# THE UNIVERSITY OF WASHINGTON

[www.washington.edu/home/about.html](http://www.washington.edu/home/about.html)

---

Founded in 1861, the University of Washington is the oldest state-assisted institution of higher education on the Pacific coast. From its original site on a 10-acre tract of wooded wilderness that is now located in downtown Seattle, the campus has grown to comprise 703 acres of trees, landscape, and buildings. Located between the shores of Lake Washington and Lake Union, it is in a residential section of the city that long has been considered one of the most attractive in the nation.

Enrollment at the University in autumn quarter 1999 was 34,450, of which 25,638 were undergraduates and the balance were in professional and graduate programs. Almost 90 percent of the undergraduates enter as freshmen from Washington high schools or as transfer students from Washington community colleges or other colleges and universities in the state. The grade-point average for the regularly admitted freshman class entering in autumn quarter 1998 was 3.63. In 1999, the full-time teaching faculty of the University numbered 3,015 members.

---

## Mission Statement

---

Founded 4 November 1861, the University of Washington is one of the oldest state-supported institutions of higher education on the Pacific coast. The University is comprised of three campuses: the Seattle campus is made up of sixteen schools and colleges whose faculty offer educational opportunities to students ranging from first-year undergraduates through doctoral-level candidates; the Bothell and Tacoma campuses, each developing a distinctive identity and undergoing rapid growth, offer diverse programs to upper-division undergraduates and to graduate students.

The primary mission of the University of Washington is the preservation, advancement, and dissemination of knowledge. The University preserves knowledge through its libraries and collections, its courses, and the scholarship of its faculty. It advances new knowledge through many forms of research, inquiry, and discussion; and disseminates it through the classroom and the laboratory, scholarly exchanges, creative practice, international education, and public service. As one of the nation's outstanding teaching and research institutions, the University is committed to maintaining an environment for objectivity and imaginative inquiry and for the original scholarship and research that ensure the production of new knowledge in the free exchange of diverse facts, theories, and ideas.

To promote their capacity to make humane and informed decisions, the University fosters an environment in which its students can develop mature and independent judgment and an appreciation of the range and diversity of human achievement. The University cultivates in its students both critical thinking and the effective articulation of that thinking.

As an integral part of a large and diverse community, the university seeks broad representation of and encourages sustained participation in that community by its students, its faculty, and its staff. It serves both non-traditional and traditional students. Through its three-campus system and through educational outreach, evening degree and distance learning programs, it extends educational opportunities to many who would not otherwise have access to them.

The academic core of the University of Washington is its College of Arts and Sciences; the teaching and research of the University's many professional schools provide essential complements to these programs in the arts, humanities, social sciences, and natural and mathematical sciences. Programs in law, medicine, forest resources, oceanography and fisheries, library science, and aeronautics are offered exclusively (in accord with state law) by the University of Washington. In addition, the University of Washington has assumed primary responsibility for the health science fields of dentistry and public health, and offers education and training in medicine for a multi-state region of the Pacific Northwest and Alaska. The schools and colleges of architecture and urban planning, business administration, education, engineering, nursing, pharmacy, public affairs, and social work have a long tradition of educating students for service to the region and the nation. These schools and colleges make indispensable contributions to the state and, with the rest of the university, share a long tradition of educating undergraduate and graduate students towards achieving an excellence that well serves the state, the region, and the nation.

Board of Regents  
February 1981; revised February 1998

---

## President's Message

---

*A university is a community of scholars and artists, a place where faculty and students communicate with each other to enrich human understanding. Universities have played an essential role in societies for hundreds of years, promoting learning and culture, generating new knowledge, and training professionals in specialized callings. The University of Washington is one of the finest universities in the world.*

*It is also an exciting place to be, with a lively interplay of teaching, research, and public service. Its contributions to the state, the nation, and the world will continue to grow as we face the challenges of the twenty-first century.*

*Richard L. McCormick*  
Richard L. McCormick, President

# ACADEMIC CALENDAR

## 2000-2001

### Summer Quarter 2000

Full-term and term a classes begin .... June 19  
 Independence Day holiday ..... July 4  
 Term a classes end ..... July 19  
 Term b classes begin ..... July 20  
 Full-term and term b classes end ... August 18

### Autumn Quarter 2000

Classes begin ..... September 25  
 Veterans Day holiday ..... November 11  
 Thanksgiving recess ..... November 23, 24  
 Last day of instruction ..... December 6  
 Final examinations ..... December 7-14

### Winter Quarter 2001

Classes begin ..... January 2  
 Martin Luther King, Jr.'s  
 Birthday holiday ..... January 15  
 Presidents Day holiday ..... February 19  
 Last day of instruction ..... March 9  
 Final examinations ..... March 12-16

### Spring Quarter 2001

Classes begin ..... March 26  
 Memorial Day holiday ..... May 28  
 Last day of instruction ..... June 1  
 Final examinations ..... June 4-8  
 Commencement ..... June 9

## 2001-2002

### Summer Quarter 2001

Full-term and term a classes begin .... June 18  
 Independence Day holiday ..... July 4  
 Term a classes end ..... July 18  
 Term b classes begin ..... July 19  
 Full-term and term b classes end ... August 17

 Seattle, Washington 98195

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran. This policy applies to all programs and facilities including, but not limited to, admissions, educational programs, employment, and patient and hospital services.

Any discriminatory action can be a cause for disciplinary action. Discrimination is prohibited by Presidential Executive Order 11246 as amended; Washington State Governorial Executive Orders 89-01 and 93-07; Titles VI and VII of the Civil Rights Act of 1964; Washington State Law Against Discrimination RCW 49.60; Title IX of the Education Amendments of 1972; State of Washington Gender Equity in Higher Education Act of 1989; Sections 503 and 504 of the Rehabilitation Act of 1973; Americans with Disabilities Act of 1990; Age Discrimination in Employment Act of 1967 as amended; Age Discrimination Act of 1975; Vietnam Era Veterans' Readjustment Act of 1972 as amended; other federal and state statutes, regulations; and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is under the direction of the Assistant Provost for Equal Opportunity, Dr. Helen Remick, University of Washington, Equal Opportunity Office, Box 354560, 4045 Brooklyn Avenue Northeast, Seattle, WA 98195, (206) 685-3263/V or 543-6452/TTY.

Additional information concerning the equal opportunity and affirmative action policies and procedures, including complaint procedures, is in the Operations Manual, D46.1, D46.2, D46.3, and D46.4, and the UW Handbook, Vol. IV, p. 44.

Information on reasonable accommodation for students with disabilities is available from the following offices: for classroom and academic-related accommodation, call Disabled Student Services, (206) 543-8924/V, (206) 543-8925/TTY, or email at [uwdss@u.washington.edu](mailto:uwdss@u.washington.edu); for other non-academic related information and accommodation, call Disability Services Office, (206) 543-6450/V, (206) 543-6452/TTY, or email at [access@u.washington.edu](mailto:access@u.washington.edu).

Copies may be purchased from the University Book Store, 4326 University Way Northeast, Seattle, Washington 98105, (206) 634-3400.

## USING THE GENERAL CATALOG

The material in this catalog has been compiled and organized to provide the reader with a comprehensive overall view of the programs and courses at the University of Washington. It includes academic requirements and procedures necessary for admission and graduation. Information on programs, faculty, and courses is usually arranged in alphabetical order following departmental structure within each school or college.

Because curriculum revisions and program changes usually occur during the two-year period the *General Catalog* is in circulation, students should assume the responsibility of consulting the appropriate academic unit or adviser for more current or specific information. The *General Catalog* is updated regularly at the University's Web site ([www.washington.edu](http://www.washington.edu)). The quarterly *Time Schedule* gives information on courses offered, class hours, and classroom locations, and has the latest calendar dates, fees, and details on registration.

Contact information has been provided wherever possible. All phone numbers, unless noted, are in the 206 area code and are voice numbers. Unless noted, all addresses with @ are email addresses. Many programs and offices at the University can be found through the University's homepage at <http://www.washington.edu>.

All announcements in the *General Catalog* are subject to change without notice and do not constitute an agreement between the University of Washington and the student.

Dates in this calendar are subject to change without notice. A detailed calendar with the latest information on registration is printed in each issue of the quarterly *Time Schedule* and can be found online at [www.washington.edu/students/reg/calendar.html](http://www.washington.edu/students/reg/calendar.html)

[www.grad.washington.edu](http://www.grad.washington.edu)

The University of Washington awarded its first graduate degree, a Master of Arts in classical languages, in 1885 and its first Doctor of Philosophy degree, in chemistry, in 1914. Since those beginnings, the University has conferred more than 65,000 master's degrees and 14,000 doctoral degrees, exclusive of medical, dental, and first legal doctorates.

Through its graduate programs, the University fulfills several functions vital to a healthy society: the advancement of human knowledge is facilitated through the development and conduct of scientific research; the education of scholars, teachers and a multitude of professionals in areas that cut across the academic spectrum insure that knowledge and information are communicated to the general public for the use and benefit of all. These functions ensure that some of the problems and needs confronting society are resolved.

To manage its developing graduate programs, the Graduate School was created as a temporary entity in 1899 and was permanently established in 1910. The purpose of the Graduate School is to define and support excellence in graduate education and the research and scholarly activities associated with it. Graduate study is guided by the Dean of the Graduate School and an ever-changing graduate faculty of more than 3,000 members who are selected for their interest in and concern for graduate education at the University of Washington. There are now more than 8,000 graduate students in residence working toward master's or doctoral degrees in 96 separate University programs. A growing number of interdisciplinary graduate degree and graduate certificate programs have been established through the efforts of interested faculty members.

Graduate School policy is enacted through an elected council of ten graduate-faculty members who are chosen from among the graduate-faculty population and who advise the Dean on matters of policy and procedure. Complementary to that input, each degree-offering unit within the University appoints a graduate program coordinator who serves as an important link between the unit and the Graduate School, advising students on questions concerning Graduate School and departmental degree requirements.

The Graduate School also has a number of responsibilities that relate to its primary ones, such as graduate program review, Graduate Opportunities and Minority Achievement Program, the administration of the Graduate School Fund and certain fellowship programs, as well as such central facilities as the University of Washington Press, and the Walker-Ames and the Jessie and John Danz distinguished visiting professorships.

The University is committed to providing greater opportunities for advanced study by women and members of ethnic minority groups. Within the Graduate School, the Graduate Opportunities and Minority Achievement Program actively solicits applications for admission, facilitates their review, and helps with various procedures related to the enrollment of minority graduate students. The division offers financial aid to students who need such help. In addition to a special appropriation of funds by the Washington State Legislature to encourage the recruitment and retention of ethnic minority students in areas of underrepresentation, the division administers several federal and private scholarship programs which provide financial aid and contribute to the overall environment of support for minority graduate students.

## Graduate Degree Programs

The Office of Academic Programs in the Graduate School contributes to the University's educational and research mission by conducting quality assessment of proposed and continuing education programs at the graduate and undergraduate level as well as research institutes and centers. Through program review, it ensures academic program quality, including all aspects of an academic unit, and promotes communication among academic units throughout the three-campus system. The principle mechanism by which this is achieved is through a process of peer review. Reviews of degree programs are conducted on a ten-year cycle, or at predetermined shorter intervals. For further information, see Graduate School Memorandum No. 7: Periodic Review of Existing Degree Programs at [www.grad.washington.edu](http://www.grad.washington.edu) and the schedule of program reviews at [www.grad.washington.edu/Acad/Academicprograms.htm](http://www.grad.washington.edu/Acad/Academicprograms.htm), or contact the Office of Academic Programs in the Graduate School at (206) 685-3519.

## Graduate Admissions

The Office of Graduate Admissions  
200 Gerberding, Box 351245  
University of Washington  
Seattle, WA 98195-1245  
(206) 543-5929; FAX (206) 543-8798  
uwgrad2@grad.washington.edu (U.S. citizens and residents) or  
intlgrad@u.washington.edu (international)

Additional program information is available on the World Wide Web at [www.grad.washington.edu](http://www.grad.washington.edu).

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam-era veteran in accordance with University policy and applicable federal and state statutes and regulations.

Application to the UW through the Office of Graduate Admissions is available for three types of students. It is important to understand the distinctions between the categories.

- A **graduate student** is a person working toward a master's or doctoral degree or earning a school administrator's credential. Students must be admitted to this status in order to earn a degree. The Application for Admission to the Graduate School is obtained from the program to which you wish to apply.
- A **visiting graduate student** is a person who plans to transfer a limited number of graduate credits earned at the UW to another institution where he or she is actively pursuing a graduate degree. Admission is based in part on availability of resources. Visiting graduate applicants must have been admitted to another recognized graduate school, be currently pursuing a graduate degree there, and be in good standing. A Certificate of Status signed by the home institution is required. The Application and Certificate should be obtained directly from the Office of Graduate Admissions at the address above. Individual departments may require additional materials, such as transcripts, GRE/GMAT scores, a statement of purpose, or a list of desired course work.
- Some graduate programs have chosen to offer admission to **graduate nonmatriculated students**. These students are not presently seeking a graduate degree but may take a maximum of 12 credits earned in this category that may be applied to degree requirements should they later be accepted into a graduate program. Applicants should meet minimum Graduate School admission requirements but *admission as a graduate nonmatriculated student does not imply admission to a graduate degree program*. The Application to Graduate Nonmatriculated Status must be obtained from the program to which you wish to apply. Official sealed transcripts from all collegiate institutions previously attended must be sent to the Graduate Nonmatriculated Office, Box 351245, University of Washington, Seattle, WA 98195-1245. (Refer to Graduate School Memorandum No. 37 for further information.)

Admission to the UW is necessarily a selective process. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or an equivalent degree from a foreign institution. The student's record should be a strong one with an average grade of "B" or a 3.00 grade-point, or better. The primary criterion and the priority for admission of new applicants into a

graduate program is the applicant's ability, as decided by the appropriate faculty, to complete the graduate program expeditiously with a high level of achievement. One aspect of meeting this criterion is the matching of interests between applicants and faculty. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

1. Priority for admission of applicants into a graduate degree program based upon the applicant's apparent ability, as determined by the University, to complete the program with a high level of achievement.
2. No practice may discriminate against an individual because of race, color, creed, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran.
3. Sustained efforts shall be made to recruit qualified applicants who are members of groups that are underrepresented in certain disciplines.
4. All applicants to a degree-offering unit shall be processed through the same set of procedures to assure that all applicants are evaluated on their individual merits.
5. Tests and criteria for admission should relate to the actual requirements of the graduate program. Reasonable accommodation for testing conditions may be made to compensate for relevant disabilities.
6. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors may vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:
  - a. Grades earned, especially for subjects in or closely related to the field of the applicant's proposed graduate work.
  - b. Scores on the Graduate Record Examination (GRE) Verbal, Quantitative, and Analytical Tests, on the GRE Advanced Test, on other tests related to the applicant's field, and on other aptitude tests which may be required.
  - c. Personal interviews of the applicant by the department admissions committee.
  - d. The career objectives of the applicant and the extent to which the graduate degree program may be expected to prepare the applicant for those objectives.
  - e. Written and oral recommendations from persons who are qualified to evaluate the applicant's academic record and promise.
  - f. The applicant's degree objective (i.e., master's degree, doctoral degree, or a master's followed by a doctoral degree).
  - g. Activities or accomplishments; educational goals; prior employment experience; living experiences, such as growing up in a disadvantaged or unusual environment; special talents.
  - h. Academic accomplishments in light of the applicant's life experiences and special circumstances. These experiences and circumstances may include, but are not limited to disabilities, low family income, first generation to attend college, need to work during college, disadvantaged social or educational environment, difficult personal and family situation or circumstances, and refugee status or veteran status.

Importance given to these factors will vary among degree programs.

Most Graduate School admissions are for summer or autumn quarters. Admissions for winter and spring quarters may be severely restricted due to considerations of space. The following are graduate admissions closing dates. *It is important to remember that individual departments often have much earlier deadlines which supersede those listed below, particularly for autumn quarter.*

- Autumn Quarter—July 1
- Winter Quarter—November 1
- Spring Quarter—February 1
- Summer Quarter—May 15

Each academic program at the UW has a graduate program coordinator who is responsible for providing advice, guidance, and assistance to applicants as well as to students working toward graduate degrees. Prospective graduate students are urged to contact the graduate program coordinator in their program of interest for information about any aspect of graduate study, including research, curriculum, faculty, and financial support in the form of teaching and research assistantships, grants, and scholarships. Information about graduate programs is available at [www.grad.washington.edu](http://www.grad.washington.edu).

**Admission Process**

The application forms for both graduate and graduate nonmatriculated status must be obtained directly from the department. Visiting graduate applications are available from the Office of Graduate Admissions. *It is very important to submit all application documents in time to meet departmental deadlines as these will supersede graduate admissions deadlines.*

**Required Examinations**

The Graduate Record Examination (GRE) is required for admission as a graduate student except in the following circumstances:

- Applicants to Art, Dance, Drama, and to the Master of Music and Doctor of Musical Arts degree in Music.
- Applicants holding earned doctorates (such as Ph.D., D.D.S., M.D., Ed.D., J.D.) from accredited U.S. institutions.
- Applicants to the M.B.A., M.P.Acc., or Ph.D. degrees in the School of Business Administration, who must submit scores from the Graduate Management Admission Test (GMAT).

Scores must be received directly from the Educational Testing Service.

For further information you may write to:  
 Graduate Record Examinations  
 Educational Testing Service  
 P.O. Box 6000  
 Princeton, NJ 08541-6000  
 (609) 771-7670 or (510) 654-1200  
 gre-info@ets.org  
 www.gre.org

**International Applicants**

Email inquiries from international applicants should be sent to [intlgrad@u.washington.edu](mailto:intlgrad@u.washington.edu). You may also refer to the World Wide Web at [www.grad.washington.edu](http://www.grad.washington.edu) for further information.

In addition to the other requirements for all applicants, a minimum score of 500 on the Test of English as a Foreign Language (TOEFL) or 173 on the computer-based test (TOEFLC) must be presented by applicants who are not citizens of the United States unless they meet one of the following exceptions:

- Citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom.
- Applicants holding bachelor's or advanced degrees from accredited institutions in the United States or in one of the countries listed above.

Applicants offered admission with TOEFL scores between 500 (173 TOEFLC) and 580 (237 TOEFLC) must fulfill an English as a Second Language (ESL) requirement before a graduate degree will be conferred by the University of Washington.

With the exception of citizens of the countries listed above, all international and immigrant status applicants who intend to apply for teaching assistantships must also take the Test of Spoken English (TSE).

Due to the time required for evaluation of applications, overseas applicants for autumn quarter are strongly encouraged to submit the application and transcripts to the Office of Graduate Admissions no later than the prior November 1. Applications received after this date will be processed as soon as possible but significant delays may result.

**Registration**

After successful applicants have been offered admission, the Registration Office sends a request for a \$100 Enrollment Confirmation Deposit to indicate the intent to register. This nonrefundable deposit will apply toward the first quarter's tuition.

The University provides registration services through STAR (Student Telephone Assisted Registration), a touch-tone telephone registration system.

Once admitted, graduate students are expected to maintain registered or on-leave status until the degree is conferred. (See section on Continuous Enrollment.)

**Financial Aid for Graduate Students**

Students applying for fellowships, traineeships, and assistantships or associateships must make certain that complete transcripts and other credentials are on file by February 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and

appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program coordinator of the appropriate department.

**Fellowships, Traineeships, and Scholarships**

A limited number of fellowships, traineeships, and scholarships is available through individual departments to outstanding students in fields of study leading to advanced degrees. Application forms may be obtained from the graduate program coordinators in the departments.

The Graduate School and the University of Washington Libraries have collaborated to provide the Grants and Funding Information Services (GFIS) for University of Washington graduate students (and faculty) who are seeking any type of general research funding for use at the University of Washington. GFIS promotes awareness of external funding information resources by providing drop-in educational consultations, maintaining a print collection for grant seekers, and offering quarterly seminars highlighting Web-based grant-seeking tools. GFIS works with students and faculty to devise a search strategy, helping to focus efforts and locate available resources. GFIS also will demonstrate searching on several online databases and how to use its print collection of funding resource books so that students can perform future searches based on changing funding needs. GFIS also maintains resources to assist in the proposal-writing process, including grant-writing handbooks and links to online resources.

To set up a consultation, email [gfis@u.washington.edu](mailto:gfis@u.washington.edu), call (206) 616-3084, or submit a research profile using GFIS's online form. For funding seminar schedules, check the Web at [www.lib.washington.edu/gfis/gsis.html](http://www.lib.washington.edu/gfis/gsis.html).

**Graduate Student Service Appointments**

The University provides for the appointment of many graduate students as teaching, research, and staff assistants; predoctoral associates; predoctoral instructors; and predoctoral lecturers. Approximately 3,000 such appointments were made during the past year.

The University's policy regarding these appointments is set forth in detail in Executive Order 28. Copies of this statement are available from the graduate program coordinator or the Graduate School, or can be obtained from the Graduate School Web site at [www.grad.washington.edu/fellow/executor28.htm](http://www.grad.washington.edu/fellow/executor28.htm). Some of the information is provided below.

Appointments are granted only to graduate students who have carefully defined educational goals and who exhibit the highest intellectual competence and attainment. Succeeding appointments may be made if the student maintains high scholarship and continues to make satisfactory progress toward the degree.

Graduate appointments are granted to graduate students only. An initial appointment may be offered to a student before being admitted formally to the Graduate School, but the appointment is contingent upon admission to graduate status before the beginning of the appointment.

**2000-2002 Graduate Student Service Appointments**

Students holding these appointments for at least 20 hours per week and for at least five of the six pay periods of an academic quarter will receive a waiver of the resident operating fee (ROF) portion of "tuition and fees" as well as a waiver for the \$40 per quarter technology fee. Appointees who are not state residents are treated as residents for tuition purposes during the term of the appointment. Appointees are required to pay approximately \$143 tuition per quarter.

All appointees who are eligible for the ROF waiver also receive paid graduate appointee health insurance. See [www.grad.washington.edu/Insurance/insurance.htm](http://www.grad.washington.edu/Insurance/insurance.htm) for details.

Salary for Half-Time Service  
 (20 hours per week)

Effective July 1, 1999 – June 30, 2000

Title	Monthly salary	Academic year (9 months) salary
Teaching Assistant	\$1,160	\$10,440
Predocctoral Teaching Associate I	1,243	11,187
Predocctoral Teaching Associate II	1,339	12,051
Predocctoral Instructor*	1,339	12,051
Predocctoral Lecturer*	1,339	12,051
Research Assistant	1,160	10,440
Predocctoral Research Associate I	1,243	11,187
Predocctoral Research Associate II	1,339	12,051
Predocctoral Researcher*	1,339	12,051
Staff Assistant	1,160	10,440
Predocctoral Staff Associate I	1,243	11,187
Predocctoral Staff Associate II	1,339	12,051

\* Minimum

Graduate students appointed to the beginning level of graduate teaching appointments are not permitted to be in overall charge of a course, but are given an appropriate degree of responsibility and supervision of laboratory or classroom work so that they may be introduced to teaching activities gradually and effectively. Student appointees may also serve as assistants in research activities for which a faculty member is responsible.

Two special categories for teaching appointments and one for research appointments are provided above the predoctoral associate level: Predoctoral Instructor, for the graduate student who has achieved Candidate status and is ready for increased teaching responsibility; Predoctoral Lecturer, for a mature and competent graduate student who, though he or she need not be a Candidate, has had exceptional previous teaching or other professional experience; and Predoctoral Researcher, for the student who has special skills or qualities obtained outside of his or her experience as a graduate student or who carries major responsibilities in relation to research activities. For the 1999-2000 academic year these appointments carry a minimum stipend of \$1,339 per month (half-time) with no designated maximum so that the stipend may be adjusted to a level appropriate to the appointee's experience and his or her teaching and research responsibilities.

International students with teaching appointments (Teaching Assistant, Predoctoral Teaching Associate I and II, Predoctoral Instructor, Predoctoral Lecturer) must meet a spoken-English requirement before they may be given classroom duties.

An additional series of appointments titled Graduate Staff Assistant and Predoctoral Staff Associates I and II is provided for University service activities that are not appropriately described as teaching or research but are closely related to the student's field of advanced study. Appointments of specific graduate students to these positions may not be made until after the position itself has been specifically approved.

Students who hold any of the above appointments are required to render 20 hours of service per week to the University. The appointments may be on a nine-month basis and ordinarily cover the period from September 16 through June 15. Some of these appointments may be extended to 11 or 12 months. Graduate student appointments do not provide for paid vacations or sick leave. Students who accept these University service appointments normally confine their employment to such appointments.

A graduate student service appointee must register for, and carry throughout each quarter except summer quarter, a minimum of 10 credits in formal courses or in research, thesis, or dissertation work. These credits must be in courses that are applicable toward an advanced degree. For summer quarter, the requirement is at least 3 credits.

### Work Study Graduate Assistantships

Graduate students who are eligible for the need-based college work-study program may qualify for work study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the February 28 deadline to be considered for these positions. Information is available from the Office of Student Financial Aid.

### Employment Opportunities

The campus offers other job opportunities for graduate students. Students may apply directly to the chair of the department in which they hope to work or to the Student Employment Office. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs.

Advisory positions in University residence halls paying room and board are available for single graduate students, both men and women. Additional information may be obtained from the Director of Residence Halls Programs, 301 Schmitz Hall.

Spouses of students also may apply for regular full- and part-time University employment. These positions cover a wide range of occupations and offer pay comparable to the prevailing salaries in the community. Some carry such fringe benefits as vacations, sick leave, and opportunities to enroll in University courses. Inquiries may be directed to the Staff Employment Office, 1320 Northeast Campus Parkway.

### Loans

Long-term educational loans are available to graduate students through the Federal Perkins Student Loan, the Federal Direct Stafford Loan, and the Federal Direct Unsubsidized Stafford Loan programs. An application form for these programs (the Free Application for Federal Student Aid, or FAFSA) is available in the office of Student Financial Aid, Box 355880, 105 Schmitz Hall, (206) 685-9395, or from the U.S. Department of Education Web site at [www.ed.gov/offices/OPE/express.html](http://www.ed.gov/offices/OPE/express.html). The Office of Student Financial Aid may also be reached by email ([osfa@u.washington.edu](mailto:osfa@u.washington.edu)) or on the Web at [www.washington.edu/students/osfa/](http://www.washington.edu/students/osfa/). The application deadline is February 28 for the following autumn quarter.

*Students should meet the application deadline even if they have not yet been admitted to the Graduate School.*

The Federal Perkins Student Loan and the subsidized Federal Direct Stafford Loan are awarded to students who demonstrate financial need. Students who do not qualify for need-based assistance may qualify for Federal Direct Unsubsidized Stafford Loans. For more detailed information on these loan programs, visit the Office of Student Financial Aid Web site at [www.washington.edu/students/osfa/](http://www.washington.edu/students/osfa/).

Short-term emergency loan funds also are available through the Office of Student Financial Aid. Several different types of short-term loans are possible. More information is available from the Office of Student Financial Aid, Short-Term Loans, 172 Schmitz Hall, (206) 685-1282. The Graduate School also has a short-term emergency loan available. For more information, call (206) 543-5900.

### Graduate Opportunities and Minority Achievement Program

The Graduate Opportunities and Minority Achievement Program (GOMAP) works to develop and maintain a diverse and welcoming climate from which all students may benefit. As part of its duties, GOMAP oversees the Graduate School Fund for Excellence and Innovation (see Special Programs and Facilities) and assists University of Washington graduate programs in developing and maintaining efforts

designed to increase the enrollment of students from ethnic minority groups that have been historically underrepresented in graduate programs.

Recognizing that financial aid in the form of scholarships, grants, and fellowships is important in achieving and maintaining diversity, the GOMAP administers a variety of need- and merit-based fellowships. Merit-based awards are generally made through the nomination and support of the department in which the student is enrolled. Need-based awards are based upon an evaluation of the student's need as established by the Free Application for Federal Student Aid (FAFSA) and the Office of Student Financial Aid. Students who have varied cultural experiences or educationally or economically disadvantaged backgrounds and who will therefore contribute to the intellectual and social enrichment of the University, are encouraged to apply. Students must be U.S. citizens or permanent residents to be eligible.

Financial assistance from individual departments may also be available. Students should apply directly to the chair of their department. Students are also encouraged to make use of the University's Grants and Funding Information Service located in Suzzallo Library.

Further information on fellowships administered by GOMAP may be obtained by writing to the University of Washington, Graduate School, Graduate Opportunities and Minority Achievement Program, Box 351240, Seattle WA 98195-1240, or emailing gomap@u.washington.edu.

All awards are contingent upon the student's admission to the UW Graduate School.

## Graduate Degree Policies

Usually focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships, and participation in research. Graduate programs leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees emphasize the development of the student's ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many master's and all doctoral programs culminate in the presentation of a thesis or dissertation conveying the results of the independent study and research carried out by the student. A master's thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student's field, be presented in scholarly form, and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems. The student must defend the doctoral dissertation in a Final Examination conducted by a faculty committee and open to all other graduate-faculty members. A member of the graduate faculty from some other discipline participates as an official representative of the entire graduate faculty in all aspects of the student's program, including various major evaluations such as the General Examination and Final Examination.

### Graduate Program Coordinator

The graduate student's initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the graduate faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

### Graduate Courses

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate nonmatriculated students, and are given numbers from 500 through 800. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only. Courses at the 300 level are not included in the calculation of grade-point average (GPA) and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master's or doctoral degree. Approved 400-level courses are accepted as part of the major as well as minor or supporting fields. Courses numbered 498 and entitled Special Topics or Special Projects normally are not applicable to a graduate degree program if addressed primarily to introductory content and undergraduate students. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum No. 36 offers additional information on graduate courses. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of any combination of courses numbered 600, 700, or 800.

### Repeating Courses

Graduate students may repeat any course. Both the first and second grades are included in the cumulative GPA. Subsequent grades are not included, but appear on the permanent record. The number of credits earned in the course apply toward degree requirements only once.

### Grading System for Graduate Students

In reporting grades for graduate students, units that offer graduate degrees use the system described herein. Grades are entered as numbers, the possible values beginning at 4.0 and decreasing by one-tenth increments until 1.7 is reached. Grades below 1.7 are recorded as 0.0 by the Registrar. A minimum grade of 2.7 is required in each course that is counted toward a graduate degree. A minimum GPA of 3.00 is required for graduation.

Correspondence between number grades and letter grades is as follows:

Numeric grade-point equivalent	Letter grade	Numeric grade-point equivalent	Letter grade
4.0	A	2.8	B-
3.9		2.7	
3.8	A-	2.6	
3.7		2.5	
3.6		2.4	C+
3.5		2.3	
3.4	B+	2.2	
3.3		2.1	
3.2		2.0	C
3.1		1.9	
3.0	B	1.8	
2.9		1.7	
		1.6-0.0	E

The following letter grades also may be used:

*I Incomplete.* An incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control.

To obtain credit for the course, a student must successfully complete the work and the instructor must submit a grade. In no case may an incomplete be converted into a passing grade after a lapse of two years or more. An incomplete received by a graduate student does not automatically convert to a grade of 0.0 but will remain a permanent part of the student's record.

*N No grade.* Used only for hyphenated courses and courses numbered 600 (Independent Study or Research), 601 (Internship), 700 (Master's Thesis), 750 (Internship), or 800 (Doctoral Dissertation). An *N* grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or supervisory committee chair should change the *N* grade(s) to one reflecting the final evaluation.

*S/NS Satisfactory/not satisfactory.* A graduate student, with the approval of the graduate program coordinator or supervisory committee chair, may elect to be graded *S/NS* in any numerically graded course for which he or she is eligible. If a student does not so elect, then the student is graded on a numerical basis. If approval is granted, the student must elect the *S/NS* option either when registering or no later than the end of the seventh week of the quarter.

*CR/NC Credit/no credit.* With the approval of the faculty in the academic unit, any course may be designated for grading on the credit/no-credit basis by notice in the appropriate *Time Schedule*. For such courses, the instructor submits a grade of *CR* or *NC* to be recorded by the Registrar's Office for each student in the course at the end of the quarter. All courses numbered 600, 601, 700, 750, and 800 may be graded with a decimal grade, *CR/NC*, or *N* at the instructor's option.

*W Course withdrawal.*

*HW Hardship withdrawal.* Refer to the University of Washington *Time Schedule* for procedures and dates, or visit the Web at [www.washington.edu/students/reg/wdoffleave.html#Q3](http://www.washington.edu/students/reg/wdoffleave.html#Q3).

Of the minimum number of credits required for a graduate degree, a graduate student must show numerical grades in at least 18 quarter hours of course work taken at the UW. These numerical grades may be earned in approved 400-level courses and 500-level courses.

The student may petition the Dean of the Graduate School to modify the procedures described above. The petition should be accompanied by comments and recommendations from the graduate program coordinator.

## Scholarship

A cumulative GPA of 3.00 or above is required to receive a degree from the Graduate School. A graduate student's GPA is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of *S*, *NS*, *CR*, *NC*, and *N* are excluded, as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 GPA, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School. Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

(See Graduate School Memorandum No. 16 for additional information.)

## Withdrawal Policy

Refer to the University of Washington *Time Schedule* for procedures and dates, or look on the Web at [www.washington.edu/students/reg/wdoffleave.html](http://www.washington.edu/students/reg/wdoffleave.html)

## Language Competency Requirements and Examinations

Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly and research-oriented programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy.

Requirements for foreign-language competence are established by the graduate faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may have special significance to the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign-language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University's language-competence requirements in French, German, and Spanish may be satisfied by successful completion of the standardized examinations given by the Educational Assessment Office. Other foreign language examinations are also given at the UW.

It is assumed that citizens of certain English-speaking countries who are admitted to the Graduate School are competent in the English language; citizens of non-English-speaking countries must demonstrate a satisfactory command of English, both for admission and for appointment as teaching assistants.

Refer to Graduate School Memorandum No. 8, *English Language Competence for Admission to the Graduate School* ([www.grad.washington.edu/Acad/gsmemos/gsmemo08.htm](http://www.grad.washington.edu/Acad/gsmemos/gsmemo08.htm)) for more information.

## Enrollment Requirement

The enrollment requirement for the master's degree is 30 credits at the University of Washington

For the doctoral degree, the enrollment requirement is 90 credits, 60 of which must be taken at the University of Washington. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment. Doctoral study requires an immersion in an academic field and its intellectual community. Degree-granting units may require a period of full-time or on-site study.

Only courses at the 400-, 500-, 600-, 700-, and 800-levels can be applied to enrollment or course credit in the major field for advanced degrees (please see Graduate Courses earlier in this section regarding courses numbered 498 and 499). Courses at the 300-level are not applicable to enrollment or course credit toward advanced degrees except when applied by permission of the graduate program coordinator or supervisory committee toward the graduate minor or supporting courses. Courses numbered below 300 are not applicable to enrollment or course credit for advanced degrees.

## Final Quarter Registration

A student must maintain registration as a full- or part-time graduate student at the University for the quarter the master's degree, the Candidate certificate, or the doctoral degree is conferred.

A student who does not complete all degree requirements by the last day of exam week must be registered for the following quarter.

## Continuous Enrollment and Official On-Leave Requirement

### Policy

To maintain graduate status, a student must be enrolled on a full-time, part-time, or On-Leave basis from the time of first enrollment in the Graduate School until completion of all requirements for the graduate degree. The student must be registered when applying for the master's degree, the passing of the master's final examination, or doctoral General or Final Examinations, the filing of the thesis or dissertation, and the receiving of the degree. Summer quarter On-Leave enrollment is automatic for all graduate students who were either registered or on-leave the prior spring quarter. Failure to maintain continuous enrollment constitutes evidence that the student has resigned from the Graduate School.

A student's petition for On-Leave status must be approved by the departmental graduate program coordinator or alternate and submitted to the Registration Office no later than the fifth day of the quarter. To be eligible for On-Leave status, the student must have registered for, and completed, at least one quarter at the UW and have been registered and completed the previous quarter, or have been officially On-Leave (except summer quarter). An On-Leave student is entitled to use the University Libraries and to sit for foreign-language competence examinations, but is not entitled to any of the other University privileges of a regularly enrolled and registered full- or part-time student. The student pays a nonrefundable fee to obtain On-Leave student status covering four successive academic quarters or any part thereof. An On-Leave student returning to the University on or before the termination of the period of the leave must file a Returning Student Reenrollment Application (available at 225 Schmitz) by the deadline stated on the form and register in the usual way as a full- or part-time student (see Graduate School Memorandum No. 9 for procedures). A student who returns before the termination of the On-Leave period and maintains registration for any part of a quarter cancels On-Leave status. Please note: Periods spent On-Leave are included as part of the maximum time periods allowed for completion of a graduate degree.

### Readmission

A student previously registered in the Graduate School who has failed to maintain graduate student status but who wishes to resume studies must file an application in person or by mail for readmission to the Graduate School by the regularly published closing dates. If the student is readmitted, registration will occur during the usual registration period. If the student has attended any other institution during the period when not registered at the UW, official transcripts in duplicate of the student's work must be submitted. An application for readmission carries no preference and is treated in the same manner as an application for initial admission, including the requirement of payment of the application fee.

The Graduate School normally allows six years to complete requirements for a master's degree and ten years for a doctoral degree. Periods spent On-Leave or out of status are included.

## Concurrent Degree Programs

### Formal Concurrent Degree Programs

Concurrent programs are defined as a pair of programs that may be taken at the UW by a postbaccalaureate student resulting in the satisfaction of the requirements for either two graduate degrees or a graduate and a professional degree. Rather than sequentially completing first one degree and then the other, the student's time and the University's resources may sometimes be conserved by providing arrangements that permit the student to proceed in a coordinated way toward completion of the degree objectives.

These specific programs have been formally approved and students are coded with the concurrent codes.

To earn two master's degrees, a student must complete two separate sets of minimum Graduate School degree requirements of 36 credits each for a total of 72 credits. If a program requires more than 36 credits for the master's degree, a graduate student, with prior approval of both graduate programs, may apply a maximum of 12 credits beyond 36 earned in one program toward the master's degree in the second program. Thus, the minimum number of additional credits for the second degree, with these 12 approved credits, is 24. Up to 12 credits earned toward a Ph.D. degree may be counted toward a master's degree in another program with the approval of both degree-granting units.

### Informal Concurrent Degree Programs

Students in these programs pursue two degrees from different departments simultaneously. These programs have not been approved as formal concurrent programs, but students complete the same requirements as in the formal concurrent programs.

Students choosing this option must complete an Informal Concurrent Degree Application, which may be obtained from the Graduate Student Services Office, 229 Gerberding Hall.

Graduate School Memorandum No. 35: Concurrent Degree Programs contains additional information and is available from the Academic Programs office in the Graduate School or may be found through the Graduate School homepage at [www.grad.washington.edu](http://www.grad.washington.edu).

## Master's Degree

### Summary of Requirements

It is the responsibility of each master's candidate to meet the following Graduate School minimum requirements:

- Under a thesis program, a minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis) must be earned. Under a non-thesis program, a minimum of 36 or more quarter credits of course work must be earned.
- At least 18 of the minimum 36 quarter credits for the master's degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be for 700, Master's Thesis.)
- Numerical grades must be received in at least 18 quarter credits of course work taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- A minimum of 30 credits must be earned at the University of Washington.
- In a thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 9 credits of thesis (700). With the exception of summer, students are limited to a maximum of 10 credits per quarter of thesis (700).
- A final master's examination, either oral or written, as determined by the student's supervisory committee, must be passed, if it is a departmental requirement.
- Any additional requirements imposed by the graduate program coordinator in the student's major department or by the student's supervisory committee must be satisfied. A master's degree student usually takes some work outside the major department. The graduate program coordinator in the major department or the student's supervisory committee determines the requirements for the minor or supporting courses.
- The graduate student must apply for the master's degree at the Graduate School within the first two weeks of the quarter in which he or she expects the degree to be conferred, in accordance with Application for the Master's Degree, as described below.
- The graduate student must maintain registration as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).
- All work for the master's degree must be completed within six years. This includes quarters spent On-Leave or out of status and applicable work transferred from other institutions (see detailed information under Transfer Credit).

- A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.

### Second Master's Degree Requirement

A second master's degree may be earned at the UW by completing an additional separate set of requirements. Please refer to Concurrent Degree Programs earlier in this section and to Graduate School Memorandum No. 35 for more specific information.

### Transfer Credit

A student working toward the master's degree may petition the Dean of the Graduate School for permission to transfer to the UW the equivalent of a maximum of 6 quarter credits of *graduate-level* course work taken at another recognized graduate school. These credits may not have been used to satisfy requirements for another degree. The petition must include a written recommendation from the graduate program coordinator and an *official* transcript indicating completion of the course work. Transfer credits are not entered on the UW transcript.

Approved transfer credits are applied toward the total credit count for the master's degree only. (Transfer credits are not applicable toward a doctoral degree.) The 18 quarter credits of numerically graded course work, and the 18 quarter credits of 500-level-and-above course work may not be reduced by transfer credit.

UW students who are within 6 credits of completing their undergraduate degree and who have met the requirements for admission to the Graduate School may register the quarter immediately preceding admission to Graduate School for up to 6 credits in 500-level courses in addition to the last 6 credits they require of undergraduate work. The graduate program which has admitted the student must approve registration for the courses. The student, after admission to the Graduate School, must file a petition with the Dean of the Graduate School to transfer the 6 credits.

The student must also provide a letter from the Office of Graduation and Academic Records stating that these credits have not been applied toward his or her undergraduate degree.

Credit taken as a nonmatriculated student or postbaccalaureate student at the UW may not be transferred into a graduate program. Credit by either independent study through correspondence or advanced credit examinations is not transferable.

### Thesis Program

The master's thesis should be evidence of the graduate student's ability to carry out independent investigation and to present the results in clear and systematic form. Two copies of the thesis, normally written in the English language, along with the appropriate forms signed by the members of the supervisory committee from the student's graduate program, must be submitted to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are completed. The faculty in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly *before* the student begins writing the thesis. The thesis must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School for consultation during the thesis preparation process.

*A \$25 binding fee is payable at 129 Schmitz Hall before the thesis is submitted to the Graduate School.*

### Non-thesis Programs

The faculty in some graduate programs have arranged programs of study for the master's degree that do not require the preparation of a thesis. These non-thesis programs normally include a more comprehensive plan of course work for more extensive examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

### Final Examination for Master's Degree

As soon as is appropriate, the graduate faculty in the student's graduate program appoints a supervisory committee, consisting of two to four members. The chair and at least one-half of the total membership must be members of the graduate faculty (see Graduate School Memorandum No. 13). The committee chair arranges the time and place of the final examination, the results of which must be reported to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are met. At least two graduate-faculty members of the committee, including the chair, must sign the Master's Application (warrant). If the exam is not satisfactory, the committee may recommend to the Dean of the Graduate School that the student be allowed to take another examination after a further period of study.

### Application for Master's Degree

The student must apply for the master's degree at the Graduate School *within the first two weeks of the quarter in which he or she expects to complete degree requirements*. The filing of the application is the responsibility *solely of the student*. When the application is received, the student's record is reviewed in the Graduate School. All requirements for the degree must be met by the end of the current quarter if the application is to be approved. If this is not possible, the applicant is notified of deficiencies by the Graduate School. Once approved, the application is forwarded to the appropriate graduate program. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application becomes void and a new one must be submitted at the appropriate time.

Master's degree applications are valid for *two consecutive quarters*, and if requirements for the degree are not completed during the quarter of the initial application, the student's application may be retained by the graduate program coordinator for the quarter *immediately* following (e.g., autumn to winter, winter to spring, spring to summer, summer to autumn) and returned to the Graduate School by the end of the second quarter. Thereafter, the application is void and the student must file a *new* application for the degree in the Graduate School during the first two weeks of the quarter in which work for the degree is to be completed.

Upon completion of departmental requirements, the master's degree application is signed by the supervisory committee and returned to the Graduate School. It must be received by the last day of the quarter (last day of exam week) if the degree is to be conferred that quarter. If all requirements are completed after this deadline, registration for the following quarter is required.

*The student and the graduate program coordinator should be thoroughly acquainted with the requirements for the particular degree.*

### Master of Arts for Teachers

Master's degree programs for experienced teachers, which focus upon the fields of knowledge normally taught in the common school and the community college, have been established at the University. These programs provide alternatives to the research-oriented Master of Arts and Master of Science degree programs, which emphasize particular fields of knowledge. Programs leading to the M.A.T. degree are offered in Biology Teaching and English.

## Doctoral Degree

The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

### Summary of Requirements

In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School *minimum* requirements:

1. Completion of a program of study and research as planned by the graduate program coordinator in the student's major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.
2. Presentation of 90 credits, 60 of which must be taken at the University of Washington.  
  
With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment.
3. Numerical grades must be received in at least 18 quarter credits of course work taken at the UW prior to scheduling the General Examination. The Graduate School accepts numerical grades in approved 400-level courses accepted as part of the major, and in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
4. Creditable passage of the General Examination. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.
5. Preparation of and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. *The Candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters*. At least one quarter must come after the student passes the General Examination. With the exception of summer quarter, students are limited to a *maximum* of 10 credits per quarter of dissertation (800).

6. Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The General and Final Examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.
7. Completion of all work for the doctoral degree within ten years. This includes quarters spent On-Leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.
8. Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).
9. *A student must satisfy the requirements that are in force at the time the degree is to be awarded.*

### Appointment of Doctoral Supervisory Committee

A *Supervisory Committee* is appointed by the Dean of the Graduate School to guide and assist a graduate student working toward an advanced degree and is expected to evaluate the student's performance throughout the program. The supervisory committee should be appointed no later than four months prior to the General Examination. Appointment of the supervisory committee indicates that the graduate faculty in the student's field finds the student's background and achievement sufficient for admission into a program of doctoral study and research. "Preliminary" examinations, if required, should be completed prior to the request for appointment of the supervisory committee (see Graduate School Memorandum No. 13: Supervisory Committees for Graduate Students).

### Admission to Candidacy for Doctoral Degree

At the end of *two years of graduate study*, the chair of the supervisory committee may present to the Dean of the Graduate School, for approval, a Request for General Examination (signed by all supervisory committee members including the Graduate School Representative) permitting the student to take the General Examination for admission to candidacy for the doctoral degree. This means that, in the opinion of the committee, the student's background of study and preparation is sufficient to justify the undertaking of the examination. A warrant is issued to the department if the Graduate School requirements have been met. The Request for General Examination must be received at least three weeks prior to the proposed examination date. Written and other examinations prior to the oral are the responsibility of the graduate program and do not need Graduate School approval. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

If the student's performance is judged by the supervisory committee to be satisfactory, the signed warrant certifying successful completion of the General Examination is filed in the Graduate School. If the General Examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit up to a maximum of two additional re-examinations, after a further period of study. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School.

Thereafter, the student is identified and designated as a *Candidate* for the appropriate doctoral degree and is awarded the Candidate's certificate. After achieving Candidate status, the student ordinarily devotes his or her time primarily to the completion of research, writing of the dissertation, and preparation for the Final Examination.

The Candidate's certificate and the doctoral degree may not be awarded in the same quarter.

### Candidate's Certificate

The Candidate's certificate gives formal recognition of the successful completion of a very significant step toward the doctoral degrees awarded through the Graduate School: Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts. Students who have passed the Graduate School General Examination and who have completed all requirements for the degree except the dissertation and the Final Examination are awarded the Candidate certificate.

### Dissertation and Final Examination

The Candidate must present a dissertation demonstrating original and independent investigation and achievement. The dissertation should reflect not only mastery of research techniques but also ability to select an important problem for investigation and to deal with it competently. Normally the dissertation is written in the English language. However, if there are circumstances that warrant the dissertation be written in a foreign language, approval must be received from the Dean of the Graduate School. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements.

This manual should be obtained from the Graduate School and read thoroughly *before* the student begins writing the dissertation. The dissertation must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School, and students are encouraged to consult with them throughout the dissertation preparation process.

When the supervisory committee agrees that the doctoral Candidate is prepared to take the Final Examination, the Dean of the Graduate School should be informed of the decision and asked to designate a reading committee consisting of at least three voting members of the supervisory committee.

Once the reading committee is established officially with the Graduate School, a Request for Final Examination (signed by all members of the supervisory committee including the Graduate School Representative) is presented to the Graduate School three weeks prior to the Final Examination date, and if the Candidate has met all other requirements, a warrant authorizing the Final Examination is issued by the Graduate School. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations.

If the Final Examination is satisfactory, the supervisory committee signs the warrant and returns it to the Graduate School by the last day of the quarter in which the degree requirements are completed. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School. If the examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit a second examination after a period of additional study.

After the Final Examination, the doctoral Candidate has 60 days in which to submit the dissertation to the Graduate School. Registration as a graduate student is required the quarter the dissertation is submitted and the degree is conferred.

### Publication of Doctoral Dissertations

Part of the obligation of research is publication of the results, and in the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all of the dissertation and provides worldwide distribution of the work. The Candidate submits the publication agreement when the dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

The following fees for microfilming the doctoral dissertation are paid at the Cashier's Office, 129 Schmitz Hall (all fees are subject to change): microfilming the entire dissertation, \$60; *optional* copyright fee (applicable only when the entire dissertation is microfilmed), \$45; or microfilming of only the abstract, \$60. *These fees are in addition to the \$25 binding fee.*

### Special Individual Ph.D. Program

The Graduate School maintains the Special Individual Ph.D. (SIPh.D.) Program for exceptionally able students whose objectives for study are of an interdisciplinary nature that cannot be met within one of the University units authorized to grant the Ph.D. degree. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. degree. It is not intended as a mechanism for offering the Ph.D. degree within units that do not have their own authorized Ph.D. programs.

A graduate student may apply to the SIPh.D. Program when he or she has completed the master's degree, or has been admitted to the Graduate School and has completed at least three quarters of full-time work at the UW, and has carefully planned an appropriate program of studies.

Proposals, including GRE scores, are due by December 15 of each year, and decisions on admission are made by May 31 of the following year. Graduate School Memorandum No. 25: Special Individual Ph.D. Programs (revised), contains additional information, proposal, and instructions and may be obtained from the Graduate School.

## Special Programs and Facilities

### Graduate School Support for Interdisciplinary Units and Graduate Student Recruitment

The objective of the *Graduate School Fund for Excellence and Innovation* (GSFEI) is to support the overall goals of graduate education and research through funding in the following areas: (1) program support for interdisciplinary units on campus, (2) graduate student recruitment support to all Ph.D.-degree granting units on campus, (3) honoraria and colloquia support for the dissemination of research, (4) matching support on proposals to establish research centers, (5) graduate student travel to present the results of research, (6) book publication subsidies for faculty, and (7) other uses that benefit graduate education and research on campus.

GSFEI revenues come from various sources that include (1) state funds provided in the University's biennial budget, (2) private donations, (3) institutional allowances provided with fellowships and traineeships, (4) patent, invention, and copyright royalties accruing to the University, and (5) various special, short-term and renewable awards from the President's and Provost's Offices for maintenance of certain unique needs.

GSFEI policies and procedures may be obtained from the Graduate School, 213 Gerberding, Box 351240, or requested by calling (206) 685-2628.

Related to its primary responsibilities for graduate education, the Graduate School has responsibility for the following programs:

### Special Professorships and Lectureships

The *Walker-Ames Fund* was established in the 1930s through a bequest from the estates of Maud Walker Ames and her husband, Edwin Gardner Ames. Its stated purpose is to enable the University of Washington "to guarantee to the state of Washington the scholarly and educational services of the most distinguished minds available in this and other countries."

Chaired by the Dean of the Graduate School, a committee of University faculty members considers nominations from their colleagues and makes recommendations to the President for the appointment to Walker-Ames Professorships of distinguished scholars of national and international reputation.

Since 1936, when the first Walker-Ames Visiting Professor was appointed, over 350 scholars and members of the profession have come to the University as temporary members of the faculty, enriching the intellectual life of the University community and the state.

The *Jessie and John Danz Fund* was established in 1961 by a gift and bequest from John Danz; an additional gift was made to the Danz fund in 1969 by his wife, Jessie Mohr Danz. The Danz fund is intended primarily to enable the University to bring to the campus each year two "distinguished scholars of national and international reputation who have concerned themselves with the impact of science and philosophy on man's perception of a rational universe."

Nominations and appointments for the Danz lectureships are made in the same manner as the Walker-Ames professorships. Since 1961 when the lectureship was established there have been 95 appointed lectureships. Other arrangements compatible with the Danz bequest (e.g., the publicizing of the Danz Lectures) may be made upon approval of the committees involved.

Questions pertaining to the Walker-Ames Fund and the Jessie and John Danz Fund may be directed to the Dean of the Graduate School.

In addition to regular academic offerings, the University maintains a wide range of programs and facilities that provide special opportunities for graduate study and research. The following units are administered by the Graduate School:

### Center for Law and Justice

Joseph G. Weis, Director  
117 and 119 Savery, Box 353340

The Center for Law and Justice is a multidisciplinary research center established in 1975. Its goals are to engage in research, to contribute to the education and training of students, to offer consultation, and to provide liaison to the community in the areas of law and justice. To achieve these goals the Center (1) appraises faculty members of research opportunities and assists in the development of proposals, (2) involves students from different disciplines in research training and education and sponsors biweekly colloquia, and (3) provides consultation to the criminal justice system and responds to the broader informational needs of the community.

### University of Washington Press

John P. Soden, Director  
1326 Fifth Avenue, Suite 555, Box 359120

The University of Washington Press, the book-publishing division of the University, has over a thousand titles in print, with special emphasis on art, anthropology, Asian-American studies, Asian studies, environmental studies, ethnology, history, international studies, and regional subjects. The Press publishes about 60 new books each year, including reprints and imports. Authors include both members of the University faculty and scholars outside the University. In addition to its own publishing program, the Press distributes art books and catalogues for numerous museums.

# Procedures and Fees

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the *General Catalog*. Appeals may be filed with the student's dean or with the Vice President for Student Affairs in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

## Registration

 [www.washington.edu/students/reg/regelig.html](http://www.washington.edu/students/reg/regelig.html)

Detailed information and procedures pertaining to registration and withdrawal are outlined in the quarterly *Time Schedule*.

### Registration Period I

 [www.washington.edu/students/reg/addpolicy.html](http://www.washington.edu/students/reg/addpolicy.html)

Designed to accommodate currently registered matriculated students and students eligible to register under the Quarter Off Eligibility Policy, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students register for autumn quarter during spring quarter.

### Registration Period II

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this period. Students who have not completed their initial registration by the end of this period (selection of student insurance, ASUW membership, optional charges, and mailing preference options) are charged a Late Registration Fee.

### Registration Period III

All students may register or make course changes during this period. Dropped courses do not appear on the transcript. Students are charged a Change of Registration service fee for registration changes made after Period III. One fee is charged for all changes occurring during the same day. A tuition forfeiture is charged for total credit reductions after Period III if applicable. See Fee Forfeiture section.

### Late Add Period

All students may register or make registration changes during this period. All added courses require an entry code or faculty number. A Change of Registration service fee is charged.

### Unrestricted Drop Period

 [www.washington.edu/students/reg/wdpolicy.html](http://www.washington.edu/students/reg/wdpolicy.html)

Courses dropped during this period will not appear on the transcript. A Change of Registration fee is charged.

### Late Course Drop Period (Annual Drop)

Students may drop one course each academic year (autumn through summer quarters) after the fourteenth calendar day of the quarter through the seventh week of the quarter. A course drop will be recorded on the transcript with a W followed by the number of the week of the drop (W3-W7). A Change of Registration service fee is charged.

## Credits Required for Full- or Half-Time Status Requirements

 [www.washington.edu/students/reg/regpol.html](http://www.washington.edu/students/reg/regpol.html)

Some agencies require that a student have full-time status to receive maximum benefits. To be classified as a full-time student by the University, a professional student must register for and complete at least 12 credits per quarter and a

graduate student must register for and complete at least 10 credits per quarter. To be classified as a half-time student by the University, a professional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

## Restrictions on Attending Classes

 [www.washington.edu/students/reg/regpol.html](http://www.washington.edu/students/reg/regpol.html)

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered.

An instructor may allow a student to attend his or her class only if the student's name is on the official class list from the Office of the Registrar. An unregistered student may attend through the fourteenth calendar day of the quarter if the student is on an official wait list for the course.

## Adding Courses/Permission Guidelines

 [www.washington.edu/students/reg/regopt.html](http://www.washington.edu/students/reg/regopt.html)

For reasons of public safety and instructional quality, it is important to limit course enrollment to the approved classroom capacity. The Office of the Registrar monitors course enrollment and accepts student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, departments may choose to overload courses up to 115% of the room capacity to offset anticipated student course drops and withdrawals as demonstrated by past registration activity.

Students must secure entry codes from instructors or departments to add closed courses. However, if enrollment is at 115% of room capacity, registration requests are denied. Students should be informed when receiving entry codes to overloaded courses that registration is not guaranteed if enrollment exceeds 115% of room capacity.

If centralized room-capacity records do not correctly reflect the actual seating capacity, notification should be made to the Room Assignments/Time Schedule Office in the Office of the Registrar.

2. Students may add courses during the Late Add Period or through the twenty-first calendar day of the quarter. Adds after the seventh calendar day of the quarter require an entry code or faculty number. Departments may also add students to departmental courses during this period through departmental registration screens. To add courses after this period, students must submit a faculty-approved Late Add Petition form to the Registration Office.
3. A course may not be changed to or from an audit registration after the first two weeks of the quarter. See below for transcript entry.

## Dropping a Course

 [www.washington.edu/students/reg/wdpolicy.html](http://www.washington.edu/students/reg/wdpolicy.html)

Students dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh weeks of the quarter is recorded on a student's transcript with a W grade and a number designating the week of the quarter in which the course drop was transacted. Only one drop after the fourteenth day of a quarter is permitted each academic year (autumn through summer quarter).

A student who does not officially drop a course through the registration system or the offering department is given a grade of 0.0.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz Hall, (206) 543-6101, before dropping a class because it may affect their eligibility.

Students receiving veterans' benefits should contact the Office of Special Services, 460 Schmitz Hall, when dropping courses.

## Complete Withdrawal from the University for a Registered Quarter

 [www.washington.edu/students/reg/wdoffleave.html](http://www.washington.edu/students/reg/wdoffleave.html)

Once registered, a student must officially withdraw if he or she later chooses not to attend the University for the registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To withdraw from a quarter, students may complete a Withdrawal Card and submit it in person to the Registration Office, 225 Schmitz Hall, or write to the Registration Office, Box 355850, Seattle, WA 98195-5850. Withdrawal forms are available at advising offices and the Registration Office. An official withdrawal is effective the day it is received in the Registration Office, or if submitted by mail, the date of the postmark.
2. Students who drop the last course on their schedules will be considered withdrawn for the quarter. Students who drop courses beginning the eighth calendar day of the quarter are charged a Change of Registration service fee per day for any course drops.
3. Submission of a graduate On-Leave application does not constitute official withdrawal from the University.
4. Refer to the grading section in the Graduate School: Graduate Study section.
5. Students receiving veterans' benefits should immediately notify the Office of Special Services of withdrawal.
6. Students with a scholarship or loan awarded through the University should notify the Student Accounts and Scholarships Office or the Student Loan Office.
7. Students who withdraw due to conscription into the armed forces or who are called to active duty military service may be entitled to either a full refund of tuition and fees or academic credit, depending on when in the quarter official withdrawal occurs. Students should contact the Registration Office for complete information.

## Additional Information

### Address Change

 [www.washington.edu/students/reg/address.html](http://www.washington.edu/students/reg/address.html)

Students are responsible for notifying the Office of the Registrar when their address changes. Individual addresses may be viewed and updated through STAR Online, which can be accessed through the Student Guide on the UW homepage ([www.washington.edu](http://www.washington.edu)). Complete instructions for updating address records are listed. Students need to enter both their student number and private access code (PAC) to update their individual address record. A confirmation message will be sent to the student's email address. *The mailing of notices to the last address on record constitutes official notification.*

### Residence Classification Requirements

 [www.washington.edu/students/reg/residency.html](http://www.washington.edu/students/reg/residency.html)

Residence classification information is available from the Graduation and Academic Records Office, 264 Schmitz Hall.

### Student Identification Cards

 [www.washington.edu/students/reg/id.html](http://www.washington.edu/students/reg/id.html)

All new students should go to the Student ID Card Center, 229 Schmitz Hall, to be issued a permanent student identification card. Photo identification (such as a driver's license, state ID card, or passport) is required to obtain a student ID card. Returning students who have not retained a previous ID card should obtain a new one. A quarterly validation sticker is mailed with the registration confirmation to each registered student. The student ID card with attached validation sticker is used for a variety of campus services. It is the student's means of identifying his or her status as a student at the University.

Registered students whose ID cards have been lost or stolen can have them replaced at the Student ID Card Center. Students who request such replacement are charged a nonrefundable fee. Replacement of cards made invalid by changes in a student's name or rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Student ID Card Center. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved, and the incident may be referred to the Office of the Vice President for Student Affairs for appropriate University action.

### Transcripts

 [www.washington.edu/students/reg/transcripts.html](http://www.washington.edu/students/reg/transcripts.html)

Official copies of student academic records at the UW must bear the official seal of the University, the signature of the Associate Registrar, and the date of issue.

### Transcript Fee

A charge of \$4, paid to the Transcript Office in advance, is required for each transcript.

### Transcripts from Other Schools

A transcript covering a student's previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

### Veterans and Children of Totally Disabled Veterans and Personnel in the Armed Forces

Information on educational benefits and tuition reduction programs for veterans and their dependents is available from the Office of Special Services, 460 Schmitz Hall.

Veterans and members of the armed forces who apply for admission to the University are subject to the same minimum requirements as regular students and are expected to enroll in accordance with University requirements.

The University's academic programs of study are approved by the Washington State Higher Education Coordinating Board's State Approving Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10 USC.

## Tuition, Fees, and Special Charges

### Estimated Expenses

The cost of a student's education at the University varies, the amount depending on his or her classification, status as resident or nonresident, and field of study. In computing college costs, a student should consider such additional expenses as insurance coverage, books, and laboratory supplies. Personal expenses (e.g., clothing, laundry, recreation, and transportation), which vary with each individual, as well as between-quarter expenses, should not be overlooked.

The following figures are prepared and updated each year by the Office of Student Financial Aid and reflect modest, but adequate, probable costs for students attending the University during the nine-month academic year. They should be used only as a guide in determining the year's expenses.

Books	\$ 777
Room and Board	8,319
Transportation	747
Miscellaneous personal expenses	2,043

Total	\$11,886
-------	----------

This budget assumes room and board is paid for by the student.

	<i>Resident tuition and fees</i>	<i>Nonresident tuition and fees</i>
Business (MBA) students	5,853	14,574
Graduate students	5,739	14,277
Law students	6,210	15,321
Medical and dental students	9,528	24,078

Tuition and fees are subject to change.

### Enrollment Confirmation Deposit

 [depts.washington.edu/insp/first2.html](http://depts.washington.edu/insp/first2.html)

A new graduate student is required to confirm his or her intention to enroll by paying a nonrefundable \$100 Enrollment Confirmation Deposit (not required of students admitted summer quarter). The \$100 is applied toward tuition and fees assessed for the quarter for which the student is determined to be admissible and subsequently enrolls. A student who pays the fee for a given quarter but does not register in that quarter is not entitled to a refund except by petition in the situations listed below:

1. A new or returning matriculated student who is unable to obtain courses required for the completion of the degree or certificate program, or courses which are determined by an appropriate academic adviser to be acceptable alternate courses. A written verification from the appropriate academic adviser must be attached to this petition. Such requests for refund must be submitted by Friday of the second week of the quarter.

## PROCEDURES AND FEES

- A new or returning matriculated student who, after meeting with an appropriate academic adviser, determines that the program for which admission was granted differs substantially from what the student was led to expect based upon earlier available information. This petition for refund must be submitted before the student registers for courses and in no case later than the first day of the quarter for which admission has been granted. A written verification from the appropriate academic adviser must be included.
- A new or returning student who applies by the prescribed deadline for financial aid administered by the University's Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University. This petition and a copy of the Notice of Award and Acceptance must be submitted no later than two weeks after receipt of notice of the financial aid award.
- A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or into civil duty. Documentation is required.

### Fee Payment

[www.washington.edu/students/sfs/sao/ttnrates.html](http://www.washington.edu/students/sfs/sao/ttnrates.html)

An obligation to pay tuition and fees in U.S. dollars is incurred when a student registers. A fee statement is mailed to the student's address on file with the Office of the Registrar.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in (1) charge of \$10 to \$30 for late payment, if payment is received within the one-week late-payment period; (2) cancellation of registration, if payment is not made by the eighth Wednesday of the quarter. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The Summer Quarter Bulletin and *Time Schedule* should be consulted for fees and fee payment schedule applicable to summer quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany the payment. In the absence of instructions, the University makes a reasoned interpretation of the student's intent and accounts for the funds accordingly. The student number must be specified on all payments.

### Estimated Quarterly Tuition Rates Effective Autumn Quarter 2000

[www.washington.edu/students/sfs/sao/ttnrates.html](http://www.washington.edu/students/sfs/sao/ttnrates.html)

#### Graduate and Pharmacy Professional Programs<sup>1</sup>

	Technology Fee	Resident <sup>2</sup>	Nonresident <sup>2</sup>
2 credits (minimum)	\$10	\$547	\$1,359
3 credits	16	820	2,039
4 credits	22	1,093	2,719
5 credits	28	1,367	3,399
6 credits	34	1,640	4,079
7-18 credits	40	1,913	4,759
Additional fee per credit for more than 18 credits	NA	255	661

#### Law<sup>3</sup>

	Technology Fee	Resident <sup>2</sup>	Nonresident <sup>2</sup>
2 credits (minimum)	\$10	\$592	\$1,459
3 credits	16	888	2,188
4 credits	22	1,183	2,918
5 credits	28	1,479	3,648
6 credits	34	1,775	4,377
7-18 credits	40	2,070	5,107
Additional fee per credit for more than 18 credits <sup>4</sup>	NA	277	711

#### Master of Business Administration

	Technology Fee	Resident <sup>2</sup>	Nonresident <sup>2</sup>
2 credits (minimum)	\$10	\$558	\$1,388
3 credits	16	837	2,082
4 credits	22	1,115	2,776
5 credits	28	1,394	3,470
6 credits	34	1,673	4,164
7-18 credits	40	1,951	4,858
Additional fee per credit for more than 18 credits	NA	260	676

#### Medical and Dental<sup>5</sup>

	Technology Fee	Resident <sup>2</sup>	Nonresident <sup>2</sup>
2 credits (minimum)	\$7	\$488	\$1,236
3 credits	10	733	1,853
4 credits	13	977	2,470
5 credits	16	1,221	3,088
6 credits	19	1,466	3,705
7 credits	22	1,710	4,322
8 credits	25	1,954	4,940
9 credits	28	2,199	5,557
10 credits	31	2,443	6,174
11 credits	34	2,687	6,792
12 credits	37	2,932	7,409
13 or more credits	40	3,176	8,026

<sup>1</sup> Does not apply to the Doctor of Pharmacy program.

<sup>2</sup> Includes technology fee.

<sup>3</sup> For the purposes of assessing tuition, a law student is any student solely pursuing the Juris Doctor degree. Visiting law students will be considered law students for tuition purposes. Students solely pursuing graduate degrees in the School of Law—i.e., degrees other than the Juris Doctor degree—pay graduate tuition. A student concurrently pursuing the Juris Doctor degree and a graduate degree (concurrent law student) will be assessed the law tuition rate for all credits taken in a quarter when 6 or more credits are in School of Law courses. Concurrent law students, who have completed 135 credits for the Juris Doctor degree and are pursuing a graduate law degree, pay graduate tuition.

<sup>4</sup> Does not apply to law students exclusively in Juris Doctor program.

<sup>5</sup> A student concurrently pursuing a medical degree and a graduate degree will be assessed the medical tuition rate for all credits taken in a quarter when 6 or more credits are in School of Medicine courses.

Fees are subject to change without notice.

Tuition rates for resident and nonresident students apply to the academic year (autumn, winter, and spring quarters). Summer quarter tuition is listed in the *Summer Quarter Bulletin and Time Schedule*. Except for students in the Schools of Dentistry or Medicine, nonresident students are charged resident tuition during summer quarter.

Tuition charges are based on student classification, e.g., undergraduate, graduate, or professional, and not on course level. Students pursuing the Doctor of Pharmacy degree are charged graduate tuition.

Fees listed above do not apply to students registered through UW Extension. See the UW Extension Bulletin for their fee structure.

#### Special Course and Laboratory Fees

The amounts listed above cover normal University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

#### Other Fees

*Auditors:* There is no reduction in fees for auditors.

*Admission Application Fees:* Graduate, \$45; Medicine, Dentistry, \$35; Law, \$50. Former students returning in the same classification, \$35.

*On-Leave Registration Fee:* This fee of \$35, charged to graduate students only, provides for a maximum on-leave period of four successive academic quarters or any part thereof and is not refundable.

**Late Registration/Reregistration Fees:** A late registration service charge of \$25 is assessed when a student registers after the last scheduled day of Period II registration and through the tenth day of the quarter. Students registering after the tenth day pay a \$75 Late Registration Fee. A student who must reregister as a result of a cancellation for nonpayment of tuition must also pay a \$75 fee. Waiver or refund of the Late Registration Fee may be petitioned in the Registration Office. Waiver or refund of the \$75 reregistration fee may be petitioned in the Student Accounts and Cashiers Office.

**Change of Registration Service Fee:** A charge of \$20 is made for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter.

**Transcript Fees:** A charge of \$4, paid to the Transcript Office in advance, is required for each transcript.

**Thesis and Dissertation Fees:** Publication binding fee, \$25; dissertation microfilming fee, \$60; abstract-only microfilming fee, \$60; optional copyright service fee, \$35.

**Replacement Fees:** Duplicate diploma, \$10; student identification card, \$5 (nonphoto), \$10 (photo).

**U-PASS Fee:** A U-PASS validation sticker is mailed quarterly with a student's registration confirmation. The U-PASS is valid on all Metro and Community Transit routes at all times and provides parking privileges to carpoolers, riding privileges to vanpool and Night Ride passengers, and merchant discounts. The quarterly fee of \$31 (subject to change) is included on the tuition bill. Students who do not wish to participate in the U-PASS program must return the validation sticker to the University by the tuition payment deadline. The sticker can be returned by mail in the return envelope provided, mailed with the tuition payment, or returned in person to the Student Accounts and Cashiers Office. For further information consult the quarterly *Time Schedule*.

All fees are subject to change without notice.

## Cancellation of Tuition

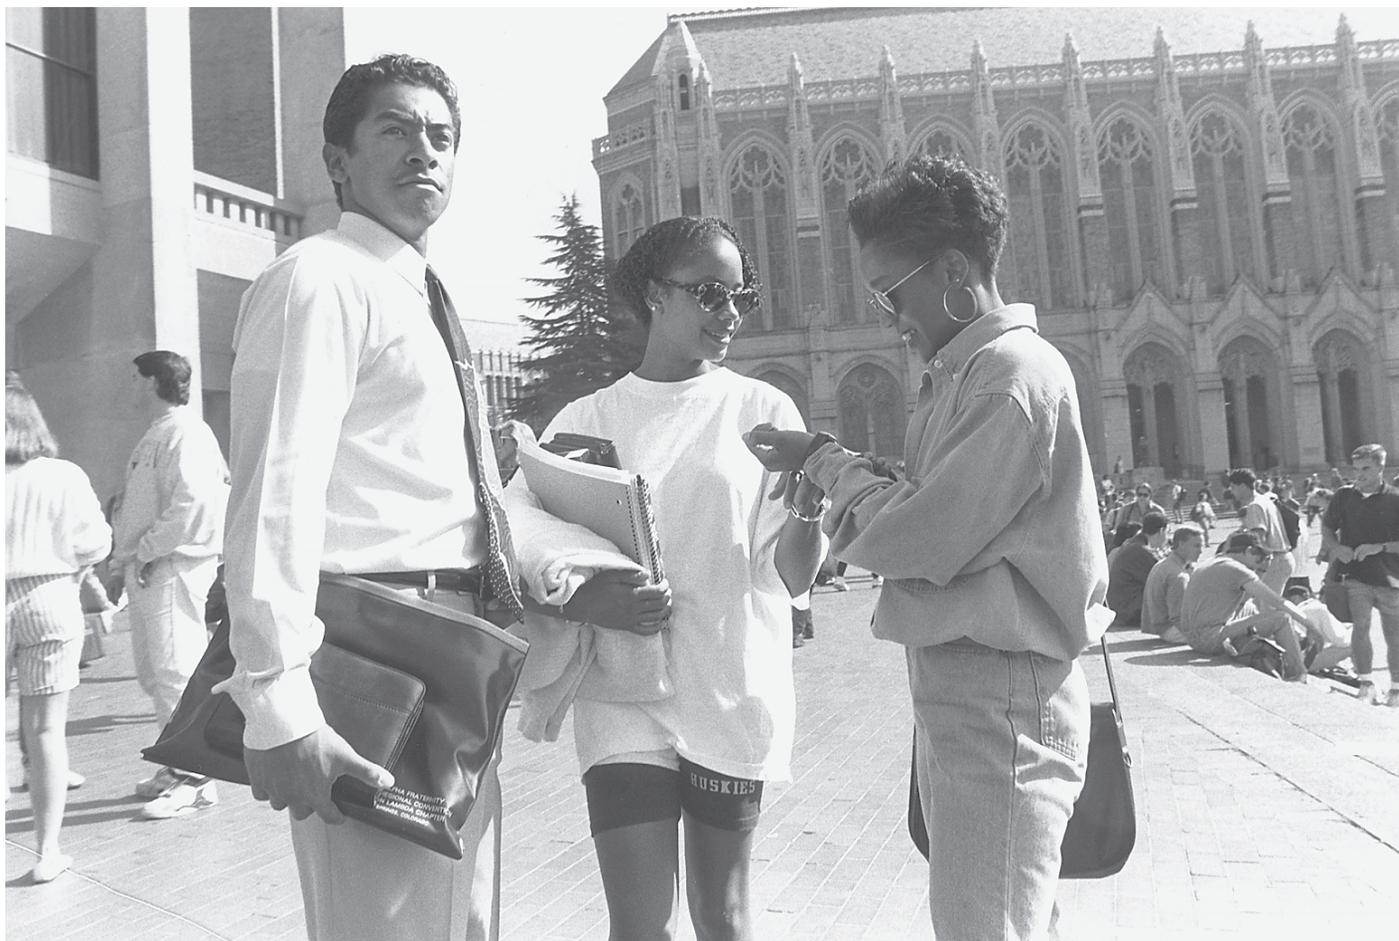

Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

## Continuing Students

1. A student who withdraws on or before the seventh calendar day of the quarter does not pay tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition.
3. A student who withdraws after the thirtieth calendar day must pay full tuition.

## New and Returning Students

1. A student who withdraws on or before the seventh calendar day forfeits the \$100 Enrollment Confirmation Deposit but does not pay the regular tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.
3. A student who withdraws after the thirtieth calendar day of the quarter must pay full tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.

## PROCEDURES AND FEES

### Fee Forfeiture

A student who does not completely withdraw but drops one or more courses may be eligible for lower tuition, depending on the total number of credits remaining after the course drop and on the time period when the drop was made. Tuition for students making a course drop on or before the seventh calendar day of the quarter is determined by the total credits remaining. Tuition for students making a course drop after the seventh calendar day through the thirtieth calendar day of the quarter is computed on the total credits remaining plus one-half the difference between the old tuition and the new tuition. There is no cancellation or reduction in tuition for courses dropped after the thirtieth calendar day of the quarter.

### Fee Refund

When a fee payment is made by check, a waiting period is required before a refund can be authorized. An application for refund may be refused, unless it is made during the quarter in which the fees apply. A student who withdraws for disciplinary reasons forfeits all rights to refund or cancellation of any portion of his or her fees.

### Financial Obligations

The Comptroller is authorized to place a hold (administrative) on the records of any student who fails to pay amounts due the University.

Until this hold is cleared, the University (1) does not release the student's record or any information based upon the record, (2) does not prepare transcripts or certified statements, and (3) denies registration.

In cases of serious financial delinquency, the Comptroller, with the consent of the Associate Registrar, may order that a student's registration be canceled and that privileges of attendance be withdrawn.

Tuition and fees not paid by the end of the academic quarter are subject to an interest charge of 1% per month, or a fraction thereof (12% APR), beginning the month following the end of the quarter.

An administrative hold or cancellation also may occur when a student has not complied with other University rules, procedures, or obligations. The hold may be placed on the student's record by the authorized University office responsible for enforcement of the rule, procedure, or obligation involved. The student is not permitted to register for any subsequent quarter or to obtain a transcript of his or her record or a certified statement except on the written release of the office that placed the hold.

### Tuition Exemptions and Reductions

[www.washington.edu/students/reg/tuition\\_exempt.html](http://www.washington.edu/students/reg/tuition_exempt.html)

#### Faculty/Staff, Washington State Employee, and Washington National Guard Member Tuition Exemption Programs

Eligible faculty, staff, state employees, and Washington National Guard members admitted to the University may enroll for up to 6 credits each quarter under these tuition exemption programs. Because such students are registered on a space-available basis, they must register after other students. The quarterly *Time Schedule* lists registration dates when students enrolling under these exemption programs may register. Eligibility information may be obtained from either the Staff Training and Development Office, or the Registration Office.

#### "Access" Program for Older Adults

[www.washington.edu/students/reg/access.html](http://www.washington.edu/students/reg/access.html)

The UW allows Washington residents who are 60 years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access Program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit, participate in discussions, complete laboratory work, or take examinations.

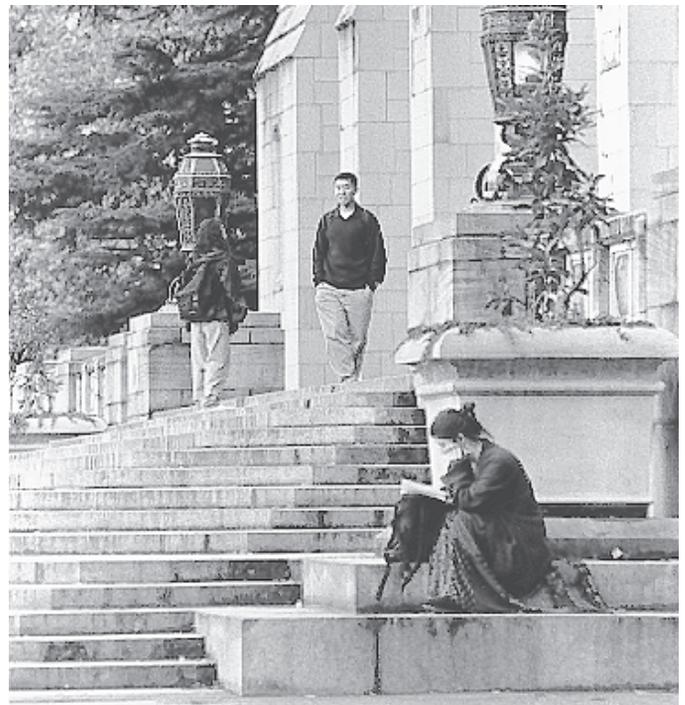

### Tuition Reductions

The following categories of students may be eligible for reduced tuition and fees. Students in these categories may contact the offices shown for information or to obtain an application. The reductions are established by legislative mandate and may be revoked by the legislature at any time.

### Category

### Contact Office

Active duty military assigned to Washington and their children and spouses	Office of Residency Classification, 264 Schmitz Hall, (206) 543-5932
American Indian students who meet specific eligibility requirements	Office of Special Services, 460 Schmitz Hall
Children of POWs or MIAs	Office of Special Services, 460 Schmitz Hall
Children of Washington law enforcement officers or firefighters who died or became totally disabled in the line of duty	Office of Special Services, 460 Schmitz Hall
UW faculty members and their children and spouses who are not Washington state residents	Academic Personnel Office, 85 Gerberding Hall, (206) 543-5630
Immigrants holding a refugee classification who have been in the United States less than one year	Office of Special Services, 460 Schmitz Hall
Senior citizens under the Access Program	Registration Office, (206) 543-8580
UW staff members and their children and spouses who are not Washington state residents	Office of Special Services, 460 Schmitz Hall
TAs/RAs with half-time appointments	Graduate School, 201 Gerberding Hall
Veterans who served in the Persian Gulf combat zone in 1991	Office of Special Services, 460 Schmitz Hall
Veterans who served in Southeast Asia during the period of August 5, 1964-May 7, 1975	Office of Special Services, 460 Schmitz Hall
Medical students in the WWAMI Program	School of Medicine, Office of Academic Affairs, A300 Health Sciences
Award recipients under the Washington State Scholars and Washington Award for Vocational Excellence (WAVE) programs	Office of Student Financial Aid, Outreach Services, 172 Schmitz Hall
Students participating in the WICHE Program	Student Accounts and Cashiers Office, 129 Schmitz Hall

## Academic Assessment

As part of an ongoing effort to ensure the quality of the education received by its students, the UW has instituted a comprehensive assessment program designed to measure student learning outcomes. This assessment program conforms with guidelines established by the state's Higher Education Coordinating Board. From time to time, students may be asked to participate in outcomes assessment by completing satisfaction surveys, sitting for achievement examinations, compiling portfolios of their academic work, or providing other academic performance indicators. The purpose of all such activities is to monitor the quality of the University's academic programs.

While it is a University requirement that students participate in these assessment activities when asked to do so, participants can be assured that assessment results will be treated in the strictest professional confidentiality. Whenever those results appear in University assessment reports or other public documents, they will be presented anonymously and in aggregate fashion.

## Academic Sessions

University instruction is offered during autumn, winter, and spring quarters, each lasting approximately 11 weeks. The 9-week summer quarter is divided into two 4 1/2-week terms.

## Accreditation

The University is accredited by the Northwest Association of Schools and Colleges and is a member of the Association of American Universities. Individual schools and colleges are members of the various accrediting associations in their respective fields. Currently enrolled or prospective students should contact the Office of the Registrar to review accreditation documents for the University and the respective department to review programmatic accreditation documents.

# Academic Programs

The University offers a wide range of undergraduate, graduate, and professional degree programs. In addition to these programs, the following educational opportunities are available.

## Certificate Programs

 [www.extension.washington.edu/extinfo/](http://www.extension.washington.edu/extinfo/)

UW Extension offers more than 80 specially designed credit and non-credit evening certificate programs of study in many areas, primarily to working adults. Some certificate programs address such personal-interest areas as film, writing, and sound production. Other programs focus on specific careers in business, industry, and technology, offering specialized training that supplements other education and work experience. Students are prepared to enter new fields or to grow professionally in areas ranging from accounting to computer programming to project management. All certificate programs and instructors have been approved by the appropriate academic units. Programs are designed by advisory boards consisting of leading professionals in the field and UW faculty. To accommodate working professionals, UW Extension schedules most classes to meet evenings or weekends. Several certificate programs are offered to students at a distance through various technologies. Course fees and admission requirements vary, and enrollment in all certificate programs is limited. More information may be obtained by consulting the quarterly UW Extension catalog, available by telephone, (206) 543-2320 or by UW Extension's Web site.

## Evening Classes

Opportunities for evening study at the University are varied to serve individual student interests and academic goals. For nonmatriculated (not formally admitted) students, UW Extension offers hundreds of evening credit courses and evening non-credit courses, which are described in the UW Extension section of this catalog.

## Evening Degree Program

 [www.evedegree.washington.edu/evedeg/](http://www.evedegree.washington.edu/evedeg/)

Students can complete a bachelor's or graduate degree in the evening through the University of Washington Evening Degree Program. A wide variety of courses are scheduled for the convenience of evening-degree students. Some programs use technology for the delivery of courses to make the degrees more accessible.

Evening Degree Program graduate-level programs include the Master of Science in Construction Management, the Master of Social Work (M.S.W.), the Master of Professional Accounting (M.P.Acc.), the Master of Public Administration (M.P.A.), Master of Business Administration (M.B.A.), the Master of Education (M.Ed.) and the Doctor of Education (Ed.D.) in educational leadership and policy studies with an emphasis in higher education, the Master of Applied Physics (M.S.), the Professional Master's in Computer Science and Engineering (M.S.), the Master of

Library and Information Sciences (M.L.S.), the External Doctor of Pharmacy Program (Pharm.D.), the Master of Health Administration (M.H.A.), and the Master of Medical Engineering (M.M.E.) which is offered by the Department of Bioengineering.

## Distance Learning Degree Programs

Degree programs available to students that incorporate distance learning technologies include the Master of Social Work (M.S.W.), the Professional Master's in Computer Science and Engineering (M.S.), the External Doctor of Pharmacy (Pharm.D.), the Master of Health Administration (M.H.A.), and the Education at a Distance for Growth and Excellence program for engineers (M.S.).

For more information on these programs call (206) 543-6160 or (206) 543-2320, or visit the Evening Degree Web site.

## Summer Quarter

 [www.summer.washington.edu/uwsql/](http://www.summer.washington.edu/uwsql/)

During summer quarter, more than two thousand courses in most major fields are available to graduate and undergraduate students pursuing degree programs on a year-round basis as well as to summer-only students seeking to broaden, intensify, or refresh subject-matter competence. Summer-only students can apply for admission as nonmatriculated students and can earn credits which may apply toward a degree at another college. This status also accommodates teachers and school administrators who take special-interest courses to earn additional university credits and postbaccalaureate students who do not desire formal admission to a graduate or second undergraduate program.

Credits earned during summer quarter are evaluated as residence credits and, with the exception of separate fee schedules for medical and dental students, summer quarter fees closely parallel those of the other quarters. Nonresidents and residents pay the same fees during the summer. A complete listing of summer-quarter courses is published in the Summer Quarter bulletin, available on request from the University of Washington, Office of Summer Quarter, Box 354224, Seattle, Washington 98195, (206) 543-2320 or 1-800-543-2320 or visit the summer-quarter Web site.

## UW Bothell and UW Tacoma

 [www.bothell.washington.edu](http://www.bothell.washington.edu)  
[www.tacoma.washington.edu](http://www.tacoma.washington.edu)

At its Bothell and Tacoma campuses, the University offers bachelor's and master's degree programs designed to provide additional educational opportunities for residents of the Puget Sound region. The campuses are located in Bothell, 15 miles to the north of the Seattle campus, and in Tacoma, 35 miles to the south. Undergraduate programs at Bothell and Tacoma are offered at the upper-division level, for students who have already completed the first two years (80 to 90 credits) of undergraduate study. The following degree programs are currently available at both campuses: Bachelor of Arts in Liberal Studies, Bachelor of Arts in Business Administration, Bachelor of Science in Nursing (designed for registered nurses),

Bachelor of Science in Computing and Software Systems, and Master of Education. In addition, a Teaching Certificate Program is available at both campuses for students preparing to teach at the K-8 grade levels. The Tacoma campus also offers Master of Nursing and Master of Social Work degree programs. The Bothell campus also offers a Master of Management degree focused on technology-oriented businesses. A Master of Arts in Public Policy and a Master of Science in Computing and Software Systems are planned to begin in autumn 2001. A Bachelor of Science in Environmental Sciences is currently being planned. Further information is provided in the University of Washington, Bothell and University of Washington, Tacoma sections of this catalog.

## Resources and Facilities

### Burke Museum

[www.washington.edu/burkemuseum/](http://www.washington.edu/burkemuseum/)

The Burke Museum of Natural History and Culture serves both the University and the public in its mission to encourage understanding of, and appreciation for, the natural and cultural heritage of Washington state, the Pacific Northwest, and the Pacific Rim. The Burke has three scientific divisions—anthropology, geology, and zoology—holding more than four million specimens. Collections of national and international ranking include Northwest Indian art, Northwest archaeology, vertebrate and invertebrate paleontology, mammals, and birds. Other noteworthy collections include Asian and Pacific ethnography, minerals and gems, paleobotany, arachnids, lepidoptera, and micropaleontology.

The collections are accessible for research by UW faculty, students, and visiting scientists. The museum's public galleries feature two long-term exhibits ("Life and Times of Washington State" and "Pacific Voices"), as well as a series of changing shows on Pacific-region cultures and natural history. Hours are 10 a.m. to 5 p.m. daily, except July 4th, Thanksgiving, December 25th, and January 1st. Admission is free to UW staff and students.

### Computing Resources

[www.washington.edu/computing/](http://www.washington.edu/computing/)  
[www.washington.edu/uwired/](http://www.washington.edu/uwired/)

The diverse computing and networking needs of instructional and research groups on campus are served by central organizations as well as individual schools, colleges, and departments. Together these provide a variety of computers, facilities, and support services to the UW community. An wide array of computing options and services is offered by Computing and Communications (C&C), the central UW organization for computing and networking, and by UWired, a collaborative effort to integrate information technology into teaching and learning.

Students, faculty, and staff members can create accounts on computers provided by C&C, which give them access to tools for teaching, learning, and research. They can use Internet resources and the World Wide Web, including servers where they can create Web pages. They can browse the UW course catalog and Time Schedule; use electronic mail; get news and campus events; research term papers; search library catalogs; and use software for statistics, graphics, programming, and text formatting. In addition, UW Internet Connectivity Kit software allows them to connect their own computer to the Internet, either from home (via a modem and a phone line) or from a residence hall or office (usually via Ethernet). To obtain the personal network identification (UW NetID), that provides access to these resources, see [www.washington.edu/computing/uwnetid/](http://www.washington.edu/computing/uwnetid/).

The University's largest drop-in labs are operated by UWired. These labs are more than just a place to check email and do word processing—they are information commons, co-located with other services to provide students with a rich set of resources required to enhance learning. The labs offer PC and Macintosh computers connected to the campus network, free workshops, student consultation, and computers with special adaptive equipment to assist people with motor, visual, hearing, or learning impairments. For hours, locations, and additional information please see [www.washington.edu/uwired/](http://www.washington.edu/uwired/).

UWired also operates the university's Center for Teaching, Learning and Technology, providing free assistance, workshops and one-on-one faculty consultation. The UWired Center is equipped with a variety of hardware and software to allow faculty to experiment with different technology options and receive assistance in using them effectively. In addition, resources are available for a small fee in the Locke Visualization Lab (located in the Health Sciences Center) to help faculty, staff, and students doing research to make visual representations of their work for scientific presentations, publications, teaching tools, or Web pages.

The UWired Center is also home to the development efforts behind Catalyst, a project to support innovation in teaching via the Web. Catalyst provides educators with the resources, ideas, tools, and information needed to make use of the Web in education and functions as a campus clearinghouse for new approaches to educational technology.

C&C provides other computing-associated services, such as telecommunications, UWTV cable channel 27, video production and videoconferencing, microcomputer and workstation support, training, administrative systems support, individual consulting, publications, and online documentation. For details about the computing resources available on campus through C&C (including how to get started and take advantage of low-cost training), see the Computing and Networking Web page. Other questions can be answered by sending email to [help@cac.washington.edu](mailto:help@cac.washington.edu) or calling C&C Information, (206) 543-5970.

### Ethnic Cultural Center and Theatre

The Ethnic Cultural Center and Theatre complex is a facility for student-organized events and activities. Twenty-two of the University's student organizations use the ECC/TC as their center of activity. The staff of the center offers students opportunities for the development of cultural, social, and student-government programs. The Ethnic Cultural Center/Theatre complex also maintains an outstanding theatre facility which provides opportunities for students interested in participating in or creating on-stage productions, symposia, and other events.

### Office of Educational Assessment

[www.washington.edu/oea/](http://www.washington.edu/oea/)

Testing and educational evaluative services for University departments and individual students are available at the Office of Educational Assessment. Of particular interest to prospective and entering students are the office's programs for admissions testing, including the Scholastic Assessment Test (SAT), and for placement testing in mathematics and foreign languages. Also, the Office administers a variety of tests for international students and others for whom English is not their native language. These tests are used for admission and English as a Second Language (ESL) placement or waiver. For the University student approaching graduation, the Office administers tests required for admission to graduate, law, medical, and other professional schools, as well as those tests often requested by prospective governmental or private employers. The Office is located at 453 Schmitz Hall.

### English As A Second Language Department

[www.edoutreach.washington.edu/esl/](http://www.edoutreach.washington.edu/esl/)

The English As A Second Language Department offers a variety of courses to help students improve their English and learn more about American culture. Additional information appears in the University Extension section of this catalog.

### Hall Health Primary Care Center

[depts.washington.edu/hhpccweb](http://depts.washington.edu/hhpccweb)

The University provides outpatient health and medical care for students, faculty, staff, and their families, and others through the Hall Health Primary Care Center. Located on campus, the Center is staffed by physicians and nurse practitioners affiliated with the UW Physicians group (UWP) and is accredited by the Accreditation Association for Ambulatory Health Care.

Services include immunizations, acute care, diagnosis and treatment of illness or injury, employee health, and health education.

The following specialties are represented: internal medicine, family practice, adolescent medicine, pediatrics and prenatal services, dermatology, allergy, minor out-patient surgery, family planning, gynecology, sports medicine, physical therapy, mental health, nutrition services, and travel medicine. Common conditions in other specialties also may be treated. The Health Education staff offer a variety of health-promotion services including providing learning resources, assistance with self-care, and educational programs.

All regularly enrolled UW students are eligible for health service

Dependents of students, faculty, and staff, and others are welcome at Hall Health Primary Care Center and are eligible for care on a fee-for-service basis.

Hall Health Primary Care Center physicians and other clinical providers participate in many managed-care plans and preferred provider organizations, including the Basic Health Plan, Healthy Options, and First Choice.

Student health insurance, available through the UW, *should not be confused* with services through Hall Health Center. A student may use Hall Health Center services without having student insurance. Occasionally, injuries and illnesses occur which may require extensive diagnostic lab tests, x-rays, medications, and

treatment in an emergency room, off-campus clinic, or hospital, and which may involve surgery, rehabilitation, or prolonged therapy. The student should protect himself or herself against such major medical expenses by obtaining student health insurance (if not covered by family health insurance or other health plans). This low-cost medical-surgical-hospital policy, designed to meet those specific needs, may be purchased at the time of registration.

Hall Health Primary Care Center is open five days a week, Monday through Friday, 8 a.m. to 5 p.m., except Tuesdays, when the clinics open at 9 a.m. Selected clinics may offer appointments before or after the usual hours.

Additional information may be obtained from Hall Health Primary Care Center, Box 354410, University of Washington, Seattle, WA 98195, (206) 685-1011, or from the Hall Health Web page ([depts.washington.edu/hhpcweb/](http://depts.washington.edu/hhpcweb/)).

## Henry Art Gallery

[www.henryart.org](http://www.henryart.org)

The Henry Art Gallery, the art museum of the University, brings to the campus and the community nationally noted special exhibitions of contemporary and historical work in all media. Its offerings include exhibitions, lectures, symposia, and an active publishing program. The University's permanent collection includes a large research collection of ethnic textiles and Western dress as well as a small but distinguished collection of European and American paintings, prints, drawings, photographs, and contemporary American ceramics and Japanese folk pottery.

The Henry completed a major expansion project in April 1997 that quadrupled the size of the museum. Renovation and expansion design was by internationally acclaimed architect Charles Gwathmey and resulted in increased access to exhibitions and collections for students, classes, and researchers.

The Henry Gallery Association offers membership to students, faculty members, and the community for the purpose of supporting the museum's programs. UW students are admitted free at all times. For details, please call the Henry at (206) 543-2281.

## Intercollegiate Athletics

[www.gohuskies.com](http://www.gohuskies.com)

The Department of Intercollegiate Athletics operates an integrated program for men and women. Intercollegiate competition is limited to full-time students.

There are twelve women's teams: cross-country, soccer, volleyball, gymnastics, basketball, swimming, indoor track, tennis, golf, softball, outdoor track and field, and crew. Women's competition is in the ten-team Pacific-10 Conference (Pac-10).

Eleven sports are offered for men's competition: baseball, basketball, crew, cross-country, football, golf, soccer, swimming, tennis, indoor track, and outdoor track and field. Men's teams compete on a full Pacific-10 Conference schedule, as well as with other institutions locally, regionally, and nationally. The University is a member of the National Collegiate Athletic Association.

Facilities available to intercollegiate athletic teams are Hec Edmundson Pavilion, Pavilion Addition, Husky Stadium, Husky Baseball Field, Husky Softball Field, Conibear Shellhouse and other crew facilities on Lake Washington at the eastern boundary of the campus, the Lloyd Nordstrom Tennis Center, Husky Soccer Field, and the Washington National golf course in Auburn.

## Office of International Programs and Exchanges

[depts.washington.edu/ipe/](http://depts.washington.edu/ipe/)

The Office of International Programs and Exchanges (IP&E) administers and cooperates in more than 80 international-study programs in Latin America, Europe, the Middle East, Africa, and Asia. Qualified undergraduate and graduate students are enrolled concurrently at the University and abroad, earning UW credit and maintaining residency and financial aid eligibility. Quarter, semester, and academic-year programs are offered. Opportunities for study include language and liberal arts courses, advanced language programs requiring two to three years of college-level language preparation, and specialized professional programs. The University also has more than 100 reciprocal exchange agreements with major research institutions abroad, including universities. These arrangements allow qualified UW students to enroll in regular courses at the foreign university while maintaining full UW standing.

Many overseas programs are supported by scholarships from private endowments. Additional scholarship support is available to undergraduate students and special consideration is given to underrepresented groups of students.

Program information and counseling are available from the Office of International Programs and Exchanges, 516 Schmitz Hall, Box 355815; (206) 543-9272; [ipe@u.washington.edu](mailto:ipe@u.washington.edu).

## Language Learning Center

[www.llc.washington.edu](http://www.llc.washington.edu)

The Language Learning Center (LLC), located in the daylight basement of Denny Hall, provides support and services to the university community for the teaching, learning, and researching of languages and cultures. Available services include audio-cassette listening/recording facilities; duplication of audio cassettes onto user cassettes; sale of pre-recorded audio cassettes; facilities for viewing video tape, CD-ROM, laserdisc, DVD, and satellite materials; and access to foreign telecasts via satellite. The LLC has a recording studio, international analogue video conversion equipment, and analogue to digital audio/video conversion equipment. The LLC also has several electronic classrooms equipped with audio, video, and cable television equipment. Instructors can reserve the electronic classrooms for speaking/listening practice, viewing of foreign video tapes and satellite programming, and informal conversation practice. Computer-Assisted Language Learning (CALL), digital multimedia, multi-lingual word processing, overhead computer projection, and Internet communications are available in the LLC computing lab. The LLC is expanding its service of providing online access to world language media.

## University Libraries

[www.lib.washington.edu](http://www.lib.washington.edu)

The University Libraries, with nearly six million volumes, consists of the Suzzallo and Allen Libraries, Odegaard Undergraduate Library, the Health Sciences Library and Information Center, East Asia Library, 15 branch libraries, and the UW Bothell and UW Tacoma Libraries. The University Libraries maintains nationally ranked collections in fisheries, forestry, East Asian languages and literature, Scandinavian studies, and Slavic and South Asian area studies. In addition to books and periodicals, the Libraries' holdings include archival materials and manuscripts, maps, newspapers, microforms, research reports, media materials, CD-ROMs, government publications, photographs, and architectural drawings.

The Libraries Information Gateway provides access, through a single World Wide Web location, to all the Libraries resources, print and electronic, as well as tools, services, and the ability to search a wide range of Internet resources. The Information Gateway is available in all UW Libraries, as well as through the Web at [www.lib.washington.edu](http://www.lib.washington.edu).

The UW Libraries Catalog provides bibliographic information, location, and circulation status for cataloged holdings of the Libraries, including branch libraries. The Libraries provides electronic access to a large and growing number of bibliographic databases, full-text resources, electronic journals, current news and information sources, government information, digital image collections, and environmental and statistical data sets such as those used in Geographic Information Systems (GIS).

The Suzzallo and Allen Libraries, a combined facility, house the major social sciences and humanities collections. The Suzzallo Library serves as the central acquisitions and processing unit of the campus libraries system and contains the interlibrary borrowing service, fee-based document delivery service (Library Express), fee-based research service (Research Express), and the public-service divisions of Government Publications, Map Collections, Microform and Newspaper Collections, Reference and Research Services, Periodicals, and International Studies (Near East, Slavic and Eastern Europe, South Asia, and Southeast Asia). Reference and research assistance is available during most library hours. The Allen Library houses the Natural Sciences Library, and Manuscripts, Special Collections, University Archives, which includes the Pacific Northwest Collection. The University Libraries' administrative offices are located also in Allen.

The Odegaard Undergraduate Library (OUGL) supports undergraduate teaching and learning through an extensive collection of books, periodicals, and media; collaborative learning spaces; specialized reference services; and general-access computing. The collection is interdisciplinary, with an emphasis on materials in the social sciences and the humanities. OUGL is the primary reserve unit for non-health-sciences classes. Media services and materials for course-related usage are provided in the University Libraries Media Center in OUGL. The UWired Commons is a 356-seat general-access computing facility in OUGL. OUGL librarians also offer classes on how to use the library, including computerized indexes and search strategies for term papers.

The Health Sciences Libraries (HSL) house the largest and most comprehensive collection of health-sciences materials in the Pacific Northwest at three locations: Health Sciences Library and Information Center, located in the Health Sciences Center; the Social Work library, located in the School of Social Work; and the K.K. Sherwood Library at Harborview Medical Center. HSL supports education, research, and patient care in the fields of dentistry, medicine, nursing, pharmacy, public health, and social work, as well as in the related behavioral, biological, and quantitative sciences. In addition to a print collection of 350,000 volumes, the libraries offer access to a wide range of non-print resources and provide extensive user services, including curriculum-based instructional support; interlibrary loan

services for health-sciences personnel, and document delivery services for affiliates and non-affiliates. HSL serves as headquarters for the National Network of Libraries of Medicine/Pacific Northwest Region (NN/LM PNR), with responsibility for promoting access to biomedical information resources in Alaska, Idaho, Montana, Oregon, and Washington. In partnership with the Health Sciences Center, HSL houses the Integrated Advanced Information Management System Program, the Research Funding Service, the Primate Information Center, the Bioinformatics Consultation Service, and the Health Services MicroLab.

The East Asia Library is one of the major resource centers of its kind in the United States and is an international leader in the provision and development of electronic services for its subject areas. The collections are especially strong in anthropology, archaeology, economics, history, art, languages, literature, law, music, political science, religion, and sociology with respect to the histories and cultures of China (including Taiwan and Hong Kong), Japan, Korea, Inner Asia, and Tibet.

### University Research Facilities

 [www.washington.edu/research/](http://www.washington.edu/research/)

In addition to the campus facilities described in this section, the University has numerous educational and cultural resource centers. Academic or research activities and facilities that are of general significance in all or many fields of knowledge throughout the University are listed in the Research section of this catalog; others are described in individual school or college sections.

### University Theatres

 [ascc.artsci.washington.edu/drama/season.html](http://ascc.artsci.washington.edu/drama/season.html)

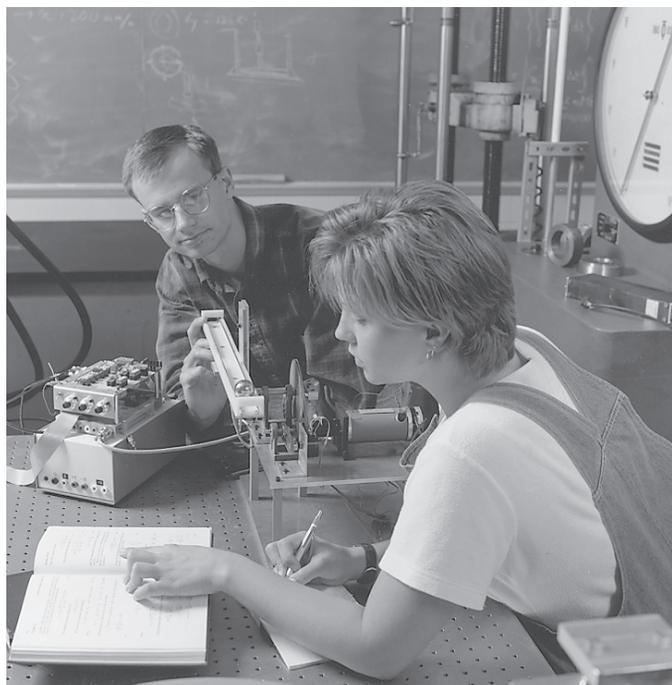

The School of Drama operates three theatres: the Playhouse, with a thrust stage; the Penthouse Theatre, the first theatre-in-the-round built in America; and Meany Studio Theatre, which seats 225. Faculty- and student-directed plays drawn from the full range of world dramatic literature are presented throughout the year.

The School also gives technical and design support to opera and dance productions of the School of Music and the Department of Dance.

### Women's Center

 [depts.washington.edu/womenctr/](http://depts.washington.edu/womenctr/)

The Women's Center, located in Imogen Cunningham Hall, promotes the advancement of women on the campus and in the community by offering a wide variety of non-credit workshops and classes including college success classes (GRE preparation courses, computer, and writing classes); career and financial classes; fitness, health, and creativity classes; the Noontime Lecture Series; and the Distinguished UW Women's Scholar Series. The Center provides services for women re-entering the University and houses a modest library with a job board and scholarship information.

## Housing and Food Service

 [www.washington.edu/hfs/](http://www.washington.edu/hfs/)

### University-Owned Housing

#### Residence Halls

The UW provides housing for about 4,500 students in seven residence halls. All are located within easy walking distance of classrooms and other campus facilities. Food service is available to residence hall students at locations throughout the campus through the use of the À La Carte Plus™ debit-card system. Students live in an environment of responsible freedom, and a residential-life staff enhances the University experience through a variety of educational, cultural, and social programs.

#### Single-Student Apartments

The University also has apartments available for single students, 20 years of age or older. Stevens Court provides four- and six-bedroom apartments that have private bedrooms, a common kitchen and living room, and bathrooms. The Commodore-Duchess Apartments have studio apartments for single students.

#### Family Housing

Convenient and economical apartment housing is available for about 450 student families.

For detailed information on housing or the Husky Card, visit the Housing and Food Services (HFS) Web site (above); email HFS at [hfsinfo@u.washington.edu](mailto:hfsinfo@u.washington.edu); write to the Student Services Office, Box 355842, Seattle, WA 98195-5842; or call (206) 543-4059.

#### Food Service

University Food Services operates dining facilities throughout the campus. The diverse schedules and dietary preferences of the campus community are accommodated by providing full meal service, à la carte menu items, and catering services, as well as convenient hours of operation.

Food may be purchased through the Husky Card program at all University Food Services facilities and two on-campus convenience stores. This program, available to the entire campus community, offers prepaid meal service through use of a debit card. The Husky Card (your UW ID card) provides the flexibility for purchase of food at many locations on campus. The card may also be used at the UW Bookstore and other UW facilities. For more information on the opening an account, call (206) 543-7222, or visit the HFS Web site at [www.washington.edu/hfs/](http://www.washington.edu/hfs/).

## Transportation and the U-PASS

 [www.washington.edu/upass/](http://www.washington.edu/upass/)

Walking and biking are the best ways to get to campus, but when you need another transportation method, use the U-PASS. The U-PASS program provides students with many benefits at a highly discounted price. With a U-PASS sticker, you get free rides on all regular Metro, Community Transit and Sound Transit routes throughout the region, free trips on the Night Ride shuttle, free parking when you drive with other U-PASS holders, discounted vanpool fares and discounts at many local merchants. In addition, the U-PASS funds bicycle improvements, including more secure racks and lockers. The U-PASS sticker is sent with registration confirmation materials before each quarter.

Having a U-PASS provides many alternatives, but some parking is available for those students that must drive. Two U-PASS holders in a car get free parking in the E1 lot (near the stadium) when they arrive between 7:00 and 10:00 a.m., and three U-PASS holders get free parking on the main campus. Other student parking is available for a daily fee in the E1 lot, which fills up quickly. A few parking permits are available from Parking Services to commuter students on a first-come, first-served basis the first day of each quarter.

For more information, visit the U-PASS Web site at [www.washington.edu/upass/](http://www.washington.edu/upass/) or contact the Transportation Office at [upass@u.washington.edu](mailto:upass@u.washington.edu) or (206) 543-0450.

# Student Services

## Office of the Vice President for Student Affairs

The Division of Student Affairs assists the University in fulfilling its academic mission by providing a broad range of services and programs designed to further the educational and personal development of students. The Division consists of ten units: Admissions and Records, Center for Career Services, Student Counseling Center, Disabled Student Services, Housing and Food Services, Recreational Sports Programs, Student Financial Aid, Student Publications, and Student Activities and Union Facilities.

Students are encouraged to contact the Office of the Vice President for Student Affairs, (206) 543-4972, 476 Schmitz Hall, for information concerning various aspects of extra-class life at the University.

### Center for Career Services

 [depts.washington.edu/careers/](http://depts.washington.edu/careers/)

The University's Center for Career Services, which includes a Minority Job Placement Program, offers career information and services to assist undergraduates, graduate students, and alumni (1) to make a viable connection between their academic backgrounds and their career or long-range employment objectives, (2) to develop effective job-seeking strategies, and (3) to find suitable employment upon leaving the University or to change employment thereafter.

A variety of programs are offered and include individual and group career counseling, career options and job-search seminars, online job listings, career-related internships, an career fairs, credential files, employer and alumni career panels, mock interviews, a résumé database, campus interviews, employer information, and student-employment listings. Students may also send questions to [ccscnslr@u.washington.edu](mailto:ccscnslr@u.washington.edu).

Students are encouraged to begin using the services of the Center early in their academic careers. This is best accomplished by visiting the Center at 134 Mary Gates Hall or calling (206) 543-0535 to make an appointment with a career counselor. The Center also maintains a Web site at [depts.washington.edu/careers/](http://depts.washington.edu/careers/).

### Childcare Program

 [www.washington.edu/students/ovpsa/cc/](http://www.washington.edu/students/ovpsa/cc/)

The Childcare Program provides eligible student-parents with direct financial assistance to purchase services at licensed childcare facilities in the Seattle-King County area. To apply, students must submit the Free Application for Federal Student Aid (FAFSA) to the designated processor by the end of February each year and a Childcare Request Application to the Childcare Office, 482 Schmitz Hall, before the end of May each year. Brochures describing the program are available at the Childcare Office, (206) 543-1041.

### Student Counseling Center

 [depts.washington.edu/scc/](http://depts.washington.edu/scc/)

All matriculated students at the University may make use of the services of the Student Counseling Center and its staff of psychologists and counselors to discuss educational progress, personal concerns, or career goals. Individual, couples, and group counseling is provided for a variety of issues including academic, career, personal, and social issues. Psychological tests, when necessary, are provided as part of the Center's counseling service. Workshops on special topics such as test anxiety, time management, test taking, note taking, and stress management are available. There is a small fee for services.

There is a \$10.00 fee for the first assessment appointment, which is provided to determine if the Student Counseling Center's services are appropriate. Treatment for substance abuse and long-term therapy is not provided. Individual appointments after the first visit currently cost \$26 each. Fees for participation in the group program range from \$60 to \$80. For students financially unable to pay the fee, efforts are made to find other options. The Center is located on the fourth floor of Schmitz Hall, (206) 543-1240. Additional information may be found at the Center's Web site.

### Disabled Student Services

The University is committed to ensuring facility and program access to students with either permanent or temporary disabilities through a variety of services and equipment. The Disabled Student Services (DSS) Office coordinates academic accommodations for enrolled students with documented disabilities. Accommodations are determined on a case-by-case basis and may include classroom relocation, sign language interpreters, recorded course materials, note taking, and priority registration. DSS also provides needs assessment, mediation, referrals, and advocacy as necessary and appropriate. Requests for accommodations or services must be arranged in advance and require documentation of the disability, verifying the need for such accommodation or service.

Technical and adaptive equipment is available through both DSS and Computing and Communications. Information about adaptive-technology computer software and equipment and their locations on campus may be obtained from DSS. Publications include *Access Guide for Persons with Disabilities*, (showing classroom access, elevator locations, ramps, parking, and restrooms), and the *Campus Mobility Route Map*, as well as other publications.

To the maximum extent possible, students with disabilities are integrated into the general student population and their problems are solved through the usual channels. Various other departments offer additional services: the Transportation Department provides free on-campus transportation with wheelchair lifts for students with mobility limitations through Dial-a-Ride, (206) 685-1511, and UW Night Ride, (206) 799-4151 after 6 p.m.

Additional information is available from Disabled Student Services, 448 Schmitz, Box 355839, (206) 543-8924 (Voice), (206) 543-8925 (TTY), [uwds@u.washington.edu](mailto:uwds@u.washington.edu).

### Student Health Insurance Program

 [www.washington.edu/students/ovpsa/insurance.html](http://www.washington.edu/students/ovpsa/insurance.html)

An accident and sickness insurance plan is available to matriculated University students (Seattle campus) and dependents on a voluntary basis. A student may enroll in the plan at the time of registration through the seventh calendar day of each quarter. The appropriate premium is paid by the quarterly tuition due date. Brochures describing the insurance eligibility, coverage, and costs are available at the Student Insurance Office, 469 Schmitz Hall, (206) 543-6202; Hall Health Primary Care Center; and the HUB.

The University also sponsors a field-trip accident insurance plan. Application forms may be requested from the Risk Management Office, 22 Gerberding Hall, Box 351276, (206) 543-3419.

## Insurance for Foreign Students

All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, proof of which must be furnished to the International Services Office and for which an insurance waiver must be obtained. To avoid cancellation of registration, international students must pay tuition and either pay for the University-sponsored insurance or have a waiver on file by the tuition due date.

## International Services Office

[www.washington.edu/students/gencaf/front/International.html](http://www.washington.edu/students/gencaf/front/International.html)

The International Services Office provides assistance to international students, scholars, and faculty in meeting United States Immigration and Naturalization Service regulations dealing with such matters as maintaining lawful status, extensions of stay, transfers of schools/programs, and working authorizations. The Office also provides a formal orientation to the campus and community for new international students and visiting faculty; advice and counsel for educational, financial, and personal problems; and dissemination of important and timely information through newsletters and workshops. The Office is located in 459 Schmitz Hall, (206) 543-0841.

## Office of Special Services

The Office of Special Services, 460 Schmitz Hall, assists students eligible for veterans' educational benefits, advises and monitors students who must meet English As A Second Language requirements, and administers certain tuition-reduction programs (see Procedures and Fees section).

## Office of Student Financial Aid

The Office of Student Financial Aid, 105 Schmitz Hall, administers federal, state, and private financial aid programs designed to help students pay for their education. Assistance is offered in the form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. An information packet describing the different programs, eligibility criteria, and application procedures may be obtained by calling (206) 685-9535.

There is a limited amount of grant aid for graduate students and assistance is generally limited to long-term loans and work opportunities. Information on graduate fellowships, scholarships, and teaching and research assistantships may be obtained from the graduate program coordinator in the individual department or program (see the Graduate School section of this catalog).

To be eligible for financial aid, an individual must be a citizen or permanent resident of the United States and be admitted to the University as a matriculated, degree-seeking student. Priority consideration is given to students who apply before the University's financial aid application deadline of February 28 (e.g., February 28, 2000, for the academic year beginning in September 2000).

The Office of Student Financial Aid also administers a short-term loan program for full-time students who find themselves in temporary financial difficulty. University students may take advantage of the short-term loan program without applying for financial aid.

## Student Legal Services

[www.washington.edu/students/handbook/legal.html](http://www.washington.edu/students/handbook/legal.html)

Student Legal Services provides legal advice, counseling, negotiating, and court representation in many legal matters. All currently enrolled undergraduate and graduate students are eligible for a free initial consultation. If additional services are needed, there is an hourly charge of \$10, plus a minimal supply fee and court costs, if any. The Office is staffed by third-year law students supervised by licensed attorneys. Students may call (206) 543-6486 or visit the Office, 31 Brooklyn Building, Box 354563, 4045 Brooklyn Avenue NE, to make an appointment or to learn more about the Office's services.

## Student Publications

[www.washington.edu/students/studentdir.html](http://www.washington.edu/students/studentdir.html)  
[www.thedaily.washington.edu](http://www.thedaily.washington.edu)

Student publications at the University include *The Daily* and the *Student Directory*. *The Daily* is published Monday-Friday throughout the academic year and is distributed in the mornings on campus without charge. During summer quarter, *The Daily* is published once a week. Any student with an interest in journalism may serve on *The Daily* staff.

## Student Union Facilities

[depts.washington.edu/sauf/](http://depts.washington.edu/sauf/)

The Husky Union Building (Student Union Building) and the South Campus Center are the principal centers of student activities and programs on the campus.

## Husky Union Building

The Husky Union Building (HUB), located in the center of campus, houses a variety of facilities and services for students, and faculty and staff members. These include lounges, a 478-seat auditorium, a multipurpose ballroom, a barber and hair-styling shop, a branch of the University Book Store, several retail food operations, a study/music lounge with email access, a lost-and-found office, a ticket sales office, a newsstand, a self-service post office, a limited-service bank, three cash machines, a number of student-organization offices, and a games area which includes a twelve-lane bowling center. Meeting rooms accommodating from 10 to 175 persons are available for registered student organizations.

## South Campus Center

The South Campus Center, located on the shore of Portage Bay, serves as the central meeting place for students and faculty on the southern end of campus. Facilities and services similar to those in the HUB are available and include meeting and conference rooms, display cases, a hair-styling shop, amusement games, a cash machine, a branch of the University Book Store, a newsstand, and lounges with beautiful views of Portage Bay.

## Student Activities and Organizations

### Student Activities Office

The services provided by the Student Activities Office (SAO) include assisting student organizations in understanding University policies and procedures, providing technical help in the planning and conduct of student events, and furnishing information and assistance in order that they may represent themselves and their interests in an effective manner. Advisers are available to assist students involved in group activities with budget and program planning, advertising, orientation to campus resources, and leadership and organizational skill development. Underlying the SAO service functions is a desire to provide an environment in which students can learn from their experiences in extracurricular activities as a supplement to their classroom experiences. Additional information about the services is available from the Student Activities Office, 207 HUB, (206) 543-2380.

### Student Organizations

[depts.washington.edu/sao/](http://depts.washington.edu/sao/)

Students at the University are encouraged to become active in at least one of the campus's approximately 400 voluntary student organizations, which include honorary, professional, and social organizations; service clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, 207 HUB, (206) 543-2380.

### Associated Students of the University of Washington

[depts.washington.edu/asuwweb/](http://depts.washington.edu/asuwweb/)

The Associated Students of the University of Washington (ASUW) is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW has an annual budget of approximately \$1 million, supported by the services and activities fee paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of control elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include lecture notes, a poster printing service, the Experimental College, a bicycle repair shop, and an ongoing film and entertainment series. Questions regarding the ASUW and its services should be directed to either the ASUW Office, 204L HUB, (206) 543-1780, or the Student Activities Office, 207 HUB, (206) 543-2380.

## Graduate and Professional Student Senate

 [depts.washington.edu/gpss/](http://depts.washington.edu/gpss/)

The Graduate and Professional Student Senate (GPSS) serves primarily as an advocate for the academic welfare of graduate and professional students. It is composed of representatives elected from each graduate and professional degree-granting unit. Funded from student services and activities fees, GPSS dedicates a portion of its budget each year to direct allocations for departmental student groups and for special programs benefiting students from many departments. GPSS publishes informational bulletins, monitors legislative issues of impact to graduate students, maintains graduate student representation on University administrative committees, assists with personal or academic grievances and, in general, seeks to represent graduate student issues and concerns within the University community. Questions regarding the GPSS should be directed to the GPSS Office, 300 HUB, (206) 543-8576.

## Recreational Sports

 [depts.washington.edu/ima/](http://depts.washington.edu/ima/)

The Department of Recreational Sports Programs provides a comprehensive program of over sports and fitness activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities Building (IMA), Golf Driving Range, Waterfront Activities Center (canoe rentals), outdoor facilities (Denny Field and tennis courts), Hutchinson Hall swimming pool and locker rooms, and the practice Climbing Rock. Programs and facilities are open to students with a valid student identification card (Husky card).

For additional information call the telephone numbers listed below, or visit the Recreational Sports Web site at [depts.washington.edu/ima/](http://depts.washington.edu/ima/).

**Intramural Activities Building:** The IMA is located north of Husky Stadium and south of parking lot E1. The IMA includes activity space for basketball, volleyball, badminton, swimming, squash, racquetball, handball, martial arts, aerobics, archery, and roller skating. The IMA has a fitness center with free weights, weight machines, and cardiovascular machines. Located near the IMA are 16 tennis courts (six are night lighted), and three multipurpose sports fields for flag football, softball, soccer, rugby, lacrosse, ultimate, and other outdoor activities. For more information, contact the IMA at (206) 543-4590 or [ima@u.washington.edu](mailto:ima@u.washington.edu).

The **fitness center** is equipped with 17 climbers, 24 treadmills, 12 recumbent cycles, 12 stationary cycles, 17 cross trainers, six ergometers, 62 single-station weight machines, 24 strength benches, and one step mill.

**Sports Skills Instruction:** Recreational Sports offers non-credit classes in aikido, aerobics, step aerobics, hydro-aerobics, deep-water fitness, body conditioning, fencing, first aid and CPR, golf, judo, karate, kung fu, racquetball, rock climbing, scuba diving, ski conditioning, snow skiing/snowboarding (indoor), squash, swimming, tae kwon do, tai chi, tennis, volleyball, and weight training. For more information, call Sports Skills Instruction at (206) 543-2571.

**Club Sports:** Recreational Sports offers club sports, including aikido, archery, climbing, cycling, fencing, ice hockey, judo, karate, kayaking, kendo, kung fu, lacrosse, rowing, rugby, sailing, scuba diving, snow skiing, soccer, tae kwon do, ultimate Frisbee, volleyball, water polo, and water skiing. For more information, contact Club Sports at (206) 543-9499.

**Intramural Sports** are offered for men, women, and men and women combined in a variety of activities, including basketball, bowling, crew, flag football, inner-tube basketball, soccer, softball, swimming, tennis, track and field, ultimate Frisbee, and volleyball, as well as special events. For more information, call Intramural Sports at (206) 543-8558.

The **Golf Driving Range** is located at the foot of the 45th Street viaduct and is the center for all golf activities on campus. The facilities include 43 hitting tees, and two putting and chipping greens, and are open seven days a week. Group lessons are available for beginning players. For more information, contact the Golf Driving Range at (206) 543-8759 or [seagren@u.washington.edu](mailto:seagren@u.washington.edu).

Waterfront Activities Center (WAC): The campus center for water sports (e.g., canoe rentals, sailing, kayaking, rowing) is located at the WAC southeast of Husky Stadium. The WAC offers locker rooms with saunas, private boat storage for non-motorized craft, and group rental of the lounge and meeting rooms. The facility is open from 10 a.m. to dusk, seven days a week. For more information, contact the WAC at (206) 543-9433 or [h2o@u.washington.edu](mailto:h2o@u.washington.edu).

## Student Rights and Responsibilities

### Student Conduct Code

 [www.washington.edu/students/handbook/conduct.html](http://www.washington.edu/students/handbook/conduct.html)

The University Board of Regents has adopted a *Student Conduct Code*, which applies to both academic and nonacademic conduct for students while in attendance at the University. The *Code* specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due process. Interested students may obtain copies through either their advisers or the Office of the Vice President for Student Affairs, 476 Schmitz Hall.

### Computer Use Policy

 [www.washington.edu/computing/rules.html](http://www.washington.edu/computing/rules.html)

All faculty, staff, and students who use any computer at the University are responsible for using computer resources in an ethical and legal manner. For example, it is not appropriate to share computer accounts or use them for commercial purposes, to send unwanted email, or to distribute copyrighted software, music, or images. Those who do not follow the rules could lose their UW computing privileges. For detailed information see the Web, or contact Computing and Communications Information at (206) 543-5970.

### University Policy on Student Education Records

 [www.washington.edu/students/reg/ferpa.html](http://www.washington.edu/students/reg/ferpa.html)

A copy of the University's policy on a student's right to inspect his or her education records and the University's responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available at the Registration Office, 225 Schmitz.

### Sexual Harassment Complaint Procedure

 [www.washington.edu/students/handbook/harrass.html](http://www.washington.edu/students/handbook/harrass.html)

Students, staff, faculty, and other users of University services who have a concern or complaint regarding sexual harassment may contact either the Ombudsman for Sexual Harassment, (206) 543-0283, or the University Complaint Investigation and Resolution Office, (206) 616-2028. Personnel in these offices provide assistance in resolving concerns and complaints. Also, University staff may contact their human resources representative about sexual harassment concerns.

**Vice Provost for Research**

Alvin L. Kwiram

**Assistant Vice Provost for Research**

Malcolm R. Parks

**Director, Grant and Contract Services**

Carol A. Zuiches

**Associate Vice Provost for Research and Director,  
Office of Technology Transfer**

Robert C. Miller

[www.washington.edu/research/](http://www.washington.edu/research/)

The Office of Research provides a range of services in support of scholarly and scientific inquiry at the University of Washington. The Vice Provost for Research works with faculty to establish appropriate research policies, develop research-related initiatives, increase resources available for research, and guarantee that the successes of faculty and the public benefits of research programs are widely known and understood. The Office of Research cooperates with the Graduate School and other units within the University that depend on or are affected by the research and graduate education activities of UW faculty. The Office of Research also serves as a point of contact with the public and private sectors on issues relating to research, including the solicitation of corporate research support, the transfer of research discoveries, and the promotion of economic development. The two main service organizations within the Office of Research are the Office of Grant and Contract Services and the Office of Technology Transfer.

The Office of Grant and Contract Services (GCS) reviews and approves all proposals to outside agencies for support of UW research. The Director of GCS is responsible for negotiating the terms and conditions for grants and contracts in consultation with the principal investigator and appropriate UW administrators. All grant and contract awards received by the University are communicated to GCS, which maintains a historical record of grant activity. GCS is also responsible, through its Human Subjects Division, for managing the human subjects review process at the University in cooperation with University's Human Subjects Review Committees.

The Office of Technology Transfer (OTT) works with UW faculty, staff, and students to identify commercially viable research discoveries. OTT seeks legal protection for inventions through patenting and other means, and negotiates contracts with companies interested in developing UW intellectual property. The revenues derived from OTT's activities are channeled back to the inventors, the UW units where the discovery originated, the Graduate School Fund, and the centrally administered Royalty Research Fund which supports UW research on a campus-wide basis.

**Funding for UW Research**

External Support for Research and Training is fundamental to the UW's established role as one of the nation's leading research institutions. During fiscal year 1999, the University received roughly \$600 million in grant and contract support for a wide array of research and training programs. Since the late 1960s, the University has ranked among the top five institutions in the United States in the receipt of federal research awards. About 80 percent of the University's grant and contract funds comes from federal agencies, most of the remainder coming from foundations, industry, and other private sources. These funds are awarded in response to faculty-initiated, University-approved proposals for funds to support specific projects in accord with the University's research, education, and public-service goals. Grant and contract funding, which is received in addition to legislative appropriations for the basic operation of the University, funds about 5,900 full- and part-time employees and provides significant opportunities for students who work with faculty members in the conduct of research as a vital component of their education.

In addition to federal research funding, corporations provide an increasing amount of funding for research. Last year, the UW received more than \$57 million in corporate research awards. This activity is expected to grow as University-industry collaborations continue to expand. Private gifts to the University total more than \$103 million per year and also add significantly to the opportunities of students and faculty to pursue research interests.

Internal Support for Research at the UW is based in part on the principle of directing revenue that arises from UW research discoveries back into the University's research enterprises. The Office of Research administers the Royalty Research Fund (RRF), which is derived from the UW's central share of royalty and licensing income negotiated by OTT and the Washington Research Foundation

with companies that commercialize University technologies. The goal of the RRF is to stimulate additional scholarly initiatives, to encourage faculty to explore new directions in research and scholarship, and to improve the environment for intellectual endeavors at the University. Proposals must demonstrate a high probability of generating important new scholarly materials or resources, significant data or information, or essential instrumentation resources that are likely to lead to external funding or that might lead to a new technology. The RRF guidelines, procedures, and application forms are available from the Office of Research.

**Special Facilities**

In support of scholarship, research activities, and regular academic offerings, the University maintains a wide range of special facilities that provide unique educational opportunities. The following list is illustrative of the range and diversity of special facilities at the UW.

**Academic Computer Center**

Provides instructional and research computing services for the University.

**Applied Physics Laboratory**

A research and development organization within the College of Ocean and Fishery Sciences, APL is one of four university research centers in the United States affiliated with the U.S. Navy. APL conducts a program of fundamental research, technology development, engineering, and education, emphasizing naval applications of ocean and polar science, acoustics, and engineering. APL has a \$30 million annual research and development budget and employs approximately 270 staff members, including 147 scientists and engineers (33 with faculty appointments) who conduct research for the Navy, NSF, NASA, NOAA, ARPA, and other federal agencies and who participate in partnerships with private companies.

**Burke Memorial Washington State Museum**

An educational and cultural center whose function is to collect, preserve, research, exhibit, and interpret the natural and cultural objects of the human environment, particularly the Pacific Ocean, its islands, and mainland shores.

**Henry Art Gallery**

The art museum of the University of Washington.

**Friday Harbor Laboratories**

The Friday Harbor Laboratories facility is the principal marine-science field station of the University of Washington. Its faculty is drawn from various academic units of the University, including botany, fisheries, oceanography, and zoology, as well as visiting faculty members from many other U.S. and foreign institutions.

The Laboratories, located approximately 80 miles north of Seattle near the town of Friday Harbor on San Juan Island, offer a biological preserve of nearly 500 acres of wooded land with about two miles of shoreline. The island is one of the largest of the 172 that make up the San Juan Archipelago, located in the northwest section of the state of Washington between Vancouver Island and the United States mainland. In addition to the Friday Harbor site, the Laboratories' administration has the responsibility for overseeing biological preserves leased or owned by the University on San Juan Island (False Bay and Argyle Lagoon), Shaw Island (uplands adjacent to Point George and Parks Bay; Cedar Rock Biological Preserve), and Lopez Island (Point Colville and Iceberg Point). Goose and Deadman islands, biological preserves owned by the Nature Conservancy, are also under the stewardship of the Laboratories.

The Laboratories are located close to seawaters that range from oceanic to those highly diluted by streams, some with depths to 1,000 feet, others with bottoms varying from mud to rock, and water movements ranging from those of quiet bays and lagoons to those of swift tideways. The waters about the San Juan Archipelago abound in varied marine flora and fauna.

The Laboratories offer opportunities for independent and supervised research, as well as a varied program of instruction for graduate and undergraduate students. Throughout the year, use of the Laboratories' facilities for research in various areas of marine science is encouraged.

**Nuclear Magnetic Resonance Facility**

The UW has one of the most advanced facilities for nuclear magnetic resonance (NMR), with high-field superconductivity magnets capable of investigating biomolecules, macromolecules, and solid state samples at frequencies of 500 MHz for protons. The UW also has a state-of-the-art 750 MHz spectrometer installed at the end of 1995.

**Nuclear Physics Laboratory**

The Nuclear Physics Laboratory is one of the nation's foremost university-based nuclear research facilities. It houses a Van de Graaff accelerator and a cyclotron for research in physics, chemistry, cancer therapy, nuclear medicine, radiation biology, and related fields.

**Oceanographic Research Vessels**

These are operated for field study and research in Puget Sound and the Pacific Ocean.

**Speech and Hearing Clinic**

Serves as a center for research in speech science, speech and language pathology, and audiology, and provides services to the public.

**University of Washington Medical Center/  
Harborview Medical Center**

The University operates two major teaching hospitals: its own 450-bed University of Washington Medical Center and, under contract with King County, the 411-bed Harborview Medical Center.

**University Libraries**

With more than five million volumes, an equal number of microforms, several million items in other formats, and more than 50,000 serial titles, the University of Washington Libraries houses one of the top research collections in the country and forms a part of one of the most innovative electronic campus information networks in the world. The fully integrated, computerized UW Libraries Catalog provides bibliographic information and circulation status for the cataloged holdings of the Libraries. The UW Libraries Catalog and an increasing number of other databases (ERIC, MEDLINE, INSPEC, PsychINFO, MLA Bibliography, etc.) may be searched by author, title, subject, publisher, keyword, and various numbers, including call number, International Standard Book Number (ISBN), International Standard Serial Number (ISSN), and Superintendent of Documents Number. Publication date and date ranges are among the limit options available.

The UW Libraries Information Gateway provides access through a single World Wide Web location to all the Libraries' resources, print and electronic, as well as tools, services, and the ability to search a wide range of Internet resources. For more information, call Reference and Research Services, (206) 543-0242, or consult the Libraries' Web site ([www.lib.washington.edu](http://www.lib.washington.edu)).

The Libraries also offer an extensive array of services at each of its 22 units. The Suzzallo and Allen Libraries, the Odegaard Undergraduate Library, the Health Sciences Library and Information Center, the East Asia Library, and 15 branch libraries each provide reference services and offer instruction in the use of library resources.

**X-Ray Beamline Facility**

Located at the Advanced Photon Source of the Argonne National Laboratory in Argonne, Illinois, this facility is operated by a Pacific Northwest consortium led by the UW. It supports the investigation of the properties of x-rays and their interaction with matter. The Advanced Photon Source uses synchrotron radiation to provide the most brilliant source of x-rays currently available.

**Centers, Institutes,  
and Other Research Organizations**

More than 170 centers, institutes and other organizations operate at the UW in support of faculty research activity. In many cases, centers and institutes are created to facilitate interdisciplinary research or to coordinate research involving many participants, some from outside the UW community.

- Addictive Behaviors Research Center
- Advanced Power Technologies Center (APT)
- Aerospace & Energetics Research Program
- Alcohol and Drug Abuse Institute
- Alzheimer's Disease Research Center
- APEC Internet Collaboration Center
- APEC Study Center
- AVID Clinical Trial Center
- Behavioral Research and Therapy Clinics (BRTC)
- Biomolecular Structure Center
- Bone and Joint Center
- Canadian Studies Center
- Cardiovascular Research and Training Center
- Cascade Center for Public Service

### Field Stations

Field work is an essential component of research and instructional programs in many academic disciplines, and access to appropriate field sites is vital and necessary for research universities. Detailed information about each of the University's research sites is available in *University of Washington Field Stations*, an inventory available from the Office of Research. The following list of 28 sites represents a broad spectrum of types and locations.

Apache Point Observatory, Archaeology Field School, Big Beef Creek, Blue Glacier, Cheeka Peak Atmospheric Research Station, Chignik Lake, Clifford A. Barnes Research Vessel, Energy Test Homes, Friday Harbor Laboratories, Joe E. Monahan Findlay Lake Reserve, Lake Ilamna and Porcupine Island, Lee Forest, Manastash Ridge Observatory, Olympic Natural Resources Center, Organization for Tropical Studies, Pack Forest, Regional Primate Research Center, Rome Center, Seismic Network, Seward Park Hatchery, Thomas G. Thompson Research Vessel, Thompson Research Site, Union Bay Ecological Research Area, University of Washington Aircraft Hangar, Washington Park Arboretum, Westport House, Wind River Canopy Crane Research Facility, Wood River System.

### The Impact of UW Research

Research programs at the UW benefit students, the state, and the nation. Over the last decade, these programs have produced life-saving advances in medical technology, support for key state and regional industries, research and analysis on critical public-policy issues, patented technologies, training for more than 8,000 graduate and professional students each year, as well as contributions to scholarly literature in virtually all major fields of the arts, sciences, and humanities. The following sections contain brief descriptions of a few of the many interesting research projects currently underway at the UW.

#### Earth, Ocean, and Atmospheric Sciences

UW earth scientists have a long tradition of concentrating on regional studies to learn more about the forces that continue to shape the Pacific Northwest. Recent evidence suggests that great earthquakes of magnitude 7 or 8 have occurred in the Pacific Northwest in the not-too-distant past, and are likely to recur at some time in the future. Data gathered from a network of seismic stations throughout the Pacific Northwest are permitting new faults in the region to be mapped and characterized. The first three-dimensional images of structures within the earth in this region are being generated. Lessons learned from seismic studies since the eruption of Mount St. Helens are being applied to eruptive activity around the globe, from Alaska to Mount Pinatubo in the Philippines. Additionally, extreme conditions deep inside the earth are simulated in the UW High Pressure Mineral Physics Lab in order to understand the geologic processes that shape our planet.

Underwater observing platforms have been installed to monitor volcanic activity on the sea floor more than a mile and a half below the surface of the Pacific Ocean off the coast of Washington state. These undersea volcanoes and hydrothermal vents spew out heated, mineral-laden waters that nourish exotic life forms and form rich metal deposits. The heat-loving organisms, capable of existing without light from the sun, are among the most ancient forms of life on earth.

UW scientists have long been interested in polar research, including both the Arctic and the Antarctic. The University is one of the major centers in the world for studies of ocean currents, ice formation, ice movement, and air-sea-ice interaction in these regions. UW personnel have developed unusual expertise for operating in polar regions. Through the Applied Physics Laboratory, UW investigators regularly conduct studies from bases sited on Arctic pack ice and have deployed a series of weather buoys on the ice and in Arctic waters that form part of a worldwide weather-forecasting system.

An ice core containing an unprecedented record of climate conditions in a near-coastal area of Antarctica has been obtained by scientists in the UW Quaternary Research Center. The ice sample, which goes back 140,000 years through a complete ice-age cycle, was taken at Taylor Dome, the site of major changes in glacier cover that affected sea level at the end of the last ice age.

Work by UW atmospheric scientists has established the role of sulfate aerosol in global climate change. Other studies are shedding light on past and future El Niño weather events—intervals of especially warm ocean temperature that periodically appear around December in the equatorial Pacific and that disrupt weather patterns around the globe. UW researchers have developed a theoretical understanding of the mechanisms that give rise to the El Niño phenomenon. Cores obtained from coral formations in the Pacific provide a record of past El Niño events and may lead to more accurate forecasts of these weather changes in the future.

UW atmospheric scientists pioneered the study of clouds and weather systems by flying into the heart of storms approaching the Washington coast. Now, aeronautical engineering researchers at the UW will be able to gather weather data using a fleet of unmanned airplanes. With the advent of global positioning satellite technology, these unmanned aircraft can be piloted by computer on flights of more than a thousand miles to gather data to improve the accuracy of northwest weather forecasts.

The School of Fisheries, renowned for the development of the Donaldson salmon as well as for its contributions to the High Seas Salmon Program and Alaska Salmon Program, also has made many important contributions to the development of shellfish aquaculture in Puget Sound and around the world. The triploid oyster, prized for its superior characteristics, was developed by UW fisheries researchers.

The Columbia River Salmon Passage model, or CRISP, is a computer model that relates the number of juvenile salmon that survive their journey through reservoirs and dams on the Columbia River to various parameters such as hatchery release dates, reservoir levels, and water flow rates. The model may help fishery biologists and planners understand the complex implications of river management decisions.

### Physical and Chemical Sciences

Extremely high precision measurements of atomic properties are the forte of a strong atomic physics group, which brought recognition in the form of a Nobel Prize awarded to Professor Hans Dehmelt in 1989. Later, the University won a competition sponsored by the Department of Energy for its first Nuclear Theory Institute. Since that time, a distinguished staff and an international visitor program have made the University a center for research in fundamental nuclear physics and associated problems in astrophysics and particle physics.

One of four Department of Energy-supported nuclear physics laboratories located at American universities is found at the University. This laboratory is equipped with a superconducting booster to a tandem Van de Graaff accelerator, placing the nuclear physics research facility on a par with the best in the world in its energy range. The Particle Physics Group and the Visual Techniques Laboratory are engaged internationally in research at the frontiers of knowledge relating to high-energy particles created both in the laboratory and by nature.

The University has been a leader in the development and use of XAFS, a sophisticated x-ray tool for determining the structure of materials. Physicists studying condensed matter are engaged in the development of the Advanced Photon Source, a high-energy x-ray source that will be the most intense in the world. With this source it will be possible to carry out detailed studies of topics such as the growth and structure of liquid-crystal films; the structure on an atomic scale of proteins and new, specially tailored drugs; and the structure of thin films, ranging from one atom thick to multiple-layered heterostructures with many layers of atoms.

Astronomers at the University conduct research in a wide variety of astronomical subjects, from the study of solar system bodies to the nature of the universe. The UW's Interplanetary Dust Laboratory has pioneered the discovery and study of cometary and asteroidal dust. The Stardust mission led by UW astronomer Don Brownlee will gather and return samples of interstellar dust from a comet called Wild-2 in January 2004. Stardust, which was selected by NASA as the fourth flight mission in its Discovery program, was launched on an expendable launch vehicle in February 1999. The return capsule carrying the comet dust samples will parachute to Earth in January 2006.

The University is part of a consortium that has constructed a 3.5-meter optical telescope located at Apache Point in the New Mexico mountains. An innovative design made this telescope lighter and more inexpensive to build than previously possible. One of the largest university-operated telescopes in the country, faculty and students can access it remotely from a laboratory in the new Astronomy-Physics Building on the UW campus.

UW astronomers have also used the Hubble Space Telescope to probe the secrets of stellar evolution, deriving a fresh understanding of the way that stars are born, change, and die. Scientists explore the nature of galaxies and their mysterious content of "dark matter." Other studies range from the nature of cosmic black holes to mergers and violent collisions of galaxies, and quasar phenomena.

Basic research in the chemical sciences is aided by exceptional research tools. The Department of Chemistry is collaborating with Pacific Northwest National Laboratory, Richland, Washington to construct a 1,000-megahertz nuclear magnetic resonance (NMR) spectrometer which will provide an instrument of unprecedented power for probing molecular structure. The University also has state-of-the-art equipment for studies involving magnetic resonance imaging (MRI), used by health researchers studying complex biological processes.

The Center for Process Analytical Chemistry is a joint University/industry effort to develop novel sensors and instrumentation for continuous monitoring of chemical processes used in the manufacturing and environmental settings. Projects range from fiber-optic sensors and spectrometric methods to data analysis and process-control algorithms. Research results from the Center transferred to industrial sponsors have led, for example, to a commercial, online, near-infrared spectrometer for determining quality parameters of hydrocarbon fluids.

### Engineering and Applied Sciences

A group of UW engineering researchers working in the field of biomimetics is taking its inspiration from nature in designing new materials. The group is probing the secrets of such natural substances as slug mucus, spider webs, and abalone shells in order to produce man-made materials that are stronger, lighter, less expensive, and more environmentally benign to manufacture than conventional materials.

The Washington Technology Center (WTC) is a state resource, established in 1983 with funding from the combined Department of Community and Economic Development. It was created to encourage collaborative industry-University research and development in new and emerging technologies to benefit the economic vitality of the state of Washington. Current research areas include advanced materials and manufacturing, biotechnology, computer systems and software, microelectronics, and human-interface technology. The WTC promotes faculty collaborations with industry within the state, and co-sponsors applied research at the state's research universities directed toward the needs and interests of state industries. Its statewide headquarters are located in Fluke Hall at the UW.

The Center for Bioengineering is the home of pioneering work in diagnostic ultrasound, which enables physicians to image in detail the internal features of a patient without having to perform surgery. In addition, important strides continue to be made in understanding how to design man-made materials that are compatible with the human body. Working together in the University of Washington Engineering Biomaterials (UWEB) project, a group of UW researchers hopes to develop a new generation of medical implants that mimic the biology of the body parts they replace, thus fooling the body into accepting foreign materials.

The Department of Computer Science and Engineering is known for its catalytic role in bringing tools for designing microchips to engineers and industrial firms in the Pacific Northwest, and for its pioneering work to address critical safety issues in software systems. Recently, UW researchers have been recognized for work leading to a three-dimensional photography system as well as for the development of Internet and World Wide Web searching tools called software robots ("softbots").

The tremendous flexibility and power of Geographic Information Systems are being brought to bear on a wide range of research activities across the campus. In a fusion of GIS, computer-aided design, and virtual reality, efforts are underway to link GIS capabilities with visualization tools to allow users to display and move around in a virtual three-dimensional representation of a GIS database. For example, city planners may be able to use GIS systems to navigate through a cityscape to visualize key features or to evaluate different planning options. This is the focus of the Community and Environmental Design and Simulation Laboratory at the University, a partnership between the College of Architecture and Urban Planning and the Human Interface Technology (HIT) Lab of the WTC.

In another project at the HIT Lab, researchers have developed a process to display electronic images directly on the human retina. Researchers anticipate the retina display may replace computer screens and video monitors in the future.

The University is part of the Pacific Earthquake Engineering Research Center (PEER), a \$20-million effort funded by the National Science Foundation. Its goal is to identify and mitigate potential earthquake hazards along the Pacific Coast. The UW joins eight California universities in the project. Amid mounting historical evidence that the Pacific Northwest is at risk for devastating temblors, the center will study new ways to assess earthquake resistance, as well as seismic retrofitting options for major structures.

## Biological Sciences

Research programs in the biological and zoological sciences take research teams to sites in the Pacific Northwest region and beyond, to remote corners of the world. Research in zoology has focused on the neurological basis of behavior and the origin of circadian rhythms, the physiology of insect development and the role of hormones in metamorphosis, and the ecology of intertidal communities. Pioneering field studies of the male red-winged blackbird conducted by UW zoologists have helped to explain the phenomenon of territorial dominance in animals.

A multidisciplinary team of UW scientists has been intensely involved in the study of the recovery of life in the blast zone that resulted from the eruption of Mount St. Helens in 1980. Findings from that effort are changing how scientists understand and study the recovery of volcanic sites around the world.

In order to study the tops of trees and tips of branches where most budding, branching, and photosynthesis occur, and to understand what makes forests thrive, the UW has erected a construction crane in the Gifford Pinchot National Forest in southwest Washington. The crane's gondola can be moved in a 550-foot circle, giving researchers access to nearly six acres of old-growth canopy. The crane is the largest forest research crane in the world and the only one located in a temperate forest.

Forest nutrition studies initiated decades ago by UW researchers have produced one of the largest databases in the world on the growth characteristics of Douglas fir and western hemlock, and spawned a highly successful research cooperative comprising over 35 organizations. Today, the Stand Management Cooperative integrates research in forest nutrition, silviculture, wood quality, and modeling.

UW microbiologists have pioneered genetic engineering techniques for plants. A UW group applied the latest gene mapping techniques to the problem of how much genetic change is required in order for a new species to evolve, one of the central mysteries of evolutionary biology. Investigators from the College of Forest Resources and the Departments of Biochemistry and Botany have teamed up in this effort.

Researchers in the Department of Genetics in the College of Arts and Sciences have conducted basic research in yeast genetics that has led to a vaccine against Hepatitis B.

## Health Sciences

Since its establishment many decades ago, the UW Health Sciences Center has become well known for its teaching, research, and patient care. University physicians and staff members pioneered the first successful long-term kidney dialysis techniques, which have led to lifesaving treatments for tens of thousands of people. Continuing research is leading to the production of simpler and more portable devices for patients suffering from kidney failure.

Medic One, a system of rapid response for victims of accidents and heart attacks, is based at Harborview Medical Center, one of the University's two teaching hospitals. It has provided a national model for emergency medical care.

University physicians have been leaders in the development of bone marrow transplantation, which offers the hope of curing several forms of leukemia. E. Donnall Thomas, former head of medical oncology at the University, now professor emeritus, received the Nobel Prize in 1990 for developing bone marrow grafting techniques.

Fundamental research in biochemistry is unlocking the secrets of life processes at the molecular and cellular level. The discovery of protein phosphorylation—the reactions that regulate energy use, growth, and transformation of cells—by UW scientists Edmond Fischer and Edwin Krebs was recognized with the Nobel Prize for Medicine in 1992.

Building on work over the past three decades to understand the structures of ion channels in the cellular membrane, new efforts are directed toward the relationship between ion channel abnormalities and various diseases such as cystic fibrosis, certain bacterial infections, and forms of muscular dystrophy.

UW scientists have made important progress in understanding the causes of atherosclerosis, in understanding and isolating blood growth and blood clotting factors, and in studying the processes involved when white blood cells engulf and destroy bacteria. On another front, a UW team has developed a novel method to measure bone loss and to monitor the effectiveness of therapies to treat osteoporosis; the technology is being commercialized by a Seattle company.

The UW played an instrumental role in launching and promoting the Human Genome Project, the 15-year, \$3-billion effort to map the roughly 100,000 genes that provide the blueprint for the human body. Recently completed was the sequence analysis of the beta T Cell receptor family. The work has yielded the longest stretch of human genetic sequence analyzed to date and is changing how scientists study human T Cell receptor genes.

A UW center in ecogenetics explores the genetic basis for cellular responses to environmental insults or other stresses. Research programs at the UW in the study of heart disease, diabetes, and sexually transmitted diseases have achieved international recognition.

Genetic engineering techniques leading to the transgenic mouse and the use of transgenic animals in the study of new treatments for disease have been pioneered at the University.

The School of Pharmacy has a strong program in pharmacokinetics, the study of how drugs are metabolized and the rate at which they affect target organs and are eliminated by the body. Research is aimed at the analysis and prediction of dangerous drug interactions.

The University's Center on Human Development and Disability is recognized for its pioneering work in the causes, prevention, and treatment of diseases and disorders leading to mental retardation and other developmental disabilities.

The UW School of Dentistry is renowned for its work in periodontology, the study of infectious diseases of the tissues surrounding the teeth. The School has the largest clinical service in the world dedicated to the challenges of treating patients with dental fears and phobias. A UW dentistry team has developed the first diagnostic criteria for temporomandibular disorders—chronic pain in the ear, jaw, or muscles of the face, conditions which affect some 12 percent of the population. University faculty participated in a landmark survey of children's dental health in Washington state.

## Social Sciences

Interactions among individuals and groups determine the texture of society. The study of these interactions is the province of social scientists, whose work ranges from basic research on perception to the effect of interest groups on public policy.

Nationwide attention has been given to the work of UW investigators studying couples and the common factors that underlie successful relationships. In related research, several investigators are examining the processes of interaction in small groups, from families to work teams.

The award-winning Social Development Research Group in the School of Social Work conducts innovative research on the causes and prevention of violence, crime, drug use, school dropout, and other problems that affect children and families.

Important research in leadership and motivation, in human memory, and in alcoholism and addictive behavior is being carried on in a number of academic disciplines. Alcoholism studies range from physiological experiments to model counseling programs for pregnant women to participant-observer studies of addictive behavior. The focus for this effort is the Alcohol and Drug Abuse Institute.

Social scientists have performed provocative studies on the changing role of urban neighborhood organizations. Another group has concentrated on deviant behavior, including juvenile delinquency and possible prevention strategies. Its work is part of a larger effort by faculty members and graduate students to explore the ways that society's institutions react to deviant behavior.

Anthropologists are studying the changes in fertility, medical history, and cultural adaptation of the Japanese-American community in the Pacific Northwest, and the challenges faced by immigrants from Vietnam and Laos. Other faculty members are pursuing problems in distant locales and times, such as the beginning of agriculture in the Nile Valley.

Geographers are studying regional issues, such as the economic linkages between the Pacific Northwest and other parts of the country, the design and financing of efficient and equitable transit systems, the recent surge in population of nonmetropolitan areas and its policy implications, and the geography of access to health care.

Economists continue working on models to predict the results of federal monetary and fiscal policy. A group of researchers is breaking ground in a relatively unexplored area, the economics of natural resources, comparing the costs and benefits of different patterns of usage. These investigations are designed to help policy makers evaluate alternatives.

Social scientists at the University have a special interest in international relations. The University has been a pioneer in research concerning the Near and Far East, and this important role was emphasized with the establishment of the School of International Studies in 1978 (now the Henry M. Jackson School of International Studies), the culmination of more than 60 years of scholarly activity in area studies and international relations. Scholars in political science, anthropology, sociology, and the humanities study the role of culture in international affairs. Economists and geographers study development, resource management, and international economics. Historians complement the work of social scientists in exploring the basis of current thought, and scholars in languages and literature provide essential knowledge of original texts and the relationship of language to culture.

### Humanities and the Arts

Research in the humanities often fulfills a primary mission of humanistic study—the preservation of the literary and artistic achievements of mankind. One aspect of this research is textual scholarship, involving the identification and authentication of original texts and artifacts. New knowledge is also generated through reassessment of earlier texts and works of art.

Texts that form part of Egypt's Nag Hammadi Library, found more than a quarter of a century ago but only recently translated from Coptic, may lead to a reinterpretation of early Christianity. Located near the upper Nile, the library contains documents from little-known monastic groups, previously unknown Christian gospels, and both familiar and unfamiliar sayings of Jesus. A UW scholar studying these texts expects them to have as great an impact as the discovery of the Dead Sea Scrolls. The texts also will shed more light on the heretical Gnostic movement, which offers a radically different interpretation of Genesis.

The earliest history of Buddhism is largely lost, because the first documented efforts to commit Buddhist scriptures to writing did not occur until 400 years after the death of the Buddha. This gap has been filled in part by the recent discovery of 29 fragments of Buddhist texts, the earliest yet found. UW professors and graduate students from the Department of Asian Languages and Literature are engaged in a joint project with the British Library to transcribe and interpret the texts, which are expected to help clarify the early development of Buddhist doctrine and literature.

Research often is meant to describe exclusively the generation of new knowledge, but in the humanities a growing number of faculty members explore the theoretical basis underlying our knowledge and the means of transmitting it. The focus for these studies has been a colloquium in theory involving faculty members and graduate students. Discussions on problems in the theory of narrative, for instance, may span literature, history, science, and psychoanalysis—in fact, wherever the written word is used. The colloquia have acted as catalysts for several scholarly articles and may lead to an expanded program encompassing other disciplines.

Theoretical studies also form an important component of research in the arts. Some faculty in the School of Music conduct extensive research in the scientific analysis of sound, known as systematic musicology. Studies in this field include the influence of vibrato on judgments of vocal blend; context and time in musical perception; and rhythmic responses of preschool children. Other faculty members are exploring new ways of creating music, including the use of computers.

The concept of scholarly achievement in the arts often is synonymous with performance or exhibition. The UW School of Music has on its faculty a number of nationally recognized composers, including two long-time recipients of research funds from the American Society of Composers, Authors, and Publishers (ASCAP). The awards are designed to encourage and assist writers of serious music. The School of Music also is home to one of the finest opera programs in the country.

The School of Art faculty includes nationally and internationally known artists and scholars in nearly every one of its ten studio, art history, and design disciplines. Studio artists carry on the age-old quest for aesthetic quality but also pursue stylistic innovation, as well as developing new techniques in such diverse areas as non-toxic water-soluble printing and computer-generated imagery. Many of the School's art historians have helped reshape this young discipline through their studies of art as cultural expression.

The UW School of Drama houses the famous Professional Actors' Training Program, which, besides teaching basic acting skills, provides an intensive introduction to the practice of the theatre arts. The program attracts dedicated students who work for demanding, scrupulous visiting directors from the commercial stage as well as for permanent faculty members with extensive professional experience. Graduate research in the history and practice of theatre forms an integral part of the School's diverse program.

The University's program in creative writing is one of the oldest in the country. It achieved prominence in the 1950s and 1960s, when its faculty included Theodore Roethke, winner of the Pulitzer Prize in 1953. The tradition of excellence continues, with current University poets and authors receiving critical acclaim throughout the nation, including Professor Charles Johnson, who was awarded the 1990 National Book Award for Fiction. This concentration of talent has made the University a center for literary activity in the Pacific Northwest.

The Center for advanced Research Technologies in the Arts and Humanities (CARTAH) supports and promotes computer-based research and creative work in the arts and humanities. The center helps foster liaisons between the research community and the University's arts and humanities departments, and provides state-of-the-art computing and media resources. CARTAH has become known internationally as an important center for producing new digital art and plays a key role in developing educational technology at the UW.

# UW Extension

## Office of Educational Outreach (UW Extension, Summer Quarter, Evening Degree Program, and Distance Learning)

### Vice Provost

David P. Szatmary

[www.outreach.washington.edu](http://www.outreach.washington.edu)

Established in 1912, UW Extension brings the University's resources to the community by providing access to quality educational programs which meet ongoing professional and personal needs.

This section describes the various programs currently part of UW Extension. The quarterly UW Extension catalog contains details of the program offerings. It is mailed without charge to residents of western Washington, who may also receive it by calling (206) 543-2320 or by writing to UW Extension, Box 354224, Seattle, Washington 98105-4190. Catalogs can also be requested at UW Extension's Web site.

### Evening Degree Program

Many credit courses are offered each quarter for students pursuing a degree, as well as those who are not formally admitted to the University. The classes are intended for non-traditional degree seekers as well as for postbaccalaureate individuals pursuing new skills and knowledge. All evening credit courses are taught by University faculty members and lecturers, approved by the appropriate academic units. UW credit is awarded and the grades earned are included in GPA calculations. Matriculated students enrolling in these courses pay course fees in addition to regular tuition.

### Graduate Nonmatriculated Program

Individuals not admitted to a graduate program who wish to enroll in a graduate-level course may apply for graduate nonmatriculated student (GNM) status. Credits earned as a GNM may be applicable toward a degree upon subsequent admission to a graduate program. Application forms are available from participating departments. The Graduate School: Graduate Study section of this catalog offers more details.

### UW Extension Distance Learning

Approximately 130 credit courses and five certificate programs are delivered through UW Extension Distance Learning. Courses are delivered by print, video, audio, and the World Wide Web, and typically consist of assigned texts, study guides, assignments, and examinations. Most courses use interactive Web sites, email and voice mail to enhance interactions with instructors as well as other students. Certain noncredit courses required for University entrance are available to those who wish to qualify for admission. Other courses provide subject matter for professional continuing education.

Courses are open to persons who prefer an alternative to on-campus classroom meetings. Matriculated University students often find distance learning a convenient way to earn credits during summers or during the evening, or a way of taking courses that would otherwise be unavailable due to schedule conflicts.

Formal admission to the University is not required for enrollment in distance learning certificate programs and UW Extension courses. Students may register at any time for most courses and have between three and six months to complete the work. As many as 90 credits earned through distance learning may be applied to a University baccalaureate degree. Upon successfully completing a course, the grade and number of credits earned are recorded on an official University transcript. Grades earned, however, are not computed in the University GPA, which is based solely on courses taken in residence. (This policy is currently under review.) UW Extension offers certificate programs to students at a distance through various technologies (see the Certificate Programs section of this catalog).

UW Distance Learning catalogs may be obtained by telephone, (206) 543-2320 or 1-800-543-2320; by writing to UW Distance Learning, UW Extension, Box 354223, Seattle, Washington 98105-4190; or by sending email to [instudy@u.washington.edu](mailto:instudy@u.washington.edu). (Include name, address, and social security number). Additional information is available through the UW Extension Distance Learning Web site.

## English As A Second Language Department

The English As A Second Language (ESL) Department provides non-native speakers of English who are interested in improving language skills with the following services and resources:

1. *Academic ESL courses for UW students.* English is the language of instruction at the University, and many students who are not U.S. citizens need additional English training to facilitate participation in regular University programs.

Students who are not U.S. citizens (and whose native language is not English) admitted with TOEFL scores of at least 500 but below 580 or Michigan Proficiency Test scores of at least 80 but below 90 are required to take the University's ESL diagnostic test before matriculating. Students whose test results show their English to be adequate for full-time University study are excused from ESL course work. Others must take those ESL courses designated as required each quarter until the language requirement is completed.

During the academic year, the courses offered are designed for students who are not U.S. citizens who are officially enrolled in a degree program at the University as either undergraduate or graduate students. These students take ESL courses along with their regular programs of study. English As A Second Language courses count as the equivalent of five credits each for the purposes of satisfying visa requirements but do not count toward graduation. Special fees are charged for these courses instead of tuition.

2. *UW Extension ESL courses for all non-native speakers.* The ESL Center offers a separate series of noncredit courses that are open year-round to any adult non-native speaker who would like to study English. These courses do not require formal admission to the University. Application may be made to the address below.

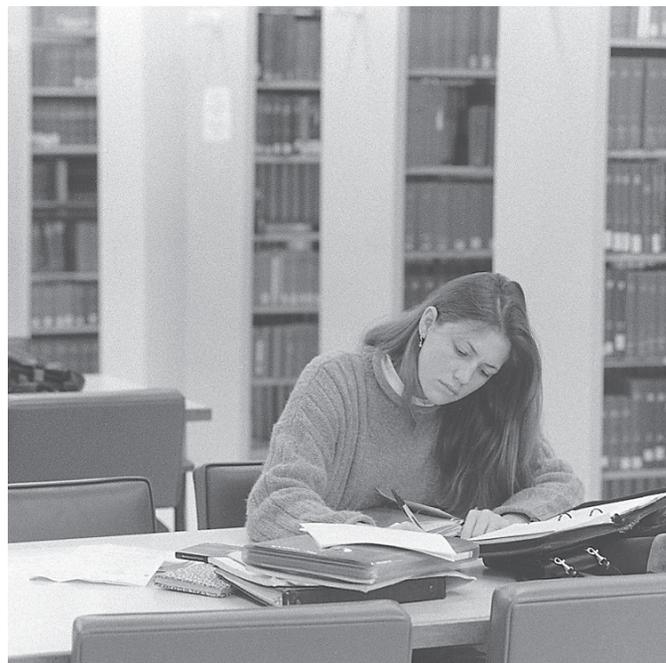

Additional information about ESL services, including complete listings and descriptions of current ESL course offerings at the University, is available from the ESL Department, Box 354232, Seattle, Washington 98195-4232, (206) 543-6242, or the ESL Web site ([www.outreach.washington.edu/esl/](http://www.outreach.washington.edu/esl/)).

## Noncredit Classes

UW Extension offers a broad range of courses, certificate programs, institutes, conferences, and seminars for adults, students, and children. Noncredit classes offer opportunities for professional development and personal enrichment. Specific programs are announced quarterly in the UW Extension catalog. To receive a catalog, call (206) 543-2320.

## Advising and Recruitment

UW Extension is committed to providing needed resources and skills to the Puget Sound community. Through its Advising and Recruitment department, companies are contacted and customized training programs are provided. Information meetings on various courses are held at companies, on campus, and in downtown Seattle. Advisers are available to answer questions on any of UW Extension's credit or noncredit courses or certificate programs. They may be reached at (206) 543-6160.

# University of Washington, Bothell

The University of Washington, Bothell (UW Bothell) admitted its first students in autumn quarter 1990 and has grown rapidly since. UW Bothell is fully accredited as part of the University of Washington and awards a University of Washington degree. In addition, professional programs are accredited by their respective accrediting bodies.

All programs give particular attention to the development of skills appropriate to an advanced level of study, to writing and oral communication, to the analysis and assessment of information, and to collaborative work with other students. At present the following programs are offered: Bachelor of Arts in Liberal Studies, Bachelor of Arts in Business Administration, Bachelor of Science in Nursing, Bachelor of Science in Computing and Software Systems, Master of Education, Master of Management, and a postbaccalaureate Teacher Certification Program for elementary school teachers. Minors are currently offered in computing, business, and education. A Bachelor of Science in Environmental Sciences, a Master of Arts in Public Policy, and a Master of Science in Computing and Software Systems are being planned for the 2001-2002 academic year. As state funding permits, options will be added in existing programs and additional undergraduate and graduate degree programs will be considered.

UW Bothell is committed to increased access to higher education for residents of north, northwest, and northeast Puget Sound. To serve a diverse student population, most programs offer part- and full-time study options, with day, late afternoon, and evening classes. The teacher certification program requires full-time study. Financial aid and a tuition installment plan are available.

UW Bothell is temporarily located in the Canyon Park Business Center, near the intersection of Interstate 405 and State Route 527. An exciting new campus, which is home to UW Bothell and Cascadia Community College will open for the 2000-2001 academic year. It is located on the former Truly Farms site, at the intersection of Interstate 405 and State Route 522. The campus is also home to the largest wetlands restoration project in the United States.

## Degree Programs

Detailed descriptions of the academic programs offered at UW Bothell may be obtained by calling the Office of Admissions at (425) 352-5000 or 1-800-736-6650. A brief overview of the programs is provided below. Undergraduate programs are offered at the upper-division level; students are expected to have completed their first two years (80 to 90 quarter credits) of college study prior to entry, and then to complete at least 90 additional credits at the upper-division level to earn the bachelor's degree. The teacher certification program is offered as a postbaccalaureate program. The Master of Education degree requires a minimum of 45 credits, and the Master of Management degree requires a minimum of 60 credits.

*Interdisciplinary Arts and Sciences:* The IAS program is an innovative and interdisciplinary program combining the methods, materials, and intellectual tools of the humanities, social sciences, and sciences. Because the ability to think, write, and speak effectively is a vital part of a liberal studies education, the program is designed to improve competence in these essential skills. The program leads to a Bachelor of Arts in Liberal Studies with degree options in American studies; society, ethics, and human behavior; culture, literature, and the arts; global studies; and science, technology, and the environment. Pending approval and funding, a Bachelor of Science in Environmental Science will begin in autumn 2001, as well as a Master of Arts in Public Policy.

*Business Administration:* The business administration program offers an integrated approach to the study of business. The program emphasizes effective oral and written communication, teamwork in a diverse workforce, entrepreneurial management, high technology and the global business environment. With close ties to the greater Seattle business community, a "real world, hands on" approach is offered. In addition, business students complete courses in liberal studies to better understand the larger social and cultural context in which business functions. The undergraduate curriculum focuses on essential business core courses and currently offers options in marketing; management; innovation and technology management; finance; and international environment.

At the graduate level, the business program offers a Master of Management degree with a focus on technology-oriented businesses and is designed for working professionals. The program covers advanced topics in finance, accounting, marketing, project management, and organizational behavior, within the context of the unique opportunities and challenges facing high-tech companies today.

Both the Bachelor of Arts in Business Administration and the Master of Management degrees are credited by the American Assembly of Collegiate Schools of Business (AACSB).

*Computing and Software Systems:* The Bachelor of Science in Computing and Software Systems (CSS) program features an innovative and broad approach to the design of applications software. Within the major, there are three options: applications programming, systems analysis, and information engineering. Students gain essential knowledge and skill in state-of-the-art computing theory, application development, problem solving, communication, and management. Through industry partnerships, students have the opportunity for "real-world" experience. Designed in collaboration with representatives of high-tech industries, the CSS program prepares students for employment, graduate education, and life-long learning in this dynamic field. Pending approval and funding, a new Master of Science in Computing and Software Systems is planned for autumn 2001.

*Nursing:* The Bachelor of Science in Nursing program at UW Bothell is specifically designed for registered nurses who have at least 90 transferable college credits. Through a credit by examination mechanism, nursing students may earn their junior-year credits. The program prepares professionals for the broader scope of current nursing practices and evolving future opportunities. Critical thinking, decision making, and oral and written communication are emphasized. The Bachelor of Science in Nursing program at UW Bothell is accredited by the CCNE accrediting body of the American Association of Colleges of Nursing (AACN) and is affiliated with the UW School of Nursing. The program begins annually in summer quarter and may be completed in four quarters; electives may be taken prior to summer quarter.

*Education:* The UW Bothell teacher certification program leads to Washington state teacher certification for grades K-8. Two options are available. Option I is a full-time, 12 month postbaccalaureate program designed for those who already hold a bachelor's degree. This option begins summer quarter. Option II is an extended two-year program that begins autumn quarter with three quarters of part-time study followed by three quarters of full-time course work. Through collaborative partnerships with area schools, the teacher certification program integrates courses and structured field experiences in a variety of school settings. This unique program incorporates the most current and thoughtful perspectives on preparing dedicated professionals for classrooms and schools. UW Bothell also offers a Master of Education degree. This program encourages educators to think deeply about the complex work of teaching, to explore questions central to their professional growth, and to develop sustained, collegial relationships with peers from across the region. The program challenges students' thinking and celebrates their accomplishments. Critical reflectivity, leadership, and the generation and use of research to improve classrooms and schools are emphasized throughout the program.

## University of Washington, Tacoma

The University of Washington, Tacoma, whose campus has won national awards for urban design and historic preservation, is changing the face of its region—architecturally and economically, as well as intellectually and culturally. Located in Tacoma's historic warehouse district, across from the Washington State History Museum and Union Station, UWT was established in 1990 to offer innovative upper-division, postbaccalaureate, master's-level programs that serve people in the South Puget Sound region. The UW Tacoma now enrolls more than 1,500 students and is expected to see continued dramatic growth in academic offerings, enrollment, and facilities. (January 2000 saw the dedication of one new building and ground-breaking for several more occurred on the same day.) An impressive faculty of scholars and researchers devote themselves to UWT students through quality teaching and to the community through service and partnership.

UWT's undergraduate programs are designed to be the next academic step for community college and transfer students who wish to complete a baccalaureate degree—either immediately upon completion of the first 90 college credits, or after a hiatus. UWT has served college students from age 14 to age 70 and enjoys tremendous community support, which has generated more than \$1.5 million in endowment support for scholarships and programs. UWT's master's programs have been tailored to serve specific demand in the South Puget Sound area. The one-year, postbaccalaureate teacher certification program has recommended alumni for more than 180 K-8 teaching certificates since 1994. With day, evening, and Saturday classes, UWT serves the needs of students who work or who have families and cannot travel long distances to further their education.

### Graduate Degree and Certificate Programs

Students seeking admission to master's degree programs should check with the specific program. Detailed information about the academic programs offered can be obtained by calling the UWT Office of Admissions at (253) 692-4400 or 1-800-736-7750; TDD (253) 692-4413; or visit UWT's Web site at [www.tacoma.washington.edu](http://www.tacoma.washington.edu).

*Master's Degree in Foundations of Public Action:* This graduate program, leading to a master's degree, prepares students for an enhanced capacity for roles of responsibility and leadership. The program will be developed through four closely integrated core courses: Models and Critical Inquiry; Culture and Public Problems; Evidence and Action; and Values and Action. Elective courses, internships, and a final project or thesis will provide opportunity for extended reflection on the application of the themes of the core to the student's particular area of interest. Anticipated start date is autumn quarter 2000.

*Business Administration:* The Master of Business Administration degree will be offered through a non-thesis graduate program that builds on the skills and knowledge of experienced business professionals while providing new tools to help manage a challenge facing every organization: change. The degree emphasizes a systems perspective of organizations, allowing managers to develop the

understanding needed to lead organizations facing an increasing pace of change. The proposed MBA degree program requires approval from the UW Graduate Council, the UW Board of Regents, and the Higher Education Coordinating Board. The proposal is currently under review. Anticipated start date is autumn quarter 2000 or winter quarter 2001.

For additional information, visit the program's Web site at [www.tacoma.washington.edu/business](http://www.tacoma.washington.edu/business).

*Education:* Underlying the UWT Education Program is a vision of the teacher as one who is broadly educated, continuing to learn, skilled at and committed to the craft of teaching, and entrusted to nurture the fullest human potential in each individual.

The Master of Education degree is a graduate course of study for experienced teachers at all levels of education, preschool through adult. Five study options are available: at-risk learner, integrated curriculum, science education, special education, and technology.

*Nursing:* The Master of Nursing degree program is accredited by the NLN and shares accreditation with the School of Nursing at the Seattle campus. The program provides advanced study in selected areas of nursing science, professional foundations, scientific and systematic inquiry/research, and related fields of study. The graduate program—Communities, Populations, and Health—assists students with looking at communities of interest, populations at risk, and health care systems. Topics emphasized are community assessment, health promotion and disease prevention, development and change, health-systems access, social justice, public policy, and health care leadership. The program aims to improve the health of populations, aggregates, communities, and delivery care systems. Students are provided with opportunities to explore individual interests within the context of the program, and an interdisciplinary focus is emphasized. The MN prepares students for advanced and specialized practice. Additional course offerings and opportunities for specialization are planned as the campus continues to develop and expand. Program information is available at [www.tacoma.washington.edu/nursing/master.htm](http://www.tacoma.washington.edu/nursing/master.htm).

*Social Work:* The Social Work Program is accredited by the Council on Social Work Education as the *Alternative* Master of Social Work for the University of Washington, Seattle School of Social Work. The MSW program prepares students to function in a wide variety of settings, including health-care agencies, child and family services, public social service organizations, the criminal justice system, and public schools. The advanced curriculum provides an in-depth education employing the classroom and practicum settings to prepare graduates for advanced specialized practice.

The *Alternative* MSW is currently offering one concentration in the area of Children, Youth, and Families. Topics include applied research, social policy, and advanced content in social work practice models and methods.

For more information or to request application materials, please visit the program's Web site at [www.tacoma.washington.edu/social/](http://www.tacoma.washington.edu/social/).

The symbols, abbreviations, and conventions below are used in the listings of program descriptions, faculty members, and course descriptions. Colleges and schools are presented in alphabetical order; departments and programs are listed alphabetically within the appropriate college or school. If you are unable to locate a department or program, consult the index.

## Faculty

Entries include appointment to the Graduate School faculty (indicated by \*); year of appointment to the University; graduate or professional degree, date, and institution. Entries also may indicate Acting, Adjunct, Affiliate, Clinical, Emeritus, or Research faculty; and area(s) of interest.

## Course Descriptions

Each course listing includes prefix, course number, title, and credits. Each listing also may include general-education designator(s), name(s) of instructor(s), description of the course, prerequisite(s), and quarter(s) offered.

Specific information on courses offered in a particular quarter, including descriptions of courses approved since the publication of this catalog, appears in the quarterly *Time Schedule*.

## Course Numbers

**400-499** Upper-division courses primarily for juniors, seniors, and postbaccalaureate (fifth-year) students. Graduate students may enroll in 300- and 400-level courses. When acceptable to the major department and the Graduate School, approved 400-level courses may be applied as graduate credit in the major field and approved 300-level courses may be applied in the supporting field(s).

**500-** Restricted to graduate students. (Courses numbered in the 500 and 600 series with a P suffix denote professional courses for students in the schools of Dentistry and Medicine; such courses may not be applied as graduate credit in the Graduate School.) Undergraduate, postbaccalaureate, and nonmatriculated students who wish to register for 500-level courses must obtain permission from the instructor of the class, departmental chair, or other designated person.

Graduate courses numbered 600, 601, 700, 750, or 800 are restricted to students in the Graduate School. They appear by number and title only where applicable under the departmental course listings in this catalog. Descriptions for these courses are listed below.

### (PREFIX) 600 Independent Study or Research (\*)

Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of supervisory committee chair or graduate program adviser.

### (PREFIX) 601 Internship (3-9, max. 9)

Internship required of students in a graduate degree program. Permission of supervisory committee chair or graduate program adviser is a prerequisite.

### (PREFIX) 700 Master's Thesis (\*)

Research for the master's thesis, including research preparatory or related thereto. Limited to premaster graduate students (i.e., those who have not yet completed the master's degree in their major field at the University of Washington). Prerequisite: permission of supervisory committee chair or graduate program adviser.

### (PREFIX) 750 Internship (\*)

Internship required of all graduate students in the Doctor of Arts degree program.

### (PREFIX) 800 Doctoral Dissertation (\*)

Research for the doctoral dissertation and research preparatory or related thereto. Limited to graduate students who have completed the master's degree or the equivalent, or Candidate-level graduate students. Premaster students initiating doctoral dissertation research should register for 600. Prerequisite: permission of supervisory committee chair or graduate program adviser.

## Credit Designation

**ART 100 (5)** 5 credits are received for the quarter.

**ART 101-102 (5-5)** Hyphenated course. Credit is earned, but may not be applied toward graduation until the entire sequence is completed. (An *N* grade may be given the first quarter and the final grade the second quarter.)

**ART 100- (5-)** Course may take longer than one quarter to complete. Repeated registration may be necessary. An *N* grade is received until the final grade is submitted.

**ART 100 (2, max. 8)** 2 credits per quarter; course may be repeated up to four times to earn a maximum of 8 credits.

**ART 100 (1-5, max. 15)** Up to 5 credits may be taken in a given quarter. Course may be repeated to a maximum of 15 credits.

**ART 100 (\*, max. 10)** Credit to be arranged per quarter; course may be repeated to a maximum of 10 credits.

**ART 100 (3/5)** 3 or 5 credits are earned in a given quarter. Specific amount is determined by school or college offering the course. The *Time Schedule* may indicate 3 credits, 5 credits, or 3 or 5 credits. Credits may vary by section.

**ART 100 (3/5, max. 15)** 3 or 5 credits are earned in a given quarter. Course may be repeated to earn a maximum of 15 credits.

**ART 700 (\*)** Credit is to be arranged with school or college offering the course. No maximum stated. Only 600-, 700-, and 800-level courses do not require a maximum.

## Undergraduate General Education Requirement Designators

The following general education requirement designators (on 400-level courses) are for purposes of undergraduate graduation and do not apply to graduate or professional students: VLPA, I&S, NW, QSR.

## Background Required

**Prerequisites** Courses to be completed or conditions to be met before a student is eligible to enroll in a specific course.

## Quarters Offered

**A,W,Sp,S** Indicates the quarter(s) the course is offered. A = Autumn, W = Winter, Sp = Spring, S = Summer.

*Examples:*

**ART 100 AWSp** ART 100 offered Autumn, Winter, and Spring quarters.

**ART 100, 101 A,W** ART 100 offered Autumn quarter. ART 101 offered Winter quarter.

# ACADEMIC PROGRAMS, FACULTY, AND COURSES

## College of Architecture and Urban Planning

224 Gould

### Dean

Jerry Finrow

### Associate Deans

Katrina Deines  
Gail L. Dubrow

General Catalog Web page:  
[www.washington.edu/students/gencat/academic/CAUP.html](http://www.washington.edu/students/gencat/academic/CAUP.html)

College Web page:  
[www.caup.washington.edu](http://www.caup.washington.edu)

The College of Architecture and Urban Planning (CAUP) comprises four departments that are directly concerned with the design and development of the physical environment: Architecture, Construction Management, Landscape Architecture, and Urban Design and Planning.

The College offers a variety of programs and degrees focusing on the environmental design disciplines within a liberal arts education. The undergraduate programs of the departments of Construction Management and Landscape Architecture lead to the professional degrees that serve as the educational credentials for careers in their respective fields. Master's degrees are offered in the College: Master of Architecture, Master of Science in Construction Management (evening degree), Master of Urban Planning, and Master of Landscape Architecture. Master's students may elect to work toward the Certificate in Urban Design or the Certificate in Preservation Planning and Design. An interdisciplinary doctoral program in urban design and planning is available through the Graduate School. All curricula encompass an appropriate level of design and technical understanding and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

As part of a major university and metropolis in the Pacific Northwest, the College is able to reinforce its program by using its setting as a laboratory for study. It works closely with its various professional communities to build curricula and a faculty attuned to the understanding and creation of an appropriate physical environment.

Research centers include:

- Center for Real Estate and Community Development
- Center for Environment, Education, and Design Studies
- Institute for Hazard Mitigation Planning and Research
- Urban Ecology Laboratory

Educational programs include:

- Certificate programs
- Urban design
- Preservation planning and design
- Continuing education/extension programs
- Architecture
- Facilities management
- Real estate

### Preservation Planning and Design Certificate Program

410 Gould

Gail L. Dubrow, Director  
Neile Graham, Program Coordinator

The College of Architecture and Urban Planning administers a special graduate-level program that leads to the Certificate of Achievement in Preservation Planning and Design. This 45-50 credit interdisciplinary program is available to students accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning. There are two options in this program: one for students in architecture and one for students in landscape architecture and urban planning. The curriculum offered by the 15-member faculty, which is drawn from the College along with visiting lecturers from the preservation community, provides students with a grounding in the history, theories, methods, and practices of historic preservation planning and design.

### Urban Design Certificate Program

410 Gould

Anne Vernez Moudon, Director  
Neile Graham, Program Coordinator

The College of Architecture and Urban Planning administers a special graduate-level program that leads to the Certificate of Achievement in Urban Design. Since 1968, this interdisciplinary program has provided a collective framework that allows students to specialize in the study and design of the urban environment as part of their professional education.

The 14-member faculty offers backgrounds in urban design as well as in architecture, landscape architecture, and urban planning. In addition, the communities of the Puget Sound region provide a unique learning laboratory for students to experience the issues and professional activities of urban design. A core curriculum and mandatory course work in four substantive areas provide the student with a firm grounding in theory, methods, and practical skills. The program is normally seven quarters in length, concurrent with the master's program.

Students accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning are eligible for the program if they possess the necessary design abilities prior to enrollment in advanced studios.

### Institute for Hazard Mitigation Planning and Research

Robert Freitag, Director

The Institute for Hazard Mitigation Planning and Research was established in 1999 as a vehicle for research, teaching, and public service that address the mitigation of natural and man-made hazards through planning and design, and through the integration of mitigation principles into a wide range of disaster and

risk-management opportunities. The institute's approach is interdisciplinary, with close links to other academic research units in the University and to risk management organizations in government and industry.

The research agenda is aimed at developing practical mitigation solutions that can be incorporated into local government land-use planning, development regulation, infrastructure, and emergency management; state and federal response to disasters; planning for business continuity; and planning for post-disaster recovery and reconstruction.

The institute is also pursuing curriculum development to incorporate mitigation principles and methods into existing and new courses in the College's degree programs.

### International Programs

224 Gould

The departments of the College offer many opportunities for foreign study in which participants earn academic credit while studying abroad. Programs in Rome, the Italian Hill Towns, and Mexico are sponsored on a regular basis. In addition, various study and exchange opportunities exist in such locations as Germany, the Scandinavian countries, Colombia, Mexico, India, and Japan. Faculty exchanges with foreign institutions occur regularly.

### University of Washington Rome Center

95 Piazza del Biscione, Rome, Italy

Katrina Deines, Co-director  
Dan Harmon, Co-director

The College maintains a permanent year-round facility in Rome. Studio and classroom spaces, a library, administrative offices, and housing accommodations for faculty are located in the Palazzo Pio on the Campo de Fiori. The Rome Center is used by UW programs in classics, Romance languages, art, art history, English, creative writing, and comparative history of ideas, as well as by the departments of the College of Architecture and Urban Planning. The Rome Center fosters interaction among students from the University and other institutions, together with practicing professionals residing in or visiting Rome. Several major universities regularly share studio critics and lecturers.

### Remote Sensing Applications Laboratory

12 Gould

Frank Westerlund, Director

The Remote Sensing Applications Laboratory (RSAL) is a facility for teaching, research, and public service applications of remote sensing and geographic information technologies in environmental planning and design. Remote sensing includes aerial photography and satellite systems that record earth-surface data in image or digital form for subsequent interpretation by visual or computer techniques and incorporation into geographic information systems. Research applications have included land-use mapping, urban form analyses, growth-management studies, development siting, natural-resource inventories, and environmental analysis. RSAL houses an extensive collection of air photo, satellite data, map, and documentary resources. In addition to optical photo interpretation equipment, the laboratory utilizes UNIX and NT workstation-based software systems such as ERDAS image processing and ArcInfo GIS.

### Facilities

#### Computing

A wide variety of computers, software, networks, computing facilities, and support services are available to CAUP students through UWired and College-operated

labs for studies and research in Computer-Aided Design (CAD) and Geographic Information Systems (GIS).

UW Computing & Communications (C&C) offers faculty, staff, and students accounts on C&C Uniform Access computers, which provide a variety of computing resources and information technologies such as email and UWIN. Establishing a UW NetID allows attachment to the campus network, and in turn, connection to a vast national and international collection of networks, computer users, computers, and bibliographic and other library resources.

CAUP facilities, composed of both Macintosh and PC computers, are connected in a College network which, in turn, is connected to the Internet. UW computing and data resources are available through these machines. The College employs one full-time Computer Resources Manager and several student consultants.

General-purpose labs are available to all CAUP students. They are networked to file servers, plotters, and laser printers. A wide variety of software is available including spreadsheets, word processors, CAD, GIS, 2D and 3D graphics, rendering, animation, scheduling, estimating, bid analysis, project management, modeling, and design programs. Furthermore, all labs support email. Hours of access to these labs generally parallel those of the College library except when classes are in progress.

For advanced course work, research, and certain independent studies, the College operates specialized labs such as the Multimedia Lab with its high-performance PowerMac workstations along with peripherals including CD-ROM drives, scanners, and a video-digitizing (capturing) system. Also, a SUN Workstation located in the Remote Sensing Applications Lab (see above) supports advanced research applications of GIS, remote sensing/image processing, and visual and other simulation modeling.

