

SOC 354 The Comparative Study of Societies (3) van den Berghe Entire societies at various levels of technological complexity are compared to explore problems of their development and structural organization. Both historical and contemporary Western and non-Western societies are examined. Joint with ANTH 354.

SOC 355 Social Change in Latin America (5) Neuhauser, van den Berghe Problems of development and dependency in Latin America. Relations of power and production between social classes and ethnic groups, with special emphasis on Meso-America (Mexico, Guatemala) and the Andes (Peru, Bolivia). Joint with SIS 355. Prerequisite: introductory course in sociology, anthropology, political science, or economics.

SOC 356 Society and Politics (5) Burstein, Jepperson, Neuhauser Causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Joint with POL S 356.

SOC 360 Introduction to Social Stratification (5) Social class and social inequality in American society. Status, power, authority, and unequal opportunity are examined in depth, using material from other societies to provide a comparative and historical perspective. Sociological origins of recurrent conflicts involving race, sex, poverty, and political ideology.

SOC 361 Age and Sex Differentiation (3) Physiological and social bases of age and sex differentiation in human societies. The implications of age and sex distinctions for kinship, economic, and political structures. The relationship between age, sex, and other bases of social inequality.

SOC 362 Race Relations (5) Interracial contacts and conflicts. Joint with AES 362.

SOC 364 Women in the Social Structure (5) Howard Gender and social institutions; the family, politics, education, medicine, law, the labor force. Inter-

section of gender with other minority statuses such as race, age, socioeconomic status, and sexual orientation. Structural, ideological, and historical determinants of gender relations. Joint with WOMEN 384.

SOC 385 Urban Community (5) *Guest* Comparative and analytic study of organization and activities of urban groups.

SOC 386 Bureaucracy in Society (5) *A Gross* The coming of organizational societies; causes of bureaucracy; informal relations and work groups; ideologies; authority and the division of labor; social change in bureaucracies; the "faceless" bureaucrat in relationship to client needs; comparative organizations; complex organizations as settings for research.

SOC 371 Criminology (5) *Bridges, Crutchfield, Weis* Survey of legal definitions, types of criminal behavior, trends and patterns, recidivism, characteristics of offenders, environmental influences, diagnostic methods, prediction, theories of crime and delinquency prevention, social policy. Recommended: 271.

SOC 372 Introduction to Criminal Justice (5) *Bridges* Examines role of police, courts, and corrections in criminal justice. Applies sociological theories and perspectives to issues in law enforcement, adjudication, and corrections. Legislative reforms. Innovations in policy. Recommended: 271.

SOC 373 Social Factors in White Collar Crime (5) *W Weis* Concept and etiology of white collar crime, its forms, costs, victims, and innovative developments. Prospects for theoretical explanations and social control.

SOC 401 Special Topics in Sociology (5, max. 15) *AWSp* Selected topics of contemporary interest taught by a sociologist active in the field. Topics vary and may be substantive, theoretical, or methodological. Prerequisite: major standing or permission of instructor.

SOC 410 History of Sociological Thought (5) *Campbell* Contributions of individual theorists (from Comte to the present); emphasis on cumulative development of concepts and principles, emergence of sociology as a science, probable future developments.

SOC 411 Selected Topics in History of Sociological Thought (5) *Campbell* Specific areas or eras in the history of sociological thought. Emphasis on the development of sociological theory in relation to the intellectual and social setting of the time. Topics change from quarter to quarter. Some topics are: the development of concepts of order in sociological thought; conflict theories; the development of action theory in sociology; German sociology; Marx, Weber, and Simmel.

SOC 415 Theory of Social Organization (5) *Wager* State and usages of theory in social organization; importance of linkage between theory and methodology; major features of social organization demonstrated by intensive examination of representative theories of social organization with particular focus on complex forms.

SOC 416 Sociological Theory (5) *Jepperson, Kiser* Theories of individual action, social order, and institutional change. Cumulative development of solutions rather than on works of given theorists. Theories of social order. How sociological treatments of these issues compare with those offered by economists and other social scientists.

SOC 419 Fieldwork: Observations and Interviewing (5) *Schwartz* Perspective, logic, and techniques of qualitative social research and analysis. Nature and uses of intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies. Recommended: 240 or 352.

SOC 424-425 Applied Social Statistics (3-3) *Blacklock, McCann* Applications of statistics in sociology and related social sciences. Emphasis on problems of analysis with imperfect data. Theory construction, and reporting results. Probability in statistical inference. Analysis of variance; contingency table analysis, non-parametric procedures; regression analysis in social research. Prerequisites: 329 for 424; 424 for 425.

SOC 426 Methodology: Quantitative Techniques in Sociology (3) *Rafferty* Applied regression analysis with emphasis on interactive computer graphics techniques and interpretation. Application to typical sociological problems. Prerequisite: 329 or 425.

SOC 427 Statistical Classification and Measurement (3) *Costner* Application of statistical principles and methods to problems of classification and measurement in social research. Prerequisites: 426, 428-429.

SOC 428, 429 Principles of Study Design (3,3) *Costner, Crutchfield, Guest* Study design from problem formulation to the analysis and interpretation of data. Prerequisite: 329.

SOC 432 Population and Modernization (3) *Hirschman* Examines role of demographic factors in the process of social modernization and economic growth. The approach is both historical, focusing on populations of developed countries since 1700, and analytic, stressing the attempts made by different disciplines to model demographic relationships, with attention to less-developed regions. Prerequisite: 331 or permission of instructor or adviser.

SOC 442 Public Opinion (3) *Lang* The nature of public opinion; formation and measurement of public opinion; the operation of public opinion polls. Recommended: 240.

SOC 443 Mass Communication (5) *Lang* Control, structure, and functioning of mass media of communications as a force in social life; methods of research. Recommended: 240.

SOC 445 Religious Movements: The Sociology of Cults and Sects (3) *Stark* Understanding religion, what it is, and what it does. Examines the formation of new religious movements, cults, and sects, and the conditions under which they succeed or fail. Joint with RELIG 449. Prerequisite: 110. (Formerly 349.)

SOC 447 Social Movements (5) Social movements as collective attempts to change society: why people join; characteristics of successful and unsuccessful movements; consequences of social movement activities. Prerequisite: previous course in political sociology or political science.

SOC 449 Social Relationships (5) *Blumstein* The structure of different kinds of relationships and the nature of interaction within them. Concept of social relationships in general; several specific types of relationships. Close personal relationships: marriage, nonmarital sexual relationships, and the parent-child relationship. Prerequisites: course in social psychology and 352 or equivalent.

SOC 450 Political Economy of Women and Family in the Third World (5) Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Joint with SIS 450.

SOC 451 Theory and Process of Social Change (5) *Wager* Basic trends in American life; frames of reference for analysis of social change; forces causing social change. Prerequisite: 15 credits in social sciences.

SOC 453 Social Factors in the Family (5) *Review* and analysis of empirical research in courtship and marriage, marital adjustment, and specific areas of marriage and family life. Prerequisites: 323 and 352.

SOC 456 Political Sociology (5) *Burstein, Jepperson, Neuhauser* Relationships between social change and political change. Focus on selected issues, including social bases of democracy, political organization, elections, and consequences of public policy. Prerequisites: 356, and a 200-level political science course or equivalent.

SOC 457 Sociology of Religion (5) *Stark* The relations between religion, polity, economy, and social structure; in particular, the political, economic, and social impact of religious beliefs and organizations, as well as the social determination of these beliefs and organizations; the rise of secularism, the rationalization of modern life, and the emergence of political quasi-religions.

SOC 460 Social Differentiation (5) Analysis of societal organization based on sex, age, residence, occupation, community, class, caste, and race.

SOC 461 Comparative Ethnic Race Relations in the Americas (5) Sketches the ethnoracial systems operating in American society. Studies these systems as systems, and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Joint with AES 461.

SOC 462 Comparative Race and Ethnic Relations (5) *Scott* Race and ethnicity are examined as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Joint with AES 462. Recommended: 362. (Formerly 363.)

SOC 464 Contemporary Society in the People's Republic of China (5) *Lavelly* Separate development of rural and urban social institutions in the People's Republic of China since 1949 from a sociological perspective. Family and marriage, social control, educational institutions. Dilemmas of contemporary China and reasons for institutional change. Joint with SISEA 464.

SOC 465 Complex Organizations (3) *Cook, Creighton, Gross* Examination of the structure of complex organizations. Attention to developing generalizations applicable to industrial organizations, businesses, hospitals, prisons, labor unions, governments, universities, armies, and similar formally instituted organizations. The major focus is on empirical research, with some attention to methodological problems in studying such organizations. Prerequisite: 15 credits in sociology.

SOC 466 Industrial Sociology (5) *Wager* Changing focus of field; cultural variation, work, and the worker; technology, society, and the evolution of industrial forms; types and forms of industrial organizations; industrial organizations as social and technical systems; issues of control, process, and change; the individual in social and technical systems.

SOC 468 Sociology of Occupations and Professions (5) Frameworks for study of occupations and professions; occupational structure and mobility in American society and relation to adult socialization and career development; occupational and professional associations and society. Prerequisites: 240 and 15 credits in social sciences.

SOC 469 Balkan Societies (3) *Chirot* Examination of the roots of Balkan social problems (economic backwardness, minority-group conflicts, peasant problem), the failure of pre-1945 attempts to solve these problems, and the post-1945 communist attempts at solution. Particular emphasis placed on Romania and Yugoslavia. Prerequisite: at least one introductory social science course.

SOC 472 Juvenile Delinquency (5) *Crutchfield, Weis* Factors in delinquency, juvenile courts. Programs of treatment and prevention. Recommended: 371 or equivalent.

SOC 473 Corrections (5) *Weis* Analyzes research on diversionary methods and treatment of convicted offenders. Emphasis on program evaluation. Community treatment, fines, restitution; probation, parole, halfway houses, and other alternatives to incarceration; correctional institutions. Organization of state and federal systems. Problems of administration. Subsidies and governmental control. Planning and public participation. Joint with SO JU 473. Prerequisite: 371 or 372. Recommended: 323.

SOC 481, 482, 483 Issues in Analytic Sociology (5, max. 15; 3, max. 9; 1-3, max. 9) Examination of current issues in sociological analysis. The specific content of the course varies according to recent developments in sociology and according to the interests of the instructor. Any of the sequence may be repeated with permission of instructor.

SOC 488 Human Family Systems: Biological and Social Aspects (3) *van den Berghe* Biological bases for human mating and reproduction, and an examination of the range of cross-cultural variability in human systems of kinship and marriage. Compares wide range of human and nonhuman species, and Western and non-Western human societies. Interplay of biological, ecological, and sociocultural factors in determining the structure and function of human family systems. Joint with ANTH 486.

SOC 495 Honors Senior Thesis (5) Preparation of senior honors thesis. Sociology majors only.

SOC 496-497-498 Honors Senior Seminar (3 or 5-3 or 5-3 or 5) A,W,Sp Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Prerequisites: senior standing and permission of instructor.

SOC 499 Undergraduate Independent Study or Research (2-5, max. 10) AWSp Open only to qualified undergraduate students by permission of instructor (see departmental adviser).

Courses for Graduates Only

SOC 501 Proseminar (2) A Introduction of first-year graduate students to each of the substantive areas in sociology and to research facilities.

SOC 502 Seminar on Teaching Sociology (3) Techniques of lecturing, leading discussion, evaluating student performance, and other pedagogical skills ancillary to successful teaching. Students develop a course and obtain videotaped feedback of presentations. Prerequisite: completion of M.A.

SOC 503 Seminar on Writing Sociology (3) A *Howard* Reviews techniques, skills, and strategies helpful for publishing in sociological journals. Includes writing and revision of own work and evaluation of the writing of other students. Also includes sociological analysis of writing and other forms of academic communication. Prerequisite: completion of M.A.

SOC 510 Seminar in Sociological Theory (3) *Campbell, Jepperson* Macrosociological theories; functionalism and neoevolutionism; conflict and consensus approach; comparative strategies; models and long-range theories; ideology and sociology. From Marx and de Tocqueville to contemporary literature.