### Lighting Applications Laboratory

The Lighting Applications Laboratory includes a variety of facilities for use by students and faculty members in conjunction with lighting classes, design-studio courses, and research work. Equipment in the lighting workshop includes lamps and lighting fixtures, sample models and model-building materials, a mirror-box artificial sky, a direct-beam sunlight simulator, assorted light meters and data loggers, cameras, and demonstration displays.

The Department of Architecture is a co-sponsor of the Lighting Design Lab. This lab, a 10,000-square-foot, half-million-dollar facility, was designed to demonstrate the energy conservation potential of state-of-the-art architectural lighting technology. It is operated by Seattle City Light in downtown Seattle. Students can take various positions in the lab as interns. It is also available to assist in their lighting design and testing, as it does with regional architectural offices.

### Photography Laboratory

A large photography laboratory is provided with studio and darkroom facilities for use by photography classes, design-studio classes, special instruction, and independent activity.

### Shop

A fully staffed and equipped wood-, plastic-, and metal-working shop provides students with an opportunity to design and build selected projects. The shop is used as an instructional facility in conjunction with studio, structures, and materials classes. Thesis and other individual activity also can be accommodated.

### Library

The Architecture-Urban Planning Library, 334 Gould, is a branch of the UW Libraries. It is the primary location for materials on architecture, landscape architecture, construction management, and urban design and

planning. The collection contains 42,500 volumes, 7,500 microforms, and 300 currently received serial subscriptions. Access to its collection is provided through the UW Libraries Information Gateway, a single World Wide Web location which encompasses all of the library's print and electronic resources as well as tools, services, and the ability to search the library's catalog and a wide range of Internet resources. The Gateway is available in all UW libraries and on the Web at [www.lib.washington.edu](http://www.lib.washington.edu).

### Slide Collection

The slide collection consists of approximately 100,000 images covering architectural, landscape, design and planning, and construction subject matter, supporting the curricular and research needs of the College. New materials for lectures and projects are continually added.

### Student Organizations

Chapters of American Institute of Architects Students, American Society of Landscape Architects, Associated General Contractors, Planning Students Association, and the Historic Preservation Association provide opportunities for undergraduate and graduate students to meet informally and to participate in a variety of projects and events.

## Community and Environmental Planning

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**CEP 446 Internship (5, max. 10)** Connects core and individual courses with field work. Group and individual readings develop understanding of how students' internships and field placements constitute particular element of community and environmental planning. Explores how what we do for a living is part of our lives as citizens and public service. Credit/no credit only. Offered: A/WSp.

**CEP 460 Planning in Context (5) I&S** Examines theory against backdrop of practice for broad, historical understanding of social, political, environmental planning. Critique from viewpoints, e.g., planning history, ethics, ecofeminism, environmental justice, class and capitalism, planning and global economy. Develop personalized history reflecting individual experience, professional experience, and philosophical heritage of planning profession. Credit/no credit only. Offered: A.

**CEP 461 Ethics and Identity (5) I&S** Examination of personal, societal, vocational, environmental, planning ethics. Readings and discourse on ethical foundations for public life. Individual and group readings on values, human potential. Develops understanding of ecological context, moral responsibility, self-awareness. Constructs positive, diverse view of humanity, environment regardless of race, gender, ethnicity, beliefs. Credit/no credit only. Offered: W.

**CEP 462 Community and Environment (5) I&S** Capstone quarter merges core seminars, disciplinary courses in major, community field experiences for mastery of personal knowledge and skills. Reflection and synthesis of themes in major; engagement with contemporary issues. Compares theoretical defini-

tions of community and environment with individual philosophies and knowledge within thoughtful, applied context. Credit/no credit only. Offered: Sp.

**CEP 498 Special Topics (1-9, max. 15) I&S** Systematic study of specialized subject matter.

## Architecture

208 Gould

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/Archit.html](http://www.washington.edu/students/genecat/academic/Archit.html)

Department Web page:  
[www.caup.washington.edu/html/arch/](http://www.caup.washington.edu/html/arch/)

The Department of Architecture offers two degrees: the Bachelor of Arts (B.A.) degree in architectural studies and the Master of Architecture (M.Arch.) degree, an accredited professional architectural degree. The professional program is based on the architect's need to be a generalist well-rounded in the liberal arts, with a full command of the discipline of architecture, who can assume an enlightened, responsible, and creative role in society.

The curriculum embodies both broad and focused courses that cover the many and various aspects of architecture: design, graphics, computing, structural engineering, building sciences, history, theory, ecology, sociology, psychology, cultural studies, law, and professional practice. The faculty comprises a large and diverse group of teachers, practitioners, scholars, and researchers who represent a wide spectrum of backgrounds, experiences, and viewpoints. Approximately thirty permanent faculty members are supplemented by dozens of part-time professional practitioners from the region and around the country, as well as by exchange scholars from foreign institutions.

Priorities stressed by the faculty reflect changing ideas and concepts of architecture. Studios are sequenced, beginning with fundamentals and demanding an increasing independence at advanced levels. The defined studio sequence not only helps clarify the student's experience, but also insures that students get a broad and coherent cross section of design problems and instructors.

*Most states require that an individual intending to become an architect hold an accredited degree. There are two types of degrees that are accredited by the National Architectural Accrediting Board (NAAB): (1) the Bachelor of Architecture, which requires a minimum of five years of architectural study (this degree is not offered at the University of Washington), and (2) the Master of Architecture, which requires a minimum of three years of study following an unrelated bachelor's degree or two years following a related pre-professional bachelor's degree. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects.*

Architectural education at the University of Washington requires a minimum of six years of higher education to attain the first professional degree, the Master of Architecture. The curriculum is divided into three two-year segments of course work with a pre-professional Bachelor of Arts degree (with a major in Architectural Studies) awarded at the completion of the second two-year segment. The professional degree, Master of Architecture, is awarded only upon completion of the third segment. (Students with bachelor's degrees in unrelated fields take an additional year of course work—see below.)

Students must also complete a master's thesis, extending over one or more additional quarters, on a research topic or design problem of their choice. Admission to the professional program requires admission to the Graduate School of the University of Washington.

## Graduate Program

Graduate Program Coordinator  
208 Gould, Box 355720  
(206) 543-4180  
archinfo@u.washington.edu

## Master of Architecture

The Master of Architecture degree is the only professional degree offered by the Department of Architecture. Completion of the requirements of this nationally accredited degree program satisfies the educational requirement for licensing (registration) as an architect. The accredited M.Arch. program accommodates two groups of undergraduate degree holders: (1) persons holding a pre-professional four-year degree, such as a Bachelor of Arts in Architecture (or equivalent), who normally will require seven or eight quarters of study; (2) persons with an undergraduate degree in an unrelated field, who normally will require ten or eleven quarters, over a period of at least three years, to complete the requirements for the degree. This three-year program may vary somewhat in duration and specific course work required, depending on selection of concentration/study areas and prior academic and professional experience.

Candidates with a pre-professional four-year degree, such as Bachelor of Arts (in architecture) or the equivalent, usually undertake six full-time quarters of study plus completion of a thesis for the M.Arch. degree. This program typically requires 99 credits of course work, including 36 credits of design studio, 36 credits of approved core courses, 9 credits of thesis, and 18 credits of electives. Special interests and certificate programs often can be accommodated within the 18 credits of electives and design-studio options.

Persons holding degrees in other fields normally take three quarters of preparatory course work to develop knowledge and skills equivalent to those of students who enter the program from undergraduate architecture programs. Upon completion of preparatory course work, the students merge with students in the two-year program described above.

The department offers an advanced M.Arch. degree program for persons holding an accredited professional five-year Bachelor of Architecture degree (and those already holding an accredited Master of Architecture degree). For these candidates the program represents a specialization or in-depth study of a specific area or interest in the field. Each student's program is developed on an individual basis in consultation with faculty advisers. The approved program of study becomes the student's curriculum, which must be completed for award of the degree. Typically this program involves a minimum of 45 credits of required course work, including a thesis, and can be completed in four or five quarters.

## Admissions

Students are admitted in autumn quarter only. All application materials should be received by the department no later than the preceding January 15. Notices of admission are mailed by April 15. Admission to the Master of Architecture program is a competitive process, with priority given to those students whose apparent abilities, as determined by the Department of Architecture Admissions Committee, will enable them to complete the program expeditiously and with a high level of achievement. In evaluating applicants, the Admissions Committee considers the following: a portfolio of work in visual arts and/or design, a Statement of Purpose, Graduate Record Examination general test scores, transcripts of previous degree programs and of additional academic study (with a 3.00 GPA requirement), three letters of recommendation, and the applicant's background and experience in architecture and/or related fields. Incomplete applications and those received after January 15 are not considered by the Admissions Committee.

## Certificate Programs

Graduate students may elect to participate in the College-wide certificate programs in urban design and preservation planning and design. (See program descriptions in the preceding College section.) The department also offers a certificate program in lighting design.

## International Studies

The department offers the Architecture in Rome program at the University of Washington Rome Center, and the Design/Build Mexico program in Cuernavaca, Mexico. Other programs have included summer study of the Italian Hill Towns and in Portugal and Scandinavia, and numerous exchanges including Scandinavia, England, Germany, Hong Kong, Colombia, Japan, and Australia.

## Financial Aid

Each spring quarter the department awards scholarships and assistantships for the following academic year. These are more typically available to students already enrolled in the architecture program at the time of the awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School Fellowship Division and the Office of Student Financial Aid in Schmitz Hall.

## Faculty

### Chair

Jeffrey K. Ochsner

### Professors

Badanes, Steven P. \* 1990; MArch, 1971, Princeton University; sustainable building technology, public art, community-based design/build, architecture.

Bonsteel, David \* 1963, (Emeritus); MArch, 1964, University of Washington; design process, computer applications, research.

Bosworth, Thomas L. \* 1968, (Emeritus); MA, 1954, Oberlin College; MArch, 1960, Yale University; design process, history, professional practice.

Ching, Francis D. K. \* 1985; BArch, 1966, University of Notre Dame; design drawing, process, and principles.

Clausen, Meredith L. \* 1979; PhD, 1975, University of California (Berkeley); twentieth-century and American architecture.

Dietz, Robert H. \* 1947, (Emeritus); MArch, 1944, Massachusetts Institute of Technology; design, housing.

Emery, Ashley F. \* 1961, (Adjunct); MS, 1958, PhD, 1961, University of California (Berkeley); energy and buildings, HVAC, thermal stresses, experimental design, stochastic finite elements.

Finrow, Jerry V. \* 1995; MArch, 1968, University of California (Berkeley); housing architecture.

Grey, Arthur L. \* 1963, (Emeritus); PhD, 1954, University of California (Berkeley).

Hildebrand, Grant \* 1964; MArch, 1964, University of Michigan; history, preservation design.

Jacobson, Phillip L. \* 1962, (Emeritus); MArch, 1969, Finnish Institute of Technology; design, professional practice.

Johnston, Norman J. \* 1960, (Emeritus); PhD, 1964, University of Pennsylvania; urban design, history.

Kiyak, H. Asuman \* 1972, (Adjunct); MA, 1974, PhD, 1977, Wayne State University; geriatric dentistry, behavioral aspects of health care.

Kolb, Keith R. \* 1952, (Emeritus); MArch, 1950, Harvard University; design, professional practice.

Lovett, Wendell H. \* 1948, (Emeritus); MArch, 1948, Massachusetts Institute of Technology; architecture.

Miller, David E. \* 1989; MArch, 1972, University of Illinois; design development, design.

Millet, Marietta \* 1976; MArch, 1972, Massachusetts Institute of Technology; illumination, environmental controls.

Nyberg, Folke E. \* 1969, (Emeritus); MArch, 1960, Yale University; theory, urban design, professional practice.

Ochsner, Jeffrey K. \* 1987; MArch, 1976, Rice University; history, preservation design, urban design.

Pundt, Hermann G. \* 1968, (Emeritus); PhD, 1969, Harvard University; history, historical preservation.

Pyatok, Michael \* 1990; MArch, 1967, Harvard University; design of affordable housing for lower income communities - urban and suburban regions.

Seligmann, Claus \* 1964; Diprch, 1950, London Polytechnic (UK); design, design process, theory.

Small, Robert \* 1965, (Emeritus); MArch, 1955, University of Oregon; design, community practice, barrier-free design, housing, site planning, design process.

Staub, Christian 1967, (Emeritus); Cert, 1944, Institute for Industrial Design, Arts and Crafts; photography.

Streatfield, David C. \* 1974, (Adjunct); MLA, 1965, University of Pennsylvania; history, historic landscape preservation, landscape theory, urban landscape design.

Streissguth, Daniel M. \* 1955, (Emeritus); MArch, 1949, Massachusetts Institute of Technology; design process.

Sutton, Sharon E. \* 1998; MArch, 1973, Columbia University; PhD, 1982, City University of New York; effect of the environment on learning and community well-being.

Thiel, Philip \* 1961, (Emeritus); MS, 1948, University of Michigan; visual design, design process, person-environment relations, experiential notation.

Vernez Moudon, Anne \* 1980; DSc, 1987, Ecole Polytechnique Federale de Lausanne; urban design, city form and neighborhood studies, design research.

Zarina, Astra \* 1970; MArch, 1955, Massachusetts Institute of Technology; design, foreign studies.

## Associate Professors

Albrecht, Robert G. \* 1960, (Emeritus); MSCE, 1960, University of Massachusetts; structures.

Curtis, J. William \* 1962, (Emeritus); MA, 1969, University of Washington; design process, professional studies.

Deines, Katrina \* 1985; MA, 1975, University of Minnesota; MArch, 1979, University of Washington; design theory and foreign studies, history.

Donnette, James J. \* 1966, (Emeritus); MArch, 1969, University of Washington; graphics, design.

Dubrow, Gail Lee \* 1989; MA, 1979, University of Oregon; PhD, 1991, University of California (Los Angeles); preservation, urban design, public art, public history, gender, multiculturalism.

Goldblatt, Steven M. 1982, (Adjunct); JD, 1977, Golden Gate University; construction law, labor relations, and accounting.

Gross, Mark D. \* 1999; PhD, 1986, Massachusetts Institute of Technology; design and planning methods, computational models, human computer interaction.

Heerwagen, Dean Reese \* 1975; MS, 1967, MArch, 1971, Massachusetts Institute of Technology; environmental controls (passive and active).

Hill, Warren \* 1959, (Emeritus); MA, 1961, New York University; interior design, design, history.

Latourelle, Elaine Day \* 1975; MArch, 1964, Yale University; design, professional practice.

Lebert, Edgar A. 1965; MS, 1967, University of Washington; structures.

Loveland, Joel E. \* 1986; MArch, 1980, University of California (Los Angeles); energy conservation, design, research.

Minah, Galen F. \* 1970; MArch, 1968, University of Pennsylvania; design process, design, professional practice.

Mohler, Richard Ernest J. \* 1986; MArch, 1984, University of Pennsylvania; architecture and community, design of housing and urban public open space.

Norton, Thomas J. \* 1968, (Emeritus); MUP, 1960, University of Washington; urban community facilities, planning administration.

Palleroni, Sergio A. \* 1992; MS, 1987, Massachusetts Institute of Technology; the relationship between cultures, their histories, and the production of architecture.

Rohrer, John \* 1948, (Emeritus); BArch, 1937, University of Washington; graphics, design.

Rolfe, George R. \* 1984, (Adjunct); MArch, 1968, MCP, 1968, University of Pennsylvania; urban development process, finance, feasibility and market analysis, urban design processes.

Rosner, Arnold S. \* 1966, (Emeritus); MSCE, 1949, California Institute of Technology; design process, building technology, computers.

Ryan, Dennis M. \* 1974; PhD, 1976, University of Pennsylvania; community planning, design, and identity; public processes; urban design, change, and continuity.

Sasanoff, Robert \* 1963, (Emeritus); MCP, 1968, University of California (Berkeley); design process, person-environment relations.

Winterbottom, Daniel M. \* 1993, (Adjunct); MLA, 1988, Harvard University; culture and environment, place attachment, building as design expression, therapeutic gardens.

### Assistant Professors

Anderson, Alex Thomas \* 1998; PhD, 1997, University of Pennsylvania; history and theory of architecture and decorative arts.

Do, Yi-Luen Ellen \* 1999; MDes, 1991, Harvard University; PhD, 1998, Georgia Institute of Technology; diagramming and freehand sketching, creativity, computer-aided design, cognitive studies.

Hill, Kristina \* 1997, (Adjunct); MLA, 1990, PhD, 1997, Harvard University; spatial patterns of land use, GIS mapping, land classification techniques, landscape ecology.

Johnson, Brian Robert \* 1978; MArch, 1981, University of Washington; computing in architectural design; 3D modeling and rendering; Web-based collaboration, communication.

Johnson, Julie M. \* 1995, (Adjunct); MCP, 1988, Massachusetts Institute of Technology; design and use of public/civic space, neighborhood design, suburban redevelopment.

Jones, Susan H. \* 1991; MArch, 1988, Harvard University; architectural design: the conceptual and tectonic ideas of making space.

Prakash, Vikramaditya \* 1996; MA, 1989, PhD, 1994, Cornell University; non-Western, Asian, Indian architecture; cultural and postcolonial studies, Le Corbusier, modernism.

### Senior Lecturers

Onouye, Barry S. \* 1967; MSCE, 1969, University of Washington; integration of structural technology into architectural design education.

Vanags, Andris 1969; BFA, 1968, University of Washington; building science, design.

Zuberbuhler, Douglas \* 1967; MArch, 1968, University of Washington; graphics, design, building technology.

### Lecturers

Dee, Jennifer 1982; MArch, 1984, University of Washington; theory, design.

Nicholls, James Keith 1995; BArch, 1986, University of British Columbia (Canada); design, industrial design, construction technology.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ARCH 400 Architectural Design IV (6)** Offers studio problems in non-residential building design to advance student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 302.

**ARCH 401 Architectural Design V (6)** Offers studio problems in non-residential building design to advance student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 400.

**ARCH 402 Architectural Design VI (6)** Selection of studio sections that introduce advanced architectural design theories and methods. Focus and format vary. Prerequisite: ARCH 401.

### ARCH 403 Architectural Problems (6)

**ARCH 411 Computer Graphics Applications (3)** *Johnson* Lectures and weekly exercises focus on understanding and applying the underlying principles of 3D computer graphics and rendering software. Topics include user-interface, data creation and modeling, lighting models, smoothing, texture mapping, ray tracing, radiosity, animation, and solid modeling. Prerequisite: ARCH 370.

**ARCH 412 Architectural Illustration and Presentation (3)** Issues, conventions, and techniques used in architectural renderings, including line drawings, shaded drawings, use of color, composition, organization, advanced perspective, scale figures, entourage, reflections, and media. Prerequisite: ARCH 315.

**ARCH 413 Architectural Photography Projects (3)** Students develop in-depth photo essays relating to architecture, the urban movement, or landscape design following the principles introduced in ARCH 313. Lectures, seminar, and discussion. Prerequisite: ARCH 313.

**ARCH 415 Architectural Sketching (3)** Exercises in freehand representational drawing using charcoal, graphite, and conte crayon with emphasis on line, proportion, values, and composition. Studies progress from geometric to nongeometric forms. Recommended: either ARCH 210 or ART 104.

**ARCH 418 Watercolor Drawing (3)** Introduction to the principles and practice of using transparent watercolor for the naturalistic representation of objects, people, and interior and exterior space. Recommended: either ARCH 210 or ART 104.

**ARCH 420 Structural Design I (4) NW** Reinforced concrete fundamentals; establishes basics of reinforced concrete behavior and introduces methods of design used in current engineering practice. Basic mechanics of structural concrete introduced in examining bending, shear, and axial forces. Topic areas include beams, slabs systems, columns, foundations, retaining walls, and an introduction to prestressed concrete. Prerequisite: ARCH 322.

**ARCH 421 Structural Design II (4)** Design of steel structures.

**ARCH 426 Structural Unit Masonry (3)** *Lebert* Structural behavior and design of reinforced brick, tile, and unit masonry structures. Prerequisite: CEE 381. Offered: jointly with CEE 455.

**ARCH 430 Materials and Processes (3)** *Vanags* Lectures, field trips, and laboratory sessions directed toward the nature, potentials, and limitations of a variety of materials (wood, metal, plastics, inorganic cementing materials, minerals, rocks, and clay) and the processes involved with their production, fabrication, and system compatibility.

**ARCH 431 Environmental Control Principles (3)** *Heerwagen* Daylighting of buildings, reducing noise and enhancing sound for communication, and regulating heat transfer for occupant thermal comfort; description of passive means for environmental control, including presentation of scientific explanations and design guidelines for utilizing these means; design guidelines are intended for use in the preliminary schematic design phase. Offered: AW.

**ARCH 432 Construction Materials and Assemblies II (3)** Lectures and readings pertaining to a survey of materials, assemblies, and techniques of assembly of concrete and steel frame, commercial exterior envelope, and interior partitioning building construction systems. Prerequisite: either ARCH 400 or CM 313.

**ARCH 433 Active Control Systems for Building Operation (3) NW** *Heerwagen* Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings. Descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and short cuts for anticipating system design and use. Prerequisite: either ARCH 331 or ARCH 431.

**ARCH 434 Color and Light (3)** *Millet* Lectures, demonstrations, exercises, and projects focusing on the use of color applied to the three-dimensional architectural context. Color theory is explored with the multiple effects of changing light.

**ARCH 435 Principles and Practices of Environmental Lighting (3)** *Millet* Perception-based approach to principles of natural and artificial lighting. Practical considerations of lighting involving environmental evaluations, calculations and the use of lamps and fixtures. Sketch and model studies for applications. Impact of lighting design on energy conservation. Relation of lighting design process to architectural design concepts. Prerequisite: either ARCH 331 or ARCH 431.

**ARCH 436 Building Acoustics (3) NW** *Heerwagen* Description of principles and practices for manipulating and enhancing sound in buildings. Information about sound behavior and the organization of architectural elements (deployment of design features, including various geometries and materials) for the control of sound in enclosed spaces and between adjacent spaces.

**ARCH 437 Passive Thermal Controls (3) NW** *Heerwagen* Devices for achieving energy-efficient buildings, analytic methods for evaluating likely thermal performances of buildings and building envelopes, resistance and capacitance of building materials, air flow through and around buildings, energy codes and industry standards, and strategies for integrating analytic techniques and guidelines into the architectural design process. Prerequisite: either ARCH 331 or ARCH 431.

**ARCH 439 Light Frame Building Assemblies (3)** *Vanags* Fundamentals of light-frame construction from soils examination, foundation systems to framing systems, and the integration of electrical, plumbing, and heating/cooling into the structure. Prerequisite: either ARCH 332 or CM 313.

**ARCH 443 Iberoamerican Architecture I: Meso-America (3) VLPA** *Palleroni* Advanced introduction to precolonial, colonial, and postcolonial architecture and urbanism of Mexico and Meso-America. Using methodologies drawn from culture studies, covers approximately four distinct periods spanning from Teotihuacan to the late twentieth century.

**ARCH 444 Iberoamerican Architecture II (3) VLPA** *Palleroni* Advanced introduction to postcolonial and modern architecture and urbanism of the Iberian peninsula and Latin America. Using methodologies drawn from culture studies, covers the cultures of Spain, Portugal, and Latin America after the period of colonialization and the nature of their continued relationship.

**ARCH 445 South Asian Architecture I (3) VLPA** *Prakash* Advanced introduction to precolonial architecture and urbanism of South Asia. Using methodologies of culture studies, examines select Hindu, Buddhist, and Islamic case studies on a comparative genealogy.

**ARCH 446 South Asian Architecture II (3) VLPA** *Prakash* Advanced introduction to colonial and postcolonial architecture and urbanism of South Asia. Using methodologies of culture studies, covers 1800 to present, emphasizing the past 50 years since India's independence in 1947.

**ARCH 447 Universal Design (3) I&S** *Kiyak* Addresses implications of recent social trends and legislation (e.g., American with Disabilities Act, extended lifespan, elimination of mandatory retirement, changing workforce) on design; emphasizes importance of integrating accessibility design concepts, including related laws and codes, into diverse design projects, in order to make environment usable by broad cross-section of people. Offered: A.

**ARCH 452 Characteristics of Puget Sound Architecture and Towns (3) I&S** *Hildebrand* Puget Sound architectural and town environment in terms of its historical development, but specifically including recent and pending changes affecting this environment in significant ways.

**ARCH 454 Greek Architecture (3) VLPA** *Langdon* Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ART H and CL AR 446.

**ARCH 455 Special Studies in Gothic Art and Architecture (3) VLPA** *Hildebrand* Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Offered: jointly with ART H 455.

**ARCH 456 Nineteenth-Century Architecture (3) VLPA** *Clausen* From late eighteenth-century French rationalists, Neoclassicists, to *fin de siècle* Vienna and Paris. Includes theorists such as Ruskin, Viollet-le-Duc, and Semper; major movements, such as the Arts and Crafts, and the French Ecole des Beaux-Arts method of design. Offered: jointly with ART H 490.

**ARCH 460 Design Theory and Analysis (3) VLPA/I&S** *Dee, Seligmann* Problematical nature of philosophies of architecture; interaction of philosophical concepts and architectural form and expression. Fundamentals of architectural criticism.

**ARCH 461 Recent Developments in Architectural Theory (3) VLPA/I&S** Concentrates particularly on developments that spring from recent work in the epistemology of science and in philosophy.

**ARCH 462 Spatial Composition in Architecture (3)** *Palleroni* Advanced introduction to compositional strategies in architecture. Drawing on a historical survey of the development of Western Architecture, the seminar investigates different compositional

strategies and their relationship to cultural values and systems of meaning. Intended as complement to the design studio.

**ARCH 463 Theories of Representation (3)** *Anderson* Seminar focusing on the development of representational techniques in western architecture from antiquity to the present which seeks to discover how these techniques have affected the realization and interpretation of architecture. Prerequisite: ARCH 350, ARCH 351, ARCH 352.

**ARCH 476 Design and the Uniform Building Code (3)** Lectures, case studies, and exercises to provide a detailed review of non-structural sections of the Uniform Building Code (UBC) including designer responsibility, code background, purpose, and requirements based on occupancy, construction type, and building design features. Prerequisite: either ARCH 302 or CM 313.

**ARCH 478 Architectural Computer Aided Design Systems (4)** *Johnson* Lectures and exercises in use of two-dimensional CAD as a tool to create working drawings (WD). CAD topics include data, accuracy, layering, symbols, 3D, customization, data exchange. WD topics include set organization, plans, building sections, elevation, wall sections, schedule, detail. Prerequisite: ARCH 370; CM 313.

**ARCH 488 American Architecture (3) VLPA** *Clausen* American architecture from indigenous native American traditions to the present. Offered: jointly with ART H 488.

**ARCH 493 Rome Preparation Seminar (2)** Seminar dealing with history, culture, topography, and customs of Rome, Italy. Required for students enrolling in 495, 496, or 497.

**ARCH 495 Architectural Studies Abroad (9)** Urban history and development of the city of Rome through first-hand studies of its topography and morphology. City's more recent quarters become subject of group research relative to problems and potentials of growth and future development. Students may be registered concurrently in an appropriate studio section. Prerequisite: ARCH 493.

**ARCH 498 Special Projects (1-12, max. 12)** Instructor-initiated and department-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter.

**ARCH 499 Undergraduate Research (1-6, max. 6)**

## Courses for Graduates Only

**ARCH 500 Architectural Design Studio (6)** Architectural design, with emphasis on development of professional skills in design synthesis. Specific focus on preservation design. Majors only.

**ARCH 501 Architectural Design Studio (6)** Architectural design, with emphasis on development of professional skills in design synthesis. Specific focus on urban design. Majors only.

**ARCH 502 Architectural Design Studio (6)** Architectural design, with emphasis on development of professional skills in design synthesis. Specific focus on design development. Majors only.

**ARCH 503 Architectural Design Studio Options (6)** Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

**ARCH 504 Architectural Design Studio Options (6)** Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

**ARCH 505 Architectural Design Studio Options (6)** Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

**ARCH 506 Advanced Architectural Studies (6)** Advanced experimental studies dealing with significant architectural relationships that involve scholarly investigation, development, and presentation of results.

**ARCH 520 Advanced Wood Structures Design (3)** *Albrecht* Design methods related to wood structures. Nature of wood as a building material, plywood, glued laminated wood structures, timber piles and pile foundations, pole buildings, and conventional wood building framing.

**ARCH 529 Seminar in American Architecture (5)** *Clausen* Topics vary. Offered: jointly with ART H 592.

**ARCH 535 Graduate Seminar: Study Topics in Environmental Lighting (3)** *Millet* Focus on individual student projects involving research and design for lighting.

**ARCH 540 Evolution and Aesthetics (3)** *Hildebrand* Exploration of new views toward the theory and philosophy of architectural aesthetics in which responses are seen as driven, in part, by predilections contributive to biological survival and evolution.

**ARCH 551 Scandinavian Architecture of the Nineteenth and Twentieth Centuries (3)** *Nyberg* Introduction to the contribution of Scandinavian architecture to early functionalism with emphasis on its relationship to neoclassicism and vernacular architecture.

**ARCH 553 Special Studies in Architecture in the Ancient World (3)** *Bosworth* Study and critical analysis of a selected topic from classical or preclassical periods. Prerequisite: ARCH 350.

**ARCH 556 History of Chicago School Architecture (3)** *Pundt* Study and critical investigation of the contribution of major architects in Chicago, the Midwest, and the West Coast from circa 1870 to 1920.

**ARCH 557 Neoclassicism and Romanticism in Europe and America (3)** *Pundt* Study and critical investigation of European and American architecture and urban design from 1750 to 1850.

**ARCH 558 Seminar in Twentieth-Century Architecture (3/5)** *Clausen* Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in architecture, architectural history, or permission of instructor. Offered: jointly with ART H 591.

**ARCH 559 American Utilitarian Architecture (3)** *Hildebrand* Significant American environmental design efforts arising from utilitarian needs, e.g., factories, bridges, skyscrapers, and associated technical building innovations.

**ARCH 560 Graduate Seminar on Architectural Theories (3)** *Dee, Nyberg, Seligmann* Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism.

**ARCH 561 Urban Design Theory (3)** Study of development of nineteenth- and twentieth-century urban design theories and parallel developments in architecture and urban planning. Theoretical premises are related to current practices of urban design in various sociopolitical contexts, European as well as American. Evolutionary nature of theory emphasized. Prerequisite: URBDP 479 or permission of instructor.

**ARCH 562 Regionalism (3)** *Nyberg* Exploration of design ideas that address the cultivation of regional character by acknowledging the commonplace, including both the landscape and its buildings. The many disruptive forces that threaten the possibilities of local culture are also considered from a political, social, and economic point of view.

**ARCH 563 Graduate Seminar in Architecture and Cultural Theory (3)** *Prakash* Study of contemporary cultural studies and postcolonial writings in terms of their impact on architectural theory and practice. Topical seminar based on reading and individual research. Offered: W.

**ARCH 570 Design Development (3)** *Miller* Lectures and case studies emphasizing the design development phase of architectural practice.

**ARCH 571 Project Feasibility (3)** Social, political, and economic factors affecting the location, design, financing, construction, and marketing of buildings.

**ARCH 572 Specifications and Contracts (3)** *Brown* Detailed organization and composition of contracts, specifications, and related contract documents.

**ARCH 573 Professional Practice (3)** *Rees* Operation of an architectural office and professional practice.

**ARCH 574 Design and Construction Law (3)** Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with CM 500.

**ARCH 581 Historic Preservation of Architecture, USA (3)** *Pundt* American achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

**ARCH 582 Technical Issues in Preservation Design (3)** *Sivinski* Issues, practices, and procedures involved in preservation and reuse of old and historic buildings. Technical and esthetic means by which practicing professionals approach the analysis, interpretation, and resolution of problems such work raises. Emphasis on recent and local projects and related experiences.

**ARCH 583 History of Historic Preservation in Europe (3)** *Pundt* European achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

**ARCH 590 Urban and Preservation Issues in Design (3)** Introduction to recent theory and practice in the fields of urban design and historic preservation primarily in North American urban contexts, including examples of recent projects presented by practicing professionals.

**ARCH 591 Architecture in the Landscape (3)** *Loveland* Advanced introduction to the relationships between buildings and places in the landscape with an emphasis on western concepts of nature. A taxonomy of place as nature is developed. Ways in which the architect can design places that landscape taxonomy are explored.

**ARCH 593 Residential Design: Methods and Practices (3)** Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods, and practices. Offered: jointly with URBDP 574.

**ARCH 596 Fieldwork in Professional Practice (\* max. 9)** On-location study under the supervision of a practicing professional involved in an aspect of environmental design. Credit/no credit only.

**ARCH 598 Special Topics for Graduate Students (1-6, max. 6)** Systematic study and offering of specialized subject matter. Topics vary and are announced in the preceding quarter. May be repeated for credit.

**ARCH 600 Independent Study or Research (\*)** Credit/no credit only.

**ARCH 700 Master's Thesis (\*)** Credit/no credit only.

## Construction Management

116 Architecture

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/Construction\\_Management.html](http://www.washington.edu/students/genocat/academic/Construction_Management.html)

Department Web page:  
[depts.washington.edu/cmweb/](http://depts.washington.edu/cmweb/)

The construction industry requires highly qualified professionals to manage its increasingly complex technical and management operations. The Department of Construction Management offers high-quality education and training to meet this demand. The interdisciplinary curriculums contain a mix of technical, managerial, and business courses to provide graduates with the essential skills needed to be successful in the construction industry. Oral and written communication skills are strengthened through written requirements and student presentations.

Construction Management is one of four departments within the College of Architecture and Urban Planning. The department was originally established as the Building Technology and Administration program in 1964; it began offering a Bachelor of Science in Building Construction degree in 1968 and a Master of Science in Construction Management degree in 1994. The mission of the Department of Construction Management is to offer a high-quality education in building construction and to conduct construction-related research.

The major objectives of the department's educational programs are:

1. To provide a valuable education that can prepare individuals to assume technical- and management-level positions in the construction industry.
2. To serve society and the construction industry each year by graduating 45 students who can obtain employment in the construction or related industries.
3. To provide a learning environment where students can acquire the technical skills and knowledge necessary for solving practical construction problems and managing the construction process.
4. To remain in full accreditation status by the American Council for Construction Education.

Emphasis is on course work that enables graduates to develop (1) technical skills necessary to define and solve practical construction problems; (2) self-discipline, analytical, and reasoning skills; (3) managerial skills necessary to make and implement sound and timely decisions in a prudent and professional manner; (4) broader perspectives of the humanities and social and natural sciences; and (5) the ability to effectively communicate verbally and in writing.

The department's faculty consists of a mix of permanent full-time professors and part-time lecturers. The full-time faculty members have construction experience. The part-time lecturers are mostly industry practitioners and include general contractors, specialty contractors, architects, engineers, and attorneys.

(206) 685-4440

### Master of Science in Construction Management

The evening Master of Science in Construction Management degree program makes high-quality graduate education accessible to working professionals. All graduate courses are offered during the evening to accommodate people who work during the day. The curriculum was developed with industry input to provide graduates with the skills desired by the construction industry. The graduate curriculum has been structured to build upon the educational foundation gained in an undergraduate building-construction or construction-management curriculum. Students with different educational backgrounds will need to take prerequisite courses, as discussed below. Admission is competitive and students are admitted in autumn, winter, and spring quarters. Applications must be submitted by July 1 for autumn quarter, November 1 for winter quarter, and February 1 for spring quarter.

**Admission Requirements:** Admission to the Graduate School is granted by the Dean of the Graduate School. Application for admission is made to the Office of Graduate Admissions. The prospective student must hold a baccalaureate degree from an accredited college or university in the United States or its equivalent from a foreign institution. The applicant must submit a completed UW graduate application form and official transcripts from all previously attended colleges, universities, and institutes. A prospective student must present recent scores (within the past five years) from the Graduate Record Examination (GRE) that indicate a potential for successful completion of a Master of Science in Construction Management degree. The applicant should have at least a 3.00 GPA in the last 90 graded quarter hours, or last 60 graded semester hours. International applicants should refer to the Graduate School section of this catalog for English language testing requirements. In addition, the Department of Construction Management requires a statement of personal goals and three letters of reference. All applications are reviewed by the department's Graduate Admissions Committee who make a recommendation regarding each applicant to the Dean of the Graduate School.

**Prerequisite Requirements:** All students admitted to the program who do not possess an undergraduate degree in building construction or construction management must complete the following prerequisite courses prior to admission into the graduate program or during their graduate studies: CM 333, 410, 411, 421, 422. All these prerequisite courses are offered during the day on a space-available basis with undergraduate students, or during the evening in the Construction Management Certificate Program offered by UW Extension. Three of the 400-level prerequisites may be counted toward elective requirements, if the student has been admitted to the graduate program prior to taking the prerequisites.

All students who do not have undergraduate degrees in building construction, construction management, engineering, or architecture must take the following prerequisites in addition to those previously listed: ARCH 320, 321, 322; CM 310, 313, 320, 321, 322, 323, 331, 332. Most of these prerequisites must be completed prior to admission into the graduate program.

Prerequisite courses may be validated if similar courses are reflected on the student's undergraduate transcript or if the student desires to take a validation examination. Students desiring to take a validation examination should contact the department's graduate program coordinator.

*Graduation Requirements:* The Master of Science in Construction Management degree program requires completion of a minimum of 45 credits of course work with at least a 3.00 cumulative GPA and satisfactory completion of either a thesis or report/project. A maximum of 6 credits may be earned for a report/project, and a maximum of 9 credits may be earned for a thesis.

## Faculty

### Chair

Saeed Daniali

### Professor

Daniali, Saeed 1997; PhD, 1975, University of Lille (France); structural design, failure analysis, value engineering, fiber reinforced plastics, marine structures.

### Associate Professors

Donnette, James J. \* 1966, (Emeritus); MArch, 1969, University of Washington; graphics, design.

Goldblatt, Steven M. 1982; JD, 1977, Golden Gate University; construction law, labor relations, and accounting.

Nemati, Kamran M. 1998; PhD, 1994, University of California (Berkeley); civil engineering materials, concrete technology, mechanical behavior of concrete, fracture mechanics.

Rolfe, George R. \* 1984; MArch, 1968, MCP, 1968, University of Pennsylvania; urban development process, finance, feasibility and market analysis, urban design processes.

Schaufelberger, John E. 1994; MSCE, 1970, PhD, 1971, University of Illinois; construction practices, international project management, contract procurement and administration.

Torrence, Gerard R. 1954, (Emeritus); MS, 1950, Massachusetts Institute of Technology; structures.

### Assistant Professors

Pace, Clark B. 1994; PhD, 1999, University of California (Berkeley); productivity improvement, innovative affordable housing, process of new technology development.

Riley, David R. \* 1995; PhD, 1994, Pennsylvania State University; construction space planning, materials handling, sustainable building and educational technology.

Woolery, John C. 1999; PhD, 1979, University of California (Berkeley); cost estimating, wireless communications, operation research applications.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscaat/](http://www.washington.edu/students/crscaat/).

**CM 411 Project Planning and Control (3)** *Pace* Introduction to the basic principles, techniques, and practices used as tools by contractors to plan, schedule, and control costs on building construction projects. Offered: A.

**CM 412 Construction Practice (3)** *Woolery* Integration of classroom theory with practical experience through a direct, on-the-job internship and industry guest speakers. For majors in construction management with 135 credits completed. Offered: Sp.

**CM 413 Competitive Business Presentations (1)** *Riley* Study and development of skills needed to develop and deliver professional construction management presentations. Includes a series of workshops and practical exercises in construction presentation skills, teamwork, and leadership. Offered: A.

**CM 421 Project Management I (3)** Introduction to the organization, management, and administrative functions on construction projects including a hands-on and extensive case study of a commercial construction project, cost control, and introduction to the concepts of Value Engineering, partnering, and Total Quality Management. Offered: W.

**CM 422 Computer Applications in Construction (3)** *Nemati* Introduction to microcomputer applications in construction industry. Discussion of available hardware and software is combined with practical assignments using estimating and scheduling programs designed for contractors, architects, and developers. Offered: W.

**CM 423 Construction Law (3)** *Goldblatt* Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Washington state law is emphasized. Entry code required. Open to nonmajors on space-available basis. Offered: W.

**CM 431 Project Management II (4)** *Riley* Capstone project using case studies to apply skills, knowledge, techniques, and concepts developed in prior courses. Emphasis on the concept of integrated project management, including cost estimating and bidding, scheduling, cost control, safety, project organization, and documentation. Offered: Sp.

**CM 432 Soils and Foundations (3)** *Nemati* Origin, classification, and physical properties of soil as used in engineering and construction applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Offered: Sp.

**CM 433 Construction Labor Relations (4)** *Goldblatt* Introduction to construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Offered: Sp.

**CM 454 Introduction to Real Estate Finance (4)** *Rolfe* Introduction to the financing of real-estate development projects, including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Offered: jointly with URBDP 454.

**CM 455 Introduction to Real Estate Development Processes (5)** *Rolfe* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Offered: jointly with URBDP 455.

**CM 456 Real Estate Investment Seminar (4)** *Rolfe* Analysis of private and public real estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in 453, 454, and 455. Prerequisite: URBDP 455 or CM 455. Offered: jointly with URBDP 456; W.

**CM 498 Special Topics (1-10, max. 20)**

**CM 499 Undergraduate Research (\* max. 12)** Individual or small-group studies in which students may select topics with approval of faculty sponsor and department.

## Courses for Graduates Only

**CM 500 Design and Construction Law (3)** *Goldblatt* Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with ARCH 574. Offered: WS.

**CM 505 Advanced Integrated Computer Applications (3)** Study of management information systems used in the construction industry. Emphasis on the utilization of current state-of-the-art integration of Computer Aided Design (CAD), scheduling (including advanced concepts such as resource leveling, schedule compression, and cash flow projections), and estimating programs. Offered: S.

**CM 510 Advanced Construction Techniques (3)** *Nemati* Study of techniques and practices used in complex construction projects, including industrial and high-rise structures, building renovation, and tenant improvements. Offered: A.

**CM 515 Innovative Project Management Concepts (3)** *Schaufelberger* Study of innovative concepts and trends in project management such as partnering, construction automation, and their application to construction projects. Total Quality Management, effective communication principles, leadership and team building are also examined. Offered: W.

**CM 520 Construction Procurement Systems (3)** *Schaufelberger* Study of the different methods used in the procurement and delivery of projects in the construction industry including lump sum, unit price, cost-plus, design-build, and construction management contracts. Offered: A.

**CM 525 Cost Analysis and Management (3)** *Pace* Study of cost management procedures applicable to the building process from the conceptual phase through owner operations, including conceptual estimating, project cost analysis and control, and value engineering and life-cycle costing. Offered: W.

**CM 545 Real Estate Development (3)** *Leahy* A study of the technical issues involved in developing real-estate projects. Tracks project development from initial conception through closing of the sale. Emphasizes the steps and processes involved in pursuing, analyzing, and closing a real-estate purchase. Offered: A.

**CM 550 Residential Project Development (3)** *Leahy* Study of the financial, technical, and management activities and environmental impact regulations and studies associated with the development of residential projects, including business and construction practices and marketing strategies for continued profitable operation of a residential construction firm. Offered: Sp.

**CM 555 Construction Firm Management I (3)** *Schaufelberger* Management of construction company including organization, corporate structure, operation procedures, marketing, and human resources management. Emphasis on safety and loss prevention management, insurance and risk management, financing, accounting, marketing construction services, and bonding requirements for construction company. Other topics include individual and corporate planning and process of strategic planning. Offered: W.

**CM 560 Construction Firm Management II (3)** *Huppert* Examination of the business practices, including market feasibility studies, related to use of Management Information Systems (MIS) in a construction company. Offered: Sp.

**CM 565 Managing International Projects (3)** *Schaufelberger* Study of processes involved in the selection, acquisition, and management of international construction projects. Emphasis is placed on examining common problems associated with managing construction projects outside the United States, identifying risks involved, and discussing possible solutions. Offered: Sp.

**CM 570 Facilities Management (3)** *Emam* Major issues involved in facilities management: facilities planning, financial planning, real estate management, interior space planning and management, facilities operation and maintenance, and emergency preparedness. Offered: A.

**CM 598 Special Topics (1-6, max. 6)** Systematic study and offering of specialized subject matter. Offered: A/WSpS.

**CM 600 Independent Study or Research (\* max. 6)** An in-depth independent investigation of some facet of construction management. Offered: A/WSpS.

**CM 700 Master's Thesis (\* max. 10)** Offered: A/WSpS.

## Master of Landscape Architecture

The Master of Landscape Architecture program, accredited by the American Society of Landscape Architects, is a professional program that offers training in design and inquiry. The design studios form the core of this program, which is supported by rigorous independent investigation in seminars and in a thesis project. Students are expected to develop a specialty within the discipline, under the professional guidance of the faculty. The curriculum emphasizes the following:

*Urban Ecology.* The rapidly changing environment of the Pacific Northwest offers an excellent opportunity for courses and thesis projects to explore the connections between culture and nature and to test ideas for how social and spatial conflicts between development and conservation might be addressed. The faculty are particularly interested in the changing roles of familiar urban and suburban landscapes, as these areas are increasingly expected to function as part of an ecological infrastructure. At the same time, diverse human cultural communities have developed with differing perceptions of and values for these changing landscapes. This department offers students the opportunity to study the rich cultural resources of these human communities as they develop new relationships to their environments, and to participate in this overlap between natural and cultural processes. The department currently offers students exposure to the social, cultural, and natural environment of central Mexico as an international example of community development and design.

*Design Leadership.* The faculty is committed to training students to be leaders in design practice and education. This includes the education of both children and adults to understand the consequences of human transactions with the natural environment. Courses are offered and research is being conducted on designing outdoor educational environments. Graduate students are also encouraged to develop independent leadership skills which will provide them with self-confidence and adaptability in a rapidly changing professional world. The primary areas in which students are encouraged to develop leadership abilities are in the definition and practice of design as a basis for interdisciplinary work, environmental education and the application of ecological concepts to urban design, the use of communication technology to develop creative solutions to cultural and environmental conflicts, and international design-build projects in which students confront the global nature of contemporary development issues.

The graduate program considers applicants with and without previous design education, and encourages applications from persons with diverse academic and professional backgrounds. The faculty is experienced in teaching mature students and seeks to admit students with a range of ages, backgrounds, and interests. Students are encouraged to benefit from the location of the department within a broad and excellent research university by adding elective courses in other disciplines to their core curriculum. In addition, graduate students may elect to participate in College-wide certificate programs in Urban Design, and Preservation Planning and Design. See program descriptions in the preceding College section.

## Program Requirements

Specific program requirements are arranged to fit each student's individual background. Seminar and field courses are selected to help students achieve their educational goals and develop a credible specialty area within landscape architecture. Students with a previous degree in landscape architecture begin course work with the Required Graduate Curriculum studios, while students from other educational backgrounds begin with the Basic Core design studios. The Required Graduate Curriculum sets the academic work required for the degree at 72 approved credits. In addition, a specialization must be developed in the area of a student's individual interests, which is worth 12 credits. This encourages students to deepen their knowledge in a particular area, while maintaining substantial flexibility for each individual.

A thesis is required of all master's degree program students. This is a creative, scholarly project which includes a rigorous written component. The thesis process allows students to develop greater intellectual maturity through independent inquiry, and to demonstrate mastery of a specialized subject area. Students select an appropriate methodology for the thesis in cooperation with their thesis adviser, and present the final product in either written and graphic form, or only in written form.

## Admission Requirements

Candidates applying to the Master of Landscape Architecture program must apply both to the Graduate Admissions Office and to the Department of Landscape Architecture by January 15 to be considered for admission the following autumn quarter.

Admission to the Graduate School requires (1) a baccalaureate degree from an accredited U.S. college or university, or its equivalent in a foreign institution; (2) a GPA of 3.00 or higher in the last 90 graded quarter hours or the last 60 graded semester hours; and (3) a Graduate Record Examination (GRE) score taken within the past three years.

Admission to the Master of Landscape Architecture program is a competitive process with priority given to applicants whose abilities, as determined by the department's admissions committee, will enable them to complete the program expeditiously and with a high level of achievement. Please contact the department for additional information.

## Faculty

### Chair

Iain M. Robertson

### Professors

Bradley, Gordon A. \* 1972, (Adjunct); PhD, 1986, University of Michigan; forest land use planning, conservation area planning, urban forestry.

Haag, Richard 1958, (Emeritus); MLA, 1952, Harvard University; theory and perception of landscapes, master planning, urban recreation, recycling landscapes.

Johnston, Norman J. \* 1960, (Emeritus); PhD, 1964, University of Pennsylvania; urban design, history.

Ochsner, Jeffrey K. \* 1987, (Adjunct); MArch, 1976, Rice University; history, preservation design, urban design.

Schauman, Sally \* 1979; MS, 1971, University of Michigan; landscape ecology, stressed landscapes, countryside conservation.

Streatfield, David C. \* 1974; MLA, 1965, University of Pennsylvania; history, historic landscape preservation, landscape theory, urban landscape design.

Sutton, Sharon E. \* 1998, (Adjunct); MArch, 1973, Columbia University; PhD, 1982, City University of New York; effect of the environment on learning and community well-being.

Vernez Moudon, Anne \* 1980; DSc, 1987, Ecole Polytechnique Federale de Lausanne; urban design, city form and neighborhood studies, design research.

### Associate Professors

Booth, Derek B. \* 1980, (Adjunct Research); PhD, 1984, University of Washington; geomorphology, environmental geology.

Dubrow, Gail Lee \* 1989, (Adjunct); MA, 1979, University of Oregon; PhD, 1991, University of California (Los Angeles); preservation, urban design, public art, public history, gender, multiculturalism.

Ewing, Kern \* 1990, (Adjunct); PhD, 1982, University of Washington; wetland plant ecology, urban ecology, ecosystem management.

Hamilton, Clement Wilson \* 1985, (Adjunct); PhD, 1985, Washington University; landscape plant selection, taxonomy of horticultural and tropical plants.

Horner, Richard R. \* 1981, (Research); PhD, 1978, University of Washington; wetland and stream conservation and storm water management.

Loveland, Joel E. \* 1986, (Adjunct); MArch, 1980, University of California (Los Angeles); energy conservation, design, research.

Palleroni, Sergio A. \* 1992, (Adjunct); MS, 1987, Massachusetts Institute of Technology; the relationship between cultures, their histories, and the production of architecture.

Robertson, Iain M. \* 1982; MLA, 1975, University of Pennsylvania; planting design, planning and design of arboreta/botanical gardens, assessment of design education.

Winterbottom, Daniel M. \* 1993; MLA, 1988, Harvard University; culture and environment, place attachment, building as design expression, therapeutic gardens.

**Assistant Professors**

Alberti, Marina \* 1996, (Adjunct); PhD, 1992, Massachusetts Institute of Technology; environmental planning, urban ecology, impact assessment, geographic information systems.

Hill, Kristina \* 1997; PhD, 1997, Harvard University; spatial patterns of land use, GIS mapping, land classification techniques, landscape ecology.

Johnson, Julie M. \* 1995; MCP, 1988, Massachusetts Institute of Technology; design and use of public/civic space, neighborhood design, suburban redevelopment.

Wolf, Kathleen L. 1994, (Adjunct Research); MLA, 1987, PhD, 1993, University of Michigan; urban forest environment, behavior.

**Lecturers**

Deutsch, Barbara L. 1995; MLA, 1997, University of Washington; landscape planning, growth management issues, marketing the profession.

Hamilton, Roxanne 1994; MLA, 1992, University of Washington; cultural landscapes; native American community design; therapeutic, restorative landscapes.

MacElroy, William P. 1996; MLA, 1983, University of Michigan; nature and urban environments, storm water management, role of craft in landscape architecture.

Smith, Luanne 1997; MLA, 1984, University of Oregon; design, planting, learning environments, children, art.

**Course Descriptions**

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**L ARCH 401 Urban Recreation Design (1-6) VLPA/I&S** Special studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

**L ARCH 402 Site Design/Cluster Housing (1-6, max. 6)** Large-scale site planning and design. Generally related to housing, new communities, and institutional development. Identification of landscape character, resources, and problems of site, cost factors, design alternatives and implications for architectural direction, policy for land acquisition. Program development to maximize site utilization and preservation of natural attributes.

**L ARCH 403 Cultural Landscape Studio (1-6, max. 6)** Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer's capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

**L ARCH 406 Individual Design Studio (6)** Senior projects in landscape architecture; projects vary according to the student's particular emphasis and needs.

**L ARCH 411 Landscape Graphics (3)** Delineation techniques for landscape perspectives, sections, rendering of plant materials. Historical and contemporary examples of landscape drawing.

**L ARCH 412 Landscape Communications (2)** Multimedia and video production techniques and presentation methods suitable for public hearings, citizen groups, design commissions, and private clients. Individual projects and case-study examples.

**L ARCH 423 Planting Design Studio (3)** Utilization of plants as design elements to manipulate space and modify the landscape for various activities and resolutions of site problems. Factors that determine the appropriate use and arrangement of plant materials in an urban context. Composition, plant selection, planting techniques, and maintenance requirements are major components of this class.

**L ARCH 425 Advanced Planting Design Studio (1-6, max. 6)** Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and esthetic principles for selecting plants to meet specific site conditions. Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites.

**L ARCH 433 Large-Scale Site Construction (4)** Includes studies of natural determinants and restraints on large-scale construction, development affected by service and utility systems, physiographic suitability of site, cost-benefit analysis, and critical path methodology for site construction projects.

**L ARCH 440 Computers in Landscape Architecture (1-3, max. 3)** Laboratory, lecture, and demonstration classes to introduce software applications specific to required landscape architecture courses. Credit/no credit only.

**L ARCH 450 History of Environmental Design in the Pacific Northwest (3) VLPA** Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from nineteenth century to the present, with major emphasis on twentieth century. Open to nonmajors.

**L ARCH 451 History of Environmental Design on the West Coast (3) VLPA** Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

**L ARCH 470 Landscape Architecture Tutorial (2, max. 6)** Various aspects of project organization, programming, scheduling of work loads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planting and design.

**L ARCH 473 Professional Practice (3)** Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

**L ARCH 474 Project Design (1-6, max. 6)** Detailed design studies of small-to-medium-scale projects. General focus on public landscape areas and social/psychological uses of site. Specific focus on design development and professional office presentation.

**L ARCH 475 Advanced Project Design Studio (1-6, max. 6)**

**L ARCH 476 Professional Operations (3-6, max. 6)** Practicum course for landscape architecture majors for internship and exposure to the profession with working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Credit/no credit only.

**L ARCH 495 Landscape Architectural Studies Abroad (1-10, max. 30)** Studies conducted under faculty supervision in various locations outside the United States.

**L ARCH 498 Special Projects (1-10, max. 30)** Special projects as arranged. Open to nonmajors.

**L ARCH 499 Undergraduate Research (1-9, max. 9)** Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues.

**Courses for Graduates Only**

**L ARCH 501 Landscape Design and Planning I (1-6)** Enhances perceptual awareness and design sensitivity to natural and man-made landscapes. Basic skills necessary for more advanced course work required in the Master of Landscape Architecture degree program. Examination of landscape environment through problem-solving techniques that acknowledge holistic approach to the environment.

**L ARCH 503 Landscape Design of Communities (1-6)** Methods and techniques for developing physical design solutions and implementation strategies in neighborhoods and small communities. Social, economic, political, and individual forces affecting community development and growth. Comparison of several communities, identifying pertinent landscape issues, potential design solutions, and methods for achieving design goals through the political process.

**L ARCH 504 Regional Landscape Planning (1-6)** Studio in applied regional landscape planning in metropolitan regions to examine conflicting land-use pressures of urban/rural fringe. Ecosystematic approach emphasizes maintenance of landscape quality. Computer applications in design.

**L ARCH 505 Regional Landscape Design (1-6)** Theory/techniques of regional design to analyze, evaluate, plan, design, and manage the resources of the regional landscape continuum.

**L ARCH 506 Landscape Visual Resources (1-6)** Survey of existing theory/techniques and the generation of new methods to analyze, evaluate, plan, design, and manage the visual resources of the landscape.

**L ARCH 507 Landscape Art (1-6)** Public art placed in, or developed for, specific landscape settings. Various aspects and benefits of public art, including materials, technologies, philosophies of landscape imagery and meaning. General planning criteria for location for maximum public benefit and identification of objectives for a specific site and artwork.

**L ARCH 523 Landscape Technology (1-6)** Studio on rehabilitation of stressed urban landscapes. Focus varies but often deals with an analysis of the potentials in urban watershed and the study of alternative site designs for enhancing a range of landscape functions related to water quality. Taught by an interdisciplinary team.

**L ARCH 550 History and Theory of Modern Landscape Architecture (3)** Lecture/seminar on history and theory of landscape architecture from the eighteenth century to the present. Relation to theory in related environmental design disciplines such as architecture and urban planning and other disciplines such as geography.

**L ARCH 561 Regional Landscape Planning and Design (2)** Seminar on objectives, philosophy, history, and theory of regional landscape planning and design. Overview of the context of regional landscape planning, examination of critical issues in the Pacific Northwest, and opportunities and role of the landscape architect in addressing these issues.

**L ARCH 570 Scholarship and Research in Landscape Architecture (3)** Seminar on the trends and results of research related to landscape architecture. Introduction to important scholars and researchers. Open to nonmajors with permission of instructor.

**L ARCH 571 Seminar on Landscape Architecture Research (3)** Introduction and exploration of problems and opportunities of several basic research methods currently employed in landscape architecture research. Emphasis on how researchers identify research topics and develop appropriate research methods. Introduce analysis and interpretation of research results.

**L ARCH 590 Seminar in Landscape Architecture (1-3, max. 12)** Advanced topics in landscape architecture with focus on unpublished areas of research.

**L ARCH 598 Special Topics (1-6, max. 9)** Systematic study of specialized regional landscape subject matter, including history, technology, implementation, and other topics depending on current interest/needs. Topics vary and are announced in the preceding quarter.

**L ARCH 600 Independent Study or Research (\*)**

**L ARCH 601 Internship (3-9, max. 9)** Credit/no credit only.

**L ARCH 700 Master's Thesis (\*)**

## Urban Design and Planning

410 Gould

General Catalog Web page:

Department Web page:

[www.caup.washington.edu/html/urbdp/](http://www.caup.washington.edu/html/urbdp/)

Urban design and planning deals with critical issues of human settlement and urban development. It provides communities with an informed basis for coordinated public- and private-sector action. Urban design and planning constitutes a professional field of growing complexity, responding to the urban complexities of this century and the next. The Department of Urban Design and Planning fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built and natural environment; the financial, administrative, political, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas and regions, bringing analysis together with vision.

Departmental faculty are active participants in interdisciplinary research units of the College of Architecture and Urban Planning, including the Center for Community Development and Real Estate and the Institute for Hazard Mitigation Planning and Research. Faculty also participate in the Puget Sound Regional Synthesis Model (PRISM) University Initiative Fund program. The department also administers the Remote Sensing Applications Laboratory, concerned with applications in urban planning of remote sensing and geographic information systems (GIS) technology and the Urban Ecology Research Laboratory. In addition, the College has a wide array of facilities for computer-based instruction related to design, including CAD, GIS, and visualization technology, and runs a joint program in advanced computer technology and virtual reality with the Human Interface Technology Laboratory of the Washington Technology Center.

## Graduate Program

Graduate Program Coordinator  
410 Gould, Box 355740  
(206) 543-4190

The department offers the Master of Urban Planning (M.U.P.) degree and its faculty participate in the interdisciplinary Doctor of Philosophy (Ph.D.) in Urban Design and Planning. The M.U.P. is the professional degree, while the Ph.D. is primarily for students planning to enter research and teaching positions in urban planning and design.

The graduate program focuses on planning the physical environment and its socioeconomic and political determinants. Advanced students are encouraged to conduct research and studies in one of the following specializations:

- urban design dealing with physical form, character, and quality issues
- community development and real estate including public/private development processes
- preservation planning and design
- land-use planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects.

Graduate students may elect to participate in the College-wide Certificate Programs in Urban Design, and Preservation Planning and Design. See program descriptions in the preceding College section.

## Master of Urban Planning

The Master of Urban Planning degree is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms. It is a two-year, or six-quarter, program requiring a minimum of 72 credits.

Requirements for graduate-level study include a satisfactory academic record and undergraduate training in one of a variety of disciplines, including urban planning and environmental design or in other appropriate fields, such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Students planning to enter the program should have completed at least one college-level course in each of the following areas: economics, mathematics, statistics, American government, environmental systems, and cultural diversity. Students without sufficient background must take these prerequisite courses concurrently with their graduate studies.

The primary objective is to educate professional planners with a broad range of competence in planning and design; a second objective is to provide opportunities for individual studies in selected professional areas. Core course requirements include 30 credits covering the history and theory of planning and urban design, urban form, communication methods, quantitative methods, processes and methods of land use planning, planning law, research methods, and a planning studio. Also required are 14 credits of restricted electives, including a course in advanced methods and a second studio; both may be in an area of specialization. In addition, a course in land-use planning and in urban development economics is required. A 9-credit thesis or professional project is required upon completion of all other degree course work. Of the 72 minimum credits required for the degree, 19 credits may be in open electives.

The core provides a foundation in urban design and planning for all students. An internship is required for those without previous professional experience. A specialization in one area of planning is encouraged. Six major specialized areas offered in the department include land-use planning and growth management, community development and real estate, urban design, preservation planning, environmental planning, and transportation planning.

Students are admitted to the M.U.P. program primarily in autumn quarter and all application material should be received by the department no later than the preceding February 1. Graduate Record Examination general test scores, three letters of recommendation, transcripts of previous degree programs and any additional academic study, and a statement of purpose are required.

## Doctor of Philosophy

Some of the departmental faculty are part of an interdisciplinary faculty group which offers doctoral study in urban design and planning. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of the catalog.

## Faculty

### Chair

Frank Westerlund

### Professors

Amoss, Harold L. 1963, (Emeritus); MA, 1947, University of New Mexico; PhD, 1951, University of California (Berkeley); planned social change, community organization.

Bell, Earl J. \* 1966, (Emeritus); PhD, 1965, University of California (Berkeley); operations research, statistics, quantitative methods and geographic information systems.

Beyers, William B. \* 1962, (Adjunct); PhD, 1967, University of Washington; economic geography, regional analysis, regional development.

Bradley, Gordon A. \* 1972, (Adjunct); PhD, 1986, University of Michigan; forest land use planning, conservation area planning, urban forestry.

Grey, Arthur L. \* 1963, (Emeritus); PhD, 1954, University of California (Berkeley).

Hancock, John L. \* 1969, (Emeritus); PhD, 1964, University of Pennsylvania; urban and planning history, society, planning and environmental policy.

Johnston, Norman J. \* 1960, (Emeritus); PhD, 1964, University of Pennsylvania; urban design, history.

Ludwig, Richard L. \* 1971; PhD, 1971, University of Pittsburgh; housing development planning, social factors in development planning.

Miller, Donald H. \* 1970; PhD, 1972, University of California (Berkeley); land use and urban spatial structure, data analysis and forecasting, planning theory.

Ochsner, Jeffrey K. \* 1987, (Adjunct); MArch, 1976, Rice University; history, preservation design, urban design.

Rutherford, G. Scott \* 1981, (Adjunct); PhD, 1974, Northwestern University; transportation planning and engineering.

Streatfield, David C. \* 1974; MLA, 1965, University of Pennsylvania; history, historic landscape preservation, landscape theory, urban landscape design.

Sutton, Sharon E. \* 1998; MArch, 1973, Columbia University; PhD, 1982, City University of New York; effect of the environment on learning and community well-being.

Untermann, Richard K. \* 1971, (Emeritus); MLA, 1967, Harvard University; urban design and site planning, housing, recreation, nonmotorized circulation.

Vernez Moudon, Anne \* 1980; DSc, 1987, Ecole Polytechnique Federale de Lausanne; urban design, city form and neighborhood studies, design research.

Wong, Shawn H. \* 1984, (Adjunct); MA, 1974, San Francisco State; creative writing, Chinese-American area studies.

Zarina, Astra \* 1970; MArch, 1955, Massachusetts Institute of Technology; design, foreign studies.

### Associate Professors

Blanco, Hilda J. \* 1996; MRP, 1984, PhD, 1989, University of California (Berkeley); comprehensive and neighborhood planning, environmental planning, infrastructure, finance.

Dubrow, Gail Lee \* 1989; MA, 1979, University of Oregon; PhD, 1991, University of California (Los Angeles); preservation, urban design, public art, public history, gender, multiculturalism.

Kasprisin, Ronald J. \* 1989; MUP, 1968, University of Washington; community design studios, town planning, planning/design communications, urban design principles.

Norton, Thomas J. \* 1968, (Emeritus); MUP, 1960, University of Washington; urban community facilities, planning administration.

Rolfe, George R. \* 1984; MArch, 1968, MCP, 1968, University of Pennsylvania; urban development process, finance, feasibility and market analysis, urban design processes.

Ryan, Dennis M. \* 1974; PhD, 1976, University of Pennsylvania; community planning, design, and identity; public processes; urban design, change, and continuity.

Waddell, Paul A. \* 1997; PhD, 1989, University of Texas (Dallas); urban policy, land use and transportation, growth management, geographic information systems.

Westerlund, Frank \* 1971; PhD, 1977, University of Washington; remote sensing applications, energy development and conservation, regional environmental planning.

### Assistant Professors

Alberti, Marina \* 1996; PhD, 1992, Massachusetts Institute of Technology; environmental planning, urban ecology, impact assessment, geographic information systems.

Bae, Christine \* 1996; MRP, 1986, State University of New York (Albany); PhD, 1994, University of Southern California; transportation, environment, land use, growth management, quantitative methods.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**URBDP 407 Urban Planning Studio (5) VLPA/I&S** Synthesis of urban design and planning problems and methods in a laboratory section.

**URBDP 420 Database Systems and Planning Analysis (3)** Applications of relational database management systems in urban design and planning. Emphasis on practical aspects of database design and use. Design, create, and modify databases and database applications, including spatial databases. Introduction to GIS. Use of personal computers linked to desktop mapping packages and relational database management systems.

**URBDP 422 Geographic Information Systems in Planning Analysis (5)** *Alberti* Principles of GIS applied to problems in urban design and planning, landscape architecture, and environmental and resource studies. Practical problem-solving approaches using contemporary desktop mapping packages and vector and raster GIS systems. Siting, environmental evaluation and inventories, and modeling. Prerequisite: 3.0 in URBDP 420.

**URBDP 429 Computer-Aided Planning of Urban Systems (3)** Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigation of hardware/software trade-offs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with CEE 418.

**URBDP 446 Practical Experience (4, max. 8)** *Rolfe* Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects.

**URBDP 451 Housing (3) I&S** *Ludwig* Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 3.0 in URBDP 300.

**URBDP 454 Introduction to Real Estate Finance (4)** *Rolfe* Introduction to the financing of real estate development projects, including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Offered: jointly with CM 454.

**URBDP 455 Introduction to Real Estate Development Processes (5)** *Rolfe* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Offered: jointly with CM 455.

**URBDP 456 Real Estate Investment Seminar (4)** *Rolfe* Analysis of private and public real-estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in 453, 454, and 455. Prerequisite: URBDP 455 or CM 455. Offered: jointly with CM 456; W.

**URBDP 457 Housing in Developing Countries (3)** *Ludwig* Emphasis on role of the design and planning professional in housing delivery in developing countries. Exploration of issues of culture, political environment, social context, economic circumstances, and other factors which define and limit the manner in which the professional planner and designer can and should function.

**URBDP 460 History of City Development (3) VLPA/I&S** *Dubrow* Analysis of city forms and designs, emphasizing their relation to the culture of each period.

**URBDP 461 History of Urban Planning in the United States (3) I&S** *Hancock* Seminar in origins, development, and significance of the American planning movement and the profession that emerged from it, as defined by some of its seminal innovators, theories, practices, and achievements, and as evaluated by cultural realities thereby served.

**URBDP 465 Land Use (3) I&S** *Westerlund* Land use as a substantive focus for urban and regional planning and growth management. Consideration of data collection, analysis, plan development, and implementation methods. Seminar and group project sections.

**URBDP 466 Infrastructure and Community Facilities (4)** *Blanco* Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste and transportation. Covers their relationship to comprehensive plans, project permitting and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

**URBDP 467 Urban Planning Uses of Remote Sensing (3)** *Westerlund* Using aerial photographs and satellite image data in urban planning. Urban change analysis, land-use and land cover classification, and environmental planning applications. Scale and resolution considerations. Development of proficiency through laboratory exercises and use of image-processing software.

**URBDP 470 Introduction to Urban Design (3) VLPA/I&S** *Rolfe* Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

**URBDP 471 History of Urban Design (3) VLPA/I&S** *Streatfield* Aspects of form, pattern, and space that mark efforts of individuals and groups to express their values and goals in the design of their cities. Special attention given to both historical and modern examples.

**URBDP 479 The Urban Form (3) VLPA** *Moudon* Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

**URBDP 481 Metropolitan Planning and Development in Developing Countries (3) I&S** *Ludwig* Examination of the nature and causes of urban planning and management problems in developing countries and exploration of alternative approaches to solve some of these problems.

**URBDP 494 Alaska Field Study (2)** *Kasprisin, Westerlund* Travel to Alaskan communities for interpretation of natural systems, history, cultures, settlement patterns, and current issues of planning and economic development. Meetings with community leaders and planners. Students either select a topic for field and documentary research, or participate in intensive charrette-type projects or quarter-long projects in communities. Offered: Sp.

**URBDP 498 Special Topics (1-9, max. 15)** Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and needs, and are announced in the preceding quarter.

**URBDP 499 Special Projects (1-12, max. 12)** Independent/tutorial study for undergraduates. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty adviser most appropriate for the project proposed. A report on the purposes, procedures, and results of the study is required.

### Courses for Graduates Only

**URBDP 500 Survey of Urban Planning (3)** *Miller* Concepts and logic of planning as a professional activity. Evolution of guiding ideas in relation to changing social, economic, and environmental conditions within the American political framework. Major procedures used by planners. Critical appraisal. Open to graduate students in urban design and planning and to graduate students in architecture seeking the urban design certificate.

**URBDP 503 Communication and Analysis (4)** *Kasprisin* Development of communication skills understanding within the planning and design process. Presentation of communications as a design process with mental, visual, oral, written, and kinesthetic cognitive actions combined to form communications thinking. Offered: W.

**URBDP 507 General Urban Planning Laboratory (5)** Studio/field project in applied professional planning of a comprehensive nature, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process.

**URBDP 508 Specialized Planning Laboratory (5, max. 10)** *Blanco, Dubrow, Kasprisin, Moudon, Rolfe, Westerlund* Studio/field project on a specialized planning problem. Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisite: ARCH 500 and ARCH 507. Additional prerequisite for some sections: urban planning seminar or lecture courses.

**URBDP 510 Theories and Methodologies of Planning I (4)** *Bae* Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate students in urban design and planning and to graduate students seeking the urban design certificate. Prerequisite: URBDP 500.

**URBDP 512 Research Seminar (2)** *Miller* Development and presentation of advanced topics of individual investigation.

**URBDP 520 Quantitative Methods in Urban Design and Planning (4)** *Bae* Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival populations models with examples solved on microcomputers. Prerequisite: college mathematics and basic course in probability and statistics.

**URBDP 530 Land-Use/Transportation Models (3)** *Waddell* Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land-use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with CEE 588.

**URBDP 537 Open Space Land Uses (3)** *Westerlund* Exploration of public and private values of open space; its aesthetic, environmental, recreational, natural resource uses from development sites to metropolitan regions. Methods of open space inventory, analysis; legal and administrative tools for preserving and managing open space; development of multipurpose open space programs in local governments. Prerequisite: URBDP 500.

**URBDP 546 Practicum (4, max. 8)** *Rolfe* Off-campus experience under academic supervision in situations useful to the education of planners, such as planning offices, public bureaucracies, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects. Credit/no credit only. Prerequisite: permission of instructor.

**URBDP 547 Professional Project (1-9, max. 9)** Independent development of client oriented project involving application of professional planning/design methods and approaches. Professional-quality report relates project to larger professional context, addresses alternative approaches/methods and includes an evaluation of the project. Master of Urban Planning students only, taken in lieu of 700. Not recommended for those continuing into Ph.D. program. Credit/no credit only.

**URBDP 560 Urban Affairs (3)** Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with PB AF 560.

**URBDP 561 Urban Economics and Public Policy (3)** Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with PB AF 561.

**URBDP 562 Introduction to Neighborhood Planning and Community Development (3)** Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with PB AF 562.

**URBDP 563 Seminar in Urban Planning and Policy (1)** Seminar for students in the MPA/MUP concurrent degree program. Explores topics that intersect urban planning and policy, through exchange with faculty and professionals working in this arena. Focuses on developing thesis topics that explore this intersection. Offered: jointly with PB AF 563.

**URBDP 571 Research and Analytical Methods for Urban Design (3)** *Moudon* Conceptual framework for an epistemology of urban design and physical planning. Review of relevant research in related fields and disciplines. Prerequisite: specialization in urban design or permission of instructor.

**URBDP 572 Case Studies in Urban Design and Development (3)** *Kasprisin* Wide range of urban design and development projects recently completed. Effective urban design implementation, including design process, decision making, administration, management. Tools and techniques such as design analysis, policy making, regulation, design review, taxation, financing. Prerequisite: URBDP 510 and URBDP 580 and/or permission of instructor.

**URBDP 574 Residential Design: Methods and Practices (3)** *Dubrow* Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods and practices. Offered: jointly with ARCH 593.

**URBDP 580 Legal and Administrative Framework for Planning (4)** *Blanco* Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

**URBDP 585 Introduction to Historic Preservation Planning (3)** *Dubrow* Theories, methods, and practices associated with historic preservation planning. Overview of preservation planning programs at federal, state, and local levels. Introduction to tools and methods needed to identify, document, evaluate, and plan for protection of historic properties. Provides opportunity to learn fundamentals of preservation planning through practical experience. Offered: Sp.

**URBDP 586 Implementation in Preservation Planning and Urban Design (4)** Analysis of recent case studies in implementation of preservation planning and urban design in terms of planning and design products and related processes, decision making, administration, management. Tools and techniques include design analysis, policy-making, regulation, design review, taxation, financing, public participation. Prerequisite: introductory course in preservation or urban design.

**URBDP 587 Preservation and the Vernacular Environment (3)** *Dubrow* Exploration of theoretical, methodological, and practical issues related to the preservation of vernacular architecture and cultural landscapes in the United States. Offered: W.

**URBDP 591- Doctoral Seminar I (4-)** Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

**URBDP -592- Doctoral Seminar II (-4-)** Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

**URBDP -593 Doctoral Seminar III (-4)** Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

**URBDP 598 Special Topics (1-6, max. 15)** Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

**URBDP 600 Independent Study or Research (\*)**

**URBDP 700 Master's Thesis (\*)**

**URBDP 800 Doctoral Dissertation (\*)**

# College of Arts and Sciences

College Web page:  
[ascc.artsci.washington.edu/](http://ascc.artsci.washington.edu/)

The departments and schools of the College of Arts and Sciences offer graduate study leading to master's and doctoral degrees. Students who intend to work toward advanced degrees must apply for admission to the Graduate School and must meet the general requirements outlined in the Graduate School section of this catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree that are in force at the time the degree is to be awarded.

## Afro-American Studies

See American Ethnic Studies.

## American Ethnic Studies

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsccat/](http://www.washington.edu/students/crsccat/).

### American Ethnic Studies

**AES 461 Comparative Ethnic Race Relations in the Americas (5) I&S** Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with SOC 461.

**AES 462 Comparative Race and Ethnic Relations (5) I&S** Scott Race and ethnicity are examined as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with SOC 462.

**AES 489 Ethnicity, Gender, and Media (5) I&S** Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with CMU 489/WOMEN 489.

**AES 494 Community Practicum and Internship (3-5, max. 10)** Faculty supervised practicum and internship experience in variety of settings and agencies, e.g., ethnic specific agencies, government and civic community-based offices. Students contribute skills and knowledge to respective communities and gain experience by working with professionals and community organizers. Credit/no credit only.

**AES 498 Special Topics in American Ethnic Studies (1-5, max. 15) I&S** Designed to provide the student an opportunity to concentrate on one specific aspect of American Ethnic Studies through a comparative, interdisciplinary approach.

**AES 499 Independent Study or Research (1-5, max. 10)** Independent readings and/or research under the supervision of a faculty member.

### Afro-American Studies

**AFRAM 401 Intermediate Swahili (5) VLPA** Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: either AFRAM 308 or AFRAM 309.

**AFRAM 402 Intermediate Swahili (5) VLPA** Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: AFRAM 401.

**AFRAM 403 Intermediate Swahili (5) VLPA** Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: AFRAM 402.

**AFRAM 437 Blacks in American Law (5) I&S** Walter Historical continuity for changing relationship between American jurisprudence and Black Americans, 1640-1986. Statutory and case law which determined role of Blacks in American society, and use of law by Blacks to gain civil and personal rights.

**AFRAM 490 Research in the Black Community (1-5, max. 10)** Identification and investigation of the problems and needs of the Black community. Methods and alternatives of approaching these problems and needs. Students designate their areas of interest and subsequently pursue research and problem solving.

**AFRAM 492 Special Topics in Afro-American Studies (3-5, max. 15) I&S** Topics in which students and faculty have developed an interest as a result of work done in other classes or as a result of the need to investigate in greater depth Afro-American Studies issues. Topics vary.

### Asian-American Studies

**AAS 401 Asian-American Literature to the 1940s (5) VLPA** Asian-American literature from nineteenth-century immigrants to the 1940s. Emphasis on Chinese, Japanese, and Filipino writings detailing the experience and sensibility of first generation immigrants. Early twentieth-century writing focus on the development not only of Asian-American community, but also of second generation American-born Asian-American writers. Recommended: AAS 205 or AAS 206.

**AAS 402 Contemporary Asian-American Literature (5) VLPA** Asian-American literature from the 1940s to the present. Emphasis on the development of attitudes and identities in contemporary Asian-American literature, the role of the writer in a minority culture, and the relationship of literature to self and society.

**AAS 403 Survey of Asian-American Poetry (5) VLPA** Asian-American poetry, nineteenth century to present. Readings include poetry of the early immi-

grant to America, cultural imperatives transferred from old world to new world, and establishment of an Asian-American identity in poetry from 1870s through 1890s.

### AAS 498 Special Topics (5, max. 10) I&S

### Chicano Studies

**CHSTU 405 Advanced Chicano Studies (5) I&S** Gamboa Chicano culture as related to current values and health practices, Mexican labor and immigration in both historical and contemporary setting. Chicano politics 1848 to present. Recurrent problems of Chicanos in society; social movement for acceptance and for self-determination.

**CHSTU 491 Special Topics in Chicano Studies (3-5, max. 10) I&S** Gamboa, Olguin, Salas Interdisciplinary course concentrating on one or more aspects of the Chicano experience.

## American Indian Studies

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsccat/](http://www.washington.edu/students/crsccat/).

**AIS 425 Indians in Western Washington History (3) I&S** Harmon Relations of Indians and non-Indians in the Puget Sound region, from the 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with HSTAA 417.

**AIS 431 History of American Indian Education (5) I&S** Traditional and European-introduced methods of schooling, the federal role in Indian education, and contemporary Indian education issues. Special attention to Indian concepts of learning; boarding school education; the role of the Bureau of Indian Affairs; current trends in bilingual and bicultural education for Indians.

**AIS 440 Reading Native American Women's Lives (5, max. 10) I&S** *Jacobs, Ross* Seminar based on social science writings, autobiographies, biographies, and fiction written by, with, or about indigenous women of the United States and Canada. Prerequisite: either WOMEN 342, WOMEN 423, AIS 201, AIS 330, or AIS 423. Offered: jointly with WOMEN 440.

**AIS 442 Images of Natives in the Cinema and Popular Cultures (5) I&S/VLPA** Ross Cultural examination of images of native people in cinema and popular culture based on social science writings and films by or about natives in the United States and Canada. Offered: jointly with WOMEN 442. Prerequisite: AIS 330 and WOMEN 200.

**AIS 450 American Indian Song and Dance Tradition: Performance (3) VLPA** Performance of various American Indian social dances, songs, and games. In-depth study of various American Indian vocal styles.

**AIS 469 Special Studies in American Indians (3, max. 6) I&S** Delineation and analysis of a specific problem or related problems in American Indian Studies. Offered occasionally by visitors or resident faculty.

**AIS 475 Special Topics in Indian Studies (1-5, max. 15) I&S** Current research and readings in American Indian Studies content areas.

**AIS 499 Independent Study (1-5, max. 15)** Readings and/or research under faculty supervision.

# Anthropology

M32 Denny

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/anthropology.html](http://www.washington.edu/students/genecat/academic/anthropology.html)

Department Web page:  
[www.anthro.washington.edu](http://www.anthro.washington.edu)

Anthropology is a discipline committed to describing, interpreting, and explaining the historical, biological, and cultural diversity of the human species. This covers our species' evolutionary origins as well as our continual evolution through many millennia of biocultural microevolution. It also covers more recent sociocultural changes up through the current global flux in population, genes, languages, practices, and identities. Anthropology's unique contribution to the human sciences and humanities is its expansive scope—temporally and spatially—in studying the human species.

In studying anthropology, students can learn about the range of human situations in the world today. They can better understand how to find ways to live together in today's world of some six billion people, respecting profound human differences of outlook while building upon common human values. A degree in anthropology can be of value in many ways. A graduate degree prepares a student for college or university teaching, research, or work for government and non-government agencies, museums, and social and human services.

## Graduate Program

Graduate Program Coordinator  
 M31 Denny Hall, Box 353100  
 (206) 685-1562

The department recognizes four principal subfields of anthropology within its faculty, programs, and curriculum: archaeology, biocultural anthropology, environmental anthropology, and sociocultural anthropology (including anthropological linguistics). The department offers four distinct Ph.D. programs within the subdisciplines. A Ph.D. program in sociocultural anthropology with emphasis in ethnomusicology is offered in cooperation with the School of Music. The M.A. degree may be earned within the Ph.D. programs. Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies.

## Admission Requirements

Applicants are admitted to begin study only during autumn quarter and are advised to have their application materials completed by the beginning of the prior January. A complete application file includes the Graduate School Application, official transcripts, the Supplementary Information Form, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE). International students are required to take the TOEFL exam as well as the GRE.

## Program Requirements

For each of the respective graduate programs, completion of the core requirements and a reading knowledge of one foreign language are required. Under the guidance of a supervisory committee selected from the appropriate subfield, the student shapes an individual program. The major areas emphasized in the faculty and curriculum are the United States, Mexico, Africa, South Asia, Southeast Asia, China, Oceania, and the post-Soviet states. The M.A. programs usually require two years of graduate study; the Ph.D. programs usually require at least three years beyond the master's level, including a year of independent field research and a year to organize field materials and write a doctoral dissertation.

## Financial Aid

One-year fellowships are awarded to one or two outstanding entering students. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Some students may be qualified for a few National Resource Fellowships for Language Studies. Work-study positions are also available for eligible graduate students.

## Faculty

### Chair

Miriam Kahn

### Professors

Chrisman, Noel J. \* 1973, (Adjunct); PhD, 1966, University of California (Berkeley); community partnership research, clinical cultural competence, ethnic health beliefs and practices.

Dunnell, Robert C. \* 1967, (Emeritus); PhD, 1967, Yale University; archeological theory, field method, eastern North America.

Grayson, Donald K. \* 1975; PhD, 1973, University of Oregon; North American prehistory, paleoecology, European paleolithic, zooarchaeology.

Harrell, Stevan \* 1974; PhD, 1974, Stanford University; family systems, demography, ethnicity, social evolution, religion, China, Taiwan.

Hunn, Eugene S. \* 1972; PhD, 1973, University of California (Berkeley); cognitive anthropology, ethnobiology, cultural ecology and evolution, Mexico, North American Indians.

Hutterer, Karl L. \* 1990; PhD, 1973, University of Hawaii; prehistory, ethnology of Southeast Asia, East Asia.

Jacobs, Sue-Ellen \* 1974, (Adjunct); PhD, 1970, University of Colorado (Boulder); anthropological studies of women, applied anthropology, ethnohistory, Native North America.

Keyes, Charles F. \* 1965; PhD, 1965, Cornell University; ethnic group relations, sociology of Theravada Buddhism, mainland Southeast Asia.

Lockard, Joan S. \* 1962, (Adjunct); PhD, 1963, University of Wisconsin; primate social behavior, animal behavior, sociobiology, human ethology, neurobehavior.

Miller, Marc \* 1979, (Adjunct); PhD, 1974, University of California (Irvine); maritime anthropology, cognitive anthropology, tourism, and social/cultural change.

Muecke, Marjorie A. \* 1979, (Adjunct); PhD, 1976, University of Washington; medical anthropology, women's health, refugee health, Southeast Asia.

Nason, James \* 1970; PhD, 1970, University of Washington; sociocultural anthropology, museology, material culture, cultural heritage, Micronesia, North America.

Newell, Laura L. \* 1957; PhD, 1967, University of Washington; primateology growth and development, human biology, evolutionary aspects of dermatoglyphics.

Nute, Peter E. \* 1970, (Emeritus); PhD, 1969, Duke University; genetics and evolution.

Pena, Devon G. \* 1999, (Acting); PhD, 1983, University of Texas (Austin); agroecology, bioregionalism, social movements, labor process theory.

Smith, Eric A. \* 1980; PhD, 1980, Cornell University; ecology, environmental studies, evolutionary theory, hunter-gatherers, demography, Native Americans.

Spain, David H. \* 1968; PhD, 1969, Northwestern University; psychocultural anthropology, African studies, research methods.

Stein, Julie K. \* 1980; MA, 1976, PhD, 1980, University of Minnesota; New World archaeology, Northwest coast archaeology, geoarchaeology, shell middens.

Wenke, Robert J. \* 1975; PhD, 1975, University of Michigan; archaeology of Egypt, the Middle East, and quantitative methods.

Winans, Edgar V. \* 1957, (Emeritus); PhD, 1959, University of California (Los Angeles); politics, economics and law, Africa, the developing world.

Witherspoon, Gary J. \* 1987; PhD, 1970, University of Chicago; language, art, and history; Indians of the Southwest.

### Associate Professors

Anagnost, Ann S. \* 1990; PhD, 1985, University of Michigan; ethnography of the state, ideology and popular culture, peasant society; China.

Close, Angela E. \* 1995; MA, 1974, PhD, 1976, Cambridge University (UK); prehistory of North Africa, lithics, paleolithic.

Eck, Gerald G. \* 1974; PhD, 1977, University of California (Berkeley); primate paleontology, especially African Pliocene-Pleistocene monkeys and hominids.

Ellingson, Terry J. \* 1983, (Adjunct); PhD, 1979, University of Wisconsin; MA, 1979, University of Chicago; ethnomusicology.

Feathers, James K. \* 1983, (Research); PhD, 1990, University of Washington; luminescence dating of sediments and pottery from archaeological sites.

Horn, Beverly M. \* 1976, (Adjunct); PhD, 1975, University of Washington; cross-cultural research in maternal-child nursing.

Kahn, Miriam \* 1986; PhD, 1980, Bryn Mawr College; cultural representations, museums, concepts of place, Melanesia, Polynesia.

Leonetti, Donna \* 1978; PhD, 1976, University of Washington; biological and sociocultural interactions in adaptation demography, epidemiology, Japanese Americans.

Posner, Karen L. 1986, (Adjunct Research); PhD, 1990, University of Washington.

Rhodes, Lorna A. \* 1983; PhD, 1973, Cornell University; medical anthropology, anthropology of institutions, religion, psychiatry.

Sorensen, Clark W. \* 1989, (Adjunct); PhD, 1981, University of Washington; Korea, social change in East Asia, development, ethnic identity.

Twine, France Winnandance 1994, (Adjunct); MA, 1990, PhD, 1994, University of California (Berkeley); critical race feminisms, racism/antiracism, whiteness studies, multiracial families, Brazil, Britain.

### Assistant Professors

Bilaniuk, Laada M. 1997; PhD, 1998, University of Michigan; linguistic anthropology.

Ferguson, G. (Jack) 1998; PhD, 1997, Stanford University; sociocultural anthropology.

Fitzhugh, J. Ben \* 1997; PhD, 1996, University of Michigan; archaeology, evolutionary ecology, archaeological method and theory, arctic/subarctic, Alaska.

Holman, Darryl J. \* 1999; MS, 1990, University of Wisconsin; PhD, 1996, Pennsylvania State University; human reproductive ecology, paleodemography.

Kyes, Randall C. \* 1993, (Adjunct Research); PhD, 1989, University of Georgia; animal behavior, primate behavior and cognition, conservation biology.

Lowe, Celia 1999; PhD, 2000, Yale University; environment, identity, representation, science studies, insular southeast Asia.

McGrath, Barbara B. \* 1987, (Research); PhD, 1993, University of Washington; medical anthropology, illness knowledge and practice, US Pacific Islander populations, HIV/AIDS.

O'Connor, Kathleen A. \* 1999; MS, 1987, PhD, 1995, State University of New York (Albany); biogeography, human reproductive biology and ecology, mortality, fertility.

Shell-Duncan, Bettina \* 1995; MS, 1988, University of Wisconsin; PhD, 1994, Pennsylvania State University; nutrition, maternal and child health, demography, Africa.

Sivaramkrishnan, K. 1999; MS, 1991, MPhil, 1993, PhD, 1996, Yale University; environmental anthropology, agrarian studies, technology studies, South Asia.

Taylor, Janelle S. \* 1999; PhD, 1999, University of Chicago; anthropology of medicine, science, and technology; reproduction; gender; consumption.

### Senior Lecturer

Green, James W. \* 1975; PhD, 1972, University of Washington; mental health, death studies, comparative aging, religion, West Indies, Pakistan.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### Sociocultural Anthropology

**ANTH 401 West African Societies (3) I&S** Social and cultural features of coastal and interior West African societies, including the Western Sudan. Detailed study of selected societies. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 402 Societies of Eastern and Southern Africa (5) I&S** Historical background and contemporary life of cultural groups in eastern and southern Africa with special study of selected cases of political and economic organization and cultural change. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 404 South America (5) I&S** Survey of anthropological research among the traditional peoples of South America. Historical background and contemporary life of cultural groups of the Amazonian Basin. Transformation of traditional life-styles through the process of European conquest and the aftermath of colonialism. Detailed study of selected societies. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 412 South Asian Social Structure (5) I&S** Caste class, and community in modern India. Transitions from colonial typology to analysis of social change, diversity, stability, and caste hierarchy in rural society. Current debates on class and community in Indian society, rural and urban, explored through themes of identity, structure, and mobility. Prerequisite: one 200-level ANTH course.

**ANTH 418 Indian Heritage of Mexico and Central America (5) I&S** Indian civilization of Mexico and Guatemala, their origins and ecological foundations. Contemporary communities of Mexico and Guatemala, focusing on creative adaptation of pre-Columbian traditions to modern national realities. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 420 Psychoanalysis and the Study of Culture (3) I&S** *Spain* Anthropological use of theories developed by Freud to understand culture. Reviews psychoanalytic theory as a foundation for examining the work of Roheim, LaBarre, Devereaux, Kardiner, and Spiro, among others. Topics covered include the universality of oedipality and the utility of psychoanalysis in non-Western cultures.

**ANTH 421 Belief, Ritual, and the Structure of Religion (5) I&S** Systematic survey of concepts, models, and theories that characterize the anthropological study of religion. Consideration of the human universal basis of religion and of diverse ways in which religions are constructed and related to social experience. Prerequisite: either ANTH 321 or RELIG 201; RELIG 202.

**ANTH 423 Traffic Across Cultural Boundaries (5) I&S** Focuses on the movement of cultural patterns and processes across boundaries, examining the "contact zones" in colonial encounters, moving to borrowing and blendings along ethnic and national borders. Examines border crossing of immigration and diasporas. Ethnographic examples from the Americas and Africa. Prerequisite: one 200-level ANTH course.

**ANTH 424 Hunter-Gatherer Societies (4) I&S** Comparative examination of human foraging societies, emphasizing ethnographic cases and socioecological analysis. Foraging and human evolution; rationality of foraging societies; population and reproductive strategies; variability in social organization and land use; power relations between the sexes; ritual and belief; contemporary status of hunter-gatherer populations. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 425 Anthropology of the Post-Soviet States (5) I&S** Analysis of Soviet and post-Soviet culture and identity. Historical transformations in Soviet approaches to ethnicity and nationality; contemporary processes of nationbuilding and interethnic conflict. Examination of culture through the intersection of social ritual, government policies, language, economic practices, and daily life. Regional focus will vary. Offered: jointly with SISRE 425.

**ANTH 427 Anthropology in Urban Settings (3) I&S** Cross-cultural examination of theoretical issues in anthropology as studied in urban places. Focuses on ethnic identity and the formation of urban ethnic groups; migration and its rural and urban consequences; family and kinship organization as an adaptation to urban complexity; the nature of urban voluntary associations; law and politics; and the developments in anthropological method. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 428 Anthropological Perspectives on Ethnicity (5) I&S** Anthropological approaches to ethnicity and ethnic group relations with reference to other models including race, caste, class, regional groupings, nations, religion, and stratification. Data drawn from precolonial, colonial, and postcolonial periods. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 429 Expressive Culture (5) VLPA** Anthropological view of one expressive aspect of culture: plastic and graphic arts, myth and folktale, music, dance, humor and tragedy, or play and games. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 430 The Anthropology of Music (3) VLPA/I&S** Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation, e.g., evolutionist, diffusionist, historical particularist, structuralist, functionalist, symbolist, and semiotic, through detailed examination of seminal texts. Offered: jointly with MUSIC 480; alternate years.

**ANTH 431 Oral Traditions (5) VLPA** Oral traditions and verbal expression, examined anthropologically and in relation to student interests. Critical examination of relevant theories and methods of analysis. Recommended: ANTH 100.

**ANTH 432 Sociolinguistics I (5) VLPA/I&S** Social variation in the phonology, morphology, syntax, lexicon of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, ethnography of speaking, pragmatics, and language attitudes. Prerequisite: LING 400; recommended: prior or concurrent registration in ANTH 451 or LING 451. Offered: jointly with LING 432.

**ANTH 433 Sociolinguistics II (3) VLPA/I&S** *Wassink* Examines field methods linguists use in socially oriented studies of language variation and change. Students learn to target and design interviews appropriate for eliciting specific kinds of linguistic data. Discussion of issues related to recording, ethics, and analysis of large bodies of data. Prerequisite: LING 432. Offered: jointly with LING 434.

**ANTH 434 Comparative Morals and Value Systems (3) I&S** Moral basis of human society and comparison of value systems based on anthropological studies. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 435 Economic Anthropology (5) I&S** Chief features of nonmonetary and simple monetary economics. Impact of central or metropolitan market economy and industrial technology as peripheral systems, especially of small-scale and limited monetary circulation. Development and application in anthropology of economic concepts, including Marxian. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 436 Comparative Family Organization (5) I&S** Function and structure of family developmental processes in band, tribal, peasant, and modern societies. Illustrates inter- and intrasocietal variation and provides data for construction of formal models of process and variation in family systems. Prerequisite: either one 200-level ANTH course, LING 203, or SOC 352.

**ANTH 437 Political Anthropology and Social Change (5) I&S** *Sivaramkrishnan* Study of politics from different anthropological perspectives, especially processual approaches to political change. Focused examination of cultural aspects of modern state formation in local and regional contexts. Themes: colonialism and nationalism, regime and transitions, local politics and global processes, social construction of bureaucracy. Prerequisite: one 200-level ANTH course.

**ANTH 438 The Analysis of Kinship Systems (5) I&S** Data, theories, and analytical technique used in the study of kinship systems, including our own, from around the world. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 440 Child Rearing, Culture, and Health (3) I&S** Cross-cultural study of the child-rearing practices, cultural norms, and health behavior of children and adolescents in different societies. Comparative approaches, diverse theoretical postures, and empirical research findings are used. Offered: jointly with NURS 495.

**ANTH 441 Psychological Anthropology (5) I&S** Assessment of mutual relevance of cultural and psychological variables in anthropology. Historical development of principal topics, e.g., cognition, national character, enculturation, personality and social change, cross-cultural psychiatry, sex and temperament, deviance, and psychoanalytic studies of culture. Prerequisite: either PSYCH 101 or PSYCH 205.

**ANTH 443 Anthropology of Modern Japan (5) I&S** Examines the problem of modernity in Japan since the late nineteenth century, with emphasis on contemporary Japan. Critically addresses previous an-

thropological work concerning patterns of Japanese "culture." Particular focus on the influence of modern forms of power, media, and exchange in the construction of present-day Japan. Offered: jointly with SISEA 447.

**ANTH 444 Politics of Representation in Modern China (5) I&S** Focuses on issues of representation and power in twentieth century China. Combines substantive information on modern Chinese society and culture with recent debates in social theory and the politics of representation. Major themes include Chinese nationalism, body politics, popular culture, and everyday practice. Offered: jointly with SISEA 444.

**ANTH 445 Literature and Society in Southeast Asia (5, max. 10) VLPA/I&S** Focus on either Vietnam or Thailand. Provides students with opportunity to explore how those living in Southeast Asia have reflected on the radical social changes their societies have undergone through novels, short stories, and poetry. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with SISSE 445.

**ANTH 446 Class and Culture in East Asia (5) I&S** Examines the nexus between culture and systems of social stratification/class in East Asia, with an emphasis on Taiwan, Korea, Japan, and China. Topics include class formation, mechanisms of social mobility and reproduction, markers of status and hierarchy, resistance, and the formation of class identity. Offered: jointly with SISEA 443.

**ANTH 447 Religion in China (5) I&S** Place of religion in Chinese society, examining the doctrines, practices, and social consequences of the eclectic folk religion, the elite Confucian, Taoist, and Buddhist traditions, syncretistic sects, and imported Christianity. Prerequisite: either one 200-level ANTH course, ANTH 370, ANTH 403, LING 203, HSTAS 211, HSTAS 454, RELIG 202, SISEA 370, or SISEA 443. Offered: jointly with SISEA 445.

**ANTH 448 Modern Korean Society (5) I&S** Social organization and values of twentieth-century Korea. Changes in family and kinship, gender relations, rural society, urban life, education, and industrial organization since 1900. Differences between North and South Korea since 1945. Recommended: HSTAS/SISEA 212. Offered: jointly with SISEA 448.

**ANTH 449 Social Transformation of Modern East Asia (5) I&S** Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Recommended: two history or anthropology of East Asia courses. Offered: jointly with SIS 449.

**ANTH 450 Language and Gender (5) I&S, VLPA Bilaniuk** Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis and other aspects of identity such as sexuality, class, and age. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with WOMEN 450 and LING 458.

**ANTH 451 Comparative Historical and Social Ecology of the Tropics (3) I&S Sivaramakrishnan** Historical and social aspects of tropical environmental change. Comparative analysis of resource management, conservation, and environmental regulation issues in Asia, Africa, and Latin America from cultural and political economic perspectives. Special focus on issues of state policy, expert knowledge, social conflict, and international politics. Offered: jointly with ENVIR 451. Prerequisite: ANTH 210.

**ANTH 454 Women, Words, Music, and Change (5) VLPA/I&S** Comparative analysis of use of myths, tales, music, and other forms of expressive culture

to account for, reinforce, and change women's status and roles. Recommended: WOMEN 353. Offered: jointly with WOMEN 454.

**ANTH 455 Areal Linguistics (3, max. 6) VLPA/I&S** Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Borrowing vocabulary specialization, lexical change, and language death and revival. Offered: jointly with LING 455.

**ANTH 456 Contemporary Ethnography (5) I&S** Techniques and theories of ethnographic description for the anthropological analysis of contemporary life. Materials drawn from the contemporary United States, with a focus on issues and events in the Seattle area. Includes fieldwork projects. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 457 Ecological Anthropology (5) I&S** Survey of anthropological research on interaction between human societies and their environments. Logic of different subsistence systems; intensification and transformation of subsistence strategies; population regulation; ecological aspects of human nutrition, disease, spatial organization, ethnicity, social stratification, conflict, and cooperation; historical roots of current ecological crisis.

**ANTH 458 Ethnobiology: Plants, Animals, and People (5) I&S Hunn** Culturally mediated relationships between human and natural environment studied in a comparative and evolutionary framework. How do peoples in diverse cultures recognize and name plants and animals and understand their relationship with nature? How is this traditional ecological knowledge applied in people's daily lives? Prerequisite: either BIO A 201, ARCHY 205, or one 200-level ANTH course.

**ANTH 459 Culture, Ecology, and Politics (5) I&S Pena** Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecosocialism, environmental justice, and social ecology. Offered: jointly with ENVIR 459.

**ANTH 460 History of Anthropology (5) I&S** Sources and development of leading concepts, issues, and approaches in anthropology. Findings of anthropology in relation to scientific and humanistic implications and to practical application. Main contributors to field; their work and influence. Past, present, and future perspectives, including anthropology of modern life.

**ANTH 464 Language Politics and Cultural Identity (3) VLPA/I&S Bilaniuk** Theories and case studies of the power of language an how it is manipulated. Multilingualism, diglossia. Role of language and linguistics in nationalism. Standardization, educational policy, language and ethnicity. World languages, language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with LING 433.

**ANTH 465 Critical Anthropology of Mass Culture (5) I&S** Critical overview of theories of mass culture and their relationship to current anthropological practice. Analyses of the historical interconnections among capitalism and commodity fetishism, modernity and representation, and media and consumption.

**ANTH 466- Anthropology Honors Thesis ([1-9]-, max. 18) I&S** Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

**ANTH 467 Anthropology of Education (5) I&S** Uses a wide range of social theory and philosophy to investigate mechanisms which reproduce inequality and asymmetry in American education.

**ANTH 469 Special Studies in Anthropology (3-5, max. 15) I&S** Delineation and analysis of a specific problem or related problems in anthropology. Offered occasionally by visitors or resident faculty. Prerequisite: one 200-level ANTH course or LING 203.

**ANTH 470 Minority Peoples of China (5) I&S** Interaction between China and the peoples of its periphery, including inner Asia, Tibet, northern mainland Southeast Asia, and aboriginal peoples of Taiwan. Emphasis on ethnicity, ethnic group consciousness, and role of the Chinese state. Prerequisite: either one 200-level ANTH course, LING 203, ANTH/SISEA 370, or HSTAS 454. Offered: jointly with SISEA 470.

**ANTH 471 Colonialism and Culture (5) I&S** Explores the cultural, political, and historical implications of the power to colonize. Readings include ethnographic, historical, and literary works on colonialism, nationalist responses, and postcolonial positions.

**ANTH 475 Perspectives in Medical Anthropology (5) I&S** Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with HSERV 475.

**ANTH 476 Culture, Medicine, and the Body (5) I&S** Explores the relationship between the body and society, with emphasis on the role of medicine as a mediator between them. Case study material, primarily from contemporary bio-medicine, as well as critical, postmodern, and feminist approaches to the body introduced within a general comparative and anthropological framework.

**ANTH 477 Medicine in America: Conflicts and Contradictions (3) I&S** Introduction to the pragmatic and theoretical dilemmas of current biomedical practice with emphasis on social and cultural context. Case studies in technological intervention, risk management, and other health-related issues used to explore connections among patients' experiences, medical practices, and the contemporary social context.

**ANTH 480 Introduction to Museology (3) I&S** Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics. Offered: jointly with MUSEUM 480.

**ANTH 481 Museum Collection Management: Ethnology (3) I&S** Lecture and work experience in museum collection management in the ethnology collections of the Burke Memorial Washington State Museum, including identification, cataloging, fumigation, storage, cleaning, inventory, and specimen preparation for exhibition of archival and nonarchival museum specimens from North America, the Pacific, and Pacific Rim areas. Offered: jointly with MUSEUM 481.

**ANTH 482 Museum Conservation (3) I&S** Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel. Offered: jointly with MUSEUM 482.

**ANTH 484 Motherhood: Ideologies and Technologies (5) I&S Twine** Examines how motherhood is culturally constituted, regulated, and managed within various ideological and technological milieus. Uses ethnographies from anthropology and case studies from feminist legal theory. Topics include slave mothers, surrogate mothers, lesbian mothers, transracial mothers, co-mothers, teen mothers. Prerequisite: WOMEN 200. Offered: jointly with WOMEN 458.

**ANTH 485 Cultural Property: Legal and Ethical Issues (3) I&S** Examines the complex history of legal and ethical issues affecting the acquisition, ownership, and disposition of cultural property, with special attention to modern indigenous peoples' requests for repatriation of collections from museums, as well as concerns with intellectual property rights, national patrimony policies, and related trade issues.

**ANTH 486 Human Family Systems: Biological and Social Aspects (5) I&S** Biological bases for human mating and reproduction and an examination of the range of cross-cultural variability in human systems of kinship and marriage; comparisons among a wide range of human and nonhuman species and between Western and non-Western human societies; interplay of biological, ecological, and sociocultural factors in determining the structure and function of human family systems. Offered: jointly with SOC 486.

**ANTH 488 Agroecology (5) I&S** *Pena* Cross-cultural survey of agroecological research methods, theoretical problems, policy issues, and ethical debates. Local knowledge and ethnoscientific bases of alternative agriculture. Comparative political ecology of agroecosystems with a focus on indicators of social equity and ecological sustainability.

**ANTH 489 Anthropology Practicum (3-9, max. 15)** Faculty-supervised off-campus internships in organizations utilizing anthropological skills in nonacademic settings. Establishing educationally valuable individual projects for internships with faculty sponsor. Organizations include museums, social service and other governmental agencies, and private nonprofit service agencies.

**ANTH 491 Honors Colloquium (2, max. 12) I&S** Introduction to anthropological research. Students read original articles and papers and discuss them with authors. Research presenters include department faculty, visiting faculty, and advanced graduate students. Credit/no credit only.

**ANTH 495 Advanced Problems in Ethnology (3-5, max. 10) I&S** Current problems in ethnology. Seminar format.

**ANTH 499 Undergraduate Research (\* max. 12)**

### Courses for Graduates Only

**ANTH 500 Preceptorial Reading (6)** For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the analysis and comparison of social and cultural systems. Not open to graduate students in the sociocultural anthropology program.

**ANTH 503 Preceptorial Reading in Linguistic Anthropology (6)** For beginning graduate students who have not had prior training in the problems, principles, and methods involved in linguistic anthropology. See also course description for 203. Not open to graduate students in the linguistics program.

**ANTH 507- Current Issues in Sociocultural Anthropology (2-)** Biweekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Credit/no credit only. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

**ANTH -508 Current Issues in Sociocultural Anthropology (-2)** Biweekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Credit/no credit only. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

**ANTH 509 Sociocultural Anthropology Problem Paper (4)** All first year graduate students in sociocultural anthropology select a topic for independent research, conduct that research, and prepare a paper of about 25-50 pages on the topic chosen. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

**ANTH 510 Seminar on North American Indians (3)** Advanced comparative treatment of selected aspects of the Indian cultures and societies of North America.

**ANTH 514 Regional Seminar (3-5, max. 15)** Comparative treatment of selected aspects of cultures and societies of a particular region or area.

**ANTH 517 Seminar on South Asia (3)** Advanced analysis of selected problems in South Asian ethnology and social structure. Prerequisite: ANTH 412.

**ANTH 521 Seminar on the Anthropological Study of Religion (3, max. 9)** Advanced seminar in the anthropological study of religion designed for students who have a background in the theory and applications of theory developed in the anthropological study of religion. Seminar topics vary each quarter. Prerequisite: ANTH 422 and graduate standing; permission of instructor for graduate students in Comparative Religion.

**ANTH 525 Seminar in Culture Processes (3, max. 6)** The concept of process and its application to the study of culture.

**ANTH 527 Ethnicities, Nations, and Cultural Identities (3)** Exploration of how cultural differences have been represented in ethnic and national narratives and how these narratives have shaped identities and social relations.

**ANTH 530 Dialectology (3)** Principles of dialect deviation as related to linguistic structure and usage. Prerequisite: ANTH 452 or permission of instructor. Offered: jointly with LING 530.

**ANTH 535 Research Issues in Demography and Population Studies (1-2, max. 7)** Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Offered: AWSp.

**ANTH 536 Seminar in Visual Anthropology (3)** Significance of anthropological cinema and photography placed in historical perspective. Screening of films to determine the role of the anthropologist as filmmaker, as well as the role of the filmmaker as anthropologist.

**ANTH 537 Political Anthropology and Law (3, max. 6)** Seminar on special topics in politics and law and their interrelationships. Prerequisite: ANTH 437, ANTH 439, or permission of instructor.

**ANTH 538 Politics of Representation (3)** Representations of power and the powers of representation. Critical approaches to representation in colonial and postcolonial worlds. Divine kings, exemplary centers, the New World Order, voting subjects, and the possibilities of transgression.

**ANTH 541 Cultural Aspects of International Development (3)** *Sivaramakrishnan* Emergence of development as an aspect of late colonialism and the decolonization process. Ways in which development came to visualize social change in sectoral terms like rural land use, cities, and education, while objectifying people in target groups. Relationships between development and modernity, and development and globalization.

**ANTH 542 Seminar in Cognitive Anthropology (3)** Examines the intellectual history of cognitive anthropology; assesses its major findings in kinship, folk biology, color classification, and decision and planning theory. Replicates key studies, using cognitive anthropological methods. Evaluates influences from linguistics, psychology, and artificial intelligence research. Practical applications and future prospects.

**ANTH 550 Field Techniques in Ethnography (5)** Techniques of collecting, ordering, and utilizing ethnographic data in the field. Problems of rapport, elicitation, observation, interpretation, and ethics. Credit/no credit only.

**ANTH 551 Research Design (3)** Principles of research design, including problem delineation and selection of appropriate methods, as applied to current issues in sociocultural anthropology. Prerequisite: permission of instructor.

**ANTH 552 Practicum in Ethnographic Research (3)** Techniques of data recording, analysis, and writing for the field ethnographer. Not recommended for non-anthropology graduate students. Prerequisite: ANTH 550 and ANTH 551.

**ANTH 553 Analysis of Linguistic Structures (3, max. 6)** Syntactic, semantic, or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with LING 553.

**ANTH 555 Discourses in Feminist Anthropology Seminar (5)** *Jacobs* Exploration of feminist anthropological theories and the works of their critics. Ways of using feminist anthropology in preparation for and conducting fieldwork. Topics include foundations in feminist anthropology, grand theories, variation in feminist theoretical foci within the "four fields," responses to critics. Prerequisite: graduate standing. Offered: jointly with WOMEN 553.

**ANTH 556 The Evolution of the Family (3)** Biological evolution of species-specific behaviors and forms of sociality linked to human mating, reproduction, and parenting. Cultural evolution of human systems of kinship and marriage as fitness-maximizing adaptations to a wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Offered: jointly with SOC 556.

**ANTH 559 Seminar in Language and Culture (3, max. 9)** Theoretical and methodological problems in language and culture.

**ANTH 561 Seminar in Methods and Theories (3, max. 9)**

**ANTH 562 Clinically Applied Anthropology (3)** Anthropology as it relates to interdisciplinary delivery of health care. Cultural variation in illness beliefs and behavior, types of healing practice, illness prevention, and social support networks. Prerequisite: graduate standing and permission of instructor. Offered: jointly with NURS 562.

**ANTH 565 Theory of Sociocultural Anthropology (5)** Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: graduate standing in anthropology or permission of instructor.

**ANTH 566 Theory of Sociocultural Anthropology (5)** Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: ANTH 565.

**ANTH 567 Theory of Sociocultural Anthropology**

**(5)** Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: ANTH 566.

**ANTH 570 Environmental Anthropology (5)** Current issues in the study of human environment interaction from a cross-cultural perspective: ecological adaptation and maladaptation; ethnoecology and indigenous knowledge; anthropogenic environmental change; political ecology of "development;" interrelations of cultural and biological diversity; conflicts over indigenous land use and property rights, environmental justice, resource conservation, and sustainability.

**ANTH 571 Communicational Anthropology (3-9, max. 9)** Introduction to communicational aspects of culture. Prerequisite: permission of instructor.

**ANTH 574 Socio-Cultural Perspectives of Public Health Genetics (2)** Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with NURS 582/PHG 521.

**ANTH 575 Cultural Construction of Illness: Seminar in Medical Anthropology (5)** Historical and comparative examination of depression, neurasthenia, somatization, hypochondriasis, and hysteria. Anthropology of psychosomatics and psychiatry, including cultural analysis of selected biomedical, indigenous folk medical, and popular common-sense conceptualizations of illness.

**ANTH 584 Ways of Speaking (5)** Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with SP CMU 584.

**ANTH 590 Seminar in Museum Theory (3)** Fundamental theoretical issues involved in current museum administrative and operations work, including administrative structure, organizational conflicts, museum-community relations, and museum educational programming. Prerequisite: permission of instructor. Offered: jointly with MUSEUM 590.

**ANTH 591 Seminar in Museum Operations (3)** Designing hypothetical museums and creating a first year of operations. Design elements include architectural plan, staffing plan, initial and recurring budgets, security system, records system, educational plan, and policy making. Recommended: 590. Offered: jointly with MUSEUM 591.

**ANTH 592 Seminar in Museum Specimen Documentation (3)** Seminar discussion of museum specimen documentation research approaches, including technological and raw material analyses, contextual studies, and esthetic studies. Documentation of a collection and reference work. Recommended: 590 and 591. Offered: jointly with MUSEUM 592.

**ANTH 599 Effective Teaching of Anthropology (1)** Class required of all graduate students who accept teaching assistantships: instruction in teaching methods and issues, e.g., professional ethics, preparing and delivering lectures, leading discussion groups, test writing and grading, diversity in the classroom. Credit/no credit only.

**ANTH 600 Independent Study or Research (\*)**

**ANTH 700 Master's Thesis (\*)** Credit/no credit only.

**ANTH 800 Doctoral Dissertation (\*)** Credit/no credit only.

**Archaeology****ARCHY 401 Archaeology of Human Origins (5) I&S**

*Close* Early part of the prehistoric archaeological record in Africa and Eurasia, from >2,000,000 years ago until the spread of modern human beings; development of stone and bone technologies; ways of making a living; cultural adaptations; intellectual and social development. Prerequisite: ARCHY 205. Offered: Sp.

**ARCHY 465 Issues in Cultural Resource Management (3) I&S** Examines practical application of archaeology to cultural resource management. Topics include role in environmental permitting, inventory and significance evaluation of resources, project impacts and design of mitigation measures, consultation with government agencies and Indian tribal organizations, and practical aspects of cultural resource management business operation.

**ARCHY 466- Archaeology Honors Thesis ([1-9]-, max. 18) I&S** Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

**ARCHY 469 Special Studies in Archaeology (3-6, max. 18) I&S** Consideration in detail of specific archaeological topics, either methodological or substantive in content, of current interest. Offered occasionally by resident, new, or visiting faculty. For advanced undergraduates and graduate students. Prerequisite: ARCHY 205.

**ARCHY 476 New World States and Empires (5) I&S** Considers theoretical and methodological scholarship on complex societies in Meso-America and the Andes. Highlights current research on population dynamics, subsistence strategies, economic foundations, and political processes in the development of states and empires. Considers archaeological evidence and texts of native and European documents. Prerequisite: ARCHY 205; ARCHY 304.

**ARCHY 477 Archaeology of the North (5) I&S** *Fitzhugh* Archaeological history of the circumpolar arctic and subarctic from Neanderthals to the 19th century. Variability in human adaptation and social evolution in some of the world's most extreme environments such as Eurasian tundra, North Pacific rim, Beringia, and North American high arctic. Prerequisite: ARCHY 205. Offered: Sp.

**ARCHY 478 Prehistory of the Arid West (5) I&S** Archaeology of arid western North America, with particular emphasis on the earliest peoples of this region (and on the peopling of the New World in general), and on the prehistoric hunter-gathers of the Great Basin and Southwest. Prerequisite: ARCHY 304.

**ARCHY 479 Prehistoric Cultures of North America: Eastern North America (5) I&S** Ecological and evolutionary account of prehistoric cultural developments in North America east of the Rocky Mountains. Cultural and environmental change from appearance of people in New World to collapse of indigenous cultural systems. Prerequisite: ARCHY 304.

**ARCHY 480 Advanced Archaeological Analysis: Ceramics (6) I&S** Human technology in traditional societies. Ceramic tools as evidence for technological innovation, continuity, and change; and as evidence for ancient economic systems involving production, consumption, and distribution. Examines variety of approaches to the study of material culture—especially ceramics—including archaeological, ethnographic, experimental, and technical. Prerequisite: ARCHY 371.

**ARCHY 481 Advanced Archaeological Analysis: Faunal Remains (6) I&S** Seminar on techniques and methods employed in analysis of faunal remains from

a wide range of Pleistocene and Holocene settings, including archaeological sites, coupled with a laboratory focusing on identification of faunal remains from these settings. Prerequisite: ARCHY 371.

**ARCHY 482 Advanced Archaeological Analysis: Geoarchaeology (6) I&S** Identification, analysis, and interpretation of sediments and soils associated with archaeological remains. Laboratories deal with sediment description and chemical analysis; field trips and student projects focus on archaeological applications of these subjects. Prerequisite: ARCHY 371.

**ARCHY 483 Analyses of Stone Artifacts (6) I&S** *Close* Current approaches to lithic analysis, including types of information obtainable (technological, functional, social, ideological) and constraints affecting the formation and analysis of lithic assemblages. Lectures interspersed with application of methods under discussion to individual artifacts and to assemblages. Prerequisite: ARCHY 371.

**ARCHY 490 Museum Curation Practicum (1-5, max. 15)** Application of museological training in curation of ethnographic, archeological, geological, or zoological collection materials in the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects: Offered: jointly with MUSEUM 490.

**ARCHY 495 Quantitative Archaeological Analytic Techniques (5) I&S** Introduction to quantitative approaches to archaeological problems; data screening, numeric methods of classification and identification, graphical and computer-based seriation techniques, and the analysis of spatial patterning in artifact distributions.

**ARCHY 497 Archaeological Method and Theory I: Formal Theory (5) I&S** Examination of theoretical constructs in the analysis of archaeological data. Terminology, typologies, and interregional comparisons. Prerequisite: ARCHY 205.

**ARCHY 498 Archaeological Method and Theory II: Explanatory Theory (5) I&S** Conceptual frameworks employed by archaeologists in obtaining explanation in the three major areas of culture history, cultural reconstruction, and explanatory prehistory, considering the nature of explanation as conceived in these areas, the basic assumptions employed in achieving these aims, and an introduction to the methods employed. Prerequisite: ARCHY 205; ARCHY 497.

**ARCHY 499 Undergraduate Research (\* max. 12)**

**Courses for Graduates Only**

**ARCHY 501 Preceptorial Reading (6)** For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the reconstruction of prehistory. Not open to graduate students in the archaeology program.

**ARCHY 520 Principles of Archaeological Theory (5)** Review of principles of archaeological theory. Student presentation of research on archaeological theory and seminar discussion or presentations. Open only to first-year graduate students in anthropology.

**ARCHY 530 Prehistory of the Northwest Coast (5)** Origins, development, and variation of Pacific Northwest cultures, focusing particularly on Washington. Adaptations to maritime and interior environments. Artifacts from a variety of archaeological sites. Technological, functional, and historical significance of Northwest artifacts.

**ARCHY 560 Seminar in Archaeological Methods (5, max. 20)** Basis, limitations, and applications of a particular archaeological analytical method, or closely related set of methods. Prerequisite: permission of instructor.

**ARCHY 570 Seminar in Archaeological Theory (3-6, max. 18)** Detailed consideration of a particular archaeological theory or closely related set of theories, including their methodological and epistemological bases. Prerequisite: ARCHY 497, ARCHY 498.

**ARCHY 571 Field Course in Archaeology (5)** Introduction to field acquisition of archaeological data through survey and excavation. Ongoing field projects; instructional emphasis on recovery and recording techniques and on management of field projects. Prerequisite: permission of department.

**ARCHY 575 Archaeological Field Research Design (6)** Nature of the archaeological record, and methods and techniques of field research, to illustrate range of data sources and modern techniques of general applicability. Practical experience in mapping, map interpretation, sampling design, remote sensing, photogrammetry, and research proposal writing. Prerequisite: permission of instructor.

**ARCHY 576 Designing Grant Proposals (5)** Design and writing of grant proposals for archaeological research at both dissertation and senior investigator levels, with particular emphasis on National Science Foundation structure and requirements. Prerequisite: upper-level graduate standing and permission of instructor.

**ARCHY 591 Advanced Field Course in Archaeology (6-9)** For students with previous field experience and graduate work in archaeology. Emphasis on decision making in field and project management. Prerequisite: ARCHY 497, V498, ARCHY 571, and ARCHY 575 or permission of instructor.

**ARCHY 600 Independent Study or Research (\*)** Prerequisite: permission of instructor.

**ARCHY 601 Internship (3-10, max. 10)** Credit/no credit only.

## Biocultural Anthropology

**BIO A 465 Nutritional Anthropology (3) I&S/NW** Concerns interrelationships between biomedical, sociocultural, and ecological factors, and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with NUTR 465.

**BIO A 466- Biocultural Anthropology Honors Thesis ([1-9]-, max. 18) NW** Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

**BIO A 469 Special Topics in Biocultural Anthropology (3-5, max. 15) NW** Delineation and analysis of a specific problem or a more general area in biocultural anthropology. Offered occasionally by visiting or resident faculty.

**BIO A 473 Biological Adaptability of Human Populations (5) NW** *Shell-Duncan* Mechanisms enabling humans to maintain homeostasis in extreme environments: high altitude, heat, cold, nutritional deficiency, radiation. Adaptive process operating at levels of physiology, metabolism, and population, including the strategies of fertility and birth spacing. Prerequisite: BIO A 201.

**BIO A 476 Sociocultural Ecology and Health (3) NW** *Leonetti* Sociocultural ecology of health/disease, focusing on humans as bioculturally integrated beings and on populations as biocultural units of adaptation. Examples of research on disease, both infectious and chronic, and patterns of morbidity and mortality, infant, maternal, old age, with particular attention to situations of sociocultural changes. Prerequisite: BIO A 201.

**BIO A 477 Evolutionary Perspectives on Sex and Gender Roles (3) I&S/NW** Critical examination of theories explaining the evolution of gamete specialization and sexual reproduction. Consideration of the extent to which gametic asymmetries lead to gender-based differences in mating patterns, conceptions of attractiveness, parental investment, subsistence patterns, aggressiveness, and coercion. Interactions of biology and culture. Prerequisite: BIO A 201.

**BIO A 482 Human Population Genetics (5) NW, QSR** *Holman* Micro-evolutionary changes in human populations. Effects of mutation, selection, inbreeding, gene flow, and genetic drift as causes of evolutionary change. Mathematics beyond high school not required. Prerequisite: BIO A 201.

**BIO A 483 Human Genetics, Disease, and Culture (5) NW** Considers relationships among genetic aspects of human disease, cultural behavior, and natural habitat for a wide variety of conditions. Also considers issues of biological versus environmental determinism, adaptive aspects of genetic disease, and the role of cultural selection. Prerequisite: BIO A 201.

**BIO A 484 Human Life Cycle (5) NW** *Newell* Human growth and physical/social development: fetal life to old age. Cultural, ecological, and evolutionary aspects of the life cycle. Population differences in age and sex related to morbidity and mortality. Prerequisite: BIO A 201.

**BIO A 485 Research in Growth and Development (2, max. 8) NW** Focus on topics relating to primate growth and development. Prerequisite: either BIO A 484, BIO A 495, or BIO A 496, any of which may be taken concurrently.

**BIO A 486 Primate Socioecology (3) NW** Focus on the variety of social systems exhibited by nonhuman primates and adaptive significance of these societies; social systems in terms of the present ecology and evolutionary past of the species; the function of communicatory gestures and vocalizations, tradition, kinship, and social roles in maintaining and structuring groups over generations; the relationship among mating systems, foraging strategies, ranging patterns, and ecological separation/resource partitioning and their contribution to species-typical social organization. Prerequisite: either BIO A 370 or PSYCH 418.

**BIO A 487 Human and Comparative Osteology (3) NW** Introduction to the vertebrate skeleton. The skeleton is described in detail and various methods of determining age and sex, as well as osteometry and modern statistical methods for handling such data, are presented.

**BIO A 488 Primate Evolution (5) NW** *Eck* Major trends in nonhominid primate evolution through the Cenozoic. Discussion of the specimens, geological context, and age of the fossil taxa and their relationship to modern taxa. Practical experience in analyzing fossil material. Prerequisite: BIO A 201.

**BIO A 491 Issues in Human Paleontology (5) NW** *Eck* Addresses five major unanswered questions concerning human evolution as represented by the fossil record. Prerequisite: BIO A 389.

**BIO A 495 Growth and Development: Infancy (5) NW** *Newell* Genetic and environmental influences on growth and development from prenatal life through infancy. Includes exploration of methods for assessing development and comparisons of development in non-human primates with human development. Prerequisite: BIO A 370.

**BIO A 496 Growth and Development: Adolescence and Reproductive Maturity (5) NW** *Newell* Genetic and environmental influences on growth and development during adolescence. Emphasis on the interaction of biological and social factors in attainment

of reproductive maturity. Compares conditions of non-human primates with human conditions. Prerequisite: BIO A 370.

**BIO A 499 Undergraduate Research (\* max. 12)**

## Courses for Graduates Only

**BIO A 502 Preceptorial Reading (6)** For beginning graduate students who have not had adequate training in the study of primate principles and methods involved in the study of evolution, human genetics, and the evolution of modern populations. Not open to graduate students in the biocultural anthropology program. Offered: AWS.

**BIO A 520 Human Behavioral Ecology (3-5) Smith** Principles and methods of evolutionary behavioral ecology, and critical examination of their application to human behavior in such areas as resource utilization, mating, parenting, life history, cooperation, and competition.

**BIO A 525 Biocultural Research Methods and Study Design (5) Shell-Duncan** Survey of basic conceptual issues in the design of empirical research, with special attention to problems that arise during anthropological fieldwork. Topics include defining data needs, sampling strategies, problems with co-funding, proposal writing, human subjects approval, and basic ethical issues in human biocultural research.

**BIO A 526 Quantitative Methods and Modeling for Biocultural Anthropology (5)** Surveys the concepts, tools, and methods for developing quantitative models based on underlying biocultural processes. Introduces methods of testing models from observations collected in anthropological field studies. Oriented toward longitudinal research of fertility, mortality, disease dynamics, population genetics, and other biocultural processes.

**BIO A 550 Skeletal Biology and Prehistoric Demography (5) O'Connor** Composition and structure of calcified tissue. Analytical techniques and their contribution to interpretation of the archaeological record.

**BIO A 568 Human Reproductive Ecology (3)** A consideration of the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, nuptiality, duration of birth intervals, and reproductive senescence.

**BIO A 569 Demographic Analysis in Biological and Social Anthropology (5) Leonetti** Demographic analysis relevant to anthropological research on small populations. Use of data collected through local surveys, genealogical methods, and from other sources. Focuses on use of demography to analyze social and biological processes with adaptive and/or cultural-historical significance. Theoretical approaches emphasized.

**BIO A 584 Topics in Ecology and Adaptation (3, max. 9)** Seminar dealing with various aspects of ecology and adaptation. Topics vary each quarter.

**BIO A 588 Topics in Primate Evolution (3)** Emphasis on fossil taxa and their importance in understanding the morphologies and distributions of members of modern taxa. Prerequisite: BIO A 488 and permission of instructor.

**BIO A 590 Current Issues in Human and Non-Human Primate Evolution (2, max. 18)** Biweekly presentation by participants and guest lecturers of current literature and ongoing research in topics pertaining to human and nonhuman primate evolution, biology, anatomy, genetics variation, and behavior. Credit/no credit only.

**BIO A 600 Independent Study or Research (\*)**

## Applied Mathematics

408 Guggenheim

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/applied\\_math.html](http://www.washington.edu/students/genocat/academic/applied_math.html)

Department Web page:  
[www.amath.washington.edu/](http://www.amath.washington.edu/)

The Department of Applied Mathematics is concerned with mathematical modeling and analysis of problems from the physical, biological, and social sciences, and from engineering. The department offers undergraduate and graduate courses for all interested students at the University, as well as degree programs for graduate students in applied mathematics.

### Graduate Program

Graduate Program Coordinator  
 408L Guggenheim, Box 352420  
 (206) 543-5077

The Department of Applied Mathematics offers graduate programs of study leading to the degrees of Master of Science and Doctor of Philosophy. These programs involve (1) broad training in those mathematical methods and techniques that have been found useful in applications, (2) in-depth study in at least one field of application, and (3) opportunities to explore various specialized aspects of applied mathematics.

### Master of Science, Doctor of Philosophy

*Admission Requirements:* Prospective students for the Master of Science program should hold an undergraduate degree either in mathematics with a strong background in applications or in physical, engineering, biological, or social science with a strong background in applications-oriented mathematics. Students who wish to apply to the doctoral program need to show evidence of completion of course work equivalent to that described for the master's degree, with at least a 3.40 GPA, and indication of the ability or potential to perform independent research. It is required that the Graduate Record Examination be taken and the results sent to Graduate Admissions. Three letters of recommendation are required in support of each application and should be sent directly to the department. After receiving notification of admission to the Graduate School and a registration appointment, the student should contact the department. (On the Application for Graduate School Admission form, the student should be sure to indicate the desire to enter the Department of Applied Mathematics, rather than Mathematics.)

### Master of Science

The M.S. degree program is designed to provide the student with a working knowledge of several basic areas of applied mathematics, together with exposure to at least one specific area of application. The applied mathematics areas include complex variables, ordinary and partial differential equations, applied linear algebra, numerical analysis, calculus of variations or optimization, and applied probability and statistics. The specific area of application is chosen by the student from a broad range of outside fields, including engineering, the physical, biological, and certain areas of medical science. After fulfilling the basic course requirements, the student can obtain the M.S. degree by additional course work to complete the required minimum of 36 credits for the degree. Students may elect to do an M.S. thesis in lieu of a maximum of 6 course credits. Detailed requirements for the M.S. degree are listed in the Applied Mathematics graduate program guidelines.

### Doctor of Philosophy

The Doctor of Philosophy degree in applied mathematics is primarily a research degree, not conferred as a result of course work alone. The granting of the degree is based on general proficiency and attainment in applied mathematics, together with a demonstrated ability to carry out an independent investigation which is described in a doctoral dissertation. Proficiency and attainment in applied mathematics is demonstrated by passing the General Examination which tests the student's ability to probe a new area of research and to exercise critical judgment on a technical issue of current importance in the chosen field of research. The doctoral dissertation must exhibit original mathematical contributions in a significant area of application. The Final Examination and defense of the dissertation is a research seminar presentation open to the public. The detailed requirements for the doctoral degree are listed in the Applied Mathematics graduate program guidelines.

### Financial Aid

Both research and teaching assistantships are available to full-time students who qualify. In addition, fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.

### Research Facilities

Students in applied mathematics have access to a departmental computing lab equipped with a DEC Alpha server, Alpha/AXP workstations, and X-terminals, with centralized file storage. Software for scientific visualization, numerical analysis, symbolic mathematics, programming, and document preparation is available. The lab is connected to the campus network and the Internet, providing access to supercomputing facilities and other resources.

## Faculty

### Chair

Ka Kit Tung

### Professors

Baker, Marcia \* 1980, (Adjunct); MS, 1960, Stanford University; PhD, 1971, University of Washington; cloud physics, atmospheric geophysics.

Bretherton, Christopher S. \* 1984; PhD, 1984, Massachusetts Institute of Technology; convective cloud systems, boundary layer meteorology, numerical modeling, tropical meteorology.

Bube, Kenneth P. \* 1986, (Adjunct); PhD, 1978, Stanford University; numerical analysis, partial differential equations.

Burke, James V. \* 1985, (Adjunct); PhD, 1983, University of Illinois; optimization, nonsmooth analysis.

Criminale, William O. \* 1968; PhD, 1960, Johns Hopkins University; fluid dynamics, mathematical physics, nonlinear mechanics, stability theory.

Durrant, Dale R. \* 1987, (Adjunct); MS, 1975, University of California (Berkeley); PhD, 1981, Massachusetts Institute of Technology; atmospheric dynamics, mesoscale meteorology, numerical simulation, mountain meteorology.

Greenbaum, Anne \* 1997, (Adjunct); PhD, 1981, University of California (Berkeley); numerical analysis.

Kevorkian, Jirair \* 1964; PhD, 1961, California Institute of Technology; partial differential equations, perturbation theory.

Kosaly, George \* 1980, (Adjunct); PhD, 1974, Eotvos Lorand University (Hungary); DSc, 1979, Hungarian Academy of Sciences; applications of stochastic processes in engineering, reacting turbulent flows.

Leveque, Randall J. \* 1985; PhD, 1982, Stanford University; numerical analysis, hyperbolic conservation laws, computational fluid dynamics.

Miura, Robert M. 1988, (Affiliate); PhD, 1966, Princeton University.

Murray, James D. \* 1988; PhD, 1956, DSc, 1968, Oxford University (UK); mathematical biology, biological pattern formation, wound healing, spread of epidemics.

Nazareth, John L. 1991, (Affiliate); PhD, 1973, University of California (Berkeley); numerical optimization.

O'Malley, Robert E. Jr. \* 1990; PhD, 1966, Stanford University; singular perturbations and asymptotic methods.

Pearson, Carl E. \* 1967, (Emeritus); PhD, 1949, Brown University; wave propagation, fluid dynamics, numerical analysis, optimization.

Riley, James J. \* 1983, (Adjunct); PhD, 1971, Johns Hopkins University; fluid mechanics, especially turbulent flows.

Rockafellar, R. T. \* 1966; PhD, 1963, Harvard University; variational analysis and optimization.

Sarachik, Edward S. \* 1984, (Adjunct); PhD, 1966, Brandeis University; atmospheric dynamics, large scale atmosphere/ocean interactions, equatorial dynamics, climate change.

Sylvester, John \* 1987, (Adjunct); PhD, 1980, New York University; partial differential equations.

Tung, Ka Kit \* 1988; PhD, 1977, Harvard University; atmospheric and geophysical fluid dynamics.

Vagners, Juris \* 1967, (Adjunct); PhD, 1967, Stanford University; dynamics, controls and optimization.

Wan, Frederic Y. \* 1983, (Affiliate); PhD, 1965, Massachusetts Institute of Technology; solid mechanics and mathematical modeling.

Watkins, David S. 1989, (Affiliate); PhD, 1974, University of Calgary (Canada); linear algebra, numerical computation.

Yeh, Harry H. \* 1983, (Adjunct); PhD, 1983, University of California (Berkeley); fluid mechanics, water wave motions, coastal and hydraulic engineering.

### Associate Professors

Adams, Loyce M. \* 1985; PhD, 1983, University of Virginia; numerical algorithms for parallel computers.

Kot, Mark \* 1989, (Affiliate); PhD, 1987, University of Arizona; mathematical ecology, nonlinear dynamics, and population biology.

Schmid, Peter J. \* 1993; PhD, 1993, Massachusetts Institute of Technology; computational fluid dynamics, hydrodynamic stability theory, transition to turbulence.

Storti, Duane W. \* 1983, (Adjunct); PhD, 1983, Cornell University; nonlinear dynamics and vibrations, dynamical systems, perturbations and bifurcations.

### Assistant Professors

Kutz, Jose Nathan 1997; PhD, 1994, Northwestern University; linear/nonlinear wave propagation, nonlinear analysis, dynamical systems.

Lewis, Mark A. 1991, (Affiliate); PhD, 1990, Oxford University (UK).

Pearson, Erik W. 1986, (Affiliate); PhD, 1983, Harvard University.

Qian, Hong 1997; PhD, 1989, Washington University; physical biochemistry of biological macromolecule, mathematical and computational biology.

Winters, Kraig B. \* 1984, (Affiliate); PhD, 1989, University of Washington.

## Course Descriptions

See page 48 for an explanation of course numbers, symbols, and abbreviations.

For graduate-level course descriptions, see the graduate and professional study volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsctat/](http://www.washington.edu/students/crsctat/).

**AMATH 401 Introduction to Methods in Applied Mathematics I (4) NW** Emphasis on acquisition of solution techniques; ideas illustrated with specific example problems arising in science and engineering. Applications of vector differential calculus, complex variables. Line-surface integrals; integral theorems; Taylor and Laurent series, contour integration. Prerequisite: MATH 324; recommended: AMATH 351, MATH 307, or MATH 351. Offered: A.

**AMATH 402 Introduction to Methods in Applied Mathematics II (4) NW** See 401. Applications of ordinary differential equations; review of elementary concepts for first and second order equations; power series and Frobenius solutions. Laplace transforms; systems of differential equations, eigenvalues. Prerequisite: either AMATH 351 or MATH 307. Offered: W.

**AMATH 403 Introduction to Methods in Applied Mathematics III (4) NW** See 401. Applications of partial differential equations; linear and quasilinear first order equations, characteristics, shocks; classification of linear second order equations; basic solution techniques for parabolic, elliptic, and hyperbolic equations; Green's functions and integral transform methods. Prerequisite: AMATH 402.

**AMATH 422 Introduction to Mathematical Biology (3) NW** Mathematical modeling in biology and medicine. Introduction to chaos and nonlinear dynamics, population models (predator-prey and competition systems), epidemic models with applications to sexually transmitted diseases and dynamic diseases, enzyme kinetics, biological oscillators and switches. Prerequisite: either AMATH 351, MATH 136, or MATH 307. Offered: W.

**AMATH 423 Mathematical Biology: Stochastic Models (3) NW** Introduction to the basics of stochastic models. Applications are taken from the biomedical sciences such as random movement of cells and molecules, activation of neurons, cancer growth and spread, population dynamics, kinetics of unimolecular reactions. Prerequisite: either AMATH 351 or MATH 307, MATH/STAT 390. Offered: Sp.

**AMATH 441 Introduction to Fluid Dynamics (3) NW** Eulerian equations of mass and motion. Surface forces. Vorticity and vortex dynamics. Water waves and interfacial waves; concept of phase and group velocities. Linear instability theory. Simple viscous flows; boundary layer theory, potential theory. Low Reynolds-number flows, application to biological fluid flows. Prerequisite: AMATH 353.

**AMATH 490 Special Topics (1-5, max. 15)** Topics of current interest in applied mathematics not covered by other undergraduate courses.

**AMATH 498 Senior Project or Thesis (1-6, max. 6)** Intended for Honors students and other advanced undergraduates completing a special project or senior thesis in applied mathematics. Offered: AWSpS.

**AMATH 499 Undergraduate Reading and Research (1-6, max. 6)** Credit/no credit. Offered: AWSpS.

## Courses for Graduates Only

**AMATH 500 Special Studies in Applied Mathematics (\* max. 12)** Lectures and discussions of topics of current interest in applied mathematics. May not be offered every quarter; content may vary from one offering to another. Prerequisite: permission of instructor.

**AMATH 501 Seminar in Applied Mathematics (1, max. 6)** Special topics and selected problems of current interest in applied mathematics. Credit/no credit only. Offered: AWSp.

**AMATH 502 Applied Mathematics Clinic (1)** The clinic provides consulting service for problems from different academic units requiring assistance in formulation, analysis, and interpretation of mathematical models. Students learn to delineate sources of difficulties, identify or devise a method of solution, and effectively communicate it to clients. Credit/no credit only. Prerequisite: AMATH 568, AMATH 569, and AMATH 584. Offered: AWSp.

**AMATH 503 Mathematical Biology I (3)** Mathematical modeling in biomedical sciences (mainly ecology, epidemiology, physiology, and zoology). Topics covered include modeling (continuous and discrete), population interactions, dynamic diseases, reaction kinetics, biological oscillators, oscillator generated wave phenomena, epidemics, and the dynamics of infectious diseases. Prerequisite: AMATH 402 or equivalent knowledge of ordinary differential equations. Offered: A.

**AMATH 505 Introduction to Fluid Dynamics (4)** Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with ATM S 505/OCEAN 511; A.

**AMATH 506 Applied Probability Statistics (4)** Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with STAT 506.

**AMATH 507 Calculus of Variations I (5)** Necessary and sufficient conditions for a weak and strong extremum. Legendre transformation, Hamiltonian systems. Constraints and Lagrange multipliers. Space-time problems with examples from elasticity, electromagnetics, and fluid mechanics. Sturm-Liouville problems. Approximate methods. Prerequisite: AMATH 351 or MATH 307; MATH 324, 327; recommended: AMATH 402 and AMATH 403 or MATH 428 and 429.

**AMATH 509 Theory of Optimal Control (3)** Trajectories obtained from ordinary differential equations with control variables. Controllability, optimality, the maximum principle. Relaxation and the existence of solutions. Techniques of nonsmooth analysis. Prerequisite: real analysis on the level of MATH 426; background in optimization corresponding to AMATH 507 or AMATH 515. Offered: jointly with MATH 509; even years.

**AMATH 512 Methods of Engineering Analysis (3)** Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Offered: jointly with CHEM E 512; A.

**AMATH 514 Networks and Combinatorial Optimization (3)** Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment

problems. Algorithms and applications. Prerequisite: MATH 308 or AMATH 352 and MATH 324. Offered: jointly with MATH 514.

**AMATH 515 Fundamentals of Optimization (5)** Maximization and minimization of functions of finitely many variables subject to constraints. Basic problem types and examples of applications; linear, convex, smooth, and nonsmooth programming. Optimality conditions. Saddlepoints and dual problems. Penalties, decomposition. Overview of computational approaches. Prerequisite: linear algebra and advanced calculus. Offered: jointly with IND E 515/MATH 515.

**AMATH 516 Numerical Optimization (3)** Methods of solving optimization problems in finitely many variables, with or without constraints. Steepest descent, quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic programming. Cutting planes and nonsmooth optimization. Prerequisite: AMATH 515. Offered: jointly with MATH 516.

**AMATH 517 Optimization Under Uncertainty (3)** Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications to optimal stopping, inventory control, resource management. Prerequisite: AMATH 506 (or an introduction to basic concepts of probability such as STAT 390 or 394, 395), MATH 308 and 324. Offered: jointly with MATH 517.

**AMATH 520 Special Topics in Mathematical Applications (5, max. 15)** In-depth study of an application topic in applied mathematics. Topics may include special studies in geophysical fluid dynamics, hydrodynamic stability, turbulence, analytic dynamics, solid mechanics, applied optimization, tensor analysis, stochastic analysis, and nonlinear optics and lasers. Offered: W.

**AMATH 521 Special Topics in Mathematical Biology (5, max. 15)** DNA-folding, pattern-forming systems, stochastic analysis. Prerequisite: AMATH 402 or equivalent. Offered: Sp.

**AMATH 563 Methods of Partial Differential Equations II (3)** Nonlinear first-order partial differential equations: characteristics, applications to geometrical optics and Hamilton-Jacobi theory. Linear and quasilinear hyperbolic equations: conservation laws, characteristics, shocks, examples from fluid dynamics. Approximate solution methods: regular, singular, and multiple-scale perturbations. Prerequisite: AMATH 569. Offered: odd years.

**AMATH 564 Methods of Partial Differential Equations III (3)** Nonlinear first-order partial differential equations: characteristics, applications to geometrical optics and Hamilton-Jacobi theory. Linear and quasilinear hyperbolic equations: conservation laws, characteristics, shocks, examples from fluid dynamics. Approximate solution methods: regular, singular, and multiple-scale perturbations. Prerequisite: AMATH 569. Offered: odd years.

**AMATH 567 Methods of Applied Mathematics I (5)** Complex variable and associated topics. Branch cuts, series and product expansions. Contour integration, numerical implications. Harmonic functions. Complex potential (and singularities) in physical problems. Conformal mapping; applications and examples. Fourier and Laplace transforms and applications. Recommended: 401 or equivalent. Offered: A.

**AMATH 568 Methods of Applied Mathematics II (5)** Survey of practical solution techniques for ordinary differential equations. Linear systems of equations including nondiagonal case. Nonlinear systems; stability phase plane analysis. Asymptotic expansions. Regular and singular perturbations. Recommended: 402 or equivalent. Offered: W.

**AMATH 569 Methods of Applied Mathematics III (5)**

Analytical solution techniques for linear partial differential equations. Discussion of how these arise in science and engineering. Transform and Green's function methods. Classification of second-order equations, characteristics. Conservation laws, shocks. Prerequisite: AMATH 403, AMATH 568 or MATH 428 or permission of instructor. Offered: Sp.

**AMATH 570 Advanced Methods in Applied Mathematics I (5)**

Analytical techniques of applied mathematics. Topics include systems of and nonlinear partial differential equations, asymptotics for integrals, perturbation and multiple-scale analysis, linear integral equations, calculus of variations. Prerequisite: AMATH 567, AMATH 568, AMATH 569. Offered: A.

**AMATH 571 Advanced Methods in Applied Mathematics II (5)**

Numerical techniques of applied mathematics. Topics include numerical solution of hyperbolic conservation laws, multigrid methods, Fourier and spectral methods. Prerequisite: AMATH 584, AMATH 585, AMATH 586. Offered: W.

**AMATH 572 Advanced Methods in Applied Mathematics III (5)**

Application of analytical and numerical techniques to problems in science and engineering. Topics include dynamical systems and bifurcation theory, wave propagation, wavelet analysis, stochastic processes, stochastic differential equations. Prerequisite: AMATH 571. Offered: Sp.

**AMATH 574 Nonlinear Dynamics and Chaos (3)**

Overview of ways in which complex dynamics arise in nonlinear dynamical systems. Topics include bifurcation theory, universality, Poincaré maps, routes to chaos, horseshoe maps, Hamiltonian chaos, fractal dimensions, Liapunov exponents, and the analysis of time series. Examples from biology, mechanics, and other fields. Prerequisite: AMATH 568 or equivalent.

**AMATH 577 Perturbation Theory I (3)**

Regular perturbations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. The methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonance phenomena, homogenization, nonlinear wave propagation in fluid, solid, and particle mechanics. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent. Offered: even years.

**AMATH 578 Perturbation Theory II (3)**

Regular perturbations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. The methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonance phenomena, homogenization, nonlinear wave propagation in fluid, solid, and particle mechanics. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent. Offered: even years.

**AMATH 584 Applied Linear Algebra and Introductory Numerical Methods (5)**

Numerical methods for solving linear systems of equations, linear least squares problems, matrix eigen value problems, nonlinear systems of equations, interpolation, quadrature, and initial value ordinary differential equations. Offered: A.

**AMATH 585 Approximate and Numerical Analysis II (5)**

Numerical methods for steady-state differential equations. Two-point boundary value problems and elliptic equations. Iterative methods for sparse symmetric and non-symmetric linear systems: conjugate-gradients, preconditioners. Prerequisite: AMATH 584 which may be taken concurrently.

**AMATH 586 Approximate and Numerical Analysis III (5)**

Finite-difference methods for time-dependent differential equations. Multistep methods, stiff equations, implicit methods. Hyperbolic and parabolic

differential equations. Stability and convergence theory. Prerequisite: AMATH 584 which may be taken concurrently.

**AMATH 587 Asymptotics and Special Functions (3)**

Origin and properties of higher transcendental functions; theoretical basis and applications of Laplace, Fourier, Bessel, Mellin transforms; asymptotic analysis, including methods of steepest descent and stationary phase, WKB. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent.

**AMATH 588 Green's Functions and Integral Equations (3)**

Review of Sturm-Liouville theory. Green's functions and integral representation of solution to PDEs. Fredholm and Volterra integral equations. Hilbert-Schmidt theory. Singular integral equations of Cauchy type. Applications to science and engineering. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent.

**AMATH 594 Special Topics in Numerical Analysis (2-3, max. 15)**

Various advanced topics in numerical analysis and scientific computing, such as iterative methods, eigenvalue computations, approximation theory, finite element methods, inverse problems, nonlinear conservation laws, computational fluid dynamics. Prerequisite: AMATH 584, 585, 586, or equivalent. Offered: jointly with MATH 594.

**AMATH 595 Special Topics in Numerical Analysis (2-3, max. 15)**

Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, 585, 586, or equivalent. Offered: jointly with MATH 595.

**AMATH 596 Special Topics in Numerical Analysis (2-3, max. 15)**

Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. AMATH 584, 585, 586, or equivalent. Offered: jointly with MATH 596.

**AMATH 600 Independent Research or Study (\*)**

Credit/no credit only.

**AMATH 700 Master's Thesis (\*)**

Credit/no credit only.

**AMATH 800 Doctoral Dissertation (\*)**

Credit/no credit only.

## Art

104 Art

General Catalog Web page:

Department Web page:  
[net.art.washington.edu](http://net.art.washington.edu)

The School of Art serves a dual role within the educational structure of the University of Washington. It is both a professional school and an academic department. As a professional school it trains students for active careers in the graphic and plastic arts; as a school of the College of Arts and Sciences it offers studio and lecture courses. All of its course offerings and its curriculum requirements are based on the underlying philosophy that an awareness and understanding of the visual arts are necessary to a liberal education, and that a liberal education is necessary to the training of a professional artist.

## Graduate Program

Graduate Program Coordinator  
104E Art, Box 353440  
(206) 685-1714 or (206) 543-0646

The School of Art offers eight art or design programs leading to the Master of Fine Arts degree: ceramics, fibers, metals, painting, photography, printmaking, sculpture, and visual communications design. Students are required to enroll for two years of full-time study (six quarters, excluding summer), earning a minimum of 63 credits of scheduled studio and class work and 9 credits of thesis for a total of 72 credits. Individual programs have specific requirements.

The thesis consists of a studio project representing a body of work, a written thesis statement, and documentation of the work in the form of slides. A selection of thesis work is exhibited at the School of Art's Master of Fine Arts Thesis Exhibition.

## Admission Requirements

Applicants for admission to the Master of Fine Arts program are required to have a Bachelor of Fine Arts degree or equivalent (determined by the quality of the applicant's work and equivalent experience, based upon the UW B.F.A. requirements) with a minimum GPA of 3.00 in the undergraduate art major.

The Graduate Record Examination is not required. Admission is on a competitive basis. Annual deadline for applications is February 1, for consideration for admission the following autumn quarter.

## Scholarships and Teaching Assistantships

School of Art scholarships are awarded annually to new and returning students, based on merit. Applicants admitted to the M.F.A. program may be offered School of Art scholarships for the coming year on an individual merit basis. Further application is not required.

The School of Art offers a limited number of teaching assistantships to incoming graduate students on an individual merit basis, as determined by each program. Enrolled graduate students may apply for a limited number of additional, competitive teaching assistantships.

## Faculty

### Chair

Christopher Ozubko

### Professors

Anderson, Judy M. \* 1988; MA, 1977, University of California (Berkeley); graphic and informational design for business and institutions, book artist.

Berger, Paul E. \* 1978; MFA, 1973, State University of New York (Buffalo); photography.

Bliquez, Lawrence J. \* 1969; PhD, 1968, Stanford University; Greek oratory, Greek historiography and historians, Greek and Roman medicine.

Bravmann, Rene A. \* 1972; PhD, 1971, Indiana University; African art.

Carraher, Ronald G. \* 1967; MA, 1961, San Jose State College; photography.

Casteras, Susan P. \* 1996; PhD, 1977, Yale University; nineteenth-twentieth century painting and sculpture, English art.

Celentano, Francis \* 1966, (Emeritus); MA, 1957, New York University; painting, drawing.

Christofides, Constantine \* 1966, (Emeritus); PhD, 1956, University of Michigan; medieval, seventeenth-century, Romanesque art and literature.

Clausen, Meredith L. \* 1979; PhD, 1975, University of California (Berkeley); twentieth-century and American architecture.

Dahn, Richard F. \* 1965, (Emeritus); MFA, 1959, Yale University; graphic design.

Dailey, Michael D. \* 1963, (Emeritus); MFA, 1963, University of Iowa; painting, drawing.

Du Pen, Everett 1945, (Emeritus); MFA, 1937, Yale University; sculpture.

Goldsmith, Layne \* 1983; MA, 1975, San Jose State College; MFA, 1979, Cranbrook Academy of Art; fiber arts and related historic and contemporary textile structures and processes.

Hildebrand, Grant \* 1964; MArch, 1964, University of Michigan; history, preservation design.

Hixson, William J. \* 1950, (Emeritus); MFA, 1950, University of Oregon; painting.

Holm, Bill \* 1968, (Emeritus); MFA, 1951, University of Washington; Northwest coast Indians.

Hu, Mary L. \* 1980; MFA, 1967, Southern Illinois University; metal design.

Hurley, Denzil 1994; MFA, 1979, Yale University; painting, drawing, theory.

Jones, Robert C. \* 1960, (Emeritus); MS, 1959, Rhode Island School of Design; painting, drawing.

Kartsonis, Anna D. \* 1983; PhD, 1982, New York University; Byzantine and medieval art.

Kehl, Richard L. \* 1962; MA, 1961, MFA, 1961, Kansas City Art Institute; painting.

Kingsbury, Martha \* 1968; PhD, 1969, Harvard University; nineteenth- and twentieth-century European and American art.

Lundin, Norman K. \* 1964; MFA, 1963, University of Cincinnati; painting, drawing.

Marshall, John C. \* 1970; MFA, 1968, Syracuse University; metal design.

Mason, Alden 1946, (Emeritus); MFA, 1947, University of Washington; painting.

Opperman, Hal N. \* 1967, (Emeritus); PhD, 1972, University of Chicago; seventeenth- and eighteenth-century European art.

Ozubko, Christopher \* 1981; MFA, 1981, Cranbrook Academy of Art; graphic design.

Pizzuto, Eugene \* 1957, (Emeritus); MFA, 1951, Cranbrook Academy of Art; painting, drawing.

Pundt, Hermann G. \* 1968, (Emeritus); PhD, 1969, Harvard University; history, historical preservation.

Silbergeld, Jerome \* 1975; PhD, 1974, Stanford University; Chinese art.

Smith, Charles W. \* 1948, (Emeritus); MFA, 1956, Cranbrook Academy of Art; sculpture.

Snow-Smith, Joanne \* 1981; PhD, 1976, University of California (Los Angeles); Italian Renaissance art.

Solberg, Ramona L. \* 1967, (Emeritus); MFA, 1957, University of Washington; art education, metal design.

Spafford, Michael C. \* 1969, (Emeritus); MA, 1960, Harvard University; painting, drawing.

Taylor, Norman J. \* 1968; MFA, 1967, MA, 1967, University of Iowa; sculpture.

Wadden, Douglas J. \* 1970; MFA, 1970, Yale University; graphic design, photography.

Walker, Jamie \* 1989; MFA, 1983, Rhode Island School of Design; ceramic arts.

Warashina, M. Patricia \* 1970, (Emeritus); MFA, 1964, University of Washington; ceramics.

Whitehill-Ward, John \* 1975; MS, 1974, Illinois Institute of Technology; graphic design.

Young, John T. \* 1984; MFA, 1978, Rhode Island School of Design; sculpture, conceptual art.

### Associate Professors

Andrews, Richard 1987, (Affiliate); MA, 1975, University of Washington.

Cabeen, Louise \* 1993; MFA, 1989, The School of Art Institute of Chicago; socially critical art with research specialties in textile history and techniques.

Failing, Patricia A. \* 1982; MA, 1974, University of California (Berkeley); contemporary art and criticism.

Garvens, Ellen J. 1994; MA, 1983, MFA, 1987, University of New Mexico; mixed-media photography.

Govedare, Philip B. \* 1991; MFA, 1984, Tyler School of Art; painting and drawing.

Koenig, Hazel L. \* 1967, (Emeritus); MFA, 1950, University of Washington; fiber arts.

Labitzke, Curt W. \* 1984; MFA, 1984, University of Notre Dame; printmaking; intaglio and lithography emphasizing hand drawn techniques.

Langdon, Merle K. \* 1976; PhD, 1972, University of Pennsylvania; Greek archaeology, epigraphy, topography, and history.

Oliver, Marvin E. 1974, (Adjunct); MFA, 1973, University of Washington; Northwest coast Indian art, Native American art, wood design, glass, metals.

Pawula, Kenneth J. \* 1965; MA, 1962, University of California (Berkeley); painting, drawing.

Praczkowski, Edward \* 1965, (Emeritus); MFA, 1965, Cranbrook Academy of Art; painting, drawing.

Proctor, Richard M. \* 1957, (Emeritus); MA, 1962, Michigan State University; fiber arts.

Scheier, Shirley E. \* 1986; PhD, 1985, University of Wisconsin; printmaking.

Takamori, Akio \* 1988; MFA, 1978, New York State College of Ceramics; ceramic sculpture.

Welman, Valentine S. \* 1954, (Emeritus); MFA, 1954, University of Colorado (Boulder); painting, drawing.

Wright, Robin K. \* 1990; PhD, 1985, University of Washington; Native American art, particularly Northwest coast Indian art.

### Assistant Professors

Bogel, Cynthia J. \* 1999; PhD, 1995, Harvard University; Buddhist arts, Japanese art and architecture, ritual aesthetic meaning, changing values.

Brody, David \* 1996; MFA, 1983, Yale University; painting, drawing.

Celentano, Denyce M. 1995; MFA, 1990, East Carolina University; painting and drawing.

Cheng, Karen \* 1997; MDes, 1996, University of Cincinnati; graphic design.

Collins, Jeffrey L. \* 1994; MA, 1990, Yale University; MA, 1994, Cambridge University (UK); PhD, 1994, Yale University; European Baroque art and architecture with an emphasis on Italy; American material culture.

Gale, Ann E. 1995; MFA, 1991, Yale University; figure painting.

Goettler, Christine E. \* 1998; PhD, 1991, University of Zurich (Switzerland); northern European art (late medieval to Baroque), religious/devotional art, iconoclasm.

Hallett, Christopher \* 1993; PhD, 1993, University of California (Berkeley); Egyptian, Greek, Roman art and archaeology.

Jeck, Douglas A. \* 1996; MFA, 1989, The School of Art Institute of Chicago; sculpture and ceramics.

Loewenstein, Daniel F. 1999; MFA, 1980, University of California (San Diego); studio foundations, sculpture, performance art.

Lyall, Marta 1999; MFA, 1987, The School of Art Institute of Chicago; new media.

Lynn, Billie G. 1998; MFA, 1989, University of San Francisco; sculpture.

O'Toole, Helen J. \* 1996; MFA, 1989, The School of Art Institute of Chicago; studio drawing, painting, art history.

Reed, T. Gervais 1950, (Emeritus); BA, 1949, Yale University; American, film.

Scott, George W. \* 1995; MFA, 1993, Cranbrook Academy of Art; industrial design, product design and development.

St. Pierre, Louise M. \* 1995; BFA, 1983, University of Alberta (Canada); design of products/exhibits which educate and enable children.

Wieczorek, Marek K. \* 1997; PhD, 1997, Columbia University; modern European art, Mondrian and de Stijl, critical theory.

### Lecturer

Nicholls, James Keith 1995; BArch, 1986, University of British Columbia (Canada); design, industrial design, construction technology.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsca/](http://www.washington.edu/students/crsca/).

**ART 421 Video Art (5, max. 15) VLPA** Prerequisite: ART 380.

**ART 428 Senior Thesis in Fiber Arts (5, max. 20) VLPA** Specialized investigation involving surface design and/or fabric structures. Prerequisite: ART 324; ART 326; ART 327.

**ART 436 Sculpture Composition (5, max. 15) VLPA** Individual compositions in various media in large scale.

**ART 440 Senior Thesis in Photography (5, max. 15) VLPA** Development of a coherent photographic theme or topic evolved over two consecutive quarters resulting in a finished thesis portfolio. Prerequisite: ART 343. Offered: AWSp.

**ART 445 Advanced Industrial Design (5) VLPA** Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance. Prerequisite: ART 318.

**ART 446 Advanced Industrial Design (5) VLPA** Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance. Prerequisite: ART 445.

**ART 447 Advanced Industrial Design (5) VLPA** Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance. Prerequisite: ART 446.

**ART 450 Individual Projects in Printmaking (5, max. 15) VLPA** Individual media study within the context of group discussion and critique. Prerequisite: ART 345; ART 350.

**ART 460 Advanced Metal Design (5, max. 25) VLPA** Advanced individual projects in metal design.

**ART 463 Advanced Painting (5, max. 15) VLPA** Development of individuality in painting through creative exercises. Prerequisite: ART 360.

**ART 464 Advanced Painting/Drawing (5, max. 15) VLPA** Advanced problems in composition. Prerequisite: ART 463.

**ART 466 Publications Design (5) VLPA** Research, development, organization, design, and presentation of a complex communications document, such as a journal, annual report, or a large publication. All aspects of design, content, image creation and production are addressed in a quarter-long project. Prerequisite: ART 368; ART 378.

**ART 467 Exhibition Design (5) VLPA** Working with 3-dimensional space, students explore the integration and presentation of graphic images and typographic messages sequenced in a given space. Explores the possibilities and multi-disciplinary character of exhibition planning and design. Prerequisite: ART 466.

**ART 468 Portfolio/Exhibition Presentation (5) VLPA** Examines the relationship between problem solving in the educational and professional environments. Emphasis on effective evaluative skills in the development, presentation, discussion, revision, and resolution of individual work. Students present their work at the BFA Exhibition. Prerequisite: ART 467.

**ART 478 Information Design (5) VLPA** Explores the strategies for enhancing and visually presenting complex statistics and data. Identifies the principles underlying the successful presentation of information. Prerequisite: ART 368; ART 378.

**ART 479 Media Information Design (5) VLPA** Explores program authoring, communication, and complex information design. Assigned information-design problems are addressed using multimedia authoring tools. Design of effective user interface, navigation techniques, and enhanced content communication. Prerequisite: ART 478.

**ART 480 Senior Project/Presentation (3) VLPA** Increased opportunity for self-directed design research and study in the context of an advanced studio seminar. Investigation and integration of visual communication skills. Student present their work at the BFA Exhibition. Prerequisite: ART 479.

**ART 485 Advanced Ceramic Art (5, max. 20) VLPA** Pottery design and construction, stoneware, clay bodies, glazes. Prerequisite: ART 353.

**ART 487 Senior Research Project, Ceramics (5) VLPA** Independent research on a topic in ceramics.

**ART 488 Senior Source Presentation, Ceramics (5) VLPA** Designed to allow ceramics majors to explore and define the primary sources of inspiration for their interest in art and why they make it.

**ART 496 Undergraduate Internship (2-5, max. 10)** Faculty supervised fieldwork in art related activities. Credit/no credit only.

**ART 497 Study Abroad-Studio Individual Projects (3-10, max. 20) VLPA**

**ART 498 Individual Projects-Painting/Sculpture (3/5, max. 15)**

**ART 499 Individual Projects-Design (3/5, max. 15)**

## Courses for Graduates Only

**ART 512 Graduate Seminar (3, max. 9)**

**ART 513 Contemporary Studio Theories and Problems (3)**

**ART 515 Photography (3-15, max. 60)**

**ART 520 Seminar in Painting (3, max. 18)** Designed as a forum for the presentation and criticism of student work as well as for discussion of contemporary directions in visual art. Credit/no credit only.

**ART 522 Sculpture (3-15, max. 60)**

**ART 525 Graduate Studio: Drawing (3, max. 15)** Supervised studio for advanced-level students from various media-based disciplines designed to develop an interest in and familiarity with aspects of drawing. Utilization of various media. Discussion of historical and contemporary issues concerning drawing.

**ART 540 Fiber Arts (3-15, max. 60)**

**ART 547 Industrial Design (3-15, max. 60)**

**ART 550 Printmaking (3-15, max. 60)**

**ART 553 Ceramic Art (3-15, max. 60)**

**ART 558 Metal Design (3-15, max. 60)**

**ART 563 Painting (3-15, max. 60)**

**ART 580 Graphic Design (3-15, max. 60)**

**ART 595 Master of Fine Arts Research Project (2-5, max. 9)** An independent research project related to and informed by the MFA student's studio work. Final project form may be a lecture, slide presentation, or paper.

**ART 600 Independent Study or Research (\*)**

**ART 700 Master's Thesis (\*)**

## Art History

209 Art

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/art\\_history.html](http://www.washington.edu/students/genocat/academic/art_history.html)

Department Web page:  
[net.art.washington.edu/SOASite/programs/AH/ahhome.html](http://net.art.washington.edu/SOASite/programs/AH/ahhome.html)

Art history is the study of the creation, style, and meaning of works of art in relation to the artists and societies that created them. The history of art involves the interaction of styles, techniques, concepts, individual personalities, and social values from many places over long periods of time. This discipline is comparative in nature and requires many different skills, derived from the study of history and culture, foreign languages and literature, iconography, stylistic analysis, and connoisseurship.

Students studying in the field of Art History can expect to develop strong writing, research, analytical, critical thinking, and problem-solving skills. Course work is designed to allow students to comprehend the social, historical, ethical, and aesthetic significance of the visual realm that is our present environment and the heritage of many cultures.

Art History graduates pursue careers in fields such as gallery and museum management, visual technology, teaching, arts administration, arts education, research, curating and restoration, interior design, and art and antique connoisseurship.

## Graduate Program

Graduate Program Coordinator  
209 Art, Box 353440  
(206) 543-4876  
[uwah@u.washington.edu](mailto:uwah@u.washington.edu)

### Master of Arts

*Admission Requirements:* (1) Bachelor of Arts degree with major in the history of art, or equivalent course work; (2) one copy of all academic transcripts (international applicants must submit two copies); (3) three letters of recommendation; (4) statement of professional objectives in the field; and (5) samples of the applicant's written work. Taking the Graduate Record Examination is required.

*Graduation Requirements:* (1) 55 credits in the thesis track or 65 credits in the non-thesis track. Of these credits, a minimum of 45 credits in the thesis track or 55 credits in the non-thesis track must be numerically graded art history courses numbered 400 and above, exclusive of thesis or practicum credits. A maximum of 10 credits in related fields, in numerically graded courses numbered 300 and above, may be approved for credit in place of art history courses. No more than 12 credits of ART H 600 may be counted toward the minimum credit requirement for the Master of Arts degree. (2) A minimum of 5 numerically graded credits must be taken in four of five major areas: African or Native American; East Asian; Ancient, Classical, and Medieval; Italian and Northern Renaissance, Baroque, and Rococo; or late eighteenth- to twentieth-century Western. (3) A minimum of 15 credits must be taken in 500-level seminars, in addition to ART H 500, Methods of Art History, and ART H 504, Methodology II, both of which must be taken within the first year of residence. At least one seminar each in a Western and a non-Western area is required. (4) A knowledge of either French or German, or of Chinese or Japanese if appropriate. Degree candidates specializing in Native American art may substitute Spanish for French or German. Candidates in the thesis track are required, in addition, to demonstrate knowledge in a second language appropriate to the student's area of study as determined by the faculty. Petitions to the Faculty Graduate Committee for exemption from the second language requirement will be considered as warranted by the needs of different fields or projects. Language requirements may be satisfied by passing graduate proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of the second year of French, German, Chinese, Japanese, or other appropriate language as a graduate student at the University of Washington with a minimum grade of 3.0. Students are expected to satisfy at least one of the language requirements no later than the first quarter of residence in the program. (5) Students in the thesis track must take 10 thesis credits in ART H 700 in preparation for the written presentation and oral defense of a thesis that demonstrates the ability to conduct rigorous research, familiarity with relevant sources, and a capacity for synthesis and critical evaluation; students in the non-thesis track must take 10 practicum credits in ART H 598, a practical or theoretical program designed in conjunction with the faculty and defended by means of a final written report and oral examination.

### Doctor of Philosophy

*Admission Requirements:* (1) Prior sound preparation in art history at a general level, which usually means having acquired the Master of Arts degree in the history of art; (2) one copy of all academic transcripts (international applicants must submit two copies); (3) three letters of recommendation; (4) statement of professional objectives in the discipline; and (5) samples of written research work in art history. Taking the Graduate Record Examination is required.

*Graduation Requirements:* Minimum of 90 credits, which include: (1) 60 credits in numerically graded art history courses numbered 400 and above, beyond the Master of Arts degree or equivalent, and exclusive of dissertation credits; a maximum of 20 credits in related fields in numerically graded courses numbered 300 and above may be approved for credit in place of art history courses; a minimum of 10 credits must be in areas other than those tested by the General Examination; at least 30 credits must be in 500-level seminars; (2) a knowledge of German or French, or of Chinese or Japanese if appropriate; a research capability in a second language adjudged appropriate to the student's area of study; a knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied by passing graduate-proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of second-year French, German, Chinese, Japanese, or other appropriate language as

a graduate student at the University with a minimum grade of 3.0; (3) a General Examination, written and oral, taken prior to enrollment for dissertation credits; this examination covers three specific fields of art history chosen from the following general areas: African, Native American, Chinese, Japanese, Ancient, Medieval, Renaissance, Baroque and eighteenth century, and Modern; no more than two fields may be selected from the same area; (4) 30 dissertation credits in ART H 800 taken after the General Examination in preparation and defense of the dissertation. These credits must be distributed over a minimum of three quarters; (5) a dissertation demonstrating original and independent investigation and achievement.

### Financial Aid

The Art History division offers certain scholarship funds, as well as teaching assistantships, for art history graduate students. A small number of grants are awarded to outstanding entering students, but it is otherwise a policy to award financial aid and assistantships only to students who have completed at least one year of graduate study.

## Faculty

Hallett, Christopher \* 1993; PhD, 1993, University of California (Berkeley); Egyptian, Greek, Roman art and archaeology.

Wieczorek, Marek K. \* 1997; PhD, 1997, Columbia University; modern European art, Mondrian and de Stijl, critical theory.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsct/](http://www.washington.edu/students/crsct/).

*400-level courses are intensive, quite narrow in scope, and addressed to current scholarly problems. A relatively high level of sophistication is needed. In general, sound prior humanistic training and knowledge of at least one of the following are required: art of the period or region at a general level (such as that provided by the relevant 200- or 300-level course), social or cultural history of the subject area, literature and thought of the area, or an appropriate foreign language. 400-level courses are available for both undergraduate and graduate credit. Each 400-level course is accompanied by two units of ART H 599, required of graduate majors.*

**ART H 400 ART History and Criticism (2-5, max. 15) VLPA** Courses on special topics, frequently by visiting faculty, which cannot be offered on a continuing basis. Consult art history office for subjects offered.

**ART H 411 Traditional Chinese Architecture and Gardens (3) VLPA/I&S** Introduction to Chinese architecture (palaces, homes, temples, tombs), urban planning, and gardens; each area examined in terms of techniques of production, visual styles, historical development, and relationship to traditional Chinese cultural values. Recommended: some background in Chinese art, history, language, or literature. Offered: jointly with ARCH 451.

**ART H 412 Chinese Painting in the Twentieth Century (3) VLPA** Modern Chinese painting and art theories, seen in relation to China's twentieth-century struggles over nationalism and Westernization, traditionalism and modernization, individualism and the Maoist "mass line." Recommended: some background in Chinese art, history, language, or literature.

**ART H 415 Chinese Painting: The Sung Period (5) VLPA/I&S** Golden age of Chinese painting, emphasizing the monumental, romantic, and Zen Buddhist landscape painting traditions of the tenth through thirteenth centuries. Recommended: some background in Chinese art, history, language, or literature.

**ART H 416 Chinese Painting: The Yuan Period (5) VLPA/I&S** Chinese painting under Mongol rule, in the fourteenth century: a period of political and social crisis that gave rise to a revolution in painting styles. Recommended: some background in Chinese art, history, language, or literature.

**ART H 417 Later Chinese Painting: Ming, Ch'ing, and Modern Periods (5) VLPA/I&S** Major masters and traditions, esthetic attitudes, and social role of Chinese painting from the fifteenth century to the present day. Recommended: some background in Chinese art, history, language, or literature.

**ART H 420 Art of the Japanese Print (3) VLPA** Foundations of Ukiyo-e in Japanese genre from the twelfth through mid-seventeenth centuries; woodblock technique from the Heian period through the early Edo period. Emphasis on the changing styles and subject matter in Ukiyo-e Hanga from Moronobu through Kuniyoshi. Recommended: some background in Japanese art, history, language, or literature.

**ART H 429 Japanese Cinema (3) VLPA** Eleven masterpieces of Japanese cinema, studied in the context of what they reveal about Japanese culture and the art of the film. Recommended: some background in Japanese art, history, language, or literature.

**ART H 430 Chinese Cinema (5) VLPA/I&S** *Silbergeld* Chinese film, 1930s to the present, studied as a visual art form, set in relation to traditional and modern Chinese arts and literature, modern history, gender, and other social issues. Recommended: some background in Chinese art, history, language, or literature.

**ART H 432 Oceanic Art (3) VLPA/I&S** Arts of Oceania, studied through cultures of Polynesia, Micronesia, Melanesia, and Australia.

**ART H 434 Native-American Art and Ceremony of the Southern and Central Northwest Coast (3) VLPA/I&S** Examination of the role of the visual arts in the ceremonial life of the Native-American people of the central and southern Northwest Coast. Emphasis on the traditional social and religious aspects of ceremonialism, contrasts between tribal traditions, and continuing twentieth-century traditions. Recommended: some background in Native American art, history, languages, or literature.

**ART H 435 Thematic Studies in Native-American Art (3, max. 9) VLPA/I&S** *Wright* Approach to Native-American art through themes and issues. Focus varies from year to year (e.g. Shamanism in Native-American art, gender identity in Native-American art, social and political aspects of Native-American art, issues in contemporary Native-American art). Recommended: some background in Native American art, history, languages, or literature.

**ART H 436 Arts of Sub-Saharan Africa I (3) VLPA/I&S** Traditional arts of the Western Sudan and the Western Guinea coast with their archaeological antecedents. Recommended: some background in African art, history, languages, or literature.

**ART H 437 Arts of Sub-Saharan Africa II (3) VLPA/I&S** Traditional arts of the Central Guinea coast, Nigeria, Cameroon, and Gabon, from precontact times to the present. Recommended: some background in African art, history, languages, or literature.

**ART H 438 Arts of Sub-Saharan Africa III (3) VLPA/I&S** Arts of Zaire, Angola, the Swahili coast, and southern Africa. Recommended: some background in African art, history, languages, or literature.

**ART H 442 Greek Painting (3) VLPA** *Langdon* Study of painted decoration on Greek vases, with emphasis on stylistic developments and cultural and historical influences. Painting on other media also examined as evidence allows. Offered: jointly with CL AR 442.

**ART H 446 Greek Architecture (3) VLPA** Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with CL AR 446/ARCH 454.

**ART H 448 The Archaeology of Italy (3) VLPA** *Harmon* Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Ostia, Pompeii, Herculaneum, Tarquinia, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life. Illustrated by slides. Offered: jointly with CL AR 448.

**ART H 451 Topics in Early Christian and Byzantine Art and Architecture (3, max. 9) VLPA** Specific theme or area of early Christian and Byzantine art and architecture, such as early Christian and Byzantine mosaics or the art of Constantinople.

**ART H 452 Art, Religion, and Politics in the Early Christian Period, 300-700 AD (3) VLPA/I&S** *Kartsonis* Evolution of the art of the early Christian period (300-700 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with RELIG 442.

**ART H 453 Art, Religion, and Politics in Byzantium, 700-1453 AD (3) VLPA/I&S** *Kartsonis* Evolution of the art of Byzantium (700-1453 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with RELIG 443.

**ART H 455 Special Studies in Gothic Art and Architecture (3) VLPA** Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Offered: jointly with ARCH 455.

**ART H 462 High Renaissance Painting in Italy (3) VLPA** Painting in central and northern Italy, from about 1480 to about 1530: Leonardo, Raphael, the early Michelangelo, Sarto, Correggio, Bellini, Giorgione, and the early Titian. Recommended: some background in Italian Renaissance art or history.

**ART H 463 Italian Renaissance Sculpture (3) VLPA** From Nicola Pisano to Giambologna. Recommended: some background in Italian Renaissance art or history.

**ART H 466 High Renaissance Painting in Venice (3) VLPA** Painting in Venice, circa 1480 to circa 1580: Bellini, Carpaccio, Giorgione, Titian, Lotto, del Piombo, Tintoretto, and Veronese. Recommended: some background in Italian Renaissance art or history.

**ART H 470 English Art: 1500-1800 (3) VLPA** English art, principally painting, and, to a lesser extent, architecture. Emphasis on patronage, on the conditions that produced the decided peculiarities of English art, and on the final triumph of the native tradition. Recommended: some background in English history.

**ART H 482 Realism and Impressionism (3) VLPA** Art and the world, 1830-80: high Romanticism through Realism and Impressionism, with emphasis on painting in France. Recommended: some background in the art or history of the period.

**ART H 483 Post-Impressionism to 1918 (3) VLPA** Post-Impressionism and the great revolution of early twentieth-century art, with emphasis on painting. From the first revisions of Impressionism around 1880 to Fauvism, Cubism, Futurism, the Blaue Reiter, and Dadaism. Recommended: some background in the art or history of the period.

**ART H 484 Topics in Modern Art (3, max. 9) VLPA** Approach to art of the nineteenth and twentieth centuries through particular themes, genres, contexts, or other issues. Focus varies from year to year. Recommended: some background in the art or history of the period.

**ART H 485 Italian Futurism, Dada, Surrealism (5) VLPA** *Failing* Survey of three European early modern art movements whose ultimate objective was the collapse of bourgeois culture. Central issues: the role of art and artists in catalyzing social change, strategies for destroying public faith in logic, integration of verbal and visual signs and nonaesthetic conceptions of art. Recommended: some background in the art or history of the period.

**ART H 486 Abstract Expressionism: History and Myth (5) VLPA** Thematic and chronological survey of abstract expressionism, including major genres of critical interpretation, revisionist scholarship, and the relationship of artistic production to a larger context of visual production. Recommended: some background in the art or history of the period.

**ART H 488 American Architecture (3) VLPA** American architecture from indigenous native American traditions to the present. Recommended: some background in the art, architecture, or history of the period. Offered: jointly with ARCH 488.

**ART H 490 Nineteenth-Century Architecture (3) VLPA** From late eighteenth-century French rationalists, Neoclassicists, to *fin de siècle* Vienna and Paris. Includes theorists such as Ruskin, Viollet-le-Duc, and Semper; major movements, such as the Arts and Crafts, and the French Ecole des Beaux-Arts method of design. Recommended: some background in the art, architecture, or history of the period. Offered: jointly with ARCH 456.

**ART H 492 Alternative Art Forms Since 1960 (5) VLPA** Survey of "post-studio" art forms developed in the 1960s by artists who did not equate artmaking with painting, sculpture, or other traditional forms. Topics include: happenings, Fluxus, land projects, artists' video, artists, books, performance, site works, and art made for distribution on CD-ROM and on the World Wide Web.

**ART H 493 Architecture Since 1945 (3) VLPA** Theories and forms in architecture from the end of World War II to present. Includes new wave Japanese architects, recent Native-American developments, and non-Western as well as Western trends. Recommended: some background in the art, architecture, or history of the period. Offered: jointly with ARCH 459.

**ART H 495 Italian Fascism: Architecture and Power (5) VLPA/I&S** *Clausen, Sbragia* Fascism in Italy as studied within the broader European context of nationalism, imperialism, and modernization, with particular emphasis on the arts—literature, film, architecture, and urbanism. Offered: jointly with ITAL 475; A.

**ART H 497 Special Topics in Art in Rome (5, max. 10) VLPA** Topics in art and architecture in Rome and environs, studied from original works. Offered in Italy as part of the art history Seminar in Rome. Topics vary. Site visits, field trips, and individual research projects.

**ART H 498 Individual Projects, Undergraduate Practicum (2-5, max. 10)** Fieldwork or internships in art-related areas in the community. Practical experience in areas such as arts administration, gallery and museum operations, collection cataloguing, curatorial responsibilities, and art education. Credit/no credit only.

**ART H 499 Individual Projects (2-5, max. 10)**

### Courses for Graduates Only

*Most 500-level courses are specialized seminars oriented to new research, intended for graduate students in art history, but open to others who possess the necessary qualifications. Since specific content varies, all students must obtain the permission of the instructor or the art history graduate coordinator.*

**ART H 500 Methods of ART History (5)** Introduction to the specialized bibliography of art historical research and to the wide variety of approaches to art historical problems of all periods and regions.

**ART H 501 Seminar in the General Field of Art (5, max. 15)**

**ART H 504 Methods of Art History: Faculty Research (2)** Discussion and analysis of methodological issues posed in faculty research. Credit/no credit only. Offered: W.

**ART H 509 Seminar in Special Topics in ART History (5, max. 15)** Specific focus changes from quarter to quarter.

**ART H 511 Seminar in Chinese Art (5, max. 15)** Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of China.

**ART H 515 Seminar in Japanese Art (5, max. 15)** Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of Japan.

**ART H 531 Seminar in Tribal Art (5, max. 15)** Methodological and cross-disciplinary problems in the visual arts of precolonial Africa, Oceania, and America. Specific content varies.

**ART H 533 Seminar in North American Indian Art (5, max. 15)** Problems in North American Indian visual arts. Content varies.

**ART H 541 Seminar in Greek and Roman Art (5)** *Langdon* In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered: jointly with CL AR 541.

**ART H 551 Seminar in Early Christian, Byzantine, and/or Medieval Art and Architecture (5, max. 15)** Problems in early Christian, Byzantine, and medieval art and architecture. Content varies. Prerequisite: permission of instructor.

**ART H 561 Seminar in Italian Renaissance Art (5, max. 15)** Problems and in-depth study of selected topics of the art of the Italian Renaissance.

**ART H 566 Seminar in North European Art (5, max. 15)** Deals with problems of style and iconography of the northern European masters of the fourteenth through seventeenth centuries.

**ART H 577 Seminar in Baroque Art (5, max. 15)** Iconographic and stylistic problems of the art of the Baroque period, with emphasis on the principal research methods, theories, and types of literature dealing with the art of the seventeenth and eighteenth centuries in Europe.

**ART H 581 Seminar in Modern Art (5, max. 15)** Art historical problems of the nineteenth and twentieth centuries.

**ART H 590 Seminar in Criticism of Contemporary Art (5, max. 15)** Contemporary art and appropriate critical methodology.

**ART H 591 Seminar in Twentieth-Century Architecture (3/5)** Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in art history, architecture, architectural history, or permission of instructor. Offered: jointly with ARCH 558.

**ART H 592 Seminar in American Architecture (5)** *Clausen* Topics vary. Offered: jointly with ARCH 529.

**ART H 598 Master's Practicum (\* max. 15)** Credit/no credit only.

**ART H 599 Reading and Writing Projects (2)** Art historical issues, methods, and materials. Required of all graduate majors registered in 400-level art history courses. Open also to graduate nonmajors.

**ART H 600 Independent Study or Research (\*)**

**ART H 700 Master's Thesis (\*)** Credit/no credit only.

**ART H 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Asian American Studies

See American Ethnic Studies.

## Asian Languages and Literature

223 Gowen

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/asian\\_lang\\_lit.html](http://www.washington.edu/students/genecat/academic/asian_lang_lit.html)

Department Web page:  
[depts.washington.edu/asian/](http://depts.washington.edu/asian/)

The Department of Asian Languages and Literature offers instruction in the principal languages and literatures of Asia, including East, Southeast, Central, and South Asia. Emphasis is placed on the roles of these languages within the cultures they serve as well as on linguistic, textual, and literary analysis. Courses on Asian literature in English are offered for majors and nonmajors alike.

## Graduate Program

Graduate Program Coordinator  
225 Gowen, Box 353521  
(206) 543-4996

The Department of Asian Languages and Literature offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees with specializations in (1) the languages and literatures of China; (2) the language and literature of Japan; (3) the languages and literatures of South Asia, subsuming Sanskrit and Hindi. All graduate students in the department must affiliate themselves with one of these three programs. The department does not offer degrees or specializations in language pedagogy.

Financial aid for graduate students newly entering the department is very limited and is awarded on a competitive basis. National Resource Fellowships are awarded for the study of Chinese, Japanese, Korean, and Hindi. The department offers incoming graduate students limited opportunities for teaching assistant positions in Chinese, Japanese, Korean, and Sanskrit. Since some financial aid is wholly or partially determined by need, all prospective students are urged to submit the Free Application for Federal Student Aid (FAFSA) with the College Scholarship Service in New Jersey, and to apply for other forms of aid mentioned in the department's cover letter to prospective students.

A full range of courses in other disciplines and aspects of Asian cultures and civilizations is available from other departments and schools of the University, such as the departments of Anthropology, Art History, History, Linguistics, Comparative Literature, and Political Science, and the Henry M. Jackson School of International Studies. Students in the Department of Asian Languages and Literature are encouraged to avail themselves of these offerings to complement and supplement their language and literature studies.

## Admission Requirements

Applicants for admission should present an undergraduate major in the language and literature of specialization (four years of language training for admission to the Chinese and Japanese programs; fewer years of language acquisition may be acceptable in South Asian languages), or the background and training equivalent to such a major. Students without such a background may be qualified for admission,

but will need to acquire the program prerequisites during the earliest stages of their graduate study. Besides an application and one original set of transcripts of prior postsecondary education (international students are required to send a second original set directly to the Office of Graduate Admissions), the department requires a statement of academic goals, and three letters of recommendation addressed to the Graduate Program Coordinator.

## Degree Requirements

The research component of the Master of Arts degree may be satisfied by the writing of either a thesis or two research papers. The Doctor of Philosophy degree requires a dissertation. In addition to the language of specialization, reading knowledge of a second (usually Western) language is required for the Master of Arts degree, and of a third (usually Asian) language for the Doctor of Philosophy degree. Neither English nor, usually, the student's native language may be used to fulfill these additional requirements.

## Faculty

### Acting Chair

Michael C. Shapiro

### Professors

Boltz, William \* 1981; PhD, 1974, University of California (Berkeley); classical Chinese.

Gething, Thomas W. 1995, (Affiliate); PhD, 1966, University of Michigan; Thai and Lao language and linguistics.

Knechtges, David R. \* 1972; PhD, 1968, University of Washington; Han and Six Dynasties literature.

Norman, Jerry \* 1971, (Emeritus); PhD, 1969, University of California (Berkeley); Chinese language and linguistics, Altaic linguistics.

Salomon, Richard G. \* 1981; PhD, 1975, University of Pennsylvania; Sanskrit language and literature.

Shapiro, Michael C. \* 1970; PhD, 1973, University of Chicago; Indo-Aryan languages and linguistics.

Shih, Vincent Y. 1945, (Emeritus); PhD, 1939, University of Southern California; Chinese.

Treat, John W. \* 1983, (Affiliate); PhD, 1982, Yale University; Japanese language and literature.

Yue-Hashimoto, Anne O. \* 1980; PhD, 1966, Ohio State University; Chinese language, linguistics and dialectology.

### Associate Professors

Brandauer, Frederick P. \* 1973, (Emeritus); PhD, 1973, Stanford University; traditional Chinese vernacular fiction and modern Chinese literature.

Cooke, Joseph R. \* 1967, (Emeritus); PhD, 1965, University of California (Berkeley); Thai language and literature.

Cox, Collett D. \* 1985; PhD, 1983, Columbia University; Buddhist studies (East and South Asian), Indian philosophy and religion, comparative religion.

Kano, Tamako-Niwa \* 1962, (Emeritus); PhD, 1956, Radcliffe; Japanese language.

Lukoff, Fred 1964, (Emeritus); PhD, 1954, University of Pennsylvania; Korean language and linguistics.

Tsutsui, Michio \* 1990, (Adjunct); PhD, 1984, University of Illinois; computer-aided instruction, international communication, Japanese linguistics, technical Japanese.

### Assistant Professors

Boltz, Judith M. 1999, (Affiliate); PhD, 1985, University of California (Berkeley); Chinese narrative.

Fulton, Bruce E. 1998, (Affiliate); .PhD, 1999, Seoul National University (Korea); modern Korean literature.

Handel, Zev \* 1998; MA, 1992, PhD, 1998, University of California (Berkeley); Chinese historical phonology, Sino-Tibetan linguistics.

Kern, Adam L. \* 1998; PhD, 1997, Harvard University; early modern Japanese literature, drama, and culture (popular and visual).

Kobayashi, Motoo \* 1994; PhD, 1994, University of Washington; modern and contemporary Japanese literature, comparative literature.

Lee, Ann Sung-Hi \* 1996; PhD, 1991, Columbia University; Korean literature.

Ohta, Amy S. \* 1995; PhD, 1993, University of California (Los Angeles); applied linguistics, acquisition of Japanese as a second language, sociolinguistics.

Ohta, Kaoru \* 1995; PhD, 1994, University of California (Los Angeles); Japanese linguistics, syntax, morphology.

Pauwels, Heidi R. \* 1997; PhD, 1994, University of Washington; medieval and modern Hindi language and literature, Hinduism, Sanskrit language and literature.

### Senior Lecturer

Nguyen, Kim O. 1984; PhD, 1973, University of California (Los Angeles); Vietnamese language and literature.

### Lecturers

Bi, Nyan-Ping 2000; MA, 1988, Indiana University; Chinese language.

Dreyfuss, Jeffrey 1998; PhD, 1981, University of Michigan; Indonesian language.

Kesavathana-Dohrs, Wiworn 1989; PhD, 1989, University of Michigan; Thai language and literature.

Kim, Soohee J. 1999; PhD, 1999, University of Washington; Korean language, morphology, phonology-phonetics interface, and historical linguistics.

Matsuda, Yuki 1997; PhD, 1997, University of Southern California; Japanese language and linguistics, formal syntax and semantics, foreign language teaching.

Matsuda-Kiami, Izumi 1996; MA, 1992, University of Wisconsin; Japanese language and pedagogy.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

## Asian Languages and Literature

**ASIAN 401 Introduction to Asian Linguistics (5) VLPA** Handel, K Ohta, Shapiro Linguistic analysis, with emphasis on languages of east, southeast, south, and central Asia. Includes phonetics, phonemics, morphology, syntax, historical reconstruction, linguistic typology, comparative grammar. Survey of major languages and language families of Asia. Diverse Asian languages as subjects of linguistic analysis. Prior knowledge of linguistics not required. Recommended: two years of any Asian language.

**ASIAN 404 Writing Systems (3) VLPA** Boltz, Salomon Origin, nature, and development of writing systems. Alphabets, syllabaries, and logographic systems; relation of writing systems to spoken languages; decipherment of previously undeciphered scripts. Prerequisite: ASIAN 401. Offered: alternate years.

**ASIAN 411 Buddhist Literature (5) VLPA, I&S** Overview of major Buddhist literary traditions of India, China, and Tibet from antiquity to the end of the first millennium CE. Special focus on Indian Mahayana

literature and the historical factors that accompanied its introduction and preservation in China and Tibet. Prerequisite: either RELIG 202, or RELIG 354. Offered: W.

**ASIAN 498 Special Topics (1-5, max. 15) VLPA** Offered occasionally by permanent or visiting faculty members. Topics vary. Offered: AWSp.

## Courses for Graduates Only

**ASIAN 503 Seminar in Asian Linguistics (1-5, max. 15)** *Handel, AS Ohta, K Ohta* Topics vary. Prerequisite: permission of instructor. Offered: AWSp.

**ASIAN 510 Teaching Assistant Training Workshop (3)** *AS Ohta* Introduction to issues and methods of teaching Asian languages in American college classrooms. Recommended for all new teaching assistants. Prerequisite: concurrent registration in ASIAN 518 and permission of instructor. Offered: A.

**ASIAN 518 Foreign Language Teaching Methodology (2)** *Brandl* Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with GERMAN 518/NEAR E 518/SCAND 518/SLAV 518.

**ASIAN 585 Seminar in Buddhism (3, max. 27)** *Cox* Systems and history of Buddhist thought. Original and secondary sources are used. Combines the methods of specialists in south, central, and east Asian Buddhism with those of historians of religion and philosophy. Prerequisite: permission of instructor. Offered: AWSp.

**ASIAN 600 Independent Study or Research (\*)** Offered: AWSpS.

**ASIAN 700 Master's Thesis (\*)** Offered: AWSpS.

**ASIAN 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Chinese

**CHIN 411 Fourth-Year Chinese (5) VLPA** *Yue-Hashimoto* Reading of unedited texts including newspaper articles, literary selections, and academic essays. Oral discussion, listening comprehension, and composition. Prerequisite: CHIN 313. Offered: A.

**CHIN 412 Fourth-Year Chinese (5) VLPA** *Yue-Hashimoto* Reading of unedited texts including newspaper articles, literary selections, and academic essays. Oral discussion, listening comprehension, and composition. Prerequisite: CHIN 411. Offered: W.

**CHIN 413 Fourth-Year Chinese (5) VLPA** *Yue-Hashimoto* Reading of unedited texts including newspaper articles, literary selections, and academic essays. Oral discussion, listening comprehension, and composition. Prerequisite: CHIN 412. Offered: Sp.

**CHIN 421 Business Chinese I (5) VLPA** *Chang* Focus on international trade issues of Greater China in the contemporary world. Subjects include international business activities such as trade, banking, marketing, finance, and investment. Prerequisite: CHIN 313. Offered: A.

**CHIN 422 Business Chinese II (5) VLPA** *Chang* Focus on international trade issues of Greater China in the contemporary world. Subjects include international business activities such as trade, banking, marketing, finance, and investment. Prerequisite: CHIN 421. Offered: W.

**CHIN 423 Business Chinese III (5) VLPA** *Chang* Focus on international trade issues of Greater China in the contemporary world. Subjects include interna-

tional business activities such as trade, banking, marketing, finance, and investment. Prerequisite: CHIN 422. Offered: Sp.

**CHIN 443 Structure of Chinese (5) VLPA** *Yue-Hashimoto* Outline of the major grammatical structures of Chinese. Focus on learning and teaching problems. Prerequisite: either CHIN 313 or CHIN 334. Offered: W.

**CHIN 451 First-Year Classical Chinese (5) VLPA** *Boltz* Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. To be taken in sequence. Prerequisite: CHIN 213. Offered: A.

**CHIN 452 First-Year Classical Chinese (5) VLPA** *Boltz* Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. To be taken in sequence. Prerequisite: CHIN 451. Offered: W.

**CHIN 453 First-Year Classical Chinese (5) VLPA** *Boltz* Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. To be taken in sequence. Prerequisite: CHIN 452. Offered: Sp.

**CHIN 461 History of Chinese Literature (5) VLPA** *Knechtges* Chinese literature from earliest times to the end of the Six Dynasties. Offered: A.

**CHIN 462 History of Chinese Literature (5) VLPA** *Knechtges* Chinese literature from the T'ang to the end of the Song. Offered: W.

**CHIN 463 History of Chinese Literature (5) VLPA** *Knechtges* Chinese literature from the Yuan to recent times. Offered: Sp.

**CHIN 470 Advanced Readings in Modern Chinese (5) VLPA** Reading and translation of scholarly articles and selections in the humanities and social sciences. Prerequisite: CHIN 413. Offered: A.

**CHIN 482 Advanced Readings in Modern Chinese (5) VLPA** Modern texts in the original, mainly works published since the beginning of the twentieth century. Focus on literature, primarily short story and essay. Offered: W.

**CHIN 496 Special Studies in Chinese (5, max. 15) VLPA** Topics vary.

**CHIN 499 Undergraduate Research (3-5, max. 15)** For Chinese language and literature majors. Offered: AWSpS.

## Courses for Graduates Only

**CHIN 532 Studies in Chinese Phonology (3)** *Handel* Sources and methods in the study of Chinese phonology; medieval period. Offered: W.

**CHIN 540 Seminar on Chinese Linguistics (3, max. 9)** *Handel, Yue-Hashimoto* Advanced topics in Chinese linguistics. Subject emphasis varies from year to year. Offered: Sp.

**CHIN 541 Seminar in Chinese Grammar (3, max. 9)** *Boltz, Yue-Hashimoto* Problems of theory and analysis of Chinese grammar, both synchronic and diachronic, modern and classical. Prerequisite: CHIN 443.

**CHIN 542 Chinese Historical Phonology (3)** *Handel* Introduction to Chinese historical phonology; emphasis on the Middle Chinese period. Prerequisite: ASIAN 401 and permission of instructor.

**CHIN 551 Second-Year Classical Chinese (5)** *Knechtges* Problems of grammar, rhetoric, and textual criticism. Early literary texts. Offered: A.

**CHIN 552 Second-Year Classical Chinese (5)** *Knechtges* Problems of grammar, rhetoric, and textual criticism. Later literary texts. Offered: W.

**CHIN 553 Second-Year Classical Chinese (5)** *Boltz* Continuation of 551, 552. Intermediate level readings in Han and pre-Han historical and philosophical texts. Prerequisite: CHIN 551 and CHIN 552. Offered: Sp.

**CHIN 554 Readings in Chinese Prose (5)** *Knechtges* Selected readings in the fu of the Han, Wei, Chin, and North-South Dynasties period. Offered: alternate years.

**CHIN 555 Readings in Chinese Prose (5)** *Knechtges* Selected readings in parallel prose (*pian*ti wen). Offered: alternate years.

**CHIN 556 Readings in Chinese Prose (5)** *Knechtges* Selected readings in *guwen* prose of the T'ang and Sung periods. Offered: alternate years.

**CHIN 557 Introduction to Chinese Philology and Textual Criticism (5)** *Boltz* Principles and methods of textual criticism and philological analysis of ancient Chinese texts. Study of both manuscripts and transmitted texts. Emphasis on Han and pre-Han documents; specific texts vary. Prerequisite: two years of classical Chinese and ASIAN 401. Offered: alternate years; W.

**CHIN 558 Seminar in Chinese Lexicology and Grammatonymy (3)** *Boltz* Study of the Chinese script, lexicographical history, and lexicological and etymological analysis. Prerequisite: two years of classical Chinese, ASIAN 401. Offered: alternate years.

**CHIN 559 Methods and Materials (5)** *Knechtges* Introduction to the basic reference works and methods of research in Chinese language and literature. Includes a history of Sinology, survey of basic bibliographies, dictionaries, atlases, catalogs, journals, literary collections, concordances, and other sources. Prerequisite: CHIN 551, CHIN 552. Offered: alternate years; A.

**CHIN 560 Proseminar in Chinese (3-5)** *Boltz, Knechtges* Methods and materials in the study of Chinese texts. Problems in textual analysis and Chinese literary history. Prerequisite: CHIN 553 and one of CHIN 554, CHIN 555, and CHIN 556.

**CHIN 561 Studies in Chinese Literature (5)** *Knechtges* Literature before Ch'in. Prerequisite: permission of instructor. Offered: W.

**CHIN 562 Studies in Chinese Literature (5)** *Knechtges* Poetry of the T'ang and Sung periods. Prerequisite: permission of instructor. Offered: Sp.

**CHIN 563 Studies in Chinese Literature (5)** *Knechtges* Literary theory and criticism. Prerequisite: permission of instructor.

**CHIN 573 Seminar in Chinese Poetry (5, max. 15)** Directed study of selected works of poetry. Subject emphasis varies each year. Prerequisite: permission of instructor. Offered: alternate years; W.

**CHIN 574 Seminar in Six Dynasties Literature (5, max. 15)** *Knechtges* Directed study of selected works of Six Dynasties. Subject emphasis varies each year. Prerequisite: permission of instructor. Offered: alternate years; Sp.

**CHIN 580 Readings in Vernacular Chinese Fiction (5, max. 15)** Directed study of selected works of premodern vernacular Chinese narrative, with an emphasis on Ming and Ch'ing fiction. Introduction to various critical approaches to the study of Chinese narrative. Offered: A.

**CHIN 582 Topics in Chinese Literature and Cultural Studies (5, max. 15)** Directed study of aspects of twentieth-century Chinese literary and popular cultures. Provides both historical coverage and a

grounding in various theoretical and methodological problems. Topics include print culture, cinema, popular music, as well as aspects of material culture; emphasis varies. Prerequisite: permission of instructor. Offered: W.

**CHIN 583 Seminar in Modern Chinese Literature (5)** Directed study of selected works of modern Chinese literature. Primary focus on the novel, short story, and essay. Offered: Sp.

**CHIN 590 Readings in the Thirteen Classics (5)** *Boltz* Selected readings from the Thirteen Classics, and from their associated exegetic and hermeneutic traditions. Readings and emphases vary from year to year. Prerequisite: two years of Classical Chinese and CHIN 557. Offered: alternate years.

## Hindi

**HINDI 401 Advanced Hindi (5) VLPA** Rapid reading of contemporary Hindi prose, poetry, and drama. Advanced conversation and composition. Offered: A.

**HINDI 402 Advanced Hindi (5) VLPA** Rapid reading of contemporary Hindi prose, poetry, and drama. Advanced conversation and composition. Offered: W.

**HINDI 403 Advanced Hindi (5) VLPA** Rapid reading of contemporary Hindi prose, poetry, and drama. Advanced conversation and composition. Offered: Sp.

**HINDI 404 Derivational Morphology of Hindi/Urdu (3) VLPA** *Shapiro* A systematic introduction to the derivational morphology of Hindi/Urdu. Sanskrit, Persian, Arabic, and English elements in Hindi/Urdu. Treatment of derivational prefixes and suffixes, stem alternations, and methods of compound formation. Prerequisite: HINDI 323. Offered: alternate years; W.

**HINDI 421 Survey of Modern Hindi Literature (3) VLPA** *Pauwels, Shapiro* Survey of Hindi literature from the late nineteenth century to the present. Readings from representative short stories. Prerequisite: HINDI 403.

**HINDI 422 Survey of Modern Hindi Literature (3) VLPA** *Pauwels, Shapiro* Survey of Hindi literature from the late nineteenth century to the present. Readings from representative poems. Prerequisite: HINDI 403.

**HINDI 423 Survey of Modern Hindi Literature (3) VLPA** *Pauwels, Shapiro* Survey of Hindi literature from the late nineteenth century to the present. Readings from representative novels. Prerequisite: HINDI 403.

**HINDI 431 Advanced Conversational Hindi (2, max. 8) VLPA** Conversational practice in contemporary Hindi. Prerequisite: HINDI 323. Offered: Sp.

**HINDI 451 Advanced Hindi Readings (3, max. 9) VLPA** Readings in Modern Standard Hindi prose texts drawn from diverse disciplines. Prerequisite: HINDI 403. Offered: W.

**HINDI 499 Undergraduate Research (3-5, max. 15)** Primarily for Hindi language and literature majors. Offered: AWSpS.

## Courses for Graduates Only

**HINDI 501 Studies in Medieval Braj Literature (3, max. 9)** *Pauwels* Introduction to the Braj dialect of Hindi and its literature. Prose readings and selected poetry by Surdas, Raskhan, Bihari, and others. Prerequisite: HINDI 403 or equivalent. Offered: A.

**HINDI 502 Studies in Medieval Avadhi Literature (3, max. 9)** *Pauwels* Introduction to the Avadhi dialect of Hindi and its literature. Readings from Ramcaritmanas of Tulsidas and Padmavat of Muhammad Malik Jayasi. Prerequisite: HINDI 403 or equivalent. Offered: W.

**HINDI 503 Studies in Medieval Sant Literature (3, max. 9)** *Shapiro* Introduction to the language and literature of Sant poets. Readings include Guru Nanak's Japuji and excerpts from Kabir's Granthavali. Prerequisite: HINDI 403 or equivalent.

**HINDI 504 Studies in Medieval Rajasthani Literature (3)** *Pauwels* Introduction to the literary language of Rajasthan. Reading of extracts from representative selections from Rajasthani literature. Prerequisite: HINDI 403 or equivalent.

## Indian

**INDN 401 Pali (3) VLPA** *Cox, Salomon* Introduction to Pali language and literature. Prerequisite: SNKRT 303.

**INDN 402 Pali (3) VLPA** *Cox, Salomon* Introduction to Pali language and literature.

**INDN 403 Introduction to Written Urdu (3) VLPA** Modern written Urdu for students with at least elementary knowledge of Hindi. Prerequisite: HINDI 313.

**INDN 404 Readings in Urdu Literature (3, max. 18) VLPA** Readings in Urdu prose and poetry. Urdu prose composition. Prerequisite: INDN 403.

**INDN 410 Prakrit (3, max. 6) VLPA** *Salomon* Introduction to the various Prakrit or Middle Indo-Aryan dialects (Gandhari, Magadhi, Maharashtri, Sauraseni) from literary, canonical, and inscriptional sources. Prerequisite: SNKRT 303.

**INDN 411 First-Year Intensive Bengali (15)** *Salomon* Study of modern Standard Bengali, including reading, writing, and conversation. Introduction to Bengali script. Offered: S.

**INDN 499 Undergraduate Research (3-5, max. 15)** Primarily for South Asian language and literature majors. Offered: AWSp.

## Courses for Graduates Only

**INDN 590 Special Topics in Indology (1-5, max. 12)** Studies in selected research topics in South Asian languages and literatures. Prerequisite: graduate standing and permission of instructor. Offered: Sp.

## Japanese

**JAPAN 421 Fourth-year Japanese for Professional and Academic Purposes I (5) VLPA/I&S** Class discussion, oral presentations, reading, and composition on topics related to the Japanese language and present-day Japan. Includes readings from Japanese newspapers and magazines. Conducted in Japanese. Prerequisite: JAPAN 313.

**JAPAN 422 Fourth-year Japanese for Professional and Academic Purposes II (5) VLPA/I&S** Class discussion, oral presentations, reading, and composition on topics related to the Japanese language and present-day Japan. Includes readings from Japanese newspapers and magazines. Conducted in Japanese. Prerequisite: JAPAN 421.

**JAPAN 423 Fourth-year Japanese for Professional and Academic Purposes III (5) VLPA/I&S** Class discussion, oral presentations, reading, and composition on topics related to the Japanese language and present-day Japan. Includes readings from Japanese newspapers and magazines. Conducted in Japanese. Prerequisite: JAPAN 422.

**JAPAN 431 Readings in Modern Japanese Literature (5) VLPA** Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax. Prerequisite: JAPAN 313.

**JAPAN 432 Readings in Modern Japanese Literature (5) VLPA** Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax.

**JAPAN 433 Readings in Modern Japanese Literature (5) VLPA** Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax.

**JAPAN 440 Introduction to Japanese Linguistics (5) VLPA** *AS Ohta, K Ohta* Overview of major topics in the linguistic description of Japanese: phonology, morphology, syntax, history, dialects, sociolinguistics, and the writing system. Elementary training in phonological, morphological, and syntactic analysis of Japanese. Prerequisite: JAPAN 313; recommended: introductory linguistics course.

**JAPAN 442 Morphology and Syntax of Japanese (5) VLPA** *K Ohta* Morphological and syntactic analysis of the Japanese language. Reading of research literature, training in analysis of Japanese language data, and contrastive analysis of Japanese with other languages. Prerequisite: JAPAN 313; JAPAN 440; LING 400.

**JAPAN 443 Topics in Japanese Sociolinguistics (5) VLPA/I&S** *AS Ohta* Methodology and theory of sociolinguistic analysis. Reading of research literature and training in analysis of Japanese language data. Prerequisite: JAPAN 313 which may be taken concurrently; recommended: JAPAN 343.

**JAPAN 445 Foreign Study: Fourth-Year Japanese (1-15, max. 20) VLPA** For participants in study abroad programs in Japan who complete 400-level language courses in approved programs in Japan. Evaluation by department/faculty required.

**JAPAN 460 Topics in Japanese Popular Culture and Literature (5) VLPA** Critical reading and analysis of multi-media texts related to various genres and aspects of popular culture and literature in Japan. Covers film and manga in particular. Primary texts in Japanese original. Prerequisite: JAPAN 313.

**JAPAN 471 Classical Japanese Grammar (5) VLPA** Introduction to classical grammatical forms and translation of classical literary texts. Prerequisite: JAPAN 313. Offered: A.

**JAPAN 472 Classical Japanese Grammar (5) VLPA** Introduction to classical grammatical forms and translation of classical literary texts. Prerequisite: JAPAN 471. Offered: W.

**JAPAN 473 Readings in Classical Japanese Literature (5) VLPA** Readings in prose, poetry, and drama, antiquity to nineteenth century. Prerequisite: JAPAN 472. Offered: Sp.

**JAPAN 499 Undergraduate Research (3-5, max. 15)** For Japanese language and literature majors. Offered: AWSpS.

## Courses for Graduates Only

**JAPAN 531 Advanced Readings in Modern Japanese Literature (5)** *Kobayashi* Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

**JAPAN 532 Advanced Readings in Modern Japanese Literature (5)** *Kobayashi* Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

**JAPAN 533 Advanced Readings in Modern Japanese Literature (5)** *Kobayashi* Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

**JAPAN 540 Seminar on Japanese Linguistics (3, max. 15)** *K Ohta* Problems in the history and structure of the Japanese language. Topics vary each quarter, according to the needs and interests of the students. Prerequisite: JAPAN 440 or permission of instructor.

**JAPAN 571 Advanced Readings in Classical Japanese Literature (5)** Continued readings in classical literary texts. Prerequisite: JAPAN 473 or permission of instructor.

**JAPAN 580 Development of Modern Japanese Fiction (5, max. 15)** Reading and translation of major works of modern fiction in the original, with emphasis on the chronological development of modern prose style. Offered: A.

**JAPAN 590 Seminar in Japanese Literature (5, max. 15)** Close examination of selected periods, writers, or genres, including problems of literary criticism in Japanese literature. Prerequisite: permission of instructor. Offered: Sp.

## Korean

**KOREAN 411 Readings in Contemporary Korean (5) VLPA** Completes the introduction to Korean writing in mixed script of 311, 312, 313. Prerequisite: KOREAN 313. Offered: A.

**KOREAN 412 Readings in Contemporary Korean (5) VLPA** Provide experience in reading a variety of contemporary styles. Materials from published works include informal essays, short stories, one-act plays, academic essays, and newspaper editorials. Offered: W.

**KOREAN 413 Readings in Contemporary Korean (5) VLPA** Provide experience in reading a variety of contemporary styles. Materials from published works include informal essays, short stories, one-act plays, academic essays, and newspaper editorials. Offered: Sp.

**KOREAN 415 Social Science Literature in Korean (3) VLPA** Readings in selections from contemporary Korean publications in social science topics. Prerequisite: KOREAN 413. Offered: A.

**KOREAN 416 Readings in Korean Literature (3) VLPA** Reading of various literature texts which may include pre-modern Korean narrative and poetry as well as modern literature and drama. Prerequisite: KOREAN 413. Offered: W.

**KOREAN 417 Readings in Korean Journals (3) VLPA** Selections from Korean newspapers, news magazines, and other journals. Prerequisite: KOREAN 413. Offered: Sp.

**KOREAN 499 Undergraduate Independent Study (3-5, max. 15)** For students who have completed 417 or equivalent. Offered: AWSpS.

## Courses for Graduates Only

**KOREAN 531 Advanced Readings in Modern Korean Literature (5)** *Lee* Literature and literary criticism in Korean. Prerequisite: fourth-year Korean or equivalent. Offered: alternate years.

**KOREAN 532 Advanced Readings in Traditional Vernacular Korean Literature (5)** *Lee* Readings in traditional Korean vernacular literature, including poetry, sung narrative, and fiction. Prerequisite: fourth-year Korean or equivalent. Offered: alternate years.

## Sanskrit

**SNKRT 401 Intermediate Sanskrit (5) VLPA** *Cox, Salomon* Further study of classical grammar; introduction to classical literature and Vedic language and texts. Prerequisite: SNKRT 303. Offered: A.

**SNKRT 402 Intermediate Sanskrit (5) VLPA** *Cox, Salomon* Further study of classical grammar; introduction to classical literature and Vedic language and texts. Offered: W.

**SNKRT 403 Intermediate Sanskrit (5) VLPA** *Cox, Salomon* Further study of classical grammar; introduction to classical literature and Vedic language and texts. Offered: Sp.

**SNKRT 411 Advanced Sanskrit (3, max. 9) VLPA** *Cox, Salomon* Reading and analysis of classical texts, chosen according to students' interests. Prerequisite: SNKRT 403. Offered: A.

**SNKRT 412 Advanced Sanskrit (3, max. 9) VLPA** *Cox, Salomon* Reading and analysis of classical texts, chosen according to students' interests. Offered: W.

**SNKRT 413 Advanced Sanskrit (3, max. 9) VLPA** *Cox, Salomon* Reading and analysis of classical texts, chosen according to students' interests. Offered: Sp.

**SNKRT 491 Vedic Studies (3) VLPA** *Salomon* Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture. Prerequisite: SNKRT 303.

**SNKRT 492 Vedic Studies (3) VLPA** *Salomon* Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture.

**SNKRT 499 Undergraduate Research (3-5, max. 15)** Primarily for Sanskrit language and literature majors. Offered: AWSp.

## Courses for Graduates Only

**SNKRT 550 Seminar on Sanskrit Literature (3, max. 9)** *Salomon* Detailed study of selected authors, periods, or traditions, within the context of Indian literary history. Prerequisite: SNKRT 403 or permission of instructor.

**SNKRT 560 Readings in Philosophical Sanskrit (3, max. 9)** *Cox, Potter, Salomon* Intensive reading and analysis of Hindu or Buddhist philosophical texts. Prerequisite: SNKRT 494 or permission of instructor. Offered: AWSp.

**SNKRT 570 Seminar in Indian Epigraphy and Paleography (3, max. 6)** *Salomon* Introduction to the study of inscriptions and other original documents in Sanskrit and Prakrit languages and in Kharosthi, Brahmi, and derived scripts. History of writing in India and development of Indic scripts. Methods of critical evaluation of inscriptions as sources of political and cultural history. Prerequisite: SNKRT 403.

**SNKRT 581 Readings in Buddhist Texts (3, max. 9)** *Cox* Interpretation of original sources. Texts vary from year to year. Prerequisite: ability to study sources in the original languages, an introduction to Buddhist thought, and permission of instructor.

## Thai

**THAI 401 Intermediate Thai (5) VLPA** *Kesavatana-Dohrs* Continuation of 303. Expands students' abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 303. Offered: A.

**THAI 402 Intermediate Thai (5) VLPA** *Kesavatana-Dohrs* Expands students' abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 401. Offered: W.

**THAI 403 Intermediate Thai (5) VLPA** *Kesavatana-Dohrs* Expands students' abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 402. Offered: Sp.

**THAI 410 Accelerated Reading and Writing (5) VLPA** *Kesavatana-Dohrs* Accelerated Thai for fluent speakers who do not read or write Thai. Emphasis on reading and writing through Intermediate Thai. Credit/no credit only.

**THAI 499 Undergraduate Research (3-5, max. 25)** For Thai language and literature majors. Offered: AWSp.

## Tibetan

**TIB 411 Readings in Tibetan (3) VLPA** Selections from various Tibetan materials. Prerequisite: TIB 313.

**TIB 412 Readings in Tibetan (3) VLPA** Selections from various Tibetan materials.

**TIB 413 Readings in Tibetan (3) VLPA** Selections from various Tibetan materials. Prerequisite: TIB 313.

**TIB 415 Readings in Tibetan Literature (3) VLPA** Reading of selections from Tibetan religious literature. May be taken in any sequence. Prerequisite: TIB 413.

**TIB 416 Readings in Tibetan Literature (3) VLPA** Reading of selections from Tibetan religious literature. May be taken in any sequence.

**TIB 417 Readings in Tibetan Literature (3) VLPA** Reading of selections from Tibetan religious literature. May be taken in any sequence.

**TIB 499 Undergraduate Research (3-5, max. 15)** For Asian languages and literature majors.

## Courses for Graduates Only

**TIB 511 Advanced Literary Tibetan (3, max. 9)** Reading of manuscripts and xylographs with emphasis on biographical, historical, and religious material. Prerequisite: TIB 413 or equivalent.

**TIB 512 Advanced Literary Tibetan (3, max. 9)** Reading of manuscripts and xylographs with emphasis on biographical, historical, and religious material. Prerequisite: TIB 413 or equivalent.

**TIB 513 Advanced Literary Tibetan (3, max. 9)** Reading of manuscripts and xylographs with emphasis on biographical, historical, and religious material. Prerequisite: TIB 413 or equivalent.

**TIB 531 Buddhist Tibetan (3, max. 9)** Reading and analysis of Tibetan Buddhist texts and associated literature. Selections vary each quarter and may be taken out of sequence. Prerequisite: TIB 413 or permission of instructor.

**TIB 532 Buddhist Tibetan (3, max. 9)** Reading and analysis of Tibetan Buddhist texts and associated literature. Selections vary each quarter and may be taken out of sequence. Prerequisite: TIB 413 or permission of instructor.

**TIB 533 Buddhist Tibetan (3, max. 9)** Reading and analysis of Tibetan Buddhist texts and associated literature. Selections vary each quarter and may be taken out of sequence. Prerequisite: TIB 413 or permission of instructor.

**TIB 541 Introduction to Tibetan Philology (3)** Philological methods in the study of Tibetan texts, blockprints as well as hand-written manuscripts. Specific examples taken from historical, religious, and autobiographical writings. Emphasis on historical philology and semasiology. Prerequisite: TIB 413 or TIB 417 and permission of instructor.

## Vietnamese

**VIET 496 Special Studies in Vietnamese (3-5, max. 15)** *Nguyen* Topics vary. Emphasizes improving language skills for research. Primarily for Southeast Asian Studies majors. Offered: AWP.

## Asian Studies

See International Studies.

## Astronomy

C319 Physics-Astronomy Building

General Catalog Web page:  
[www.washington.edu/students/gencaf/academic/astronomy.html](http://www.washington.edu/students/gencaf/academic/astronomy.html)

Department Web page:  
[www.astro.washington.edu](http://www.astro.washington.edu)

Modern research in astronomy and astrophysics encompasses a large number of disciplines and specialties, and the faculty members of the Department of Astronomy are active in many of these areas. Research areas of the department include planetary astronomy, stellar structure and evolution, interstellar matter, x-ray sources, galactic structure, extragalactic astronomy, galactic dynamics, quasars and galactic nuclei, and theoretical and observational cosmology. The department is part of a consortium of universities which operates a 3.5-meter optical/infrared telescope located on Sacramento Peak, New Mexico, and is a partner in the innovative Sloan Digital Sky Survey. Students also have access to a variety of national facilities, such as the Kitt Peak and Cerro Tololo observatories and the Very Large Array. A variety of research is conducted with satellite instruments such as the Hubble Space Telescope. The department operates a well-instrumented 30-inch telescope at the Manastash Ridge Observatory near Ellensburg. Data analysis and theoretical research are conducted on the department's cluster of SUN and SGI computers, and on a variety of UW and national supercomputer facilities. Undergraduate majors often assist faculty members in acquisition, reduction, and interpretation of data.

## Graduate Program

Graduate Program Coordinator  
C308 Physics-Astronomy, Box 351580  
(206) 543-7683

## Master of Science, Doctor of Philosophy

A series of graduate courses in solar system, stellar, galactic, and extragalactic astrophysics is offered. The heart of the graduate program is the collaboration of students and faculty members in research at the frontiers of astronomy. Students work collaboratively with members of the faculty to develop the techniques and insight necessary for successful research, and, subsequently, to define a thesis topic. The student's thesis research may be purely theoretical or use observational material (obtained through the facilities of either the University of Washington or one of the national observatories) or a combination. Active research programs are being carried out in the areas of stellar interiors, stellar atmospheres, planetary atmospheres and surfaces, x-ray sources, interplanetary dust, interacting binary stars, extragalactic astronomy, gravitation, interstellar matter, dark matter, cosmology, relativistic astrophysics, and computational astrophysics.

## Admission Qualifications

Most, though not all, entering students have a bachelor's degree in physics. Entering students are not required to have a background in astronomy, although some knowledge of general astronomy is expected of those to whom a teaching assistantship is to be offered. Undergraduates interested in a graduate program in astronomy are urged to concentrate on preparation in physics and mathematics before entering.

## Assistantships

Normally all students making satisfactory academic progress receive financial support. More than three-quarters of the department's graduate students hold fellowships or research assistantships. A number of teaching assistantships are available, primarily in the elementary astronomy courses.

## Faculty

### Chair

Craig J. Hogan

### Professors

Adelberger, Eric G. \* 1972, (Adjunct); PhD, 1967, California Institute of Technology; experimental nuclear physics.

Anderson, Scott F. \* 1988, (Research); PhD, 1985, University of Washington; quasars and active galaxies, x-ray astronomy.

Balick, Bruce \* 1975; PhD, 1971, Cornell University; radio astronomy, ionized nebulae, peculiar galaxies.

Bardeen, James M. \* 1976, (Adjunct); PhD, 1965, California Institute of Technology; general relativity, theoretical astrophysics.

Bohm, Karl-Heinz \* 1967, (Emeritus); PhD, 1954, University of Kiel (Germany); stellar atmospheres, star formation.

Bohm-Vitense, Erika H. \* 1968, (Emeritus); PhD, 1951, University of Kiel (Germany); stellar atmospheres, pulsating stars.

Boynton, Paul E. \* 1970; PhD, 1967, Princeton University; high-energy astrophysics, astronomy.

Brownlee, Donald E. \* 1965; PhD, 1971, University of Washington; origin of the solar system, comets, interplanetary dust.

Haxton, Wick C. \* 1984, (Adjunct); PhD, 1976, Stanford University; theoretical physics, nuclear physics.

Hodge, Paul W. \* 1965; PhD, 1960, Harvard University; extragalactic astronomy, interplanetary dust.

Hogan, Craig J. \* 1990; PhD, 1980, Cambridge University (UK); astrophysical cosmology, especially the origin of astronomical structures in the expanding universe.

Jacobsen, Theodore S. 1979, (Emeritus); PhD, 1926, University of California (Berkeley); astronomy.

Lake, George Russell \* 1985; PhD, 1980, Princeton University; stellar dynamics, galaxy structure and formation, cosmology, computational astrophysics.

Margon, Bruce H. \* 1980; PhD, 1973, University of California (Berkeley); galactic and extragalactic x-ray astronomy, optical counterparts of x-ray sources.

Stubbs, Christopher \* 1981; PhD, 1988, MSc, 1988, University of Washington; observational cosmology and gravitation.

Sullivan, Woodruff T. III \* 1973; PhD, 1971, University of Maryland; radio astronomy, galactic and extragalactic structure, history of astronomy.

Szkody, Paula \* 1982; PhD, 1975, University of Washington; cataclysmic variables, photometry, spectroscopy.

Wallerstein, George \* 1965, (Emeritus); PhD, 1958, California Institute of Technology; chemical composition of stars, peculiar stars, interstellar matter.

### Associate Professors

Hawley, Suzanne \* 1999, (Research); PhD, 1989, University of Texas (Austin); stellar astronomy.

Quinn, Thomas R. \* 1993, (Research); PhD, 1986, Princeton University; solar system dynamics and galaxy formation.

### Assistant Professors

Dalcanton, Julianne \* 1998; PhD, 1995, Princeton University; evolution and formation of galaxies.

Gonzalez, Guillermo \* 1987, (Research); PhD, 1993, University of Washington; stellar evolution, star formation, planetary systems.

Richardson, Derek C. \* 1996, (Research); PhD, 1993, Cambridge University (UK); solar system dynamics.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ASTR 421 Stellar Observations and Theory (3) NW** Observations and theory of the atmospheres, chemical composition, internal structure, energy sources, and evolutionary history of stars. Prerequisite: PHYS 224; PHYS 225; PHYS 228.

**ASTR 422 Interstellar Material (3) NW** Description and physics of the matter between the stars. Physical conditions, distribution, evolution, and motions of interstellar atoms, molecules, and dust grains. Exchange of energy and matter between stars and interstellar material. Prerequisite: either ASTR 322 or ASTR 421; PHYS 321; PHYS 324.

**ASTR 423 High-Energy Astrophysics (3) NW** High-energy phenomena in the universe. Includes supernova, pulsars, neutron stars, x-ray and gamma-ray sources, black holes, cosmic rays, quasi stellar objects, active galactic nuclei, diffuse background radiations. Radiative emission, absorption processes, and models derived from observational data. Prerequisite: PHYS 224; PHYS 225.

**ASTR 480 Introduction to Astronomical Data Analysis (5) NW** Hands-on experience with electronic imaging devices (CCDs) and software for image reduction and analysis. Introduction to operating systems, reduction software, and statistical analysis with applications to CCD photometry. Prerequisite: ASTR 323.

**ASTR 481 Introduction to Astronomical Observation (5) NW** Theory and practice of obtaining optical data at a telescope. Preparation, obtaining data with a CCD on a telescope, and subsequent data analysis for completion of a research project. Prerequisite: ASTR 480.

**ASTR 497 Topics in Current Astronomy (1-3, max. 9) NW** Recent developments in one field of astronomy or astrophysics.

**ASTR 499 Undergraduate Research (\* max. 15)** Special astronomical problems and observational projects, by arrangement with instructor.

## Courses for Graduates Only

**ASTR 500 Seminar in Elementary Astronomy Instruction (1, max. 5)** Seminar in the preparation of lecture and workshop materials with emphasis on demonstration, visual aids, and the evaluation of students' progress. Credit/no credit only.

**ASTR 507 Physical Foundations of Astrophysics I (3)** Thermodynamics from an astronomer's point of view: black body radiation, basic radiative transfer, equation of state, degenerate gases, crystallization at high density.

**ASTR 508 Physical Foundations of Astrophysics II (3)** Introduction to astronomical hydrodynamics and magnetohydrodynamics, basic theorems and application to stellar and interstellar magnetic fields. Introduction to plasma physics, waves in a plasma.

**ASTR 509 Physical Foundations of Astrophysics III (3)** Potential theory as applied to astrophysical systems. Orbits. Integrals of motion. Equilibrium and stability of stellar systems. Encounters of Stellar Systems. Kinetic theory of collisional systems. Applications of stellar dynamics to star clusters, galaxies, and large-scale structure.

**ASTR 510 Nuclear Astrophysics (3)** Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae; nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with PHYS 554; A.

**ASTR 511 Galactic Structure (3)** Kinematics, dynamics, and contents of the galaxy. Spiral structure. Structure and evolution of galaxies.

**ASTR 512 Extragalactic Astronomy (3)** Types of galaxies. Integrated properties, content, and dynamics. Extragalactic distance scale, groups and clusters. Radio sources. Observational cosmology.

**ASTR 513 Cosmology and Particle Astrophysics (3)** Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter. Offered: jointly with PHYS 555.

**ASTR 521 Stellar Atmospheres (3)** Theory of continuous radiation and spectral line formation. Applications to the sun and stars. Prerequisite: PHYS 421 or equivalent.

**ASTR 522 Stellar Atmospheres (3)** Theory of continuous radiation and spectral line formation. Applications to the sun and stars. Prerequisite: PHYS 421 or equivalent.

**ASTR 531 Stellar Interiors (4)** Physical laws governing the temperature, pressure, and mass distribution in stars. Equation of state, opacity, nuclear energy generation, computational methods. Models of main sequence stars and star formation. Prerequisite: PHYS 421 or equivalent.

**ASTR 532 Stellar Evolution (3)** Theoretical and observational approaches to stellar evolution. Structure of red giants, supernovae, and white dwarfs. Observations of star clusters and the chemical composition of stars as they relate to the theory of stellar structure. Prerequisite: ASTR 531.

**ASTR 541 Interstellar Matter (3)** Physical conditions and motions of neutral and ionized gas in interstellar space. Interstellar dust, magnetic fields, formation of grains, clouds, and stars. Prerequisite: modern physics or permission of instructor.

**ASTR 555 Planetary Atmospheres (3)** Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ATM S 555/GPHYS 555.

**ASTR 557 Origin of the Solar System (3)** Nebular and nonnebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with GEOL 557/GPHYS 557.

**ASTR 561 High Energy Astrophysics (3)** Observed properties of supernovae, x-ray stars, radio sources, quasars. Theories explaining such objects. Origin of cosmic rays.

**ASTR 576 Astronomy Colloquium (1, max. 20)** Current research topics in astronomy and astrophysics. Credit/no credit only. Prerequisite: permission of department.

**ASTR 597 Topics in Observational Astrophysics (1-5, max. 20)** Credit/no credit only.

**ASTR 598 Topics in Theoretical Astrophysics (1-5, max. 20)** Credit/no credit only.

**ASTR 600 Independent Study or Research (\*)**

**ASTR 700 Master's Thesis (\*)**

**ASTR 800 Doctoral Dissertation (\*)**

### Master of Science, Doctor of Philosophy

Admission to the graduate program requires a baccalaureate degree in physical science, engineering, or mathematics, or its equivalent, as well as the Graduate Record Examination. The program of graduate study varies with each individual.

During the first year of graduate study, most students concentrate on developing a strong background in the fundamentals that underlie the atmospheric sciences and on getting a broad understanding of the wide range of problems encountered in the atmosphere. A qualifying examination is given toward the end of the first year of graduate study, as soon as possible after the student has completed 24 credits, including 12 credits in courses numbered 500 and above. All students desiring to proceed toward the Ph.D. degree must take this examination, and students desiring the Master of Science degree may elect to take it. This examination tests understanding of the fundamental aspects of the atmospheric sciences and of the relevant mathematics and physics. Physical reasoning, rather than factual information, is stressed. Those who pass the examination with distinction are encouraged to work toward the Ph.D. degree; those who pass continue toward the Master of Science degree. Students whose objective is the Master of Science degree may elect to submit a written-thesis proposal in lieu of the qualifying examination.

Research assistantships and a few teaching assistantships are available to full-time students. Applications are made through the department office.

## Faculty

### Chair

James R. Holton

### Professors

Badgley, Franklin \* 1953, (Emeritus); MS, 1948, PhD, 1951, New York University; atmospheric turbulence and diffusion.

Baker, Marcia \* 1980; MS, 1960, Stanford University; PhD, 1971, University of Washington; cloud physics, atmospheric geophysics.

Breidenthal, Robert E. \* 1980, (Adjunct); PhD, 1979, California Institute of Technology; turbulence, mixing, combustion, vorticity, bluff body flows.

Bretherton, Christopher S. \* 1984; PhD, 1984, Massachusetts Institute of Technology; convective cloud systems, boundary layer meteorology, numerical modeling, tropical meteorology.

Brown, Robert A. \* 1971, (Research); MS, 1962, University of California (Berkeley); PhD, 1969, University of Washington; geophysical fluid dynamics, planetary boundary layers, air-sea interaction, remote sensing.

Businger, Joost A. \* 1958, (Emeritus); PhD, 1954, University of Utrecht (Netherlands); boundary layer meteorology, air-sea interaction, atmospheric turbulence.

Charlson, Robert J. \* 1962, (Emeritus); MS, 1959, Stanford University; PhD, 1964, University of Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction and instrumentation.

Covert, David S. \* 1975, (Research); MS, 1971, PhD, 1974, University of Washington; atmospheric chemistry, aerosol instrumentation, aerosol physics, chemistry, optics.

Durrant, Dale R. \* 1987; MS, 1975, University of California (Berkeley); PhD, 1981, Massachusetts Institute of Technology; atmospheric dynamics, mesoscale meteorology, numerical simulation, mountain meteorology.

Fleagle, Robert G. \* 1948, (Emeritus); MS, 1944, PhD, 1949, New York University; air-sea interaction, science policy.

Gammon, Richard H. \* 1985, (Adjunct); PhD, 1970, Harvard University; atmospheric, marine, and environmental chemistry; biogeochemical cycles, global climate change.

Grenfell, Thomas C. \* 1968, (Research); MS, 1968, University of Chicago; PhD, 1972, University of Washington; atmospheric radiation, radiative transfer, remote sensing, sea-ice-snow optics, microwave theory.

Harrison, Don Edmunds \* 1985, (Affiliate); MS, 1973, PhD, 1977, Harvard University; ocean circulation modeling, large-scale atmosphere-ocean interaction, climate diagnostics/dynamics.

Hartmann, Dennis L. \* 1977; PhD, 1975, Princeton University; climate change, dynamic meteorology, radiation and remote sensing.

Hegg, Dean A. \* 1975, (Research); MS, 1976, PhD, 1979, University of Washington; atmospheric chemistry, cloud physics.

Hobbs, Peter V. \* 1963; PhD, 1963, University of London; Imperial College; aerosol/cloud/precipitation physics, atmospheric chemistry, air pollution, mesoscale meteorology.

Holton, James R. \* 1965; PhD, 1964, Massachusetts Institute of Technology; dynamic meteorology, middle atmosphere meteorology.

Houze, Robert A. \* 1972; MS, 1969, PhD, 1972, Massachusetts Institute of Technology; mesoscale meteorology, cloud physics and dynamics, radar meteorology, tropical meteorology.

Jaffe, Daniel A. \* 1997, (Adjunct); MS, 1983, PhD, 1987, University of Washington; atmospheric chemistry, urban and global air pollution, environmental education.

Katsaros, Kristina B. \* 1959, (Affiliate); PhD, 1969, University of Washington; air-sea interaction, radiative surface fluxes, remote sensing.

LaChapelle, Edward R. \* 1955, (Emeritus); ScD, 1967, University of Puget Sound; snow-ice physics.

Leovy, Conway B. \* 1967, (Emeritus); PhD, 1964, Massachusetts Institute of Technology; climatic role of clouds, planetary atmospheres and astrobiology, upper-atmosphere circulation.

Mass, Clifford F. \* 1981; PhD, 1978, University of Washington; synoptic and mesoscale meteorology.

Maykut, Gary \* 1969, (Research); PhD, 1969, University of Washington; polar air-sea-ice interaction, radiative transfer in ice and snow.

Overland, James E. \* 1983, (Affiliate); MS, 1971, University of Washington; PhD, 1973, New York University; arctic and North Pacific climate variability, sea ice.

Plant, William J. 1991, (Affiliate); PhD, 1972, Purdue University; remote sensing, atmosphere-ocean interaction.

Radke, Lawrence F. \* 1964, (Affiliate); MS, 1966, PhD, 1968, University of Washington; cloud/aerosol physics, optical and microwave remote sensing, airborne instrumentation/applications.

Reed, Richard J. \* 1954, (Emeritus); DSc, 1949, Massachusetts Institute of Technology; weather analysis and prediction, numerical modeling.

Rhines, Peter B. \* 1984; PhD, 1967, Cambridge University (UK); the circulation of the oceans and evolution of climate.

Sarachik, Edward S. \* 1984; PhD, 1966, Brandeis University; atmospheric dynamics, large scale atmosphere/ocean interactions, equatorial dynamics, climate change.

Tillman, James E. 1971, (Research); MS, 1961, Massachusetts Institute of Technology; Mars meteorology, humidity and temperature instrumentation, planetary boundary layers.

Tung, Ka Kit \* 1988, (Adjunct); PhD, 1977, Harvard University; atmospheric and geophysical fluid dynamics.

Untersteiner, Norbert \* 1957, (Emeritus); PhD, 1950, University of Innsbruck (Austria); air-sea-ice interaction, polar climatology, sea ice physics.

Wallace, John M. \* 1966; PhD, 1966, Massachusetts Institute of Technology; atmospheric general circulation, climate variability, climate change.

Warren, Stephen G. \* 1981; MA, 1969, PhD, 1973, Harvard University; atmospheric radiation, radiative properties of clouds, snow, and sea ice, Antarctic climate.

### Associate Professors

Bates, Timothy S. \* 1990, (Affiliate); MS, 1978, PhD, 1988, University of Washington; oceanic and atmospheric chemistry, air-sea exchange of gases and particles, aerosols and climate.

Battisti, David S. \* 1983; MS, 1981, PhD, 1988, University of Washington; large-scale atmosphere-ocean dynamics, climate dynamics, tropical circulation, arctic climate.

Bond, Nicholas A. 1997, (Affiliate); PhD, 1986, University of Washington; air-sea interaction, boundary layers, coastal and marine meteorology.

Chen, Shuyi S. \* 1991, (Affiliate); MS, 1985, University of Oklahoma; PhD, 1990, Pennsylvania State University; mesoscale dynamics and numerical modeling, atmospheric deep convection, tropical meteorology.

Colman, Bradley R. 1999, (Affiliate); ScD, 1984, Massachusetts Institute of Technology; operational weather analysis and forecasting, coastal meteorology and oceanography

Ferek, Ronald J. \* 1985, (Research); MS, 1978, PhD, 1982, Florida State University; atmospheric chemistry, aerosol-cloud interactions, marine aerosols, biomass burning emissions.

Ghan, Steven J. 1993, (Affiliate); MS, 1981, PhD, 1988, Massachusetts Institute of Technology; clouds/aerosol/tropospheric chemistry, climate modeling.

Harrison, Halstead \* 1971, (Emeritus); PhD, 1960, Stanford University; atmospheric chemistry, dispersion modeling, radiative transfer.

Locatelli, John D. 1969, (Research); BS, 1967, University of Washington; cloud and precipitation physics, synoptic and mesoscale meteorology.

Rothrock, David A. \* 1970, (Adjunct); PhD, 1969, Cambridge University (UK); physical oceanography, polar oceanography, polar ice remote sensing and modeling.

Smull, Bradley F. 1996, (Research); PhD, 1986, University of Washington; mesoscale and radar meteorology, tropical meteorology, large-scale atmosphere-ocean interaction.

### Assistant Professors

Alexander, M. Joan \* 1992, (Affiliate); MS, 1989, PhD, 1992, University of Colorado (Boulder); atmospheric gravity waves, middle atmosphere dynamics, planetary atmospheres.

Hakim, Gregory J. \* 1999; MS, 1993, PhD, 1997, State University of New York (Albany); synoptic and mesoscale meteorology; atmospheric dynamics; rotating, stratified turbulence.

Kamenkovich, Igor V. 1998, (Research); PhD, 1996, Massachusetts Institute of Technology; atmosphere-ocean coupled modeling, thermohaline circulation.

Mantua, Nathan J. 1998, (Affiliate); PhD, 1994, University of Washington; large-scale climate variability and predictability, the El Niño/Southern Oscillation.

Yuter, Sandra Ellyn \* 1990, (Research); PhD, 1996, University of Washington; physical meteorology, mesoscale meteorology, radar and remote sensing.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ATM S 431 Atmospheric Physics (5) NW** Energy transfer processes: solar and atmospheric radiation, turbulence, and boundary layer structure. Applications. Prerequisite: either ATM S 340 or PHYS 224. Offered: A.

**ATM S 441 Atmospheric Motions I (3) NW** Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Prerequisite: either AMATH 353 or MATH 309; MATH 324. Offered: A.

**ATM S 442 Atmospheric Motions II (5) NW** Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Includes laboratory exercises. Prerequisite: ATM S 441. Offered: W.

**ATM S 451 Instruments and Observations (5) NW** Principles of operating instruments for measuring important atmospheric parameters (e.g., temperature, humidity, aerosol concentration). Concepts of sensitivity, accuracy, representativeness, time re-

sponse. Manipulation of output data including signal processing and statistical analysis. Experimental design and implementation of the design in actual field experiments is included. Prerequisite: ATM S 350. Offered: Sp.

**ATM S 452 Weather Forecasting and Advanced Synoptic Meteorology (5) NW** Basic forecasting techniques. Application of numerical modeling and statistical approaches. Structure, evolution, and forecasting of convective systems. Radar applications. Diurnal and topographically-forced circulations. Aviation meteorology. Laboratories include extensive practice in forecasting and surface map analysis. Prerequisite: ATM S 370; ATM S 442. Offered: Sp.

**ATM S 458 Global Atmospheric Chemistry (4) NW** Global atmosphere as chemical system. Physical factors and chemical processes. Natural variabilities and anthropogenic change. Cycling of trace substances. Global issues such as climate change, acidic deposition, influences on biosphere. Prerequisite: either ATM S 358 or CHEM 456. Offered: jointly with CHEM 458; A.

**ATM S 460 Water in the Environment (3) NW Baker, Raymond, Waddington, Warren** Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136 and PHYS 123; PHYS 133. Offered: jointly with GPHYS 460 and PHYS 460. Offered: A.

**ATM S 480 Air-Quality Modeling (3) NW** Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Topics include meteorological dispersion models and various "receptor" models based on chemical "fingerprinting" of sources. Emphasizes current problems. Prerequisite: either CEE 381, ATM S 458, or CHEM 458. Offered: jointly with CEE 480; W.

**ATM S 492 Readings in Meteorology or Climatology (\*)** Credit/no credit only. Offered: AWSpS.

### Courses for Graduates Only

**ATM S 501 Fundamentals of Physics and Chemistry of the Atmosphere (5)** Fundamentals of hydrostatics, thermodynamics, radiation, cloud physics, and atmospheric chemistry. Offered: A.

**ATM S 502 Introduction to Synoptic Meteorology (3)** Overview of weather systems; atmospheric observations and data assimilation. Elementary manual and computer-aided synoptic analysis techniques. Interpretation of satellite and ground-based observations. Kinematics. Fronts and frontogenesis; life cycles of extratropical cyclones; related mesoscale phenomena. Numerical weather prediction; interpretation of forecast products. Offered: Sp.

**ATM S 505 Introduction to Fluid Dynamics (4)** Eulerian equations for mass, motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress, strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high, low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with AMATH 505/OCEAN 511; A.

**ATM S 508 Geochemical Cycles (4)** Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with OCEAN 523 and CHEM 523.

**ATM S 509 Geophysical Fluid Dynamics I (4)**

Dynamics of rotating stratified fluid flow in the atmosphere/ocean and laboratory analogues. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincaré, Kelvin, Rossby waves, geostrophic adjustment. Ekman layers. Continuously stratified dynamics: Inertia-gravity waves, potential vorticity, quasigeostrophy. Prerequisite: ATM S/AMATH 505/OCEAN 511. Offered: jointly with OCEAN 512; W.

**ATM S 510 Physics of Ice (3)**

Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Prerequisite: permission of instructor. Offered: jointly with GPHYS 510; alternate years; W.

**ATM S 511 Formation of Snow and Ice Masses (3)**

Snow and ice climatology. Formation of the ice crystals in clouds. Snow metamorphism. Transfer of radiative, sensible, and latent heat at snow and ice surfaces. Remote sensing of snow and ice. Growth and melt of sea ice. Climatic records from ice. Prerequisite: permission of instructor. Offered: jointly with GPHYS 511; alternate years; A.

**ATM S 512 Dynamics of Snow and Ice Masses (3)**

Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with GPHYS 512; alternate years; Sp.

**ATM S 513 Structural Glaciology (3)**

Physical and chemical processes in snow, stratigraphy, and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism of ice from flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between structures and bulk physical properties. Prerequisite: permission of instructor. Offered: jointly with GPHYS 513; alternate years; W.

**ATM S 514 Ice and Climate Modeling (3)**

Principles of global climate modeling. Modeling seasonal cycles of snow cover and sea ice. Ice-sheet mass balance and flow. Solar radiation anomalies due to changes in earth's orbit. Climate/ice-sheet models of Pleistocene ice ages. Prerequisite: permission of instructor. Offered: jointly with GPHYS 514; alternate years.

**ATM S 520 Atmospheric Sciences Colloquium (1, max. 15)**

Seminars on current research in advanced topics related to atmospheric sciences, conducted by faculty and visiting professors/scientists. Includes presentation of doctoral dissertations by department graduate students. For Atmospheric Sciences graduate students only. Credit/no credit only. Prerequisite: permission of department. Offered: AWSp.

**ATM S 521 Seminar in Atmospheric Dynamics (\*)**

Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

**ATM S 523 Seminar in Clouds and Precipitation (\*)**

Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: AW.

**ATM S 524 Seminar in Energy Transfer and Remote Sensing (\*)**

Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: ASp.

**ATM S 525 Seminar Topics in Atmospheric Chemistry (1-3, max. 6)**

Seminar for atmospheric scientists, chemists, and engineers in problems associated with the chemical composition of the atmosphere. Topics range from the natural system to urban pollution and global atmospheric change.

Faculty lectures and student participation. Prerequisite: CEE 301 or permission of instructor. Offered: jointly with CEE 553; W.

**ATM S 532 Atmospheric Radiation: Shortwave (3)**

Principles of radiative transfer in planetary atmospheres with emphasis on single and multiple scattering of visible and infrared radiation. Applications to atmosphere and surface energy balance and remote sensing. Prerequisite: PHYS 323 or permission of instructor. Offered: jointly with GPHYS 532; alternate years.

**ATM S 533 Atmospheric Radiation: Longwave (3)**

Principles of radiative energy exchange in planetary atmospheres with emphasis on emission and absorption of infrared and microwave radiation. Applications to atmospheric and surface energy balance and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: jointly with GPHYS 533; Sp.

**ATM S 534 Remote Sensing of the Atmosphere and Climate System (3)**

Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications to research. Prerequisite: ATM S 532 or ATM S 533. Offered: jointly with GPHYS 534; alternate years

**ATM S 535 Cloud Microphysics and Dynamics (3)**

Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with GPHYS 535; W.

**ATM S 536 Mesoscale Storm Structure and Dynamics (3)**

Techniques of observing storm structure and dynamics by radar and aircraft, observed structures of precipitating cloud systems, comparison of observed structures with cloud models. Prerequisite: ATM S 535 or GPHYS 535. Offered: alternate years; Sp.

**ATM S 542 Synoptic and Mesoscale Dynamics (3)**

Quasi-geostrophic theory, baroclinic instability, symmetric instability, tropical disturbances, frontogenesis, orographic disturbances, convective storms. Prerequisite: ATM S 509/OCEAN 512 and AMATH 402 or equivalents. Offered: Sp.

**ATM S 545 General Circulation of Atmosphere (3)**

Requirements of the global angular momentum, heat, mass, and energy budgets upon atmospheric motions as deduced from observations. Study of the physical processes through which these budgets are satisfied. Prerequisite: ATM S 509/OCEAN 512 or permission of instructor. Offered: A.

**ATM S 547 Boundary Layer Meteorology (3)**

Turbulence, turbulent fluxes, averaging. Convection and shear instability. Monin-Obukhov similarity theory, surface roughness. Wind profiles. Organized large eddies. Energy fluxes at ocean and land surfaces, diurnal cycle. Convective and stable stratified boundary layers. Cloud-topped boundary layers. Remote sensing. Boundary layer modeling and parameterization. Prerequisite: ATM S 505, AMATH 505, or OCEAN 511. Offered: alternate years; Sp.

**ATM S 551 Atmospheric Structure and Analysis I: Synoptic Scale Systems (4)**

Extratropical cyclones and cyclogenesis. Jet streams. Upper waves in the westerlies. Diagnosis of vertical motions. Fronts and frontogenesis. Prerequisite: ATM S 502 and ATM S 509/OCEAN 512. Offered: alternate years; A.

**ATM S 552 Objective Analysis (3)**

Review of objective analysis techniques commonly applied to atmospheric problems; examples from the meteorological literature and class projects. Superposed epoch analysis, cross-spectrum analysis, filtering, eigenvector analysis, optimum interpolation techniques. Offered: alternate years; W.

**ATM S 555 Planetary Atmospheres (3)** Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/GPHYS 555; alternate years.

**ATM S 556 Planetary-Scale Dynamics (3)**

Zonally symmetric circulations, planetary waves, equatorial waves, dynamics of the middle atmosphere, trace constituent transport, nonlinear aspects of atmospheric flows. Prerequisite: ATM S 542 or permission of instructor. Offered: alternate years; Sp.

**ATM S 558 Atmospheric Chemistry (3)**

Photochemistry of urban, rural, and marine tropospheric air, and of the natural and perturbed ozone in the middle atmosphere. Unity of the chemistries in these apparently different regimes. Prerequisite: ATM S 458 or ATM S 501 or CHEM 457 or permission of instructor. Offered: alternate years; Sp.

**ATM S 560 Atmosphere/Ocean Interactions (3)**

Observations and theory of phenomena of the coupled atmosphere-ocean system. El Niño/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Credit/no credit only. Prerequisite: ATM S 509/OCEAN 512. Offered: jointly with OCEAN 560; alternate years; Sp.

**ATM S 571 Advanced Physical Climatology (3)**

Physical processes that determine the climate of Earth and its past and future changes. Greenhouse effect. Climate modeling. Radiative and dynamical feedback processes. Orbital parameter theory. Critical analysis of climate change predictions. Prerequisite: permission of instructor. Offered: A.

**ATM S 575 Large Scale Dynamics of the Tropical Atmosphere (3)**

Observations and underlying dynamics of large-scale tropical circulations. Factors that determine regions of large-scale persistent precipitation in the tropics, thermal forcing of atmospheric circulations by these regions, and temporal variability of the forcing and response. Credit/no credit only. Prerequisite: ATM S 509/OCEAN 512, 542. Offered: alternate years; W.

**ATM S 581 Numerical Modeling of Atmospheric Flows I (3)**

Numerical methods for initial value problems of atmospheric science and fluid dynamics. Finite difference methods, spectral and pseudo-spectral methods, finite element methods. Stability, accuracy, numerical dispersion and numerical dissipation. Computer models constructed to illustrate behavior of each method. Prerequisite: familiarity with partial differential equations and FORTRAN.

**ATM S 582 Numerical Modeling of Atmospheric Flows II (3)**

Topics of current interest including: efficient time differencing, semi-implicit and multiple time-step techniques. Semi-lagrangian schemes. Treatment of poorly resolved gradients. Flux-corrected transport. Positive definite advection schemes. Aliasing error and nonlinear instability. Wave permeable boundary conditions. Credit/no credit only. Prerequisite: ATM S 581. Offered: alternate years.

**ATM S 591 Special Topics (1-4, max. 9)**

Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor.

**ATM S 600 Independent Study or Research (\*)**

Credit/no credit only. Offered: AWSpS.

**ATM S 700 Master's Thesis (\*)**

Offered: AWSpS.

**ATM S 800 Doctoral Dissertation (\*)**

Offered: AWSpS.

## Biology

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**BIOL 401 Cell Biology (5) NW** *Bakken, Hille, Wakimoto, Wright* Selected topics in molecular cell biology. Strong emphasis on understanding original experiments that describe the functions of the cell. Prerequisite: either BIOL 202, BIOL 355, or GENET 371; either CHEM 221, CHEM 224, CHEM 239, or CHEM 337; either BIOL 355, GENET 372, ZOOL 301, ZOOL 485, BIOC 405, or BIOC 440.

**BIOL 402 Cell Biology Laboratory (3) NW** *Shellenbarger* Practice in modern methods (restriction enzyme digestion, blotting, hybridization, immunochromatography, density gradient centrifugation, electrophoresis) and other methods currently used to study plant and animal cells, nucleic acids, and proteins. Includes practice in scientific style writing. Prerequisite: BIOL 401, which may be taken concurrently.

**BIOL 405 Cellular and Molecular Biology of Human Disease (3) NW** *Wakimoto* Concepts of cellular and molecular biology as applied to human disease. Emphasis on current experimental approaches to investigate disease mechanisms and the contributions of model systems. Selected topics in cancer biology, viral induced disease, gene therapy. Prerequisite: BIOL 202; either BIOC 405, BIOC 440, BIOL 355, BIOL 401, GENET 371, GENET 372, ZOOL 301, ZOOL 455, or ZOOL 485.

**BIOL 438 Biological Monitoring and Assessment (5) NW** *Karr* Explores the technical questions (conceptual, sampling, and analytical), the rationale, policy relevance, and legal basis for tools—existing and needed—to assess ecological health. Prepares students to see the biological components of ecological systems in diverse ways. Offered: jointly with FISH 438.

**BIOL 454 Evolutionary Mechanisms (4) NW** *Kingsolver, Schemske* Evolutionary change as determined by mutation, selection, drift and other mechanisms. Effects of the genetic system, isolating mechanisms, and population structure on speciation. Examples of microevolutionary and macroevolutionary changes from the diversity of life. For advanced undergraduate and graduate students in biological sciences. Prerequisite: either BIOL 102 or BIOL 203.

**BIOL 470 Biogeography (4) NW** Analysis of historical and ecological determinants of current and past distributions of organisms. Integrates techniques developed by taxonomists, paleontologists, geologists, evolutionists, ecologists, and biogeographers to elucidate relationships between geographical distributions and continental drift, ecological interactions, climate, and dispersal abilities of organisms. Recommended: one year college biology; background in ecology and evolution.

**BIOL 472 Principles of Ecology (5) NW** Population biology, interactions between species in biological communities, relationship of community to environment, physiological ecology, principles of natural selection. Prerequisite: either BIOL 102 or BIOL 203.

**BIOL 473 Limnology (3) NW** *Schindler* Biological, physical, and chemical features of lakes and other inland waters. Prerequisite: either BIOL 102 or BIOL 203.

**BIOL 475 Limnology Laboratory (2) NW** *Schindler* Examination of biota of fresh waters, survey of limnological methods, and analysis of data. Prerequisite: BIOL 473, which may be taken concurrently.

**BIOL 476 Conservation Biology (5) NW** *Boersma* Explores biological, managerial, economic, and ethical concepts affecting survival of species. Applications of ecology, biogeography, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Prerequisite: either BIOL 102 or BIOL 203.

**BIOL 477 Marine Conservation (3) NW** Terrestrially based concepts of conservation biology applied to marine systems. Human activities affecting the marine environment including fishing and pollution; influence of legal and cultural frameworks; and ecosystem management. Prerequisite: BIOL 476.

**BIOL 490 Undergraduate Seminar (1-3, max. 6) NW** Supervised readings and group discussion of selected topics of broad biological significance. Prerequisite: BIOL 102, BIOL 202, or BIOL 203.

**BIOL 491 Special Topics in Biological Science for Teachers (3-9, max. 9) NW** Study of selected areas of biology. Designed to enhance the skills and background of K-12 teachers. Credit/no credit only. Recommended: teaching experience.

**BIOL 492 The Teaching of Biology (2)** Basic course in the teaching of biology in the secondary school. Designed to help preservice teachers identify useful laboratory techniques, materials, and content for the teaching of pre-college biology. Special attention to current issues in biology education. Required for biology student in Teacher Certification Program.

**BIOL 493 Study Abroad - Advanced Biology (1-15, max. 15) NW** For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

**BIOL 496 Peer Teaching Assistants in Biology (1-5, max. 10)** Direct experience in the classroom, typically teaching a lab section of BIOL 100. Peer Teaching Assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material as well as training in teaching techniques and approaches. Credit/no credit only. Prerequisite: either BIOL 102 or both BIOL 202 and BIOL 203. Offered: AWSp.

**BIOL 497 Special Topics in Biology (1-5, max. 10) NW**

**BIOL 498 Library Research (1-5, max. 10)**

**BIOL 499 Undergraduate Research (1-5, max. 15)**

### Courses for Graduates Only

**BIOL 501 Advanced Cytology (1-5, max. 5)** Detailed study of the structure and function of the cell.

**BIOL 508 Cell Biology (3, max. 6)** Four to five topics of current interest in cell biology selected by the enrollees.

**BIOL 520 Computers in Biology Instruction (2)** *Palka* Review and evaluation of software for undergraduate instruction in biology. Discussions on usefulness of different types of programs, e.g., simulations and interactive tutorials. Generation of new ideas and approaches for increasing use of computers in biology instruction. Credit/no credit. Credit/no credit only. Prerequisite: graduate student in biological or biomedical sciences.

**BIOL 581 Biology of Drosophila Seminar (1, max. 12)** Weekly presentation by participants of classical literature, current literature, and research in the molecular biology, developmental biology, neurobiology, and genetics of *Drosophila*. Prerequisite: permission of instructor. Offered: AWSp.

**BIOL 585 Methods and Problems in Development (3)** *Schubiger, Comai, Kimelman* Special topics in development. Integrates classical and current approaches. Developmental genetics, experimental embryology, molecular mechanisms of developmental regulation, and gene function in cell determination and differentiation in developing systems. Prerequisite: BIOL 455 or equivalent.

**BIOL 586 Analysis of Development (3, max. 6)** Analysis of structural, physiological, and molecular levels of developmental processes, including gametogenesis, fertilization, cell and tissue movements, induction, and cytodifferentiation. Prerequisite: ZOOL 456 and BIOC 442.

**BIOL 591 Problems in Biological Instruction (1-3, max. 3)**

## Botany

426 Hitchcock

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/botany.html](http://www.washington.edu/students/genecat/academic/botany.html)

Department Web page:  
[depts.washington.edu/botweb/](http://depts.washington.edu/botweb/)

Botany is concerned with the function and structure of plants, algae and fungi, their ecology and evolution, classification, physiology, development, and genetics. Emphasis is placed both on organismal and on cellular and molecular biology. Special courses and programs in botany of the Pacific Northwest are shared with related departments.

### Graduate Program

Graduate Program Coordinator  
430 Hitchcock, Box 355325  
(206) 543-1942  
[botweb@u.washington.edu](mailto:botweb@u.washington.edu)

The Department of Botany offers programs of graduate study leading to the Master of Science and Doctor of Philosophy degrees. Each program takes into consideration the background and interests of the student.

### Research Facilities

Special departmental facilities include a herbarium containing vascular plants, bryophytes, algae and fungi, a modern greenhouse, algae and fungal culture collections, growth chambers and rooms, modern instrumentation, and a scanning electron microscope center. The Friday Harbor Laboratories on San Juan Island offer opportunities for the study of marine botany. The great variety of habitats in the Pacific Northwest provide excellent opportunities for field investigations.

### Special Requirements

A prospective graduate student is expected to have had the equivalent of an undergraduate major in biological science, with training in chemistry (at least through organic chemistry), and background in general botany and genetics. Calculus and/or statistics are recommended.

### Financial Aid

Teaching assistantships and fellowships are awarded to selected applicants by March of each year. Students should inquire about research assistantships, training grants and other sources of support.

## Faculty

### Chair

Joseph F. Ammirati

### Professors

Ammirati, Joseph F. \* 1979; MA, 1967, San Francisco State; PhD, 1972, University of Michigan; mycology, taxonomy and ecology of fungi.

Bendich, Arnold J. \* 1970; PhD, 1969, University of Washington; chromosome structure in mitochondria, chloroplasts, and bacteria.

Bliss, Lawrence C. \* 1978, (Emeritus); PhD, 1956, Duke University; physiological plant ecology and ecosystem development and function, arctic, alpine environments.

Cattolico, Rose A. \* 1975; PhD, 1973, State University of New York (Stony Brook); plastid replication, nucleic acid biochemistry in synchronized unicellular algae.

Cleland, Robert E. \* 1964; PhD, 1957, California Institute of Technology; plant physiology, plant hormones.

Del Moral, Roger \* 1968; PhD, 1968, University of California (Santa Barbara); plant ecology, community structure, succession.

Dunwiddie, Peter W. 1998, (Affiliate); PhD, 1983, University of Washington.

Ebrey, Thomas 2000, (Research); PhD, 1968, University of Chicago; phototransaction in biology, halo bacteria.

Hall, Benjamin D. \* 1963; MA, 1956, PhD, 1959, Harvard University; yeast molecular genetics and molecular evolution of gene expression in eukaryotes.

Halperin, Walter \* 1968, (Emeritus); PhD, 1965, University of Connecticut; plant physiology, developmental anatomy, embryogenesis.

Haskins, Edward F. \* 1966, (Emeritus); PhD, 1965, University of Minnesota; cytology, ultrastructure of microorganisms, especially slime molds.

Hinckley, Thomas M. \* 1980, (Adjunct); PhD, 1971, University of Washington; forest tree physiology and autecology, subalpine ecosystems, water stress problems.

Kruckeberg, Arthur R. \* 1950, (Emeritus); PhD, 1950, University of California (Berkeley); evolution, flora of PNW, edaphic ecology, conservation.

Leopold, Estella B. \* 1976; PhD, 1955, Yale University; paleoecology, pollen and seed analysis, late Cenozoic environment.

Nester, Eugene W. \* 1962, (Adjunct); PhD, 1959, Case Western Reserve University; genetics and biochemistry of bacterial-plant cell interactions, tumorigenesis.

Schemske, Douglas W. \* 1989; PhD, 1977, University of Illinois; evolutionary biology, plant population biology and coevolution.

Tsukada, Matsuo \* 1969; PhD, 1961, Osaka City University (Japan); interpretation of Quaternary events from palynological and kindred data.

Van Volkenburgh, Elizabeth \* 1982; PhD, 1980, University of Washington; leaf growth and development, photobiology and electrophysiology.

Waaland, J. Robert \* 1969; PhD, 1969, University of California (Berkeley); biology of marine algae.

Walker, Richard B. \* 1948, (Emeritus); PhD, 1948, University of California (Berkeley); plant physiology, mineral nutrition, water relations.

Whisler, Howard C. \* 1963, (Emeritus); PhD, 1961, University of California (Berkeley); mycology, aquatic fungi, slime-molds and phycocyanes, development.

### Associate Professors

Bradshaw, Harvey D. \* 1984, (Adjunct Research); PhD, 1984, Louisiana State University; plant molecular biology and genetic modification of poplars.

Comai, Luca \* 1989; PhD, 1980, University of California (Davis); chromatin, functional genomics, polyploidy.

Hamilton, Clement Wilson \* 1985, (Adjunct); PhD, 1985, Washington University; landscape plant selection, taxonomy of horticultural and tropical plants.

Mandoli, Dina F. \* 1987, (Research); PhD, 1983, Stanford University; development and photomorphogenesis in giant unicell using genetics, physiology and molecular biology.

Olmstead, Richard G. \* 1996; PhD, 1988, University of Washington; plant molecular systematics, plant phylogeny and macroevolution.

Rodriguez, Russell 1995, (Affiliate); PhD, 1983, Oregon State University.

### Assistant Professors

Maron, John L. \* 1998; PhD, 1996, University of California (Davis); plant population biology, plant-consumer interactions, conservation biology.

Torii, Keiko \* 1999; PhD, 1993, University of Tsukuba (Japan); arabidopsis developmental genetics, receptor-mediated signal transduction.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsctat/](http://www.washington.edu/students/crsctat/).

**BOTANY 428 Molecular and Cellular Biology of Plants (3) NW** *Bendich, Cattolico, Comai* Structure and function of the nucleus, the organelles, and their genomes. Review of the techniques used in cellular and molecular biology such as tissue culture, cell fractionation, nucleic acid characterization, genetic engineering, and genome mapping. Prerequisite: either BIOL 101 or BIOL 203. Offered: W.

**BOTANY 429 Plant Nuclear and Cytoplasmic Genetics (3) NW** *Bendich, Comai* Covers genetic aspects specific to plants and algae, including chromosome structure, genome mapping, transposon biology, genes for floral and vegetative development, genetic engineering, ploidy levels, and cytoplasmic genetics. Prerequisite: either BIOL 101 or BIOL 203; either GENET 371 or GENET 372. Offered: Sp.

**BOTANY 441 Morphology and Anatomy of Land Plants (5) NW** *Halperin* Comparative morphology and anatomy of land plants. Derivation of morphological structures and basis for current classification schemes examined using living and fossil organisms. Laboratories emphasize live plants native to the Pacific Northwest. Prerequisite: either BIOL 102 or BIOL 203. Offered: A.

**BOTANY 443 Origins of Our Modern Floras (5) NW** *Leopold* Evolution and biogeographic development of modern forest taxa and associations. Late Cenozoic forests (last 60 million years) of western North American environments, emphasizing geologic and climatic shifts that have shaped temperate and tropical vegetation. Three required weekend field trips. Prerequisite: BOTANY 113; either BIOL 102 or BIOL 203. Offered: A.

**BOTANY 445 Marine Botany (8) NW** Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Prerequisite: either

BIOL 102 or BIOL 203; ZOO 430, which may be taken concurrently. Offered: at Friday Harbor Laboratories; Sp.

**BOTANY 446 Phycology (5) NW** *Cattolico, Waaland* Study of major algal groups emphasizing form, function, reproduction, and distribution. Topics include evolution, phylogeny, and classification. Economically useful and ecologically important algae emphasized. Prerequisite: either BIOL 102 or BIOL 203. Offered: Sp.

**BOTANY 455 Vegetation of Western Washington (5) NW** *del Moral* Vegetation of western Washington, including mature, seral, and weedy vegetation. Recognition of landscape patterns, sight identification of common and indicator species, classification of major community types, and uses of native species in landscape design. Four weekend field trips required. Recommended: either BOTANY 113 or BOTANY 354. Offered: even years; Sp.

**BOTANY 456 Plant Community Ecology (5) NW** *del Moral* Development of plant community theory; theory of vegetation structure and typical identification; numerical methods for vegetation description and pattern analysis; gradient analysis; competition in complex systems; vegetation dynamics; niche theory. Laboratory emphasizes field and computer methods. Three weekend field trips required. Prerequisite: either BOTANY 354 or BOTANY 455. Offered: odd years; Sp.

**BOTANY 458 Alpine Plant Ecology (5) NW** Structure of plant communities in alpine regions of the Pacific Northwest. Characteristics of physical environment which influence species adaptation and distribution. Influence, impact of humans and criteria for preservation and/or management of alpine areas. Three weekend field trips required. Prerequisite: either BIOL 102 or BIOL 203. Offered: S.

**BOTANY 461 General Mycology (5) NW** *Ammirati, Whisler* General survey of the fungi with emphasis on life cycles, structure, physiology, economic importance. Prerequisite: either BIOL 102 or BIOL 203. Offered: A.

**BOTANY 462 Mushrooms and Related Fungi (5) NW** *Ammirati* General biology, ecology, and classification of mushrooms, polypores, puffballs, and other related basidiomycetes. Emphasis on Pacific Northwest species. Prerequisite: either BIOL 102 or BIOL 203.

**BOTANY 490 Undergraduate Seminar (1-3, max. 6) NW** Presentation and discussion of undergraduate research, including honors projects, and selected topics in botany and related biological sciences. Offered: AWSp.

**BOTANY 496 Peer Teaching Assistantships in Botany (1-5, max. 5)** Direct experience in the classroom, typically teaching a lab section of an undergraduate course. Peer TA's attend lectures and weekly preparation meetings and gain in-depth background in the subject material as well as training in teaching techniques and approaches. Offered: AWSpS.

**BOTANY 498 Special Problems in Botany (1-15, max. 15)** Students with suitable background in botany may enroll for special study in phycology, anatomy, ecology, mycology, morphology, paleobotany, physiology, or taxonomy. Offered: AWSpS.

## Courses for Graduates Only

**BOTANY 502 Teaching Assistant Orientation (2)** Theory and practice of effective teaching in the laboratory. Students study the theory of being an effective teaching assistant in biological laboratories and receive direct experience in the laboratory setting. Credit/no credit only. Offered: A.

**BOTANY 505 Modern Botany (2, max. 4)** For incoming graduate students in botany and certain interdisciplinary programs. Reviews recent advances in modern botany, covering molecular, cellular, organismal, and community areas.

**BOTANY 511 Scanning Electron Microscopy and Energy Dispersive Spectroscopy (2/3)** *JR Waaland* Principles and practice of scanning electron microscopy and energy dispersive spectroscopy applied to biological and non-biological materials. Includes sample preparation, critical point drying, sputter coating, SEM operation, photomicrography, backscattered electron imaging, SEM alignment and performance maximization, x-ray microanalysis, x-ray dot maps, and quantitative x-ray microanalysis. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 520 Seminar (1, max. 18)** Credit/no credit only. Offered: AWPSP.

**BOTANY 521 Topics in Plant Physiology (1-3, max. 10)** *Cleland, Torii, Van Volkenburgh* Modern trends and methods in plant physiology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 523 Selected Topics in Mycology (1-3, max. 10)** *Ammirati* Selected topics from all phases of mycology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 524 Topics in Phycology (1-3, max. 10)** *Cattolico, Waaland* Topics from all phases of phycology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 525 Topics in Plant Ecology (1-3, max. 10)** *del Moral, Maron* Selected topics from various phases of plant ecology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 527 Advanced Topics in Plant Molecular Systematics and Evolution (1-3, max. 10)** *Hall, Olmstead* In-depth discussion of topics which emphasize molecular level systematics and evolution. Credit/no credit only. Prerequisite: permission of instructor. Offered: on demand.

**BOTANY 529 Topics in Plant Molecular Biology (1-3, max. 10)** *Bendich, Comai, Torii* Discussions of recent trends in plant molecular biology, genetics, and development. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 530 Topics in Plant Population Ecology (1-3, max. 10)** *Schemske* Discussions of recent developments in plant population biology and ecology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 545 Marine Phycology (9)** *Waaland* Morphology, life histories, systematics, and ecology of marine algae, with emphasis on the local flora. Prerequisite: 10 credits of biological sciences or permission of the Director of Friday Harbor Laboratories. Offered: at Friday Harbor; S.

**BOTANY 549 Advanced Phycology (9)** *Waaland* Varied marine algal flora of the San Juan region. Topic changes from year to year. Individual research projects. Prerequisite: BOTANY 545 or equivalent and permission of the Director of Friday Harbor Laboratories. Offered: at Friday Harbor.

**BOTANY 575 Transport Processes in Plants (3)** *Van Volkenburgh* Analysis of pathways and mechanisms of water, ion, and sugar transport in higher plants, from abiochemical understanding of membrane properties, water potential, and electrophysiology to whole plant control of water status, nutrient transport, and carbon allocation. Prerequisite: BOTANY 371 and BOTANY 372 or permission of instructor; recommended: 441. Offered: on demand.

**BOTANY 597 Advanced Reading in Botany (1-3, max. 12)** Reading and evaluation of subject matter in plant, algal, and fungal biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 598 Field Studies in Botany (1-6, max. 12)** Field studies of plants, algae or fungi. Emphasis on methods and techniques for gathering and evaluating field data. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 599 Laboratory Studies in Botany (1-6, max. 12)** Laboratory studies of plants, algae, and/or fungi. Emphasis on methods, procedures, and evaluating research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**BOTANY 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWPSP.

**BOTANY 700 Master's Thesis (\*)** Credit/no credit only. Offered: AWPSP.

**BOTANY 800 Doctoral Dissertation (\*)** Credit/no credit only. Offered: AWPSP.

## Chemistry

109 Bagley

General Catalog Web page:

[www.washington.edu/students/genecat/academic/chemistry.html](http://www.washington.edu/students/genecat/academic/chemistry.html)

Department Web page:

[www.chem.washington.edu](http://www.chem.washington.edu)

Chemistry is a branch of natural science that deals principally with the properties of substances, the changes they undergo, and the natural laws that describe these changes.

## Graduate Program

Graduate Program Coordinator  
109D Bagley, Box 351700  
(206) 543-4787  
[graduate@chem.washington.edu](mailto:graduate@chem.washington.edu)

The Master of Science and Doctor of Philosophy programs are designed to lead to positions of leadership and independent investigation in research institutes, industrial laboratories, and government agencies, and as teachers, researchers, or administrators in colleges and universities in chemistry or allied fields.

Students can pursue research in the following areas of chemistry: analytical, bioinorganic, bioorganic, biophysical, environmental, inorganic, medicinal, nuclear, organic, organometallic, physical, polymer, process analytical, and theoretical.

Thesis research for the Master of Science degree and dissertation research for the Doctor of Philosophy degree will constitute an original contribution of knowledge worthy of report in the scientific literature.

## Master of Science

**Admission Requirements:** Baccalaureate degree with major in chemistry or allied sciences; Graduate Record Examination.

**Graduation Requirements:** With Thesis—36 approved credits with 18 in courses at the 500 level or above; 21 credits in courses at the 400 or 500 level taken for numerical grade; 9 credits in thesis research. Without Thesis—Same as with thesis, except that additional course work may be substituted for the required research. Minimum GPA of 3.00 required for both degrees.

## Doctor of Philosophy

**Admission Requirements:** Same as for the Master of Science degree.

**Graduation Requirements:** 18-27 credits of approved courses at the 400 or 500 level, with a total minimum GPA of 3.00; candidacy examinations covering area of specialization; dissertation.

## Faculty

### Chair

Paul B. Hopkins

### Professors

Andersen, Niels H. \* 1968; PhD, 1967, Northwestern University; peptide secondary structure and protein folding, fold design and stability, biophysical NMR.

Anderson, Arthur G. \* 1946, (Emeritus); MS, 1942, PhD, 1944, University of Michigan; chemistry of nonclassical aromatic compounds and novel heterocycles.

Borden, Weston T. \* 1972; PhD, 1968, Harvard University; molecular orbital theory of organic molecules and reactions, synthesis of unnatural products.

Callis, James B. \* 1973; PhD, 1970, University of Washington; instrumentation development, process analytical chemistry, non-invasive clinical chemistry.

Campbell, Charles T. \* 1989; PhD, 1979, University of Texas (Austin); physical chemistry, analytical chemistry, surfaces, chemisorption, catalysis, biosensors.

Charlson, Robert J. \* 1962, (Emeritus); MS, 1959, Stanford University; PhD, 1964, University of Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction and instrumentation.

Christian, Gary D. \* 1972; PhD, 1964, University of Maryland; electroanalysis, flow injection analysis, process control.

Dalton, Larry R. \* 1998; PhD, 1971, Harvard University; materials chemistry focused on producing next-generation opto-electronic materials.

Drobny, Gary P. \* 1981; PhD, 1981, University of California (Berkeley); solid state nuclear magnetic resonance, biophysics, biomaterials.

Engel, Thomas \* 1980; PhD, 1969, University of Chicago; surface chemistry and catalysis.

Epiotis, Nicholas \* 1972; PhD, 1972, Princeton University; applied quantum chemistry.

Floss, Heinz G. \* 1987; PhD, 1961, Technical University of Munich (Germany); bioorganic and natural products chemistry.

Gammon, Richard H. \* 1985; PhD, 1970, Harvard University; atmospheric, marine, and environmental chemistry; biogeochemical cycles, global climate change.

Gelb, Michael H. \* 1985; PhD, 1982, Yale University; mechanistic enzymology, bioorganic and medicinal chemistry, molecular and cellular biology.

Gouterman, Martin \* 1966, (Emeritus); PhD, 1958, University of Chicago; electronic spectra and luminescence of porphyrins, oxygen pressure sensing by luminescence quenching.

Gregory, Norman W. \* 1946, (Emeritus); PhD, 1943, Ohio State University; structure and thermodynamic properties of inorganic substances, vaporization reactions.

Hakomori, Sen-itiroh \* 1967, (Adjunct); MD, 1951, DMedSc, 1956, Tohoku University (Japan); role of glycosphingolipids in defining antigenicity, cellular interaction, and signal transduction.

Halsey, George D. \* 1951, (Emeritus); PhD, 1948, Princeton University; surface absorption/interaction of rare gases, solid solutions of rare gases, catalysis, colloids.

Heinekey, Dennis M. \* 1991; PhD, 1982, University of Alberta (Canada); organometallic chemistry of the transition metals.

Hopkins, Paul B. \* 1982; PhD, 1982, Harvard University; organic synthesis, bioorganic and nucleic acid chemistry.

Jonsson, Hannes \* 1988; PhD, 1985, University of California (San Diego); theory and simulations of atomic scale structure and dynamics in liquids, glasses, and crystals.

Klevit, Rachel E. \* 1983, (Adjunct); DPhil, 1981, Oxford University (UK); structure/function of breast cancer proteins; protein NMR, mass spectrometry, other spectroscopies.

Kowalski, Bruce \* 1973, (Emeritus); PhD, 1969, University of Washington; analytical chemometrics, computerized instrumentation for process monitoring and control.

Krohn, Kenneth A. \* 1981, (Adjunct); PhD, 1971, University of California (Davis); chemistry, radiation oncology.

Kwiram, Alvin L. \* 1970; PhD, 1963, California Institute of Technology; molecular structure/dynamics in the solid state with emphasis on excited states, magnetic resonance.

Lingafelter, Edward C. \* 1939, (Emeritus); PhD, 1939, University of California (Berkeley); crystal and molecular structure of coordination compounds.

Mayer, James M. \* 1984; PhD, 1982, California Institute of Technology; inorganic, bioinorganic, organometallic transition metal chemistry; synthesis and reaction mechanisms.

Murray, James W. \* 1973, (Adjunct); PhD, 1973, Massachusetts Institute of Technology; marine geochemistry, aquatic chemistry.

Norman, Joe G. Jr. \* 1972; PhD, 1972, Massachusetts Institute of Technology; chemical education, interdisciplinary education.

Olmstead, Marjorie A. \* 1991, (Adjunct); PhD, 1985, University of California (Berkeley); experimental condensed-matter physics, surface and interface physics.

Palczewski, Krzysztof \* 1992; MS, 1980, PhD, 1986, Technical University of Wroclaw (Poland); visual transduction.

Parson, William W. \* 1971, (Adjunct); PhD, 1965, Case Western Reserve University; spectroscopic and computational studies of energy capture and electron transfer in photosynthesis.

Pocker, Yeshayau \* 1961, (Emeritus); PhD, 1953, University College, London (UK); DSc, 1960, University of London (UK); organic reaction mechanisms, chemical and enzymatic catalysis, metalloenzymes, Alzheimer proteins.

Rabinovitch, B. Seymour \* 1948, (Emeritus); PhD, 1942, McGill University (Canada); chemical dynamics, energy relaxation, properties of silver surfaces.

Raucher, Stanley \* 1975; PhD, 1973, University of Minnesota; new methods in synthetic organic chemistry, total synthesis of natural products.

Reid, Brian R. \* 1980; PhD, 1965, University of California (Berkeley); biophysical chemistry.

Reinhardt, William P. \* 1991; PhD, 1968, Harvard University; theoretical chemistry, atomic physics, applications to computational thermodynamics, quantum fluids

Robinson, Bruce H. \* 1980; PhD, 1975, Vanderbilt University; magnetic resonance, molecular dynamics, polymer dynamics, nonlinear response theory.

Ruzicka, Jaromir \* 1984; PhD, 1963, Technical University of Prague (Czech); analysis via flow injection for research in biotechnology and industrial applications.

Schubert, Wolfgang M. \* 1947, (Emeritus); PhD, 1947, University of Minnesota; mechanism/steric course of organic reactions, substituent and solvent effects, acid-base catalysis.

Schurr, J. Michael \* 1966; PhD, 1965, University of California (Berkeley); dynamics, structures, and energetics of linear and supercoiled DNAs; laser optical and NMR methods.

Slutsky, Leon J. \* 1961; PhD, 1957, Massachusetts Institute of Technology; lattice dynamics, kinetics of conformational change, physical absorption.

Stuve, Eric M. \* 1985, (Adjunct); MS, 1979, PhD, 1983, Stanford University; electrochemical surface science, fuel cell engineering.

Trager, William F. \* 1972, (Adjunct); PhD, 1965, University of Washington; medicinal chemistry, bioanalytical chemistry drug metabolism.

Turecek, Frantisek \* 1990; PhD, 1977, Charles University (Czechoslovakia); mass spectrometry of transient intermediates, organometallics and enzyme reactions.

Vandenbosch, Robert \* 1963, (Emeritus); PhD, 1957, University of California (Berkeley); nuclear fission and nuclear reaction mechanisms, atomic and molecular clusters, C60.

Yager, Paul \* 1987, (Adjunct); PhD, 1980, University of Oregon; physical chemistry and applications of biomembranes.

Zoller, William H. \* 1984; PhD, 1969, Massachusetts Institute of Technology; analytical, environmental, and nuclear chemistry.

### Associate Professors

Crittenden, Alden L. \* 1947, (Emeritus); PhD, 1947, University of Illinois; mass spectra, solid electrode polarography.

Goldberg, Karen 1995; PhD, 1988, University of California (Berkeley); synthetic and mechanistic organometallic chemistry.

Kahr, Bart E. \* 1997; PhD, 1988, Princeton University; mechanisms of crystal growth, structures of disordered and mixed crystals, crystal optics.

Kovacs, Julia A. \* 1988; PhD, 1986, Harvard University; synthesis, structure, and reactivity of biologically relevant transition-metal complexes.

Lybrand, Terry Paul \* 1990, (Adjunct); PhD, 1984, University of California (San Francisco); molecular modeling, computer simulation of biomacromolecules, development of simulation analysis.

Macklin, John W. \* 1968; PhD, 1969, Cornell University; spectrometric studies of electrode surface adsorbates, condensed phase materials and solutions.

Reid, Philip J. 1995; PhD, 1992, University of California (Berkeley); chemical reaction dynamics in solution.

Sasaki, Tomikazu \* 1989; PhD, 1985, Kyoto University (Japan); design and synthesis of functional proteins and protein mimetics.

Stenkamp, Ronald E. \* 1978, (Adjunct); PhD, 1975, University of Washington; crystallography, metalloproteins, protein engineering, blood clotting proteins, streptavidin.

Synovec, Robert E. \* 1986; PhD, 1986, Iowa State University; chemical analysis by high speed gas chromatography, liquid chromatography, surface tension.

Woodman, Darrell J. \* 1965; PhD, 1965, Harvard University; peptide synthesis, heterocyclic compounds, chemistry of ketoketenimines, computers in education.

### Assistant Professors

Beeson, Craig C. \* 1996; PhD, 1993, University of California (Irvine); chemistry and biochemistry of the immune system.

Prezhdo, Oleg \* 1998; PhD, 1997, University of Texas (Austin); excitation dynamics of condensed-phase chemical systems.

Sigurdsson, Snorri Th. \* 1996, (Research); , PhD, 1993, University of Washington; nucleic acids chemistry, RNA catalysts (ribozymes), RNA structure and function.

Simon, Julian A. \* 1996, (Affiliate); PhD, 1991, Columbia University; identification and characterization of new anticancer agents.

Xia, Younan \* 1997; PhD, 1996, Harvard University; materials chemistry and nanotechnology.

### Senior Lecturers

Nyasulu, Frazier W. 1991; PhD, 1985, University of Salford (UK); chemical education, electroanalytical chemistry, electro depositions.

Selfe, Sara 1983; PhD, 1983, University of Washington; chemical education, retention of underrepresented minorities and women in science and mathematics.

Wiegand, Deborah H. 1990; PhD, 1990, Northern Illinois University; chemical education, electrochemistry on liquid/liquid interfaces.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**CHEM 410 Radiochemistry Laboratory (2) NW** Introductory general service course for students planning further work in nuclear or tracer applications. Safety procedures, detection and measurement of nuclear radiation, radiochemical and tracer techniques. Prerequisite: either 1.7 in CHEM 155, 1.7 in both CHEM 160 and CHEM 161, or 1.7 in CHEM 162; recommended: CHEM 418. Offered: alternate years.

**CHEM 414 Chemistry of the Main Group Elements (3) NW** The elements and their compounds in relation to the periodic system. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 452 or CHEM 457, either CHEM 453 or CHEM 455. Offered: alternate years.

**CHEM 415 The Chemical Bond (3) NW** Nature of the chemical bond. Simple bonding theories, molecular orbital methods, symmetry, and group theory. Includes computer exercises in which students perform ab initio calculations. Prerequisite: either CHEM 453 or CHEM 455. Offered: W.

**CHEM 416 Transition Metals (3) NW** Survey of selected key topics in the chemistry of the transition metals, including emphasis on the structure, bonding, and reactivity of major classes of compounds. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 453 or CHEM 455 which may be taken concurrently. Offered: A.

**CHEM 417 Organometallic Chemistry (3) NW** Chemistry of the metal-carbon bond for both main group and transition metals. Structure and reactivity with applications to organic synthesis and catalysis. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; CHEM 416. Offered: W.

**CHEM 418 Nuclear Chemistry (3) NW** Natural radioactivity, nuclear systematics and reactions, radioactive decay processes, stellar nucleosynthesis, applications of radioactivity. Prerequisite: either CHEM 452 or CHEM 455. Offered: alternate years.

**CHEM 419 Bioinorganic Chemistry (3) NW** Description of transition metal-containing systems found in biology. Structural and electronic properties and reactivity of metalloproteins, metalloenzymes, and metallocofactors. Methods used to probe and model metal sites by spectroscopic and synthetic techniques. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; CHEM 416. Offered: Sp.

**CHEM 426 Instrumental Analysis (3) NW** Introduction to modern instrumental methods of chemical analysis, including chromatography, optical and mass spectroscopy, electrochemistry and flow injection analysis. Basic concepts of transducers, spectrometers, mass analysis, separation sciences, and computerized data acquisition and reduction. Includes laboratory. Prerequisite: CHEM 321. Offered: Sp.

**CHEM 427 Principles of Modern Wet Analysis (3) NW** Sampling and sample dissolution, multiple chemical equilibria, pH and electrochemical measurement, reagent-based kinetic enzyme assays and immunoassays. Principles of process, environmental, clinical, and biotechnological assays. Separations and flow injection. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335; CHEM 321.

**CHEM 429 Chemical Separation Techniques (3) NW** Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, electrophoresis, and field flow fractionation. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; either CHEM 241, CHEM 321, or CHEM 346. Offered: W.

**CHEM 433 Theoretical Organic Chemistry—Predictions and Experimental Tests (3) NW** Molecular orbital theory in organic chemistry. Woodward-Hoffmann rules, aromaticity, concerted reactions, photochemical transformations, and reactions of electron-deficient species. Prerequisite: either CHEM 239 or CHEM 337. Offered: alternate years.

**CHEM 435 Introductory Biophysical Chemistry (3) NW** Survey of the statics and dynamics of biophysical and biochemical processes. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; CHEM 452 or CHEM 455, either of which may be taken concurrently; recommended: either BIOC 405 or BIOC 440. Offered: alternate years; W.

**CHEM 436 Bioorganic Chemistry—Enzymes and Natural Products (3) NW** Enzyme chemistry and inhibition, including modes of biological catalysis, stereochemistry, enzyme characterization and kinetics, and design and principles of enzyme inhibitors. Also major classes of natural products, their chemistry, biological activity, biosynthesis, physiological role, and ecological significance. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; recommended: either BIOC 405 or BIOC 440. Offered: alternate years; Sp.

**CHEM 437 Organic and Bioorganic Chemistry of Nucleic Acids in Proteins (3) NW** Chemistry of DNA, RNA, peptides, and proteins. Solid phase chemical synthesis. Manual and automated sequencing. Conformational analysis. Peptide mimetics and protein design. Interaction of DNA with drugs and toxins. Triple helices and antisense oligonucleotides. Prerequisite: either CHEM 239 or CHEM 337.

**CHEM 452 Physical Chemistry for Biochemists I (3) NW** General equilibrium thermodynamics emphasizing biochemical applications: ligand binding, biological oxidation-reduction reactions, membranes, active transport, colligative properties, and surface tension. No more than the number of credits indicated can be counted toward graduation from the following course groups: 355, 452 (4 credits); 452, 456 (3 credits). Prerequisite: either CHEM 155, CHEM 160, or CHEM 162; either MATH 125, MATH 128, or MATH 134; either PHYS 115 or PHYS 122. Offered: AW.

**CHEM 453 Physical Chemistry for Biochemists II (3) NW** Continuation of 452. Includes transport properties, enzyme kinetics, introduction to quantum mechanics, spectroscopy, and classical statistical mechanics. Prerequisite: either CHEM 452 or CHEM 456; either MATH 126, MATH 129, or MATH 135; either PHYS 116 or PHYS 123. Recommended: MATH 307; MATH 308. Offered: WSp.

**CHEM 455 Physical Chemistry (3) NW** Introduction to quantum chemistry and spectroscopy. Theory of quantum mechanics presented at an elementary level and applied to the electronic structure of atoms and molecules and to molecular spectra. Prerequisite: either CHEM 155, CHEM 160, or CHEM 162; either MATH 126, MATH 129, or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: ASpS.

**CHEM 456 Physical Chemistry (3) NW** Chemical thermodynamics. Laws of thermodynamics presented with applications to phase equilibria, chemical equilibria, and solutions. No more than the number of credits indicated can be counted toward graduation from the following course groups: 452, 456 (3 credits). Prerequisite: either CHEM 155, CHEM 160, or CHEM 162; either MATH 126, MATH 129, or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307. Offered: WS.

**CHEM 457 Physical Chemistry (3) NW** Introduction to statistical mechanics, kinetic theory, and chemical kinetics. Prerequisite: CHEM 455; either CHEM E 326 which may be taken concurrently or CHEM 456. Offered: WSp.

**CHEM 458 Global Atmospheric Chemistry (4) NW** Global atmosphere as chemical system. Physical factors and chemical processes. Natural variabilities and anthropogenic change. Cycling of trace substances. Global issues such as climate change, acidic deposition, influences on biosphere. Prerequisite: either ATM S 358 or CHEM 456. Offered: jointly with ATM S 458; A.

**CHEM 460 Spectroscopic Molecular Identification (3) NW** Basic theory of spectral techniques—infrared and ultraviolet/visible spectroscopy, NMR, and mass spectrometry—with emphasis on spectral interpretation skills needed for the elucidation of structure, conformation, and dynamics in organic and biological chemistry. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; recommended: CHEM 455. Offered: A.

**CHEM 461 Physical Chemistry Laboratory (2-3) NW** Physical measurements in chemistry. Vacuum techniques, calorimetry, spectroscopic methods, electrical measurements. Prerequisite: either CHEM 155, CHEM 161, CHEM 162, or CHEM E 436; either CHEM 453, CHEM 457, or both CHEM 452 and CHEM 455; either PHYS 117 or PHYS 131; recommended: PHYS 132; PHYS 133. Offered: AWSpS.

**CHEM 462 Techniques of Synthetic Organic Chemistry (2-3) NW** Laboratory techniques of synthetic organic chemistry. Vacuum distillation, multi-step synthesis, air sensitive reagents, photochemistry, chromatography, and separation techniques. Prerequisite: either CHEM 242 or CHEM 347; CHEM 460 which may be taken concurrently. Offered: A.

**CHEM 463 Spectroscopic Techniques for Structural Identification (2) NW** Laboratory techniques of spectroscopic analysis for structural determination using UV, IR, NMR, mass spectroscopy. Prerequisite: CHEM 460. Offered: W.

**CHEM 464 Computers in Data Acquisition and Analysis (3) NW** Introduction to use of the computer in the chemistry laboratory. Principles of microcomputers and their use for such problems as data acquisition, noise reduction, and instrument control. Prerequisite: either CHEM 453 or CHEM 455; MATH 136, or both MATH 307 and MATH 308. Offered: Sp.

**CHEM 465 Computations in Chemistry (3) NW** Computer calculations on color graphics workstations applied to problems in chemistry. Numerical methods and algorithms for calculating classical dynamics, quantum wavefunctions, wavepacket propagation, chemical kinetics. Use of computer programs for calculating electronic wavefunctions, molecular conformations, simulations of liquids and solids. Prerequisite: either CHEM 453 or CHEM 457 which may be taken concurrently. Offered: W.

**CHEM 471 Physical Chemistry of Macromolecules (3) NW** Classical hydrodynamic methods, and modern optical correlation and pulse techniques for studying dynamical motions and conformations of macromolecules, especially biopolymers, in solution. Cooperative thermal transitions, optical properties, and polyelectrolyte effects. Prerequisite: either CHEM 452 or CHEM 456; either CHEM 453 or CHEM 457. Offered: alternate years; W.

**CHEM 473 Workshop in the Teaching of Chemistry (\* max. 15) NW** Individual or group study project on the improvement of instruction in chemistry for K-6 teachers. Credit/no credit only. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145. Offered: S.

**CHEM 475 Honors Physical Chemistry (3) NW** Introduction to quantum chemistry, spectroscopy. Theory of quantum mechanics applied more rigorously than in CHEM 455. Application of quantum mechanics to electronic structure of atoms and molecules. Computer software used to solve problems. Prerequisite: either CHEM 155, CHEM 160, or CHEM 162; either MATH 126, MATH 129, or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: A.

**CHEM 476 Honors Physical Chemistry (3) NW** For chemistry and biochemistry majors and otherwise qualified students. Chemical Thermodynamics. Similar in scope to CHEM 456 with the study of more complicated systems. Emphasis on using computer software to solve problems. Prerequisite: CHEM 475. Offered: W.

**CHEM 477 Honors Physical Chemistry (3) NW** For chemistry and biochemistry majors or otherwise qualified students. Statistical mechanics, kinetic theory, and chemical kinetics including statistical interpretations of kinetics and transport phenomena. Prerequisite: CHEM 475; either CHEM E 426, which may be taken concurrently or CHEM 476. Offered: Sp.

**CHEM 496 Research Seminar for Undergraduates (1, max. 2) NW** Formal presentations of student research. One credit applies to research component of a relevant major. Credit/no credit only. Prerequisite: BIOC 396 or CHEM 396. Offered: jointly with BIOC 496Sp.

**CHEM 498 Teaching Chemistry (3) NW** Training in teaching chemistry laboratory and quiz sections. For chemistry and biochemistry majors, especially those planning graduate work or secondary education. Covers teaching strategies, student diversity, learning styles, grading, and interaction with students and faculty. Credit/no credit only. Offered: A.

**CHEM 499 Undergraduate Research and Report Writing (\* max. 12)** Research in chemistry and/or study in the chemical literature. Credit/no credit only. Offered: AWSpS.

### Courses for Graduates Only

**CHEM 501 Readings in Chemistry (1, max. 9)** Individual meetings with faculty to discuss readings (journal articles, book chapters, proceedings) in the chemical sciences. Credit/no credit only. Offered: AWSpS.

**CHEM 502 Practical NMR Methods for Biological and Organic Structure Elucidation (4)** Theory of NMR (rotating frame formalism, multi-pulse experiments, relaxation phenomena, 2D experiments) as applied to structural and dynamic problems in organic and biological chemistry. Provides basis for experiment selection and spectrum interpretation. A more advanced treatment of NMR than 460. Prerequisite: CHEM 224, CHEM 239, or CHEM 337; recommended: CHEM 460 or equivalent, CHEM 435 or CHEM 455. Offered: W.

**CHEM 508 Advanced Inorganic Chemistry (3, max. 9)** Discussion of selected applications of physical techniques to the study of inorganic molecules. Topics include group theory, magnetic resonance spectroscopy (NMR and ESR), vibrational spectroscopy (IR and Raman), electronic spectroscopy, magnetism, and electrochemistry. Offered: A.

**CHEM 510 Current Problems in Inorganic Chemistry (1-3, max. 12)** Primarily for doctoral candidates in inorganic chemistry. Current topics (e.g., bioinorganic, advanced organometallic, materials and solid state, advanced inorganic spectroscopy). See department for instructor and topics during any particular quarter. Offered: Sp.

**CHEM 520 Current Problems in Analytical Chemistry (1-3, max. 12)** Primarily for doctoral candidates in analytical chemistry. Current topics (e.g., flow injection analysis, mass spectrometry, and advanced radiochemistry). See department for instructor and topics during any particular quarter. Offered: AW.

**CHEM 522 Atomic and Molecular Analytical Spectroscopy (3)** Quantitative analysis of atomic and molecular species, using all forms of electromagnetic radiation, electrons, and gaseous ions. Offered: alternate years.

**CHEM 523 Geochemical Cycles (4)** Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with OCEAN 523 and ATM S 508.

**CHEM 526 Chemometrics (3, max. 9)** Mathematical and statistical methods for experimental design, calibration, signal resolution, and instrument control and optimization. Offered: alternate years.

**CHEM 530 Advanced Organic Chemistry (3)** Fundamental aspects of organic structures and transformations. Structure and basicity of carbanions, substitution reactions, elimination reactions, nucleophilic addition and addition/elimination reactions, condensation reactions, structure and rearrangements of carbocations, electrophilic addition, electrophilic substitutions, neighboring group effects. Prerequisite: CHEM 337. Offered: A.

**CHEM 531 Advanced Organic Chemistry (3)** Synthetic organic chemistry. Discussion of practical methods for the synthesis of complex organic molecules with an emphasis on strategy and the control of stereochemistry. Prerequisite: CHEM 530. Offered: W.

**CHEM 532 Advanced Organic Chemistry (3)** Chemical Biology. Application of chemical methods to the study of biological processes that occur in cells. Prerequisite: CHEM 530 and CHEM 531. Offered: Sp.

**CHEM 540 Current Problems in Organic Chemistry (1-3, max. 12)** Primarily for doctoral candidates in organic chemistry. Discussions of topics of current interest and importance. See department for instructor and topic during any particular quarter.

**CHEM 550 Introduction to Quantum Chemistry (3)** Origins and basic postulates of quantum mechanics, solutions to single-particle problems, angular momentum and hydrogenic wave functions, matrix methods, perturbation theory, variational methods. Prerequisite: CHEM 455. Offered: A.

**CHEM 551 Introduction to Quantum Chemistry (3)** Electronic structure of many-electron atoms and molecules, vibration and rotation levels of molecules, effects of particle exchange, angular momentum and group theory, spectroscopic selection rules. Prerequisite: CHEM 550. Offered: W.

**CHEM 552 Statistical Mechanics (3)** General theorems of statistical mechanics, relation of the equilibrium theory to classical thermodynamics, quantum statistics, theory of imperfect gases, lattice statistics and simple cooperative phenomena, lattice dynamics and theory of solids, liquids, solutions, and polymers, time-dependent phenomena and mechanisms of interaction. Prerequisite: CHEM 455 and CHEM 456 (concurrent registration permitted) or equivalent. Offered: Sp.

**CHEM 553 Statistical Mechanics (3)** General theorems of statistical mechanics, relation of the equilibrium theory to classical thermodynamics, quantum statistics, theory of imperfect gases, lattice statistics and simple cooperative phenomena, lattice dynamics and theory of solids, liquids, solutions, and polymers, time-dependent phenomena and mechanisms of interaction. Prerequisite: CHEM 552. Offered: A.

**CHEM 560 Current Problems in Physical Chemistry (1-3, max. 12)** Primarily for doctoral candidates in physical chemistry. A discussion of topics selected from active research fields. See department for instructor and the topic during any particular quarter.

**CHEM 561 Macromolecules (3, max. 9)** Physical chemistry of macromolecules and biopolymers. Topics include solution thermodynamics, hydrodynamic properties, molecular weight distributions, optical and electro-optic techniques, chain configuration statistics, cooperative phenomena, theory of rubber elasticity, and polyelectrolytes. Offered: alternate years.

**CHEM 575 Molecular Modeling Methods (4)** Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: jointly with BIOEN 575.

**CHEM 580 Topics in Chemistry (1, max. 3)** General topics of interest relating to chemistry. Credit/no credit only.

**CHEM 581 Topics in Inorganic Chemistry (3, max. 18)** Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

**CHEM 582 Topics in Analytical Chemistry (3, max. 18)** Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

**CHEM 583 Topics in Organic Chemistry (3, max. 18)** Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

**CHEM 585 Topics in Physical Chemistry (3, max. 18)** Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

**CHEM 590 Seminar in General Chemistry (1, max. 18)** For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

**CHEM 591 Seminar in Inorganic Chemistry (1, max. 18)** For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

**CHEM 592 Seminar in Analytical Chemistry (1, max. 18)** For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

**CHEM 593 Seminar in Organic Chemistry (1, max. 18)** For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

**CHEM 595 Seminar in Physical Chemistry (1, max. 18)** For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

**CHEM 600 Independent Study or Research (\*)** Prerequisite: permission of coordinator. Offered: AWSpS.

**CHEM 700 Master's Thesis (\*)** Prerequisite: permission of coordinator. Offered: AWSpS.

**CHEM 800 Doctoral Dissertation (\*)** Prerequisite: permission of coordinator. Offered: AWSpS.

## Classics

218 Denny

 *General Catalog Web page:*  
[www.washington.edu/students/genccat/academic/Classics.html](http://www.washington.edu/students/genccat/academic/Classics.html)

 *Department Web page:*  
[depts.washington.edu/clasdept/](http://depts.washington.edu/clasdept/)

Classics embraces the ancient Greek and Roman civilizations from prehistoric times to the Middle Ages. The department is concerned with the Greek and Latin languages and their literatures, including poetry, drama, history, philosophy, rhetoric, and political theory, as well as with classical art and archaeology.

*Classical Seminar in Rome:* During spring quarter, the department offers instruction in classics for advanced undergraduate majors and graduate students at the University of Washington Rome Center, located in the Palazzo Pio on the Campo de' Fiori.

## Graduate Program

Graduate Program Coordinator  
218 Denny, Box 353110  
(206) 543-2266  
[clasdept@u.washington.edu](mailto:clasdept@u.washington.edu)

The Department of Classics offers programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The M.A. degree may be in Greek, Latin, or Classics (a combination of Greek and Latin). The Ph.D. degree requires both Greek and Latin.

The program of formal instruction has been designed to ensure comprehensive and thorough training in the basic disciplines needed for teaching and research. The department offers courses in the major writers and periods of literature, philosophy, and history, in classical art and archaeology, and in Greek and Latin linguistics. The courses in Greek and Latin literature include many works on the Ph.D.-degree reading list. Seminars introduce research techniques through the

study of more specialized topics, which vary from quarter to quarter. Students may include in their programs courses and seminars given by other departments in such subjects as ancient philosophy, ancient and medieval history, comparative literature, and linguistics. A brochure, *The Graduate Program in Classics*, available from the department, gives additional information.

The Suzzallo Library has an extensive classics collection. The department's seminar room in Denny Hall, which is available to graduate students for their study and research, contains an excellent noncirculating library with such reference works as Pauly-Wissowa, *L'Année Philologique*, the *Thesaurus Linguae Latinae*, the *Müller Handbuch* series, the Teubner and Oxford texts, commentaries on the classical authors, standard collections of inscriptions and fragments, and a number of important serials. The department also possesses an Ibycus scholarly computer and a license for the *Thesaurus Linguae Graecae*, *Thesaurus Linguae Latinae*, *Perseus*, and other databases.

Applicants for admission to the M.A. program should present an undergraduate major or its equivalent in Greek, Latin, or Classics. Prospective aspirants for the Ph.D. degree should have had two years of upper-division study in both languages, but may be admitted with less preparation in one language if their preparation in the other language is exceptionally strong. Admission to the Ph.D. program may be granted after completion of the requirements for the M.A. degree.

The M.A. degree requires a minimum of 27 credits in courses or seminars in Greek or Latin or both, and in related subjects approved by the department; a reading knowledge of French, German, or Italian; either an acceptable thesis or 9 additional credits in approved graduate courses and seminars and a research paper.

The Doctor of Philosophy degree requires a minimum of 72 credits in courses or seminars in Greek, Latin, and related subjects approved by the department; a reading knowledge of German and either French or Italian; Greek and Latin prose composition; translation examinations on Greek and Latin; examinations in two special authors and one field of classical studies; an oral General Examination; dissertation; and Final Examination. Graduate students must have teaching experience before completing requirements for their terminal degree.

A number of teaching assistantships are available. Assistants teach sections of elementary Latin and Greek, a course in Latin and Greek derivatives, hold discussion sections in classical literature in translation, or assist faculty members with other courses. The teaching load is four to six hours a week throughout the academic year.

## Faculty

### Chair

Stephen E. Hinds

### Professors

Bliquez, Lawrence J. \* 1969; PhD, 1968, Stanford University; Greek oratory, Greek historiography and historians, Greek and Roman medicine.

Clauss, James J. \* 1984; PhD, 1983, University of California (Berkeley); Latin poetry and prose, Hellenistic literature, Latin literature of the Empire.

Halleran, Michael R. \* 1983; PhD, 1981, Harvard University; Greek literature, especially tragedy; Greek intellectual history.

Harmon, Daniel P. \* 1973; PhD, 1968, Northwestern University; Greek and Roman religion, Latin poetry, archaic Rome, classical linguistics.

Hinds, Stephen E. \* 1992; PhD, 1985, St Johns College (UK); Latin poetry, literary criticism and theory.

MacKay, Pierre A. \* 1966, (Emeritus); PhD, 1964, University of California (Berkeley); Greek literature, post-classical and Byzantine Greek literature, numismatics.

McDiarmid, John B. \* 1949, (Emeritus); PhD, 1940, Johns Hopkins University; Greek literature and philology.

Pascal, Paul \* 1953, (Emeritus); PhD, 1953, University of North Carolina; Latin literature and paleography, medieval Latin.

### Associate Professors

Blondell, Ruby \* 1985; PhD, 1984, University of California (Berkeley); Greek and Roman philosophy and literature.

Connors, Catherine M. \* 1990; PhD, 1989, University of Michigan; Roman epic, ancient novel, women in Greek and Roman antiquity.

Gowing, Alain M. \* 1988; PhD, 1988, Bryn Mawr College; Latin and Greek historiography, Latin literature of the Empire.

Langdon, Merle K. \* 1976; PhD, 1972, University of Pennsylvania; Greek archaeology, epigraphy, topography, and history.

### Assistant Professors

Connolly, Joy P. \* 1997; PhD, 1997, University of Pennsylvania; ancient rhetoric, feminist theory, imperial literature.

Lape, Susan \* 1998; PhD, 1998, Princeton University; political theory, Hellenistic history, drama, cultural studies.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### Classical Archaeology

**CL AR 442 Greek Painting (3) VLPA** *Langdon* Study of painted decoration on Greek vases, with emphasis on stylistic developments and cultural and historical influences. Painting on other media also examined as evidence allows. Offered: jointly with ART H 442.

**CL AR 446 Greek Architecture (3) VLPA** *Langdon* Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ARCH 454/ART H 446.

**CL AR 448 The Archaeology of Italy (3) VLPA** *Harmon* Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Ostia, Pompeii, Herculaneum, Tarquinia, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life. Illustrated by slides. Offered: jointly with ART H 448.

### Courses for Graduates Only

**CL AR 541 Seminar in Greek and Roman Art (3) VLPA** *Langdon* In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered: jointly with ART H 541.

## Classical Linguistics

### Courses for Graduates Only

**CL LI 501 Comparative Phonology of Greek and Latin (5)** *Harmon* Phonological developments of Greek and Latin from Indo-European to the classical periods of both languages.

**CL LI 506 Italic Dialects (5)** *Harmon* Principal remains of the non-Latin languages and dialects of ancient Italy.

### Classics Courses in English

**CLAS 424 The Epic Tradition (5) VLPA** *Clauss, Halleran, MacKay* Ancient and medieval epic and heroic poetry of Europe in English: the *Iliad*, *Odyssey*, and *Aeneid*; the *Roland* or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies according to instructor's preference. Offered: jointly with C LIT 424.

**CLAS 427 Greek and Roman Tragedy in English (5) VLPA** *Halleran, Lape* Study of the development of Greek and Roman tragedy, with extensive readings in representative plays of Aeschylus, Sophocles, Euripides, and Seneca.

**CLAS 428 Greek and Roman Comedy in English (3) VLPA** *Lape* Readings from the comedies of Aristophanes, Plautus, and Terence.

**CLAS 430 Greek and Roman Mythology (3/5) VLPA** *Clauss, Connors, Gowing, Halleran, Hinds* Principal myths found in classical and later literature. Offered: AWSp.

**CLAS 432 Classical Mythology in Film (3/5) VLPA** *Clauss* Comparison and discussion of classical myths and modern films inspired by them. Promotes access to the reading of classical mythology. Analyzes significant differences between ancient literary and modern cinematographic representations of the myth.

**CLAS 435 The Ancient Novel (3) VLPA** *Connolly, Connors, Lape* Reading and discussion of the principal Greek and Roman novels, the earliest European prose fiction, with attention to earlier literature and to imperial culture.

**CLAS 445 Greek and Roman Religion (3) VLPA/I&S** *Harmon, Langdon* Religion in the social life of the Greeks and Romans, with emphasis placed on their public rituals and festivals. Attention is given to the priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Many lectures illustrated by slides. Recommended: RELIG 201. Offered: jointly with RELIG 445.

**CLAS 496 Special Topics (2-5, max. 15) VLPA** Offered occasionally by visitors or resident faculty.

**CLAS 520 Seminar (5, max. 45)** Advanced comparative work on Greek and Latin materials studied in both original languages.

**CLAS 700 Master's Thesis (\*)**

**CLAS 800 Doctoral Dissertation (\*)**

### Greek

**GREEK 413 The Pre-Socratic Philosophers (3) VLPA** *Blondell*

**GREEK 414 Plato (3) VLPA** *Blondell, Lape, MacKay*

**GREEK 415 Aristotle (3) VLPA** *Blondell, Lape, MacKay*

**GREEK 422 Herodotus and the Persian Wars (3) VLPA** *Bliquez, Langdon, MacKay*

**GREEK 424 Thucydides and the Peloponnesian War (3) VLPA** *Bliquez, Langdon, Lape*

**GREEK 426 Attic Orators (3) VLPA** *Bliquez, Langdon, Lape, MacKay*

**GREEK 442 Greek Drama (3) VLPA** *Halleran*

**GREEK 443 Greek Drama (3) VLPA** *Halleran*  
Offered: alternate years.

**GREEK 444 Greek Drama (3) VLPA** *Halleran*

**GREEK 449 Greek Epic (3) VLPA** *Halleran, MacKay*

**GREEK 451 Lyric Poetry (3) VLPA** *Blondell, Halleran*

**GREEK 453 Pindar: The Epinician Odes (3) VLPA** *Halleran*

**GREEK 461 Early Greek Literature (3-5, max. 15) VLPA** Readings and discussion of selected authors of the early Greek period.

**GREEK 463 Hellenistic Greek Literature (3-5, max. 15) VLPA** *Clauss* Readings and discussion of selected authors of the Hellenistic Age.

**GREEK 490 Supervised Study (\* max. 18)** Special work in literary and philosophical texts for graduates and undergraduates.

### Courses for Graduates Only

**GREEK 500 Grammar and Composition (5) VLPA** *Bliquez, Blondell, MacKay* Translation of passages from English to Greek for the purpose of acquiring advanced knowledge of the grammar and the style of the classical tongue.

**GREEK 501 Homer (5)** *Halleran* Readings from the *Iliad* or the *Odyssey*.

**GREEK 503 Aristophanes (5)** *Bliquez, Lape* Select comedies.

**GREEK 512 Greek Tragedy (5, max. 10)** *Halleran* Aeschylus, Sophocles, and/or Euripides.

**GREEK 515 Greek Epigraphy (5)** *Langdon, Lape* Selected inscriptions from various Greek states and sanctuaries and evidence they provide for religious and social practices, literature, and political history. Classification and editing of inscriptions, and epigraphical techniques.

**GREEK 520 Seminar (5, max. 45)** *Bliquez, Blondell, Clauss, Halleran, Harmon, Langdon, Lape, MacKay*

**GREEK 590 Supervised Study (\* max. 18)** Prerequisite: permission of graduate program coordinator.

**GREEK 600 Independent Study or Research (\*)**

### Latin

**LATIN 401 Medieval Latin Literature to 1200 (3) VLPA** *Hinds* Texts read in Latin; cultural and historical contexts discussed. Presupposes year and a half of Latin or equivalent. Informal individual guidance available to members of class handling medieval or renaissance Latin texts in their research. Recommended: LATIN 306.

**LATIN 402 Later Medieval and Renaissance Latin Literature (3) VLPA** *Hinds* Texts read in Latin; cultural and historical contexts discussed. Presupposes year and a half of Latin or equivalent. Informal individual guidance available to members of class handling medieval or renaissance Latin texts in their research. Recommended: LATIN 306.

**LATIN 412 Lucretius (3) VLPA** *Blondell, Clauss*

**LATIN 414 Seneca (3) VLPA** *Blondell, Connolly*

**LATIN 422 Livy (3) VLPA** *Clauss, Gowing*

**LATIN 423 Cicero and Sallust (3) VLPA** *Clauss, Connolly, Gowing*

**LATIN 424 Tacitus (3) VLPA** *Clauss, Gowing*

**LATIN 447 Roman Lyric (3) VLPA** *Clauss, Harmon*

**LATIN 449 Roman Elegy (3) VLPA** *Connolly, Harmon, Hinds*

**LATIN 451 Roman Satire (3) VLPA** *Connors*

**LATIN 457 Roman Drama (3) VLPA** *Connors*

**LATIN 458 Roman Epic (3) VLPA** *Clauss, Connors, Harmon, Hinds*

**LATIN 461 Latin Literature of the Republic (3-5, max. 15) VLPA** Readings and discussion of selected authors from the era of the Roman Republic.

**LATIN 462 Latin Literature of the Augustan Age (3-5, max. 15) VLPA** Readings and discussion of selected authors from the Augustan era.

**LATIN 463 Latin Literature of the Empire (3-5, max. 15) VLPA** Readings and discussion of selected authors from the Roman Empire.

**LATIN 465 Roman Topography and Monuments (5, max. 10) VLPA** *Clauss, Gowing, Harmon* Study of the material remains of ancient Rome from the archaic period through the imperial age. Reading of source materials and inscriptions in Latin. Conducted in Rome. Offered: Sp.

**LATIN 490 Supervised Study (\* max. 18)** Special work in literary and philosophical texts for graduates and undergraduates.

### Courses for Graduates Only

**LATIN 500 Grammar and Composition (5) VLPA** *Clauss, Gowing, Hinds* Translation of passages from English to Latin for the purpose of acquiring advanced knowledge of the grammar and style of the classical tongue.

**LATIN 501 Vergil (5)** *Clauss, Harmon, Hinds* The *Aeneid*.

**LATIN 502 Horace (5)** *Clauss, Harmon* *Odes* and/or *Epistles*.

**LATIN 503 Plautus and Terence: Early Republican Literature (5)** *Blondell, Connors*

**LATIN 506 Cicero (5)** *Gowing* Select speeches, with attention to rhetorical theory and/or letters.

**LATIN 508 Silver Latin Literature (5)** *Connolly, Connors, Hinds* Selections from Martial, Lucan, and Petronius.

**LATIN 510 Roman Historians (5, max. 10)** *Clauss, Gowing* Caesar, Livy, and/or Tacitus.

**LATIN 512 Augustan Poetry (5, max. 10)** *Clauss, Connolly, Connors, Harmon, Hinds* Vergil's *Eclogues* and *Georgics*, Roman elegiac poetry, and/or Ovid's *Metamorphoses* and *Amores*.

**LATIN 520 Seminar (5, max. 45)** *Blondell, Clauss, Connors, Gowing, Halleran, Harmon, Hinds*

**LATIN 565 Seminar in Rome (5, max. 10)** *Clauss, Gowing, Harmon* Study of selected topics and authors in Latin literature. Conducted in Rome.

**LATIN 590 Supervised Study (\* max. 18)** Prerequisite: permission of graduate program coordinator.

**LATIN 600 Independent Study or Research (\*)**

## Graduate Program

Graduate Program Coordinator  
102E Communications, Box 353740  
(206) 543-7269  
[cmuinfo@u.washington.edu](mailto:cmuinfo@u.washington.edu)

The School of Communications offers programs leading to the degrees of Master of Arts, Doctor of Philosophy, and Master of Communications.

The Master of Arts degree program provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. A thesis is required.

The Doctor of Philosophy degree program is designed to develop conceptual and methodological capabilities in a substantive area of communication. Substantive scholarly interests represented in the School may be found in the faculty listing below. Doctoral students are expected to apply these capabilities as apprentice scholars in the teaching and research functions of the School.

The Master of Communications degree program offers the practicing professional communicator an opportunity to develop a substantive specialty in conjunction with the academic study of communication.

A foreign language, if appropriate to the student's program of study, may be required in the M.A. and Ph.D. programs.

### Special Requirements

Students are admitted to programs in the autumn quarter only. All foreign and Ph.D. students must attend full time. February 15 is the deadline for all applicants who wish to be considered for departmental teaching or research assistantships. All required application materials must be received by that date. For all others, the application deadline is April 1.

Applicants for all programs must submit official transcripts of all previous study, results of the Graduate Record Examination (from a test taken within the past five years), a letter of intent linking the applicant's research and vocational objectives to an available graduate program, three letters of recommendation and, where applicable, evidence of fluency in English. The minimum acceptable TOEFL score is 580. Elementary statistics is a prerequisite for the methods courses required of all M.A. and Ph.D. students, but can be taken once enrolled.

## Faculty

### Chair

Charles A. Giffard

### Professors

Baldasty, Gerald J. \* 1974; MA, 1974, University of Wisconsin; PhD, 1978, University of Washington; communications history, media and gender, race, government-press relations.

Bassett, Edward P. \* 1989, (Emeritus); PhD, 1967, University of Iowa; telecommunication technologies and information dissemination, public opinion, environment.

Bennett, W. Lance \* 1974; MPhil, 1973, PhD, 1974, Yale University; American politics, comparative politics, political communication, mass media, political culture.

Edelstein, Alex S. \* 1955, (Emeritus); PhD, 1958, University of Minnesota; comparative communication research, public opinion, propaganda, international communication.

Giffard, Charles A. \* 1978; PhD, 1968, University of Washington; international communication systems, news flow, editing and reporting.

Lang, Gladys Engel \* 1984, (Emeritus); PhD, 1954, University of Chicago; political effects of mass media, sociology of art, political movements and crowd behavior.

Lang, Kurt \* 1984, (Emeritus); PhD, 1953, University of Chicago; political and social effects of the media on mass communication.

Pember, Don R. \* 1969; PhD, 1969, University of Wisconsin; mass media law, First Amendment history.

Shadel, Willard F. 1963, (Emeritus); MA, 1953, University of Michigan; broadcasting.

Stamm, Keith R. \* 1973; PhD, 1968, University of Wisconsin; communities and newspapers, political communication, communication and environmental problems.

Stewart, John R. \* 1969, (Adjunct); PhD, 1970, University of Southern California; philosophy of qualitative research and interpersonal communication.

Whitehill-Ward, John \* 1975, (Adjunct); MS, 1974, Illinois Institute of Technology; graphic design.

Yerxa, Fendall Winston \* 1965, (Emeritus); BA, 1936, Hamilton College; editorial journalism.

### Associate Professors

Bowen, Lawrence \* 1973; PhD, 1974, University of Wisconsin; commercial communications, media research, consumer information-seeking and -processing behaviors.

Bowes, John E. \* 1974; PhD, 1971, Michigan State University; man-machine communication, public opinion, international communication.

Chan, Anthony B. \* 1990; PhD, 1980, York University (Canada); Pacific rim communication systems, Canadian studies, China studies, Asian cinema.

Cranston, Patricia \* 1954, (Emeritus); MA, 1954, University of Texas (Austin); broadcast journalism, history, writing and production of docudramas.

Fearn-Banks, Kathleen A. 1990; MS, 1965, University of California (Los Angeles); crisis communications, history.

Jackson, Kenneth M. \* 1974, (Emeritus); PhD, 1970, University of Washington; institutional communications, media research, mass media and public policy, cultural communications.

Kielbowicz, Richard B. \* 1984; PhD, 1984, University of Minnesota; communication history/law, impact of technology on press and society, Canadian media.

Manusov, Valerie L. \* 1993, (Adjunct); PhD, 1989, University of Southern California; the interplay between communication behaviors and cognitions in interpersonal interactions.

Parks, Malcolm R. \* 1978, (Adjunct); PhD, 1976, Michigan State University; communication theory, interpersonal communication, research methods.

Rivenburgh, Nancy \* 1989; MS, 1982, Boston University; PhD, 1991, University of Washington; international communications, the media, intercultural relations and identity, international news.

Samuelson, Merrill \* 1962, (Emeritus); PhD, 1960, Stanford University; research methods, processes of reading, patterns in reader selection of new stories.

Simpson, Roger A. \* 1968; PhD, 1973, University of Washington; communication history, law of communication, media economics, editorial journalism.

Underwood, Douglas M. \* 1987; MA, 1974, Ohio State University; newspaper economics and management, press and politics, literature and journalism.

### Assistant Professors

Domke, David S. \* 1998; PhD, 1996, University of Minnesota; political cognition and elites' interaction with news media in social change.

Gastil, John W. \* 1997, (Adjunct); PhD, 1994, University of Wisconsin; political participation and deliberative forms of democratic decision making.

Kawamoto, Kevin Y. \* 1992; PhD, 1997, University of Washington; new media technologies, computer-mediated communication, computer crime.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**CMU 400 History of Media Technology and Regulation (5) I&S** Impact of pre-1980s media technologies—printing, telecommunications, broadcasting, photography, and more—on individuals and institutions, especially government, business, and the mass media. How laws and policies have changed to govern new media forms.

**CMU 401 Telecommunication Policy and Convergent Media (5) I&S** Examines contemporary media and telecommunications industries since 1980 and their accelerating convergence. Attention given to economic, policy, and mass use issues. Review of major industry leaders, promising technologies, and new services. Social issues, government initiatives, and new legislation covered for both North American and international markets. Recommended: CMU 301.

**CMU 402 New Media as Virtual Communities (5) I&S** Technologically-mediated virtual communities considered through analysis of historical precedents and influences and through an exploration of the concept of community. Issues include a focus on social interactions; the social, political, economic, and technological contexts of virtual communities and the limits for their sustenance.

**CMU 403 Visual Literacy for Mass Communication (5) VLPA/I&S** Overview of how we apprehend, interpret, and understand visual content of traditional and evolving media forms. Emphasis on analytic methods, the aesthetic characteristics of media forms and how visuals are utilized and understood. Several perspectives considered, including historical, cultural, and critical. Recommended: CMU 300.

**CMU 404 New Media Criticism (5) VLPA/I&S** Examines critically the content of new media forms, contrasting them with traditional media. Stresses influences of social, economic, political, and technological forces on content and developing strategies for critical analysis.

**CMU 418 Issues in Mass Communication (5, max. 10) I&S** Topics vary.

**CMU 420 Comparative Media Systems (5) I&S** Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with SIS 419/POL S 468.

**CMU 421 Intercultural Communication (5) I&S** Investigates intercultural communication theory and its application for varying levels of human interaction: interpersonal, intergroup, and international. Recommended: SP CMU 384. Offered: jointly with SP CMU 478.

**CMU 422 Culture in International Communications Research (5) I&S** Examines research that deals with or compares data from different countries, cultures, or sub-cultures. For methodological issues and potential pitfalls due to variability in language, culture, geo-political orientation.

**CMU 423 Communications and Development (5) I&S** Examines both theory and application involved in using communications media as a tool for addressing political, social, and economic development issues. Utilizes a case study approach to look at localized applications of traditional and new communications tools in the pursuit of sustainable development.

**CMU 424 Canadian Media Systems (5) I&S** Structure and operation of Canadian mass media and telecommunications industries. Impact of United States media on Canadian culture. Role of domestic media in lives of minorities. Laws and policies governing communications. Offered: jointly with SISCA 424.

**CMU 425 European Media Systems (5) I&S** Examines media systems in selected countries in Europe and policy issues that link (or divide) members of the European Union and other major media producers. Media studied in context of the contemporary economic, social, political, and cultural milieu in which they operate. Offered: jointly with EURO 425.

**CMU 426 International Media Images (5) I&S** Ways in which media construct images of international peoples and events. Develops a set of critical tools for assessing media portrayals of international affairs and cultures.

**CMU 427 International Communications Law and Policy (5) I&S** Examines the international and comparative aspects of traditional press law, broadcast regulation, and telecommunications policy. Also examines freedom of the press in international reporting and the efforts of countries to limit foreign media influences within their borders.

**CMU 428 Asian Media Systems (5) I&S** Examines the media systems and communication policies in selected Asian countries. Identifies and analyzes the cultural, economic, historical, and political parameters that influence these media.

**CMU 429 Chinese Communications Systems (5) I&S** Analyzes the economic, historical, intellectual, social, and political foundations of communications systems in the region of Chinese Asia: China, Hong Kong, Singapore, and Taiwan. Focus primarily on print and broadcast journalism.

**CMU 430 Canadian Documentary Film Traditions (5) VLPA/I&S** History and development of non-fiction film documentary traditions, especially in Canada, the first institutionally defined area in which documentaries became prominent through the National Film Board and the Canadian Broadcasting Corporation. Discussion of Flaherty, Greirson, and independent network producers who developed present-day style of documentaries. Offered: jointly with SISCA 430.

**CMU 440 Mass Media Law (5) I&S** Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with POL S 461.

**CMU 441 United States Media History (5) I&S** Development of mass communication in the United States with emphasis on role of mass media in politics, economics, gender, and race.

**CMU 442 Public Opinion and the Mass Media: Processes and Methods (5) I&S** Considers public opinion in the United States as formed and affected by the mass media. Two themes stressed are historical and institutional use of public opinion and the political influence of the media. Attention given to public opinion measurement by the mass media, political candidates, and governmental institutions.

**CMU 444 Public Relations and Society (5) I&S** Overview of issues, strategies, and role of public relations professionals in various areas of American society, including media relations, government relations, community affairs, and consumer relations.

**CMU 445 Communication Theory (5) I&S** Centrality of communication and mass communication in behavior and society. Problems of, and questions about, communicative effectiveness. Theoretical principles applicable to communicative effectiveness. Communication's six contributions to effective behavior.

**CMU 451 Mass Media and Culture (5) VLPA/I&S** Empirical and theoretical framework for analyzing role of mass media in cultural change. Historical and contemporary cases consider ethnic, gender, class, and urban-rural conflicts and cultural roles of sports, elections, and national rituals. Focus on visual electronic media.

**CMU 452 Crisis Communications (5) I&S** Study of the functions of communications professionals during crises. Covers public relations professionals as advocates for organizations and companies in crisis and the news media as advocates of the mass public. Discussion of cases.

**CMU 460 Special Reporting Topics (4) I&S** Topics vary.

**CMU 461 Computer-Assisted Journalism (5) I&S** Introduction to computer-assisted journalism and other advanced reporting techniques. Includes hands-on electronic data analysis, exploration of on-line investigative tools, and the fashioning of electronically-retrieved information into news stories. Students examine ethical and technical challenges these tools present to media and society. Offered: AWSpS.

**CMU 462 Magazine Writing (5) I&S** Techniques of writing and marketing the full-length magazine article.

**CMU 463 Copy Editing and Design (5) I&S** Focus on editing copy for publications, covering grammar and style, production methods, news criteria, use of wire services, headlines, make-up and design, pagination, and online publication.

**CMU 465 Legislative Reporting (12) I&S** Coverage of Washington legislature for a daily newspaper. Selected students live in Olympia, interview legislative delegations, report on committee and floor sessions, and attend and report on gubernatorial and other press conferences.

**CMU 467 Journalism and Literature (5) VLPA/I&S** Explores the relationship between journalism and fiction writing in the United States. Examines writers who began their careers as journalists and forged a fiction-writing philosophy related to what they learned in journalism. Readings in fiction and journalism.

**CMU 468 Journalism Ethics (5) I&S** *Simpson* Provides a method and substantive context based on ethical theory, media history, and value systems analysis for analyzing and resolving dilemmas raised by journalistic practices.

**CMU 469 Intellectual Foundations of American Journalism (5) I&S** Examines the thinkers and philosophers who have influenced modern journalism. Studies the main ideas in the development of world thought and their impact on today's journalists. Explores the role communications systems have played in the creation of the world's cultures.

**CMU 470 Communications and the Environment (5) I&S** Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with ENVIR 470.

**CMU 476 Models and Theories in Speech Communication (5) I&S** Examination of selected theories and models of speech communication from the behavioral sciences, as well as of criteria applicable to them. Emphasis on the nature and function of theories and models, especially as these relate to basic principles underlying the scientific, interpretive, and critical study of speech communication phenomena. Offered: jointly with SP CMU 476.

**CMU 489 Ethnicity, Gender, and Media (5) I&S** Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with AES 489/WOMEN 489.

**CMU 498 Undergraduate Research in Communications (1-5, max. 10)** Research and individual study. Prerequisite: permission of instructor.

### Courses for Graduates Only

**CMU 500 Seminar in Theory of Communication (5)** Procedures for analyzing concepts and theoretical material to provide basis for one's research. How to make productive use of the literature. Procedures for theorizing about empirical findings and generalizations. Typologies, models, theories, laws, and working hypotheses. Prerequisite: permission of instructor.

**CMU 501 Development of Mass Communication (5)** Institutions of mass communication. Political and social roles.

**CMU 502 Mass Communication Process and Its Effects (5)** Analytic approach to conceptualization and research in the field since 1900.

**CMU 503 Research Methods (5)** Introduces and compares basic methods of research in communications.

**CMU 505 Communication and Politics (5)** Primary literature dealing with communication and American political behavior. Prerequisite: CMU 421.

**CMU 506 Critical Theory Applications in Mass Communication (5)** Major approaches in critical theory: Marxism, psychoanalysis, structuralism, and semiology. Synthesizes these approaches by viewing the "cultural studies" tradition. Assesses critical theory through empirical study of network television in the United States and the United Kingdom.

**CMU 507 Theories and Criticism of Communications Technologies (5)** Potential of the computer for use in behavioral science. Prerequisite: elementary programming, elementary statistics.

**CMU 508 Communication Research (5)** Basic methodological questions in communication research. Foundations in history and philosophy of science. Prerequisite: permission of instructor.

**CMU 511 Seminar in Communication Research (5, max. 15)** Individual research projects undertaken collectively within a given area of study, under direction of faculty member. Prerequisite: permission of instructor.

**CMU 512 Content Analysis (5)** Content analysis as a technique for making inferences from texts, including traditional, manual methods of analysis and computer coding.

**CMU 513 Survey Research Methods in Communications (5)** Faculty-directed project in survey research in which basic principles of survey design, including sampling, observation, measurement, data analysis, and data interpretation, are all applied. Prerequisite: elementary statistics or permission of instructor.

**CMU 515 Field Seminar in Communication Historiography (5)** Readings in communications history.

**CMU 516 Communications History Research Methods (5)** Development of the historical approach to communications research. Study of historical methods, bibliography, and criticism.

**CMU 517 Seminar in Communications History (5)** Topical research seminar in communications history.

**CMU 518 Seminar in Special Topics in Mass Communications (5, max. 10)**

**CMU 519 Seminar in Government and Mass Communications (5)** Legal problems of mass communication, institutions, and media operations.

**CMU 521 Seminar in Media Structure (5)** Directed independent research into structural aspects of American mass communications. Prerequisite: graduate standing.

**CMU 550 Advanced Communication Methods (1-3, max. 3)** Directed individual projects at a level acceptable by print or broadcast media. Advanced techniques of research and production analyzed and applied. Open only to students seeking the Master in Communications degree.

**CMU 571 Seminar in Regional Communication Systems (5)** Communication as a factor in economic, sociocultural, and political relations among nations of a region. Focus varies with specialization of instructor. Consult graduate secretary for details. Interdisciplinary focus.

**CMU 575 Seminar in International Communication Systems (5)** International communications and contemporary issues that affect the functioning of global communication systems. Interdisciplinary focus.

**CMU 577 Seminar in International Communications Research (5)** Methodological issues particular to the design or analysis of research that deals with data from different countries, cultures, or sub-cultures. Prerequisite: CMU 503 or equivalent.

**CMU 579 Seminar in Media and Foreign Policy (5)** The role of communications media in how nations interact. The media as source, actor, and catalyst in international affairs. Interdisciplinary focus.

**CMU 581 Seminar in Public Opinion and Communication (5)** Conceptual and methodological approaches to public opinion and communication as historical and behavioral phenomena. United States and international perspectives.

**CMU 586 Telecommunications Structure and Policies (5)** Structures and policies governing the functioning of communication technologies and data flow: United States and international perspectives. Interdisciplinary approach.

**CMU 589 Gender, Race, and Media (5)** Analysis of the role of media in construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with SP CMU 527 and WOMEN 589.

**CMU 593 Communications Colloquium: Current topics in Communications Research (1)** Presentations, mostly by faculty, on current research in the School of Communications. Students read articles and discuss them with authors. Offered: A.

**CMU 596 Effective Teaching of Communications (1, max. 3)** Development of effective teaching and professional skills. Emphasizes interactive teaching, leading discussions, lecturing, planning courses, evaluating resource materials, grading and evaluation, teaching philosophies, and effective classroom management and communications. Required of all graduate students who accept teaching assistantships. Credit/no credit only.

**CMU 597 Practicum in Communication Research (1-3, max. 6)** Student participation in faculty-directed research projects.

**CMU 598 Selected Readings (1-5, max. 10)** Prerequisite: permission of supervisory committee chairperson.

**CMU 600 Independent Study or Research (\*)** Prerequisite: permission of supervisory committee chairperson.

**CMU 700 Master's Thesis (\*)**

**CMU 800 Doctoral Dissertation (\*)**

## Comparative Literature

B531 Padelford

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/comp\\_lit.html](http://www.washington.edu/students/genocat/academic/comp_lit.html)

Department Web page:  
[depts.washington.edu/complit/](http://depts.washington.edu/complit/)

The comparative literature program works across national and regional boundaries to explore the relationships among multiple literary traditions. Comparative literature also focuses on the relationship of literature to the other arts and to fields of knowledge such as philosophy, anthropology, history, or cultural studies. Departmental courses deal with a range of topics in literary and cultural studies, from specific investigations of the patterns of influence and reception across national traditions to the general study of literary theory and criticism.

## Graduate Program

Graduate Program Coordinator  
B405 Padelford, Box 354330  
(206) 543-1488

The Department of Comparative Literature offers a program of study with faculty members from the following participating departments: Asian Languages and Literature, Classics, English, French and Italian Studies, Germanics, Near Eastern Languages and Civilization, Scandinavian Studies, Slavic Languages and Literatures, Spanish and Portuguese Studies, and Women Studies. Study in this program leads to a Master of Arts or Doctor of Philosophy degree. Students concentrate on graduate courses in comparative literature and specialize in two or more national literatures of major interest to them, studied in the original language. With permission, a Ph.D. aspirant may choose as a third area of study a field outside of literature (e.g., philosophy, religion, art, political thought). On receiving the advanced degree, the student is qualified for teaching and research in comparative and general literature, as well as the language and literature of specialization.

## Special Requirements

Applicants for the M.A. program are required to have a B.A. degree in comparative literature, English, or any foreign language, or an equivalent background; applicants for the Ph.D. program are required to have an M.A. in one of the above areas. M.A. students are required to demonstrate advanced competence in one foreign language and a basic reading knowledge of a second. Ph.D. students are required to demonstrate advanced competence in two foreign languages and a basic reading knowledge of a third. Advanced competence usually must be demonstrated upon admission to the program, and the reading knowledge is required before M.A. or Ph.D. examinations are administered. Language competence is evaluated by comparative literature faculty through departmental examinations or by evidence of completion of satisfactory advanced (400- or 500-level) course work in the language.

## Financial Aid

The department awards teaching assistantships annually to qualified students and provides up to five years of support toward the Ph.D. to students who enter with a B.A. Teaching assistantships can be assigned in Comparative Literature, Cinema Studies, or in any of the national literature departments affiliated with Comparative Literature.

## Ph.D. Program in Theory and Criticism

This is a joint-doctoral program with eleven participating doctoral programs (Asian Languages and Literature; Classics; Comparative Literature; Drama; English; Germanics; French and Italian Studies; Scandinavian Studies; Slavic Languages and Literatures; Spanish and Portuguese Studies; and Speech Communication). The program combines the doctoral program in one of the participating departments with an additional set of courses in theory and criticism into an integrated course of study. The purpose is to broaden a student's perspective and to increase awareness of different critical approaches to literature and related fields. Study in this program leads to a Ph.D. in the respective major field and theory and criticism.

## Admission Requirements

Applicants must have been admitted to one of the participating departments and have received a Master's degree in a subject represented by these departments or in a related field.

## Faculty

### Chair

Gary J. Handwerk

### Professors

Adams, Hazard S. \* 1977, (Emeritus); MA, 1949, PhD, 1953, University of Washington; romanticism, history of literary theory, Anglo-Irish literature.

Ammerlahn, Hellmut H. \* 1968; PhD, 1965, University of Texas (Austin); Goethe, eighteenth to early twentieth century, comparative literature.

Behler, Diana I. \* 1971; PhD, 1970, University of Washington; romanticism, nineteenth century, comparative literature.

Borch-Jacobsen, Mikkel \* 1986; Doct, 1981, University of Strasbourg (France); French twentieth-century literature, theory and criticism, psychoanalysis.

Brown, Jane K. \* 1988; PhD, 1971, Yale University; seventeenth, eighteenth and nineteenth century, comparative literature.

Brown, Marshall J. \* 1988; PhD, 1972, Yale University; eighteenth- and nineteenth-century literature, literary theory, music and literature.

Handwerk, Gary J. \* 1984; PhD, 1984, Brown University; literary theory, English and Irish nineteenth- and twentieth-century narrative.

Hruby, Antonin F. \* 1961, (Emeritus); PhD, 1946, Charles University (Czechoslovakia); medieval literature, comparative literature.

Jaeger, C. Stephen \* 1985; PhD, 1970, University of California (Berkeley); medieval German and Latin literature, medieval intellectual history, comparative literature.

Jones, Frank W. 1955, (Emeritus); PhD, 1941, University of Wisconsin; MA, 1955, Oxford University (UK); translation, twentieth-century theatre, poetry.

Leiner, Jacqueline \* 1963, (Emeritus); DresLe, 1969, University of Strasbourg (France); modern French literature.

Leiner, Wolfgang \* 1963, (Emeritus); PhD, 1955, University of Saarlandes (Germany); seventeenth- and twentieth-century French and Italian literature.

Modiano, Raimonda \* 1978; PhD, 1973, University of California (San Diego); romanticism.

Reinert, Otto \* 1956, (Emeritus); PhD, 1952, Yale University; comparative literature, eighteenth-century literature.

Rossel, Sven H. \* 1974, (Affiliate); PhD, 1968, University of Copenhagen (Denmark); Danish language and literature, medieval literature; European pre-romanticism, romanticism, symbolism.

Shapiro, Steven \* 1984; PhD, 1981, Yale University; literary theory, romantic poetry, post-modernism.

Staten, Henry J. \* 1998; PhD, 1978, University of Texas (Austin); 19th- and 20th-century British literature, history of criticism.

Steele, Cynthia 1986; PhD, 1980, University of California (San Diego); Latin American literature and cultural studies; Mexican literature, film, and photography.

Steele, Birgitta \* 1973, (Emeritus); PhD, 1960, University of Washington; Scandinavian drama and film, children's literature, comparative literature.

Vance, Eugene \* 1990; PhD, 1964, Cornell University; French, English, and Italian medieval literature; history of rhetoric; sacred art; age of Augustine.

Wang, Ching-Hsien \* 1971; PhD, 1971, University of California (Berkeley); Chinese poetry and comparative literature.

Webb, Eugene \* 1966; PhD, 1965, Columbia University; modern English, French, and German literature, comparative religion.

Ziadeh, Farhat J. \* 1966, (Emeritus); LLB, 1940, University of London (UK); Arabic language and literature, Islamic law, Islamic institutions.

### Associate Professors

Collins, Douglas P. \* 1980; PhD, 1978, University of Missouri; twentieth-century French literature.

Dubois, Thomas A. \* 1990; PhD, 1990, University of Pennsylvania; Nordic folklore and mythology, Finnish, Sami.

Ellrich, Robert J. \* 1964, (Emeritus); PhD, 1960, Harvard University; eighteenth-century French literature.

Fisher, Alan S. \* 1968; PhD, 1969, University of California (Berkeley); Renaissance, seventeenth- and eighteenth-century literature, history of literary criticism.

Geist, Anthony L. \* 1987; PhD, 1978, University of California (Berkeley); twentieth-century Spanish literature: ideology and literary form, cultural studies, film.

Kapetanac, Breda \* 1975, (Emeritus); LittD, 1966, University of Zagreb (Yugoslavia); theory of comparative literature, 19th and 20th century European literature.

Konick, Willis \* 1950; PhD, 1964, University of Washington; Russian literature, nineteenth-century European literature, cinema studies.

McLean, Sammy K. \* 1967, (Emeritus); PhD, 1963, University of Michigan; Western drama, twentieth-century poetry, psychoanalysis and literature, literary translation, comparative literature.

Searle, Leroy F. \* 1977; MA, 1968, PhD, 1970, University of Iowa; twentieth-century literature, critical theory, American studies.

Sehmsdorf, Henning K. \* 1967, (Emeritus); PhD, 1968, University of Chicago; folklore and mythology, Norwegian language and literature, comparative literature.

Vaughan, Miceal F. \* 1973; PhD, 1973, MA, 1973, Cornell University; medieval language and literature.

Warne, Lars G. \* 1975, (Emeritus); PhD, 1974, University of California (Berkeley); Swedish language and literature, Scandinavian novel, comparative literature.

### Assistant Professors

Bean, Jennifer M. 1998; PhD, 1998, University of Texas (Austin); film studies, American literature and culture, studies in gender and sexuality.

Crnkovic, Gordana \* 1993, (Adjunct); MA, 1991, PhD, 1993, Stanford University; East European literature, film, former Yugoslavia, theory, American literature, comparative literature.

### Senior Lecturer

Dornbush, Jean M. \* 1980; PhD, 1976, Princeton University; medieval period, women and literature, writing in comparative literature.

### Lecturer

Popov, Nikolai B. \* 1985; PhD, 1994, University of Washington; modern Irish, Slavic, and German writers; literary theory and criticism; translation.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**C LIT 400 Introduction to the Theory of Literature (5) VLPA** A selection of major theoretical statements in the history of literary theory, with emphasis on fundamental issues of lasting concern and with attention to some recent emphases.

**C LIT 410 Studies in Literary History (5, max. 15) VLPA** Introduction to a major figure or movement associated with the development of literary history. Through the study of one aspect of literary history students gain a thorough understanding of a particular point of view, while exploring the breadth of contemporary approaches to literature.

**C LIT 421 Studies in Connections: Literature and Other Disciplines (5, max. 15) VLPA** Examines the links between literature and other disciplines or art forms. Literature and history, literature and philosophy, literature and music, literature and the visual arts are all appropriate topics. Selection of focus depends on instructor.

**C LIT 422 Studies in Genre (5, max. 15) VLPA** Major genres of world literature: poetry, fiction, drama. Readings, in English from a wide selection of national literatures.

**C LIT 424 The Epic Tradition (5) VLPA** Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments

and adaptations of the genre. Choice of reading material varies. Literary background recommended. Offered: jointly with CLAS 424.

**C LIT 430 Readings in Folklore (5) VLPA** Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 430.

**C LIT 431 The Northern European Ballad (5) VLPA** Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, theory, genre classification, and interpretive approaches. Offered: jointly with SCAND 431.

**C LIT 460 Cinematic Production (5) VLPA** Examines fictional or documentary filmmaking/video production from concept, focus, treatment, research, data gathering, story development, scripting, narrating, performing and postproduction. Students will be exposed to a wide variety of filmmaking styles and will engage in a group creative project.

**C LIT 470 Senior Seminar in Folklore (5) VLPA** Investigates ethnic and several American folk traditions in the Pacific Northwest through extensive fieldwork. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 470.

**C LIT 490 Directed Study or Research (1-5, max. 10)** Individual study of topics in comparative literature by arrangement with the instructor and the Comparative Literature office.

**C LIT 491 Internship (1-5, max. 5)** Supervised experience in local businesses and other agencies. Open to upper-division Comparative Literature and Cinema Studies majors. Recommended: 25 credits of C LIT courses.

**C LIT 493 Comparative Literature Honors Seminar (5, max. 15) VLPA** Special topics in comparative literature. Required of honors students in comparative literature.

**C LIT 495 Honors Thesis (5) VLPA** Preparation of an honors thesis under the direction and supervision of a faculty member.

**C LIT 496 Special Studies in Comparative Literature (3-5, max. 15) VLPA** Offered occasionally by visitors or resident faculty. Content varies.

**C LIT 497 Special Topics in Cinema Studies (3-5, max. 10) VLPA** Varying topics in Cinema Studies. Offered by resident or visiting faculty.

### Courses for Graduates Only

**C LIT 500 The Theory of Literature I: The Literary Text (5, max. 15)** An investigation into the nature of literature in contrast to other forms of writing and into essential features of literature such as genres, imagery, modes of communication, and structure.

**C LIT 501 The Theory of Literature II: History of Literature (5, max. 15)** An exploration of topics of literary history such as periods, traditions, the writing of literary history, and literary history in contrast to other histories.

**C LIT 502 The Theory of Literature III: Special Topics (5, max. 15)** Offerings vary to cover topics such as individual theorists, theoretical movements, or the intersection of literary theory with other disciplines or arts (psychoanalysis, structuralism, ethics, aesthetics).

**C LIT 507 History of Literary Criticism and Theory I (5, max. 15)** A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle,

Longinus, and the major medieval critics. Offered: jointly with ENGL 507.

**C LIT 508 History of Literary Criticism and Theory II (5, max. 15)** Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with ENGL 508.

**C LIT 509 History of Literary Criticism and Theory III (5, max. 15)** Literary Criticism and theory from Kant's Critique of Judgment to the mid-twentieth century and the work of Northrop Frey. Offered: jointly with ENGL 509.

**C LIT 510 History of Literary Criticism and Theory IV (5, max. 15)** A study of the major issues in literary criticism and theory since about 1965. Offered: jointly with ENGL 510.

**C LIT 511 Literary Translation (5, max. 15)** Lectures on principles of translating literary works into readable English. Students present and comment on translations made by them and write seminar papers on problems of translation in theory and practice.

**C LIT 516 Colloquium in Criticism (5, max. 15)** Recent trends in literary criticism, taught by representatives from various literature departments, covering critical trends such as structuralism, poststructuralism, hermeneutics, reception theory, and sociological approaches to literature.

**C LIT 517 Colloquium in Folklore (5)** Recent trends in folklore studies, taught by representatives from various literature departments and disciplines in the social sciences.

**C LIT 518 Colloquium in Medieval Studies (5)** Salient literary aspects of the European Middle Ages, taught by representatives from various literature departments as well as from related disciplines, such as philosophy, art history, history, and comparative religion.

**C LIT 530 Cultural Criticism and Ideology Critique I (5, max. 15)** A study of the main attempts to come to an understanding of the humanities and the nature of historical interpretation in a cultural context.

**C LIT 535 Cultural Criticism and Ideology Critique II (5, max. 15)** Offerings vary to cover individual theorists and particular manifestations of cultural criticism and ideology critique.

**C LIT 545 Medieval Studies (3/5, max. 15)** Literature, intellectual history, and sociology of the Middle Ages, 500-1200. Topics may include "renaissance" of the twelfth century; the educational ideal; rise of universities; philosophical concepts.

**C LIT 546 Studies in Renaissance and Baroque (3-5, max. 10)** Aspects of Western European literature during the Renaissance and Baroque period. Course content varies.

**C LIT 547 Studies in Eighteenth-Century Literature (3-5, max. 10)** Examination of various trends in eighteenth-century literature including the Enlightenment, Rationalism, Pre-Romanticism, and Neo-Classicism. Course content varies with instructor.

**C LIT 548 Studies in Nineteenth-Century Literature (3-5, max. 10)** Examination of various trends in nineteenth century literature including Romanticism, Realism, Naturalism, and Symbolism.

**C LIT 549 Twentieth-Century Literature (3-5, max. 10)** Selected movements, schools, and trends of significance in twentieth-century literature of Europe and Americas. Symbolism, surrealism, dada, expressionism, neorealism, existentialism, nouveau roman, and absurd may be considered. Texts in English, French, and German figure most prominently, but Spanish, Italian, Russian, and other materials may be examined. Content and emphasis vary.

**C LIT 570 The Novel: Theory and Practice (3-5, max. 15)** Study of the novel as a genre, examining two or more novels of varying national literatures. Course content varies.

**C LIT 571 The Lyric: Theory and Practice (3-5, max. 15)** Examination of central questions in the study of the lyric genre as approached from an international point of view. Course content varies.

**C LIT 572 The Epic: Theory and Practice (3-5, max. 15)** Examination of epic literature as exemplified by selected works chosen from various cultures and periods (e.g., French and German medieval courtly epic, the epic in Renaissance and baroque Europe, traditions of the mock epic). Course content varies.

**C LIT 573 The Drama: Theory and Practice (3-5, max. 15)** Examination of various aspects of the drama as a major literary genre, as approached from international and multilingual points of view. Course content varies.

**C LIT 576 Seminar in East-West Literary Relations (3-5, max. 15)** Comparative investigation of literary topics requiring the study of both Eastern and Western documents. Explores parallels and contradictions between the two, in concepts, ideas, and specific topics. A comparative paper on a chosen topic with qualified conclusions is required. Emphasis varies. Prerequisite: at least one East Asian language.

**C LIT 596 Special Studies in Comparative Literature (3-5, max. 15)** Offered occasionally by visiting or resident faculty. Course content varies.

**C LIT 599 Special Seminar or Conference (1-9, max. 30)** Group seminars or individual conferences scheduled to meet special needs. Prerequisite: permission of graduate program adviser.

**C LIT 600 Independent Study or Research (\*)**

**C LIT 700 Master's Thesis (\*)**

**C LIT 800 Doctoral Dissertation (\*)**

## Comparative Religion

See International Studies.

## Dance

258 Meany

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/dance.html](http://www.washington.edu/students/genecat/academic/dance.html)

Department Web page:  
[depts.washington.edu/uwdance/](http://depts.washington.edu/uwdance/)

The dance program is designed as part of a liberal arts curriculum and provides students with a foundation for future advanced work in performance or movement-related work. It is recommended that majors supplement their dance studies with work that will provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.

## Graduate Program

Graduate Program Coordinator  
259 Meany, Box 351150  
(206) 543-7536  
[uwdance@u.washington.edu](mailto:uwdance@u.washington.edu)

The dance program offers graduate study leading to a Master of Fine Arts degree. This program is designed specifically for professional dance performers who wish to prepare for a transition into college teaching careers. All graduate students will comprise the Chamber Dance Company and will hold teaching assistantships.

During the two-year program, a student must complete at least 72 credits, of which a minimum of 24 must be in an area of specialization (e.g., history, criticism, aesthetics, anatomy, ethnology).

### Admission Requirements

(1) A letter of application and résumé. (2) An undergraduate degree. (3) A minimum of eight years of professional performing experience. (4) The ability to demonstrate movement skills at a professional level in at least one idiom, and an in-person audition or performance video tape. (5) Three letters of reference verifying success and responsibility in the professional dance arena. Neither a foreign language nor the Graduate Record Examination is required. Application deadline is January 15.

### Financial Aid

All graduate students will receive tuition waivers and teaching assistant stipends.

## Faculty

### Acting Chair

Sarah N. Gates

### Professors

Boris, Ruthanna 1965, (Emeritus); DTR, 1946, American Dance Therapy Association; ballet technique and dance therapy.

Knapp, Joan S. \* 1981, (Emeritus); MA, 1964, University of Illinois; dance composition, improvisation, kinesesthetic training.

Wiley, Hannah \* 1984; MA, 1981, New York University; ballet, scientific aspects of dance, choreography, dance in higher education.

### Assistant Professors

Novak, Marsha 1990, (Affiliate); MS, 1982, University of Washington.

Parker, Rip \* 1989; MFA, 1992, University of Washington; artists and their work in relation to history, choreography.

Simpson, Maria Quinlan \* 1994; MFA, 1996, University of Washington; physical challenges of dance techniques, ballet, modern dance.

### Lecturer

Kitsos, Robert R. 1995; MFA, 1997, University of Washington; dance aesthetics, choreography, contemporary popular styles.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**DANCE 420 Dance Aesthetics (3) VLPA/I&S** Philosophical investigation of the expressive elements of dance. Reading and discussion of the concepts of beauty, style, and aesthetic theory.

**DANCE 490 Special Studies in Dance (1-3, max. 10) VLPA** Special studies designed to address contemporary and historical concerns in the field of dance.

**DANCE 493 Anatomy for Dance (3) VLPA/NW Simpson** Anatomy of the musculoskeletal system and its applications in dance movement. Offered: alternate years; W.

### Courses for Graduates Only

**DANCE 510 Chamber Dance Production (3, max. 9)** Dance production in the university environment. Publicity, programming, budgeting. Rehearsal, rehearsal direction, and performance of Chamber Dance Company repertoire. Credit/no credit only.

**DANCE 515 Dance Research Methods (3)** Seminar in problem identification and definition, theory development, research design, data analysis, and interpretation. Examples of various types of dance research.

**DANCE 520 Dance in Higher Education (3)** Readings, discussion, and observation of teaching methods. Students assist faculty in the instruction of lower-level classes. Selected anatomical, historical, and aesthetic concepts as they relate to dance pedagogy. Development of a personal teaching style appropriate for university-level dance courses.

**DANCE 521 Dance Administration (3)** Readings and discussion relating to dance administration in college and professional settings. Topics include: curricular development, academic advising, budgetary procedures, personnel issues, and problems related to dance as a performing art within the university structure.

**DANCE 530 Choreographer/Composer Collaboration (2) Rahn, Wiley** Collaboration between choreographers and composers: models and creative workshop projects, in preparation for a concert of collaborative work in DANCE 531. Offered: Sp.

**DANCE 531 Choreographer/Composer Collaborative Performance (3, max. 9) Kitsos, Rahn** Collaboration between choreographers and composers culminating in public performance. Offered: A.

**DANCE 544 Early Dance History (3)** Study of the evolution of dance from ritual to a theatre art form. Offered: alternate years.

**DANCE 545 Late Dance History (3)** Roots of contemporary dance as an art form and its relationship to developments in ballet since the turn of the century. Offered: alternate years.

**DANCE 590 Dance Teaching Methodologies (3) Wiley** Introduction to dance pedagogy with an emphasis on motor learning skills and biomechanics. Practical teaching experience. Offered: alternate years.

**DANCE 595 Master's Project (3)** Culminating project in area of interest developed in consultation with faculty advisor and supported by elective courses. Full faculty approval of proposed project by end of first year. Formal presentation, appropriate to project's content, presented to full faculty during second year. Projects may range from creative to scholarly.

**DANCE 600 Independent Study or Research (\* max. 10)**

## Drama

101 Hutchinson

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/drama.html](http://www.washington.edu/students/genocat/academic/drama.html)

Department Web page:  
[asc.arts.washington.edu/drama/](http://asc.arts.washington.edu/drama/)

At the graduate level the School of Drama provides advanced training which prepares theatre artists and scholars to make significant contributions in theatre performance, production, and scholarship.

The School uses four theatres including the Penthouse (the first theatre-in-the-round built in the United States), the thrust-stage Playhouse, the end-stage Studio Theatre, and the proscenium opera house in Meany Hall. Faculty- and student-directed plays drawn from the full range of world dramatic literature are produced throughout the year. The School also produces operas in association with the School of Music and utilizes two performance spaces in Hutchinson Hall for student work.

## Graduate Program

Graduate Program Coordinator  
101 Hutchinson, Box 353950  
(206) 543-5140  
[uwdrama@u.washington.edu](mailto:uwdrama@u.washington.edu)

The School of Drama offers programs of graduate study leading to the Master of Fine Arts and Doctor of Philosophy degrees. Areas of study for the M.F.A. degree are acting, stage direction, scene design, lighting design, and costume design. Most students should expect to spend three years to complete requirements for the M.F.A. degree.

The Ph.D. program provides students with training for scholarly research in theatre history, dramatic literature, theory, and criticism. Students are also encouraged to do interdisciplinary work with such allied programs as the Ph.D. program in critical theory.

## Admission Requirements

Students may enter only in autumn quarter. Since admission requirements vary for each of the graduate programs, applicants should contact the School for current application information and deadlines.

## Faculty

### Chair

Sarah N. Gates

### Professors

Clay, Jack D. \* 1986, (Emeritus); MA, 1956, Northwestern University; acting.

Comtois, Mary Elizabeth \* 1985, (Emeritus); PhD, 1970, University of Colorado (Boulder); playwrighting.

Crider, James R. \* 1952, (Emeritus); MA, 1950, University of Washington; costume design.

Dahlstrom, Robert A. \* 1971; MA, 1967, University of Illinois; scene design.

Gates, Sarah N. \* 1983; MA, 1974, University of California (Santa Barbara); MFA, 1983, Boston University; costume design.

Haaga, Agnes M. 1947, (Emeritus); MA, 1952, Northwestern University; child drama.

Hostetler, Paul S. \* 1974, (Emeritus); PhD, 1965, Louisiana State University; theatre history, directing.

Jones, Frank W. 1955, (Emeritus); PhD, 1941, University of Wisconsin; MA, 1955, Oxford University (UK); translation, twentieth-century theatre, poetry.

Jory, Jon 2000; directing, acting.

Loper, Robert B. \* 1967, (Emeritus); PhD, 1957, University of Birmingham (UK); acting, directing.

Pearson, Steven \* 1989; MFA, 1978, Carnegie Mellon University; professional actor training and modern Japanese theatrical techniques.

Siks, Geraldine B. 1949, (Emeritus); MA, 1940, Northwestern University; child drama.

Sydow, John D. 1970, (Emeritus); MFA, 1950, Yale University; directing.

Witham, Barry B. \* 1979; PhD, 1968, Ohio State University; modern theatre history.

### Associate Professors

Forrester, William D. \* 1972; MFA, 1969, Yale University; scene design.

Geiger, Mary L. \* 1993; MFA, 1985, Yale University; lighting design.

Hunt, Robyn \* 1988; MFA, 1978, University of California (San Diego); actor training, cross cultural performances, techniques, and script writing.

Jenkins, Mark F. \* 1989; the Stanislavsky approach to acting; acting, directing.

Valentinetti, Aurora 1943, (Emeritus); MA, 1949, University of Washington; puppetry.

### Assistant Professors

Curtis-Newton, Valerie \* 1993; MA, 1996, University of Washington; directing, acting, African-American theatre history.

Johnson, David Odai \* 1998; PhD, 1994, University of Texas (Austin); theatre history, especially English Restoration and 18th century.

Parker, Shanga Kyle Gerard \* 1994; MFA, 1991, University of California (San Diego); acting, directing, acting in verse.

Redd, Tina \* 1993; PhD, 1996, University of Washington; dramatic theory and criticism, emphasis on representations of race and gender.

Wolcott, John R. \* 1967, (Emeritus); PhD, 1967, Ohio State University; theatre history, computing in theatre research.

### Senior Lecturers

Harrison, Mark Jeffrey \* 1997; PhD, 1989, New York University; theatre and opera, directing.

Shahn, Judith \* 1990; BFA, 1977, Carnegie Mellon University; voice production for the theatre, dialects, Shakespeare and modern text.

### Lecturers

Burke, Thomas D. \* 1994; MFA, 1988, University of Washington; CAD, technical theatre.

Trout, Deborah L. \* 1994; MFA, 1994, Yale University; costume design.

### Artist in Residence

Madden, Catherine M. 1987; MA, 1977, Washington University; Alexander technique, acting.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### DRAMA 401- Drama Colloquium ([0-1]-, max. 4)

**VLPA** *Gates* A professional seminar featuring guest artists and career development specialists. Recommended for prospective Drama majors and required for admitted majors. Offered: AWSp.

### DRAMA 405 Computer Graphics Systems (3)

**VLPA** *Burke* Introduction to CAD applications in theatre design and technology. Focus on learning to use general purpose graphics software for CAD. Discussion of available hardware and software. Recommended: DRAMA 420. Offered: A.

### DRAMA 410 Advanced Theatre Technical Practices (2-4, max. 20) VLPA

Production-related apprenticeship, in the areas of scene construction, scene painting, costume, or lighting. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 418. Offered: AWSp.

### DRAMA 413 Advanced Scene Construction (3)

**VLPA** *Burke* Special problems in scene construction materials and rigging. Recommended: DRAMA 210; DRAMA 212; DRAMA 290; DRAMA 292; DRAMA 410; DRAMA 420.

### DRAMA 414 Scene Design (3, max. 6) VLPA

*Dahlstrom, Forrester* Theory, practice, and rendering of scene designs. Repeat of course involves intermediate designs and models. Recommended: ART H 203; DRAMA 210.

### DRAMA 415 Stage Costume Design (3, max. 6)

**VLPA** Theory, practice, and rendering of costume designs for the theatre. Repeat of course involves intermediate designs. Recommended: ART H 203; DRAMA 211; DRAMA 416 if repeating.

### DRAMA 416 History of Western Dress (5) VLPA

*Gates* Survey history of Western dress. Emphasis on use of this information by theatrical costume designers. Includes development of costume for drama, ballet, and opera. Prerequisite: DRAMA 302.

### DRAMA 417 Stage Costume Patterning and Construction (3, max. 6) VLPA

Techniques of costume construction, including study of fabrics; emphasis on creating patterns by draping. Recommended: DRAMA 211; DRAMA 416.

### DRAMA 418 Scene Painting (3, max. 6) VLPA

*Forrester* Lecture-laboratory with focus on techniques and principles of scene painting. Uses of various media and types of equipment as applicable to varied scenic pieces. Recommended: DRAMA 210.

### DRAMA 419 Advanced Stage Lighting Design (3, max. 9) VLPA

*Geiger* Development of a working process consistent with current professional practice. Includes drafting, worksheets, study of color. Students read plays and develop analytical skills. Recommended: DRAMA 212.

**DRAMA 420 Design and Technical Drafting (2, max. 4) VLPA** Laboratory and project critique covering stage design graphics and technical drawing; specifically: designer's elevations, ground plans, sections, detail drawing, transposition of design drawing information to technical drawings. Recommended: DRAMA 210.

**DRAMA 421 Drawing and Rendering Techniques for the Theatre (2, max. 10) VLPA** *Forrester* Weekly figure-drawing laboratories with live model and weekly field trips for laboratories in drawing natural phenomena and architectural detail. Studies in historical drawing styles. Practice in use of several media and techniques of expression. Recommended: DRAMA 210; DRAMA 211.

**DRAMA 441 Beginning Playwriting (1-6, max. 12) VLPA** Writing exercises and drafts of a one-act play provide first experience in writing for performance. Readings of representative one-act plays introduce genres and writing styles. Recommended: DRAMA 253 or DRAMA 353; DRAMA 210; DRAMA 211; DRAMA 212.

**DRAMA 450 Rehearsal Laboratory (2, max. 6) VLPA** Acting in projects directed by graduate directing students. Recommended: DRAMA 253.

**DRAMA 454 Projects in Acting (3, max. 9) VLPA** Rehearsal and classroom performance of dramatic literature of various periods and styles.

**DRAMA 455 Alexander Technique (3) VLPA** *Madden Harrison* A practical and theoretical introduction to the Alexander Technique, a psychophysical re-education process developed by F. M. Alexander (1869-1955). Studio application of this work improves physical/vocal coordination, enhances creativity, and clarifies thinking.

**DRAMA 460 Introduction to Directing (3) VLPA** *Harrison* Student is introduced to the art of the stage director. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 253 or DRAMA 353; DRAMA 302. Offered: A.

**DRAMA 461 Elementary Directing (3) VLPA** *Harrison* Elementary study of the art of the stage director. Recommended: DRAMA 460.

**DRAMA 462 Elementary Directing (3) VLPA** *Harrison* Elementary study of the art of the stage director. Recommended: DRAMA 461.

**DRAMA 466 Stage Management (2-5, max. 15) VLPA** *Stewart* Study and practice of stage management. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 290; DRAMA 291; DRAMA 292.

**DRAMA 471 History of the English Restoration and 18th Century Theatre (5) VLPA** Examination of the relationship of the physical theatre and the productions that took place within that theatre. Particular emphasis on the text performed, styles of acting, scenic elements, and the critical theories that influenced the theatre of the period. Prerequisite: DRAMA 302.

**DRAMA 472 European and American Theatre, Revolution to Modernism (1780-1920) (5) VLPA** Survey of the drama, theatre, and theatre culture from the French Revolution into the beginnings of Modernism; social and political aspects of theatre, rise of Romanticism, melodrama, and variety entertainment through the 19th century to the artistic revolution that paved the way for modern theatre. Prerequisite: DRAMA 302.

**DRAMA 473 Modern European Theatre and Drama (5) VLPA** *Witham* Major movements and figures in contemporary European theatre from French absurdism to the present. Prerequisite: DRAMA 302.

**DRAMA 475 Modern English Theatre and Drama (5) VLPA** *Witham* Major trends in contemporary English theatre, post-World War II to the present. Performers, dramatists, and designers who shaped the course of the theatre following the "angry young rebellion" of the 1950s. Prerequisite: DRAMA 302.

**DRAMA 476 Modern American Theatre and Drama (5) VLPA** *Witham* Major forces shaping modern American theatre, Eugene O'Neill to the present. Leading dramatists, directors, and designers of the post-World War II era. Experiments such as the Federal Theatre Project, Group Theatre, and Living Theatre. Prerequisite: DRAMA 302.

**DRAMA 490 Special Studies in Acting-Directing (1-6, max. 12) VLPA**

**DRAMA 491 Special Studies in Design-Technical (1-6, max. 6) VLPA**

**DRAMA 494 Special Studies in Theatre and Drama (5, max. 20) VLPA** *Johnson, Redd, Witham* Topics in drama, history, and criticism. See Time Schedule for specific topic. Prerequisite: DRAMA 302.

**DRAMA 495 Practicum in Design and Technical Theatre (2-6, max. 15) VLPA** Emphasis on developing design and technology problem-solving skills through laboratory and project evaluation. Recommended: DRAMA 211, DRAMA 212, DRAMA 313.

**DRAMA 496 Stage Costume Problems (2, max. 8) VLPA** Specific research problems of stage costume design and execution: accessories, masks, wigs, fabric modification, millinery or construction analysis for specialized costumes. Topics vary. Recommended: DRAMA 211; DRAMA 416.

**DRAMA 498 Theatre Production (1-2, max. 9) VLPA** Laboratory course for students participating in School of Drama major productions. Credit/no credit only. Offered: AWSp.

**DRAMA 499 Undergraduate Research (1-5, max. 15)**

### Courses for Graduates Only

**DRAMA 502 Designer-Director Analysis (4)** *Dahlstrom, Harrison* Methods of examining plays to make the collaboration of director and designer productive. Attempts to create a structural whole from visual and verbal approaches to analysis. Prerequisite: graduate standing in drama.

**DRAMA 510 Design Studio (3, max. 18)** *Dahlstrom, Forrester, Gates, Geiger, Trout* Investigation of space, form, light, texture, and color in total theatre design, stressing mastery of the media, methods of presentation and execution, and intelligent and appropriate visual reaction to a dramatic text. Prerequisite: graduate standing in drama.

**DRAMA 512 Lighting Design Seminar (1/4, max. 18)** *Geiger* Forum for graduate lighting students to further explore the art of lighting design. Assignments include paper projects, School of Drama production, and field trips to local theatres. Prerequisite: graduate standing.

**DRAMA 514 Design and Technical Theatre Colloquium (2, max. 18)** Discussion of work in progress or completed in production, centering on the conceptual work of the designer/director on the production and the methods of execution in the shops and on stage. Offered: AWSp.

**DRAMA 518 Studies in Historic Design (3)** *Dahlstrom* Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods.

**DRAMA 519 Studies in Historic Design (3)** *Dahlstrom* Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods. Prerequisite: DRAMA 518, or permission of instructor.

**DRAMA 520 Advanced Theatre Practicum (1-5, max. 15)** Professional student internship with professional theatres: scenery, lighting, scene painting, costume, acting, directing, stage management, theatre management. Prerequisite: permission of instructor.

**DRAMA 551 Teaching of Acting (1-3, max. 3)** Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

**DRAMA 552 Teaching of Acting (1-3, max. 3)** Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

**DRAMA 553 Teaching of Acting (1-3, max. 3)** Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

**DRAMA 555 Studies in Acting (2-6, max. 18)** Individual or group work on special skills for the actor. Topics vary. Prerequisite: admission to the Professional Actor Training Program. Offered: AWSp.

**DRAMA 557 Studio I (12, max. 36)** *Hunt, Jenkins, Pearson, Shahn* Skill development in acting, voice, speech, and movement necessary for professional training in acting. Prerequisite: admission to the Professional Actor Training Program. Offered: AWSp.

**DRAMA 558 Studio II (12, max. 36)** *Hunt, Jenkins, Pearson, Shahn* Continuation of 557. Prerequisite: DRAMA 557 and completion of the first year of the Professional Actor Training program. Offered: AWSp.

**DRAMA 559 Studio III (6, max. 18)** *Hunt, Jenkins, Pearson, Shahn* Specialized and individualized work relating to the main curriculum of the third year of the Professional Actor Training Program. Prerequisite: DRAMA 558 and completion of the second year of the Professional Actor Training Program. Offered: AWSp.

**DRAMA 560 Managing the Rehearsal and Production Process (2)** Introduction to graduate-level directing. Play analysis, research, performance theory, and concept development as it relates to process-acting and rehearsal, design, staging techniques, and production management. Reading and writing assignments augmented by faculty and professional guests in performance, design, production, and dramaturgy.

**DRAMA 561 Directing Projects (2-3, max. 12)** *Harrison* Rehearsal techniques and staging skills in a variety of spatial configurations. One-act and full-length plays which follow a prescribed sequence. Prerequisite: graduate standing in the directing program.