SOC 511 Classical Social Theory (3) Study of classical masters of social theory; Marx, Durkheim, Weber, and Simmel.

SOC 513 Demography and Ecology (3) *Hirschman, Lye, McCann* Theories and research on human fertility, mortality, mobility, migration, and urbanization in social/economic context. Comparative and historical materials on Europe, the United States, and the Third World.

SOC 514 Current Theories in Social Psychology (3) *Cook, Howard, Schmitt* Broad graduate-level introduction to the theories in the field of social psychology.

SOC 515 Current Research in Social Psychology (3) *Howard* Broad graduate-level introduction to the research in the field of social psychology.

SOC 516 Organizations (3) *Cook, Creighton, Wager* Broad graduate-level introduction to the theory and research on complex organizations.

SOC 517 Deviance and Social Control (3) *Bridges, Crutchfield, Weis* Survey of current research on deviant behavior and mechanisms of social control; definitions and forms of deviant behavior, causal analysis, and legal or other methods of social control.

SOC 518 Social Stratification (3) *Burstein, Guest* Intensive preparation in theoretical, methodological, and substantive topics in social stratification.

SOC 519 Social Change (3) *Burstein* Basic perspectives in the study of social change. Classical works and exemplary contemporary contributions in the literature.

SOC 525 Experimental Methods in Social Research (3) *Borgatta* For graduate students who wish additional understanding of techniques, problems, and issues involved in the design and conduct of experimental social research. Considers strengths and weaknesses of various experimental designs, artifacts and their control, problems in going from the laboratory to the field, and ethical issues. Prerequisites: 424-425 and 428, 429, or equivalents.

SOC 526 Causal Approach to Theory Building and Data Analysis (3) *Blalock* Theory construction and testing from a causal models perspective. Path analysis, standardized versus unstandardized measures, feedback models, identification problems, estimation in overidentified models, difference equations, differential equations, stability conditions. Multiplicative models as alternatives to additive ones. Causal approach to measurement error.

SOC 527 Measurement of Basic Sociological Concepts (3) *Blalock* Conceptualization and measurement problems in sociology, using major concepts as illustrations of basic issues. Causal approach to measurement to deal with problems of indirect measurement, cross-level measurement problems, aggregation and disaggregation. Consequences of crude measurement for data analyses. Prerequisite: 424; recommended: 426.

SOC 528 Seminar on Selected Statistical Problems in Social Research (3) *Costner, Raftery* Prerequisite: 426.

SOC 529 Multiple Indicators in Social Measurement (3) *Costner* Repeated measures, alternate measures and multiple observers in estimating the reliability, assessing the validity, and analyzing conceptual and indicator problems in social measurement. Implications of measurement error for research conclusions. Prerequisites: 424, 426.

SOC 530 Advanced Human Ecology (3) Human population distribution and migration patterns. Causes and consequences of world urbanization. Spatial and social patterns in the metropolis. Aggregate population movements and selectivity of migrants.

SOC 531 Demography: Fertility and Mortality (3) *Lye* Theories of fertility and mortality, demographic transitions, individual variations. Specific analytic approaches. Familiarity with basic fertility and mortality measures, and with the life table, is assumed.

SOC 533 Research Methods in Demography (3) *Lye, McCann* Basic measures and models used in demographic research. Sources and quality of demographic data. Rate construction, standardization, the life table, stable population models, migration models, population estimation and projection, measures of concentration and dispersion, measures of family formation and dissolution.

SOC 534 Demographic Issues in Asia (3-5) *Lavelly* Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. This seminar addresses a set of these issues by focusing on the demography of one or more countries in Asia. Joint with SISEA 564.

SOC 536 Log-Linear Modeling and Logistic Regression for the Social Sciences (3) *Raftery* Log-linear modeling of multidimensional contingency tables. Logistic regression. Applications to social mobility, educational opportunity, and assortative marriage. Applied and computing focus. Joint with STAT 536. Prerequisite: 425 or STAT 395 or permission of instructor.

SOC 539 Selected Topics in Demography and Ecology (3, max. 9) Specialized problems in demography or ecology are covered; for example, migration, fertility, mortality, language, race and ethnic relations, metropolitan community. See quarterly announcement for specific problem to be covered.

SOC 542 Selected Topics in Group Processes (3) *Cook, Schmitt* Theories, methodology, and studies in the area of small-group research. May be repeated for credit. Prerequisite: permission of instructor for nonmajors.

SOC 544 Seminar on Social Power (3) Examination of basic principles concerning power, influence, and authority in small groups, organizations, and communities. Recommended: 240, 415, 460.

SOC 545 Methods of Experimental Analysis in Social Research (3) Application of the method of experimental analysis to problems in sociology and social psychology.

SOC 546 Seminar on Symbolic Interaction (3) *Blumstein* Focuses on several key areas in, and related to, the symbolic interactionist perspective (e.g., language, the self, the dramaturgic perspective, ethnomethodology, stigma, the social construction of social problems). Prerequisite: permission of instructor for nonmajors.

SOC 547 Social Cognition and Attribution (3) Theories and research on social cognition and attribution. Theoretical and methodological debates on cognition. Sociological aspects of attribution. Prerequisite: 514 or equivalent.

SOC 550 Changing Patterns of Family Organization (3) *Schwartz* History of the family with emphasis on changes in European and American families since 1600. Concomitant changes in other institutions and their relation to changes in the family.

SOC 551 Family and Gender Relations (3) *Lye, Schwartz* Overview of major research findings on marriage and the family, including demographic trends, the place of children in society, courtship, divorce, and gender roles.

SOC 554 Seminar in the Sociology of Religion (3) *Stark* Survey of significant and active areas of theory and research in contemporary social scientific studies of religion.

SOC 555 Methods in Macro, Comparative, and Historical Sociology (3) *Chiot*

SOC 556 The Evolution of the Family (3) Sp *van den Berghe* Biological evolution of species-specific behaviors and forms of sociality linked to human mating, reproduction, and parenting. Cultural evolution of human systems of kinship and marriage as fitness-maximizing adaptations to a wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Joint with ANTH 556.

SOC 558 Sociological Aspects of Human Sexuality (3) *Blumstein, Schwartz* Research-oriented seminar. Sociological literature on sexuality. Individual project based on readings and discussions of strategies for studying sexuality. Topics include: cross-cultural perspectives on sexuality, the social scripting of sexual conduct, sex roles, sexual identity, gender identity, sexual life-styles, prostitution, pornography. (Formerly 588.)

SOC 559 Seminar on Gender Roles (3) *Blumstein* Theoretical issues concerning gender and society. Current state of empirical knowledge on the sociology of gender and strategies for research. Cross-cultural variations in gender roles, how these develop in people, how gender roles develop in society and their effects on social structure, social institutions, and interaction. Prerequisite: graduate student standing in a social science. (Offered alternate years.)

SOC 561 Sociology of Health and Illness: An Organizational and Managerial Perspective (3) Critical examination and discussion of sociological approaches—methodological, theoretical, and empirical—in the health-care field. Attention to applied studies in the field and, more broadly, to the implications for decision making from the sociological perspective. Prerequisite: undergraduate major in sociology, or permission of instructor.

SOC 562 Seminar in Comparative Race Relations (3) *van den Berghe* Cross-cultural approach to race and ethnic relations, including case studies from Africa and Latin America. Prerequisite: graduate standing in social sciences.

SOC 563 Advanced Seminar in Medical Sociology (3) *Cook* Development and testing of theories related to illness behavior, health occupations and professions, and the organization of health services. Emphasis given to provider-patient relationships and the sociology of health-care-delivery organizations. Joint with HSERV 579. Prerequisite: admission to health services doctoral opportunities program or graduate status in sociology, or permission of instructor.

SOC 566, 567 Seminar in Complex Organizations (3,3) *Gross, Wager* Special topic seminars in the field of complex organizations or industrial sociology.

SOC 569 Demographic Studies of Stratification (3) A *Guest, Hirschman* Overview of development of models of socioeconomic achievement ("status attainment" paradigm) in the field of stratification. Begins with work of Blau and Duncan. Covers elaboration of basic models to include race and ethnicity, social psychological variables, class, school and labor market effects, and other structural variables. Prerequisites: 513, 518.

SOC 574 Seminar on Methods of Criminological Research (3) *Bridges, Wels* Provides training in the technical analysis of published research in criminology; designs and processes studies in parole prediction, prediction of prison adjustment, and prediction of treatment effect.

SOC 581 Special Topics in Theory and the History of Sociological Thought (3) Examination of current topics in theory and the history of sociological thought. Content varies according to recent developments in the field and the interests of the instructor.

SOC 582 Special Topics in Research Methods and Statistical Analysis in Sociology (3) Examination of current topics in research methods and statistical analysis in sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 583 Special Topics in Demography and Ecology (3) Examination of current topics in demography and ecology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 584 Special Topics in Social Psychology (3) Examination of current substantive topics in social psychology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 585 Special Topics in Marriage and Family (3) Examination of current substantive topics in marriage and the family. Content varies according to recent developments in the field and the interests of the instructor.

SOC 586 Special Topics in Organization and Industrial Sociology (3) Examination of current substantive topics in organizational and industrial sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 587 Special Topics in Deviance and Social Control (3) Examination of current substantive topics in deviance and social control. Content varies according to recent developments in the field and the interests of the instructor.

SOC 588 Special Topics in Stratification and Race Relations (3) Examination of current substantive topics in stratification and race relations. Content varies according to recent developments in the field and the interests of the instructor.

SOC 589 Special Topics in Macrosociology (3) Examination of current substantive topics in macrosociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 590 Special Topics in Sociology (3) Examination of current substantive topics in sociology. Content varies according to recent developments in the field and the interests of the instructor. Topics covered in courses with this number lie outside those covered by other special topics courses numbered 581 through 589.

SOC 591 Political Sociology (3) A Introduction to political sociology, considering the rise of the modern state, power, political organization, social movements, and other related topics.

SOC 600 Independent Study or Research (*) AWSP

SOC 700 Master's Thesis (*) AWSP

SOC 800 Doctoral Dissertation (*)

Speech and Hearing Sciences

203 Eagleson

The speech and hearing sciences concern the processes and disorders of verbal communication. The undergraduate programs include the study of normal language development, speech acoustics, speech physiology and perception, hearing, the nature of language, speech and hearing disorders in children and adults, and the clinical processes involved in identification, prevention, and remediation of those disorders.

Undergraduate Program

Adviser
Barbara Mathers-Schmidt
253 Eagleson

Bachelor of Science Degree

Admission Requirements: 2.50 overall grade-point average. Recommended preparation includes high school physics or equivalent; introductory exposure to human learning, sensory, perceptual, and cognitive processes, general physiology and the physiology of behavior, and college mathematics.

Core requirements for all options: 29 credits in the following courses—SPHSC 201, 250, 303, 307, 310, 311. Students following Options II, III, or IV below must have a 3.00 grade-point average in courses that make up the common core. Students following Options III or IV must meet additional grade-point requirements to participate in clinical practicum.

OPTION I, GENERAL ACADEMIC

Intended to provide broad perspectives of the field, but not to prepare students for professional careers in the speech and hearing sciences.

Major Requirements: Core requirements listed above; 25 credits in courses dealing with normal and abnormal language, speech, and hearing taken from the following: SPHSC 315, 330, 332, 370, 380, 401, 402, 410, 411, 416, 420, 430, 431, 444, 499; PHYS 101-102.

OPTION II, BASIC SCIENCES

Intended for students who wish to continue graduate study in speech and hearing that leads to university teaching and research careers, but does not include clinical training in audiology or speech pathology.

Major Requirements: Core requirements listed above; 28-37 credits, including SPHSC 401, 402, 410, 416, 420, 499, and 6 credits in the speech pathology or clinical audiology areas; 28-30 credits outside the department, including a mathematics course that deals with calculus; one course each in statistics, psychology (learning, memory, or cognition), and human physiology; PHYS 101-102.

OPTION III, CLINICAL SCIENCES—AUDIOLOGY

Intended for students who wish to continue graduate study and to obtain clinical training in audiology.

Major Requirements: Core requirements listed above; 38 credits, including SPHSC 315, 330, 332, 350, 351, 370, 380, 401, 420, 431, 451 (audiology); at least 9 credits outside the department, in psychology (deviant personality, cognitive development, developmental psychology, neural and sensory bases of behavior), educational psychology (behavior measurement and management, statistics); PHYS 101-102.

OPTION IV, CLINICAL SCIENCES—SPEECH/LANGUAGE PATHOLOGY

Intended for students who wish to continue graduate study and to obtain clinical training in speech/language pathology.

Major Requirements: Core requirements listed above; 38 credits, including SPHSC 315, 330, 332, 350, 351, 370, 380, 451 (audiology), 401, 430, 431; two courses in developmental psychology or deviant personality; PHYS 101-102.

Graduate Program

The Department of Speech and Hearing Sciences offers the Master of Science and Doctor of Philosophy degrees. The program consists of a wide range of course work and seminars providing opportunities for the development of scholarly and professional competence in various areas of specialization: language ac-

quisition; phonology; speech production and transmission; hearing; psychoacoustics; speech perception; computer recognition and generation of meaningful speech; and human communication disorders related to language, speech, and hearing and the clinical procedures involved in their identification, prevention, and remediation. To complement departmental curricula in various specialization areas, close interdisciplinary relationships are maintained with other University departments and off-campus centers. Advanced degrees in the speech and hearing sciences equip the student to do research, to teach at the college and university level, and to provide clinical services to the communicatively impaired.

Special Requirements: Prospective candidates for advanced degrees are expected to have earned 50-60 credits in the speech and hearing sciences at the undergraduate level, depending upon the specific area of graduate specialization chosen. The M.S. (thesis) degree requires a minimum of 30 credits of approved course work, plus an acceptable thesis (9 credits). This degree program is recommended for students who plan to continue graduate study for the Ph.D. degree. The M.S. (non-thesis) degree is intended primarily for students who desire careers as speech and hearing clinicians, but who do not intend to continue study for the Ph.D. degree. A minimum of 45 credits is required, of which 23 must be at the 500 level or above in this program. Students also complete the academic and practical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association. These requirements necessitate more than the minimum 45-credit program for most students. A thesis is not required. For the Ph.D. degree, individually tailored programs of study are developed to focus on specialized areas of interest within speech science, experimental and clinical audiology, and speech/language pathology.

Financial Aid

A number of teaching and research assistantships are available for qualified graduate students. In addition, the department has traineeships supported by the U.S. Department of Education and the Veterans Administration.

Research Facilities

The department's research laboratories contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Child Development and Mental Retardation Center also provide laboratories to support applied research in communication processes and remedial procedures.

Professors

Kuhl, Patricia K.,* 1976, (Psychology, Otolaryngology), M.A., 1971, Ph.D., 1973, Minnesota; speech perception.

Miner, Adah L., 1965, (Emeritus), M.A., 1948, Washington; Ph.D., 1962, Wisconsin; speech pathology, clinical supervision.

Minifie, Fred D.,* 1971, M.A., 1962, Ph.D., 1963, Iowa; speech science.

Palmer, John M.,* 1952, (Prosthodontics),† M.A., 1950, Washington; Ph.D., 1952, Michigan; disorders of voice and orofacial deformities.

Prins, David,* 1969, M.A., 1957, Ph.D., 1961, Michigan; stuttering.

Thompson, Gary,* 1966, M.A., 1955, Iowa; Ph.D., 1967, Minnesota; pediatric audiology, clinical evaluation.

Thompson, Marie D.,* 1979, ‡(Education), M.A., 1968, Ph.D., 1970, Washington; special education (hearing impaired).

Tiffany, William R., 1951, (Emeritus), M.A., 1947, Washington; Ph.D., 1951, Iowa; phonetics and speech sciences, clinical evaluation.

Wilson, Wesley R.,* 1969, M.A., 1961, Redlands; Ph.D., 1969, Washington; audiology, infant assessment.

Yantis, Phillip A.,* 1965, M.A., 1952, Ph.D., 1955, Michigan; audiology, clinical evaluation.

Associate Professors

Burns, Edward M.,* 1984, M.S., 1966, Arizona; Ph.D., 1977, Minnesota; psychoacoustics.

Carpenter, Robert L.,* 1970, M.A., 1965, Ph.D., 1969, Northwestern; language and language disorders.

Coggins, Truman E.,* 1974, M.S., 1971, Redlands; Ph.D., 1976, Wisconsin; language disorders in children.

Cooker, Harry S.,* 1976, M.A., 1961, Ph.D., 1963, Iowa; speech science.

Dale, Philip S.,* 1968, ‡(Linguistics, Psychology), M.A., 1964, M.S., 1968, Ph.D., 1968, Michigan; language development.

Folsom, Richard C.,* 1977, M.S., 1970, Portland State; Ph.D., 1979, Washington; electrophysiologic audiology.

Mateer, Catherine A.,* 1980, (Research), M.S., 1972, Wisconsin (Madison); Ph.D., 1977, Western Ontario; neuropsychology and neurolinguistics.

Olswang, Lesley B.,* 1978, M.A., 1971, Illinois; Ph.D., 1978, Washington; language development and disorders.

Reich, Alan R.,* 1977, M.A., 1969, Connecticut; Ph.D., 1975, Iowa; speech physiology and voice disorders.

Stoel-Gammon, Carol,* 1983, M.A., 1968, Ph.D., 1974, Stanford; developmental phonology and phonetics.

Lecturers

Branson, Cynthia W., 1974, M.A., 1970, Northwestern; language disorders, dysarthria.

Cerf, F. Ann, 1973, M.A., 1950, West Virginia; M.A., 1970, Ph.D., 1972, Washington; stuttering.

Labiak, James A., 1974, M.A., 1971, Washington; audiology.

McHenry, Monica,* 1986, M.S., 1978, Pennsylvania State; Ph.D., 1983, Washington; speech pathology.

Moering, Betty C., 1983, M.S.P.A., 1975, Washington; speech/language disorders.

Sanborn, E. Sue, 1988, M.A., 1967, Ph.D., 1971, Washington; audiology.

Course Descriptions

Courses for Undergraduates

SPHSC 100 Voice and Articulation Improvement (3) AWSpS Only for persons for whom English is the primary language. Voice production and the sound system of standard American speech. Speech standards, regional and social dialects, voice quality and basic language-oriented characteristics. Practice for improving speech style.

SPHSC 111 The American English Sound System (2, max. 4) AWSpS For persons for whom English is not the primary language. Speech sounds of American English. Practice in listening and using American phonetic features. Prerequisite: college-level reading knowledge of English.

SPHSC 201 Anatomy of the Speech and Hearing Mechanisms (5) Asp Palmer Anatomy and functional coordination of those parts of the human body associated with phonation, articulation, resonance, and hearing. Required for majors; open to nonmajors.

SPHSC 250 Human Communication and its Disorders (5) WS Palmer Normal and disordered oral communication. Includes speech, language, and hearing disorders as well as normal processes. Required for majors, open to nonmajors.

SPHSC 300 Speech Science (5) AWSpS Cooker Basic physiological and acoustical attributes of speech. For nonmajors.

SPHSC 303 Language Science (5) A Stoel-Gammon Introduction to techniques of linguistic analysis in the areas of phonetics, phonology, morphology, syntax, and semantics.

SPHSC 307 Speech and Language Development (4) WSp T. Coggins, Olswang Study of the normal acquisition of speech and language in children. Required for majors. Prerequisite: 250, 303, or permission of instructor.

SPHSC 310 Introduction to Hearing Science (5) Asp Folsom, Wilson Acoustic properties of simple and complex sounds; description of normal audition; elementary structure and function of the hearing mechanism. Required for majors.

SPHSC 311 Speech Science: Speech Production (5) Asp Cooker, Minifie, Reich Physiological, acoustical, and perceptual aspects of speech production. Examples and laboratory work directed toward students with interests in speech pathology and audiology. Required for majors and open only to them. Prerequisites: 201 and 310; 310 may be taken concurrently.

SPHSC 315 Survey of Hearing Impairment (3) Asp Thompson, Wilson, Yantis Causes of hearing impairment and their psychological, social, and educational/vocational effects on the individual. Prerequisite: 310.

SPHSC 330 Disorders of Articulation (3) Asp Stoel-Gammon Nature, etiology, and treatment. Prerequisites: 250, 303, 307.

SPHSC 332 Clinical Processes I: Assessment (4) Asp Olswang Principles and procedures for the assessment of speech and language disorders. Prerequisites: 307, 330.

SPHSC 350 Clinical Processes II: Treatment (4) WS Olswang Principles and procedures for planning the effective treatment of speech and language disorders. Prerequisites: 330, 332, and permission of undergraduate adviser.

SPHSC 370 Basic Audiometry (5) WS Thompson Theory and practice of the assessment of hearing function, including standard pure-tone audiometry, speech audiometry, and basic impedance audiometry. Prerequisites: 315 and permission of undergraduate adviser.

SPHSC 380 Introduction to Aural Rehabilitation (4) WS Principles and methods of amplification and use of residual hearing, speech reading, speech conservation, and general counseling toward acceptance of hearing impairment. Considerations for education and special populations. Prerequisite: 370, which may be taken concurrently.

SPHSC 391 Practicum in Audiology (1-4, max. 10) AWSpS Supervised practicum in audiological assessment (section A) and aural rehabilitation (section B) of children and adults. Prerequisites: 350 for section A; and 380 for section B, and permission of undergraduate adviser.

SPHSC 400 Clinical Processes III: Communication Analysis (2) WS Carpenter, Coggins Principles and procedures for evaluating pragmatic, grammatic,

and semantic communicative abilities of linguistically impaired children and adults. Also covers approaches for evaluating communication in infants. Presents specific systems of analysis. Prerequisites: 303, 332, 350.

SPHSC 401 Neural Bases of Speech and Language (4) AS Neuroanatomical and neurophysiological bases of motor speech production and language processes. Laboratory. Prerequisite: 201 or permission of instructor.

SPHSC 402 Advanced Phonetic Analysis (2) W Advanced transcriptional and feature analysis of abnormal and nonstandard speech patterns. Prerequisite: 303 or equivalent introductory phonetics course or permission of instructor.

SPHSC 410 Psychology and Physiology of Audition (4) A Burns Physiological and behavioral bases of hearing. Correlation of human hearing with acoustic, anatomic, and physiological factors.

SPHSC 411 Perceptual Development (5) A Kuhl, Meltzoff Origins, development of perception in human infancy; nature-nurture controversy as applied to perceptual development. Topics from visual, auditory domains. Development of object and face perception; auditory pattern perception; speech perception; categorization; perception of three-dimensional space; auditory localization; cross-modal relations among touch, vision, audition. Joint with PSYCH 411.

SPHSC 416 Speech Acoustics and Perception (3) ASp Kuhl Historical perspectives and current research on speech acoustics and perception: neurophysiology and brain organization underlying speech and language; machine recognition of speech; animal communication; speech evolution; implications for people with impaired communication skills.

SPHSC 420 Instrumentation for Speech and Hearing Sciences (3) A Wilson General problems in design and application of electronic equipment used in the speech and hearing sciences. Laboratory problems and demonstrations.

SPHSC 430 Nature of Stuttering (3) ASp Prins Major theories of stuttering are studied in light of research concerning the characteristics of stutterers and their symptoms. Prerequisite: 250 or permission of instructor.

SPHSC 431 Language Disorders of Children (4) ASp Carpenter, Coggins Consideration of descriptions and theories, both historical and contemporary, of disordered language in children and related problems. Prerequisites: 250, 303, 307.

SPHSC 444 Speech, Language, and Hearing Disorders in the Elderly (3) S Reich, Yantis Speech, language, and hearing changes caused by aging. Communication disorders in the elderly population and their management. Offered for students or practitioners involved in the delivery of health care and social services to the elderly.

SPHSC 449 Special Studies in Speech Pathology and Audiology (*) AWSpS Selected special problems in speech pathology and audiology. Prerequisite: permission of instructor.

SPHSC 450 Treatment of Stuttering (3) W Prins Description and evaluation of therapy systems for children and adults who stutter. Two hours per week of therapy observation are integrated with class material. Prerequisites: 350 and 430, or permission of instructor.