**DRAMA 562 Performance Studio (1-3, max. 12)** Performance techniques in specialized areas of importance to the professional director, including stage combat, speech and dialect, mask, physical comedy, improvisation, and puppetry.

**DRAMA 563 Seminar in Directing (2, max. 18)** *Harrison* Seminar discussion of current productions; focused readings and discussion in specific areas of dramatic literature and problems related to stage direction. Prerequisite: graduate standing in drama and permission of instructor.

**DRAMA 564 Theatre Studies: History, Theory, Criticism (3, max. 15)** Special topics in history, theory, and criticism.

**DRAMA 565 Verse Workshop (4)** Techniques necessary to direct and perform plays of Shakespeare, Moliere, and other verse playwrights: scansion and imagery; period and style using verse text; crowd scenes, transformations of time and space, and other staging exercises; direction of scenes or acts from verse plays.

**DRAMA 566 Directing for the Camera (3)** Storyboarding, setting up camera shots, improvisation, and rehearsal techniques for directing actors on camera (both in studio and on location). Students direct one- and two-camera scenes; and write, direct, and edit a short screenplay.

**DRAMA 567 Acting Process (1-3, max. 12)** Development of acting skills necessary for the professional director. Emphasis on physical training, playing action, strong internal technique, imagination and clarity of expression.

**DRAMA 568 Writing for the Stage (3, max. 6)** Focus on adaptation for the stage of non-dramatic sources, such as literature, poetry, history, and contemporary events. Emphasis on structure, dialogue, dramatic action, rhythm, characterization. Writing exercises using fictive and non-fictive sources, biographical sources, and found objects.

**DRAMA 569 Directing/Teaching Apprenticeship (3)** Assisting faculty or professional guest director in production for the entire rehearsal period, or assisting faculty in performance training.

**DRAMA 571 Problems in Theatre History Research (5)** *Johnson, Witham* Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

**DRAMA 572 Problems in Theatre History Research (5)** *Johnson, Witham* Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

**DRAMA 573 Problems in Theatre History Research (5)** *Johnson, Witham* Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

**DRAMA 575 Seminar in Theatre History (5)** *Johnson, Witham* Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 576 Seminar in Theatre History (5)** *Johnson, Witham* Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 577 Seminar in Theatre History (5)** *Johnson, Witham* Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 581 Analysis of Dramatic Texts (5)** *Redd* Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

**DRAMA 582 Analysis of Dramatic Texts (5)** *Redd* Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

**DRAMA 583 Analysis of Dramatic Texts (5)** *Redd* Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

**DRAMA 585 Seminar in Dramatic Theory (5)** *Redd* Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

**DRAMA 586 Seminar in Dramatic Theory (5)** *Redd* Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

**DRAMA 587 Seminar in Dramatic Theory (5)** *Redd* Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

**DRAMA 599 Advanced Studies in Theatre Arts (1-5, max. 10)** Independent projects or group study of specialized aspects of theatre arts. Prerequisite: permission of instructor.

**DRAMA 600 Independent Study or Research (\*)**

**DRAMA 700 Master's Thesis (\*)**

**DRAMA 800 Doctoral Dissertation (\*)**

## Economics

302 Savery

General Catalog Web page:  
[www.washington.edu/students/gencat/academic/economics.html](http://www.washington.edu/students/gencat/academic/economics.html)

Department Web page:  
[www.econ.washington.edu](http://www.econ.washington.edu)

The Department of Economics is concerned with the analysis of the ways in which societies organize the production of goods and services and the distribution of these among groups and individuals. Applied fields of study available to the student include money and banking, industrial organization, natural resource economics, labor economics, public finance, economic history, comparative systems and development, international trade, and econometrics.

---

## Graduate Program

Graduate Program Coordinator  
304A Savery, Box 353330  
(206) 685-1384  
[econadv@u.washington.edu](mailto:econadv@u.washington.edu)

The department offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. The academic programs in economics are designed to develop trained economists for careers in teaching, private industry, government, and international agencies. Frequent seminars led by U.S. and foreign visitors as well as by faculty and students are conducted as an integral element of the department's graduate program.

## Special Requirements

Applicants should have completed undergraduate training that includes courses in at least intermediate-level microeconomic and macroeconomic theory. In addition, applicants must have had at least one year of calculus, one term of linear algebra, and one term of statistics. A course in differential equations is strongly recommended. Additional work in calculus, matrix algebra, and probability and statistics is also strongly recommended. An undergraduate major in economics is not required for admission to the graduate program provided that the above prerequisites have been met. All applicants are required to take the General Test of the Graduate Record Examination (GRE) and are encouraged to take the Subject Test in Economics.

Graduate requirements for the M.A. degree include ECON 500, 501, 502, 503, 508, 580, 581, and 582. In addition to this core program, M.A. students must take at least seven elective courses in economics at the graduate level. At least three of these courses must be in applied areas, and at least two must be in the same area (the field of specialization). M.A. students also must complete 6 credits of a supervised internship. Well-prepared students should be able to complete the M.A. program in two years.

Graduate requirements for the Ph.D. degree include ECON 500, 501, 502, 503, 508, 509, 580, 581, and 582. Ph.D. students are required to pass core examinations in microeconomics and macroeconomics. In addition to this core program, Ph.D. students must take eight other elective field courses in economics at the graduate level. Each Ph.D. student must satisfy the requirements for two fields of specialization. The fields of specialization include advanced macroeconomic theory, advanced microeconomic theory, comparative systems and development, econometrics, finance, health economics, industrial organization, international economics, labor economics, natural resource economics, and public finance.

The doctoral dissertation is the final major requirement for the Ph.D. degree. Each Ph.D. student chooses a dissertation topic and a doctoral supervisory committee is appointed. After the dissertation topic has been developed, Ph.D. students take the General Examination, an oral defense of the dissertation proposal. When the dissertation is completed, Ph.D. students take the Final Examination, an oral defense of the completed dissertation. A foreign language is not required. The doctoral program is designed to be completed in four years, although most students take slightly longer.

## Financial Aid

The principal form of financial aid available to graduate students in economics is a teaching assistantship. A number of such assistantships are available to entering graduate students with promising academic records.

## Research and Computing Resources

The Institute for Economic Research houses a computer laboratory that provides hardware and software for economic modeling, economic estimation, word processing, and other faculty and graduate student research functions. Access is restricted to economics graduate students and faculty. In addition, the Center for Social Science Computation and Research (CSSCR) maintains an extensive library of computer software and data, and offers free consulting services to aid faculty and students with computing problems.

---

## Faculty

### Chair

Richard Startz

### Professors

Barzel, Yoram \* 1961; MA, 1956, Hebrew University (Israel); PhD, 1961, University of Chicago; price theory, political economy, property rights.

Brown, Gardner \* 1965; PhD, 1964, University of California (Berkeley); resource and environmental economics.

Bruce, Neil \* 1990; PhD, 1975, University of Chicago; public finance (economics of the public sector), especially taxation.

Crutchfield, James A. \* 1960, (Emeritus); PhD, 1954, University of California (Berkeley); natural resources economics, policy and management, especially marine and environmental resources.

Deolalikar, Anil B. \* 1989; PhD, 1981, Stanford University; economic development, economics of human capital, economics of population, technology transfer.

Engel, Charles M. \* 1991; PhD, 1983, University of California (Berkeley); international monetary economics.

Halvorsen, Robert \* 1972; PhD, 1973, Harvard University; environmental and natural resource economics.

Hartman, Richard C. \* 1971; PhD, 1971, University of California (Berkeley); economic theory.

Lundberg, Shelly J. \* 1984; PhD, 1981, Northwestern University; labor economics.

Madden, Carolyn Watts \* 1984, (Adjunct); MA, 1974, PhD, 1976, Johns Hopkins University; health economics and policy.

Mah, Feng-Hwa \* 1961, (Emeritus); PhD, 1959, University of Michigan; Chinese economy and foreign trade.

McCaffree, Kenneth M. \* 1949, (Emeritus); PhD, 1950, University of Chicago; labor economics and the economics of medicine.

McGee, John S. \* 1966, (Emeritus); PhD, 1952, Vanderbilt University; industrial organization.

Morris, Morris D. 1949, (Emeritus); PhD, 1954, University of California (Berkeley); economic history and the economy of India.

Nelson, Charles R. \* 1975; PhD, 1969, University of Wisconsin; econometric analysis of time series data, financial markets, monetary economics.

North, Douglas C. 1950, (Emeritus); PhD, 1952, University of California (Berkeley); economic history.

Parks, Richard \* 1970; PhD, 1966, University of California (Berkeley); microeconomics, econometrics, finance.

Plotnick, Robert D. \* 1984, (Adjunct); MA, 1973, PhD, 1976, University of California (Berkeley); poverty, labor and social welfare policy, economic policy analysis.

Silberberg, Eugene \* 1967; PhD, 1964, Purdue University; microeconomics.

Startz, Richard \* 1984; PhD, 1978, Massachusetts Institute of Technology; macroeconomics, econometrics, economics of race, finance.

Thornton, Judith Ann \* 1961; PhD, 1960, Harvard University; transition economics, natural resources.

Turnovsky, Stephen J. \* 1987; PhD, 1968, Harvard University; macroeconomics and growth, international economics, theory of economic stabilization.

Wong, Kar-Yiu \* 1983; PhD, 1983, Columbia University; international trade and commercial policy.

### Associate Professors

Brock, Philip L. \* 1991; PhD, 1982, Stanford University; economic liberalization with emphasis on financial markets and capital accumulation.

Hadjimichalakis, Michael \* 1969; PhD, 1970, University of Rochester; monetary theory and policy, macroeconomics, growth, Federal Reserve.

Huppert, Daniel D. \* 1987, (Adjunct); PhD, 1975, University of Washington; economics and management of natural resources, especially marine fisheries.

Khalil, Fahad A. \* 1991; PhD, 1991, Virginia Polytechnic Institute and State University; industrial organization, theory of contracts.

Kochin, Levis A. \* 1972; PhD, 1975, University of Chicago; macroeconomics, industrial organization, financial economics.

Lawarree, Jacques P. \* 1990; PhD, 1990, University of California (Berkeley); industrial organization, contract theory, game theory.

Leffler, Keith B. \* 1978; PhD, 1977, University of California (Los Angeles); antitrust economics, industrial organization, contracts.

Thomas, Robert P. \* 1968; PhD, 1964, Northwestern University; economic history.

### Assistant Professors

Eicher, Theo S. \* 1994; MA, 1991, MPhil, 1993, PhD, 1994, Columbia University; international, development, and macroeconomics, with emphasis on economic growth.

Liu, Wen-Fang 1998; PhD, 1998, University of Chicago; macroeconomics theory.

Martin, Laurent 1998; PhD, 1999, University of Maryland; public economics, microeconomics.

Rose, Elaina 1993; PhD, 1993, University of Pennsylvania; labor, development, applied microeconomics.

Zivot, Eric W. \* 1993; PhD, 1992, Yale University; time series, econometrics, applied macroeconomics, empirical finance.

### Senior Lecturers

Heyne, Paul \* 1976; PhD, 1963, University of Chicago; evolution of economic theory and commercial society.

Salehi-Esfahani, Haideh 1990; PhD, 1985, University of Pennsylvania; international economics, economic development.

Turnovsky, Michelle H. L. 1987; MBA, 1965, Harvard University; PhD, 1978, Australian National University; international economics, economics of the European Union.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ECON 400 Advanced Topics in Microeconomics (5) NW** Application of calculus to microeconomics. Development of comparative statics used in production and consumption theory, including derivation of the Slutsky equation and duality results. Prerequisite: ECON 300; either MATH 124, MATH 127, MATH 134, or MATH 145; recommended: MATH 126.

**ECON 401 Advanced Topics in Macroeconomics (5) NW** Application of mathematics to macroeconomics. Possible topics include economic dynamics and growth, rational expectations, real business cycle models, and New Keynesian approach. Prerequisite: ECON 301; either MATH 126, MATH 129, or MATH 136.

**ECON 403 The Economics of Property Rights (5) I&S** Property rights as an economic concept. Delineation of rights as a subject of optimization. Formation of contracts to maximize the value of personal property. Formation of organizations to induce efficient use of resources and minimize losses to public domain. Prerequisite: ECON 300; recommended: two 400-level microeconomics classes.

**ECON 404 Industrial Organization and Price Analysis (5) I&S** Analysis of firm behavior in imperfectly competitive markets. Topics include monopoly, oligopoly, product differentiation, entry deterrence, and the role of asymmetric information. Game theoretic tools and empirical evidence used to analyze topics. Prerequisite: ECON 300.

**ECON 406 Undergraduate Seminar in Economics (5, max. 10) I&S** Provides undergraduate student an opportunity to apply the tools of economic analysis in a critical examination of theoretical and empirical work. A list of topics is available in the departmental office. Prerequisite: ECON 200.

**ECON 407 Development of Economic Thought (5) I&S** From the early modern period to the present. The main subjects treated are Adam Smith and the classical school, Karl Marx, the neoclassical reformulation and its critics, the impact of J. M. Keynes, and the evolution of economics in the twentieth century. Prerequisite: ECON 300.

**ECON 409 Undergraduate Seminar in Political Economy (5, max. 10) I&S** Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Recommended: ECON 300; POL S 270. Offered: jointly with POL S 409.

**ECON 421 Money, Credit, and the Economy (5) I&S** Role of money and the banking system in the United States economy. Relation of money to inflation, interest rates, and business fluctuations. Monetary policy and Federal Reserve System. Prerequisite: ECON 301.

**ECON 422 Investment, Capital, and Finance (5) I&S** Intertemporal optimization: consumption and portfolio allocation decisions of households, investment and financing decisions of firms. Introduction to financial decisions under uncertainty. Portfolio theory, asset pricing, options, and futures. Financial market institutions and efficiency. Prerequisite: ECON 300; either ECON 311 or STAT 311.

**ECON 431 Government and Business (5) I&S** Economic effects of various governmental regulatory agencies and policies. Antitrust legislation as a means of promoting desired market performance. Observed economic effects of policies intended to regulate business practices, control prices, conserve resources, or promote competition. Prerequisite: ECON 300.

**ECON 435 Natural Resource Economics (5) I&S** Survey of the economics of renewable and nonrenewable resources including fisheries, forest, minerals, and fuels. Optimal trade-offs between benefits and costs of resource use, including trade-offs between current and future use. Effects of property rights on resource use. Prerequisite: ECON 300.

**ECON 436 Economics of the Environment (5) I&S** Microeconomic analysis of environmental regulation. The problem of social cost, policy instrument choice, enforcement of regulations, methods for damage assessment, and estimating benefits of environmental improvement. Prerequisite: ECON 300.

**ECON 437 Economics of Biological Resources (5) I&S** Application of economic concepts to biology and biological concepts to economics. Examination of theory of species maximization, parallels in behavior between humans and other biota, animal choices among alternative food sources, games animals play, evidence of risk aversion in animals. Prerequisite: ECON 300.

**ECON 443 Labor Market Analysis (5) I&S** Determinants of employment and incomes in the United States: analysis of individual and firm decisions and of equilibrium in the labor market. Topics include decisions to work and retire, education and occupation choices, compensation, discrimination, poverty, unemployment and unions. Examination of policy issues affecting the labor market. Prerequisite: ECON 300.

**ECON 444 Topics in Labor Market Analysis (5) I&S**

In-depth analysis of special topics in the operation of labor markets and public policies affecting incomes and employment. Course content varies by instructor. Prerequisite: ECON 300.

**ECON 447 Economics of Gender (5) I&S**

Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimination, human capital, fertility and intrahousehold resource allocation. Economics of the family in developed and developing countries. Prerequisite: ECON 300. Offered: jointly with WOMEN 447.

**ECON 448 Population and Development (5) I&S**

Survey of topics in population economics, including history of thought, demographic experience of currently developing countries, household production models, fertility demand, quantity-quality models of fertility, mortality, health and nutrition, migration, macroeconomic-demographic linkages. Prerequisite: ECON 300.

**ECON 450 Public Finance: Expenditure Policy (5) I&S**

Application of normative microeconomic theory to analysis of government expenditures. Rationale for government economic activity, collective choice, public goods, and externalities, income redistribution, public sector pricing, and specific expenditure programs. Prerequisite: ECON 300.

**ECON 451 Public Finance: Tax Policy (5) I&S**

Microeconomics of taxation: efficiency, incidence, effect on distribution of income, personal and corporate income taxes, sales and consumption taxes, taxation of property and estates. Prerequisite: ECON 300.

**ECON 454 Cost-Benefit Analysis (5) I&S**

Theory and practice of cost-benefit analysis of public sector projects and policies. Welfare criteria, investment criteria, shadow prices, social discount rate, marginal-willingness-to-pay for non-market goods, social risk, and special topics. Prerequisite: ECON 300.

**ECON 460 Economic History of Europe (5) I&S**

Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 201. Offered: jointly with HIST 481.

**ECON 462 Economic History of the United States to the Civil War (5) I&S**

Systematic study of the changing pre-Civil War economic conditions and the consequences of these changes for the American society. Prerequisite: ECON 201.

**ECON 463 Economic History of the United States From the Civil War to the Present (5) I&S**

Systematic study of the changing economic conditions since the Civil War and the consequences of these changes for the American society. Prerequisite: ECON 201.

**ECON 466 Economic History of China: 1840-1949 (5) I&S**

Study of the post-1840 Chinese economy, with a brief introduction to the socioeconomic background of the earlier period. Explanations of China's long economic stagnation, and analyses of the impact of external factors and the role of the government in China's economic development before 1949. Recommended: ECON 201.

**ECON 468 China's Economic Reforms-Integration Into World Economy (5) I&S**

Systematic survey of China's economic reforms since 1978, including China's increasing integration into the world economy. Prerequisite: ECON 201. Offered: jointly with SISEA 468.

**ECON 471 International Trade (5) I&S**

Theory of comparative advantage and different models of international trade. Trade and welfare. Factor mobility and trade flows. Economic integration. Theory and practice of commercial policy. Prerequisite: ECON 301.

**ECON 472 International Macroeconomics (5) I&S**

International monetary theory and open economy macroeconomics. Balance of payments and foreign exchange markets. Different exchange rate arrangements and their adjustment mechanisms. Money and international capital movements. Policy issues. The international monetary system. Prerequisite: ECON 301.

**ECON 473 Topics in International Trade (5) I&S**

Advanced theory of trade and analysis of government trade policies. International trade and factor mobility. Theory of commercial policy. Prerequisite: ECON 301; ECON 471.

**ECON 475 Economics of the European Union (5) I&S**

Analysis of economic issues relating to the European union. Explores the institutional aspects, the attempt to coordinate social and economic policies-welfare, employment, commercial, fiscal, and monetary-and the economic linkages between the European Union and the rest of the world. Prerequisite: ECON 301.

**ECON 481 Introduction to Mathematical Statistics (5) NW**

Probability, generating functions; the  $t$ -method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and 580.) Prerequisite: STAT/ECON 311; either MATH 129, MATH 136, or MATH 126 with either MATH 308 or MATH 309. Offered: jointly with STAT 481; A.

**ECON 482 Econometric Methods (5) NW**

Application of statistical modeling to empirical work in economics. A mixture of theory and applied computer work. Primary focus is regression analysis. Prerequisite: ECON 300; ECON/STAT 311.

**ECON 483 Applied Econometric Modeling (5) NW**

Provides undergraduates the opportunity to learn econometric model building for a particular problem while applying the theory learned in various courses to specific economic cases. Students estimate, test, and forecast economic models. Extensive use of the computer and econometric programs. Prerequisite: ECON 301; ECON/STAT 311.

**ECON 485 Game Theory with Applications to Economics (5) NW**

Introduction to the main concepts of game theory: strategy, solution concepts for games, strategic behavior, commitment, cooperation, and incentives. Application to economics oligopoly theory, bargaining theory, and contract theory. Prerequisite: either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145; recommended: ECON 300; ECON 404.

**ECON 490 Comparative Economic Systems (5) I&S**

Study of resource allocation, growth, and income distribution in capitalist, market socialist, and centrally planned economies. Prerequisite: ECON 301.

**ECON 491 Issues in Economic Development (5) I&S**

Examines factors contributing to the economic problems of developing countries and possible solutions. Theory and applications in economic development and international trade. Prerequisite: ECON 301.

**ECON 494 Economy of Japan (5) I&S**

Analysis of the economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisite: ECON 201. Offered: jointly with SISEA 494.

**ECON 495 Economic Transformation of Russia and Eastern Europe (5) I&S**

Analytical survey of the economic institutions and economic structures of the transforming socialist economies. Socialist resource allocation. Market institutions. Structural change and the sequencing of economic reform. Primary focus on Russia and Eastern Europe. Prerequisite: ECON 301.

**ECON 496 Honors Seminar (5) I&S**

Honors and other students in high standing have the opportunity to develop research techniques, to pursue topics in breadth and depth, and to apply tools of economic analysis to selected topics in economic theory and current issues of national and international economic policy. For seniors only.

**ECON 497 Honors Directed Study (5)**

Students write their honors thesis on the topic chosen in the Honors Seminar working under the previously arranged supervision of an economics faculty adviser. Prerequisite: ECON 496

**ECON 499 Undergraduate Research (1-5, max. 10)**

May not be applied toward an advanced degree.

**Courses for Graduates Only****ECON 500 Microeconomic Analysis I (4)**

Duality and comparative statics analysis. Consumer and firm behavior. Uncertainty. Prerequisite: ECON 300.

**ECON 501 Microeconomic Analysis II (4)**

General equilibrium and welfare economics. Introduction to game theory. Prerequisite: ECON 500.

**ECON 502 Macroeconomic Analysis I (4)**

An introduction to advanced macroeconomics. Theories of income, employment, inflation, and growth. Prerequisite: ECON 300 and ECON 301.

**ECON 503 Macroeconomic Analysis II (4)**

Rational expectations in macroeconomic models. Dynamic optimizing models under uncertainty. Empirical examination of consumption, asset-pricing, and real business cycles.

**ECON 505 Microeconomic Theory: Problems and Applications (3)**

Seminar for graduate students who have completed the basic core sequence in price theory. Designed to extend the student's analytic and problem-solving abilities by working systematically through a programmed set of readings and problems. The material includes both formal analytical techniques and applications of economic theory. Prerequisite: ECON 501.

**ECON 507 History of Economic Thought (3)**

Classical and neoclassical economics with emphasis on alternative conceptions of the nature and significance of economic science.

**ECON 508 Microeconomic Analysis III (4)**

Information economics. Prerequisite: ECON 500, ECON 501.

**ECON 509 Macroeconomic Analysis III (4)**

Modern macroeconomic dynamics, presenting a range of approaches based on intertemporal optimization. Representative agent models with special emphasis on the analysis of government policy. More advanced discussion of economic growth. Prerequisite: ECON 502, ECON 503 or equivalent.

**ECON 511 Advanced Microeconomic Theory: Selected Topics (3, max. 12)**

Seminar in advanced microtheory. Selected topics of special interest and significance. Prerequisite: ECON 500, ECON 501.

**ECON 512 Advanced Macroeconomic Theory: Selected Topics (3, max. 12)**

Seminar in advanced macrotheory. Selected topics of special interest and significance.

**ECON 513 Mathematical Economics: Linear Analysis (3)** Theory and application of linear algebra and linear economic models. Prerequisite: ECON 300 and MATH 126 or equivalent.

**ECON 515 Special Topics in Mathematical Economics (3, max. 12)**

**ECON 516 Introduction to Noncooperative Game Theory (3)** Study of both pure game theory and its applications to such problems as oligopoly pricing, non-cooperative bargaining, entry deterrence, reputation phenomena. Focus on game theory as a modeling tool as opposed to a body of known results. Prerequisite: ECON 508.

**ECON 518 Contract Theory (3)** Basic contract theory models, including hidden action and hidden information models. Current developments in contract theory. Prerequisite: ECON 508 and ECON 516 or permission of instructor.

**ECON 520 The Economics of Property Rights (3)** Application of standard economic theory to analyze various forms of property rights as constraints on competition; the costs associated with delineation and enforcement of rights; the costs of negotiating and enforcing contracts for right transfers; resource allocation and income distribution implied by different property right and transaction cost constraints. Prerequisite: ECON 500 and ECON 501, or permission of instructor.

**ECON 523 Emergence of the State (3)** Using tools of property rights, industrial organization, and game theory, explores the emergence of the state. Specifies conditions conducive to constitutional rule. Analyzes circumstances amenable to state-promoted exchange as opposed to self-enforced agreements. Prerequisite: ECON 500 and ECON 501 or permission of instructor.

**ECON 530 Government Regulation of Business (3)** Public policy in the United States with respect to industrial organization and business conduct. Economic issues in antitrust policy emphasized. Prerequisite: ECON 500, ECON 501.

**ECON 531 Theory of Industrial Organization I (3)** Analysis of the monopolist's problem in different choice variables. Topics include the theory of the firm; pricing; choice of quality and advertising; price discrimination; and vertical control. Prerequisite: ECON 500, ECON 501.

**ECON 532 Theory of Industrial Organization II (3)** The application of game theory to problems of strategic behavior that arise in the study of imperfectly competitive markets. Topics include vertical integration, short- and long-run price competition, folk theorems, empirical tests of oligopoly pricing models, entry deterrence, research and development, and product differentiation. Prerequisite: ECON 500, ECON 501.

**ECON 535 Economics of Natural Resources I (3)** First half of integrated two-course sequence. Non-renewable resource extraction and exploration, including effects of market structure, uncertainty, and taxation. Externality theory and pollution-control policies. Prerequisite: ECON 500, ECON 501, or permission of instructor.

**ECON 536 Economics of Natural Resources II (3)** Second half of integrated two-course sequence. Renewable resources, including fisheries and forests. Valuation of environmental amenities. Prerequisite: ECON 535.

**ECON 537 Economic Aspects of Marine Policy I (3)** Development of pertinent economic concepts and their application to selected topics in marine policy decision making. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with SMA 537.

**ECON 538 Economic Aspects of Marine Policy II (3)** Development of pertinent economic concepts and their application to selected topics in marine policy. Prerequisite: ECON 537 or permission of instructor. Offered: jointly with SMA 538.

**ECON 539 Economics of Natural Resources Seminar III (3)** Selected advanced topics in the economics of natural resources and environmental regulation. Topics may include environmental regulation as a problem in optimal mechanism design, enforcement of regulations, regulatory regimes for common property resources, and the measurement of market power in nonrenewable resource industries. Prerequisite: ECON 536.

**ECON 541 Labor Economics (3)** Theoretical and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

**ECON 542 Labor Economics (3)** Theoretical and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

**ECON 543 Population Economics (3)** Economic determinants and consequences of population growth; emphasis on formal theoretical models and on empirical analysis. Introduction to: formal demography; welfare economics of population change, including analyses of population effects on consumption, savings, investment, and technical change; and determinants of mortality, fertility, and migration. Prerequisite: ECON 500, ECON 501, or permission of instructor.

**ECON 546 Health Economics (3)** Theoretical and empirical models of the demand for health and health care; supply of health care from physicians and hospitals; government programs that subsidize health care; occupational health; cost-benefit analyses of preventive health care and new medical technologies. Prerequisite: graduate-level microeconomics, HSERV 585, or permission of instructor.

**ECON 547 Health Policy Economics (3)** Selected topics in health economics, including risk and insurance, medical malpractice, the market for physician services, and industry regulation. Prerequisite: a course in intermediate microeconomics or permission of instructor. Offered: jointly with HSERV 587.

**ECON 550 Public Finance: Expenditure Policy (3)** Theory of public finance with emphasis on public expenditures. Social welfare maximization, public goods and externalities, decreasing cost industries, theory of collective choice, second-best analysis. Prerequisite: ECON 500, ECON 501, or permission of instructor.

**ECON 551 Public Finance: Tax Policy (3)** Theory of public finance with emphasis on taxation. Second-best analysis, optimal taxation, general equilibrium incidence analysis, issues in personal income taxation and corporate income taxation. Prerequisite: ECON 500, ECON 501, or permission of instructor.

**ECON 554 Cost-Benefit Analysis (3)** Covers the theoretical foundations of cost-benefit analysis using graduate microeconomics. Stresses both the conceptual and practical problems encountered in the subject. Emphasis on problem solving and term project. Prerequisite: ECON 500 and ECON 501.

**ECON 571 International Trade Theory (3)** Comparative advantage, resource allocation, income distribution, and foreign trade. Different theories of trade, with or without perfect competition and constant returns. International factor mobility. Prerequisite: ECON 500, ECON 501.

**ECON 572 International Financial and Monetary Economics (3)** Analysis of open economy macro models with emphasis on exchange rates and balance of payments determination. Prerequisite: ECON 502, ECON 503.

**ECON 573 International Commercial Policy (3)** Analysis of welfare aspects of international trade and factor mobility. Costs and benefits of protection; implications of different government policies. Import competition and response. Prerequisite: ECON 571 or permission of instructor.

**ECON 574 International Macroeconomics (3)** Surveys recent developments in international macroeconomics, placing particular emphasis on the dynamic aspects. One sector, multisector, and two-country international models discussed. Fiscal issues treated in depth. Stochastic aspects introduced and related to the literature on international real business cycles. Prerequisite: ECON 509 or equivalent.

**ECON 580 Econometrics I (4)** Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Students may receive credit for only one of MATH/STAT 390, ECON/STAT 481, and ECON 580.

**ECON 581 Econometrics II (4)** Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 580.

**ECON 582 Econometrics III (4)** Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 581.

**ECON 583 Econometric Theory I (3)** Estimation and testing in linear and nonlinear regression models. Asymptotic theory, bootstrapping. Theoretical developments are reinforced with a variety of empirical examples and applications. Prerequisite: ECON 580, ECON 581, ECON 582 or equivalent.

**ECON 584 Econometric Theory II (3)** Continuation of 583. Analysis of stationary and nonstationary, univariate, and multivariate time series models. Emphasis on empirical applications. Prerequisite: ECON 583.

**ECON 585 Applied Microeconomics (3)** Economic issues that arise in applied microeconomic research. Topics include the use of panel data and models with limited and qualitative dependent variables. Prerequisite: ECON 582 or equivalent.

**ECON 591 Theoretical Issues in Economic Development (3)** Analysis of issues in economic development with application to the less-developed countries of the world today. Prerequisite: ECON 500, ECON 501, or permission of instructor.

**ECON 592 Development Policy (3)** Theoretical and empirical analysis of macroeconomic policies pursued by developing countries. Topics include the determination of exchange rates and relative prices in small economies; the examination of government spending, taxation, banking, trade, and labor market policies; and the evaluation of market-oriented economic reform programs. Prerequisite: ECON 503; recommended: ECON 591.

**ECON 595 Analysis of the Transforming Socialist Economies (3)** Applications of economic analysis to the economic problems of transforming socialist economies. Economic institutions. The role of the state. Privatization and the behavior of decentralized organizations. Integration into the world market. Prerequisite: micro- and macroeconomic theory and permission of instructor.

**ECON 596 Research Practicum in Microeconomics (1, max. 6)** Provides opportunity to practice research and presentation skills in applied and theoretical microeconomics. Students develop and refine thesis topics under faculty supervision. Peer criticism a significant part of participation requirement. Maximum of 6 credits allowed in 596, 597, and 598 combined. Credit/no credit only.

**ECON 597 Research Practicum in Macroeconomics (1, max. 6)** Provides opportunity to practice research and presentation skills in applied and theoretical macroeconomics. Students develop and refine thesis topics under faculty supervision. Peer criticism a significant part of participation requirement. Maximum of 6 credits allowed in 596, 597, and 598 combined. Credit/no credit only.

**ECON 598 Research Practicum in Labor and Development (1, max. 6)** Provides opportunity to practice research and presentation skills in economics of labor and development. Students develop and refine thesis topics under faculty supervision. Peer criticism a significant part of participation requirement. Maximum of 6 credits allowed in 596, 597, and 598 combined. Credit/no credit only.

**ECON 599 Research Issues in Demography and Population Studies (1-2, max. 7)** Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Offered: AWP.

**ECON 600 Independent Study or Research (\*)** Credit/no credit only.

**ECON 601 Internship (3-9, max. 9)** Credit/no credit only.

**ECON 602 Teaching Introductory Economics (1)** Examines problems encountered in preparing and presenting courses in introductory economics. Credit/no credit only.

**ECON 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Graduate Program

Graduate Program Coordinator  
A105 Padelford, Box 354330  
(206) 543-6077  
[englgrad@u.washington.edu](mailto:englgrad@u.washington.edu)

The Department of English offers a complete program of graduate courses and seminars designed to provide aspirants for the Master of Arts and Doctor of Philosophy degrees with a knowledge of English literature and language and the necessary scholarship for training in literary criticism and theory, literary history, and English-language study, including rhetoric and composition. It is possible to pursue a literature- or language-study emphasis. The Master of Fine Arts program in creative writing emphasizes projects in imaginative writing in fiction and poetry, supported by courses in criticism and literary periods and types. A special degree program, the Master of Arts for Teach-

ers, is offered for English teachers in secondary schools and community colleges and a Master of Arts for Teachers (English as a Second Language) for those interested in teaching English to speakers of other languages. The graduate program permits completion of master's degree requirements in four to six quarters and doctoral degree requirements in five years (including the master's degree). In a typical five-year program, a student is encouraged to complete course requirements (75 credits) during the first three years, the General Examination for the doctorate in the fourth year, and the dissertation in the fifth year. Those admitted with a master's degree from another university can complete the doctorate in four years: two years of course work, exam year, and dissertation year.

### Financial Aid

The department annually awards 20 or more new teaching assistantships. To be considered for the following autumn, applicants must submit an assistantship application and supporting materials for admission to the graduate program by January 15. A statement of purpose, three recommendations, the GRE general test, the GRE subject test (literature in English) [except M.F.A., M.A.T. (E.S.L.)], and a critical-writing sample are required [except M.A.T. (E.S.L.)]. Teaching assistantship applicants who are not native speakers of English must submit as part of their application a score of 290 or better on the Test of Spoken English (TSE) or UW-administered SPEAK test.

### Master of Arts

**Admission Requirements:** Bachelor of Arts degree: Major in English equivalent to that awarded by the UW preferred. Graduate Record Examination general test and subject test (literature in English). Three letters of recommendation, statement of purpose, and a critical writing sample.

**Graduation Requirements:** Intermediate-level proficiency in a language other than English. 40 credits, including 30 credits in graduate English seminars. For students continuing to the doctoral program, a 10-credit master's essay. For a terminal master's degree, students may substitute 10 additional credits in graduate English seminars for the master's essay. A maximum of 5 credits may be transferred from an accredited graduate program elsewhere.

### Master of Fine Arts

**Admission Requirements:** Bachelor of Arts degree, Graduate Record Examination general test, three letters of recommendation, statement of purpose, a critical-writing sample, and a creative-writing sample.

**Graduation Requirements:** 55 credits, including 20 credits in creative writing, 15 credits in graduate English seminars (5 credits must be from an approved course in criticism), 5 elective credits, 15 thesis credits (including a creative thesis, an MFA essay, and a final oral examination); demonstration of proficiency in a language other than English.

### Master of Arts for Teachers

**Admission Requirements:** Same as for the Master of Arts degree, but usually including prior teaching experience.

**Graduation Requirements:** 45 credits, of which 25 must be in courses numbered 500 or above; including at least one course each in English language or linguistics, rhetoric and/or composition, literary criticism or critical theory, and literature; three courses must have a stated orientation on teaching English; and 5 credits of M.A.T. essay. In addition to the 45 credits, a student with no regular or formal teaching experience is required to complete at least 6 credits of ENGL 601 (Internship). 15 of these may be taken outside the department in courses related to the teaching of English, subject to approval.

### Master of Arts for Teachers (English As A Second Language)

**Admission Requirements:** Bachelor of Arts degree, Graduate Record Examination general test, statement of purpose, three letters of recommendation. Students without training in linguistic method and theory must take LING 400 as a prerequisite for 400-level linguistics courses.

**Graduation Requirements:** 45-54 credits, including ENGL 571, 572, 574, 576; LING 446 or 450, ENGL 575 or LING 461; three courses from ENGL 471, 478, 479, 560, 561, 562, 563, 564, 567, 569, 575, LING 433/ ANTH 464, LING 457/PSYCH 457, LING 451, 462; one elective course; 3-6 credits of ENGL 570. Intermediate-level proficiency in a language other than English.

### Doctor of Philosophy

**Admission Requirements:** By petition to the Graduate Studies Committee upon completion of the M.A. degree option in literature. Students with recent master's degrees from other institutions are admitted at the post-master's level following the guidelines for admission to the M.A. option and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transferring with a master's degree from other institutions may be required to submit an equivalent to the master's essay. Students with M.F.A., M.A.T., or M.A.T. (E.S.L.) degrees from this University must complete coursework and language requirements for the M.A. degree option and submit an equivalent to the master's essay.

**Graduation Requirements:** 75 graded credits of electives in graduate English seminars as advised by the student's Supervisory Committee. Students with a recent master's degree from another university may count up to 30 credits from the master's program, upon approval of the Director of Graduate Studies. Students with a master's degree from the UW may count up to 40 credits in courses taken before admission to the doctoral program. Fluency in at least one language other than English, plus whatever additional language study the supervisory committee advises. Written examinations for literature emphasis: (1) historical period, (2) specialized field of study, (3) second period or genre; written examinations for language emphasis: (1) major approach to English-language study, (2) second approach to language study, (3) textual focus (can be literary period); an oral General Examination on an individualized topic; 27 credits of ENGL 800 (Dissertation) and a Final Examination based on the dissertation.

## Faculty

### Chair

Shawn H. Wong

### Professors

Alexander, Edward \* 1962; MA, 1959, PhD, 1963, University of Minnesota; romantic and Victorian literature.

Allen, Carolyn \* 1972; MA, 1966, Claremont Graduate School; PhD, 1972, University of Minnesota; twentieth-century literature, women writers, contemporary critical theory.

Bierds, Linda L. \* 1981; MA, 1971, University of Washington; poetry writing; contemporary American poetry.

Blake, Kathleen \* 1971; PhD, 1971, University of California (San Diego); Victorian literature, children's literature, women's studies.

Brown, Marshall J. \* 1988; PhD, 1972, Yale University; eighteenth- and nineteenth-century literature, literary theory, music and literature.

- Burns, Wayne 1948, (Emeritus); MA, 1940, Harvard University; PhD, 1946, Cornell University; Victorian literature.
- Butler, Johnella E. \* 1987, (Adjunct); EdD, 1979, University of Massachusetts; Afro-American and multicultural studies, comparative American ethnic literature, African diaspora.
- Coldewey, John C. \* 1972; PhD, 1972, University of Colorado (Boulder); Renaissance literature, medieval drama.
- Dillon, George L. \* 1986; PhD, 1969, University of California (Berkeley); rhetoric, composition.
- Dunn, Richard J. \* 1967; PhD, 1964, Case Western Reserve University; Victorian literature, English novel.
- Fowler, David C. \* 1952, (Emeritus); PhD, 1949, University of Chicago; medieval literature, comparative religion.
- Frey, Charles Hubbard \* 1970; PhD, 1971, Yale University; Renaissance literature, Shakespeare.
- Gerstenberger, Donna \* 1960, (Emeritus); PhD, 1958, University of Oklahoma; twentieth-century literature, Anglo-Irish literature, feminist criticism.
- Handwerk, Gary J. \* 1984; PhD, 1984, Brown University; literary theory, English and Irish nineteenth- and twentieth-century narrative.
- Harris, Markham 1946, (Emeritus); MA, 1931, Williams College; fiction writing.
- Heilman, Robert B. 1948, (Emeritus); MA, 1930, Ohio State University; MA, 1931, PhD, 1935, Harvard University; drama.
- Irrmscher, William F. \* 1960, (Emeritus); PhD, 1950, Indiana University; rhetoric and theory of composition.
- Jeffords, Susan E. \* 1985; MA, 1977, PhD, 1981, University of Pennsylvania; feminist theory, American popular culture, and the representation of Vietnam.
- Johnson, Charles R. \* 1983; MA, 1973, Southern Illinois University; PhD, 1988, State University of New York (Stony Brook); fiction writing.
- Jones, Frank W. 1955, (Emeritus); PhD, 1941, University of Wisconsin; MA, 1955, Oxford University (UK); translation, twentieth-century theatre, poetry.
- Kaplan, Sydney J. \* 1971; PhD, 1971, University of California (Los Angeles); twentieth-century literature, women writers, feminist criticism.
- Kenney, Richard L. \* 1987; BA, 1970, Dartmouth College; poetry writing.
- Korg, Jacob \* 1955, (Emeritus); PhD, 1952, Columbia University; Victorian, twentieth-century literature.
- Lockwood, Thomas \* 1967; PhD, 1967, Rice University; Restoration and eighteenth-century literature.
- Matchett, William H. \* 1954, (Emeritus); PhD, 1957, Harvard University; Renaissance literature, Shakespeare.
- McCracken, J. David \* 1966; PhD, 1966, University of Chicago; eighteenth-century, Romantic, and biblical literature.
- McElroy, Colleen J. \* 1972; PhD, 1973, University of Washington; Black literature, women writers, poetry writing.
- McHugh, Heather \* 1982; MA, 1973, University of Denver; writing and close reading of poetry, form in nature and art.
- Modiano, Raimonda \* 1978; PhD, 1973, University of California (San Diego); romanticism.
- Posnock, Ross \* 1983; PhD, 1980, Johns Hopkins University; American literature.
- Reinert, Otto \* 1956, (Emeritus); PhD, 1952, Yale University; comparative literature, eighteenth-century literature.
- Russ, Joanna \* 1977, (Emeritus); MFA, 1960, Yale University; fiction writing.
- Sale, Roger H. \* 1962, (Emeritus); PhD, 1957, Cornell University; Renaissance literature.
- Shapiro, Steven \* 1984; PhD, 1981, Yale University; literary theory, romantic poetry, post-modernism.
- Shields, David \* 1988; MFA, 1980, University of Iowa; fiction writing, screen writing, twentieth-century literature, autobiography, mass media, film.
- Shulman, Robert \* 1961; PhD, 1959, Ohio State University; American literature.
- Silberstein, Sandra V. \* 1982; PhD, 1982, University of Michigan; TESL, critical theory, discourse analysis, sociolinguistics, language and culture.
- Simonson, Harold P. \* 1967, (Emeritus); PhD, 1958, Northwestern University; American literature.
- Staten, Henry J. \* 1998; PhD, 1978, University of Texas (Austin); 19th- and 20th-century British literature, history of criticism.
- Stevick, Robert D. \* 1962, (Emeritus); PhD, 1956, University of Wisconsin; medieval language and literature.
- Streitberger, William R. \* 1973; PhD, 1973, University of Illinois; Renaissance literature, textual criticism, paleography.
- Tollefson, James W. \* 1984; PhD, 1980, Stanford University; English as a second language, language planning.
- Wagoner, David R. \* 1957; MA, 1949, Indiana University; twentieth-century literature, fiction and poetry writing.
- Wong, Shawn H. \* 1984; MA, 1974, San Francisco State; creative writing, Chinese-American area studies.

### Associate Professors

- Abrams, Robert \* 1979; PhD, 1973, Indiana University; American literature.
- Altieri, Joanne S. \* 1977, (Emeritus); PhD, 1969, University of North Carolina; Shakespeare studies, including early seventeenth-century theatre more generally.
- Aravamudan, Srinivas \* 1996; MA, 1986, Purdue University; PhD, 1991, MA, 1991, Cornell University; eighteenth-century literature, contemporary postcolonial literature.
- Bosworth, David L. \* 1984; BA, 1969, Brown University; fiction writing, modern fiction and poetry, American Puritans.
- Brenner, Gerald J. \* 1966; PhD, 1969, University of New Mexico; American literature, fiction writing.
- Butwin, Joseph M. \* 1978; PhD, 1971, Harvard University; Victorian literature.
- Cummings, Katherine \* 1985; PhD, 1985, University of Wisconsin; feminist, psychoanalytical, and literary theory, modern and contemporary literature.
- Dunlop, William M. \* 1962; MA, 1965, Cambridge University (UK); Shakespeare, nineteenth-century literature, poetry writing.
- Fisher, Alan S. \* 1968; PhD, 1969, University of California (Berkeley); Renaissance, seventeenth- and eighteenth-century literature, history of literary criticism.
- Griffith, John W. \* 1968; PhD, 1969, University of Oregon; American literature.
- Guerra, Juan C. \* 1990; MA, 1983, PhD, 1992, University of Illinois (Chicago); rhetoric, composition, literacy, ethnography.
- Hudson, Lois Phillips \* 1969, (Emeritus); LittD, 1965, North Dakota State University; fiction writing.
- Laguardia, Eric \* 1961; PhD, 1961, University of Iowa; Renaissance literature.

- Longyear, Christopher R. \* 1972, (Emeritus); PhD, 1961, University of Michigan; linguistics.
- Moody, Joycelyn K. \* 1991; MA, 1980, University of Wisconsin; PhD, 1993, University of Kansas; nineteenth-century American, African-American, and women's literature, autobiography.
- Mussetter, Sally Ann \* 1978; PhD, 1975, Cornell University; medieval language and literature.
- Palomo, Dolores J. \* 1971, (Emeritus); PhD, 1972, State University of New York (Buffalo); Renaissance literature, women writers.
- Patterson, Mark R. \* 1981; PhD, 1981, Princeton University; American literature.
- Remley, Paul G. \* 1988; PhD, 1990, Columbia University; Old and Middle English, medieval languages and literatures, critical theory.
- Riggenbach, Heidi R. \* 1989; PhD, 1989, University of California (Los Angeles); teaching English as a second language, discourse analysis, sociolinguistics.
- Searle, Leroy F. \* 1977; MA, 1968, PhD, 1970, University of Iowa; twentieth-century literature, critical theory, American studies.
- Simpson, Caroline Chung \* 1994; MA, 1989, University of Houston; PhD, 1994, University of Texas (Austin); Asian American literature and culture, postwar fiction and film.
- Smith, Eugene H. \* 1958, (Emeritus); PhD, 1963, University of Washington; rhetoric and theory of composition.
- Sonenberg, Maya \* 1993; MA, 1984, Brown University; fiction writing, twentieth-century fiction, postmodern fiction, women writers.
- Stanton, Robert B. \* 1956, (Emeritus); PhD, 1953, Indiana University; American literature.
- Stygall, Gail \* 1990; PhD, 1989, Indiana University; rhetoric and composition, English language linguistics, law and literature.
- van den Berg, Sara J. \* 1980; PhD, 1969, Yale University; early modern and seventeenth-century literature, psychoanalytic theory, medicine and literature.
- Vaughan, Miceal F. \* 1973; PhD, 1973, MA, 1973, Cornell University; medieval language and literature.
- Webster, John M. \* 1972; PhD, 1974, University of California (Berkeley); Renaissance literature.

### Assistant Professors

- Bawarshi, Anis 1999; PhD, 1999, University of Kansas; rhetoric and composition.
- Burstein, Jessica L. \* 1998; PhD, 1998, University of Chicago; modernism.
- Crane, Gregg David \* 1995; MA, 1981, University of California (Los Angeles); JD, 1986, University of California (San Francisco); PhD, 1995, University of California (Berkeley); American literature.
- Curzan, Anne L. \* 1998; PhD, 1998, University of Michigan; Old English languages.
- Eversley, Shelly J. \* 1997; PhD, 1997, Johns Hopkins University; twentieth-century American, African American literature and culture.
- Fuchs, Barbara \* 1997; PhD, 1997, Stanford University; early modern English and Spanish literature, literature and imperialism.
- Goldberg, Brian B. \* 1999; PhD, 1995, Indiana University; romanticism.
- Goodlad, Lauren M. E. \* 1994; MA, 1986, New York University; MPhil, 1989, PhD, 1994, Columbia University; Victorian literature and culture, contemporary culture, cross-disciplinary literary/cultural theory.
- Griffith, Malcolm A. \* 1966; PhD, 1966, Ohio State University; twentieth-century literature, modern criticism, American literature.

Khanna, Ranjana \* 1996; PhD, 1993, York University (Canada); postcolonial theory, transnational feminism, twentieth-century writing.

Sanok, Catherine 1999, (Acting); PhD, 1999, University of California (Los Angeles); medieval literature.

Weinbaum, Alys E. \* 1998; PhD, 1998, Columbia University; 19th and 20th century American and European literature.

### Senior Lecturers

George, E. Laurie \* 1991; PhD, 1984, University of Oregon; expository/computer-aided writing, American literature, feminist linguistics, pedagogy.

Graham, Joan Adelle 1974; MA, 1972, University of Washington; expository and interdisciplinary writing.

McNamara, Robert J. 1985; PhD, 1985, University of Washington; expository and interdisciplinary writing.

Simmons-O'Neill, Elizabeth 1985; PhD, 1988, University of Washington; expository and interdisciplinary writing, service learning, education and tutoring.

### Lecturers

Gillis-Bridges, Kimberlee 1989; PhD, 1999, Claremont Graduate School; interdisciplinary writing.

O'Neill, John 1985; MA, 1986, University of Washington; interdisciplinary writing.

Popov, Nikolai B. \* 1985; PhD, 1994, University of Washington; modern Irish, Slavic, and German writers; literary theory and criticism; translation.

Wacker, Norman J. 1989; MA, 1976, PhD, 1986, University of Washington; expository and interdisciplinary writing.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ENGL 407 Special Topics in Cultural Studies (5) VLPA** Advanced work in Cultural Studies.

**ENGL 422 Arthurian Legends (5) VLPA** Medieval romance in its cultural and historical setting, with concentration on the evolution of Arthurian romance.

**ENGL 430 British Writers: Studies in Major Authors (5, max. 15) VLPA** Concentration on one writer or a special group of British writers.

**ENGL 431 Topics in British Literature (5, max. 15) VLPA** Themes and topics of special meaning to British literature.

**ENGL 440 Special Studies in Literature (3/5, max. 10) VLPA** Themes and topics offering special approaches to literature.

**ENGL 442 The Novel: Special Studies (5, max. 10) VLPA** Readings may be English or American and drawn from different periods, or they may concentrate on different types—gothic, experimental, novel of consciousness, realistic novel. Special attention to the novel as a distinct literary form. Specific topic varies from quarter to quarter.

**ENGL 443 Poetry: Special Studies (5, max. 10) VLPA** A poetic tradition or group of poems connected by subject matter or poetic technique. Specific topics vary, but might include poetry as a geography of mind, the development of the love lyric, the comic poem.

**ENGL 451 American Writers: Studies in Major Authors (5, max. 15) VLPA** Concentration on one writer or a special group of American writers.

**ENGL 452 Topics in American Literature (5, max. 15) VLPA** Exploration of a theme or special topic in American literary expression.

**ENGL 453 Introduction to American Folklore (5) VLPA** Study of different kinds of folklore inherited from America's past and to be found in America today.

**ENGL 466 Gay and Lesbian Studies (5) VLPA/I&S** Examination of ways gays and lesbians are represented in literature, film, performance, and popular culture and how these representations are interpreted in mainstream, gay/lesbian, and academic writing.

**ENGL 471 The Composition Process (5) VLPA** Consideration of psychological and formal elements basic to writing and related forms of nonverbal expression and the critical principles that apply to evaluation.

**ENGL 473 Current Developments in English Studies: Conference (5) VLPA**

**ENGL 474 Special Topics in English for Teachers (1-10, max. 10) VLPA**

**ENGL 475 Colloquium in English for Teachers (1-5, max. 10) VLPA**

**ENGL 476 Puget Sound Writing Program Institute (1-9, max. 9) VLPA** Focus on the writing process and the teaching of writing, accomplished through research, writing, reflection, and demonstration of writing instruction. Affiliated with the National Writing Project.

**ENGL 477 Children's Literature (5) VLPA** An examination of books that form a part of the imaginative experience of children, as well as a part of a larger literary heritage, viewed in the light of their social, psychological, political, and moral implications.

**ENGL 478 Language and Social Policy (5) VLPA/I&S** Examines the relationship between language policy and social organization; the impact of language policy on immigration, education, and access to resources and political institutions; language policy and revolutionary change; language rights.

**ENGL 479 Language Variation and Language Policy in North America (5) VLPA/I&S** Surveys basic issues of language variation: phonological, syntactic, semantic, and narrative/discourse differences among speech communities of North American English; examines how language policy can affect access to education, the labor force, and political institutions.

**ENGL 481 Special Studies in Expository Writing (5) VLPA** Individual projects in various types of nonfictional prose, such as biographical sketches, informational reports, literary reviews, and essays.

**ENGL 483 Advanced Verse Writing (5, max. 15) VLPA** Intensive study of ways and means of making a poem. Prerequisite: ENGL 383.

**ENGL 484 Advanced Short Story Writing (5, max. 10) VLPA** Experience with the theory and practice of writing the short story. Prerequisite: ENGL 384.

**ENGL 485 Novel Writing (5, max. 15) VLPA** Experience in planning, writing, and revising a work of long fiction, whether from the outset, in progress, or in already completed draft. Prerequisite: ENGL 384.

**ENGL 490 Study Abroad Program (5, max. 15) VLPA** This course, for students in the Study Abroad program, relates major works of literature to the landscape and activities of their settings.

**ENGL 491 Internship (1-6, max. 12)** Supervised experience in local businesses and other agencies. Open only to upper-division English majors. Credit/no credit only.

**ENGL 492 Advanced Expository Writing Conference (1-5, max. 10)** Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken.

**ENGL 493 Advanced Creative Writing Conference (1-5, max. 10)** Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken.

**ENGL 494 Honors Seminar (5) VLPA** Survey of current issues confronting literary critics today. Readings begin with work in the New Criticism that followed World War II and move forward to consider issues such as changing student population and role of the critic, revisions of the past, emergent technologies, and rise of interdisciplinary teaching and research.

**ENGL 495 Major Conference for Honors in Creative Writing (5)** Special projects available to honors students in creative writing. Required of, and limited to, honors students in creative writing.

**ENGL 496 Major Conference for Honors (5)** Individual study (reading, papers) by arrangement with the instructor. Required of, and limited to, honors seniors in English.

**ENGL 497 Honors Senior Seminar (5) VLPA** Seminar study of special topics in language and literary study. Limited to honors students majoring in English.

**ENGL 498 Senior Seminar (5) VLPA** Seminar study of special topics in language and literary study. Limited to seniors majoring in English.

**ENGL 499 Independent Study (1-5, max. 10)** Individual study by arrangement with instructor.

### Courses for Graduates Only

**ENGL 500 Reading Medieval Literature (5)** Special problems involved in the study and interpretation of medieval texts, selected examples drawn from the beginnings of English literature to 1500.

**ENGL 501 The Renaissance and Literary Tradition (5)** Examination of selected texts from 1500 to 1660, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the Renaissance.

**ENGL 502 English Literary Culture: 1660-1800 (5)** Examination of selected texts of the Restoration and eighteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

**ENGL 503 English Literary Culture: 1800-1900 (5)** Examination of selected texts from the nineteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

**ENGL 504 Backgrounds of Modern Literature (5)** Examination of selected texts from the twentieth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

**ENGL 505 Theories of American Literature (5)** Examination of selected texts in American Literature, concentrating on the specific problems of interpretation and scholarship characteristic of the study of works in this field.

**ENGL 506 Critical Approaches to Literary Texts (5)**

Examination of a range of critical theories and practices appropriate to the study of literature.

**ENGL 507 History of Literary Criticism and Theory I (5, max. 15)**

A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Offered: jointly with C LIT 507.

**ENGL 508 History of Literary Criticism and Theory II (5, max. 15)**

Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with C LIT 508.

**ENGL 509 History of Literary Criticism and Theory III (5, max. 15)**

Literary criticism and theory from Kant's *Critique of Judgment* to the mid-twentieth century and the work of Northrop Frye. Offered: jointly with C LIT 509.

**ENGL 510 History of Literary Criticism and Theory IV (5, max. 15)**

A study of the major issues in literary criticism and theory since about 1965. Offered: jointly with C LIT 510.

**ENGL 512 Introductory Reading in Old English (5)****ENGL 513 Old English Language and Literature (5, max. 15)****ENGL 514 Middle English (5, max. 15)****ENGL 515 Chaucer (5, max. 15)****ENGL 516 Topics in Medieval English Literature (5, max. 15)****ENGL 517 Sixteenth-Century Literature (5, max. 15)****ENGL 518 Shakespeare (5, max. 15)****ENGL 520 Seventeenth-Century Literature (5, max. 15)****ENGL 521 Milton (5, max. 15)****ENGL 522 Topics in the English Renaissance, 1485-1660 (5, max. 15)****ENGL 524 Restoration and Eighteenth-Century Literature (5, max. 15)****ENGL 525 Topics in Restoration and Eighteenth-Century Studies (5, max. 15)****ENGL 527 Romanticism (5, max. 15)****ENGL 528 Victorian Literature (5, max. 15)****ENGL 529 Topics in Nineteenth-Century Studies (5, max. 15)****ENGL 531 Early American Literature (5, max. 15)****ENGL 532 Nineteenth-Century American Literature (5, max. 15)****ENGL 533 Modern American Literature (5, max. 15)****ENGL 535 American Culture and Criticism (5, max. 15)****ENGL 537 Topics in American Studies (5, max. 15)****ENGL 540 Modern Literature (5, max. 15)****ENGL 541 Contemporary Literature (5, max. 15)****ENGL 543 Anglo-Irish Literature (5, max. 15)****ENGL 544 World Literature in English (5, max. 15)****ENGL 546 Topics in Twentieth-Century Literature (5, max. 15)****ENGL 550 Studies in Narrative (5, max. 15)****ENGL 551 Studies in Poetry (5, max. 15)****ENGL 554 Theories of Structure, Genre, Form, and Function (5, max. 15)****ENGL 555 Feminist Theories (5, max. 15)****ENGL 556 Cultural Studies (5, max. 15)****ENGL 559 Literature and Other Disciplines (5, max. 15)****ENGL 560 The Nature of Language: History and Theory (5)****ENGL 561 Stylistics (5)****ENGL 562 Discourse Analysis (5)****ENGL 563 Comparative Grammars (5)****ENGL 564 Current Rhetorical Theory (5)** Prerequisite: teaching experience.**ENGL 567 Approaches to Teaching Composition (1-5, max. 10)** Readings in composition theory and discussion of practical classroom applications. Prerequisite: previous experience or concurrent assignment in teaching writing.**ENGL 569 Topics in Language and Rhetoric (5, max. 15)****ENGL 570 Practicum in Teaching English as a Second Language (3, max. 6)** Discussion and practice of second-language teaching techniques. Three hours per week teaching required in addition to regular class meetings. Credit/no credit only. Prerequisite: ENGL 571 or permission of instructor.**ENGL 571 Theory and Practice on Teaching English to Speakers of Other Languages (5)** Topics include second language reading, aural/oral skills, critical pedagogy, program administration, and language policy.**ENGL 572 Methods and Materials for Teaching English as a Second Language (5)** Prerequisite: LING 445 or permission of instructor.**ENGL 574 Research Methods in Second-Language Acquisition (5)** Prerequisite: ENGL 572, LING 449, or permission of instructor.**ENGL 575 Pedagogy and Grammar in Teaching English as a Second Language (5)****ENGL 576 Testing and Evaluation in English as a Second Language (5)** Evaluation and testing of English language proficiency, including testing theory, types of tests, and teacher-prepared classroom tests. Prerequisite: ENGL 571 and ENGL 572 or permission of instructor.**ENGL 578 Colloquium in Teaching English to Speakers of Other Languages (5, max. 10)** Overview of major issues in second-language acquisition, teaching methodology, and classroom practice with special emphasis on links between theories of language learning and practical aspects of teaching English to speakers of other languages.**ENGL 581 The Creative Writer as Critical Reader (5)****ENGL 584 Advanced Fiction Workshop (5, max. 15)** Prerequisite: graduate standing.**ENGL 585 Advanced Poetry Workshop (5, max. 15)** Prerequisite: graduate standing.**ENGL 586 Graduate Writing Conference (5)****ENGL 590 Master of Arts Essay (5/10, max. 10)**

Research and writing project under the close supervision of a faculty member expert and with the consultation of a second faculty reader. The field of study is chosen by the student. Work is independent and varies. The model is an article in a scholarly journal. Prerequisite: graduate standing in English.

**ENGL 591 Master of Arts for Teachers Essay (5)**

Research and writing project under the close supervision of a faculty member expert in the field of study chosen by the student within the MAT degree orientation towards the teaching of English, and with the consultation of a second faculty reader. The model is an article in a scholarly journal.

**ENGL 592 Graduate English Studies (1-5, max. 10)****ENGL 593 Textual Criticism (5)** Introduction to paleography, codicology, analytical and descriptive bibliography; examination of the major contributions to textual theory in the nineteenth and twentieth centuries; practice in applying textual theory in editing literary works.**ENGL 595 Topics in Teaching Literature (5, max. 15)****ENGL 597 Directed Readings (\* max. 18)** Intensive reading in literature or criticism, directed by members of doctoral supervisory committee. Credit/no credit only.**ENGL 598 Colloquium in English (1-5, max. 10)**

Lectures and seminars presented by visiting scholars or a range of local scholars relevant to English graduate studies.

**ENGL 599 Special Studies in English (5, max. 15)****ENGL 600 Independent Study or Research (\*)****ENGL 601 Internship (3-10, max. 10)** Credit/no credit only.**ENGL 700 Master's Thesis (\*)****ENGL 800 Doctoral Dissertation (\*)**

## Graduate Program

Graduate Program Coordinator  
J205 Health Sciences, Box 357360  
(206) 543-1657

The Department of Genetics offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. Students are admitted only to the doctoral program and may be granted the Master of Science only in lieu of or in conjunction with the Ph.D. A student may choose among a wide variety of research areas, while at the same time receiving broad training in genetics. New graduate students join a research project in one of the faculty laboratories during each of the first three quarters in residence. New students

thereby become acquainted with several different experimental approaches in genetics research, and the projects help them choose an adviser for their thesis work at the end of the first year. In addition to graduate courses offered by the Department of Genetics, students can choose among a large number of courses in related departments to broaden their perspective. Graduate students also participate in undergraduate teaching after gaining expertise in pertinent areas. A General Examination is taken during the second year to gain formal admittance to candidacy for the Ph.D. degree.

Applications for graduate work are invited from students who have emphasized biology, the physical sciences, or mathematics in their undergraduate careers. Applicants are asked to submit Graduate Record Examination scores and three letters of recommendation.

### Financial Aid

The Department of Genetics offers financial support to promising students who wish to work toward the doctoral degree.

### Research Facilities

The department is housed in a modern, well-equipped building shared with the Department of Biochemistry and the Howard Hughes Medical Institute. Students benefit from interdisciplinary research and teaching programs in collaboration with departments having related interests.

## Faculty

### Chair

Breck E. Byers

### Professors

Bendich, Arnold J. \* 1970, (Adjunct); PhD, 1969, University of Washington; chromosome structure in mitochondria, chloroplasts, and bacteria.

Brewer, Bonita J. \* 1982; PhD, 1979, University of Washington; replication of chromosomes, plasmids, and mitochondrial DNA in yeast.

Byers, Breck E. \* 1970; PhD, 1967, Harvard University; cell biology; mitosis and meiosis, mechanisms of nuclear division and crossing-over in yeast.

Deeb, Samir S. \* 1983, (Adjunct Research); PhD, 1964, University of Illinois; genetic factors predisposing to hyperlipidemia and coronary artery disease.

Eisen, Harvey \* 1986, (Affiliate); PhD, 1967, University of Toronto (Canada); host-parasite interactions, generation of genetic diversity.

Fangman, Walton L. \* 1967; PhD, 1965, Purdue University; molecular genetics: control of replication of yeast chromosomes, plasmid and mitochondrial DNA.

Felsenstein, Joseph \* 1968; PhD, 1968, University of Chicago; evolution and population genetics.

Fields, Stanley \* 1995; MA, 1978, PhD, 1981, Cambridge University (UK); molecular genetics.

Furlong, Clement E. \* 1977, (Research); PhD, 1968, University of California (Davis); human biochemical genetics in biochemistry of membrane transport systems.

Gallant, Jonathan A. \* 1961; PhD, 1961, Johns Hopkins University; molecular genetics, control mechanisms in bacteria, accuracy of translation.

Gartler, Stanley M. \* 1957, (Emeritus); PhD, 1952, University of California (Berkeley); mammalian somatic cell genetics with emphasis on the mechanism of x-chromosome inactivation.

Gottschling, Daniel E. 1996, (Affiliate); PhD, 1984, University of Colorado; chromosome biology.

Hall, Benjamin D. \* 1963; MA, 1956, PhD, 1959, Harvard University; yeast molecular genetics and molecular evolution of gene expression in eukaryotes.

Hartwell, Leland H. \* 1968; PhD, 1964, Massachusetts Institute of Technology; genetic analysis of chromosome transmission and of the control of division by hormones in yeast.

Hawthorne, Donald C. \* 1980, (Emeritus); PhD, 1955, University of Washington; yeast genetics, chromosome mapping, supersuppressors.

King, Mary-Claire \* 1995; PhD, 1973, University of California (Berkeley); genetic analysis of complex human phenotypes, human diversity and evolution.

Laird, Charles D. \* 1971, (Adjunct); PhD, 1966, Stanford University; cell and developmental biology, human genetics.

Manoil, Colin C. \* 1986; PhD, 1979, Stanford University; molecular genetics, protein localization in bacteria.

Martin, George \* 1957, (Adjunct); MD, 1953, University of Washington; somatic cell genetics, pathobiology of aging, Alzheimer's disease, Werner's syndrome.

Motulsky, Arno G. \* 1953, (Emeritus); MD, 1947, University of Illinois; medical genetics.

Olson, Maynard V. 1992; PhD, 1970, Stanford University; large-scale genome mapping and sequencing.

Reid, Brian J. \* 1983, (Adjunct); PhD, 1975, MD, 1980, University of Washington; genetic and cell-cycle abnormalities in neoplastic progression in Barrett's esophagus.

Schubiger, Gerold A. \* 1972, (Adjunct); PhD, 1968, University of Zurich (Switzerland); developmental genetic control of *Drosophila* embryos, pattern formation in imaginal disks.

Sibley, Carol Hopkins \* 1976; PhD, 1974, University of California (San Francisco); mammalian cell genetics and molecular parasitology.

Smith, Gerald R. \* 1983, (Affiliate); PhD, 1970, Massachusetts Institute of Technology; molecular biology of genetic recombination and regulation of gene expression.

Stadler, David R. \* 1956, (Emeritus); PhD, 1952, Princeton University; mutation and genetic repair in *Neurospora*.

Stamatoyannopoulos, George 1964; MD, 1958, DMedSc, 1960, University of Athens (Greece); medical genetics.

Trask, Barbara J. \* 1992, (Adjunct); PhD, 1985, University of Leiden (Netherlands); molecular cytogenetics, large-scale genome organization and polymorphism, genomics of olfaction.

Wakimoto, Barbara T. \* 1984, (Adjunct); PhD, 1981, Indiana University; developmental genetics, gene expression and chromosome organization in eukaryotes.

Young, Elton \* 1969, (Adjunct); PhD, 1967, California Institute of Technology; regulation of gene activity in the yeast *Saccharomyces cerevisiae*.

### Associate Professors

Berg, Celeste A. \* 1990; PhD, 1986, Yale University; *Drosophila* developmental genetics: cell communication and cell migration during oogenesis.

Braun, Robert Elmer \* 1986; PhD, 1985, Tufts University; mouse molecular genetics and male germ cell development.

Breedon, Linda 1994, (Affiliate); PhD, 1981, University of Colorado (Boulder); cell cycle regulation in budding yeast.

Henikoff, Steven 1982, (Affiliate); PhD, 1977, Harvard University; chromosome organization, epigenetic effects, analysis of protein sequence information.

Kruglyak, Leonid \* 1998, (Affiliate); PhD, 1990, University of California (Berkeley); genetic linkage analysis, population genetics, analysis of gene expression arrays.

Monnat, Raymond J. Jr. \* 1982, (Adjunct); MD, 1976, University of Chicago; somatic mutation, somatic cell molecular genetics, human genetic disease.

Soriano, Philippe 1994, (Affiliate); PhD, 1978, University of Paris (France); vertebrate developmental genetics.

Thomas, James H. \* 1988; PhD, 1985, Massachusetts Institute of Technology; genetics of development and the nervous system in nematodes.

Wright, Robin L. \* 1990, (Adjunct); PhD, 1985, Carnegie Mellon University; biogenesis of membranes, yeast cell biology.

### Assistant Professors

Edgar, Bruce A. 1994, (Affiliate); PhD, 1987, University of Washington; cell cycle control in *Drosophila*.

Pallanck, Leo J. \* 1997; PhD, 1992, Albert Einstein College of Medicine; neurogenetics.

Ruohola-Baker, Hannele \* 1993, (Adjunct); PhD, 1989, Helsinki University (Finland); signaling, pattern formation, establishment of polarity in development.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsctat/](http://www.washington.edu/students/crsctat/).

**GENET 411 Gene Action (5) NW** Molecular genetics: description of fundamental genetics processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focus is on prokaryotic organisms. Prerequisite: BIOL 201; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with MICROM 411; W.

**GENET 453 Genetics of the Evolutionary Process (3) NW** *Felsenstein* Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENET 371 or GENET 372.

**GENET 454 The Origins of Genetics (4) NW** Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence contributing to cornerstone of classical genetics—the chromosome theory of heredity. Prerequisite: either GENET 351, GENET 371, or GENET 372. Offered: A.

**GENET 465 Advanced Human Genetics (4) NW** *King, Olson* Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of to other species to analysis of human genes. Offered: W.

**GENET 466 Cancer Genetics (3) NW** Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENET 371 or GENET 372. Offered: Sp.

**GENET 490 Undergraduate Seminar (2, max. 6) NW** Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSpS.

**GENET 499 Undergraduate Research (\* max. 30)** Credit/no credit only. Offered: AWSpS.

### Courses for Graduates Only

**GENET 501 Introduction to Research Materials (3, max. 9)** The student undertakes a research project in one of the research groups within the department for a quarter at a time. Credit/no credit only. Prerequisite: graduate standing in the Department of Genetics or permission of graduate program coordinator. Offered: AWSpS.

**GENET 520 Seminar (1, max. 15)** Credit/no credit only. Prerequisite: graduate standing in the Department of Genetics or permission of graduate program coordinator. Offered: AWSp.

**GENET 525 Current Literature in Human Genetics (1)** Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Credit/no credit only. Prerequisite: graduate or postdoctoral status. Offered: AWSp.

**GENET 531 Human Genetics (3)** Modern approaches to the identification of human disease genes permitted by their isolation. Functional conservation of proteins throughout eukaryotic evolution as an approach to their function in model systems such as somatic cell culture, transgenic mice, nematodes, *Drosophila*, and yeast. Prerequisite: second-year graduate student. Offered: alternate years.

**GENET 550 Methods and Logic in Genetics (3)** Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and *in vivo* gene function. Prerequisite: first year genetics graduate students only. Offered: A.

**GENET 551 Basics of Genetic Analysis (3)** First course in a three-quarter sequence in formal, molecular, and microbial genetics. Offered: A.

**GENET 552 Nature and Consequences of Mutation (3)** Origin of mutations and their analysis in human and other genomes. Prerequisite: GENET 551 or permission of instructor. Offered: W.

**GENET 553 Chromosome Structure and Mechanics (3)** Chromosome structure and DNA replication; molecular basis of recombination and transposition. Prerequisite: GENET 552 or permission of instructor. Offered: Sp.

**GENET 554 Topics in Genetics (2, max. 6)** Current problems and research methods. Credit/no credit only. Prerequisite: permission of instructor.

**GENET 562 Population Genetics (4)** *Felsenstein* Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: Sp.

**GENET 565 Advanced Human Genetics (4)** *King, Olson* Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure, and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Offered: W.

**GENET 570 Phylogenetic Inference (3)** *Felsenstein* Methods for inferring phylogenies (evolutionary trees)—biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Offered: alternate years; Sp.

**GENET 575 Developmental Genetics (3)** Genetic control of early development in a range of organisms, emphasizing systems in which cellular, genetic, and molecular approaches have combined to make significant contributions to understanding. Prerequisite: permission of instructor. Offered: W.

**GENET 581 Seminar in *Drosophila* Genetics (1)** *Berg* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of *Drosophila* development. Credit/no credit only. Offered: AWSp.

**GENET 582 Seminar in Mouse Genetics (1)** *Braun* Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no credit only. Offered: AWSp.

**GENET 583 Seminar in Molecular Cytology (1)** *Byers* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of spindle behavior in the mitotic cell cycle of budding yeast. Credit/no credit. Offered: AWSp.

**GENET 584 Seminar in DNA Replication (1)** *Brewer, Fangman* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no credit only. Offered: AWSp.

**GENET 585 Seminar in Bacterial Genetics (1)** *Manoil* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no credit only. Offered: AWSp.

**GENET 586 Seminar in Mammalian Genetics (1)** *Sibley* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no credit only. Offered: AWSp.

**GENET 587 Seminar in Nematode Genetics (1)** *Thomas* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no credit only. Offered: AWSp.

**GENET 590 Population Genetics Seminar (1)** *Felsenstein* Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Credit/no credit only. Prerequisite: GENET 562 or permission of instructor.

**GENET 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWSpS.

**GENET 700 Master's Thesis (\*)** Offered: AWSpS.

**GENET 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Geography

408A Smith

 *General Catalog Web page:*  
[www.washington.edu/students/genecat/academic/geography.html](http://www.washington.edu/students/genecat/academic/geography.html)

 *Department Web page:*  
[depts.washington.edu/geog/](http://depts.washington.edu/geog/)

Geography is a far-reaching discipline providing a distinctive spatial approach to many of today's societal problems and issues: regional inequality; growth of service activities; residential and educational segregation; health-care delivery, urban growth management; transportation efficiency; environmental and pollution problems; economic impacts of major investments or technological changes; spatial efficiency of industrial production; spatial inequality in the distribution of goods, services, and resources; and the activities of international corporations and political states. Geography is the study of how individuals, groups, and societies interact with their environments. The discipline offers sufficient skills training to enable both graduates and undergraduates to be competitive in many job markets.

The study of geography emphasizes both technical and critical thinking skills. Geographers' skill sets include the ability to use Geographic Information Systems (GIS) software to produce maps; advanced technical skills in statistical analysis; the ability to use census and other demographic data; sophistication in locating data and interpreting it to help make an argument; sophistication in visual techniques for displaying data, including maps, charts, and graphs; advanced use of such software as spreadsheets, relational data bases, and Web page design; and the ability to present multiple models of land-use patterns for analysis in environmental and economic decision making. Graduates have pursued careers as urban planners, environmental planners and land-use analysts, GIS analysts, economic analysts (marketing, location analysis, geodemographics), public health researchers, NGO specialists in developing nations, airline route analysts, import-export/international-trade specialists, real estate valuation specialists, economic development specialists, social studies teachers, and college professors.

Geography seeks to understand the complex processes that result in observed patterns of settlement, location of economic activities, patterns of development, political organization, and the linkages and direction of trade and communication. Geographers also construct analytical tools, models of information representation, and graphic portrayals (notably maps) to aid the cognitive process of understanding. Individual undergraduate and graduate programs are built around five program options. Students are encouraged to develop a specific, individualized focus of study within their chosen option.

1. *Urban, Social, and Political Processes and Patterns.* Human population distribution, migration, settlement systems, and organization. Geographic facets of ethnicity, race, sexuality, and gender; wealth and poverty; and health and disease. Cultural landscapes; politics, nationalism, and identity formation; geopolitics. Location of urban services, including health-care systems, urban transportation, land use and housing, and neighborhoods. Urban spatial policies. Courses include: GEOG 230, 277, 280, 308, 330, 342, 350, 371, 375, 380, 401, 430, 431, 432, 440, 442, 443, 445, 461, 478.
2. *Economic Geography.* Key questions in this concentration include the following: Why do some cities and regions grow while others decline? What local characteristics attract businesses and employment? What determines the flows of goods, services, ideas, people, and capital that bind together the world economy and the regions within it? How are all these relationships being affected by, and in turn influencing, technological change? What can governments and non-governmental organizations do to affect these characteristics and flows? What personal, organizational, and institutional attributes tend to influence spatial behaviors? What are the relevant economic analysis tools to apply to questions of environmental regulation and land use? What effects do global corporations have on the economies of regions and nation-states? To what extent is international development driven by questions of political economy. Courses include: GEOG 207, 230, 302, 330, 336, 349, 350, 366, 367, 370, 430, 433, 435, 440, 443, 447, 448, 449, 450, 478, and 498.
3. *Regional Geography and International Development Studies.* Continental and global patterns of international relations and development. Political economy of development; development theory and practice; globalization. Analysis of geographic concepts in the regional context, especially on such topics as population growth and migration; development history, theory, and practice; hunger, resources, and poverty; and interconnections in the global economy. Special emphasis on East Asia, Russia and the former Soviet republics, Africa, Latin America, Canada, and the United States. Courses include: GEOG 230, 302, 304, 308, 313, 330, 333, 335, 336, 349, 371, 375, 404, 430, 431, 432, 433, 434, 435, 437, 466.
4. *Geographic Information Systems (GIS).* Role, design, and use of geographic information systems for research, planning, management, and decision making. Use of computers in the collection, manipulation, analysis, and presentation of geographical data. Courses include: GEOG 360, 370, 443, 458, 460, 461, 463, 465, 471.
5. *Society and Environment.* Examines the key debates on the causes and outcomes of environmental change and degradation and the paths to sustainable development; the use of data in the formulation of human-environment interaction models; perceptions of nature; nature-culture relationships; and historical and contemporary societal responses to environmental degradation, health problems, and resource consumption. Courses include: GEOG 270, 360, 370, 371, 372, 432, 460, 461, 463, 471, 472, 480, 490.

## Special Research and Teaching Facilities

A map center in Suzzallo Library houses atlases, sheet maps, and aerial photographs. Departmental facilities include the Edward L. Ullman Geography Collaboratory and the John C. Sherman Laboratory, which houses a variety of computer workstations connected to the campus computer network. The Ullman Collaboratory in 415 Smith provides a unique collaborative classroom with networked computer work stations. The Geography Commons Computer Room also provides computer work stations for students. The Department of Geography is a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.

## Graduate Program

Graduate Program Coordinator  
415B Smith, Box 353550  
(206) 543-3246  
geogd@u.washington.edu

The Department of Geography has flexible programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The aspirant to the master's degree is expected to complete all work for the degree in four to six quarters. The aspirant to the doctoral degree is expected to undertake two years of post-master's study and must take a departmental diagnostic examination upon entry, pass the General Examination, attain an appropriate level of competence in a foreign language or cognate field, and successfully complete a dissertation. Normally, doctoral program students complete all degree requirements in three to four years.

## Admission Requirements

Admission to the graduate program normally requires a minimum GPA of 3.00 (on a 4.00 scale), or "B." Students holding a master's degree must meet this minimum scholastic requirement, but also should have achieved a GPA higher than 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

## Financial Aid

The department usually awards approximately 15 to 20 teaching assistantships for the academic year. Most of the assistantships are for teaching quiz sections for a larger lecture class. A few of the more advanced doctoral candidates may teach a class. Normally, several research assistantships are also available. In recent years, approximately 85 percent of the department's graduate students have been funded by internal or external sources.

## Faculty

### Chair

Victoria A. Lawson

### Professors

Beyers, William B. \* 1962; PhD, 1967, University of Washington; economic geography, regional analysis, regional development.

Chrisman, Nicholas R. \* 1987; PhD, 1982, University of Bristol (UK); geographic information systems, spatial error analysis, science and technology studies.

Fleming, Douglas K. \* 1963, (Emeritus); PhD, 1965, University of Washington; transportation geography (especially ocean and air), regional organization of western Europe.

Guest, Avery \* 1972, (Adjunct); MS, 1964, Columbia University; MA, 1967, PhD, 1970, University of Wisconsin; demography, ecology, stratification.

Harrington, James W. \* 1997; PhD, 1983, University of Washington; economic change and labor processes in sub-national, regional economic development.

Hart, Lawrence G. 1982, (Adjunct); PhD, 1985, University of Washington; rural health policy, medical geography.

Hayuth, Yehuda 1990, (Affiliate); PhD, 1978, University of Washington.

Hodge, David C. \* 1975; MS, 1973, PhD, 1975, Pennsylvania State University; urban geography, urban transportation geography, equity, gender.

Jackson, W. A. Douglas \* 1955, (Emeritus); PhD, 1953, University of Maryland; Canada, political systems, nature and culture.

Krumme, Gunter \* 1970; PhD, 1966, University of Washington; economic, organizational and marketing geography, location theory, regional development.

Lawson, Victoria A. \* 1986; PhD, 1986, Ohio State University; Latin America, critical development studies, feminist geography.

Mayer, Jonathan D. \* 1977; PhD, 1977, University of Michigan; medical geography, clinical applications, philosophy, human-environment relations.

Morrill, Richard L. \* 1955, (Emeritus); PhD, 1959, University of Washington; spatial organization, migration, population, diffusion, regional planning/development, inequality.

Nyerges, Timothy L. \* 1985; PhD, 1980, Ohio State University; GIS, collaborative decision support, growth management, transportation, environment, land use.

Thomas, Morgan D. \* 1959, (Emeritus); PhD, 1954, Queen's University (UK); regional economics, regional planning and development, technical innovation.

Velikonja, Joseph \* 1964, (Emeritus); PhD, 1948, State University (Italy); social and political geography, international migration, immigrants in America, eastern Europe.

Zumbrunnen, Craig \* 1977; PhD, 1973, University of California (Berkeley); resource analysis, Russia and NIS, quantitative methods, physical geography, urban ecology.

## Associate Professors

Braden, Kathleen 1989, (Affiliate); PhD, 1981, University of Washington

Chan, Kam Wing \* 1991; PhD, 1988, University of Toronto (Canada); economic development, urbanization, migration, China, Hong Kong.

Chang, Kuei-Sheng \* 1966, (Emeritus); PhD, 1955, University of Michigan; economic geography of China, historical geography of exploration, Third World development.

Ellis, John Mark 1999; PhD, 1988, Indiana University; labor markets, immigration, "race," ethnicity.

England, Kim V. L. 1999; MA, 1984, PhD, 1988, Ohio State University; feminist geographies, labor markets, service-sector employment, families, child care.

Jaros, Lucy A. \* 1990; PhD, 1990, University of California (Berkeley); critical development studies; food and agriculture, feminist geography, political ecology.

Kakiuchi, George H. \* 1957, (Emeritus); PhD, 1957, University of Michigan; Japan, agriculture, internal migration, regional geography.

Mitchell, Katharyne 1993; PhD, 1993, University of California (Berkeley); urban, cultural and economic geography, Pacific Rim, migration, transnational studies.

Waddell, Paul A. \* 1997, (Adjunct); PhD, 1989, University of Texas (Dallas); urban policy, land use and transportation, growth management, geographic information systems.

**Assistant Professors**

Brown, Michael P. \* 1997; PhD, 1994, University of British Columbia (Canada); local, political, cultural, health geography; gender and sexuality; history of geographic thought.

Chang, Stephanie E. \* 1997, (Research); PhD, 1994, Cornell University; natural hazards, economic geography, transportation and urban infrastructure, Japan.

Hayes, Michael V. 1990, (Affiliate); PhD, 1989, McMaster University (Canada)

Jhaveri, Nayna J. 1997, (Acting); MSc, 1984, PhD, 1999, University of Edinburgh (UK); political and cultural ecology, consumption and environment, common property systems, Asia.

Sparke, Matthew \* 1995; MA, 1991, PhD, 1996, University of British Columbia (Canada); geopolitics, Cascadia, borderlands studies, globalization.

Withers, Suzanne D. \* 1997; PhD, 1992, University of California (Los Angeles); population, spatial demography, urban housing, quantitative and longitudinal methods, poverty.

**Course Descriptions**

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**GEOG 401 Culture, Capital, and the City (5) I&S**

*Brown* Examines current themes in social theory as they apply to the urban landscape. Includes the interconnections of cultural and economic processes and the spatial patternings of race, class, and gender in the modern urban context. Offered: A.

**GEOG 425 Qualitative Methodology in Geography (5) I&S**

*Jaroszk* Historical and philosophical overview of qualitative methodology in design of geography research strategies. Techniques of interviewing, participant observation, and archival research. Forms of analyses such as textual interpretation, discourse analysis and computer-aided analyses of interview transcripts and ethnography. Questions of ethics, field notes and write-up. Offered: W.

**GEOG 426 Quantitative Methods in Geography (5) I&S**

*Withers* Quantitative methods for empirical research in geography. Emphasis on statistical analysis; use of geographic data bases like the United States Census; understanding special issues and problems associated with geographically ordered data; verbal and graphic presentation in a computer environment. Recommended: GEOG 326. Offered: Sp.

**GEOG 430 Contemporary Development Issues in Latin America (5) I&S**

*Lawson* Contemporary development issues in Latin America, seen from a spatial perspective. Concept of development; competing theories as related to various Latin American states. Economic structural transformation, migration, urbanization, regional inequality, and related policies. Offered: A.

**GEOG 431 Geography and Gender (5) I&S**

*Jaroszk* Examines theories and case studies across international, national, and regional scales in order to illustrate the impacts of social and economic processes upon the construction of gender in particular places. Offered: Sp.

**GEOG 432 Population and Urbanization Problems of Russia and the Newly Independent States (5) I&S**

*ZumBrunnen* Historical background and evolution of Soviet/Russian population and urbanization processes and problems. Distinguishing demographic characteristics and recent trends in the growth and migration of rural and urban populations. Analysis of problems associated with ethnicity and nationality, regional-temporal labor demand and supply issues, and spatial-temporal well-being. Offered: odd years; Sp.

**GEOG 433 Resource Use and Management in Russia and the Newly Independent States (5) I&S**

*ZumBrunnen* Geographic and historical background of the natural resource base of Russia and the Newly Independent States. Geographic and historical perspectives on Soviet natural resource use and management in theory and practice. Implications of the breakup of the USSR for natural resource use and management. Offered: odd years; W.

**GEOG 434 Southeast Asia: Conflict and Development (5) I&S**

*Mitchell* Study of complexity of ethnic, cultural, and socioeconomic background in relation to division and rivalry in past; conflict and development in contemporary southeast Asia.

**GEOG 435 Industrialization and Urbanization in China (5) I&S**

*Chan* Examines the impacts of industrialization strategies adopted by the Peoples Republic of China on urbanization and rural-urban relations. Topics include: economic development strategies, industrial geography, rural industrialization, urban development patterns, migration, and urbanization policies. Recommended: GEOG 336. Offered: Sp.

**GEOG 440 Regional Analysis (5) I&S**

*Beyers* Regional industrial structures and economic change. Application of shift-share, cohort, multiplier, input/output, and programming models to the analysis and projection of regional population and employment patterns, regional growth differentials, and regional impact analysis. Recommended: GEOG 207. Offered: Sp.

**GEOG 442 Social Geography (5) I&S**

Review of concepts and methods of postwar social geography; historical roots and present orientations. Study of social spatial systems, their structures and functioning.

**GEOG 443 Location and Movement Models (5) I&S**

*Morrill* Application of models of optimum location and allocation; assignment, transportation, and spatial equilibrium; spatial interaction; geographic simulation; and spatial diffusion.

**GEOG 445 Population Distribution and Migration (5) I&S**

*Withers* Relation of population distribution to environment, economic development, and culture. Frontier and rural settlement, urbanization, and suburbanization. Regional variation in age, ethnicity, fertility, and mortality. Causes and effects of migration from the world to the local scale. Offered: A.

**GEOG 447 The Geography of Air Transportation (5) I&S**

Geographic analysis of world air routes, passenger and cargo flows, and airport activities; consideration of physical, economic, political, and institutional determinants of routes and flows.

**GEOG 448 Geography of Transportation (5) I&S**

Circulation geography, principles of spatial interaction emphasizing commodity flow, the nature and distribution of rail and water transport, the role of transport in area development.

**GEOG 449 Geography of Ocean Transportation (5) I&S**

Geographic analysis of ocean trade routes, cargo and passenger flows, and port activities. Evaluation of the role of the transportation carrier in international trade.

**GEOG 450 Theories of Location (5) I&S**

*Krummel* Derives basic micro-economic, decision-theoretical, managerial, and organizational-theoretical principles underlying consumer, commercial, industrial, and government behavior in physical, economic, transportation, and communication (including cyber-) space. Recommended: GEOG 207. Offered: A.

**GEOG 451 Cultural Geography of Latin America (5) I&S**

Interdisciplinary senior seminar examining how physical and social geographies are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitution of space via an interplay of material and cultural forces. Offered: jointly with SISLA 451.

**GEOG 458 Map Sources and Errors (5) I&S**

*Chrisman* Analysis and appraisal of source materials for maps, production constraints of mapping agencies, coverage and quality. Focus on errors inherent in maps and geographic information; metadata resources; judgment of fitness for specific applications. Prerequisite: 2.0 in GEOG 360.

**GEOG 460 Geographic Information Systems Analysis (5) I&S**

*Chrisman* Methods of Analysis provided by geographic information systems (GIS). Operations on map information including map overlay, aggregation/disaggregation, and other spatial and attribute procedures. Exposure to raster and vector software. Review of capabilities of current available GIS software. Prerequisite: 2.0 in GEOG 360. Offered: A.

**GEOG 461 Urban Geographic Information Systems (5) I&S**

*Nyerges* Use of geographic information systems to investigate urban/regional issues; focus on transportation, land-use and environmental issues; all urban change problems considered. GIS data processing strategies. Problem definition for GIS processing. Data collection, geocoding issues. Data structuring strategies. Prerequisite: 2.0 in GEOG 360; recommended: GEOG 277. Offered: W.

**GEOG 463 Geographic Information Systems Workshop (5) I&S**

*Chrisman, Nyerges* Practical experience applying geographic information system (GIS) tools to analyze spatial data. Workshop format requires student-motivated projects; diverse backgrounds encouraged. Prerequisite: either 2.0 in GEOG 460 or 2.0 in GEOG 461. Offered: Sp.

**GEOG 465 Analytical Cartography (5) I&S**

*Chrisman* Algorithms and data structures for selected topics in computer-assisted cartography. Emphasis on point, line, area, and surface data representation, map design, generalization, and data transformations. Prerequisite: either 2.0 in GEOG 460 or 2.0 in GEOG 461. Offered: odd years; W.

**GEOG 466 Regional Economic Development (5) I&S**

*Harrington* Provides a theoretical overview of sub-national, regional economic growth and structural change, including the roles of interregional interaction and international trade, technological change, social, and legal institutions. Emphasizes inter-regional disparities in the context of relatively wealthy countries. Explores the constraints and effectiveness of government (and other organizations') policy. Offered: W.

**GEOG 471 Methods of Resource Analysis (5) I&S**

*ZumBrunnen* Economic and noneconomic criteria for resource analysis. Theory and methods of linear models of natural resource analysis. Includes materials-balance modeling, residuals management, constrained system optimization approaches to water quality analysis, land-use patterns and interregional energy use, and multiple objective planning techniques applied to natural resource problems. Recommended: GEOG 370.

**GEOG 472 Ecoscapes: Nature, Culture, and Place (5) I&S** *Jhaveri* Relationship between nature, culture, and place as the heart of geographic inquiry. Examines how perceptions of nature are influenced by changing political-economic, cultural, and scientific practices. Uses cultural studies of ecological science as a primary method of analysis. Offered: Sp.

**GEOG 478 Intraurban Spatial Patterns (5) I&S** *Brown* Geographic patterns and processes within metropolitan areas. Economic land-use patterns (commercial and industrial location), social land-use patterns (segregation, housing, and neighborhood change), urban political geography, analysis of urban infrastructure, and assessment of contemporary and future trends in urban development. Recommended: GEOG 277. Offered: A.

**GEOG 480 Environmental Geography, Climate, and Health (5) I&S** *Mayer* Demonstrates and investigates how human-environment relations are expressed in the context of health and disease. Local and global examples emphasize the ways medical geography is situated at the intersection of the social, physical, and biological sciences. Examines interactions between individual health, public health, and social, biological, and physical phenomena. Offered: W.

**GEOG 490 Field Research: The Seattle Region (6) I&S** *Morrill* Field methods for contemporary urban research. Survey designs used in the analysis of transportation, land use, location of employment, shopping and housing, political fragmentation, and environmental degradation. Field report required, based on field work in the Seattle region.

**GEOG 492 Library Research in Geography (3) I&S** Introduction to library research methods in geography. Review and assessment of geographical bibliographies and abstract services for monographs, periodicals, gazetteers, dictionaries, encyclopedias, government publications, and statistical sources. Credit/no credit only.

**GEOG 494 Senior Essay (3) I&S** Supervised individual research and writing of major paper during senior year. Offered: AWSp.

**GEOG 495 Special Topics (\* max. 15) I&S** Topics vary and are announced in the preceding quarter. Offered: AWSpS.

**GEOG 496 Internship in Geography (3/5, max. 12)** Internship in the public or private sector, supervised by a faculty member. Credit/no credit only. Offered: AWSpS.

**GEOG 497 Tutorial in Geography (1-3, max. 6) I&S** *ZumBrunner* Intensive directed study and tutoring. Literature reviews, formulations of project outlines and research designs, orientation in contemporary geographic thought and trends. Directed writing. Required for honors students. Offered: AWSp.

**GEOG 498 Undergraduate Seminar in Economic Geography and Regional Science (3) I&S** *Krumme* Selected advanced topics and current problems in economic geography. Emphasis on formulating research questions, developing an appropriate research process, selecting methods, searching for resources, writing up and documenting research results, and using the Internet for research purposes. Offered: A.

**GEOG 499 Special Studies (\* max. 15)** Supervised reading programs, undergraduate and graduate library and field research; special projects for undergraduate honors students. Offered: AWSpS.

## Courses for Graduates Only

**GEOG 502 Professional Writing in Geography (\* max. 6)**

**GEOG 505 Research Seminar: China (5, max. 10)** *Chan* Offered: A.

**GEOG 507 Research Seminar: Canadian Problems (3, max. 6)** Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potentials and relations with the United States, Japan, and other important trading partners. Prerequisite: GEOG 308 or permission of instructor. Offered: jointly with SISCA 507.

**GEOG 512 History of Geographic Thought (5)** Historical development of modern geography. Emphasis on various philosophical and methodological debates in geography and the contexts from which they emerged. Investigates geography's foundational concepts and institutions; how they have responded to—and influenced—the world around them. Offered: A.

**GEOG 513 Research Grant Workshop (5, max. 10)** Writing research proposals. Participants learn to identify and approach sponsors; practice the peer-review process; develop a competitive research proposal. Prerequisite: GEOG 512 or GEOG 515 or equivalent; training and experience with quantitative, qualitative, or cartographic analysis; an already-formulated research project.

**GEOG 515 Evidence and Explanation in Geography (5)** *Sparke* Introduces the main strands of philosophical debate shaping the discipline of human geography, including description, prediction, explanation, abstraction, structuration, representation, and institutionalization. Focuses on ways "theories" from outside the discipline have shaped the questions and concerns of geographers, and the ways geography reworks such theories. Offered: Sp.

**GEOG 520 Research Seminar: Geographic Information Representation (5)** *Nyerges* Current issues in geographic information representation for geographic information systems (GIS). Includes representation for visualization, databases, and analyses. Prerequisite: one course in GIS.

**GEOG 531 Latin American Development Seminar (5, max. 10)** *Lawson* Evolution of development theory in Latin America from a spatial perspective. Theories and development issues, using case studies from Latin America. How geographers have conceptualized development problems and solutions. Prerequisite: GEOG 430. Offered: W.

**GEOG 532 Rural Development Seminar (5, max. 10)** *Jarosz* Contemporary issues in international development theory related to regional and agrarian change, with emphasis on Africa. Offered: Sp.

**GEOG 533 Research Seminar: Russia and the Newly Independent States (5, max. 10)** *ZumBrunner*

**GEOG 540 Research Seminar: Industrial Geography (5, max. 10)** *Beyers* Offered: W.

**GEOG 542 Research Seminar: Social and Population Geography (5, max. 10)** *Morrill* Offered: W.

**GEOG 553 Advanced Topics in Cultural Geography (5, max. 10)** *Mitchell* Focuses on important contemporary topics in cultural geography. Examines current theoretical debates in anthropology, sociology, geography, feminist criticism, and cultural studies as they relate to the landscape. Include critical questions surrounding issues of representation and ethnography. Designed to help student prepare for advanced fieldwork. Offered: Sp.

**GEOG 560 Geographic Information and Analysis (3, max. 6)** *Chrisman* Current research topics in geographic information systems. Particular emphasis on analytical methods, and their use in practical circumstances. Prerequisite: graduate status in GIS or related field. Offered: W.

**GEOG 563 Algorithms and Data Structures for Geographic Information Systems (5)** *Chrisman* Anatomy of a software package for geographic information processing. Emphasis on analysis of algorithmic complexity and software design techniques. Presents dynamic data structures, persistence of temporal data, and data flow algorithms. Prerequisite: GEOG 460, GEOG 465, and CSE 326 or CSE 373.

**GEOG 567 Research Seminar: Geography and Economic Development (5, max. 10)** *Harrington* Explores ways in which economic and social changes affect the well-being and development of subnational, regional economies. Explanatory roles of such factors as labor and labor institutions, governments, technical change, corporations, capital markets, information costs, and international trade in the process of global restructuring. Specific focus changes annually.

**GEOG 570 Research Seminar: Natural Resources Analysis (3, max. 6)** *ZumBrunner*

**GEOG 571 Research Seminar: Critical and Normative Ecologies (5)** *Jhaveri* Engages in an ecocritique of mainstream managerial environmentalisms by unearthing their ideological bases, and delves into the ethical underpinnings of ecological resistance struggles or green utopias such as ecofeminist, deep and social ecology, and environmental justice movements. Offered: A.

**GEOG 575 Advanced Political Geography (5)** *Sparke* Provides resources for theorizing how politics shapes and is shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines interrelationships of contemporary capitalism with other complex systems of social and political power relations. Offered: jointly with SIS 575.

**GEOG 577 Research Seminar: Internal Spatial Structure of Cities (4, max. 8)** *Hodge* Offered: A.

**GEOG 580 Medical Geography (3)** *Mayer* Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Offered: jointly with HSERV 586; W.

**GEOG 581 Seminar in Medical Geography (3)** *Mayer* Research and methodologies in medical geography; critical analysis of readings in medical geography; interrelations of medical geography with (1) other geographical specialties, (2) other health sciences. Prerequisite: GEOG 580. Offered: odd years; W.

**GEOG 597 Tutorial for Graduate Students (2)** Introduces beginning geography students to the main research agendas of the faculty; identifies the range of current discourse communities formed by current faculty and graduate students; establishes a process of mentoring and long-term planning for each new graduate student. Credit/no credit only. Offered: A.

**GEOG 598 Geography Colloquium (1, max. 3)**  
Participation in, and critique of, student thesis and dissertation research, faculty research, and visitor contributions. Offered: AWP.

**GEOG 599 Effective Teaching of Geography (1)**  
Designed for the ongoing development of effective teaching and professional skills. Topics/activities include micro-teaching, communications and presentation skills; course organization, time management, personal and small group dynamics; design of geography curricula using simulations and computer-assisted instruction in the classroom, and fostering of creative thinking. Credit/no credit only. Offered: A.

**GEOG 600 Independent Study or Research (\*)**  
Offered: AWP.

**GEOG 700 Master's Thesis (\*)** Offered: AWP.

**GEOG 800 Doctoral Dissertation (\*)** Offered: AWP.

## Geological Sciences

63 Johnson

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/geo\\_sci.html](http://www.washington.edu/students/genecat/academic/geo_sci.html)

Department Web page:  
[www.geology.washington.edu](http://www.geology.washington.edu)

The geological sciences include the collection and interpretation of field and laboratory data as well as the application of principles of physics, chemistry, biology, and mathematics to the study of the earth, its environment, its origin, and the processes by which it has been transformed through time.

The department is well equipped with modern analytical, computational, and experimental facilities and has sizable research/teaching collections of rocks, minerals, and fossils.

## Graduate Program

Graduate Program Coordinator  
63 Johnson, Box 351310  
(206) 543-5405

The Department of Geological Sciences offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. The department emphasizes a rigorous quantitative approach to significant problems in the geological sciences. Study in virtually all branches of geology is possible; any emphasis on field, laboratory, or theoretical work is largely dictated by the nature of the research problem selected.

While in the graduate program, students develop into productive scholars. Nearly all Geological Sciences doctoral graduates go on to teaching and research careers in academia, government organizations, or industry research laboratories.

## Research Facilities

Analytical, experimental, and computational research facilities include a wet chemistry laboratory, a Finnigan SOLA ICP-MS for elemental and isotopic analyses of rocks and fluids, a JEOL 733 Superprobe with EDS/WDS for mineral analysis, a thermal-ionization mass spectrometer and clean laboratory for separation of radiogenic and trace elements (Rb/Sr, Sm/Nd, U/Pb), two fully automated single-crystal x-ray diffractometers for crystal-structure studies at high temperature, a computer laboratory, a remote-sensing laboratory with an image-processing system with LANDSAT tape li-

brary and spectral reflectance equipment, and high temperature controlled atmosphere furnaces. Additional facilities are provided by the Burke Memorial Washington State Museum which houses paleontological laboratories and extensive reference collections of invertebrate, vertebrate, and plant fossils, and minerals, and the Quaternary Research Center (scanning and transmission electron microscopes, radiocarbon and stable-isotope research laboratories, palynology, snow and ice research, and a periglacial laboratory).

## Master of Science

*Graduation Requirements: With Thesis*—36 credits, of which 18 must be in courses at the 400 level or above and up to 9 may be for thesis (GEOL 700). Final examination consists of oral presentation and defense of thesis. *Without Thesis*—45 credits, of which 18 must be in courses at the 400 level or above, which includes a 5-credit research paper (GEOL 600). Final examination is oral and is administered by the supervisory committee. All students entering the M.S. program must present approved field courses or other approved field experience.

## Doctor of Philosophy

*Graduation Requirements:* Credits variable; one-half total program, including dissertation, must be in courses at the 500 level or above; a minimum of 27 credits for thesis (GEOL 800); at least 18 credits completed with numerical grade in courses at the 400 and 500 levels. Completion of two years of graduate study, passage of the Ph.D. entrance requirement which includes the defense of a proposal, General Examination, and admission to candidacy; completion of acceptable dissertation and passage of Final Examination.

## Financial Aid

The department awards annually a number of teaching assistantships, endowed fellowships and scholarships, and research assistantships. Industry-sponsored grants are also available. Qualified students are strongly encouraged to apply for National Science Foundation and other fellowships available through national and private agencies.

## Faculty

### Acting Chair

Darrel S. Cowan

### Professors

Adams, John B. \* 1975, (Emeritus); MS, 1958, PhD, 1961, University of Washington; planetology, remote sensing.

Atwater, Brian F. \* 1986, (Affiliate); MS, 1974, Stanford University; PhD, 1980, University of Delaware; paleoseismology, neotectonics, regional geology, seismic hazards.

Bostrom, Robert C. \* 1964, (Emeritus); MA, 1952, PhD, 1961, Oxford University (UK); geotectonics, geophysics.

Brown, J. Michael \* 1984, (Adjunct); PhD, 1980, University of Minnesota; experimental and theoretical mineral physics at high pressure and temperature.

Cowan, Darrel S. \* 1974; PhD, 1972, Stanford University; structural geology and regional tectonics.

Creager, Joe S. \* 1958, (Emeritus); PhD, 1958, Texas A&M University; geological oceanography, sedimentology.

Crosson, Robert S. \* 1966, (Adjunct); PhD, 1966, Stanford University; seismology, structure and tectonics, earthquake hazards.

Delaney, John R. \* 1977, (Adjunct); PhD, 1977, University of Arizona; geological oceanography, origin of oceanic crust, igneous petrology.

Dunne, Thomas \* 1973, (Affiliate); PhD, 1969, Johns Hopkins University; geomorphology and hydrology.

Evans, Bernard W. \* 1969; PhD, 1959, Oxford University (UK); petrology and mineralogy.

Ghiorso, Mark S. \* 1980; MA, 1978, PhD, 1980, University of California (Berkeley); geochemistry.

Ghose, Subrata \* 1972; PhD, 1959, University of Chicago; mineralogy.

Gillespie, Alan R. \* 1985; PhD, 1982, California Institute of Technology; landscape evolution, paleoclimate, geochronology, and applications of remote sensing.

Hallet, Bernard \* 1980; PhD, 1975, University of California (Los Angeles); glaciology, permafrost studies, geomorphology.

Johnson, Harlan Paul \* 1976, (Adjunct); PhD, 1972, University of Washington; paleomagnetism and marine geophysics.

Leopold, Estella B. \* 1976, (Adjunct); PhD, 1955, Yale University; paleoecology, pollen and seed analysis, late Cenozoic environment.

Mallory, V. Standish \* 1952, (Emeritus); PhD, 1952, University of California (Berkeley); biostratigraphy, micro-paleontology, paleoecology.

McCallum, Ian S. \* 1970; PhD, 1968, University of Chicago; petrology.

Merrill, Ronald T. \* 1967; PhD, 1967, University of California (Berkeley); geomagnetism, geophysics of solids, rock magnetism.

Nelson, Bruce K. \* 1986; PhD, 1985, University of California (Los Angeles); isotopic and geochemical investigations.

Newhall, Christopher \* 1994, (Affiliate); PhD, 1980, Dartmouth College; volcanology.

Nittroer, Charles \* 1998; PhD, 1978, University of Washington; geological oceanography, continental-margin sedimentation.

Porter, Stephen C. \* 1962; PhD, 1962, Yale University; Quaternary geology and geomorphology.

Raymond, Charles F. \* 1969, (Adjunct); PhD, 1969, California Institute of Technology; glaciology, glacier and ice sheet dynamics.

Rensberger, John M. \* 1966; PhD, 1967, University of California (Berkeley); Cenozoic mammalian evolution, taxonomy, and biostratigraphy.

Sack, Richard O. \* 1993, (Affiliate); PhD, 1979, Harvard University; petrology, thermochemistry of rock-forming minerals.

Stuiver, Minze \* 1969, (Emeritus); PhD, 1958, University of Groningen (Netherlands); geochronology, isotope geology.

Swanson, Donald A. \* 1992, (Affiliate); PhD, 1964, Johns Hopkins University; volcanology.

Tsukada, Matsuo \* 1969, (Adjunct); PhD, 1961, Osaka City University (Japan); interpretation of Quaternary events from palynological and kindred data.

Ward, Peter D. \* 1984; PhD, 1976, McMaster University (Canada); invertebrate paleontology, paleobiology.

Washburn, A. Lincoln 1974, (Emeritus); PhD, 1942, Yale University; geomorphology, periglacial processes and environments.

**Associate Professors**

Anderson, Patricia M. \* 1982, (Research); MA, 1976, PhD, 1982, Brown University; paleoecology, paleoclimatology, Quaternary studies, biogeography, North American archaeology.

Bergantz, George W. \* 1988; PhD, 1988, Johns Hopkins University; physical petrology, heat and mass transfer, geophysics.

Booth, Derek B. \* 1980, (Adjunct Research); PhD, 1984, University of Washington; geomorphology, environmental geology.

Bourgeois, Joanne \* 1980; PhD, 1980, University of Wisconsin; sedimentology, sedimentary geology.

Cheney, Eric S. \* 1964; PhD, 1964, Yale University; economic geology, sequence stratigraphy.

Irving, Anthony J. \* 1979, (Affiliate); PhD, 1972, Australian National University; igneous petrology and geochemistry.

Iverson, Richard M. \* 1990, (Affiliate); PhD, 1984, Stanford University; landslides, debris flows, granular materials, geomechanics, hydrology, geomorphology.

Montgomery, David R. \* 1991; PhD, 1991, University of California (Berkeley); earth surface processes, especially those occurring in mountain drainage basins.

Stewart, Richard J. \* 1969; PhD, 1970, Stanford University; sedimentary petrology, diagenesis of sediment.

Vance, Joseph A. \* 1957, (Emeritus); PhD, 1957, University of Washington; igneous and metamorphic petrology, general geology.

**Assistant Professors**

Cladouhos, Trenton T. 1995, (Affiliate); PhD, 1993, Cornell University; structural geology, hydrogeology of fractured rocks.

Kress, Victor C. 1990, (Research); PhD, 1990, University of California (Berkeley); igneous petrology, volcanology, experimental petrology.

Nesbitt, Elizabeth A. \* 1993, (Affiliate); PhD, 1982, University of California (Berkeley); paleontology, K-12 education.

Sletten, Ronald S. 1983, (Research); MS, 1987, PhD, 1995, University of Washington; aquatic geochemistry, polar soils.

Stone, John O. H. \* 1998; PhD, 1986, Cambridge University (UK); Quaternary dating and geomorphical studies with cosmic-ray-produced isotopes.

Weeks, Robin J. 1992, (Research); PhD, 1988, University of California (Santa Barbara); remote sensing and global/regional change.

Willett, Sean D. \* 1998; PhD, 1988, University of Utah; numerical modeling of lithospheric processes.

**Senior Lecturer**

Chernicoff, Stanley E. 1981; PhD, 1980, University of Minnesota; geomorphology.

**Lecturer**

Swanson, Terry W. 1988; MA, 1989, University of California (Davis); PhD, 1994, University of Washington; cosmogenic isotopes, Quaternary studies.

**Course Descriptions**

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**GEOL 401 Field Geology (12) NW** Six weeks of geologic mapping in a variety of rock types in the western United States. Enhances students' knowledge of geologic phenomena and processes. Development of skills in mapping, field interpretation, and report writing. Students responsible for own living expenses while in the field. Prerequisite: GEOL 203; two courses selected from GEOL 391, GEOL 392, and GEOL 393. Offered: S.

**GEOL 402 International Field Geology (12) NW** Supervised geological field work in classic, instructive international sites. Venue varies from year to year. Work may include geologic mapping, construction of cross sections, measurement and analysis of stratigraphic sections, field excursion, and supervised individual research projects. Prerequisite: GEOL 401. Offered: S.

**GEOL 403 Principles of Paleobiology (4) NW Ward** Fossil record and methods of analysis. Biologic systems in geologic time, including preservation, variation, population structure, adaptation, functional morphology, biostratigraphy, paleoecology, evolution, and biogeography.

**GEOL 405 Global Geophysics and Plate Tectonics (5) NW Willett** Introduction to geophysical features of the earth including gravity, magnetic, and temperature fields. Use of geophysical methods including seismology, heat flow, and paleomagnetism to study geophysical and geological processes in the context of plate tectonic theory. Prerequisite: PHYS 121. Offered: A.

**GEOL 408 Regional Geology of the Pacific Northwest (5) NW Cheney** Explores the geological diversity of the Pacific Northwest temporally (Archean to Pleistocene), tectonically (craton, terranes, and cover sequences), and lithologically (ophiolites to coal). Three weekend field trips required. Offered: A.

**GEOL 409 Great Geological Issues (3) NW Bourgeois** History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Recommended: HIST 311; HIST 312. Offered: alternate years.

**GEOL 410 Introduction to Geological Remote Sensing (4) NW Gillespie** Principles of image interpretation for geologists. Study of land forms, structure, lithology, surface processes using aircraft and satellite data. Use of digital multispectral images and radar images for geological mapping. Offered: A.

**GEOL 411 Geomorphology (5) NW** Introduction to landforms and surficial deposits. Emphasis on landscape-forming processes. Intended for students who wish to take additional courses in geomorphology. Prerequisite: PHYS 121; PHYS 131. Offered: A.

**GEOL 412 Fluvial Geomorphology (5) NW Montgomery** Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, report writing. Prerequisite: either GEOL 392 or GEOL 411.

**GEOL 413 Hillslope Geomorphology (5) NW Montgomery** Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Prerequisite: either GEOL 392 or GEOL 411. Offered: alternate years; W.

**GEOL 414 Intermediate Spectral Remote Sensing (4) NW Gillespie, Weeks** Explores spectral image processing with ENVI software, used in individualized projects involving satellite or aircraft images. Emphasis on integration of remote sensing and field measurement using process models and Geographic Information Systems (GIS). Recommended: introductory courses in physics, chemistry, calculus, geology, and field geology. Prerequisite: GEOL 410. Offered: W.

**GEOL 415 Principles of Glaciology (3) NW Hallet, Porter, Raymond, Waddington, Warren** Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, Ice Age theories. Offered: jointly with GPHYS 415; A.

**GEOL 416 Glacial Geology (3) NW Porter** Interpretation of glacial environments and history through study of sediments and landforms; stratigraphic approaches, chronology, reconstructions, applications. Recommended: GEOL 415.

**GEOL 417 Environmental Change in the Glacial Ages (3) NW Porter** Physical, biological evidence of climatic change during Quaternary Period; emphasizing stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth's terrestrial, marine environments. Theories on causes of climatic variation. Offered: jointly with QUAT 417.

**GEOL 418 Alpine and Polar Landscape (3) NW Hallet** Processes responsible for landforms and deposits in alpine and polar regions. Focuses on the underlying processes many of which are ice related. Includes discussions of linkages between glacial erosion and tectonics in active high mountain ranges, and between permafrost/glaciers and global climate. Prerequisite: GEOL 201.

**GEOL 419 Landscape Evolution (5) NW Hallet** Advanced examination of landscape evolution. Emphasis on interactions among tectonics, climate, and hillslope, fluvial, and glacial processes. Intended for seniors and graduate students in geomorphology and related disciplines. Prerequisite: either GEOL 412, GEOL 413, or GEOL 418. Offered: alternate years; W.

**GEOL 420 Mineralogy (5) NW Ghose** Symmetry of crystals and crystal structures. Rules of crystal chemistry. Microscopic, diffraction, and spectroscopic techniques of mineral characterization. Transformation processes in minerals: order-disorder, phase transition, and exsolution. Crystal chemistry and phase relations. Reactions on mineral surfaces. Physical properties, deformation, and creep. Prerequisite: CHEM 142; PHYS 123; GEOL 202; GEOL 391. Offered: W.

**GEOL 423 Optical Mineralogy (2) NW Evans** Petrographic microscopy and recognition of common minerals in thin section. Prerequisite: GEOL 202. Offered: A.

**GEOL 424 Petrology of Igneous Rocks (5) NW McCallum** Systematic study of the major families of volcanic and plutonic igneous rocks with emphasis on tectonic setting, phase relations, geochemistry, and models of their origin and evolution throughout geologic time. Laboratory emphasizes thin-section study of rocks using transmitted and reflected light. Prerequisite: GEOL 391; GEOL 423. Offered: W.

**GEOL 425 Petrography and Petrology of Metamorphic Rocks (5) NW** *Evans* Mineralogy, textures, and origins of metamorphic rocks; metamorphic facies and metamorphic phase equilibria; controls of metamorphism. Prerequisite: GEOL 391; GEOL 423. Offered: Sp.

**GEOL 426 Petrology and Petrography of Sedimentary Rocks (5) NW** *Stewart* Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisite: GEOL 391.

**GEOL 430 Invertebrate Paleontology (5) NW** *Ward* Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology.

**GEOL 435 Seismic Exploration (5) NW** *Brown* Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: GEOL 392; either MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with GPHYS 435.

**GEOL 437 Fossil Vertebrates (5) NW** *Rensberger* Highlights in evolutionary history of the fossil vertebrates, from early Paleozoic fishes through late Cenozoic mammals. Morphology, adaptations, relationships of the major groups. Bone structures and systematic relationships. Field trip. Prerequisite: either GEOL 100 or BIOL 101.

**GEOL 438 Fossil Mammals (5) NW** *Rensberger* Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology, adaptations, extinctions, evolutionary patterns. Structures and relationships of most major groups. Field trip. Prerequisite: either GEOL 100, BIOL 101, or GEOL 437.

**GEOL 440 Structure and Tectonics (5) NW** *Cowan* Geometry, kinematics, and tectonic setting of major types of structures, including those in contractional fold-and-thrust belts; extended crust; strike-slip-dominated regimes; and shear zones. Laboratory exercises develop basic tools of structural geology. Prerequisite: GEOL 203; GEOL 392. Offered: Sp.

**GEOL 452 Principles of Sediment Transport by Turbulent Flow (3) NW** Theoretical and experimental techniques used in studying erosion, transportation, and deposition of sediment. Initial motion of sediments, bed-load motion, suspension of sediment by turbulent flows, erosion and deposition of sediments, and applications of sediment transport theory to problems of geological interest. Prerequisite: GEOL 455. Offered: jointly with OCEAN 452.

**GEOL 455 Geodynamics (4) NW** Principles of continuum mechanics, their application to flow of water, mud, magma; deformation of soil, rock, ice. Emphasis on sound physical understanding of these principles and use of elementary mathematics in their application to earth sciences problems. Prerequisite: GEOL 392; either MATH 126, MATH 129, or MATH 136; PHYS 121.

**GEOL 461 Stratigraphy (4) NW** *Bourgeois* Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biostratigraphy, magnetostratigraphy, seismic stratigraphy, subsurface analysis. Basin analysis, evolution of sedimentary basins and continental margins. Prerequisite: GEOL 203. Offered: A.

**GEOL 462 Depositional Environments (4) NW** *Bourgeois* Principles of sedimentary facies analysis, including survey of modern processes that produce sedimentary sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: GEOL 203. Offered: Sp.

**GEOL 474 Introduction to X-Ray Crystallography (3) NW** *Ghose* Point groups and space groups. Reciprocal lattice. Theory of x-ray diffraction from single crystals. Powder diffraction; identification of unknowns and determination of precise cell dimensions. Single crystal camera (precession and Weissenberg) techniques; determination of cell dimensions and space groups; study of exsolution and phase transformation in rock-forming silicates. Structure factor formula and the use of three-dimensional Fourier and Patterson series in the determination of crystal structures. Prerequisite: GEOL 391; PHYS 123.

**GEOL 476 Isotope Geology (3) NW** The geochemistry of stable isotopes. Topics covered include the chemical properties of isotopes, a survey of isotopic variations in nature, application of isotopes as natural tracers in surficial processes, and the use of isotopic proxy indicators for interpreting paleoclimate. Prerequisite: GEOL 391.

**GEOL 477 Isotope and Trace Element Geology: Lithosphere (3) NW** *Nelson* Radiogenic isotopes and trace element as petrogenetic indicators; evolution of earth's major geochemical reservoirs; application to problems in igneous, metamorphic, sedimentary petrology; stable isotope geothermometry; nucleosynthesis, origin, and chronology of solar system formation; U-Th disequilibrium series. Prerequisite: either CHEM 150, CHEM 152, or CHEM 155; GEOL 391.

**GEOL 478 Age Determinations in the Earth Sciences and Archaeology (3) NW** *Stone* Principles and methods of age dating with a strong focus on radiocarbon dating. Other techniques include dendrochronology, amino acid, potassium argon, uranium series, and thermoluminescence dating. History of past climatic change and cultural-global change applications.

**GEOL 480 Volcanic Processes (3) NW** *Bergantz, Nelson, Newhall* Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruptive phenomena, syn- and post-eruption lahars and other re-working of deposits. Prerequisite: GEOL 391 or GEOL 392. Offered: Sp.

**GEOL 485 Geology of Ore Deposits (5) NW** *Cheney* The geologic principles, environmental aspects, and exploration strategies of selected types of metallic and nonmetallic ore deposits and coal. Prerequisite: GEOL 391.

**GEOL 488 Economic Field Geology (5) NW** *Cheney* Identification of hydrothermally altered rocks, oxidation, and supergene enrichment; principles of exploration, geochemistry and remote sensing. Four-to-eight-day field trip to mining districts for field inspection of ore deposits. Two weekends (three days each) mapping mineral deposits. Prerequisite: GEOL 485. Offered: Sp.

**GEOL 490 Special Topics (2-10, max. 20) NW**

### Courses for Graduates Only

**GEOL 509 Great Geological Issues (3)** *Bourgeois* History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary material. Prerequisite: GEOL 409 and graduate standing in earth sciences, or in history of science, or permission of instructor.

**GEOL 511 Seminar in Geomorphology and Hydrology (\* max. 3)** Credit/no credit only. Prerequisite: graduate status and permission of instructor.

**GEOL 520 Advanced Mineralogy (3)** *Ghose* Crystal symmetry; point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with MSE 518.

**GEOL 524 Petrogenesis of Igneous Rocks (3)** *McCallum* Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: GEOL 424 or equivalent. Offered: alternate years.

**GEOL 525 Theoretical Metamorphic Petrology (4)** *Evans* Theoretical treatment of metamorphic mineral assemblages and metamorphic processes. Prerequisite: GEOL 425, CHEM 456, or equivalent.

**GEOL 526 Advanced Igneous Petrology (4)** *Cry-*stal-liquid-vapor equilibria in magmatic systems. Physical properties of silicate melts. Geothermometry and geobarometry in igneous rocks. Models of fractionation, assimilation, and magma mixing. Trace elements, radiogenic isotopes, and stable isotopes as tracers in magmatic processes. Nucleation, crystal growth, and diffusion in melts. Prerequisite: GEOL 391, GEOL 424. Offered: alternate years.

**GEOL 527 Phase Equilibria in Magmatic Systems (4)** *McCallum* Phase equilibria in simple and multicomponent systems appropriate to the crystallization of igneous rocks. Effect of volatiles and variable oxidation states on phase equilibria. Application to the petrogenesis of common igneous rocks. Prerequisite: GEOL 391 and GEOL 424. Offered: alternate years.

**GEOL 533 Seminar in Vertebrate Paleontology (3, max. 9)** *Rensberger* Advanced topics in vertebrate evolution, morphology, classification, function, ecology, and stratigraphy. Subject to be chosen by class at beginning of quarter. Prerequisite: advanced standing in paleontology, vertebrate zoology, or biocultural anthropology.

**GEOL 548 Tectonic Evolution of Western North America (4)** *Cowan* Survey of each of the major Mesozoic and Cenozoic tectonic provinces in western North America, emphasizing structural styles, tectonic framework, and plate-tectonic setting. Provinces include: Laramide, Rocky Mountain thrust belt, Basin and Range, Cordilleran core complexes, San Andreas, Sierran-Klamath, Franciscan-Great Valley, Vancouver Island-San Juan Islands-North Cascades. Prerequisite: GEOL 440.

**GEOL 550 Theoretical Structural Geology (4)** Analysis of finite deformation; elastic, plastic, and viscous behavior; dislocations and crystal deformation; deformation mechanisms and flow laws for rocks; formation of folds, boudinage, and mullions; tensile fracture and the growth of joints, dikes, and veins; mechanics of faulting; large-scale crystal deformation. Credit/no credit only.

**GEOL 556 Planetary Surfaces (3)** Comparison of surface processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and on the implied course of solar-system evolution. Analysis of data from Earth-based telescopes and from manned and unmanned space missions. Offered: jointly with ASTR 556/GPHYS 556; alternate years.

**GEOL 557 Origin of the Solar System (3)** Nebular and nonnebular theories of the origin of the solar system; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; examination of the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557/GPHYS 557.

**GEOL 560 Mechanics of Erosion and Sediment Transport (3)** Physics of transportation of sediment by turbulent flows. Use of theoretical fluid mechanics to formulate and solve problems of bed-load and suspended-load transport. Prerequisite: GEOL 455 or MATH 329, and GEOL 452.

**GEOL 564 Sedimentology of Carbonate Rocks (2-4, max. 4)** *Bourgeois* Petrographic and environmental interpretation of carbonate sediments and rocks. Hand-specimen and thin-section studies, with references to modern and ancient carbonate environments. Offered: alternate years.

**GEOL 565 Interpretation of Sedimentary Structures (2-4, max. 4)** *Bourgeois* Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required.

**GEOL 571 Transport Theory and Applications in Geology (3)** *Bergantz* Introduction to the quantitative treatment of transport phenomena with applications to igneous processes and metamorphism, magma and mantle convection, flow and reaction in regional and contact metamorphism. Emphasis on the governing equations of heat transfer, fluid and porous media flow, rheology, and analytical, numerical, and scaling solutions. Prerequisite: AMATH 402.

**GEOL 572 Solution Geochemistry (4)** *Ghiorso* Solution chemistry and thermodynamics as applied to solid and liquid silicates and aqueous fluids. Modeling configurational entropies in solids, activity coefficients and complexes in aqueous solution, and modeling chemical mass transfer in geologic systems. Prerequisite: GEOL 391 or equivalent.

**GEOL 573 Electron Beam Microanalysis (4)** *Kuehner* Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems. Credit/no credit only.

**GEOL 574 Advanced X-Ray Crystallography (4)** *Ghose* Theory of x-ray diffraction; determination of crystal structures with special emphasis on minerals and inorganic compounds, through the application of three-dimensional Patterson function, Fourier series, and direct methods; structure refinement; determination of cation distribution, exsolution, and antiphase domain structure through x-ray diffraction. Prerequisite: GEOL 474 or permission of instructor.

**GEOL 575 Physics and Chemistry of the Earth's Interior (3)** *Brown, Creager, Irving, Merrill* Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of subducted lithosphere and geochemical constraints on mantle convection. Prerequisite: permission of instructor. Offered: jointly with GPHYS 575.

**GEOL 579 Magma Physics (3)** *Bergantz* The quantitative treatment of magmatic processes: thermo-mechanical state of the lithosphere, solidification, convection, conjugate heat transfer, crystal settling, magma mixing, diapirism and melt extraction, hydrothermal convection. Emphasis on continental lithosphere. Prerequisite: GEOL 571, AMATH 403.

**GEOL 582 Seminar in Sedimentology (2-4)** *Bourgeois* Selected problems of current interest; extended field trips to classic sedimentologic localities.

**GEOL 586 Economic Geology of Sedimentary Rocks (5)** *Cheney* Description and origin of metallic and nonmetallic ore deposits indigenous to regoliths, sediments, and sedimentary rocks. Prerequisite: GEOL 485 or equivalent or permission of instructor. Offered: alternate years.

**GEOL 587 Economic Geology of Igneous and Metamorphic Rocks (5)** *Cheney* Description and origin of metallic and nonmetallic ore deposits formed in igneous and metamorphic rocks or by igneous and metamorphic processes. Prerequisite: GEOL 485 or equivalent or permission of instructor. Offered: alternate years.

**GEOL 590 Special Topics (2-10, max. 20)**

**GEOL 600 Independent Study or Research (\*)** Credit/no credit only.

**GEOL 700 Master's Thesis (\*)**

**GEOL 800 Doctoral Dissertation (\*)**

---

## Geophysics

202 Atmospheric Sciences Building

General Catalog Web page:  
[www.washington.edu/students/gencat/academic/geophysics.html](http://www.washington.edu/students/gencat/academic/geophysics.html)

Department Web page:  
[www.geophys.washington.edu](http://www.geophys.washington.edu)

Geophysics is the study of the earth's constitution and behavior from its core to the near-space environment. Because solid, liquid, and gaseous elements of our dynamic planet interact in complex ways, geophysics is an interdisciplinary science that draws on fundamentals of mathematics, physics, and chemistry which are applied to the earth systems.

---

## Graduate Program

Graduate Program Coordinator  
218 Atmospheric Sciences-Geophysics, Box 351650  
(206) 685-8992  
grad@geophys.washington.edu

The Geophysics program offers graduate study leading to the Master of Science and Doctor of Philosophy degrees. These degrees cover a broad range of topics in which the analytic techniques of physics and mathematics are brought to bear on problems of the earth and its environment. Major areas of interest are the internal and surface structures of planets, dynamic processes within the earth, oceans, atmosphere, and space environments, along with the associated environmental applications of these processes, and the interactions of the earth, ice, ocean, atmosphere, and near-space regions in the climate system.

The required curriculum is flexible to permit pursuit of the wide variety of scientific disciplines that may be necessary for approaching a specific geophysical problem. However, a core curriculum of basic physics and mathematics, and a sequence of courses dealing with some of the important problems encountered in space, the atmosphere, the oceans, and the solid earth are required. Additional specialized course work is necessary before a student embarks on a thesis project identified by the student and a faculty committee.

## Special Requirements

Qualification for the Ph.D. program is a process that considers course and research performance together with the result of an oral exam that is based on a research proposition and is normally given to students at the beginning of their second year. Students who do not qualify for the Ph.D. program by means of this process may be reconsidered following completion of an M.S. program.

## Financial Aid

Most financial aid is provided through graduate research assistantships that enable students to work with individual faculty members on research projects. However, two teaching assistantships also are awarded each year.

## Research Facilities

Research facilities include field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including a laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent, statewide seismic network; a portable telemetered seismic network for studying volcanoes and active faults in western North America; geodetic-quality global-positioning-system receivers; a cold laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical-fluids laboratory; a space-physics laboratory for preparing balloon, rocket, and satellite experiments; and a laboratory for the development of high-resolution optical instrumentation.

Computer facilities include a local area network linking a high-speed, large-storage server with various laboratory workstations and peripheral devices. This local net is connected to a campuswide fiber-optic ring that provides access to other campus computers and national networks.

Many of the geophysics faculty members also have laboratories or access to laboratories in other departments, thus making possible a wide diversity of research opportunities. This is particularly valuable in such fields as aeronomy, tropospheric aerosols, mineral physics, and geophysical fluid mechanics. The primary center for global digital seismic data, the IRIS Data Management System, is hosted by the Geophysics department.

In addition to laboratory work, field programs are carried out at a number of remote sites, particularly in the Washington Cascades and Olympics, Tibet, South America, and Antarctica. In marine geophysics, joint geophysics/oceanography projects provide opportunities for studying the earth's structure and tectonic processes on the sea floor. Facilities for reflection profiling and long-range seismic refraction are also available.

---

## Faculty

### Chair

J. Michael Brown

### Professors

Baker, Marcia \* 1980; MS, 1960, Stanford University; PhD, 1971, University of Washington; cloud physics, atmospheric geophysics.

Bergantz, George W. \* 1988, (Adjunct); PhD, 1988, Johns Hopkins University; physical petrology, heat and mass transfer, geophysics.

Booker, John R. \* 1971; PhD, 1968, University of California (San Diego); geomagnetic induction, magnetotellurics, inverse theory, geophysical fluid dynamics.

Brown, J. Michael \* 1984; PhD, 1980, University of Minnesota; experimental and theoretical mineral physics at high pressure and temperature.

Businger, Joost A. \* 1958, (Emeritus); PhD, 1954, University of Utrecht (Netherlands); boundary layer meteorology, air-sea interaction, atmospheric turbulence.

Charlson, Robert J. \* 1962, (Emeritus); MS, 1959, Stanford University; PhD, 1964, University of Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction and instrumentation.

Clark, Kenneth C. \* 1948, (Emeritus); PhD, 1947, Harvard University; optical spectroscopy, upper atmosphere.

Creager, Kenneth C. \* 1986; PhD, 1984, University of California (San Diego); global seismology and geophysical inverse theory.

Criminale, William O. \* 1968; PhD, 1960, Johns Hopkins University; fluid dynamics, mathematical physics, nonlinear mechanics, stability theory.

Crosson, Robert S. \* 1966; PhD, 1966, Stanford University; seismology, structure and tectonics, earthquake hazards.

Ghose, Subrata \* 1972, (Adjunct); PhD, 1959, University of Chicago; mineralogy.

Hernandez, Gonzalo \* 1988, (Research); PhD, 1962, University of Rochester; optical interference phenomena, with application to remote sensing of atmospheres.

Holzworth, Robert \* 1982; PhD, 1977, University of California (Berkeley); experimental space plasma physics, atmospheric/magnetospheric electric fields, thunderstorms.

LaChapelle, Edward R. \* 1955, (Emeritus); ScD, 1967, University of Puget Sound; snow-ice physics.

Leovy, Conway B. \* 1967, (Emeritus); PhD, 1964, Massachusetts Institute of Technology; climatic role of clouds, planetary atmospheres and astrobiology, upper-atmosphere circulation.

Lewis, Brian T. R. \* 1970; PhD, 1970, University of Wisconsin; marine geophysics, marine seismology, gravity, magnetics, and computer modeling of those processes.

Malone, Stephen \* 1972, (Research); PhD, 1972, University of Nevada; volcano seismology, general seismic network operations.

Maykut, Gary \* 1969, (Research); PhD, 1969, University of Washington; polar air-sea-ice interaction, radiative transfer in ice and snow.

Merrill, Ronald T. \* 1967; PhD, 1967, University of California (Berkeley); geomagnetism, geophysics of solids, rock magnetism.

Parks, George K. \* 1971; PhD, 1966, University of California (Berkeley); particles and waves in auroral, magnetospheric, and interplanetary space plasma phenomena.

Raymond, Charles F. \* 1969; PhD, 1969, California Institute of Technology; glaciology, glacier and ice sheet dynamics.

Smith, Stewart W. \* 1970, (Emeritus); PhD, 1961, California Institute of Technology; seismology, earthquake risk, seismotectonics.

Untersteiner, Norbert \* 1957, (Emeritus); PhD, 1950, University of Innsbruck (Austria); air-sea-ice interaction, polar climatology, sea ice physics.

Waddington, Edwin D. \* 1984; PhD, 1981, University of British Columbia (Canada); glacier and ice sheet modeling, interpretation of ice sheet stratigraphy.

Warren, Stephen G. \* 1981; MA, 1969, PhD, 1973, Harvard University; atmospheric radiation, radiative properties of clouds, snow, and sea ice, Antarctic climate.

Whipple, Elden C. 1995, (Affiliate); PhD, 1965, George Washington University; magnetospheric physics, spacecraft-plasma interactions, kinetic theory of plasmas.

### Associate Professors

Conway, Howard B. \* 1987, (Research); PhD, 1986, University of Canterbury (New Zealand); glaciology with emphasis on physical process in snow and ice.

McCarthy, Michael P. \* 1978, (Research); PhD, 1988, University of Washington; plasma physics in space, especially processes that accelerate or heat charged particles.

Mercer, James A. \* 1968, (Research); PhD, 1983, University of Washington; ocean weather and climate change, acoustic tomography, seismoacoustics.

Odom, Robert I. Jr. \* 1990, (Research); PhD, 1980, University of Washington; ocean acoustics, theoretical seismology, wave propagation and scattering.

Qamar, Anthony \* 1983, (Research); PhD, 1971, University of California (Berkeley); earthquakes associated with volcanoes and glaciers, earth-structure and earthquake hazards.

Sahr, John D. \* 1991, (Adjunct); PhD, 1990, Cornell University; radar remote sensing, ionospheric physics; signal processing; wireless communications.

Unsworth, Martyn J. \* 1993, (Research); PhD, 1991, Cambridge University (UK); geomagnetic induction, magnetotellurics, electromagnetic geophysics.

Wilcock, William S. D. \* 1993, (Adjunct); PhD, 1992, Massachusetts Institute of Technology; marine seismology, dynamics of mid-ocean ridges, geological fluid dynamics.

Winglee, Robert M. \* 1991; PhD, 1984, University of Sydney (Australia); energetic phenomena in sun/earth plasmas, excitation of waves, high energy particle acceleration.

### Assistant Professors

DeCosmo, Janice M. 1984, (Affiliate); PhD, 1991, University of Washington; atmosphere-ocean interaction, boundary layer processes, science education, educational technology.

Swanson, Brian \* 1982, (Research); PhD, 1992, University of Washington; atmospheric geophysics, condensed-matter physics, physics of ice.

Willett, Sean D. \* 1998, (Adjunct); PhD, 1988, University of Utah; numerical modeling of lithospheric processes.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsccat/](http://www.washington.edu/students/crsccat/).

**GPHYS 401 Geophysical Continuum Mechanics (3) NW** Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the earth's lithosphere. Creep of solids and flow of geological materials. Prerequisite: either MATH 136 or both MATH 307 and MATH 308. Offered: A.

**GPHYS 402 Seismology (3) NW** Introduction to theoretical and observational seismology. Elastic plane wave propagation through stratified media. Surface waves, eigenvibrations, ray theory. Structure of the Earth's mantle and core. Seismicity distributions, earthquake focal mechanisms and relationship to tectonics. Prerequisite: GPHYS 401; recommended: concurrent registration in GPHYS 432. Offered: W.

**GPHYS 403 Geophysics: The Earth (3) NW** The earth and its interior; gravity, magnetism, heat flow, seismology. Earth's outer structure, studied through the unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Prerequisite: GPHYS 402; PHYS 322. Offered: Sp.

**GPHYS 404 Geophysics: Fluids (3) NW** Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Prerequisite: either MATH 136 or both MATH 307 and MATH 308; PHYS 322. Offered: A.

**GPHYS 405 Space and Plasmas (3) NW** Survey of various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Prerequisite: PHYS 321. Offered: W.

**GPHYS 406 Geophysics: The Atmosphere (3) NW** Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Prerequisite: GPHYS 404. Offered: Sp.

**GPHYS 415 Principles of Glaciology (3) NW** *Hallet, Raymond, Waddington, Warren* Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow and erosion, ice sheets, sea ice, frozen ground, methods of paleoclimate reconstruction, Ice Age theories. Offered: jointly with GEOL 415; A.

**GPHYS 425 NASA Science and Engineering Research Seminar (1, max. 4) NW** *DeCosmo* Review of current space science-related research. Emphasis varies, but topics may include planetary geology, astronomy, global change, aeronautical engineering, and remote sensing. Credit/no credit only. Offered: Sp.

**GPHYS 431 Seismology and Earthquake Engineering (3) NW** Overview of earthquake processes and details of the characteristics of destructive ground motion; effects of such motion on engineering structures; current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either MATH 136 or both MATH 307 and MATH 308. Offered: jointly with CEE 431.

**GPHYS 432 Applied Seismology (2) NW** *Qamar* Interpretation methods in seismology. Seismogram interpretation, including body and surface waves. Seismic instrumentation. Earthquake location, magnitude, and fault-plane solutions. Seismic reflection and refraction methods. Measurement and interpretation of strong ground motion near the epicenter of large earthquakes. Recommended: concurrent registration in GPHYS 402. Offered: W.

**GPHYS 435 Seismic Exploration (5) NW** *Brown* Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: GEOL 392; either MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with GEOL 435; Sp.

**GPHY 458 Volcanic Processes (3) NW** *Bergantz, Nelson, Newhall, Qamar* Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruptive phenomena, syn- and post eruption lahars and other re-working of deposits. Prerequisite: GEOL 391 or GEOL 392. Offered: Sp.

**GPHY 460 Water in the Environment (3) NW** *Baker, Raymond, Waddington, Warren* Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136 and PHYS 123; PHYS 133. Offered: jointly with ATM S 460 and PHYS 460. Offered: A.

**GPHY 480 Special Topics in Geophysics (2-6, max. 12) NW** Intensive treatment of a selected geophysical topic presented through faculty lectures, guest lectures, and student reports. For students in geophysics and related fields. Subject varies from year to year. Offered: A/WSp.

### Courses for Graduates Only

**GPHY 501 Geophysical Continuum Mechanics (3)** Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the earth's lithosphere. Creep of solids and flow of geological materials. Includes advanced, research-oriented problems. Prerequisite: MATH 307 and MATH 308 or equivalent. Offered: A.

**GPHY 502 Seismology (3)** Theoretical and observational seismology. Elastic plane wave propagation through stratified media. Surface waves, eigenvibrations, ray theory. Structure of Earth's mantle and core. Seismicity distributions, earthquake focal mechanisms and relationship to tectonics. Advanced, research-oriented problems. Prerequisite: GPHY 501; recommended: concurrent registration in GPHY 432. Offered: W.

**GPHY 503 Geophysics: The Earth (3)** Study of gravity, magnetism, heat flow, seismology. Earth's outer structure studied through unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Includes advanced, research-oriented problems. Prerequisite: GPHY 502 and PHYS 322. Offered: Sp.

**GPHY 504 Geophysics: Fluids (3)** Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322, MATH 307 and MATH 308 or equivalent. Offered: A.

**GPHY 505 Geophysics: Space (3)** Various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Includes advanced, research-oriented problems. Prerequisite: PHYS 321 or equivalent. Offered: W.

**GPHY 506 Geophysics: The Atmosphere (3)** Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Includes advanced, research-oriented problems. Prerequisite: GPHY 504. Offered: Sp.

**GPHY 510 Physics of Ice (3)** *Raymond* Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Prerequisite: permission of instructor. Offered: jointly with ATM S 510; alternate years.

**GPHY 511 Formation of Snow and Ice Masses (3)** *Warren* Snow and ice climatology. Formation of the ice crystals in clouds. Snow metamorphism. Transfer of radiative, sensible, and latent heat at snow and ice surfaces. Remote sensing of snow and ice. Growth and melt of sea ice. Climatic records from ice. Prerequisite: permission of instructor. Offered: jointly with ATM S 511; alternate years.

**GPHY 512 Dynamics of Snow and Ice Masses (3)** *Raymond* Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512; odd years.

**GPHY 513 Structural Glaciology (3)** *Raymond* Physical and chemical processes in snow, stratigraphy, and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism of ice from flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between structures and bulk physical properties. Prerequisite: permission of instructor. Offered: jointly with ATM S 513; even years.

**GPHY 514 Ice and Climate Modeling (3)** *Warren* Principles of global climate modeling. Modeling seasonal cycles of snow cover and sea ice. Ice-sheet mass balance and flow. Solar radiation anomalies due to changes in earth's orbit. Climate/ice-sheet models of Pleistocene ice ages. Prerequisite: permission of instructor. Offered: jointly with ATM S 514; alternate years.

**GPHY 518 Introduction to Geophysical Research (1-2, max. 4)** Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results. Offered: A/WSp.

**GPHY 519 Geophysical Research Methods (2, max. 12)** Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students. Offered: A/WSp.

**GPHY 520 Seminar (1, max. 15)** Review of current literature in geophysics and graduate student research with faculty participation. Credit/no credit only. Offered: A/WSp.

**GPHY 522 Atmospheric Electrical Dynamics (3)** *Holzworth* Global and local dynamic electric field models, including upper atmospheric and tropospheric sources as modified by propagation delays, orographic features, and transient phenomena. Radiation and plasma waves along with microphysics of corona discharge and charge separation mechanisms. Prerequisite: GPHY 405 and GPHY 406, or permission of instructor. Offered: A.

**GPHY 523 Introduction to Solar-Terrestrial Physics (3)** *Holzworth* Introduces the student to several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisite: PHYS 321, PHYS 322, PHYS 323 or permission of instructor. Offered: Sp.

**GPHY 532 Atmospheric Radiation: Shortwave (3)** *Warren* Principles of radiative transfer in planetary atmospheres with emphasis on single and multiple scattering of visible and infrared radiation. Applications to atmospheric and surface energy balance and remote sensing. Prerequisite: PHYS 323 or permission of instructor. Offered: jointly with ATM S 532; alternate years.

**GPHY 533 Atmospheric Radiation: Longwave (3)** *Leovy, Warren* Principles of radiative energy exchange in planetary atmospheres with emphasis on emission and absorption of infrared and microwave radiation. Applications to atmospheric and surface energy balance and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: jointly with ATM S 533.

**GPHY 534 Remote Sensing of the Atmosphere and Climate System (3)** *Leovy, Warren* Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications for research. Prerequisite: GPHY 532 and GPHY 533. Offered: jointly with ATM S 534.

**GPHY 535 Cloud Microphysics and Dynamics (3)** *Baker, Houze* Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535; W.

**GPHY 537 Space and Laboratory Plasma Physics (3)** *Holzworth, Parks, Winglee* Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: GPHY 405 or equivalent or permission of instructor. Offered: jointly with A A 556; Sp.

**GPHY 538 Advanced Space Plasma Physics (3)** *Holzworth, Parks, Winglee* Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: GPHY 405 or permission of instructor. Offered: A.

**GPHY 539 Kinetic Theory and Simulation of Space Plasmas (3)** *Winglee* Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves to Alfvén waves. Beam, Weibel, and masers instabilities, heavy ion interactions. Particle simulations, electrostatic and electromagnetic, for non-linear wave evolution and particle heating. Offered: even years; W.

**GPHY 540 Observational Seismology (1, max. 18)** *Creager, Crosson, Malone, Qamar* Quarterly research themes introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no credit only. Prerequisite: GPHY 402 or GPHY 502 or permission of instructor. Offered: A/WSp.

**GPHY 541 Theoretical Seismology I (3)** *Creager, Crosson* Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: GPHY 402 or GPHY 502 or permission of instructor. Offered: even years; Sp.

**GPHY 542 Theoretical Seismology II (3)** *Creager, Crosson* Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: GPHY 541. Offered: even years; A.

**GPHYS 543 Low-Frequency Seismology (3)**

*Creager* Represent seismic displacement field, including surface and body waves, as superposition of normal modes. Rigorous development of equations of motion, their solution, energy integrals, Rayleigh's Principle, perturbation theory, attenuation, and excitation formulae. Moment-tensor representation of seismic sources. Prerequisite: GPHYS 402 or GPHYS 502 or permission of instructor. Offered: odd years; Sp.

**GPHYS 545 Physics of the Oceanic Lithosphere I (3)**

Physical processes responsible for the formation and evolution of the oceanic lithosphere. Thermodynamic mechanisms of mantle creep; fluid dynamics of mantle flow, decompressional melting, formation of oceanic crust, and cooling of the oceanic lithosphere. Prerequisite: GPHYS 501 and GPHYS 504 or permission of instructor. Offered: jointly with OCEAN 545.

**GPHYS 546 Physics of the Oceanic Lithosphere II (3)**

Physical processes responsible for the formation and evolution of the oceanic lithosphere. Rheology, fault mechanics, plate flexure, marine gravity, the relationship between gravity and topography, magnetic properties of ocean crust, and character of marine magnetic anomalies. Prerequisite: GPHYS 545 or permission of instructor. Offered: jointly with OCEAN 546.

**GPHYS 551 Marine Seismology (3)**

Practical application of seismic techniques to the study of the ocean basins. Analysis of refraction data, multichannel reflection profiling, surface wave studies, and earthquake analysis. Prerequisite: GPHYS 502 or permission of instructor. Offered: jointly with OCEAN 551.

**GPHYS 555 Planetary Atmospheres (3)**

*Leovy* Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all planetary atmospheres; roles of radiation, chemistry, and dynamic processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar-system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ATM S 555; alternate years.

**GPHYS 556 Planetary Surfaces (3)**

Comparison of surface processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and the implied course of solar-system evolution. Analysis of data from earth-based telescopes and manned and unmanned space missions. Offered: jointly with ASTR 556/GEOL 556; odd years; Sp.

**GPHYS 557 Origin of the Solar System (3)**

*Brownlee* Nebular and nonnebular theories of solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557/GEOL 557; W.

**GPHYS 561 Computational Methods and Modeling in Geophysics I (3)**

*Winglee* Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects. Offered: odd years, W.

**GPHYS 562 Computational Methods and Modeling in Geophysics II (3)**

*Winglee* Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects. Offered: odd years, Sp.

**GPHYS 563 Geophysical Data Collection and Analysis (3)**

*Crosson* Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system. Offered: A.

**GPHYS 564 Geophysical Inverse Theory (3)**

*Booker* Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Prerequisite: GPHYS 563 or permission of instructor. Offered: odd years; Sp.

**GPHYS 571 Geodynamics (3)**

Advanced study of various aspects of the dynamics of the solid Earth. Topics may include plate tectonics, mantle convection, rotational dynamics, post-glacial rebound, fault mechanics, and geodetic measurement of crustal deformation. Offered: odd years.

**GPHYS 572 Geomagnetism (3)**

*Merrill* Advanced aspects of earth magnetism intended for specialists in this field. Extensive discussion of origin theories and their implications; physical basis and theories of magnetism in rocks; paleomagnetic techniques and results. Prerequisite: permission of instructor. Offered: even years.

**GPHYS 573 Mineral Physics (3)**

*Brown, Merrill* Applications of solid-state physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor. Offered: alternate years.

**GPHYS 574 Electromagnetic and Potential Field Methods (3)**

*Booker* Development of equations of electromagnetic fields in conducting media. Solution of forward and inverse problems with natural and controlled sources: magnetotelluric and related methods. Includes the special case of static fields: DC resistivity, gravity, and magnetic interpretation. Prerequisite: GPHYS 403 or GPHYS 503, GPHYS 563 and PHYS 323 or permission of instructor. Offered: even years; W.

**GPHYS 575 Physics and Chemistry of the Earth's Interior (3)**

*Brown, Creager, Irving, Merrill* Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of subducted lithosphere and geochemical constraints on mantle convection. Prerequisite: permission of instructor. Offered: jointly with GEOL 575; A.

**GPHYS 580 Special Topics in Geophysics (2-6, max. 12)**

Intensive treatment of a selected topic in geophysics presented by lectures or seminars for students in geophysics and related special fields. Subject is selected from all areas in geophysics and varies from year to year. Prerequisite: permission of instructor. Offered: A/WSp.

**GPHYS 600 Independent Study or Research (\*)**

Offered: A/WSpS.

**GPHYS 700 Master's Thesis (\*)**

Offered: A/WSpS.

**GPHYS 800 Doctoral Dissertation (\*)**

Offered: A/WSpS.

## Germanics

340C Denny

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/germanics.html](http://www.washington.edu/students/genecat/academic/germanics.html)

Department Web page:  
[depts.washington.edu/uwgerman/](http://depts.washington.edu/uwgerman/)

The Department of Germanics focuses on the language, literature, and civilization of the German-speaking countries; on the role of their history, literature, and philosophy in Western civilization; and on linguistic analysis, especially historic, of the Germanic languages.

## Graduate Program

Graduate Program Coordinator  
345 Denny, Box 353130  
(206) 543-6025  
[uwgerman@u.washington.edu](mailto:uwgerman@u.washington.edu)

The Department of Germanics offers a closely integrated program leading to the Master of Arts and Doctor of Philosophy degrees. The doctoral curriculum serves the needs of the future professors at universities and colleges, stressing scholarship and research. The master's curriculum requires a minimum of 40 credits, a final comprehensive examination, and two papers. The study period of the doctoral program is two years (minimum number of post-master's credits is 60). The completion of the necessary course work is followed by general written and oral examinations. A third doctoral year is reserved for the writing of the dissertation.

The M.A. and Ph.D. programs concentrate on German literature, civilization, and philosophical traditions, with an option to include Germanic linguistics and courses outside the department. The doctoral dissertation must be an original contribution to scholarship and must demonstrate mastery of the pertinent methods of investigation.

The Department of Germanics also participates in the joint-doctoral program in literature and critical theory. Study in this program leads to a Ph.D. in Germanics and Critical Theory. For details see the program description under Comparative Literature.

## Special Requirements

Aspirants for advanced degrees in German must have the equivalent of an undergraduate major in German. A reading knowledge of one foreign language (usually German) is a prerequisite for the M.A. degree. Reading knowledge of a second language is required before the student is admitted to the Ph.D. General Examination. The languages chosen are subject to approval by the department.

## Financial Aid

A limited number of teaching assistantships and fellowships are available. The teaching load consists of a five-hour course on the first- or second-year level. The teaching assistants are supervised by experienced faculty members.

## Faculty

### Chair

Richard T. Gray

### Professors

Ammerlahn, Hellmut H. \* 1968; PhD, 1965, University of Texas (Austin); Goethe, eighteenth to early twentieth century, comparative literature.

Barrack, Charles M. \* 1968; PhD, 1969, University of Washington; Germanic linguistics.

Behler, Diana I. \* 1971; PhD, 1970, University of Washington; romanticism, nineteenth century, comparative literature.

Brown, Jane K. \* 1988; PhD, 1971, Yale University; seventeenth, eighteenth and nineteenth century, comparative literature.

Gray, Richard T. \* 1991; PhD, 1981, University of Virginia; eighteenth-, nineteenth- and early twentieth-century literature, literary sociology, critical theory.

Hertling, Gunter H. \* 1961, (Emeritus); PhD, 1963, University of California (Berkeley); eighteenth- and nineteenth-century literature.

Hruby, Antonin F. \* 1961, (Emeritus); PhD, 1946, Charles University (Czechoslovakia); medieval literature, comparative literature.

Jaeger, C. Stephen \* 1985; PhD, 1970, University of California (Berkeley); medieval German and Latin literature, medieval intellectual history, comparative literature.

Rey, William H. 1950, (Emeritus); PhD, 1937, University of Frankfurt (Germany); nineteenth and twentieth century German literature.

Voyles, Joseph B. \* 1965; PhD, 1965, Indiana University; Germanics and linguistics.

Wilke, Sabine \* 1988; PhD, 1986, University of Mainz (Germany); critical theory, contemporary theatre and film, literature and philosophy.

### Associate Professors

Bansleben, Manfred \* 1988; PhD, 1979, University of Vienna (Austria); German language and methodology, history, culture studies.

McLean, Sammy K. \* 1967, (Emeritus); PhD, 1963, University of Michigan; Western drama, twentieth-century poetry, psychoanalysis and literature, literary translation, comparative literature.

Prutti, Brigitte \* 1991; DPhil, 1988, University of Graz (Austria); PhD, 1995, University of California (Irvine); eighteenth-century literature, twentieth-century Austrian literature, theory and history of drama.

Rabura, Horst M. \* 1961, (Emeritus); MA, 1966, University of Washington; German language and methodology.

Sauerlander, Anne M. 1949, (Emeritus); PhD, 1936, Cornell University; Germanics.

### Assistant Professor

Ostmeier, Dorothee \* 1993; PhD, 1993, Johns Hopkins University; eighteenth and twentieth century literature and philosophy, critical theory, German studies.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**GERMAN 401 Advanced Writing and Conversation (3-5) VLPA** Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

**GERMAN 403 Advanced Writing and Conversation (3-5) VLPA** Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

**GERMAN 406 Intensive Elementary Yiddish (5-15, max. 15)** Intensive study of Yiddish grammar, with oral and written drills and reading of selected texts. Offered: S.

**GERMAN 411 Studies in Medieval Literature and Culture (5) VLPA** Rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 412 Studies in Renaissance and Baroque Literature and Culture (5) VLPA** Rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 421 Studies in Eighteenth-Century Literature and Culture (5) VLPA** Rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 422 Studies in Nineteenth-Century Literature and Culture (5) VLPA** Rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 423 Studies in Twentieth-Century Literature and Culture: (5) VLPA** Rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 444 Undergraduate Thesis in Germanics (5) VLPA** Supervised research leading to the writing of a research thesis.

**GERMAN 445 Undergraduate Honors Thesis in Germanics VLPA (5)** Supervised research for honors students leading to the writing of an honors thesis.

**GERMAN 446 Internship in German (2-5, max. 10)** Prerequisite: 6 credits of upper-level German language courses. Credit/no credit only.

**GERMAN 447 Undergraduate Research (1-5, max. 15)** Supervised research with faculty member. Offered: AWSpS.

**GERMAN 451 Linguistic Analysis of German (5) VLPA** Recommended: GERMAN 203 Offered: A.

**GERMAN 452 History of the German Language (5) VLPA** From early Germanic to the present. Recommended: GERMAN 203 Offered: W.

**GERMAN 490 Contemporary German Literature (5) VLPA** Interpretation of selected works by contemporary German authors. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

**GERMAN 493 Special Topics in German Culture (5) VLPA/IS** Recommended: GERMAN 303; either GERMAN 322 or GERMAN 323.

**GERMAN 494 Studies in German Poetry (5) VLPA** Introduction to various methods of interpretation and to their practical application. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

**GERMAN 495 Proseminar in German Literature (5, max. 15) VLPA** Special topics, the subject matter and depth of which are not included in other literature courses, arranged through consultation among students and faculty members.

**GERMAN 496 History of Germanic Philology (5) VLPA** Introduction to the works of outstanding scholars in the field of Germanics.

**GERMAN 497 Studies in German Literature (1-6, max. 15)**

**GERMAN 498 Studies in the German Language (1-6, max. 15)**

**GERMAN 499 Studies in German Culture (1-6, max. 15)**

## Courses for Graduates Only

**GERMAN 500 Literary Theory, Methodology, and Bibliography (5)** Historical survey and analysis of criticism (*Methodengeschichte*) and modern trends in contemporary theory. Methods of research and bibliography, as well as theoretical aspects of practical interpretation.

**GERMAN 501 Proseminar in Methods and Writing (5)** Introduction to research methods, presentation of research, scholarly writing, and general poetological issues. Each year a different special topic is chosen as a focus for students' research in the course.

**GERMAN 503 Contemporary German Literature (5, max. 15)** Seminar analyzing the esthetic movements and thought of contemporary German literature, the social and political problems dealt with in the works of representative authors, and major experimental concepts. Some previous exposure to the German literature and civilization after 1945 is expected.

**GERMAN 504 Special Studies in Literary Criticism and Theory (5, max. 15)** Literary criticism and theory, focusing on special topics proposed by the instructor. Taught in English. Prerequisite: GERMAN 500 or equivalent.

**GERMAN 510 Studies in Medieval Literature and Culture (5, max. 15)** Seminar on rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems.

**GERMAN 511 Studies in Renaissance and Baroque Literature and Culture (5, max. 15)** Seminar on rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems.

**GERMAN 512 Studies in Eighteenth-Century Literature and Culture (5, max. 15)** Seminar on rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems.

**GERMAN 514 Studies in Nineteenth-Century Literature and Culture (5, max. 15)** Seminar on rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems.

**GERMAN 516 Studies in Twentieth-Century Literature and Culture (5, max. 15)** Seminar on rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems.

**GERMAN 518 Foreign Language Teaching Methodology (2)** *Brandl* Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with ASIAN 518/NEAR E 518/SCAND 518/SLAV 518.

**GERMAN 525 Seminar in Romanticism (5, max. 15)**

**GERMAN 526 Seminar in Nineteenth-Century Drama (5, max. 15)**

**GERMAN 527 Seminar in Nineteenth-Century Prose (5, max. 15)**

**GERMAN 528 Nineteenth-Century Poetry (5, max. 15)** Representative selections from Hölderlin, the late Goethe, and from prevalent trends in nineteenth-century poetry, such as romanticism, "Young Germany," poetic realism, and the experimental poetry of naturalism.

**GERMAN 529 Studies in Literature 1870-1920 (5, max. 15)** Seminar on rotating special topics drawn from the period 1870-1920, such as particular movements, authors, genres, themes, or problems.

**GERMAN 533 Seminar in Eighteenth-Century Literature (5, max. 15)** Study of one or more of the literary movements: Enlightenment, sentimentalism, anacreontics, storm and stress, classicism, early romanticism, and works by principal authors such as Gottsched, Bodmer, Gellert, Lessing, Wieland, Klopstock, Herder, Lenz, Goethe, Schiller, Jean Paul.

**GERMAN 534 Storm and Stress (5, max. 15)** Extensive investigation of poetological and esthetic concepts advanced by initiators and exponents of German storm and stress. Analyses of narrative and dramatic works of storm and stress reveal reflections and implementations of the new theoretical concepts.

**GERMAN 535 Classicism: Goethe, Schiller (5, max. 15)**

**GERMAN 537 Studies in Literature 1770-1830 (5, max. 15)** Seminar on rotating special topics drawn from the period 1770-1830, such as particular movements, authors, genres, themes, or problems.

**GERMAN 540 Twentieth-Century Poetry (5, max. 15)** Development of German poetry from Rilke, Hofmannsthal, and George through Trakl, Benn, the Expressionists and the Dadaists, Brecht, and Enzensberger, to such contemporaries as Eich, Heissenbüttel, the concrete poets, Celan, and Bachmann.

**GERMAN 541 Twentieth-Century German Drama (5, max. 15)** Selection from modern German drama representative of the concern with the human condition, of social criticism, and of experimentation with the new dramatic forms.

**GERMAN 542 Twentieth-Century Prose (5, max. 15)** Selected modern German novels, short novels, and short stories by representative authors dealing with the social and political problems of Germany as well as with individual problems of existence and identity.

**GERMAN 550 Gothic (5)**

**GERMAN 551 Seminar in Germanic Philology and Linguistics (5, max. 15)** Topics vary. Prerequisite: basic knowledge of German and at least one elementary linguistics course.

**GERMAN 552 Old High German (5)**

**GERMAN 555 Old Saxon (5)**

**GERMAN 556 Middle High German (5)**

**GERMAN 558 Middle High German Literature (5)**

**GERMAN 560 Modern Dialects (5)**

**GERMAN 565 Seminar in Courtly Epic (5)** Aspects and methods of literary analysis pertaining to the study of medieval courtly epics.

**GERMAN 566 Late Middle High German Narrative (3)**

**GERMAN 567 Minnesang (3)** In-depth study of medieval German lyrics in the context of German and European literary and intellectual development. Poems of the period from Kurenberger through Walther are analyzed with stress on grammatical, formal, stylistic, and ideological interpretation. Prerequisite: adequate knowledge of Middle High German.

**GERMAN 568 Seminar in Heroic Epic (5)** Literary and historic problems of the German heroic epic, with special emphasis on the *Nibelungenlied* and the *Dietrichsepik*.

**GERMAN 575 Teaching of German Literature and Civilization (3)** Teaching of German language and literature on the advanced level in secondary schools and colleges. Credit/no credit only.

**GERMAN 576 Modern Methods and Materials in Teaching German (3)** The audiolingual method and its application; current developments in foreign-language teaching; evaluation of teaching materials. Credit/no credit only.

**GERMAN 580 Seminar in German Literature (5, max. 15)** Open topics seminar with varying content.

**GERMAN 581 Seminar in Poetry (5, max. 15)** Open topics seminar with varying content.

**GERMAN 582 Seminar in Drama (5, max. 15)** Open topics seminar with varying content.

**GERMAN 583 Seminar in Prose (5, max. 15)** Open topics seminar with varying content.

**GERMAN 590 Philosophical Issues in German Culture (5, max. 15)** Seminar on rotating special topics dealing with the impact of particular thinkers, movements, or philosophical problems in German culture.

**GERMAN 591 Studies in German Intellectual History (5, max. 15)** Seminar on rotating special topics dealing with interactions of history, literature, and culture in the German tradition.

**GERMAN 592 Cultural Studies (5, max. 15)** Seminar on rotating special topics dealing with periods, themes, or particular problems in German life and culture.

**GERMAN 600 Independent Study or Research (\*)**

**GERMAN 700 Master's Thesis (\*)**

**GERMAN 800 Doctoral Dissertation (\*)**

## History

315 Smith

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/history.html](http://www.washington.edu/students/genecat/academic/history.html)

Department Web page:  
[depts.washington.edu/clio/](http://depts.washington.edu/clio/)

History undertakes the study of human affairs in a manner that seeks to understand change and development rather than the state of things at a given moment, taking into account societies in diverse parts of the world from the earliest times for which written records exist to the present.

## Graduate Program

Graduate Program Coordinator  
206C Smith, Box 353560  
(206) 543-8291  
[histgrad@u.washington.edu](mailto:histgrad@u.washington.edu)

The Department of History offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in a large number of fields within the discipline. Students in the programs prepare for careers as college teachers who combine teaching with scholarship and professional writing. A few graduates enter government service, college administration, or publishing. The M.A. program is normally completed in four or five full-time academic quarters or their equivalent. The Ph.D. program requires at least three years of full-time work beyond the M.A. degree. Graduate training at both levels includes (1) course work and independent study leading to examinations in special historical fields, and (2) sustained investigation and interpretation of historical problems in seminars involving the writing of essays. A dissertation must be prepared for the Ph.D.

## Special Requirements

Admission to the graduate program requires a sound undergraduate major in history or in one of the basic disciplines related to history completed within a college of liberal arts and sciences. The department also requires evidence of the applicant's ability to write cogently and lucidly and to interpret historical data.

## Financial Aid

Beginning graduate students may qualify for a limited number of fellowships, readerships, and work-study assistantships. Students with, or who expect to receive, the M.A. degree by the time they begin their duties may apply for teaching assistantships and may, with continued satisfactory scholarly progress, expect reappointment for a total of three years, provided adequate funds are available.

## Faculty

### Chair

Robert C. Stacey

### Professors

Alden, Dauril \* 1959; MA, 1952, PhD, 1959, University of California (Berkeley); Latin American history, colonial history.

Bacharach, Jere L. \* 1967; MA, 1962, Harvard University; PhD, 1967, University of Michigan; history of the Middle East, Islam.

Barlow, Tani E. \* 1994, (Adjunct); MA, 1979, PhD, 1985, University of California (Davis); history of modern China, gender studies, feminist theory, historiography.

Behlmer, George K. \* 1979; MA, 1972, PhD, 1977, Stanford University; modern Britain, social history of family.

Benson, Keith R. \* 1981, (Adjunct); MA, 1973, PhD, 1979, Oregon State University; history of modern American biology, marine biology, and evolutionary biology.

Bergquist, Charles W. \* 1989; MA, 1968, PhD, 1973, Stanford University; modern Latin American history, labor history.

Bridgman, Jon M. \* 1961, (Emeritus); PhD, 1960, Stanford University; modern European history (especially military).

Butow, Robert J. C. \* 1960, (Emeritus); PhD, 1953, Stanford University; East Asian diplomatic history.

Conlon, Frank F. \* 1968; PhD, 1969, University of Minnesota; history of India, modern South Asia.

Ebrey, Patricia B. \* 1997; PhD, 1975, Columbia University; early Imperial China, Song dynasty, social history.

Ellison, Herbert J. \* 1968; PhD, 1955, University of London (UK); modern Russian history.

Ferrill, Arthur L. \* 1964; PhD, 1964, University of Illinois; Ancient Rome, military history.

Findlay, John M. \* 1987; PhD, 1982, University of California (Berkeley); history of the American West, Pacific.

Fowler, Wilton B. \* 1969; PhD, 1966, Yale University; U.S. foreign policy, diplomatic.

Gil, Carlos \* 1974; PhD, 1975, University of California (Los Angeles); Hispanics of the United States, Latin America.

Glenn, Susan A. \* 1993; PhD, 1983, University of California (Berkeley); twentieth-century U.S. social and cultural history including women's history.

Griffiths, Gordon 1959, (Emeritus); PhD, 1942, University of California (Berkeley); MA, 1946, Oxford University (UK); Renaissance and Reformation.

Hankins, Thomas L. \* 1964; PhD, 1964, Cornell University; history of science.

Hanley, Susan B. \* 1970, (Adjunct); PhD, 1971, Yale University; premodern Japanese history.

Johnson, Richard R. \* 1972; PhD, 1972, University of California (Berkeley); early American history, constitutional history.

Jonas, Raymond A. \* 1985; PhD, 1985, University of California (Berkeley); modern France.

Kirkendall, Richard S. \* 1988, (Emeritus); PhD, 1958, University of Wisconsin; twentieth-century US, agricultural.

Lebsock, Suzanne D. \* 1995; MA, 1973, PhD, 1977, University of Virginia; history of women, American social history, history of the American South.

Levy, Fred J. \* 1960; PhD, 1960, Harvard University; Tudor-Stuart England, English historiography.

McCormick, Richard L. \* 1995; PhD, 1976, Yale University; U.S. political history.

Palais, James B. \* 1968; PhD, 1968, Harvard University; Korean history.

Pease, Otis A. \* 1966, (Emeritus); PhD, 1954, Yale University; United States in the twentieth century.

Pressly, Thomas J. \* 1949, (Emeritus); PhD, 1949, Harvard University; nineteenth-century United States, Civil War and Restoration.

Pyle, Kenneth B. \* 1964; PhD, 1965, Johns Hopkins University; modern Japanese history.

Ramet, Sabrina P. \* 1983, (Adjunct); PhD, 1981, University of California (Los Angeles); politics and history of former Yugoslavia, East European religion and culture.

Rorabaugh, William J. \* 1976; PhD, 1976, University of California (Berkeley); United States social history, nineteenth-century US.

Saum, Lewis O. \* 1965, (Emeritus); PhD, 1962, University of Missouri; U.S. intellectual history.

Stacey, Robert C. \* 1988; PhD, 1983, Yale University; medieval.

Sullivan, Woodruff T. III \* 1973, (Adjunct); PhD, 1971, University of Maryland; radio astronomy, galactic and extragalactic structure, history of astronomy.

Taylor, Quintard \* 1995; MA, 1971, PhD, 1977, University of Minnesota; African American, American west.

Thomas, Carol G. \* 1964; PhD, 1965, Northwestern University; ancient Greece.

Toews, John E. \* 1979; PhD, 1973, Harvard University; European intellectual and cultural.

Ullman, Joan Connelly \* 1966, (Emeritus); PhD, 1963, Bryn Mawr College; modern Spain.

Walter, John C. \* 1989, (Adjunct); PhD, 1971, University of Maine; Afro-American studies; Afro-American, American, Caribbean immigrant, sport, and women's history.

White, Richard \* 1990, (Affiliate); PhD, 1975, University of Washington; American West, American Indian, environmental history.

Whorton, James C. \* 1970, (Adjunct); PhD, 1969, University of Wisconsin; history of medicine, public health, pharmacy and alternative healing.

Williams, Michael A. \* 1976, (Adjunct); PhD, 1977, Harvard University; early Christianity and religions of antiquity.

Wineburg, Samuel S. \* 1989, (Adjunct); PhD, 1990, Stanford University; educational psychology, cognitive psychology of school subjects, historical cognition.

#### Associate Professors

Felak, James R. \* 1989; PhD, 1989, Indiana University; Eastern European history.

Gamboa, Erasmo \* 1976, (Adjunct); MA, 1973, PhD, 1984, University of Washington; history, Pacific Northwest, Chicano and Latino, social, labor and immigration.

Gowing, Alain M. \* 1988, (Adjunct); PhD, 1988, Bryn Mawr College; Latin and Greek historiography, Latin literature of the Empire.

Gregory, James N. \* 1993; PhD, 1983, University of California (Berkeley); twentieth-century United States, race, politics, labor.

Guy, R. Kent \* 1980; PhD, 1981, Harvard University; late imperial China.

Hevly, Bruce W. \* 1989; PhD, 1987, Johns Hopkins University; history of technology and science.

Leiren, Terje I. \* 1977, (Adjunct); PhD, 1978, North Texas State University; Scandinavian history, nationalism, immigration, ethnicity, Norwegian language.

McKenzie, Robert T. \* 1988; PhD, 1988, Vanderbilt University; nineteenth-century United States, U.S. economic, civil war and reconstruction.

O'Neil, Mary R. \* 1983; PhD, 1982, Stanford University; Renaissance/Reformation, early modern Europe.

Salas, Elizabeth 1987, (Adjunct); MA, 1977, California State University, Los Angeles; PhD, 1987, University of California (Los Angeles); New Mexican history and politics, Chicana, Mexicana and Chicano history, minorities in the military.

Sears, Laurie J. \* 1989; PhD, 1986, University of Wisconsin; Southeast Asia, historiography.

Stacey, Robin C. \* 1988; PhD, 1986, Yale University; medieval history, Celtic.

Waugh, Daniel Clarke \* 1972; PhD, 1972, Harvard University; medieval Russian history.

Yee, Shirley J. \* 1988, (Adjunct); PhD, 1987, Ohio State University; U.S. women's history, African-American history, nineteenth-century U.S. social history.

Young, Glennys J. \* 1992; PhD, 1989, University of California (Berkeley); Imperial and Soviet Russia, religion, women.

#### Assistant Professors

Camp, Stephanie M. H. 1998; PhD, 1998, University of Pennsylvania; African American history.

Dong, Yue 1996, (Adjunct); MA, 1991, University of Oregon; PhD, 1996, University of California (San Diego); late 19th and 20th century China, social and cultural history, urban history, gender studies.

Harmon, Alexandra J. \* 1991, (Adjunct); PhD, 1995, University of Washington; history of U.S. race relations, American Indians, and legal culture.

Nash, Linda L. 1999, (Acting); MS, 1989, University of California (Berkeley); environmental, American west.

Poiger, Uta G. \* 1995; MA, 1990, PhD, 1995, Brown University; modern German history, European, women, gender, historiography.

Schmidt, Benjamin \* 1996; MA, 1988, PhD, 1994, Harvard University; early modern European history, the Netherlands.

Singh, Nikhil Pal \* 1999; PhD, 1995, Yale University; U.S. intellectual, African American, ethnicity and nationalism.

Thomas, Lynn M. \* 1997; MA, 1989, Johns Hopkins University; MA, 1993, Northwestern University; PhD, 1997, University of Michigan; Africa, cultural and social.

Walker, Joel T. 1997; PhD, 1998, Princeton University; late antiquity, Byzantine, early Middle Ages.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

## History

### HIST 412 Science and the Enlightenment (5) I&S

The role of science in relation to intellectual, social, economic, and religious forces in the eighteenth century, and growth of the international community in science during the same period.

### HIST 425 History of the British Empire and Commonwealth Since 1783 (5) I&S

Britain in the Caribbean, Africa, India, Southeast Asia, and the Pacific; and the settlement, economic development, and political evolution of Canada, Australia, New Zealand, and South Africa.

### HIST 449 Issues in Comparative Labor History (5)

**I&S** Role of labor in the modern world. Emphasis on the centrality of workers' struggles in the evolution of national societies on the conceptual, research, and expository strategies of contemporary students of the labor movement and on differences and relationships between labor in developed and underdeveloped countries.

**HIST 451 Eastern and Central Africa Since 1500 (5) I&S** Explores the history of Eastern and Central Africa from the period prior to the slave trade through European colonialism to the post-colonial present. Focuses on political, economic, and social change and continuity. Emphasis on understanding how various historical actors and historians have interpreted these processes.

**HIST 452 Southern Africa Since 1500 (5) I&S** Explores the history of Southern Africa from pre-colonial social institutions through European colonialism and industrialization to the post-apartheid present. Focuses on the interplay between race, class, ethnicity, and gender in the structuring of political relations. Emphasis on understanding how various historical actors and historians have interpreted these processes.

**HIST 455 Topics in African History (5) I&S** Explores important issues in the history and historiography of sub-Saharan Africa since 1500. Content varies. Possible topics include labor and the family; health and healing; and resistance, ethnicity, and nationalism.

**HIST 461 History of the Middle East: 622-1300 (5) I&S** Political and economic analysis of the period circa AD 600, preliminary to rise of Islam, to arrival of the Turks. Muhammad's teaching and impact; Islamization and Arabization.

**HIST 462 History of the Middle East: 1258-1798 (5) I&S** Conquests by successors of Ghengis Khan; creation in Egypt, Syria, and Iran of cavalry-based states; domination of political, social, and economic history by Ottoman and Safavid empires. The Napoleonic invasion.

**HIST 463 History of the Middle East Since 1789 (5) I&S** Critical issues and themes in the changing Middle East, including Westernization, growth of nationalism, Arab-Israeli dispute, Iranian revolution, and the role of Islam.

**HIST 467 Nations and States in the Modern World (5) I&S** Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by new nationalism, spreading into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with SIS 467.

**HIST 470 History of the Jews in the Twentieth Century (5) I&S** Historical experience of the Jews since World War I in Europe, North America, and the Middle East under the impact of three developments: growth of mass-based American Jewish community, destruction of Jewish life in Central and Eastern Europe, and creation of the State of Israel. Offered: jointly with SISJE 470.

**HIST 481 Economic History of Europe (5) I&S** Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 201. Offered: jointly with ECON 460.

**HIST 490 Senior Thesis (5, max. 10) I&S** Preparation of the senior thesis for the History and Science emphasis.

**HIST 491- Honors Historical Method (5-) I&S** The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

**HIST -492 Honors Historical Method (-5) I&S** The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

**HIST 495 History Internship (1-5, max. 10)** Off-campus independent fieldwork with a community agency in an apprenticeship or internship situation. Work to be jointly supervised by a member of the History Department and an on-site field supervisor.

**HIST 496- Public and Local History (5-) I&S** Reviews the nonacademic applications of history (museums, parks, business, archives, planning, policy-making, popular media). Includes directed research and writing on local topics in one applied setting. Students ordinarily undertake a lengthy research project in an internship-like role.

**HIST -497 Public and Local History (-5) I&S** Reviews the nonacademic applications of history (museums, parks, business, archives, planning, policy-making, popular media). Includes directed research and writing on local topics in one applied setting. Students ordinarily undertake a lengthy research project in an internship-like role.

**HIST 498 Colloquium in History (3-5, max. 15) I&S** Each seminar examines a different subject or problem. A quarterly list of the seminars and their instructors is available in the Department of History undergraduate advising office.

**HIST 499 Undergraduate Research (1-5, max. 15)**

### Courses for Graduates Only

**HIST 501 Ancient Greece and Rome: Writings and Interpretations (3-6, max. 6)** Study of historians, development of historical study as a distinct pursuit, focus of attention in historical scholarship in the ancient world and comparison with modern interpretation of antiquity.

**HIST 502 Medieval Europe: Writings and Interpretations (3-6, max. 6)** Study of historians, schools of history, and interpretations of medieval European history.

**HIST 504 Comparative Ethnicity and Nationalism (3)** Theoretical approaches to, and historical case studies of, the phenomena of ethnicity, nationalism, and ethnic conflict in the modern world. Emphasis on Europe and Asia.

**HIST 511 History of Science (3-6, max. 6)**

**HIST 512- Seminar in the History of Science (3-6, max. 6)-)**

**HIST -513- Seminar in the History of Science (-3-6, max. 6)-)**

**HIST 530 Comparative Colonialisms: Methodological and Conceptual Approaches (3)** Introduces students to the historiography of modern European/American colonialisms, focusing on Africa, Asia, and/or the Americas. Addresses methodological and conceptual issues by examining relationship between capitalism and colonialism; violence and routinization of colonial power; colonial categories of race, ethnicity, class, and gender; and resistance movements and nationalist politics.

**HIST 552 Field Course in African History (3)** Methodological and conceptual issues in African historiography, focusing on 1500 to the present. Examines topics including pre-colonial politics and economics, slavery and the slave trades, European conquest and colonization, resistance movements and nationalist politics, and post-colonial debates and dilemmas. Special attention to issues of gender, race, ethnicity, and class.

**HIST 561 Islamic History (3-6, max. 6)** Field course. Introduction to advanced study in the major periods and problems of Islam. Bibliographical guidance is stressed.

**HIST 562 Ottoman History (3-6, max. 6)** Field course. Introduction to the major periods and problems of Ottoman history, 1300-1914, by acquainting the student with the major works in at least two languages. An attempt is made to teach some use of Ottoman materials. A minor problem is investigated in detail by every student. Prerequisite: knowledge of at least one major language besides English (French, German, Russian, or other).

**HIST 563 Modern Near East (3-6, max. 6)** Field course introducing the student to the major periods and problems of Near Eastern history, 1798 to the present.

**HIST 571 Orientation to an Academic Career in History (3)** Course for prospective college and university history instructors, preparing them for the nonacademic aspects of their duties. Prerequisite: Master of Arts degree in history or permission of instructor.

**HIST 580 Gender and History (5)** Introduction to gender as category of historical analysis, examining the impact of feminist theory within the discipline of history. Course traces historiographical debates in women's and gender history and explores, through cross-cultural comparisons, how scholars have conceived the relationship between gender and categories such as class, race, ethnicity, and sexuality.

**HIST 590 Topics in History (3, max. 9)** Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

**HIST 595 Historical Practices (5)** Emphasizes the interrelatedness of theoretical issues and historical research. Students read works that encourage the rethinking of sources and their historical meaning and experiment with sources, methods, and questions in a set of practical assignments.

**HIST 598 Methods of Historical Research (5)** Exploration of new historical and scholarly techniques employed in historical research. Use of social science methodology and literary theory in the evaluation and interpretation of historical sources. Use of feminist theory, deconstruction, critical theory, and orality/literacy studies. Student research paper is based upon a chosen theoretical approach.

**HIST 600 Independent Study or Research (\*)**

**HIST 700 Master's Thesis (\*)**

**HIST 800 Doctoral Dissertation (\*)**

### History of the Americas

**HSTAA 401 American Revolution and Confederation (5) I&S** Causes of separation of the United States from the British empire; political theory of the Revolution; its military history; diplomacy of the Revolution; the Revolution as a social movement; intellectual aspects; readjustment after independence; the formation of the American union; the Constitution.

**HSTAA 404 New England: From the Foundings to the Civil War (5) I&S** New England from colonial beginnings to the region's emergence to national leadership in the mid-nineteenth century. Emphasis on Puritanism, the New England town, adjustment to empire, revolution and constitution making, the growth of party, abolitionism, the flowering of a regional culture, and the personalities who embodied these key themes and periods.

**HSTAA 409 American Social History: The Early Years (5) I&S** Survey of American society and institutions from the colonial era through the Civil War, with special attention to reform, labor, immigration, education, law enforcement and the city.

**HSTAA 410 American Social History: The Modern Era (5) I&S** Survey of American society and institutions from Reconstruction to the present with special attention to reform, poverty, social mobility, immigrant and ethnic groups, the city and law enforcement.

**HSTAA 411 The United States During the Era of Civil War and Reconstruction (5) I&S** Conflicting interests, ideologies, and ways of life in the United States from the 1840s to the 1870s.

**HSTAA 412 The Westward Movement, 1700-1850 (5) I&S** Anglo-American advance into interior of continental United States culminating in occupation of Far West. Rivalry with New France and New Spain in colonial period; role of federal government in westward expansion; land policy and land distribution; migration, settlement, and the pioneering experience; federal Indian policies and implementation; political evolution, urbanization, and economic development of trans-Appalachian West; shaping of national character and institutions.

**HSTAA 413 History of the Trans-Mississippi West (5) I&S** Anglo-American exploration, conquest, occupation, and exploitation of the trans-Mississippi West, with emphasis on economic development into the twentieth century. Considers wide range of developmental themes (social, political, cultural) in historiography of American West.

**HSTAA 414 The Canadian West, 1670-1990 (5) I&S** Examines the history of colonization and settlement of Canada's four westernmost provinces with emphasis on their economic, social, and Native history.

**HSTAA 416 American Law and the American Indian (3) I&S** Relationship between Indians and the United States from 1789 to the present. Significant constitutional, legislative, and judicial actions. Legal events explored within their political, military, social, and cultural contexts. Comparisons with other minority-group experiences. Offered: jointly with LAW 467.

**HSTAA 417 Indians in Western Washington History (3) I&S** *Harmon* Relations of Indians and non-Indians in the Puget Sound region, 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with AIS 425.

**HSTAA 420 Farmers in United States History (5) I&S** From pre-colonial practices to the modern agricultural system with emphasis on the demographic, geographic, and technological dimensions and their social, economic, and political implications.

**HSTAA 421 American Environmental History (5) I&S** American attitudes toward the natural environment. Impact of settlement on the major natural regions of the United States. Evolution of the conservation movement, including development of the national park system and national forest system and emergence of the ecological perspective.

**HSTAA 426 American Urban History Since 1870 (3/5) I&S** Development of American cities for the past century. Topics include physical development, immigration, politics, and changes in society and culture.

**HSTAA 431 American Politics and Society Since 1920 (5) I&S** Political, social, economic, and intellectual developments in the United States from 1920 to the present.

**HSTAA 432 History of Washington and the Pacific Northwest (5) I&S** Exploration and settlement; economic development; growth of government and social institutions; statehood.

**HSTAA 436 American Jewish History Since 1885 (5) I&S** Political, social, economic, religious history of American Jewish community from great eastern European migration to present. Integration of immigrant community into general American community; rise of nativism; development of American socialism; World War I and II; and reactions of American Jews to these events. Offered: jointly with SISJE 436.

**HSTAA 445 Economic History of the United States (5) I&S** Growth and development of the United States economy from the colonial period to the present. Follows the course of economic change, examines contemporary reactions, and analyzes implications for American society and politics.

**HSTAA 450 Class and Labor in American History (5) I&S** The history of workers and class formation from early industrialization to the present. Emphasizes the interaction of class with race, ethnicity, gender, and political culture within the context of American economic development. Explores the role of unions, labor politics, and radical movements.

**HSTAA 451 Constitution Making in America, 1776-89 (5) I&S** Intensive study of the framing of the Articles of Confederation, the state constitutions, the territorial ordinances, the United States Constitution of 1787, and the Bill of Rights. Class discussions and term paper, in addition to required attendance at lectures offered in 351, which cover the English and colonial backgrounds and developments to 1840. Credit cannot be received for both 351 and 451.

**HSTAA 454 The Intellectual History of the United States (5) VLPA/I&S** Lectures and discussions devoted to the development of the American mind, from historical beginnings to the present.

**HSTAA 456 The American Character (5) I&S** Explores prevailing explanations for the American character and tries to assess its historical consequences. Lectures, discussion, reading, reports.