SPHSC 451 Speech Pathology-Audiology Practicum in the Schools (1-10, max. 10) AWSpS Special projects in clinical practicum, offered only in the school setting. Provides an opportunity for students to extend practicum experiences in this special environment; does not fulfill requirements for teaching practicum in the College of Education. Prerequisites: 350 and permission of undergraduate adviser.

SPHSC 453 Communication Augmentation for Non-Speaking Individuals (3) S Communication needs of nonspeaking individuals. Interdisciplinary approaches to the evaluation, selection, and implementation of aided and unaided communication augmentation systems. Joint with REHAB 458. Prerequisite: basic course work in either speech and hearing sciences, physical therapy, occupational therapy, or engineering, or permission of instructor.

SPHSC 470 Survey of Audiological Assessment (3) S Yantis General review of methods, techniques, and instruments used in the measurement of auditory function. Designed for majors in speech pathology, speech science, and special education. Not open to audiology majors except by permission. Prerequisite: 370 or permission of instructor.

SPHSC 479 Pediatric Audiology (3) Sp Thompson Assessment of auditory disorders in infants and young children. Emphasis on behavioral and electrophysiologic techniques and on the role of the audiologist in the clinical management of the young hearing-impaired child. Prerequisite: 370 or equivalent.

SPHSC 499 Undergraduate Research (1-5, max. 15) AWSpS Prerequisite: permission of instructor.

Courses for Graduates Only

SPHSC 502 Advanced Anatomy of Speech and Hearing Structures (2) AWSp Palmer Directed individual dissection and study of selected anatomic structures of the speech and hearing mechanisms. Prerequisites: 201 and permission of instructor.

SPHSC 503 Current Issues in Speech and Hearing Sciences (3) Application of experimental methods to research in speech science.

SPHSC 504 Research Methods in Speech and Hearing Science (3) AW Kuhl, Minifie Introduction to empirical methods in the speech and hearing sciences.

SPHSC 505 Clinical Research in Communication Disorders (3) W Olswang Introduction to clinical research. Methodological issues concerning the evaluation of treatment for speech, hearing, and language disorders. Primary emphasis on time series designs. Prerequisite: 504 or permission of instructor.

SPHSC 510 Physiological Acoustics (3) W Burns Study of pertinent literature and experimental techniques incident to the scientific study of the normal and abnormal auditory system. Prerequisites: 410 and familiarity with algebra and trigonometry. (Offered alternate years.)

SPHSC 511 Psychoacoustics (3) Sp Burns Review of significant literature and theory pertinent to normal auditory sensitivity, pitch, loudness, and other attributes of auditory sensation. Prerequisites: 410 or permission of instructor, familiarity with intermediate mathematics (MATH 105 or equivalent). (Offered alternate years.)

SPHSC 514 Speech Physiology (3) A Cooker Study of the physiological parameters of speech production. Prerequisites: 310, 311, or permission of instructor. (Offered alternate years.)

SPHSC 515 Speech Acoustics (3) W Minifie Study of the acoustical correlates of the distinctive parameters of speech. Prerequisites: 310, 311, 514, or permission of instructor. (Offered alternate years.)

SPHSC 516 Speech Perception (3) Sp Kuhl Study of the perceptual and linguistic parameters of speech perception. Prerequisites: 310, 311, 515, or permission of instructor. (Offered alternate years.)

SPHSC 519 Seminar in Speech Science (2, max. 6)

SPHSC 520 Advanced Instrumentation for Speech and Hearing Sciences (3) WS Cooker, Wilson Design and use of electronic and electroacoustic devices in the speech and hearing sciences. Four hours of laboratory required each week. Prerequisite: 420.

SPHSC 530 Maxillofacial Bases of Speech Disorders (3) A Palmer Causation and remediation of speech disorders derived from upper vocal tract defects, including cleft palate and other craniofacial defects. Thorough grounding in vocal tract anatomy and physiology, speech acoustics, and multidiscipline rehabilitation approaches. Recommended: 201 or permission of instructor.

SPHSC 531 Neurogenic Motor Speech Disorders (5) Sp The nature of dysarthria and apraxia of speech and the evaluation and treatment of those disorders. Prerequisite: 401 or permission of instructor.

SPHSC 532 Neurogenic Language Disorders (5) W Nature of aphasia and other neurogenic language disorders; evaluation and treatment of those disorders. Prerequisite: 401 or permission of instructor.

SPHSC 533 Speech Pathology in a Medical Setting (3) Sp For speech pathology students who intend to work in a hospital. Prerequisites: 531 and 532 or permission of instructor.

SPHSC 534 Dysphagia and Associated Disorders (3) Sp Palmer Anatomic and physiologic bases of function and dysfunction associated with speech-language disorders. Mastication and swallowing problems, their causes, assessments, and management. Prerequisites: 201, 401.

SPHSC 535 Voice Disorders (4) WS Reich Physiology, acoustics, and perception of the normal and disordered human voice. Etiology, evaluation, and treatment of phonatory disorders.

SPHSC 536 Assessment of Language Impairment in Children (5) AS Carpenter, Coggins, Olswang Principles and procedures used in the assessment of speech- and language-disordered children and adolescents. Prerequisites: 332, 431, and permission of instructor.

SPHSC 540 Phonological Development (3) Sp Selected topics in the developmental sequence of phonological systems in normal-speaking children. Relationships between possible phonological inventories and rule systems in different languages. Joint with LING 540. Prerequisites: LING 451, 452, or permission of instructor.

SPHSC 541 Syntactic and Semantic Development (3) Sp Dale Advanced topics in the study of first-language acquisition by children, including cognitive bases of language, cross-linguistic research, early semantic systems and their reorganization, learnability theory, and other theories of acquisition. Joint with LING 541. Prerequisite: PSYCH 457 or LING 447 or permission of instructor.

SPHSC 550 Intervention with Communication Disorders in the School Setting (2) W Study of administrative and clinical issues in implementation of programs to remediate communication disorders in the school-aged population. Field experiences and professional issues. Open only to graduate students in speech and hearing sciences.

SPHSC 551 Advanced Practicum in Speech Pathology Evaluation (1-9, max. 10) AWSpS Laboratory experience in the evaluation of speech and language disorders. Prerequisites: 536 and permission of instructor.

SPHSC 552 Advanced Practicum in Speech Pathology Management (1-9) AWSpS Laboratory experience in the management of speech and language disorders. Prerequisites: 551 and permission of instructor.

SPHSC 555 Preinternship (1-9) AWSpS Practicum in speech pathology or audiology designed to teach the clinical regimen of a participating professional center prior to assuming a full internship assignment. Prerequisite: 150 hours of supervised practicum.

SPHSC 566 Seminar in Speech-Language Development (2, max. 6) Prerequisites: 307, 431.

SPHSC 569 Seminar in Speech-Language Pathology (2, max. 6)

SPHSC 570-571 Assessment of Auditory Dysfunction I, II (5-5) A,W Yantis Strategies and procedures in the auditory evaluation of hearing-impaired adults. Laboratory required. Prerequisite: 370 or equivalent.

SPHSC 572 Immittance Audiometry (3) A Wilson, Yantis Instrumentation and approaches to evaluation of auditory function through determination of impedance characteristics, including tympanometry, and detection of the acoustic reflex. Prerequisite: 370 or equivalent.

SPHSC 573 Electrophysiologic Assessment of Auditory Function (3) Sp Folsom Consideration of electrophysiologic techniques that may be used to evaluate the normal and disordered auditory system. Outside laboratory required. Prerequisite: 310 or permission of instructor.

SPHSC 575 Medical Backgrounds in Audiology (3) A Snyder Diseases and injuries of the ear resulting in reduced audition. Prerequisite: -571 or permission of instructor.

SPHSC 581 Management of Hearing-Impaired Children (3) S Management of hearing-impaired children, including identification of target behaviors and methods for modification such as individualized therapy programs and parent and teacher involvement.

SPHSC 582 Hearing Aid Amplification (4) W Acoustic amplification and methods of determining electroacoustic characteristics. Includes earmold technology. Prerequisites: 370, 380, or permission of instructor.

SPHSC 583 Hearing Aid Selection (4) Sp Yantis Consideration of strategies utilized in selecting acoustic amplification for the hearing impaired, including review of pertinent research literature. Prerequisite: 582 or permission of instructor.

SPHSC 584 Industrial and Community Hearing Conservation (2) W Yantis Psychophysiological effects of environmental noise on man. Techniques of noise measurement and attenuation, including the planning of hearing conservation programs in industry and in the community. Prerequisite: 370 or permission of instructor. (Offered alternate years.)

SPHSC 588 Proseminar (1, max. 3) ASp Consideration of professional issues and student/faculty research in specific areas of interest.

SPHSC 589 Seminar in Audiology (2, max. 6) Prerequisite: permission of instructor.

SPHSC 591 Advanced Practicum in Audiology (1-9, Max. 10) AWSpS Prerequisite: forty hours of practicum.

SPHSC 599 Research Practicum (*, max. 12) AWSpS Supervised laboratory experience in experimental approach to problems in speech and hearing sciences. Prerequisite: permission of instructor.

SPHSC 600 Independent Study or Research (*) AWSpS Prerequisite: permission of instructor.

SPHSC 601 Internship (3-9, max. 9) AWSpS Prerequisite: 150 hours of supervised practicum.

SPHSC 700 Master's Thesis (*) AWSpS

SPHSC 800 Doctoral Dissertation (*) AWSpS

Speech Communication

205 Raitt

Speech communication is the study of the ways people share meanings and make their ideas known to each other in face-to-face interaction. The major in speech communication is designed to enable students to analyze and evaluate their own and others' communication behavior, to understand speech as a form of behavior and a social process, and to become better communicators themselves.

Undergraduate Program

Advisers
Robert M. Post
Beatrice Restoule
206B Raitt

Students in the department begin their study in introductory courses in public speaking, interpersonal communication, and small-group decision making. In advanced courses, students study and analyze specialized forms of communication—persuasion, argumentation, small-group facilitation, and communication in instructional settings and large organizations.

Bachelor of Arts Degree

Admission Requirements: A minimum of 30 quarter credits completed and a minimum 2.50 overall grade-point average (2.50 guarantees consideration, but not acceptance). Recommended courses include 10 credits in quantitative and symbolic reasoning; 10 credits in history, literature, and philosophy; and 10 credits in English composition (see department for list of recommended courses). Students submit an application packet that includes: (1) application form; (2) current class schedule; (3) copies of transcripts and grade reports; (4) statement of objectives. Applications are due the end of the third week of the quarter. Admission is once a quarter—Autumn, Winter, and Spring.

Major Requirements: 60 approved credits, which includes 32-33 credits of core requirements (students should consult with departmental adviser upon entering the program regarding distribution of core requirements), and 27-28 elective credits, of which 15 credits must be in courses at the 400 level, excluding 499. For core requirements, students should complete: 10 credits from SPCH 103, 140, 220; 5 credits from 334, 373; 14-15 credits from 270, 305, 310, 478; and 400. A 2.50 overall grade-point average in all speech courses taken is required.

Graduate Program

Graduate Program Coordinator
Barbara P. Warnick

Graduate study is guided by the principle that speech communication is a unified discipline concerned with the ways persons share meanings and how shared meanings affect, and are affected by, persons and society at large. Specialty areas include communication theory; interpersonal, small-group, organizational, instructional, cultural, and developmental communication; communication education; oral interpretation; freedom of speech; argument; rhetorical theory; criticism; and public address. Emphasis is on both "social scientific" and "humanistic" methods of scholarly inquiry.

The M.A. program with thesis requires at least 31 credits of approved course work and a thesis (9 credits). The M.A. program without thesis: 45 credits and completion of a creative project.

The Ph.D. program usually requires four to five years of study beyond the baccalaureate degree.

Special Research Facilities

A laboratory complex accommodates studies on individuals and groups of varying sizes and includes one-way mirrors, as well as audio and video capabilities. A computer lab houses several personal computers, terminals, and printers that are linked to the University's computer systems. An instructional resource center provides support for the development and use of electronic and print materials for teaching and research.

Admission Qualifications

Baccalaureate degree in speech communication or equivalent background.

Financial Assistance

The department annually awards a number of teaching assistantships.

Faculty

Chairperson

Ann Q. Staton

Professors

Baskerville, Barnet, 1948, (Emeritus), M.A., 1944, Washington; Ph.D., 1948, Northwestern; public address, rhetorical criticism.

Bosmajian, Haig A.,* 1965, M.A., 1951, Pacific; Ph.D., 1960, Stanford; rhetoric, freedom of speech.

Crowell, Laura I., 1949, (Emeritus), M.A., 1940, Ph.D., 1948, Iowa; public address, discussion.

Nilsen, Thomas R.,* 1950, (Emeritus), M.A., 1948, Washington; Ph.D., 1953, Northwestern; contemporary rhetorical theory, ethics of rhetoric.

Scheldel, Thomas M.,* 1976, M.A., 1955, Ph.D., 1958, Washington; communication theory and research, small-group processes.

Associate Professors

Albrecht, Terrance L.,* 1979, M.A., 1975, M.Lit., 1978, Ph.D., 1978, Michigan State; organizational communication, persuasion.

Campbell, John A.,* 1968, M.A., 1967, Ph.D., 1968, Pittsburgh; modern rhetorical theory, British public address.

Nelson, Oliver W., 1945, (Emeritus), M.A., 1939, Ph.D., 1949, Washington; speech education.

Parks, Malcolm R.,* 1978, M.A., 1975, Ph.D., 1976, Michigan State; communication theory, interpersonal communication, research methods.

Phillipsen, Gerry F.,* 1978, Ph.D., 1972, Northwestern; ethnography of communication.

Post, Robert M.,* 1960, M.A., 1958, Ph.D., 1961, Ohio; oral interpretation of literature.

Staton, Ann Q.,* 1977, M.A., 1973, Baylor; Ph.D., 1977, Texas; instructional communication.

Stewart, John R.,* 1969, M.A., 1964, Northwestern; Ph.D., 1970, Southern California; philosophy of qualitative research and interpersonal communication.

Warnick, Barbara P.,* 1980, M.A., 1972, Marshall; Ph.D., 1977, Michigan; rhetorical theory and criticism.

Assistant Professors

Bauman, Isabelle, 1990, M.A., 1988, Ph.D., 1990, Wisconsin; language and cognition, communication theory.

Black, Alex K., 1991, M.A., 1987, Ph.D., 1990, Victoria; discourse analysis, research methods.

Kline, Susan L., * 1984, M.A., 1977, Ph.D., 1981, Illinois (Urbana); interpersonal communication, communication development.

Purcell, William M., * 1988, M.A., 1983, Ph.D., 1986, Indiana; classical and medieval rhetorical theory, American public address.

Lecturers

Hogan, Michael, 1949, (Emeritus), M.A., 1950, Washington; oral interpretation.

Nyquist, Jody D., 1967, M.A., 1967, Washington; communication education.

Course Descriptions

Courses for Undergraduates

SPCH 102 Speech, the Individual, and Society (5) AWSp Kline, Philipsen, Stewart Provides a basic understanding of human speech communication. Covers three major areas: (1) the nature of human communication, including models, principles, settings; (2) elements of verbal and nonverbal communication; and (3) approaches to, and functions of, human communication including persuasion, interpersonal communication, argument, propaganda, free speech.

SPCH 103 Interpersonal Communication (5) AWSp Stewart Emphasizes analyzing and understanding communication variables affecting human relationships, such as person perception, feedback, idea development, nonverbal cues. Focus on informal communication settings.

SPCH 140 Oral Interpretation of Literature (5) AWSp Post Analysis and critical study of imaginative literature through the medium of oral performance. Includes verse, prose, and drama.

SPCH 203 Communication in the Classroom (5) AWSp Staton Theory and practice of interpersonal communication in instructional settings. Designed to prepare prospective teachers to employ communication effectively as a medium of teaching and learning, to create a classroom communication environment in which interaction is open and productive. Recommended for all teacher candidates in any discipline.

SPCH 220 Introduction to Public Speaking (5) AWSp Campbell Emphasizes choice and organization of material, sound reasoning, audience analysis, oral style, and delivery. Overview of history of rhetoric. Classroom speeches followed by conferences with instructor.

SPCH 222 Speech Communication in a Free Society (3) Bosmajian Problems and arguments related to freedom of speech; early English writers on freedom of expression; background of freedom of speech in the United States; contemporary freedom of speech issues.

SPCH 235 Parliamentary Procedure (3) Bosmajian Principles and practice: a study of the historical bases and contemporary uses of parliamentary procedure; methods and practice in organizing and conducting public meetings.

SPCH 270 Introduction to Empirical Research in Speech Communication (5) AWSp Albrecht, Parks Basic research principles in speech communication science; survey of substantive research findings. Recommended: any 100- or 200-level speech communication course.

SPCH 301 Interviewing (5) Warnick Interviewing principles and practices, with emphasis on information gathering and persuasive interviews. Purposes and types of interviews, structure of interviews, and influence of communication patterns on interview outcomes.

SPCH 305 Perspectives on Language in Speech Communication (5) Philipsen, Stewart Study of language and meaning, and survey of several influential modern approaches, including the semantic, general semantic, behavioral, and analytic philosophical. Relates theories of language and meaning to the study of speech communication.

SPCH 308 Humanistic Approaches to Interpersonal Communication (5) Stewart Exploration of several humanistic approaches to interpersonal speech communication, emphasizing the theorists' philosophical orientations.

SPCH 310 The Rhetorical Tradition in Western Thought (5) Purcell, Warnick Analysis of the major theories that prescribe and describe the use of symbols to change attitudes and behavior. Principal emphasis is placed upon defining the nature and scope of rhetoric and upon analyzing the art's underlying assumptions about human beings as symbol users. Some background in history, philosophy, and literature is desirable. Recommended: junior standing.

SPCH 320 Public Speaking (5) Practice in preparation and presentation of a variety of types of public speeches based on study of their structure and form; emphasis on organization and delivery. Recommended: 220.

SPCH 329 Rhetoric of Social and Political Movements (5) Bosmajian Inquiry into the rhetoric of social and political movements; emphasis on investigation of persuasive discourse; examination of the nonverbal symbols of persuasion.

SPCH 334 Essentials of Argument (5) AWSp Purcell, Warnick Argument as a technique in the investigation of social problems; evidence, proof, refutation, persuasion; training in argumentative speaking.

SPCH 335 Methods of Debate (5) Warnick Debate as a method of advocacy, with emphasis on the analysis of value and policy questions. Prerequisite: 220 or 334.

SPCH 341 Oral Interpretation of Children's Literature (3) Post Study and performance of children's literature, emphasizing oral interpretation as a method of teaching literature in the elementary school.

SPCH 349 Readers Theatre (2, max. 10) Post Preparation and public presentation of programs of literary works. Prerequisites: 140 and permission of instructor.

SPCH 368 Small-Group Facilitation (3) Methods for facilitating discussion in small groups formed for the purposes of instruction. Emphasis is on each student's practical application of the insights derived. Prerequisites: permission of instructor, concurrent registration in 369; recommended: 102.

SPCH 369 Small-Group Facilitation Practicum (2) Implementation of the theoretical principles taught in 368. Emphasis on direct application of those principles to an assigned group of students from 102. Prerequisite: concurrent registration in 368.

SPCH 373 Principles of Group Discussion (5) Philipsen Discussion as an everyday community activity, with emphasis on the informal cooperative decision-making methods of committee, conference, and roundtable groups.

SPCH 375 Ethics in Interpersonal and Public Speech Communication (5) Ethical problems in interpersonal and public speech communication. Alternative ways of evaluating and responding to moral problems in a variety of communication situations.

SPCH 400 Theoretical Backgrounds in Speech Communication (3) W Philipsen Speech viewed as a form of individual and social behavior, with emphasis on the function of symbols in speech communication in informal and societal settings. The development of speech as a field of study and its contemporary emphases.

SPCH 421 Advanced Speech Composition (5) Bosmajian Preparation and delivery of public speeches with emphasis on style, thought organization, and proof. Analysis of model speeches. Recommended: 220 or 320.

SPCH 424 Rhetorical Perspective in Revolutionary Documents (5) Campbell Rhetorical investigation of selected major writings. Examines the rhetorical dimension in the progress of ideas through analysis of revolutionary documents as persuasive works. Relates principal revolutions in Western thought to contemporary controversy. Examines *Rights of Man*, *Communist Manifesto*, *The Origin of Species*, etc.

SPCH 425 American Public Address (5) Campbell Historical and critical study of rhetorical discourse and movements and of their relationship to American political, social, and intellectual life. Examines the discourse of the American revolution, debates on the ratification of the federal constitution, the slavery question, Reconstruction, populism, imperialism.

SPCH 426 American Public Address (5) Campbell, Purcell Historical and critical study of rhetorical discourse and movements and of their relationship to American political, social, and intellectual life. Examines Lyceum and Chautauqua movements, progressive era, World War I, the New Deal, isolationism, the Cold War era, civil rights movement, anti-nuclear movement. Recommended: 425.

SPCH 428 British Public Address (5) Campbell Historical and critical analysis of significant speeches and speakers and of their relationship to British social, political, and religious life. Historical overview of the major periods of British oratory and of the unique role of the oration in each as a means of exhortation and advocacy.

SPCH 434 Argumentation Theory (5) Kline, Warnick Theory and research on the structure and properties of argument, argument fields, argument modeling, the influence of audience, argument criticism, and related topics.

SPCH 440 Oral Interpretation of Poetry (3) W Post Study of forms of verse through analysis and oral presentation. Recommended: 140.

SPCH 442 Oral Interpretation of Fiction (3) A Post Analysis and oral interpretation of narrative perspectives in the novel and the short story. Recommended: 140.

SPCH 444 Oral Interpretation of Modern Dramatic Literature (3) Sp Post Study of dramatic literature from Ibsen to the present for purposes of developing understanding, appreciation, and ability to communicate its meaning. Recommended: 140.

SPCH 455 Communication in Children's Environments (4) Nyquist, Staton Study of the communication capacity of children with emphasis on the analysis of the communication process in formal and informal learning environments. Includes examination of communication-based educational approaches and instructional strategies.

SPCH 456 Communication in Youth Environments (4) Nyquist, Staton Study of the communication process in youth environments with a primary focus on formal and informal learning. Includes critical analysis of communication in contemporary instructional settings and the development of communication strategies for teaching and learning.

SPCH 471 Persuasion (3) Albrecht, Kline Analysis of the ways in which beliefs, values, attitudes, and behavior are deliberately influenced through communication. Recommended: junior standing.

SPCH 472 Empirical Approaches to Interpersonal Communication (5) Parks Examination of major theoretic positions and empirical research findings in current speech communication literature on inter-

personal influence. Emphasis on the insights that such theory and research provides on human speech communication behavior in common interpersonal situations. Recommended: junior standing.

SPCH 473 Problems of Discussion Leadership (3) *Scheidel* Critical analysis of leadership in committee and conference, with emphasis on the development of speech effectiveness in the cooperative achievement of goals. Recommended: 373.

SPCH 475 Organizational Communication (5) *Albrecht* Role of communication in organizations, the types of problems arising, and approaches to their resolution. Communication in the human relations and productivity of organizations. Applying communication skills in various organization roles. Recommended: junior standing.

SPCH 476 Models and Theories in Speech Communication (4) *Kline, Stewart* Examination of selected theories and models of speech communication from the behavioral sciences, as well as of criteria applicable to them. Emphasis on the nature and function of theories and models, especially as these relate to basic principles underlying the scientific study of speech communication phenomena. Recommended: junior standing.

SPCH 484 Cultural Codes in Communication (5) *Philipsen* Social and cultural codes in interpersonal communication, with special reference to contemporary American subcultural groups and their communication patterns.

SPCH 498 Special Topics in Speech Communication (2-5, max. 15) AWSp Lecture, seminar, and/or team study. Topics vary.