**HSTAA 461 Diplomatic History of the United States, 1776-1901 (5) I&S** Foreign policy of the United States government prior to the twentieth century. Emphasis on international wars, territorial expansion, and the peculiarities of the American position in world politics.

**HSTAA 462 Diplomatic History of the United States, 1901-Present (5) I&S** Foreign policy of the United States government during the twentieth century. International wars and the other major episodes in diplomacy are emphasized.

**HSTAA 470 Colloquium in American History: the Progressive Era, 1900-1917 (5) I&S** The principal problems and themes of the Progressive Era, emphasizing political, economic, social, and cultural aspects.

**HSTAA 471 Colloquium in American History: the 1920s in America (5) I&S** Achievements and issues of the New Era; causes and consequences of the stock-market crash and Great Depression, with emphasis on political, economic, social, and cultural analysis.

**HSTAA 472 Colloquium in American History: Franklin D. Roosevelt and the New Deal (5) I&S** Analysis of the key political, economic, social, and cultural factors in the New Deal, including the role played by President Roosevelt.

**HSTAA 473 Colloquium in History: the American Experience in World War II (5) I&S** Problems and policies of the people of the United States and their government in World War II; the role of the United States in winning the war; impact of the war on American society.

**HSTAA 480 Labor and Popular Movements in Latin America (5) I&S** Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women's movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-English-language Latin American studies courses. Offered: jointly with SISLA 480.

**HSTAA 482 The History of Brazil: Colonial Period to the Present (5) I&S** Colonial foundations; the first and second empires; the old and new republics; current problems; prospects for the future.

**HSTAA 483 Southern South America (5) I&S** History of the four countries that form southern South America: Argentina, Uruguay, Paraguay, and Chile, focusing on economic, social, and political change in the nineteenth and twentieth centuries. Governments of Juan Perón in Argentina and Salvador Allende in Chile. Relations of the four countries with Europe and the United States.

**HSTAA 486 History of Mexico: Colonial Origins to 1822 (5) I&S** Political, social, and economic history of Mexico from its discovery by the Spanish to its independence from Spain.

**HSTAA 487 History of Mexico: 1822 to the Present (5) I&S** Political, social, and economic history of Mexico from its independence from Spain to the present.

**HSTAA 488 History of the Caribbean and Central America (5) I&S** Political, social, and economic history of principal countries in the Caribbean and Central America from their discovery to the present.

### Courses for Graduates Only

**HSTAA 501 American History: Early (3-6, max. 6)**

**HSTAA 503- Seminar in American History, Early (3-)** Research seminar in early American History, 1600-1875.

**HSTAA -504 Seminar in American History, Early (3-6, max. 12)** Research seminar in early American History, 1600-1875.

**HSTAA 512 American History: Western (3-6, max. 6)**

**HSTAA 513- Seminar in American History: Western (3-6, max. 12)-**

**HSTAA -514 Seminar in American History: Western (-3-6, max. 12)**

**HSTAA 516 Hispanics of the United States (3-6, max. 6)**

**HSTAA 517 Field Course in American Indian History (5)** Field-reading course. Survey of major problems and literature concerning indigenous peoples of North America and their descendents.

**HSTAA 521 American History: Writings and Interpretations, 1770-1870 (4-6)**

**HSTAA 522 American History: Writings and Interpretations Since 1870 (4-6)**

**HSTAA 524 American Social History Before 1860 (3-6, max. 6)** Field course. Survey of major problems and literature in American social history before 1860.

**HSTAA 525 American Social History After 1860 (3-6, max. 6)** Field course. Survey of major problems and literature in American social history after 1860.

**HSTAA 531 American History: Twentieth Century (3-6, max. 6)**

**HSTAA 532- Seminar in American History: Recent Period (3-6, max. 12)-**

**HSTAA -533- Seminar in American History: Recent Period (-3-6, max. 12)-**

**HSTAA -534 Seminar in American History: Recent Period (-3-6, max. 12)**

**HSTAA 549 Culture, Politics, and Power in Nineteenth-Century Black America (5) Camp** Canonical issues, problems, and topics in nineteenth-century black social history. Traces major developments during the period; engages historiographical debates; and explores methodological questions such as the intersection of social and cultural history, and the challenges and possibilities of writing the history of a people with few written records.

**HSTAA 550 African-American History to Reconstruction (5)** Comprehensive introduction to the major topics and writings in African-American history from the colonial era to 1900, including the inception of slavery, free Blacks, slave revolts, Black abolition, Blacks in the Civil War and Reconstruction, and the Black female role in the struggle for freedom.

**HSTAA 551 African-American History Since Reconstruction (5)** Comprehensive introduction to the major topics and writings in African-American history in the twentieth century, including Jim Crow era, Black Women's Movement, Harlem Renaissance, legal origins of Civil Rights Revolution, Second Reconstruction, and Politics of Cultural Pluralism.

**HSTAA 552- Graduate Seminar in African-American History (3-)** Research experiences and opportunities in African-American history. Provides students with skills and methodology to pursue advanced research in the field.

**HSTAA -553 Graduate Seminar in African-American History (-3)** Research experiences and opportunities in African-American history. Provides students with skills and methodology to pursue advanced research in the field.

**HSTAA 554 American History: Intellectual (3-6, max. 6)**

**HSTAA 555- Seminar: American Intellectual History ([3-6, max. 6]-)** Develops research and writing competence in American intellectual history. Prerequisite: permission of instructor or graduate program coordinator.

**HSTAA -556 Seminar: American Intellectual History (-[3-6, max. 6])** Develops research and writing competence in American intellectual history. Prerequisite: permission of instructor or graduate program coordinator.

**HSTAA 561 History of American Foreign Policy (3-6, max. 6)**

**HSTAA 562- Seminar in American Diplomatic History ([3-6, max. 6]-)**

**HSTAA -563 Seminar in American Diplomatic History (-[3-6, max. 6])**

**HSTAA 570 American Environmental History (5)** Readings in environmental history emphasizing theory, methodology, and principal themes in the field. Readings emphasize the environmental history of North America and the United States.

**HSTAA 581 Latin American History: Colonial Period (3-6, max. 6)**

**HSTAA 582 Latin American History: National Period (3-6, max. 6)**

**HSTAA 583- Seminar in Latin American History ([3-6, max. 12]-)** Problems of historical research in the history of Latin America from colonial beginnings to the present.

**HSTAA -584- Seminar in Latin American History (-[3-6, max. 12]-)** Problems of historical research in the history of Latin America from colonial beginnings to the present.

**HSTAA -585 Seminar in Latin American History (-[3-6, max. 12])** Problems of historical research in the history of Latin America from colonial beginnings to the present.

**HSTAA 590 Topics in American History (3, max. 9)** Seminar on selected topics in American history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

## Ancient and Medieval History

**HSTAM 401 Early Greece (5) I&S** Bronze and Dark Age Greece: realities of the heroic age of ancient Greece.

**HSTAM 402 Classical Greece (5) I&S** The classical civilization of ancient Greece, with special emphasis on the legacy of Greece to Western civilization.

**HSTAM 403 Alexander the Great and the Hellenistic Age (5) I&S** Rise of Macedonia, conquest of Near East by Alexander, and division into lesser kingdoms after Alexander's death. Special emphasis on fusion of cultures and change from city-state to world-state.

**HSTAM 405 Topics in Ancient History (5, max. 10) I&S** Select topics in the history of the ancient world, from the Neolithic Near East to the late Roman Empire. Offered by various faculty/instructors.

**HSTAM 411 The Early Roman Republic (3) I&S** Political, social, economic, and cultural history, with emphasis on the development of the constitution and territorial expansions.

**HSTAM 412 The Late Roman Republic (3) I&S** Political, social, and cultural history, with special emphasis on the period of Cicero and Caesar.

**HSTAM 413 The Early Roman Empire (3) I&S** Political, social, economic, and cultural history, with emphasis on the Julio-Claudians.

**HSTAM 414 The Late Roman Empire (3) I&S** Political, social, economic, and cultural history, with emphasis on the decline of ancient civilization.

**HSTAM 421 The Byzantine Empire (5) I&S** Political, social, economic, and cultural history of the eastern Roman Empire from the fourth to fifteenth centuries.

**HSTAM 431 Topics in Medieval History, 500-1000 (5) I&S** Study in depth of one or more topics in the history of Europe during the early Middle Ages.

**HSTAM 443 Kievan and Muscovite Russia: 850-1700 (5) I&S** Development of Russia from earliest times to the reign of Peter the Great. Offered jointly with SISRE 443.

**HSTAM 446 Medieval Russian Chronicles (5) I&S** History of Russian chronicle writing; study of the chronicles as literature and as historical sources, with emphasis on the latter.

**HSTAM 460 Medieval England, 1042-1485 (5) I&S** Upper level survey of English history from the Norman conquest until 1485. Emphasis on political, social, and economic history, with special attention to the peculiarities of English development as these had emerged by 1485.

**HSTAM 472 Intellectual and Religious History of the Later Middle Ages (5) I&S** Selected topics in intellectual and religious history, 1250 to 1550. Concentration on Europe north of the Alps and on philosophical and theological issues rather than on "humanism" and the history of scholarship. Most reading in original sources in translation.

## Courses for Graduates Only

**HSTAM 501 Greek History Field Course (3-6, max. 6)** Examines various topics and themes in Greek history. Content varies.

**HSTAM 511 Roman History Field Course (3-6, max. 6)** Examines various topics and themes in Roman history. Content varies.

**HSTAM 512- Seminar in Ancient History ([3-6, max. 6]-)** Detailed study of special topics in ancient history.

**HSTAM -513 Seminar in Ancient History (-[3-6, max. 6])** Detailed study of special topics in ancient history.

**HSTAM 530 Early Middle Ages (3-6, max. 6)** Field course. Survey of early European history through the times of tribal migrations and invasions from Asia. Problems and methods of research.

**HSTAM 531 Medieval European History (3-6, max. 6)**

**HSTAM 532 Medieval European Seminar (3-6, max. 6)** Prerequisite: reading knowledge of Latin.

**HSTAM 533 Medieval European Seminar (3-6, max. 6)** Prerequisite: reading knowledge of Latin.

**HSTAM 534 Medieval European Seminar (3-6, max. 6)** Prerequisite: reading knowledge of Latin.

**HSTAM 535 Later Medieval Europe (3-6, max. 6)** Field course. Surveys European history from ca. 1250 to 1500, with particular attention to historiography.

**HSTAM 536 Topics in Early Medieval History (3-6, max. 6)** Graduate level study of specific topics in early medieval history. Topics vary from quarter to quarter; for information, please see instructor.

**HSTAM 590 Topics in Ancient and Medieval History (3, max. 9)** Seminar on selected topics in ancient and medieval history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

## History of Asia

**HSTAS 401 History of Ancient India (5) I&S** India in ancient times; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

**HSTAS 402 History of Medieval and Mughal India (5) I&S** Medieval India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

**HSTAS 403 History of Modern India to 1900 (5) I&S** Modern India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

**HSTAS 404 History of Twentieth-Century India (5) I&S** Analysis of the problems in the fields of social life, international and domestic politics, education, economics, and other areas that confront India today.

**HSTAS 422 History of Tokugawa Japan (5) I&S** Background to the unification of Japan in 1600; establishment of the Tokugawa political structure; and the social, economic, and cultural history of the period 1600-1868. Offered: jointly with SISEA 422.

**HSTAS 423 History of Modern Japan (5) I&S** Political, social, economic, and cultural development of Japan from the late Tokugawa period to the present with special emphasis on the cultural impact of the West. Offered: jointly with SISEA 423.

**HSTAS 424 The Emergence of Postwar Japan (5) I&S** The making of modern Japan; World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 423. Offered: jointly with SISEA 440.

**HSTAS 431 Tibetan History (3) I&S** Tibet from earliest times to the present. Emphasis on the status and relations of Tibet in Asian affairs and on the evolution of the political institutions of a lama-ruler state.

**HSTAS 441 Economic and Social History of Japan to 1900 (5) I&S** Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: either SISEA 341 or HSTAS 341. Offered: jointly with SISEA 441.

**HSTAS 451 Chinese History: Earliest Times to 221 BC (5) I&S** Preimperial China.

**HSTAS 452 Chinese History from Earliest Times to 1276(5) I&S** *Ebrey* Traces the development of Chinese civilization from earliest times through the Song dynasty. Examines social, cultural, political, and economic history.

**HSTAS 453 Chinese History: AD 906 to 1840 (5) I&S** *Guy* Political, social, economic, and intellectual history from the time of the Mongol conquest of China to the Sino-Japanese war. Focus on the evolution of the late imperial Chinese state and the "early modern" era in China.

**HSTAS 454 History of Modern China (5) I&S** Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with SISEA 454.

**HSTAS 456 Topics in Chinese Social History (5) I&S** Surveys major issues and approaches to the study of the role of the Chinese people in China's historical development. Historical focus of course varies with instructor. Prerequisite: HSTAS 211. Offered: jointly with SISEA 456.

**HSTAS 462 Southeast Asian History to 1800 (5) I&S** Absorption and modification of cultures (Indian and Chinese), religions (Islam, Buddhism, Catholicism), and peoples (northern European) by island and mainland-Southeast Asians. Main themes are cultural contact and the growth of states and peoples.

**HSTAS 463 Southeast Asian History from 1800 to the Present (5) I&S** Post-eighteenth-century history of the present countries of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Singapore, Brunei, Indonesia, and the Philippines. Deals with colonial rule, emerging nationalism, and political independence. Investigates broad themes of social, economic, and cultural history.

**HSTAS 465 The Vietnam Wars (5) I&S** Analyzes Vietnamese, Cambodian, and Laotian wars fought in Southeast Asia from 1946 to present. Examines how the Vietnamese managed to defeat both the French and Americans. Questions whether these wars were wars of independence, civil wars, or "proxy wars" in which local forces served the interests of great powers.

**HSTAS 469 Topics in Southeast Asian History (5) I&S** Introduces major issues within the history and culture of one country of Southeast Asia. Content varies. Topics may include religion, economics, colonialism, perspectives on gender, labor history, literatures, popular culture, and performing arts. Focuses on a different Southeast Asian country each time offered. Offered: jointly with SISSE 469.

**HSTAS 481 History of Traditional Korea: Earliest Times to the Nineteenth Century (5) I&S** Korean history from earliest times to the modern period.

**HSTAS 482 History of Modern Korea: 1860 to the Present (5) I&S** Traditional institutions and society, Japanese colonial rule, liberation and the Korean War, early Korean communist movement, and North Korea and South Korea since 1945.

## Courses for Graduates Only

**HSTAS 501 Indian History (3-6, max. 6)** Prerequisite: permission of instructor.

**HSTAS 502 Seminar: History of India (3-6, max. 12)** Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

**HSTAS 503 Seminar: History of India (3-6, max. 12)** Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

**HSTAS 520 Premodern Japanese History (5)** Field course; Japanese history prior to 1868. Prerequisite: HSTAS 421 and HSTAS 422, or SISEA 441 and SISEA 541, or permission of instructor.

**HSTAS 521 Modern Japanese History (3-6, max. 6)** Field course. Prerequisite: HSTAS 422, HSTAS 423, or permission of instructor.

**HSTAS 530 Field Course in Southeast Asian History (3)** Introduction to major English-language works on Southeast Asian history and to the major historiographical issues of the era.

**HSTAS 532 Seminar in Southeast Asian History (3)** Selected topics in Southeast Asian history and historiography. Preparation for theses and doctoral dissertations on Southeast Asian History.

**HSTAS 541 Economic and Social History of Japan to 1900 (5)** Analyses of landholding systems, the rise of commerce, demographic changes, urbanization, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken HSTAS 441. Offered: jointly with SISEA 541.

**HSTAS 551 Field Course in Chinese History: Pre-Sung Period (3-6, max. 6)** *Ebrey* Introduction to the English-language literature on Chinese history through the Song dynasty. Recommended: HSTAS 452 or equivalent.

**HSTAS 552- Seminar in Chinese History: Earliest Times to 1276 ([3-6, max. 12]-)** *Ebrey* Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

**HSTAS -553- Seminar in Chinese History: Earliest Times to 1276 ([3-6, max. 12]-)** *Ebrey* Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

**HSTAS -554 Seminar in Chinese History: Earliest Times to 1276 ([3-6, max. 12])** *Ebrey* Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

**HSTAS 560- Field Course in Chinese History: 1276-1895 ([3-6, max. 6]-)** *Guy* Introduction to the English-language literature on the Yuan, Min, and Qing dynasties. Recommended: HSTAS 453 or equivalent.

**HSTAS -561 Field Course in Chinese History: 1276-1895 ([3-6, max. 6])** *Guy* Introduction to the English-language literature on the Yuan, Min, and Qing dynasties. Recommended: HSTAS 453 or equivalent.

**HSTAS 562- Seminar in Chinese History: 1268-1895 ([3-6, max. 6]-)** *Guy* Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

**HSTAS -563- Seminar in Chinese History: 1268-1895 ([3-6, max. 6]-)** *Guy* Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

**HSTAS -564 Seminar in Chinese History: 1268-1895 ([3-6, max. 6])** *Guy* Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

**HSTAS 571- Field Course in Modern Chinese History ([3-6, max. 6]-)** Introduction to the major English-language literature on modern Chinese history and to the major historiographical issues of the period. Prerequisite: HSTAS 454 or equivalent, and permission of instructor.

**HSTAS -572 Seminar in Twentieth Century Chinese History ([3-6, max. 6])** *Dong* Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

**HSTAS 573- Seminar in Twentieth Century Chinese History ([3-6, max. 12]-)** *Dong* Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

**HSTAS -574- Seminar in Twentieth Century Chinese History ([3-6, max. 12]-)** *Dong* Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

**HSTAS -575 Seminar in Chinese History: Modern Period ([3-6, max. 12])** Research seminar in modern Chinese history. Training in the materials and methods of research, and preparation of extended research papers. Prerequisite: HSTAS 571-572 or permission of instructor and reading knowledge of Chinese.

**HSTAS 581 Modern Korean History (3-6, max. 6)** Field course. Prerequisite: permission of instructor.

**HSTAS 582- Seminar in Korean History ([3-6, max. 6]-)** Selected topics in Korean history and historiography.

**HSTAS -583- Seminar in Korean History ([3-6, max. 6]-)** Selected topics in Korean history and historiography.

**HSTAS -584 Seminar in Korean History ([3-6, max. 6])** Selected topics in Korean history and historiography.

**HSTAS 590 Topics in Asian History (3, max. 9)** Seminar on selected topics in Asian history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

## Modern European History

**HSTEU 401 The Reformation (5) I&S** Origins of the disunity of Europe in the crisis of the sixteenth century with emphasis on the relations between religion and politics.

**HSTEU 405 European Intellectual History: Eighteenth Century (5) VLPA/I&S** Development of the social sciences, moral theory, political theory, and religious thought in eighteenth-century Europe. Rationalism, empiricism, utilitarianism, and the sources of idealism.

**HSTEU 406 European Intellectual History: Nineteenth Century (5) VLPA/I&S** Selected topics in intellectual history up to 1890. The philosophical consequences of the French Revolution, the development of idealism, conservatism, romanticism, and early socialist theory; positivism, the problems of historicism, new forms of Christian apologetics, utilitarianism in decline, liberalism as philosophy, the early Marx.

**HSTEU 407 European Intellectual History: Twentieth Century (5) VLPA/I&S** Selected topics in the intellectual history of the late nineteenth and early twentieth centuries. The aftermath of Darwinism, the problems of methodology in modern social science, historicism and moral relativism, irrationalism in philosophy and social theory, revisionism in secular and orthodox religions.

**HSTEU 410 The Renaissance: 1300-1560 (5) I&S** Conditions of Renaissance culture: Italian republics and despots, humanism, the classical ideal of the arts, Machiavelli and the foundations of modern political thought; the end of an era.

**HSTEU 411 Europe: 1814-70 (5) I&S** Development of Europe during the age of Metternich, the revolutions of 1848, and the emergence of new national states.

**HSTEU 413 Europe: 1914-45 (5) I&S** Politics and society of Europe in the age of the concentration camp.

**HSTEU 415 Europe in the Six Years' War: 1939-45 (5) I&S** Inquiry to discover what the war of 1939-45 was about and what it did to more than five hundred million Europeans.

**HSTEU 421 France: 1429-1789 (5) I&S** Political and cultural history, from Joan of Arc to the eve of the French Revolution. Villon, Rabelais, Montaigne, Molière, Voltaire, Rousseau, de Tocqueville.

**HSTEU 422 The French Revolution and Napoleon: 1789-1815 (5) I&S** Transformation of France under the Revolution of 1789; the Reign of Terror and Napoleon; the impact of the revolution and Napoleon upon Europe.

**HSTEU 423 France Since 1814 (5) I&S** Political, economic, and social history since the Congress of Vienna. Special emphasis upon the continuity of the revolutionary tradition.

**HSTEU 425 Topics in the History of France (5) I&S** An exploration of the political, social, cultural, or psychological dimensions of key themes in the history of France.

**HSTEU 431 Germany: 1648-1914 (5) I&S** Culture(s) and politics in central Europe from the end of the Thirty Years' War to the formation of the first German national state. Emphasis on the self-perception of societies and on the variety of interpretations of this period's history that are offered by different "schools" of historians.

**HSTEU 432 Germany: 1914-1945 (5) I&S** Politics and society from the collapse of the Bismarckian empire to the collapse of Hitler's empire.

**HSTEU 433 Central Europe: the Habsburg Monarchy, 1740-1918 (5) I&S** Social, political, cultural history of Europe's second-largest state, from the reign of Maria Theresa to the dissolution of the empire at the end of World War I. Topics include: state formation, nineteenth-century revolutions, nationality conflicts, political radicalism and anti-Semitism, and literature and the arts.

**HSTEU 434 Germany 1871-1989 (5) I&S** Society and politics from Germany's first unification to its reunification; domestic and foreign policy; political, economic, social, and cultural developments; high emphasis on German society's self-perception and on the variety of interpretations of this period's history offered by different "schools" of historians.

**HSTEU 435 World War I (5) I&S** European society on the eve of the war. War experience of the Europeans. Long term consequences of the war on European social, political, and economic institutions. Impact of the war on non-European world. The war in European literature.

**HSTEU 439 Soviet Union Since World War II (5) I&S** Domestic and foreign policy; political, economic, social, and cultural developments.

**HSTEU 440 History of Communism (5) I&S** Communism from its origins in the Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with SIS 440.

**HSTEU 444 Imperial Russia: 1700-1900 (5) I&S** Development of Russia from Peter the Great to Nicholas II. Offered jointly with SISRE 444.

**HSTEU 451 East-Central Europe Since 1342 (5) I&S** Focus on the lands of today's Poland, Czechoslovakia, Hungary, and Germany from the time they were great powers to the present. Traces the major changes in the fortunes of these lands in both local and international settings.

**HSTEU 452 Eastern Europe Since 1918 (5) I&S** Poland, Czechoslovakia, Hungary, Romania, Yugoslavia, Bulgaria, and Albania, from the end of World War I to the present.

**HSTEU 453 History of the Balkans, 1400 to the Present (5) I&S** Centuries of Ottoman rule that produced a new basis for the reemergence of independent states in the nineteenth and twentieth centuries; history of these new states until the present.

**HSTEU 454 Baltic History (5) I&S** Overview of the history of the area occupied by the Baltic countries of Latvia, Lithuania, and Estonia. Emphasizes their emergence as modern European nation-states. Era from World War I to present treated in depth, including the historical role and present situation of non-Baltic peoples, particularly Russians.

**HSTEU 461 Spain and Its Golden Age, 1469-1700 (5) I&S** History and culture of Spain and its empire from the late Middle Ages through the seventeenth century.

**HSTEU 462 Spain: 1700 to the Present (5) I&S** Political, economic, and cultural attempts of Spain to adjust to capitalism, liberalism, and secularism.

**HSTEU 464 The Jews in Spanish History (5) I&S** Sephardic Jews in Spanish politics, economy, and culture, emphasizing the medieval Golden Age and the Inquisition. Offered: jointly with SISJE 464.

**HSTEU 465 The Jews of Eastern Europe (5) I&S** Jewish society in Poland, Russia, the Hapsburg Lands, and Romania from the late Middle Ages to the Holocaust. Offered: jointly with SISJE 465.

**HSTEU 466 The Sephardic Diaspora: 1492-Present (5) I&S** *Stein* Examines the history and culture of Sephardic Jewry from the expulsion from the Iberian Peninsula in 1492 to the present. Explores the creation of Sephardic communities in the Dutch and Ottoman Empires, Western Europe, the Americas, and Africa, and the history of the conversos and "hidden Jews." Offered: jointly with SISJE 466.

**HSTEU 467 Medieval Jewish History (5) I&S** Social and intellectual history of the Jews in western Europe to the fifteenth century. Jews under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Offered: jointly with SISJE 467.

**HSTEU 468 Early Modern Jewish History, 1492-1789 (5) I&S** Jews in the early-modern period. The Spanish expulsion in 1492 to the onset of political and social emancipation in western Europe and America. Offered: jointly with SISJE 468.

**HSTEU 469 Enlightenment, Emancipation, Antisemitism: History of the Jews, 1770-1914 (5) I&S** The Jewish experience in the modern world from the European Enlightenment to the First World War. Focus on the debates surrounding Jewish emancipation, the reception of Jews within European society, modern antisemitism, nationalist movements, mass migration, and war. Offered: jointly with SISJE 469.

**HSTEU 470 The Jacobethan Age: England 1580-1630 (5) I&S** Emphasis on arts and society instead of the traditional kings, battles, and politics; the way people at all levels of society lived, in towns and in the countryside, within the bounds of the royal court or outside in the political wilderness. Classes on poetry, drama, music, architecture, painting, interior decoration, and some of the minor arts, as well as on demography and some of the traditional historical subjects. Not open for credit to students who have taken 471 or 472.

**HSTEU 471 England in the Sixteenth Century (5) I&S** Political, administrative, and social history from Henry VII to Elizabeth I, with emphasis on the Reformation and its effects and on conditions of life in Elizabethan England. Not open to students who have taken 470.

**HSTEU 472 England in the Seventeenth Century (5) I&S** Political, administrative, and social history from the accession of James I to the Glorious Revolution. Not open to students who have taken 470.

**HSTEU 474 England in the Nineteenth Century (5) I&S** Political, social, and cultural development; the agrarian, industrial, and French revolutions; the rise of parliamentary democracy; the Victorian age; political thought from utilitarianism to Fabianism; Irish home rule.

**HSTEU 475 England in the Twentieth Century (5) I&S** From the Boer War to the present; conservatism, liberalism, and socialism; England in two world wars; the decline of British imperialism.

**HSTEU 476 Modern Irish History (5) I&S** Political and social history from 1800 to the present; the Irish Question after the Act of Union; development of Irish nationalism in the Home Rule and Sinn Fein periods; the Irish Free State and Northern Ireland since 1921; current problems in Northern Ireland.

**HSTEU 480 European Socialism (5) I&S** Origins and development of socialist theory and practice in Europe since the French Revolution. Socialism as a political movement.

**HSTEU 482 Fascism in Europe (5) I&S** History of the fascist era in modern Europe from 1919 to 1945. A study of the principal examples of national fascism and fascist-like movements coupled with a general theoretical consideration of the phenomenon.

## Courses for Graduates Only

**HSTEU 501 Renaissance Field Course (3-6, max. 6)** Topics in the cultural, political, and social history of the Renaissance era.

**HSTEU 502 Reformation Field Course (3-6, max. 6)** Topics in the religious, political, and social history of the Reformation era.

**HSTEU 505 Early Modern European History (3-6, max. 18)** Select topics in early modern European history. Topics vary from quarter to quarter. Prerequisite: permission of instructor.

**HSTEU 510- Core Seminar in the History of Modern Europe (3-)** An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

**HSTEU -511- Core Seminar in the History of Modern Europe (-3-)** An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

**HSTEU -512 Core Seminar in the History of Modern Europe (-3)** An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

**HSTEU 515 Modern European Intellectual History (3-6, max. 6)**

**HSTEU 516- Seminar: European Intellectual History ([3-6, max. 6]-)**

**HSTEU -517 Seminar: European Intellectual History (-[3-6, max. 6])**

**HSTEU 521 Modern European History: France (3-6, max. 6)**

**HSTEU 531 Modern European History: Germany (3-6, max. 6)**

**HSTEU 532- Seminar in Modern European History: Germany ([3-6, max. 6]-)**

**HSTEU -533- Seminar in Modern European History: Germany (-[3-6, max. 6]-)**

**HSTEU -534 Seminar in Modern European History: Germany (-[3-6, max. 6])**

**HSTEU 544 Modern Russian History (3-6, max. 6)**

**HSTEU 545- Seminar in Modern Russian History (3-6, max. 6]-)** Prerequisite: reading knowledge of Russian and either French or German.

**HSTEU -546- Seminar in Modern Russian History (-[3-6, max. 6]-)** Prerequisite: reading knowledge of Russian and either French or German.

**HSTEU -547 Seminar in Modern Russian History (-[3-6, max. 6])** Prerequisite: reading knowledge of Russian and either French or German.

**HSTEU 548 Field Course in Soviet History (3-6, max. 6)** Specialized course for graduate history students in the scholarly literature of Russian history since 1917. Intended for graduate students preparing for MA or Ph.D. field examination in Russian history of the Soviet period.

**HSTEU 551 History of Eastern Europe: 1772-1939 (5)** Study of the east-central European region: Poland, Czechoslovakia, Hungary, Romania, and the Balkan countries, from their rebirth to World War II. Prerequisite: reading knowledge of German, French, Russian, or one East European language.

**HSTEU 552 History of Eastern Europe: 1939 to the Present (5)** Prerequisite: reading knowledge of one major European or one East European language.

**HSTEU 553- Seminar in Modern East European History ([3-6, max. 6]-)** Study and research involving special methods dealing with the histories of the East European countries in the modern period.

**HSTEU -554- Seminar in Modern East European History (-[3-6, max. 6]-)** Study and research involving special methods dealing with the histories of the East European countries in the modern period.

**HSTEU -555 Seminar in Modern East European History (-[3-6, max. 6])** Study and research involving special methods dealing with the histories of the East European countries in the modern period.

**HSTEU 563 Modern Spanish History (3-6, max. 6)** Problems in the history of Spain, 1500 to the present.

**HSTEU 571 English History: Tudor and Stuart (3-6, max. 6)**

**HSTEU 572 English History (3-6, max. 6)**

**HSTEU 573- Seminar in Modern English History ([3-6, max. 6]-)**

**HSTEU -574 Seminar in Modern English History (-[3-6, max. 6])**

**HSTEU 575- Seminar in Tudor-Stuart History ([3-6, max. 6]-)** History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

**HSTEU -576 Seminar in Tudor-Stuart History (-[3-6, max. 6])** History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

**HSTEU 590 Topics in European History (3, max. 9)** Seminar on selected topics in European history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

## Humanities (Simpson Center for the Humanities)

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsca/](http://www.washington.edu/students/crsca/).

**HUM 498 Special Topics in the Humanities (1-5, max. 15) I&S/VLPA** Examination of selected topics in the humanities and the study of the arts. Taught by U.W. faculty and visiting scholars and artists.

### Courses for Graduates Only

**HUM 520 Seminar in Textual Theory (5)** Introduction to the theoretical perspectives that have shaped the emerging interdisciplinary field of Textual Studies. Included in curriculum of Textual Studies Program.

**HUM 521 Seminar in Scribal Texts (5)** Relationship between oral and written texts and of the social and cultural systems which enable their production, transmission, and preservation. Included in curriculum of Textual Studies Program.

**HUM 522 Seminar in Printed Texts (5)** Study of printing as a means of textual transmission in the ages of the hand press, machine press, and electronic press; of current theories of editing; and of preparing critical editions of printed texts.

**HUM 523 Seminar in Hypertext and Textual Studies (5)** Several views of hypertext conceptually explored as a basis for research and evaluation of selected hypertext works. Includes initiating the construction of a World Wide Web hypertext of resources for the study of oral, graphical, hand-written, and printed texts. Included in curriculum of Textual Studies Program.

**HUM 596 Humanities Research Seminar (1-5, max. 15)** Exploration of current research in the Humanities and the study of the arts. Offered by specially selected U.W. faculty and visiting scholars in the arts and humanities.

## International Studies

401 Thomson

General Catalog Web page:  
[www.washington.edu/students/genccat/academic/internat\\_studies.html](http://www.washington.edu/students/genccat/academic/internat_studies.html)

Department Web page:  
[jsis.artsci.washington.edu](http://jsis.artsci.washington.edu)

The Henry M. Jackson School of International Studies organizes and supports interdisciplinary teaching and research in international affairs. The school consists of a group of interdisciplinary area-studies programs on major world regions, as well as topical and comparative programs of study that transcend national and regional boundaries.

## Graduate Program

Graduate Program Information  
111 Thomson, Box 353650  
(206) 543-6001  
[jsinfo@u.washington.edu](mailto:jsinfo@u.washington.edu)

The Jackson School offers six area-studies programs that lead to a Master of Arts in International Studies degree. These include China Studies; Japan Studies; Korea Studies; Middle East Studies; Russian, East European, and Central Asian Studies; and South Asian Studies. Specific requirements vary from one program to another, but all stress interdisciplinary study within the context of the historical cultures, contemporary situations, and languages of the world areas. In addition, the Jackson School offers a program in Comparative Religion for the Master of Arts in International Studies.

The Jackson School also offers a general program in International Studies that concentrates on the interaction of international economic, political, and cultural processes with states and societies around the world. This program was developed in conjunction with several professional schools and is designed as a concurrent degree program.

**Admission Requirements:** Applicants must meet the requirements of the Graduate School: a 3.00 GPA in the last 90 quarter (60 semester) graded credits and a baccalaureate degree from an accredited university. Submission of the scores of the general Graduate Record Examination is required. Applicants must also meet the requirements of the specific Jackson School program to which they are applying. Most of them require or strongly recommend previous study of an appropriate foreign language.

**Graduation Requirements:** Students must meet Graduate School requirements for the Master of Arts, as well as individual Jackson School program requirements. Programs are designed to be completed in two years.

**Financial Aid:** Financial support is available in the form of Title VI Foreign Language and Area Studies Fellowships. Some Jackson School programs have additional fellowships available for specific areas of study. Graduate students are also eligible for a limited number of teaching or research assistantships and reader-ships.

*Research Facilities (East Asia):* Research and training facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. In addition, the University is affiliated with the Inter-University Program for Chinese Language Studies in Beijing and Taipei, language programs in the People's Republic of China sponsored by the Council on International Educational Exchange, and the Inter-University Center for Japanese Language Studies in Yokohama, which provide intensive language training for advanced undergraduate and graduate students. The School has ongoing projects on China, Japan, and Korea in which advanced graduate students and recognized scholars from the United States and foreign institutions regularly participate.

See also descriptions of research facilities on Russia, East Europe, and Central Asia as well as South Asia under the appropriate headings below.

## China Studies

David Bachman, Chair

The China Studies program provides a broad understanding of the Chinese people and their culture, historical development, and contemporary problems. The curriculum emphasizes the attainment of facility in Chinese language, a grounding in history, and a familiarity with the approaches of the social sciences to China studies. The cultural aspects of China are covered through offerings of several departments, with special strengths in art history and literature. The breadth of offerings allows students to select courses to meet career goals in business, government, or other professions, or to prepare for further graduate study in an academic discipline.

*Admission Requirements:* See above under Graduate Program. While not required for admission, some previous study of Chinese language is highly recommended.

*Graduation Requirements:* Chinese language training through the third year; two seminars: SISEA 521-522 (5 credits each) plus 26 credits in discipline study related to China from at least two different disciplines; two seminar papers or a thesis; comprehensive oral examination.

## Comparative Religion

Martin S. Jaffee, Chair

The Comparative Religion program leading to the Master of Arts in International Studies offers an interdisciplinary curriculum in the study of religion, with several choices for areas of concentration. The required core seminars focus on methodology and comparative perspective in the study of religion. For the remaining course requirements, primary and secondary curricular concentrations are available in Buddhism, Hinduism, Judaism, Islam, Christianity, and religion and culture; further secondary curricular concentrations are available in Greco-Roman religions, East Asian indigenous traditions, and African religious traditions.

*Admission Requirements:* See above under Graduate Program. The Comparative Religion faculty reserve the right to determine in each case whether an applicant has sufficient language preparation and background in the study of religion for acceptance into the program.

*Graduation Requirements:* Completion of the third year in a language of the primary sources in the chosen concentration, and first-year reading proficiency in a secondary foreign language necessary for reading published research (e.g., German, French); certification of basic competency in the history of world religions; RELIG 501-502; one course focused on historical relations between religious traditions; at least four courses in a major concentration and two in a minor; one or two final research paper(s); and a comprehensive examination including both oral and written segments.

## International Studies

Resat Kasaba, Chair

The general program in International Studies provides students with broad knowledge and skills in analyzing international affairs. Designed for students entering a variety of professional fields, the program trains them in international and comparative studies in a multidisciplinary setting. Students are prepared to undertake sophisticated analyses of international affairs and typically will hold positions after graduation with the international divisions of federal and state governments, international divisions of banks, trading companies, policy-study institutes, corporations with international operations, and international development and educational organizations. The program usually entails concurrent enrollment in a graduate professional-degree program and adds approximately one year to the student's course of study.

*Admission Requirements:* See above under Graduate Program. Those applying concurrently to a professional program (Business Administration, Public Affairs, Marine Affairs, Forest Resources, Law, or Public Health and Community Medicine) must first be accepted by the professional school. For non-concurrent applicants, preference is given to those who have a professional interest, or previous professional experience or education. Prior study of a foreign language and preparation in intermediate-level microeconomics and macroeconomics are highly recommended.

*Graduation Requirements:* Japanese or Chinese language through the third year or any other modern foreign language through the second year; SIS 500, 501, 502, 511, and 512 (3 credits each); SIS 591, 592, and 593 (1 credit each); courses in two of the following three fields: a regional studies field, a professional field, or a special topics field (minimum three classes—9 credits—for each field); two seminar papers; and an oral examination. Students in concurrent graduate-degree programs also must meet Graduate School requirements for the second degree.

## Japan Studies

The graduate program in Japan Studies gives students in-depth knowledge of many facets of Japan, including its history, political economy, and language. Course work helps prepare students for careers in business, government, journalism, secondary-school teaching, and a wide variety of other professional fields. The program is specifically designed (1) for students with bachelor's degrees in a discipline who need language and interdisciplinary training on Japan to pursue their career goals, and (2) as preparation for doctoral work in an academic discipline involving Japan for students who have had little or no training on Japan or in the language.

*Admission Requirements:* See above under Graduate Program. At least one year of prior training in Japanese language is strongly recommended.

*Graduation Requirements:* Japanese language training through the third year (15 credits minimum training at the UW); SISEA 554-555 (6 credits) and SISEA 558-559 (5 credits each); 20 credits in discipline study of Japan to include at least one history course and one social science course; essay of distinction; and an oral examination.

## Korea Studies

Clark W. Sorensen, Chair

The graduate program in Korea Studies offers courses in Korean language, history, and society. Regular offerings are supplemented by visiting faculty from political science, economics and economic development, folklore, and literature. The program emphasizes the study of Korea in the context of East Asian civilization and the modern world economy, not simply as a single country in isolation from its neighbors. The objective of the program is to provide students with a broad back-

ground which will be of use for further graduate study, or in a variety of professions such as teaching, business, and government.

*Admission Requirements:* See above under Graduate Program. Previous language training is recommended.

*Graduation Requirements:* Korean language through the third year of instruction (through the second year of instruction if the student is admitted with no previous language training); HSTAS 481-482, SISEA 584 (5 credits each), and SISEA 585 (6 credits); 15 credits in discipline study of East Asia or international studies; two seminar papers; comprehensive oral examination.

## Middle Eastern Studies

The Middle East program is designed for students who wish to study the region within an interdisciplinary framework, focusing especially on the social, political, economic, and legal systems of the Middle East and/or Islamic Central Asia. To provide a thorough grounding in this region, students take courses in the social sciences, humanities, and a Middle Eastern or Central Asian language.

*Admission Requirements:* See above under Graduate Program. Although knowledge of a Middle Eastern or Central Asian language is not a prerequisite for admission, applicants are generally expected to have had at least the equivalent of one year's study of the language in which they plan to concentrate. Students accepted with no language training may wish to begin their language study in an intensive summer program.

*Graduation Requirements:* Three 3-credit or two 5-credit Middle Eastern language courses beyond the second-year (native speakers as well as non-native speakers); 20 credits on the modern Middle East from at least two social science or humanities disciplines; one approved Jackson School course; two courses in one social science discipline or in one professional school other than courses taken for preceding requirements; either a thesis or two seminar papers and a four-hour written examination.

## Russian, East European, and Central Asian Studies

Stephen E. Hanson, Chair

Designed primarily for students with bachelor's degrees in a discipline, the program offers a background for professional pursuits in government and nongovernmental organizations, journalism, business, or teaching, or for advanced graduate study leading to the Ph.D. degree in a discipline. The program includes language training, a concentration of study in a chosen discipline, and a combination of courses in other disciplines that deal with aspects of the area. Students usually focus on one region (Russia, East Europe, the Baltics, Central Asia), although the program provides flexibility to take courses on another region.

*Admission Requirements:* See above under Graduate Program. A prerequisite for all applicants is two years of college-level language courses or the equivalent; for Russian Studies the language must be Russian; for other regions of the former Soviet Union and East Europe, two years of a language of the region, or another relevant language.

*Graduation Requirements:* Including the two years required for entry, four years of a language of the region being studied or two years each of two relevant languages (four years of Russian required for Russian focus); SISRE 500, 501, and 502 (3 credits each); 30 credits in disciplines other than language, with 15-20 credits in a discipline of concentration and 10-15 credits in at least two additional disciplines; a thesis (9 credits of SISRE 700); a written examination in the discipline of concentration and an oral interdisciplinary examination.

*Research Facilities:* The University of Washington is a major center for research on Eastern Europe, Russia, and the other newly independent states of the former Soviet Union, notably the Baltics and the countries of Central Asia. In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has one of the best Central Asian language collections in the country and the largest collection of Latvian books outside Latvia. The strengths of the program are complemented by strong programs in East Asian and Middle Eastern Studies.

## South Asian Studies

Frank F. Conlon, Chair

The South Asian Studies program has been designed for students whose career objectives involve teaching and research in a traditional discipline with geographical interests within South Asia (i.e., India, Pakistan, Bangladesh, Sri Lanka, Afghanistan, Tibet, and Nepal); those planning to enter professional-training programs (e.g., education, business administration, journalism, law, or public affairs); or students planning a career in government service (e.g., the foreign service) who wish to acquire a special understanding of the South Asia area.

*Admission Requirements:* See above under Graduate Program.

*Graduation Requirements:* Completion of the third year of a South Asian language to include at least 7 credits at the 400 level or above; SISSA 510 and 511 (5 credits each); 26 credits in discipline course work other than language, from at least two different departments; two seminar papers; and a comprehensive oral examination.

*Research Facilities:* The University of Washington library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

## Faculty

### Director

Jere L. Bacharach

### Professors

Bacharach, Jere L. \* 1967; MA, 1962, Harvard University; PhD, 1967, University of Michigan; history of the Middle East, Islam.

Brass, Paul R. \* 1965, (Emeritus); PhD, 1964, University of Chicago; comparative politics (South Asia).

Butow, Robert J. C. \* 1960, (Emeritus); PhD, 1953, Stanford University; East Asian diplomatic history.

Chiro, Daniel \* 1974; PhD, 1973, Columbia University; political sociology, ethnic conflict.

Ebrey, Patricia B. \* 1997; PhD, 1975, Columbia University; early Imperial China, Song dynasty, social history.

Ellison, Herbert J. \* 1968; PhD, 1955, University of London (UK); modern Russian history.

Hanley, Susan B. \* 1970; PhD, 1971, Yale University; premodern Japanese history.

Hellmann, Donald C. \* 1967; PhD, 1964, University of California (Berkeley); Japanese politics and international relations.

Jackson, W. A. Douglas \* 1955, (Emeritus); PhD, 1953, University of Maryland; Canada, political systems, nature and culture.

Jaffee, Martin S. \* 1987; PhD, 1980, Brown University; rabbinic religion and literature in late antiquity.

Kasaba, Resat \* 1985; PhD, 1985, State University of New York (Binghamton); historical sociology, world systems, social change in the Middle East.

Keyes, Charles F. \* 1965; PhD, 1965, Cornell University; ethnic group relations, sociology of Theravada Buddhism, mainland Southeast Asia.

Legters, Lyman H. \* 1966, (Emeritus); PhD, 1958, Freie University of Berlin (Germany); Russian and East European Studies.

Migdal, Joel S. \* 1980; MA, 1968, PhD, 1972, Harvard University; state-society relations, rules of public space, Israel-Palestine.

Palais, James B. \* 1968; PhD, 1968, Harvard University; Korean history.

Pempel, T. J. \* 1995; PhD, 1972, Columbia University; comparative politics in Japan.

Poznanski, Kazimierz \* 1987; PhD, 1974, University of Warsaw (Poland); comparative economic systems, technological change, political economy of Eastern Europe.

Pyle, Kenneth B. \* 1964; PhD, 1965, Johns Hopkins University; modern Japanese history.

Ramet, Sabrina P. \* 1983; PhD, 1981, University of California (Los Angeles); politics and history of former Yugoslavia, East European religion and culture.

Taylor, George E. 1939, (Emeritus); MA, 1928, LittD, 1957, University of Birmingham (UK); East Asian studies.

Townsend, James R. \* 1968, (Emeritus); PhD, 1965, University of California (Berkeley); comparative government (China), politics of development.

Webb, Eugene \* 1966; MA, 1962, PhD, 1965, Columbia University; modern English, French, and German literature, comparative religion.

Williams, Michael A. \* 1976; PhD, 1977, Harvard University; early Christianity and religions of antiquity.

Wong, Christine P. W. 2000; PhD, 1979, University of California (Berkeley); Chinese public finance, rural industrialization in China, transition economies of Asia.

Yamamura, Kozo \* 1972, (Emeritus); PhD, 1964, Northwestern University; economic development and economic history of Japan, comparative economic history.

### Associate Professors

Anchordoguy, Marie C. \* 1989; PhD, 1986, University of California (Berkeley); Japan's political economy; East Asian economic development.

Bachman, David M. \* 1991; PhD, 1984, Stanford University; Chinese politics and foreign policy and China's political economy (1949-present); US-China relations.

Guy, R. Kent \* 1980; PhD, 1981, Harvard University; late imperial China.

Ingebritsen, Christine \* 1992; PhD, 1993, Cornell University; politics, international political economy, European integration, environmental policy.

Jones, Christopher D. \* 1984; PhD, 1975, Harvard University; post-Cold War security issues in Europe and East Asia, political economy.

Lavelly, William R. \* 1985; PhD, 1982, University of Michigan; social demography of China.

Sorensen, Clark W. \* 1989; PhD, 1981, University of Washington; Korea, social change in East Asia, development, ethnic identity.

Waugh, Daniel Clarke \* 1972; PhD, 1972, Harvard University; medieval Russian history.

Young, Glennys J. \* 1992; PhD, 1989, University of California (Berkeley); Imperial and Soviet Russia, religion, women.

### Assistant Professors

Callahan, Mary P. 1999; PhD, 1996, Cornell University; Southeast Asia, military politics, historical memory.

Dong, Yue 1996; MA, 1991, University of Oregon; PhD, 1996, University of California (San Diego); late 19th and 20th century China, social and cultural history, urban history, gender studies.

Giebel, Christoph \* 1998; PhD, 1996, Cornell University; Vietnamese studies, Southeast Asian history.

Johnson, David T. 2000; PhD, 1996, University of California (Berkeley); comparative public law, Japanese law and politics, sociology of law, socio-legal theory.

Noegel, Scott B. \* 1995; PhD, 1994, Cornell University; ancient Near Eastern languages.

Sparke, Matthew \* 1995; MA, 1991, PhD, 1996, University of British Columbia (Canada); geopolitics, Cascadia, borderlands studies, globalization.

Stein, Sarah A. \* 1999; PhD, 1999, Stanford University; Jewish history, Russian history, Ottoman history, nationalism/ethnicity.

Warren, Jonathan W. 1996; MA, 1990, PhD, 1997, University of California (Berkeley); race and ethnicity, Latin American studies, cultural studies, Native American studies.

### Senior Lecturer

Clowes, James D. 1988; MA, 1988, University of Montana; modern European intellectual history, early German romanticism, pedagogy.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsat/](http://www.washington.edu/students/crsat/).

### International Studies

**SIS 401 International Political Economy (5) I&S** *Ingebritsen, Poznanski* Establishment, maintenance, and decay of the post-1945 international economic order. Political economy of international trade, monetary relations, inflation, and North-South relations. Prerequisite: SIS 201 which may be taken concurrently; ECON 201 which may be taken concurrently.

**SIS 406 Political Islam and Islamic Fundamentalism (5) I&S** Study of resurgence, since mid-1970s, of political Islam and what has come to be called Islamic fundamentalism, especially in the Middle East. Topics include the nature and variety of political Islam today, causes and implications of the current resurgence, and comparison with previous resurgences. Offered: jointly with POL S 432.

**SIS 419 Comparative Media Systems (5) I&S** Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with CMU 420/POL S 468.

**SIS 421 National Security and International Affairs (5) I&S** *Jones* Major military aspects of contemporary international politics. Uses and limitations of military capabilities for sustaining a stable international order and national security. Processes by which states detect and assess threats to their security; practice of deterrence; transfer of arms among states; pursuit of arms control. Recommended: one SIS or international relations course.

**SIS 422 The United States in the Contemporary International System (5) I&S** United States in the world: ways in which international circumstances shape the political-strategic, economic, and cultural dimensions of America's policy. Case studies from post-1945 period. Recommended: one international relations or foreign policy course.

**SIS 423 Practicing American Foreign Policy (5) I&S** Develops familiarity with tools available to promote international objectives of the United States. International case studies selected to illustrate the diverse considerations inherent in the policy process and evaluate the strengths and weaknesses of the national institutions involved. Prerequisite: SIS 201.

**SIS 426 World Politics (5) I&S** *Caporaso, Modelski* Nation-state system and its alternatives; world distributions of preferences and power; structures of international authority; historical world societies and their politics. Offered: jointly with POL S 426.

**SIS 430 International Population (5) I&S** *Lavelly* Demographic situation of the world and of major world regions. The demographic transition. Topics include public health, policies of fertility and mortality control, international migration, relation of population growth to economic development, social change, and resource constraints. Exploration and manipulation of international demographic data.

**SIS 432 Population and Modernization (3) I&S** *Hirschman, Lavelly* Examines role of demographic factors in process of social modernization and economic growth. Approach is historical, focusing on populations of developed countries since 1700, and analytic, stressing attempts made by different disciplines to model demographic relationships, with attention to less developed regions. Offered: jointly with SOC 432.

**SIS 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S** Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Offered: jointly with POL S 436.

**SIS 440 History of Communism (5) I&S** *Ellison, Ramet* Communism from its origins in Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with HSTEU 440.

**SIS 444 Peasants in Politics (5) I&S** *Young* Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly independent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with POL S 446.

**SIS 449 Social Transformation of Modern East Asia (5) I&S** *Sorensen* Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Recommended: two history or anthropology of East Asia courses. Offered: jointly with ANTH 449.

**SIS 450 Political Economy of Women and Family in the Third World (5) I&S** Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SOC 450.

**SIS 455 Industry and the State (5) I&S** *Whiting* Builds on states and markets approach of 200 and 201 through specific examination of effects of industry and industrial structure on political outcomes and roles of state. Emphasis on late-developing and newly developing economies. Prerequisite: SIS 200; SIS 201.

**SIS 456 State-Society Relations in Third World Countries (5) I&S** *Bachman, Kasaba* Relationships among political, social, and economic changes in Asia, Africa, and Latin America. Problems of economic and political development, revolution and reform, state-society relations, imperialism and dependency. Offered: jointly with POL S 450.

**SIS 460 Law, State, and Society (5) I&S** *Migdal* Examination of both state law and non-state law (rules and ways of ordering behavior such as customary law, religious law, and social conventions). Focuses on the ways non-state law interacts with and affects state law and is affected by state law.

**SIS 465 Deeply Divided Societies (5) I&S** *Migdal* Ethnic conflict seen from two perspectives: 1. the study of theoretical approaches as a means of understanding deeply divided societies; 2. a focus on one or more specific conflicts. Recommended: SIS 201 or POL S 204.

**SIS 467 Nations and States in the Modern World (5) I&S** Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by the new nationalism and its spread into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with HIST 467.

**SIS 476 Comparative International Political Economy (5) I&S** *Ingebritsen, Pempel, Pozanski* Comparative analysis of four major approaches to international political economy: mercantilism, Marxism, liberalism, and evolutionary approach. Focus on international cooperation, social change, and economic institutions. Theoretical analysis of the four paradigms and applications to historic and current issues in international political economy: hegemonic cycle, post-communist transition, and cross-national income inequality.

**SIS 480 The Catholic Church in World Politics (5) I&S** *Ramet* Acquaints students with the self-identity, theology, ecclesiology, and political role of the Catholic Church in the contemporary era, with emphasis on its role in the United States, the USSR, China, Eastern Europe, and Latin America. Recommended: SIS 201, SIS 202, or RELIG 201.

**SIS 490 Special Topics (1-5, max. 15) I&S** Content varies from quarter to quarter.

**SIS 491- Senior Honors Seminar (5-) I&S** Study of issues related to students' thesis topics. Develops thesis-writing skills. Open only to Jackson School honors students.

**SIS -492 Senior Honors Seminar (-5) I&S** Students write a senior thesis working with their individual writing advisers.

**SIS 495 Task Force (5) I&S** Small-group seminars address current problems in international affairs, each focusing on one specific policy question and producing a joint task force report. Restricted to senior majors in International Studies. Prerequisite: SIS 200; SIS 201; SIS 202; SIS 401.

**SIS 497 Internship (1-5, max. 15)** Credit for the completion of an approved internship in international studies. Credit/no credit only.

**SIS 498 Readings in International Studies (5) I&S** Reading and discussion of selected works of major importance in interdisciplinary international studies. Restricted to majors in International Studies.

### Courses for Graduates Only

**SIS 500 Seminar: Origins of the Modern Global System (3)** *Kasaba, Migdal* Development of global interdependence from the fifteenth century to World War II. Interrelationship of politics and economics. International political economy from contextual, institutional, and historical perspectives.

**SIS 501 Seminar: International Political Economy (3)** *Poznanski, Pempel* Institutional and historical perspective on the international political economy, focusing on the developing interrelationship of politics and economics. Prerequisite: ECON 200, ECON 201.

**SIS 502 Seminar: Change and Stability in International Affairs (3)** *Jones* Examines major differences in the nature of cultural and economic adaptation to the challenge of the West, as well as the tensions these differences have generated within particular societies. Regional phenomena in the context of powerful international forces.

**SIS 511 Practicum: Methods in International Studies (3)** *Chirof, Pempel* Assumptions underlying leading methodologies for comparative study of societies and other large-scale social entities. Quantitative and nonquantitative methods illustrated by recent research.

**SIS 512 Task Force in International Affairs (3)** *Chirof, Pempel* Seminar addressing a current problem in international affairs and resulting in a joint task-force report. Results presented to, and critiqued by, a distinguished outside evaluator at end of term.

**SIS 520 Introduction to Theories and Quantitative Methods for Social Science Research (5)** Selected social scientific theories and quantitative methods for students in international and area-studies programs. Introduction to methodological neoclassicism, neo-institutional analysis, "developmentalism," rational choice and dynamic institutionalist approaches, and selected theories from political science. Essentials of statistical analysis.

**SIS 522 Special Topics in Ethnicity and Nationalism (3, max. 6)** Topics vary, but always focus on ethnic group relations and nationalism viewed from a broad, comparative, interdisciplinary perspective. Emphasis is heavily cross-cultural, and the geographical coverage world-wide. Prerequisite: graduate standing in any social science or education, or by permission of instructor.

**SIS 534 International Affairs (3)** Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 534/POL S 534.

**SIS 542 Seminar: State and Society (5)** *Migdal* Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states as large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with POL S 542.

**SIS 551 Comparative Administrative Systems (3)** Methodological problems of research in comparative administration. Theoretical and substantive aspects of administrative systems in urban-industrial and developing nations. Offered: jointly with PB AF 551.

**SIS 575 Advanced Political Geography (5) Sparke** Provides resources for theorizing how politics shapes and is shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines interrelationships of contemporary capitalism with other complex systems of social and political power relations. Offered: jointly with GEOG 575.

**SIS 580 Teaching International Studies (2, max. 4) Migdal** For current and prospective teaching assistants. Includes teaching writing, leading effective discussions, the art of evaluation, and teaching critical reading skills; videotaping of actual teaching sessions of participants in class. Credit/no credit only.

**SIS 590 Special Topics (2-5, max. 10) Seminar.** Course content varies. Offered occasionally by visiting or resident faculty.

**SIS 591- Colloquium in International Studies (1-) Migdal, Kasaba** Required colloquium for first-year Master in International Studies (MAIS) students. Informal introduction to the faculty and major avenues of research in international studies. Credit/no credit only.

**SIS -592- Colloquium in International Studies (-1-) Migdal, Kasaba** Required colloquium for first-year Master in International Studies (MAIS) students. Informal introduction to the faculty and major avenues of research in international studies. Credit/no credit only.

**SIS -593 Colloquium in International Studies (-1) Migdal, Kasaba** Required colloquium for first-year Master in International Studies (MAIS) students. Informal introduction to the faculty and major avenues of research in international studies. Credit/no credit only.

**SIS 600 Independent Study or Research (\*)**

## African Studies

**SISAF 444 African Studies Seminar (5, max. 15) I&S** Interdisciplinary seminar focusing upon one particular aspect of the African continent. Emphasis may be humanistic, social scientific, or historical. African Studies faculty and visiting scholars lecture on areas of their own expertise.

**SISAF 490 Special Topics (1-5, max. 15) I&S**

## Asian Studies

**SISA 490 Special Topics (1-5, max. 15) I&S** Content varies.

## Canadian Studies

**SISCA 424 Canadian Media Systems (5) I&S** Structure and operation of Canadian mass media and telecommunications industries. Impact of United States media on Canadian culture. Role of domestic media in lives of minorities. Laws and policies governing communications. Offered: jointly with CMU 424.

**SISCA 430 Canadian Documentary Film Traditions (5) VLPA/I&S** History and development of non-fiction film documentary traditions, especially in Canada, the first institutionally defined area in which documentaries became prominent through the National Film Board and the Canadian Broadcasting Corporation. Discussion of Flaherty, Greirson, and independent network producers who developed present-day style of documentaries. Offered: jointly with CMU 430.

**SISCA 441 Québécois Literature (5) VLPA** Readings of novels, plays, and occasionally, poetry. Special attention paid to how Québécois authors represent in their works the complex socio-political reality of their culture. Conducted in French. French majors required to read and write in French; all others may read and write in English. Prerequisite: FRENCH 303; FRENCH 306. Offered: jointly with FRENCH 441.

**SISCA 490 Special Topics (1-5, max. 15)** Content varies.

**SISCA 495 Multiculturalism in Canada (5) I&S** History of the multi-racial and multi-ethnic character of Canadian society. Impact of federal policy of bilingualism and multiculturalism. Current issues of language rights, retention of cultural heritage, self-government for aboriginal peoples, and improving race and ethnic relations.

**SISCA 498 Seminar: Canadian Problems (5) I&S** Major issues pertaining to Canadian society, government, and economic development.

## Courses for Graduates Only

**SISCA 507 Research Seminar: Canadian Problems (3, max. 6)** Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potentials and relations with the United States, Japan, and other important trading partners. Prerequisite: GEOG 308 or permission of instructor. Offered: jointly with GEOG 507.

**SISCA 590 Special Topics (2-5, max. 10)** Offered occasionally by visitors or resident faculty. Course content varies.

**SISCA 600 Independent Study (\*)**

## Comparative Religion

**RELIG 400 The Jewish Mystical Tradition (5) I&S Jaffee** Jewish esoteric thought from antiquity to early modern times. Emergence of Spanish Kabbalah. The thought of Isaac Luria and its immense influence in Jewish history through other movements—specifically the mystical messiah. Sabbetai Sevi, and the rise of Hasidism. Recommended: RELIG 201 or RELIG 210.

**RELIG 405 Scripture in Judaism (5) I&S Jaffee** Explores the phenomenon of religious interpretation of sacred books by attending to the destiny of the Bible as read within Judaism. Begins with the canonization of the biblical text itself and continues into the rationalist and mystical interpretive innovations of the Middle Ages. Recommended: HIST/SISJE 250, RELIG 201, or RELIG 210.

**RELIG 415 Modern Jewish Thought (5) I&S Jaffee** Major trends in Jewish religious thought since the European Enlightenment, focusing on encounters between Judaism and the modern world. Includes Haskalah; varieties of religious reform and accommodation; Zionism; socialism; the philosophy of Rosenzweig, Buber, and Kaplan; and theological responses to the Holocaust. Recommended: HIST/SISJE 250, HSTEU/SISJE 469, RELIG 201, or RELIG 210.

**RELIG 420 The World of the Early Church (5) I&S Williams** Early Christian church within the context of the Greco-Roman sociopolitical, philosophical, and religious environment. Covers the period from about AD 100 to 300. Christian thinkers and documents studied include both the classical "orthodox" and the "heretical." Recommended: HIST 307, RELIG 220, or RELIG 324.

**RELIG 421 The Age of St. Augustine (5) I&S Williams** Christian church in the fourth and fifth centuries as a major institution in the Roman Empire. Great figures of patristic theology, such as Athanasius, Gregory Nazianzus, Gregory of Nyssa, and Augustine. Recommended: HIST 307, RELIG 320, or RELIG 324.

**RELIG 426 Gnosticism and Early Christianity (5) I&S Williams** Impact of Gnosticism on the development of Christianity and several other religious groups of that period. Readings dating from the first through the third centuries AD.

**RELIG 428 Modern Christian Theology (5) I&S Webb** Modern Protestant and Catholic thought since the nineteenth century: Kierkegaard, Barth, Bultmann, Rahner, Lonergan, and other major figures. Recommended: RELIG 301.

**RELIG 430 Scripture in Islam (5) VLPA/I&S Wheeler** Examines concept and use of scripture in Islam, with special attention to issues of canon and commentary, heavenly books, talismanic uses, and the place of scripture in ritual. In English. Offered: jointly with NEAR E 430.

**RELIG 432 Ritual and Law in Islam (5) VLPA/I&S** Comparative study of Islamic ritual practices and related development of jurisprudence and law. Focus on sacrifice, political and social legal theory, pilgrimage, regulation of the body, and the diversity of contemporary practices. In English. Offered: jointly with NEAR E 432; W.

**RELIG 433 Life of Prophet Muhammad (5) VLPA/I&S Wheeler** Examines historical and religious traditions associated with the life of the Prophet Muhammad with particular attention to the biography in classical Islam. Focuses on Muhammad as prophet, holy man, law-giver, mystic, and statesman. Comparison with other religious figures such as Jesus and the Buddha. In English. Offered: jointly with NEAR E 433.

**RELIG 442 Art, Religion, and Politics in the Early Christian Period, 300-700 AD (3) VLPA/I&S Kartsonis** Evolution of the art of the early Christian period (300-700 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with ART H 422.

**RELIG 445 Greek and Roman Religion (3) VLPA/I&S Harmon, Langdon** Religion in social life of Greeks and Romans; emphasis on their public rituals and festivals. Priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Recommended: RELIG 201. Offered: jointly with CLAS 445.

**RELIG 449 Religious Movements: The Sociology of Cults and Sects (5) I&S Stark** Understanding religion, what it is and what it does. Examines the formation of new religious movements, cults, and sects and the conditions under which they succeed or fail. Offered: jointly with SOC 445.

**RELIG 456 Women in Ancient Judaism (3) I&S/VLPA Noegel** Explores those texts in early Jewish literature in which women play prominent roles and those in which women are surprisingly absent. Discusses the literary portrayal of women for what they tell us about the people who wrote the texts. No knowledge of Hebrew is required. Offered: jointly with NEAR E 456.

**RELIG 457 The History of Biblical Interpretation (3) I&S/VLPA Noegel** Traces biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a "hands-on" approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with NEAR E 457.

**RELIG 490 Special Topics (1-5, max. 15) I&S** Topics vary with each offering.

**RELIG 491 Seminar: Topics and Issues in Judaism (5) I&S Jaffee** Topics vary. Recommended: RELIG 210; RELIG 400, RELIG 405, or RELIG 410.

**RELIG 492 Seminar: Topics in Early Christianity (5) I&S** *Williams* Topics vary. Recommended: one early Christian history or literature course.

**RELIG 497 Field Archaeology (1-10, max. 20)** Professionally-guided archaeological fieldwork at a recognized archeological dig in the United States or abroad. Offered: S.

**RELIG 498 Honors Thesis (5) I&S** Required course for Comparative Religion honors students.

### Courses for Graduates Only

**RELIG 501 Approaches to the Study of Religion (5)** *Cox, Jaffee, Williams* Major approaches employed by modern scholarship in the study of religion, including historical, phenomenological, anthropological, sociological, and psychological. Prerequisite: admission to the comparative religion MAIS program or permission of instructor.

**RELIG 502 Religion in Comparative Perspective (5, max. 15)** *Ellingson, Jaffee, Keyes, Pauwels* Analysis of selected theme or symbols in relation to several different religious traditions. Topics vary. Prerequisite: admission to the comparative religion MAIS program or permission of instructor.

**RELIG 504 Religion and Culture (5)** Study of the relations between religion and culture, with attention to the role of religion in defining conceptions of order and grounding socio-political and artistic traditions.

**RELIG 520 Seminar On Early Christianity (5)** *Williams* Problems in the history and literature of early Christianity.

**RELIG 570 Religion and Literature (5)** The relation of religious thought to the study of imaginative literature. Includes both critical theory and practical criticism of exemplary texts.

**RELIG 590 Special Topics (2-5, max. 10)** Offered occasionally by visitors or resident faculty. Course content varies.

**RELIG 600 Independent Study or Research (\*)**

### East Asian Studies

**SISEA 422 History of Tokugawa Japan (5) I&S** Background to the unification of Japan in 1600; establishment of the Tokugawa political structure; and the social, economic, and cultural history of the period 1600-1868. Offered: jointly with HSTAS 422.

**SISEA 423 History of Modern Japan (5) I&S** *Pyle* Political, social, economic, and cultural development of Japan from the late Tokugawa period to the present with special emphasis on the cultural impact of the West. Offered: jointly with HSTAS 423.

**SISEA 424 Perspectives on East Asia for Teachers (3, max. 6) I&S** Substantive concepts, resources, and materials employed in teaching about East Asia. Requirements may vary in relation to the background of participants.

**SISEA 434 Demographic Issues in Asia (3-5) I&S** *Hirshman, Lavelly* Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. Addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with SOC 434.

**SISEA 435 Japanese Government and Politics (5) I&S** *Hellmann* Government and politics of Japan with emphasis on the period since 1945. Offered: jointly with POL S 435.

**SISEA 440 The Emergence of Postwar Japan (5) I&S** *Pyle* The making of modern Japan; World War II and surrender; American occupation; post-occupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 423. Offered: jointly with HSTAS 424.

**SISEA 441 Economic and Social History of Japan to 1900 (5) I&S** *Hanley* Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: SISEA 341/HSTAS 341. Offered: jointly with HSTAS 441.

**SISEA 442 Political Economy of Postwar Japan (5) I&S** *Anchorodoguy* Political and economic problems of Japan since 1945. Utility of competing theoretical approaches to analysis of government and economy of Japan. Policy-making processes and effects of policies adopted. Some knowledge of postwar Japan desirable. Recommended: SISEA 440/HSTAS 424.

**SISEA 443 Class and Culture in East Asia (5) I&S** Examines the nexus between culture and systems of social stratification/class in East Asia, with an emphasis on Taiwan, Korea, Japan, and China. Topics include class formation, mechanisms of social mobility and reproduction, markers of status and hierarchy, resistance, and the formation of class identity. Offered: jointly with ANTH 446.

**SISEA 444 Politics of Representation in Modern China (5) I&S** Focuses on issues of representation and power in twentieth century China. Combines substantive information on modern Chinese society and culture with recent debates in social theory and the politics of representation. Major themes include Chinese nationalism, body politics, popular culture, and everyday practice. Offered: jointly with ANTH 444.

**SISEA 445 Religion in China (5) I&S** *Harrell* Religion in Chinese society, doctrines, practices, and social consequences of the eclectic folk religion, the elite Confucian, Taoist, and Buddhist traditions, syncretistic sects, and imported Christianity. Prerequisite: either one 200-level ANTH course, ANTH 370, ANTH 403, LING 203, HSTAS 211, HSTAS 454, RELIG 202, SISEA 370, or SISEA 443. Offered: jointly with ANTH 447.

**SISEA 448 Modern Korean Society (5) I&S** *Sorensen* Social organization and values of twentieth-century Korea. Changes in family and kinship, gender relations, rural society, urban life, education, and industrial organization since 1900. Differences between North and South Korea since 1945. Recommended: HSTAS/SISEA 212. Offered: jointly with ANTH 448.

**SISEA 449 Government and Politics of China (5) I&S** *Whiting* Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with POL S 442.

**SISEA 454 History of Modern China (5) I&S** *Dong* Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with HSTAS 454

**SISEA 459 United States-China Relations (5) I&S** *Bachman* Surveys the history of United States-China relations and examines the evolution of bilateral relations, particularly since 1949. Focus on the period since 1972 and the major issues as they have evolved since that time, including trade, human rights, security, and Taiwan. Offered: jointly with POL S 419.

**SISEA 468 China's Economic Reforms: Integration Into World Economy (5) I&S** A systematic survey of China's economic reforms since 1978, including China's increasing integration into world economy. Prerequisite: ECON 201. Offered: jointly with ECON 468.

**SISEA 470 Minority Peoples of China (5) I&S** *Harrell* Interaction between China and the peoples of its periphery, including Inner Asia, Tibet, Northern Mainland, Southeast Asia, and aboriginal peoples of Taiwan. Emphasis on ethnicity, ethnic group consciousness, and role of the Chinese state. Prerequisite: either ANTH/SISEA 370, HSTAS 454, LING 203, or one 200-level ANTH course. Offered: jointly with ANTH 470.

**SISEA 475 Japanese Society (5) I&S** *Hanley* Discusses rapidly changing Japanese society and history of its unique aspects. Readings and lectures in sociology, anthropology, economics, and politics; emphasis on Japanese search for cultural identity and prevalent interpretations of Japanese society and behavior. Recommended: SISEA 341/HSTAS 341.

**SISEA 478 Readings in the Social Sciences in Japanese (3-5) I&S** Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

**SISEA 479 Readings in the Social Sciences in Japanese (3-5) I&S** Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

**SISEA 480 New Orders in East Asia (5) I&S** *Pyle* Rise and fall of successive international systems in East Asia over the past 150 years: Sino-centric, imperialist, Washington Treaty system, Japan's East Asian order, Yalta system, cold-war system. Post-cold-war search for a new order. Special attention to triangular relations among the United States, China, and Japan.

**SISEA 482 Japanese Business and Technology (5) I&S** *Anchorodoguy* Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future.

**SISEA 490 Special Topics (1-5, max. 15) I&S** Course content varies.

**SISEA 494 Economy of Japan (5) I&S** *Yamamura* Analysis of the economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisite: ECON 201. Offered: jointly with ECON 494.

### Courses for Graduates Only

**SISEA 517- Foreign Trade and Investment Law of the People's Republic of China (1-4, max. 4) I&S** Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their implementation in practice, as well as the political and economic background. Offered: jointly with LAW E 517.

**SISEA 521- Seminar: Introduction to the Interdisciplinary Study of China (5-)** *Guy, Harrell*

**SISEA -522 Seminar: Introduction to the Interdisciplinary Study of China (-5)** *Guy, Harrell*

**SISEA 530 Seminar on China (3, max. 6)** Problems of Chinese history. Prerequisite: permission of instructor.

**SISEA 532 The Chinese Political System (5)** Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with POL S 532.

**SISEA 533 Seminar on Contemporary Chinese Politics (5)** Research on selected problems in contemporary Chinese politics. Prerequisite: SISEA 532 or permission of instructor. Offered: jointly with POL S 533.

**SISEA 535 International Relations of Modern China (5)** Foreign policy of the People's Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with POL S 535.

**SISEA 540 Law in East Asia: Japan (4)** *Footie, Haley* Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with LAW B 540.

**SISEA 541 Economic and Social History of Japan to 1900 (5)** *Hanley* Analyses of landholding systems, the rise of commerce, demographic changes, urbanization, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken 441. Offered: jointly with HSTAS 541.

**SISEA 543 Law in East Asia: China (3)** *Clarke* Introduction to the basic institutions and processes of the Chinese legal system. Development and role of law in both the traditional and contemporary periods. Offered: jointly with LAW B 541.

**SISEA 550 Japan, the United States, and New Orders in Asia (5)** *Pyle* Seeks historical understanding of establishment of new order in contemporary East Asia. Analyzes the imperialist, Washington conference, and cold war systems and explores the present post-cold war search for a new order. Prerequisite: one course in modern Japanese history, political economy, or political science.

**SISEA 551 International Relations of Northeast Asia (5)** *Hellmann* Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economics are examined. Prerequisite: permission of instructor. Offered: jointly with POL S 539.

**SISEA 554- Introduction to Japanese Studies (2-)** *Hanley* Interdisciplinary introduction to the study of Japan, with emphasis on historical development. Required seminar for first-year graduate students.

**SISEA -555 Introduction to Japanese Studies (-[4/6])** *Hanley* Interdisciplinary introduction to the study of Japan, with emphasis on historical development. Required seminar for first-year graduate students.

**SISEA 558 Readings on Japan in the Social Sciences (5)** Seminar discussing articles in Japanese in economics, history, political science, and other social sciences. Assignments from major Japanese monthlies and academic works. Prerequisite: JAPAN 313 or equivalent and permission of instructor.

**SISEA 559 Interdisciplinary Seminar on Japan (5)** Advanced readings in history and the social sciences. Prerequisite: permission of instructor.

**SISEA 575 Seminar on Japanese Society (5)** *Hanley* Interdisciplinary seminar with class-led discussions on readings from anthropology, history, sociology, and nondiscipline-specific articles on Japanese society. Prerequisite: background on Japan. Not open to students who have taken SISEA 475.

**SISEA 577 Readings on Political Economy of Japan (5)** *Anchorodoguy* Analysis of major issues such as the Japanese state's role in industrial development, Japan's trade and investment in Asia, US-Japan trade and security relations, and Japan's model of capitalism.

**SISEA 582 Japanese Business and Technology (5)** *Anchorodoguy* Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future.

**SISEA 584 Survey of Korean Society (5)** *Sorensen* Introduction to the social and political institutions of North and South Korea with an opportunity to master the most important literature on modern Korea. Focuses on the twentieth century with the major emphasis on the post-1945 period. Offered: A.

**SISEA 585 Research Seminar: Modern Korea (6)** *Sorensen* Advanced instruction in problems and methods of research in Korean history. Foreign language not required. Prerequisite: permission of instructor.

**SISEA 590 Special Topics (2-5, max. 10)** Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

**SISEA 600 Independent Study or Research (\*)**

**SISEA 700 Master's Thesis (\*)**

## European Studies

**EURO 425 European Media Systems (5) I&S** Examines media systems in selected countries in Europe and policy issues that link (or divide) members of the European Union and other major media producers. Media studied in context of the contemporary economic, social, political, and cultural milieu in which they operate. Offered: jointly with CMU 425.

**EURO 481 August Strindberg and European Cultural History (5) I&S/VLPA** Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and history of ideas from 1880 to 1912, and Strindberg's influence on 20th-century drama and film. Offered: jointly with SCAND 481.

**EURO 490 Senior Seminar I (5) I&S** Introduction to research into European topics and to the analysis of problems.

**EURO 491 Senior Seminar II (5) I&S** Writing and discussion of senior thesis. Prerequisite: EURO 490. Offered: Sp.

**EURO 498 Special Topics (1-5, max. 15) I&S**

## Jewish Studies

**SISJE 436 American Jewish History Since 1885 (5) I&S** Political, social, economic, religious history of American Jewish community from great eastern European migration to present. Integration of immigrant community into general American community; rise of nativism; development of American socialism; World War I and II; and reactions of American Jews to these events. Offered: jointly with HSTAA 436.

**SISJE 452 The Biblical Song of Songs (3) VLPA** *Noegel* Examines the erotic and beautiful Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with various interpretations it has received from antiquity until today. No knowledge of Hebrew or the Bible is required. Offered: jointly with NEAR E 452

**SISJE 453 The Biblical Prophets (3) VLPA I&S** *Noegel* Explores the biblical prophets (in translation) within their Near Eastern contexts. Studies them for their historicity, literary and rhetorical sophistication, and ideological agendas. This course seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible is required. Offered: jointly with NEAR E 453.

**SISJE 454 Israel: The First Six Centuries BCE (3) VLPA I&S** *Noegel* Traces the Israelites, from the Babylonian destruction of the Jerusalemite Temple (586 BCE) to events following the destruction of the second Temple (1st century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible is required. Offered: jointly with NEAR E 454.

**SISJE 455 The Kings of Monarchic Israel (3) VLPA I&S** *Noegel* Examines the biblical accounts (in translation) concerning the formation and collapse of the united Israelite monarchy. Investigates the archaeological and textual evidence for their historicity, the literary sophistication of these accounts, and Israelite kingship within the wider context of the ancient Near East. No knowledge of the Bible is required. Offered: jointly with NEAR E 455.

**SISJE 464 The Jews in Spanish History (5) I&S** *Ullman* Sephardic Jews in Spanish politics, economy, and culture, emphasizing the medieval Golden Age and the Inquisition. Offered: jointly with HSTEU 464.

**SISJE 465 The Jews of Eastern Europe (5) I&S** Jewish society in Poland, Russia, the Habsburg Lands, and Romania from the late Middle Ages to the Holocaust. Offered: jointly with HSTEU 465.

**SISJE 466 The Sephardic Diaspora: 1492-Present (5) I&S** *Stein* Examines the history and culture of Sephardic Jewry from the expulsion from the Iberian Peninsula in 1492 to the present. Explores the creation of Sephardic communities in the Dutch and Ottoman Empires, Western Europe, the Americas, and Africa, and the history of the conversos and "hidden Jews." Offered: jointly with HSTEU 466.

**SISJE 467 Medieval Jewish History (5) I&S** *Stacey* Social and intellectual history of the Jews in Western Europe to fifteenth century. Jews under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Offered: jointly with HSTEU 467.

**SISJE 468 Early Modern Jewish History, 1492-1789 (5) I&S** *Stein* Jews in the early-modern period. The Spanish expulsion in 1492 to the onset of political and social emancipation in western Europe and America. Offered: jointly with HSTEU 468.

**SISJE 469 Enlightenment, Emancipation, Antisemitism: History of the Jews, 1770-1914 (5) I&S** *Stein* The Jewish experience in the modern world from the European Enlightenment to the First World War. Focus on the debates surrounding Jewish emancipation, the reception of Jews within European society, modern antisemitism, nationalist movements, mass migration, and war. Offered: jointly with HSTEU 469.

**SISJE 470 History of the Jews in the Twentieth Century (5) I&S** Historical experience of the Jews since World War I in Europe, North America, and the Middle East under the impact of three developments: growth of mass-based American Jewish community, destruction of Jewish life in Central and Eastern Europe, and creation of the State of Israel. Offered: jointly with HIST 470.

**SISJE 490 Special Topics (1-5, max. 15) I&S** Content varies.

**SISJE 495 Seminar in Jewish Studies (5) I&S** *Jaffee* History of Jewish Studies as an organized field of academic inquiry. Explores the implications for Jewish Studies of its present setting within the context of the humanities and the social sciences.

**SISJE 497 Field Archaeology (1-10, max. 20)** Professionally-guided archaeological fieldwork at a recognized archeological dig in the United States or abroad. Offered: S.

## Latin American Studies

**SISLA 451 Cultural Geography of Latin America (5) I&S** Interdisciplinary senior seminar examining how physical and social geographies are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitution of space via an interplay of material and cultural forces. Offered: jointly with GEOG 451.

**SISLA 470 Latin American Studies Internship (1-5, max. 10)** Off-campus fieldwork with a community national, or international organization, in an apprenticeship or internship situation. Supervised by on-site field supervisor and Latin American Studies faculty member.

**SISLA 480 Labor and Popular Movements in Latin America (5) I&S** Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women's movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-language Latin American studies courses. Offered: jointly with HSTAA 480.

**SISLA 485 Cultural Studies of Latin America (5) VLPA/I&S** Identity, representation, and transculturation in Latin American popular culture. Topics vary but may include, cinema, folk art, and historical, ethnographic, and travel writing. Prerequisite: SPAN 303; SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 485.

**SISLA 486 Photography and Cultural Studies in Latin America (5) VLPA/I&S** Interdisciplinary exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Offered jointly with SPAN 486.

**SISLA 490 Special Topics (1-5, max. 15) I&S** Content varies.

**SISLA 492 Latin American Studies Seminar (5, max. 15) I&S**

## Middle Eastern Studies

**SISME 400 The Middle East in the Modern World (5) I&S** *Kasaba* Economic, political, and cultural ties between the Middle East and the modern world between the eighteenth century and the present. Particular attention to the transformation of societies, formation of modern states, the relationship between Islam and democracy, and gender and society in the Middle East.

**SISME 430 Economic Development of the Middle East (5) I&S** *Kasaba* Comparative examination of economic development in the Middle East. Includes population growth, agrarian change, industrialization, foreign trade, capital flows, and fiscal and monetary policies.

**SISME 490 Special Topics (1-5, max. 15) I&S** Content varies.

**SISME 495 Trends in the Contemporary Middle East (3) I&S** Perspectives on cultural, political, and other aspects of Middle Eastern societies. Focuses on background complexities rather than immediate political-military confrontations. Topics vary. Offered: jointly with NEAR E 495.

## Courses for Graduates Only

**SISME 530 Reading Seminar on Middle East Studies (2)** Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

**SISME 531 Reading Seminar on Middle East Studies (2)** Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

**SISME 532 Reading Seminar on Middle East Studies (2)** Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

**SISME 590 Special Topics (3-5, max. 10)** Content varies.

**SISME 600 Independent Study or Research (\*)**

**SISME 700 Master's Thesis (\*)**

## Russian, East European, and Central Asian Studies

**SISRE 418 Eastern Europe: the Political Economy of the Region (5) I&S** *Poznanski* Focus on the classical command-type economy and the most recent economic and political transition in Eastern Europe. Analysis of current institutional reform, privatization, and trade relations.

**SISRE 424 Security Affairs of Russia and Eurasia (5) I&S** *Jones* Surveys history of Soviet military and Soviet empire from 1917 to 1985, breakup of the USSR during 1985 to 1991, and the emergence of new security issues among those Eurasian states that formally constituted the national components of the USSR and its communist military allies.

**SISRE 425 Anthropology of the Post-Soviet States (5) I&S** Analysis of Soviet and post-Soviet culture and identity. Historical transformations in Soviet approaches to ethnicity and nationality; contemporary processes of nationbuilding and interethnic conflict. Examination of culture through the intersection of social ritual, government policies, language, economic practices, and daily life. Regional focus will vary. Offered: jointly with ANTH 425.

**SISRE 443 Kievan and Muscovite Russia: 850-1700 (5) I&S** Development of Russia from earliest times to the reign of Peter the Great. Offered jointly with HSTAM 443.

**SISRE 445 Politics and Society Eastern Europe (5) I&S** *Ramet* Political and social issues in lands east of the Elbe, treating some historical problems but focusing particularly on developments since 1945. Includes all communist states of Eastern Europe and their successors. Offered: jointly with POL S 445.

**SISRE 448 Twentieth-Century Russia (5) I&S** Russia and the USSR from Nicholas II to the present. Offered: jointly with HSTEU 445.

**SISRE 455 Marine Business Environment in Russia and Eastern Europe (3) I&S** *Kaczynski* International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipbuilding, ports, and land infrastructures, marine tourism, and water sports. Offered: jointly with SMA 455.

**SISRE 457 Senior Colloquium (5) I&S** Required for majors. Involves writing of senior thesis. Prerequisite: SISRE 343; either RMN/ROMN 406, BULGR 406, CR SB 406, CZECH 406, POLSH 406, ROMN 406, or RUSS 203.

**SISRE 490 Special Topics (1-5, max. 15) I&S** Topics vary.

## Courses for Graduates Only

**SISRE 500 Interdisciplinary Seminar (3)** Contemporary problems in the societal, political, and economic development of Russia and East Europe. Seminars are devoted to specific topics, such as comparative cultures and ethnic minorities; economic development and environmental degradation; comparative communism; problems of a similar interdisciplinary nature. Prerequisite: permission of instructor. Required of all first-year MAIS students.

**SISRE 501 Bibliography and Research Methods (3)** Introduction to bibliography and other scholarly resources in field; development of research techniques. Some use of relevant language required. Required of all first-year MAIS students. Credit/no credit only.

**SISRE 502 Thesis Seminar (3)** Required of all second-year MAIS students. Credit/no credit only.

**SISRE 504 Approaches to East European Politics (3-5)** *Ramet* Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and south-eastern Europe. Prerequisite: permission of instructor. Offered: jointly with POL S 537.

**SISRE 505 Seminar: Problems of Social and Political Development in Eastern Europe (3-6, max. 6)** *Ramet* Research seminar dealing with selected problems of continuity and change in eastern Europe. Prerequisite: some previous course work on eastern Europe.

**SISRE 555 Russian Ocean Policy (3)** *Kaczynski* Russian ocean policy following perestroika and disintegration of Soviet empire. Discusses Russian navy, fishery industry, merchant marine, ocean research fleet, in light of international agreements, and joint ventures and new political, economic, and social environments. Prerequisite: knowledge of Soviet/Russian socio-economic problems or permission of instructor. Offered: jointly with SMA 555.

**SISRE 590 Special Topics (2-5, max. 10)** Course content varies. Offered occasionally by visitors or resident faculty.

**SISRE 600 Independent Study or Research (\*)**

**SISRE 700 Master's Thesis (\*)**

## South Asian Studies

**SISSA 434 International Relations of South Asia (5) I&S** Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with POL S 434.

**SISSA 490 Special Topics (1-5, max. 15) I&S** Topics vary.

## Courses for Graduates Only

**SISSA 510 Introduction to Interdisciplinary Study of South Asia (5)** *Conlon* Examines work done in the various disciplines focusing on South Asia.

**SISSA 511 Seminar on South Asia (5)** Interdisciplinary seminar for graduate students in which research and writing on individual research topics are critically developed. Designed to provide each student with an opportunity to synthesize his or her studies on South Asia. Prerequisite: SISSA 510 or permission of graduate program coordinator.

**SISSA 590 Special Topics (2-5, max. 10)** Seminar. Course content varies. Offered occasionally by visitors or resident faculty.

**SISSA 600 Independent Study or Research (\*)**

**SISSA 700 Master's Thesis (\*)**

## Southeast Asian Studies

**SISSE 445 Literature and Society in Southeast Asia (5, max. 10) VLPA/I&S** Focus on either Vietnam or Thailand. Provides students with opportunity to explore how those living in Southeast Asia have reflected on the radical social changes their societies have undergone through novels, short stories, and poetry. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 445.

**SISSE 469 Topics in Southeast Asian History (5) I&S** Introduces major issues within the history and culture of one country of Southeast Asia. Content varies. Topics may include religion, economics, colonialism, perspectives on gender, labor history, literatures, popular culture, and performing arts. Focuses on a different Southeast Asian country each time offered. Offered: jointly with HSTAS 469.

**SISSE 490 Special Topics in Southeast Asian Studies (2-5, max. 15) I&S** Content varies.

## Linguistics

A210 Padelford

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/linguistics.html](http://www.washington.edu/students/genocat/academic/linguistics.html)

Department Web page:  
[depts.washington.edu/lingweb/](http://depts.washington.edu/lingweb/)

Linguistics is the scientific study of language, which is one of the most characteristic human attributes. Courses provide training in the method and theory of language analysis and description, as well as studies of language change and language in society. The Romance Linguistics program allows the student to specialize in the analysis and history of one or more Romance languages.

## Graduate Program

Graduate Program Coordinator  
A210B Padelford, Box 354340  
(206) 543-2046  
phoneme@u.washington.edu

The Department of Linguistics offers a program of study for graduate students leading to the degrees of Master of Arts and Doctor of Philosophy. The program is administered by the departmental faculty. The major interest of the core faculty lies in syntax, semantics, phonetics, phonology, sociolinguistics, and in theoretical aspects of second-language acquisition.

Some course work is also available in various cooperating departments. Among those fields represented outside the department are anthropological linguistics, psycholinguistics, philosophy of language, and the structure and history of a number of individual languages and language families.

*Admission Requirements:* At least one previous course in linguistics is highly recommended, as is proficiency in one language other than the student's native language. Three letters of recommendation and Graduate Record Examination scores are required for all applicants. Doctoral degree applicants should send the department a copy of their master's thesis or a paper of high quality, or both.

### Master of Arts

(1) Two courses each in syntax and phonetics/phonology. (2) One course in semantics. (3) Three courses not in categories (1) and (2) above. (4) Three courses at the 400 or 500 level. At least two of these must be 500-level courses for which papers or projects are required. (LING 504, 505, 506, 507, 508, and 509 do not qualify for this requirement. Also note the University requirement for 9 credits at the 500 to 600 level.) (5) No course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option. (6) Demonstrated ability to read the linguistic literature in a language other than English. This can be satisfied at any time during the program by arrangement with the Graduate Program Coordinator. (7) An M.A. exam in any areas in which the grade point average for the required course work in that area is below 3.30. (8) A short M.A. thesis (30 to 50 pages), which will typically be an expansion of a term paper. Students must register for 9 credits of LING 700.

### Doctor of Philosophy

Direct admission to the Ph.D. program will be considered on an individual basis for applicants holding a degree from a comparable M.A. thesis program in linguistics or a closely related field. Some applicants may be granted admission directly into the Ph.D. program, with the stipulation that they make up one or more M.A.-level deficiencies.

Requirements for the Ph.D. degree are an M.A. degree plus the following:

- 35 additional credits of course work. At least 18 credits at the 500 level and above must be completed before the General Exam, 9 credits of which must follow the M.A. A minimum cumulative GPA of 3.00 is required for graduate course work. One year (three quarters) of full-time registration is required by the Graduate School.
- During the course of the entire M.A.-Ph.D. program, the student must have completed at least three courses each in syntax and phonetics/phonology and at least two courses in semantics, and have taken a total of five 500-level classes for which papers or projects are required. (LING 504, 505, 506, 507, 508, and 509 do not qualify for this requirement.) There is also a major, minor, and breadth requirement as follows: *Major*—six courses in the student's primary area of specialization; *Minor*—four courses in a second area (the major and minor together should form a coherent research area); *Breadth*—eight courses in other areas of the field. The students supervisory committee will be the final judge of what courses might qualify to meet these requirements. However, it is worth noting that (a) courses fulfilling these requirements do not necessarily have to be offered from within the Department of Linguistics; (b) non-language instruction courses in a language area can fulfill the major or minor requirement; and (c) no course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option.
- 27 credits of LING 800.
- An exotic language requirement as follows: (a) for native speakers of an Indo-European language, a year of a non-Indo-European language; (b) for native speakers of a non-Indo-European language, a year of a language that is not English or in the same sub-family as their language. The student has the right to petition the supervisory committee to allow a language excluded in (a) or (b) above.
- Two linguistic papers delivered at a colloquium or conference. Each will be evaluated by a member of the student's Ph.D. committee with expertise in the area of the paper. The evaluation may be either of the oral presentation or of the paper in written form. The student should request evaluation by a faculty member for any paper to be considered for this requirement.

## Faculty

### Chair

Frederick J. Newmeyer

### Professors

Augerot, James E. \* 1960, (Adjunct); MA, 1959, New Mexico Highlands University; PhD, 1968, University of Washington; Slavic linguistics, Romanian, Bulgarian.

Brame, Michael K. \* 1974; PhD, 1970, Massachusetts Institute of Technology; syntax, phonology, structure of Arabic and English.

Contreras, Heles \* 1964, (Emeritus); PhD, 1961, Indiana University; Spanish linguistics, syntax and semantics.

Dale, Philip S. \* 1968, (Adjunct); PhD, 1968, University of Michigan; psycholinguistics, language and cognitive development in normal and exceptional children.

Kaisse, Ellen \* 1976; PhD, 1977, Harvard University; phonology, historical linguistics, ancient and modern Greek, Spanish, syntax-phonology interface.

Klausenburger, Jurgen \* 1969; PhD, 1969, University of Michigan; Romance linguistics.

Micklesen, Lew R. \* 1966, (Emeritus); PhD, 1951, Harvard University; Slavic linguistics.

Newmeyer, Frederick J. \* 1969; PhD, 1969, University of Illinois; theoretical and English syntax, history of linguistics.

Shapiro, Michael C. \* 1970, (Adjunct); PhD, 1973, University of Chicago; Indo-Aryan languages and linguistics.

Silberstein, Sandra V. \* 1982, (Adjunct); PhD, 1982, University of Michigan; TESL, critical theory, discourse analysis, sociolinguistics, language and culture.

Tarlinkskaya, Marina \* 1984, (Research); DPhil, 1976, Moscow Institute of Foreign Languages; theory of translation, theory of versification, second language acquisition, semantics.

Tollefson, James W. \* 1984, (Adjunct); PhD, 1978, Stanford University; English as a second language, language planning.

Voyles, Joseph B. \* 1965, (Adjunct); PhD, 1965, Indiana University; Germanics and linguistics.

### Associate Professors

Coats, Herbert S. \* 1968, (Adjunct); MA, 1964, Fordham University; PhD, 1970, University of Illinois; Slavic linguistics, Russian phonology, Russian syntax, Slavic accentuation.

Hargus, Sharon Louise \* 1985; PhD, 1985, University of California (Los Angeles); phonology, morphology, northwestern Native American languages, lexicography, phonetics.

Herschensohn, Julia R. \* 1985; PhD, 1976, University of Washington; Romance linguistics, French syntax, second language acquisition.

Ogihara, Toshiyuki \* 1991; PhD, 1989, University of Texas (Austin); semantic theory, structure of Japanese, syntax-semantics interface.

Riggenbach, Heidi R. \* 1989, (Adjunct); PhD, 1989, University of California (Los Angeles); teaching English as a second language, discourse analysis, sociolinguistics.

Strozer, Judith R. \* 1987; PhD, 1976, University of California (Los Angeles); comparative Romance syntax, second language acquisition, foreign language teaching.

Zagona, Karen T. \* 1987; PhD, 1982, University of Washington; syntactic theory and Spanish syntax, tense, and aspect.

### Assistant Professors

Kim, Soowon \* 1992; PhD, 1991, Brandeis University; syntactic theory, syntax-semantics interface, argument structure, Japanese/Korean linguistics.

Wassink, Alicia Beckford \* 1998; PhD, 1999, University of Michigan; sociolinguistics, experimental phonetics, creole linguistics.

Wright, Richard A. \* 1998; PhD, 1996, University of California (Los Angeles); production and perception of language, phonetics and phonology of African and Austronesian languages.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### Linguistics

**LING 400 Survey of Linguistic Method and Theory (4) I&S/VLPA, QSR** Major linguistic theories in phonology, syntax and semantics; linguistic analysis and argumentation. Intended for students who plan to pursue further linguistic or language-related study. Students who have taken LING 200 or 201 should not take LING 400, although credit is allowed for both if 400 is taken after 200 or 201.

**LING 402 Survey of the History of Linguistics (3) VLPA/I&S** *Newmeyer* Main trends in linguistic theory and philosophy of linguistics from ancient times through advent of transformational-generative grammar. Includes nineteenth-century comparative and historical grammar, Prague school grammar, American structuralist grammar, major concerns of linguistics today. Prerequisite: LING 451.

**LING 403 Structure of American Sign Language (5) VLPA** *Hargus* Introduction to the phonological, morphological, and syntactic structure of American Sign Language. Topics include acquisition, sociolinguistics, neurolinguistics, lexicography, history, and culture. Knowledge of American Sign Language is not required. Prerequisite: LING 200, 201, 203, or 400.

**LING 404 Indo-European (3) VLPA** *Voyles* Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

**LING 432 Sociolinguistics I (5) VLPA/I&S** *Wassink* Social variation in the phonology, morphology, syntax, lexicon of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, ethnography of speaking, pragmatics, and language attitudes. Prerequisite: LING 400; recommended: prior or concurrent registration in LING 451. Offered: jointly with ANTH 432.

**LING 433 Language Politics and Cultural Identity (3) VLPA/I&S** *Bilaniuk* Theories and case studies of the power of language and how it is manipulated. Multilingualism, diglossia. Role of language and linguistics in nationalism. Standardization, educational policy, language and ethnicity. World languages, language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with ANTH 464.

**LING 434 Sociolinguistics II (3) VLPA/I&S** *Wassink* Examines field methods linguists use in socially oriented studies of language variation and change. Students learn to target and design interviews appropriate for eliciting specific kinds of linguistic data. Discussion of issues related to recording, ethics, and analysis of large bodies of data. Prerequisite: LING 432. Offered: jointly with ANTH 433.

**LING 442 Semantics I (4) VLPA/NW** *Ogihara* Introduction to the study of meaning as part of linguistic theory. Relation of semantics to syntax. Emphasis on formal semantics and pragmatics. Discussion of various semantic phenomena in natural language that are theoretically relevant. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

**LING 444 Philosophy of Language-Pragmatics (3) VLPA/I&S** *Potter* Language as communicative activity. Speech act theory in Austin, Grice, and contemporary writings. Applications to problems of reference, presupposition, metaphor, relativism. Offered: jointly with PHIL 444.

**LING 446 Descriptive Aspects of English: Phonology and Morphology (3) VLPA** *Hargus, Kaisse* Descriptively oriented analysis of English phonology and morphology; dialect differences. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

**LING 447 Psychology of Language II (4) VLPA/I&S** *Corina, Osterhout* Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: jointly with PSYCH 447.

**LING 449 Second-Language Learning (3) VLPA** *Herschensohn, Tarlinkskaja* Issues related to the psychological aspects of second-language learning. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

**LING 450 Introduction to Linguistic Phonetics (5) VLPA/NW** *Wright* Introduction to the articulatory and acoustic correlates of phonological features. Issues covered include the mapping of dynamic events to static representations, phonetic evidence for phonological description, universal constraints on phonological structure, and implications of psychological speech-sound categorization for phonological theory. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

**LING 451 Phonology I (4) VLPA/I&S** *Hargus, Kaisse* Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 450.

**LING 452 Phonology II (4) VLPA/I&S** *Hargus, Kaisse* Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 451.

**LING 453 Phonology III (4) I&S/NW/VLPA** *Hargus, Kaisse* Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 451.

**LING 455 Areal Linguistics (3, max. 6) VLPA/I&S** Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Processes such as borrowing, vocabulary specialization, lexical change, and language death and revival. Offered: jointly with ANTH 455.

**LING 457 Language Development (5) VLPA/I&S** *Dale* First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: either PSYCH 306, LING 200, or LING 400. Offered: jointly with PSYCH 457.

**LING 458 Language and Gender (5) I&S, VLPA** *Bilaniuk* Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis and other aspects of identity such as sexuality, class, and age. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450 and WOMEN 450.

**LING 461 Syntax I (4) VLPA/I&S** *Brame, Contreras, Kim, Newmeyer, Zagona* Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

**LING 462 Syntax II (4) VLPA/I&S** *Brame, Contreras, Kim, Newmeyer, Zagona* Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 461.

**LING 472 Introduction to Computational Linguistics (3) VLPA** *Hoard* Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: LING 461. Offered: jointly with CSE 472.

**LING 476 Philosophy of Language (5) VLPA/I&S** Current theories of meaning, reference, predication, and related concepts. Offered: jointly with PHIL 453.

**LING 479 Semantics II (3) VLPA/I&S/NW** *Ogihara* Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with PHIL 479.

**LING 480 Topics in Linguistics (3, max. 12) VLPA** Introduction to an area of linguistic study not covered by the regular departmental course offerings.

**LING 481 Introduction to Morphology (4) VLPA** *Brame, Hargus, Kaisse, Newmeyer* Structure of words and the processes by which they are formed. Morphological processes in a wide variety of languages. Prerequisite: LING 451; LING 461.

**LING 484 Lexical Semantics and the Lexicon (3) VLPA** *Kim* Role of the lexicon in syntax and semantics. Topics include the syntax-lexicon mapping; theories of argument structure; complex predicate formation and lexical subordination; the lexicon and language acquisition; the role of the lexicon in linguistic theory; and the lexicon and sentence processing. Prerequisite: LING 461.

**LING 499 Undergraduate Research (1-5, max. 5)** Credit/no credit only.

## Courses for Graduates Only

**LING 501 Field Methods (3)** Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 453, LING 462, or permission of instructor.

**LING 507 Syntactic Theory I (4)** Introduction to the principles and parameters model of syntactic theory. The lexicon and its relation to syntactic representations. Syntactic modules and principles. Problem solving.

**LING 508 Syntactic Theory II (4)** Historical antecedents of the principles-and-parameters theory. Lexicalism versus transformationalism. The unification of transformational operations and conditions. Origins of subtheories. Extensive reading list of primary sources. Practical training in syntactic argumentation. Prerequisite: LING 507 or permission of instructor.

**LING 509 Syntactic Theory III (4)** Current issues in syntactic theory, including logical form, empty categories, the range of parametric variation, barriers, minimality, and the status of functional categories. Training in the methodology of syntactic research. Prerequisite: LING 508 or permission of instructor.

**LING 514 Seminar in Comparative Linguistics (3)** *Kaisse* Nineteenth- and twentieth-century theories of phonological change. Prerequisite: LING 404 or permission of instructor.

**LING 519 Mathematical Models of Grammar (3)** *Brame, Ogihara* Study of some mathematical models of language recognition, emphasizing context-free and context-sensitive grammars. Prerequisite:

graduate standing in mathematics, linguistics, or psychology, or permission of instructor.

**LING 522 Topics in the History of Linguistics (3)** *Newmeyer* Intensive investigation of the main trends in the history of linguistics, concentrating on the development of nineteenth-century historical linguistics, the various schools of structural linguistics, and transformational-generative grammar. Prerequisite: LING 451, LING 461.

**LING 525 Seminar in Theoretical Phonology (4, max. 12)** Individual and joint research on selected topics in theoretical phonology. Topics vary. Typical offerings include phonology and the lexicon, syntax and phonology, phonological representations. Prerequisite: LING 453.

**LING 531 Problems in Romance Linguistics (2-5, max. 15)** Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with ROLING 531.

**LING 550 Advanced Phonology (2-3)** *Hargus, Kaisse* Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 451, LING 452, LING 453.

**LING 551 Advanced Phonology (2-3)** *Hargus, Kaisse* Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 451, LING 452, LING 453.

**LING 552 Advanced Phonology (2-3)** *Hargus, Kaisse* Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 451, LING 452, LING 453.

**LING 553 Analysis of Linguistic Structures (3, max. 6)** Syntactic, semantic, and/or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with ANTH 553.

**LING 554 Advanced Linguistic Phonetics (3, max. 9)** *Wright, Wassink* Individual and joint projects on selected topics in theoretical and experimental phonetics. Topics may include articulatory timing, the phonetics phonology interface, and constraints and constraint interaction. Prerequisite: LING 450 or LING 452. Offered: Sp.

**LING 562 Advanced Syntax (2-3, max. 9)** Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

**LING 563 Advanced Syntax (2-3, max. 9)** Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

**LING 580 Problems in Linguistics (2-3, max. 12)** Advanced study in current theories of syntax, semantics, phonology, or morphology.

**LING 599 Linguistics Colloquium (1, max. 6)** Seminar attended by faculty and graduate students to discuss research in progress and topics of general interest. Presentation of two seminars required for doctoral students. Prerequisite: permission of instructor.

**LING 600 Independent Study or Research (\*)**

**LING 700 Master's Thesis (\*)**

**LING 800 Doctoral Dissertation (\*)**

## French Linguistics

**FRLING 400 The Syntactic Structure of French (5) VLPA** Scientific study of the syntax of French: phrase structure and movement, with emphasis on passives, relatives, and interrogatives. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

**FRLING 401 The Morphological Structure of French (5) VLPA** *Klausenburger* Linguistic study of French morphology. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

**FRLING 402 The Phonological Structure of French (5) VLPA** *Klausenburger* The phonological component of the generative grammar of French: representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

**FRLING 403 Background of Modern French (5) VLPA** *Klausenburger* Linguistic analysis of the important developments in the history of the French language from its Latin origin to contemporary speech. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

**FRLING 406 Advanced French Grammar (5) VLPA** *Herschensohn* Problems of French grammar. Differences between forms and structures of French and English. Problems of effective teaching of French. Prerequisite: FRENCH 303.

**FRLING 409 The Phonetics of French (5) VLPA** *Klausenburger* Scientific study of the French sound system with special emphasis on "lower level" phonetic rules. Focus on data from standard French as well as socioeconomic and geographic variations. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

## Romance Linguistics

**ROLING 402 Historical Romance Linguistics (5) VLPA** *Klausenburger* Comparative historical survey of the development of the principal Romance tongues. Prerequisite: LING 400.

**ROLING 490 Senior Essay (2) VLPA** Essay on linguistic problem of student's choice written with faculty consultant.

## Courses for Graduates Only

**ROLING 518 Foreign Language Teaching Methodology (2)** *Brandl* Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology.

**ROLING 531 Problems in Romance Linguistics (2-5, max. 15)** Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with LING 531.

**ROLING 551 Romance Linguistics: History, Methodology, and Bibliography (5)** For new graduate students in the Romance linguistics program. History of Romance linguistics and linguistic science in the nineteenth and twentieth centuries as it relates to Romance studies. Comparative and descriptive methods used in contemporary scholarship. Prerequisite: ROLING 401 or LING 200 or equivalent.

**ROLING 600 Independent Study or Research (\*)**

## Spanish Linguistics

### SPLING 400 The Syntactic Structure of Spanish (5)

**VLPA** Strozer, Zagona Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPAN 400.

### SPLING 401 The Morphological Structure of Spanish (5)

**VLPA** Strozer, Zagona Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPAN 401.

### SPLING 402 The Phonological Structure of Spanish (5)

**VLPA** Strozer, Zagona Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPAN 402.

### SPLING 403 The Evolution of the Spanish Language (5)

**VLPA** Zagona Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPAN 403.

### SPLING 406 Advanced Spanish Grammar (5)

**VLPA** Anderson, Strozer Problems of Spanish grammar. Difference from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: SPAN 303; SPAN 323. Offered: jointly with SPAN 406.

### SPLING 409 Spanish Phonetics (5)

**VLPA** Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish language in its modalities. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPAN 409.

## Mathematics

C138 Padelford

General Catalog Web page:  
[www.washington.edu/students/gencat/academic/mathematics.html](http://www.washington.edu/students/gencat/academic/mathematics.html)

Department Web page:  
[www.math.washington.edu](http://www.math.washington.edu)

Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, mathematics is a surprisingly effective tool for describing the natural world. Indeed, mathematics has come to serve as the foundation of modern science, through its language and results. Some mathematical results were initially developed in order to solve internally generated mathematical problems and only later found application in other disciplines; other mathematical results were inspired by the needs of these other disciplines. The two facets of mathematics—tool of science and subject of inquiry for its own sake—have come to be interwoven into a complex fabric.

## Graduate Program

Graduate Program Coordinator  
C36 Padelford, Box 354350  
(206) 543-6830  
[grads@math.washington.edu](mailto:grads@math.washington.edu)

The degrees of Master of Arts, Master of Science, and Doctor of Philosophy are offered. Opportunities are available within the department for study of pure and applied mathematics for each of these degree programs. The Master of Arts degree is appropriate for students who need a broad background in advanced mathematics and who expect to continue working with mathematics of approximately the same level in their careers. The Master of Science degree is appropriate for students who expect to be working with more specialized mathematics of increasing order of complexity in their careers. The Doctor of Philosophy degree is the highest professional degree in mathematics. It is appropriate for students who plan on a career of research and/or teaching of mathematics at the highest levels.

Of the master's degrees, the M.S. non-thesis program has the most demanding course requirements and most closely matches the early stages of the Ph.D. program. Most students who enroll in the department begin their studies with the Ph.D. or M.S. non-thesis program in mind. The M.S. programs with options in numerical analysis or optimization provide more focused training in these directions, which can be useful for students seeking employment in certain industries; however, students intending to do research in these areas would normally follow the requirements of the Ph.D. program. Note that the department does not offer a master's degree in mathematics education.

### Master of Arts

*Admission Requirement:* Bachelor of Arts degree with major in mathematics or equivalent background (minimum of 45 quarter credits or 30 semester credits of mathematics beyond college algebra).

Graduation Requirements:

*With Thesis*—A minimum of nine approved one-quarter courses numbered 400 or above, at least three of which are at the 500 level, plus 9 thesis credits (700). The total must include at least two courses in each of algebra, analysis, and one other field. The thesis is defended in an oral examination.

*Without Thesis*—A minimum of twelve approved one-quarter courses numbered 400 or above, at least six of which are at the 500 level. The six courses at the 500 level should be distributed over no more than three sequences. The total must include at least two courses in each of algebra, analysis, and one other field. Oral examination in area of specialization agreed upon by the student and the chair of the examining committee.

### Master of Science

*Admission Requirement:* Bachelor of Science degree with major in mathematics, Bachelor of Arts degree with strong major in mathematics or equivalent background. In particular, at least one senior-level course in abstract algebra or real analysis is expected.

Graduation Requirements:

*With Thesis*—A total of nine numerically graded one-quarter courses from MATH 402, 403, 404; 424, 425, 426; 427, 428, 429; 441, 442, 443; any 500-level mathematics course; AMATH 507; 584, 585, 586; plus 9 thesis credits (700). Courses to include at least two quarters from each of two designated core graduate courses and one other 500-level sequence. Transfer credits are not accepted at the 400 level; other transfer credits and substitutions are at the discretion of the graduate program coordinator. The thesis, which is defended in an oral examination, should demonstrate the ability to do independent research.

*Without Thesis*—A total of twelve numerically graded one-quarter courses from MATH 402, 403, 404; 424, 425, 426; 427, 428, 429; 441, 442, 443; any 500-level mathematics course; AMATH 507; 584, 585, 586. Courses to include at least two quarters from each of three designated core graduate courses, and in addition one three-quarter sequence of 500-level mathematics courses in an area of specialization approved by the graduate program coordinator and the chair of the student's examining committee. Oral examination in the area of specialization on a topic agreed upon by the student and the chair of the examining committee, or the General Examination for the Ph.D. degree.

*Numerical Analysis/Optimization Option*—A total of twelve one-quarter courses, at least six of which are at the 500 level, chosen from MATH 424, 425, 426; 427, 428, 429; 438, 439; 441, 442, 443; 461, 462; 491, 492; any 500-level mathematics course; AMATH 507; 584, 585, 586. Courses to include four from AMATH 584-586 and MATH 594-596 (numerical analysis option) or four from AMATH 507 and MATH 509, 514-517 (optimization option). Oral examination in a special topic agreed upon by the student and the chair of the student's examining committee.

### Doctor of Philosophy

*Admission Requirement:* Mathematical training equivalent to a bachelor's degree with strong major in mathematics, including rigorous course work in real analysis and abstract algebra.

*Graduation Requirements:* Completion of Graduate School requirements to include satisfactory performance in six three-quarter sequences numbered 500 or above, including three sequences from the department's list of core graduate courses; passing of three preliminary exams; demonstration of proficiency in two of three languages: French, German, or Russian; General Examination on a special topic; dissertation that is an original piece of work; and Final Examination.

### Financial Support

Most graduate students in mathematics are supported by fellowships, research assistantships, and teaching assistantships. The workload of teaching assistants allows ample time for graduate courses and thesis work.

## Faculty

### Chair

Donald E. Marshall

### Professors

Arsove, Maynard G. \* 1951, (Emeritus); MS, 1948, PhD, 1950, Brown University; potential theory, complex function theory, theory of bases.

Birnbaum, Z. W. \* 1939, (Emeritus); PhD, 1929, John Casimir State University (Poland); probability, mathematical statistics (distribution-free statistics, reliability theory).

Blumenthal, Robert M. \* 1956, (Emeritus); PhD, 1956, Cornell University; probability theory (Markov processes).

Borgs, Christian 1999, (Affiliate); PhD, 1987, University of Munich (Germany); field theory and statistical mechanics.

Brownell, Francis H. III \* 1950, (Emeritus); PhD, 1949, Yale University; spectral analysis of Hilbert space operators, mathematical quantum mechanics.

Bube, Kenneth P. \* 1986; PhD, 1978, Stanford University; numerical analysis, partial differential equations.

Burdzy, Krzysztof \* 1988; PhD, 1984, University of California (Berkeley); probability theory.

Burke, James V. \* 1985; PhD, 1983, University of Illinois; optimization, nonsmooth analysis.

- Chayes, Jennifer T. 1999, (Affiliate); PhD, 1983, Princeton University; theoretical condensed-matter physics.
- Collingwood, David \* 1987; PhD, 1983, University of Utah; representation theory of Lie groups.
- Curjel, Caspar R. \* 1964, (Emeritus); DSc, 1960, Eidgenosse Technische Hochschule (Switzerland); algebraic topology.
- Curtis, Edward B. \* 1970; PhD, 1962, Harvard University; graph theory, networks.
- Dubisch, Roy 1961, (Emeritus); PhD, 1943, University of Chicago; teacher training, elementary and secondary curriculum.
- Duchamp, Thomas E. \* 1979; PhD, 1976, University of Illinois; differential geometry, computer graphics.
- Erickson, Kent B. \* 1973; PhD, 1970, University of Wisconsin; probability theory.
- Folland, Gerald Budge \* 1973; PhD, 1971, Princeton University; harmonic analysis and differential equations.
- Freedman, Michael H. 1999, (Affiliate); PhD, 1973, Princeton University; topology.
- Gangolli, Ramesh A. \* 1962, (Emeritus); PhD, 1961, Massachusetts Institute of Technology; probability theory, harmonic analysis on Lie groups.
- Goldstein, Allen A. \* 1964, (Emeritus); PhD, 1954, Georgetown University; approximation theory, nonlinear programming, control theory, calculus of variations.
- Goodearl, Kenneth R. \* 1998, (Affiliate); MS, 1969, PhD, 1971, University of Washington; noncommutative algebra (noetherian rings, quantum groups, regular rings,  $C^*$ -algebras).
- Graham, C. Robin \* 1984; PhD, 1981, Princeton University; partial differential equations, differential geometry, invariant theory.
- Greenbaum, Anne \* 1997; PhD, 1981, University of California (Berkeley); numerical analysis.
- Greenberg, Ralph \* 1978; PhD, 1971, Princeton University; number theory.
- Grunbaum, Branko \* 1966; PhD, 1957, Hebrew University (Israel); geometry.
- Irving, Ronald S. \* 1981; PhD, 1977, Massachusetts Institute of Technology; representations of Lie algebras and Lie groups, ring theory.
- Jans, James P. \* 1957, (Emeritus); PhD, 1955, University of Michigan; ring structures and homological algebra.
- Kas, Arnold \* 1996, (Affiliate); PhD, 1966, Stanford University; partial differential equations, applied mathematics.
- Klee, Victor \* 1953, (Emeritus); PhD, 1949, University of Virginia; convex sets, functional analysis, analysis of algorithms, optimization, combinatorics.
- Koblitz, Neal I. \* 1979; PhD, 1974, Princeton University; number theory and cryptography.
- Lee, John M. \* 1986; PhD, 1982, Massachusetts Institute of Technology; differential geometry and partial differential equations.
- Leveque, Randall J. \* 1985; PhD, 1982, Stanford University; numerical analysis, hyperbolic conservation laws, computational fluid dynamics.
- Lind, Douglas A. \* 1976; PhD, 1973, Stanford University; ergodic theory.
- Lovasz, Laszlo \* 1999, (Affiliate); PhD, 1977, Hungarian Academy of Sciences; discrete mathematics.
- Marshall, Donald E. \* 1976; PhD, 1976, University of California (Los Angeles); complex analysis.
- Michael, Ernest A. \* 1953, (Emeritus); PhD, 1951, University of Chicago; topology.
- Mitchell, Stephen A. \* 1985; PhD, 1981, University of Washington; algebraic topology.
- Morrow, James Allen \* 1969; PhD, 1967, Stanford University; complex singularities, inverse problems.
- Namioka, Isaac \* 1963, (Emeritus); PhD, 1956, University of California (Berkeley); functional analysis.
- Nijenhuis, Albert \* 1988, (Affiliate); PhD, 1952, University of Amsterdam (Netherlands); geometry, combinatorics, computational complexity.
- Nunke, Ronald \* 1958, (Emeritus); PhD, 1955, University of Chicago; category theory, Abelian groups.
- Osborne, M. Scott \* 1975; PhD, 1972, Yale University; representation theory.
- Phelps, Robert R. \* 1956, (Emeritus); PhD, 1958, University of Washington; convexity, functional analysis, geometry of Banach spaces, optimization.
- Pyke, Ronald \* 1960, (Emeritus); PhD, 1956, University of Washington; probability - Brownian and empirical processes.
- Ragozin, David \* 1971; PhD, 1967, Harvard University; approximation theory, splines, wavelets, numerical analysis, harmonic analysis.
- Rockafellar, R. T. \* 1966; PhD, 1963, Harvard University; variational analysis and optimization.
- Schramm, Oded 1999, (Affiliate); MS, 1987, Hebrew University (Israel); PhD, 1990, Princeton University; complex analysis.
- Segal, Jack \* 1960; PhD, 1960, University of Georgia; topology and shape theory.
- Shorack, Galen \* 1965, (Adjunct); PhD, 1965, Stanford University; empirical processes, robustness, nonparametric statistics.
- Smith, Hart F. \* 1991; PhD, 1989, Princeton University; partial differential equations, Fourier analysis.
- Smith, S. Paul \* 1986; PhD, 1981, University of Leeds (UK); algebra.
- Stout, Edgar L. \* 1969; PhD, 1964, University of Wisconsin; complex analysis.
- Sullivan, John B. \* 1973; PhD, 1971, Cornell University; representations of classical groups.
- Sylvester, John \* 1987; PhD, 1980, New York University; partial differential equations.
- Tseng, Paul Yun \* 1990; PhD, 1986, Massachusetts Institute of Technology; optimization.
- Tuncel, Selim \* 1986; PhD, 1982, University of Warwick (UK); ergodic theory, symbolic dynamics.
- Uhlmann, Gunther A. \* 1984; PhD, 1976, Massachusetts Institute of Technology; partial differential equations.
- Warner, Garth \* 1966; PhD, 1966, University of Michigan; algebraic topology.
- Westwater, Michael J. \* 1970; PhD, 1967, Cambridge University (UK); mathematical physics.
- Devinatz, Ethan S. \* 1991; PhD, 1985, Massachusetts Institute of Technology; algebraic topology.
- King, James Richard \* 1975; PhD, 1969, University of California (Berkeley); complex manifolds, instructional computing in geometry.
- McGovern, William M. \* 1990; PhD, 1987, Massachusetts Institute of Technology; representation theory.
- Monk, George Stephen \* 1964; PhD, 1966, University of Minnesota; mathematics education.
- Moore, Robert T. \* 1968; PhD, 1964, Princeton University; operator theory, group representation, mathematical software and experimental mathematics.
- Rohde, Steffen \* 1998; PhD, 1989, University of Berlin (Germany); complex analysis, complex dynamics, geometric function theory.
- Solomyak, Boris \* 1990; PhD, 1986, Leningrad University (Russia); fractals and dynamics.
- Toro, Tatiana \* 1996; MS, 1989, PhD, 1992, Stanford University; analysis and geometric measure theory.
- Zhang, Jian James \* 1994; MS, 1985, Fudan University (China); PhD, 1991, Massachusetts Institute of Technology; algebra and noncommutative algebraic geometry.

### Assistant Professors

- Babson, Eric K. \* 1998; PhD, 1993, Massachusetts Institute of Technology; algebraic and geometric combinatorics.
- Chen, Zhen-Qing \* 1998; PhD, 1992, Washington University; probability theory and stochastic analysis.
- Hoffman, Christopher \* 1999; PhD, 1996, Stanford University; ergodic theory and probability theory.
- Iovita, Adrian \* 1998; PhD, 1996, Boston University; p-adic co-homology of algebraic varieties.
- Ozols, Vilnis \* 1968; PhD, 1967, University of California (Berkeley); Lie groups, Riemannian geometry.
- Palmieri, John \* 1999; PhD, 1991, Massachusetts Institute of Technology; algebraic topology, modular representation theory, and the connections between them.
- Pollack, Daniel \* 1996; MS, 1986, University of Pennsylvania; PhD, 1991, Stanford University; differential geometry, nonlinear partial differential equations.

### Senior Lecturer

- Warfield, Virginia 1977; MA, 1965, PhD, 1971, Brown University; probability and the teaching of mathematics.

### Lecturers

- Averbeck, Patrick J. 1998; MS, 1993, Oregon State University; mathematics education.
- Plochinski, Kenneth 1991; MS, 1983, University of Michigan; Director of Math Study Center.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**MATH 402 Introduction to Modern Algebra (3) NW**  
Algebraic systems; elementary theory of groups, rings, and fields; polynomials; topics in linear algebra; reductions of forms. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 327, or 2.0 in MATH 340. Offered: AS.

**MATH 403 Introduction to Modern Algebra (3) NW**  
Algebraic systems; elementary theory of groups, rings, and fields; polynomials; topics in linear algebra; reductions of forms. Prerequisite: 2.0 in MATH 402. Offered: WS.

**MATH 404 Introduction to Modern Algebra (3) NW** Algebraic systems; elementary theory of groups, rings, and fields; polynomials; topics in linear algebra; reductions of forms. Prerequisite: 2.0 in MATH 403. Offered: Sp.

**MATH 407 Linear Optimization (3) NW** Maximization and minimization of linear functions subject to constraints consisting of linear equations and inequalities; linear programming and mathematical modeling. Simplex method, elementary games and duality. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, or 2.0 in AMATH 352. Offered: AWS.

**MATH 408 Nonlinear Optimization (3) NW** Maximization and minimization of nonlinear functions, constrained and unconstrained; nonlinear programming problems and methods. Lagrange multipliers; Kuhn-Tucker conditions, convexity. Quadratic programming. Prerequisite: 2.0 in MATH 308; 2.0 in MATH 327. Offered: W.

**MATH 409 Discrete Optimization (3) NW** Maximization and minimization problems in graphs and networks (shortest paths, minimum spanning trees, maximum flows, minimum cost flows); transportation and trans-shipment problems, NP-completeness. Prerequisite: 2.0 in MATH 407. Offered: Sp.

**MATH 411 Introduction to Modern Algebra for Teachers (3) NW** Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Prerequisite: either 2.0 in MATH 205, 2.0 in MATH 308, or 2.0 in MATH 136. Offered: AS.

**MATH 412 Introduction to Modern Algebra for Teachers (3) NW** Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Prerequisite: 2.0 in MATH 411. Offered: WS.

**MATH 414 Number Theory (3) NW** Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet's theorem on primes in an arithmetic progression, Chebyshev's theorem on distribution of primes, the partition function, equations over finite fields. Prerequisite: either 2.0 in MATH 301 or 2.0 in MATH 402.

**MATH 415 Number Theory (3) NW** Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet's theorem on primes in an arithmetic progression, Chebyshev's theorem on distribution of primes, the partition function, equations over finite fields. Prerequisite: 2.0 in MATH 414.

**MATH 420 History of Mathematics (3) NW** Survey of the development of mathematics from its earliest beginnings through the first half of the twentieth century. Prerequisite: either 2.0 in MATH 402 or 2.0 in MATH 411, either of which may be taken concurrently. Offered: S.

**MATH 424 Fundamental Concepts of Analysis (3) NW** Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Prerequisite: either 2.0 in MATH 328 or 2.0 in MATH 335. Offered: A.

**MATH 425 Fundamental Concepts of Analysis (3) NW** Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Prerequisite: either 2.0 in MATH 326 or 2.0 in MATH 335; 2.0 in MATH 424. Offered: W.

**MATH 426 Fundamental Concepts of Analysis (3) NW** Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Prerequisite: 2.0 in MATH 425. Offered: Sp.

**MATH 427 Topics in Applied Analysis (3) NW** Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 327 or 2.0 in MATH 335; recommended: MATH 328. Offered: AS.

**MATH 428 Topics in Applied Analysis (3) NW** Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 335, or 2.0 in MATH 309 and 2.0 in MATH 327. Offered: W.

**MATH 429 Topics in Applied Analysis (3) NW** Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 427 or 2.0 in MATH 336; 2.0 in MATH 428. Offered: Sp.

**MATH 435 Introduction to Dynamical Systems (3) NW** Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. *Chaos*. Interval maps; quadratic families. Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 335 or 2.0 in MATH 327; either 2.0 in MATH 309 or 2.0 in AMATH 352 and 2.0 in AMATH 353.

**MATH 436 Introduction to Dynamical Systems (3) NW** Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. *Chaos*. Interval maps; quadratic families. Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 435.

**MATH 441 Topology (3) NW** Metric and topological spaces, convergence, continuity, finite products, connectedness, and compactness. Prerequisite: either 2.0 in MATH 328 or 2.0 in MATH 335. Offered: A.

**MATH 442 Differential Geometry (3) NW** Curves in 3-space, continuity and differentiability in 3-space, surfaces, tangent planes, first fundamental form, area, orientation, the Gauss Map. Prerequisite: either 2.0 in MATH 335, or 2.0 in MATH 326 and 2.0 in MATH 328 and 2.0 in either MATH 308 or 2.0 in MATH 318. Offered: W.

**MATH 444 Geometry for Teachers (3) NW** Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates, exploration using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Designed for teaching majors. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 127. Offered: AS.

**MATH 445 Geometry for Teachers (3) NW** Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates, exploration using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Designed for teaching majors. Prerequisite: 2.0 in MATH 444. Offered: WS.

**MATH 461 Combinatorial Theory (3) NW** Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: either 2.0 in MATH 308 or 2.0 in MATH 318.

**MATH 462 Combinatorial Theory (3) NW** Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: 2.0 in MATH 461.

**MATH 464 Numerical Analysis I (4) NW** Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308 and 2.0 in MATH 327, or 2.0 in MATH 335; 2.0 in CSE/ENGR 142. Offered: A.

**MATH 465 Numerical Analysis II (4) NW** Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: 2.0 in MATH 464. Offered: W.

**MATH 487 Advanced Mathematics Computer Laboratory (1/2, max. 6) NW** Laboratory activities in the use of computing as a tool for doing mathematics, to be taken jointly with a designated section of a 400-level mathematics course. Credit/no credit only.

**MATH 491 Introduction to Stochastic Processes (3) NW** Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Prerequisite: 2.0 in MATH/STAT 396. Offered: jointly with STAT 491; A.

**MATH 492 Introduction to Stochastic Processes (3) NW** Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Prerequisite: 2.0 in MATH/STAT 491. Offered: jointly with STAT 492; W.

**MATH 496 Honors Senior Thesis (1-5) NW** Problem seminar for honors students. Cannot be repeated for credit. Offered: AWSp.

**MATH 497 Special Topics in Mathematics for Teachers (2-9, max. 9) NW** Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with EDC&I 478.

**MATH 498 Special Topics in Mathematics (1-5, max. 15)** Reading and lecture course intended for special needs of advanced students. Offered: AWSpS.

**MATH 499 Undergraduate Research (8)** Summer research opportunity for undergraduates. Credit/no credit only. Offered: S.

## Courses for Graduates Only

**MATH 501 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)** Selected Topics dealing with issues in the teaching and learning of mathematics.

**MATH 502 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)** Selected Topics dealing with issues in the teaching and learning of mathematics.

**MATH 503 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)** Selected Topics dealing with issues in the teaching and learning of mathematics.

**MATH 504 Modern Algebra (5)** First quarter of a three-quarter sequence covering group theory; field theory and Galois theory; commutative rings and modules, linear algebra, theory of forms; representation theory, associative rings and modules; commutative algebra and elementary algebraic geometry. Prerequisite: MATH 404 or equivalent.

**MATH 505 Modern Algebra (5)** Continuation of MATH 504. Prerequisite: MATH 504.

**MATH 506 Modern Algebra (5)** Continuation of MATH 505. Prerequisite: MATH 505.

**MATH 509 Theory of Optimal Control (3)** Trajectories from ordinary differential equations with control variables. Controllability, optimality, maximum principle. Relaxation and existence of solutions. Techniques of nonsmooth analysis. Prerequisite: real analysis on the level of MATH 426; background in optimization corresponding to MATH 515. Offered: jointly with AMATH 509; even years.

**MATH 510 Seminar in Algebra (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 511 Special Topics in Algebra (2-3, max. 15)** In recent years the following subjects have been covered: Abelian groups, algebraic function fields, algebraic number theory, classical groups, game theory, group extensions, lattice theory, Lie algebras, number theory, and structure of rings.

**MATH 512 Special Topics in Algebra (2-3, max. 15)** In recent years the following subjects have been covered: Abelian groups, algebraic function fields, algebraic number theory, classical groups, game theory, group extensions, lattice theory, Lie algebras, number theory, and structure of rings.

**MATH 513 Special Topics in Algebra (2-3, max. 15)** In recent years the following subjects have been covered: Abelian groups, algebraic function fields, algebraic number theory, classical groups, game theory, group extensions, lattice theory, Lie algebras, number theory, and structure of rings.

**MATH 514 Networks and Combinatorial Optimization (3)** Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Prerequisite: MATH 308 or AMATH 352 and MATH 324. Offered: jointly with AMATH 514.

**MATH 515 Fundamentals of Optimization (5)** Maximization and minimization of functions of finitely many variables subject to constraints. Basic problem types and examples of applications; linear, convex, smooth, and nonsmooth programming. Optimality conditions. Saddlepoints and dual problems. Penalties, decomposition. Overview of computational approaches. Prerequisite: linear algebra and advanced calculus. Offered: jointly with IND E 515/AMATH 515.

**MATH 516 Numerical Optimization (3)** Methods of solving optimization problems in finitely many variables, with or without constraints. Steepest descent,

quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic programming. Cutting planes and nonsmooth optimization. Prerequisite: MATH 515. Offered: jointly with AMATH 516.

**MATH 517 Optimization Under Uncertainty (3)** Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications such as to optimal stopping, inventory control, resource management. Prerequisite: MATH 308, MATH 324 and an introduction to basic concepts of probability, such as MATH 390 or MATH 394, MATH 395. Offered: jointly with AMATH 517.

**MATH 521 Advanced Probability (3)** Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: MATH 426. Offered: jointly with STAT 521.

**MATH 522 Advanced Probability (3)** Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: MATH 426. Offered: jointly with STAT 522.

**MATH 523 Advanced Probability (3)** Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: MATH 426. Offered: jointly with STAT 523.

**MATH 524 Real Analysis (5)** First quarter of a three-quarter sequence covering the theory of measure and integration, point set topology, Banach spaces,  $L_p$  spaces, applications to the theory of functions of one and several real variables. Additional topics to be chosen by instructor. Prerequisite: MATH 426 or equivalent.

**MATH 525 Real Analysis (5)** Continuation of MATH 524. Prerequisite: MATH 524.

**MATH 526 Real Analysis (5)** Continuation of MATH 525. Prerequisite: MATH 525.

**MATH 527 Functional Analysis (3)** First quarter of a three-quarter sequence. Review of Banach, Hilbert, and  $L_p$  spaces; locally convex spaces (duality and separation theory, distributions, and function spaces); operators on locally convex spaces (adjoints, closed graph/open mapping and Banach-Steinhaus theorems); Banach algebras (spectral theory, elementary applications); spectral theorem for Hilbert space operators. Additional topics chosen by instructor. A working knowledge of real variables, general topology, and complex variables is assumed.

**MATH 528 Functional Analysis (3)** Continuation of MATH 527. Prerequisite: MATH 527.

**MATH 529 Functional Analysis (3)** Continuation of MATH 528. Prerequisite: MATH 528.

**MATH 530 Seminar in Analysis (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 531 Special Topics in Analysis (2-3, max. 15)** In recent years the following subjects have been covered: functional analysis, abstract harmonic analysis, linear operations in Hilbert space, group representations, Fourier series and integrals, topological linear spaces, potential theory, and numerical analysis.

**MATH 532 Special Topics in Analysis (2-3, max. 15)** In recent years the following subjects have been covered: functional analysis, abstract harmonic analysis, linear operations in Hilbert space, group representations, Fourier series and integrals, topological linear spaces, potential theory, and numerical analysis.

**MATH 533 Special Topics in Analysis (2-3, max. 15)** In recent years the following subjects have been covered: functional analysis, abstract harmonic analysis, linear operations in Hilbert space, group representations, Fourier series and integrals, topological linear spaces, potential theory, and numerical analysis.

**MATH 534 Complex Analysis (5)** First quarter of a three-quarter sequence covering complex numbers, analytic functions, contour integration, power series, analytic continuation, sequences of analytic functions, conformal mapping of simply connected regions, and related topics. Prerequisite: MATH 426.

**MATH 535 Complex Analysis (5)** Continuation of MATH 534. Prerequisite: MATH 534.

**MATH 536 Complex Analysis (5)** Continuation of MATH 535. Prerequisite: MATH 535.

**MATH 537 Several Complex Variables (3)** First quarter of a three-quarter sequence covering Weierstrass preparation theorem and its immediate consequences, analytic continuation, domains of holomorphy, pseudoconvexity, Cartan-Oka theory of coherence, embedding theorems; the CR equations, CR manifolds, connections with algebraic geometry. Prerequisite: MATH 536.

**MATH 538 Several Complex Variables (3)** Continuation of MATH 537. Prerequisite: MATH 537.

**MATH 539 Several Complex Variables (3)** Continuation of MATH 538. Prerequisite: MATH 538.

**MATH 543 Special Topics in Applied Mathematics (2-3, max. 15)** Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 544 Topology and Geometry of Manifolds (5)** First quarter of a three-quarter sequence covering general topology, the fundamental group, covering spaces, topological and differentiable manifolds, vector fields, flows, the Frobenius theorem, Lie groups, homogeneous spaces, tensor fields, differential forms, Stokes's theorem, deRham cohomology. Prerequisite: MATH 404 and MATH 426 or equivalent.

**MATH 545 Topology and Geometry of Manifolds (5)** Continuation of MATH 544. Prerequisite: MATH 544.

**MATH 546 Topology and Geometry of Manifolds (5)** Continuation of MATH 545. Prerequisite: MATH 545.

**MATH 547 Geometric Structures (3, max. 9)** First quarter of a three-quarter sequence covering differential-geometric structures on manifolds, Riemannian metrics, geodesics, covariant differentiation, curvature, Jacobi fields, Gauss-Bonnet theorem. Additional topics to be chosen by the instructor, such as connections in vector bundles and principal bundles, symplectic geometry, Riemannian comparison theorems, symmetric spaces, symplectic geometry, complex manifolds, Hodge theory. Prerequisite: MATH 546.

**MATH 548 Geometric Structures (3, max. 9)** Continuation of MATH 547. Prerequisite: MATH 547.

**MATH 549 Geometric Structures (3, max. 9)** Continuation of MATH 548. Prerequisite: MATH 548.

**MATH 550 Seminar in Geometry (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 551 Special Topics in Geometry (2-3, max. 15)** Advanced topics in geometry.

**MATH 552 Special Topics in Geometry (2-3, max. 15)** Advanced topics in geometry.

**MATH 553 Special Topics in Geometry (2-3, max. 15)** Advanced topics in geometry.

**MATH 554 Linear Analysis (5)** First quarter of a three-quarter sequence covering advanced linear algebra and matrix analysis, ordinary differential equations (existence and uniqueness theory, linear systems, numerical approximations), Fourier analysis, introductions to functional analysis and partial differential equations, distribution theory. Prerequisite: MATH 426 and familiarity with complex analysis at the level of 427 (the latter may be obtained concurrently).

**MATH 555 Linear Analysis (5)** Continuation of MATH 554. Prerequisite: MATH 554.

**MATH 556 Linear Analysis (5)** Continuation of MATH 555. Prerequisite: MATH 555.

**MATH 557 Introduction to Partial Differential Equations (3)** First quarter of a three-quarter sequence. Review of the theory of distributions and the Fourier transform. Detailed study of main linear equations: wave equation, Laplace's equation, and the heat equation. Sobolev spaces and regularity of solutions of elliptic equations. Theory of pseudodifferential operators. Initial value problem for hyperbolic equations and methods of geometrical optics. Fourier integral operators. The Dirichlet problem and eigenfunction expansions for elliptic equations. Prerequisite: MATH 556.

**MATH 558 Introduction to Partial Differential Equations (3)** Continuation of MATH 557. Prerequisite: MATH 557.

**MATH 559 Introduction to Partial Differential Equations (3)** Continuation of MATH 558. Prerequisite: MATH 558.

**MATH 564 Algebraic Topology (3)** First quarter of a three-quarter sequence covering classical and modern approaches; complexes and their homology theory; applications; fixed points, products and Poincaré duality; axiomatic approach. Prerequisite: MATH 506 and MATH 544, or equivalent.

**MATH 565 Algebraic Topology (3)** Continuation of MATH 564. Prerequisite: MATH 564.

**MATH 566 Algebraic Topology (3)** Continuation of MATH 565. Prerequisite: MATH 565.

**MATH 570 Seminar in Topology (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 571 Special Topics in Topology (2-3, max. 15)** Special topics from general and algebraic topology.

**MATH 573 Special Topics in Topology (2-3, max. 15)** Special topics from general and algebraic topology.

**MATH 577 Lie Groups and Lie Algebras (3, max. 9)** Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

**MATH 578 Lie Groups and Lie Algebras (3, max. 9)** Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

**MATH 579 Lie Groups and Lie Algebras (3, max. 9)** Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

**MATH 590 Seminar in Probability (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of instructor.

**MATH 591 Special Topics in Probability (2-3, max. 15)** Advanced topics in probability and stochastic processes.

**MATH 592 Special Topics in Probability (2-3, max. 15)** Advanced topics in probability and stochastic processes.

**MATH 593 Special Topics in Probability (2-3, max. 15)** Advanced topics in probability and stochastic processes.

**MATH 594 Special Topics in Numerical Analysis (2-3, max. 15)** Various advanced topics in numerical analysis and scientific computing, such as iterative methods, eigenvalue computations, approximation theory, finite element methods, inverse problems, nonlinear conservation laws, computational fluid dynamics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 594.

**MATH 595 Special Topics in Numerical Analysis (2-3, max. 15)** Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 595.

**MATH 596 Special Topics in Numerical Analysis (2-3, max. 15)** Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, 585, 586, or equivalent. Offered: jointly with AMATH 596.

**MATH 597 Seminar on Teaching Math (1, max. 3)** Issues in the teaching and learning of college mathematics, such as discovering and working with student background and expectations, increasing student engagement with course material, and evaluating student achievement. For graduate students who are, or soon will be, teaching mathematics courses on their own. Credit/no credit only.

**MATH 598 Seminar on Technology (1, max. 3)** Explores the use of computer technology in teaching and research in mathematics. Develops the basic skills required for using computer mathematics software.

**MATH 600 Independent Study or Research (\*)**

**MATH 700 Master's Thesis (\*)**

**MATH 800 Doctoral Dissertation (\*)**

## Middle Eastern Studies

See International Studies.

## Music

102 Music

 *General Catalog Web page:*  
[www.washington.edu/students/genecat/academic/music.html](http://www.washington.edu/students/genecat/academic/music.html)

 *Department Web page:*  
[depts.washington.edu/musicweb/](http://depts.washington.edu/musicweb/)

The School of Music prepares students for careers as composers, performers, teachers, or researchers. It also offers general courses to nonmajors, designed to enhance the student's understanding of the art of music.

## Graduate Program

Graduate Program Coordinator  
116 Music, Box 353450  
(206) 543-2726  
musicadv@u.washington.edu

Graduate programs in the School of Music take into consideration the dual nature of music's subject matter. First, it is one of the creative arts, requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development. Advanced study presupposes an emphasis in one or the other direction without entirely neglecting the alternate aspect.

## Special Requirements

Before admission to the Graduate School as a music major, the student must further qualify for a specific area of specialization. See below.

## Financial Aid

A limited number of teaching and staff assistantships are available. Accompanists are also employed at hourly rates. Competitive auditions for performance scholarships for new and returning students are held each year. The School of Music office may be contacted for details.

## Research Facilities

The Music Building contains the music library, an electronic composition laboratory, a listening center, ethnomusicology archives, and the usual studio, practice, and classroom facilities of a modern music department. Ensembles available for student participation include Opera, Contemporary Group, Collegium Musicum, and several non-Western ensembles among the many traditional large and small choral and instrumental groups.

## Master of Music, Doctor of Musical Arts

The programs with more creative emphasis lead to the degrees of Master of Music and Doctor of Musical Arts. Areas of specialization: performance (piano, organ, harpsichord, voice, strings, other orchestral instruments), instrumental conducting, choral conducting, composition, and opera production. Except for composition, the Graduate Record Examination is not required for application to these graduate programs. All graduate students must maintain a GPA of at least 3.00, and a minimum grade of 3.0 in courses used to fulfill School of Music graduation requirements.

## Master of Music

*Admission Requirements:* Audition required for entrance to performance and composition. Entrance to other areas by permission. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

*Graduation Requirements:* 45 credits, of which 18 must be in courses at the 500 level or above. Demonstration of proficiency in one language from French, German, Italian, and Latin (required in composition and voice). *With Thesis*—Program to include 9 credits in thesis. *Without Thesis*—A final oral examination is required.

## Doctor of Musical Arts

*Admission Requirements:* Audition required for performance and composition. Entrance to other areas by permission. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

*Graduation Requirements:* Three academic years of study; dissertation—in lieu of a full-length dissertation, a thesis in three parts may be substituted, of which one must be a research paper and two may be additional research papers, musical compositions, documented public performances, or documented lecture demonstrations. Demonstration of proficiency in one language (two languages for voice) from among French, German, Italian, Spanish, and Latin, as soon as possible, but in any case, before taking the General Examination.

## Master of Arts, Doctor of Philosophy

The research-oriented programs lead to the degrees of Master of Arts and Doctor of Philosophy. Areas of specialization are music theory, music history, ethnomusicology, and music education. Both the standard and advanced music sections of the Graduate Record Examination are required for application to some of these graduate programs. Check individual program requirements. All graduate students must maintain a GPA of at least 3.00, and a minimum grade of 3.0 in courses used to fulfill School of Music graduation requirements.

## Master of Arts

*Admission Requirements:* Requirements vary for the different areas of specialization. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

*Graduation Requirements:* 45 credits, of which 18 must be in courses at the 500 level or above and 9 in thesis. Except for music education, demonstration of proficiency in one language from among French, German, Italian, and Latin or another language as is necessary for research.

## Doctor of Philosophy

*Admission Requirements:* Requirements vary for the different areas of specialization. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

*Graduation Requirements:* Three academic years of study; dissertation. Except for music education, demonstration of foreign language proficiency as soon as possible, but in any case, before taking the General Examination. Details of the General Examination requirements for each of the areas of specialization are available from the School of Music graduate program coordinator.

## Faculty

### Chair

Robin L. McCabe

### Professors

Beale, James M. \* 1948, (Emeritus); MMus, 1947, Yale University; theory/composition.

Bernard, Jonathan W. \* 1987; MA, 1973, MPhil, 1975, PhD, 1977, Yale University; theory and analysis of twentieth-century music.

Bozarth, George S. Jr. \* 1982; MFA, 1973, PhD, 1978, Princeton University; music history and literature, Brahms.

Campbell, Patricia S. \* 1989; MM, 1975, University of Akron; PhD, 1981, Kent State University; music and child development, multicultural music education, comparative music education.

Carlsen, James C. \* 1967, (Emeritus); MA, 1958, Washington University; PhD, 1962, Northwestern University; systematic musicology, psychomusicology, research methodology, theories of music instruction.

Chaloupka, Vladimir \* 1981, (Adjunct); PhD, 1975, University of Geneva (Switzerland); experimental elementary-particle physics.

Curtis-Verna, Mary \* 1969, (Emeritus); BA, 1943, Hollins College (Virginia); voice.

Dahlstrom, Robert A. \* 1971, (Adjunct); MA, 1967, University of Illinois; scene design.

Dempster, Stuart R. \* 1968, (Emeritus); MA, 1967, San Francisco State; trombone, contemporary music.

Eros, Peter S. \* 1989; Diploma, 1956, Franz Liszt Academy; orchestra and opera.

Grossman, Arthur \* 1968; Diploma, 1955, Curtis Institute of Music; bassoon.

Heinitz, Eva M. 1948, (Emeritus); studied at State Academy of Music (Berlin); violoncello.

Hokanson, Randolph H. \* 1949, (Emeritus); studied with Dame Myra Hess, Howard Ferguson (London); piano.

Jacobs, Sue-Ellen \* 1974, (Adjunct); PhD, 1970, University of Colorado (Boulder); anthropological studies of women, applied anthropology, ethnohistory, Native North America.

Jenkins, Speight 1991, (Affiliate); BA, 1957, University of Texas (Austin); LLB, 1961, Columbia University.

Kaplan, Abraham \* 1977; Diploma, 1957, Juilliard School; choral conducting.

Kappy, David L. \* 1979; MM, 1971, University of Wisconsin; French horn performance, chamber music, and theory.

Karpen, Richard S. \* 1989; MA, 1986, DMA, 1989, Stanford University; composition, computer music, and music theory.

Kechley, Gerald \* 1955, (Emeritus); MA, 1950, University of Washington; theory/composition.

Kind, Silvia E. 1969, (Emeritus); Konzert-Reife-Prüfung, 1934, Hochschule für Musik (Germany); harpsichord.

Lundquist, Barbara R. \* 1973, (Emeritus); MS, 1959, Montana State University; DMA, 1973, University of Washington; music education, sociomusicology, ethnomusicology in schools.

McCabe, Robin L. 1987; MMus, 1973, DMA, 1976, Juilliard School; concert piano performance, communication skill, pedagogy.

McCull, William D. \* 1968; Diploma, 1955, State Academy of Music (Austria); clarinet.

Moore, John T. 1948, (Emeritus); MM, 1941, University of Illinois; piano.

Patrick, Julian \* 1990; BA, 1950, Cincinnati Conservatory; music, opera, song literature, musical theater, legitimate theater, teaching voice.

Patterson, Ronald G. 1999; violin teaching and performance, chamber music, orchestral studies.

Rahn, John \* 1975; MFA, 1972, PhD, 1974, Princeton University; theory/composition.

Sakata, Hiromi L. \* 1977, (Affiliate); MA, 1968, PhD, 1976, University of Washington; ethnomusicology.

Saks, Toby \* 1976; MS, 1966, Juilliard School; performance and teaching of violoncello and chamber music.

Salzman, Timothy O. \* 1987; MM, 1979, Northern Illinois University; wind ensemble conducting, pedagogy and repertoire.

Schwarz, Gerard 1988, (Affiliate); MS, 1972, MM, 1972, Juilliard.

Siki, Bela \* 1985, (Emeritus); Diploma, 1948, Conservatoire de Musique (Switzerland); piano literature with special interest in interpretation and performance.

Skowronek, Felix E. \* 1968; BMus, 1956, Curtis Institute of Music; flute.

Smith, William O. \* 1966, (Emeritus); MA, 1952, University of California (Berkeley); theory/composition.

Sokol, Vilem 1961, (Emeritus); BMus, 1938, MMus, 1946, Oberlin College; violin, viola, conducting.

Starr, Lawrence \* 1977; PhD, 1973, University of California (Berkeley); music history and literature.

Staryk, Steven S. \* 1987, (Emeritus); studied at the Royal Conservatory of Music (Toronto); violin.

Storch, Laila \* 1968, (Emeritus); BA, 1964, Wilkes College; oboe.

Terry, Carole R. \* 1979; MM, 1973, University of Rochester; DMA, 1977, Stanford University; organ, harpsichord.

Thome, Diane \* 1977; MA, 1966, University of Pennsylvania; PhD, 1973, Princeton University; theory/composition, computer music.

Tufts, Paul Dewitt 1961, (Emeritus); MA, 1951, University of Washington; theory/composition.

Verrall, John 1948, (Emeritus); BA, 1934, University of Minnesota; Cert of Music, 1932 Liszt Conservatory (Budapest); theory/composition.

Winn, William David \* 1985, (Adjunct); PhD, 1972, Indiana University; educational technology, instructional theory, instructional design, visual information processing.

Zsigmondy-Liedemann, Denes 1973, (Emeritus); BA, 1940, Gymnasium, Budapest (Hungary); violin.

### Associate Professors

Benshoof, Kenneth 1963, (Emeritus); MA, 1963, San Francisco State; theory/composition.

Demorest, Steven M. \* 1993; MM, 1983, Westminster Choir College; PhD, 1989, University of Wisconsin; music education, choral ensembles.

Dunlop, William M. \* 1962, (Adjunct); MA, 1965, Cambridge University (UK); Shakespeare, nineteenth-century literature, poetry writing.

Durand, Joel-Francois \* 1991; MM, 1984, Musikhochschule, Freiburg (Germany); PhD, 1988, State University of New York (Stony Brook); composition.

Ellingson, Terry J. \* 1983; PhD, 1979, University of Wisconsin; MA, 1979, University of Chicago; ethnomusicology.

Geissmar, Else J. 1947, (Emeritus); MM, 1944, University of Michigan; piano.

Jussila, Clyde F. 1971, (Emeritus); MS, 1951, Kansas State University; music education.

Michaelian, Patricia \* 1984; Diploma, 1970, Curtis Institute of Music; concert pianist: orchestral soloist, recitalist, and chamber musician.

Pelton, Carmen 1992; BMus, 1977, University of Wisconsin; voice.

Rosinbum, Ralph 1942, (Emeritus); MA, 1948, University of Washington; opera production.

Schuyler, Philip D. 1999; MA, 1974, PhD, 1986, University of Washington; ethnomusicology, ethnography of art.

Seales, Marc A. 1987; BA, 1978, Western Washington University; jazz studies, keyboard.

Taricani, Jo Ann \* 1980; PhD, 1986, University of Pennsylvania; music history and literature.

Waterman, Christopher \* 1985, (Affiliate); PhD, 1986, University of Illinois; ethnomusicology.

### Assistant Professors

Boers, Geoffrey Paul \* 1996; MA, 1985, Portland State University; DMA, 1987, University of Arizona; choral music: literature, history, conducting, rehearsal techniques.

Callus, Helen Sarah 1996; MA, 1994, Johns Hopkins University; viola teaching and performance, chamber music.

Dudley, Shannon K. \* 1996; MA, 1988, PhD, 1996, University of California (Berkeley); ethnomusicology, steel band.

Henderson, Rebecca A. \* 1996; MM, 1985, Eastman School of Music; oboe performance and teaching, chamber music.

Immel, Don T. 1999; MM, 1996, Rice University; trombone performance, soloist, chamber music, jazz and orchestral trombone teaching.

Kopp, David 1997; MA, 1980, State University of New York (Stony Brook); PhD, 1995, Brandeis University; theory, composition.

Morrison, Steven J. \* 1997; MM, 1988, University of Wisconsin; PhD, 1995, Louisiana State University; factors in the development of music listening and performance behaviors.

Will, Richard J. \* 1993; MA, 1989, PhD, 1994, Cornell University; European music 1700-1850, popular music since 1900.

Zahn, Claudia 1998; BFA, 1976, Carnegie Mellon University; opera production.

### Senior Artist in Residence

Sheppard, Craig \* 1993; MSc, 1971, Juilliard School; piano.

### Lecturers

Brockman, Michael S. 1987; MM, 1982, New England Conservatory of Music (Boston); saxophone performance and teaching, jazz studies, music education.

Collier, Thomas W. 1980; BMus, 1971, BA, 1971, University of Washington; percussion.

Cross, David B. 1993; MM, 1971, Washington State University; vocal jazz ensemble, music education.

Herbolsheimer, Bern H. 1984; MM, 1973, University of Washington; advanced vocal repertoire, vocal accompanying/coaching, composition.

McDavid, J. Bradley 1994; MM, 1970, Arizona State University; conducting athletic band and concert band, music education.

Miller, Douglas 1993; BA, Antioch College (Seattle); jazz bass performance and teaching, jazz studies.

Novacek, Steven A. 1984; BMus, 1975, California State University, Northridge; guitar.

Vokolek, Pamela C. 1968; MM, Cleveland Institute of Music; harp performance and teaching, harp ensemble.

### Artists in Residence

Bergman, Lisa E. 1988; BA, 1978, University of Washington; MM, 1980, State University of New York (Stony Brook); MM, 1982, Juilliard School; piano accompanying and vocal (operatic) coaching.

Crusoe, Michael 1990; BMus, 1974, University of Missouri; timpani.

Harper, Thomas 1998; MM, 1976, University of Arkansas (Fayetteville).

Krishnaswami, Rajan S. 1996; MM, 1987, Juilliard School; cello teaching and performance.

Lieberman, Barry 1991; BA, 1971, Cleveland Institute of Music; string bass.

Tindemans, Margaretha E. 1987; Diploma, 1972, Conservatorium (Netherlands); viola da gamba, early music.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsccat/](http://www.washington.edu/students/crsccat/).

### Music

**MUSIC 400 Computer Applications to Music (3, max. 9) VLPA** Music workstation applications using microcomputers, music synthesizers, and analog-to-digital converters: music editing and score production, transcription, waveform and spectral analysis, and introduction to programming.

**MUSIC 401 Computer Music Seminar 1 (3) VLPA Karpen** Use of computers in musical composition, software digital sound synthesis, score generation, theoretical investigations. Prerequisite: either MUSIC 212, MUSIC 302, MUSIC 456, or PHYS 207.

**MUSIC 402 Computer Music Seminar 2 (3) VLPA Karpen** Use of computers in musical composition, digital sound synthesis, digital signal processing. Hardware used includes NeXT computers, digital recorders. Software used includes CSound, Common LISP, UNIX. Prerequisite: MUSIC 401.

**MUSIC 403 Computer Music Seminar 3 (3) VLPA Karpen** Advanced use of computers for musical composition, digital sound synthesis, digital signal processing. Advanced synthesis techniques such as LPC for speech and vocal synthesis, phase vocoders, reverberation, and spatial location. Hardware used includes NeXT computers and peripherals. Software includes CSound, Common Lisp, C, and UNIX. Prerequisite: MUSIC 402.

**MUSIC 410 ElectroAcoustic Music: History and Analysis (3) VLPA Thome** Examines the music of major electro-acoustic composers. Emphasis on the relationship between technological resources and compositional advances. Addresses issues raised by the diversity of approaches to musical composition; relates particular creative contributions to the historical, cultural, and technological contexts in which they originated. Prerequisite: MUSIC 303; MUSIC 306; MUHST 210. Offered: Sp.

**MUSIC 418 Baroque Ornamentation and Improvisation (3) VLPA Terry** The study of ornamentation and improvisation for keyboard, woodwinds, voice, and strings of selected German, Italian, French, and English repertoire from 1600 to 1800.

**MUSIC 420 Organ Improvisation and Service Playing I (2) VLPA** Prepares students to improvise, especially for the church/synagogue service. Includes a brief study of hymnology, hymn elaboration, altered harmonizations, improvisation based on existing hymn tunes, interludes, chorale preludes, ornamented chorales. Prerequisite: MUSIC 303; MUSIC 306. Offered: A.

**MUSIC 421 Organ Improvisation and Service Playing II (2) VLPA** Continuation of MUSIC 420. Includes brief review of figured bass and functional harmony, free improvisation in simple antecedent/consequent ABA forms and more complex forms (rondo, theme, and variation), improvising partitas, interludes, improvisations based on plainchant. A survey of important improvisation texts. Prerequisite: MUSIC 420. Offered: W.

**MUSIC 422 Organ Improvisation and Service Playing III (2) VLPA** Continuation of MUSIC 421. Advanced improvisation: baroque improvisation techniques, fughetts, baroque preludias and fantasias, canons, toccatas, duos, trios, and simple fugues. Prerequisite: MUSIC 421. Offered: Sp.

**MUSIC 425 Jazz History and Analysis (3) VLPA Collier** Major eras and styles of jazz with emphasis on technical aspects of jazz music: composition, arranging, improvisation practices.

**MUSIC 426 Advanced Jazz Arranging (2) VLPA Brockman** Advanced arranging techniques for jazz ensembles of various sizes, exploring methods employed by Duke Ellington, Gil Evans, and others. Assignments include one original arrangement each for small-combo and full-jazz ensemble. Prerequisite: MUSIC 336. Offered: Sp.

**MUSIC 427 Music of Africa (3) VLPA/I&S** Music cultures of sub-Saharan Africa. Traditional styles and more recent developments. Open to all students with an interest in the area. Prerequisite: MUSIC 317.

**MUSIC 428 Music of North India (3) VLPA/I&S** Classical music of North India, the Hindustani tradition with emphasis on the Dhrupad and Khyal styles. Recommended: ethnomusicology or South Asian studies background.

**MUSIC 430 Organology (3) VLPA** Systematic study of musical instruments, involving the history, acoustical phenomena, and physical topologies of instruments from around the world, with emphasis on non-Western music.

**MUSIC 433 Music of Latin America (3) VLPA/I&S** The Indian, African, and European music of the Spanish-, French-, and Portuguese-speaking New World countries.

**MUSIC 434 Pedagogy (2) VLPA** Principles of effective studio teaching; survey and evaluation of teaching materials.

**MUSIC 435 Pedagogy (2) VLPA** Principles of effective studio teaching; survey and evaluation of teaching materials.

**MUSIC 436 Pedagogy (2) VLPA** Principles of effective studio teaching; survey and evaluation of teaching materials.

**MUSIC 438 Problems in Contemporary Music Performance (3, max. 9) VLPA Kappy** An active course examining and solving problems relevant to the successful performance of twentieth-century music. Preparation for complex rhythms, odd groupings, new notation, and extended performing techniques.

**MUSIC 439 Music of Indonesia and the Philippines (3) VLPA/I&S** Includes the gong culture traditions of Sumatra, Sunda, Java, Bali, Sunda Islands, and the Philippines. Open to students in music and to students with an interest in the area. Prerequisite: MUSIC 316.

**MUSIC 444 Music of the Near East (3) VLPA/I&S** *Sakata* Classical and folk musical traditions of Iran, Turkey, and the Arab world. Prerequisite: MUSIC 316.

**MUSIC 445 Selected Topics in Ethnomusicology (3, max. 9) VLPA/I&S** Deals with topics not covered by regular courses in ethnomusicology. Frequently taught by visiting lecturers. Content varies with different instructors.

**MUSIC 447 Music of Southern India (3) VLPA/I&S** Classical music of South India, the Karnatic tradition, with emphasis on the concert repertoire. Recommended: ethnomusicology or South Asian studies background.

**MUSIC 448 Music of China (3) VLPA/I&S** Confucian philosophies that relate to music, theory, scale systems, cosmology. Development of instrumental styles, vocal and dramatic regional forms from early historical periods to the present; recommended: background in either ethnomusicology or East Asian Studies. Recommended: ethnomusicology or East Asian studies background.

**MUSIC 454 Organ Pedagogy (3) VLPA** *Terry* Pedagogical approaches to organ techniques and performance practice, provides opportunity for practical application by means of student teaching.

**MUSIC 455 Choral Arranging (3) VLPA** Primarily for choral conductors who need to modify, arrange or compose material to suit the capabilities of specific choral groups and performance situations.

**MUSIC 458 Organ Repertoire: Middle Ages through Baroque (3) VLPA** *Terry* Analysis and performance practices of organ literature, Middle Ages through baroque period. Development of the organ as musical instrument. Prerequisite: either MUHST 400, MUHST 401, MUHST 402, MUHST 403, MUHST 406, or MUHST 407.

**MUSIC 459 Organ Repertoire: Bach to Present (3) VLPA** *Terry* Analysis and performance practices of organ literature, classical period through the twentieth century. Development of the organ as a musical instrument. Prerequisite: either MUHST 408, MUHST 409, MUHST 410, MUHST 411, MUHST 412, MUHST 413, MUHST 414, MUHST 415, MUHST 417, MUHST 418, MUHST 419, MUHST 423, MUHST 424, or MUHST 426.

**MUSIC 460 Advanced Vocal Repertoire: Pre-Nineteenth-Century Art Songs (2, max. 6) VLPA** Professional preparation of pre-nineteenth-century songs with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 328.

**MUSIC 461 Advanced Vocal Repertoire: Nineteenth-Century Art Songs (2, max. 6) VLPA** Professional preparation of works from the literature of nineteenth-century German lieder, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 460.

**MUSIC 462 Advanced Vocal Repertoire: Twentieth-Century Art Songs (2, max. 6) VLPA** Preparation of works from the twentieth-century repertoire of French, German, Italian, Spanish, and English songs, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 461.

**MUSIC 464 Jazz Laboratory (1, max. 9) VLPA** *Seales* Forum for testing new technical skills, improvisational techniques, and jazz compositions and/or arrangements in a formal laboratory setting.

**MUSIC 465 Acting for Singers (2, max. 6) VLPA** Workshop designed specifically for the singing actor, focusing on character analysis, movement, and audition deportment skills.

**MUSIC 467 Advanced Jazz Improvisation I (1) VLPA** *Collier, Seales* Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 369.

**MUSIC 468 Advanced Jazz Improvisation II (1) VLPA** *Collier, Seales* Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 467.

**MUSIC 469 Advanced Jazz Improvisation III (1) VLPA** *Collier, Seales* Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 468.

**MUSIC 470 Analysis of Tonal Music: Introduction to Schenker (3) VLPA** *Bernard, Kopp, Rahn* Introduction to the theories of Heinrich Schenker and their subsequent development; analysis of music from the common-practice period (1700-1900), with possible excursions into the twentieth century. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

**MUSIC 471 Introduction to Atonal Theory and Analysis (3) VLPA** *Bernard, Rahn* Theory of atonal music, including the "classical" twelve-tone repertoire. Analysis of works by Schoenberg, Berg, Webern, and others. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

**MUSIC 472 Analysis of Twentieth Century Music, 1900-1950 (3, max. 6) VLPA** *Bernard, Durand, Karpen, Kopp, Rahn, Thome* Analytical examination of musical works of the first half of the twentieth century in Europe and the United States, with emphasis on music other than that of the second Viennese school. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

**MUSIC 473 Keyboard Harmony and Transposition (3) VLPA** *Terry* Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215. Offered: alternate years.

**MUSIC 474 Keyboard Harmony and Transposition (3) VLPA** *Terry* Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: MUSIC 473. Offered: alternate years.

**MUSIC 475 Figured Bass Realization (3) VLPA** *Terry* Various styles of continuo realization for keyboardists, emphasizing Bach cantatas, Haydn symphonies, and Mozart operas. Prerequisite: MUSIC 474. Offered: alternate years.

**MUSIC 476 Advanced Vocal Repertoire: Seventeenth and Eighteenth Centuries (2) VLPA** Opera repertoire, 1600 to the Bel Canto era (Bellini, Rossini, Donizetti); style, traditions, embellishments in Italian, French, and German arias. Prerequisite: MUSIC 328.

**MUSIC 477 Advanced Vocal Repertoire: Nineteenth Century (2) VLPA** Opera repertoire, the post Bel Canto era through Verdi, Puccini and verismo, and significant German, French, and Slavic repertoire. Prerequisite: MUSIC 476.

**MUSIC 478 Advanced Vocal Repertoire: Twentieth Century (2) VLPA** Opera repertoire, twentieth-century opera literature (Barber, Menotti, Bartok, Dvorak); understanding of style, character and overall artistic and musical needs of the present. Prerequisite: MUSIC 477.

**MUSIC 479 Senior Recital (1) VLPA**

**MUSIC 480 The Anthropology of Music (3) VLPA/I&S** Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation. e.g., evolutionist, diffusionist, historical particularist, structuralist, functionalist, symbolist, and semiotic, through detailed examination of seminal texts. Offered: jointly with ANTH 430.

**MUSIC 481 Choral Repertoire: Sixteenth and Seventeenth Centuries (3) VLPA** Sacred and secular choral literature from the Renaissance through the early baroque, covering Europe and England. Various genres and styles of major composers, including performance practice, rehearsals, and conducting.

**MUSIC 482 Choral Repertoire: Eighteenth Century (3) VLPA** Sacred and secular choral literature of the baroque, covering mainland Europe and England. Choral works of Bach, his predecessors, and contemporaries. Stylistic analysis and study of performance practice.

**MUSIC 483 Choral Repertoire: Nineteenth Century (3) VLPA** Sacred and secular choral literature of the nineteenth century, covering mainland Europe and England. Analysis of accompanied and a cappella choral works by major composers with implications for conducting and programming of literature.

**MUSIC 484 Choral Repertoire: Twentieth Century (3) VLPA** Choral literature of the twentieth century, covering America, England, and mainland Europe. Various genres and styles, including score study and teaching strategies.

**MUSIC 487 Tonal Counterpoint (3) VLPA** *Durand, Karpen, Rahn* Evaluation of fugal practices from the baroque era to the present. Prerequisite: either MUSIC 311 or MUSIC 202.

**MUSIC 489 Special Topics in Music Theory (3, max. 9) VLPA** Prerequisite: either MUSIC 303 and MUHST 210 or MUSIC 312 and MUHST 314.

**MUSIC 490 Orchestration (3) VLPA** Study of the instruments of the orchestra and practical experience in combining them; to enable the student to score for various instrumental combinations. Ideally to be taken before band arranging or jazz arranging, but is not a prerequisite.

**MUSIC 491 Composition (3, max. 18) VLPA** One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 391.

**MUSIC 492 Opera Direction and Production (4) VLPA** Practical experience with problems of the theater.

**MUSIC 493 Opera Direction and Production (4) VLPA** Practical experience with problems of the theater. Prerequisite: MUSIC 492.

**MUSIC 495 Music of Japan (3) VLPA/I&S** Instrumental and dramatic forms including Gagaku, Sankyoku, Noh, and Kabuki, as well as regional and popular styles. Open to students in music and East Asian area studies. Prerequisite: MUSIC 316.

**MUSIC 498- Senior Thesis (3-, max. 9) VLPA** Design and completion of an individual research project and writing of a thesis under supervision of a faculty member. Required of students in the pre-Systematic Musicology major.

**MUSIC 499 Undergraduate Research (\* max. 6)**

**Courses for Graduates Only**

**MUSIC 501 Seminar in Musical Analysis (3)** Chant to middle baroque.

**MUSIC 502 Seminar in Musical Analysis (3)** High baroque through nineteenth century.

**MUSIC 503 Seminar in Musical Analysis (3)** Impressionists to present.

**MUSIC 511 Seminar in Field and Laboratory Methods (3)** Methodology of research in ethnomusicology along with practical experience in recording and processing field and laboratory materials. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

**MUSIC 512 Seminar in Ethnomusicology (3, max. 18)** Study of methodological procedures in ethnomusicology applied to specific research problems. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

**MUSIC 526 History of Theory (3)** Ancient, medieval, early Renaissance.

**MUSIC 527 History of Theory (3)** Renaissance, baroque, early classic.

**MUSIC 528 History of Theory (3)** Classic, romantic, twentieth century.

**MUSIC 531 Proseminar in Ethnomusicology (3)** Theoretical and methodological practices in ethnomusicology based on existing major writings. Critical evaluations of works with a broad view toward developing ethnomusicological research. Prerequisite: permission of instructor.

**MUSIC 532 Opera Direction and Production (4/6, max. 12)** Practical experience with problems of the opera theatre.

**MUSIC 533 Preceptorial Readings in Ethnomusicology (5)** Significant ethnomusicological literature on the major music cultures. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

**MUSIC 534 Preceptorial Readings in Ethnomusicology (5)** Significant ethnomusicological literature on the major music cultures. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

**MUSIC 536 Transcription and Analysis (3)** Study of practice in different notational analytical systems used in non-Western music. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

**MUSIC 551 Practicum in Music Instruction (3, max. 9)** Practical application and validation of results of investigation in curriculum, music teaching and learning, performance and theoretical studies. Prerequisite: teaching experience or permission of instructor.

**MUSIC 559 Master's Recital (3, max. 6)** Public performance for students in the Master of Music degree program. Prerequisite: permission of instructor and Master of Music program standing.

**MUSIC 570 Seminar in Schenkerian Analysis (3, max. 9)** *Bernard, Kopp, Rahn* Advanced work in Schenkerian analysis. Prerequisite: MUSIC 470.

**MUSIC 571 Seminar in Serialism (3, max. 9)** *Bernard, Kopp, Rahn* Advanced theoretical and analytical work in serialism and other nontonal systems. Prerequisite: MUSIC 471 or equivalent.

**MUSIC 572 Advanced Topics in Computer Music (3)** *Karpen, Rahn* Topics vary. Offered: AWSpS.

**MUSIC 573 Seminar in Tonal Analysis (3, max. 9)** Modern theoretical and analytical methods appropriate to study of western music of the eighteenth and nineteenth centuries, conceived independently of or in response to the work of Heinrich Schenker. Prerequisite: MUSIC 470 or permission of instructor.

**MUSIC 574 Analysis of Twentieth-Century Music: 1950—Present (3)** *Bernard, Durand, Karpen, Kopp, Rahn, Thome* Analytical examination of major works of second half of twentieth century. Prerequisite: MUSIC 471 and MUSIC 472 or permission of instructor.

**MUSIC 575 Seminar in Theory (3, max. 18)** *Bernard, Kopp, Rahn* Development and discussion of current student and faculty research in compositional/analytical theory and metatheory.

**MUSIC 576 Critical Theory of Music (3, max. 18)** Philosophical foundations of the criticism of music, including relevant contemporary thought in the criticism of literature and the other arts.

**MUSIC 577 Composers of the Twentieth Century (3, max. 9)** *Bernard, Durand, Karpen, Kopp, Rahn, Thome* Analytical examination of the work of a major composer of the twentieth century. Prerequisite: MUSIC 574 or permission of instructor.

**MUSIC 580 Advanced Conducting (3, max. 9)** *Eros, Salzman*

**MUSIC 581 Advanced Conducting (3, max. 9)** *Eros, Salzman*

**MUSIC 582 Advanced Conducting (3, max. 9)** *Eros, Salzman*

**MUSIC 583 Advanced Choral Conducting (3, max. 27)** *Kaplan*

**MUSIC 590 Doctoral Recital (2-6, max. 18)** Public performance for students in the Doctor of Musical Arts degree program. Prerequisite: permission of instructor.

**MUSIC 591 Graduate Composition (\* max. 30)** *Bernard, Durand, Karpen, Rahn, Thome*

**MUSIC 599 Advanced Selected Topics (1-3, max. 27)** Selected readings on current issues and problems in music. Prerequisite: permission of a supervising music faculty member.

**MUSIC 600 Independent Study or Research (\*)**

**MUSIC 700 Master's Thesis (\*)**

**MUSIC 800 Doctoral Dissertation (\*)**

**Music Applied**

**MUSAP 420 Private Instruction: Voice (2-3, max. 27) VLPA** *Harper, Patrick, Pelton*

**MUSAP 421 Private Instruction: Piano (2-3, max. 27) VLPA** *Herrman, McCabe, Michaelian, Seales, Sheppard, Siki*

**MUSAP 422 Private Instruction: Organ (2-3, max. 27) VLPA** *Terry*

**MUSAP 423 Private Instruction: Harpsichord (2-3, max. 27) VLPA** *Terry*

**MUSAP 424 Private Instruction: Violin-Viola (2-3; max. 27) VLPA** *Callus, Patterson*

**MUSAP 425 Private Instruction: Violoncello (2-3; max. 27) VLPA** *Krishnaswami, Saks*

**MUSAP 426 Private Instruction: Double Bass (2-3, max. 27) VLPA** *Lieberman*

**MUSAP 427 Private Instruction: Flute (2-3, max. 27) VLPA** *Skowronek*

**MUSAP 428 Private Instruction: Oboe (2-3, max. 27) VLPA** *Henderson*

**MUSAP 429 Private Instruction: Clarinet (2-3, max. 27) VLPA** *McColl*

**MUSAP 430 Private Instruction: Bassoon (2-3, max. 27) VLPA** *Grossman*

**MUSAP 431 Private Instruction: Saxophone (2-3, max. 27) VLPA** *Brockman*

**MUSAP 432 Private Instruction: Horn (2-3, max. 27) VLPA** *Kappy*

**MUSAP 433 Private Instruction: Trumpet (2-3, max. 27) VLPA**

**MUSAP 434 Private Instruction: Trombone (2-3, max. 27) VLPA** *Immel*

**MUSAP 435 Private Instruction: Tuba (2-3, max. 27) VLPA** *Phillips*

**MUSAP 436 Private Instruction: Harp (2-3, max. 27) VLPA** *Vokolek*

**MUSAP 437 Private Instruction: Percussion (2-3, max. 27) VLPA** *Collier, Crusoe*

**MUSAP 438 Private Instruction: Guitar (2-3, max. 27) VLPA** *Novacek*

**MUSAP 439 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA** *Tindemans*

**MUSAP 440 Timpani (2-3, max. 27) VLPA** *Crusoe*

**MUSAP 441 Mallet Percussion (2-3, max. 27) VLPA** *Collier*

**MUSAP 442 Jazz and Non-Western Drumming Techniques (2/3, max 18) VLPA** *Collier* Focused study of American jazz drumming and/or hand drumming techniques of various world music cultures to broaden the skills of percussion students, preparing them for new demands of contemporary musical styles. Designed primarily for music majors enrolled in the percussion program.

**Courses for Graduates Only**

**MUSAP 500 Private instruction: Voice (2-3, max. 45)** *Harper, Patrick, Pelton*

**MUSAP 501 Private Instruction: Piano (2-3, max. 45)** *Herrman, McCabe, Michaelian, Seales, Sheppard, Siki*

**MUSAP 502 Private Instruction: Organ (2-3, max. 45)** *Terry*

**MUSAP 503 Private Instruction: Harpsichord (2-3, max. 45)** *Terry*

**MUSAP 504 Private Instruction: Violin-Viola (2-3, max. 45)**

**MUSAP 505 Private Instruction: Violoncello (2-3, max. 45)** *Krishnaswami, Saks*

**MUSAP 506 Private Instruction: Double Bass (2-3, max. 45)** *Lieberman*

**MUSAP 507 Private Instruction: Flute (2-3, max. 45)** *Skowronek*

**MUSAP 508 Private Instruction: Oboe (2-3, max. 45)** *Henderson*

**MUSAP 509 Private Instruction: Clarinet (2-3, max. 45)** *McColl*

**MUSAP 510 Private Instruction: Bassoon (2-3, max. 45)** *Grossman*

**MUSAP 511 Private Instruction: Saxophone (2-3, max. 45)** *Brockman*

**MUSAP 512 Private Instruction: Horn (2-3, max. 45)** *Kappy*

**MUSAP 513 Private Instruction: Trumpet (2-3, max. 45)**

**MUSAP 514 Private Instruction: Trombone (2-3, max. 45)** *Immel*

**MUSAP 515 Private Instruction: Tuba (2-3, max. 45)** *Phillips*

**MUSAP 516 Private Instruction: Harp (2-3, max. 45)** *Vokolek*

**MUSAP 517 Private Instruction: Percussion (2-3, max. 45)** *Collier, Crusoe*

**MUSAP 518 Private Instruction: Guitar (2-3, max. 45)** *Novacek*

**MUSAP 519 Private Instruction: Viola da Gamba (2-3, max. 45)** *Tindemans*

**MUSAP 520 Private Instruction: Voice (3, max. 18)** *Harper, Patrick, Pelton*

**MUSAP 521 Private Instruction: Piano (3, max. 18)** *McCabe, Michaelian, Sheppard, Siki*

**MUSAP 522 Private Instruction: Organ (3, max. 18)** *Terry*

**MUSAP 523 Private Instruction: Harpsichord (3, max. 18)** *Terry*

**MUSAP 524 Private Instruction: Violin-Viola (3, max. 18)** *Callus, Patterson*

**MUSAP 525 Private Instruction: Violoncello (3, max. 18)** *Saks*

**MUSAP 526 Private Instruction: Double Bass (3, max. 18)** *Lieberman*

**MUSAP 527 Private Instruction: Flute (3, max. 18)** *Skowronek*

**MUSAP 528 Private Instruction: Oboe (3, max. 18)** *Henderson*

**MUSAP 529 Private Instruction: Clarinet (3, max. 18)** *McColl*

**MUSAP 530 Private Instruction: Bassoon (3, max. 18)** *Grossman*

**MUSAP 531 Private Instruction: Saxophone (3, max. 18)** *Brockman*

**MUSAP 532 Private Instruction: Horn (3, max. 18)** *Kappy*

**MUSAP 533 Private Instruction: Trumpet (3, max. 18)**

**MUSAP 534 Private Instruction: Trombone (3, max. 18)** *Immel*

**MUSAP 535 Private Instruction: Tuba (3, max. 18)** *Phillips*

**MUSAP 536 Private Instruction: Harp (3, max. 18)** *Vokolek*

**MUSAP 537 Private Instruction: Percussion (3, max. 18)** *Collier, Crusoe*

**MUSAP 538 Private Instruction: Guitar (3, max. 18)** *Novacek*

**MUSAP 540 Timpani (3, max. 18)** *Crusoe*

**MUSAP 541 Mallet Percussion (3, max. 18)** *Collier*

**MUSAP 542 Private Instruction: Viola da Gamba (3, max. 18)** *Tindemans*

**MUSAP 570 Private Instruction: Voice (3, max. 27)** *Harper, Patrick, Pelton*

**MUSAP 571 Private Instruction: Piano (3, max. 27)** *McCabe, Michaelian, Sheppard, Siki*

**MUSAP 572 Private Instruction: Organ (3, max. 27)** *Terry*

**MUSAP 573 Private Instruction: Harpsichord (3, max. 27)** *Terry*

**MUSAP 574 Private Instruction: Violin-Viola (3, max. 27)** *Callus, Patterson*

**MUSAP 575 Private Instruction: Violoncello (3, max. 27)** *Saks*

**MUSAP 576 Private Instruction: Double Bass (3, max. 27)** *Lieberman*

**MUSAP 577 Private Instruction: Flute (3, max. 27)** *Skowronek*

**MUSAP 578 Private Instruction: Oboe (3, max. 27)** *Henderson*

**MUSAP 579 Private Instruction: Clarinet (3, max. 27)** *McColl*

**MUSAP 580 Private Instruction: Bassoon (3, max. 27)** *Grossman*

**MUSAP 581 Private Instruction: Saxophone (3, max. 27)** *Brockman*

**MUSAP 582 Private Instruction: Horn (3, max. 27)** *Kappy*

**MUSAP 583 Private Instruction: Trumpet (3, max. 27)**

**MUSAP 584 Private Instruction: Trombone (3, max. 27)** *Immel*

**MUSAP 585 Private Instruction: Tuba (3, max. 27)** *Phillips*

**MUSAP 586 Private Instruction: Harp (3, max. 27)** *Vokolek*

**MUSAP 587 Private Instruction: Percussion (3, max. 27)** *Collier, Crusoe*

**MUSAP 589 World Music Laboratory (2-3, max. 18)** World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Required of all graduate students in ethnomusicology. Credit/no credit only.

**MUSAP 590 Timpani (3, max. 27)** *Crusoe*

**MUSAP 591 Mallet Percussion (3, max. 27)** *Collier*

**MUSAP 592 Private Instruction: Viola da Gamba (3, max. 27)** *Tindemans*

## Music Education

**MUSED 403 Part-Time Student Teaching in Music (6) VLPA** *Campbell, Demorest, Morrison* Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Credit/no credit only. Offered: AWSp.

**MUSED 404 Full-Time Student Teaching in Music (15) VLPA** *Campbell, Demorest, Morrison* Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Credit/no credit only. Prerequisite: MESED 403. Offered: AWSp.

**MUSED 405 Marching Band Technique (2) VLPA** *McDavid, Morrison, Salzman* Basics of marching and maneuvering discussed and used to write drill. Covers selection of music, use of marching procession, and show design. Students complete a drill for their own band or for an instrumentation determined by the instructor.

**MUSED 410 Instrumental Rehearsal Techniques (3) VLPA** *Salzman* Includes score preparation, rehearsal formats, and error detection.

**MUSED 431 Curriculum in Music Education (3) VLPA** *Campbell, Demorest, Morrison* Principles and practices of curriculum design applied to the development of the music curriculum. Individual or group work on elementary and secondary school music curriculum projects.

**MUSED 432 Comprehensive Music in the Secondary School (3) VLPA** *Demorest* The teaching of music and its literature in music classes other than traditional ensembles from grade six through adults. Prerequisite: MUSED 340.

**MUSED 440 Music for Children (3) VLPA** *Campbell* Identification and selection of appropriate objectives, materials, teaching strategies and evaluation techniques used in teaching music from birth through grade five, with consideration of various approaches (e.g., Delcroze, Kodaly, Orff) for the musical development of children. Prerequisite: MUSED 302; MUSED 340

**MUSED 442 Instrumental Curriculum: Methods and Materials (3) VLPA** *Morrison* Study of the organization and administration of school instrumental music; the selection and use of materials and teaching strategies from beginning to advanced levels of instrumental instruction. Prerequisite: MUSED 340.

**MUSED 443 Choral Curriculum: Methods and Materials (3) VLPA** *Demorest* Study of the organization and administration of school choral music; the selection and use of materials and teaching strategies from beginning to advanced levels of choral instruction. Prerequisite: MUSED 340.

**MUSED 452 Ethnomusicology in the Schools (3) VLPA** *Campbell* Issues, teaching materials, and techniques involved in incorporating music cultures of United States and related world music repertoires in K-12 classroom instruction. Prerequisite: MUSED 340.

**MUSED 453 Approaches to Classroom Instruction: K-12 (3) VLPA** *Campbell* Examines such major instructional approaches as MMCP, Orff, Kodaly, and Dalcroze. Included are the philosophy of each and the methods, materials, and instructional skills needed for classroom application. Prerequisite: MUSED 403.

**MUSED 465 Classroom Management and Evaluation in Music Education (3) VLPA** *Morrison* Provides future teachers with strategies and techniques for classroom management, motivation, assessment, and evaluation for applications to K-12 school music programs. Prerequisite: MUSED 340.

**MUSED 475 Teaching the Music of Selected Cultures (1, max. 6) VLPA** *Campbell* Music and culture of a specific world region with particular attention to songs, stories, and instrumental pieces applicable to the teaching of music and the arts in elementary and secondary schools.

**MUSED 480 Music Methods for Classroom Teachers (3) VLPA** *Campbell* Addresses the basic fundamentals of music and methods for teaching K-6 school children. Topics include repertoire appropriate for different age levels, methods and materials for integrating music into the K-6 curriculum.

**MUSED 496 Special Topics in Music Education (1-3, max. 10) VLPA** Special studies designed to reflect contemporary emphases and concerns in the music education profession.

**Courses for Graduates Only**

**MUSED 501 Introduction to Research in Music Education (3)** *Campbell, Demorest, Morrison* Seminar in research design and method with emphasis on identification of problems in music instruction, interpretation of data, and application of findings to classroom settings.

**MUSED 502 Quantitative Research in Music Education (3)** *Campbell, Demorest, Morrison* Seminar in quantitative research utilizing experimental, quasi-experimental, and descriptive design, with emphasis on the pursuit of solutions to pedagogical problems through appropriate research procedures, analysis, and interpretation of findings. Prerequisite: MUSED 501.

**MUSED 503 Qualitative Research in Music Education (3)** *Campbell, Demorest, Morrison* Examination of qualitative modes of inquiry (including ethnographic, case study, phenomenological, and historical) to music instruction in classroom, studio, and community settings. Prerequisite: MUSED 502.

**MUSED 522 Psychology of Music Learning and Teaching (3)** *Campbell, Demorest, Morrison* Examines previous research in areas related to music cognition, including music perception, music performance, musical creativity, musical affect, musical preference, and social psychology. Explores how this research relates to curriculum and practice in music education. Role of theory, method, and procedure for psychological research in music education.