SPCH 499 Undergraduate Research (1-5, max. 10) AWSpS Prerequisite: permission of instructor.

Courses for Graduates Only

SPCH 501 Introduction to Graduate Research in Speech Communication (3) A *Scheidel, Warnick*

SPCH 510 Rhetoric in Society (3) A *Campbell, Warnick* Selected works of major rhetorical theorists such as Aristotle, Cicero, Augustine, Campbell, Whately, Perelman, and Burke. Examines how rhetorical themes are responsive to and symptomatic of societal conditions and values.

SPCH 521 Studies in Greek and Roman Rhetoric (5) *Purcell* Development of the Greek tradition in rhetorical theory, criticism, and pedagogy from Homer to Augustine; analysis of the contributions of major figures and works to that tradition.

SPCH 522 Studies in Medieval Rhetoric (5) *Purcell* Critical analysis of selected persons, works, and topics related to the development of rhetorical theory during the Middle Ages.

SPCH 523 Studies in Renaissance and Modern Rhetoric (5) *Campbell, Warnick* Development of rhetorical theory from the mid-sixteenth to early nineteenth centuries. Examines the contributions of Wilson, Ramus, Bacon, Port Royalists, Vico, Campbell, Blair, and Whately.

SPCH 524 Studies in Contemporary Rhetoric (5) *Warnick* Critical analysis of theories of rhetoric from early twentieth century.

SPCH 525 Rhetorical Criticism (5) *Campbell* History and method of rhetorical criticism. Application of critical standards to notable British and American speeches.

SPCH 540 History of Oral Interpretation (3) *Post* Critical analysis of writings by Sheridan, Walker, Rush, Deisarte, Bell, Curry, Emerson, and others.

SPCH 550 Instructional Design in Speech Communication (4) *Staton* Research, theory, and practice relevant to instructional design in speech communication. Instructional models, writing instructional objectives, strategies, and evaluative measures.

SPCH 555 Instructional Communication (5) *Staton* Communication in instructional environments. Nature of instructional communication, paradigms for instructional communication research, quantitative and qualitative approaches to instructional communication, verbal and nonverbal classroom interaction.

SPCH 560 Social Scientific Perspectives on Interpersonal Communication (5) A *Parks* Social scientific research and theory on the role of communication in developing and maintaining interpersonal relationships. Nature of interpersonal communication, relationship change processes, interpersonal control through communication, and personal communication networks.

SPCH 570 Organizational Communication (5) *Albrecht* Examination of social scientific theory and research on communication in organizations. Topics include quantitative and qualitative approaches to process of organizational communication, function and structure of macro networks, superior-subordinate relationships, and the role of communication in organizational change, development, and effectiveness. Prerequisite: graduate standing in the social sciences.

SPCH 575 Philosophy of Interpretive Research in Communication (5) *Stewart* Introduces interpretive researchers to foundations of this approach in Dilthey, Gadamer, Schutz, Weber, Wittgenstein, and others. Emphasizes Gadamer's philosophical hermeneutics.

SPCH 576 Research Methods in Speech Communication (5) *Parks* Application of behavioral research principles to problems in quantification, design, and analysis of data in speech communication research.

SPCH 577 Research Problems in Speech Communication (3-6, max. 12) *Philipsen* Application of methodology and design principles to research problems in speech communication.

SPCH 588 Small-Group Communication (5) *Scheidel* Major small-group theories relevant to communicative behavior. Descriptive and experimental research findings in current speech communication literature. Prerequisite: 473.

SPCH 590 Seminar in Theory of Speech Communication (3-4, max. 12)

SPCH 592 Seminar in Public Address (3-4, max. 12)

SPCH 593 Seminar in Rhetorical Theory (3-4, max. 12)

SPCH 595 Seminar in Speech Communication Education (3-4, max. 12)

SPCH 597 Seminar in Interpersonal Communications (3-4, max. 12) Examination of experimental literature on selected topics. Subject changes from year to year; topics include conflict resolution, information processing, communication networks, feedback systems, audience composition research, communication effects.

SPCH 598 Small-Group Discussion and Communication (3-4, max. 12) Introduction to study of communication within small problem-solving groups. Theoretical as well as methodological dimensions of selected studies. Emphasis on role communication in decision-making process. From a communication viewpoint, examines such topics as conformity, consensus, interpersonal attraction, and emergent phases of discussion.

SPCH 600 Independent Study or Research (*) AWSpS

SPCH 700 Master's Thesis (*) AWSpS

SPCH 800 Doctoral Dissertation (*) AWSpS

Statistics

B313 Padelford

By means of joint faculty appointments, the Department of Statistics maintains active academic contracts with the School of Business Administration; the College of Engineering; the Departments of Computer Science, Economics, Genetics, Geological Sciences, Mathematics, and Psychology; Quantitative Science; the Applied Physics Laboratory; and the Applied Statistics Division of the Boeing Company. The department has an especially close relationship with the Department of Biostatistics.

Undergraduate Program

Bachelor of Science Degree

Major Requirements: MATH 124, 125, 126; 307, 308, 309; 328, 329; (the honors sequences in calculus may replace the corresponding regular sequences); CSE 210, 211; STAT 311, 341, 342, 421, 423 and two other upper-division statistics courses chosen with prior approval of the statistics adviser. Electives (9 credits): one upper-division course in mathematics, statistics, or computer science, plus two upper-division courses in any discipline (including mathematics, statistics, and computer science), all subject to prior approval by the statistics adviser. The first elective gives an opportunity to define the flavor of the major within interrelated fields, and the other two give a chance to broaden the basis of the major into a special interest area, chosen from the full range of upper-division courses offered at the University. Grades of 2.0 or better in all courses used to satisfy major requirements. Cumulative grade-point average of 2.50 in required statistics courses.

Graduate Program

The graduate program emphasizes both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. An ongoing statistical consulting program provides the students with practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers Master of Science and Doctor of Philosophy degrees.

Master of Science Degree

Graduation Requirements: At least twelve approved courses numbered 400 or above with a value of 36 credits or more; of these, at least six courses must be numbered in the 500 series (exclusive of 511, 512, 513) with a value of 18 credits or more, and with a coherent theme. Approved proficiency in statistical computing. Satisfactory participation in statistical consulting and the departmental seminar. Passage of an appropriate final master's examination. Successful completion of a master's thesis can count as up to three courses worth 9 credits (may not replace any of the six courses in the 500 series mentioned above). All programs must be approved in advance by the departmental graduate program coordinator.

Doctor of Philosophy Degree

Admission Requirements: Background in mathematics, statistics, or a quantitative field.

Graduation Requirements: Appropriate training in statistics and related sciences. Appropriate General Examination of basic graduate-level knowledge in statistics and probability (including two preliminaries). Satisfactory performance in STAT 570, 571, 572; STAT 581, 582, 583; and STAT 521, 522, 523 (in some circumstances, other graduate-level mathematical science courses may be used as a substitute). Approved performance in statistical consulting (typically continuing participation in STAT 599). Demonstration of proficiency in computing. 1 credit of STAT 590 per quarter. Demonstration of ability to read technical literature in French, German, or Russian. Dissertation. Final Examination.

Computing Facilities

Computing facilities in the Department of Statistics rank among the best of any statistics programs in the country and reflect the department's expertise in the field of statistical computing. For graduate instruction, the department relies mostly on a laboratory of IBM RT UNIX workstations, and a VAX 3500, the latter owned jointly with the computer science and mathematics departments. In addition, the department operates 15 SUNs, three Symbolics-3600 Lisp machines used mainly for work in statistical computing environments and graphics, and several microcomputers. All machines are connected by a TCP/IP network. Support is provided by a systems programmer, an applications programmer, and a systems administrator.

Faculty

Chairperson

Elizabeth A. Thompson

Professors

Basag, Julian,* 1989, B.S., 1968, Birmingham (United Kingdom); spatial statistics, with applications to epidemiology, image analysis, and agriculture; Bayesian inference, Monte Carlo tests.

Birnbaum, Z. W.,* 1939, (Emeritus), (Mathematics),† LL.M., 1925, Ph.D., 1929, John Casimir (Poland); nonparametric statistics, reliability theory, competing risks.

Felsenstein, Joseph,* 1967, ‡(Genetics), Ph.D., 1968, Chicago; estimation of evolutionary trees, models of long-term evolutionary processes, and theoretical population genetics.

Fleming, Thomas R.,* 1984, (Biostatistics),† M.A., 1974, Ph.D., 1976, Maryland; survival analysis, clinical trials, sequential analysis.

Ford, E. David,* 1985, ‡(Biostatistics, Fisheries, Forest Resources), Ph.D., 1968, University College (London); modeling plant response to environment, interpreting ecological processes from spatial patterns, statistical inference for complex models, measurement theory for ecological processes, time-series analysis.

Kronmal, Richard A.,* 1964, (Biostatistics),† Ph.D., 1964, California (Los Angeles); nonparametric density estimation, computer algorithms, cardiovascular data analysis.

Lunneborg, Clifford E.,* 1962, (Psychology),† M.S., 1957, Ph.D., 1959, Washington; applied multivariate analysis, linear models, educational and psychological measurement.

Martin, R. Douglas,* 1969, M.S.E., 1965, Washington; Ph.D., 1969, Princeton; robust methods, time series, data analysis.

Nelson, Charles R.,* 1975, ‡(Economics), M.A., 1967, Ph.D., 1969, Wisconsin; econometrics, time-series analysis, monetary economics.

Perlman, Michael D.,* 1979, M.S., 1965, Ph.D., 1967, Stanford; multivariate analysis, decision theory.

Shorack, Galen R.,* 1966, (Mathematics), M.A., 1962, Oregon; Ph.D., 1965, Stanford; empirical processes, robustness, nonparametric statistics.

Siegel, Andrew F.,* 1983, ‡(Management Science), (Finance and Business Economics), M.S., 1975, Ph.D., 1977, Stanford; statistics, data analysis, computing, finance.

Thompson, Elizabeth A.,* 1985, (Biostatistics),† M.A., 1974, Ph.D., 1974, Cambridge; statistical analysis of human genetic data, population genetics, statistics of conservation biology.

Wellner, Jon A.,* 1983, (Biostatistics),† Ph.D., 1975, Washington; large-sample theory, asymptotic efficiency, empirical processes, semiparametric models.

Associate Professors

Guttorp, Peter,* 1980, M.A., 1976, Ph.D., 1980, California (Berkeley); point processes, stochastic models, applications to hydrology and geophysics.

McDonald, John A.,* 1985, (Research), (Computer Science and Engineering), Ph.D., 1982, Stanford; scientific computing, interactive graphics, human interfaces, visualization.

O'Sullivan, Finbarr,* 1987, (Biostatistics),† Ph.D., 1983, Wisconsin; nonparametric curve estimation, inverse problems, computational aspects of these.

Raftery, Adrian E.,* 1986, (Sociology),† M.Sc., 1977, Trinity (Dublin); Ph.D., 1980, Université de Paris VI; time series, point processes, discrete data, applications in sociology.

Sampson, Paul D.,* 1981, (Research), Ph.D., 1979, Michigan; applied multivariate analysis, spatial statistics in environmental, statistical consulting.

Scholz, Friedrich W.,* 1981, (Affiliate), Ph.D., 1971, California (Berkeley); theory of estimation, large sample theory, nonparametric statistics.

Stuetzle, Werner,* 1984, ‡(Computer Science), Ph.D., 1977, Eidgenössische Technische Hochschule (Switzerland); graphical methods in multivariate analysis, nonparametric curve estimation, computer vision.

Walden, Andrew T., 1989, (APL),† Ph.D., 1982, Southampton (United Kingdom); estimation in the extreme value distribution, deconvolution in the non-Gaussian case, applications to geophysics.

Assistant Professor

Madigan, David, 1990, Ph.D., 1990, Trinity (Dublin); expert systems, probabilistic influence networks, computational efficiency of network modeling.

Senior Research Associate

Zeh, Judith E.,* 1982, Ph.D., 1979, Washington; robust methods for time series, statistical models for marine environmental data, statistical computing.

Research Associate

Percival, Donald B.,* 1985, (APL),† Ph.D., 1983, Washington; robust time series analysis, techniques employed in atomic clock control.

Senior Lecturer

Morita, June G., 1982, (Management Science),† Ph.D., 1982, California (Berkeley); survey sampling, data analysis.

Course Descriptions

Courses for Undergraduates

STAT 220 Basic Statistics (5) AWSps Objectives and pitfalls of statistical studies. Structure of data sets, histograms, means, and standard deviations. Correlation and regression. Probability, binomial and normal. Interpretation of estimates, confidence intervals, and significance tests. (Students may receive credit for only one of 220, 301, 311, and ECON 311.) Prerequisite: 1½ years of high school algebra.

STAT 301 Basic Statistics with Applications (5) W Objectives, pitfalls of statistical studies. Structure of data sets, histograms, means, standard deviations. Correlation, regression. Probability, binomial and normal. Interpretation of estimates, confidence intervals, significance tests. Application to problems in student's major field. (Students may receive credit for only one of 220, 301, 311.) Prerequisites: 1½ years of high school algebra.

STAT 311 Elements of Statistical Methods (5) AWSps Elementary concepts of probability and sampling; binomial and normal distributions. Basic concepts of hypothesis testing, estimation, and confidence intervals; t-tests and chi-square tests. Linear regression theory and the analysis of variance. (Students may receive credit for only one of 220, 301, 311, and ECON 311.) Prerequisite: MATH 105 or 156.

STAT 316 Regression Analysis and Design of Experiments (3) Introduction to the analysis of data from planned experiments. Analysis of variance and regression analysis with applications in engineering. Joint with IND E 316. Prerequisite: IND E 315 or permission of instructor.

STAT 341, 342 Introduction to Probability and Statistical Inference I, II (4,4) AW,WSp Sample spaces, random variables, probability. Distributions: binomial, normal, Poisson, geometric. Expectation, variance, moment generating functions. Central limit theorem. Basic concepts of estimation, testing and confidence intervals. Maximum likelihood estimators and likelihood ratio tests; efficiency. Introduction to regression and analysis of variance. (Students may not receive credit for both 341 and 481.) Prerequisite: 311, MATH 126.

STAT 390 Probability and Statistics in Engineering and Science (4) AWSps Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Joint with MATH 390. (Students may not receive credit for both 390 and 481.) Prerequisites: MATH 126 and MATH 205 or 308.

STAT 394 Probability I (3) AWS Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson and normal distributions. Joint with MATH 394. Prerequisite: MATH 126.

STAT 395 Probability II (3) WSpS Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Joint with MATH 395. Prerequisite: 394.

STAT 396 Probability III (3) Sp Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Joint with MATH 396. Prerequisite: 395 or 511.

STAT 403 Introduction to Data Analysis (4) W Philosophy, methods of exploratory data analysis, robustness, statistical graphics. Structure in data sets: groups of numbers, several groups, bivariate, time series, two-way tables. Includes plotting, transformation, outlier identification, regression, smoothing, median polish. Joint with QMETH 403. May not be taken for credit if credit received for 503. Prerequisites: 220 or 311 or QMETH 201 or ECON 311.

STAT 421 Applied Statistics and Experimental Design (4) A Computer-aided data analyses using comparisons between batches, analysis of variance and regression. Evaluation of assumptions, data transformation, reliability of statistical measures (jackknife, bootstrap). Fisher-Gosset controversy. Prerequisites: 342, 390, 481, or grade of 3.0 in 311 plus MATH 126 or permission of instructor.

STAT 423 Applied Regression and Analysis of Variance (4) W Regression analysis. Problems in interpreting regression coefficients. Estimation, including two-stage least squares. Guided regression: building linear models, selecting carriers. Regression residuals. Analysis of variance. Nonparametric regression. Factorial designs, response surface methods. Prerequisites: 342, 390, 421, 481, or grade of 3.0 in 311 plus MATH 126, or permission of instructor.

STAT 425 Introduction to Nonparametric Statistics (3) Overview of nonparametric methods, such as rank tests, goodness of fit tests, 2x2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Joint with BIOST 425. Prerequisites: 311, BIOST 473, 511, or permission of instructor.

STAT 427 Introduction to Analysis of Categorical Data (4) Techniques for analysis of count data. Log-linear models, logistic regression, and analysis of ordered response categories. Illustrations from the behavioral and biological sciences. Computational procedures. Prerequisites: 362, 421, or permission of instructor.

STAT 428 Multivariate Analysis for the Social Sciences (4) Sp Multivariate techniques commonly used in the social and behavioral sciences. Linear models for dependence analysis (multivariate regression, MANOVA, and discriminant analysis) and for interdependence analysis (principal components and factor analysis). Techniques applied to social science data using computer statistical packages. Prerequisites: 362, 421, or permission of instructor.

STAT 480 Sampling Theory for Biologists (3) Sp Simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Sampling plant and animal populations, sampling distributions, estimation and statistical treatment of data. Joint with Q SCI 480. Prerequisites: Q SCI 482, 483, or permission of instructor.

STAT 481 Introduction to Mathematical Statistics (5) A Probability, generating functions; the δ -method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. Joint with ECON 481. (Students receiving credit for either 341 or 390 may not receive credit for 481.) Prerequisites: 311, ECON 311 or equivalent; MATH 124, 125, 126; and a course in linear algebra, which may be taken concurrently.

STAT 486 Experimental Design (3) Sp Topics in analysis of variance and experimental designs; choice of design, comparison of efficiency, power, sample size, use of computer for standard analyses. Joint with Q SCI 486. Prerequisite: Q SCI 483.

STAT 491, 492 Introduction to Stochastic Processes (3,3) A,W Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queueing theory, stationary processes. Joint with MATH 491, 492. Prerequisites: 396 for 491; 491 for 492.

STAT 498 Special Topics (1-5, max. 15) Reading and lecture course intended for special needs of students. Prerequisite: permission of instructor. (Offered when demand is sufficient.)

STAT 499 Undergraduate Research (1-5, max. 15) Prerequisite: permission of instructor.

Courses for Graduates Only

STAT 503 Practical Methods for Data Analysis (3) A Basic exploratory data analysis with business examples. Groups of numbers, multivariate data, time series, multiway tables. Techniques include plotting, transformation, outlier identification, cluster analysis, smoothing, regression, median polish, and robustness. Joint with QMETH 503. May not be taken for credit if

credit received for 403. Prerequisite: 342 or QMETH 500 or equivalent, or permission of instructor.

STAT 506 Applied Probability and Statistical Inference (4) Sp Overview of probability models, random variables, independence and conditional probability, Markov chains, stationary time series, statistical inference, estimation and testing. Joint with AMATH 506. Prerequisites: some advanced calculus and linear algebra.

STAT 512, 513 Statistical Inference (4,4) A,W General theory of statistical inference; estimation and hypothesis testing; multivariate theory; regression, correlation, and analysis of variance. Prerequisites: 395 and 421, 423, or BIOST 512 (concurrent registration permitted for these three) for 512; 512 for 513.

STAT 516-517 Stochastic Modeling of Scientific Data (4-4) A,W Models and statistical analysis of data with a significant temporal and/or spatial structure. Markovian and semi-Markovian models, point processes, cluster models, queueing models, likelihood methods, estimating equations. Prerequisites: 511 or 396 for 516; 516 for 517.

STAT 519 Time Series Analysis (3) A Descriptive techniques. Stationary and nonstationary processes, including ARIMA processes. Estimation of process mean and autocovariance function. Fitting ARIMA models to data. Statistical tests for white noise. Forecasting. State space models and the Kalman filter. Robust time series analysis. Regression analysis with correlated errors. Statistical properties of long memory processes. Prerequisite: 513.

STAT 520 Spectral Analysis of Time Series (4) W Estimation of spectral densities for single and multiple time series. Nonparametric estimation of spectral density, cross-spectral density, and coherency for stationary time series, real and complex spectrum techniques. Bispectrum. Digital filtering techniques. Aliasing, prewhitening. Choice of lag windows and data windows. Use of the fast Fourier transform. The parametric autoregressive spectral density estimate for single and multiple stationary time series. Spectral analysis of nonstationary random processes and for randomly sampled processes. Techniques of robust spectral analysis. Joint with E E 520. Prerequisite: one of 342, 390, 481, or permission of instructor.

STAT 521, 522, 523 Advanced Probability (3,3,3) A,W,Sp Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Joint with MATH 521, 522, 523. Prerequisite: MATH 426.

STAT 524 Design of Medical Studies (3) Emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for students in biostatistics and other scientific fields. Joint with BIOST 524. Prerequisites: BIOST 511 or equivalent, and one of 421, 423, BIOST 513 or EPI 512; or permission of instructor. (Offered even-numbered years.)

STAT 529 Sample Survey Techniques (3) Sp Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Joint with BIOST 529 and QMETH 529. Prerequisites: 421, 423, QMETH 500 or BIOST 511 or equivalent; or permission of instructor.

STAT 533 Classical Theory of Linear Models (3) Sp Introduction to one-, two-way analysis of variance; randomized blocks; fixed, random effects, multiple comparisons. Statistical distribution theory for quadratic forms of normal variables. Fitting of the general

linear model by least squares. Joint with BIOST 533. Prerequisites: 421 or 423; and 513, BIOST 513, and a course in matrix algebra.

STAT 534 Statistical Computing I (3) W Computational methods in statistics: sorting, searching and calculation of order statistics, data interpolation and approximation, numerical methods for least squares and principal components, computational geometry, calculation of probabilities, data structures, and data-base management. Joint with BIOST 534.

STAT 535 Statistical Computing II (3) Sp Computational methods in statistics: generation of pseudo random numbers, Monte Carlo quadrature, variance reduction techniques, design of Monte Carlo studies, nonlinear optimization, nonlinear least squares, selected special topics. Joint with BIOST 535.

STAT 536 Log-Linear Modeling and Logistic Regression for the Social Sciences (3) Log-linear modeling of multidimensional contingency tables. Logistic regression. Applications to social mobility, educational opportunity, and assortative marriage. Applied and computing focus. Joint with SOC 536. Prerequisite: 395 or SOC 425 or permission of instructor.

STAT 542 Multivariate Analysis (3) Multivariate normal distribution; partial and multiple correlation; Hotelling's T^2 ; Bartlett's decomposition; various likelihood ratio tests; discriminant analysis; principal components. Prerequisite: 582 or permission of instructor.

STAT 544 Bayesian Statistical Methods (3) Statistical methods based on the idea of a probability distribution over the parameter space. Coherence and utility. Subjective probability. Likelihood principle. Conjugate families. Structure of Bayesian inference. Limit theory for posterior distributions. Sequential experiments. Exchangeability. Bayesian nonparametrics. Empirical Bayes methods. Prerequisite: 513 or permission of instructor.

STAT 548 Robust Statistical Methods (3) Robust statistical methods: algorithms, data analysis, and theory. Basic robustness concepts. Robust estimation techniques for the following estimation problems: location, scale, correlation, covariance matrices, regression. Use of robust methods for exploratory data analysis and outlier detection diagnostics. Nonlinear optimization and root-finding algorithms for computing robust estimates. Prerequisite: 513 or permission of instructor.

STAT 561, 562, 563 Special Topics in Applied Statistics (1-5, max. 15; 1-5, max. 15; 1-5, max. 15) A,W,Sp Data analysis, spectral analysis or robust estimation, etc. Prerequisite: permission of instructor.

STAT 565 Inference in Stochastic Processes (3) Methods for statistical inference from dependent observations. Emphasis on one or more of the following: Markov chains in discrete or continuous time; diffusion processes; point processes; asymptotic theory; filtering and smoothing of linear models. Prerequisite: 581 or permission of instructor.

STAT 570, 571, 572 Advanced Applied Statistics and Linear Models (4,4,4) A,W,Sp Quality measures, robustness, variability, and randomization. Regression; multiple predictors; multiple linear regression. Analysis of residuals; model building; errors in variables; missing data; additive models; recursive partitioning; classification; generalized linear models; censored and truncated data; design of experiments; blocking; patterned covariance matrices. Multivariate analysis. Joint with BIOST 570, 571, 572. Prerequisites: 421, 423 or BIOST 512, 513 or 533 and a course in matrix algebra for 570; 570 for 571; 571 for 572.