**MUSED 524 Seminar in Music Education (3)** *Campbell, Demorest, Morrison* Special problems in the teaching and supervision of music in the elementary grades. Prerequisite: one year of teaching experience.

**MUSED 525 Seminar in Music Education (3)** *Campbell, Demorest, Morrison* Special problems in the teaching and administration of music in the secondary school and community college. Prerequisite: one year of teaching experience.

**MUSED 530 Administration and Supervision in Music Education (3)** *Campbell, Demorest, Morrison* Survey of issues in policy and systems for facilities, student/personnel, technology, school/community relations, and special programs in music education. Focuses on evaluating and improving existing programs. Includes supervision of student teachers.

**MUSED 535 Seminar in Musical Development (3)** *Campbell, Demorest, Morrison* Critical review of theories, methods of inquiry, designs, and conclusions of research in musical development from early childhood through adolescence. Emphasis on evaluating theories and methods of studying musical development and exploring their relationship to theories of general intellectual development; adult music cognition research; and curriculum and practice in music education.

**MUSED 540 History of American Music Education (3)** *Campbell, Demorest, Morrison* A chronological examination of individual, social, and political events, and educational philosophies, that characterized the development of music instruction in American schools from colonial times to the present.

**MUSED 542 Comparative Music Education (3)** *Campbell, Demorest, Morrison* A transcultural examination of philosophy and practice of music instruction.

**MUSED 550 Proseminar in Music Education (3)** *Campbell, Demorest, Morrison* Examination of the major literature in the philosophy, history, psychology, and sociology of formal school music instruction.

**MUSED 552 World Music Education (3)** *Campbell* Seminar on issues of multiculturalism and the world music "movement" as they affect school music curriculum and instruction. Curricular content and cultural context examined in relation to teaching K-12 students, teachers, and undergraduate students in music education programs. Offered: AWSpS.

**MUSED 560 Contemporary Issues in Music Education (1-3, max. 6)** *Campbell, Demorest, Morrison* Seminar focusing on review of literature on psychological and sociological aspects of music education, including historical and philosophical foundations of music education in the United States. Appropriate for MA students seeking guidance in preparation of topic for examinations. Prerequisite: MUSED 501.

**MUSED 561 Seminar in Theories of Music Instruction (3, max. 9)** *Campbell, Demorest, Morrison* Theories of music instruction, with special attention to curriculum, instructional procedures, and assessment of learning. Prerequisite: MUSED 501 or permission of instructor.

**MUSED 575 Seminar in Music Education Research (1-3, max. 6)** *Campbell, Demorest, Morrison* Examines research and research-based issues relevant to music instruction and learning. Doctoral students should register each quarter until successful completion of general examination. Offered: A.

**Music Ensemble**

**MUSEN 446 Advanced Studio Jazz Ensemble (1, max. 9)** *VLPA* Preparation and performance of material appropriate to large jazz ensemble concerts, clinics, and radio and television broadcasts. Recommended: three quarters of MUSEN 346.

**Courses for Graduates Only**

**MUSEN 500 University Symphony Orchestra (1, max. 9)**

**MUSEN 501 Wind Ensemble (1, max. 9)** *Salzman*

**MUSEN 502 Symphonic Band (1, max. 6)** *Salzman*

**MUSEN 503 Marching Band (2, max. 6)** *McDavid* Credit/no credit only.

**MUSEN 504 Percussion Ensemble (1, max. 9)** *Collier*

**MUSEN 505 Brass Ensemble (1, max. 9)** *Kappy*

**MUSEN 506 Woodwind Ensemble (1, max. 9)** *Skowronek*

**MUSEN 507 University Oratorio Chorus (1, max. 9)** *Kaplan* Credit/no credit only.

**MUSEN 525 Accompanying (2, max. 18)** *Bergman*

**MUSEN 540 Vocal Jazz Ensemble (1, max. 9)** Credit/no credit only.

**MUSEN 545 Jazz Workshop (1, max. 9)** *Collier, Seales*

**MUSEN 546 Studio Jazz Ensemble (1, max. 9)**

**MUSEN 547 Opera Chorus (1, max. 9)** *Kaplan*

**MUSEN 550 University Chorale (1, max. 9)** Credit/no credit only.

**MUSEN 551 Chamber Singers (1, max. 9)** *Boers*

**MUSEN 561 Piano Ensemble (1, max. 9)** Study and performance of works for four hands at one or two pianos. Designed for upper-level piano majors or students with equivalent ability.

**MUSEN 568 Harp Ensemble (1, max. 9)** *Vokolek*

**MUSEN 569 Baroque Chamber Ensemble (1)** *Terry, Tindemans*

**MUSEN 575 Opera Workshop (1, max. 9)** *Zahn* Preparation of music theatre repertoire. Intended for the mature voice student.

**MUSEN 581 Chamber Music (1, max. 9)**

**MUSEN 582 Opera Theatre (2, max. 18)** Public performance of roles in opera.

**MUSEN 583 Collegium Musicum (1, max. 9)** *Tindemans*

**MUSEN 584 Contemporary Group (1, max. 9)** *Durand* Exploration of notation and performance problems in today's music; preparation for public performance. Credit/no credit only.

**Music History**

**MUHST 400 Medieval Music: To 1400 (3)** *VLPA Taricani* Gregorian chant through Machaut and Landini. Prerequisite: one 300-level MUHST course.

**MUHST 401 Early British Music: 1300-1700 (3)** *VLPA Taricani* Examines the history of British music from its earliest polyphony through the music of Purcell. Stylistic features of English music studied, including medieval polyphony, Tudor music, Elizabethan music, and seventeenth-century music through Purcell. Prerequisite: one 300-level MUHST course.

**MUHST 402 Late Renaissance Secular Music: 1525-1630 (3)** *VLPA Taricani* The madrigal in Italy, England, and Germany. The Chanson, Jannequin through Lassus. Prerequisite: one 300-level MUHST course.

**MUHST 403 Late Renaissance Sacred and Instrumental Music: 1525-1630 (3)** *VLPA Taricani* Latin church music. Willawert through G. Gabrieli; early Reformation church music, Walther through Gibbons; instrumental music, Cabezon, the English virginal school, and Sweelinck. Prerequisite: one 300-level MUHST course.

**MUHST 404 Baroque Keyboard Music (3)** *VLPA* Forms and styles: Frescobaldi through J. S. Bach and C.P.E. Bach. Prerequisite: one 300-level MUHST course.

**MUHST 405 Orchestral Music: 1620-1760 (3)** *VLPA* Corelli through the Mannheim School. Prerequisite: one 300-level MUHST course.

**MUHST 406 Baroque Choral Music (3)** *VLPA Bozarth* Monteverdi through Handel. Prerequisite: one 300-level MUHST course.

**MUHST 407 Baroque Opera (3)** *VLPA* Opera of the Baroque period. Prerequisite: one 300-level MUHST course.

**MUHST 408 Keyboard Music: 1760-1830 (3)** *VLPA Bozarth* Haydn through Schumann. Prerequisite: one 300-level MUHST course.

**MUHST 409 Chamber Music: 1760-1830 (3)** *VLPA* Haydn through Schubert. Prerequisite: one 300-level MUHST course.

**MUHST 410 Orchestral Music: 1760-1830 (3)** *VLPA Will* Haydn through Berlioz. Prerequisite: one 300-level MUHST course.

**MUHST 411 Art Song, 1760-1830 (3)** *VLPA* The art song in European culture during the classical and early romantic periods. Prerequisite: one 300-level MUHST course.

**MUHST 412 Choral Music: 1750-1830 (3)** *VLPA Will* Large works for chorus and orchestra. Haydn through Berlioz. Prerequisite: one 300-level MUHST course.

**MUHST 413 Opera: 1750-1830 (3)** *VLPA Will* Gluck through Bellini. Prerequisite: one 300-level MUHST course.

**MUHST 414 Keyboard Music: 1830-1915 (3) VLPA**  
*Bozarth* Liszt through Debussy. Prerequisite: one 300-level MUHST course.

**MUHST 415 Chamber Music: 1830-1915 (3) VLPA**  
Schumann through Ravel. Prerequisite: one 300-level MUHST course.

**MUHST 416 Orchestral Music: 1830-1915 (3) VLPA**  
Liszt and Brahms through early Schoenberg and Stravinsky. Prerequisite: one 300-level MUHST course.

**MUHST 417 Art Song: 1830-1915 (3) VLPA** *Bozarth*  
The Lieder of Schumann, Brahms, Wolf, Strauss, Mahler, and Schoenberg. Prerequisite: one 300-level MUHST course.

**MUHST 418 Choral Music: 1830-1915 (3) VLPA**  
*Bozarth* Selected choral masterpieces. Brahms through Britten. Prerequisite: one 300-level MUHST course.

**MUHST 419 Opera: 1830-1915 (3) VLPA** *Will*  
Wagner through Puccini. Prerequisite: one 300-level MUHST course.

**MUHST 420 Authenticity and Performance (3) VLPA**  
The practical and philosophical issues raised by historically informed performance of early music on period instruments. Prerequisite: one 300-level MUHST course.

**MUHST 421 Music Criticism (3) VLPA** *Starr*  
Study of the various forms of music criticism, with an emphasis on the writing of valid examples and evaluation of one's own work along with that of others—classmates, journalists, and academic critics. Prerequisite: one 300-level MUHST course.

**MUHST 423 Twentieth-Century Music: to 1945 (3) VLPA** *Starr*  
Intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of this century. Prerequisite: one 300-level MUHST course.

**MUHST 424 Music Since 1945 (3) VLPA** *Starr*  
Diversity of the contemporary musical scene. Vocabularies appropriate for the description and understanding of the new music, developed through study of representative composers and works, and appropriate readings. Prerequisite: one 300-level MUHST course.

**MUHST 426 American Popular Music (3) VLPA**  
*Starr* An in-depth consideration of American popular music styles and repertory from about 1920 to the present day. Analysis of representative pieces; consideration of critical and aesthetic issues relating to popular music; relationship of popular music to "art" music and to American culture and society. Prerequisite: one 300-level MUHST course.

**MUHST 429 Music, Literature, and the Arts (3) VLPA**  
Literary and visual art works that include musical subject matter and forms; musical genres that incorporate such other arts as opera and ballet. Related philosophical writings. Includes works of a particular time period or investigation of a specific problem in comparative arts. Prerequisite: one 300-level MUHST course.

**MUHST 497 Special Topics in Music History (1-3, max. 6) VLPA**  
Topics vary each quarter. Prerequisite: one 300-level MUHST course.

## Courses for Graduates Only

**MUHST 500 Seminar in Methods of Music Research (3)** *Taricani, Will*  
Explores various critical approaches to research in music at the graduate level, examining specialized bibliographical resources, controversial arguments about musical issues, and other matters of musical criticism required to begin advanced study of music. Prerequisite for all graduate music history courses except 515.

**MUHST 503 Readings in Medieval and Renaissance Music (5)** *Taricani*  
Musical styles, genres, and forms of the middle ages and Renaissance. Focuses upon musicological problems and controversy related to music composed between ca. 1000 and 1600. Prerequisite: permission of instructor.

**MUHST 504 Seminar in Medieval Music (3, max. 6)** *Taricani*  
Prerequisite: MUHST 500.

**MUHST 505 Seminar in Renaissance Music (3, max. 6)** *Taricani*  
Prerequisite: MUHST 500.

**MUHST 506 Seminar in Baroque Music (3, max. 6)**  
*Bozarth* Prerequisite: MUHST 500.

**MUHST 508 Seminar in the Viennese Classical Period: 1760-1830 (3, max. 6)** *Bozarth, Will*  
Prerequisite: MUHST 500.

**MUHST 509 Seminar in Nineteenth-Century Music: 1830-1890 (3, max. 6)** *Bozarth*  
Prerequisite: MUHST 500.

**MUHST 510 Seminar in Music Since 1890 (3, max. 6)** *Starr*  
Prerequisite: MUHST 500.

**MUHST 515 Seminar in Medieval and Renaissance Notation (5)** *Taricani*  
Gregorian chant through sixteenth-century prints.

**MUHST 519 Seminar in Modern Editorial Procedures (5)** *Bozarth*  
Study of modern procedures for preparing critical editions. Related areas of study may include analysis of musical style and historical and performance problems inherent in works being edited.

**MUHST 520 Seminar in American Music (3, max. 6)** *Starr*  
Research in the life, works, and times of composers in the United States from colonial days to the present. Prerequisite: MUHST 500 and undergraduate work in the history and analysis of twentieth century music.

**MUHST 537 Seminar on Opera (3, max. 6)** *Will*  
Seminar in music history, providing a complement to history of opera series. Prerequisite: MUHST 500.

## Graduate Program

Graduate Program Coordinator  
M29A Denny, Box 353120  
(206) 685-3800

## Master of Arts

The Department of Near Eastern Languages and Civilization offers a graduate program of studies leading to the Master of Arts degree. The program is designed to provide students with advanced training in at least one Near Eastern language and in a specific field of specialization. Students may concentrate in Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended not only for those students who wish to continue their studies at the doctoral level but also for students who wish to pursue careers in government or business.

*Admission Requirements:* Statement of purpose; a sample of written work; three letters of recommendation, of which at least two must attest to scholarly ability. Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years' study of the language in which they plan to concentrate.

*Graduation Requirements:* Departmental requirements, in addition to those required by the Graduate School for the Master of Arts degree, include a reading knowledge of French or German, or, with the prior approval of the student's M.A. committee, any other language pertinent to the research in the student's field of study; a seminar paper representing the student's best work; a written examination consisting of four parts: (1) on the general culture of the Near East, (2) on the student's field of specialization, (3) on the student's language of concentration, (4) on a second Near Eastern language related to the language concentration. Fulfillment of these requirements normally entails the completion of at least two years of study.

## Doctor of Philosophy

Some of the department faculty are part of an interdisciplinary faculty group which offers doctoral study in Near and Middle Eastern Studies. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of this catalog.

## Summer Programs

The department offers Summer Intensive Language programs in Arabic, Hebrew, and Central Asian languages (Uzbek, Kazakh, Tajik, and others).

## Research Facilities

The University of Washington Libraries holds an extensive collection of books and materials in the languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. Candidates for the master's degree as well as doctoral students will find in the collection adequate resources for their research. The library participated in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials. The library staff includes Near East and Central Asia specialists responsible for acquiring and cataloging the collection. The library maintains book exchanges with the Central Asian republics, some of these beginning as early as 1961. They are handled through the Near East and Slavic Sections of the University's Suzzallo Library. Among its staff are an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the East Asia Library.

## Financial Aid

A limited number of teaching assistantships are available for graduate students in the department who are fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

## Exchange Agreements

The University of Washington and the Department of Near Eastern Languages and Civilization maintain exchange agreements for graduate students and faculty with the following universities and institutions: American University in Cairo, Egypt; Hebrew University of Jerusalem-Israel; Tashkent University-Uzbekistan. In addition the department has direct exchange agreements with Xinjiang University, Urumchi, People's Republic of China, and several universities in Kyrgyzstan and Kazakhstan. It also maintains exchanges and cooperation with the Oriental Institute at the Tajik Academy of Sciences, Dushanbe; and participates in an agreement of scholarly exchanges and cooperation with the Uzbek Writers' Union, the Uzbek Academy of Sciences, and the Kazakh Academy of Sciences. The department is an institutional member of the following organizations which also offer opportunities for study and research abroad: Center for Arabic Study Abroad in Cairo (CASA), American Research Center in Egypt, and the American Research Institute in Turkey.

## Faculty

### Chair

Michael A. Williams

### Professors

Bacharach, Jere L. \* 1967, (Adjunct); MA, 1962, Harvard University; PhD, 1967, University of Michigan; history of the Middle East, Islam.

Cirtautas, Ilse D. \* 1968; PhD, 1958, University of Hamburg (Germany); Turkic languages and literatures.

Heer, Nicholas L. \* 1965, (Emeritus); PhD, 1955, Princeton University; Arabic language and literature, Islamic theology and philosophy.

Jaffee, Martin S. \* 1987, (Adjunct); PhD, 1980, Brown University; rabbinic religion and literature in late antiquity.

Karimi-Hakkak, Ahmad \* 1985; PhD, 1979, Rutgers University; Persian language and literature, Iranian culture and civilization.

MacKay, Pierre A. \* 1966, (Emeritus); PhD, 1964, University of California (Berkeley); Greek literature, post-classical and Byzantine Greek literature, numismatics.

Sokoloff, Naomi B. \* 1985; PhD, 1980, Princeton University; Hebrew language and literature.

Williams, Michael A. \* 1976; PhD, 1977, Harvard University; early Christianity and religions of antiquity.

Ziadeh, Farhat J. \* 1966, (Emeritus); LLB, 1940, University of London (UK); Arabic language and literature, Islamic law, Islamic institutions.

### Associate Professors

Deyoung, Terri L. \* 1991; PhD, 1988, University of California (Berkeley); Arabic language and literature.

### Assistant Professors

Kuru, Selim Sirri 1999, (Acting); Other, 1999, Harvard University; Turkish language and literature.

Noegel, Scott B. \* 1995; PhD, 1994, Cornell University; ancient Near Eastern languages.

Walker, Joel T. 1997, (Adjunct); PhD, 1998, Princeton University; late antiquity, Byzantine, early Middle Ages.

Wheeler, Brannon M. \* 1996; PhD, 1993, University of Chicago; Islamic studies, comparative religion, late antiquity, Jewish studies, legal studies.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### Akkadian

**AKKAD 401 Elementary Akkadian (3)** Introduction to the Akkadian language (Assyrian and Babylonian). Readings in original Akkadian cuneiform from historical, legal, and literary texts.

**AKKAD 402 Elementary Akkadian (3)** Introduction to the Akkadian language (Assyrian and Babylonian). Readings in original Akkadian cuneiform from historical, legal, and literary texts.

**AKKAD 403 Elementary Akkadian (3)** Introduction to the Akkadian language (Assyrian and Babylonian). Readings in original Akkadian cuneiform from historical, legal, and literary texts.

**AKKAD 421 Intermediate Akkadian (3)** Readings in Akkadian texts.

**AKKAD 422 Intermediate Akkadian (3)** Readings in Akkadian texts.

**AKKAD 423 Intermediate Akkadian (3)** Readings in Akkadian texts.

### Arabic

**ARAB 401 Intensive Elementary Arabic (15)** Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 411, 412, 413 taken.) Offered: S.

**ARAB 411 Elementary Arabic (5)** Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.)

**ARAB 412 Elementary Arabic (5)** Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB 411.

**ARAB 413 Elementary Arabic (5)** Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB 412.

**ARAB 421 Intermediate Arabic (5) VLPA** Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: either ARAB 401 or ARAB 413.

**ARAB 422 Intermediate Arabic (5) VLPA** Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: ARAB 421.

**ARAB 423 Intermediate Arabic (5) VLPA** Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: ARAB 422.

**ARAB 431 Advanced Arabic (3) VLPA** Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 423.

**ARAB 432 Advanced Arabic (3) VLPA** Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 431.

**ARAB 433 Advanced Arabic (3) VLPA** Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 432.

**ARAB 452 Maqamat: Hamadhani, Hariri (3) VLPA** *MacKay* Reading of several maqamat (essays in rhymed prose) of al-Hamadhani and al-Hariri. Examination of the maqamat genre as a whole. Prerequisite: ARAB 432.

**ARAB 453 Historical Texts (3) VLPA/I&S** *B. Wheeler* Readings in Arab historians with particular reference to scholars such as Tabari, Ibn al-Jawzi, and Ibn al-Athir. Prerequisite: ARAB 432.

**ARAB 454 Quran and Its Interpretation (3) VLPA** *B. Wheeler* Reading of selected passages from the Quran in relation to their interpretation in classical commentaries (tafsir) and in legal texts (ahkam al-Quran). Focus on the various types of classical scholarship applied to the text of the Quran (ulum al-Quran). Prerequisite: ARAB 432.

**ARAB 455 Ritual and Legal Texts (3) VLPA** *B. Wheeler* Selected readings from well-known Islamic legal texts (furu al-fiqh) with attention to the sources of the law and methods of exegesis (usul al-fiqh). Prerequisite: ARAB 432.

**ARAB 456 Islamic Political Theorists (3) VLPA/I&S** Readings from the main political theorists: al-Baghdadi, al-Mawardi, and Ibn Khaldun. Prerequisite: ARAB 432.

**ARAB 458 Modern Poetry (3) VLPA** *DeYoung* Neoclassical poetry of the nineteenth and twentieth centuries, and the development of modern verse. Prerequisite: ARAB 432.

**ARAB 470 Stories of the Prophets (3) VLPA/I&S** *B. Wheeler* Reading and discussion of Jewish and Islamic exegesis of selected Biblical and Quranic narratives dealing with such figures as Moses, Abraham, Jacob, or Adam and Eve. Prerequisite: either ARAB 432 or HEBR 423. Offered: jointly with HEBR 470.

**ARAB 472 Quran and Bible Masorah (3) VLPA B. Wheeler** Introduces and discusses selected readings in textual apparatuses for the Quran and Bible. Attention to marginalia in Rabbinic texts, and Islamic scholars such as al-Zarkashi and as-Suyuti. Prerequisite: either ARAB 432, HEBR 427, or HEBR 432. Offered: jointly with HEBR 472.

**ARAB 490 Supervised Study (1-6 max. 18)** Special work in literary texts for graduates and undergraduates. Prerequisite: ARAB 423.

**ARAB 496 Special Studies in Arabic (3-5, max. 15) VLPA** Topics vary. Offered occasionally by visiting or resident faculty.

**ARAB 499 Undergraduate Research (1-6 max. 18)**

### Courses for Graduates Only

**ARAB 596 Special Studies in Arabic (3-5, max. 15)** Topics vary. Offered occasionally by visiting or resident faculty.

**ARAB 600 Independent Study or Research (\*)**

### Aramaic

**ARAMIC 422 Targumic Aramaic (5) VLPA Noegel** The Targum (ancient Aramaic translation) of the Hebrew Bible forms an important basis for biblical interpretation. Emphasis on comprehension and interpretive strategies. Recommended: knowledge of Hebrew and/or Aramaic. Prerequisite: HEBR 333 or HEBR 426.

### Egyptian

**EGYPT 410 Hieroglyphic Egyptian (5) VLPA Noegel** Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (c. 2040-1782 BCE). Focuses on reading and writing hieroglyphics, including reading a complete Egyptian text. No knowledge of Egyptian or any other Near Eastern language is required.

**EGYPT 411 Introduction to Coptic (3) Williams** Elements of grammar of the Sahidic dialect of the Coptic language.

**EGYPT 422 Readings in Coptic (3) VLPA Williams** Readings from ancient Coptic Christian literature, with emphasis on the *Nag Hammadi* texts. Prerequisite: COPTC 411 or EGYPT 411.

**EGYPT 423 Readings in Coptic (3) VLPA Williams** Readings from ancient Coptic Christian literature, with emphasis on the *Nag Hammadi* texts. Prerequisite: COPTC 411 or EGYPT 411.

### Hebrew

**HEBR 401 Intensive Elementary Modern Hebrew (15)** Intensive study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 411, 412, 413 taken.) Offered: S.

**HEBR 411 Elementary Modern Hebrew (5) Sokoloff** Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.)

**HEBR 412 Elementary Modern Hebrew (5) Sokoloff** Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.) Prerequisite: HEBR 411.

**HEBR 413 Elementary Modern Hebrew (5) Sokoloff** Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.) Prerequisite: HEBR 412.

**HEBR 421 Intermediate Modern Hebrew (5) VLPA Sokoloff** Readings of selected texts in modern Hebrew with continuing emphasis on grammar and syntax. Prerequisite: either HEBR 401 or HEBR 413.

**HEBR 422 Intermediate Modern Hebrew (5) VLPA Sokoloff** Readings of selected texts in modern Hebrew with continuing emphasis on grammar and syntax. Prerequisite: HEBR 421.

**HEBR 423 Intermediate Modern Hebrew (5) VLPA Sokoloff** Readings of selected texts in modern Hebrew with continuing emphasis on grammar and syntax. Prerequisite: HEBR 422.

**HEBR 427 Biblical Hebrew Poetry (5) VLPA Noegel** Explores select poetic sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: HEBR 333 or HEBR 426.

**HEBR 428 Inscriptions from Biblical Times (5) VLPA Noegel** Surveys Northwest Semitic inscriptions that bear significantly on our understanding of Biblical history and ancient Hebrew including the Moabite stone, Israelite ostraca, Siloam engraving, Gezer calendar, Deir Alla (Gilead) inscriptions, the Asherah texts, Ammonite fragments, and Phoenician monuments. Prerequisite: HEBR 333 or HEBR 426.

**HEBR 451 Introduction to Hebrew Literature (3) VLPA Sokoloff** Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

**HEBR 452 Introduction to Hebrew Literature (3) VLPA Sokoloff** Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

**HEBR 453 Introduction to Hebrew Literature (3) VLPA Sokoloff** Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

**HEBR 454 Hebrew Poetry (3) VLPA Sokoloff** Selections of poetry by prominent twentieth-century Hebrew poets whose texts comment or elaborate on biblical texts. Original source considered side-by-side with modern poetry, to examine ways recent literature models itself on, draws upon, and revises traditional sources. Prerequisite: HEBR 423.

**HEBR 470 Stories of the Prophets (3) VLPA/I&S B. Wheeler** Reading and discussion of Jewish and Islamic exegesis of selected Biblical and Quranic narratives dealing with such figures as Moses, Abraham, Jacob, or Adam and Eve. Prerequisite: either ARAB 432 or HEBR 423. Offered: jointly with ARAB 470.

**HEBR 472 Quran and Bible Masorah (3) VLPA Wheeler** Introduces and discusses selected readings in textual apparatuses for the Quran and Bible. Attention to marginalia in Rabbinic texts, and Islamic scholars such as al-Zarkashi and as-Suyuti. Prerequisite: either ARAB 437, HEBR 427, or HEBR 432. Offered: jointly with ARAB 472.

**HEBR 490 Supervised Study (1-6 max. 18)** Special work in literary texts for graduates and undergraduates. Prerequisite: HEBR 423.

**HEBR 600 Independent Study or Research (\*)**

### Persian

**PRSAN 401 Intensive Elementary Tajik (15)** Intensive study of grammar with oral and written drill and reading of selected texts in Tajik, the literary language spoken and written in the Central Asian Republic of Tajikistan. Offered: S.

**PRSAN 404 Intensive Persian for Native Speakers (15) VLPA Karimi-Hakkak** Enables students with a degree of proficiency in spoken Persian to read and write, to translate rudimentary texts, and to conceptualize the use of the formal style of composition. Reading, writing, and comprehension, particularly of handwritten manuscripts of the scribal tradition. Also covers calligraphy, translation, journalistic prose, and other facets of the language and the script. Offered: S.

**PRSAN 411 Elementary Persian (5)** Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words.

**PRSAN 412 Elementary Persian (5)** Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 411.

**PRSAN 413 Elementary Persian (5)** Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 412.

**PRSAN 421 Intermediate Persian (5) VLPA** Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 413.

**PRSAN 422 Intermediate Persian (5) VLPA** Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 421.

**PRSAN 423 Intermediate Persian (5) VLPA** Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 422.

**PRSAN 431 Advanced Persian (3) VLPA** Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 423.

**PRSAN 451 Introduction to Persian Literature (3) VLPA Karimi-Hakkak** Selected texts from modern and classical Persian poetry and prose. Provides insights into Iranian culture and its past and present achievements in literature. Prepares the student for a more comprehensive and critical study of Persian literature. Prerequisite: PRSAN 423.

**PRSAN 452 Modern Persian Literature: A Survey (3) VLPA Karimi-Hakkak** Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forugh. Prerequisite: PRSAN 423.

**PRSAN 453 Classical Persian Literature: A Survey (3) VLPA** *Karimi-Hakkak* History of Persian literature from Rudaki to Hafiz. Studies epic, lyric, and mystic traditions placed in historical settings. Covers the most important genres such as the Qasida, the Ghazal, the *Ruba'i* and the *Masnavi*. Prerequisite: PRSAN 423.

**PRSAN 454 The Epic Tradition in Iran (3) VLPA** *Karimi-Hakkak* Focuses on the Shahnameh of Firdawsi: explores the ancient legends that gave rise to it and follows the fortunes of epic poetry after Firdawsi, touching on the rise, development, and decline of romance in classical Persian literature. Prerequisite: PRSAN 433.

**PRSAN 455 The Persian Ghazal (3) VLPA** *Karimi-Hakkak* The Ghazal as the leading medium for lyrical expression in classical Persian tradition. Follows this genre from conception to culmination in the poetry of Hafiz. Conventions and devices of the *Ghazal*. Development placed in historical and social context. Prerequisite: PRSAN 433.

**PRSAN 456 Sufism: Thought and Expression (3) VLPA/I&S** *Karimi-Hakkak* Dynamics of mystical thought and expression as evolved in the writings of the great Sufi masters and reflected in the poetry of Sana'i, Attar, Rumi, and others. The fundamental unity of the mystical vision, with special attention to the peculiarities of individual style and expression. Prerequisite: PRSAN 433.

**PRSAN 490 Supervised Study (1-6, max. 18)** Special work in literary texts for graduates and undergraduates. Prerequisite: PRSAN 423.

**PRSAN 499 Undergraduate Research (1-6, max. 18)**

**PRSAN 600 Independent Study or Research (\*)**

## Turkic

**TKIC 401 Intensive Elementary Uzbek (15)** Intensive study of grammar, with oral and written drill and reading of simple texts in Uzbek. Covers first year Uzbek. Cannot be taken for credit if 411, 412, 413 taken. Offered: S.

**TKIC 403 Intensive Elementary Kirghiz (15)** Intensive study of grammar with oral and written drill of selected texts. Offered: S.

**TKIC 404 Intensive Intermediate Uzbek (15) VLPA** Allows students to complete second year Uzbek in one quarter. Reading of selected texts in Uzbek, with continuing emphasis on oral and written practice, grammar, and advanced readings. Cannot be taken for credit if 421, 422, 423 taken. Prerequisite: either TKIC 401 or TKIC 413. Offered: S.

**TKIC 405 Intensive Intermediate Kazakh (15) VLPA** Allows students to complete second year Kazakh in one quarter. Reading of selected texts in modern literary Kazakh, with emphasis on grammar, syntax, and oral practice. Prerequisite: either TKIC 402 or TKIC 416. Offered: S.

**TKIC 406 Intensive Advanced Uzbek (15) VLPA** Advanced-level instruction in speaking, writing, reading, and listening skills. Students work independently on translation projects. Emphasis on extensive writing practices in Uzbek and student participation in an Uzbek email conversation circle. Prerequisite: TKIC 423. Offered: S.

**TKIC 411 Elementary Uzbek (5) Cirtautas** Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

**TKIC 412 Elementary Uzbek (5) Cirtautas** Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

**TKIC 413 Elementary Uzbek (5) Cirtautas** Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

**TKIC 421 Intermediate Uzbek (3) VLPA Cirtautas** Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: either TKIC 401 or TKIC 413.

**TKIC 422 Intermediate Uzbek (3) VLPA Cirtautas** Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 421.

**TKIC 423 Intermediate Uzbek (3) VLPA Cirtautas** Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 422.

**TKIC 490 Supervised Study (1-6, max. 18)** Special work in literary texts for graduates and undergraduates. Prerequisite: either TKIC 404, TKIC 405, or TKIC 423.

**TKIC 499 Undergraduate Research (3-5, max. 15)** For Turkic language and literature majors.

## Courses for Graduates Only

**TKIC 546 Old Turkic (3) Cirtautas** Introduction to Runic script; phonology, morphology, and syntax of the oldest form of Turkic; reading and translation of eighth-century inscriptions of historical and literary importance. Prerequisite: permission of instructor.

**TKIC 562 Middle Turkic (3) Cirtautas** Introduction to the phonology, morphology, and syntax of the Middle Turkic languages; reading and translation of texts in Karakhanid, Khorazmian Turkic, Kipchak, and Chagatai. Prerequisite: permission of instructor.

**TKIC 563 Seminar on Turkic Literature (5) Cirtautas** Topics in oral and written literature. Prerequisite: permission of instructor.

**TKIC 600 Independent Study or Research (\*)**

## Turkish

**TKISH 401 Intensive Elementary Modern Turkish (15)** Intensive study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if TKISH 411, 412, 413 taken.) Offered: S.

**TKISH 411 Elementary Turkish (5)** Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be taken for credit if TKISH 401 is taken.)

**TKISH 412 Elementary Turkish (5)** Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be taken for credit if TKISH 401 is taken.)

**TKISH 413 Elementary Turkish (5)** Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be taken for credit if TKISH 401 is taken.)

**TKISH 421 Intermediate Turkish (5) VLPA** Introduction to modern Turkish literature. Prerequisite: TKISH 413.

**TKISH 422 Intermediate Turkish (5) VLPA** Introduction to modern Turkish literature. Prerequisite: TKISH 421.

**TKISH 423 Intermediate Turkish (5) VLPA** Introduction to modern Turkish literature. Prerequisite: TKISH 422.

**TKISH 454 Turkish Literary Genres: Prose (3) VLPA** Major genres, styles, and themes of Turkish art-prose from Ottoman times to present; creation of stylistic and critical norms. Prerequisite: TKISH 423.

**TKISH 490 Supervised Study (1-6, max. 18)** Special work in literary texts for graduates and undergraduates. Prerequisite: TKISH 423.

**TKISH 499 Undergraduate Research (1-6, max. 18)**

**TKISH 600 Independent Study or Research (\*)**

## Near Eastern Languages and Civilization

**NEAR E 402 Classical Arabic Literature in Translation (3) VLPA** *DeYoung* Examines development of Arabic literature from its beginnings through the fall of the Abbasid dynasty to the Mongols. Coincides with period when Arabic language and literature were dominant forces in Islamic civilization. Topics include: impact of Islam on the literature, courtly love, mystical poetry, the Thousand-and-One Nights, and Hispano-Arabic literature.

**NEAR E 403 Colonialism, Nationalism, and the Modern Arabic Novel (3) VLPA/I&S** *DeYoung* Examines how representative novels from the modern canon in Arabic have both endorsed and critiqued aspects of nationalism and colonialist ideology. Recommended: NEAR E 210.

**NEAR E 420 Islamic Theological Literature in English (3) VLPA** Readings from Mu'tazilite and Ash'arite works and from traditionalist works opposed to theology.

**NEAR E 430 Scripture in Islam (5) VLPA/I&S** *B Wheeler* Examines concept and use of scripture in Islam, with special attention to issues of canon and commentary, heavenly books, talismanic uses, and the place of scripture in ritual. In English. Offered: jointly with RELIG 430.

**NEAR E 433 Life of Prophet Muhammad (5) VLPA/I&S** *B. Wheeler* Examines historical and religious traditions associated with the life of the Prophet Muhammad with particular attention to the biography in classical Islam. Focuses on Muhammad as prophet, holy man, law-giver, mystic, and statesman. Comparison with other religious figures such as Jesus and the Buddha. In English. Offered: jointly with RELIG 433.

**NEAR E 442 Turkish Literature in Translation (3) VLPA** Covers major theoretical issues concerning Ottoman court literature and Turkish epic and troubadour poetry. Major writers and works of modern Turkish literature read and analyzed in their social, political, and theoretical contexts. Previous study of Turkish literature not required.

**NEAR E 451 Pharaonic Egypt in the Context of the Ancient Near East (3) VLPA I&S** *Noegel* Surveys the history, literature, and archaeology of ancient Egypt from the first pharaohs to the conquest of Alexander the Great. Introduces the field of Egyptology, and focuses on the continuity of Egyptian history and culture in context. Slide presentations supplement the readings and in-class lectures.

**NEAR E 452 The Biblical Song of Songs (3) VLPA** *Noegel* Examines the erotic and beautiful Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with various interpretations it has received from antiquity until today. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 452.

**NEAR E 453 The Biblical Prophets (3) VLPA I&S** *Noegel* Explores the biblical prophets (in translation) within their Near Eastern contexts. Studies them for their historicity, literary and rhetorical sophistication, and ideological agendas. This course seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 453.

**NEAR E 454 Israel: The First Six Centuries BCE (3) VLPA I&S** *Noegel* Traces the Israelites, from the Babylonian destruction of the Jerusalem Temple (586 BCE) to events following the destruction of the second Temple (1st century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 454.

**NEAR E 455 The Kings of Monarchic Israel (3) VLPA I&S** *Noegel* Examines the biblical accounts (in translation) concerning the formation and collapse of the united Israelite monarchy. Investigates the archaeological and textual evidence for their historicity, the literary sophistication of these accounts, and Israelite kingship within the wider context of the ancient Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 455.

**NEAR E 456 Women in Ancient Judaism (3) I&S/ VLPA** *Noegel* Explores those texts in early Jewish literature in which women play prominent roles and those in which women are surprisingly absent. Discusses the literary portrayal of women for what they tell us about the people who wrote the texts. No knowledge of Hebrew is required. Offered: jointly with RELIG 456.

**NEAR E 457 The History of Biblical Interpretation (3) I&S/VLPA** *Noegel* Traces biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a "hands-on" approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with RELIG 457.

**NEAR E 490 Supervised Study (1-6, max. 18)** Special work in Near Eastern studies for graduates and undergraduates.

**NEAR E 495 Trends in the Contemporary Middle East (3) I&S** *Bacharach, De Young* Perspectives on cultural, political, and other aspects of Middle Eastern societies. Focuses on background complexities rather than immediate political-military confrontations. Topics vary. Offered: jointly with SISME 495.

**NEAR E 496 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) VLPA** Offered occasionally by visitors or resident faculty. Content varies.

**NEAR E 499 Undergraduate Research (1-6, max. 18)**

## Courses for Graduates Only

**NEAR E 518 Foreign Language Teaching Methodology (2) Brandl** Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with ASIAN 518/GERMAN 518/SCAND 518/SLAV 518.

**NEAR E 520 Seminar on Near Eastern Civilization and Thought (3, max. 27)** Content varies.

**NEAR E 596 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15)** Offered occasionally by visitors or resident faculty. Content varies.

**NEAR E 600 Independent Study or Research (\*)**

## Philosophy

345 Savery

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/philosophy.html](http://www.washington.edu/students/genocat/academic/philosophy.html)

Department Web page:  
[depts.washington.edu/phillweb/](http://depts.washington.edu/phillweb/)

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

## Graduate Program

Graduate Program Coordinator  
345 Savery, Box 353350  
(206) 543-5855  
[philinfo@u.washington.edu](mailto:philinfo@u.washington.edu)

### Master of Arts, Doctor of Philosophy

The Department of Philosophy offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees, the M.A. program serving as the initial stage of the Ph.D. program.

The Master of Arts program option is a two-year non-thesis program which may be extended to three years depending on the outcome of the spring research papers. The student must take twelve courses in philosophy, satisfy a logic requirement, and at the end of the second year, submit three research papers for evaluation by the graduate faculty of the department. The courses and the papers must satisfy a distribution requirement. The departmental evaluation of the student's papers and course work determines whether an M.A. degree is awarded and also whether admission to the Ph.D. program is granted. The M.A. portion of the program serves as the initial stage of the Ph.D. program.

The Ph.D. program, which normally requires at least two years of study beyond the M.A., has three general requirements: (1) General Examination, (2) dissertation, and (3) Final Examination.

### Special Requirements

An undergraduate major in philosophy is recommended, although not required, for admission to the M.A. program. An applicant's philosophical potential is assessed primarily on the basis of a sample of his or her written work in philosophy and secondarily on the basis of his or her undergraduate record, Graduate Record Examination scores, and letters of recommendation.

### Financial Aid

The department has some teaching assistantships available to incoming students and the Graduate School offers some non-teaching assistantships.

## Faculty

### Chair

Kenneth C. Clatterbaugh

### Professors

Benson, Keith R. \* 1981, (Adjunct); MA, 1973, PhD, 1979, Oregon State University; history of modern American biology, marine biology, and evolutionary biology.

Boler, John F. \* 1960, (Emeritus); PhD, 1960, Harvard University; medieval philosophy.

BonJour, Laurence A. \* 1977; PhD, 1969, Princeton University; epistemology, Kant, British empiricism.

Clatterbaugh, Kenneth C. \* 1966; PhD, 1966, Indiana University; modern philosophy, social philosophy, gender studies.

Coburn, Robert C. \* 1971; PhD, 1958, Harvard University; metaphysics, social philosophy.

Cohen, S. Marc \* 1973; PhD, 1967, Cornell University; ancient philosophy, metaphysics.

Dietrichson, Paul \* 1961, (Emeritus); PhD, 1955, Yale University; philosophy of religion, Kant, existentialism.

Jecker, Nancy A. S. \* 1982, (Adjunct); MA, 1982, Stanford University; MA, 1984, PhD, 1986, University of Washington; philosophical and ethical aspects of health care delivery and policy.

Keyt, David \* 1957; PhD, 1955, Cornell University; ancient philosophy, logic.

Marks, Charles \* 1966; PhD, 1972, Cornell University; philosophy of mind, modern philosophy.

Potter, Karl H. \* 1970, (Emeritus); PhD, 1955, Harvard University; Indian philosophy, philosophy of language.

Richman, Robert J. \* 1961, (Emeritus); PhD, 1953, Harvard University; ethics, epistemology.

### Associate Professors

Lange, Marc B. \* 1997; PhD, 1990, University of Pittsburgh; philosophy of science, epistemology, metaphysics.

Mish'alani, James K. \* 1963, (Emeritus); PhD, 1961, Brown University; contemporary continental philosophy.

Moore, Ronald M. \* 1979; PhD, 1971, Columbia University; philosophy of law, aesthetics.

Roberts, Jean Valerie \* 1992; PhD, 1982, University of Pittsburgh; ancient philosophy, ethics, philosophy of feminism.

Talbott, William J. \* 1989; PhD, 1976, Harvard University; epistemology, ethics, social and political philosophy, rational choice theory.

Townsend, Michael F. \* 1992, (Adjunct); MA, 1978, PhD, 1982, University of Michigan; JD, 1989, Yale University; law and science, intellectual property, use of quantitative methods.

### Assistant Professors

Smith, Angela \* 1999; PhD, 1999, Harvard University; ethics, political philosophy.

Taylor, Paul C. 1998; PhD, 1997, Rutgers University; social and political philosophy, American pragmatism, aesthetics, race theory.

Weller, Cass \* 1997; PhD, 1983, University of Pittsburgh; ancient philosophy, modern philosophy, epistemology, philosophy of the mind.

Woody, Andrea I. \* 1997; PhD, 1997, University of Pittsburgh; philosophy of science, history of science, philosophy of feminism.

**Senior Lecturer**

Baker, Ann Michelle 1994; MA, 1983, PhD, 1990, University of Washington; metaphysics, epistemology.

**Course Descriptions**

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**PHIL 406 Philosophical Topics in Feminism (5) I&S Roberts** Detailed examination of questions raised by recent feminist scholarship in particular areas of philosophy, such as political theory, ethics, epistemology, or philosophy of science. Emphasis varies.

**PHIL 410 Social Philosophy (5) I&S Clatterbaugh, Coburn, Talbott, Taylor** An examination of topics pertaining to social structures and institutions such as liberty, distributive justice, and human rights.

**PHIL 411 Justice in Health Care (5) VLPA/I&S Jecker** Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or medical ethics. Offered: jointly with MHE 474.

**PHIL 412 Indian Philosophy (5) I&S Potter** Historical survey of the major systems and the traditional problems of philosophy in India. Readings in Buddhism, Nyaya, Samkhya, and Vedanta.

**PHIL 414 Philosophy of Law (3) I&S Bonjour, Moore** Nature and function of law. Relation of law to morality. Legal rights, judicial reasoning.

**PHIL 418 Indian Buddhist Philosophy (3) I&S Potter** Topics from Buddhist thought, both Sravakayanist and Mahayanist, touching on the following areas: epistemology, theory of liberation, metaphysics and the theory of the absolute, cosmology, and ethics. Readings in translation. At least one course in Indian philosophy or Hinduism or Buddhism recommended.

**PHIL 422 Studies in Continental Rationalism (3, max. 9) I&S Clatterbaugh, Coburn, Marks** Study of one or more of the major continental Rationalists: Descartes, Spinoza, Leibniz.

**PHIL 425 Studies in Nineteenth-Century Philosophy (3) I&S Baker** Study of post-Kantian metaphysical theories, with special emphasis on idealism, realism, and/or pragmatism. Typical authors include F. H. Bradley, J. McTaggart, Royce, and Green.

**PHIL 426 Twentieth-Century Philosophy (5) I&S Baker, Lange, Weller** A study of development of contemporary analytic philosophy, the revolt against idealism, and the linguistic turn in philosophy.

**PHIL 430 Hellenistic Philosophy (3) I&S Roberts** Survey of the Epicurean, Stoic, and Septic philosophy of the Hellenistic period. Emphasis may vary.

**PHIL 431 Philosophy of Plato (3, max. 6) I&S Cohen, Keyt, Roberts, Weller** Study of selected middle and late dialogues.

**PHIL 433 Philosophy of Aristotle (3, max. 6) I&S Cohen, Keyt, Roberts, Weller** Study of several major Aristotelian treatises.

**PHIL 434 Philosophy of Thomas Aquinas (3) I&S** Examination of the major philosophical positions of Thomas Aquinas in the theory of knowledge, metaphysics, and ethics.

**PHIL 436 British Empiricism (3) I&S Bonjour** Examination of the metaphysical and epistemological views of Locke and Berkeley, with perhaps some attention also to Hume. Prerequisite: either PHIL 322 or PHIL 350.

**PHIL 437 Philosophy of Hume (3) I&S Marks, Weller** Study Hume's analyses of knowledge, the passions, and morals.

**PHIL 438 Philosophy of Kant (5) I&S Bonjour, Weller** Systematic study of *The Critique of Pure Reason*.

**PHIL 440 Ethics (5) I&S Coburn, Roberts, Smith, Talbott** Critical examination of the concepts and judgments of value, including an analytical treatment of the notions of good and bad, right and wrong, and obligation. Emphasis varies from quarter to quarter.

**PHIL 445 Philosophy of Art (5) VLPA/I&S Moore** Critical examination of various accounts of the nature of art, artistic activity, the aesthetic experience. Problems in interpretation and evaluation of works of art.

**PHIL 446 Development of Aesthetic Theory (5) VLPA/I&S Moore, Taylor** Historical development of aesthetics, emphasizing such major figures as Plato, Aristotle, Hume, Kant, Hegel, and Goodman.

**PHIL 450 Epistemology (5) I&S Baker, Bonjour, Lange, Talbott** Systematic study of some of the main problems of the theory of knowledge, such as: the definition of "knowledge;" a priori knowledge; perception and knowledge of the external world; and whether knowledge has or requires a foundation. Emphasis varies from quarter to quarter.

**PHIL 453 Philosophy of Language (5) VLPA/I&S** Current theories of meaning, reference, predication, and related concepts. Offered: jointly with LING 476.

**PHIL 456 Metaphysics (5) I&S Baker, Coburn** Examination of such topics as freedom of the will, the nature of persons and personal identity, the existence of God, time, necessary truth, and universals. The emphases vary from year to year.

**PHIL 458 Phenomenology (5) I&S** The contributions of phenomenology to selected topics in the theory of meaning, philosophy of mind, ontology, and epistemology.

**PHIL 459 Philosophy of Medicine (5) I&S Jecker** Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Recommended: prior courses in philosophy, history of science, or history of medicine. Offered: jointly with MHE 440.

**PHIL 460 Philosophy of Science (5) I&S/NW Lange, Woody** Critical study of the nature of scientific knowledge. Topics include the relation of theory to observation, the use of mathematics, how theories change, the requirements for the meaningfulness of a theory, and nature of confirmation.

**PHIL 463 Philosophy of Mind (3) I&S Bonjour, Marks** Examination of current theories of the nature of the mind and mental processes.

**PHIL 464 Philosophical Issues in the Cognitive Sciences (5) I&S/NW Marks** Philosophical problems connected with research in psychology, artificial intelligence, and other cognitive sciences. Topics vary. Readings from both philosophical and scientific literature. Accessible to nonphilosophers with suitable interests and backgrounds.

**PHIL 466 Philosophy of the Social Sciences (5) I&S Talbott** Examination of fundamental issues in the foundations, methodology, and interpretation of the social sciences. Topics include value orientation and objectivity, methodological individualism, functionalism, reductionism, and the status of idealized models, including models involving idealized conceptions of individual rationality. Emphasis varies from quarter to quarter.

**PHIL 467 Philosophy of Religion (5) I&S** Study of selected topics and problems in the philosophy of religion, such as: arguments for the existence of God; the problem of evil; atheism; faith; religious experience and revelation; the attributes of God; miracles; immortality; and the relation between religion and morality. Readings from historical and contemporary authors.

**PHIL 469 Existentialist Philosophy (3) I&S** Examination of major ideas of selected existentialist philosophers.

**PHIL 470 Intermediate Logic (5) I&S/NW, QSR Keyt** An introduction to the concepts and methods of metatheory and their application to the sentential calculus.

**PHIL 471 Advanced Logic (5) I&S/NW Keyt** Study of the first-order predicate calculus with identity and function symbols. Consistency, soundness, completeness, compactness. Skolem-Löwenheim theorem. Formalized theories.

**PHIL 472 Axiomatic Set Theory (5) I&S/NW Keyt** Development of axiomatic set theory up to and including the consistency of the Axiom of Choice and Continuum Hypothesis with the Zermelo-Fraenkel Axioms.

**PHIL 473 Philosophy of Mathematics (5) I&S/NW** Study of the traditional accounts of the nature of mathematical entities and mathematical truth given by logicism, intuitionism, and formalism, and the impact of Gödel's incompleteness theorems on these accounts.

**PHIL 474 Modal Logic (5) I&S/NW** Notions of necessity and possibility, using the classical systems T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems.

**PHIL 479 Semantics II (3) VLPA/I&S/NW Ogihara** Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with LING 479.

**PHIL 481 Philosophy of Biology (5) I&S/NW Lange** Study of several current topics in philosophy of biology, which may include the logical structure of evolutionary theory, fitness, taxonomy, the concept of a living thing, reductionism, the concept of a biological species, evolutionary explanations, and philosophical consequences of sociology.

**PHIL 482 Philosophy of Physical Science (5, max. 10) I&S/NW Lange, Woody** Study of philosophical issues raised by theories in physics or chemistry, such as whether space (time) is a substance, how causation and locality are treated in quantum mechanics, temporal anisotropy and time travel, the nature of a field of force, the reduction of chemistry to physics. Prerequisite: one PHIL course.

**PHIL 484 Reading in Philosophy (1-5, max. 15)** Individual study of selected philosophical works.

**PHIL 490 Advanced Topics in Epistemology (5, max. 15) I&S Bonjour, Talbott** Intensive study of a particular topic or area in epistemology. Prerequisite: either PHIL 350 or PHIL 450.

## Courses for Graduates Only

**PHIL 500 Proseminar in Philosophy (5)** Introduces incoming graduate students to topics representative of the field and the faculty's interest. Each class session is devoted to a separate topic taught by a different member of the faculty. In addition to reading and short written assignments. Students prepare a term paper on a topic presented. Offered: A.

**PHIL 505 Seminar in Teaching Philosophy (1, max. 2)** *Baker* First quarter: seminar on topics of importance to a graduate student teaching two quiz sections of a large lecture course. Second quarter: focus on helping student prepare to teach own course. Prerequisite: graduate standing in philosophy. Offered: AW.

**PHIL 514 Seminar in Legal Philosophy (5, max. 20)** *Moore*

**PHIL 520 Seminar in Ancient Philosophy (5, max. 20)** *Cohen, Keyt, Roberts, Weller*

**PHIL 522 Seminar in Modern Philosophy (5, max. 20)** *Clatterbaugh*

**PHIL 525 Seminar in Nineteenth-Century Philosophy (5, max. 20)** *Baker*

**PHIL 526 Seminar in Recent Philosophy (5, max. 20)** *Keyt, Lange*

**PHIL 540 Seminar in Ethics (5, max. 20)** *Coburn, Roberts, Smith, Talbott*

**PHIL 545 Seminar in the Philosophy of Art (5, max. 20)** *Moore, Taylor*

**PHIL 550 Seminar in Epistemology (5, max. 20)** *BonJour, Talbott*

**PHIL 553 Seminar in Philosophy of Language (5, max. 20)**

**PHIL 556 Seminar in Metaphysics (5, max. 20)** *Baker, BonJour, Coburn*

**PHIL 560 Seminar in the Philosophy of Science (5, max. 20)** *Lange, Woody*

**PHIL 563 Seminar in the Philosophy of Mind (5, max. 20)** *BonJour, Marks*

**PHIL 566 Seminar in Philosophy of the Social Sciences (5, max. 20)**

**PHIL 567 Seminar in the Philosophy of Religion (5, max. 20)** *Coburn*

**PHIL 570 Seminar in Logic (5, max. 20)** *Keyt*

**PHIL 584 Reading in Philosophy (1-5, max. 12)** Intensive reading in philosophical literature. Prerequisite: permission of graduate program coordinator.

**PHIL 587 Contemporary Analytic Philosophy (5, max. 20)** *Baker*

**PHIL 600 Independent Study or Research (\*)** Prerequisite: permission of graduate program coordinator.

**PHIL 700 Master's Thesis (\*)**

**PHIL 800 Doctoral Dissertation (\*)**

## Physics

C121 Physics-Astronomy

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/physics.html](http://www.washington.edu/students/genocat/academic/physics.html)

Department Web page:  
[www.phys.washington.edu](http://www.phys.washington.edu)

Physics is the study of the fundamental structure of matter and the interaction of its constituents, with the goal of providing a quantitative description of nature based on a limited number of physical principles.

## Graduate Program

Graduate Program Coordinator  
C139 B Physics-Astronomy, Box 351560  
(206) 543-2488

The Department of Physics offers studies leading to the degrees of Master of Science and Doctor of Philosophy. The department has a permanent faculty of 50 members, about 20 research faculty, and about forty adjunct, affiliate, and emeritus faculty. An average of twenty Ph.D. and twenty-five M.S. degrees in physics have been awarded annually in recent years.

## Research Facilities

The department is well equipped, both in staff and facilities, for instruction and research in a discipline that emphasizes fundamental problems in the understanding of the physical universe. Areas of research available to the Ph.D. student within the department include atomic physics, astrophysics, condensed-matter physics, elementary-particle physics, nuclear physics, and physics education. In addition, students may do research in physics with adjunct faculty members whose primary appointment is in another department such as Aeronautics and Astronautics, Bioengineering, Chemistry, or Geophysics. Experimental work in atomic physics is concentrated on the measurement of fundamental physical properties through laser, ion trap, and radiofrequency techniques. The emphasis on fundamental measurements is continued in experiments on the gravitational force, carried out by faculty and students in atomic physics, nuclear physics, and astrophysics. Condensed-matter experiment includes research on surfaces, interfaces, lower-dimensional and bulk matter, with materials as diverse as high-temperature superconductors and low-temperature hydrogen monolayers. Facilities used range from synchrotron radiation and neutron sources in the U.S. and abroad to on-campus laboratories with low-temperature, high-pressure, scanning-probe microscopy, x-ray and light scattering, and surface-physics equipment. Members of the high-energy experimental groups are heavily engaged in experiments at the European Center for Nuclear Research in Geneva, Kamiokande in Japan, and the Stanford Linear Accelerator Center. Faculty and students of the nuclear physics group are involved in a broad spectrum of research including studies of neutrino properties, relativistic heavy ions, fundamental symmetries and nuclear astrophysics. Researchers use the on-campus accelerators of the Nuclear Physics Laboratory (NPL), as well as major facilities in the U.S., Canada, and Europe. Theorists in the department are concerned with problems in: the theories of elementary particles and quantum fields, nuclear and high-energy reactions from the very lowest to the very highest energies phase transitions and statistical mechanics, condensed-matter physics from localization in disordered systems to electron transport in mesoscopic systems, atomic physics, general relativity, and astrophysics. The Institute for Nuclear Theory, a national

facility closely associated with the department, offers a unique opportunity for students to pursue research with distinguished permanent and visiting staff. Students in physics have the opportunity to obtain a physics degree in a number of interdisciplinary and applied physics areas through research with faculty members in other departments.

Department facilities are housed in the Physics-Astronomy Building and the Nuclear Physics Laboratory.

## Master of Science (Applications of Physics)

**Admission Requirements:** This option is designed for students who are currently employed and whose background is in physical science, engineering, mathematics, or computer science. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of instruction offered in the physics department. Entering students are expected to have an undergraduate background equivalent to a B.S. degree in physical science, engineering, mathematics, or computer science.

**Graduation Requirements:** As part of the standard Graduate School requirements, students are expected to complete the sequence of core courses PHYS 441, 541, and 543, and to select appropriate elective courses. In addition, students must complete an independent-study project in consultation with a faculty member. This project may be carried out at the University or at the student's place of employment. A written report as well as an oral presentation of the project are required. Students must take at least 3 credits of PHYS 600 while completing the project. No thesis is required.

## Master of Science, Doctor of Philosophy

**Admission Requirements:** Undergraduate preparation should include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics should include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions. Admission is determined by: the applicant's undergraduate program, undergraduate grades, Graduate Record Examination aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

## Master of Science

**Graduation Requirements:** Department requirements include standard Graduate School requirements. In addition, 3 credits must be in PHYS 600 and at least 12 other credits in physics graduate courses. A final examination is required. No thesis is required.

## Doctor of Philosophy

**Graduation Requirements:** The student is expected to obtain here, or elsewhere with a master's degree, a background in physics equivalent to that contained in the following sequences of basic graduate courses: PHYS 505, 506, 511, 513, 514, 515, 517, 518, 519, 520, 521, and 524; and in specialized courses appropriate to each student's interests. The student is required to pass, successively, a written qualifying examination (in the autumn of the second year), an oral General Examination for admission to candidacy, and an oral Final Examination. In order to take the General Examination, the student must have been accepted by a graduate faculty member as a research student and have completed the graduate studies outlined above. This examination concentrates on the area in which the dissertation research is planned. Teaching experience is required of all candidates. Courses in teaching techniques in physics, PHYS 501-503, are required of students holding teaching assistantships.

## Financial Aid

Most graduate students are supported by fellowships and assistantships. Applications for the Ph.D. program are automatically considered for these fellowships and assistantships.

## Faculty

### Chair

David G. Boulware

### Professors

Adelberger, Eric G. \* 1972; PhD, 1967, California Institute of Technology; experimental nuclear physics.

Alberg, Mary Ann 1983, (Affiliate); PhD, 1974, University of Washington; theoretical nuclear physics.

Arons, Arnold B. 1968, (Emeritus); MS, 1940, Stevens Institute of Technology; PhD, 1943, Harvard University; physical oceanography, physics education.

Baker, Marcia \* 1980, (Adjunct); MS, 1960, Stanford University; PhD, 1971, University of Washington; cloud physics, atmospheric geophysics.

Baker, Marshall \* 1962; PhD, 1958, Harvard University; field theory, theoretical elementary-particle physics.

Bardeen, James M. \* 1976; PhD, 1965, California Institute of Technology; general relativity, theoretical astrophysics.

Bertsch, George F. \* 1992; PhD, 1965, Princeton University; theoretical physics, nuclear and atomic cluster physics.

Bichsel, Hans 1992, (Affiliate); PhD, 1951, University of Basel (Switzerland); experimental nuclear physics.

Bodansky, David \* 1954, (Emeritus); PhD, 1950, Harvard University; experimental nuclear physics.

Boulware, David G. \* 1965; PhD, 1962, Harvard University; field theory, theoretical elementary-particle physics, general relativity.

Bowles, Thomas J. 1995, (Affiliate); PhD, 1978, Princeton University; experimental nuclear physics.

Boynton, Paul E. \* 1970; PhD, 1967, Princeton University; high-energy astrophysics, astronomy.

Brown, Frederick C. \* 1987; PhD, 1950, Harvard University; use of synchrotron radiation in experimental solid state physics.

Brown, Lowell S. \* 1968; PhD, 1961, Harvard University; field theory, theoretical elementary-particle physics.

Buck, Warren W. 1999, (Adjunct); MS, 1970, PhD, 1976, The College of William and Mary; physics and nuclear energy.

Burnett, Thompson H. \* 1979; PhD, 1968, University of California (San Diego); experimental elementary-particle physics.

Cahn, John Werner 1984, (Affiliate); PhD, 1953, University of California (Berkeley); theoretical condensed-matter physics.

Campbell, Charles T. \* 1989, (Adjunct); PhD, 1979, University of Texas (Austin); physical chemistry, analytical chemistry, surfaces, chemisorption, catalysis, biosensors.

Chaloupka, Vladimir \* 1981; PhD, 1975, University of Geneva (Switzerland); experimental elementary-particle physics.

Chayes, Jennifer T. 1997, (Affiliate); PhD, 1983, Princeton University; theoretical condensed-matter physics.

Clark, Kenneth C. \* 1948, (Emeritus); PhD, 1947, Harvard University; optical spectroscopy, upper atmosphere.

Cook, Victor \* 1963; PhD, 1962, University of California (Berkeley); experimental high-energy physics.

Cramer, John G. \* 1964; PhD, 1961, Rice University; experimental nuclear physics.

Dash, J. Gregory \* 1961, (Emeritus); PhD, 1951, Columbia University; low-temperature condensed-matter physics.

Dehmelt, Hans G. \* 1955; PhD, 1950, University of Gottingen (Germany); experimental atomic physics.

den Nijs, Marcel P. \* 1981; PhD, 1979, Katholieke University (Netherlands); theoretical condensed-matter physics.

Doe, Peter J. \* 1994, (Research); MSc, 1975, PhD, 1977, University of Durham (UK); experimental nuclear physics.

Drobny, Gary P. \* 1981, (Adjunct); PhD, 1981, University of California (Berkeley); solid state nuclear magnetic resonance, biophysics, biomaterials.

Efimov, Vitaly 1990, (Affiliate); PhD, 1966, Physico-Technical Institute (Russia); theoretical nuclear physics.

Ellis, Stephen D. \* 1975; PhD, 1971, California Institute of Technology; theoretical elementary-particle physics.

Engel, Thomas \* 1980, (Adjunct); PhD, 1969, University of Chicago; surface chemistry and catalysis.

Fain, Samuel C. \* 1970; PhD, 1969, University of Illinois; experimental condensed-matter physics, surface physics.

Farwell, George W. \* 1948, (Emeritus); PhD, 1948, University of Chicago; experimental nuclear physics.

Fortson, E. Norval \* 1963; PhD, 1964, Harvard University; experimental atomic physics.

Gerhart, James B. \* 1956, (Emeritus); PhD, 1954, Princeton University; physics education.

Halpern, Isaac \* 1953, (Emeritus); PhD, 1948, Massachusetts Institute of Technology; experimental nuclear physics.

Haxton, Wick C. \* 1984; PhD, 1976, Stanford University; theoretical physics, nuclear physics.

Heckel, Blayne \* 1983; PhD, 1981, Harvard University; experimental neutron and atomic physics.

Henley, Ernest M. \* 1954, (Emeritus); PhD, 1952, University of California (Berkeley); theoretical nuclear physics, theoretical elementary-particle physics.

Hogan, Craig J. \* 1990; PhD, 1980, Cambridge University (UK); astrophysical cosmology, especially the origin of astronomical structures in the expanding universe.

Holzworth, Robert \* 1982, (Adjunct); PhD, 1977, University of California (Berkeley); experimental space plasma physics, atmospheric/magnetospheric electric fields, thunderstorms.

Ingalls, Robert L. \* 1966; PhD, 1962, Carnegie Mellon University; experimental condensed-matter physics.

Jarboe, Thomas R. \* 1989, (Adjunct); PhD, 1974, University of California (Berkeley); plasma physics and controlled fusion, magnetic reconnection and relaxation.

Kaplan, David B. \* 1994; PhD, 1985, Harvard University; theoretical nuclear and elementary-particle physics.

Lake, George Russell \* 1985, (Adjunct); PhD, 1980, Princeton University; stellar dynamics, galaxy structure and formation, cosmology, computational astrophysics.

Lord, Jere J. \* 1952, (Emeritus); PhD, 1950, University of Chicago; cosmic rays, experimental elementary-particle physics.

Lubatti, Henry J. \* 1969; PhD, 1966, University of California (Berkeley); experimental elementary-particle physics.

Margon, Bruce H. \* 1980, (Adjunct); PhD, 1973, University of California (Berkeley); galactic and extragalactic x-ray astronomy, optical counterparts of x-ray sources.

McDermott, Lillian C. \* 1971; PhD, 1959, Columbia University; physics education.

McDermott, Mark N. \* 1962; PhD, 1959, Columbia University; experimental atomic physics.

Miller, Gerald A. \* 1975; PhD, 1972, Massachusetts Institute of Technology; theoretical nuclear physics.

Mockett, Paul M. \* 1972, (Research); PhD, 1965, Massachusetts Institute of Technology; experimental elementary-particle physics.

Nagourney, Warren \* 1977, (Research); PhD, 1972, Columbia University; experimental atomic physics, high resolution laser spectroscopy of atoms.

Nelson, Ann E. \* 1994; MA, 1981, PhD, 1984, Harvard University; theoretical elementary-particle physics.

Olmstead, Marjorie A. \* 1991; PhD, 1985, University of California (Berkeley); experimental condensed-matter physics, surface and interface physics.

Parks, George K. \* 1971, (Adjunct); PhD, 1966, University of California (Berkeley); particles and waves in auroral, magnetospheric, and interplanetary space plasma phenomena.

Pearsall, Thomas P. \* 1989, (Adjunct); PhD, 1973, Cornell University; physics of semiconductors and the technology of semiconductor devices.

Puff, Robert D. \* 1962; PhD, 1960, Harvard University; many-body theory, statistical physics.

Rehr, John J. \* 1974; PhD, 1972, Cornell University; theoretical condensed-matter physics.

Reinhardt, William P. \* 1991, (Adjunct); PhD, 1968, Harvard University; theoretical and computational chemistry with applications in chemistry and biophysics.

Riedel, Eberhard K. \* 1975, (Affiliate); PhD, 1966, Technical University of Munich (Germany); theoretical condensed-matter physics.

Robertson, R. G. Hamish \* 1994; MA, 1965, Oxford University (UK); PhD, 1971, McMaster University (Canada); experimental nuclear physics.

Rothberg, Joseph E. \* 1969; PhD, 1963, Columbia University; experimental high-energy physics.

Schick, Michael \* 1969; PhD, 1967, Stanford University; theoretical condensed-matter physics.

Sharpe, Stephen R. \* 1986; PhD, 1983, University of California (Berkeley); theoretical particle physics: lattice gauge theory and strong interaction phenomenology.

Snover, Kurt Albert \* 1972, (Research); PhD, 1969, Stanford University; experimental nuclear physics.

Sorensen, Larry B. \* 1983; PhD, 1980, University of Illinois; experimental condensed-matter physics.

Spivak, Boris \* 1991; PhD, 1970, Leningrad Polytechnic Institute (Russia); theoretical condensed-matter physics.

Stern, Edward A. \* 1965; PhD, 1955, California Institute of Technology; experimental condensed-matter physics.

Storm, Derek \* 1979, (Research); PhD, 1970, University of Washington; nuclear physics, especially medium energy, accelerator physics.

Streib, John F. \* 1947, (Emeritus); PhD, 1941, California Institute of Technology; experimental nuclear physics.

Stubbs, Christopher \* 1994; MSc, 1983, PhD, 1988, University of Washington; observational cosmology and gravitation.

Thouless, David \* 1980; PhD, 1958, Cornell University; theoretical condensed-matter physics.

Trainor, Thomas A. \* 1973, (Research); PhD, 1973, University of North Carolina; experimental nuclear physics.

Van Dyck, Robert S. Jr. \* 1971; PhD, 1971, University of California (Berkeley); experimental atomic physics.

Vilches, Oscar E. \* 1968; PhD, 1966, National University of Cuyo (Argentina); low-temperature condensed-matter physics.

Weitkamp, William G. \* 1968, (Research Emeritus); MS, 1961, PhD, 1965, University of Wisconsin (Madison); experimental nuclear physics.

Wilets, Lawrence \* 1958, (Emeritus); PhD, 1952, Princeton University; theoretical nuclear and atomic physics.

Wilkerson, John F. \* 1994; MS, 1979, PhD, 1982, University of North Carolina; experimental nuclear physics.

Wilkes, Richard Jeffrey \* 1974, (Research); PhD, 1974, University of Wisconsin; experimental cosmic ray and elementary particle physics.

Williams, Robert W. \* 1959, (Emeritus); PhD, 1948, Massachusetts Institute of Technology; experimental high-energy physics, cosmic rays.

Yaffe, Laurence G. \* 1988; PhD, 1980, Princeton University; quantum field theory, elementary particle theory.

### Associate Professors

Bulgac, Aurel \* 1993; PhD, 1977, Leningrad Nuclear Physics Institute (Russia); many body theory, molecular dynamics, classical and quantum chaos.

Gundlach, Jens 1984, (Research); PhD, 1990, University of Washington; experimental nuclear physics.

Jonsson, Hannes \* 1988, (Adjunct); PhD, 1985, University of California (San Diego); theory and simulations of atomic scale structure and dynamics in liquids, glasses, and crystals.

Savage, Martin J. \* 1996; MSc, 1985, University of Auckland (New Zealand); PhD, 1990, California Institute of Technology; nuclear and particle physics.

Schwinger, Paul B. 1972, (Research); MS, 1975, PhD, 1979, University of Washington; experimental atomic physics.

Unsworth, Martyn J. \* 1993, (Adjunct Research); PhD, 1991, Cambridge University (UK); geomagnetic induction, magnetotellurics, electromagnetic geophysics.

Vogel, Viola \* 1990, (Adjunct); DPhil, 1987, Johann Wolfgang Goethe University (Germany); molecular assemblies and Langmuir-Blodgett films, liquid interfaces, nonlinear optics, microscopy.

Wettlaufer, John S. 1987, (Affiliate); PhD, 1991, University of Washington; fundamental and applied physics of ice and crystal growth.

Winglee, Robert M. \* 1991, (Adjunct); PhD, 1984, University of Sydney (Australia); energetic phenomena in sun/earth plasmas, excitation of waves, high energy particle acceleration.

Zhao, Tianchi \* 1986, (Research); PhD, 1987, Columbia University; experimental high-energy physics instrumentation and detectors.

### Assistant Professors

Bedaque, Paulo S. F. 1996, (Research); MS, 1989, Sao Paulo State University (Brazil); PhD, 1994, University of Rochester; theoretical nuclear physics.

Elliott, Steven R. \* 1995, (Research); PhD, 1987, University of California (Irvine); experimental nuclear physics.

Heron, Paula \* 1995; MS, 1992, University of Ottawa (Canada); PhD, 1995, Western Ontario University (Canada); physics education.

Kaplan, Lev 1999, (Research); MS, 1993, PhD, 1996, Harvard University; theoretical nuclear physics.

Mittleman, Richard K. 1987, (Research); PhD, 1987, University of Chicago; experimental atomic physics.

Phillips, Daniel R. \* 1998, (Research); PhD, 1995, University of South Australia; theoretical nuclear physics.

Rieke, Frederick Martin \* 1997, (Adjunct); PhD, 1991, University of California (Berkeley); sensory signal processing and computation.

Romalis, Michael V. \* 1997; PhD, 1997, Princeton University; atomic physics, low energy tests of fundamental particle physics.

Seidler, Gerald T. \* 1996; MA, 1991, PhD, 1993, University of Chicago; condensed matter experiments: microstructural kinetics and nonequilibrium statistical mechanics.

Shaffer, Peter S. \* 1985, (Research); PhD, 1993, University of Washington; physics education.

Steiger, Thomas D. 1994, (Research); MS, 1989, PhD, 1994, University of Michigan; experimental nuclear physics.

Vokos, Stamatis P. \* 1992; MA, 1985, PhD, 1990, University of California (Berkeley); physics education.

Wasserbaech, Steven R. \* 1993, (Research); PhD, 1989, Stanford University; experimental high-energy physics.

Watts, Gordon T. \* 1999; PhD, 1995, University of Rochester; accelerator-based elementary particle physics.

### Senior Lecturer

Robertson, Charles E. 1990; MS, 1981, University of Washington; physics education.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**PHYS 401 Special Problems (\* max. 30)** Supervised individual study. Offered: AWSpS.

**PHYS 402 Special Problems (\* max. 30)** Supervised individual study. Offered: AWSpS.

**PHYS 403 Special Problems (\* max. 30)** Supervised individual study. Offered: AWSpS.

**PHYS 405- Physical Science by Inquiry II (5-) NW** Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: A.

**PHYS -406 Physical Science by Inquiry II (-5) NW** Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: W.

**PHYS 407 Physics by Inquiry II (5) NW** Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 123. Offered: A.

**PHYS 408 Physics by Inquiry II (5) NW** Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 407. Offered: W.

**PHYS 409 Physics by Inquiry II (5) NW** Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 408. Offered: Sp.

**PHYS 410 Physics by Inquiry for In-Service Teachers (1-2, max. 10) NW** A "hands-on" inquiry-oriented approach designed to train in-service teachers in the use of the physical science content for any of several science programs selected by a school or school district. Credit/no credit only.

**PHYS 411 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW** Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

**PHYS 412 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW** Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: W.

**PHYS 413 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW** Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: Sp.

**PHYS 421 Atomic and Molecular Physics (3) NW** Survey of the principal phenomena of atomic and molecular physics. Prerequisite: PHYS 323; PHYS 325.

**PHYS 422 Nuclear and Elementary-Particle Physics (3) NW** Survey of the principal phenomena of nuclear and elementary-particle physics. Prerequisite: PHYS 323; PHYS 325. Offered: Sp.

**PHYS 423 Solid-State Physics (3) NW** Survey of the principal phenomena of solid-state physics. Prerequisite: PHYS 323; PHYS 325. Offered: A.

**PHYS 424 Mathematical Physics (3) NW** Advanced classical mechanics. Prerequisite: PHYS 323; PHYS 325. Offered: A.

**PHYS 425 Mathematical Physics (3) NW** Mathematical techniques of particular use in physics, including partial differential equations. Prerequisite: PHYS 323; PHYS 325. Offered: W.

**PHYS 426 Mathematical Physics (3) NW** Mathematical techniques of particular use in physics, including partial differential equations. Prerequisite: PHYS 425. Offered: Sp.

**PHYS 427 Applications of Physics (1-3, max. 12) NW** Current applications of physics to problems in the sciences and technology.

**PHYS 428 Selected Topics in Physics (1-5, max. 12) NW**

**PHYS 431 Modern Physics Laboratory (3) NW** Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: A.

**PHYS 432 Modern Physics Laboratory (3) NW** Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: W.

**PHYS 433 Modern Physics Laboratory (3) NW** Techniques in nuclear and elementary-particle research. Prerequisite: either PHYS 327 or PHYS 422. Offered: Sp.

**PHYS 434 Application of Computers to Physical Measurement (3) NW** Laboratory giving specific instruction and experience in interfacing laboratory equipment to computers. Prerequisite: PHYS 335. Offered: A.

**PHYS 436 Nonlinear Dynamics and Chaos (4) NW** Variational Principle, Lagrangian and Hamiltonian Mechanics, phase space, nonlinear dynamics, approach to chaos, Lyapunov exponents, applications to physical systems. Numerical exercises to illustrate phenomena. Prerequisite: MATH 309.

**PHYS 441 Quantum Physics (4) NW** Introduction to concepts and methods of quantum physics: wave mechanics (de Broglie wavelength, uncertainty principle, Schrodinger equation), one-dimensional examples (tunneling, harmonic oscillator), formalism of quantum physics, angular momentum and the hydrogen atom. Recommended: 30 credits in physical science or engineering. Offered: W.

**PHYS 451 Issues for Ethnic Minorities and Women in Science and Engineering (5) I&S** Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with WOMEN 485.

**PHYS 460 Water in the Environment (3) NW** *Baker, Raymond, Waddington, Warren* Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136 and PHYS 123; PHYS 133. Offered: jointly with ATM S/GPHYS 460. Offered: A.

**PHYS 485 Senior Honors Seminar (1, max. 3) NW** Offered: A.

**PHYS 486 Senior Honors Seminar (1, max. 3) NW** Offered: W.

**PHYS 487 Senior Honors Seminar (1, max. 3) NW** Offered: Sp.

**PHYS 491 Independent Research (1-3, max. 3)** Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: A.

**PHYS 492 Independent Research (1-3, max. 3)** Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: W.

**PHYS 493 Independent Research (1-3, max. 3)** Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: Sp.

**PHYS 494 Seminar on Current Problems in Physics (1-3, max. 3) NW** Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: A.

**PHYS 495 Seminar on Current Problems in Physics (1-3, max. 3) NW** Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: W.

**PHYS 496 Seminar on Current Problems in Physics (1-3, max. 3) NW** Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: Sp.

### Courses for Graduates Only

**PHYS 501 Tutorials in Teaching Physics (1, max. 2)** Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: A.

**PHYS 502 Tutorials in Teaching Physics (1, max. 2)** Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: W.

**PHYS 503 Tutorials in Teaching Physics (1, max. 2)** Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: Sp.

**PHYS 505 Mechanics (3)** Lagrangian and Hamiltonian dynamics, with applications to various topics such as coupled oscillators, parametric resonance, anharmonic oscillations, chaos. Offered: A.

**PHYS 506 Numerical Methods (3)** Integration, solution of differential equations, Monte Carlo methods, function minimization, data analysis, modern computing techniques, computation in experimental physics. Offered: Sp.

**PHYS 507 Physical Applications of Group Theory (3)** Applications of finite and continuous groups, representation theory, symmetry, and conservation laws to physical systems. Offered: Sp.

**PHYS 511 Topics in Contemporary Physics (3, max. 9)** Topics of current experimental, theoretical, or technological interest in modern physics. Offered: Sp.

**PHYS 513 Electromagnetism and Relativity (4)** First of a three-part sequence. Principles of electrostatics, complex variable techniques, boundary value problems and their associated mathematical techniques, Green's functions. Offered: A.

**PHYS 514 Electromagnetism and Relativity (3)** Continuation of PHYS 513. Electric and magnetic fields in free space and material media, wave guides and cavity resonators. Offered: W.

**PHYS 515 Electromagnetism and Relativity (4)** Continuation of PHYS 514. Special relativity, electromagnetic radiation from accelerated charges, synchrotron radiation, Cerenkov radiation, radiation reaction. Offered: Sp.

**PHYS 517 Quantum Mechanics (4)** First of a three-part sequence. Modern non-relativistic quantum mechanics developed, beginning with its basic principles. Dirac and abstract operator notation introduced, starting with simple examples. Offered: A.

**PHYS 518 Quantum Mechanics (4)** Continuation of PHYS 517. Modern non-relativistic quantum mechanics. The character of the theory illustrated both with physical examples and with conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: W.

**PHYS 519 Quantum Mechanics (4)** Continuation of PHYS 518. Modern non-relativistic quantum mechanics. Physical examples and conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: Sp.

**PHYS 520 Advanced Quantum Mechanics—Introduction to Quantum Field Theory (3)** Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: A.

**PHYS 521 Advanced Quantum Mechanics—Introduction to Quantum Field Theory (3)** Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: W.

**PHYS 522 Advanced Quantum Mechanics: Introduction to Modern Quantum Field Theory (3)** Functional integrals, symmetry breaking, critical phenomena and continuum limits, and non-perturbative methods. Credit/no credit only. Offered: Sp.

**PHYS 524 Thermodynamics and Statistical Mechanics (4)** Statistical mechanical basis of the fundamental thermodynamical laws and concepts; classical and quantum statistical distribution functions; applications to selected thermodynamic processes and examples of Bose and Fermi statistics. Offered: W.

**PHYS 525 Statistical Mechanics (3)** Introduction to equilibrium and non-equilibrium aspects of many-body systems; scale invariance and universality at phase transitions and critical phenomena; exactly soluble models; Markov processes, master equations and Langevin equation in non-equilibrium stochastic processes. Prerequisite: PHYS 524. Offered: A.

**PHYS 527 Current Problems in Physics (1)** Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: A.

**PHYS 528 Current Problems in Physics (1)** Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: W.

**PHYS 530 Laser Physics (4)** Physics underlying laser design and operation in the context of common laboratory systems. Topics may include continuous and pulsed lasers; solid, liquid, and gas gain media; Q-switching, mode-locking, resonator theory, nonlinear optics, and others. Prerequisite: basic quantum mechanics, electromagnetism, and optics; recommended: PHYS 541.

**PHYS 541 Applications of Quantum Physics (4)** Techniques of quantum mechanics applied to lasers, quantum electronics, solids, and surfaces. Emphasis on approximation methods and interaction of electromagnetic radiation with matter. Prerequisite: PHYS 421 or PHYS 441 or equivalent. Offered: Sp.

**PHYS 542 Numerical Methods in Physics (4)** Numerical methods for analysis and computation in physics. Topics may include integration, differential equations, partial differential equations, optimization, data handling, and Monte Carlo techniques. Emphasis is applications in physics. Prerequisite: 30 credits in physical sciences, computer science, or engineering.

**PHYS 543 Electromagnetic Theory (4)** Principal concepts of electromagnetism. Static electric and magnetic fields. Boundary-value problems. Electric and magnetic properties of materials. Electromagnetic waves and radiation. Prerequisite: 30 credits in physical sciences, computer science, or engineering. Offered: A.

**PHYS 544 Applications of Electromagnetic Theory (4)** Emphasis may vary from year to year. Topics may include electromagnetic waves, radiation, scattering, wave guides, plasma physics, quantum electronics, and accelerator physics. Prerequisite: PHYS 543 or equivalent.

**PHYS 545 Contemporary Optics (4)** Coordinated lecture and laboratory treatment of topics in contemporary optics. Subjects include Fourier optics, lens systems, interferometry, laser optics, holography, polarization, crystal optics, birefringence, laser and conventional light sources, optical detectors. Prerequisite: PHYS 543 or equivalent.

**PHYS 546 Condensed-Matter Physics (4)** Introduction to the theory of solids: crystal structure in real space and reciprocal space, phonons, free electrons, band theory, semiconductor devices. Prerequisite: PHYS 441 or equivalent.

**PHYS 547 Electronics for Physics Research (4)** Electronic techniques as applied in physics research. Topics include noise, control-system analysis, operational amplifiers, lock-in amplifiers, precision power supplies and metering, data transmission, microprocessors. Several integrated measurement systems are examined in the context of specific research problems. Prerequisite: elementary electronics.

**PHYS 550 Atomic Physics (3)** Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

**PHYS 551 Atomic Physics (3)** Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

**PHYS 554 Nuclear Astrophysics (3)** Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae; nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with ASTR 510; A.

**PHYS 555 Cosmology and Particle Astrophysics (3)** Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter. Offered: jointly with ASTR 513; W.

**PHYS 557 High Energy Physics (3)** First quarter of a three-quarter series. Emphasis on the experimental foundations of particle physics. Prerequisite: PHYS 519; recommended: PHYS 520 and PHYS 521, which may be taken concurrently. Offered: A.

**PHYS 558 High Energy Physics (3)** Second quarter of a three-quarter series. Phenomenology of the standard model of strong and electro-weak interactions, including an introduction to Feynman diagrams. Prerequisite: PHYS 519; recommended: PHYS 520 and PHYS 521, which may be taken concurrently. Offered: W.

**PHYS 559 High Energy Physics (3)** Third quarter of a three-quarter series. Topics of current interest in high-energy particle physics. Prerequisite: PHYS 519; recommended: PHYS 520 and 521, which may be taken concurrently. Offered: Sp.

**PHYS 560 Theoretical Nuclear Physics (3)** First of a two-part sequence. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: A.

**PHYS 561 Theoretical Nuclear Physics (3)** Continuation of PHYS 560. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: W.

**PHYS 564 General Relativity (3)** First of a two-part sequence. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

**PHYS 565 General Relativity (3)** Continuation of PHYS 564. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

**PHYS 567 Theory of Solids (3)** First quarter of a course on modern solid state and condensed matter physics, aimed at bringing student's knowledge up to the level of current literature. Topics include structural, electronic, and vibrational properties; optical response functions and dynamics; transport theory; and cooperative phenomena. Prerequisite: PHYS 519, PHYS 524. Offered: AW.

**PHYS 568 Theory of Solids (3)** Second quarter of a course on modern solid state and condensed matter physics, aimed at bringing the student's knowledge up to the level of current literature. Additional topics (see PHYS 567) include magnetism, quantum Hall effect, superconductivity. Offered: WSp.

**PHYS 570 Quantum Field Theory (3)** Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Credit/no credit only. Prerequisite: PHYS 522.

**PHYS 571 Quantum Field Theory (3)** Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Credit/no credit only. Prerequisite: PHYS 522.

**PHYS 572 Modern Quantum Field Theory (3)** Advanced topics in quantum field theory. Credit/no credit only. Prerequisite: PHYS 570, PHYS 571.

**PHYS 575 Selected Topics in Applications of Physics (\* max. 30)**

**PHYS 576 Selected Topics in Experimental Physics (\* max. 30)**

**PHYS 578 Selected Topics in Theoretical Physics (\* max. 30)** Credit/no credit only.

**PHYS 580 Physics Colloquium (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 581 Seminar in High-Energy Physics (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 582 Seminar in Particle Theory (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 583 Seminar in Relativistic Astrophysics (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 584 Seminar in Atomic Physics and Coherent Spectroscopy (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 585 Seminar in Experimental Nuclear Physics (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 586 Seminar in Condensed Matter Physics (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 587 Seminar in Nuclear Theory (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 588 Particle Astrophysics Seminar (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 589 Seminar in Problems of Physics Education (\* max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 590 Seminar in Statistical Physics (1, max. 30)** Credit/no credit only. Offered: AWSp.

**PHYS 600 Independent Study or Research (\*)** Study or research under the supervision of individual faculty members. Credit/no credit only. Prerequisite: permission of supervisor. Offered: AWSpS.

**PHYS 800 Doctoral Dissertation (\*)** Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson. Offered: AWSpS.

## Political Science

101 Gowen

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/political\\_sci.html](http://www.washington.edu/students/genocat/academic/political_sci.html)

Department Web page:  
[depts.washington.edu/polisci/](http://depts.washington.edu/polisci/)

Students of political science examine the theory and practice of government and politics. They acquire knowledge of political institutions and processes and learn to think critically about public policies and their consequences. They learn how to evaluate individual, group, and mass behavior in political settings. Because of their understanding and interest in political systems, students who major in political science enter such career fields as government service, law, business, journalism, politics, public-policy analysis, and education.

The department is organized into four major fields of study: political theory, American government and politics, international relations, and comparative politics. Several subfields—public law, law and public policy, political communication, and political economy—cut across these main areas and provide focused specialization for both undergraduate and graduate students. The department has long been renowned in comparative and international politics, especially in the study of Asian political phenomena, in public law, and in American government and politics. The department has also augmented its faculty strength in international relations, public policy, political and feminist theory, political communication, and political economy.

## Graduate Program

Graduate Program Coordinator  
215 Smith, Box 353530  
(206) 543-1898  
polsgrad@u.washington.edu

Graduate study in political science integrates traditional education in political science's primary fields with other fields in the social sciences allowing an eclectic, interdisciplinary approach.

The department has long been outstanding in comparative and international politics, especially in the study of Asian political phenomena. The department has augmented its faculty strength in American politics, Western European politics, political theory, international relations, political economy, public policy, public law, political communication, and methodology. Graduate students can pursue studies in other campus units, such as the School of Marine Affairs, the Graduate School of Public Affairs, the Henry M. Jackson School of International Studies, the School of Communications, and the School of Law.

### Master of Arts, Doctor of Philosophy

Graduate work in political science is organized primarily as preparation for the Doctor of Philosophy degree. Because the department does not offer a terminal Master of Arts degree, the Master of Arts program serves as the initial stage of the Ph.D. program.

The department admits for autumn quarter only, with an application deadline of January 15. Admission and financial-aid decisions are based on the applicant's academic transcript, Graduate Record Examination general-test scores (no subject test is required), three letters of reference, a statement of purpose, and a writing sample. Foreign students are required to submit TOEFL scores.

### Master of Arts

A bachelor's degree is required for admission to the graduate program. To earn the M.A. degree, students must complete four courses in quantitative and qualitative political analysis, complete course requirements in two fields, and submit and orally defend an essay of distinction. One of the fields must be chosen from four general fields: political theory, international relations, comparative politics, and American politics. The second field may be a second general field or one of the following specialized fields: area study, public law, political communication, public policy process, or political economy. Completion of the M.A. degree requires two years of full-time study.

### Doctor of Philosophy

Most students are expected to have completed an M.A. degree in political science in this department for the Ph.D. program. The doctoral student must prepare a total of three fields, including at least one general field (see general and specialized fields above) and no more than one constructed field. Students must also complete a four-course methodology sequence (usually completed as part of the M.A.). Competence in a foreign language is required only if deemed appropriate by the student's supervisory committee. To be advanced as a doctoral candidate, students must complete all of the above, a research seminar, a written examination in each of the three fields, and a defense of their dissertation prospectus. Once advanced to candidacy, students must write, and orally defend, their dissertation thesis. The Ph.D. program requires a minimum of three years of full-time course work followed by the completion of the dissertation project.

### Research Facilities

The University library system, the largest research library in the Pacific Northwest, has a collection of five million volumes, with specialized collections for the Pacific Northwest, Near East, South Asia, and Slavic and East European areas. A political science reference librarian is available in the Suzzallo and Allen Libraries to assist graduate students and the specialized needs of the department. Specialized access to computing facilities and extensive data holdings is available through the Center for Social Science Computation and Research, and the Political Science Computer Classroom. The University is a member of the Inter-University Consortium for Political and Social Research.

### Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of study.

## Faculty

### Chair

Michael W. McCann

### Professors

Bennett, W. Lance \* 1974; MPhil, 1973, PhD, 1974, Yale University; American politics, comparative politics, political communication, mass media, political culture.

Brass, Paul R. \* 1965, (Emeritus); PhD, 1964, University of Chicago; comparative politics (South Asia).

Burstein, Paul \* 1985, (Adjunct); PhD, 1974, Harvard University; political sociology, social stratification, public policy, law.

Caporaso, James A. \* 1988; PhD, 1968, University of Pennsylvania; international political economy, comparative politics, European Community, research methodology.

Cassinelli, Charles W. \* 1960, (Emeritus); PhD, 1953, Harvard University; comparative government (Latin America).

Gerberding, William P. \* 1979, (Emeritus); PhD, 1959, University of Chicago; American government and politics, public policy.

Gore, William J. \* 1966, (Emeritus); PhD, 1952, University of Southern California; public policy, public administration.

Hartsock, Nancy C. M. \* 1984; PhD, 1972, University of Chicago; feminist theory, Marxism, contemporary political theory.

Hellmann, Donald C. \* 1967; PhD, 1964, University of California (Berkeley); Japanese politics and international relations.

Jones, Bryan D. \* 1996; PhD, 1970, University of Texas (Austin); decision-making and public policy processes in American government.

Keeler, John T. \* 1980; PhD, 1978, Harvard University; comparative politics (Western Europe), international relations.

Lang, Gladys Engel \* 1984, (Emeritus); PhD, 1954, University of Chicago; political effects of mass media, sociology of art, political movements and crowd behavior.

Lev, Daniel S. \* 1970, (Emeritus); PhD, 1964, Cornell University; comparative politics (Southeast Asia).

Levi, Margaret \* 1974; PhD, 1974, Harvard University; comparative politics, political economy, labor politics.

Majeski, Stephen J. \* 1984; PhD, 1981, Indiana University; international relations, foreign policy, peace and conflict resolution.

Matthews, Donald Rowe \* 1976, (Emeritus); PhD, 1953, Princeton University; American government and politics, comparative politics (Norway, U.K.).

May, Peter J. \* 1979; PhD, 1979, University of California (Berkeley); policy analysis, quantitative methods, federal disaster policy.

McCann, Michael W. \* 1982; MA, 1976, PhD, 1983, University of California (Berkeley); American government and politics, public law, political theory.

McCrone, Donald J. \* 1979; PhD, 1966, University of North Carolina; American politics, political economy, methodology.

Migdal, Joel S. \* 1980, (Adjunct); MA, 1968, PhD, 1972, Harvard University; state-society relations, rules of public space, Israel-Palestine.

Modelski, George \* 1967, (Emeritus); PhD, 1954, University of London (UK); international relations, international political economy.

Olson, David J. \* 1974; PhD, 1971, University of Wisconsin; American government and politics (urban, state, and labor relations).

Pempel, T. J. \* 1995, (Adjunct); PhD, 1972, Columbia University; comparative politics in Japan.

Reshetar, John S. Jr. \* 1957, (Emeritus); PhD, 1950, Harvard University; comparative government (Soviet Union), international relations.

Scheingold, Stuart A. \* 1969; PhD, 1963, University of California (Berkeley); American politics (public law).

Taylor, Michael John \* 1985; PhD, 1976, University of Essex (UK); political theory, political economy.

Townsend, James R. \* 1968, (Emeritus); PhD, 1965, University of California (Berkeley); comparative government (China), politics of development.

Ward, Michael D. \* 1997; PhD, 1977, Northwestern University; international relations, political economy, political geography, statistical models.

### Associate Professors

Bachman, David M. \* 1991, (Adjunct); PhD, 1984, Stanford University; Chinese politics and foreign policy and China's political economy (1949-present); US-China relations.

Di Stefano, Christine \* 1985; PhD, 1984, University of Massachusetts; political theory (modern and contemporary), feminist theory, political culture.

Gill, Anthony J. \* 1994; MA, 1989, PhD, 1994, University of California (Los Angeles); comparative politics, Latin America, political economy, methodology.

Goldberg, Ellis \* 1985; PhD, 1983, University of California (Berkeley); political economy of the Middle East, comparative politics.

Gottfried, Alex 1951, (Emeritus); MA, 1948, PhD, 1952, University of Chicago; American government and politics.

Hanson, Stephen E. \* 1990; MA, 1986, PhD, 1991, University of California (Berkeley); Soviet, post-Soviet and comparative politics.

Ingebritsen, Christine \* 1992, (Adjunct); PhD, 1993, Cornell University; politics, international political economy, European integration, environmental policy.

Kier, Elizabeth L. \* 1998; PhD, 1992, Cornell University; international relations.

Kiser, Edgar Vance \* 1988, (Adjunct); PhD, 1987, University of Arizona; political sociology, theory, historical sociology.

Litfin, Karen T. \* 1991; PhD, 1992, University of California (Los Angeles); international environmental politics, globalization processes, technology and politics.

Mayerfeld, Jason \* 1991; MA, 1988, PhD, 1992, Princeton University; political theory, ethics.

Mercer, Jonathan L. \* 1996; PhD, 1993, Columbia University; international relations theory, security, political psychology, rationality and emotion.

Riley, Walter 1946, (Emeritus); MA, 1935, PhD, 1957, Stanford University; political science.

Rivenburgh, Nancy \* 1989, (Adjunct); MS, 1982, Boston University; PhD, 1991, University of Washington; international communications, the media, intercultural relations and identity, international news.

Rohn, Peter H. \* 1962, (Emeritus); PhD, 1958, University of Washington; international relations, international law.

Wilkinson, John D. \* 1990; MA, 1989, PhD, 1991, University of Rochester; American government and politics, quantitative methodology.

### Assistant Professors

Givens, Terri E. 1999; MA, 1996, PhD, 1999, University of California (Los Angeles); comparative politics, Western Europe, political parties, political economy.

La Vaque-Manty, Mika T. 1998; PhD, 1998, University of Michigan; political theory.

Simon, Adam F. \* 1997; MA, 1993, PhD, 1997, University of California (Los Angeles); American government, methodology, political communication, voting behavior, media.

Simpson, Andrea Y. \* 1993; PhD, 1993, Emory University; ethnic identity and its effects on political attitudes and behavior.

Smith, Mark A. \* 1997; PhD, 1997, University of Minnesota; American politics, interest groups, political economy, Congress, public policy.

Whiting, Susan H. \* 1994; PhD, 1995, University of Michigan; political economy of development in post-1949 China.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### Political Science

**POL S 401 Advanced Special Topics in Political Theory (5, max. 10) I&S** Topics can include, but are not limited to, analytical theory pertaining to justice, exploitation, and freedom; revolution and social changes; collective choice and action; sexuality and politics; critical theory; Marxist theory; post-structuralism. Content varies. Recommended: POL S 201.

**POL S 403 Advanced Special Topics in International Relations (5, max. 10) I&S** Examination of contemporary developments in the field of international relations. Content varies according to the nature of developments and research interests of the instructor.

**POL S 404 Topics in Public Policy (3-5) I&S** Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with PB AF 499.

**POL S 405 American Politics Seminar (5, max. 10) I&S** Intensive reading and research in selected problems or fields of political analysis.

**POL S 407 International Conflict (5) I&S** Many forms of international conflict, including global wars, local wars, antiregime wars, military interventions, and international crises. Several political, social, and anthropological explanations for conflicts and examination of alternative world futures.

**POL S 409 Undergraduate Seminar in Political Economy (5, max. 10) I&S** Seminar in political economy with focus on Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Recommended: ECON 300; POL S 270. Offered: jointly with ECON 409.

**POL S 410 Technology, Politics, and the State (5) I&S** Relationships between politics, technological change, and development of multinational corporations. Considers whether the relations between political and economic systems of industrial societies have been fundamentally altered by the increased importance and interdependence of government, experts, and new technological possibilities for intervention in social life.

**POL S 411 Theories of the State (5) I&S** Topics may include origins and development of the state; arguments about the necessity, desirability, and proper role of the state; the nature and operation of modern states and the international state system; the legitimacy of modern state power.

**POL S 412 Democratic Theory (5) I&S** Explores the concept of democracy and theoretical models purporting to describe its central features: majority rule, participation, and deliberation. Themes also include: representative vs. direct democracy; the rights of minorities; the relationship between democracy and other political theories such as liberalism, socialism, and conservatism. Prerequisite: POL S 201; either POL S 308, POL S 309, POL S 310, or POL S 318.

**POL S 413 Contemporary Political Theory (5) I&S** Analysis of political theorists, exploring contemporary theories of humanity and society that form the basis for differing political ideas.

**POL S 414 Politics and Culture (5) I&S** How people interpret and shape the political world around them through the use of such cultural resources as language, symbolism, myth, and ritual. The various uses of these cultural elements establish the place of the individual in society, influence the perception of political events, and create opportunities for individual and mass political responses.

**POL S 422 International Environmental Politics Seminar (5) I&S** Study of the practical and theoretical challenges associated with global ecological interdependence. Examination of international treaties and institutions, state, and nonstate actors with an emphasis on the emerging concept of sustainability.

**POL S 423 International Law (5) I&S** Origin and present status of efforts to make rules of conduct for sovereign states; simulation of a treaty-drafting conference, with students playing roles of legal advisers to foreign governments.

**POL S 426 World Politics (5) I&S** The nation-state system and its alternatives, world distributions of preferences and power, structure of international authority, historical world societies and their politics. Offered: jointly with SIS 426.

**POL S 427 International Political Economy (5) I&S** Examines major theoretical problems, substantive issues, and school of thought in international political economy (IPE), including issues of trade, production, and finance. Preparation for critical analysis of dilemmas entailed in establishing and maintaining an instrumentally effective and ethically acceptable IPE system.

**POL S 428 Military Intervention (5) I&S** Historical and theoretical analysis of military intervention in the post-World War II era. Considers how and why interventions occur and evaluates intervention as a foreign-policy response.

**POL S 429 National and International Security (5) I&S** Examines what constitutes U.S. national interests; causes of war and means of deterring war; discusses role nuclear weapons play in international security; how to deter use of chemical and biological weapons; desirability of non-lethal weapons; and role for economic sanctions, intelligence, and ethics.

**POL S 431 International Relations in the Middle East (5) I&S** Study of domestic sources of foreign policy in the Middle East; politics of oil; the East-West rivalry in the arena; and conflict and collaboration among the local powers.

**POL S 432 Political Islam and Islamic Fundamentalism (5) I&S** Study of resurgence, since mid-1970s of political Islam and what has come to be called Islamic fundamentalism, especially in the Middle East. Topics include the nature and variety of political Islam today, causes and implications of the current resurgence, and comparison with previous resurgences. Offered: jointly with SIS 406.

**POL S 434 International Relations of South Asia (5) I&S** Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with SISSA 434.

**POL S 435 Japanese Government and Politics (5) I&S** Government and politics of Japan with emphasis on the period since 1945. Offered: jointly with SISEA 435.

**POL S 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S** Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Offered: jointly with SIS 436.

**POL S 437 Politics in Scandinavia (5) I&S** Twentieth-century politics in Scandinavia. How Scandinavian countries have been governed. Costs and consequences of their governmental style and its uncertain future. Optimal size of polities, problems of mature welfare states, process of leadership and representation in multiparty systems, decline of political parties. Offered: jointly with SCAND 437.

**POL S 438 Politics in France (5) I&S** Study of contemporary France. Structures of government in the Fifth Republic; nature of French voting behavior and evolution of the bipolarized political party system; behavior of political interest groups; training of France's administrative elite and functioning of the state bureaucracy; dynamics of policy-making.

**POL S 441 Government and Politics of the Soviet Union and Russia (5) I&S** Ideological and historical bases of Soviet politics; Leninism; Stalinism; Gorbachev's perestroika and the collapse of the USSR; the role of Yeltsin; problems of Russian state-building, market reform, and democratic transition; political parties and civil society; the relationship between the center and the regions; the problem of Russian national identity.

**POL S 442 Government and Politics of China (5) I&S** Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with SISEA 449.

**POL S 443 Comparative Political Societies (5) I&S** Analyses of modern and premodern types of stable political society; special attention to contemporary representative democracy.

**POL S 445 Politics and Society in Eastern Europe (5) I&S** Political and social issues in lands east of the Elbe, treating some historical problems but focusing particularly on developments since 1945. Includes all communist states of Eastern Europe and their successors. Offered: jointly with SISRE 445.

**POL S 446 Peasants in Politics (5) I&S** Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly interdependent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with SIS 444.

**POL S 447 Comparative Politics Seminar (5, max. 10) I&S** Selected comparative political problems, political institutions, processes, and issues in comparative perspective. Strongly recommended: POL S 204.

**POL S 448 Politics of the European Community (5) I&S** Examines the origins, structures, and political dynamics of the European Community. Attention given to theories of integration, to relations between the European Community and member states, and to the role of the European Community in world politics.

**POL S 449 Politics of Developing Areas (5) I&S** Comparative study of problems of national integration and political development in the new states of Asia and Africa.

**POL S 450 State-Society Relations in Third World Countries (5) I&S** Relationships among political, social, and economic changes in Asia, Africa, and Latin America. Problems of economic and political development, revolution and reform, state-society relations, imperialism and dependency. Offered: jointly with SIS 456.

**POL S 452 Political Processes and Public Opinion in the United States (5) I&S** The foundations and environment of opinion; organization and implementation of opinion in controlling government and public opinion as a force in the development of public policy; public relations activities of government agencies.

**POL S 461 Mass Media Law (5) I&S** Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with CMU 440.

**POL S 464 The Politics of American Criminal Justice (5) I&S** Political forces and value choices associated with the enforcement of criminal law. Distribution of resources among participants in the criminal justice system (e.g., police, attorneys, defendants, and judges). Understanding and evaluation of the interaction of criminal justice processes with the political system.

**POL S 467 Comparative Law in Society (5) I&S** Legal systems around the world as they actually work in their respective political, social, and economic contexts. Emergence and development of European legal systems, legal customs at variance with those of Europe, problems of legal processes in the modern state.

**POL S 468 Comparative Media Systems (5) I&S** Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with CMU 420/SIS 419.

**POL S 470 Public Bureaucracies in the American Political Order (5) I&S** Growth, power, and roles of governmental bureaucracies in America: conflict and conformity with American political thought, other political institutions, and the public.

**POL S 472 Topics in Public Leadership (3-5) I&S** Examines the nature and variety of public leadership in modern political life. Discussion of the political, managerial, and ethical challenges facing today's public leaders as well as strategies of leadership in a wide variety of settings. Offered: jointly with PB AF 498.

**POL S 473 Decision-Making in Politics (5) I&S** Process of decision-making in politics at elite and mass levels, comparison of approaches based on the comprehensive rationality of decision makers with approaches based on limitations on the cognitive capacities of decision makers. Applications to real decision-making situations.

**POL S 474 Government and the Economy (5) I&S** Interaction between politics and the economy. Impact of policy makers on economic performance. Models of partisan and political business cycles. Concepts of economic voting. Marxist theories of modern capitalist economics. Recommended: ECON 201; MATH 124 or MATH 134.

**POL S 475 Public Choice (5) I&S** Problems and prospects for collective action in a political democracy. Designing rules and institutions for effective central authority and effective constraints on governmental power. Social choice theory and game theory. Recommended: POL S 270 or POL S 474.

**POL S 476 Strategy in Politics (5) I&S** Explores the problem of finding fair methods for making social decisions, and examines alternative methods of social choice. Emphasis on the importance of agenda control for outcomes, and the implications of theories of social choice for common interpretations of concepts such as democracy and the general will. Recommended: POL S 101 or POL S 202; POL S 481.

**POL S 481 Big City Politics (5) I&S** Contemporary big city politics, focusing on Seattle and the largest twenty-five cities. Social, economic, and political trends that have shaped characteristics of large American cities. Distribution and use of economic and political power among parties and groups. Future of large cities and politics of change.

**POL S 488- Honors Senior Thesis (5-) I&S** Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student's senior thesis. Students meet periodically as a group to discuss research in progress. Recommended: 15 credits POL S 398.

**POL S -489 Honors Senior Thesis (-5) I&S** Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student's senior thesis. Students meet periodically as a group to discuss research in progress. Recommended: 15 credits POL S 398.

**POL S 490 Foundations of Political Analysis (5) I&S** Fundamental issues pertaining to research in political science: "logics of inquiry," problems of concept formation, and development of research methods. Positivist, postempiricist, and other arguments about the nature of scientific knowledge.

**POL S 491 Political Research Design and Analysis (5) I&S** Major quantitative methods of empirical research in political science. Primary emphasis on research design, data collection, data analysis, and use of computers.

**POL S 492 Advanced Political Research Design and Analysis (5) I&S** Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor.

**POL S 493 Qualitative Research Methods (5) I&S** Introduction to qualitative methods in political science, emphasizing practical experience with techniques. Readings and exercises cover research design, multiple methods, varieties of qualitative data, measurement and validation, participant observation, interviewing, and content analysis. Research decision-making issues include analytical strategies, presentation of data, ethics, epistemology, and theory-building.

**POL S 496 Undergraduate Internship (5, max. 15)** Students serving in approved internships.

**POL S 497 Political Internship in State Government (5, max. 20)** Students serving in approved internship program with state government agencies.

**POL S 498 The Washington Center Internship (15)** Full-time academic internship with the Washington Center in Washington, DC Includes internship activities, academic seminar, assemblies, and related activities. Credit/no credit only. Recommended: POL S 202; 45 UW credits.

**POL S 499 Individual Conference and Research (2-5, max. 20)** Intensive study with faculty supervision. No more than one registration in 499 under same instructor.

### Courses for Graduates Only

**POL S 505 Comparative Politics (5)** Core course. Modern theories, approaches, and methods in the study of comparative politics.

**POL S 509 Political Theory—Core (5, max. 10)** Introduction to central themes in political theory and the works of major political theorists, past and present.

**POL S 511 Seminar in Ethical and Political Theory (5)** Ethical writings of major political philosophers. Coherent themes arising from these works and assessment of their impact on concepts of politics.

**POL S 512 Seminar in Nationalism and Political Theory (3)** Nationalism, republics, impact of mass democracy. Growth of internationalism. Role of political philosophy in probing institutions, moral perspectives, and assessing significance of nation-state, international order.

**POL S 514 Selected Topics in Political Theory (5, max. 15)** Selected topics, historical and conceptual, national, regional, and universal. Prerequisite: permission of instructor.

**POL S 515 Political Theory Research Seminar (5)** Survey of paradigmatic research approaches in political theory through the exploration of a theme (canonical text, theoretical concept, and specific topic). Methods covered may include rational choice, psychoanalytic, Straussian, Marxian, and feminist approaches. Students carry out substantive theoretical research. Recommended: second or third year graduate standing.

**POL S 516 Special Topics in American Political Thought (3/5)** Special topics or themes in the development of American political culture.

**POL S 517 Marxism and Critical Theory (5)** Works of Marx and Engels as well as selected works of twentieth-century Marxist and critical theorists. Themes such as Marx's method, twentieth-century interpretations of Marx, and relationship of twentieth-century theorists to their eighteenth- and nineteenth-century forebears.

**POL S 518 Liberalism and Its Critics (5)** Examination of liberal theory and the critiques it has inspired. Focuses on central themes, such as toleration, rights, justice, and democracy, or on specific thinkers, historical or contemporary.

**POL S 519 Modern Scandinavian Politics (5)** Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with SCAND 519.

**POL S 521 International Relations I: Theory and Method (5)** Part one of the core course in the field of international relations. Reviews contemporary theory, research, and methodology in the study of world politics.

**POL S 522 International Political Economy (5)** Theories of international political economy. Focuses on the emergence and development of the modern world system, the transition from feudalism to capitalism, and the institution of the nation-state system. Examines the political economy of trade, investment, and the international division of labor from a variety of theoretical perspectives. Prerequisite: POL S 521.

**POL S 525 International Law—Policy (5)** Inputs of international law into the decisional process in foreign policy. Effect of policy on law. Relevant roles of individuals and institutions in routine and crisis situations. Prerequisite: POL S 423 or permission of instructor.

**POL S 527 Special Topics in International Relations Research (5, max. 15)** Examination of current topics in the theory and practice of world politics. Content varies according to recent developments in the field and research interests of the instructor.

**POL S 528 Advanced International Relations Theory (5)** Covers advanced works in international relations theory. e.g., realism, neorealism, game theory, and theories of cooperation and conflict. Includes some classic works (Thucydides, Hobbes, E. H. Carr) to show continuity of debates in the present. Modern theories of war, conflict, cooperation, and international institutions also explored. Prerequisite: POL S 521.

**POL S 530 Transatlantic Relations: The United States and Europe in World Politics (5)** Fulfills required component of "American Module" of Transatlantic Studies program. Addresses political dynamics of relations between United States and Europe from American republic's founding to post-Cold War era. Limited to students in Transatlantic Studies program.

**POL S 532 The Chinese Political System (5)** Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with SISEA 532.

**POL S 533 Seminar on Contemporary Chinese Politics (5)** Research on selected problems in contemporary Chinese politics. Prerequisite: POL S 532 or permission of instructor. Offered: jointly with SISEA 533.

**POL S 534 International Affairs (3)** Provides a broad understanding of international issues and United States policy. Students explore US foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 534/SIS 534.

**POL S 535 International Relations of Modern China (5)** Foreign policy of the People's Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with SISEA 535.

**POL S 536 Ethnic Politics and Nationality Formation (3)** Seminar on analysis and theoretical understanding of two interrelated processes: ethnic group persistence and change over time; and the transformation of ethnic groups into politically self-conscious and influential nationalities. The readings and discussions deal with these two processes in the contexts of both developing societies and advanced industrial societies.

**POL S 537 Approaches to East European Politics (3-5)** Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with SISRE 504; alternate years.

**POL S 538 Government and Politics in the Middle East and North Africa (5)** Political change in the area within the context of comparative politics; breakdown of traditional political systems; new range of choice expressed in competing ideologies; governmental and nongovernmental instrumentation of change; and problems of international relations and regional conflict and integration.

**POL S 539 International Relations of Northeast Asia (5)** Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economics are examined. Prerequisite: permission of instructor. Offered: jointly with SISEA 551.

**POL S 542 Seminar: State and Society (5)** Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states as large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with SIS 542.

**POL S 544 Problems in Comparative Government (5, max. 15)** Selected problems in the comparative analysis of political institutions, organizations, and systems.

**POL S 547 Politics of Reform (5)** Examines cases of reform in democratic political systems, e.g., Roosevelt's New Deal, Allende's Chilean "revolution," Mitterrand's socialist experiment in France, and the Thatcher government in Britain.

**POL S 548 Comparative Political Parties (3)** Role of political parties in the modern state. Similarities and differences in origins and development of political parties and functions they perform, both in established democracies and in developing countries.

**POL S 550 American Politics—Core (5)** Core course in American government and politics. Systematic survey of the literature; focuses on national politics. Prerequisite: undergraduate courses in American government and politics.

**POL S 551 Political Communication (5)** Survey of contemporary and some historical political communications research, emphasizing quantitative aspects. Includes discussions and demonstrations of experimental, survey, aggregate, and content analysis methods. Designed to foster substantive comprehension of political communication literature, familiarity with research techniques and creation of empirical projects.

**POL S 554 Legislative Politics (5)** Selected problems in legislative processes and leadership, state and national.

**POL S 561 Law and Politics (5)** Points and levels at which law and politics intersect. What is distinctive about legal forms; how these legal forms influence, and are influenced by, politics. Conceptions of law, courts and public policy, law and bureaucracy, civil and criminal justice, and the legal profession.

**POL S 562 Law, Politics, and Social Control (5)** Explores works of social scientists and lawyers regarding these competing conceptions of social control: as the seamy side of law—reinforcing equitable patterns of domination and disciplining deviants; as law embodying society's basic values, articulating minimum rules for harmonious social interaction.

**POL S 563 Supreme Court in American Politics (5)** Explores the tendency in the United States to turn to the Supreme Court to provide constitutional solutions for some of our biggest social, economic, and political problems. Focuses on the controversies concerning the legitimacy and capacity of the Supreme Court to intervene in American politics and public policy.

**POL S 564 Law and the Politics of Social Change (5)** Explores the many ways that law figures into the politics of social struggle and reform activity. Analyzes law in terms of particular state institutions (courts, agencies), professional elites (lawyers, judges), and especially cultural norms ("rights" discourses) that are routinely mobilized by reform-movement activists.

**POL S 566 Problems in Comparative Legal Institutions (3)** Social science inquiry in comparative legal institutions. Worldwide scope, with attention to both theory of law in society and development and practice of legal institutions.

**POL S 571 American National Institutions (5)** Answers the question, "Do institutions matter?" Surveys American national institutions from theoretical perspectives, focusing on how they affect the manner in which decisions are made. Employs cross-institutional perspective of American institutions.

**POL S 572 Administrative and Executive Leadership (3)** Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities. Offered: jointly with PB AF 503.

**POL S 573 Topics in Public Policy (5, max. 10)** Specialized research topics with a policy process or related theoretical content.

**POL S 574 Environmental Regulation Policy (5)** Scholarly and practical aspects of environmental regulation. Examines literature concerning regulatory policy design, policy instruments, federalism, compliance and enforcement. Studies selected federal, state, and other nations' environmental policies. Participants are expected to have a good understanding of American policy processes.

**POL S 575 Public Policy Processes (5)** Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and normative perspectives concerning role of governmental entities. Offered: jointly with PB AF 575.

**POL S 582 The Political Economy of Social Change (5)** Social change and property rights theory. Exploration of long-term secular change through works whose approaches derive from neo-classical economics and analytical Marxism. Evolution and transformation of property rights over land, labor, and capital and the consequences of the property rights structure for political and economic institutions.

**POL S 583 Economic Theories of Politics (5)** Problems of public goods provision and collective action. Collective action theories and applications as well as critical review of the concept of rationality.

**POL S 587 Politics of Urban Reform (5)** Interpretations of urban reformers at turn of this century and during 1960s and 1970s. Historical and political science literature on the subject. Prerequisite: graduate student standing and permission of instructor.

**POL S 589 Special Topics in Political Economy (3, max. 9)** Evaluating research in political economy as well as developing research problems. Topics vary with instructor and with current problems in the literature. Prerequisite: POL S 406, POL S 416, ECON 400, and permission of instructor.

**POL S 590 Seminar in Political Behavior (5, max. 10)** Analysis of behavioral research in selected fields of political science.

**POL S 593 Theories of Decision Making (5)** Explanation of political decisions using models of such theoretical processes as preference formation, learning, heuristics, noncooperative games, collective action, agenda manipulation, and coalition formation. Examination of competing notions of political rationality and irrationality and criteria for their evaluation. Strategies for design of decision research. Prerequisite: POL S 491 or permission of instructor.

**POL S 595 College Teaching of Political Science (1)**

**POL S 597 Directed Readings (1-10, max. 10)** Intensive reading in the literatures of political science, directed by the chair of the doctoral supervisory committee. Credit/no credit only.

**POL S 598 Independent Writing I (1-5, max. 5)** Supervised research and writing for graduate students completing the MA essay of distinction.

**POL S 599 Independent Writing II (3-5)** Supervised research and writing for graduate students completing the Ph.C. essay of distinction.

**POL S 600 Independent Study or Research (\*)**

**POL S 800 Doctoral Dissertation (\*)**

## Society and Justice

**SO JU 400 Seminar in Society and Justice (3, max. 6) I&S** Aspects of the administration of justice.

**SO JU 401 Field Experience in Society and Justice (5)** Participant observation in some public or private agency relevant to the system of justice.

**SO JU 405 Introduction to Organized and White Collar Crime (3) I&S** Overview of organized and white collar crime. Exposure to definitional problems, distinctive characteristics, potential areas of overlap, and barriers to more effective social control. Addresses impediments resulting from inadequate conceptualizations, legal and operational difficulties in pursuing offenders, and effects of corruption and discretion in the justice system.

**SO JU 425 Introduction to the American Court System (3) I&S** Philosophical and structural bases of the American court system; roles of attorneys, judges and the public in that system. Some focus also on current challenges to the courts posed by court congestion and alternative dispute resolution, and on future prospects for the courts.

**SO JU 430 The Police (5) I&S** Conceptual and empirical issues concerning multifaceted and changing roles of the American police.

**SO JU 440 Criminal Law and Procedure (4) I&S** Substantive and procedural criminal law for lay persons; analysis of the philosophy behind the law, with an emphasis on due process in adult and juvenile courts; case-analysis teaching technique.

**SO JU 450 Special Topics in Society and Justice (1-5, max. 15) I&S** Examination of various current topics or issues concerning the criminal justice system in our society.

**SO JU 473 Corrections (5) I&S** Analyzes research on diversionary methods, treatment of convicted offenders. Emphasis on program evaluation. Community treatment, fines, restitution, probation, parole, halfway houses, other alternatives to incarceration; correctional institutions. Organization of state, federal systems. Problems of administration. Subsidies, governmental control. Planning, public participation. Recommended: SOC 371 and SOC 372. Offered: jointly with SOC 473.

**SO JU 499 Readings in Society and Justice (1-5, max. 10)** Individual readings in society and justice.

## Psychology

119 Guthrie

General Catalog Web page:  
[www.washington.edu/students/gencat/academic/psychology.html](http://www.washington.edu/students/gencat/academic/psychology.html)

Department Web page:  
[depts.washington.edu/psych/](http://depts.washington.edu/psych/)

Psychology involves the scientific study of behavior and its causes and the understanding of human behavior in a variety of settings. Psychology is studied either as a natural science, which stresses physical and biological causes of behavior, or as a social science, which stresses the effects of the social setting on human behavior. Major areas of emphasis are human cognition, animal behavior, physiological and sensory bases of behavior, personality and clinical psychology, developmental psychology, social psychology, and quantitative techniques. The department does not have formal programs in educational, school, or counseling psychology (see the College of Education section of this catalog); engineering psychology; or industrial psychology.

## Graduate Program

Graduate Program Coordinator  
219 Guthrie, Box 351525  
(206) 543-4612  
[psygrad@u.washington.edu](mailto:psygrad@u.washington.edu)

Graduate work in psychology is organized primarily as preparation for the Doctor of Philosophy degree. The optional Master of Science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into six major areas of study: animal behavior, adult and child clinical, cognition and perception, developmental, physiological, and social psychology and personality. Specialization also exists in the subareas of community, law, sport, and quantitative psychology.

The program in clinical psychology is accredited by the American Psychological Association and provides scientific and professional training.

## Admissions Qualifications

An undergraduate degree in psychology is desirable, but not required. Some preparation in biological, social, or quantitative sciences is strongly advised. Applicants are judged on a number of criteria, including academic and research backgrounds, Graduate Record Examination scores, and written evaluations submitted by former professors or supervisors. Students with little training in psychology may be required to complete preliminary work in undergraduate courses. Admission of new students occurs in autumn quarter. The deadline for receipt of admissions material is December 31.

## Master of Science (Optional)

A master's-degree-only program is not available. Doctoral students have the option of obtaining a master's degree while working toward the Ph.D.

*Graduation Requirements:* Completion of first-year graduate program (see Doctor of Philosophy degree requirements below) and an appropriate research program, including a research thesis.

## Doctor of Philosophy

*Graduation Requirements:* Completion of course work in major and out-of-area requirements, completion of required course work in statistics and general methodology, independent research, General Examination, dissertation, and Final Examination. Minimum 3.00 GPA overall must be maintained; a minimum grade of 3.0 is required for all courses used to satisfy breadth and minor requirements. *First-year requirements:* Demonstrate competence in statistics and experimental design; complete at least 3 credits of independent predoctoral research and report that research at the department's annual Research Festival.

## Special Research Facilities

Facilities for research and graduate instruction include teaching laboratories; machine, electronic, and carpentry shops; microprocessor room; animal vivarium; darkroom; remote-access console to computer center; and approximately 60 small, specialized laboratory research rooms.

## Assistantships, Fellowships, or Traineeship Opportunities

Research and teaching assistantships are available to qualified graduate students. Additional traineeships and fellowships are also available.

## Faculty

### Chair

Michael D. Beecher

### Professors

Barash, David P. \* 1975; MA, 1968, PhD, 1970, University of Wisconsin; sociobiology, psychological aspects of nuclear war, peace studies, animal behavior and evolution.

Barnard, Kathryn E. \* 1972, (Adjunct); MSN, 1962, Boston University; PhD, 1972, University of Washington; ecological factors of child development.

Becker, Joseph \* 1965, (Emeritus); PhD, 1958, Duke University; psychosocial aspects of depression.

Beecher, Michael D. \* 1978; MA, 1965, PhD, 1970, Boston University; animal communication, animal behavior, sensory processes.

Bernstein, Ilene L. \* 1974; MA, 1967, Columbia University; PhD, 1972, University of California (Los Angeles); behavioral neuroscience, mechanisms affecting appetite and taste preference.

Booth, Cathryn L. \* 1980, (Adjunct Research); PhD, 1974, Ohio State University; mother-infant interaction, observational methodology, child birth experiences and attachment.

Brenowitz, Eliot A. \* 1987; PhD, 1982, Cornell University; animal behavior, neuroethology, neuroendocrinology, animal communication.

Carr, John E. \* 1963; PhD, 1963, Syracuse University; clinical health psychology, behavioral medicine.

Casseday, John H. \* 1996, (Research); MA, 1963, PhD, 1970, Indiana University; neuroethology of sensory systems, echolocation and function of auditory mid-brain.

- Cauce, Ana Mari \* 1986; PhD, 1984, Yale University; community/developmental psychology, socialization of children/adolescents of color, ethnic identity.
- Chapman, C. Richard \* 1971, (Adjunct); PhD, 1969, University of Denver; human pain measurement, psychophysiology, sensation and perception, chronic pain.
- Curry, Susan J. \* 1981, (Adjunct); MA, 1979, PhD, 1981, University of New Hampshire; health behavior change.
- Dale, Philip S. \* 1968, (Affiliate); PhD, 1968, University of Michigan; psycholinguistics, language and cognitive development in normal and exceptional children.
- Dawson, Geraldine \* 1985; PhD, 1979, University of Washington; developmental disabilities, autism, and neuropsychology.
- Diaz, Jaime \* 1978; PhD, 1975, University of California (Los Angeles); brain development, developmental psychopharmacology, neurophysiology.
- Doerr, Hans O. \* 1967, (Emeritus); PhD, 1965, Florida State University; psychophysiology of central and autonomic nervous systems, neuropsychology.
- Donovan, Dennis 1981, (Adjunct); MA, 1972, Western Washington University; PhD, 1980, University of Washington; cognitive-behavioral factors in substance abuse and addictive behaviors.
- Fiedler, Fred E. \* 1969, (Emeritus); PhD, 1949, University of Chicago; leadership and group effectiveness, social, industrial, and organizational psychology.
- Fuchs, Albert F. \* 1969, (Adjunct); PhD, 1966, Johns Hopkins University; oculomotor physiology.
- Gottman, John M. \* 1986; PhD, 1971, University of Wisconsin; development of children's friendships, marriage and family, observational research techniques.
- Greenberg, Mark T. \* 1977, (Affiliate); PhD, 1978, University of Virginia; developmental psychopathology, prevention of mental disorders in childhood.
- Greenwald, Anthony G. \* 1986; PhD, 1963, Harvard University; social cognition, attitudes, self and self-esteem, methodology, unconscious cognition.
- Guralnick, Michael J. 1986; MS, 1964, PhD, 1967, Lehigh University; developmental disabilities, peer relations, social and language development, evaluation systems.
- Heiman, Julia R. \* 1980, (Adjunct); PhD, 1975, State University of New York (Stony Brook); sexuality and sexual relationships, prevention and treatment of family abuse.
- Hunt, Earl B. \* 1966; PhD, 1960, Yale University; individual differences in cognition, cognition in education and the workplace.
- Keating, John P. \* 1972, (Affiliate); PhD, 1972, Ohio State University; social psychology, media effect on attitude, psychology and religion, emergency behavior psychology.
- Kiyak, H. Asuman \* 1972, (Adjunct); MA, 1974, PhD, 1977, Wayne State University; geriatric dentistry, behavioral aspects of health care.
- Kuhl, Patricia K. \* 1976, (Adjunct); MA, 1971, PhD, 1973, University of Minnesota; speech perception.
- Linehan, Marsha M. \* 1977; PhD, 1971, Loyola University (Chicago); personality disorders, including borderline; suicidal behaviors, cognitive and behavior therapies.
- Lockard, Joan S. \* 1962; PhD, 1963, University of Wisconsin; primate social behavior, animal behavior, sociobiology, human ethology, neurobehavior.
- Loftus, Elizabeth F. \* 1973; PhD, 1970, Stanford University; cognition, long-term memory, eye-witness testimony, psychology and law.
- Loftus, Geoffrey R. \* 1972; PhD, 1971, Stanford University; perception, cognitive processes and information processing, computer control of experimentation.
- Lunneborg, Clifford E. \* 1962, (Emeritus); PhD, 1959, University of Washington; psychometrics, multivariate models, individual differences in cognition.
- Marlatt, G. Alan \* 1972; PhD, 1968, Indiana University; health psychology and addictive behaviors (relapse prevention and harm reduction).
- McCauley, Elizabeth 1979, (Adjunct); PhD, 1973, State University of New York (Buffalo); clinical and developmental psychology.
- McMahon, Robert J. \* 1987; PhD, 1979, University of Georgia; developmental psychopathology, prevention, family interaction, tobacco use in youth.
- Meltzoff, Andrew N. \* 1977; PhD, 1976, Oxford University (UK); cognitive and social development of human infants.
- Mitchell, Terence R. \* 1969; PhD, 1969, University of Illinois; organizational behavior.
- Morrison, Diane M. \* 1980, (Adjunct Research); PhD, 1982, University of Washington; sexual decision-making, attitudes and behavior, teen pregnancy.
- Patterson, David R. \* 1984, (Adjunct); PhD, 1982, Florida State University; treatment of acute pain, psychology of burn patients, psychological outcome of physical trauma.
- Robinson, Nancy M. \* 1969, (Adjunct); PhD, 1958, Stanford University; developmental psychology, giftedness.
- Rubel, Edwin W. \* 1986, (Adjunct); PhD, 1969, Michigan State University; developmental neurobiology, with special emphasis on vertebrate auditory system development.
- Sackett, Gene P. \* 1970; PhD, 1963, Claremont Graduate School; primate behavior, early experience and development.
- Sarason, Irwin G. \* 1956; PhD, 1955, Indiana University; personality, social support, stress and anxiety.
- Sax, Gilbert \* 1965, (Emeritus); PhD, 1958, University of Southern California; measurement, statistics and research design.
- Smith, Ronald E. \* 1973; PhD, 1968, Southern Illinois University; clinical psychology, personality, stress and coping, human performance enhancement.
- Smoll, Frank L. \* 1976; PhD, 1970, University of Wisconsin; sport psychology, leadership behavior in youth sports, psychological correlates of motor development.
- Speltz, Matthew L. 1981, (Adjunct); MA, 1975, Western Washington University; PhD, 1980, University of Missouri; developmental psychotherapy, family therapy, pediatric behavioral medicine.
- Spieker, Susan J. \* 1983, (Adjunct Research); PhD, 1982, Cornell University; developmental psychology, infant security, mother-infant interaction.
- Streissguth, Ann P. 1972, (Adjunct); MA, 1959, University of California (Berkeley); PhD, 1964, University of Washington; psychology and behavioral teratology.
- Teller, Davida Y. \* 1965; PhD, 1965, University of California (Berkeley); vision, color vision, development of vision in infants.
- Teri, Linda \* 1984, (Adjunct); PhD, 1980, University of Vermont; dementia, healthy aging and intervention research, depression and anxiety.
- Townes, Brenda D. \* 1961, (Adjunct); PhD, 1970, University of Washington; psychology.
- Vitaliano, Peter P. \* 1978, (Adjunct); PhD, 1975, Syracuse University; stress and coping.
- Vitiello, Michael V. \* 1982, (Adjunct); PhD, 1980, University of Washington; sleep, sleep disorders and circadian rhythms in aging, age-related neuroendocrine/cognitive change.
- Weinstein, Philip \* 1972, (Adjunct); PhD, 1971, University of Kentucky; dental behavioral science; dental fear and pain in children, adults, and early childhood cases.
- Westrum, Lesnick E. \* 1966, (Adjunct); MD, 1963, University of Washington; PhD, 1966, University College, London (UK); neuroanatomy, synaptology, plasticity, olfactory and trigeminal systems, dental pathways.

### Associate Professors

- Baer, John S. \* 1985, (Research); PhD, 1986, University of Oregon; clinical psychology, addictive behaviors, early intervention.
- Bassok, Miriam \* 1997; MA, 1978, PhD, 1984, Hebrew University (Israel); cognitive psychology, focus on learning, problem solving, and analogical reasoning.
- Bowen, Deborah J. \* 1986, (Adjunct); PhD, 1986, Uniformed Service University of the Health Sciences; health psychology.
- Brown, Jonathon D. \* 1989; PhD, 1986, University of California (Los Angeles); self-concept and social behavior; stress and physical health.
- Buck, Steven L. \* 1979; PhD, 1976, University of California (San Diego); human visual psychophysics, perception, human and animal learning.
- Burns, Edward M. \* 1984, (Adjunct); PhD, 1977, University of Minnesota; psychoacoustics.
- Corina, David P. \* 1993; PhD, 1991, University of California (San Diego); functional neuroimaging, cognitive neuropsychology, psycholinguistics, sign-language processing.
- Covey, Ellen \* 1996; MS, 1976, University of Houston; PhD, 1980, Duke University; structure and function of the central auditory system, echo location.
- Craft, Suzanne \* 1994, (Adjunct); PhD, 1985, University of Texas (Austin); neuropsychology of attention and memory in aging and Alzheimer's disease.
- Culbert, Sidney S. \* 1955, (Emeritus); PhD, 1950, University of Washington; perception, psycholinguistics, intercultural communication.
- Douglas, Robert J. \* 1968; PhD, 1964, University of Michigan; neuropsychology of learning and memory, aging and inhibition.
- Fitts, Douglas A. \* 1981, (Research); PhD, 1978, Washington State University; neurobiology, salt/water regulation, thirst.
- Frey, Karin S. \* 1983, (Adjunct Research); PhD, 1978, University of Washington; educational psychology, relationships between social cognitions and behaviors.
- George, William H. \* 1990; PhD, 1982, University of Washington; alcohol effects on social/sexual behavior, treatment and cultural issues in addiction.
- Gillmore, Gerald M. \* 1973, (Affiliate); PhD, 1970, Michigan State University; measurement theory, assessment of student performance, program evaluation.
- Ginorio, Angela B. \* 1981, (Adjunct); PhD, 1979, Fordham University; women and/in science, violence and women, socially defined identities, psychology issues for Latinas.
- Gonzalez, Richard D. \* 1990, (Affiliate); PhD, 1990, Stanford University; judgment and decision making, measurement statistics, group dynamics, psychology and law.
- Ha, James C. \* 1993, (Research); PhD, 1989, Colorado State University; animal behavior, behavioral ecology, infant primate development.

Kahn, Peter H., Jr. 2000, (Research); PhD, 1988, University of California (Berkeley); social cognition and development; multicultural psychology, environmental psychology.

Katz, Lynn Fainsilber 1991, (Research); PhD, 1988, University of California (Berkeley); antisocial children, social psychophysiology, family interaction, parent-child interaction.

Kenney, Nancy J. \* 1976; PhD, 1974, University of Virginia; neural and endocrine controls of food and fluid intake, physiological basis of motivation.

Kerr, F. Beth \* 1974; PhD, 1974, University of Oregon; cognition, human motor control and learning, attention, human factors.

Kivlahan, Daniel R. \* 1983, (Adjunct); PhD, 1983, University of Missouri; evaluating assessment, prevention, and treatment approaches for addictive behaviors.

Kohlenberg, Robert J. \* 1968; PhD, 1968, University of California (Los Angeles); behavior modification, learning, clinical behavior analysis, psychotherapy process.

Miyamoto, John M. \* 1984; PhD, 1985, University of Michigan; mathematical models of mental processes, inductive reasoning and decision making.

Mizumori, Sheri J. 2000; PhD, 1985, University of California (Berkeley); neurobiology of learning and memory.

Olavarria, Jaime F. \* 1990; MD, 1974, State University of Chile; PhD, 1984, University of California (Berkeley); visual system: anatomy and physiology, comparative and developmental studies.

Osterhout, Lee E. \* 1991; PhD, 1990, Tufts University; psycholinguistics, cognitive psychophysiology.

Ramsay, Douglas S. \* 1983, (Adjunct); DMD, 1983, University of Pennsylvania; PhD, 1988, MSD, 1990, University of Washington; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

Rose, Richard M. \* 1966, (Emeritus); PhD, 1964, University of Pennsylvania; stochastic models, psychophysics, sleep.

Shoda, Yuichi \* 1996; PhD, 1990, Columbia University; social and personality psychology, social cognition, health and coping.

Unis, Alan S. \* 1987, (Adjunct); MD, 1976, University of Pittsburgh; early-onset psychopathology resulting from disrupted brain development.

### Assistant Professors

Brown, Joseph L. 1999, (Acting); PhD, 1999, Stanford University; sociocultural influences on intellectual performance and identity, stereotyping and decision making.

Canfield, James G. 2000, (Research); PhD, 1995, University of Utah; neuroethical approach to the study of brain-behavior relationships.

Carlson, Stephanie M. \* 1998; PhD, 1997, University of Oregon; cognitive and social development in preschool children.

Jones, Theresa A. \* 1996; PhD, 1992, University of Texas (Austin); behavioral and neural plasticity after brain damage.

Kyes, Randall C. \* 1993, (Research); PhD, 1989, University of Georgia; animal behavior, primate behavior and cognition, conservation biology.

Larimer, Mary E. \* 1987, (Research); PhD, 1992, University of Washington; prevention of alcohol problems among college students.

Lengua, Lilianna J. \* 1993; PhD, 1994, Arizona State University; child-clinical, community psychology; contextual/family/individual predictors of child adjustment.

O'Donnell, Sean \* 1996; PhD, 1993, University of Wisconsin; genetic and hormonal effects on behavior in social insects.

Richards, Jane M. 2000; PhD, 2000, Stanford University; how emotion regulation affects cognitive performance, social relationships, and personality processes.

Rudd, Michael \* 1998; PhD, 1987, University of California (Irvine); quantitative psychology, statistics and mathematical modeling.

von der Emde, Gerhard 2000; PhD, 1987, Eberhard-Karls-Universität Tübingen (Germany); neuroethology, neural basis of animal behavior and animal sensory capabilities.

### Senior Lecturers

Barrett, Kimberly \* 1990; EdD, 1989, University of San Francisco; adolescent substance abuse, child development, parent education, ethnic identity development.

Fagan, Corey N. \* 1989; PhD, 1988, University of Massachusetts; psychotherapy effectiveness, program evaluation, psychotherapy for adults and adolescents.

McDermott, Lois J. 1984; PhD, 1979, University of Chicago; human sexuality and reproductive physiology.

Passer, Michael W. \* 1977; MA, 1972, PhD, 1977, University of California (Los Angeles); social psychology, organizational psychology, teaching of psychology.

### Lecturers

Joslyn, Susan L. 1988; PhD, 1995, University of Washington; cognition, autobiographical memory, multitasking, applied issues.

Little, Laura M. 1997; PhD, 1998, University of New Mexico; quantitative methodology.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**PSYCH 400 Learning (5) I&S/NW** Experimental research and basic theories primarily in animal learning. Prerequisite: either PSYCH 101 or PSYCH 102.

**PSYCH 401 Observing Interaction (4) I&S** *Gottman* Surveys the methods of systematic observational research for the study of interaction. Emphasis on summarizing quantitative data for analysis of pattern and sequence, and for theory development. Prerequisite: PSYCH 101; PSYCH 209.

**PSYCH 402 Infant Behavior and Development (3/5) I&S** *Meltzoff* Psychological development in the first two years of life. Basic and advanced techniques for assessing psychological development in infancy. Classic theories of human infancy and examination of a wide range of new experiments about infant behavior and development. Prerequisite: either PSYCH 306 or PSYCH 414. Offered: A.

**PSYCH 403 Motivation (5) I&S/NW** Theory and research on reinforcement, punishment, frustration, preference, instinctual mechanisms, and other factors controlling animal behavior. Prerequisite: either PSYCH 101 or PSYCH 102.

**PSYCH 405 Advanced Personality: Theory and Research (5) I&S** Intensive survey of theoretical concepts and detailed review of experimental methods and experiments in the field of personality. Prerequisite: PSYCH 205.

**PSYCH 407 History of Psychology (5) I&S** Historical and theoretical background of the basic assumptions of modern psychology, including such doctrines as behaviorism, determinism, and associationism and the scientists who developed them. Prerequisite: either PSYCH 101 or PSYCH 102.

### PSYCH 408 Mechanisms of Animal Behavior (4)

**NW** *Beecher, Brenowitz* Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisite: either PSYCH 200, BIOL 102, or BIOL 203. Offered: jointly with ZOO 408; W.

### PSYCH 409 Sociobiology (5) NW

*Beecher, Rohwer* Biological bases of social behavior, emphasizing evolution as a paradigm. Topics are: individual versus group selection, kin selection, altruism, group versus individual living, mating systems, parental care of offspring, and competitive strategies. Prerequisite: either PSYCH 200 or both BIOL 202 and BIOL 203. Offered: jointly with ZOO 409.

### PSYCH 410 Child and Adolescent Behavior Disorders (5) I&S

*McMahon* Introduction to psychopathology in children and adolescents, and an overview of principal modes of intervention. Particularly for students interested in advanced work in clinical psychology, social work, or special education. Prerequisite: PSYCH 305; PSYCH 306. Offered: WS.

### PSYCH 412 Behavioral Genetics (4) NW

*O'Donnell* Role of genetics in determining variation in human and animal behavior and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects, and gene expression. Prerequisite: either PSYCH 200 or both BIOL 202 and BIOL 203. Offered: W.

### PSYCH 414 Cognitive Development (5) I&S

*Batterson* Key theoretical and research approaches to cognitive development from infancy through adolescence. Sensorimotor development, language development, imitation, number concepts, logical reasoning, memory, cognition in adolescents, intelligence, and the role of biology, environment, and experience. Prerequisite: PSYCH 209; PSYCH 306.

### PSYCH 415 Personality Development of the Child (5) I&S

*Carlson* Socialization theory and research, infant attachment and social relationships, development of aggressive and altruistic behaviors, sex-role development, moral development, parent and adult influences. Applied issues in social development and policy. Prerequisite: PSYCH 306.

### PSYCH 416 Animal Communication (5) NW

*Beecher, Brenowitz* Evolution and mechanisms of animal communication and related processes of perception, thinking, and social behavior. Prerequisite: either PSYCH 200, BIOL 102, or BIOL 203.

### PSYCH 417 Human Behavior as a Natural Science (5) I&S/NW

*Lockard* Evolution of human social behavior and the adaptive significance of communication systems from a sociobiological and anthropological perspective. Prerequisite: either PSYCH 200, or BIO A 201, or BIOL 202 and BIOL 203. Offered: WS.

### PSYCH 418 Primate Social Behavior (5) NW

*Lockard* Social behavior, ecology, and group structure of monkeys and apes from an evolutionary, sociobiological, and anthropological perspective. Prerequisite: either PSYCH 200, or BIO A 201, or BIOL 202 and BIOL 203. Offered: Sp.

### PSYCH 419 Behavioral Studies of Zoo Animals (5, max. 10) NW

*Lockard* Observational studies of behavior of zoo animals to expand basic knowledge of animal behavior, conservation of endangered species, and research methodology with discussions and tours focusing on zoo philosophy and operations. Offered in cooperation with Woodland Park Zoo. Prerequisite: either PSYCH 200, or BIO A 201, or BIOL 202 and BIOL 203. Offered: AS.

**PSYCH 420 Drugs and Behavior (3) NW** *Diaz* Animal and clinical research on the behavioral consequences of drug intake. Prerequisite: PSYCH 322.

**PSYCH 421 Neural Basis of Behavior (5) NW** *Diaz* Anatomical and physiological principles and resultant behavior involved in the integrative action of the nervous system. 431 recommended but not required to follow 421. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: AS.

**PSYCH 422 Physiological Psychology (5) NW** *Douglas* Physiological mechanisms in behavior, including those basic to emotion, fatigue and sleep, learning, and memory. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: Sp.

**PSYCH 423 Sensory Basis of Behavior (5) NW** *Olavarria* Study of sensory mechanisms as a way to understand behavior. Basic properties of neurons, anatomy, and physiology of sensory systems, with some emphasis on the visual system. Prerequisite: either PSYCH 222 or PSYCH 333. Offered: W.

**PSYCH 424 Vision and Its Physiological Basis (5) NW** *Teller* Behavioral neurobiology of human vision: color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of visual functioning with known optical, biochemical, physiological, and anatomical substrates. Prerequisite: either PSYCH 101, PSYCH 102, BIOL 202, or ZOOL 301. Offered: jointly with P BIO 424; W.

**PSYCH 425 Surgical and Histological Techniques (5) NW** Practicum in basic and advanced surgical and histological techniques used in psychophysiological experimentation. Prerequisite: PSYCH 421.

**PSYCH 426 Neurobiology of Learning and Memory (4) NW** *T. Jones* Theory and research on how animals learn and remember, including basic concepts of brain plasticity, how brain areas and neurons adapt to changes in experiences throughout the lifespan, and cellular and structural substrates of a "memory." Prerequisite: either PSYCH 222, PSYCH 322, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423.

**PSYCH 427 Behavioral Endocrinology (5) NW** *Lattermann* The endocrine system and how its secretions influence and are influenced by behavior; relationships between the nervous and endocrine systems. Prerequisite: PSYCH 421.

**PSYCH 428 Human Motor Control and Learning (5) I&S/NW** *Kerr* Current theory and research in human motor performance and skill acquisition. Prerequisite: PSYCH 101 or PSYCH 102; recommended: PSYCH 209. Offered: W.

**PSYCH 429 Brain Anatomy for the Behavioral Scientist (1) NW** *Diaz* Detailed review of the neuroanatomical features of the sheep brain with laboratory demonstrations. Prerequisite: PSYCH 421 which may be taken concurrently. Offered: A.

**PSYCH 430 Development of Brain Connections (4) NW** *Olavarria* Analysis of innate and environmental factors that play a role in the development of brain connections. Critical review of current literature on the various strategies used by neurons to find their appropriate targets. Prerequisite: either PSYCH 222, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423. Offered: Sp.

**PSYCH 433 Regulatory Behavior (4) NW** *Kenney* Neural and endocrine mechanisms in the control of food and water intake and the regulation of body weight and fluid balance. Prerequisite: either PSYCH 421 or PSYCH 427.

**PSYCH 436 Developmental Aspects of Sport Competition (4) I&S** *Smoll* Biophysical and psychosocial influences of sport participation on growth and development of children and youth. Competition readiness, injuries, stress, aggression, roles and responsibilities of parents and coaches. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: AS.

**PSYCH 437 Motor Development (4) NW** *Smoll* Analysis of motor development from prenatal origins through adolescence with emphasis on relations between biophysical and psychosocial development of children and youth. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: Sp.

**PSYCH 441 Perceptual Processes (5) I&S/NW** Theory and findings in perception with a focus on visual perception in humans. Discrimination and constancy for simple judgments, segregation and identification of visual objects, and specific areas of investigation such as reading and computer vision. Prerequisite: PSYCH 333.

**PSYCH 445 Theories of Social Psychology (5) I&S** *JD Brown* Evaluation of the major theories of human social behavior supported by the empirical literature; theories of social cognition and thought; major theories of social interaction, group processes, and social learning. Prerequisite: PSYCH 345.

**PSYCH 446 Personality Assessment (3) I&S** *R Smith* Measurement of personality variables in personal research, social psychology, and clinical psychology. Theoretical conceptions underlying various clinical and experimental scales and an assessment of their construct validity and behavioral correlates. Prerequisite: PSYCH 205; either PSYCH 213 or PSYCH 217; PSYCH 305.

**PSYCH 447 Psychology of Language II (4) VLPA/I&S** *Corina, Osterhout* Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: jointly with LING 447.

**PSYCH 448 Seminar in Psychology (1-15, max. 15)** Selected research topics of contemporary interest. Quarterly listings of specific offerings are available at departmental advisory office. Offered: AWSpS.

**PSYCH 449 Organizational and Industrial Psychology (3) I&S** *Passer* Examines research on human behavior in industrial and organizational environments. Topics include research methods, job analysis, the prediction of workplace performance, personnel selection and training, performance appraisal, group influences, job satisfaction, job motivation, leadership, and human factors. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: S.

**PSYCH 450- Honors Research Seminar in Psychology (2-, max. 4)** *Teller* Senior thesis research; preparation of senior thesis; oral presentation of research. Four credits of 450 required for all senior honors and distinction candidates in conjunction with 498 and 499. Offered: AWSpS.

**PSYCH 451 Health Psychology (5) I&S/NW** Overview of the psychological and behavioral factors in health and disease. Includes research on both psychological causes and treatments. Topics include stress, risky behaviors, patient-provider interactions, pain, behavioral/medical treatments, and lifestyle interventions. Prerequisite: either PSYCH 101 or PSYCH 102; PSYCH 209; either PSYCH 205, PSYCH 222, PSYCH 305, or PSYCH 345.

**PSYCH 452 Psychology of the Self-Concept (4) I&S** *JD Brown* Examines psychological theory and research on the role of the self-concept in regulating behavior. Topics include the development of the self-concept; self-awareness; and self-esteem maintenance. Prerequisite: PSYCH 345. Offered: W.

**PSYCH 454 Personality and Social Influence (4) I&S** *Shoda* Survey of various theories and research for analyzing person-situation interactions—how the qualities of persons and situations combine to generate thoughts, feelings, and behaviors of a person in a given social situation. Prerequisite: PSYCH 209; either PSYCH 205 or PSYCH 345. Offered: A.

**PSYCH 457 Language Development (5) VLPA/I&S** First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: either PSYCH 306, LING 200, or LING 400. Offered: jointly with LING 457.

**PSYCH 460 Cognitive Neuropsychology (4) NW** *Corina, Osterhout* Discussion of neural systems underlying cognitive behavior with particular focus on breakdown of cognition following brain damage. Topics include object and space perception, language, voluntary movement, attention, and memory. Examination of contributions from related areas of neuroimaging, visual perception, linguistics, physiology, and neuroscience. Prerequisite: either PSYCH 222, PSYCH 333, PSYCH 355, or PSYCH 421.

**PSYCH 462 Human Memory (5) I&S** *Joslyn* Research and theory in key areas of memory. Issues covered include information processing theory, the link between memory processes and their biological underpinnings, autobiographical memory, implicit memory, and the effect of emotion on memory. Prerequisite: PSYCH 209; recommended: PSYCH 355. Offered: A.

**PSYCH 465 Intelligence (5) I&S** *Hunt* Analysis of individual differences in cognition. Includes description/use of psychometric ("intelligence test") models, test scores' relationship to academic and non-academic performance, information processing and biological models of intelligence (including genetic models). Discussion of male-female and demographic group differences in cognition. Prerequisite: either PSYCH 213 or PSYCH 217; PSYCH 355.

**PSYCH 466 Psychology of Judgment and Decision Making (5) I&S** *Miyamoto* Human information processing in judgment and decision making, especially the interface between cognitive theories and normative and prescriptive theories of decision making. Prerequisite: either PSYCH 213 or PSYCH 217; either PSYCH 231, PSYCH 355, or PSYCH 361.

**PSYCH 467 Eyewitness Testimony (3) I&S** *E Loftus* Perception, memory, and retrieval of real world events. The eyewitness in the legal system. Psychologists as expert witnesses regarding eyewitness accounts. Prerequisite: either PSYCH 101 or PSYCH 102; PSYCH 355. Offered: W.

**PSYCH 469 Psychology of Reasoning (4) I&S** *Bassok* Cognitive processes in human learning, problem solving, deductive and inductive reasoning. Prerequisite: either PSYCH 231 or PSYCH 355.

**PSYCH 470 Psychology and Music (5) VLPA/I&S** Introduction to the scientific study of musical behavior. An overview of current topics in the psychology of music from the areas of musical perception and cognition, musical development, music therapy, musical performance, and composition. Includes psychoacoustical and neuropsychological foundations, research methods, and some basic material in music theory. Prerequisite: either PSYCH 101 or PSYCH 102.

**PSYCH 471 Applied Issues in Cognition (4-5, max. 10) I&S** *Joslyn* Examines cognitive issues in applied settings, such as the workplace and education. Topics include such issues as attention, expertise, problem solving, decision-making, human error, automation, navigation, and individual differences. Prerequisite: either PSYCH 355 or PSYCH 462 or PSYCH 469.

**PSYCH 480 Ideas of Human Nature (5) I&S** *Barash* Reviews various approaches to the nature of human nature, including ideas from ancient philosophy, theories of the soul, empiricism, idealism, conditioning, social constructions, concepts of Freud, Marx, the existentialists, and neo-Darwinism. Prerequisite: either PSYCH 101 or PSYCH 102.

**PSYCH 488 Stress and Coping (4) I&S/NW** *Sarason* Reviews theories and research concerning stress and its roles in behavior, personality, development, health, and interpersonal relationships. Coping analyzed as a factor in the way people respond to stressful circumstances. Prerequisite: either PSYCH 205 or PSYCH 305. Offered: Sp.

**PSYCH 489 Clinical Psychology (3) I&S** *George* Basic issues, methods, and research concerning professional issues, psychological assessment, and approaches to psychotherapy and behavioral change. Prerequisite: either PSYCH 205 or PSYCH 305.

**PSYCH 490 Stress Management (3) I&S/NW** Nature of stress. Physiological responses to stress and relaxation. Techniques of stress management with training in relaxation, biofeedback, meditation, cognitive restructuring, exercise, nutrition, interpersonal communication skills, and time management. Credit/no credit only. Prerequisite: either PSYCH 101 or PSYCH 102. Offered: S.

**PSYCH 494 Field Study in Animal Behavior (2-3, max. 9)** *Kyes* Field experience in areas relating to animal behavior through participation in seminar discussion and field exercises and training at foreign and domestic field study sites. Prerequisite: PSYCH 200.

**PSYCH 496 Undergraduate Teaching Experience in Psychology (2-3, max. 6)** Students are trained as assistants in quiz sections or as supplemental tutors for undergraduate psychology courses. Designed especially for those students planning graduate work or education certification. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree. Offered: AWSpS.

**PSYCH 497 Undergraduate Fieldwork (2-5, max. 10)** Individual consultation with faculty member and supervised practicum experience in a broad range of community settings and agencies dealing with psychological problems. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

**PSYCH 498 Directed Reading in Psychology (1-3, max. 18)** Readings in special interest areas under supervision of departmental faculty. Discussion of reading in conference with the instructor. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree. Offered: AWSpS.

**PSYCH 499 Undergraduate Research (1-3, max. 18)** Design and completion of individual research projects. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree. Offered: AWSpS.

### Courses for Graduates Only

**PSYCH 500 Laboratory in Statistical Computation I (2)** *Miyamoto* Techniques of computation using statistical software on personal computers. Organization of data files, transformations of variables, graphical representations of data, descriptive statistics, elementary inferential statistical analyses. Prerequisite: concurrent enrollment in PSYCH 513 or permission of instructor. Offered: A.

**PSYCH 501 Laboratory in Statistical Computation II (2)** Techniques of statistical computation using statistical software on personal computers and mainframe computers. Multiple regression, analysis of

variance and covariance. Planned and post hoc comparisons and confidence intervals. Data analytic diagnostics for violations of regression assumptions. Prerequisite: PSYCH 500 and PSYCH 513, concurrent enrollment in PSYCH 514, or permission of instructor. Offered: W.

**PSYCH 504 Biological Basis of Development (4)** *Bernstein* Embryological, genetic, physiological, and evolutionary perspectives of human development; biological development in infancy; sensory development and its influence on the development of perception; primate models for human development. First quarter of a three-quarter proseminar required for graduate majors in developmental psychology. Offered: A.

**PSYCH 505 Early Cognitive and Linguistic Development (4)** *Meltzoff* Focus on the origins and early development of thought and language. Piagetian theory and modern-day revisions of it emphasized. In depth examination of historical and philosophical bases for current empirical research. Second quarter of a three-quarter proseminar, required for graduate majors in developmental psychology. Offered: W.

**PSYCH 506 Personality and Social Development (4)** *Carlson* Theories and empirical literature in personality and social development throughout infancy, childhood, and adulthood. Third quarter of a three-quarter proseminar required for graduate majors in developmental psychology.

**PSYCH 508 Research Methods in Social Psychology (4, max. 8)** *Greenwald* Examination of methodological, practical, and communication problems associated with research on human behavior. Topics include: selecting research problems, use of theory, types of validity, common sense about statistics, when to replicate, dealing with unpredicted results, strategies for presentation and publication. Offered: Sp.

**PSYCH 510 Advanced Attitude Theory (5)** *Greenwald* Theoretical, methodological, and empirical work on the concept of attitude and its practical applications. Topics include: definition of attitude, measurement of attitudes, information processing theories, functional theories, cognitive structure theories, the self as attitude object, unconscious attitudinal processes. Prerequisite: PSYCH 445 or PSYCH 503; PSYCH 514 or equivalent; or permission of instructor.

**PSYCH 511 Personality (3)** *Shoda, R Smith* Review of personality research. Roles of cognitive, affective, motivational, and psychodynamic processes. Critical evaluation of current personality research as it relates to concepts of personality, its antecedents, and influences over behavior. Attention to role of personality variables in social relationships.

**PSYCH 513 Introduction to Statistics and Data Analysis (4)** *Miyamoto* Basic concepts of statistical theory and methods of data analysis. Emphasis on the integration of statistical theory, statistical computation, and psychological research methods. Required of all first-year graduate students in psychology. Prerequisite: concurrent enrollment in PSYCH 500 or permission of instructor. Offered: A.

**PSYCH 514 Linear Models and Data Analysis (4)** Analysis of data in the behavioral sciences. Required of all first-year graduate majors. Prerequisite: PSYCH 500, PSYCH 513; concurrent registration in PSYCH 501, or permission of instructor. Offered: W.

**PSYCH 515 Modeling Experimental and Observational Data (4)** *Rudd* An introduction to statistical modeling; interactive data analyses; use of regression, ANOVA, logistic regression, and log-linear models in explanatory studies. Prerequisite: PSYCH 514.

**PSYCH 518 Single Subject Design and Research (3)** *Kohlenberg* Single subject designs (reversal, multiple baseline, changing criterion) and their application to clinical cases. Prerequisite: graduate major standing in clinical psychology or permission of instructor. Offered: W.

**PSYCH 519 Statistical Methods in Longitudinal Research (3)** *Sackett* Those aspects of statistics and experimental design unique to, or heavily used in, developmental research; behavioral observation methods, analysis of variance and nonparametric techniques, time series and survival, analysis and repeated measure techniques for studying change over time. Prerequisite: PSYCH 514 or equivalent.

**PSYCH 522 Cognitive Perception (3)** *G Loftus* Current topics in perception, psychophysics, sensory memory, pattern recognition, letter and word perception, and visual masking. Prerequisite: PSYCH 441 and PSYCH 517, or permission of instructor. Offered: Sp.

**PSYCH 523 Cognition (5)** *Hunt* Survey of the major influences on human cognition. Discussion of biological, information processing, and content-based theories of thought. Applications described in memory, language, decision-making, and problem solving. Prerequisite: completion of departmental mathematical and statistical requirement through PSYCH 514.

**PSYCH 524 Cognitive Approaches to Human Memory (3)** *E Loftus* Examination of current topics in human memory from the perspective of cognitive psychology. Prerequisite: PSYCH 355 or permission of instructor. Offered: Sp.

**PSYCH 525 Assessment of Intelligence (5)** *Lengua* Current theory and research on intelligence and intelligence testing; training in administration, scoring, and interpretation of major intelligence tests; ethical issues in assessment. Prerequisite: graduate major standing in child clinical or clinical psychology, or graduate minor standing in child clinical psychology. Offered: Sp.

**PSYCH 526 Psychological Assessment of Children (5)** *Dawson* Assessment techniques appropriate to children, including those for infants, special problems of preschool and school-age children; projective tests, family interviews, and target observational assessment; training in administration of selected techniques. Prerequisite: PSYCH 525 and permission of instructor.

**PSYCH 527 Psychological Assessment of Adults (3)** Training in adult assessment and development of skills in administration, scoring, and interpretation of the Rorschach with some attention to other projective techniques. Prerequisite: PSYCH 525 and permission of instructor.

**PSYCH 533 Teaching of Psychology (3)** *Passer* Examines issues concerning the teaching of psychology, including educational goals, course development, instructional methods, T.A.-student and T.A.-faculty relations, grading, student diversity, and problem situations. Assignments are designed to enhance students' organizational, presentational, and problem-solving skills. Credit/no credit only. Prerequisite: graduate standing in the Department of Psychology.

**PSYCH 535 Approaches to Psychological Assessment (4)** Problem-solving approach to psychological assessment; review of psychological tests and procedures and presentation of approaches to their clinical interpretation and use. Required for all graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology. Offered: Sp.

**PSYCH 536 Behavioral Assessment (4)** *Linehan* Research, theory, and technique in behavioral assessment. Emphasis on assessing for change and relationship between assessment and therapy. Interviewing, observational techniques, self-monitoring, simulated environments, and physiological, self-report, and imaginal procedures. Prerequisite: clinical psychology graduate standing and permission of instructor.

**PSYCH 538 Systems of Psychotherapy (3)** *George, Marlatt* Theory and research of major systems of psychotherapy, including the psychodynamic, behavioral, cognitive, and family systems approaches as an introduction to subsequent practica in clinical psychology. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate major standing in clinical psychology and permission of instructor. Offered: A.

*The content of each graduate seminar (numbered 540 through 560) offered by the department changes from quarter to quarter. A list of offerings is published each quarter and can be obtained from the Department of Psychology.*

**PSYCH 540 Seminar in Clinical Psychology (2)** *Baer, Cauce, Dawson, George, Kohlenberg, Linehan, Marlatt, McMahon, Sarason, Smith* Prerequisite: permission of instructor.

**PSYCH 541 Seminar in Cognitive Processes (2)** *Hunt, E Loftus, G Loftus* Prerequisite: permission of instructor.

**PSYCH 542 Seminar in Animal Behavior (2)** *Barash, Beecher, Brenowitz, Lockard* Prerequisite: permission of instructor.

**PSYCH 543 Seminar in Developmental Psychology (2)** *Carlson, Gottman, Meltzoff, Sackett* Prerequisite: permission of instructor.

**PSYCH 549 Seminar in Physiological Psychology (2)** *Bernstein, Diaz, Douglas, Kenney, Teller* Prerequisite: permission of instructor.

**PSYCH 550 Seminar in Psycholinguistics (2)** *Osterhout* Prerequisite: PSYCH 447 or PSYCH 457.

**PSYCH 551 Seminar in Psychophysics (2)** *Buck, Teller* Prerequisite: permission of instructor.

**PSYCH 552 Seminar in Quantitative Techniques (2)** *Hunt, Lunneborg* An introduction to the use of mathematical modeling in psychology and the behavioral sciences. Topics vary.

**PSYCH 553 Seminar in Social Psychology (2)** *JD Brown, JL Brown, Greenwald, Shoda* Prerequisite: permission of instructor.

**PSYCH 554 Seminar in Decision Processes (2)** *Miyamoto* Prerequisite: permission of instructor.

**PSYCH 559 Seminar in Current Research in Vision (1)** *Buck, Olavarria, Teller* Prerequisite: permission of instructor.

**PSYCH 560 Seminar (\* max. 30)** Prerequisite: permission of instructor. Offered: AWSpS.

**PSYCH 565 Quantifying Brain Structure (3)** *Jones* Covers concepts and applications of statistically unbiased methods for quantifying brain structure. Hands-on learning and application of concepts, sampling strategies and calculations for unbiased stereological measure of the size and number of various brain components.

**PSYCH 570 Child Clinical Psychology (4)** Issues and content of child clinical psychology, promotion of student's beginning work in research. Prerequisite: graduate major or minor standing in child-clinical psychology.

**PSYCH 571 Child Psychopathology (5)** *McMahon* Broad survey of major categories of child and adolescent disorders. Emphasis on scientific, empirical approach to description, classification, and research literature on these disorders. Required for all graduate students majoring in child clinical psychology. Prerequisite: graduate standing in psychology or permission of instructor.

**PSYCH 572 Approaches to Child Treatment (4)** *Barrett, Dawson* Major approaches to child psychotherapy, including specific applications, issues in treatment, and research. Prerequisite: graduate major standing in child-clinical psychology or permission of instructor. Offered: Sp.

**PSYCH 574 Community Psychology (4)** Overview of key issues and concepts in the field of community psychology. History of field and overview of different models used to conceptualize system-level mental health issues and delivery systems. Emphasizes theory and research rather than intervention. Prerequisite: psychology graduate student or permission of instructor.

**PSYCH 575 Minority Mental Health (3)** *Barrett, George* Surveys topics on mental health and treatment of racial and ethnic minorities. Theory emphases include: models addressing ethnic identity, cross-cultural differences, models of culturally sensitive intervention. Practice emphases include unique psychotherapy strategies for: African-, Asian-, and Latino-Americans, and American Indians. Prerequisite: graduate clinical major standing in psychology or permission of instructor.

**PSYCH 583 Research Methods in Clinical and Community Psychology (4)** *Lengua* Addresses issues concerning the design and implementation of research in clinical and community psychology. Topics include validity; reliability; experimental, quasi-, and non-experimental designs; causal inference; interpretation of data; and research ethics. Provides students with tools to evaluate research, develop hypotheses, and design rigorous empirical studies. Offered: A.

**PSYCH 584 Behavioral Methods: Clinical Interventions (3)** *Linehan* Provides students with basic skills required for competent practice of cognitive and behavioral therapies. Topics include behavioral skills training, cognitive restructuring, contingency management, and exposure-based procedures. Prerequisite: second year of graduate clinical psychology, social work, psychosocial nursing, or psychiatric residency.

**PSYCH 586 Clinical Personality Assessment (3)** *R Smith* Use of objective personality inventories in the description of normal and abnormal personality and use of such information in case conceptualization and treatment planning. Minnesota Multiphasic Personality Inventory, Millon Clinical Multiaxial Inventory. Credit/no credit only. Prerequisite: clinical psychology graduate standing.

**PSYCH 587 Clinical Methods: Interviewing (2)** *Fagan* Provides the foundation for developing good clinical skills. Enables students to conduct an initial clinical interview and generate a diagnostic formulation, problem list, and treatment plan after taking a complete history. Limited to and required of all second year clinical psychology graduate students. Credit/no credit only. Offered: A.

**PSYCH 588 Clinical Methods: Ethics (2)** *Fagan* Enables students to acquire a thorough working knowledge of the American Psychological Association's Ethical Standards for Psychologists; an awareness of Washington state law as it affects psychologists and a knowledge of how to identify and solve ethical dilemmas. Limited to and required of all second year clinical psychology graduate students. Credit/no credit only. Offered: W.

**PSYCH 589 Advanced Clinical Practicum (4)** *Cauce, Dawson, George, Kohlenberg, Marlatt, McMahon, Smith* Supervised psychotherapy involving several individual clients. Separate consultations with instructor for intensive supervision of each case. Occasional meetings in small groups of instructors and students to discuss case material. Assigned readings appropriate to each case with opportunities to discuss these with instructor. Credit/no credit only. Prerequisite: clinical psychology graduate standing and permission of instructor. Offered: AWSpS.

**PSYCH 590 Practicum in Psychological Assessment (2)** Demonstration and practice of selected psychological test procedures and interviewing skills. Concurrent registration in 535 required. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical or child-clinical psychology and permission of instructor.

**PSYCH 591 Issues in Clinical Psychology (1, max. 3)** Personal and professional issues in clinical psychology. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Credit/no credit only. Prerequisite: graduate major standing in clinical psychology. Offered: AW.

**PSYCH 593 Clinical Colloquium and Clinic Practicum (1-6, max. 24)** *Fagan* Required of all clinical psychology graduate students seeing clients in the clinic. Clinical colloquium required of all second-year students, optional for others. Credit/no credit only. Offered: AWS.

**PSYCH 594 Advanced Personality Theory (5)** *Linehan* Conceptual models of behavioral functioning, cognition, emotion, and environment as organizers of behavior and other critical issues in personality theory. Opportunity to integrate previous courses, research, and practice, and arrive at coherent theoretical framework. Required for graduate majors in clinical psychology.

**PSYCH 595 Behavior Disorders (5)** *Sarason* Major types of behavior disorders, with emphasis on clinical manifestations, relevant research, and theoretical perspectives. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate major standing in clinical psychology or permission of instructor. Offered: W.

**PSYCH 596 Psychology of Behavior Change (5)** *Kohlenberg* Behavioral theory and behavioral approaches to treatment. Prerequisite: PSYCH 595 and permission of instructor. Offered: Sp.

**PSYCH 597 Fieldwork in Clinical Psychology (1-5, max. 36)** *Baer, Cauce, Dawson, George, Kohlenberg, Linehan, Marlatt, McMahon, N Robinson, R Smith* Prerequisite: second-year graduate major standing and permission of departmental faculty.

**PSYCH 598 Directed Reading in Psychology (\* max. 30)** Selected topics. Prerequisite: permission of a supervising psychology faculty member.

**PSYCH 599 Directed Research in Psychology (1-3, max. 24)** Supervised participation in research. Prerequisite: permission of a supervising psychology faculty member.

**PSYCH 600 Independent Study or Research (\*)** Offered: AWSpS.

**PSYCH 700 Master's Thesis (\*)** Offered: AWSpS.

**PSYCH 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Romance Languages and Literature

C104 Padelford

 *General Catalog Web page:*  
[www.washington.edu/students/gencat/academic/romance.html](http://www.washington.edu/students/gencat/academic/romance.html)

The department consists of two divisions: French and Italian Studies and Spanish and Portuguese Studies. The divisions offer programs designed to develop competence in the reading, speaking, and writing of the languages and in the study of the literatures and cultures.

## French and Italian Studies

C254 Padelford

 *Division Web page:*  
[depts.washington.edu/frenital/](http://depts.washington.edu/frenital/)

## Graduate Program

Graduate Program Coordinator  
C259 Padelford, Box 354360  
(206) 616-5366

The Division of French and Italian Studies offers programs of graduate study leading to the degrees of Master of Arts in French or Italian and Doctor of Philosophy in French. Students who wish to complete their doctoral studies in Italian may do so through the Department of Comparative Literature.

The Master of Arts degree consists of 45 credits of courses taken at the 400 and 500 levels (plus 10 credits for exam preparation). The M.A. Final Examinations are written and oral and are administered in the last quarter of study.

Students enrolled in the doctoral program of French language and literature should devote at least two-thirds of their course work to the fields of specialization. Some training in the history of language is required. The Ph.D. program requires a total of 77 credits beyond the 55 for the M.A. (including 27 dissertation credits). The General Examination is divided into three broad areas: century or literary movement, critical problem, and outside area or constructed area. A dissertation is also required.

Information on specific requirements for the various degree programs is available upon request from the office of the graduate advising assistant or on the division's Web page ([depts.washington.edu/frenital/](http://depts.washington.edu/frenital/)).

## Financial Aid

The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the 10 weeks of the quarter.

## Faculty

### Chair

John T. Keeler

### Professors

Borch-Jacobsen, Mikkel \* 1986; Doct, 1981, University of Strasbourg (France); French twentieth-century literature, theory and criticism, psychoanalysis.

Christofides, Constantine \* 1966, (Emeritus); PhD, 1956, University of Michigan; medieval, seventeenth-century, Romanesque art and literature.

Clausen, Meredith L. \* 1979, (Adjunct); PhD, 1975, University of California (Berkeley); twentieth-century and American architecture.

Creore, A. Emerson 1940, (Emeritus); MA, 1936, University of Rochester; PhD, 1939, Johns Hopkins University.

Friedman, Lionel J. 1961, (Emeritus); PhD, 1950, Harvard University.

Handwerk, Gary J. \* 1984, (Adjunct); PhD, 1984, Brown University; literary theory, English and Irish nineteenth- and twentieth-century narrative.

Jonas, Raymond A. \* 1985, (Adjunct); PhD, 1985, University of California (Berkeley); modern France.

Keeler, John T. \* 1980; PhD, 1978, Harvard University; comparative politics (Western Europe), international relations.

Leiner, Jacqueline \* 1963, (Emeritus); DresLe, 1969, University of Strasbourg (France); modern French literature.

Nostrand, Howard L. 1982, (Emeritus); MA, 1933, Harvard University; Doct, 1934, Université De Paris VI (France); French culture and civilization.

Pace, Antonio 1980, (Emeritus); MA, 1937, Syracuse University; PhD, 1943, Princeton University; Italian language and literature.

Vance, Eugene \* 1990; PhD, 1964, Cornell University; French, English, and Italian medieval literature; history of rhetoric; sacred art; age of Augustine.

### Associate Professors

Collins, Douglas P. \* 1980; PhD, 1978, University of Missouri; twentieth-century French literature.

Dale, Robert C. \* 1963, (Emeritus); PhD, 1963, University of Wisconsin; nineteenth-century French literature, cinema.

Delcourt, Denyse \* 1990; PhD, 1987, University of Montreal (Canada); French Middle Ages, French Renaissance, French women writers and Quebecois literature.

Ellrich, Robert J. \* 1964, (Emeritus); PhD, 1960, Harvard University; eighteenth-century French literature.

Friedrich, Pia \* 1965, (Emeritus); PhD, 1946, University of Turin (Italy); pedagogy and twentieth-century Italian literature.

O'Neil, Mary R. \* 1983, (Adjunct); PhD, 1982, Stanford University; Renaissance/Reformation, early modern Europe.

Sbragia, Albert J. \* 1989; PhD, 1988, University of California (Berkeley); modern and contemporary Italian literature and cinema, Italian fascism, Rome.

Wortley, W. Victor \* 1965, (Emeritus); PhD, 1964, University of Oregon; seventeenth-century French theatre and prose (nonfiction).

### Assistant Professors

Collins, Jeffrey L. \* 1994, (Adjunct); MA, 1989, Yale University; MA, 1992, Cambridge University (UK); PhD, 1994, Yale University; European Baroque art and architecture with an emphasis on Italy; American material culture.

Jackson, Dianah Leigh \* 1998; PhD, 1999, University of Minnesota; body of Enlightenment culture and the epistolary novel, medical history of the 18th century.

Rubino, Nancy I. \* 1997; PhD, 1996, Columbia University; 19th-century French literature, modernism, history of medicine, French cinema.

Van Elslande, Jean-Pierre \* 1996; PhD, 1996, University of Geneva (Switzerland); seventeenth-century French literature and cultural history.

### Senior Lecturer

Yowell, Donna Lynne \* 1988; PhD, 1987, University of California (Berkeley); medieval Italian literature, Dante, Occitan lyric.

### Lecturers

Collins, H  l  ne V. 1984; PhD, 1995, University of Washington; French pedagogy and curriculum development, French cinema studies.

Leporace, Giuseppe 1987; MA, 1989, University of Washington; Italian pedagogy and translation.

Meyer, Hedwige M. 1988; MA, 1992, University of Washington; French pedagogy.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### French

**FRENCH 406 Advanced French Composition (5) VLPA** Extensive guidance in advanced French composition, emphasizing stylistics and grammar. Prerequisite: FRENCH 303.

**FRENCH 411 Topics in the Middle Ages (5) VLPA** Sixteenth-century literature with emphasis on poetry and the general artistic ambiance. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 412 Topics in Sixteenth Century French Literature (5) VLPA** An introduction to major French literary texts of the Sixteenth Century. Prerequisite: FRENCH 303; FRENCH 304.

**FRENCH 413 Topics in Seventeenth Century (5) VLPA** Seventeenth-century literature, with emphasis on the development of classicism. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 414 French Literature of the Eighteenth Century: Enlightenment (5) VLPA** Eighteenth-century literature, with emphasis on the development of the Enlightenment ideology. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 415 French Literature of the Eighteenth Century: Post-Enlightenment (5) VLPA** Eighteenth-century literature, with emphasis on the "dark side of the Enlightenment" and nascent romanticism. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 416 French Literature of the Nineteenth Century: Romanticism (5) VLPA** Nineteenth-century literature, with emphasis on romanticism and the early manifestations of realism. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 418 French Literature of the Early Twentieth Century (5) VLPA** Twentieth-century literature, with emphasis on the period 1900-1939. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 420 Interdisciplinary Approaches to Literature (5) VLPA** Interdisciplinary studies in French literature and culture, focusing on the complex interactions of literature and other disciplines, i.e. philosophy, psychoanalysis, anthropology, architecture. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 306.

**FRENCH 432 Critical Approaches to French Fiction (5) VLPA** Addresses theory and practice of fiction within the context of a given century or movement. Content varies. Prerequisite: FRENCH 303.

**FRENCH 435 Topics in Non-Fiction (5) VLPA** Content varies. Prerequisite: FRENCH 303.

**FRENCH 441 Québécois Literature (5) VLPA** Readings of novels, plays, and occasionally, poetry. Special attention paid to how Québécois authors represent in their works the complex socio-political reality of their culture. Conducted in French. French majors required to read and write in French; all others may read and write in English. Prerequisite: FRENCH 303; FRENCH 306. Offered: jointly with SCSA 441.

**FRENCH 445 Women Writers and Feminist Theory (5) VLPA** Focus on French women writers from different periods and places. Gender issues addressed in critical fashion, considering the different historical and ideological contexts in which each of the works were produced. Prerequisite: FRENCH 303.

**FRENCH 450 Themes in French Literature and Culture (5) VLPA** Interdisciplinary studies in French literature and culture, focusing on the construction and representation of gender roles in the French novel from the early eighteenth century. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 455 One Author in French Literature/Culture (5, max. 15) VLPA** In depth focus on the works of one author in French Literature or Culture. Prerequisite: FRENCH 303.

**FRENCH 458 French Art and Literature: Period Studies (5) VLPA** Comparative studies of theme and technique in art and literature to illustrate major concerns of a particular period as expressed in these two media. Recommended: background in French literature.

**FRENCH 470 Cinema (5) VLPA** Major films and figures of French cinema from the beginnings to the present. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

**FRENCH 481 Twentieth-Century French Novel in English (5) VLPA**

**FRENCH 486 Literature of the Enlightenment in English (5) VLPA**

**FRENCH 487 Nineteenth-Century Fiction in English (5) VLPA**

**FRENCH 488 Women in French Literature in English (5) VLPA** Masterpieces of French literature are read in an attempt to understand French attitudes toward women. From the sixteenth century, with a concentration on the twentieth century.

**FRENCH 490 Honors Seminar (2-5, max. 10) VLPA** Special studies in French literature. Required of candidates for honors and distinction in French.

**FRENCH 499 Special Topics (1-5, max. 10)** Topics to meet special needs. Prerequisite: FRENCH 303.

### Courses for Graduates Only

**FRENCH 510 Methodology of French Language Teaching (3)** Theoretical and practical foundation of teaching French. Major topics include modern theories of language and language acquisition which underlie modern methods of foreign language teaching, teaching techniques, testing, and classroom relations with emphasis on the multiple-approach direct method. Required for beginning French Teaching Assistants. Credit/no credit only.

**FRENCH 515 French Literature of the High Middle Ages (5, max. 10)** Old French literature, from the beginning to 1315. Prerequisite: permission of instructor.

**FRENCH 516 Middle French Literature (5, max. 10)** French literature from 1315 to 1500. Prerequisite: permission of instructor.

**FRENCH 520 Renaissance Prose: Rabelais (5)**

**FRENCH 523 Studies in Fiction: 1660-1800 (5, max. 10)**

**FRENCH 525 Studies in Fiction: 1850-1900 (5, max. 10)**

**FRENCH 526 Studies in Fiction: 1900-1950 (5, max. 10)**

**FRENCH 555 French Nonfiction (5, max. 10)**

**FRENCH 561 Studies in Seventeenth-Century Drama (5, max. 10)**

**FRENCH 565 Studies in French Drama (5, max. 10)** Studies in French drama, sixteenth to twentieth centuries.

**FRENCH 575 Literary Criticism (5)**

**FRENCH 576 Critical Methodology (5)** Basic scholarly tools of bibliography; historical review of literary doctrine; an introduction to critical methodology.

**FRENCH 577 Modern Critical Methods (5)** Modern critical methodology and theory.

**FRENCH 590 Special Seminar and Conference (1-10, max. 30)** Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of the graduate program coordinator.

**FRENCH 591 Literary Problems: Middle Ages (5, max. 10)**

**FRENCH 592 Literary Problems: Renaissance (5, max. 10)**

**FRENCH 593 Literary Problems: Seventeenth Century (5, max. 10)**

**FRENCH 594 Literary Problems: Eighteenth Century (5, max. 10)**

**FRENCH 595 Literary Problems: Nineteenth Century (5, max. 10)**

**FRENCH 596 Literary Problems: Twentieth Century (5, max. 10)**

**FRENCH 600 Independent Study or Research (\*)**

**FRENCH 700 Master's Thesis (\*)** Credit/no credit only.

**FRENCH 800 Doctoral Dissertation (\*)** Credit/no credit only.

### Italian

**ITAL 401 Medieval Italian Readings (5) VLPA** Exploration of medieval Italian cultural history through a broad variety of literary and other textual traditions.

**ITAL 402 Early Modern Italian Readings I (5) VLPA** Readings in Italian Quattro/Cinquecento, covering the period of the Renaissance.

**ITAL 403 Early Modern Italian Readings II (5) VLPA** Readings in Italian Sei/Settecento, covering the periods of Baroque and Enlightenment literature.

**ITAL 404 Modern Italian Readings I(5) VLPA** Readings in Italian Ottocento, covering the period of Romanticism. Prerequisite: ITAL 203.

**ITAL 405 Modern Italian Readings II (5) VLPA** Readings in Italian Novecento, covering the work of major Italian twentieth-century authors. Prerequisite: ITAL 203.

**ITAL 466 Italian Society in Cinema and Literature in Italian (5) VLPA/I&S** *Sbragia* Studies the evolution of Italian postwar society through the analysis of film and literature as well as critical, historical, and sociological readings. Offered in Italian.

**ITAL 475 Italian Fascism: Architecture and Power (5) VLPA/I&S** Fascism in Italy as studied within the broader European context of nationalism, imperialism, and modernization, with particular emphasis on the arts—literature, film, architecture, and urbanism. Offered: jointly with ART H 495; A.

**ITAL 480 Dante's Comedy in English (5) VLPA** Introduction to Dante's Comedy. Considers formal, structural, linguistic, literary, historical, cultural, philosophical, and theological issues raised by the text. Discusses the main currents of twentieth-century Dante criticism.

**ITAL 481 Dante's Comedy in English (5) VLPA** Second half of a two-quarter series. Close study of Dante's Purgatory and Paradiso and retrospective reading of Inferno. Explores Dante's concept of art, both human and divine, as it is developed in and defines the poem. Prerequisite: ITAL 480.

**ITAL 482 The Decameron in English (5) VLPA** An integral reading of the Decameron, with some consideration of its place in world literature and as an expression of the culture of its time.

**ITAL 490 Proseminar in Italian Literature (3-5) VLPA** Intended to help the student achieve a mature critical mastery of Italian literature.

**ITAL 499 Special Topics (1-5, max. 10)** Topics to meet special needs.

### Courses for Graduates Only

**ITAL 501 Medieval Italian Readings (5)** *Yowell* Exploration of medieval Italian cultural history through a broad variety of literary and other textual traditions.

**ITAL 502 Early Modern Italian Readings I (5)** Readings in Italian Quattro/Cinquecento over the period of the Renaissance. Covers major intellectual, literary, and cultural movements and figures of the period, including humanistic rediscovery of Graeco-Roman models, chivalric poems, comic theater.

**ITAL 503 Early Modern Italian Readings II (5)** *Scalabrini* Readings in Italian Sei/Settecento, covering the periods of Baroque and Enlightenment literature.

**ITAL 504 Modern Italian Readings I (5)** *Sbragia, Scalabrini* Readings in Italian Ottocento, covering the period of Romanticism.

**ITAL 505 Modern Italian Readings 2 (5)** *Sbragia, Scalabrini* Readings in Italian Novecento, covering the work of the major Italian twentieth-century authors.

**ITAL 514 Dante (5, max. 10)**

**ITAL 590 Special Seminar and Conference (1-10, max. 30)** Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of instructor.

**ITAL 596 Literary Problems: Twentieth Century (5, max. 10)**

**ITAL 600 Independent Study or Research (\*)**

## Spanish and Portuguese Studies

C104 Padelford

 Division Web page:  
[depts.washington.edu/spanport/](http://depts.washington.edu/spanport/)

### Graduate Program

Graduate Program Coordinator  
C104 Padelford, Box 354360  
(206) 543-2075

The Division of Spanish and Portuguese Studies offers programs of graduate study leading to the degrees of Master of Arts and Doctor of Philosophy.

The Master of Arts degree normally requires two years of course work and successful completion of a comprehensive examination.

The doctorate normally requires one to two years of course work beyond the M.A., successful completion of a series of comprehensive examinations, and a dissertation.

Information on specific requirements for the various degree programs is available upon request from the office of the division's academic counselor.

### Financial Aid

The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the ten weeks of the quarter.

### Faculty

#### Chair

Cynthia Steele

#### Professors

Anderson, Farris Furman \* 1967; MA, 1962, Duke University; PhD, 1968, University of Wisconsin; nineteenth- and twentieth-century Spanish literature and civilization, advanced Spanish grammar.

Hunn, Eugene S. \* 1972, (Adjunct); PhD, 1973, University of California (Berkeley); cognitive anthropology, ethnobiology, cultural ecology and evolution, Mexico, North American Indians.

Lawson, Victoria A. \* 1986, (Adjunct); PhD, 1986, Ohio State University; Latin America, critical development studies, feminist geography.

Steele, Cynthia \* 1986; PhD, 1980, University of California (San Diego); Latin American literature and cultural studies; Mexican literature, film, and photography.

#### Associate Professors

Deyoung, Terri L. \* 1991, (Adjunct); PhD, 1988, University of California (Berkeley); Arabic language and literature.

Flores, Lauro H. \* 1980; PhD, 1980, University of California (San Diego); Chicano literature, contemporary Latin American literature (narrative).

Geist, Anthony L. \* 1987; PhD, 1978, University of California (Berkeley); twentieth-century Spanish literature: ideology and literary form, cultural studies, film.

O'Hara, Edgar \* 1989; PhD, 1989, University of Texas (Austin); Spanish, Latin American poetry, writing poetry and essays.

Petersen, Suzanne Helen \* 1973; PhD, 1976, University of Wisconsin; medieval Spanish literature, oral poetry, pan-Hispanic ballad, medieval Spanish literature.

Shipley, George A. \* 1967; PhD, 1968, Harvard University; Spanish Golden Age.

Strozer, Judith R. \* 1987, (Adjunct); PhD, 1976, University of California (Los Angeles); comparative Romance syntax, second language acquisition, foreign language teaching.

Zagona, Karen T. \* 1987, (Adjunct); PhD, 1982, University of Washington; syntactic theory and Spanish syntax, tense, and aspect.

#### Assistant Professors

Fuchs, Barbara \* 1997, (Adjunct); PhD, 1997, Stanford University; early modern English and Spanish literature, literature and imperialism.

Santianez, Nil 1999; PhD, 1991, University of Illinois; naturalism and realism, modernism, 19th-century science fiction, theory of the novel.

#### Lecturers

Basdeo, Ganeshdath D. 1985; MA, 1976, University of Washington; second-year Spanish, Spanish linguistics.

Bensadon, Leon M. 1989; MA, 1991, University of Washington; French and Spanish pedagogy and curriculum development.

Borreguero, Paloma A. 1990; MA, 1992, University of Washington; Spanish language and culture, pedagogy and teaching methodology.

Fox, Joan H. 1984; MA, 1973, University of British Columbia (Canada); language pedagogy and translation.

Gillman, Maria 1990; MA, 1986, Oregon State University; third-year Spanish curriculum and pedagogy.

Marulanda, Sandra 1987; MA, 1989, University of Washington; language pedagogy, children's literature, translation.

Raneda-Cuartero, Immacula 1997; MA, 1994, University of Wisconsin; second- and third-year Spanish curriculum and pedagogy.

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

## Romance Languages and Literature

### Courses for Graduates Only

**ROMAN 596 Problems in Comparative Contemporary Literary Studies (5)** Seminar exploring contemporary literary thought through theoretical and/or creative literature. A selection of texts from at least two Romance languages and literary traditions. Prerequisite: competence in at least two Romance languages; completion of several upper division literature courses; some familiarity with critical methodologies.

**ROMAN 600 Independent Study or Research (\*)** Credit/no credit only.

**ROMAN 700 Master's Thesis (\*)** Credit/no credit only.

**ROMAN 800 Doctoral Dissertation (\*)** Credit/no credit only.

### Romanian

**RMN 401 Elementary Romanian (5)** Comprehensive introduction to spoken and literary Romanian. Offered: jointly with ROMN 401; A.

**RMN 402 Elementary Romanian (5)** Comprehensive introduction to spoken and literary Romanian. Prerequisite: RMN/ROMN 401. Offered: jointly with ROMN 402; W.

**RMN 403 Elementary Romanian (5)** Designed to increase vocabulary and enhance knowledge of grammar through readings in modern Romanian. Prerequisite: RMN/ROMN 402. Offered: jointly with ROMN 403; Sp.

**RMN 404 Advanced Romanian (5) VLPA** Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: RMN/ROMN 403. Offered: jointly with ROMN 404; A.

**RMN 405 Advanced Romanian (5) VLPA** Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: RMN/ROMN 404. Offered: jointly with ROMN 405; W.

**RMN 406 Advanced Romanian (5) VLPA** Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: RMN/ROMN 405. Offered: jointly with ROMN 406; Sp.

### Spanish

**SPAN 400 The Syntactic Structure of Spanish (5) VLPA** *Strozer, Zagona* Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 400.

**SPAN 401 The Morphological Structure of Spanish (5) VLPA** *Strozer, Zagona* Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 401.

**SPAN 402 The Phonological Structure of Spanish (5) VLPA** *Strozer, Zagona* Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 402.

**SPAN 403 The Evolution of the Spanish Language (5) VLPA** *Zagona* Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 403.

**SPAN 406 Advanced Spanish Grammar (5) VLPA** Problems of Spanish grammar. Differences from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: SPAN 303; SPAN 323. Offered: jointly with SPLING 406.

**SPAN 408 Spanish Translation Workshop (5) VLPA** Intensive practice in translation to and from Spanish. Texts include literary prose, poetry, expository writing, newspaper and magazine articles. Problems of standard versus colloquial language, transposition of cultural references, concept of fidelity in translation. Prerequisite: SPAN 303; SPAN 323; recommended: SPAN 406.

**SPAN 409 Spanish Phonetics (5) VLPA** Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish language in its modalities. Prerequisite: SPAN 301; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 409.

**SPAN 414 Spanish Literature: Eighteenth Century (5) VLPA** Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 415 Spanish Literature: Nineteenth Century (5) VLPA** Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 416 Spanish Literature: 1900-1936 (5) VLPA** Spanish literature of the twentieth century prior to the Civil War (1900-1936). Concentration on Generations of 1898 and 1927. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 417 Spanish Literature From 1940 to the Present (5) VLPA** Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 420 Spanish Poetry: Origins Through the Fifteenth Century (5) VLPA** Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 424 Hispanic Poetry (5) VLPA** Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 426 Hispanic Poetry (5) VLPA** Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 433 Golden Age Prose (5) VLPA** Representative, and outstanding, prose works of sixteenth- and seventeenth-century Spain. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 436 Spanish Novel of the Nineteenth Century (5) VLPA** Representative works of Galdos, Clarn, Pereda, Valera, and Blasco Ibanez. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 438 Spanish Novel: 1939 to the Present (5) VLPA** Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 439 Women Writers (5) VLPA/I&S** Feminist analysis of selected texts by Chicana/Latina writers in the United States as well as by Spanish-American, Luso-Brazilian and/or Spanish women writers in their specific socio-historical contexts. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 453 Cervantes and His Times (5) VLPA** Study of Cervantes and his moment in Spanish history, with special attention to his cultural and artistic environment. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 461 Cultural Background of Latin American Literature (5) VLPA** Survey of ideas and art forms and their relationship to literature in four periods: pre-Columbian, colonial, early independence, and twentieth century. Prerequisite: SPAN 303; SPAN 322; one additional 300-level course above SPAN 303.

**SPAN 462 Early Spanish Civilization (5) I&S/VLPA** Development of Spanish society and art forms from early times to 1700. Prerequisite: SPAN 303; SPAN 322; one additional 300-level course above SPAN 303.

**SPAN 463 Spanish Civilization Since 1700 (5) I&S/VLPA** Spanish civilization and its major artistic products since 1700. Major moments in the development of Spanish society and intellectual life as reflected in music, painting, and especially literature. Prerequisite: SPAN 303; SPAN 322; one additional 300-level course above SPAN 303.

**SPAN 465 Contemporary Chicano Literature (5) VLPA** Examination of one or more problems, themes, and/or figures in the developing body of Chicano literature. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 466 Chicano Literature: Fiction (5) VLPA** Nineteenth- and early twentieth-century fiction, as well as contemporary works, are examined in attempts to trace the development of Chicano fiction in the proper historical trajectory. Prerequisite: either SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 467 Spanish Women (5) VLPA/I&S** Women's culture in Spain, focusing on women's experience during Civil War; persecution and censorship of women activists, artists, intellectuals during Franco years; changes in women's culture brought about by reintroduction of democracy; major issues addressed by contemporary Spanish feminists. Prerequisite: SPAN 303; SPAN 322; one additional 300-level course above SPAN 303.

**SPAN 468 Latin American Women (5) VLPA/I&S** The elaboration of discourses of identity in relation to gender, ethnicity, social class, and nationality, by women writers from South America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women's experimental fiction. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303. Offered: jointly with WOMEN 468.

**SPAN 474 Latin American Fiction: Twentieth Century (5) VLPA** Study of prose fiction in Latin America in the twentieth century. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 475 Latin American Poetry: Colonial Through Nineteenth Century (5) VLPA** Poetic movements of the seventeenth, eighteenth, and nineteenth centuries in Spanish American, Renaissance, baroque, neoclassicism, romanticism, and modernism. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 476 Contemporary Latin American Poetry (5) VLPA** Evolution of Latin American poetry, from postmodernism and vanguardism to the most recent poetic expression. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 477 Latin American Essay (5) VLPA** Literary expression of ideas in Latin American countries, nineteenth and twentieth centuries. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 478 Modern Latin American Theater (5) VLPA** Study of the origin, development, and achievements of Latin American theater with an overview of its history prior to the twentieth century. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 480 Spanish Medieval Literature (5) VLPA** Principal literary works of the Spanish Middle Ages in the context of evolving intellectual, spiritual, and artistic climates of the period. Covers the evolution of narrative and lyric prose and verse in both their traditional and learned manifestations. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 481 Sixteenth- and Seventeenth-Century Spanish Literature (5) VLPA** Spanish literature of the sixteenth and seventeenth centuries. Close study of key texts from all genres as well as their socio-historical contexts. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 482 Eighteenth- through Twentieth-Century Spanish Literature (5) VLPA** Survey of Spanish literature since 1700, and its historical context. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 483 Latin American Literature: Origins to Independence (5) VLPA** The elaboration of discourses of legitimization by the Spanish conquistadores, and of resistance and accommodation by native and mestizo peoples; the development of a New World Baroque aesthetic; literatures of independence from Spain and of nation-building. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 484 Latin American Literature: Modernismo to the Present (5) VLPA** Principal literary movements of Latin America, late nineteenth century to the present, with particular emphasis on poetry and narrative: modernismo, postmodernismo, the vanguard, nueva and novísima narrativa. Includes essays and autobiographical writings to help place the literary works in socio-historical perspective. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 485 Cultural Studies of Latin America (5) VLPA/I&S** Identity, representation, and transculturation in Latin American popular culture. Topics vary but may include cinema, folk art, and historical, ethnographic, and travel writing. Prerequisite: SPAN 303; SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SISLA 485.

**SPAN 486 Photography and Cultural Studies in Latin America (5) VLPA/I&S** Interdisciplinary exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Offered jointly with SISLA 486.

**SPAN 487 Mexican Cinema (5) VLPA, I&S Steele** Analysis of representative films about post-revolutionary Mexico by directors from both the Golden Age of Mexican Cinema (1940-1960) and the Mexican New Film movement (1975-the present). Revolutionary nationalism, modernization and its discontents; construction of gender, class and ethnicity; migration and globalization. Prerequisite: SPAN 303; SPAN 322 and one additional 300-level course beyond 303.

**SPAN 490 Honors Seminar (2-5, max. 10) VLPA** Special studies in Spanish literature. Required of candidates for Honors and Distinction in Spanish.

**SPAN 491 Individual Authors and Special Topics in Spanish Literature (5, max. 10) VLPA** Focus on an individual Spanish author or a special problem in Spanish literature. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303.

**SPAN 493 Foreign Study (2-10, max. 20) VLPA** Advanced study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisite: SPAN 303; one additional 300-level course above SPAN 303.

**SPAN 495 Study in Spain (12) VLPA** Study in Spain. Course content varies from year to year. Consult the Division of Spanish and Portuguese for availability and further requirements.

**SPAN 499 Special Topics (1-5, max. 10)** Topics to meet special needs.

### Courses for Graduates Only

**SPAN 510 Methodology of Spanish Language Teaching (3) *Borneguero*** Theoretical and practical foundation for teaching Spanish. Major topics include modern theories of language and language acquisition which underlie modern methods of foreign language teaching, teaching techniques, testing, classroom relations. Emphasis on the multiple-approach direct method. Required for beginning Spanish Teaching Assistants. Credit/no credit only.

**SPAN 561 Spanish-American Novel From 1940 to the Present (5)**

**SPAN 571 The Modern Essay in Spanish America (5)**

**SPAN 572 Twentieth-Century Spanish Poetry (5, max. 10)**

**SPAN 573 Twentieth-Century Spanish-American Poetry (5, max. 10)**

**SPAN 577 Contemporary Literary Theory (5)** Introduction to various structuralist and poststructuralist theories of literary analysis, including those developed by Hispanic theorists, and their application to the study of texts from the Spanish and Latin American traditions.

**SPAN 590 Special Seminar and Conference (1-10, max. 30)** Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of the graduate program coordinator.

**SPAN 591 Literary Problems: Middle Ages (5, max. 10)**

**SPAN 592 Literary Problems: Renaissance (5, max. 10)**

**SPAN 593 Literary Problems: Golden Age (5, max. 10)**

**SPAN 594 Literary Problems: Eighteenth Century (5, max. 10)**

**SPAN 595 Literary Problems: Nineteenth Century (5, max. 10)**

**SPAN 596 Literary Problems: Twentieth Century (5, max. 10)**

**SPAN 597 Literary Problems: Spanish-American Colonial Literature (5, max. 10)**

**SPAN 598 Literary Problems: Latin America (5, max. 10)**

**SPAN 600 Independent Study or Research (\*)**

**SPAN 700 Master's Thesis (\*)** Credit/no credit only.

**SPAN 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Scandinavian Studies

318 Raitt

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/scandinavian.html](http://www.washington.edu/students/genocat/academic/scandinavian.html)

Department Web page:  
[depts.washington.edu/scand/](http://depts.washington.edu/scand/)

The Department of Scandinavian Studies is concerned with the study of languages, literature, history, politics, and cultures of Denmark, Finland, Iceland, Norway, Sweden, and the Baltic States of Estonia, Latvia, and Lithuania. Emphasis is placed both on contemporary literature and culture and on historical development. Although most courses designed for majors are taught in the original languages, a broad spectrum of courses designed primarily for nonmajors is offered in English. Graduate seminars require considerable reading in the Scandinavian languages.

## Graduate Program

Graduate Program Coordinator  
318 Raitt, Box 353420  
(206) 543-0645  
[uwscand@u.washington.edu](mailto:uwscand@u.washington.edu)

The Department of Scandinavian Studies offers graduate programs of study leading to the Master of Arts and Doctor of Philosophy degrees. For the M.A. degree, the emphasis may be placed on Old Icelandic (Old Norse), Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies. Ph.D. degree aspirants must complete one year's study of Old Icelandic and concentrate their studies primarily within one of four areas: Danish language and literature, Finnish language and literature, Norwegian language and literature, Swedish language and literature, or Scandinavian philology and linguistics.

For the graduate student, the programs in Scandinavian languages and literature open several areas of study: medieval, with extensive study of Old Scandinavian languages and literature, particularly Old Icelandic; modern, including the eighteenth century, romanticism, the modern breakthrough, and the twentieth century. Attention is paid to the history of the Scandinavian languages, prose fiction, drama, and poetry. Opportunities for supervised study and specialization also exist in such areas as Scandinavian history, politics, mythology, and folklore. There are also opportunities for comparative-literature study.

### Master of Arts

For the M.A. degree, two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

1. An emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of literary history, critical theory and text analysis, plus study of one secondary area.
2. An emphasis on Scandinavian area studies includes the study of Scandinavian folklore, mythology, history, politics, and society, with an emphasis in one of these areas.

*Admission Requirement:* Bachelor of Arts degree with major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background.

*Graduation Requirements:* Minimum of 40 credits in courses or seminars in Scandinavian and related subjects approved by the department, of which at least 20 credits must be in courses numbered 500 and above; reading knowledge of French or German (another non-Scandinavian language may be substituted with faculty approval); written and oral examination; option between thesis and non-thesis program. Candidates in Scandinavian languages and literature must satisfy the departmental requirements in Old Icelandic.

### Doctor of Philosophy

For the Ph.D. degree, the student concentrates primarily on one of two areas: Scandinavian languages and literature, or Scandinavian philology and linguistics, with an emphasis on the student's chosen target language. Major attention is given to the history of the Scandinavian languages, literary history and theory, and genre study. Opportunities for graduate work also exist in such areas as Scandinavian history, politics, mythology, and folklore.

*Admission Requirement:* Master of Arts degree with major in Scandinavian languages and literature or equivalent background.

*Graduation Requirements:* 40 credits beyond the master's degree in courses or seminars in Scandinavian languages and literature and related subjects approved by the department, one year's study of Old Icelandic, a reading knowledge of French and German (other non-Scandinavian languages may be substituted with faculty approval), General Examination for admission to candidacy, 27 credits of SCAND 800 (dissertation) taken over at least three quarters, and a Final Examination on the dissertation.

### Financial Aid

Teaching assistantships in Danish, Finnish, Norwegian, Swedish, and Scandinavian Area Studies are usually available, as well as occasional research assistantships. If funding allows, a Baltic-language teaching assistantship may be available.

## Faculty

### Chair

Terje I. Leiren

### Professors

Rossel, Sven H. \* 1974, (Affiliate); PhD, 1968, University of Copenhagen (Denmark); Danish language and literature, medieval literature; European preromanticism, romanticism, symbolism.

Steene, Birgitta \* 1973, (Emeritus); PhD, 1960, University of Washington; Scandinavian drama and film, children's literature, comparative literature.

### Associate Professors

Conroy, Patricia L. \* 1972; PhD, 1974, University of California (Berkeley); Scandinavian philology, Icelandic language and literature, Danish, Faroese.

Dubois, Thomas A. \* 1990; PhD, 1990, University of Pennsylvania; Nordic folklore and mythology, Finnish, Sami.

Gavel Adams, Ann-Charlotte \* 1986; PhD, 1990, University of Washington; August Strindberg, Scandinavian women's literature, Scandinavian turn-of-the-century drama and art.

Ingebritsen, Christine \* 1992; PhD, 1993, Cornell University; politics, international political economy, European integration, environmental policy.

Leiren, Terje I. \* 1977; PhD, 1978, North Texas State University; Scandinavian history, nationalism, immigration, ethnicity, Norwegian languages.

Remley, Paul G. \* 1988, (Adjunct); PhD, 1990, Columbia University; Old and Middle English, medieval languages and literatures, critical theory.

Sehmsdorf, Henning K. \* 1967, (Emeritus); PhD, 1968, University of Chicago; folklore and mythology, Norwegian language and literature, comparative literature.

Sjavik, Jan \* 1978; PhD, 1979, Harvard University; Norwegian languages and literature, prose fiction, critical theory.

Stecher Hansen, Marianne T \* 1988; MA, 1981, University of Washington; PhD, 1990, University of California (Berkeley); Danish language and literature, Scandinavian literature.

Warme, Lars G. \* 1975, (Emeritus); PhD, 1974, University of California (Berkeley); Swedish language and literature, Scandinavian novel, comparative literature.

### Senior Lecturer

Brandl, Klaus K. \* 1991; PhD, 1991, University of Texas (Austin); foreign language pedagogy, computer-assisted language learning, applied linguistics.

### Lecturers

Dubois, Ia G. 1989; PhD, 1991, University of Washington; Swedish language and literature, ethnicity.

Smidchens, Guntis I. 1993; PhD, 1996, Indiana University; Estonian, Latvian, and Lithuanian languages and literatures; Baltic studies; folklore.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### Danish

**DANISH 490 Supervised Reading (\* max. 10)** Readings in a selected area of Danish language, literature, or related fields.

### Estonian

**ESTO 490 Supervised Reading (1-10)** Readings in a selected area of Estonian language, culture, or society.

### Finnish

**FINN 490 Supervised Reading (1-5, max. 10)** Readings in a selected area of Finnish language, culture, or society.

### Latvian

**LATV 490 Supervised Reading (1-10, max. 10)** Readings in a selected area of Latvian language, culture, or society.

### Lithuanian

**LITH 490 Supervised Reading (1-10, max. 10)** Readings in a selected area of Lithuanian language, culture, or society.

### Norwegian

**NORW 490 Supervised Reading (\* max. 10)** Readings in a selected area of Norwegian language, literature, or related fields.

## Swedish

**SWED 490 Supervised Reading (\* max. 12)** Readings in a selected area of Swedish language, literature, or related fields.

## Scandinavian

**SCAND 427 Scandinavian Women Writers in English Translation (5) VLPA** Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present with focus on feminist issues in literary criticism. Offered: jointly with WOMEN 429.

**SCAND 431 The Northern European Ballad (5) VLPA** Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, theory, genre classification, and interpretive approaches. Offered: jointly with C LIT 431.

**SCAND 437 Politics in Scandinavia (5) I&S** Twentieth-century politics in Scandinavia. How Scandinavian countries have been governed. Costs and consequences of their governmental style and its uncertain future. Optimal size of polities, problems of mature welfare states, process of leadership and representation in multiparty systems, decline of political parties. Offered: jointly with POL S 437.

**SCAND 460 History of the Scandinavian Languages (5) VLPA** Development of languages from common Scandinavian to contemporary Danish, Norwegian, Swedish, Faroese, and Icelandic. Recommended: DANISH 203, FINN 203, NORW 203, or SWED 203.

**SCAND 462 Isak Dinesen and Karen Blixen (5) VLPA** The fiction of Isak Dinesen (pseudonym for Karen Blixen) reevaluated in light of current issues in literary criticism, particularly feminist criticism. Close readings of selected tales, essays, and criticism. Offered: jointly with WOMEN 462.

**SCAND 481 August Strindberg and European Cultural History (5) I&S/VLPA** Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and history of ideas from 1880 to 1912, and Strindberg's influence on 20th-century drama and film. Offered: jointly with EURO 481.

**SCAND 490 Special Topics (1-5, max. 15)** Special topics in Scandinavian art, literature, culture, and history. Course offerings based on instructor's specialty and student demand.

**SCAND 498 Senior Essay (5) VLPA** Undergraduate research and the writing of a senior essay in Scandinavian area studies.

**SCAND 499 Independent Study or Research (1-5, max. 10)** Independent study or research in Scandinavian area studies. May be done in a Scandinavian language or in English.

## Courses for Graduates Only

**SCAND 500 Introductory Readings in Old Icelandic (5)** Systematic study of the grammatical structure of Old Icelandic and the reading of several short prose works.

**SCAND 501 Old Icelandic Language and Literature (5)** Reading of a major work in Old Icelandic literature as a vehicle for discussions about literary history and genre, narrative, and rhetorical strategies.

**SCAND 503 Methods of Scandinavian Studies (5)** Introduction to Scandinavian studies on the graduate level with emphasis on Scandinavian literature, folklore, history, and politics.

**SCAND 504 Contemporary Literary Theory (5)** Contemporary literary theory and its application to Scandinavian texts. Prerequisite: graduate student standing or permission of instructor.

**SCAND 505 Topics in Scandinavian Drama and Film (5, max. 15)** Seminar on a selected topic in Scandinavian drama or film, such as an author (Holberg, Ibsen, Strindberg, Bergman), a period, a genre, or a movement.

**SCAND 508 Topics in Scandinavian Prose (5, max. 15)** Seminar on various topics in Scandinavian prose, including shorter prose texts, as well as a selection of the significant novels of the nineteenth and twentieth centuries.

**SCAND 518 Foreign Language Teaching Methodology (2)** Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with ASIAN 518/GERMAN 518/NEAR E 518/SCAND 518/SLAV 518.

**SCAND 519 Modern Scandinavian Politics (5)** Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with POL S 519.

**SCAND 520 Topics in Scandinavian Poetry (5, max. 15)** Seminar on selected periods of Scandinavian poetry: romanticism, symbolism, modernism, and contemporary poetry. Poetry examined in relation to the literary canon of each country and to Scandinavian literature as a whole. International influences also discussed.

**SCAND 533 Interdisciplinary Approaches to Community in Scandinavia (5)** Humanistic examination of community creation, maintenance, and change in the Nordic region. Examples drawn from folklore, literature, activism, popular culture, history. Focus on issues of gender, belief, and art in relation to community. Coursework includes both individual and collaborative assignments.

**SCAND 590 Special Topics in Scandinavian Literature (1-5, max. 15)**

**SCAND 595 Teaching Assistant Workshop (1)** Focuses on topics in language pedagogy. Required for teaching assistants in Scandinavian languages. Required for all teaching assistants. Credit/no credit only.

**SCAND 600 Independent Study or Research (\*)** Prerequisite: permission of instructor.

**SCAND 700 Master's Thesis (\*)**

**SCAND 800 Doctoral Dissertation (\*)**

## Slavic Languages and Literatures

M253 Smith

General Catalog Web page:  
[www.washington.edu/students/genca/academic/slavic.html](http://www.washington.edu/students/genca/academic/slavic.html)

Department Web page:  
[depts.washington.edu/slavweb/](http://depts.washington.edu/slavweb/)

The Department of Slavic Languages and Literatures offers instruction in the principal East European languages and literatures and in Slavic linguistics, working closely with the School of International Studies. Languages may include Bulgarian, Czech, Polish, Romanian, Russian, Croatian/Serbian, and Ukrainian.

## Graduate Program

Graduate Program Coordinator  
M264 Smith, Box 353580  
(206) 543-6848

The Department of Slavic Languages and Literatures offers a complete program of courses and seminars leading to the Master of Arts and Doctor of Philosophy degrees in Russian and East European languages, literatures, and cultures. Languages taught in the department include Czech, Old Church Slavonic, Polish, Russian, and Croatian/Serbian.

The graduate program is organized to permit completion of the master's degree in four to six quarters and the doctoral degree in three additional years. The duration of each program, however, will depend on the extent of the student's preparation upon entrance into the program.

### Research Facilities

The Suzzallo Library holdings include some 200,000 titles in the languages of Eastern Europe. While the majority of these titles are in Russian, the collection is well provided with resources in Bulgarian, Czech, Hungarian, Polish, Romanian, and Croatian/Serbian languages and literatures.

### Admission Qualifications

*For the Master of Arts Program:* Bachelor of Arts degree with major in Russian or Eastern European languages and literatures, or equivalent background.

*For the Doctor of Philosophy Program:* Master of Arts degree with major in Slavic Languages, Literatures, and Cultures.

### Assistantship Opportunities

The department regularly offers a number of teaching assistantships. In conjunction with the Henry M. Jackson School of International Studies, students in the department are eligible for several other types of fellowships.

## Faculty

### Chair

Jack V. Haney

### Professors

Augerot, James E. \* 1960; MA, 1959, New Mexico Highlands University; PhD, 1968, University of Washington; Slavic linguistics, Romanian, Bulgarian.

Diment, Galya \* 1989; MA, 1978, Claremont Graduate School; PhD, 1987, University of California (Berkeley); nineteenth/twentieth-century Russian literature, comparative literature, modernism, cultural studies.

Haney, Jack V. \* 1965; DPhil, 1970, Oxford University (UK); medieval Russian literature, Slavic folklore.

Kapetanic, Davor \* 1972, (Emeritus); MA, 1954, PhD, 1972, University of Zagreb (Yugoslavia); Yugoslav literature, Slavic literary theory.

Kramer, Karl D. \* 1970; MA, 1957, PhD, 1964, University of Washington; Russian and comparative literature.

Micklesen, Lew R. \* 1966, (Emeritus); PhD, 1951, Harvard University; Slavic linguistics.

### Associate Professors

Coats, Herbert S. \* 1968; MA, 1964, Fordham University; PhD, 1970, University of Illinois; Slavic linguistics.

Dziwirek, Katarzyna A. \* 1993; MA, 1984, University of Illinois; MA, 1985, University of Lodz (Poland); PhD, 1991, University of California (San Diego); linguistics, Polish syntax, and typology.

West, James D. \* 1972; PhD, 1970, Cambridge University (UK); modern Russian literature, art and philosophy.

### Assistant Professor

Crnkovic, Gordana \* 1993; MA, 1991, PhD, 1993, Stanford University; East European literature, film, former Yugoslavia, theory, American literature, comparative literature.

### Senior Lecturer

Polack, Zoya M. 1973; MA, 1975, University of Washington; Russian and Ukrainian languages.

### Lecturer

Boyle, Eloise M. 1995; MA, 1983, PhD, 1988, Ohio State University; twentieth-century Russian literature, pedagogy, teaching methodology.

## Course Descriptions

*See page 39 for an explanation of course numbers, symbols, and abbreviations.*

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

### Bulgarian

**BULGR 401 Elementary Bulgarian (5)** Introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. Offered: A.

**BULGR 402 Elementary Bulgarian (5)** Introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. Prerequisite: BULGR 401. Offered: W.

**BULGR 403 Elementary Bulgarian (5)** Reading of modern texts to increase command of grammar and vocabulary. Prerequisite: BULGR 402. Offered: Sp.

**BULGR 404 Advanced Bulgarian (5) VLPA** Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 403. Offered: A.

**BULGR 405 Advanced Bulgarian (5) VLPA** Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 404. Offered: W.

**BULGR 406 Advanced Bulgarian (5) VLPA** Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 405. Offered: Sp.

### Croatian-Serbian

**CR SB 401 Elementary Croatian/Serbian (5)** Comprehensive introduction to spoken and written literary Croatian and Serbian. Offered: A.

**CR SB 402 Elementary Croatian/Serbian (5)** Comprehensive introduction to spoken and written literary Croatian and Serbian. Prerequisite: CR SB 401. Offered: W.

**CR SB 403 Elementary Croatian/Serbian (5)** Comprehensive introduction to spoken and written literary Croatian and Serbian. Prerequisite: CR SB 402. Offered: Sp.

### CR SB 404 Advanced Croatian/Serbian (5) VLPA

Continuation of 401, 402, 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories both Croatian and Serbian. Prerequisite: CR SB 403. Offered: A.

### CR SB 405 Advanced Croatian/Serbian (5) VLPA

Continuation of 401, 402, 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories both Croatian and Serbian. Prerequisite: CR SB 404. Offered: W.

### CR SB 406 Advanced Croatian/Serbian (5) VLPA

Continuation of 401, 402, 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories both Croatian and Serbian. Prerequisite: CR SB 405. Offered: Sp.

### CR SB 420 Drawn from the Fire: Literature of the Former Yugoslavia in English (5) VLPA

Twentieth-century prose of the former Yugoslavia. Cultural identity at the crossroads between East and West. Relation of Yugoslav literature, created on the European margin, to the European cultural centers. Literature and the myths of socialism and nationalism. Yugoslav oral tradition. Issues of gender.

### Czech

**CZECH 401 Elementary Czech (5)** Introduction to spoken and written Czech. Offered: A.

**CZECH 402 Elementary Czech (5)** Introduction to spoken and written Czech. Prerequisite: CZECH 401. Offered: W.

**CZECH 403 Elementary Czech (5)** Modern Czech prose, leading to a command of the language as a research tool and providing an adequate basis for further study. Prerequisite: CZECH 402. Offered: Sp.

**CZECH 404 Advanced Czech (5) VLPA** Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: 403. Offered: A.

**CZECH 405 Advanced Czech (5) VLPA** Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: 404. Offered: W.

**CZECH 406 Advanced Czech (5) VLPA** Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: 405. Offered: Sp.

### Polish

**POLSH 401 Elementary Polish (5)** Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. Offered: A.

**POLSH 402 Elementary Polish (5)** Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. Prerequisite: POLSH 401. Offered: W.

**POLSH 403 Elementary Polish (5)** Designed to enlarge general vocabulary by the reading of short texts selected from Polish authors of the nineteenth and twentieth centuries. Prerequisite: POLSH 402. Offered: Sp.

**POLSH 404 Advanced Polish (5) VLPA** Continuation of 401, 402, 403. Selected readings of the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: POLSH 403. Offered: A.

**POLSH 405 Advanced Polish (5) VLPA** Continuation of 401, 402, 403. Selected readings of the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: POLSH 404. Offered: W.

**POLSH 406 Advanced Polish (5) VLPA** Continuation of 401, 402, 403. Selected readings of the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: POLSH 405. Offered: Sp.

## Romanian

**ROMN 401 Elementary Romanian (5)** Comprehensive introduction to spoken and literary Romanian. Offered: jointly with RMN 401; A.

**ROMN 402 Elementary Romanian (5)** Comprehensive introduction to spoken and literary Romanian. Prerequisite: ROMN/RMN 401. Offered: jointly with RMN 402; W.

**ROMN 403 Elementary Romanian (5)** Designed to increase vocabulary and enhance knowledge of grammar through readings in modern Romanian. Prerequisite: ROMN/RMN 402. Offered: jointly with RMN 403; Sp.

**ROMN 404 Advanced Romanian (5) VLPA** Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: ROMN/RMN 403. Offered: jointly with RMN 404; A.

**ROMN 405 Advanced Romanian (5) VLPA** Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: ROMN/RMN 404. Offered: jointly with RMN 405; W.

**ROMN 406 Advanced Romanian (5) VLPA** Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: ROMN/RMN 405. Offered: jointly with RMN 406; Sp.

## Russian

**RUSS 401 Advanced Russian (5) VLPA** Class discussion, oral presentations, and composition, based on reading a variety of texts, both literary and non-literary. Advanced grammar. Translation one full course period per week. See credit note above. Prerequisite: either RUSS 303 or RUSS 350. Offered: AWSp.

**RUSS 402 Advanced Russian (5) VLPA** Class discussion, oral presentations, and composition, based on reading a variety of texts, both literary and non-literary. Advanced grammar. Translation one full course period per week. See credit note above. Prerequisite: RUSS 401. Offered: AWSp.

**RUSS 403 Advanced Russian (5) VLPA** Class discussion, oral presentations, and composition, based on reading a variety of texts, both literary and non-literary. Advanced grammar. Translation one full course period per week. See credit note above. Prerequisite: RUSS 402. Offered: AWSp.

**RUSS 420 Topics in Russian Literary and Cultural History (5, max. 20) VLPA** A special topic in the literary and cultural history of Russia. Topics vary.

**RUSS 421 Post-Soviet Literary and Cultural Scene (5, max. 15) VLPA** Russian literature of the second half of the twentieth century. In English.

**RUSS 430 Major Authors (5, max. 15) VLPA** Major Russian writers of the nineteenth and twentieth centuries. Among authors read are Pushkin, Gogol, Lermontov, Turgenev, Tolstoy, Dostoevsky, Chekhov, Babel, If and Petrov, Olesha. Content varies.

**RUSS 450 Intensive Fourth-Year Russian (15) VLPA** Covers material of 401, 402, 403 in one quarter. Meets three hours daily. See credit note above. Prerequisite: either RUSS 303 or RUSS 350. Offered: S.

**RUSS 451 Structure of Russian (5) VLPA** Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and elementary principles of syntax. Prerequisite: either RUSS 303 or RUSS 350. Offered: A.

**RUSS 452 Structure of Russian (5) VLPA** Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and elementary principles of syntax. Prerequisite: RUSS 451. Offered: W.

**RUSS 461 Introduction to Russian Literature in Russian (5) VLPA** Analysis of original Russian literary texts representative of different varieties of Russian writing. Vocabulary of Russian literary analysis; typically Russian approaches to literature, some readings of secondary critical texts; discussion in Russian of passages studied. Prerequisite: RUSS 403 or RUSS 450.

**RUSS 463 Introduction to Russian Literature in Russian (5) VLPA** Analysis of original Russian literary texts representative of different varieties of Russian writing. Vocabulary of Russian literary analysis; typically Russian approaches to literature, some readings of secondary critical texts; discussion in Russian of passages studied. Prerequisite: either RUSS 403 or RUSS 450.

**RUSS 481 Russian Language in St. Petersburg (15) VLPA** Daily work in phonetics, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Prerequisite: either RUSS 403 or RUSS 450.

**RUSS 482 Research Project in St. Petersburg (12) VLPA** Supervised research in student's selected area of concentration, combined with language instruction tailored to the student's field. Successful completion of course requires a 15-page term paper in Russian. Prerequisite: either RUSS 403 or RUSS 450.

**RUSS 483 Russian Literature in St. Petersburg (5, max. 10) VLPA** Selection of courses on specialized topics in Russian literature; specific authors or periods. Prerequisite: either RUSS 403 or RUSS 450.

**RUSS 484 Russian History in St. Petersburg (5, max. 10) VLPA/I&S** Selection of courses on specialized topics in Russian political, economic, social, cultural, or art history. Prerequisite: either RUSS 403 or RUSS 450.

**RUSS 485 Economics in St. Petersburg (5, max. 10) VLPA/I&S** Selection of courses on topics relating to economic issues.

**RUSS 490 Studies in Russian Literature (3-5, max. 15) VLPA** In either Russian or English. Topics vary.

**RUSS 499 Directed Study or Research (1-5, max. 15)** Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literatures office. Offered: AWSpS.

## Courses for Graduates Only

**RUSS 501 Russian Language for Graduate Students (2, max. 10)** Develops skills of particular use to graduate students. Emphasis on rapid assimilation of variety of written materials with sophisticated understanding and maximum retention of vocabulary, and ability to discuss in Russian the more theoretical and abstract kinds of material. Prerequisite: RUSS 403 or equivalent and graduate standing in Russian, East European, and Central Asian Studies.

**RUSS 502 Russian Translation (3)** Introduction to the theory of translation; translation to and from Russian of selected prose passages in a variety of styles, with emphasis on idiomatic accuracy and stylistic compatibility. Prerequisite: two quarters of RUSS 501 or permission of instructor.

**RUSS 520 Seminar in Russian Poetry (5)** Topics in Russian poetry and poetry criticism to be selected by the instructor and students. Some emphasis on recent theoretical approaches to poetry criticism that are current in Russia and eastern Europe. For advanced MA and Ph.D. students. Offered: alternate years.

**RUSS 521 Russian Literature to 1800 (5)** Representative works of East Slavic, Muscovite, and Russian literature from the beginnings to 1800. Studies include a varied selection of primary texts. Intended as an introduction to the study of modern literature for beginning graduate students in Russian literature. Offered: alternate years.

**RUSS 522 Russian Literature of the Nineteenth Century (5)** Survey of nineteenth-century Russian poetry and prose. Representative works of Russia's major and minor authors, literary trends, and genres. Offered: alternate years.

**RUSS 523 Russian Literature of the Twentieth Century (5)** Survey of twentieth-century Russian poetry and prose. Pre-revolutionary, Soviet, and Émigré authors, trends, and genres. Includes survey of twentieth-century Literary Criticism as well, in particular Russian Formalists and Mikhail Bakhtin. Offered: alternate years.

**RUSS 526 Literary, Cultural, and Film Studies of the Post-Soviet Era (5, max. 15)** Contemporary post-Soviet literature and film. Topics include post-colonialism, gender, reflections of social upheavals, artistic experimentation, issues of commercialism in art, search for new cultural expressions and identity. Readings in both Russian and English. Offered: Sp.

**RUSS 542 Seminar in Contemporary Russian Poetry (5)** One specific problem or theme in contemporary Russian poetry, seen in its widest possible dimensions. Students must read, in Russian, the literary works involved and become familiar with the social, historical, and philosophical backgrounds that inspire them. Offered: alternate years.

**RUSS 543 Seminar in Contemporary Russian Prose (5)** Analysis of Russian prose fiction of the post-1917 period. Selected authors and topics. Offered: alternate years.

**RUSS 554 History of the Russian Literary Language (5)** Russian literary language from the eleventh through the twentieth centuries, with special attention to syntax and lexicon and to the development of notions of literary styles. Offered in Russian. Prerequisite: RUSS 555 or SLAV 565, or permission of instructor. Offered: alternate years.

**RUSS 570 Research Seminar in Russian Literature (5)** *Diment, Haney, Kramer, West* Working in consultation with a faculty adviser, students formulate a topic and prepare a 30-minute oral presentation to be delivered at the seminar and submit a written paper to be read and critiqued, by all participants.

**RUSS 577 Russian Folk Literature (5)** Analysis of representative works of the various genres of folk literature, including the byliny, skazki, historical and lyrical songs, and the spiritual stikhi.

**RUSS 600 Independent Study or Research (\*)**

### Ukrainian

**UKR 401 Elementary Ukrainian (5)** Introduction to spoken and written Ukrainian.

**UKR 402 Elementary Ukrainian (5)** Introduction to spoken and written Ukrainian.

**UKR 403 Elementary Ukrainian (5)** Introduction to spoken and written Ukrainian.

### Slavic

**SLAV 420 The Other Europe: Contemporary East European Fiction (5, max. 15) VLP** *Crnkovič* Contemporary fiction by Czech, East German, Hungarian, Polish, Baltic, and Balkan writers. Topics include: history of colonization, the imagination of social utopia, socialism and nationalism, everyday life under communism, cultural identity between East and West, experimental writing, new fiction in post-communist Eastern Europe. All readings in English.

**SLAV 423 East European Film (5) VLP** *Crnkovič* Survey of major East European film makers. Compares East European and Western production of those directors who worked partially in the West, e.g., Polanski, Forman, Holland, Makavejev. Topics include film in socialist versus market economy, politics, gender, sexuality.

**SLAV 425 Ways of Meaning: Universal and Culture Specific Aspects of Language (5) VLP/IA&S** *Dziwirek* Social and cultural conditioning of language use. Language as a mirror of culture and national character. Universal and culture/language specific components in linguistic expression of emotions, courtesy/politeness and rudeness, prejudice and (in)sensitivities, linguistic expression of gender differences in different cultures. Offered: Sp.

**SLAV 470 Special Topics in Slavic Linguistics (3-5, max. 15) VLP** *Augerot, Coats, Dziwirek* Special topics in Slavic linguistics. Course offerings based on instructor's specialty and student demand. Offered: AWSp.

**SLAV 490 Studies in Slavic Literatures (3-5, max. 15) VLP** Topics vary.

**SLAV 499 Directed Study or Research (1-5, max. 15)** Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literatures office. Prerequisite: permission of instructor and undergraduate adviser. Offered: AWSpS.

### Courses for Graduates Only

**SLAV 501 Using Slavic Resources (2)** Introduction to graduate studies in Slavic languages, literatures, and cultures. Discusses field of study and research materials and techniques employed.

**SLAV 518 Foreign Language Teaching Methodology (2)** *Brandl* Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with ASIAN 518/GERMAN 518/NEAR E 518/SCAND 518.

**SLAV 519 Slavic Language Pedagogy (3)** *Boyle* Introduction to current issues of foreign language pedagogy. Concentrates on the practical classroom application of methodological theory through lectures and micro-teaching presentation. Topics discussed and practiced include testing, proficiency teaching, teaching listening and reading skills, writing, teaching grammar, and computers. Offered: A.

**SLAV 520 Slavic Literary Theory (3)** *Crnkovič* Slavic and East European theoretical works and their place in contemporary theoretical landscape. Includes survey of Russian formalism, Czech structuralism, and Tartu school semiotics. Literary theory, film theory, cultural studies, feminist theory. Special emphasis on Mikhail Bakhtin.

**SLAV 550 Synchronic Slavic Linguistics (5)** Linguistic analysis of the phonology, morphology, and syntax of Russian and other Slavic languages. Investigation of current theological work in these areas.

**SLAV 551 The Introduction to the Study of Slavic Languages (5)** External and internal history of Slavic literary languages from the beginnings to the present time, including the development of writing systems, external attempts at reform, and the development of vocabulary.

**SLAV 560 Diachronic Slavic Linguistics (5)** Development of the phonological and morphological system of Common Slavic from Indo-European. Evolution of Russian and other modern Slavic languages from Common Slavic. Offered: A.

**SLAV 561 History of the East Slavic Languages (5)** Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the Ukrainian and Byelorussian literary languages. Prerequisite: SLAV 560. Offered: alternate years.

**SLAV 563 History of the South Slavic Languages (5)** Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the South Slavic languages. Prerequisite: SLAV 560.

**SLAV 565 Old Church Slavic (4)** Rise and development of earliest Slavic literary language and a descriptive study of its orthography, phonology, morphology, and syntax. Readings from normalized texts. Offered: alternate years.

**SLAV 566 Readings in Old Church Slavic (4)** Reading and grammatical interpretation of a selected group of canonical texts, as well as some examples of the various later recensions of Old Church Slavonic. Prerequisite: SLAV 555. Offered: alternate years.

**SLAV 570 Seminar on Slavic Linguistics (3)** Investigation and discussion of special topics in Slavic linguistics.

### Slavic Languages and Literatures

**SLAVIC 600 Independent Study or Research (\*)**

**SLAVIC 800 Doctoral Dissertation (\*)**

## Society and Justice

See Political Science.

## Sociology

202 Savery

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/Sociology.html](http://www.washington.edu/students/genocat/academic/Sociology.html)

Department Web page:  
[www.soc.washington.edu/soc.html](http://www.soc.washington.edu/soc.html)

The Department of Sociology has a strong commitment to research, publication, and training and is dedicated to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

## Graduate Program

Graduate Program Coordinator  
206 Savery, Box 353340  
(206) 543-5396  
[asksoc@u.washington.edu](mailto:asksoc@u.washington.edu)

Sociology seeks to explain social structure, social institutions, and social interaction. The department has graduate program specialization in demography and ecology, deviance and social control, race and ethnic relations, family systems, gender studies, macrosociology, organizations and occupations, quantitative research methodology, social psychology, sociological theory, and stratification.

Emphasis is on empirical research aimed at testing theories and generating new principles. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered in various methods: statistical, survey, computer, demographic and ecological, interaction observation, experimental, case study, field research, and historical. Students learn social research by participating in faculty projects or developing their own studies. Also available is an extensive program in training students to teach.

The graduate program aims at completion of the Master of Arts degree in two calendar years and the Doctor of Philosophy degree in three years beyond the M.A. degree, although not all students finish in this time. A thesis is required for the M.A. degree. For the Ph.D. degree, the student must be certified in general methodology and in a major and a minor substantive area, in addition to completing an approved dissertation.

### Special Requirements

Applicants for admission to the Master of Arts program are evaluated on undergraduate performance, Graduate Record Examination scores, statement of educational plans, recommendations, and samples of written work. For admission to the Ph.D. program, students are expected to have completed an M.A. degree in sociology in this department or elsewhere. Occasionally, M.A. degrees in other fields are accepted as a basis for admission to the Ph.D. program. The department encourages applications from minority students.

### Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

## Faculty

### Chair

Robert D. Crutchfield

### Professors

Barth, Ernest A. T. 1955, (Emeritus); PhD, 1955, University of North Carolina.

Borgatta, Edgar F. \* 1980, (Emeritus); PhD, 1952, New York University; methodology, social psychology, demography-ecology, aging.

Bridges, George S. \* 1982; PhD, 1979, University of Pennsylvania; deviance, social control, law, and legal institutions.

Burstein, Paul \* 1985; PhD, 1974, Harvard University; political sociology, social stratification, public policy, law.

Campbell, Frederick L. \* 1966; PhD, 1967, University of Michigan; population and ecology, social organization.

Chiro, Daniel \* 1974; PhD, 1973, Columbia University; political sociology, ethnic conflict.

Costner, Herbert L. \* 1959, (Emeritus); PhD, 1960, Indiana University; methodology, social change.

Crutchfield, Robert D. \* 1979; PhD, 1980, Vanderbilt University; deviance, criminology, social control, stratification.

Gillmore, Mary Louise 1977, (Adjunct); MS, 1970, University of Michigan; MA, 1977, PhD, 1983, University of Washington; adolescent sexuality and substance abuse.

Grembowski, David \* 1981, (Adjunct); MA, 1975, Washington State University; PhD, 1982, University of Washington; dental care demand, fluoridation, dental health services research.

Gross, Edward \* 1965, (Emeritus); PhD, 1949, University of Chicago; formal organizations, industrial sociology, symbolic interaction, sociology of law.

Guest, Avery \* 1972; MS, 1964, Columbia University; MA, 1967, PhD, 1970, University of Wisconsin; demography, ecology, stratification.

Hamilton, Gary G. \* 1993; PhD, 1975, University of Washington; economic sociology, historical comparative, organizational studies, East Asia.

Handcock, Mark S. 2000, (Acting); PhD, 1989, University of Chicago; spatial statistics.

Hechter, Michael N. \* 1999; PhD, 1972, Columbia University; political sociology, theory, rational choice.

Hirschman, Charles \* 1987; PhD, 1972, University of Wisconsin; demography, race and ethnic relations, social stratification, Southeast Asia.

Howard, Judith A. \* 1982; PhD, 1982, University of Wisconsin; social psychology, sociology of gender, intersections of race/class/gender/sexuality.

Kasaba, Resat \* 1985, (Adjunct); PhD, 1985, State University of New York (Binghamton); historical sociology, world systems, social change in the Middle East.

Lang, Kurt \* 1984, (Emeritus); PhD, 1953, University of Chicago; political and social effects of the media on mass communication.

Larsen, Otto \* 1958, (Emeritus); PhD, 1955, University of Washington; mass communications, public opinion, collective behavior.

Locke, Hubert G. \* 1976, (Adjunct); MA, 1962, University of Michigan; criminal justice, urban policy, race and ethnic relations, ethics and public policy.

Matsueda, Ross L. \* 1998; PhD, 1984, University of California (Santa Barbara); criminology, juvenile delinquency, deviance, quantitative methods.

Miyamoto, Frank 1941, (Emeritus); MA, 1938, University of Washington; PhD, 1950, University of Chicago; social psychology, collective behavior.

Raftery, Adrian Elmes \* 1985; Doct, 1980, Universite de Paris VI (France); time series, Bayesian statistics, spatial statistics, population estimation, model selection.

Schmitt, David R. \* 1968; PhD, 1963, Washington University; experimental social psychology, behavior analysis.

Schwartz, Pepper J. \* 1972; PhD, 1974, Yale University; family, gender, human sexuality, field methods.

Scott, Joseph W. \* 1985; PhD, 1963, Indiana University; political sociology, family sociology, race/ethnic relations.

Stark, Rodney \* 1971; PhD, 1971, University of California (Berkeley); scientific methods in theory and research, religion, deviance, prejudice, police.

Van Den Berghe, Pierre L. \* 1965, (Emeritus); PhD, 1960, Harvard University; comparative sociology, stratification, race and ethnic relations, kinship, sociology.

Wager, L. Wesley \* 1954, (Emeritus); PhD, 1959, University of Chicago; organizations/occupations, theory, culture.

Weis, Joseph G. \* 1974; DCrim, 1974, University of California (Berkeley); crime, delinquency, social control, deviance.

### Associate Professors

Brines, Julie E. \* 1993; PhD, 1990, Harvard University; gender, stratification, family, methods.

Friedman, Debra 1993, (Affiliate); PhD, 1983, University of Washington; political sociology, theory, education.

Herting, Jerald R. \* 1996, (Research); PhD, 1987, University of Washington; adolescent substance abuse and mental health, quantitative methods, social demography.

Kashima, Tetsuden \* 1976, (Adjunct); PhD, 1975, University of California (San Diego); Japanese American incarceration and social organization, sociology of race and ethnic relations.

Kiser, Edgar Vance \* 1988; PhD, 1987, University of Arizona; political sociology, theory, historical sociology.

Lavelly, William R. \* 1985; PhD, 1982, University of Michigan; social demography of China.

### Assistant Professors

Brewer, Devon 1996, (Affiliate); PhD, 1994, University of California (Irvine); social networks, research methodology.

Kim, Hyojoung \* 1998; PhD, 1995, University of Wisconsin; social movements, comparative historical analysis, social networks, rational choice.

Kuo, Hsiang-Hui D. \* 1996; PhD, 1995, University of Wisconsin; social stratification, life course and aging, quantitative methods, social demography.

Lepore, Paul C. \* 1997; PhD, 1997, University of Wisconsin; social psychology, sociology of education, social structure and personality, sociological methods.

Pettit, Elizabeth M. 1999; PhD, 1999, Princeton University; family, demography, stratification/mobility.

Pfaff, Steven J. 1999; PhD, 1999, New York University; comparative/historical sociology, theory, collective behavior/social movements.

Pitchford, Susan \* 1987; PhD, 1994, University of Washington; race and ethnic relations, social movements, comparative sociology.

Sunindyo, Saraswati \* 1993, (Adjunct); PhD, 1993, University of Wisconsin; feminism and nationalism, comparative women's movements, Southeast Asia.

Warren, John R. \* 1998; PhD, 1998, University of Wisconsin; social stratification and inequality, sociology of education, research methods.

### Senior Lecturer

Black, Albert W. \* 1972; MA, 1968, Wayne State University; PhD, 1976, University of California (Berkeley); race and ethnic relations, stratification, social movements, race and poverty.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**SOC 401 Special Topics in Sociology (5, max. 15) I&S** Selected topics of contemporary interest taught by a sociologist active in the field. Topics vary and may be substantive, theoretical, or methodological.

**SOC 410 History of Sociological Thought (5) I&S** Contributions of individual theorists (from Comte to the present); emphasis on cumulative development of concepts and principles, emergence of sociology as a science, probable future developments.

**SOC 411 Selected Topics in History of Sociological Thought (5) I&S** Specific areas or eras in the history of sociological thought. Emphasis on the development of sociological theory in relation to the intellectual and social setting of the time. Topics change from quarter to quarter. Some topics are: the development of concepts of order in sociological thought; conflict theories; the development of action theory in sociology; German sociology; Marx, Weber, and Simmel.

**SOC 416 Sociological Theory (5) I&S** *Kiser* Theories of individual action, social order, and institutional change. Cumulative development of solutions rather than on works of given theorists. Theories of social order. How sociological treatments of these issues compare with those offered by economists and other social scientists.

**SOC 419- Fieldwork: Observation and Interviewing (5-) I&S** *Becker* Perspective, logic, and techniques of qualitative social research and analysis. Nature and uses of intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies. Offered: W.

**SOC -420 Fieldwork: Observation and Interviewing (-5) I&S** *Becker* Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, qualitative data analysis (including applications of data base technology, problem reformulation, and techniques of visual documentation). Results of student work reported and discussed in class. Offered: Sp.

**SOC 424- Applied Social Statistics (3-) I&S** Applications of statistics in sociology and related social sciences. Emphasis on problems of analysis with imperfect data. Probability in statistical inference. Analysis of variance; contingency table analysis, nonparametric procedures; regression analysis in social research. Offered: W.

**SOC -425 Applied Social Statistics (-3) I&S** Applications of statistics in sociology and related social sciences. Emphasis on problems of analysis with imperfect data. Probability in statistical inference. Analysis of variance; contingency table analysis, nonparametric procedures; regression analysis in social research. Offered: Sp.

**SOC 428 Principles of Study Design (3) I&S** *Crutchfield, Guest* Study design from problem formulation to the analysis and interpretation of data. Offered: Sp.

**SOC 429 Practicum in Data Analysis (3) I&S** *Bridges, Crutchfield, Guest* Introduction to selected programs for data analysis and practice in their application. Practice in coordination research problem, data, and mode of analysis into a coherent, interrelated set. Interpretation of results. Offered: A.

**SOC 431 Fertility and Mortality (3) I&S** *Lavelly* Theories of fertility and mortality, demographic transitions, individual variations. Specific analytic approaches. Familiarity with basic fertility and mortality measures, and with the life table, is assumed.

**SOC 432 Population and Modernization (3) I&S** *Hirschman, Lavelly* Examines role of demographic factors in the process of social modernization and economic growth. The approach is both historical, focusing on populations of developed countries since 1700, and analytic, stressing the attempts made by different disciplines to model demographic relationships, with attention to less-developed regions. Offered: jointly with SIS 432.

**SOC 433 Research Methods in Demography (3) I&S** *Hirschman* Basic measures and models used in demographic research. Sources and quality of demographic data. Rate construction, standardization, the life table, stable population models, migration models, population estimation and projection, measures of concentration and dispersion, measures of family formation and dissolution.

**SOC 434 Demographic Issues in Asia (3-5) I&S** *Lavelly* Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. This seminar addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with SISEA 434.

**SOC 447 Social Movements (5) I&S** Social movements as collective attempts to change society: why people join; characteristics of successful and unsuccessful movements; consequences of social movement activities.

**SOC 450 Political Economy of Women and Family in the Third World (5) I&S** Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SIS 450.

**SOC 451 Theory and Process of Social Change (5) I&S** *Hamilton* Basic trends in economic and social development; comparative and historical analysis of social and economic changes; the rise of capitalist societies.

**SOC 456 Political Sociology (5) I&S** *Burstein* Relationships between social change and political change. Focus on selected issues, including social bases of democracy, political organization, elections, and consequences of public policy.

**SOC 457 Sociology of Religion (5) I&S** The relations between religion, polity, economy, and social structure; in particular, the political, economic, and social impact of religious beliefs and organizations, as well as the social determination of these beliefs and organizations; the rise of secularism, the rationalization of modern life, and the emergence of political quasi-religions.

**SOC 460 Social Differentiation (5) I&S** Analysis of societal organization based on sex, age, residence, occupation, community, class, caste, and race.

**SOC 461 Comparative Ethnic Race Relations in the Americas (5) I&S** *Scott* Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with AES 461.

**SOC 462 Comparative Race and Ethnic Relations (5) I&S** *Scott* Race and ethnicity as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with AES 462.

**SOC 465 Complex Organizations (5) I&S** *Hamilton* Examination of the structure of complex organizations. Attention to developing generalizations applicable to industrial organizations, businesses, hospitals, prisons, labor unions, governments, universities, armies, and similar formally instituted organizations. The major focus is on empirical research, with some attention to methodological problems in studying such organizations.

**SOC 466 Economic Sociology (5) I&S** *Hamilton, Reitman* Changing focus of field: cultural variation, work, and the worker; technology, society, and the evolution of industrial forms; types and forms of in-

dustrial organizations; industrial organizations as social and technical systems; issues of control, process, and change; the individual in social and technical systems.

**SOC 472 Juvenile Delinquency (5) I&S** *Crutchfield, Weis* Factors in delinquency, juvenile courts. Programs of treatment and prevention.

**SOC 473 Corrections (5) I&S** *Weis* Analyzes research on diversionary methods and treatment of convicted offenders. Emphasis on program evaluation. Community treatment, fines, restitution; probation, parole, halfway houses, and other alternatives to incarceration; correctional institutions. Organization of state and federal systems. Problems of administration. Subsidies and governmental control. Planning and public participation. Recommended: SOC 371; SOC 372. Offered: jointly with SO JU 473.

**SOC 481 Issues in Analytic Sociology (5, max. 15) I&S** Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

**SOC 483 Issues in Analytic Sociology (1-3, max. 9) I&S** Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

**SOC 485 Family Change in Western Europe and the United States (5) I&S** Investigates patterns of recent family change. Explores similarities and differences in family life between Western Europe and US as well as variations among countries and among population subgroups within countries. Focuses on differences and similarities in social, economic, political, and cultural environments. Offered: jointly with EURO 485.

**SOC 486 Human Family Systems: Biological and Social Aspects (5) I&S** Biological bases for human mating and reproduction, and an examination of the range of cross-cultural variability in human systems of kinship and marriage. Compares wide range of human and nonhuman species, and Western and non-Western human societies. Interplay of biological, ecological, and sociocultural factors in determining the structure and function of human family systems. Offered: jointly with ANTH 486.

**SOC 487 Sociology of Gender and Sexuality (5) I&S** Addresses the intersection of gender and sexuality in U.S. society, social institutions and movements, families, and the individual. Topics include the history of sexuality as practiced and politicized since colonial times, major theoretical approaches to sexuality, and how gender and other social status characteristics influence the meanings of sexuality.

**SOC 490 The Urban Underclass (5) I&S** Examines underlying issues which have led to the emergence and perpetuation of an underclass within an affluent society. Explores some of the consequences for these people and for this society. Considers policies that might be used to address problems of the urban underclass.

**SOC 491 Sociology of Science (5) I&S** *Becker* Sociological study of scientific activity. Social origins of scientific thought and practice, the organization of scientific work, and the process of change in science. Major theories in the area, including Merton, Kuhn, and Latour.

**SOC 492 Sociology of Education (5) I&S** *LePore* Emphasizes the ways in which schools and colleges reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Examines the structures, practices, content, and outcomes of schooling and its relationship to the wider society as well as the rise and dynamics of the modern education system.

**SOC 495 Honors Senior Thesis (1-5, max. 5) I&S** Preparation of senior honors thesis. Sociology majors only.

**SOC -497- Honors Senior Seminar (-[3/5]-) I&S** Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: W.

**SOC -498 Honors Senior Seminar (-[3/5]) I&S** Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: Sp.

**SOC 499 Undergraduate Independent Study or Research (2-5, max. 10)** Credit/no credit only.

## Courses for Graduates Only

**SOC 500 Teaching Sociology as a Teaching Assistant (1)** *Bridges* Techniques of quiz section administration, advising of students, and student evaluation important to successful teaching as a Teaching Assistant. Students develop presentations and classroom materials and develop and grade student examinations. Credit/no credit only. Prerequisite: admission to graduate program in sociology.

**SOC 501 Proseminar (3)** Introduction for first-year graduate students to substantive areas of sociology, research and information resources, and issues in graduate education and professional socialization. Credit/no credit only. Offered: A.

**SOC 502 Seminar on Teaching Sociology (3)** *Howard* Techniques of lecturing, leading discussion, evaluating student performance, and other pedagogical skills ancillary to successful teaching. Students develop a course and obtain videotaped feedback of presentations. Prerequisite: completion of MA. Offered: W.

**SOC 503 Seminar on Writing Social Science (3)** *Becker, Burstein, Howard* Techniques, skills, and strategies helpful for publishing in the social sciences. Includes writing and revision of own work and evaluation of the writing of other students. Also includes social scientific analysis of writing and other forms of academic communication. Prerequisite: completion of MA. Offered: A.

**SOC 510 Seminar in Sociological Theory (3)** *Kiser* Macrosociological theories; functionalism and neoevolutionism; conflict and consensus approach; comparative strategies; models and long-range theories; ideology and sociology. From Marx and de Tocqueville to contemporary literature. Offered: A.

**SOC 511 Classical Social Theory (3)** *Chirot* Study of classical masters of social theory: Marx, Durkheim, and Weber, their precursors, and their immediate successors.

**SOC 513 Demography and Ecology (3)** *Hirschman* Theories and research on human fertility, mortality, mobility, migration, and urbanization in social/economic context. Comparative and historical materials on Europe, the United States, and the Third World.

**SOC 514 Current Theories in Social Psychology (3)** *Howard, LePore, Schmitt* Broad graduate-level introduction to the theories in the field of social psychology.

**SOC 516 Organizations (3)** *Hamilton* Broad graduate-level introduction to the theory and research on complex organizations.

**SOC 517 Deviance and Social Control (3)** *Bridges, Crutchfield, Weis* Survey of current research on deviant behavior and mechanisms of social control; definitions and forms of deviant behavior, causal analysis, and legal or other methods of social control.

**SOC 518 Social Stratification (3)** *Burstein* Intensive preparation in theoretical, methodological, and substantive topics in social stratification.

**SOC 528 Seminar on Selected Statistical Problems in Social Research (3)** *Raftery* Prerequisite: SOC 426.

**SOC 529 Multiple Indicators in Social Measurement (3)** Repeated measures, alternate measures and multiple observers in estimating the reliability, assessing the validity, and analyzing conceptual and indicator problems in social measurement. Implications of measurement error for research conclusions. Prerequisite: SOC 424, SOC 426.

**SOC 535 Research Issues in Demography and Population Studies (1-2, max. 7)** Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Offered: AWP.

**SOC 536 Log-Linear Modeling and Logistic Regression for the Social Sciences (3)** *Raftery* Log-linear modeling of multidimensional contingency tables. Logistic regression. Applications to social mobility, educational opportunity, and assortative marriage. Applied and computing focus. Prerequisite: SOC 425 or STAT 395 or permission of instructor. Offered: jointly with STAT 536.

**SOC 539 Selected Topics in Demography and Ecology (3, max. 9)** Specialized problems in demography or ecology are covered; for example, migration, fertility, mortality, language, race and ethnic relations, metropolitan community. See quarterly announcement for specific problem to be covered.

**SOC 550 Changing Patterns of Family Organization (3)** *Schwartz* History of the family with emphasis on changes in European and American families since 1600. Concomitant changes in other institutions and their relation to changes in the family.

**SOC 551 Family and Gender Relations (3)** *Lye, Schwartz* Overview of major research findings on marriage, the family, and gender, including demographic trends, the place of children in society, courtship, the internal management of intimate relationships, divorce, and social policy.

**SOC 553 Seminar on Gender and Sexuality (3)** Research seminar considering theoretical and empirical approaches to sexuality, with particular attention to the importance of gender. Examines the social control of sexuality by the state and by families, as well as social meanings of sexuality within social movements related to various aspects of sexuality.

**SOC 554 Seminar in the Sociology of Religion (3)** Survey of significant and active areas of theory and research in contemporary social scientific studies of religion.

**SOC 555 Methods in Macro, Comparative, and Historical Sociology (3)** *Chiro, Reitman* Systems of conducting research with qualitative methods brought to bear on broad questions.

**SOC 556 The Evolution of the Family (3)** *van den Berghe* Biological evolution of species-specific behaviors and forms of sociality linked to human mating, reproduction, and parenting. Cultural evolution of human systems of kinship and marriage as fitness-maximizing adaptations to a wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Offered: jointly with ANTH 556.

**SOC 559 Seminar on Gender Roles (3)** *Brines, Howard* Broad graduate-level introduction to theoretical issues concerning gender and society. Current state of empirical knowledge on the sociology of gender and

strategies for research. Cross-cultural variations in conception of gender roles and how gender intersects with social institutions and social interactions.

**SOC 561 Society, Chronic Illness, and Disability (3)** *Hedrick* Definition and assessment of chronic illness, disability, and health status. Analysis of chronic illness and disability using frameworks from social sciences and public health. Dimensions of disablement as they affect provision of health services. Research on effectiveness of services and approaches to improvement. Prerequisite: permission of instructor. Offered: jointly with HSERV 580; Sp.

**SOC 562 Seminar in Comparative Race Relations (3)** *van den Berghe* Cross-cultural approach to race and ethnic relations, including case studies from Africa and Latin America. Prerequisite: graduate standing in social sciences.

**SOC 566 Seminar in Complex Organizations (3)** Special topic seminars in the field of complex organizations or industrial sociology.

**SOC 569 Demographic Studies of Stratification (3)** *Hirschman* Overview of development of models of socioeconomic achievement ("status attainment" paradigm) in the field of stratification. Begins with work of Blau and Duncan. Covers elaboration of basic models to include race and ethnicity, social psychological variables, class, school and labor market effects, and other structural variables. Prerequisite: SOC 513, SOC 518.

**SOC 574 Seminar in Methods of Criminological Research (3)** *Bridges, Weis* Provides training in the technical analysis of published research in criminology; designs and processes studies in parole prediction, prediction of prison adjustment, and prediction of treatment effect.

**SOC 581 Special Topics in Theory and the History of Sociological Thought (3, max. 9)** Examination of current topics in theory and the history of sociological thought. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 582 Special Topics in Research Methods and Statistical Analysis in Sociology (3, max. 9)** Examination of current topics in research methods and statistical analysis in sociology. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 584 Special Topics in Social Psychology (3, max. 9)** Examination of current substantive topics in social psychology. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 585 Special Topics in Marriage and Family (3, max. 9)** Examination of current substantive topics in marriage and the family. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 586 Special Topics in Organization and Industrial Sociology (3, max. 9)** *Reitman* Examination of current substantive topics in organizational and industrial sociology. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 587 Special Topics in Deviance and Social Control (3, max. 9)** Examination of current substantive topics in deviance and social control. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 588 Special Topics in Stratification and Race Relations (3, max. 9)** Examination of current substantive topics in stratification and race relations. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 589 Special Topics in Macrosociology (3, max. 9)** Examination of current substantive topics in macrosociology. Content varies according to recent developments in the field and the interests of the instructor.

**SOC 590 Special Topics in Sociology (3, max. 9)** Examination of current substantive topics in sociology. Content varies according to recent developments in the field and the interests of the instructor. Topics covered in courses with this number lie outside those covered by other special topics courses numbered 581 through 589.

**SOC 591 Political Sociology (3)** Introduction to political sociology, considering the rise of the modern state, power, political organization, social movements, and other related topics.

**SOC 600 Independent Study or Research (\*)** Credit/no credit only.

**SOC 700 Master's Thesis (\*)** Credit/no credit only.

**SOC 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Graduate Program

Graduate Program Coordinator  
205 Eagleson, Box 354875  
(206) 685-7400  
[sphscadv@u.washington.edu](mailto:sphscadv@u.washington.edu)

The Department of Speech and Hearing Sciences offers the Master of Science and Doctor of Philosophy degrees. The program consists of a wide range of course work and seminars providing opportunities for the development of scholarly and professional competence in various areas of specialization: language acquisition, phonetics, speech production, hearing, hearing development, psychoacoustics, physiological acoustics, speech perception, computer recognition and generation of speech, and human communication disorders related to language, speech, and hearing. At the master's level, the specific focus is on the clinical procedures involved in their identification, prevention, and remediation of communicative disorders. To complement departmental curricula in various specialization areas, close interdisciplinary relationships are maintained with other University departments and off-

campus centers. Advanced degrees in the speech and hearing sciences equip the student to do research, to teach at the college and university level, and to provide clinical services to the communicatively impaired.

### Special Requirements

Prospective candidates for advanced degrees are expected to have earned 50-60 credits in the speech and hearing sciences at the undergraduate level, depending upon the specific area of graduate specialization chosen. The M.S. degree is intended primarily for students who desire careers as speech-language pathologists and audiologists, but who may or may not continue study for the Ph.D. degree. Students complete the academic and practical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association. Students must also meet all Graduate School requirements for the master's degree. A thesis is optional. A non-clinical M.S. degree, requiring a thesis, may be designed as well. (Please contact the graduate program coordinator.) For the Ph.D. degree, individually tailored programs of study are developed to focus on specialized areas of interest within speech science, hearing science, experimental and clinical audiology, and speech/language pathology.

### Financial Aid

A number of teaching and research assistantships are available for qualified graduate students. In addition, the department has traineeships/fellowships supported by the National Institutes of Health and the Department of Veterans Affairs.

### Research Facilities

The department's research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Center on Human Development and Disability also provide laboratories to support basic and applied research in speech, language and hearing development and disorders, across the life span.

## Faculty

### Chair

Carol Stoel-Gammon

### Professors

Folsom, Richard C. \* 1976; PhD, 1979, University of Washington; pediatric audiology, auditory evoked potentials.

Gates, George A. 1993, (Adjunct); MD, 1959, University of Michigan; otology/neurotology, cochlear implantation.

Kuhl, Patricia K. \* 1976; MA, 1971, PhD, 1973, University of Minnesota; speech perception.

Meltzoff, Andrew N. \* 1977, (Adjunct); PhD, 1976, Oxford University (UK); cognitive and social development of human infants.

Miner, Adah L. 1965, (Emeritus); MA, 1948, University of Washington; PhD, 1962, University of Wisconsin; speech pathology, clinical supervision.

Minifie, Fred D. \* 1971, (Emeritus); PhD, 1963, University of Iowa; speech acoustics.

Olswang, Lesley B. \* 1977; PhD, 1978, University of Washington; language development and disorders/clinical processes.

Prins, David \* 1969, (Emeritus); PhD, 1961, University of Michigan; fluency disorders.

Stoel-Gammon, Carol \* 1983; PhD, 1974, Stanford University; developmental phonology and phonetics.

Thompson, Gary \* 1966, (Emeritus); PhD, 1967, University of Minnesota; pediatric audiology, clinical evaluation.

Thompson, Marie D. \* 1979, (Adjunct); PhD, 1970, University of Washington; special education (hearing impaired).

Werner, Lynne A. \* 1986; PhD, 1980, Loyola University (Chicago); auditory development, infant psychoacoustics.

Wilson, Wesley \* 1966, (Emeritus); PhD, 1969, University of Washington; audiology, infant assessment and aural rehabilitation.

Yantis, Phillip A. \* 1965, (Emeritus); PhD, 1955, University of Michigan; audiology, clinical evaluation.

Yorkston, Kathryn \* 1975, (Adjunct); PhD, 1975, University of Oregon; neurogenic communication disorders in adults.

### Associate Professors

Burns, Edward M. \* 1984; PhD, 1977, University of Minnesota; psychoacoustics.

Carpenter, Robert L. \* 1970; PhD, 1969, Northwestern University; language and language disorders.

Coggins, Truman E. \* 1974; PhD, 1976, University of Wisconsin; language disorders in children.

Cooker, Harry S. \* 1976, (Emeritus); PhD, 1963, University of Iowa; speech physiology.

Moore, Christopher A. \* 1995; MA, 1981, PhD, 1985, Purdue University; speech production, development, and physiology; acoustics, motor control, coordination.

Norton, Susan J. \* 1991, (Adjunct); PhD, 1982, University of Washington; normal and non-normal hearing, specifically cochlear mechanics, in humans and animals.

Rees, Thomas 1971, (Adjunct); MA, 1969, University of Redlands; PhD, 1972, University of Washington; audiology.

Reich, Alan R. \* 1977; PhD, 1975, University of Iowa; speech physiology and voice disorders.

Rogers, Margaret A. \* 1992; PhD, 1992, University of Iowa; spoken language production including semantics, phonology, and motor control; speech aphasia/apraxia.

Schwartz, Ilene Sharon \* 1991, (Adjunct); PhD, 1989, University of Kansas; early childhood, classroom-based interventions, and applied behavior analysis.

### Assistant Professors

Kujawa, Sharon Guilds 1997, (Adjunct); PhD, 1993, University of Arizona; audiology.

Souza, Pamela E. \* 1996; MS, 1992, PhD, 1996, Syracuse University; hearing aids, effects of sensorineural hearing loss on speech perception.

Tremblay, Kelly L. 1998; PhD, 1998, Northwestern University; hearing sciences, clinical audiology, evoked potentials, central auditory plasticity.

### Senior Lecturers

Alarcon, Nancy B. 1988; MS, 1981, University of Wisconsin; speech-language disorders/adult.

Labiak, James M. 1974; MA, 1971, University of Washington; audiologic evaluation/calibration.

Sanborn, E. Sue 1988; MA, 1967, PhD, 1971, University of Washington; clinical audiology/aural rehabilitation.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**SPHSC 405 Diagnosis of Speech and Language Disorders (3) NW** Principles and procedures for the diagnosis of speech and language disorders. Required for majors. Prerequisite: SPHSC 305. Offered: W.

**SPHSC 406 Treatment of Speech and Language Disorders (3) NW** Principles and procedures for planning, implementing, and evaluating treatment for speech and language disorders. Required for majors. Prerequisite: SPHSC 405. Offered: SpS.

**SPHSC 425 Speech, Language, and the Brain (5) NW** Historical perspectives and current research on speech acoustics, speech perception, and brain processing of speech information; speech development; techniques used in speech analysis; machine recognition of speech; brain imaging techniques, animal communication systems; speech evolution; implications for impaired populations. Offered: A.

**SPHSC 435 Forensic Acoustics: Courtroom Applications of Speech and Hearing Sciences (5) I&S/NW Reich** Forensic applications of speech and hearing sciences: audio tape enhancement; tape authentication; speech transcription; speech level and audibility; speaker identification; voice stress analysis; gunshot, aviation, microphone, and telephone sound analysis; train and emergency vehicle audibility; the judicial process; being an effective expert witness.

**SPHSC 445 Models of Speech Processing (3) NW** Examines models and basic issues concerning how spoken language is processed. Presents current issues, theories, and research relative to the levels of processing entailed in producing and comprehending speech. Required for majors; open to nonmajors. Recommended: SPHSC 302; SPHSC 303; SPHSC 320; SPHSC 425.

**SPHSC 449 Special Studies in Speech Pathology and Audiology (\* max. 30)** Selected special problems in speech pathology and audiology. Offered: S.

**SPHSC 454 Augmentative and Alternative Communication: Access for Technology (3) NW** Communication technology and motor evaluation of augmentative and alternative users. Issues related to hardware, software, switch placement and access, with opportunities for clinical trials. Recommended: SPHSC 453 or REHAB 458. Offered: jointly with REHAB 459.

**SPHSC 462 Hearing Development (3) NW** Description of the changes that occur in human hearing during development. Consideration of the possible explanations for early immaturity. Prerequisite: SPHSC 461. Offered: even years; A.

**SPHSC 471 Basic Audiometry (5) NW** Theory and practice of the assessment of hearing function, including standard pure-tone audiometry, speech audiometry, and basic impedance audiometry. Required for majors. Prerequisite: SPHSC 371 which may be taken concurrently; SPHSC 461. Offered: WSp.

**SPHSC 481 Management of Hearing Loss (4) NW** Introduction to methods of communicative rehabilitation of person with hearing loss. Remediation principles of auditory and visual perception, amplification, communication strategies, and information counseling. Required for majors. Prerequisite: SPHSC 471. Offered: WS.

**SPHSC 491 Audiology Practicum in Schools (2)** Special projects in clinical audiology practicum, offered only in the school setting. Provides an opportunity for students to extend audiology practicum experiences into the school environment. Prerequisite: SPHSC 471. Offered: A.

**SPHSC 499 Undergraduate Research (1-5, max. 15)** Offered: AWSpS.

### Courses for Graduates Only

**SPHSC 500 Clinical Methodology for Documenting Change (4)** Introduction to clinical methodology for examining efficacy of treatments for individuals with communication problems. Students consider nature of intervention designed to alter communication disorders and types of accountability questions that need to be raised. They learn methodology for collecting and analyzing data to document effectiveness, effects, and efficiency of treatments.

**SPHSC 501 Neural Bases of Speech, Language, and Hearing (4)** Neuroanatomical and neurophysiological bases of language, hearing, sensory, and motor function. Special emphasis given to brain behavior correlates and behavioral consequences to speech, language, and hearing as a result of neurologic injury or disease.

**SPHSC 502 Advanced Anatomy of Speech and Hearing Structures (2)** Directed independent dissection and study of selected anatomic structures of the speech or hearing mechanisms.

**SPHSC 503 Current Issues in Speech and Hearing Sciences (3)** Application of experimental methods to research in speech and hearing sciences.

**SPHSC 504 Research Methods in Speech and Hearing Sciences (3)** Introduction to empirical methods in the speech and hearing sciences.

**SPHSC 505 Clinical Research in Communication Disorders (3)** Introduction to clinical research. Methodological issues concerning the evaluation of treatment for speech, hearing, and language disorders. Primary emphasis on time series designs. Prerequisite: SOC 504 or permission of instructor.

**SPHSC 510 Physiological Acoustics (3)** Study of pertinent literature and experimental techniques incident to the physiology of the normal and abnormal auditory system. Prerequisite: SPHSC 461.

**SPHSC 511 Psychoacoustics (3)** Review of significant literature and theory pertinent to normal auditory sensitivity, pitch, loudness, and other attributes of auditory sensation. Prerequisite: SPHSC 461, SPHSC 510.

**SPHSC 515 Speech Acoustics (3)** Study of the acoustical correlates of the distinctive parameters of speech. Prerequisite: SPHSC 310, SPHSC 311, SPHSC 514.

**SPHSC 519 Seminar in Speech Science (2, max. 6)**

**SPHSC 520 Advanced Instrumentation for Speech and Hearing Sciences (3)** Design and use of electronic and electroacoustic devices in the speech and hearing sciences. Four hours of laboratory required each week.

**SPHSC 521 Instrumentation for Audiology (4)** Introduction to basic instrumentation used in audiology and hearing science; detailed instruction in audiometer calibration including a review of current national and international standards pertinent to audiology; emphasis on use rather than theory. Prerequisite: permission of instructor.

**SPHSC 530 Language Disorders in Children (4)** Consideration of the nature of language impairment in children, the types of children in whom language impairment is an important dimension, and approaches to treatment.

**SPHSC 531 Neurogenic Motor Speech Disorders (4)** The nature of apraxia of speech and dysarthria and the assessment and treatment of those disorders. Prerequisite: SPHSC 501 or permission of instructor.

**SPHSC 532 Neurogenic Language Disorders (4)** Nature of aphasia and other neurogenic language disorders; evaluation and treatment of those disorders. Prerequisite: SPHSC 501 or permission of instructor.

**SPHSC 533 Medical Speech Pathology (3)** Nature of speech pathology practiced in medical settings. Prerequisite: SPHSC 501, SPHSC 531, SPHSC 532, and SPHSC 535 or permission of instructor.

**SPHSC 534 Dysphagia and Associated Disorders (3)** Anatomic and physiologic bases of function and dysfunction associated with speech-language disorders. Mastication and swallowing problems, their causes, assessments, and management. Prerequisite: SPHSC 501 or permission of instructor.

**SPHSC 535 Voice and Resonance Disorders (4)** Physiology, acoustics, and perception of voice quality and speech resonance. Etiology, evaluation, and treatment of voice and resonance disorders.

**SPHSC 536 Assessment of Language Impairment in Children (4)** Principles and procedures used in the assessment of speech- and language-disordered children and adolescents.

**SPHSC 537 Fluency Disorders (4)** Characteristics of fluent speech and the nature and treatment of stuttering in children and adults are studied in relation to normal speech production processes, human learning, principal explanations of stuttering, and treatment systems.

**SPHSC 538 Management of Acquired Cognitive Disorders (2)** Epidemiology, neuropathology, assessment, and management of acquired cognitive disorders. Focus on traumatic brain injury in adults and children, dementia, and right brain injury. Prerequisite: SPHSC 501 and SPHSC 532 or permission of instructor.

**SPHSC 539 Articulation and Phonological Disorders (4)** Patterns of normal phonological development. Nature, assessment, and treatment of phonological disorders.

**SPHSC 542 Counseling and Interactive Skills for Speech-Language Pathologists and Audiologists (2-3)** Introduction to counseling theory and practice in speech-language pathology, audiology, and related fields. Provides opportunities for learning and practicing counseling skills. Addresses key counseling issues, including professional boundaries, intense emotions, and counselor's feelings and reactions. Prerequisite: graduate standing or permission of instructor.

**SPHSC 551 Advanced Practicum in Speech Pathology Evaluation (1-10, max. 10)** Laboratory experience in the evaluation of speech and language disorders. Credit/no credit only. Prerequisite: SPHSC 536 and permission of instructor.

**SPHSC 552 Advanced Practicum in Speech Pathology Management (1-10, max. 10)** Laboratory experience in the management of speech and language disorders. Credit/no credit only. Prerequisite: permission of instructor.

**SPHSC 555 Preinternship in Speech and Hearing Sciences (1-10, max. 10)** Practicum in speech pathology or audiology designed to teach the clinical regimen of a participating professional center prior to assuming a full internship assignment. Credit/no credit only.

**SPHSC 560 Studies in Speech Science and Disorders (3)** Examines contemporary models and research paradigms in speech science and disorders. Topics include respiratory physiology, laryngeal physiology, aerodynamics of speech production, articulatory dynamics, speech acoustics, and speech perception.

**SPHSC 561 Studies in Hearing Sciences and Disorders (3)** Examines contemporary models and research paradigms in the area of hearing science and disorders. Topics include psychoacoustics; amplification; electrophysiological evaluation; physiological acoustics; and perceptual consequences of hearing loss.

**SPHSC 562 Studies in Language Science and Disorders (3)** Examines research in the area of language science and disorders including word recognition and production; storage of retrieval of word form and meaning; comprehension and production of sentences and discourse; and language in social context. Topics examined relative to development, language impairments, and normal language processing.

**SPHSC 563 Proseminar: Instructional Development Forum (1, max. 3)** *Olswang* Emphasizes instructional techniques and issues as they relate to teaching in the discipline of communication sciences and its disorders. Topics include course development, grading, student-faculty relations, teaching methods, and diversity. Credit/no credit only. Prerequisite: graduate standing in Speech and Hearing Sciences.

**SPHSC 564 Teaching Practicum (1-5, max. 5)** Provides experience in preparing and giving lectures, leading discussions, preparing and grading assignments and tests, and working directly with undergraduate and graduate students. Prerequisite: doctoral student standing and permission of instructor. Credit/no credit only. Offered: AWSpS.

**SPHSC 565 Speech and Language Pathology Proseminar (1, max. 6)** Consideration of professional issues and student and faculty research. Credit/no credit only.

**SPHSC 566 Seminar in Speech-Language Development (2, max. 6)** Prerequisite: permission of instructor.

**SPHSC 567 Research Seminar in Speech and Hearing Sciences (1)** A platform for the presentation and exchange of scientific information (research data, new hardware and hardware development, scientific papers) resulting from ongoing research projects by graduate students and faculty within the Speech and Hearing Sciences department. Credit/no credit only.

**SPHSC 568 Grant Writing in Hearing, Language, and Speech Science (3)** Design and writing of grant proposals in speech, language, and hearing sciences and disorders. Explanation of the funding process at various agencies, particularly the National Institutes of Health. Students prepare a proposal and review the proposals of their peers. Prerequisite: upper-level doctoral standing and permission of instructor.

**SPHSC 569 Seminar in Speech-Language Pathology (2, max. 6)**

**SPHSC 570- Assessment of Auditory Dysfunction I (4-)** Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

**SPHSC 571 Assessment of Auditory Dysfunction II (-4)** Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

**SPHSC 572 Pediatric Audiology (3)** Assessment of auditory disorders in infants and young children. Emphasis on behavioral and electrophysiologic techniques and on the role of the audiologist in the clinical management of the young hearing-impaired child. Prerequisite: SPHSC 471 or equivalent.

**SPHSC 573 Physiologic Assessment of Auditory Function (4)** Consideration of physiologic techniques that may be used to evaluate the normal and disordered auditory system. Outside laboratory required. Prerequisite: SPHSC 461, SPHSC 571.

**SPHSC 574 Assessment of Balance Function (4)** Examines normal anatomy and physiology of the peripheral and central vestibular system. Reviews peripheral and central vestibular disorders and treatment protocols. Major focus of assessment on electronystagmography with associated lab. Provides overview of rotational and posturography measures of balance function. Prerequisite: permission of instructor.

**SPHSC 575 Medical Backgrounds in Audiology (3)** Diseases and injuries of the ear resulting in reduced audition. Prerequisite: SPHSC 571 or permission of instructor.

**SPHSC 580 Rehabilitative Audiology (3)** Explores technology to enhance communication effectiveness of hearing impaired persons. Selection and training in the use of assistive systems and cochlear implants. Advanced perception assessment and training methodology. Prerequisite: SPHSC 571 and SPHSC 583.

**SPHSC 581 Management of Hearing-Impaired Children (3)** Management of hearing-impaired children, including identification of target behaviors and methods for modification such as individualized therapy programs and parent and teacher involvement.

**SPHSC 582 Hearing Aid Amplification (4)** Acoustic amplification and methods of determining electroacoustic characteristics. Includes earmold technology. Prerequisite: SPHSC 471 and SPHSC 570 or permission of instructor.

**SPHSC 583 Hearing Aid Selection (4)** Consideration of strategies utilized in selecting acoustic amplification for the hearing impaired, including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor.

**SPHSC 588 Audiology Proseminar (1, max. 3)** Consideration of professional issues and student/faculty research in specific areas of interest. Credit/no credit only.

**SPHSC 589 Seminar in Audiology (2, max. 6)** Prerequisite: permission of instructor.

**SPHSC 591 Advanced Practicum in Audiology (1-10, max. 10)** Credit/no credit only. Prerequisite: permission of instructor.

**SPHSC 599 Research Practicum (\* max. 12)** Supervised laboratory experience in experimental approach to problems in speech and hearing sciences. Prerequisite: permission of instructor.

**SPHSC 600 Independent Study or Research (\* max. 10)** Prerequisite: permission of instructor.

**SPHSC 601 Internship (1-10, max. 10)** Supervised field experiences in settings other than public schools. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**SPHSC 602 Internship in the Schools (3-10, max. 10)** Supervised field experience in a public school setting. Credit/no credit only. Prerequisite: permission of instructor.

**SPHSC 700 Master's Thesis (\* max. 10)**

**SPHSC 800 Doctoral Dissertation (\* max. 10)**

## Speech Communication

205 Raitt

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/speech\\_comm.html](http://www.washington.edu/students/genecat/academic/speech_comm.html)

Department Web page:  
[depts.washington.edu/spcom/](http://depts.washington.edu/spcom/)

Speech communication is the study of how people in specific contexts verbally and nonverbally negotiate meanings. The discipline studies such contexts as classrooms, families, political campaigns, and online environments, and examines how meanings are interactively constructed there. Course work is designed to enable students to enhance their theoretical knowledge by understanding speech communication as an outcome of choices, a social activity, and an aesthetic endeavor; to improve their critical capabilities through analysis of communicative behavior and discourse; and to develop their abilities to apply theory and criticism in communication practices.

## Graduate Program

Graduate Program Coordinator  
205 Raitt, Box 353415  
(206) 543-4860

Graduate study specialties include philosophy of communication; communication theory; interpersonal, small-group, political, instructional, cultural/intercultural, and developmental communication; communication education; oral interpretation; argument; rhetorical theory; criticism; and public address. Emphasis is on both social scientific and humanistic methods of scholarly inquiry.

The M.A. program with thesis requires at least 31 credits of approved course work and a thesis (9 credits). The M.A. program without thesis requires at least 45 credits, including a creative project.

The Ph.D. program usually requires four years of study beyond the baccalaureate degree.

## Special Research Facilities

The Instructional Resource Center provides support for the development and use of print, photographic, video, computer, and Web-based materials for teaching and research. In addition, a laboratory complex provides facilities for investigating phenomena that range from intimate interpersonal communication to worldwide computer-mediated public discourse. In early 2000, the laboratory included, among other items, 49 work stations, 12 servers, CD-R/CD-RW and DVD-RAM drives, digital video editing, robotic video cameras, dual-deck VCRs, digital audio editing, and 32-channel digital mixing equipment, along with extensive libraries of software for video and audio production, animation, image creation, and Web development.

## Admission Qualifications

A background of academic work adequate for pursuit of the degree sought is required. Applicants for the Ph.D. are normally expected to have an M.A. in speech communication or communications. A GPA and Graduate Record Examination scores that give promise of success in the department's graduate program are required.

## Financial Assistance

The department annually awards a number of teaching assistantships.

## Faculty

### Chair

Barbara P. Warnick

### Professors

Baskerville, Barnet 1940, (Emeritus); MA, 1944, University of Washington; PhD, 1948, Northwestern University; public address, rhetorical criticism.

Bennett, W. Lance \* 1974, (Adjunct); MPhil, 1973, PhD, 1974, Yale University; American politics, comparative politics, political communication, mass media, political culture.

Bosmajian, Haig A. \* 1965, (Emeritus); PhD, 1960, Stanford University; rhetoric, freedom of speech.

Coney, Mary B. \* 1976, (Adjunct); PhD, 1973, University of Washington; writing style and theories of technical communication, rhetoric, reader response theory.

Nielsen, Thomas R. 1946, (Emeritus); MA, 1948, University of Washington; PhD, 1953, Northwestern University; contemporary rhetorical theory, ethics of rhetoric.

Philipsen, Gerry F. \* 1978; PhD, 1972, Northwestern University; ethnography of communication.

Scheidel, Thomas M. \* 1976, (Emeritus); MA, 1955, PhD, 1958, University of Washington; communication theory and research, small group processes.

Stamm, Keith R. \* 1973, (Adjunct); PhD, 1968, University of Wisconsin; communities and newspapers, political communication, communication and environmental problems.

Staton, Ann Q. \* 1977; PhD, 1977, University of Texas (Austin); instructional communication.

Stewart, John R. \* 1969; PhD, 1970, University of Southern California; philosophy of qualitative research and interpersonal communication.

Warnick, Barbara P. \* 1980; PhD, 1977, University of Michigan; rhetorical theory and criticism.

### Associate Professors

Manusov, Valerie L. \* 1993; PhD, 1989, University of Southern California; the interplay between communication behaviors and cognitions in interpersonal interactions.

Parks, Malcolm R. \* 1978; PhD, 1976, Michigan State University; communication theory, interpersonal communication, research methods.

Post, Robert M. \* 1960; PhD, 1961, Ohio University; oral interpretation of literature.

Rivenburgh, Nancy \* 1989, (Adjunct); MS, 1982, Boston University; PhD, 1991, University of Washington; international communications, the media, intercultural relations and identity, international news.

### Assistant Professors

Ceccarelli, Leah M. \* 1996; MA, 1992, PhD, 1995, Northwestern University; rhetoric of science, rhetorical criticism.

Gastil, John W. \* 1997; PhD, 1994, University of Wisconsin; political participation and deliberative forms of democratic decision making.

Wulf, Donald H. \* 1982, (Affiliate); PhD, 1984, University of Washington; communication in instructional settings, including interpersonal and small-group communication.

### Senior Lecturer

Nyquist, Jody D. \* 1966; MA, 1967, University of Washington; communication occurring in higher education and/or business/industry training units.

## Lecturers

Coutu, Lisa 1990; PhD, 1996, University of Washington; culture and communication.

Zediker, Karen E. 1996; , PhD, 1995, University of Washington; philosophy of communication, instructional communication, conflict management.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**SP CMU 400 Theoretical Backgrounds in Speech Communication (5) VLPA/I&S** Capstone course, surveying development of the discipline and describing and analyzing its contemporary emphases. Students link appropriate interdisciplinary research and applications to their own 2-5 year post-baccalaureate trajectories.

**SP CMU 421 Advanced Speech Composition (5) VLPA/I&S** Preparation and delivery of public speeches with emphasis on style, thought organization, and proof. Analysis of model speeches. Recommended: SP CMU 220.

**SP CMU 423 Public Discourse on the Internet (5) I&S/VLPA** Study of public advocacy and persuasion in internet environments, including public interest advocacy sites, political campaigns, advertisements, editorials, and essays. Various critical models applied to analyze narratives, style, argument structure, and credibility of internet discourse. Recommended: SP CMU 310, SP CMU 425, or SP CMU 426.

**SP CMU 425 Historic American Public Discourse (5) VLPA/I&S** Rhetorical criticism of historical public speeches, essays, and declarations. Includes readings of public texts in their historical and political context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers the beginnings of the nation to the middle of the 20th century.

**SP CMU 426 Contemporary American Public Discourse (5) VLPA/I&S** Rhetorical criticism of contemporary public messages. Includes reading of public texts in their context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers mid-20th century to the present.

**SP CMU 434 Argumentation Theory (5) VLPA/I&S** Theory and research on the structure and properties of argument, argument fields, argument modeling, the influence of audience, argument criticism, and related topics. Prerequisite: either SP CMU 220 or SP CMU 334.

**SP CMU 440 Oral Interpretation of Poetry (3) VLPA** Study of forms of verse, representing various literary movements and cultures, through analysis and oral presentation. Recommended: SP CMU 140.

**SP CMU 442 Oral Interpretation of Fiction (3) VLPA** Analysis and oral interpretation of narrative perspectives in diverse works of prose fiction. Recommended: SP CMU 140.

**SP CMU 444 Oral Interpretation of Modern and Contemporary Dramatic Literature (3) VLPA** Study of dramatic literature from Ibsen to the present for purposes of developing understanding, appreciation, and ability to communicate its meaning. Playwrights from various cultures represented. Recommended: SP CMU 140.

**SP CMU 455 Communication in Children's Environments (5) VLPA/I&S** Study of the communication

capacity of children with emphasis on the analysis of the communication process in formal and informal learning environments. Includes examination of communication-based educational approaches and instructional strategies.

**SP CMU 456 Communication in Adolescent Environments (5) VLPA/I&S** Study of the communication process in youth environments with a primary focus on formal and informal learning. Includes critical analysis of communication in contemporary instructional settings and the development of communication strategies for teaching and learning.

**SP CMU 471 Persuasion (3) VLPA/I&S** Analysis of the ways in which beliefs, values, attitudes, and behavior are deliberately influenced through communication.

**SP CMU 472 Empirical Approaches to Interpersonal Communication (5) I&S** Examination of theories and research on the development and deterioration of interpersonal relationships. Emphasis on the nature of interpersonal interaction, the role of language and nonverbal communication in relationships, functional and dysfunctional interaction patterns, and the dynamics of interpersonal networks.

**SP CMU 474 Communication, Conflict, and Cooperation (5) VLPA/I&S** Role of communication in resolving informal conflicts and in facilitating interpersonal and intergroup cooperation. Review of empirical literature. In-class simulations and exercises.

**SP CMU 475 Organizational Communication (5) VLPA/I&S** Role of communication in organizations, the types of problems arising, and approaches to their resolution. Communication in the human relations and productivity of organizations. Applying communication skills in various organization roles.

**SP CMU 476 Models and Theories in Speech Communication (5) I&S** Examination of selected theories and models of speech communication as well as of criteria applicable to them. Emphasis on the nature and function of theories and models, especially as these relate to basic principles underlying the scientific, interpretive, and critical study of speech communication phenomena. Offered: jointly with CMU 476.

**SP CMU 477 Political Deliberation (5) I&S** Exploration of philosophical and empirical writings on political deliberation in small groups, campaigns, and other public settings. Contemporary deliberative theory. Participation in face-to-face discussions on current issues. Recommended: SP CMU 368, SP CMU 369, or SP CMU 373.

**SP CMU 478 Intercultural Communication (5) I&S** Investigates intercultural communication theory and its application for varying levels of human interaction: interpersonal, intergroup, and international. Recommended: SP CMU 384. Offered: jointly with CMU 421.

**SP CMU 482 Computer-Mediated Interpersonal Communication (5) I&S** Examination of relationships and groups formed through computer-mediated interpersonal communication. Focus on how people manage interactions and identities, develop interpersonal relationships, engage in collaboration and conflict, and develop communities in virtual environments. Involves both the study and use of network-based computer-mediated systems.

**SP CMU 495 Internship Theory and Practicum (3-5, max. 5)** Faculty-supervised study of communication principles in internship contexts. Readings to aid students in observations of communication concepts combined with individualized reading structured around topics of interest for each student.

**SP CMU 496 Honors Seminar (5) VLPA/I&S** Preparation for researching and writing senior honors thesis.

**SP CMU 497 Honors Thesis (5, max. 15) VLPA/I&S** Researching and writing honors thesis.

**SP CMU 498 Special Topics in Speech Communication (2-5, max. 15)** Lecture, seminar, and/or team study. Topics vary.

**SP CMU 499 Undergraduate Research (1-5, max. 10)**

## Courses for Graduates Only

**SP CMU 501 Introduction to Graduate Research in Speech Communication (3)**

**SP CMU 506 Nonverbal Communication Theory and Research (5)** Primary theories and research on nonverbal communication. Focus on developmental and social aspects of nonverbal cues, including review of communicative functions served by nonverbal channels. Topics include tie of paralinguistic systems to language, deception, relational messages, acquisition of cue use, and emotional expression. Research methods for studying nonverbal behavior.

**SP CMU 510 Rhetoric in Society (4)** Selected works of major rhetorical theorists such as Aristotle, Cicero, Augustine, Campbell, Whately, Perelman, and Burke. Examines how rhetorical themes are responsive to and symptomatic of societal conditions and values.

**SP CMU 521 Studies in Greek and Roman Rhetoric (5)** Development of the Greek tradition in rhetorical theory, criticism, and pedagogy from Homer to Augustine; analysis of the contributions of major figures and works to that tradition.

**SP CMU 524 Studies in Contemporary Rhetoric (5)** Critical analysis of theories of twentieth-century rhetoric.

**SP CMU 525 Rhetorical Criticism (5)** History and method of rhetorical criticism. Application of critical standards to various rhetorical artifacts.

**SP CMU 526 The Rhetoric of Scientific Revolutions (3)** Examines selected topics in the history of science, underscoring the interplay of language, situation, culture, and prior tradition in the quest for exact knowledge of the natural world. Focuses on one science: biology, geology or psychology, examining selected revolutions within that discipline.

**SP CMU 527 Gender, Race, and Media (5)** Analysis of the role of media in construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with CMU 589 and WOMEN 589.

**SP CMU 530 Philosophical Issues in Rhetorical and Communication Theory (5)** Survey of selected philosophical controversies among speech communication theorists, and analysis of one philosopher's approach to communication. Topics include paradigm descriptions of communication, rhetoric and knowledge, linguistic analysis and communication, hermeneutics and dialogue.

**SP CMU 550 Instructional Design in Speech Communication (5)** Research, theory, and practice relevant to instructional design in speech communication. Instructional models, writing instructional objectives, strategies, and evaluative measures.

**SP CMU 551 Proseminar on Teaching Speech Communication (1-3, max. 9)** Rotating special-topics proseminar for teaching assistants on issues related to teaching speech communication and professional development. Content varies. Topics include cultural diversity, reflective teaching, developing a teaching portfolio, assessing oral communication, discussion teaching. Credit/no credit only.

**SP CMU 555 Instructional Communication (5)** Communication in instructional environments. Nature of instructional communication, paradigms for instructional communication research, quantitative and qualitative approaches to instructional communication, verbal and nonverbal classroom interaction.

**SP CMU 560 Social Scientific Perspectives on Interpersonal Communication (5)** Social scientific research and theory on the role of communication in developing and maintaining interpersonal relationships. Nature of interpersonal communication, relationship change processes, interpersonal control through communication, and personal communication networks.

**SP CMU 570 Organizational Communication (5)** Examination of social scientific theory and research on communication in organizations. Topics include quantitative and qualitative approaches to process of organizational communication, function and structure of macro networks, superior-subordinate relationships, and the role of communication in organizational change, development, and effectiveness.

**SP CMU 572 Theories of Human Communication (4)** Description and evaluation of theoretical approaches to the study of human communication. Exploration of their applications to specific subject areas.

**SP CMU 575 Philosophy of Interpretive Research in Communication (5)** Introduces interpretive researchers to foundations of this approach in Dilthey, Gadamer, Schutz, Weber, Wittgenstein, and others. Emphasizes Gadamer's philosophical hermeneutics.

**SP CMU 577 Fieldwork Research Methods (3-6, max. 12)** Methods of fieldwork research in communication studies, with emphasis on participant observation, ethnography, and discourse analysis.

**SP CMU 580 Research Methods in Speech Communication (5)** Application of behavioral research principles to problems in quantification, design, and analysis of data in speech communication research.

**SP CMU 581 Advanced Research Methods in Speech Communication (4)** Application of social scientific methods to problems in quantification, design, and analysis of communication data. Emphasis on advanced data collection concerns, multivariate data analysis, and computer operation. Prerequisite: SP CMU 580.

**SP CMU 584 Ways of Speaking (5)** Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with ANTH 584.

**SP CMU 588 Small-Group Communication (5)** Major small-group theories relevant to communicative behavior. Descriptive and experimental research findings in current speech communication literature. Prerequisite: SP CMU 473.

**SP CMU 590 Seminar in Theory of Speech Communication (5, max. 15)**

**SP CMU 592 Seminar in Public Address (3-4, max. 12)**

**SP CMU 593 Seminar in Rhetorical Theory (3-4, max. 12)**

**SP CMU 595 Seminar in Speech Communication Education (3-4, max. 12)**

**SP CMU 597 Seminar in Interpersonal Communication (3-4, max. 12)** Examination of social scientific literature on selected topics. Subject changes from year to year; topics include conflict resolution, information processing, communication networks, feedback systems, audience composition research, communication effects.

**SP CMU 600 Independent Study or Research (\*)**

**SP CMU 700 Master's Thesis (\*)**

**SP CMU 800 Doctoral Dissertation (\*)**

## Statistics

B313 Padelford

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/statistics.html](http://www.washington.edu/students/genecat/academic/statistics.html)

Department Web page:  
[www.stat.washington.edu](http://www.stat.washington.edu)

Probability provides the conceptual foundation and mathematical language for the logic of uncertainty and induction. Statistics is concerned with procedures for the acquisition, management, exploration, and use of information in order to learn from experience in situations of uncertainty and to make decisions under risk. Statistical practice includes design of experiments and of sampling surveys; exploration, summarization, and display of observational data; drawing inferences, and assessing their uncertainty; and building mathematical models for systems with stochastic components.

By means of joint faculty appointments and joint research projects, courses, and seminars, the Department of Statistics maintains active academic contacts with the School of Business Administration; the College of Engineering; the departments of Applied Mathematics, Atmospheric Sciences, Cardiology, Computer Science, Economics, Genetics, Geological Sciences, Geophysics, Mathematics, Psychology, Radiology, Sociology, and Zoology; the National Research Center for Statistics and the Environment; the Quantitative Ecology and Resource Management program; the Center for Statistics and the Social Sciences; the Applied Physics Laboratory; the Applied Statistics Division of the Boeing Company; Microsoft Research; and the StatSci division of Math Soft. The department has an especially close relationship with the Department of Biostatistics; for example, the two departments are jointly developing new curricula in statistical genetics.

## Graduate Programs

Graduate Program Coordinator  
B309 Padelford, Box 354322  
(206) 543-8296

The graduate programs emphasize both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. Computing facilities in the Department of Statistics rank among the best of any statistics programs in the country and reflect the department's expertise in the field of statistical computing. An ongoing statistical consulting program provides the students with practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers Master of Science and Doctor of Philosophy degrees.

## Admission Requirements

Background in mathematics, statistics, or a quantitative field, with 30 or more quarter credits in mathematics and statistics, to include a year of advanced (second-year) calculus, one course in linear algebra, and one course in probability theory; Graduate Record Examination scores, including the Advanced Mathematics subject test; and three letters of recommendation from appropriate former or current faculty.

## Master of Science

**Graduation Requirements:** In addition to Graduate School requirements, at least twelve approved courses numbered 400 or above with a value of 36 credits or more; of these, at least six courses must be numbered in the 500 series (exclusive of STAT 512, 513) with a value of 18 credits or more, and with a coherent theme. Approved proficiency in statistical computing. Satis-

factory participation in statistical consulting and the departmental seminar. Passage of an appropriate final master's examination or successful completion of a master's thesis which can count as up to three courses worth 9 credits but cannot replace any of the six courses in the 500 series mentioned above. All programs must be approved in advance by the departmental graduate program coordinator.

## Doctor of Philosophy

**Graduation Requirements:** In addition to Graduate School requirements, appropriate training in statistics and related sciences. Appropriate General Examination of basic graduate-level knowledge in statistics and probability (including two preliminary examinations). Satisfactory performance in MATH 424, 425, 426. Satisfactory performance in three approved core-course sequences chosen from STAT 570, 571, 572; 581, 582, 583; 521, 522, 523; 534, 535, 538; and 516, 517, 518. (In some circumstances, other graduate-level mathematical science courses may be used as a substitute.) Approved performance in statistical consulting (typically STAT 598 and 599). Demonstration of proficiency in computing. 1 credit of STAT 590 per quarter. Demonstration of ability to read technical literature in Chinese, French, German, Russian, or Spanish. Dissertation. Final Examination.

## Financial Aid

The department annually awards a limited number of teaching and research assistantships for the support of new and continuing graduate students on the basis of academic promise.

## Faculty

### Chair

Werner Stuetzle

### Professors

Besag, Julian E. \* 1989; BS, 1963, University of Birmingham (UK); spatial statistics, applications to epidemiology, image analysis, agriculture; inference via MCMC.

Birnbaum, Z. W. \* 1939, (Emeritus); PhD, 1929, John Casimir State University (Poland); probability, mathematical statistics (distribution-free statistics, reliability theory).

Burdzy, Krzysztof \* 1988, (Adjunct); PhD, 1984, University of California (Berkeley); probability theory.

Felsenstein, Joseph \* 1968, (Adjunct); PhD, 1968, University of Chicago; evolution and population genetics.

Fleming, Thomas Richard \* 1984; MA, 1974, PhD, 1976, University of Maryland; survival analysis, cancer clinical trials, AIDS research, sequential analysis.

Ford, E. David \* 1985, (Adjunct); PhD, 1968, University College, London (UK); forest ecology and ecophysiology, crop growth, quantitative methods, philosophy of science.

Guttorp, Peter \* 1980; PhD, 1980, University of California (Berkeley); point processes, stochastic models, applications in hydrology, atmospheric and environmental science.

Handcock, Mark S. 2000, (Acting); PhD, 1989, University of Chicago; spatial statistics.

Kronmal, Richard A. \* 1964; PhD, 1964, University of California (Los Angeles); nonparametric density estimation, computer algorithms, cardiovascular data analysis, clinical trials.

Lunneborg, Clifford E. \* 1962, (Emeritus); PhD, 1959, University of Washington; psychometrics, multivariate models, individual differences in cognition.

Martin, R. Douglas \* 1974; PhD, 1969, Princeton University; robust methods, time series, wavelets and neural networks.

Nelson, Charles R. \* 1975, (Adjunct); PhD, 1969, University of Wisconsin; econometric analysis of time series data, financial markets, monetary economics.

Perلمان, Michael D. \* 1979; PhD, 1967, Stanford University; multivariate analysis, graphical Markov models, decision theory, probability inequalities, convexity.

Raftery, Adrian Elmes \* 1985; Doct, 1980, Universite De Paris VI (France); time series, Bayesian statistics, spatial statistics, population estimation, model selection.

Sampson, Paul D. \* 1981, (Research); PhD, 1979, University of Michigan; spatial statistics and environmetrics, morphometrics, applied multivariate analysis.

Scholz, Friedrich-Wilhelm \* 1972, (Affiliate); PhD, 1971, University of California (Berkeley); large sample theory, reliability, risk and tolerance analysis, bootstrap, extreme value theory.

Shorack, Galen \* 1965; PhD, 1965, Stanford University; empirical processes, robustness, nonparametric statistics.

Siegel, Andrew F. \* 1983, (Adjunct); MS, 1975, PhD, 1977, Stanford University; statistics, computing, corporate finance, investments, data analysis.

Stuetzle, Werner \* 1984; PhD, 1977, Swiss Federal Institute of Technology; nonparametric methods in multivariate analysis, statistical applications of computer graphics.

Thompson, Elizabeth A. \* 1985; PhD, 1974, Cambridge University (UK); statistical analysis of human genetic data, population genetics, statistics of conservation.

Wellner, Jon A. \* 1983; PhD, 1975, University of Washington; large-sample theory, asymptotic efficiency, empirical processes, semiparametric models.

### Associate Professors

Haynor, David R. \* 1979, (Adjunct); PhD, 1971, University of California (Berkeley); MD, 1979, Harvard University; medical image processing and segmentation, image deformation, functional MRI, expression arrays.

Percival, Donald B. \* 1979, (Affiliate); PhD, 1983, University of Washington; time series and signal analysis, computational environments, statistics of clocks.

Richardson, Thomas S. \* 1996; PhD, 1996, Carnegie Mellon University; graphical models, algorithmic model selection, Bayesian inference, causal models.

Wakefield, Jonathan Clive \* 1999; PhD, 1992, Nottingham University (United Kingdom); Bayesian data analysis, statistical methods in epidemiology, spatial epidemiology.

Zeh, Judith \* 1982, (Research); PhD, 1979, University of Washington; estimation of whale population size and dynamics, statistics in infectious disease research.

### Assistant Professors

Gneiting, Tilmann J. \* 1997; PhD, 1997, Bayreuth University (Germany); spatial and environmental statistics, positive definite functions.

Stephens, Matthew 2000; PhD, 1997, University of Oxford (UK); statistical genetics.

### Lecturer

Courbois, Jean-Yves Pip 1999; PhD, 2000, Oregon State University; survey methodology, design-based inference, interactive data visualization, data communication.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**STAT 403 Introduction to Resampling Inference (4) NW** Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Credit allowed for 403 or 503 but not both. Prerequisite: either STAT 220, STAT 301, STAT/ECON 311, STAT 341, STAT 361, STAT/MATH 390, or STAT/ECON 481. Offered: Sp.

**STAT 421 Applied Statistics and Experimental Design (4) NW** Computer-aided data analyses using comparisons between batches, analysis of variance and regression. Evaluation of assumptions, data transformation, reliability of statistical measures (jackknife, bootstrap). Fisher-Gosset controversy. Prerequisite: either STAT 342, STAT/MATH 390, or STAT/ECON 481; recommended: MATH 308. Offered: A.

**STAT 423 Applied Regression and Analysis of Variance (4) NW** Regression analysis. Problems in interpreting regression coefficients. Estimation, including two-stage least squares. Guided regression: building linear models, selecting carriers. Regression residuals. Analysis of variance. Nonparametric regression. Factorial designs, response surface methods. Prerequisite: either STAT 342, STAT/MATH 390, STAT 421, or STAT/ECON 481; recommended: MATH 308. Offered: W.

**STAT 427 Introduction to Analysis of Categorical Data (4) NW** Techniques for analysis of count data. Log-linear models, logistic regression, and analysis of ordered response categories. Illustrations from the behavioral and biological sciences. Computational procedures. Prerequisite: either STAT 342, STAT 362, or STAT 421. Offered: alternate years.

**STAT 428 Multivariate Analysis for the Social Sciences (4) NW** Multivariate techniques commonly used in the social and behavioral sciences. Linear models for dependence analysis (multivariate regression, MANOVA, and discriminant analysis) and for interdependence analysis (principal components and factor analysis). Techniques applied to social science data using computer statistical packages. Prerequisite: either STAT 342, STAT 362, or STAT 421. Offered: alternate years.

**STAT 480 Sampling Theory for Biologists (3) NW Gallucci, Rustagi** Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with Q SCI 480; even years.

**STAT 481 Introduction to Mathematical Statistics (5) NW** Probability, generating functions; the  $d$ -method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 580.) Prerequisite: STAT/ECON 311; either MATH 136 or MATH 126 with either MATH 308 or MATH 309. Offered: jointly with ECON 481; A.

**STAT 486 Experimental Design (3) NW** Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudoreplication, factor structure. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with Q SCI 486.

**STAT 491 Introduction to Stochastic Processes (3) NW** Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Prerequisite: 2.0 in MATH/STAT 396. Offered: jointly with MATH 491; A.

**STAT 492 Introduction to Stochastic Processes (3) NW** Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Prerequisite: 2.0 in MATH/STAT 491. Offered: jointly with MATH 492; W.

**STAT 498 Special Topics (1-5, max. 15) NW** Reading and lecture course intended for special needs of students. Offered: when demand is sufficient.

**STAT 499 Undergraduate Research (1-5, max. 15)** Offered: AWSpS.

### Courses for Graduates Only

**STAT 506 Applied Probability and Statistics (4)** Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with AMATH 506.

**STAT 512 Statistical Inference (4)** Review of random variables; transformations, conditional expectation, moment generating functions, convergence, limit theorems, estimation; Cramer-Rao lower bound, maximum likelihood estimation, sufficiency, ancillarity, completeness. Rao-Blackwell theorem. Hypothesis testing: Neyman-Pearson lemma, monotone likelihood ratio, likelihood-ratio tests, large-sample theory. Contingency tables, confidence intervals, invariance. Introduction to decision theory. Prerequisite: STAT 395 and STAT 421, STAT 423, or BIOST 512 (concurrent registration permitted for these three). Offered: A.

**STAT 513 Statistical Inference (4)** Review of random variables; transformations, conditional expectation, moment generating functions, convergence, limit theorems, estimation; Cramer-Rao lower bound, maximum likelihood estimation, sufficiency, ancillarity, completeness. Rao-Blackwell theorem. Hypothesis testing: Neyman-Pearson lemma, monotone likelihood ratio, likelihood-ratio tests, large-sample theory. Contingency tables, confidence intervals, invariance. Introduction to decision theory. Prerequisite: STAT 512. Offered: W.

**STAT 516- Stochastic Modeling of Scientific Data (4-)** Markovian and semi-Markovian models, point processes, cluster models, queuing models, likelihood methods, estimating equations. Prerequisite: STAT 511 or STAT 396. Offered: A.

**STAT 517 Stochastic Modeling of Scientific Data (-4)** Markovian and semi-Markovian models, point processes, cluster models, queuing models, likelihood methods, estimating equations. Prerequisite: STAT 516-. Offered: W.

**STAT 518 Stochastic Modeling Project (4)** Supervised, applied project based on stochastic modeling of scientific data. Prerequisite: STAT 517. Offered: Sp.

**STAT 519 Time Series Analysis (3)** Descriptive techniques. Stationary and nonstationary processes, including ARIMA processes. Estimation of process mean and autocovariance function. Fitting ARIMA models to data. Statistical tests for white noise. Forecasting. State space models and the Kalman filter. Robust time series analysis. Regression analysis with correlated errors. Statistical properties of long memory processes. Prerequisite: STAT 513. Offered: A.

**STAT 520 Spectral Analysis of Time Series (4)** Estimation of spectral densities for single and multiple time series. Nonparametric estimation of spectral density, cross-spectral density, and coherency for stationary time series, real and complex spectrum techniques. Bispectrum. Digital filtering techniques. Aliasing, prewhitening. Choice of lag windows and data windows. Use of the fast Fourier transform. The parametric autoregressive spectral density estimate for single and multiple stationary time series. Spectral analysis of nonstationary random processes and for randomly sampled processes. Techniques of robust spectral analysis. Prerequisite: one of STAT 342, STAT 390, STAT 481, or permission of instructor. Offered: jointly with E E 520; W.

**STAT 521 Advanced Probability (3)** Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: MATH 426. Offered: jointly with MATH 521; A.

**STAT 522 Advanced Probability (3)** Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: MATH 426. Offered: jointly with MATH 522; W.

**STAT 523 Advanced Probability (3)** Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: MATH 426. Offered: jointly with MATH 523; Sp.

**STAT 524 Design of Medical Studies (3)** Emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for students in biostatistics and other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of STAT 421, STAT 423, BIOST 513 or EPI 512; or permission of instructor. Offered: jointly with BIOST 524; even years.

**STAT 529 Sample Survey Techniques (3)** Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: STAT 421, STAT 423, QMETH 500 or BIOST 511 or equivalent; or permission of instructor. Offered: jointly with BIOST 529.

**STAT 530 Wavelets: Data Analysis, Algorithms, and Theory (3)** Review of spectral analysis. Theory of continuous and discrete wavelets. Multiresolution analysis. Computation of discrete wavelet transform. Time-scale analysis. Wavelet packets. Statistical properties of wavelet signal extraction and smoothers. Estimation of wavelet variance. Prerequisite: some Fourier theory and linear algebra; STAT 390, STAT 481, or STAT 513; or permission of instructor. Offered: Sp.

**STAT 533 Classical Theory of Linear Models (3)** Introduction to one-, two-way analysis of variance; randomized blocks; fixed, random effects, multiple comparisons. Statistical distribution theory for quadratic forms of normal variables. Fitting of the general linear model by least squares. Prerequisite: STAT 421 or STAT 423; and STAT 513, BIOST 513, and a course in matrix algebra. Offered: jointly with BIOST 533; Sp.

**STAT 534 Statistical Computing (3)** Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 534; Sp.

**STAT 535 Statistical Computing (3)** Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 535; A.

**STAT 538 Statistical Computing (3)** Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 538; W.

**STAT 536 Log-Linear Modeling and Logistic Regression for the Social Sciences (3)** Log-linear modeling of multidimensional contingency tables. Logistic regression. Applications to social mobility, educational opportunity, and assortative marriage. Applied and computing focus. Prerequisite: STAT 395 or SOC 425 or permission of instructor. Offered: jointly with SOC 536.

**STAT 542 Multivariate Analysis (3)** Multivariate normal distribution; partial and multiple correlation; Hotelling's  $T^2$ ; Bartlett's decomposition; various likelihood ratio tests; discriminant analysis; principal components; graphical Markov models. Prerequisite: STAT 582 or permission of instructor. Offered: alternate years.

**STAT 544 Bayesian Statistical Methods (3)** Statistical methods based on the idea of a probability distribution over the parameter space. Coherence and utility. Subjective probability. Likelihood principle. Conjugate families. Structure of Bayesian inference. Limit theory for posterior distributions. Sequential experiments. Exchangeability. Bayesian nonparametrics. Empirical Bayes methods. Prerequisite: STAT 513 or permission of instructor. Offered: alternate years.

**STAT 550 Statistical Genetics I: Mendelian Traits (3)** *Thompson* Mendelian genetic traits. Population genetics; Hardy-Weinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with BIOST 550; A.

**STAT 551 Statistical Genetics II: Quantitative Traits (3)** *Monks* Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with BIOST 551; W.

**STAT 552 Statistical Genetics III: Medical Genetics Studies (3)** *Wijsman* Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENET 371; or permission of instructor. Offered: jointly with BIOST 552; Sp.

**STAT 570 Advanced Applied Statistics and Linear Models (3)** Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 513; STAT 533 or STAT 421 and STAT 423, and a course in matrix algebra for STAT 570. Offered: jointly with BIOST 570; A.

**STAT 571 Advanced Applied Statistics and Linear Models (3)** Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 570. Offered: jointly with BIOST 571; W.

**STAT 572 Advanced Applied Statistics and Linear Models (3)** Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 571. Offered: jointly with BIOST 572; Sp.

**STAT 573 Statistical Methods for Categorical Data (3)** Advanced topics in generalized linear models and the analysis of categorical data: overdispersion, quasilielihood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: STAT 571 and STAT 582. Offered: jointly with BIOST 573; alternate years.

**STAT 574 Multivariate Statistical Methods (3)** Use of multivariate normal sampling theory, linear transformations of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: STAT 570 or permission of instructor. Offered: jointly with BIOST 574; alternate years.

**STAT 576 Statistical Methods for Survival Data (3)** Statistical methods for censored survival data. Covers parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either STAT 423, BIOST 513, or Q SCI 483, or equivalent. Offered: jointly with BIOST 576; alternate years.

**STAT 577 Advanced Design and Analysis of Experiments (3)** Concepts important in experimental design: randomization, blocking, confounding. Application and analysis of data from randomized blocks designs, Latin and Greco-Latin squares, incomplete blocks designs, split-plot and repeated measures, factorial and fractional replicates, response surface experiments. Prerequisite: STAT 570 or STAT 421 (minimum grade 3.0), or permission of instructor. Offered: jointly with BIOST 577.

**STAT 578 Special Topics in Advanced Biostatistics (\* max. 3)** Advanced-level topics in biostatistics offered by regular and visiting faculty members. Prerequisite: permission of instructor. Offered: jointly with BIOST 578.

**STAT 581 Advanced Theory of Statistical Inference (3)** Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jack-knife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 513 and MATH 426. Offered: A.

**STAT 582 Advanced Theory of Statistical Inference (3)** Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jack-knife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 581. Offered: W.

**STAT 583 Advanced Theory of Statistical Inference (3)** Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jack-knife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 582. Offered: Sp.

**STAT 590 Statistics Seminar (\* max. 15)** Credit/no credit only. Prerequisite: permission of graduate program coordinator. Offered: AWSp.

**STAT 591 Special Topics in Statistics (1-5, max. 15)** Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: A.

**STAT 592 Special Topics in Statistics (1-5, max. 15)** Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: W.

**STAT 593 Special Topics in Statistics (1-5, max. 15)** Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: Sp.

**STAT 598 Techniques of Statistical Consulting (1)** Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with B10ST 598; ASp.

**STAT 599 Statistical Consulting (\* max. 12)** Consulting experience in data analysis, applied statistics. Student required to provide consulting services to students and faculty three hours per week. Credit/no credit only. Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

**STAT 600 Independent Study or Research (\*)** Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

**STAT 700 Master's Thesis (\*)** Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

**STAT 800 Doctoral Dissertation (\*)** Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

## Women Studies

B110 Padelford

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/women\\_studies.html](http://www.washington.edu/students/genecat/academic/women_studies.html)

Department Web page:  
[depts.washington.edu/webwomen/](http://depts.washington.edu/webwomen/)

Women Studies is an interdisciplinary department that offers students a cohesive framework for the study of women's and men's lives within historical and contemporary contexts, and from multi-disciplinary, multi-cultural, and international perspectives. As a field of inquiry, Women Studies challenges traditional scholarship about human societies and fosters the construction of new theoretical and methodological approaches to understanding diverse experiences and realities. Students select a variety of courses offering breadth in Women Studies scholarship, while pursuing concentrated study in a particular track, such as women and arts; gender, race, ethnicity, women, and health; and women and the law; or self-designed programs.

## Graduate Program

Graduate Program Coordinator  
B110C Padelford, Box 354345  
(206) 543-6900  
[womenst@u.washington.edu](mailto:womenst@u.washington.edu)

The Department of Women Studies offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in interdisciplinary women studies as well as in a chosen discipline. The core faculty represent the following disciplines: anthropology, American Indian studies, economics and development, history, international studies, English, sociology, and psychology. Although students are required to work primarily with a core faculty member in Women Studies, they have the opportunity to study with more than 60 faculty members from a wide range of disciplines who are adjunct faculty to Women Studies. M.A. students must complete a thesis or practicum. Ph.D. students must complete a dissertation.

## Admission Requirements

Applicants are admitted to begin study during autumn quarter only and are required to have their application materials completed by the beginning of the prior January. A complete application file includes the Graduate School application, one copy of official transcripts, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE).

## Program Requirements

All students are required to complete 15 credits of the core seminars: History of Feminism (WOMEN 501), Problems in Feminist Theory (WOMEN 502), and Feminist Research and Methods of Inquiry (WOMEN 503). Under the guidance of a core faculty mentor and advisory committee, the student shapes an individual program of study. The master's program usually requires two years of graduate study; the doctoral program usually requires three years of study beyond the master's level, including independent field research and preparation of a dissertation. Ph.D. students must exhibit proficiency in a language relevant to their theoretical and regional areas of specialization. Students are urged to establish foreign language competency as undergraduates before entering the graduate program or as early as possible in their graduate careers.

## Financial Aid

A limited number of teaching and research assistantships are offered to Ph.D. students.

## Faculty

### Chair

Shirley J. Yee

### Professors

Allen, Carolyn \* 1972, (Adjunct); MA, 1966, Claremont Graduate School; PhD, 1972, University of Minnesota; twentieth-century literature, women writers, contemporary critical theory.

Allen, David G. \* 1988, (Adjunct); PhD, 1975, University of Iowa; philosophy of science, critical and feminist theory, psychosocial nursing theory.

Baldasty, Gerald J. \* 1974, (Adjunct); MA, 1974, University of Wisconsin; PhD, 1978, University of Washington; communications history, media and gender, race, government-press relations.

Barlow, Tani E. \* 1994; MA, 1979, PhD, 1985, University of California (Davis); history of modern China, gender studies, feminist theory, historiography.

Bereano, Philip L. \* 1975, (Adjunct); JD, 1965, Columbia University; MRP, 1971, Cornell University; technology assessment, biotech policies, policy and technology, social values, citizen participation.

Blake, Kathleen \* 1971, (Adjunct); PhD, 1971, University of California (San Diego); Victorian literature, children's literature, women's studies.

Boersma, P. Dee \* 1974, (Adjunct); PhD, 1974, Ohio State University; ecology and conservation biology, reproductive strategies, colonial seabird biology.

Butler, Johnella E. \* 1987, (Adjunct); EdD, 1979, University of Massachusetts; Afro-American and multicultural studies, comparative American ethnic literature, African diaspora.

Cauce, Ana Mari \* 1986, (Adjunct); PhD, 1984, Yale University; community/developmental psychology, socialization of children/adolescents of color, ethnic identity.

Clatterbaugh, Kenneth C. \* 1966, (Adjunct); PhD, 1966, Indiana University; modern philosophy, social philosophy, gender studies.

Glenn, Susan A. \* 1993, (Adjunct); PhD, 1983, University of California (Berkeley); twentieth-century U.S. social and cultural history including women's history.

Goldsmith, Layne \* 1983, (Adjunct); MA, 1975, San Jose State College; MFA, 1979, Cranbrook Academy of Art; fiber arts and related historic and contemporary textile structures and processes.

Gorbman, Claudia L. \* 1990, (Adjunct); PhD, 1978, University of Washington; film studies: history, theory, criticism; film sound and music.

Gordon, Margaret T. \* 1988, (Adjunct); PhD, 1972, Northwestern University; news media and public policy, trust in government, urban policy.

Graham, Katherine J. 1988, (Adjunct); MN, 1967, PhD, 1978, University of Washington; quality of life across life, work; health systems.

Hartsock, Nancy C. M. \* 1984, (Adjunct); PhD, 1972, University of Chicago; feminist theory, Marxism, contemporary political theory.

Howard, Judith A. \* 1982, (Adjunct); PhD, 1982, University of Wisconsin; social psychology, sociology of gender, intersections of race/class/gender/sexuality.

Jacobs, Sue-Ellen \* 1974; PhD, 1970, University of Colorado (Boulder); anthropological studies of women, applied anthropology, ethnohistory, Native North America.

Jeffords, Susan E. \* 1985; MA, 1977, PhD, 1981, University of Pennsylvania; feminist theory, American popular culture, and the representation of Vietnam.

Kaplan, Sydney J. \* 1971, (Adjunct); PhD, 1971, University of California (Los Angeles); twentieth-century literature, women writers, feminist criticism.

Lawson, Victoria A. \* 1986, (Adjunct); PhD, 1986, Ohio State University; Latin America, critical development studies, feminist geography.

Lebsock, Suzanne D. \* 1995, (Adjunct); MA, 1973, PhD, 1977, University of Virginia; history of women, American social history, history of the American South.

McElroy, Colleen J. \* 1972, (Adjunct); PhD, 1973, University of Washington; Black literature, women writers, poetry writing.

Richey, Cheryl A. \* 1973, (Adjunct); DSW, 1974, University of California (Berkeley); cultural and gender issues, intervention design and research.

Schauman, Sally \* 1979, (Adjunct); MS, 1971, University of Michigan; landscape ecology, stressed landscapes, countryside conservation.

Schwartz, Pepper J. \* 1972, (Adjunct); PhD, 1974, Yale University; family, gender, human sexuality, field methods.

Silberstein, Sandra V. \* 1982, (Adjunct); PhD, 1982, University of Michigan; TESL, critical theory, discourse analysis, sociolinguistics, language and culture.

Sokoloff, Naomi B. \* 1985, (Adjunct); PhD, 1980, Princeton University; Hebrew language and literature.

Steele, Cynthia 1986, (Adjunct); PhD, 1980, University of California (San Diego); Latin American literature and cultural studies; Mexican literature, film, and photography.

Treat, John W. \* 1983, (Affiliate Adjunct); PhD, 1982, Yale University; Japanese language and literature.

Woods, Nancy \* 1978, (Adjunct); PhD, 1978, University of North Carolina; women's health.

### Associate Professors

Anagnost, Ann S. \* 1990, (Adjunct); PhD, 1985, University of Michigan; ethnography of the state, ideology and popular culture, peasant society; China.

Brines, Julie E. \* 1993, (Adjunct); PhD, 1990, Harvard University; gender, stratification, family, methods.

Cabeen, Louise \* 1993, (Adjunct); MFA, 1989, The School of Art Institute Of Chicago; socially critical art with research specialties in textile history and techniques.

Cummings, Katherine \* 1985, (Adjunct); PhD, 1985, University of Wisconsin; feminist, psychoanalytical, and literary theory, modern and contemporary literature.

Di Stefano, Christine \* 1985, (Adjunct); PhD, 1984, University of Massachusetts; political theory (modern and contemporary), feminist theory, political culture.

Dubois, Thomas A. \* 1990, (Adjunct); PhD, 1990, University of Pennsylvania; Nordic folklore and mythology, Finnish, Sami.

Dubrow, Gail Lee \* 1989, (Adjunct); MA, 1979, University of Oregon; PhD, 1991, University of California (Los Angeles); preservation, urban design, public art, public history, gender, multiculturalism.

England, Kim V. L. 1999, (Adjunct); MA, 1984, PhD, 1988, Ohio State University; feminist geographies, labor markets, social identities and space.

Friedman, Kathie \* 1987, (Adjunct); MA, 1979, Other, 1990, State University of New York (Binghamton); sociology of gender, immigration, race, and ethnicity in the U.S.

Gavel-Adams, Ann-Charlotte \* 1986, (Adjunct); PhD, 1990, University of Washington; August Strindberg, Scandinavian women's literature, Scandinavian turn-of-the-century drama and art.

Ginorio, Angela B. \* 1981; PhD, 1979, Fordham University; women and/in science, violence and women, socially defined identities, psychology issues for Latinas.

Heuving, Jeanne D. \* 1990, (Adjunct); PhD, 1988, University of Washington.

Ingebritsen, Christine \* 1992, (Adjunct); PhD, 1993, Cornell University; politics, international political economy, European integration, environmental policy.

Jarosz, Lucy A. \* 1990, (Adjunct); PhD, 1990, University of California (Berkeley); political economy of development, food and agriculture, feminist geography, political ecology.

Kenney, Nancy J. \* 1976; PhD, 1974, University of Virginia; neural and endocrine controls of food and fluid intake, physiological basis of motivation.

Klawitter, Marieka \* 1990, (Adjunct); MS, 1986, PhD, 1992, University of Wisconsin; family and employment policy, sexual orientation, women's studies.

Magyary, Diane L. \* 1981, (Adjunct); PhD, 1981, University of Washington; family centered health care of children at risk, disabled or handicapped.

Mitchell, Katharyne 1993, (Adjunct); PhD, 1993, University of California (Berkeley); urban, cultural and economic geography, Pacific Rim, migration, transitional studies.

Moody, Joycelyn K. \* 1991, (Adjunct); MA, 1980, University of Wisconsin; PhD, 1993, University of Kansas; nineteenth-century American, African-American, and women's literature, autobiography.

Noble, Kathleen D. \* 1984, (Research); PhD, 1984, University of Washington; feminist talent development, spirituality and mental health, feminist psychological theory.

Rhodes, Lorna A. \* 1983, (Adjunct); PhD, 1973, Cornell University; medical anthropology, anthropology of institutions, religion, psychiatry.

Roberts, Jean Valerie \* 1992, (Adjunct); PhD, 1982, University of Pittsburgh; ancient philosophy, ethics, philosophy of feminism.

Ross, Luana K. 1999; MSW, 1981, Portland State University; PhD, 1992, University of Oregon; criminology/deviance, race/ethnic relations and gender, documentary film.

Salas, Elizabeth 1987, (Adjunct); MA, 1977, California State University, Los Angeles; PhD, 1987, University of California (Los Angeles); New Mexican history and politics, Chicana, Mexicana and Chicano history, minorities in the military.

Sears, Laurie J. \* 1989, (Adjunct); PhD, 1986, University of Wisconsin; Southeast Asia, historiography.

Simpson, Caroline Chung \* 1994, (Adjunct); MA, 1989, University of Houston; PhD, 1994, University of Texas (Austin); Asian American literature and culture, post-war fiction and film.

Stacey, Robin C. \* 1988, (Adjunct); PhD, 1986, Yale University; medieval history, Celtic.

Stecher Hansen, Marianne T \* 1988, (Adjunct); MA, 1981, University of Washington; PhD, 1990, University of California (Berkeley); Danish language and literature, Scandinavian literature.

Stygall, Gail \* 1990, (Adjunct); PhD, 1989, Indiana University; rhetoric and composition, English language linguistics, law and literature.

Twine, France Winddance 1994; MA, 1990, PhD, 1994, University of California (Berkeley); critical race feminisms, racism/antiracism, whiteness studies, multiracial families, Brazil, Britain.

Ward, Deborah \* 1987, (Adjunct); PhD, 1987, Boston University; health policy and politics, women's paid and unpaid caregiving work.

Yee, Shirley J. \* 1988; PhD, 1987, Ohio State University; U.S. women's history, African-American history, nineteenth-century U.S. social history.

### Assistant Professors

Boyer, Debra 1988, (Affiliate); PhD, 1986, University of Washington; feminist research methodology, policy and evaluation issues, urban applied anthropology.

Dong, Yue 1996, (Adjunct); MA, 1991, University of Oregon; PhD, 1996, University of California (San Diego); late 19th and 20th century China, social and cultural history, urban history, gender studies.

Ensign, B. Josephine \* 1994, (Adjunct); MS, 1986, Virginia College of Medicine; MPH, 1992, DPH, 1994, Johns Hopkins University; community-based health service for adolescents.

Khanna, Ranjana \* 1996, (Adjunct); PhD, 1993, York University (Canada); postcolonial theory, transnational feminism, twentieth-century writing.

Ostmeier, Dorothee \* 1993, (Adjunct); PhD, 1993, Johns Hopkins University; eighteenth and twentieth century literature and philosophy, critical theory, German studies.

Ramamurthy, Priti \* 1997; PhD, 1995, Syracuse University; political economy of development, third-world feminism, irrigation, agro-food systems, South Asia.

Rose, Elaine 1993, (Adjunct); PhD, 1993, University of Pennsylvania; labor, development, applied microeconomics.

Schroeder, Carole A. 1993, (Adjunct); MSN, 1985, University of Nevada; PhD, 1993, University of Colorado (Denver); women's health, community health, models of care delivery, health care systems.

Sunindyo, Saraswati \* 1993; PhD, 1993, University of Wisconsin; feminism and nationalism, comparative women's movements, Southeast Asia.

Taylor, Janelle S. \* 1999, (Adjunct); PhD, 1999, University of Chicago; anthropology of medicine, science, and technology; reproduction; gender; consumption.

Thomas, Lynn M. \* 1997, (Adjunct); MA, 1989, Johns Hopkins University; MA, 1993, Northwestern University; PhD, 1997, University of Michigan; Africa, cultural and social.

Weinbaum, Alys E. \* 1998, (Adjunct); PhD, 1998, Columbia University; 19th and 20th century American and European literature.

Woody, Andrea I. \* 1997, (Adjunct); PhD, 1997, University of Pittsburgh; philosophy of science, history of science, philosophy of feminism.

### Lecturer

Tupper, Kari Lynn 1988; PhD, 1997, University of Washington; literature and law, American studies, women writers.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsat/](http://www.washington.edu/students/crsat/).

**WOMEN 405 Comparative Women's Movements and Activism (5) I&S** *Sunindyo* Comparative cultural, national, and historical study of women's movements and activists. Critically analyzes multiple arenas of women's movements and resistance. Topics include feminist anti-racism, pre-nationalism and nationalism, economics, electoral politics, women's and human rights, and international/transnational feminisms. Prerequisite: either WOMEN 205, WOMEN 305, or SOC 364.

**WOMEN 415 Gender and Education (5) I&S** Gender bias, discrimination, and gender-equity efforts in education. Includes curriculum instruction, instructional materials, testing, counseling, athletics, teacher education, educational employment issues, and sexual harassment. Relevant federal and state laws, court decisions, and strategies for promoting gender equity also addressed. Recommended: WOMEN 200 or SOC 110. Offered: jointly with EDC&I 440; S.

**WOMEN 424 Women in Midlife (5) I&S** Explores women's lives, experiences, and concerns in the middle years. Topics include physical and physiological changes; psychological development; representations and treatment of midlife women in literature, media, and other institutions; economics of aging; crosscultural and subcultural differences in the aging process; the synergistic effects of sexism and ageism on women.

**WOMEN 425 Femininity, Feminism, and Antifeminism in Popular Culture (5) VLPA/I&S** *Twine* Explores shifting meanings and reconfigurations of femininity, feminism, and antifeminism in United States popular culture. Analyzes the incorporation and transformation of feminist critiques of dominant ideologies into popular culture. Popular forms examined may include television serials, music videos, advertisements, films, and novels. Prerequisite: WOMEN 200.

**WOMEN 427 Women and Violence (5) I&S** *Ginorio* Multi-disciplinary explorations of the continuum of violence which affects women's lives, ranging from experience in personal settings (family violence) to cultural or state policies (prisons, wars). Violence against women explored in the context of societal, political, and state violence. Recommended: WOMEN 200.

**WOMEN 429 Scandinavian Women Writers in English Translation (5) VLPA** *Gavel-Adams* Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present with focus on feminist issues in literary criticism. Offered: jointly with SCAND 427.

**WOMEN 440 Reading Native American Women's Lives (5) I&S** *Jacobs, Ross* Seminar based on social science writings, autobiographies, biographies, and fiction written by, with, or about indigenous women of the United States and Canada. Prerequisite: either WOMEN 342, WOMEN 423, AIS 201, AIS 330, or AIS 423. Offered: jointly with AIS 440.

**WOMEN 442 Images of Natives in the Cinema and Popular Cultures (5) I&S/VLPA** *Ross* Cultural examination of images of native people in cinema and popular culture based on social science writings and films by or about natives in the United States and Canada. Offered: jointly with AIS 442. Prerequisite: AIS 330 and WOMEN 200.

**WOMEN 447 Economics of Gender (5) I&S** *Rose* Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimination, human capital, fertility and intrahousehold resource allocation. Economics of the family in developed and developing countries. Prerequisite: ECON 300. Offered: jointly with ECON 447.

**WOMEN 450 Language and Gender (5) I&S, VLPA** *Bilaniuk* Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis and other aspects of identity such as sexuality, class, and age. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450 and LING 458.

**WOMEN 454 Women, Words, Music, and Change (5) VLPA/I&S** *Jacobs* Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women's status and roles. Recommended: WOMEN 353. Offered: jointly with ANTH 454.

**WOMEN 455 Contemporary Feminist Theory (5) I&S** *Barlow* Raises the question of how political contexts condition the way some ideas become theory. Emphasizes the present crises in thinking about a transnational feminism.

**WOMEN 456 Feminism, Racism, and Anti-Racism (5) I&S** *Twine* Examines meaning of racism and feminism in women's lives in an international context. Building upon an analysis of racial hierarchies and institutionalized racism, explores strategies used by women engaged in feminist and anti-racist activism. Prerequisite: WOMEN 200.

**WOMEN 458 Ideologies and Technologies of Motherhood (5) I&S** *Twine* Examines how motherhood is culturally constituted, regulated, and managed within various ideological and technological milieus. Uses ethnographies from anthropology and case studies from feminist legal theory. Topics include slave mothers, surrogate mothers, lesbian mothers, transracial mothers, co-mothers, teen mothers. Prerequisite: WOMEN 200. Offered: jointly with ANTH 484.

**WOMEN 462 Isak Dinesen and Karen Blixen (5) VLPA** *Stecher-Hansen* The fiction of Isak Dinesen (pseudonym for Karen Blixen) reevaluated in light of current issues in literary criticism, particularly feminist criticism. Close readings of selected tales, essays, and criticism. Offered: jointly with SCAND 462.

**WOMEN 468 Latin American Women (5) VLPA/I&S** *Steele* The elaboration of discourses of identity in relation to gender, ethnicity, social class, and nationality, by women writers from South America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women's experimental fiction. Prerequisite: SPAN 303; SPAN 321; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 468.

**WOMEN 485 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S** Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with PHYS 451.

**WOMEN 488 Women and Science (5) I&S** *Ginorio* Explores science as a method of inquiry and as a profession while also expanding knowledge about women through the use of biographies of women scientists, discipline-based and feminist critiques, and the psycho-social concept of socially defined identities. Recommended: one Women Studies course and one college-level science course.

**WOMEN 489 Ethnicity, Gender, and Media (5) I&S** *Baldasty* Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with CMU 489/AES 489.

**WOMEN 490 Special Topics in Women Studies (2-5, max. 15) I&S** Exploration of specific problems and issues relevant to the study of women. Offered by visiting or resident faculty members. Primarily for upper-division and graduate students.

**WOMEN 491 Senior Thesis I (3) I&S** Introductory course of the senior thesis sequence required of all majors. Students attend a weekly seminar, select a thesis topic, and contract with an appropriate faculty adviser. Successful completion of the course is contingent on submission of an acceptable thesis proposal. Majors and senior standing only. Offered: A.

**WOMEN 492 Senior Thesis II (3) I&S** Second course in senior thesis sequence required of majors. Majors and seniors only. Prerequisite: WOMEN 491. Offered: W.

**WOMEN 493 Senior Thesis III (4) I&S** Research and writing of thesis under supervision of a faculty member. Required of all majors. Prerequisite: WOMEN 492. Offered: AWSpS.

**WOMEN 495 Tutoring Women Studies (5)** Students train to serve as tutors in designated courses. Facilitate weekly group discussions, assist with writing assignments, explain course materials. Credit/no credit only.

**WOMEN 497 Fieldwork in Women Studies (1-15, max. 15)** Internships in local agencies. Allows development of specific skills in area of specialization. Credit/no credit only. Offered: AWSpS.

**WOMEN 499 Undergraduate Research (1-5, max. 10)** Independent study and research supervised by a faculty member with appropriate academic interest. Offered: AWSpS.

## Courses for Graduates Only

**WOMEN 501 History of Feminism (5)** *Barlow, Yee* Study of feminism from the 18th through the 20th centuries in the national, international, and intranational world system, with a focus on imperialism, colonialism, nationalism, and modernity. Surveys the literature in a global context, supplemented by critical essays and historiographic reviews.

**WOMEN 502 Cross Disciplinary Feminist Theory (5)** *Barlow* Raises questions about how feminism becomes theory and what the relation of feminist theory is to conventional disciplines. Readings exemplify current crises in feminism (e.g., the emergence of neo-materialism; critical race theory; citizenship; identity; transnational and migrancy and questions of post-colonialism) to consider disciplinization.

**WOMEN 503 Feminist Research and Methods of Inquiry (5)** *Allen* Explores appropriate research methodologies for interdisciplinary work. Asks how scholarship is related to feminism as a social movement and to the institutions in which we work. Focuses on how similar objects of study are constituted in different disciplines for feminist scholars. Offered: Sp.

**WOMEN 512 Critical and Interdisciplinary Approaches to Women's Health (3)** *Ensign, Schroeder* Critical examination of the historical, socio-political, and scientific influences on women's health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with NURS 512; W.

**WOMEN 534 Feminism and History of Women in China (5)** Explores historical question of gendered subjects in modern China and feminist stories of emancipation of Chinese women asking how these render invisible other kinds of history. Prerequisite: background in China studies or ability to handle Chinese primary sources.

**WOMEN 553 Discourses in Feminist Anthropology Seminar (5)** *Jacobs* Exploration of feminist anthropological theories and the works of their critics. Ways of using feminist anthropology in preparation for and conducting fieldwork. Topics include foundations in feminist anthropology, grand theories, variation in feminist theoretical foci within the "four fields," responses to critics. Prerequisite: graduate standing. Offered: jointly with ANTH 555; W.

**WOMEN 589 Gender, Race, and Media (5)** Analysis of the role of media in construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with CMU 589 and SP CMU 527.

**WOMEN 600 Independent Study or Research (\*)**  
Offered: AWSpS.**WOMEN 700 Master's Thesis (\*)** Credit/no credit only. Offered: AWSpS.**WOMEN 701 Master's Practicum (\*)** Offered: AWSpS.**WOMEN 800 Doctoral Dissertation (\*)**

---

## Zoology

106 Kincaid

General Catalog Web page:  
[www.washington.edu/students/genecat/academic/zoology.html](http://www.washington.edu/students/genecat/academic/zoology.html)

Department Web page:  
[www.zoology.washington.edu](http://www.zoology.washington.edu)

Zoology is a natural science concerned primarily with animals: their development, structure, and function, and their relationship with their environments.

Zoology field courses are offered both at the main campus and at the Friday Harbor Laboratories. See individual course listings for location.

---

## Graduate Program

Graduate Program Coordinator  
106 Kincaid, Box 351800  
(206) 685-8240

Programs of study leading to the degree of Doctor of Philosophy are available in the areas of cell biology, molecular biology, developmental biology, developmental genetics, ecology, evolution, behavior, invertebrate and vertebrate morphology, organismic and comparative physiology, endocrinology, and neurobiology, as well as mathematical approaches to the above topics. Interdisciplinary programs are offered in developmental biology, cell and molecular biology, and neurobiology.

## Research Facilities

Modern instruments (TEM, confocal microscopy) and special facilities (radioisotope, neurophysiology, and sea-water rooms) needed for instructional and research purposes are available in Kincaid Hall. The department also houses a superb computational facility consisting of SGI machines and a variety of UNIX, Mac and PC workstations. Extensive natural-history collections are housed at the Burke Museum. The facilities of the Friday Harbor Laboratories on San Juan Island are available for research. The department is within 100 yards of the Magnuson Health Sciences Center, one of the top medical-research institutions in the country. Several researchers at the Fred Hutchinson Cancer Research Center are appointed as affiliate faculty in the department.

## Special Requirements

Completed applications for entry in autumn quarter must be received by January 15.

Entering students should have preparation in several of the areas listed above, organic chemistry, physical chemistry in some cases, two quarters of college physics, and mathematics through calculus.

All students are required to acquire at least three quarters of teaching experience regardless of their source of support.

## Financial Aid

Normally all prospective candidates for the Ph.D. degree are supported by teaching or research assistantships or by fellowships or traineeships from national or private agencies. Summer appointments are available both on the Seattle campus and at the Friday Harbor Laboratories on San Juan Island.

---

## Faculty

### Chair

Barbara T. Wakimoto

### Professors

Beecher, Michael D. \* 1978, (Adjunct); MA, 1965, PhD, 1970, Boston University; animal communication, animal behavior, sensory processes.

Boersma, P. Dee \* 1974; PhD, 1974, Ohio State University; ecology and conservation biology, reproductive strategies, colonial seabird biology.

Brenowitz, Eliot A. \* 1987; PhD, 1982, Cornell University; animal behavior, neuroethology, neuroendocrinology, animal communication.

Cloney, Richard A. \* 1962, (Emeritus); PhD, 1959, University of Washington; invertebrate embryology, histology, morphogenetic movements, metamorphosis, biology of ascidians.

Daniel, Thomas L. \* 1984; PhD, 1982, Duke University; functional morphology, biomechanics, mechanics and energetics of animal locomotion.

Deyrup-Olsen, Ingrith J. \* 1964, (Emeritus); PhD, 1944, Columbia University; general physiology, cell-membrane phenomena.

Ebrey, Thomas 2000, (Research); PhD, 1968, University of Chicago; phototransaction in biology, halo bacteria.

Edwards, John S. \* 1967; PhD, 1960, Cambridge University (UK); arthropod neurobiology, insect physiology and development, tundra and alpine biology.

Felsenstein, Joseph \* 1968, (Adjunct); PhD, 1968, University of Chicago; evolution and population genetics.

Foe, Victoria 1984, (Research); PhD, 1975, University of Texas (Austin); cell cycle control and morphogenesis in *Drosophila* embryos.

Gorbman, Aubrey \* 1963, (Emeritus); PhD, 1940, University of California (Berkeley); endocrinology and neuroendocrinology.

Graubard, Katherine \* 1979, (Research); PhD, 1973, University of Washington; cellular neurophysiology, neural basis of behavior.

Hauschka, Stephen D. \* 1972, (Adjunct); PhD, 1966, Johns Hopkins University; muscle gene regulation, gene therapy, stem cell phenotypic conversion.

Herring, Susan W. \* 1990, (Adjunct); PhD, 1971, University of Chicago; vertebrate functional morphology, relations between muscular function and skull growth.

Hille, Merrill B. \* 1976; PhD, 1965, Rockefeller University; developmental biology, gastrulation in sea urchin embryos, translational regulation during meiosis.

Huey, Raymond B. \* 1977; PhD, 1975, Harvard University; evolutionary and physiological ecology, herpetology, behavior.

Karr, James \* 1991; PhD, 1970, University of Illinois; ecology and conservation biology, water resources, environmental sciences, natural resources.

Kenagy, George James \* 1976; PhD, 1972, University of California (Los Angeles); ecophysiology and behavior, reproduction and life history, population biology, evolution, mammalogy.

Kingsolver, Joel \* 1986; PhD, 1981, Stanford University; physiological ecology and evolutionary morphology of insects.

Kohn, Alan J. \* 1961, (Emeritus); PhD, 1957, Yale University; invertebrate zoology, ecology and functional morphology of marine invertebrates.

Kozloff, Eugene N. \* 1964, (Emeritus); PhD, 1950, University of California (Berkeley); biology of lower invertebrates, ciliates, orthonectids, turbellarians and kinorhynchans.

Laird, Charles D. \* 1971; PhD, 1966, Stanford University; cell and developmental biology, human genetics.

Martin, Arthur W. 1958, (Emeritus); PhD, 1936, Stanford University; comparative invertebrate physiology.

Moody, William J. \* 1982; PhD, 1977, Stanford University; single cell electrophysiology, development of electrical properties in embryos.

Morse, M. Patricia 1992, (Acting); PhD, 1966, University of New Hampshire; invertebrates, interstitial molluscs, functional ultrastructure of bivalve heart-kidney and blood

Murray, James D. \* 1988, (Adjunct); PhD, 1956, DSc, 1968, Oxford University (UK); mathematical biology, biological pattern formation, wound healing, spread of epidemics.

Nordlander Edwards, Ruth 1997, (Acting); PhD, 1968, DDS, 1980, Case Western Reserve University; frog embryology and axonal guidance.

Odell, Garrett M. \* 1985; PhD, 1972, Johns Hopkins University; mathematical biology, ecology, models in cell and developmental biology.

Orians, Gordon H. \* 1960, (Emeritus); PhD, 1960, University of California (Berkeley); ecology and ethology, vertebrate social systems, community structure, plant-herbivore interactions.

Paine, Robert T. \* 1962, (Emeritus); PhD, 1961, University of Michigan; experimental ecology, organization and structure of marine communities.

Palka, John M. \* 1969; PhD, 1965, University of California (Los Angeles); neurophysiology, sensory physiology, developmental neurobiology.

Pietsch, Theodore W. \* 1978, (Adjunct); PhD, 1973, University of Southern California; ichthyology.

Pinter, Robert B. \* 1967, (Adjunct Emeritus); MS, 1960, PhD, 1964, Northwestern University; cybernetics, robotics, biophysics.

Reeder, Ronald H. \* 1981, (Affiliate); PhD, 1965, Massachusetts Institute of Technology; regulation of ribosomal RNA transcription by RNA polymerase I.

Riddiford, Lynn M. \* 1973; PhD, 1961, Cornell University; insect development and physiology, invertebrate endocrinology, mechanisms of hormone action.

Rohwer, Sievert A. \* 1973; PhD, 1971, University of Kansas; ecology and evolution of social behavior, avian biology and systematics.

Schubiger, Gerold A. \* 1972; PhD, 1968, University of Zurich (Switzerland); developmental genetic control of *Drosophila* embryos, pattern formation in imaginal disks.

Steiner, Robert A. \* 1977, (Adjunct); PhD, 1975, University of Oregon; neuroendocrinology.

Strathmann, Richard R. \* 1973; PhD, 1970, University of Washington; invertebrate development, larval ecology and developmental strategies of marine invertebrates.

Truman, James W. \* 1973; PhD, 1970, Harvard University; hormones and invertebrate behavior, insect neural development, circadian rhythms.

Wakimoto, Barbara T. \* 1984; PhD, 1981, Indiana University; developmental genetics, gene expression and chromosome organization in eukaryotes.

Ward, Peter D. \* 1984, (Adjunct); PhD, 1976, McMaster University (Canada); invertebrate paleontology, paleobiology.

Whiteley, Arthur H. \* 1947, (Emeritus); PhD, 1945, Princeton University; comparative developmental physiology of invertebrates, gene action, fertilization.

Willows, A. O. Dennis \* 1969; PhD, 1967, University of Oregon; invertebrate neurophysiology, neural mechanisms underlying behavior.

Wingfield, John C. \* 1985; PhD, 1973, University College of North Wales (UK); environmental and hormonal control of avian reproductive cycles.

Yao, Meng Chao \* 1988, (Affiliate); PhD, 1975, University of Rochester; regulation of gene amplification and chromosome rearrangements in Tetrahymena.

### Associate Professors

Bakken, Aimee \* 1973; PhD, 1970, University of Iowa; gene regulation during oogenesis and embryogenesis, developmental, cellular and molecular biology.

Cooper, Mark S. \* 1990; PhD, 1985, University of California (Berkeley); cellular physiology and cell motility in developing tissues.

Dethier, Megan N. 1985, (Research); PhD, 1981, University of Washington; marine intertidal ecology, shoreline classification systems, plant-herbivore interactions.

Edwards, Scott V. 1994; PhD, 1992, University of California (Berkeley); molecular population genetics and evolution, avian comparative biology and systematics.

Griffiths, W. Mary 1971, (Emeritus); MA, 1942, PhD, 1953, University of California (Berkeley); zoology.

Kimelman, David \* 1989, (Adjunct); PhD, 1985, Harvard University; molecular regulation of early vertebrate development.

Ostrander, Elaine A. \* 1994, (Affiliate); PhD, 1987, Oregon Health Sciences University; study of human cancer susceptibility genes.

Parkhurst, Susan M. 1994, (Affiliate); PhD, 1995, Johns Hopkins University; developmental, genetic and molecular analysis of *Drosophila* embryogenesis.

Priess, James R. \* 1993, (Affiliate); PhD, 1983, University of Colorado (Boulder); reliability models, fault trees.

Wright, Robin L. \* 1990; PhD, 1985, Carnegie Mellon University; biogenesis of membranes, yeast cell biology.

### Assistant Professors

Bosma, Martha \* 1987; PhD, 1986, University of California (Los Angeles); development of CNS neuronal properties, electrophysiology and imaging of single cells.

Groom, Martha 1989, (Adjunct); PhD, 1995, University of Washington; environmental studies.

Grünbaum, Daniel 1998, (Research); PhD, 1991, Cornell University; theoretical ecology, marine biology, biomechanics, biomedical ecology, conservation biology.

Maron, John L. \* 1998, (Adjunct); PhD, 1996, University of California (Davis); plant population biology, plant-consumer interactions, conservation biology.

Moens, Cecilia B. \* 1998, (Affiliate); PhD, 1993, University of Toronto; molecular and medical genetics.

Naeem, Shahid \* 1998; PhD, 1988, University of California (Berkeley); ecosystem consequences of declining plant, animal, and microbial biodiversity.

O'Carroll, David C. \* 1998; PhD, 1989, Flinders University (Australia); neuroethology, sensory systems and behavior, visual processing.

Parrish, Julia \* 1990, (Research); PhD, 1988, Duke University; behavioral ecology, conservation biology, predator-prey interactions.

Raible, David W. \* 1995, (Adjunct); PhD, 1989, University of Pennsylvania; zebrafish neural development.

Ruesink, Jennifer 1990; PhD, 1996, University of Washington; marine community ecology, especially food web interactions, species, invasions, and conservation.

Rutherford, Suzanne L. 1999, (Affiliate); PhD, 1995, University of California (San Diego); developmental canalization and the evolution of networks of signal transduction pathways.

Schindler, Daniel E. \* 1997; PhD, 1995, University of Wisconsin; ecosystem and community ecology, especially of aquatic systems; limnology.

Secord, David L. 1995, (Adjunct); PhD, 1995, University of Washington; population and community ecology, marine ecology and biodiversity, conservation biology.

Swalla, Billie J. 1999; PhD, 1988, University of Iowa; evolution of invertebrates studied by comparison of gene expression and sequences.

Wasser, Samuel K. \* 1982, (Adjunct); PhD, 1981, University of Washington; behavioral ecology, endocrinology, conservation genetics and reproductive biology.

### Lecturers

Frederickson, Richard 1994; PhD, 1970, University of North Dakota; human physiology.

Herron, Jon 1997; PhD, 1996, University of Washington; evolution, physiological ecology, population genetics, evolutionary psychology.

Petersen, Karen E. 1991; PhD, 1983, University of New Mexico; introductory human physiology, comparative vertebrate anatomy, vertebrate natural history.

Ramenofsky, Marilyn 1987; PhD, 1982, University of Washington; environmental endocrinology, physiology and behavior of avian migration.

Rudkin, Alison H. 1974; MS, 1973, University of Washington; physiology and development.

Shellenbarger, David 1977; PhD, 1974, University of Iowa; developmental biology, cell biology.

Wenderoth, Mary Pat 1994; PhD, 1987, Rush Medical College; animal physiology and anatomy, muscle development, science education.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsocat/](http://www.washington.edu/students/crsocat/).

**ZOOL 403 Comparative Vertebrate Histology (5) NW** Microscopic and submicroscopic anatomy of vertebrates. Emphasis on mammals. Light microscopy and interpretation of ultrastructure. Functions of basic tissue types and organs as related to structure. Prerequisite: either BIOL 202 or BIOL 355.

**ZOOL 408 Mechanisms of Animal Behavior (4) NW** *Beecher, Brenowitz* Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisite: either BIOL 102, BIOL 203, or PSYCH 200. Offered: jointly with PSYCH 408; W.

**ZOOL 409 Sociobiology (5) NW** *Rohwer* Biological bases of social behavior, emphasizing evolution as a paradigm. Topics are: individual versus group selection, kin selection, altruism, group versus indi-

vidual living, mating systems, parental care of offspring, and competitive strategies. Prerequisite: either PSYCH 200 or both BIOL 202 and BIOL 203. Offered: jointly with PSYCH 409.

**ZOOL 410 Ethology and Ecology Laboratory (4) NW** *Boersma* Field projects on foraging and social behavior, species interactions and structure of terrestrial and marine communities, including special student research problems. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: BIOL 472. Offered: Sp.

**ZOOL 414 Molecular Evolution (5) NW** *S Edwards* Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level.

**ZOOL 430 Marine Zoology (8) NW** *Strathmann* Survey of groups of invertebrate animals represented in marine environments; natural history, ecology, distribution, habitat, adaptation, and trophic interrelationships. Permission of Director, Friday Harbor Laboratories required for registration. Recommended: 20 credits in biological sciences. Offered: at Friday Harbor Laboratories; Sp.

**ZOOL 432 Marine Invertebrate Zoology (9) NW** Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed alive, and studied in detail. Not open for credit to students who have taken 433 or 434. Recommended: 20 credits in biological sciences. Offered: at Friday Harbor Laboratories; S.

**ZOOL 433 Invertebrate Zoology (5) NW** Comparative biology and morphology of invertebrates. Laboratory work emphasizes structures and functions. Deals with principles of animal organization, Protista, simpler multicellular animals, echinoderms, and chordates. Not open to students who have taken 430 or 432. Prerequisite: BIOL 102 or BIOL 202. Offered: A.

**ZOOL 434 Invertebrate Zoology (5) NW** Comparative biology and morphology of invertebrates. Laboratory work emphasizes structures and functions. Emphasizes annelids and related worms, mollusks, and arthropods. Not open to students who have taken 430 or 432. Prerequisite: BIOL 102 or BIOL 202. Offered: W.

**ZOOL 435 Parasitology (5) NW** General course covering the principles of parasitism and the major groups of animal parasites. Prerequisite: BIOL 102 or BIOL 202.

**ZOOL 436 Invertebrate Endocrinology (3) NW** Survey of endocrine mechanisms used by invertebrate groups to regulate homeostasis, growth, reproduction, and behavior. Special emphasis given to invertebrate model systems that provide unique insights into basic biological processes. Prerequisite: either BIOL 202, ZOOL 301, or ZOOL 315; either CHEM 220, CHEM 224, CHEM 239, or CHEM 337; either PHYS 115 or PHYS 122.

**ZOOL 438 Comparative Endocrinology (3) NW** *Wingfield* Hormonal integration of living processes at all levels in animals: molecules, cells, organs, organisms, populations. Prerequisite: either BIOL 202 or BIOL 102 with either ZOOL 301 or ZOOL 315; recommended: a 400-level course in physiology and biochemistry.

**ZOOL 439 Comparative Endocrinology Laboratory (2) NW** *Wingfield* A broad introduction to endocrine techniques with appropriate experiments to accompany and enlarge on material presented in 438. Prerequisite: ZOOL 438 which may be taken concurrently.

**ZOOL 440 Biomechanics (4) NW** *Daniel* Physical biology emphasizing a mechanical approach to ecological, evolutionary, and physiological questions. Basic principles underlying fluid and solid mechanics to explore responses of animals to flows, loads, and motions. Recommended: either BIOL 102 or BIOL 202; either MATH 125 or Q SCI 292; either PHYS 114 or PHYS 121.

**ZOOL 444 Entomology (3) NW** Biology of terrestrial arthropods, with emphasis on insects. Structure, classification, physiology, and ecology of insects. Interrelationships of insects and man. Prerequisite: either BIOL 102 or both BIOL 202 and BIOL 203. Offered: Sp.

**ZOOL 445 Entomology Laboratory (2) NW** Structure and function of arthropods, with emphasis on insects. Field studies and taxonomy of important insect groups. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: ZOOL 444 which may be taken concurrently. Offered: Sp.

**ZOOL 448 Concepts of Nervous System Function (3) NW** *Palka* Broad examination of integrative mechanisms in central nervous system function, with emphasis on sensory processing, plasticity, and control of behavior. Examples are taken from a variety of animal groups. Prerequisite: BIOL 202.

**ZOOL 451 Vertebrate Zoology (5) NW** *Kenagy* The biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips, films, and introduction to regional vertebrate fauna. Prerequisite: either BIOL 102 or both BIOL 202 and BIOL 203.

**ZOOL 453 Comparative Anatomy of Vertebrates (5) NW** Comparison of the structure of vertebrates with emphasis on evolution and organ system functions. Prerequisite: BIOL 202; recommended: B STR 301; ZOOL 451. Offered: W.

**ZOOL 455 Developmental Biology of Animals (4) NW** *Schubiger* Embryology and subsequent development of vertebrate and invertebrate animals, including *Xenopus*, mammals, chicks, *Drosophila*, echinoderms. Morphological changes in developing animals; experimental analysis of developing systems; underlying genetic and biochemical regulation of development. Prerequisite: either BIOL 202, BIOL 401, or either BIOL 355, BIOC 405, BIOC 440, or ZOOL 301 with either GENET 371 or GENET 372.

**ZOOL 456 Developmental Biology of Animals Laboratory (3) NW** *Shellenbarger* Normal development of living embryos (frog, chick, insect, echinoderm). Internal anatomy of embryos on prepared slides. Comparisons between vertebrate and invertebrate animals. Scientific style reports on experiments. Prerequisite: ZOOL 455 which may be taken concurrently.

**ZOOL 457 Methods and Problems in Development (3) NW** *Schubiger, Kimelman* Special topics in development. Integrating classical and current approaches. Developmental genetics, experimental embryology, molecular mechanisms of developmental regulation, and gene function in cell determination and cell differentiation in animal systems. Prerequisite: either ZOOL 455 or BIOL 202 with BIOL 401 and either GENET 371 or GENET 372.

**ZOOL 459 Developmental Neurobiology (3) NW** *Bosma* Invertebrate and vertebrate examples illustrate the mechanisms used in constructing nervous systems. Focus on the cellular and molecular mechanisms that underlie questions about the basis of neuronal diversity, axonal pathfinding and target recognition, synaptogenesis, and activity-dependent plasticity. Prerequisite: either BIOL 202, BIOL 355, or ZOOL 301; either BIOL 401 or ZOOL 455.

**ZOOL 464 Natural History of Birds (5) NW** *S Edwards, Wingfield* Field, lecture, and laboratory study of birds framed in biological theory rather than taxonomy. Breeding systems, brood parasitism, appearance, molt, migration, orientation, social behavior, song, and flight are emphasized. Includes Saturday and weekend field trips for which students are required to share a portion of transportation costs. Prerequisite: either BIOL 102 or both BIOL 202 and BIOL 203. Offered: Sp.

**ZOOL 467 Comparative Animal Reproduction (3) NW** *Ramenofsky, Wingfield* Reproductive mechanisms, environmental influences on reproductive endocrinology, physiology, behavior, ecology of vertebrates. Discussions extend from organismal to cellular level, and focus on diversity of reproductive patterns among vertebrates. Prerequisite: BIOL 102 or both BIOL 202 and BIOL 203; recommended: biochemistry and physiology.

**ZOOL 468 Comparative Animal Reproduction Laboratory (2) NW** *Ramenofsky, Wingfield* Laboratory and field studies on animal reproduction involving endocrinology, anatomy, behavior, and ecology. Accompanies, supplements, and extends material presented in 467. Prerequisite: ZOOL 467 which may be taken concurrently.

**ZOOL 470 Techniques for Mathematical Biology (3) NW** *Odell* Equips students to use, rather than prove, many applied mathematics techniques essential in mathematical biology. Includes instruction to use symbolic computation software (Mathematica, Macsyma) to do by computer the kind of mathematical formula manipulation that mathematicians formerly performed by hand. Recommended: calculus, linear algebra.

**ZOOL 471 Models in Biology (4) NW** *Odell* Explores use of models in biology in a wide range of topics, including morphogenesis, nerve signals, ecological interactions, population biology, and evolutionary theory. Emphasis on the biological insights models can provide rather than mathematical techniques. Prerequisite: either ZOOL 470, MATH 125, MATH 128, MATH 134, MATH 145, or Q SCI 292.

**ZOOL 484 Animal Physiology (3) NW** *Huey, Riddiford, Truman* Physiology at levels of organisms and behavior, organ systems, and cells—an evolutionary and integrative perspective. Organismal physiology: metabolism, temperature, locomotion, osmoregulation, respiration, circulation, digestion. Prerequisite: either BIOL 202, ZOOL 301, ZOOL 315, or BIOL 355; either CHEM 155, CHEM 160, CHEM 162, CHEM 164, CHEM 165, or CHEM 220; either PHYS 114 or PHYS 121.

**ZOOL 485 Animal Physiology (3) NW** *Huey, Riddiford, Truman* Physiology at levels of organisms and behavior, organ systems, and cells—an evolutionary and integrative perspective. Integrative physiology: neurons, muscles, and hormones. Prerequisite: either BIOL 202, ZOOL 301, ZOOL 315, or BIOL 355; either CHEM 160, CHEM 162, CHEM 164, CHEM 165, or CHEM 220; either PHYS 114 or PHYS 121.

**ZOOL 486 Animal Physiology Lab (2) NW** *Huey, Riddiford, Truman* Experimental design and techniques, data analysis, written reports. Project labs in organismal-level physiology. Prerequisite: ZOOL 484 which may be taken concurrently.

**ZOOL 487 Animal Physiology Lab (2) NW** *Huey, Riddiford, Truman* Experimental design and techniques, data analysis, written reports. Experiments in integrative physiology. Prerequisite: ZOOL 485 which may be taken concurrently.

**ZOOL 490 Undergraduate Seminar (3, max. 6) NW** Supervised reading and group discussion on selected concepts of zoology. Recommended: one upper-division zoology course.

**ZOOL 491 Topics in Zoological Research (1, max. 3) NW** Undergraduate seminar on research problems currently under investigation by department faculty members. Includes discussions and laboratory demonstrations of aims, techniques, and results of zoological research. Credit/no credit only. Recommended: one upper-division zoology course.

**ZOOL 492 Animal Migration (3) NW** Undergraduate seminar on evolution, ecology, behavior, and physiology of migration. Student presents a seminar and leads class discussion on a selected topic. Prerequisite: either BIOL 102 or BIOL 203; recommended: course in physiology, ecology, or animal behavior.

**ZOOL 498 Special Problems in Zoology (1-5, max. 15)** Recommended: one upper-division zoology course. Offered: AWSpS.

## Courses for Graduates Only

**ZOOL 506 Topics in Developmental Biology (1-2, max. 15)** Seminars and discussions of aspects of growth of special current interest.

**ZOOL 509 Topics in Vertebrate Biology (1-3, max. 15)** *Rohwer* Detailed consideration of topics in behavioral integration, communication, and social organization. Prerequisite: ZOOL 409 or PSYCH 409 or equivalent.

**ZOOL 520 Seminar (1)** Credit/no credit only. Offered: A.

**ZOOL 521 Seminar (1)** Credit/no credit only. Offered: W.

**ZOOL 522 Seminar (1)** Credit/no credit only. Offered: Sp.

**ZOOL 525 Seminar in Mathematical Biology (2, max. 12)** *Daniel, Kareiva, Odell* Examines mathematical models in a broad range of topics in biology, from cellular and subcellular to organismal and population phenomena. Participants present research topics, supplemented with selected readings from the primary literature, showing how mathematical methods and experimental or field biology are merged to predict observable phenomena. Credit/no credit only.

**ZOOL 528 Advanced Topics in Physiology (1-3, max. 15)** Recent developments. Prerequisite: one 400-level course in physiology.

**ZOOL 529 Advanced Topics in Physiology (1-3, max. 15)** Recent developments. Credit/no credit only. Prerequisite: one 400-level course in physiology.

**ZOOL 530 Science and Environmental Policy (3)** Role of science and scientists in formulating public policy related to the environment. Conceptualizes policy processes as a means of understanding opportunities for, and limits of, science in development and implementation of public policy. Prerequisite: concurrent registration in ZOOL 531. Offered: W.

**ZOOL 531 Science and Environmental Policy: Case Histories (2)** Examples of the use of scientific analysis in the development of environmental policies. Prerequisite: concurrent registration in ZOOL 530. Offered: W.

**ZOOL 533 Advanced Invertebrate Zoology (9)** Invertebrate fauna of the San Juan Archipelago. Topic changes from year to year. Individual research projects are emphasized. Prerequisite: course in invertebrate zoology and permission of Director of Friday Harbor Laboratories. Offered: at Friday Harbor Laboratories; SpS.

**ZOOL 536 Comparative Invertebrate Embryology (9)** Diversity in developmental patterns in major marine taxa. Analysis of evolutionary changes in development. Emphasis on observation of live em-

bryos and larvae. Prerequisite: permission of Director of Friday Harbor Laboratories; recommended: courses in invertebrate zoology and developmental biology. Offered: at Friday Harbor Laboratories; SpS.

**ZOOL 538 Advanced Invertebrate Physiology (9)** General and comparative aspects of nerve and muscle physiology with particular emphasis upon neuronal control of behavior, neuronal interactions, and other advanced topics determined by visiting faculty. Extensive laboratory experience, including intracellular and extracellular stimulating and recording techniques. Offered: at Friday Harbor Laboratories; Sp.

**ZOOL 540 Topics in Cellular Developmental Biology (1, max. 16)** *Bakken, Cooper, Hille, Moody* Seminar on current topics dealing with cellular aspects of developmental biology. Variable topics on both vertebrate and invertebrate development. Credit/no credit only.

**ZOOL 541 Experimental Design in Cell Biology (1.5)** *Wakimoto, Wright, Hille, Cooper* Focuses on experimental design in cell biology. A topic of current research interest covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with CONJ 536 .

**ZOOL 543 Morphogenesis and Gene Networks (1, max. 12)** *Odell* Seminar on current topics in genetic networks and the mechanics of morphogenesis. Topics vary.

**ZOOL 557 Topics in Molecular Insect Endocrinology (1, max. 12)** *Riddiford* Assigned reading and discussion of current topics in molecular insect endocrinology. Prerequisite: ZOOL 438 or ZOOL 485 or equivalent.

**ZOOL 568 Chemical Integration (2, max. 6)** *Wingfield* Graduate seminar dealing with current problems in endocrinology and neuroendocrinology. Credit/no credit only.

**ZOOL 570 Evolutionary Physiological Ecology (2, max. 16)** *Huey, Kingsolver* Assigned reading, discussion, and student presentations on issues in physiological and ecological aspects of evolution. Topics variable. Credit/no credit only. Prerequisite: BIOL 454 and BIOL 472 or equivalent.

**ZOOL 571 Current Topics in Evolution (1, max. 16)** *Huey, Kingsolver* Assigned reading and discussion of current topics in evolution. Topics variable. Credit/no credit only. Prerequisite: BIOL 454 or equivalent.

**ZOOL 572 Topics in Ecology (1-3, max. 15)** Graduate seminar on modern problems in ecology. Prerequisite: BIOL 472 or equivalent.

**ZOOL 575 Topics in Historical Ecology (2, max. 14)** Assigned reading and discussion of the history of conceptual issues or significant individuals. Topics variable. Credit/no credit only. Prerequisite: BIOL 472 or equivalent.

**ZOOL 577 Marine Invertebrate Biology (1, max. 8)** Seminar on current topics in biology or marine invertebrates at all levels of biological organization. Topics variable. Credit/no credit only. Prerequisite: ZOOL 433 and ZOOL 434 or equivalent.

**ZOOL 578 Advanced Ecology (5)** Strategies of reproduction, habitat selection, foraging and spacing; theory of competition and predator-prey interactions; niche theory and community structure. Prerequisite: BIOL 472 or equivalent.

**ZOOL 579 Criticism in Evolutionary Ecology and Behavior (2, max. 16)** *Rohwer* Critical analysis of manuscripts under preparation that treat evolutionary ecology, morphology, and behavior. Topics variable. Credit/no credit only. Prerequisite: ZOOL 409 or equivalent introduction to evolutionary thinking.

**ZOOL 580 Environmental Physiology and Behavior (2, max. 14)** *Kenagy, Wingfield* Current conceptual issues and research results. Topics vary. Credit/no credit only. Prerequisite: two upper-division courses in physiology or behavior or equivalent.

**ZOOL 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWSpS.

**ZOOL 700 Master's Thesis (\*)** Credit/no credit only. Offered: AWSpS.

**ZOOL 800 Doctoral Dissertation (\*)** Credit/no credit only. Offered: AWSpS.

# School of Business Administration

## Dean

Yash P. Gupta  
114 Mackenzie

## Associate Dean for Academic Affairs

Kamran Moizadeh  
116 Mackenzie  
busadmin@u.washington.edu

 *General Catalog Web page:*  
[www.washington.edu/students/gencaf/academic/School\\_BusinessAdmin.html](http://www.washington.edu/students/gencaf/academic/School_BusinessAdmin.html)

 *School Web page:*  
[depts.washington.edu/bschool/](http://depts.washington.edu/bschool/)

Men and women embarking on business careers will have the opportunity to influence many of the social, political, and economic forces in today's world. The School of Business Administration prepares students for professional careers in management and related disciplines in both the private and public sectors.

The School of Business Administration offers an undergraduate program leading to the degree of Bachelor of Arts (BA) in Business Administration and graduate programs leading to the degrees of Master of Business Administration (MBA), Executive Master of Business Administration (EMBA), Master of Professional Accounting (MPAcc), and Doctor of Philosophy (PhD). Evening BA and MBA programs are also offered.

Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business (now known as the International Association for Management Education) since 1921.

## Facilities and Services

Most Business School classes and activities are in four buildings. Balmer Hall, named for Thomas Balmer, former president of the University Board of Regents, contains classrooms and computer labs. There are four computer labs in Balmer Hall that are available to Business School students. Mackenzie Hall, named in memory of Prof. Donald Mackenzie, Chair of the Department of Accounting from 1949 to 1955, contains the Dean's Office, the Undergraduate Program Office, the Graduate Program Office, the PhD Program Office, Business Administration Computer Services (BACS), Office of Development and External Relations, faculty offices, five department offices, and other business administration program offices. Nearby Lewis Hall contains the Business Career Center and other faculty and administrative offices. A fourth building, on the north side of Balmer, has three distinct components: the Bank of America Executive Education Center (which includes the James B. Douglas Executive Forum), the Boeing Auditorium, and the Albert O. and Evelyn Foster Business Library.

To serve the continuing education needs of middle- and senior-level managers, the School of Business Administration offers a number of certificate programs, either University-initiated or co-sponsored with various community and industry organizations. The Management Program, a nine-month, one night per week program, strengthens understanding and skills in all areas of management and provides an opportunity for successful managers to learn from a distinguished faculty

and each other. Short courses and seminars are offered throughout the year in all areas of management, including marketing strategy, finance and accounting for non-financial executives, negotiation skills, and many others. In addition, the School develops and runs custom programs under contract with individual companies and organizations. Information on continuing education programs may be obtained from the Office of Executive Programs, (206) 543-8560, fax (206) 685-9236, uwexp@u.washington.edu.

## International Business Programs

International business programs are coordinated and developed by the School's Center for International Business Education and Research (CIBER). These activities include the Global Business Program, seminars, internships, business foreign-language programs, special guest-speaker programs, and study tours. In addition, the MBA program coordinates fifteen foreign-exchange programs around the world. Although the Marketing and International Business Department offers a general curriculum in international business, each of the five academic departments within the School maintains faculty with special international teaching and research expertise. Internationally oriented courses are offered by each department.

The Education for the Global Entrepreneur (EDGE) program teams undergraduate and graduate students with local businesses to provide information and assistance necessary to compete successfully in the international arena. This is accomplished through student consulting teams, overseas research projects which involve Business School students on exchange programs, and student interns.

At the MBA level, the Business School offers the Global Business Program (GBP) that provides opportunities for MBA students to build on the international business foundation that every MBA develops through the first year of the program. In addition to international business electives, the GBP includes overseas travel through study tours, quarter-long exchange programs, and international internships. GBP students also participate in the weekly Global Business Forum, which brings top international business leaders to campus to discuss important issues facing their companies and industries.

Questions regarding these programs may be directed to the Program Assistant, CIBER, 303 Lewis, (206) 685-3432, fax (206) 685-4079, uwiciber@u.washington.edu.

## Entrepreneurship Programs

The focus of the Business School's entrepreneurship programs is on nurturing skills that generate creative ideas, innovative processes, and new business growth. These skills are developed through special academic certificate programs, a high-tech entrepreneurship speaker series, internships, a business plan competition, club activities, and consulting opportunities with area businesses.

The Program in Entrepreneurship and Innovation (PEI) is open to both undergraduate and graduate students from the Business School as well as other schools and colleges of the University. Graduate students who wish to complete this specialization must participate in the PEI consulting club, attend the High-Tech Entrepreneurship Speaker Series, complete several PEI core classes, and participate in the Business Plan Competition. Contact PEI for more information at (206) 685-9868.

The Business and Economic Development Program (BEDP) matches undergraduate and graduate student consulting teams with small-business owners in Seattle's inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the

Business and Economic Development Program can be directed to the program office at (206) 543-9327.

## Business Career Center

The Business Career Center coordinates all MBA and MPAcc career services. These include career counseling and career management workshops, the administration of special career events such as career fairs, company presentations, on-campus MBA and MPAcc recruitment, and a job-listing service. The Business Career Center also administers alumni and executive mentoring programs. Questions regarding these programs and services may be directed to the center's office, 202 Lewis, (206) 685-2410.

## Instructional Resources Office

The Instructional Resources Office promotes excellence in teaching by providing resources in current practice and research in teaching and learning. The office serves faculty and teaching assistants with individual consultations, coordinates a teaching preparation program for doctoral students, and offers assistance with instructional innovations.

## Honor Societies

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based on outstanding scholastic achievement.

Beta Alpha Psi is the accounting honor society. Membership is based primarily on scholastic achievement, but some community service is also required. Beta Alpha Psi provides a mechanism for students, professionals, and educators to meet on both formal and informal bases.

## Student Organizations

The goals and interests of graduate students are served by the MBA Association, the Association of Black Business Students, Challenge for Charity, Graduate Consulting Club, MBA Finance Club, Global Business Association, Graduate Accounting Club, Environmental Business Alliance, Graduate and Professional Student Senate, MBA Marketing Club, Program in Entrepreneurship and Innovation Club, PEI Consulting Network, Net Impact, High-Tech Club, MBA Speak-easy, Women in Business, and the Doctoral Association.

## Graduate Programs

Gary Sundem  
Associate Dean for Masters Programs

### Admission

Qualified students who are graduates of the University of Washington or other accredited colleges or universities may be admitted autumn quarter to graduate degree programs. GPA, Graduate Management Admission Test score, work experience, educational and professional objectives, and other factors are considered in the admission process. Inquiries concerning the details of admission should be made to the specific degree program of interest, University of Washington, Graduate School of Business Administration, Mackenzie Hall, Box 353200, Seattle, WA 98195.

### Application Procedure

Applications to graduate programs are considered for entry in autumn quarter only. The formal deadlines for application are: February 1 for the PhD program; December 1, January 1, February 1, and March 1 for domestic applicants for the MBA; February 1 for international applicants for the MBA; April 1 for Evening

MBA; and April 15 for the Executive MBA and MPAcc programs. Students are encouraged to apply as early as possible for the full-time MBA program.

The Graduate School of Business Administration offers programs of study leading to the advanced degrees of Master of Business Administration, Executive Master of Business Administration, Master of Professional Accounting, and Doctor of Philosophy.

## Master of Business Administration

Executive Director  
JoAnne Starr  
110 Mackenzie Hall, Box 353200  
(206) 543-4661  
mba@u.washington.edu

The Master of Business Administration degree program has been designed for students who are preparing for a professional career in management. A period of two academic years, or 96 academic credits, is required for most students to complete the MBA program. The program consists of 48 credits of required first-year courses and 48 elective credits. The student may take no more than 24 credits in any one elective area.

The evening MBA program, initiated in the fall of 1996, is targeted toward fully employed college graduates who seek a management degree that can be earned outside their regular working hours. Instruction takes place two evenings per week and students typically take two courses per quarter. The program consists of 76 academic credits, with normal completion of degree requirements in eleven quarters.

### Special Programs

Within the MBA program, there are options for special study: Global Business Program; Program in Entrepreneurship and Innovation; and the interdisciplinary Global Trade, Transportation, and Logistics Studies. The following concurrent degree programs are also available: MBA/JD with the School of Law, MBA/MAIS with the Henry M. Jackson School of International Studies, MBA/MSE with the College of Engineering's Program in Engineering and Manufacturing Management, and MBA/MHA with the School of Public Health and Community Medicine.

## Executive Master of Business Administration

Assistant Dean  
Ann Lightbody  
(206) 685-1333  
emba@u.washington.edu

Since the autumn of 1983, the Executive MBA Program has provided an additional pathway to the Master of Business Administration degree. The EMBA program provides an intensive executive-development experience to a select group of midcareer managers who continue to work full-time while pursuing the MBA degree. Candidates for this two-year program should have seven or more years of increasingly successful work experience including three to four years in management, and currently hold mid- or top-level management positions. They are typically sponsored by their organizations and have been identified as employees with high potential to advance as general managers. Students are selected to ensure diversity of industry, functional areas and organizational size.