STAT 573 Statistical Methods for Categorical Data (3) Sp Exact and asymptotic methods for 2x2 contingency tables. Maximum likelihood estimation of logistic regression models for binary response. Examples in epidemiologic and clinical research. Theory and

applications of log-linear models for discrete data. Selected special topics. Joint with BIOST 573. Prerequisites: 571 and 581; or permission of instructor.

STAT 574 Multivariate Statistical Methods (3) Use of multivariate normal sampling theory, linear transformations of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Joint with BIOST 574. Prerequisite: 570 or permission of instructor.

STAT 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Covers parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Joint with BIOST 576. Prerequisites: 581 and either 423, BIOST 513, or Q SCI 483, or equivalent. (Offered alternate years.)

STAT 577 Advanced Design and Analysis of Experiments (3) Concepts important in experimental design: randomization, blocking, confounding. Application and analysis of data from randomized blocks designs, Latin and Greco-Latin squares, incomplete blocks designs, split-plot and repeated measures, factorial and fractional replicates, response surface experiments. Joint with BIOST 577. Prerequisite: 570 or 421 (minimum grade 3.0), or permission of instructor.

STAT 578 Special Topics in Advanced Biostatistics (*, max. 3) Advanced-level topics in biostatistics offered by regular and visiting faculty members. Joint with BIOST 578. Prerequisite: permission of instructor.

STAT 579 Advanced Data Analysis (4) Resampling methods; jackknife, bootstrap, cross-validation. Smoothing techniques; local averages; projection-pursuit regression; recursive partitioning regression. Selected aspects of linear regression. Robust-resistant methods. Density estimation. Clustering techniques. The EM-algorithm. Graphical exploratory methods. Prim-81. Joint with BIOST 579. Prerequisites: 513; one of 571, 421, 423; or permission of instructor.

STAT 581, 582, 583 Advanced Theory of Statistical Inference (4,4,4) A,W,Sp Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability; (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisites: 513 and either prior or concurrent registration in MATH 425, 426, 427 for 581; 570 and 581 for 582; 582 for 583.

STAT 590 Statistics Seminar (*, max. 15) AWSp Prerequisite: permission of graduate program adviser.

STAT 591, 592, 593 Special Topics in Statistics (1-5, max. 15; 1-5, max. 15; 1-5, max. 15) A,W,Sp Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes, etc. Prerequisite: permission of instructor.

STAT 598 Techniques of Statistical Consulting (3) Instruction and practice in planning studies, analyzing data, writing reports, and interacting with clients. Includes applied statistics and consulting literature not covered elsewhere in graduate curriculum. Significant data analysis projects and critiques of actual consulting sessions. Prerequisites: two or more courses in the application of statistical methods.

STAT 599 Statistical Consulting (*, max. 12) AWSp Consulting experience in data analysis, applied statistics, etc. Student required to provide con-

sulting services to students and faculty three hours per week. Prerequisite: permission of graduate program coordinator.

STAT 600 Independent Study or Research (*) AWSp Prerequisite: permission of graduate program coordinator.

STAT 700 Master's Thesis (*) AWSp Prerequisite: permission of graduate program coordinator.

STAT 800 Doctoral Dissertation (*) Prerequisite: permission of graduate program coordinator.

Women Studies

C254 Padelford

Women Studies is an interdisciplinary program that offers students the opportunity to select courses from a variety of academic disciplines while pursuing concentrated study in a particular department or track within the program. Women Studies courses are planned to foster open, vigorous inquiry about women, to challenge curricula in which women are absent or peripheral, to question cultural assumptions in light of new information, and to create a supportive environment for those interested in studying women.

Undergraduate Program

Major Requirements: Although an undergraduate degree in Women Studies is not offered, students may work toward a Bachelor of Arts degree in General Studies with a concentration in Women Studies. Course requirements are as follows: WOMEN 200 or equivalent; 5 additional lower-division credits in Women Studies; 15 upper-division credits in selected courses. See department for list; one course of 3-5 credits in an ethnic area; WOMEN 300; senior seminar (WOMEN 400) and senior thesis (G ST 483). 30 additional credits may be satisfied under one of three options: (1) 30 credits in a single department relevant to Women Studies curriculum; (2) 30 credits in a Women Studies track (an interdisciplinary series of courses); or (3) 30 credits in an individual course of study arranged between the student and a Women Studies adviser, with approval by the Director.

Faculty

Director

Sydney J. Kaplan

Professors

Bereano, Philip L.,* 1975, ‡(Engineering), J.D., 1965, Columbia; M.R.P., 1971, Cornell; social management of technology.

Blake, Kathleen A.,* 1971, ‡(English), M.A., 1967, California (Los Angeles); Ph.D., 1971, California (San Diego); English.

Blumstein, Philip W.,* 1970, ‡(Sociology), M.A., 1967, Ph.D., 1970, Vanderbilt; sociology.

Deyrup-Olsen, Ingrid J.,* 1964, (Emeritus), ‡(Zoology), Ph.D., 1944, Columbia; zoology.

Eastman, Carol M.,* 1967, ‡(Anthropology, Linguistics), Ph.D., 1967, Wisconsin; anthropology.

Gerstenberger, Donna,* 1960, ‡(English), M.A., 1952, Ph.D., 1958, Oklahoma; English.

Gottlieb, Naomi,* 1970, ‡(Social Work), M.S.W., 1949, D.S.W., 1970, California (Berkeley); social work.

McElroy, Colleen W.,* 1972, ‡(English), M.A., 1963, Kansas State; Ph.D., 1973, Washington; English.

Russ, Joanna,* 1977, ‡(English), M.F.A., 1960, Yale; English.

Schwartz, Pepper J.,* 1972, ‡(Psychiatry and Behavioral Sciences, Sociology), M.A., 1968, Washington (St. Louis); Ph.D., 1974, Yale; sociology.

Teller, David A.,* 1965, ‡(Physiology and Biophysics, Psychology), Ph.D., 1965, California (Berkeley); psychology.

Associate Professors

Allen, Carolyn R. J.,* 1972, ‡(English), M.A., 1966, Claremont; Ph.D., 1972, Minnesota; English.

Butler, Johnnella, 1988, ‡(Afro-American Studies, American Ethnic Studies, English), M.A.T., 1969, Johns Hopkins; Ed.D., 1979, Massachusetts (Amherst); Afro-American literature, multicultural studies.

Case, Sue-Ellen,* 1981, ‡(Drama), M.A., 1968, California State (San Francisco); Ph.D., 1981, California (Berkeley); dramatic criticism.

Cauce, Ana Mari,* 1986, ‡(Psychology), M.S., 1979, Ph.D., 1984, Yale; social support and networks, at-risk adolescents, community psychology, minority populations.

Clatterbaugh, Kenneth C.,* 1966, ‡(Philosophy, Psychology), Ph.D., 1966, Indiana; philosophy.

Hartsock, Nancy,* 1984, ‡(Political Science), ‡ M.A., 1967, Ph.D., 1972, Chicago; philosophy of feminism, feminist theory, political theory.

Howard, Judith A.,* 1982, ‡(Sociology), M.A., 1976, M.A., 1977, Oregon; Ph.D., 1982, Wisconsin; social psychology, gender roles.

Jacobs, Sue Ellen,* 1974, (Anthropology), M.A., 1966, Ph.D., 1970, Colorado; women studies, anthropology.

Kaplan, Sydney J.,* 1971, (English), ‡ M.A., 1966, Ph.D., 1971, California (Los Angeles); women studies.

Kenney, Nancy J.,* 1976, (Psychology), ‡ M.A., 1972, Ph.D., 1975, Virginia; women studies, psychology.

Palomo, Dolores J., 1971, ‡(English), M.A., 1966, Wayne State; Ph.D., 1972, State University of New York (Buffalo); English.

Richey, Cheryl A.,* 1973, ‡(Social Work), M.S.W., 1971, D.S.W., 1974, California (Berkeley); social work.

Silberstein, Sandra V.,* 1982, ‡(English), M.A., 1971, Ph.D., 1982, Michigan; English, sociolinguistics.

Yarbro-Bejarano, Yvonne M.,* 1974, ‡(Romance Languages and Literature, Comparative Literature), M.A., 1971, Ph.D., 1976, Harvard; sixteenth- and seventeenth-century literature of Spain.

Assistant Professors

Bentz, Marilyn G.,* 1968, ‡(American Indian Studies), M.S.W., 1967, Illinois; Ph.D., 1984, Washington; anthropological and ethnographical studies, American Indians.

Cummings, Katherine,* 1985, ‡(English), M.A., 1979, Montclair State; Ph.D., 1985, Wisconsin (Madison); feminist, psychoanalytical and literary theory, modern and contemporary literature.

DiStefano, Christine,* 1985, ‡(Political Science), Ph.D., 1984, Massachusetts (Amherst); political and feminist theory.

Frankenberg, Ruth, 1988, M.A., Cambridge (England); Ph.D., 1988, California (Santa Cruz); feminist theory and research methods, white women and racism, multiracial women's studies curriculum.

Salas, Elizabeth, 1987, ‡(American Ethnic Studies), M.A., 1977, Alabama State; Ph.D., 1987, California (Los Angeles); United States women's history, Chicana history.

Steele, Cynthia,* 1986, ‡(Romance Languages and Literature), M.A., 1979, Ph.D., 1980, California (San Diego); Mexican literature, Spanish-American writers.

Taylor, Gabriela A.,* 1986, ‡(Communications), M.A., 1976, Leicester (England); Ph.D., 1985, Brandeis; mass media, popular culture.

Yee, Shirley, 1988, M.A., 1983, Ph.D., 1987, Ohio; U.S. women's history, Afro-American history, nineteenth-century United States social history.

Course Descriptions

Courses for Undergraduates

WOMEN 200 Introduction to Women Studies (5) *AW Frankenberg* Interdisciplinary course drawing selectively from the following fields: anthropology, art history, economics, history, law, literature, psychology, and sociology. Not open for credit to students who have taken GIS 255 or 256.

WOMEN 206 Philosophy of Feminism (5) *Hartsock* Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, its relation to racial liberation, and ethical issues. Joint with PHIL 206 and POL S 212.

WOMEN 257 Psychology of Sex Differences (5) *A Kenney* Major psychological theories of sex-role development; biological and environmental influences that determine and maintain sex differences in behavior; sex roles in children, sex differences in aggression, cognitive abilities, achievement motivation, affiliation, sexuality. Joint with PSYCH 257. Not open for credit to students who have taken GIS 244. Recommended: PSYCH 101 or 102.

WOMEN 283 Introduction to Women's History (5) *A Yee* Includes units on American, European, and Third World women that examine centers of women's activities, women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Joint with HST 283.

WOMEN 290 Special Topics in Women Studies (2-5, max. 15) Offered occasionally by visitors or resident faculty.

WOMEN 300 Research Methods in Women Studies (5) *Jacobs, Kenney* Selected methods in women studies research. Use of historical documents, literary texts, interviews, and computerized data sets in research on human problems and women's roles. Computer applications in women studies research. Includes drafting proposal for senior thesis project. Prerequisites: 200, 206, or permission of instructor.

WOMEN 310 Women and the Law (5) *A* Focus on the status of women and the law; the legal status of single and married women, the rationale of protective legislation, and the effect of the legal changes such as the Civil Rights Act of 1964 and Equal Rights Amendment. Current cases on abortion, child care, tax laws, Social Security benefits, lesbianism, prostitution, etc. Not open for credit to students who have taken GIS 355.

WOMEN 313 Women in Politics (5) Political theory, historical and contemporary, including writings of the women's liberation movement on the political role of women in society. Empirical studies of the "apolitical" woman; process of political socialization in various cultural contexts; women's participation in political decision making. Joint with POL S 313. Prerequisite: 200 or a political science course.

WOMEN 321 History of Afro-American Women and the Feminist Movement (5) "Feminist Movement" from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Joint with AFRAM 321.

WOMEN 322 Race and Gender: Historical Perspectives (5) *Sp Yee* The intersection of race and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Joint with AES 322.