The Executive MBA degree program is offered in two scheduling options. Both run for two academic years, September through June. (1) The Puget Sound Option meets on campus for a full day once a week, on alternating Fridays and Saturdays. In addition, students attend spring and fall residence sessions each

year. (2) The Northwest and Beyond Option meets on campus once a month, generally for three consecutive days, Thursday through Saturday. Between monthly sessions, students continue to interact with faculty and classmates online via the Internet and interactive groupware. This format is designed for individuals from the greater Northwest as well as those from the Puget Sound area whose schedules preclude weekly attendance.

While the scope of the curriculum is comparable to that of the regular MBA program, the pace is more intense and the perspective is that of a general manager. There are 21 required courses and no electives.

Applications are accepted throughout the year, with an application deadline of April 15 for the class beginning each autumn. Late applications are handled on a space-available basis.

## Master of Professional Accounting

Managing Director  
Francine Shafer  
231 Mackenzie  
(206) 616-4964

The Master of Professional Accounting (MPAcc) prepares students for high-level careers with major accounting and consulting firms, governmental agencies, and industry. Students with undergraduate degrees in accounting may complete the program in four quarters. Students with no prior business background must take an expanded version of the program. Enrollment is limited to 25 to 30 students in each of two tracks—Accounting and Audit (A&A) and Taxation. MBA students with a strong interest in accounting and taxation may earn a joint MBA/MPAcc degree.

## Doctor of Philosophy

Program Coordinator  
Jaime Banaag  
102 Mackenzie  
(206) 543-4111  
baphd@u.washington.edu

The Ph.D. program in business administration is a research-based program designed to train scholars interested in academic careers, although this training is also useful for individuals seeking research positions in business and government, as well as in consulting firms.

With the guidance of faculty members who have similar interests, Ph.D. students complete a program of formal coursework (a minimum of 18 courses) and participate in doctoral seminars, independent study, and research. A faculty supervisory committee is appointed early in the program to assist each student in constructing a course of study that fits that individual's background and interests. Students select one major area of specialization and complete requirements in two or three additional minor areas that support their major area of specialization (including areas outside the Business School, such as economics, psychology, and mathematics). Throughout the program, doctoral students receive support and training that hone their skills as teachers and course developers.

Major areas of concentration include accounting, finance, human resource management and organizational behavior, marketing, information systems, operations management, operations research, and strategic management. All doctoral students are required to have research methods as one of their minor areas.

Doctoral study is full-time and year-round, and students are admitted autumn quarter only. Most candidates will require four to five years to complete the

program. The School's goal is to make financial aid available, in the form of research and teaching assistantships, to all of its doctoral students. In addition to service appointments, fellowships are available on a competitive basis to support students engaged in their dissertation research during the final part of their programs.

### Special Requirements

Applicants to graduate business programs are required to submit scores on the Graduate Management Admission Test. Those admitted to the MBA program must demonstrate understanding of the fundamental concepts of calculus.

## Accounting

Accounting involves development and communication of financial and operational information for business and nonprofit economic entities. The curriculum includes understanding accounting information systems, using accounting information in managerial decision making, preparing and auditing financial statements under generally accepted accounting and auditing standards, and understanding the fundamental aspects of personal and corporate taxation. Elective courses provide in-depth instruction in managerial and financial accounting, not-for-profit accounting, and taxation. Courses provide a foundation for careers in accounting (public, industrial, private, or governmental), for a general business career, or for other professions such as law.

## Faculty

### Chair

Stephan E. Sefcik

### Professors

Berg, Kenneth B. \* 1950, (Emeritus); MS, 1941, PhD, 1952, University of Illinois; financial and managerial accounting.

Bowen, Robert M. \* 1978; PhD, 1978, Stanford University; financial and managerial accounting.

Burgstahler, David C. \* 1980; PhD, 1981, University of Iowa; financial and managerial accounting, statistical methods.

Dukes, Roland E. \* 1979; PhD, 1974, Stanford University; financial and managerial accounting.

Heath, Loyd C. \* 1962, (Emeritus); PhD, 1965, University of California (Berkeley); financial accounting.

Jiambalvo, James \* 1977; PhD, 1977, Ohio State University; managerial accounting, auditing.

Mueller, Fred J. \* 1953, (Emeritus); PhD, 1956, Ohio State University; auditing, not-for-profit, tax accounting.

Noreen, Eric W. \* 1976; PhD, 1976, Stanford University; managerial accounting.

Ramanathan, K. V. \* 1972; PhD, 1970, Northwestern University; managerial accounting.

Sefcik, Stephan E. \* 1986; PhD, 1983, University of Illinois; financial reporting and environmental accounting issues.

Shevlin, Terrence J. \* 1985; PhD, 1986, Stanford University; financial accounting, capital markets, taxation.

Sundem, Gary L. \* 1971; PhD, 1971, Stanford University; information systems, managerial accounting, information economics.

**Associate Professors**

Kennedy, S. Jane 1991; MBA, 1977, University of Alberta (Canada); PhD, 1992, Duke University; financial and managerial accounting.

Shores, Donna J. \* 1986; MS, 1980, University of Wisconsin; PhD, 1986, Stanford University; financial and managerial accounting.

**Assistant Professors**

Kadous, Kathryn K. 1998; PhD, 1996, University of Illinois; auditing, financial accounting.

Myers, James N. 1996; PhD, 1997, University of Michigan; accounting/financial statement analysis.

Paperman, Joseph B. 1995; MS, 1984, Purdue University; PhD, 1997, Cornell University; capital markets/financial accounting.

Rajgopal, Shivaram 1998; PhD, 1998, University of Iowa; reverse recognition accounting.

**Senior Lecturers**

Resler, William M. 1982; JD, 1972, University of Washington; LLM, 1973, New York University; tax accounting.

Rice, Steven J. 1985; MS, 1971, Oklahoma State University; PhD, 1974, University of Texas (Austin); tax accounting.

**Lecturers**

Angell, Patricia L. 1998; MPAcc, 1999, University of Washington.

Britzmann, Jeannie R. 1993; MPAcc, 1994, University of Washington; tax accounting.

Creech, William R. 1992; LLM, 1983, New York University; taxation.

Gillick, James V. 1986; BBA, 1957, University of Louisville.

Wells, William L. 1988; MPAcc, 1989, University of Washington; financial reporting, not-for-profit accounting.

## Finance and Business Economics

Finance and Business Economics address the financial and economic aspects of business decision making. The Finance curriculum focuses on financial management and the financial markets within which firms and individual investors operate. Business Economics courses concern the economic behavior of firms, including factors that determine costs and prices, and real and monetary forces (such as government policies) that affect the national and international economic environment.

### Faculty

**Chair**

Lawrence D. Schall

**Professors**

Alberts, William \* 1967, (Emeritus); PhD, 1961, University of Chicago; capital investment planning, business strategy, economics of industrial organization.

Bourque, Philip J. \* 1957, (Emeritus); PhD, 1956, University of Pennsylvania; business economics.

Bradford, William D. 1994; MBA, 1968, PhD, 1972, Ohio State University; corporate finance, small and minority business, financial markets and institutions.

Conrad, Douglas A. \* 1977, (Adjunct); MHA, 1973, University of Washington; MBA, 1977, PhD, 1978, University of Chicago; managed care, corporate finance in managed care.

D'ambrosio, Charles A. \* 1960, (Emeritus); PhD, 1962, University of Illinois; finance.

Ferson, Wayne E. \* 1992; PhD, 1982, Stanford University; financial economics and investments.

Frost, Peter A. \* 1969; PhD, 1966, University of California (Los Angeles); investments, business finance, econometrics, monetary theory.

Haley, Charles \* 1966; PhD, 1968, Stanford University; business finance, financial management of banks, international finance.

Hanson, Kermit O. 1948, (Emeritus); MS, 1940, PhD, 1950, Iowa State University; accounting and statistics.

Hess, Alan C. \* 1967; PhD, 1969, Carnegie Mellon University; banking, financial markets, microeconomics and macroeconomics.

Higgins, Robert C. \* 1967; PhD, 1969, Stanford University; financial management, international financial management.

Johnson, Dudley \* 1960, (Emeritus); PhD, 1957, Northwestern University; business economics.

Kamara, Avraham \* 1984; PhD, 1986, Columbia University; financial economics, investment, futures and options.

Karpoff, Jonathan M. \* 1983; PhD, 1982, University of California (Los Angeles); corporate finance, law and economics, natural resources.

Malatesta, Paul H. \* 1980; PhD, 1982, University of Rochester; corporate finance, security and capital markets, corporate mergers, and empirical methods in finance.

Roley, V. Vance \* 1983; PhD, 1977, Harvard University; financial markets, finance, monetary theory, monetary policy.

Schall, Lawrence D. \* 1968; PhD, 1969, University of Chicago; corporate finance, valuation, leasing, performance evaluation, acquisitions.

Siegel, Andrew F. \* 1983; MS, 1975, PhD, 1977, Stanford University; statistics, computing, corporate finance, investments, data analysis.

**Associate Professors**

Dewenter, Kathryn L. \* 1992; PhD, 1993, University of Chicago; international finance, macroeconomics.

Koski, Jennifer Lynch \* 1991; MBA, 1987, Harvard University; PhD, 1991, Stanford University; corporate finance, market microstructure.

Pigott, William 1954, (Emeritus); MA, 1955, PhD, 1957, University of Washington; finance and business economics.

Pontiff, Jeffrey E. \* 1992; PhD, 1994, University of Rochester; corporate finance, capital market theory, closed-end mutual funds, investments.

Rice, Edward M. \* 1979; PhD, 1978, University of California (Los Angeles); corporate finance, microeconomics, industrial organization.

**Assistant Professor**

Novaes, Walter 1993; PhD, 1993, Massachusetts Institute of Technology; corporate finance, contract theory, industrial organization.

**Senior Lecturers**

Glassman, Debra A. 1989; PhD, 1980, University of Wisconsin; international finance, international economic policy, macroeconomics.

Hadjimichalakis, Karma G. 1976; MA, 1968, PhD, 1974, University of Rochester; monetary policy, bank-

ing, financial markets, domestic and international macroeconomics.

Tarhouni, Ali A. 1985; MA, 1978, PhD, 1983, Michigan State University; economic theory, international trade and finance, financial markets.

## Management and Organization

Management and Organization provides an understanding of the processes and structures of organizations through three distinct programs. The Human Resource Management and Organizational Behavior (HRMOB) courses address personnel and industrial-relations topics such as selection, performance appraisal, compensation, and negotiations, as well as behavioral topics such as leadership, motivation, and group dynamics. They prepare students for managing an organization's human resources effectively. The Organization and Environment (O E) courses examine organization theory, organization design, and management of technology and innovation, as well as the social, political, legal, and ethical environments in which organizations operate. They give students the knowledge, perspective, and analytical tools to deal effectively with organization-environment interactions. The Business Policy (B POL) courses focus on organizational effectiveness from the viewpoint of top management. Emphasis is placed on an integrated view through strategic management and control, planning, decision making, and entrepreneurship.

Charles William L. Hill

**Professors**

Fenn, Margaret P. \* 1950, (Emeritus); DBA, 1963, University of Washington; organizational behavior and administrative theory.

French, Wendell L. \* 1958, (Emeritus); EdD, 1956, Harvard University; organizational behavior, human resources management, organization development.

Gist, Marilyn Elaine \* 1987; PhD, 1985, University of Maryland; cognitive processes involved in motivation training and work task performance.

Henning, Dale A. \* 1955, (Emeritus); PhD, 1954, University of Illinois; administrative theory and organizational behavior.

Hill, Charles William L. \* 1988; PhD, 1983, University of Manchester (UK); business policy, corporate strategy, multinational enterprise.

Huber, Vandra Lee \* 1987; DBA, 1982, Indiana University; human resource decision making, compensation, and performance appraisal.

Johnson, Richard A. \* 1969, (Emeritus); DBA, 1958, University of Washington; business policy.

Jones, Thomas M. \* 1977; PhD, 1977, University of California (Berkeley); ethics, business, government and society.

Kast, Fremont E. \* 1978, (Emeritus); DBA, 1956, University of Washington; administrative theory and organizational behavior.

Lee, Thomas W. \* 1983; PhD, 1984, University of Oregon; administrative theory and organizational behavior, human resources management.

Mitchell, Terence R. \* 1969; PhD, 1969, University of Illinois; organizational behavior.

Moxon, Richard W. \* 1971; DBA, 1973, Harvard University; international business.

Newell, William T. \* 1963, (Emeritus); PhD, 1962, University of Texas (Austin); operations management and business policy.

Peterson, Richard B. \* 1971; PhD, 1966, University of Wisconsin; cross-cultural management, industrial relations.

Rosenzweig, Jim E. \* 1956, (Emeritus); PhD, 1956, University of Illinois; administrative theory and organizational behavior.

Saxberg, Borje O. \* 1957; PhD, 1958, University of Illinois; administrative theory, organizational behavior, entrepreneurship.

Scott, William George \* 1966, (Emeritus); DBA, 1957, Indiana University; administrative theory and organizational behavior.

Sutermeister, Robert A. 1949, (Emeritus); MA, 1942, University of Washington; personnel and organizational behavior.

Vesper, Karl H. \* 1969; PhD, 1969, Stanford University; business policy, mechanical engineering, marine studies.

Wheeler, Bayard O. 1948, (Emeritus); MA, 1930, University of Washington; PhD, 1942, University of California (Berkeley); urban economics.

#### Associate Professors

Butler, John E. \* 1985; PhD, 1985, New York University; entrepreneurship, technology and innovation, strategic management.

Hansen, Gary S. \* 1984; PhD, 1987, University of Michigan; business and corporate strategy, innovation and entrepreneurship.

Kienast, Philip K. \* 1970; PhD, 1972, Michigan State University; human resources management.

Kotha, Suresh \* 1996; MBA, 1983, Rensselaer Polytechnic Institute; MArch, 1985, MS, 1986, PhD, 1988, Rensselaer Polytechnic Institute; competitive strategy, competing on the Internet and e-commerce, and international management.

Strong, Dennis Fulton \* 1967, (Emeritus); PhD, 1959, University of Washington; business history.

Wickman, James A. \* 1953, (Emeritus); DBA, 1961, University of Washington; risk control and insurance.

Wicks, Andrew C. \* 1992; PhD, 1992, University of Virginia; normative business ethics including stakeholder theory, trust, and managed care.

#### Assistant Professors

Boeker, Warren \* 1998; PhD, 1987, University of California (Berkeley); strategic management.

Chen, Xiao-Ping 1999; PhD, 1998, University of Illinois; cross-cultural management, organizational behavior.

Fuller, Sally R. 1992; PhD, 1993, University of Wisconsin; organizational behavior and organizational theory.

Rindova, Violina 1998; PhD, 1999, New York University; strategic management and entrepreneurship.

Sarasvathy, Saras D. 1998; PhD, 1998, Carnegie Mellon University; entrepreneurship and finance.

Schulz, Martin 1993; PhD, 1993, Stanford University; organizations, qualitative and quantitative methods.

#### Lecturers

Berger, Robert H. 1985; JD, 1967, MBA, 1983, University of California (Berkeley); law.

Gautschi, Frederick H. 1988; PhD, 1978, University of California (Berkeley); law, organization behavior.

George-Falvy, Jane 1989; PhD, 1995, University of Washington; organizational behavior and human resource management.

Hauser, Owen Shannon 1990; MBA, 1974, Pepperdine University; entrepreneurship.

Huwe, Ruth A. 1990; PhD, 1999, University of Washington; speech communication, negotiation.

## Management Science

The Department of Management Science consists of three subareas: Information Systems (IS), Operations Management (OPMGT), and Quantitative Methods (QMETH). The Information Systems area focuses on the management of computer-based information systems. The IS curriculum is designed to give students a basic understanding of IS technology and its impact on all phases of an organization. Specific areas of study include telecommunications and network design, systems analysis and design, database management, expert systems, and applications programming. The Operations Management (OPMGT) area of study refers to the functional area of management which produces goods or services in an organization. Specifically, the OPMGT curriculum focuses on the many changes which have occurred in the past ten years in the way that managers think, plan, and operate manufacturing and service facilities. The area includes courses in logistics, quality, inventory and supply-chain management, project management, and waiting lines, among others. The Quantitative Methods (QMETH) area focuses on the theory and application of mathematical and statistical tools in the modeling and analysis of business problems. The QMETH curriculum includes courses in statistics and data analysis as well as courses in operations research (e.g., linear programming, forecasting, using spread-sheets to construct decision support models).

## Faculty

#### Chair

Theodore Klasterin

#### Professors

Chiu, John S. Y. \* 1960, (Emeritus); PhD, 1960, University of Illinois; business statistics.

Faaland, Bruce H. \* 1971; PhD, 1971, Stanford University; manufacturing, networks, production scheduling, mathematical programming, forestry.

Gupta, Yash P. 1999; PhD, 1976, University of Bradford (UK); management and administration.

Klasterin, Theodore \* 1974; PhD, 1973, University of Texas (Austin); operations management, facility location, project management, waiting lines, logistics, inventory.

Moinzadeh, Kamran \* 1984; MS, 1982, PhD, 1984, Stanford University; operations management, production management, inventory, quality and supply chain management.

Siegel, Andrew F. \* 1983; MS, 1975, PhD, 1977, Stanford University; statistics, computing, corporate finance, investments, data analysis.

Tamura, Hirokuni \* 1967; MS, 1961, PhD, 1967, University of Michigan; statistical models for auditing, cost accounting, total quality management/global strategy.

#### Associate Professors

Mookerjee, Vijay \* 1991; MBA, 1984, Indian Institute of Technology (India); PhD, 1991, Purdue University; artificial intelligence, decision support systems, expert systems.

Schmitt, Thomas G. \* 1979; MBA, 1974, University of Cincinnati; DBA, 1979, Indiana University; management of service and manufacturing operations.

#### Assistant Professors

Dewan, Sanjeev \* 1998; PhD, 1991, University of Rochester; economics of information systems and information technology.

Dey, Debabrata \* 1997; MS, 1989, Syracuse University; MS, 1992, PhD, 1994, University of Rochester; database theory/design, telecommunications, heterogeneous/distributed systems, software engineering.

Hillier, Mark S. \* 1993; MS, 1991, PhD, 1994, Stanford University; operations management, inventory, commonality, mathematical programming applications.

Jain, Apurva 1999; PhD, 1999, Purdue University; supply chains, Web retailing, logistics, inventory.

#### Senior Lecturers

Burrows, William E. 1968; MA, 1972, University of Washington; systems analysis/design methodologies and data/file structures.

Morita, June G. \* 1982; MA, 1978, PhD, 1984, University of California (Berkeley); sample surveys, quality control, survival analysis, statistical data analysis, statistics education.

Pilcher, Martha G. \* 1987; MS, 1978, PhD, 1985, Georgia Institute of Technology; operations research/operations management, health care applications and logistics.

## Marketing and International Business

Marketing (MKTG) provides knowledge of concepts and relationships in the areas of consumer behavior, channels of distribution, measurement and analysis of markets, pricing, physical movement of goods, product development, promotion, and sales administration. Marketing careers may involve specialization in Internet marketing, product or brand management, advertising, selling, sales management, marketing research, retailing, wholesaling, and international marketing for a wide spectrum of firms and industries. International Business (I BUS) includes trade, payments, and multinational corporate systems and activities. The area prepares students for international responsibilities in domestic business firms, governmental agencies, and overseas business. Courses in Business Communications (B CMU) stress writing in organizations to accomplish goals, oral reporting, business plan presentation, and the use of computer graphics in communication.

## Faculty

#### Chair

Gary Erickson

#### Professors

Erickson, Gary \* 1980; MBA, 1973, PhD, 1978, Stanford University; quantitative models of marketing and analysis of competitive strategies.

Gautschi, David A. \* 1992; MBA, 1974, University of Oregon; PhD, 1979, University of California (Berkeley); marketing management, marketing strategies in the global information telecommunications industries.

Gordon, Guy G. 1957, (Emeritus); MBA, 1950, University of Washington; PhD, 1957, University of California (Berkeley); marketing.

Harder, Virgil E. \* 1955, (Emeritus); PhD, 1958, University of Illinois; business communications.

Ingene, Charles A. \* 1982; MA, 1972, PhD, 1975, Brown University; retailing and distribution strategy and marketing management.

Jacobson, Robert L. \* 1984; PhD, 1981, University of California (Berkeley); marketing strategy, marketing management and entrepreneurial management.

Kolde, Endel-Jakob \* 1951, (Emeritus); DBA, 1954, University of Washington; international business and marketing.

MacLachlan, Douglas \* 1970; MBA, 1965, MA, 1970, PhD, 1971, University of California (Berkeley); marketing research, sales forecasting, psychological measurement and statistics.

Moinpour, Reza \* 1966; MBA, 1966, PhD, 1970, Ohio State University; consumer decision making, new product development and marketing research.

Narver, John C. \* 1966, (Emeritus); MBA, 1960, PhD, 1965, University of California (Berkeley); market strategy, market-driven organization, pricing policies, marketing management.

Spratlen, Thaddeus H. \* 1972; MA, 1957, PhD, 1962, Ohio State University; retailing, marketing management, marketing and the city.

Sullivan, Jeremiah J. \* 1975; MA, 1967, PhD, 1970, New York University; MBA, 1975, University of Washington; international business, Japanese management.

Wheatley, John J. \* 1960, (Emeritus); MBA, 1954, PhD, 1959, State University of New York (Buffalo); marketing management, marketing research, sales management.

Yalch, Richard F. \* 1971; MS, 1970, Carnegie Mellon University; PhD, 1974, Northwestern University; advertising management and consumer behavior, marketing management, marketing research.

### Associate Professor

Grathwohl, Harrison L. \* 1958, (Emeritus); DBA, 1957, Indiana University; marketing.

### Assistant Professors

Forehand, Mark Robeck 1997; PhD, 1997, Stanford University; international business.

Louie, Therese A. \* 1993; PhD, 1992, University of California (Los Angeles); behavioral biases that influence the perception of self and others.

Okada, Erica Mina 1999; MBA, 1992, Dartmouth College; PhD, 1999, University of Pennsylvania; international marketing, decision theory and marketing strategy.

Turner, Daniel J. 1999, (Acting); PhD, 2000, Northwestern University; retailing, marketing models.

### Lecturers

Quarton, Mary Ann O. 1995; MBA, 1971, PhD, 1980, Stanford University; retailing and retail management.

Stearns, Elizabeth P. 1995; MBA, 1978, New York University; advertising, direct marketing.

Whelan, John F. 1985; MA, 1977, Yale University; business communications.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For complete undergraduate course descriptions, see the undergraduate volume of the *General Catalog* or visit the online course catalog at [www.washington.edu/students/crsctat/](http://www.washington.edu/students/crsctat/).

## Accounting

### ACCTG 411 Auditing Standards and Principles (3)

Intensive introduction to the attest function in society today. The environment, the process, and the report of the public auditor are analyzed. Potential extensions of the attest function are examined. Prerequisite: 2.0 in ACCTG 302; 2.0 in ACCTG 311; 2.0 in either ACCTG 320 or ACCTG 330.

### ACCTG 421 Tax Effects of Business Decisions (3)

Issues in taxation, including tax considerations in business decision making, tax effects of business transactions, taxation of compensation, fringe benefits, capital gains, fixed asset transactions, disposition of business distribution from corporations. Prerequisite: 2.0 in ACCTG 302.

### ACCTG 440 Accounting and Financial Management Decisions (3)

Business financial planning with an emphasis of the role of accounting information in financial decisions. Topics include the accounting and finance aspects of business valuation, short and long term financing, short and long term investments, alternative types of debt and equity financing, and related topics. Prerequisite: ACCTG 302; ACCTG 311; FIN 350.

### ACCTG 450 Business Taxation (3)

Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes corporate distributions, liquidations, and reorganizations. Prerequisite: 2.0 in ACCTG 421.

### ACCTG 451 Individual Income Taxation (3)

Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual income tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees. Prerequisite: 2.0 in ACCTG 421.

### ACCTG 460 Advanced Cost Accounting (3)

Advanced analysis of cost and management accounting problems; special applications of cost accounting techniques for management planning and control; current developments in cost accounting. Prerequisite: 2.0 in ACCTG 311.

### ACCTG 470 Accounting for Mergers, Acquisitions, and International Operations (3)

Accounting for business combinations, parent-subsidiary and branch relationships, and foreign operations. Prerequisite: ACCTG 321; ACCTG 421 which may be taken concurrently; ACCTG 440 which may be taken concurrently.

### ACCTG 480 Accounting for Not-for-Profit Organizations (3)

Fund and budgetary accounting as applied to public sector organizations, such as governments, foundations, hospitals, and colleges. Prerequisite: 2.0 in ACCTG 302.

### ACCTG 485 Advanced Financial Accounting (3)

Accounting for partnerships, accounting for business combinations, parent-subsidiary and branch relationships, foreign exchange. Prerequisite: 2.0 in ACCTG 302.

### ACCTG 490 Special Topics in Accounting (1-6, max. 6)

Special topics of current concern to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

### ACCTG 495 Accounting Internship (1-4, max. 4)

One quarter's internship with a certified public accounting firm, industrial organization, or government agency. Credit/no credit only.

### ACCTG 499 Undergraduate Research (1-6, max. 9)

Arranged and supervised by individual members of the faculty.

## Courses for Graduates Only

Approval of graduate business program office required. Entry code required for nonmajors.

### ACCTG 500 Financial Accounting (3)

Introduction to concepts and procedures underlying determination and presentation of information for financial decisions by investors and other decision makers outside the business enterprise. Study of problems of valuation, income determination, and financial reporting.

### ACCTG 501 Managerial Accounting (3)

Study of the generation and the use of accounting information within the firm for purposes of planning and controlling operations. Topics covered include cost concepts, responsibility accounting systems, cost control, and the use of accounting information in short- and long-term management decision problems. Prerequisite: ACCTG 500.

### ACCTG 503 Introduction to Accounting for Managers (4)

*Noreen, Sundem* Provides potential managers with a basic knowledge of financial and managerial accounting. Focuses on the use, not the preparation, of accounting information. Examples presented for a variety of for-profit and nonprofit organizations.

### ACCTG 505 Intensive Analysis of Accounting Principles and Practices (18)

Covers the subjects in the required core for undergraduate accounting majors: intermediate accounting, advanced accounting, cost accounting, auditing, and tax accounting. Credits will not count toward MBA degree. Prerequisite: ACCTG 215 and ACCTG 225 or equivalent, or permission of instructor.

### ACCTG 510 Problems in Financial Reporting (4)

Extension of 500 emphasizing financial reporting from a user's perspective. Alternative approaches to recognition, valuation, and measurement of assets, equities, and income considered. Choice of accounting methods and effects on the firm of accounting policy regulation also examined. Prerequisite: B A 502 or permission of instructor.

### ACCTG 511 Problems in Managerial and Cost Accounting (4)

Discussion and analysis of costing techniques, use of accounting data in planning and evaluating managerial performance, and use of accounting data in short-run and long-run decisions. Special attention directed to issues in human behavior involved in cost allocation, budgeting, and performance evaluation. Prerequisite: B A 502 or permission of instructor.

### ACCTG 513 Tax Effects of Business Decisions (4)

Importance of tax considerations in making business decisions. Relationship of taxable income to accounting and economic concepts of income, and the economic, political, and social background of important tax provisions. Prerequisite: B A 502 or permission of instructor.

### ACCTG 515 Seminar in Financial Statement Analysis (4)

Emphasizes use of published financial reports by decision makers external to the firm (e.g., investors, creditors). Within each decision context, traditional models and recent empirical research in accounting and finance are discussed. Project required as an application of course subject matter. Prerequisite: B A 502 or permission of instructor.

### ACCTG 517 Seminar in International Accounting (4)

Introduction to the conceptual, managerial, professional, and institutional issues of international accounting. Comparative and empirical studies receive special attention. Current interest topics (e.g., standard setting and transnational financial reporting) are explored. A research paper required. Prerequisite: B A 502 or permission of instructor.

**ACCTG 519 Seminar in Financial Control Systems**

**(4)** Design and administration of formal information systems to aid the planning and control process in large organizations; formulation of divisional financial goals and control criteria; measurement of divisional performance and problems of goal congruence; administration of new investment programs. Prerequisite: B A 502 or permission of graduate office.

**ACCTG 520 Information Quality and Assurance Services**

**(4)** Introduction to assurance services with a focus on financial statement audits. Auditing concepts and procedures, and the role of audits in financial markets.

**ACCTG 521 Cases and Issues in Information Quality and Assurance Services**

**(4)** Analysis of cases and discussions of current issues dealing with assurance services. Prerequisite: ACCTG 520.

**ACCTG 522 Advanced Financial Reporting**

**(4)** Advanced problems related to the measurement of enterprise income and asset and liability valuation.

**ACCTG 523 Advanced Financial Analysis**

**(4)** Explores the use of published financial reports by decision makers external to the firm (e.g. investors and creditors). Emphasis is on traditional and statistical analyses of financial statements for the purposes of making economic decisions. Prerequisite: ACCTG 522.

**ACCTG 524 Individual Taxation**

**(4)** Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees.

**ACCTG 525 Business and International Taxation**

**(4)** Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Included corporate distributions, liquidations, and reorganizations. International dimensions of business taxation are introduced. Prerequisite: ACCTG 524.

**ACCTG 526 Preparation for IPOs and SEC Reporting**

**(4)** Introduces legal issues pertaining to the accounting profession. Discusses the role of operations of the SEC with an emphasis on its functions in regulating information disclosure. Prerequisite: ACCTG 522.

**ACCTG 527 Communications in Professional Accounting**

**(4)** Introduction to the communications practices of professional accountants. Development of effective written and oral skills employed in accounting presentations such as audit reports. Study of results of organizational communications research applicable to accounting firms and units within firms.

**ACCTG 530 Tax Issues in Property Ownership**

**(4)** Analysis of gain and loss realization, recognition, and characterization of such. Detailed exploration of statutory and case law regarding acquisition, ownership, and disposition of assets. Treatment of capital and ordinary gains and losses. Timing issues regarding deferral transactions and installment reporting are analyzed. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 531 Timing and Periods of Taxation**

**(3)** Analysis of the cash and accrual methods of accounting, choice of taxable period and multi-period transaction analysis. Consideration of statute of limitations and mitigation thereof. Details of passive activity losses. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 533 Procedural and Policy Issues**

**(3)** Analysis of the procedures of Federal taxation: assessment, collection, and refund claims. Detailed exploration of the rules governing the statute of limitations and the mitigation thereof. An introduction to

tax policy considerations is given. Tax penalties are explored. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 534 Fundamentals of Corporate Taxation**

**(3)** Detailed analysis of contribution of assets to corporations. Calculation of recognized gains and basic effects of asset contributions. Treatment of income and deduction items of corporate operations. Analysis of distribution of assets to shareholders with respect to their stock. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 535 Advanced Issues in Corporate Taxation**

**(3)** A continuation of 534. Fundamentals of moving assets out of and within corporate solution. Basics of corporate reorganizations: acquisitive and divisive. The details of the election to obtain (or avoid) the Section 338 election are explored in detail. Prerequisite: Undergraduate accounting concentration or equivalent; ACCTG 534 or permission of instructor.

**ACCTG 536 Advanced Issues in Corporate Taxation**

**(3)** Continuation of 534 and 535. Study of complex issues in corporate taxation planning. Substantial portion of course involves resolving case studies to improve analytic skills and to interrelate disparate corporate planning opportunities. Corporate reorganizations are analyzed in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 535 or permission of instructor.

**ACCTG 537 Income Taxation of Conduits I**

**(3)** *Resler, Rice* Tax consequences to owners and entity from formation, operation, distributions from, and liquidation of partnerships and S corporations. Study of taxable and tax-free formations, nature of "bottom line" income and separately stated items, changes to owners' tax basis, basics of non-liquidating and liquidating distributions. Prerequisite: undergraduate accounting concentration or equivalent. Offered: W.

**ACCTG 538 Income Taxation of Conduits II**

**(3)** A continuation of 537. Study of complex issues in partnership and S corporation taxation. Substantial portion involves resolving case studies to improve analytic skills and interrelate partnership and S corporation planning issues. Sections 751(b) and 736 examined in detail. Prerequisite: undergraduate accounting concentration or equivalent; 537 or permission of instructor.

**ACCTG 539 Tax Research and Decision Making**

**(4)** Decision-making processes in relation to problems of taxation. Tools of tax analysis and research and the communication of conclusions flowing from professional tax work. Role of the professional accountant in client business transactions and in negotiations with taxing authorities is highlighted and simulated on the basis of actual case histories. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 540 Communications for Taxation Professionals**

**(4)** Introduction to the communications forms and to practices professional accountants and accounting managers. Development of effective written and oral skills employed in accounting presentations, such as audit reports and consultants' reports. Study of results of organizational communications research applicable to accounting firms and/or units within firms. Prerequisite: undergraduate accounting concentration or permission of instructor.

**ACCTG 543 Income Taxation of Trusts and Estates**

**(3)** Development of fundamental skills regarding income taxation of trusts and estates. Calculation of distributable net income and the distribution deduction for the fiduciary entity. Basic analysis of the throwback rules. Case studies. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 547 Estate and Gift Taxation**

**(3)** Development of fundamental knowledge of the unified transfer tax on the transfer of property from one person to another. Calculation of gross estate, adjusted

gross estate, and taxable estate. Calculation of gift and estate taxes owing. Discussion of estate planning concepts. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 548 State and Local Taxation**

**(3)** *Resler, Rice* Differences in definition of income at state and federal levels, treatment of state income taxes, piggyback for state income taxes, state tax rates, minimum tax, double taxation of income by home and host states, Uniform Division of Income for Tax Purposes Act, concept of nexus for taxation, multistate tax planning. Offered: S.

**ACCTG 549 Employee Tax Problems and Deferred Compensation**

**(3)** *Resler, Rice* Covers the tax issues facing employees and self-employed tax payers, including deferred compensation arrangements, fringe benefit packages, restricted property, independent contractor status, achieving favorable tax treatment of retirement plans, and substantiating employee business expenses. Offered: S.

**ACCTG 560 Special Topics in Professional Accounting**

**(1-4, max. 4)** Lectures, discussion, and case analyses dealing with special current topics relevant to professional accounting. Satisfies the professional accounting elective requirement for the M.P.Acc. degree program. Prerequisite: permission of instructor.

**ACCTG 562 Accounting for Business Combinations in a Global Marketplace**

**(4)** The examination of acquisitions and mergers in a global context. Explores the issues involved in accounting for domestic and foreign equity investments, partnerships with respect to financial statement interpretations.

**ACCTG 564 Governmental Accounting**

**(4)** Budgetary and financial accounting/reporting as applied at the state, local, and special-purpose governments; financial accounting and reporting for not-for-profit organizations.

**ACCTG 566 Issues in International Accounting**

**(4)** Insights into the conceptual, managerial, professional, and institutional issues of international accounting. Focus on current topics in international accounting and on the cultural, managerial, and governmental forces that shape both internal and external accounting in specific countries.

**ACCTG 568 Advanced Management Accounting**

**(4)** Discussion and analysis of costing techniques, use of accounting data in planning and evaluating managerial performance, and use of accounting data in short-term and long-run decisions. Special attention directed to issues in human behavior involved in cost allocation, budgeting, and performance evaluation. Prerequisite: ACCTG 502.

**ACCTG 579 Special Topics in Accounting**

**(4, max. 12)** Accounting topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

**ACCTG 580 Introduction to Accounting Research**

**(4)** Examination of research problems and techniques in accounting. Interdisciplinary nature of accounting research emphasized. Work in finance, economics, and psychology used to develop current trends in accounting research. Prerequisite: doctoral student status.

**ACCTG 581 Seminar in Managerial Accounting**

**(4)** Critical examination of conceptual and practical issues of cost and managerial accounting. Specific topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: ACCTG 511 or permission of instructor.

**ACCTG 596 Seminar in Financial Accounting Research (4)** Review and critical analysis of research strategies and methods applied to problems in financial reporting practice and financial accounting standard setting. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

**ACCTG 597 Seminar in Managerial Accounting Research (4)** Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and 581 or equivalent or permission of graduate office.

**ACCTG 599 Doctoral Seminar in Accounting (1, max. 12)** Study and research in advanced topics of Accounting. The seminar is generally concerned with unpublished areas of research as well as research methodology and philosophy. It is conducted by departmental faculty and occasional distinguished visiting faculty. Prerequisite: doctoral student status.

**ACCTG 600 Independent Study or Research (\* max. 10)**

---

## Business Administration

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required.

**B A 500 Business Administration I (16)** Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

**B A 501 Business Administration II (16)** Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

**B A 502 Business Administration III (16)** Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

**B A 541 Environmental Management I (4)** Survey of environmental ethics, environmental laws and regulation, the economics of environmental decisions, and the relationship of business to public policy and the environment. Must be taken concurrently with B A 544. Prerequisite: permission of instructor.

**B A 542 Environmental Management II (4)** Applications of the functional areas of business to environmental concerns. Major federal legislation affecting these concerns applied to business problems in the areas of accounting, finance, marketing, management information systems, and organizational behavior. Must be taken concurrently with 544. Prerequisite: B A 541 or permission of instructor.

**B A 543 Environmental Management III (4)** Case studies that integrate the fundamentals of business and environmental management to address such issues as plant siting, regulatory compliance, production line changes, and innovative, proactive re-

sponses to environmental issues. Case studies include results of student consulting projects and a capstone case in environmental management. Must be taken concurrently with 544. Prerequisite: B A 542 or permission of instructor.

**B A 544 Environmental Management Seminar (1, max. 3)** Guest lecturers from academia, business, government, and advocacy groups discuss environmental science, ethics, law, regulation, economics, finance, accounting, and policy issues. Seminar topics supplement course material in 541, 542, 543 which are to be taken concurrently.

**B A 545 The Global Business Forum: Current Issues in Global Business (1, max. 3)** Discussion of current trends in the global business environment and of international issues facing companies. Leaders from international businesses and other organizations, as well as faculty members from various departments and specializations, invited to share their perspectives with seminar participants. Topics change each quarter.

**B A 560 Cooperative Education in Business (1)** Business practicum: internship with approved business or governmental agency. Open only to students who meet requirements of internship program. Internship credit may not be applied to fulfill specific course requirements or to credits required for graduation. Credit/no credit grading only. Offered: S.

**B A 571- Research Reports (4-)** Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: instructor's approval of preliminary research topic outline.

**B A -572 Research Reports (-4)** Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: B A 571.

**B A 800 Doctoral Dissertation (\* max. 10)**

---

## Business Administration Research Methods

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**BA RM 580 Applied Econometrics I (4)** Emphasizes the application of econometric methods rather than the mathematical proofs of statistical procedures. Introduction to the linear regression model, interpretation of summary statistics, bias and precision of regression estimates, analysis of the residuals, and hypothesis testing. Prerequisite: STAT 342 or STAT 395 or STAT 481, or permission of instructor.

**BA RM 581 Applied Econometrics II (4)** Continuation of 580. Measurement errors, distributed lags, and simultaneous equation models. Prerequisite: BA RM 580.

**BA RM 590 Behavioral Research Methods-Theory and Design (4)** Philosophy of science, development of scientific method, and meaning of behavioral research. Historical perspective of scientific investigation and the evaluation of research. The development of theory and its relationship to research. Various strategies and designs in behavioral research. Prerequisite: STAT 361, STAT 362, or permission of instructor.

**BA RM 591 Behavioral Research Methods-Approaches and Applications (4)** Considers alternative research approaches, such as laboratory and field experimentation, simulation, and surveys, with data-gathering techniques appropriate for each approach. It is primarily concerned with developing alternative approaches to research problems and with discussing specific applications. It builds upon a background of specific statistical tools and techniques and an understanding of theory development and research design. Prerequisite: STAT 361, STAT 362, or permission of instructor.

---

## Business Communication

**B CMU 410 Business Reports and Other Specialized Communications (4)** Covers both internal and external communications that businessmen and businesswomen write on the job. Emphasis on various types of internal reports, ranging from short informal memos to the more complex formal reports. Also covered are specialized external types of communications directed to customers. Prerequisite: B CMU 301.

**B CMU 490 Special Topics in Business Communications (1-6, max. 12)** Students and faculty focus on current topics of concern. Prerequisite: B CMU 301.

**B CMU 499 Research in Business Communications (1-6, max. 9)**

### Courses for Graduates Only

**B CMU 510 Business Communications for Managers (4)** Seeks to develop understanding of communications and related theories, to describe strategies for planning managerial communications, and to build skills in oral and written reporting and persuading. Prerequisite: approval of graduate business office.

---

## Business Economics

**B ECON 420 Financial Markets (4)** Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: either B ECON 301 or ECON 301.

**B ECON 427 International Finance (4)** Asset choice and institutional operations in international finance, foreign exchange problems, the impact of international financial problems and operations on business, short- and long-term international financing. Prerequisite: either B ECON 300 or ECON 300; either B ECON 301 or ECON 301.

**B ECON 490 Special Topics in Business Economics (1-6, max. 6)** Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

**B ECON 499 Undergraduate Research (1-6, max. 9)** Research in selected areas of business economics. Recommended: either ECON 301 or B ECON 300 and B ECON 301.

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**B ECON 500 Business Economics I (3)** Factors underlying the determination of cost and prices for the industry and the firm, demand and supply analysis and firm behavior. The relation of the economic environment to the microeconomic decisions of the firm.

**B ECON 501 Business Economics II (3)** Analysis of real and monetary factors affecting the national and international economic environment, supply and demand for money, interest rates, stabilization problems and policies, in relation to government and policy effects on business and individual affairs. Prerequisite: B ECON 500.

**B ECON 520 Financial Markets (4)** Analysis of the functions and structure of money markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of the Federal Reserve and Treasury in the money markets. Prerequisite: B A 501.

**B ECON 527 International Finance and Investments (4)** Study of selected problems in financing, international trade, investment, and foreign business operations; international aspects of money markets; problems of evaluation of foreign investments. Prerequisite: B A 502, FIN 502.

**B ECON 528 International Financial Management (4)** Analysis of financial problems facing businesses engaged in international activities: financing foreign investment, financial control of foreign operations, and working capital management including foreign-exchange positions using cases and readings.

**B ECON 579 Special Topics in Business Economics (4, max. 12)** Business economics topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

**B ECON 600 Independent Study or Research (\* max. 10)**

---

## Business Policy

**B POL 470 Business Policy (4)** Policy making and administration from a general management point of view. Emphasis is on problem analysis, the decision-making process, administration and control, and continuous reappraisal of policies and objectives. This course integrates and builds upon the work of the core curriculum. Prerequisite: FIN 350; MKTG 301; either HRMOB 300 or HRMOB 400; recommended: OPMGT 301.

**B POL 471 Entrepreneurship (4)** Entrepreneurship presents the real challenges of starting new businesses, focusing on the skills and contacts an entrepreneur needs to develop ideas. The many facets of entrepreneurship—organization form, funding sources, the start-up team, the product launch—are illustrated through field and case studies and guest speakers. Prerequisite: FIN 350; MKTG 301; either HRMOB 300 or HRMOB 400; recommended: OPMGT 301.

**B POL 472 Business Planning for Entrepreneurs and Product Managers (4)** Focuses on the process of developing and selling the new venture's business growth plan. Also covers franchising and business acquisition. Students develop their own business plans for venture concepts. Prerequisite: B POL 471.

**B POL 473 Practicum in Entrepreneurship (4)** Explores requirements and challenges in establishing a business in the State of Washington. Broad areas of interest include developing business concepts, marshalling resources, startup actions, and strategic and operation planning. Recommended: B POL 472.

**B POL 474 Small Business Management (4)** Explores entrepreneurial activities within the special environment of the small firm and family-owned companies. Combines case studies with field projects assisting companies in the Puget Sound area.

**B POL 480 Business Simulation (5)** Critical analysis of integrated business policy formulation in a complex and dynamic industrial environment by means of simulation (business gaming). Prerequisite: FIN 350; MKTG 301; either HRMOB 300 or HRMOB 400; recommended: OPMGT 301.

**B POL 490 Special Topics in Business Policy (1-6, max. 6)** Study and research topics of current interest to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

**B POL 499 Undergraduate Research (1-6, max. 9)**

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**B POL 505 Business Policy and Strategy (3)** Policy decisions and strategic leadership from the general management point of view. Determination of corporate product-service objectives, development of a network of internal operating policies and methods to achieve objectives at a cost satisfactory to the consumer and to society. Prerequisite: all first-year required courses in MBA curriculum.

**B POL 530 Entrepreneurship (4)** Entrepreneurship, both in the form of (1) establishment of new independent businesses owned largely by those who manage them and (2) initiation of new enterprises having exceptional autonomy within larger organizations that finance and own them. Basic knowledge in accounting, marketing, and finance is assumed.

**B POL 532 Developing the New Venture Plan (4)** Process of developing the new venture's business growth plan. Practice of franchising and business acquisition. Students develop their own business plans for venture concepts. Prerequisite: B POL 530.

**B POL 536 Software Entrepreneurship (4)** Case- and project-based course. Focuses on starting a software or hardware company. Guest entrepreneurs, lawyers, and financiers discuss market identification and analysis, planning the business, financing, and typical operating and administrative problems.

**B POL 540 Managing Intellectual Property Rights (4)** Comprehensive analysis of the issues pertinent to the various forms of intellectual property, including how to recognize, develop, maintain, and capitalize on them.

**B POL 541 Ecommerce: Competing on the Internet (4)** Focuses on issues pertinent to the emergence of the global digital economy and its impact on commerce, business models that innovative firms employ in the emerging medium, and the concept of "netpreneurship."

**B POL 555 Intrapreneurship and Corporate Venturing (4)** Focuses on role of managers in fostering profitable growth and entrepreneurial actions within ongoing organizations. Class sessions utilize current analytical and conceptual methods, case and field studies, management development exercises, and *Foodcorp, Inc.* which allows students to simulate management of multinational corporations. Prerequisite: B A 502. Offered jointly with MKTG 555.

**B POL 570 Strategic Planning Systems (4)** Formal institutional procedures for involving the entire organization in strategic planning and quantitative methods for doing such planning. These are applied to

analyzing strategy and firm performance, predicting long-range industry and national environments, formulating corporate-level and business-level strategies, and integrating planning models into the planning process. Prerequisite: B A 502 or permission of graduate office.

**B POL 575 Strategic Decision Making (4)** Focuses on (1) role of strategic leadership in the success of organizations, (2) conceptual-logical methods for doing strategic planning, (3) organization-wide experience methods for formulating policies, and (4) decision methods for use within the strategic coalition. Prerequisite: B A 502 or permission of graduate office.

**B POL 579 Special Topics in Business Policy (4, max. 12)** Study and research in topics of current concern to faculty and students. Offered only when allowed by faculty availability and sufficient student interest. Seminar content announced in advance of scheduled offering.

**B POL 599 Doctoral Seminar in Business Policy (1, max. 12)**

**B POL 600 Independent Study or Research (\* max. 10)**

---

## Finance

**FIN 423 Banking and the Financial System (4)** Role of banks and nonbank financial institutions in the financial system; asset choices of banks and nonbank financial institutions; problems in the management of financial institutions with emphasis on commercial banks. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 450 Problems in Corporate Finance (4)** Case problems in corporate financial management. Includes cases on management of current assets, obtaining short-term loans, raising long-term capital, capital budgeting, and dividend policy. The management point of view is stressed. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 453 Financial Theory and Analysis (4)** Business financial strategic planning. Topics include business valuation and financing, performance evaluation, risk analysis, capital budgeting, and inflation and taxes. Emphasizes tools with real-world applications while incorporating modern finance concepts. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 460 Investments (4)** Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate-of-return aspects of particular securities portfolios, and total wealth. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 461 Financial Futures and Options Markets (4)** Introduction to financial futures and options markets. Instructional aspects and social functions of these markets, pricing of options and futures, and risk shifting by hedging. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 490 Special Topics in Finance (1-6, max. 6)** Study and research topics of current concern to faculty and students. Only offered when faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

**FIN 499 Undergraduate Research (1-6, max. 9)** Research in selected areas of business finance, money and banking, or investments, with permission of instructor. Recommend: FIN 350; either B ECON 300 or ECON 300.

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**FIN 502 Business Finance (3)** Financial management of the firm, including capital budgets, working capital analysis, and financing policy. Prerequisite: ACCTG 500, B ECON 500, QMETH 500.

**FIN 530 Financial Management of Banks (4)** Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B ECON 520 or permission of graduate office.

**FIN 550 Advanced Business Finance (4)** Systematic coverage of the theory of financial management. Application of quantitative analysis to financial problems of the firm, including the investment and financial decisions, lease analysis, and merger analysis. Prerequisite: B A 502.

**FIN 551 Problems in Business Finance (4)** Examines case studies of a broad range of financial management topics, including financial statement analysis, forecasting financial statements, use of bank credit, working capital management, public and private securities issues, capital budgeting, and business valuation. Prerequisite: B A 502.

**FIN 552 Corporate Planning and Financing (4)** Addresses management of working capital flows and finance operations. Topics include financial statement analysis, *pro forma* forecasting, case budgeting, sources of financing including bank, venture capital, private placements, and leases, and determinants of company financing policy. Cannot be taken for credit in combination with FIN 551. Prerequisite: B A 502.

**FIN 553 Capital Investment Planning (4)** Case discussions used to examine corporate resource allocation decisions. Topics include capital budgeting techniques, estimation of capital costs, capital budgeting systems, strategic investment decisions, and financial restructurings. Prerequisite: FIN 552 or FIN 555.

**FIN 555 Corporate Financing Decisions (4)** Framework for analyzing the effects of non-investment decisions on corporate value. Topics include financing policy, compensation policy, hedging, leasing, and dividend policy. Focus on the role of financial contracting. Prerequisite: B A 502.

**FIN 556 Investment Planning and Evaluation (4)** Analytic tools for valuing and evaluating business entities and for investment planning. Topics include business valuation, performance evaluation, risk analysis, capital budgeting, inflation and tax issues, leasing, and business acquisitions. Prerequisite: B A 502.

**FIN 557 New Venture Financing (4)** Explores the financial issues that face entrepreneurs, including the stages of financing, business cash-flow models, and strategic positioning of the early-stage company. Business angels, venture capital funds, and institutional investors. Strategic alliances, licensing agreements, and exit strategies.

**FIN 560 Investments (4)** Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate of return aspects of particular securities, securities portfolios, and total wealth. Prerequisite: B A 502 or permission of graduate office.

**FIN 561 Financial Futures and Options Markets (4)** The pricing of options and futures contracts are analyzed and available empirical evidence is examined. Particular attention is given to the ways these

instruments can be used to reduce an investor's or a firm's exposure to risk.

**FIN 579 Special Topics in Finance (4, max. 12)** Finance topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offerings. Prerequisite: permission of instructor.

**FIN 580 Doctoral Seminar in Financial Economics (4)** Study of the financing of the corporation, including recent theoretical and institutional developments. Extensive reading and discussion in designated areas covering problems relating to financial management and to the social and economic implications of the financial process. Prerequisite: ECON 500 or permission of instructor.

**FIN 590 Doctoral Seminar in Capital Market Theory (4)** Decision making under uncertainty, information and capital market efficiency, portfolio theory, capital asset pricing model, arbitrage pricing model, and options pricing model. Prerequisite: ECON 500 or permission of instructor.

**FIN 591 Doctoral Seminar in Corporate Finance (4)** Principles of intertemporal choice, alternative valuation models, theory of investment under uncertainty, impact of dividend and financing decisions on firm valuation in perfect and imperfect markets, and theory of firm organization and agency costs. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

**FIN 592 Doctoral Seminar in Financial Research (4)** Empirical research in finance with emphasis on methodology and scientific method. Empirical research in market efficiency, capital asset pricing model, options pricing model, and impact of firm's dividend and financing decisions on firm value. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

**FIN 599 Doctoral Seminar in Finance (1, max. 12)** Study and research in advanced topics of finance. Generally concerned with unpublished areas of research, conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

**FIN 600 Independent Study or Research (\* max. 10)**

## Human Resources Management and Organizational Behavior

**HRMOB 410 Staffing (4)** Affirmative action, recruitment, testing, interviewing, placement, promotion, and overall human resource planning.

**HRMOB 415 Performance Appraisal and Compensation (4)** The various kinds of systems used by organizations to evaluate and reward employee performance. Job analysis, job evaluation, setting performance standards, giving appraisal feedback, designing incentive systems, administering a salary plan.

**HRMOB 420 Collective Bargaining and Arbitration (4)** Labor-management relations. The legal context, union organizing, grievance administration, collective bargaining. Individual and group simulations used.

**HRMOB 450 Leadership and Decision Making (4)** The manager as leader and decision maker. Various leadership theories, styles, and behaviors. Decision-making models and techniques.

**HRMOB 460 Negotiations (4)** The art and science of negotiations with the goal of making students more effective negotiators in a variety of business situa-

tions, such as budget negotiations, buying and selling, contracts, and merger negotiations. Concept and skill development.

**HRMOB 470 Motivation and Performance (4)** Various strategies for influencing employee motivation and performance. Reward systems, goal-setting procedures, and various techniques to enlarge and enrich ones job. Effects of these formal and informal strategies on job attitudes.

**HRMOB 475 Organization Development and Change (4)** Provides a conceptual understanding of organization development theory, practice, and research. Organization development is an umbrella term for a collection of behavioral science techniques for increasing individual, group, and organizational effectiveness.

**HRMOB 490 Special Topics in Human Resources Management and Organizational Behavior (1-6, max. 6)** Topics of current interest to faculty and students. Offered when allowed by faculty availability and sufficient student interest. Content announced in advance of scheduled offerings.

**HRMOB 499 Undergraduate Research (1-6, max. 9)**

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**HRMOB 500 The Management of Organizational Behavior (3)** Behavioral aspects of management with emphasis on leadership, motivation, and decision making. May include communication, conflict management, group dynamics, and organizational change.

**HRMOB 501 Human Resource Management (3)** Fair employment practice, job analysis, selection, performance appraisal, and training. May include compensation and labor relations.

**HRMOB 510 Staffing (4)** Systems related to manpower planning, recruitment, interviewing, placement, and development. Advanced techniques, with emphasis on validating predictive measures of performance. Criteria development, psychological testing, validation procedures, and cost effectiveness of personnel research.

**HRMOB 515 Performance Appraisal and Compensation (4)** Strategies, procedures, and problems in evaluating and rewarding employees. Performance measurement methods, different appraisal systems, and ways of coaching employees. Ways to integrate performance appraisal into compensation systems.

**HRMOB 525 Dispute Settlement and Labor-Management Cooperation (4)** Goes beyond traditional collective bargaining and grievance arbitration to examine the role of third parties as mediators, interest arbitrators, and fact finders. New forms of labor-management cooperation, such as gain sharing, quality of work life programs and labor-management committees.

**HRMOB 540 Managerial Behavior in Cross-Cultural Settings (4)** The role of culture as it impacts managerial values and behavior in diverse national settings including the United States, western Europe, Latin America, and Japan.

**HRMOB 550 Leadership (4)** Various theories of leadership: trait theories, leader behavior theories, and situational theories. Concept of leadership within the broader framework of power-how power is gained, lost, and distributed within organizations.

**HRMOB 560 Negotiations (4)** Strategy used in negotiations other than labor-management bargaining to develop skills necessary to devise a negotiating strategy appropriate to situation. Negotiation of contracts in simulated business settings, case studies, readings.

**HRMOB 570 Motivation (4)** Approaches that emphasize people's needs, effects of reward systems, and goal setting, as well as topics that show how the social environment and the task itself influence motivation. Different motivational techniques to be used under various conditions.

**HRMOB 575 Theory and Practice in Organizational Development (4)** Theory, practice, and research in organizational development; the applied discipline that seeks to improve organizational effectiveness, efficiency, and morale through causing changes in managerial practices and organizational dynamics. History of the field, intervention techniques, diagnostic methods, and client-consultant relations. Concepts and skill development.

**HRMOB 579 Special Topics in Human Resources Management and Organizational Behavior (4, max. 12)** In-depth study and research on topics of special interest to faculty members and students in the fields of human resources management and organizational behavior. Offered on an ad hoc basis. Content announced before scheduled offering.

**HRMOB 580 The Individual and the Organization (3)** Focuses on attributes the individual brings to the organization. Covers important performance-related processes such as learning, motivation, and decision-making as well as an understanding of personal attitudes and personality traits.

**HRMOB 581 Groups, Teams, and Organizations (3)** Focuses on importance of group processes for organizational effectiveness. Covers concepts of group dynamics including interpersonal communication, role and norm development, and group decision making as well as organizational processes such as team development and organizational culture.

**HRMOB 582 Power, Influence, and Citizenship Behavior (3)** Focuses on ways in which the individual and the organization get things done through working with others. Includes leadership, social influence, and the use and abuse of power, with attention given to positive organizational activities such as citizenship behavior and extra role activities.

**HRMOB 591 Employee Appraisals and Rewards (3)** Focuses on the organization's employee performance appraisal and compensation systems. Examines effects of different practices.

**HRMOB 592 Employee Rights, Protection, and Justice (3)** Focuses on the systems and procedures that safeguard an individual's employment and benefits. Topics include industrial relations and corporate performance, labor-management cooperation, grievance systems, dispute resolution, whistle blowing, and organizational justice.

**HRMOB 599 Doctoral Seminar in Human Resources Management and Organizational Behavior (1, max. 12)** Advanced topics in the fields of human resources management and organizational behavior. May be used by visiting faculty members to present topics of interest to students.

**HRMOB 600 Independent Study or Research (\* max. 10)**

## Information Systems

**I S 423 Object-Oriented Systems (4)** Covers the design and programming of object-oriented application software. Includes introduction to object-oriented principles, representing objects in software, object management, object analysis and design, construction of object-oriented applications, and use of object-oriented language to program working applications. Prerequisite: 3.5 in I S 320.

**I S 460 Systems Analysis and Design I (4)** First course in analysis and design of business information systems. Concentrates on analysis phase of systems development. Systems development life cycle, the feasibility study, analysis of user requirements, and the development of a logical model for the system under study. Prerequisite: I S 320.

**I S 461 Systems Analysis and Design II (4)** Second course in analysis and design of business information systems. Concentrates on design and implementation phases of systems development. Translation of logical system model into physical model, design of modules, file design, testing, implementation. Includes a project using third- and fourth-generation software development tools. Prerequisite: I S 460.

**I S 470 Business Data Communications (4)** Technology and applications of business data communications including characteristics of data, fundamentals of transmission, communications hardware and software, common-carrier services, network configurations (LAN, MAN, WAN), design, management, and security. Exercises in use of information retrieval/distribution systems, file transfer, and Internet resources. Prerequisite: I S 320.

**I S 480 Database Management (4)** Concepts of physical and logical data base organization. Physical file structures used in data management. Logical data models, including hierarchical, network, relational. Data base design, data dictionaries, data manipulation languages. Exercises in design, implementation, and use of data base systems. Survey of commercial data base management systems. Prerequisite: I S 320.

**I S 490 Selected Topics in Information Systems (1-6, max. 20)** Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: I S 320.

**I S 495 Practical Experience in Information Systems (1-4, max. 8)** Undergraduate substantive I S internship and mentorship. Internships can be repeated up to two quarters for maximum of 4 credits; grades based on weekly status reports, paper, demonstration of knowledge. Mentorship program (maximum 1 credit/quarter) allows student to be matched with I S executive; grade based on status reports, other participatory events.

**I S 499 Undergraduate Research (1-6, max. 12)** Selected problems in information systems and computer applications.

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors. Students interested in probability and statistics are also urged to consider BA RM 500 and 501.

**I S 504 Computer-Based Information Systems for Management (3)** Introduction to information systems and computer technology. Covers concepts of information use in decision making. Use of decision-support problem-solving tools (e.g., spread sheet, database software). Management's responsibility in defining, developing, using information systems is focal point.

**I S 530 Management of Information Systems Resources (4)** Topics include general control problem in organizations; performance evaluation of data processing managers; technology and cost trends; software cost estimation; capacity planning; short term utilization; queuing and associated externalities; issues in centralization and decentralization of the information system facilities. Prerequisite: B A 501 or I S 504 or equivalent.

**I S 545 Database Management (4)** Concepts of physical, logical database organization. Physical file structures used in data management. Logical data models, including hierarchical, network, relational. Database design. Data dictionaries. Data manipulation languages. Exercise in design, implementation, use of several database management systems. Survey of commercial database management systems. Database administrator's role. Prerequisite: B A 501 or I S 504, and introductory knowledge of a programming language.

**I S 560 Information Systems Development (4)** Offers comprehensive look at information systems development from the initial stage of defining requirements to final evaluation of installed systems. Topics include analysis of user requirements, development of logical system model, translation of logical systems model into physical system model, testing, and implementation. Prerequisite: B A 501 or I S 504 or equivalent.

**I S 579 Selected Topics in Information Systems (4, max. 12)** Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: B A 501 or I S 504 or permission of instructor.

**I S 585 Advanced Database Research (4)** Introduces topics of interest in database research including heterogeneous database, derived data management, expert database systems, logical and physical database design, formal languages for data manipulation, and temporal databases. Prerequisite: doctoral student and previous course work and experience with database management system or permission of instructor.

**I S 586 Data Structures and Algorithms in Information Systems (4)** Design of computer algorithms in information systems. Methods for analyzing in terms of time and space. Data structures and design techniques used in the solution of frequently encountered problems. Prerequisite: doctoral student and working knowledge of a programming language or permission of instructor.

**I S 588 Advanced Expert Systems (4)** Study of methodological, behavioral, and economic considerations of uncertainty handling in expert systems. Topics include the Certainty Factor model, the Dempster-Shaefer theory, and probabilistic belief networks. Prerequisite: doctoral student and introductory knowledge of a programming language and basic probability theory or permission of instructor.

**I S 599 Doctoral Seminar (1, max. 12)** Advanced topics of information systems. Generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

**I S 600 Independent Study or Research (\* max. 10)**

## International Business

**I BUS 440 Business in Asia (4)** Major aspects of the Asian business environment and how Asian enterprises are managed. Problems and opportunities of foreign corporations in Asia. Prerequisite: I BUS 300.

**I BUS 470- Management of International Trade Operations 1 (4-)** Integrated study of international trade functions, practices, concepts, management, strategy, and policy. The approach utilizes lectures, case studies, research, guest speakers, and extensive practical application. Designed as a two-quarter

sequence. Students may enroll at the beginning of any quarter, summer included. Prerequisite: I BUS 300.

**I BUS -471 Management of International Trade Operations 2 (-4)** Integrated study of international trade functions, practices, concepts, management, strategy, and policy. The approach utilizes lectures, case studies, research, guest speakers, and extensive practical application. Designed as a two-quarter sequence. Students may enroll at the beginning of any quarter, summer included. Prerequisite: I BUS 300.

**I BUS 480 Multinational Operations Management (4)** Case studies in foreign operations management: planning international objectives and strategies; developing multinational company structures and executives; adapting administrative practices and operating policies to international diversities. Prerequisite: I BUS 300.

**I BUS 490 Special Topics in International Business (1-6, max. 12)** Students and faculty focus on current topics of concern. Offered when faculty, student interest, and availability allow. Prerequisite: I BUS 300.

**I BUS 491 CISB Track Seminar (1, max. 6)** Students meet with business community leaders to discuss international aspects of their companies. Allows for networking and sharing experiences with other students as well as practicing foreign languages.

**I BUS 495 International Business Practicum (4)** Offers students opportunity to apply principles, concepts, and skills learned previously to actual business situation. Working on projects provides students an exposure to the issues and choices facing managers operating in an international business environment. Prerequisite: either I BUS 340 and I BUS 470 or I BUS 340 and I BUS 480 or I BUS 340 and MKTG 301 or I BUS 470 and MKTG 301 or I BUS 480 and MKTG 301 or I BUS 470 and I BUS 480.

**I BUS 499 Undergraduate Research (1-6, max. 9)** Prerequisite: I BUS 300.

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**I BUS 530 International Business in Less Developed Countries (4)** Understanding the economic, sociocultural, and political environment in the less developed countries. Problems of international trade and investment, north-south relations, commodities, technology transfer, foreign aid, and capital flows. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

**I BUS 540 International Business in Industrialized Countries (4)** Understanding the economic, sociocultural, and political environment in developed, industrialized countries. Problems of international trade and payments relations, economic integration, national policies, and supranational organizations' impact on managerial environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

**I BUS 550 Field Studies in International Business (4)** Research, analysis, and report on a specific international business project with an existing organization involved with international trade. Possible tasks include identifying most viable foreign target markets, developing best market entry strategies, establishing international terms and conditions of sale, and completing a preliminary marketing or business plan for clients.

**I BUS 560 Multinational Business Management (4)** Managerial responses to problems of international business organizations and operations. Strategy formulation in an international context; design and control of multinational organization; adaptation of management systems and policies to different economic, sociocultural, and political environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

**I BUS 579 Seminar: Special Topics in International Business (4, max. 12)** Application of international business principles to the analysis of a specific issue in trade or resource transfer, or to the business conditions in a particular country. Japan and other Pacific Rim countries are frequent topics. Prerequisite: B A 500 or permission of instructor.

**I 600 Independent Study or Research (\* max. 10)**

## Marketing

**MKTG 430 Sales Force Management (4)** Sales and distribution planning; sales organization and training; management of the sales force; methods of sales, cost, and performance analysis. Prerequisite: MKTG 301.

**MKTG 450 Consumer Behavior (4)** Theory and practice pertinent to marketing decisions of individuals and business firms; utilization of theories from behavioral sciences in marketing research; theories of fashion, characteristics of goods, shopping behavior, product differentiation, market segmentation, and opinion leadership; application of concepts to management of advertising, personal selling, pricing, and channels of distribution. Prerequisite: MKTG 301; recommended: either ECON 311, QMETH 201, PSYCH 213, PSYCH 218, STAT 220, STAT 301, STAT 311, or STAT 390.

**MKTG 452 Marketing Issues for New Ventures (4)** Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth.

**MKTG 460 Marketing Research (4)** Marketing research process; preliminary steps and research design, questionnaires, secondary and primary data, sampling, processing and interpreting data, evaluation and effective presentation of findings. A class research project provides practical application of methods studied. Prerequisite: MKTG 301; either ECON 311, QMETH 201, PSYCH 213, PSYCH 218, STAT 220, STAT 301, STAT 311, or STAT 390.

**MKTG 475 Retail Structure and Strategy (4)** Analysis of the nature and scope of competition within and between sectors of retail trade. Emphasis is placed on the importance of demographic, environmental, and legal differences between geographical areas in determining the level of competition. Prerequisite: MKTG 370.

**MKTG 480 Advanced Marketing Management (4)** Introduction to advanced marketing management through the application of various decision-making models and selected computer routines to such marketing problems as advertising budgeting, media planning, sales forecasting, sales-force allocation, and pricing. Applications include market simulation, Bayesian approaches, and linear programming. Prerequisite: either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145.

**MKTG 490 Special Topics and Issues in Marketing (1-6, max. 8)** Contemporary topics and issues in marketing: marketing in nonprofit organizations, marketing of services, marketing in the public sector,

and marketing in an economy of scarcity. Ordinarily only one topic area is addressed in any one quarter. Course content reflects contemporary developments and the current interests of instructors and students. Prerequisite: MKTG 301.

**MKTG 499 Undergraduate Research (1-6, max. 9)** Prerequisite: MKTG 301.

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**MKTG 501 Marketing Management (3)** Analysis and management of customer satisfaction in goods and services markets by profit and nonprofit organizations. Buyer behavior, market segmentation and product positioning, product policy, pricing, distribution, sales force and advertising management, and market research in the contexts of strategy development, decision making, implementation, and control.

**MKTG 511 Business-to-Business Marketing (4)** *Edwards, Narver* Integrated approach to product marketing management in the business-to-business marketplace. Analysis of core competencies, competitive environment, positioning and segmentation strategies, cost structure, and customer satisfaction. Case-based and project-oriented approach to studying marketing management in the business-to-business market. Prerequisite: B A 501 or permission of instructor.

**MKTG 512 Consumer Marketing (4)** *Louie* Analysis of marketing strategies for consumer products and services. Focuses on consumer satisfaction and brand management including product line and brand developments, pricing strategies, channel and retail relationships, and marketing communication strategies for consumer goods and services. Prerequisite: B A 501 or permission of instructor.

**MKTG 520 Distribution Management (4)** Location and distribution decisions for goods and services in profit and nonprofit organizations. Considers methods of optimizing the number and quality of institutions and activities employed in dealing with exchange, and space and time aspects of distribution. Relates distribution questions to the marketing mix and organizational objectives. Prerequisite: B A 501.

**MKTG 525 Strategic Retail Management (4)** Emphasis on strategic planning decisions faced by senior management in a wide range of retail industries. Taught exclusively by the case method. Prerequisite: B A 501.

**MKTG 530 Management of Sales Operations (4)** Management of personal selling activities within a marketing program. Setting objectives, determining sales strategies; recruiting, selection, and training of sales representatives; allocation of effort, supervision, compensation, and control. Emphasis on case studies. Prerequisite: B A 501.

**MKTG 540 Advertising and Promotion Management (4)** Management of advertising and promotional activities and their integration with other elements of the marketing mix. Topics include: understanding the communication process, analyzing markets, working with suppliers, establishing objectives, determining budgets, selecting media, measuring and evaluating effectiveness, using publicity and promotions. Legal, social, and economic consequences are considered. Prerequisite: B A 501.

**MKTG 552 Marketing Issues for New Ventures (4)** Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: B A 501.

**MKTG 555 Entrepreneurial Marketing and Management (4)** Focuses on role of managers in fostering profitable growth and entrepreneurial actions within ongoing organizations. Class sessions utilize current analytical and conceptual methods, case and field studies, management development exercises, and *Foodcorp, Inc.* which allows students to simulate management of multinational corporations. Prerequisite: B A 501. Offered: jointly with B POL 555.

**MKTG 560 Research for Marketing Decisions (4)** Methods and applications of marketing research incorporating analytical procedures and relevant concepts from behavioral and quantitative sciences. Deals with various aspects of research: problem definition, research design, questionnaire construction, sampling, and data analysis. Introduces promising new developments: multivariate techniques of data analysis, laboratory and field experimentation, and demand analysis in both business and public environments. Prerequisite: B A 501.

**MKTG 570 International Marketing (4)** Analysis of the marketing strategies and tactics of multinational corporations. Choice of entry strategies for foreign markets, analyzing international competition at home and abroad, and developing global marketing strategies. Prerequisite: B A 501; recommended: one I BUS course.

**MKTG 575 Strategic Market Management (4)** The marketing dimensions of strategic planning with emphasis on identifying market opportunities and implementing appropriate competitive-advantage strategies. Includes strategies to stimulate brand demand; defend ones market position; manage the behavior of competitors; manage the behavior of suppliers; and increase the market orientation of ones business. Prerequisite: B A 501.

**MKTG 579 Special Topics in Marketing (4, max. 12)** Marketing topics of current concern to faculty and students. Offered only when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings. Prerequisite: B A 501.

**MKTG 581 Doctoral Seminar in Consumer Behavior (4)** *Louie, Yalch* Survey of the field of consumer behavior introduces fundamental topics in consumer behavior including cognitive processes, emotion, and consumer satisfaction. Provides exposure to a variety of research methods including experiments, surveys, and phenomenological research.

**MKTG 582 Doctoral Seminar in Multivariate Analysis for Marketing Research (4)** *MacLachlan, Moinspour* Survey of methods useful for empirical evaluation of multivariate marketing phenomena and relationships. Includes an overview of measurement theory and practice; multidimensional scaling; conjoint analysis; cluster, factor, and discriminant analyses; multivariate analysis of variance; structural equation modeling; and other methods commonly encountered in academic marketing research.

**MKTG 583 Doctoral Seminar in Marketing Strategy (4)** *Jacobson* Study of factors influencing business performance and role of marketing in achieving competitive advantage. Analysis of prevailing, and emerging, theories underlying strategic thinking and competitive process. Examination of empirical research regarding measurement, level, and persistence of business success and implications of findings for theory and strategy development. Prerequisite: BA RM 580.

**MKTG 584 Doctoral Seminar in Marketing Systems (4)** *Gautschi, Ingene* Examines fundamental and institutional dynamics within marketing systems. Addresses market intermediation, including conditions under which institutions survive, flourish, or retreat and relevant forces on marketing systems including public policy, transportation, infrastructure,

information and communications systems, business cycles, levels of economic development, international trade. Prerequisite: B A 500 or permission of instructor.

**MKTG 591 Doctoral Seminar in Consumer Behavior Research Topics (4)** *Louie, Yalch* Investigates research topics of current interest in consumer behavior. Considers the processes used by consumers to acquire and evaluate marketing information including advertising, publicity, word of mouth, packaging, product description, price, and retail outlets, and examines ways the principles in social perception influence consumers' individual responses to marketing-related activities.

**MKTG 593 Doctoral Seminar in Marketing Models (4)** *Erickson, Ingene* Focuses on modeling research efforts in various areas of marketing. Discussion of mathematical and statistical modeling approaches which contribute to scientific development in the marketing area and ways in which modeling is used to characterize and summarize the nature of general marketing situations in complex environments.

**MKTG 599 Doctoral Seminar in Marketing (1, max. 12)** Study and research in advanced topics of marketing. The seminar is generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

**MKTG 600 Independent Study or Research (\* max. 10)**

## Operations Management

**OPMGT 402 Introduction to Logistics (4)** Logistics studies of the efficient delivery of goods and services. A total-cost approach recognizes this involves not only the obvious vehicle-routing issues but also shipment size and mix, warehouse location, product design, and customer services. Includes study of real companies' logistics problems. Prerequisite: OPMGT 301.

**OPMGT 443 Inventory and Supply Chain Management (4)** Use of material and supply chain management in manufacturing and service organizations to reduce inventory levels while providing adequate service to customers. Specific topics include forecasting, Just-in-Time production, deterministic and stochastic inventory models, and material requirements planning (MRP). Prerequisite: OPMGT 301.

**OPMGT 450 Introduction to Project Management (4)** Focuses on the management of complex projects and the tools and techniques which have been developed in the past 25 years to assist managers with such projects. The course covers all elements of project planning, scheduling and control as well as implementation and organizational issues. Prerequisite: OPMGT 301.

**OPMGT 490 Special Topics in Operations Management (1-6, max. 20)** Operations management topics of current concern to faculty and students. Potential topics are: logistics management, project scheduling, manufacturing strategy, site and location analysis, management of service operations. Prerequisite: OPMGT 301.

**OPMGT 499 Undergraduate Research (1-6, max. 9)**

## Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**OPMGT 502 Introduction to Operations Management (3)** Production of goods or services in any type of organization or institution. Managerial decision

making in operations problems, including application of quantitative analysis and use of computers. Inventory management, scheduling, facility location, management of service systems, and quality assurance. Prerequisite: B A 501, QMETH 501, or equivalent.

**OPMGT 535 Logistics and Physical Distribution Management (4)** Deals with management of the distribution process including all activities involved in physically moving raw materials and finished goods from point of origin to point of consumption. Topics include warehousing, locations, purchasing, and strategic planning in physical distribution organizations. Prerequisite: OPMGT 502 or B A 502 or equivalent and permission of graduate office.

**OPMGT 550 Project Management (4)** Management of complex projects, and tools and techniques (e.g., CPM and PERT) developed to aid the planning, scheduling, and control of projects. Includes work breakdown structures, precedence networks, Gantt charts, resource leveling and allocation, and the use of microcomputer programs. Prerequisite: B A 502 or OPMGT 502 or equivalent.

**OPMGT 570 Operations Strategy (4)** Strategic management of operations and manufacturing in domestic and international companies. Developing and implementing a coherent strategy based on continuous improvement of quality, productivity, products, processes, and customer services. Facilities, capacity, process/work-force planning, organization, people, systems integration, coordination between operations, marketing, engineering, and R&D. Prerequisite: B A 502 or OPMGT 502 or equivalent.

**OPMGT 575 Manufacturing Planning and Control (4)** Focuses on planning decisions for manufacturing firms with emphasis on Material Requirements Plan (MRP) system. Topics include inventory management, capacity planning, operations scheduling, assembly line balancing, cellular manufacturing, and Just-in-Time (JIT) techniques. Prerequisite: OPMGT 502, B A 502, or permission of instructor.

**OPMGT 579 Special Topics in Operations Management (4, max. 12)** Major topics in operations management and systems analysis. Emphasis on research and, where appropriate, application of quantitative analysis and computers. Topics vary, including workforce planning, project management, research and development management, quality assurance, technology planning and forecasting, systems analysis of complex organizations, and urban systems analysis. Prerequisite: B A 502.

**OPMGT 587 Advanced Topics in Inventory Management (4)** Survey of literature in inventory/production control with emphasis on current research. Topics include single-echelon deterministic and probabilistic models and multi-echelon stochastic models. Prerequisite: QMETH 592 and course in probability theory and in stochastic processes.

**OPMGT 590 Theory of Scheduling (4)** Considers scheduling problems in different production environments including assembly lines and flow shops as well as closed and open job shops. Discussion of optimization and heuristic techniques for sequencing, due-date assignment, release time determination, labor assignment, and lot sizing. Prerequisite: doctoral student or permission of instructor.

**OPMGT 599 Doctoral Seminar in Operations Management (1, max. 12)** Study and research in advanced topics of operations management. The seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Credit/no credit only. Prerequisite: doctoral student status.

**OPMGT 600 Independent Study or Research (\* max. 10)**

## Organization and Environment

**O E 403 Commercial Law (5)** Principles of the law of contracts, agency, property, sales, negotiable instruments, and security transactions. Prerequisite: O E 200.

**O E 440 Organization Structure (3)** Concepts of formal organization structures, power, authority, and influence; delegation and decentralization, strategic planning, decision making; philosophy and values in management, the organization in the context of the environment and its impact on the organization's subsystems. Recommended: HRMOB 300.

**O E 490 Special Topics and Issues in Organization and Environment (1-6, max. 6)** Topics and issues of business organization and a changing environment. Content reflects interests of faculty members and students not otherwise covered in the curriculum.

**O E 499 Undergraduate Research (1-6, max. 9)** Selected problem areas or issues in consultation among faculty members and students. Prerequisite: permission of the undergraduate office.

### Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

**O E 510 Organization and Environment (3)** Business organization's political, social and legal environments. Critical managerial issues from historical, theoretical, and social/ethical perspectives. Corporate political power, corporate boards of directors, industrial power, social responsibility, business ethics, roles of the corporation in society, themes of change.

**O E 513 Business Ethics and Corporate Responsibility (4)** Business ethics and corporate social responsibility from philosophical, theoretical, and pragmatic perspectives. Ethical theories and the role of values in business. Ethics and social responsibility put into a framework useful for practicing managers.

**O E 514 Commercial Law (4)** Principles of the law of property sales, negotiable instruments, and security transactions.

**O E 550 Organization and Management (4)** Integrates management as practice, theory, and research. Concepts and values, alternative theories, organizational rationality, cooperative and coordinated systems, bureaucracy and classical organization theory, executive function, accountability and legitimacy; manager's role in matching environment, culture goals, strategy, structure, technology, and control systems.

**O E 560 Seminar in Organization Design (4)** Top managers can choose among alternative organizational forms. Each is dependent on the current stage in the organization's life cycle, the organization's strategy, and internal organization practices. Conditions that lead to effective organization design.

**O E 570 Seminar in Management of Technology and Innovation (4)** Critical issues relating to the management of technology and innovation. How to design innovative organizations in terms of strategy, structure, and process. The innovation process, creativity, management of professionals, technical and strategic leadership, entrepreneurship, intraentrepreneurship, and matrix management.

**O E 579 Special Topics in Organization and Environment (4, max. 12)** Topics of current concern to faculty members and students. Offered only when faculty members are available and there is sufficient student interest.

**O E 600 Independent Study or Research (\*)**

## Quantitative Methods

**QMETH 450 Spreadsheet Models for Managerial Decision Making (4)** Formulation and solution of business problems using operations research techniques in a spreadsheet environment. Techniques of linear and integer programming, dynamic programming, network optimization, queuing, and simulation. Applications from marketing, finance, and operations. Prerequisite: I S 300.

**QMETH 490 Special Problems in Quantitative Analysis (1-6, max. 20)** Specialized quantitative techniques useful for solving business problems. Topics from operation research, statistics, computer methods. Emphasis on application. Prerequisite: either ECON 311, QMETH 201, PSYCH 213, PSYCH 218, STAT 220, STAT 301, STAT 311, or STAT 390.

**QMETH 499 Undergraduate Research (1-6, max. 9)** Research in selected problems in business statistics, operations research, decision theory, and computer applications.

### Courses for Graduates Only

**QMETH 500 Statistical Data Analysis for Management (3)** Introduction to statistical techniques useful for aiding management decisions. Use of interactive computer methods in basic business problems. Random sequences, probability distributions, linear regression, and elementary time series analysis. Prerequisite: QMETH 300 or equivalent preparation in elementary calculus.

**QMETH 501 Decision Support Models (3)** Introduction to computer-based modeling techniques for management decision making. Linear programming, networks, decision analysis, and simulation. Formulation and interpretation. Prerequisite: QMETH 300 or equivalent preparation in elementary calculus.

**QMETH 520 Managerial Applications of Regression Models (4)** Data exploration and inference using regression models for business forecasting and management. Models include simple, multiple, logistic, and nonlinear regression, use of dummy variables, transformations, variable selection, and diagnostics. Prerequisite: QMETH 500 or B A 500.

**QMETH 528 Survey Sampling Applications (4)** Introduction to design and implementation of sample surveys with emphasis on business applications. Simple random, stratified, cluster, multistage sample methods. Probability sampling, optimal allocation of sampling units. Mail, telephone, interview methods. Estimation methods, Questionnaire design. Non-response. Prerequisite: QMETH 500 or B A 500 or equivalent or permission of instructor.

**QMETH 530 Forecasting Models in Business (4)** Introduction to time series analysis and forecasting. Topics include seasonal adjustment, decomposition, exponential smoothing, moving average, and autoregression as well as model identification, estimation, diagnostics, and adaptive forecasting illustrations using real data. Prerequisite: QMETH 500 or B A 500.

**QMETH 551 Linear and Integer Programming (4)** Advanced modeling in linear and integer programming. Linear programming includes formulations, simplex method and variations, duality theory, sensitivity and parametric analysis, quadratic and separable programming; integer programming includes formulations and algorithms (branch and bound and cutting planes). Application areas include production, scheduling, distribution, marketing, finance. Prerequisite: B A 501 or equivalent.

**QMETH 579 Special Topics in Quantitative Methods (4, max. 12)** Presentation of topics of current concern to students and faculty in operations research and applied business statistics. Potential topics include applications and extensions of mathematical programming, stochastic processes, discrete programming, networks models, and the application of statistical techniques.

**QMETH 580 Mathematical Programming (4)** Advanced survey of mathematical programming with applications to business problems. Includes linear, integer, stochastic, nonlinear, and dynamic programming and network optimization. Treatment includes formulation, optimality conditions, duality theory, solution algorithms. Applications to production, scheduling, marketing, finance, and equipment replacement. Prerequisite: B A 501 or equivalent and doctoral student or permission of instructor.

**QMETH 592 Stochastic Models: Queuing and Simulation (4)** Application of stochastic processes to business problems. Focuses on development and application of queuing theory and discrete event simulation. Prerequisite: stochastic processes, knowledge of high level programming language, and doctoral student or permission of instructor.

**QMETH 599 Doctoral Seminar in Operations Research (1, max. 12)** Study and research in advanced topics of operations research. The seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status. Credit/no credit only.

**QMETH 600 Independent Study or Research (\*)**

## Strategic Management

### Courses for Graduates Only

**ST MGT 591 Theories of the Firm and Strategic Management: Economic Models (4)** Reviews the economic theories that support strategies pursued by firms and explores the links between market processes, firm strategy, and firm performance. Topics include agency theory, transaction cost economics, resource dependence, population ecology, and neo-Austrian economics.

**ST MGT 592 Theories of the Firm and Strategic Management : Sociological Models (4)** Explores the sociology of organizations from multiple perspectives while introducing fundamental sociological questions and preparing students for conducting research in organizations. Emphasis on structural contingencies, institutions, resource dependence, population ecology, negotiated order and culture, organizational learning and decision making, organizational power and politics, networks, and inter-organizational relations.

**ST MGT 593 Contemporary Strategic Management Research (4)** Facilitates understanding of empirical foundations of theory development and testing in contemporary strategic management research. Focuses on evaluation of ways in which the empirical tradition has evolved in the strategic management area. Attention to evaluating research methodologies used in the field.

**ST MGT 594 The Social and Political Environment of the Firm (4)** Focuses on the social and political factors that help shape corporate strategy using stakeholder management as an integrating concept. Topics include corporate governance, corporate political activity, governmental regulation, comparative political economy, and normative aspects of strategic management, including ethics and corporate social responsibility.

# School of Dentistry

## Dean

Paul B. Robertson  
D322 Health Sciences

General Catalog Web page:

School Web page:  
[www.dental.washington.edu](http://www.dental.washington.edu)

Established in 1945, the University of Washington School of Dentistry offers courses leading to a Doctor of Dental Surgery (D.D.S.) degree, and advanced education leading to a Master of Science in Dentistry degree and/or a certificate of proficiency in endodontics, oral medicine, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Residency training is available in oral and maxillofacial surgery and general practice. The Department of Oral Biology offers a Master of Science (M.S.), an M.S. non-thesis degree for dental hygiene educators, and a doctoral degree (Ph.D.). Postdoctoral study is available in various disciplines. The School also offers a baccalaureate degree completion program in dental hygiene.

Opportunities to earn other degrees concurrently (M.S. or Ph.D. in the School of Dentistry's Department of Oral Biology and other schools) may be arranged on an individual basis.

These educational programs are enriched by the School's strong commitment to research and the presence of a Regional Clinical Dental Research Center, a Comprehensive Center for Oral Health Research, a Dentist-Scientist program, and a fellowship research training program for predoctoral students. The mission of the Regional Clinical Dental Research Center is to foster clinically relevant research that will advance dentistry's knowledge base, improve patient care, and promote oral health. The Comprehensive Center for Oral Health Research is focused on children's dental health and is one of only six such programs to be funded nationally by the National Institute of Dental and Craniofacial Research. State-of-the-art clinical research facilities are available for faculty and student use.

*School of Dentistry Mission Statement:* "The School of Dentistry shares the University's overall mission to generate, disseminate, and preserve knowledge and serve the community. The School is an integral part of the Health Sciences Center and is an oral health-care center of excellence serving the people of the state of Washington and the Pacific Northwest. Through its exemplary educational, research, and service programs, the School prepares students to be competent oral health-care professionals. Its research programs fundamentally contribute to the understanding of basic biologic processes and behavioral, biomedical, and clinical aspects of oral health. The School values and seeks diversity in its students, staff, faculty, and patient populations. It fosters an environment of mutual respect where objectivity, imaginative inquiry, and the free exchange of ideas can flourish to facilitate personal development, professionalism, and a strong sense of self-worth." (July 1994)

The following departments participate in the curriculum for the School's programs: *Dental Public Health Sciences* is concerned with the social, legal, political, economic, and psychological aspects of dental health-care delivery as well as the epidemiology of oral diseases and the application of biostatistical methods in studying them. *Endodontics* offers training in the diagnosis and treatment of diseases and injuries of the

tooth pulp and periradicular tissues. *Oral and Maxillofacial Surgery* trains students in the procedures used for all types of operations in the oral cavity and all phases of dental pain control. *Oral Biology* encompasses the study of basic biological mechanisms in normal and diseased oral tissues and structures. *Oral Medicine* provides training in diagnostic techniques and nonsurgical treatments of oral disease. *Orthodontics* provides training in the prevention and correction of malocclusion of the teeth. *Pediatric Dentistry* provides students with a broad understanding of prevention, diagnosis, and treatment of most dental needs from infancy through adolescence with emphasis on the psychological and educational requirements of the patient and parent. *Periodontics* offers training relative to the periodontium and dental implants, with emphasis placed on diagnosis, prevention, treatment, and maintenance. *Prosthodontics* provides instruction in the fabrication and maintenance of removable, complete, and partial dentures, and dental implants. *Restorative Dentistry* offers training in the restoration or replacement of tooth structure and study of the form and function of the masticatory structures.

## Undergraduate Program

Department Web Page:  
[www.depts.washington.edu/dhyg](http://www.depts.washington.edu/dhyg)

Dental hygiene seeks to understand why some people get preventable oral diseases, and why others do not. Risk factors, such as poverty, ethnicity, and education, as well as environment, contribute to perpetuation of these diseases. The dental hygienist observes and defines dental diseases, assesses potential outcomes of interventions, and manages conditions that compromise oral health. As an applied discipline, dental hygiene links its theoretical foundation to behavioral and natural sciences. Using evidence-based science, the discipline seeks to facilitate holistic assessments of individuals and communities and to find solutions to oral health problems. Students in the discipline learn to transfer learning from clinical to community contexts as a means of improving the oral health status among people.

Adviser  
Reinhard (Ron) Hahn

## Bachelor of Science

The University of Washington Dental Hygiene Degree Completion Program provides postlicensure education for dental hygienists who have completed a prelicensure program and who are certified or licensed to work as dental hygienists. Completion of this education enables graduates to function professionally as dental hygienists in business, management, advanced clinical dental hygiene services, public health, research, education, or private enterprise, depending upon path selections. It also provides opportunity for dental hygienists to prepare for advancement into graduate or professional schools or other careers.

For information on the dental hygiene undergraduate program, see the undergraduate volume of the *General Catalog* or visit the *General Catalog* online at [www.washington.edu/students/genocat/](http://www.washington.edu/students/genocat/).

## Professional Programs

### Doctor of Dental Surgery

The Doctor of Dental Surgery (D.D.S.) curriculum provides opportunities to learn the fundamental principles significant to the entire body of dental knowledge. Students are expected to learn fundamentals of basic health sciences, to attain proficiency in clinical skills, to develop an understanding of professional and ethical principles, and to develop reasoning and critical decision-making skills that will enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory, and preclinical activities in basic sciences, dental anatomy, occlusion, and dental materials. In the second year, students develop further preclinical skills, learn how basic science principles are applied to the clinical setting, and begin clinical patient treatment. In the third and fourth years, students concentrate on providing clinical treatment, attend lectures that refine technical and diagnostic skills, and participate in electives. Students are required to take one elective in each of the junior and senior years. Electives are chosen by students from courses offered by all departments, including opportunities in independent study, research, seminars on various topics, and specialty clinical topics.

The curriculum extends for 42 months or 14 quarters, including two summer quarters. The 12 academic year quarters are variable in length (ten weeks of instruction, one week of examination), while the two required summer quarters following years two and three are each nine weeks long. If needed, students may be allowed additional time to complete required course work.

### Admission

To be considered for admission to the predoctoral program, a student will need to have completed the required courses listed below, have taken the Dental Admission Test, and have attended a personal interview. The School does not select or give preference to a particular undergraduate major field; in fact, the Admissions Committee encourages diversity in majors. Courses in the social sciences and the humanities are also important and reviewed by the Committee.

The School of Dentistry is a state supported institution and participates in the student exchange program provided by the Western Interstate Commission for Higher Education (WICHE) which supports students from western states without dental schools. Although all applications are carefully reviewed, preference in admission is given to residents of Washington and WICHE states. Required courses are: general chemistry—2 quarters or 1 semester; organic chemistry—2 quarters or 1 semester; general biochemistry—2 quarters or 1 semester, general physics—3 quarters or 2 semesters; general biology or zoology—3 quarters or 2 semesters; general microbiology—2 quarters or 1 semester. Although a majority of students have baccalaureate degrees, students with outstanding academic qualifications may be considered for admission after only three years. The School enrolls a first-year class of 50-55 students. The School is committed to diversity within the dental school student body and the dental community.

*Transfer Applicants:* The School rarely, and only under exceptional circumstances, admits transfer students from other dental schools.

*Foreign Applicants:* The School does not provide a special program for foreign-trained dentists.

*Dental Readiness Program:* To achieve the School's mission of a diverse student body, the School has instituted the Dental Readiness Program. The goals of the Dental Readiness Program are (1) to correct academic deficiencies of specific applicants who have not met the University of Washington School of Dentistry

GPA or Dental Admission Test admission-eligibility criteria, (2) to assist specific applicants in gaining admission to dental school, and (3) to prepare students for successful completion of the predoctoral dental degree. If selected, entrants may be enrolled in some first-year dental courses, as well as study-skills seminars, learning-method assessment seminars, research activities, and other University courses that will strengthen academic background. Mentors and tutors will be provided as needed. During the program year, the entrant must be enrolled only in the approved curriculum, must successfully complete all the designated courses of the Dental Readiness Program, and receive no failing, deficient, or withdrawal grades, while attaining a 2.50 overall GPA. Entrants successfully meeting these criteria will be admitted to the four-year Doctor of Dental Surgery (D.D.S.) curriculum.

To increase diversity of students, the School participates in, and provides funding for, the Health Sciences Educational Enrichment and Transition Services (EETS) Office. In addition to advising and career counseling, this office works with Health Sciences schools to provide student development and support programs, networking opportunities, and summer research programs. The EETS Office activities include participation on several Health Sciences and campus-wide committees for purposes of collaborating and exchanging strategies on effective methods for recruiting and retaining a diverse student body; as well as promoting/celebrating diversity.

The School belongs to the American Association of Dental Schools Application Service (AADSAS). The School has established November 1 as its AADSAS priority filing deadline. Only those applications received in the AADSAS Washington, D.C. office by the priority filing date will be forwarded to the University of Washington for consideration by the Admissions Committee. Applications may be requested from the AADS Web site ([www.aads.jhu.edu/aadsas.html](http://www.aads.jhu.edu/aadsas.html)). Information concerning application status may be requested by email at [aadsas.status@aaads.jhu.edu](mailto:aadsas.status@aaads.jhu.edu), or by regular mail at 1625 Massachusetts Avenue NW, Washington, D.C. 20036-2212; (202) 667-1886.

Information regarding the Dental Admission Test should be requested from the American Dental Association, Dental Admissions Testing Program, 211 East Chicago Ave., Suite 1846, Chicago, IL 60611-2678, (312) 440-2689, [www.ada.org/prac/careers/dat-01.html](http://www.ada.org/prac/careers/dat-01.html).

For information on the University of Washington School of Dentistry application or admissions contact either Kathy Craig, Office of Student Admissions, School of Dentistry, University of Washington, Box 356365, Seattle, WA 98195-6365, (206) 543-5840, fax (206) 616-2612, [askuwsod@u.washington.edu](mailto:askuwsod@u.washington.edu), [www.dental.washington.edu](http://www.dental.washington.edu), or Debbie Prince, Pre dental Advising Office, University of Washington, 008 Communications, Box 353760, Seattle, WA 98195-3760, (206) 543-2598, [debbiepf@u.washington.edu](mailto:debbiepf@u.washington.edu).

Once the AADSAS application has been received, a preliminary screening determines if an applicant meets the Admissions Committee's criteria to receive a supplemental application and request for the following materials:

1. A supplementary application that includes a short personal statement
  2. A non-refundable application fee of \$35.
  3. Three letters of recommendation. Letters of recommendation should include one from a science instructor who can evaluate the applicant's academic and intellectual qualifications, a second from a dentist who is familiar with the applicant's knowledge of and motivation toward the dental profession, and the third (character reference) from someone who can indicate the applicant's contribution to fellow man, community, etc. If a pre dental committee exists on the applicant's campus, a combined recommendation from that committee may be used to replace all three recommendations.
  4. Dental Admission Test scores. Test must be taken by October 31 of the year prior to entry.
  5. Transcripts from all higher education institutions attended.
  6. A list of current and future courses.
  7. Acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the *Essential Requirements of Dental Education at the University of Washington School of Dentistry* (to be sent with the supplemental application form).
  8. Conviction/criminal history information. Washington state law requires that all faculty, students, and staff disclose background information concerning crimes and offenses against vulnerable populations. A complete copy of the law is available from the School's Office of Student Services and will be forwarded upon request. Applications will not be considered until completed disclosure forms have been returned to Student Admissions.
- The application will be considered complete once all materials noted above (1-8) are returned. Upon receipt of the completed application, invitations for an interview are sent to applicants based on a preliminary screening of grades and DAT scores. The interview is an opportunity for an open and friendly discussion of the applicant's interests, background, and reasons for selecting dentistry as a profession. The interview allows the applicant to ask questions about the School, faculty, and student life, and is conducted by a member of the Admissions Committee. In addition to the interview, the applicant will have an opportunity to hear information about financial aid, meet with enrolled students, take a tour of the School, and meet one of the School's deans.
- Following the interview, the Admissions Committee, which is composed of faculty, students, and alumni, will make a decision concerning admission status. In their deliberations, the following seven areas are considered, with the first two areas receiving the most weight in assessing the applicant's merits as a candidate:
1. *Grades.* Overall grade-point average (GPA) and GPA of pre dental required science courses are reviewed. College grades are an important indicator of dental school performance and success. The Committee members review these grades for a strong, consistent GPA with very few withdrawals, incompletes, repeated courses, or non-graded options.
  2. *DAT (Dental Admission Test).* The test, sponsored by the American Dental Association, covers several areas: quantitative reasoning, survey of natural sciences (including biology, general, and organic chemistry), and perceptual ability (including form development, apertures, angles, cubes, and orthographic projections). At the University of Washington the scores are reviewed to identify an applicant's areas of strength. The test must be taken no later than October, one year prior to admission.
  3. *Level of Pre-professional Education.* The majority of applicants will have a baccalaureate degree by the time of entry. Admission may be offered to applicants without a baccalaureate degree but only to those applicants who have completed all pre dental requirements and have an extremely competitive academic record.
  4. *Dental Knowledge.* Knowledge of the field of dentistry through experience in a dental setting (dentist's office, clinic, etc.), introductory dental course work, and exploration of the dental literature are considered as admission factors. A qualified applicant will have a clear understanding of the profession and a demonstrated interest in the field.
  5. *Unique Life Experiences.* Research and teaching efforts, travel, and work experience are some of the life experiences that are considered important. Such experiences demonstrate the breadth and level of maturity of a candidate.
  6. *Personal Attributes.* In addition to motivation, the applicant's poise and communication skills are examined by the Admissions Committee. Personal attributes such as integrity, responsibility, leadership, initiative, community service, perseverance, and diversity of interests are important.
  7. *Contribution to Diversity.* Diversity in the student body contributes to the development of oral health care professionals prepared to address the needs of society.
- Although interviews begin in October, the earliest the Admissions Committee will notify applicants of its decision is December 1. The School uses a "rolling admission" format, so interviews and committee decisions will continue to be made between December and March. The Admissions Committee will make one of three decisions regarding all applications:
1. *Offer of Acceptance.* Admission application has been accepted. The applicant will have a specified time to reply to reserve enrollment in the entering first-year class. In addition, enrollment will be contingent on timely submission of the following requirements: required registration deposit, transcripts showing completion of pre dental courses, physician statement, registration for autumn quarter of the upcoming academic year, and completion of required immunizations.
  2. *Alternate Status.* Applicant is offered a position on the Alternate List. The applicant will have a specified time to reserve a position on this list which is maintained until the beginning of the school year.
  3. *Denial of Admission.* The Committee has considered the application but cannot offer a position or alternate status.
- Accepted applicants will receive follow-up letters and information. Letters detailing registration procedures and providing financial aid information will be sent in early summer. In late summer, accepted students will receive a packet of materials welcoming them to the School and describing the orientation program, also called Prep Weeks. Attendance is mandatory and will provide an opportunity for the newly enrolled student to learn about the upcoming curriculum, student rights and responsibilities, financial aid information, student organizations, and to begin course work. Prep Weeks begin approximately two weeks prior to the start of the School of Dentistry's autumn quarter. The accepted student also will participate in an off-campus student retreat.
- Western Interstate Commission for Higher Education (WICHE):* The School participates in the program administered by WICHE for students who reside in Western states not served by a dental school (Alaska, Arizona, Hawaii, Montana, Nevada, New Mexico, North Dakota, South Dakota, and Wyoming). Such students should seek requests for certification from the WICHE commission office in their state of residence. Students who enroll in the School under the WICHE program pay in-state tuition, the nonresident portion being paid by the member state that sponsors the student.

<i>Projected costs for 1999-2000</i>	<i>First Year</i>	<i>Second Year</i>	<i>Third Year</i>	<i>Fourth Year</i>	<i>Total</i>
Tuition (resident)	9,210	12,111	12,111	9,210	42,642
Tuition (nonresident)	23,256	30,633	30,633	23,256	107,778
Technology fee (\$40/quarter)	120	160	160	120	560
Supplies (includes issue, rental, nonrental, syllabi, clinic fees, models)	3,582	4,638	1,212	0	9,432
Textbooks	1,195	831	206	0	2,232
Misc.	237	356	124	561	1,278
Total Education Costs (resident)†	14,344	15,195	13,813	12,792	56,144
Total Education Costs (nonresident)‡	28,390	36,618	32,335	23,937	121,280

†Total Educational Costs do not include living and personal expenses. Nonrental instruments belong to the student, and should be considered a long-term investment and not part of the expendable educational costs.

‡Nonresident Total Educational Costs include Total Educational Costs plus the additional tuition for students with nonresident tuition status.

Information on loans and scholarships may be obtained from the Director of Financial Aid, D322 Health Sciences, Box 356365. Information relating to student life, including the Student Dress Code, Academic Regulations Manual, and Professional Ethics Code may be obtained from the Associate Dean for Student Services, D322 Health Sciences, Box 356365.

### Facilities

School clinics, teaching laboratories, and lecture halls are up-to-date, well maintained, and periodically renovated. Third- and fourth-year students are assigned a permanent clinical module for use in patient care.

### School Accreditation and Licensure

The School is fully accredited by the Commission on Dental Accreditation, the recognized accrediting body for dentistry and the related dental fields. For information, write to the Commission on Dental Accreditation, 211 East Chicago Ave., Chicago, IL 60611-2678. Admission to the practice of dentistry in any state is conditional upon meeting the requirements of the individual state dental licensure requirement. In order to practice in the State of Washington, the candidate for licensure must have a dental degree from a U.S. or Canadian dental school, and have successfully completed the American Dental Association National Board Examinations and the Western Regional Examining Board Examination. Additional information about licensure requirements should be requested from the Washington State Department of Health, Dental Quality Assurance Commission, PO Box 1099, Olympia WA 98504-1099, (360) 586-6898.

### Health Care and Immunization Policy

Accepted students are required to meet the University and Health Sciences immunization requirements. Information is forwarded in late summer.

## Graduate Programs

Through their respective departments, the graduate faculty members of the School offer programs leading to the degrees of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs.

### Master of Science in Dentistry/ Postgraduate Certificates

Fields of study for the M.S.D. programs include endodontics, oral pathology, oral medicine, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Although students may enroll in a graduate certificate program only, students may elect to pursue an M.S.D. The programs are planned to prepare students to think independently, to evaluate their own services and the literature of the programs, and to develop their clinical skills to a level to permit successful clinical practice, teaching, or research in their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment. The purpose of the programs is not only to train students in their respective specialties but also to encourage preparation for academic careers or for research. Research may be undertaken in basic or applied science. Opportunities for collaborative research are available with the cooperation of other colleges, schools, or departments of the University.

Applicants for admission to the M.S.D. and certificate programs must be graduates of a school of dentistry approved by the Commission on Dental Accreditation of the American Dental Association or a university dental school located outside the North American continent whose curriculum and admission requirements are similar to those of the UW School of Dentistry. Applications must be submitted to the appropriate department on or before the following deadline: October 1 for endodontics, oral medicine, oral surgery, orthodontics, pediatric dentistry, periodontics, and prosthodontics. A concurrent Application for Admission to the Graduate School also must be filed. International students must complete a preliminary evaluation process before the application deadline and must demonstrate competency in the English language, for which TOEFL scores are required. Applicants who have not received dental degrees from an institution within the United States will be required to supply Graduate Record Examination scores for admission to the University of Washington Graduate School (graduates of U.S. institutions are not required to submit GRE scores). Requests for information or application forms may be forwarded to the department of the specialty field, School of Dentistry, University of Washington, Seattle, WA 98195-6365, (206) 543-5840.

A minimum of eight consecutive full-time quarters of residence is required except in the periodontics and prosthodontics programs. Certificate training in periodontics requires a minimum of 12 consecutive full-time quarters of enrollment and may be pursued concurrently with other advanced degrees which may

extend the program length. The graduate prosthodontic program requires a minimum of 12 full-time quarters of didactic, clinical care, and research activities.

Postgraduate certificate programs are not administered by the Graduate School, and no thesis is required. The course content may vary somewhat from the M.S.D. program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

### Master of Science, Doctor of Philosophy

Curriculums for the M.S. and Ph.D. programs are offered through the Department of Oral Biology.

Oral biology is concerned with the nature of the oral and paraoral tissues and with the applicability of basic scientific knowledge to oral tissues in health and disease. The courses and research programs in the department deal with the origin, growth and development, structure, and functions of oral tissues, as well as with the etiology and pathogenesis of oral diseases and malfunctions. By its nature, oral biology overlaps the basic medical sciences and clinical dental sciences.

The department contains well-equipped laboratories actively engaged in various aspects of research involving the following approaches: biochemical, including studies on protein synthesis and secretion and the structure of salivary macromolecules, as well as studies on the structural proteins of the cytoskeleton of oral epithelial and epidermal cells; pharmacological, including molecular mechanisms in the regulation of secretion; physiological, including ion fluxes and their control in secretory tissues; microbiological, including the molecular basis of bacterial colonization of oral surfaces, and the identification, taxonomy and pathogenicity of oral pathogens; pathological, including the growth and metastasis of oral tumors; tissue culture, including studies on factors regulating the growth and development of oral epithelial cells; and morphological, including studies on oral tissues at the light and electron microscopic levels.

Several programs are available through the Department of Oral Biology to accommodate students with different educational objectives.

A program of study and research leading to the Doctor of Philosophy degree is available for those students desiring extensive research training as well as in-depth course work in oral biology. In addition to the courses offered by this department, students in the Ph.D. program are expected to gain proficiency in one of the biomedical sciences.

A separate program of study and research leading to the Master of Science degree is available for those students who want less training than the Ph.D. program affords.

A non-thesis option exists in the Master of Science program for the purpose of training dental hygiene educators to instruct in certain basic and applied sciences as well as in the clinic.

The School offers a program leading to the degree of Master of Science in Dentistry in oral pathology. Students enroll in a series of advanced courses in general and oral pathology.

Clinical specialty training (e.g., endodontics, oral medicine, orthodontics, pediatric dentistry, periodontics) can also be obtained in conjunction with either the M.S. or Ph.D. programs.

Applicants for all programs must have either a baccalaureate or professional degree from a dental or medical school. Acceptance into the programs requires approval of both the Department of Oral Biology and the Graduate School. For information or application materials, contact the Graduate Program Adviser, Department of Oral Biology, B224 Health Sciences, Box 357132, University of Washington, Seattle, WA 98195-7132, (206) 543-5477.

United States Public Health Service traineeships in oral biology may be available to students who are U.S. citizens or permanent residents. These begin at \$26,256 at the postdoctoral level. An allowance for tuition and fees is normally included. Applicants may also seek support via the institutional or the individual Dentist-Scientist Awards from the National Institutes of Health, which provide up to five years of stipend support for dental graduates seeking a combined clinical specialty-Ph.D. degree course of study.

### Residency Training

Residency training programs are available in oral and maxillofacial surgery and the general practice of dentistry. Both programs provide for rotation through several of the University-affiliated hospitals. Each is a fully accredited program that grants a certificate upon successful completion of the training. Stipends are provided.

The Oral and Maxillofacial Surgery Program is four years in duration and provides broad exposure to all aspects of the practice of oral and maxillofacial surgery. Application, selection, and administration of this training program is provided through the Department of Oral and Maxillofacial Surgery. Further information can be obtained by contacting the Residency Program Coordinator, Department of Oral and Maxillofacial Surgery, Box 357134, School of Dentistry, University of Washington, Seattle, WA 98195-7134, (206) 543-7722.

The General Practice Residency is a one-year training program that emphasizes the general dentist's role in a hospital and the management of medically, physically, and mentally compromised patients. Application, selection, and administration of the General Practice Residency is provided through the Department of Restorative Dentistry. Further information can be obtained by contacting Dr. Barton S. Johnson, Division of Hospital Dentistry, Department of Restorative Dentistry, Box 357456, School of Dentistry, University of Washington, Seattle, WA 98195-7456, (206) 543-7496.

### Postdoctoral Fellowships

Postdoctoral training fellowships are available in behavioral or public-health research in dentistry in addition to those in oral biology. Programs vary in duration and many accommodate degree-seeking or research fellows pursuing an academic career. NIH-sponsored full tuition and a stipend for up to three years are provided for U.S. citizens, noncitizen nationals, and those foreign nationals with permanent-residency status in the United States. Members of ethnic minorities and women are especially invited to apply. Application, selection, and administration of the program are provided through the Departments of Dental Public Health Sciences and Oral Biology.

### Graduate Training in Dental Public Health

Opportunities exist for pursuing graduate degrees in public health which emphasize applications to research in dentistry. Master of Public Health (M.P.H.) programs in the Departments of Epidemiology and Health Services of the School of Public Health and Community Medicine can be pursued in conjunction with postdoctoral training in the School of Dentistry's Department of Dental Public Health Sciences. Didactic course work is taken in the School of Public Health and Community Medicine, augmented with independent study and thesis research on selected topics in the School of Dentistry. Similar opportunities exist for pursuing the Ph.D. in epidemiology or biostatistics with an emphasis on research in dentistry. Further information may be obtained from the Department of Dental Public Health Sciences, Box 357475, School of Dentistry, University of Washington, Seattle, WA 98195-7475, (206) 543-2034.

The Office of Continuing Dental Education, School of Dentistry, offers programs and courses throughout the year to provide dentists, auxiliary personnel, and others involved in health care with current scientific knowl-

edge and methodology of patient treatment. Utilizing local, national, and international experts, these programs provide a broad spectrum of information relevant to the needs of dental-health professionals. The instructional program consists of lectures, clinical courses, study clubs, extended clinical training, correspondence, and participation courses, some of which are offered in the new simulated-patient laboratory. Various programs are presented throughout the year in the Pacific Northwest, Alaska, Arizona, and Hawaii.

A list of courses offered may be obtained from the Office of Continuing Dental Education, Box 357137, University of Washington, School of Dentistry, Seattle, WA 98195-7137, (206) 543-5444.

## Dental Hygiene

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**D HYG 402 Global Perspectives in Oral Health (3)** Disease patterns and their impact on oral health care delivery systems. Cultural, demographic, economic, and political factors affecting the effectiveness of various systems. Offered: A.

**D HYG 403 Oral Health Educational Strategies (3)** Planning, preparing, and evaluating educational strategies for oral health promotion. Assessment of needs, development of objectives, creation of communication messages, review of behavioral and educational theories, mechanisms of evaluation. Offered: W.

**D HYG 404 Field Experience in Delivery of Oral Health Care (2-12, max. 12)** Focuses on healthcare delivery issues: environmental, social, educational, economic, or cultural. Students participate at approved health agencies to learn about societal, ethical, cultural, and client oral healthcare needs and demands. The 2-credit minimum includes 30 hours on-site, end-of-quarter seminar, written assignment, and weekly e-mail communication with faculty. Offered: AWSpS.

**D HYG 465 Theoretical and Scientific Basis for Dental Hygiene Practice (3)** Lecture-discussion on science, theory, and dental hygiene practice. Focuses on clinical-decision making processes and evidence-based learning in management of oral health problems. Includes experience at selected sites. UW library system and computer resources used to search and retrieve information for reports. Offered: A.

**D HYG 482 Local Anesthesia for Dental Hygienists (2)** Techniques of local anesthesia and initial management of emergencies in the dental office.

**D HYG 491 Issues in Professional Education (3)** Seminar and discussions on topics influencing dental education. Academic freedom, accreditation, interdisciplinary relationships, legislation, licensure, tenure.

**D HYG 492 Principles of Scientific Investigation for Oral Health Professionals (3) QSR** Introduction to principles of scientific investigation, biostatistics and their application to relevant literature. Offered: W.

**D HYG 493 Review of Literature for Oral Health Professionals (3) QSR** Application of modern methods of library search and critical analysis of relevant literature. Includes technical writing and oral reporting as a means of integrating knowledge and skills acquired in 465 and 492. Offered: Sp.

**D HYG 494 Principles of Teaching for Oral Health Professionals (3)** Application of principles of learning to teaching methods and techniques used in education, with opportunity for course planning, demonstration, and practice teaching. Offered: A.

**D HYG 497 Directed Studies for Oral Health Professionals (\* max. 14)** Based on student interest in special areas. Independent study and tutorial student-faculty relationships. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**D HYG 565 Theoretical and Scientific Basis for Dental Hygiene Practice (3)** Lecture-discussion on science, theory, and dental hygiene practice. Focuses on clinical decision making processes and evidence-based learning in management of oral health problems. Includes field experience at selected practice sites. UW library system and computer resources used to search and retrieve information essential to making oral and written reports. Offered: A.

**D HYG 594 Principles of Teaching for Oral Health Professionals (3)** Application of principles of learning to teaching methods and techniques used in education, with opportunity for course planning, demonstration, and practice teaching. Prerequisite: graduate program admission. Offered: A.

**D HYG 595 Internship (\* max. 12)** Clinical and/or didactic teaching experience or program administration. Teaching and administration responsibilities assigned according to student's previous experience, education needs, and interest. Seminar required. Prerequisite: D HYG 494 or D HYG 594 and permission of instructor. Offered: AWSpS.

## Dental Public Health Sciences

### Faculty

#### Chair

Timothy De Rouen

#### Professors

Chapko, Michael K. \* 1978, (Adjunct Research); MA, 1970, Hunter College; PhD, 1972, City University of New York; diffusion of health technologies, cost-effectiveness in health care.

Conrad, Douglas A. \* 1977; MHA, 1973, University of Washington; MBA, 1977, PhD, 1978, University of Chicago; managed care, corporate finance in managed care.

De Rouen, Timothy \* 1975; PhD, 1971, Virginia Polytechnic Institute and State University; applications of biostatistics to clinical epidemiology of oral and infectious diseases.

Domoto, Peter K. \* 1973, (Adjunct); DDS, 1964, University of California (San Francisco); MPH, 1975, University of Washington; pediatric dentistry, dental behavioral science.

Fales, Martha H. \* 1959, (Emeritus); PhD, 1978, University of Michigan; dental hygiene.

Grembowski, David \* 1981; MA, 1975, Washington State University; PhD, 1982, University of Washington; dental care demand, fluoridation, dental health services research.

Milgrom, Peter M. \* 1974; DDS, 1972, University of California (San Francisco); management of fearful and phobic dental patients, quality of dental care.

Weinstein, Philip \* 1972; PhD, 1971, University of Kentucky; dental behavioral science; dental fear and pain in children, adults, and early childhood cases.

### Associate Professors

Beaton, Randal D. \* 1976, (Adjunct Research); PhD, 1972, University of Washington; assessment and treatment of temporomandibular joint pain and dysfunction.

Cameron, Cheryl A. 1979; MEd, 1978, University of Kentucky; PhD, 1986, University of Washington; JD, 1994, Seattle University; dental hygiene, educational policy, academic and health law.

Critchlow, Cathy W. \* 1979; PhD, 1993, University of Washington; epidemiology of sexually transmitted diseases, virus-associated cancers, epidemiologic methods.

Leroux, Brian \* 1991; MSc, 1985, PhD, 1989, University of British Columbia (Canada); biostatistical methodology and its application to clinical trials and epidemiology.

Martin, Michael D. \* 1986, (Adjunct); DMD, 1979, University of Kentucky; MPH, 1989, PhD, 1993, University of Washington; dental education in oral health care of persons with disability.

Ramsay, Douglas S. \* 1983, (Adjunct); DMD, 1983, University of Pennsylvania; PhD, 1988, MSD, 1990, University of Washington; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

Wells, Norma J. 1960; MPH, 1966, University of California (Los Angeles); oral health promotion, dental caries, dental hygiene education.

### Assistant Professors

Coldwell, Susan E. \* 1994; MA, 1990, PhD, 1994, University of Pennsylvania; pain, anxiety, and taste preference.

Mancl, Lloyd A. \* 1986, (Research); MS, 1988, PhD, 1992, University of Washington; statistical methodology in periodontal disease and TMD research.

### Instructor

Drangsholt, Mark T. 1985, (Acting); DDS, 1984, MPH, 1992, University of Washington; epidemiology.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**DPHS 449 P-Directed Studies in Dental Public Health Sciences (\*)** Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: AWSpS.

**DPHS 510 Social and Historical Perspectives in Dentistry (2)** Examines dental care problems involving biological, behavioral, and community elements and has student develop hypotheses regarding nature and complexity of problem, set objectives, seek resources and information, and contribute to development of outcomes. Offered: A.

**DPHS 535 P-Scientific Literature in Clinical Decision Making (1)** Introduction to critical reading of individual articles in professional journals and integrating the findings of several articles. Use of the literature to assist the practicing dentist in making clinical decisions. Offered: Sp.

**DPHS 541 P-Ethics in Dentistry (1)** Seminar improving ethical reasoning skills and conveying ethical and legal standards of the profession. Credit/no credit only. Offered: Sp.

**DPHS 550 P-Directed Studies in Dental Public Health Sciences (\* max. 6)** Students and faculty members who have common academic interests can pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: AWSpS.

**DPHS 568 Biostatistics in Dentistry (3)** Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or Permission of instructor. Offered: jointly with B10ST 510.

**DPHS 569 Clinical Epidemiology and Study Design in Dentistry (2)** An introduction to epidemiological methods as they relate to dental research. Topics covered include the estimation of dental disease occurrence at patient level and site level and the design and analysis of clinical trials with special emphasis on designs unique to dentistry, such as split-mouth designs. Credit/no credit only. Offered: S.

**DPHS 575 Behavioral Dental Research (1)** Survey of behavioral science research and methodology in dentistry and related fields. Emphasis in various quarters varies: literature review, research design, instrumentation, data analysis. Designed for advanced students who plan a research career. Credit/no credit only. Prerequisite: doctoral degree or permission of instructor. Offered: AWSp.

**DPHS 640 P-Professional Issues: Clinical Management of the Fearful and Phobic (1)** Introduction to assessment process and treatment strategies for successful management of anxious, fearful, or phobic patient, combined with clinical observation of diagnostic and treatment appointments of active patients. Offered: AWSpS.

**DPHS 660 Dental Fear Clinic (2)** Clinical instruction in the care of the severely anxious or phobic adult or child. Strategies from behavioral and cognitive psychology. Credit/no credit only. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: AWSpS.

## Dentistry

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**DENT 520 P-Clinical Practice Management 1 (1)** Designed to provide the student with the knowledge required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, authorized treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines. Offered: S.

**DENT 521 P-Oral Pathology (3)** Survey of the diseases of the oral-facial regions in lecture and laboratory sessions. Among the conditions discussed are diseases of teeth and their supporting structures and diseases of the oral and paraoral soft tissues and

bones. Correlations between clinical findings, etiologic factors, and histopathologic features are stressed. Attendance in the laboratory is required. Offered: A.

**DENT 522 P-Oral Pathology (3)** Survey of the diseases of the oral-facial regions in lecture and laboratory sessions. Among the conditions discussed are diseases of teeth and their supporting structures and diseases of the oral and paraoral soft tissues and bones. Correlations between clinical findings, etiologic factors, and histopathologic features are stressed. Attendance in the laboratory is required. Offered: W.

**DENT 523 Prevention and Management of Medical Emergencies in Dentistry (1)** Introduction to medical emergencies in the dental office, including cardiopulmonary resuscitation. Offered: A.

**DENT 534 P-Geriatric Dentistry (1, max. 2)** Special needs of older persons seeking dental care: oral health, psychology of aging, socioeconomic problems, effective communication, dental management, and special problems in home health care and in long-term care settings. Offered: WSp.

**DENT 537 P-Hospital Dentistry (1)** Introductory course presenting hospital procedures and protocol and specific patient types. Offered: Sp.

**DENT 545 Review of Medical Emergencies and Basic Life Support (1)** Review of medical emergency management in dentistry, including prevention and treatment. Review and update basic life support and airway management. Offered: S.

**DENT 550 P-Special Studies in Dentistry (\* max. 12)** Series of courses offered by the various departments from which students may elect study in areas of special interest to them. These courses include subject matter applicable to all phases of dentistry. Credit/no credit only. Offered: AWSpS.

**DENT 551 P-Clinical Practice Management 2 (1)** Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

**DENT 552 P-Clinical Practice Management 2 (1)** Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

**DENT 553 P-Clinical Practice Management 2 (1)** Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

**DENT 554 P-Clinical Practice Management 2 (1)** Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

**DENT 555 P-Clinical Practice Management 2 (1)**

Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary bio-hazardous materials guidelines.

**DENT 556 P-Clinical Practice Management 2 (1)**

Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary bio-hazardous materials guidelines.

**DENT 557 P-Clinical Practice Management 2 (1)**

Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary bio-hazardous materials guidelines.

**DENT 561 Elective in Forensic Odontology (1)**

Elective opportunity in forensic odontology. Offered: SpS.

**DENT 562 Elective Offering in Advanced Cardiac Life Support (2)**

Introduction to airway management (masking/intubation/oropharyngeal airways/nasopharyngeal airways/cricothyrotomy), 12-lead EKG recognition and diagnosis, cardiac physiology and pathophysiology, and pharmacologic action of several different medications. Students who pass AHA guidelines for completion of an ACLS course are awarded ACLS certification. Offered: W.

**DENT 563 Elements of Conscious Sedation (1-2)**

Details theory and techniques for rendering oral, inhalation, transmucosal, intramuscular, and intravenous forms of conscious sedation. Focuses on pharmacology and pharmacokinetics of nitrous oxide, benzodiazepines, narcotics, and barbiturates. Addresses usual applications, special considerations, legal issues, and proper record keeping. Emphasizes prevention and management of emergencies. Offered: A.

**DENT 565 Dental Photography (2)**

Provides student with sufficient knowledge and experience to select and use correct photographic equipment for photographing patients (facial and interoral), casts, instruments, x-rays, charts, and objects. Credit/no credit only. Offered: A.

**DENT 566 Physical Diagnosis (1)**

Seminar on performing complete physical examination including basic assessment of overall patient, vital signs, cardiac, pulmonary, abdominal, extremities, neurologic, and head/neck. Examination techniques include observation, auscultation, percussion. Writing findings and interpreting physical examinations. Offered: S.

**DENT 568- Internal Medicine for Dentistry ([1-3]-, max. 6)**

Review of major organ systems, including normal anatomy and physiology, common pathophysiological, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Offered: AS.

**DENT 640 P-Extramural Clinics in Geriatric Dentistry (2)**

Extramural geriatric clinical experience, including choice of nursing home or community clinic, and brief didactic component. Credit/no credit only. Offered: AWSpS.

**DENT 645 P-Hospital Rotation (2)**

Clinical experience that puts into practice the material presented in 537. The student is involved in hospital procedures and protocol and in dental care of the hospital patient. Offered: AWSpS.

**DENT 650 P-Extramurals (\* max. 12)**

Extramural sites arranged to provide dental students, at varying levels of their education, with opportunities to treat a wide variety of patients in the delivery systems outside the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**DENT 655 Medical Emergency Management: Basic Life Support (1)**

Review of principles and practical applications for the management of medical emergencies in dental practice in conjunction with training and certification in Basic Life Support. Offered: S.

**DENT 657 Comprehensive Clinic (1-10, max. 10)**

Clinical comprehensive care for patients. Offered: S.

**DENT 659 Comprehensive Clinic (1-10, max. 10)**

Clinical comprehensive care for patients. Offered: S.

**DENT 660 Temporomandibular Joint Diagnosis and Treatment (2, max. 8)**

Seminar and clinic sequence for comprehensive examination, diagnosis, and treatment of patients with temporomandibular joint problems. Includes management of dysfunction and morphologic alterations in associated muscles and occlusion. Prerequisite: permission of instructor. Offered: AW.

**DENT 690 P-Extended Clinical Dentistry (1)**

Educational experiences in clinical dentistry. Available to students who have successfully completed the University of Washington Doctor of Dental Surgery curriculum and seek additional supervised experience in the delivery of oral health care services within three quarters of graduation and prior to licensure. Prerequisite: permission of instructor. Offered: AWSpS.

**DENT 700 Master's Thesis (\*)**

Offered: AWSpS.

---

## Endodontics

---

### Faculty

#### Chair

Gerald W. Harrington

#### Professors

Byers, Margaret R. \* 1972, (Adjunct Research); PhD, 1969, Harvard University; somatosensory receptor structure, cytochemistry, and pathologic reactions; neuroimmune interactions.

Guild, Robert E. 1951, (Emeritus); PhD, 1955, University of Washington.

Harrington, Gerald W. \* 1969; DDS, 1959, St Louis University; MSD, 1969, University of Washington; endodontics.

Natkin, Eugene \* 1962, (Emeritus); DDS, 1957, New York University; MSD, 1962, University of Washington; endodontics.

Oswald, Robert J. \* 1974, (Affiliate); DDS, 1969, Virginia Commonwealth University; endodontics.

Steiner, James C. \* 1992, (Clinical); DDS, 1956, Case Western Reserve University; MSD, 1966, University of Washington; normal sensory mechanisms of human dental pulp and pathologic alterations causing pain.

#### Associate Professor

Pitts, David Leroy \* 1977; DDS, 1972, Indiana University; MSD, 1977, University of Washington; endodontics.

### Assistant Professor

Sarram, Shahrzad 1989, (Clinical); DDS, 1992, MDS, 1995, University of Washington.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ENDO 520 P-Introduction to Endodontics (2)**

Lecture course dealing with the differential diagnosis and the treatment of pulp pathosis and associated periapical pathosis. This course also deals with criteria and procedures for the evaluation of success and failure of endodontic treatment. Offered: Sp.

**ENDO 531 P-Endodontic Technique (4)**

Lecture-laboratory course in root canal therapy in terms of present-day concepts. Treatment of extracted teeth as practice for clinical cases. Offered: A.

**ENDO 534 P-Endodontic Clinical Procedures(1)**

Lecture course dealing with clinical procedures particular to endodontics, diagnosis and treatment of endodontic emergencies, and surgical management of endodontic problems. Offered: W.

**ENDO 535 P-Clinical Management of Endodontic Treatment Problems (1)**

Management of a variety of technical problems frequently encountered in the treatment of endodontic cases and the diagnosis and treatment of impact injuries to teeth. Offered: Sp.

**ENDO 545 Honors Endodontics (2, max. 4)**

Seminar discussions of advanced endodontic diagnosis and treatment planning issues as well as clinical sessions on treatment of calcified negotiable canals, alternate instrumentation procedures and anterior endodontic surgery. Offered: WSp.

**ENDO 547 Dental Practice Administration (2)**

Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: A.

**ENDO 548 Dental Practice Administration (2)**

Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: W.

**ENDO 549 Dental Practice Administration (2)**

Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: Sp.

**ENDO 550 P-Directed Studies in Endodontics (\* max. 6)**

See DPHS 449 for course description and prerequisite.

**ENDO 560 Advanced Endodontic Diagnosis and Treatment (2)**

Current concepts are presented and discussed relating to the diagnosis and treatment of pulpal and periapical pathosis. Criteria for evaluation of success or failure of root canal therapy are presented. Offered: W.

**ENDO 561 Anatomical Basis for Clinical Endodontics (2)**

Root canal anatomy of significance in clinical endodontics is discussed in a seminar format. Offered: A.

**ENDO 562 Anatomical Bases for Surgical Endodontics (2)**

Diagnosis and treatment of acute symptoms of dental origin, surgical endodontic therapy, traumatic dental injuries, and the relationship be-

tween periodontal and pulpal pathosis, including differential diagnosis and appropriate treatment planning, are discussed. Offered: Sp.

**ENDO 563 Radiographic Interpretation (2)** Various aspects of radiographic interpretation of particular relevance to endodontics, including interpretation of normal structures, acquired and developmental abnormalities, infections, sialoliths, dysplasias, cysts, malignant lesions, benign tumors, and various diseases other than tumors.

**ENDO 568 Endodontic Practice Management (1)** Essential elements for establishing and managing a successful specialty practice in Endodontics. Prerequisite: ENDO 562. Offered: A.

**ENDO 580 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 581 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 582 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 583 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 584 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 585 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 586 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 587 Endodontic Seminar (2)** Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

**ENDO 590 Treatment Planning Seminar (2, max. 16)** Weekly seminar to discuss controversial treatment problems and difficult diagnostic cases.

**ENDO 593 Clinical Practice Teaching (1, max. 3)** Closely supervised experience in teaching clinical endodontics to the undergraduate dental student.

**ENDO 597 Endodontics Teaching Seminar (2)** Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: W.

**ENDO 598 Endodontics Teaching Seminar (2)** Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: Sp.

**ENDO 600 Independent Study or Research (\*)** Prerequisite: permission of graduate program adviser.

**ENDO 630- P-Clinical Endodontics (1-, max. 7)** Student is required to complete endodontic treatment of anterior, premolar, and molar teeth. In addition to nonsurgical treatment of several endodontic cases, the student assists with a periapical surgery. Student must complete seven quarters of 630 and all course requirements before a grade is awarded.

**ENDO 660 Clinical Endodontics (4, max. 32)** Clinical diagnosis and treatment of pulpal pathosis and related sequelae.

## Oral and Maxillofacial Surgery

### Faculty

#### Chair

Owen Ross Beirne

#### Professors

Beirne, Owen Ross \* 1985; DMD, 1972, Harvard University; PhD, 1976, University of California (San Francisco); basic and clinical biology of bone tissue reconstruction.

Gehrig, John D. \* 1954, (Emeritus); DDS, 1946, MSD, 1951, University of Minnesota; oral and maxillofacial surgery, biological structure.

Kiyak, H. Asuman \* 1977; MA, 1974, PhD, 1977, Wayne State University; geriatric dentistry, behavioral aspects of health care.

Myall, Robert W. \* 1979; BDentS, 1964, University of London (UK); MD, 1975, University of British Columbia (Canada); oral and maxillofacial surgery and biological structure.

Oda, Dolphine \* 1985; BDentS, 1975, University of Baghdad (Iraq); MSc, 1981, University of Manitoba (Canada); transformation and differentiation of cultured oral epithelial cells.

Worthington, Phillip 1976; MD, 1956, BDentS, 1962, University of Liverpool (UK); oral and maxillofacial surgery.

#### Associate Professors

Bloomquist, Dale S. \* 1972; DDS, 1969, University of Washington; oral and maxillofacial surgery.

Egbert, Mark A. 1986; DDS, 1981, University of Washington; oral and maxillofacial surgery.

Johnson, Barton S. \* 1991; DDS, 1985, MS, 1989, University of California (Los Angeles); hospital dentistry, medical compromise, oncology, sedation, pharmacology, molecular biology.

Kinney, Lisa A. 1996; DDS, 1982, Case Western Reserve University; oral and maxillofacial surgery.

Rothwell, Bruce R. 1980; DMD, 1973, University of Oregon; MSD, 1977, University of Washington; general dentistry, hospital-based dentistry, forensic dentistry.

#### Assistant Professors

Dawson, Kenneth \* 1993; BDentS, 1983, University of Sydney (Australia); MDSc, 1993, University of Melbourne (Australia); oral and maxillofacial surgery.

#### Instructor

Rubens, Brian C. 1990, (Acting); DDS, 1980, University of Washington; oral and maxillofacial surgery.

### Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**O S 520 P-Local Anesthesia (2)** Pharmacology, physiology, anatomy, and techniques of local anesthesia for dental students.

**O S 530- Oral Surgery: Didactic (1-, max. 3)** Covers the scope of oral and maxillofacial surgery as prac-

ticed in the United States today. Introductory course for predoctoral dental students.

**O S 532 P-Sedation and Pain Control (2)** Techniques of sedation (oral, inhalational, intravenous) and pain control.

**O S 550 P-Directed Studies in Oral Surgery (\* max. 16)** See DPHS 449 for course description and prerequisite.

**O S 560 Dental Sedation (2)** For graduates of the various dental specialties on the theory, application, and techniques of dental sedation. All forms of sedation, including oral, intramuscular, intravenous, and inhalation, are covered. Clinical experience is provided in the second half of the quarter.

**O S 630- P-Oral Surgery Clinic (2-, max. 6)** Clinical experience in simple and complex dentoalveolar and pre-prosthetic surgery. A problem-based course using an auto-tutorial approach covering the extraction of teeth, impaction surgery, medications, surgical complications, treatment of infections, bone cysts, maxillary sinus complications, and salivary gland and mucosal pathology.

**O S 651 P-Harborview Clerkship (2-10, max. 10)** Six-week rotation at Harborview Medical Center, including intensive instruction in oral surgery procedures and observing and assisting oral and maxillofacial surgery in the operating room. Credit/no credit only. Prerequisite: permission of department Chairperson.

**O S 652 P-Smith Hospital, Texas, Rotation (2-12, max. 12)** Six-week rotation at John Peter Smith Hospital in Fort Worth, Texas, including intensive instruction in oral surgery procedures and observing and assisting oral and maxillofacial surgery in the operating room. Credit/no credit only. Prerequisite: permission of department Chairperson.

## Oral Biology

### Faculty

#### Chair

Kenneth Izutsu

#### Professors

Altman, Leonard \* 1974, (Clinical); MD, 1969, Harvard University; mechanisms of tissue injury produced by bacteria, leukocytes, or toxins.

Byers, Margaret R. \* 1972, (Adjunct Research); PhD, 1969, Harvard University; somatosensory receptor structure, cytochemistry, and pathologic reactions; neuroimmune interactions.

Byers, Peter H. \* 1976, (Adjunct); MD, 1969, Case Western Reserve University; extracellular matrix synthesis, genetic disorders of collagen metabolism, secretion.

Dale-Crunk, Beverly A. \* 1972; PhD, 1968, University of Michigan; keratin biochemistry.

Eyre, David R. \* 1985, (Adjunct); PhD, 1969, University of Leeds (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism.

Herring, Susan W. \* 1990, (Adjunct); PhD, 1971, University of Chicago; vertebrate functional morphology, relations between muscular function and skull growth.

Izutsu, Kenneth \* 1971; PhD, 1970, University of Washington; salivary gland physiology and pathophysiology.

Keller, Patricia J. \* 1955, (Emeritus); PhD, 1953, Washington University; protein structure and function.

Lamont, Richard J. \* 1988; PhD, 1985, University of Aberdeen (UK); pathogenic mechanisms and taxonomy of oral bacteria.

Morton, Thomas H. \* 1975; DDS, 1972, Creighton University; MSD, 1975, University of Washington; oral pathology, oral medicine.

Robinovitch, Murray \* 1966; DDS, 1961, University of Minnesota; PhD, 1967, University of Washington; salivary biochemistry, salivary anti-HIV factors.

Tamarin, Arnold \* 1961, (Emeritus); DDS, 1951, University of Illinois; MSD, 1961, University of Washington; oral embryology and histology, electron microscopy.

Verdugo, Pedro \* 1974, (Adjunct); MD, 1965, State University of Chile; microrheology, biomechanics, polymer gel physics, laser spectroscopy, cell biology.

Watson, Eileen L. \* 1972; PhD, 1970, University of Utah; salivary gland pharmacology and regulation.

### Associate Professors

Bordin, Sandra \* 1981, (Adjunct Research); PhD, 1966, University of Ferrara (Italy); regulation of connective tissue repair by immune-inflammatory complement components.

Darveau, Richard P. \* 1989, (Adjunct Research); PhD, 1981, Washington State University; bacterial interactions with the innate host defense system.

Ramsay, Douglas S. \* 1983, (Adjunct); DMD, 1983, University of Pennsylvania; PhD, 1988, MSD, 1990, University of Washington; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

Wells, Norma J. 1960, (Adjunct); MPH, 1966, University of California (Los Angeles); oral health promotion, dental caries, dental hygiene education.

### Assistant Professors

Cangelosi, Gerard A. \* 1985, (Adjunct); PhD, 1984, University of California (Davis); molecular biology, environmental monitoring, clinical detection of pathogenic mycobacteria.

Jackson, Douglass L. \* 1996, (Adjunct); DMD, 1986, University of Pittsburgh; MS, 1989, University of Michigan; PhD, 1996, University of Minnesota; peripheral regulation of sensory neurons during tissue injury.

Park, Yoonsuk 1995, (Research); PhD, 1995, University of British Columbia (Canada); characterization of virulence genes of an oral pathogen, *Porphyromonas gingivalis*.

Presland, Richard B. 1989, (Research); PhD, 1987, University of Adelaide (Australia); molecular basis of epithelial cell differentiation.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ORALB 449 Undergraduate Research Topics in Oral Biology (\*)** Individual research on topics selected in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPpS.

**ORALB 510- P-Development, Structure, and Function of Oral Tissues (3-)** Development, microscopic and submicroscopic structure, functional aspects of hard and soft oral tissues. Embryonic development of head and neck; morphodifferentiation of face and oral structures. Structure-function relationships in descriptions of development and histology-ultrastructure of oral tissues by integration of traditional oral histology and oral physiology topics. Offered: WSp.

**ORALB 520 P-Molecular Microbiology and Oral Diseases (3)** Lamont Applies students' background knowledge in basic sciences to an understanding of

the molecular bases of the interactions between microorganisms and oral tissues that lead to plaque formation and dental diseases. Principles of clinical asepsis and diagnosis of caries and periodontal diseases also covered. Offered: A.

**ORALB 540 P-Clinical Oral Pathology Conference (2)** Morton Seminar stressing basic science aspects and clinical findings of various oral lesions through exploration of etiology, pathogenesis, histopathology, and treatment modalities for oral pathology cases drawn from files of the Division of Oral Pathology. Offered: A.

**ORALB 550 P-Directed Studies in Oral Biology (\* max. 12)** Morton Selected readings and seminars on a topic chosen by individual arrangement in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPpS.

**ORALB 561- Oral Tissue Development, Structure, and Function (2-, max. 4)** Selected readings and discussions explore recent advances in cellular and molecular biology relevant to oral biology and medicine. Special emphasis on craniofacial and dental development, oral mucosal and periodontal tissues, salivary gland function, and olfaction and gustation. Credit/no credit only. Prerequisite: permission of instructor. Offered: WSp.

**ORALB 562 Supervised Teaching in Oral Biology (1-5, max. 10)** Directed and guided experience in selected topics in teaching techniques, teaching philosophy, and course design of courses given by the Department of Oral Biology. Students are required to participate in lecture and laboratory teaching under the supervision of the course director. Prerequisite: permission of instructor. Offered: AWPp.

**ORALB 565 Clinical Oral Pathology (1-3, max. 10)** Morton Presentation of interesting oral lesions from the dental school and the University of Washington Medical Center and the correlation of the clinical findings with the underlying morphologic and biochemical changes in the tissues. The relation of these oral lesions to systemic disease is stressed. Primarily designed for students with DDS, MD, or DVM. degrees. Prerequisite: permission of instructor. Offered: AWPpS.

**ORALB 566 Surgical Oral Pathology (2-4, max. 16)** Students are trained to interpret microscopic slides of lesions from the oral cavity and related areas, and to correlate these with the clinical findings. Each student is responsible for the grossing of specimens and the preparation of histology reports. Primarily designed for students with DDS, MD, or DVM. degrees. Prerequisite: permission of instructor. Offered: AWPpS.

**ORALB 569 Advanced Oral Microbiology (2)** Lamont Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. A.

**ORALB 570 Seminar in Oral Pathology (1-3, max. 9)** Consists of in-depth studies of specific oral diseases through use of seminar and discussion. Students are required to present literature reviews and to act as discussion leaders. Primarily designed for students with DDS, MD, or DVM. degrees. Prerequisite: permission of instructor. Offered: AWPpS.

**ORALB 572 Oral Pathology (5)** Oda Survey of the diseases of the oral facial regions in lecture and laboratory sessions. Diseases of teeth and their supporting structures and diseases of the oral and paraoral soft tissues and bones. Correlations be-

tween clinical findings and histopathologic features. Attendance in the laboratory is required. Offered: AW.

**ORALB 574 Clinical Stomatology (3)** Morton Diseases of the oral cavity and jaw are presented as the practitioner encounters them-detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: Sp.

**ORALB 575 Oral Biology Seminar (1-3, max. 10)** Presentation and discussion of current research problems by members of the staff, investigators from other departments in the University, visiting scientists, and trainees. Prerequisite: permission of instructor. Offered: AWPp.

**ORALB 576 Molecular Aspects of Epithelial Biology (2)** Dale In-depth discussion of cytoskeleton, cell junctions, influence of growth factors, retinoids, and other exogenous agents on differentiation and function of normal stratified epithelia. Prerequisite: BIOC 440 (or equivalent) or permission of instructor. Offered: alternate years; Sp; odd years.

**ORALB 577 Applied Therapeutics in Dentistry (2)** Watson Practical information about drugs included in practice of dentistry. Topics include evaluation of case histories, dental considerations pertaining to medical conditions and drug therapies, types of drugs and dosages used for common medical conditions, the pharmacology of drugs prescribed by the clinician, and the mechanisms involved in drug interactions. Offered: A; odd years.

**ORALB 578 Research Techniques in Oral Biology (2-4, max. 15)** Introduction to biochemical, analytical, or morphological techniques employed in biochemical cytology or molecular pathology as well as *in vitro* techniques of tissue and organ culture. Prerequisite: permission of instructor. Offered: AWPpS.

**ORALB 579 Molecular Biology (2)** Presland Applications of molecular biology and recombinant DNA methodologies to oral biology topics of interest in dental sciences. Credit/no credit only. Prerequisite: BIOCHEM 405 or BIOCHEM 406 or equivalent, and permission of instructor. Offered: even years; S.

**ORALB 581- Secretory Process in Exocrine Glands (1-3, max. 3-)** Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: A.

**ORALB -582- Secretory Process in Exocrine Glands (-1-3, max. 3-)** Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: W.

**ORALB -583 Secretory Process in Exocrine Glands (-1-3, max. 3)** Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: Sp.

**ORALB 591 Advanced Topics in Oral Biology and Medicine I (1-2, max. 2)** Herring, Izutsu Review of current molecular and cellular advances in developmental biology relevant to head and neck embryology, tooth development and epithelial differentiation. Credit/no credit only. Offered: jointly with ORTHO 591A.

**ORALB 592 Advanced Topics in Oral Biology and Medicine II (1-2, max. 2)** Herring Review of current scientific literature relevant to cranioskeletal develop-

ment and growth, bone biology and orthodontic tooth movement. Credit/ no credit only. Offered: jointly with ORTHO 592 W.

**ORALB 593 Advanced Topics in Oral Biology and Medicine III (1-2, max. 2)** *Herring* Review of current scientific literature relevant to oral soft tissue structure and physiology, including mastication and swallowing, salivary glands, periodontium and dental pulp. Credit/no credit only Offered: jointly with ORTHO 593 Sp.

**ORALB 600 Independent Study or Research (\*)** Prerequisite: permission of instructor. Offered: AWSpS.

**ORALB 700 Master's Thesis (\*)** Offered: AWSpS.

**ORALB 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Oral Medicine

### Faculty

#### Chair

Edmond L. Truelove

#### Professors

Dworkin, Samuel F. \* 1974; DDS, 1958, PhD, 1969, New York University; dentistry and clinical psychology, pain, psychosomatic and illness-related behavior.

Hollender, Lars Gosta \* 1988; DDS, 1958, Royal Dental School (Sweden); PhD, 1964, University of Lund (Sweden); oral radiology.

Izutsu, Kenneth \* 1971; PhD, 1970, University of Washington; salivary gland physiology and pathophysiology.

Le Resche, Linda A. \* 1983, (Research); DSc, 1977, Johns Hopkins University; nonverbal behavior (facial expression) related to pain; pain epidemiology.

Morton, Thomas H. \* 1975; DDS, 1972, Creighton University; MSD, 1975, University of Washington; oral pathology, oral medicine.

Omnell, Karl-Ake \* 1981; DDS, 1950, Royal Dental School (Sweden); DO, 1957, University of Lund (Sweden); oral radiology.

Truelove, Edmond L. \* 1972; DDS, 1967, MSD, 1971, Indiana University; oral medicine, orofacial pain, stomatitis, and salivary gland disorders.

#### Associate Professors

Chasteen, Joseph E. 1989; DDS, 1967, MA, 1976, University of Michigan; dental informatics and multimedia instructional programs.

Epstein, Joel B. 1983, (Research); DMD, 1976, University of Saskatchewan (Canada); MSD, 1979, University of Washington.

Martin, Michael D. \* 1986; DMD, 1979, University of Kentucky; MPH, 1989, PhD, 1993, University of Washington; dental education in oral health care of persons with disability.

Moore, Rodney A. 1987, (Research); DDS, 1973, Ohio State University; PhD, 1991, Royal Dental College (Denmark); illness behavior.

Persson, Rigmor E. 1988, (Research); DDS, 1969, University of Lund (Sweden); MSD, 1989, University of Washington; oral health, geriatric and medically compromised patients, general dentistry.

Schubert, Mark M. \* 1974; DDS, 1974, MSD, 1981, University of Washington; oral medicine/oral oncology.

Sommers, Earl E. \* 1972, (Clinical); DDS, 1971, Indiana University; diagnosis/management of orofacial pain, stomatitis, and salivary gland disorders.

Stiefel, Doris \* 1972, (Emeritus); DDS, 1954, University of Washington; dental education in oral health care of persons with disability.

#### Assistant Professors

Jackson, Douglass L. \* 1996; DMD, 1986, University of Pittsburgh; MS, 1989, University of Michigan; PhD, 1996, University of Minnesota; peripheral regulation of sensory neurons during tissue injury.

Massoth, Donna L. 1984, (Research); DDS, 1983, University of California (Los Angeles); MSD, 1985, PhD, 1992, University of Washington; chronic pain, illness behavior, somitization.

Wilson, Leanne 1982, (Affiliate); PhD, 1988, University of Washington; clinical and developmental psychology, behavioral patterns associated with illness and chronic pain.

#### Instructor

Drangsholt, Mark T. 1985, (Acting); DDS, 1984, MPH, 1992, University of Washington; epidemiology.

#### Lecturers

Gandara, Beatrice 1979; DDS, 1978, University of Southern California; MSD, 1985, University of Washington.

Govin, Glenn M. 1999; DDS, 1985, University of Texas (San Antonio); MPH, 1992, University of Texas (Houston); dental education in oral health care of persons with disabilities.

Griffith, Mickaella V. 1979; DDS, University of Tehran (Iran).

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**ORALM 404 Considerations in Care of the Patient With a Disability (\* max. 6)** Role of auxiliaries in dental treatment of the special patient, including psychosocial issues, communication techniques, wheelchair transfers; dental prevention, medical and dental management of specific disabilities; drug therapy, sedation, and anesthesia. Offered: AWSpS.

**ORALM 460 Clinical Management of Patients With Disabilities (\* max. 10)** Participation in chair/bedside dental treatment of a broad range of disabled populations, including homebound and institutionalized patients. Offered: AWSpS.

**ORALM 525 P-Detection and Management of Systemic and Oral Disease I (1)** Clinical presentation of diseases of oral cavity and appropriate treatment conditions. Offered: A.

**ORALM 526 P-Detection and Management of Systemic and Oral Disease II (2)** Clinical presentation of diseases of oral cavity and appropriate treatment conditions. Offered: W.

**ORALM 527 P-Detection and Management of Systemic and Oral Disease III (1)** Clinical presentation of diseases of oral cavity and appropriate treatment conditions. Offered: Sp.

**ORALM 528 Problem Oriented Case Planning (2)** Basic concepts of treatment planning. Offered: S.

**ORALM 529 Physical Diagnosis (1)** Techniques and methods for examination and analysis of patient needs. Offered: S.

**ORALM 530 Normal and Abnormal Growth and Development: Dental Education in Care of the Disabled (3)** Introduction to acquired and developmental disabilities and dental management considerations of patients with disabilities. Offered: S.

**ORALM 531 P-Acute and Chronic Orofacial Pain (1)** Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: A.

**ORALM 532 P-Acute and Chronic Orofacial Pain (1)** Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: W.

**ORALM 533 P-Acute and Chronic Orofacial Pain (2)** Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: Sp.

**ORALM 540 P-Oral Medicine Senior Seminar (2)** Clinical conference devoted to case presentations of patients with dental treatment needs and complicating medical problems. Offered: AW.

**ORALM 545- P-Clinical Conference in Oral Medicine (1-, max. 2)** Clinical pathologic conference utilizing interdisciplinary approach to patient care and emphasizing basic science application. Offered: AW.

**ORALM 550 P-Directed Studies in Oral Diagnosis (\* max. 12)** See DPHS 449 for course description and prerequisite. Offered: AWSpS.

**ORALM 564 Dental Care of the Disabled I (\* max. 10)** Advanced topics in rehabilitation dentistry including psychosocial issues; characteristics and needs of patients with specific disabilities; patient management and use of portable equipment; drug therapy, sedation and anesthesia; dental prevention, and emergency procedures. Seminars and self-directed study. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALM 565 Oral Medicine Clinical Conference (\* max. 16)** Clinical conference in which diagnostic data concerning patients seen in the oral medicine clinic are presented for evaluation. When possible, the patient is present with laboratory findings, radiographs, and the results of special tests. Offered: AWSpS.

**ORALM 567 Behavioral Management of Acute and Chronic Orofacial Pain (2)** Overview of psychosomatic concepts, as related to acute and chronic pain. Behavioral management strategies for acute and chronic pain integrated into clinical care provided by primary dentist. Review biofeedbacks, relaxation, hypnosis, placebos, and related psychophysiological approaches. Open to graduate students, postdoctoral fellows, residents in dentistry, medicine, psychology. Offered: AWSpS.

**ORALM 570- Oral Medicine and Therapy (2-, max. 6)** Lecture directed toward the presentation and discussion of oral diseases and oral manifestations of systemic disease. Primarily the clinical manifestations' relationship to generalized disease processes and patient management with in-depth discussions of therapy. Offered: AWSpS.

**ORALM 576 Oral Medicine Literature Review (1)** Seminar analyzes the recent literature concerning the area of oral medicine, diagnosis, and therapy for oral disease. Offered: AWSpS.

**ORALM 578 Dental Care of the Disabled Literature Review (1, max. 3)** Review of the current scientific literature pertaining to disability issues, including research, clinical management, resources, and legislation pertaining to oral health of persons with disabilities. Credit/no credit only. Offered: AWSpS.

**ORALM 580 Current Concepts in Oral Radiology (2)** Lecture/seminar covering current concepts in oral radiology including technical factors, radiation risks, observer characteristics and variation, radiographic localization, interpretation, and overview of current extraoral techniques. Offered: AWSpS.

**ORALM 581 Advanced Seminars in Oral Radiology (2, max. 8)** Explores aspects of oral and maxillofacial radiology and related fields. Offered: AWSpS.

**ORALM 584 Dental Care of the Disabled III (\* max. 10)** Field practice in community outreach to facilities and agencies serving disabled populations. Includes observation, dental screenings, patient education and in-service training of direct care staff. Prerequisite: ORALM 404 or ORALM 664. Offered: AWSpS.

**ORALM 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWSpS.

**ORALM 601 Oral Medicine Research Seminar (1, max. 10)** Presentation and discussion of current research problems by graduate students, faculty, and investigators from other departments in the university. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALM 630- P-Clinical Diagnosis and Oral Medicine ([1/2]-, max. 5)** Opportunity for examining, performing x-ray survey, and planning treatment for less-involved patients. Students also participate in rendering diagnosis and emergency treatment. Offered: AWSpS.

**ORALM 640- Advanced Clinical Diagnosis and Oral Medicine ([1/2]-, max. 3)** Advanced instruction in diagnosis and in the examination and handling of patients. Students are in block assignment and perform radiographic surveys, oral diagnosis, and treatment plans for prospective patients. Offered: AWSpS.

**ORALM 650 P-Oral Medicine Clinical Elective (1-6, max. 6)** Opportunities for students to work in various clinical activities at local hospitals or other sites outside the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALM 660 Rotations in Medical Disciplines (1-4, max. 24)** Clinic, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no credit only. Offered: AWSpS.

**ORALM 663 Introduction to Educational Methods in Dentistry (2)** Principles of teaching and learning, their applications in dental education. Basic principles include learning theory and cognitive processing, identifying prerequisite knowledge of learners, determining objectives of outcomes of learning, selecting appropriate methods and materials, using evaluation procedures. Increases understanding of instruction process to provide a sound foundation for teaching. Offered: AWSpS.

**ORALM 664 Dental Care of the Disabled II (\* max. 10)** Practicum in chair/bedside delivery of dental care to different disabled populations. Includes rotations to institutions, long-term care facilities, and homebound service, using mobile equipment. Prerequisite: ORALM 564 and permission of instructor. Offered: AWSpS.

**ORALM 665 Clinical Oral Medicine (\* max. 33)** Clinic involving the diagnostic evaluation of patients with difficult and unusual oral diseases. The student diagnoses and treats the patient. Types of therapy include medications and chemical agents, functional physical therapy, and counseling. Offered: AWSpS.

**ORALM 670 Clinical Oral Medicine Teaching (1-4, max. 16)** Clinic designed to give the student experience and instruction in the teaching of clinical oral diagnosis. Treatment of emergency dental problems as well as routine and special diagnostic procedures is emphasized. Offered: AWSpS.

## Orthodontics

### Faculty

#### Chair

Gregory J. King

#### Professors

Herring, Susan W. \* 1990; PhD, 1971, University of Chicago; vertebrate functional morphology, relations between muscular function and skull growth.

King, Gregory J. \* 1996; DMD, 1969, Tufts University; MDS, 1976, Harvard University; bone remodeling, bone cells, mineral metabolism, bone paracrine/endocrine mechanisms.

Little, Robert M. \* 1974; DDS, 1966, Northwestern University; MSD, 1970, PhD, 1974, University of Washington; orthodontics.

Moffett, Benjamin C. \* 1964, (Emeritus); PhD, 1952, New York University; anatomy.

Moore, Alton W. 1980, (Emeritus); DDS, 1941, University of California (San Francisco); MS, 1948, University of Illinois; orthodontics.

Newell, Laura L. \* 1957, (Adjunct); PhD, 1967, University of Washington; primatology growth and development, human biology, evolutionary aspects of dermatoglyphics.

#### Associate Professors

Bollen, Anne-Marie 1990; DDS, 1984, University of Brussels (Belgium); MSD, 1986, PhD, 1990, University of Michigan; orthopaedics.

Joondeph, Donald R. \* 1971; DDS, 1967, MS, 1969, Northwestern University; orthodontics.

Ramsay, Douglas S. \* 1983; DMD, 1983, University of Pennsylvania; PhD, 1988, MSD, 1990, University of Washington; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

#### Assistant Professor

Ma, Tsun \* 1988, (Adjunct); DMD, 1978, Washington University; MS, 1985, University of Michigan; MDS, 1995, University of Pittsburgh; maxillofacial prosthetics.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crsctat/](http://www.washington.edu/students/crsctat/).

**ORTHO 449 Directed Studies in Orthodontics (\*)** See DPHS 449 for course description and prerequisite. Credit/no credit only. Offered: AWSpS.

**ORTHO 520 P-Craniofacial Growth and Development in Orthodontic Diagnosis and Treatment (4)** Basic principles of pre- and postnatal growth and development integrated with the recognition, analysis, and treatment planning of problems encountered in dental and skeletal malocclusions. Offered: Sp.

**ORTHO 522 P-Beginning Adjunctive Orthodontics (2)** Lecture/laboratory instruction in indications for, and techniques of, simple orthodontic tipping, rotational and extrusive movements, as well as orthodontic study model fabrication. Prerequisite: ORTHO 520. Offered: S.

**ORTHO 550 P-Directed Studies in Orthodontics (\* max. 6)** See DPHS 449 for course description and prerequisite. Offered: AWSpS.

**ORTHO 551 Review of Selected Literature in Orthodontics (1)** Students select a topic for review, review appropriate literature, and prepare written critique. Offered: AWSp.

**ORTHO 552 Journal Club (1)** Predoctoral students join graduate students in review of current orthodontic literature. Offered: AWSp.

**ORTHO 560 Orthodontics Seminar (1-5, max. 25)** Methods of diagnosis, analysis, and treatment planning of malocclusion; analysis of methods and theoretical principles used in the treatment of malocclusion. The student presents a detailed case analysis and plan of treatment for each clinical patient supervised. Offered: AWSpS.

**ORTHO 562 Orthodontic Theory (2)** Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

**ORTHO 563 Orthodontic Theory (2)** Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

**ORTHO 564 Orthodontic Theory (2)** Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

**ORTHO 565 Orthodontic Theory (2)** Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

**ORTHO 566 Orthodontic Theory (2)** Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

**ORTHO 570 Roentgenographic Cephalometry (2)** Basic principles, history, and techniques of roentgenographic cephalometry. Offered: AS.

**ORTHO 575 Post-Retention Seminar (1, max. 2)** Each student is required to locate three or more former orthodontic patients who qualify as at least ten years postretention. Complete orthodontic records must be obtained, analyzed, and discussed in the seminar. Instructor critiques the presentation and offers similar or contrasting cases for comparison. Offered: WSp.

**ORTHO 580 Orofacial Biology (\* max. 8)** Three-quarter sequence pertaining to craniofacial anatomy, development, and function. Summer quarter is combined lecture/laboratory on clinical and functional

anatomy and may be taken separately. Autumn and winter quarters are lecture/seminars on development, growth, and function. Outside reading assignments by the students are discussed and critiqued during sessions. Offered: AWS.

**ORTHO 582 Adult Orthodontics Seminar (2)** Seminar for orthodontic, periodontic, and restorative dentistry graduate students in comprehensive, integrated diagnosis and treatment planning of the dental problems of the adult patient. Offered: AWSpS.

**ORTHO 585 Surgical Orthodontic Diagnosis and Treatment Planning (3)** Seminar and clinic for orthodontic graduate students and oral surgery residents in comprehensive, integrated diagnosis, and treatment planning for patients with major facial deformities. Offered: AWSpS.

**ORTHO 584 Clinical Management of Cleft Lip and Palate and Craniofacial Anomalies (2)** Management of these complex patients involves members of a dedicated, highly specialized multidisciplinary team. Insight gained into specific evaluation and treatment modalities of each discipline through lectures, seminars, assigned readings. Integrated approach to management is illustrated by attendance at craniofacial staffing and clinics. Prerequisite: graduate students in orthodontics. Offered: AW.

**ORTHO 587- Management of Debilitated Dentitions (1-, max. 2)** Integrated diagnosis and treatment planning for patients with edentulous spaces, emphasizing use of osseointegrated implants. Offered: AW.

**ORTHO 589 Applied Psychology in Orthodontics and Pediatric Dentistry (1)** Application of psychological theories, research, and intervention strategies to orthodontics and pediatric dentistry. Topics include the principles of behavior change, patient compliance with therapeutic regimens, and motivations for orthodontic treatment. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: A.

**ORTHO 590 Scientific Methodology in Dental Research (2)** Review of the scientific method. Evaluation of dental literature. Discussion of proposed master's degree research projects. Formulation and discussion of hypothetical research projects related to orthodontics. Offered: W.

**ORTHO 597 Preclinical Technique (1)** Techniques of construction and manipulation of the edgewise arch mechanism. Offered: AWS

**ORTHO 598 Archwire Formation (1)** Principles of wire bending and the use of orthodontic pliers. Offered: AS

**ORTHO 599 Biomechanics (1)** Principles of biologic reactions to application of orthodontic forces. Credit/no credit only. Offered: S.

**ORTHO 600 Independent Study or Research (\*)** Managing the experimental protocol. Data collection and analysis. Preparation and writing of a thesis or publishable manuscript. Prerequisite: permission of instructor. Offered: SpS.

**ORTHO 630- P-Orthodontic Clinic (1-, max. 6)** Direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative and/or periodontal therapy. Prerequisite: ORTHO 522. Offered: ASpS.

**ORTHO 660 P-Clinical Orthodontics (1-6, max. 24)** Clinical application of the techniques in the treatment of malocclusion. Offered: AWSpS.

**ORTHO 682 Adult Orthodontics Clinic (1)** Clinic for orthodontic graduate students in the treatment of the dental problems of the adult patient. Offered: AWSpS.

## Pediatric Dentistry

### Faculty

#### Chair

Peter K. Domoto

#### Professors

Domoto, Peter K. \* 1973; DDS, 1964, University of California (San Francisco); MPH, 1975, University of Washington; pediatric dentistry, dental behavioral science.

Weinstein, Philip \* 1972, (Adjunct); PhD, 1971, University of Kentucky; dental behavioral science; dental fear and pain in children, adults, and early childhood cases.

#### Associate Professors

Davis, John M. \* 1967; DDS, 1961, MSD, 1967, University of Washington; pediatric dentistry.

Leggott, Penelope J. \* 1993; BDentS, 1969, University of Bristol (UK); MSc, 1980, University of Illinois; pediatric dentistry.

Peterson, Devereaux \* 1982; DMD, 1975, MSD, 1977, PhD, 1980, University of Pittsburgh; computer-based instructional programs.

Ramsay, Douglas S. \* 1983; DMD, 1983, University of Pennsylvania; PhD, 1988, MSD, 1990, University of Washington; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

#### Assistant Professor

Coldwell, Susan E. \* 1994, (Adjunct); MA, 1990, PhD, 1994, University of Pennsylvania; pain, anxiety, and taste preference.

#### Lecturer

Williams, Bryan J. 1991; DDS, 1974, Western Ontario University (Canada); MSD, 1979, University of Washington; pediatric dentistry, orthodontics.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**PEDO 520 P-Pediatric Dentistry (4)** Introduction to clinical pediatric dentistry, including behavior management, oral diagnosis, preventive dentistry, dental anomalies, radiography, anesthesia, restorative procedures, pulpal therapy, interceptive orthodontics, and traumatic dental injuries of the child patient. Offered: S.

**PEDO 523 P-Communication Skills I (1)** Introductory communication skills with emphasis on interviewing, presented in seminar format. Credit/no credit only. Offered: A.

**PEDO 524 P-Communication Skills II (1)** Continuation of basic communication skills. Credit/no credit only. Offered: A.

**PEDO 525 P-Management of Pediatric Patient Behavior (1)** Introduction to selected theories of child development and application in dental setting; pediatric cognitive, affective, and social development and introduction to problematic child behaviors; use of

social systems approach to overview child psychosocial development for the dentist. Credit/no credit only. Offered: W.

**PEDO 550 P-Directed Studies in Pediatric Dentistry (\* max. 6)** See DPHS 449 for course description and prerequisite. Offered: S.

**PEDO 560 Fundamentals of Pediatric Dentistry (1)** Preclinical laboratory, lecture course covering fundamentals of primary care in pediatric dentistry, including behavior management, dental emergencies, prevention, diagnosis and treatment planning, and infection control. Offered: S.

**PEDO 570 Pediatric Dentistry Seminar I (2)** Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

**PEDO 571 Pediatric Dentistry Seminar II (2)** Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

**PEDO 572 Pediatric Dentistry Seminar III (2)** Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

**PEDO 573 Pediatric Dentistry Seminar IV (2)** Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: Sp.

**PEDO 574 Pediatric Dentistry Seminar V (2)** Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

**PEDO 575 Pediatric Dentistry Seminar VI (2)** Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

**PEDO 576 Pediatric Dentistry Seminar VII (2)**

Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

**PEDO 577 Pediatric Dentistry Seminar VIII (2)**

Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: Sp.

**PEDO 580 Developmental Disabilities Seminar (1)**

Multidisciplinary approach to managing children with developmental disabilities. Offered: S.

**PEDO 581 Developmental Disabilities Seminar (1)**

Multidisciplinary approach to managing children with developmental disabilities. Offered: A.

**PEDO 582 Developmental Disabilities Seminar (1)**

Multidisciplinary approach to managing children with developmental disabilities. Offered: W.

**PEDO 583 Developmental Disabilities Seminar (1)**

Multidisciplinary approach to managing children with developmental disabilities. Offered: Sp.

**PEDO 600 Independent Study or Research (\*)**

Prerequisite: permission of instructor. Offered: AW.

**PEDO 630- P-Clinical Pediatric Dentistry (1-, max. 7)**

Educational experiences in comprehensive clinical pediatric dentistry. Students register third and fourth years for 24 sessions in the pediatric dentistry clinic, a 3-day rotation at a community clinic, computer assisted clinical simulations, behavioral change projects, and a written analysis of videotaped patient/student clinic encounters. Offered: AWSpS.

**PEDO 650 P-Pediatric Dentistry Extramurals (1-6, max. 6)**

Clinical extramurals in the field of children's dentistry. Prerequisite: permission of instructor. Offered: AWSpS.

**PEDO 660 P-Clinical Pediatric Dentistry (1-3, max. 3)**

Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

**PEDO 661 P-Clinical Pediatric Dentistry (1-3, max. 3)**

Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: A.

**PEDO 662 P-Clinical Pediatric Dentistry (1-3, max. 3)**

Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

**PEDO 663 P-Clinical Pediatric Dentistry (1-3, max. 3)**

Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

**PEDO 664 P-Clinical Pediatric Dentistry (1-3, max. 3)**

Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

**PEDO 667 P-Clinical Pediatric Dentistry (1-3, max. 3)**

Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

**PEDO 669 Supervised Clinical Teaching (1-3, max. 4)**

Graduate pediatric dental students provide clinical instruction for predoctoral dental students by supervising clinical sessions. Offered: AWSpS.

**PEDO 670 Hospital Pediatric Dentistry (1-3, max. 3)**

Diagnosis, management, and treatment of patients with disabilities in Children's Hospital Dental Clinic. Offered: S.

**PEDO 671 Hospital Pediatric Dentistry (1-3, max. 3)**

Diagnosis, management, and treatment of patients with disabilities in Children's Hospital Dental Clinic. Offered: A.

**PEDO 672 Hospital Pediatric Dentistry (1-3, max. 3)**

Diagnosis, management, and treatment of patients with disabilities in Children's Hospital Dental Clinic. Offered: W.

**PEDO 673 Hospital Pediatric Dentistry (1-3, max. 3)**

Diagnosis, management, and treatment of patients with disabilities in Children's Hospital Dental Clinic. Offered: Sp.

**PEDO 675 Hospital Pediatric Dentistry (1-3, max. 3)**

Diagnosis, management, and treatment of patients with disabilities in Children's Hospital Dental Clinic. Offered: A.

**PEDO 676 Hospital Pediatric Dentistry (1-3, max. 3)**

Diagnosis, management, and treatment of patients with disabilities in Children's Hospital Dental Clinic. Offered: W.

**PEDO 677 Hospital Pediatric Dentistry (1-3, max. 3)**

Diagnosis, management, and treatment of patients with disabilities in Children's Hospital Dental Clinic. Offered: Sp.

**PEDO 679 Care of the Disabled Pediatric Patient (1)**

Clinical experiences in the management of disabled patients. Offered: S.

**PEDO 680 Pediatric Dentistry under General Anesthesia (1-4, max. 4)**

Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

**PEDO 681 Pediatric Dentistry under General Anesthesia (1-4, max. 4)**

Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

**PEDO 682 Pediatric Dentistry under General Anesthesia (1-4, max. 4)**

Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

**PEDO 683 Pediatric Dentistry under General Anesthesia (1-4, max. 4)**

Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

**PEDO 685 Pediatric Dentistry under General Anesthesia (1-4, max. 4)**

Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

**PEDO 686 Pediatric Dentistry under General Anesthesia (1-4, max. 4)**

Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

**PEDO 687 Pediatric Dentistry under General Anesthesia (1-4, max. 4)**

Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

**PEDO 691 Craniofacial Anomalies Clinic (1-4, max. 4)**

Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: W.

**PEDO 693 Craniofacial Anomalies Clinic (1-4, max. 4)**

Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: S.

**PEDO 694 Craniofacial Anomalies Clinic (1-4, max. 4)**

Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: A.

**PEDO 695 Craniofacial Anomalies Clinic (1-4, max. 4)**

Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: W.

**PEDO 699 Pediatric Orthodontic Clinic (1-4, max. 4)**

Clinical orthodontic care for pediatric patients. Offered: AWSpS.

---

## Periodontics

---

### Faculty

#### Chair

Murray Robinovitch

#### Professors

Ammons, William F. \* 1970, (Emeritus); DDS, 1959, University of Texas (Houston); MSD, 1970, University of Washington; periodontics.

Dale-Crunk, Beverly A. \* 1972, (Adjunct); PhD, 1968, University of Michigan; keratin biochemistry.

Johnson, Robert H. \* 1981; DDS, 1962, McGill University (Canada); MSD, 1964, Indiana University; periodontics and oral medicine.

Lukehart, Sheila A. \* 1980, (Adjunct Research); PhD, 1978, University of California (Los Angeles); infectious diseases.

Page, Roy C. \* 1967; DDS, 1957, University of Maryland; PhD, 1967, University of Washington; connective-tissue pathology, chronic inflammation, immunopathology, periodontal disease.

Persson, Gosta Rutger \* 1985; DDS, 1967, PhD, 1978, University of Lund (Sweden); diagnosis of periodontal diseases and the consecutive process of clinical decision making.

Robertson, Paul B. \* 1992; DDS, 1966, MS, 1972, University of Alabama; host-bacterial interactions in the etiology and pathogenesis of the periodontal diseases.

Robinovitch, Murray \* 1966; DDS, 1961, University of Minnesota; PhD, 1967, University of Washington; salivary biochemistry, salivary anti-HIV factors.

#### Associate Professors

Bordin, Sandra \* 1981, (Research); PhD, 1966, University of Ferrara (Italy); regulation of connective tissue repair by immune-inflammatory complement components.

Darveau, Richard P. \* 1989, (Research); PhD, 1981, Washington State University; bacterial interactions with the innate host defense system.

O'Neal, Robert B. \* 1995; DMD, 1971, University of South Carolina; MEd, 1971, Wayne State University; periodontics.

## Assistant Professor

Roberts, Frank A. 1996; DDS, 1990, University of Tennessee; PhD, 1996, University of Alabama; immunological and biochemical regulatory mechanisms of inflammatory periodontal disease progression.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crsctat/](http://www.washington.edu/students/crsctat/).

**PERIO 449 Directed Studies in Periodontics (\*)** See DPHS 449 for course description and prerequisite.

**PERIO 525- P-Prevention/Periodontics (2-)** Overview of preventive dentistry, introduction to periodontal therapy. Offered: W.

**PERIO -526 P-Prevention/Periodontics (-2)** Overview of preventive dentistry, introduction to periodontal therapy. Offered: Sp.

**PERIO 527 P-Introduction to Periodontics (1)** Epidemiology, natural history, etiology, and histopathology of various periodontal diseases. Offered: S.

**PERIO 530 P-Principles of Periodontics (2)** Diagnosis of periodontal diseases and development of a treatment plan including maintenance program, rationale for non-surgical, surgical, and antibacterial management of periodontal diseases. Discussion of principles of various periodontal procedures. Prerequisite: PERIO 525-526 and PERIO 527. Offered: A.

**PERIO 531 P-Principles of Periodontics (2)** Diagnosis of periodontal diseases and development of a treatment plan including maintenance program, rationale for non-surgical, surgical, and antibacterial management of periodontal diseases. Discussion of principles of various periodontal procedures. Prerequisite: PERIO 525-526 and PERIO 527. Offered: W.

**PERIO 542 Advanced Periodontics (1)** Designed to improve the understanding of sequencing of patient care and providing periodontal therapy into the perspective of a comprehensive care system. Offered: Sp.

**PERIO 550 P-Directed Studies in Periodontics (\* max. 6)** See DPHS 449 for course description and prerequisite.

**PERIO 561- Periodontal Case Management (2-, max. 8)** Didactic presentation of clinical periodontics to provide a comprehensive view of the field and a grasp of modern therapeutics. Offered: AWSp.

**PERIO 566 Practice Management (1)** Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: PERIO 561. Offered: S.

**PERIO 567 Oral Medicine Case Studies (1, max. 3)** Weekly seminar discussing series of unknown oral and perioral conditions. Discussion of history taking, differential diagnoses, relevant tests, therapeutic approaches, and outcomes. Offered: AWSp.

**PERIO 574 Periodontal Microbiology (2)** Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: jointly with ORALB 569; A.

## PERIO 575 Immunologic Aspects of Oral Diseases

(2) Lecture course designed to acquaint students with basic concepts of immunology and immunopathology. Topics include cellular immunology, antibody structure and function, complement system, immunopathologic mechanisms, tumor immunology and immunologic manifestations in mucocutaneous oral lesions as well as immunology of caries and periodontal disease. Offered: W.

**PERIO 576 The Molecular and Cellular Biology of the Periodontium (2)** Nucleic acid, protein, and carbohydrate biochemistry reviewed. Roles of collagens and proteoglycans in gingival tissues and the organization of oral epithelia discussed. Structures of human and animal periodontal lesions compared. Cellular and molecular inflammatory and immunological mechanisms in periodontal disease discussed. History, classification, and epidemiology of periodontal diseases described. Offered: Sp.

**PERIO 577 Review of Literature (2, max. 16)** Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures. Offered: AWSpS.

**PERIO 582- Periodontic Treatment Planning Seminar (1-, max. 12)** Weekly seminar involved with the presentation, discussion, and tentative solution of moderate to complex problems in diagnosis and treatment. Offered: AWSpS.

**PERIO 585- Periodontal Therapy Seminar (1-, max. 12)** Weekly seminar utilizing the case review method and dealing with the treatment of moderate to advanced periodontal disease. Offered: AWSpS.

**PERIO 586- Longitudinal Evaluation of Periodontal Therapy (1-, max. 9)** Close examination of case progress from initial therapy to most recent maintenance visits to determine efficacy of method, demands upon patient, and temporal effect of therapy and survival. Preparation and delivery of a lecture on a therapeutic modality. Offered: AWSp.

**PERIO 592- Prescription Surgery (1-)** Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and to stimulate an environment in which the student can encounter the problems in communication and patient management that occur in the private sector.

**PERIO 600 Independent Study or Research (\*)** Prerequisite: permission of graduate program adviser.

**PERIO 620 P-Introduction to Clinical Periodontics (1)** Clinical periodontics, with emphasis on examination and assessment.

**PERIO 630- P-Periodontics (1-)** Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 527. Offered: A.

**PERIO -631- P-Periodontics (-1-)** Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 527. Offered: W.

**PERIO -632 P-Periodontics (-1)** Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 527. Offered: Sp.

## PERIO 640- P-Advanced Clinical Periodontics

(1-) Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: A.

**PERIO -641- P-Advanced Clinical Periodontics (-1-)** Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: W.

**PERIO -642 P-Advanced Clinical Periodontics (-1)** Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: Sp.

**PERIO 659 P-Periodontics Extended Learning (\* max. 4)** Supplemental work in periodontics to correct an area of student deficiency. Credit/no credit only.

**PERIO 660- Clinical Periodontics ([2-6]-, max. 60)** Clinical experience in diagnosis and treatment of periodontal disease.

**PERIO 663 Pre-Prosthodontics Clinical Periodontics (\*)** Clinical diagnosis and treatment of periodontal disease for nonperiodontics student. Prerequisite: permission of department chairperson.

**PERIO 665 Clinical Practice Teaching (\*)** Supervised experience in teaching clinical periodontics to undergraduate dental students.

**PERIO 685 Hospital Periodontics (1)** Preparation in periodontics to practice in hospital situations, including experience in operation of nitrous oxide analgesia, general anesthesia, intravenous premedication, treating of out- and inpatients.

## Prosthodontics

### Faculty

#### Chair

L. Brian Toolson

#### Professors

Bolender, Charles L. \* 1959; DDS, 1956, MS, 1957, University of Iowa; removable prosthodontics.

Brudvik, James S. \* 1979, (Emeritus); DDS, 1957, University of Minnesota; removable prosthodontics.

Frank, Richard P. \* 1971; DDS, 1962, University of Iowa; MSD, 1968, University of Washington; removable prosthodontics.

Smith, Dale E. \* 1972, (Emeritus); DDS, 1952, University of Pittsburgh; MSD, 1962, University of Washington; removable prosthodontics.

#### Associate Professors

Faine, Mary P. 1982; MS, 1975, University of Washington; nutrition.

Rubenstein, Jeffrey E. \* 1989; DMD, 1975, Tufts University; MS, 1980, University of Texas (Houston); maxillofacial and implant prosthodontics.

Toolson, L. Brian \* 1970; DDS, 1967, MSD, 1977, University of Washington; removable prosthodontics.

#### Assistant Professor

Ma, Tsun \* 1988; DMD, 1978, Washington University; MS, 1985, University of Michigan; MDS, 1995, University of Pittsburgh; maxillofacial prosthetics.

#### Lecturer

Phillips, Sandra L. 1988; MPA, 1985, University of Washington.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**PROS 510 P-Introduction to Dental Nutrition (3)** Basic principles of normal human nutrition, including nutrient requirements at various ages, assessment of nutritional status, nutritive values of foods, with special emphasis on the role of diet in development and maintenance of oral tissues. Offered: S.

**PROS 520 P-Introduction to Complete Dentures-Lecture (3)** Didactic course in the treatment of completely edentulous patients. Instruction is provided in diagnostic procedures, complete denture construction, and maintenance care. Offered: A.

**PROS 521 P-Management of Immediate Denture Patients (1)** Lecture course describing and illustrating the clinical management of immediate denture patients (typical and overdenture). Offered: S.

**PROS 523 P-Removable Partial Denture Design (2)** Lectures in the basic principles of removable partial denture design. Practical drawings and more advanced designs are discussed in seminars. Certain technical aspects of design procedures are done in the classroom. Offered: W.

**PROS 525 P-Removable Partial Denture Clinical Preparatory Course (4)** Lecture-laboratory course dealing with those procedures the dentist must perform in order to fabricate a physiologically acceptable removable partial denture. The student gains experience via clinically simulated laboratory exercises prior to beginning prosthodontic treatment of a partially edentulous patient. Offered: S.

**PROS 542 P-Special Topics in Prosthodontics (1)** Lecture describing and illustrating the following topics: implant procedure, management of difficult patients, maxillofacial prosthesis, quality-control problems in private practice, and other special topics. Offered: W.

**PROS 560 Complete and Immediate Dentures (2)** Lecture/seminar devoted to the diagnosis and treatment of the completely edentulous patient and the immediate denture patient, with emphasis on management of patients with difficulties in treatment. Offered: A.

**PROS 562 Removable Partial Dentures (2)** Lecture/seminar concentrating on factors peculiar to fabrication of removable partial dentures, with emphasis on management of combined fixed and removable therapy. Offered: W.

**PROS 563 Maxillofacial Prosthetics I (1)** Introductory lecture/seminar series with emphasis on diagnosis and prosthodontic rehabilitative treatment of patients who have experienced trauma or have congenital or acquired defects in the oral region. Offered: S.

**PROS 564 Maxillofacial Prosthetics II (1)** Introductory lecture series focusing on the prosthodontic rehabilitation of patients with loss and compromise of

facial anatomy, i.e., ocular, orbital, nasal, auricular, combination intraoral/extraoral, and other related facial deformities.

**PROS 571 Review of Literature Seminar (1, max. 12)** Continuous weekly seminar devoted to the review of prosthodontic and related literature.

**PROS 572 Special Topics Related to Prosthodontics (1)** Lecture-seminar series focusing on relating principles of basic science to clinical application in prosthodontics. A wide and varied range of topics including surgery, psychology, speech, pharmacology, practice management, physiology, temporomandibular/myofascial joint dysfunction.

**PROS 600 Independent Study or Research (\*)** Prerequisite: permission of graduate program adviser.

**PROS 620- P-Clinical Complete Dentures (1/3, max. 3)** Basic principles of complete denture fabrication and of diagnosis and treatment of completely edentulous patient. In second quarter student completes denture patient care, provides follow-up treatment, and participates in four competency examinations. Offered: AW.

**PROS 630- P-Clinical Prosthodontics (1-, max. 3)** Clinical course involving the diagnosis and management of completely and partially edentulous patients. Removable partial dentures and immediate dentures are fabricated. Follow-up care provided for patients previously treated.

**PROS 640- P-Clinical Prosthodontic Maintenance (1-, max. 3)** Clinic involving additional patient treatment with complete, partial, or intermediate dentures, plus indirect relines, managing adjustment chair, peer review, recall clinic, and follow-up care for patients previously treated. Offered: AWSp.

**PROS 650 P-Extramurals in Prosthodontics (\* max. 12)** Elective clinical experiences or clinical practice teaching. Credit/no credit only. Prerequisite: permission of instructor.

**PROS 660 Clinical Prosthodontics (2, max. 6)** Practical application of material covered in 560 and 562.

**PROS 665- Clinical Practice Teaching (1-, max. 4)** Supervised experience in teaching clinical prosthodontics to the undergraduate dental student.

## Restorative Dentistry

### Faculty

#### Chair

Bruce R. Rothwell

#### Professors

Canfield, Robert C. \* 1967, (Emeritus); DDS, 1951, University of Washington; restorative dentistry.

Hamilton, A. Ian \* 1968, (Emeritus); DDS, 1936, University of Toronto (Canada); MA, 1958, University of Washington; PhD, 1968, University of London (UK); restorative dentistry.

Hodson, Jean Turnbaugh \* 1952, (Emeritus); MS, 1958, University of Washington; restorative dentistry.

Johnson, Glen H. \* 1980; DDS, 1978, University of Washington; MS, 1983, University of Michigan; instruction, clinical trials and laboratory research with dental bio-materials.

Morrison, Kenneth N. \* 1948, (Emeritus); DDS, 1943, University of Toronto (Canada); MSD, 1952, University of Washington; restorative dentistry.

Nicholls, Jack I. \* 1965; PhD, 1965, Purdue University; dental materials.

Warnick, Myron E. \* 1956; DDS, 1955, University of Alberta (Canada); restorative dentistry, fixed prosthodontics.

Weaver, James D. 1970, (Clinical Emeritus); DDS, 1965, Ohio State University; restorative dentistry, implants.

Yuodelis, Ralph A. \* 1963, (Emeritus); DDS, 1955, University of Alberta (Canada); MSD, 1964, University of Washington; restorative dentistry, prosthodontics, periodontics, implants.

#### Associate Professors

Bales, David J. 1983; DDS, 1957, University of Washington; MSD, 1972, Indiana University; restorative dentistry.

Chasteen, Joseph E. 1989, (Adjunct); DDS, 1967, MA, 1976, University of Michigan; dental informatics and multi-media instructional programs.

Johnson, Barton S. \* 1991; DDS, 1985, MS, 1989, University of California (Los Angeles); hospital dentistry, medical compromise, oncology, sedation, pharmacology, molecular biology.

Lepe, Xavier \* 1993; DDS, 1980, University of Guadalajara (Mexico); MS, 1987, Loyola University (Chicago); restorative dentistry, dental materials.

Ostlund, Lyle E. 1972, (Emeritus); DMD, 1947, University of Oregon; PhD, 1993, Johns Hopkins University; restorative dentistry.

Powell, Laurri Virginia 1986; DMD, 1982, University of Mississippi; restorative dentistry.

Rothwell, Bruce R. 1980; DMD, 1973, University of Oregon; MSD, 1977, University of Washington; general dentistry, hospital-based dentistry, forensic dentistry.

#### Assistant Professors

Aw, Tar C. 1995; DDS, 1990, Northwestern University; MS, 1995, University of Michigan; restorative dentistry, operative dentistry, dental materials, computers.

Libman, Warren J. 1990, (Affiliate); DDS, 1986, McGill University (Canada); MSD, 1990, University of Washington; restorative dentistry, fixed prosthodontics.

Ma, Tsun \* 1988, (Adjunct); DMD, 1978, Washington University; MS, 1985, University of Michigan; MDS, 1995, University of Pittsburgh; maxillofacial prosthetics.

Morgan, John P. 1997, (Clinical); DDS, 1997, State University of New York (Buffalo); restorative dentistry, hospital-based dentistry.

Schwedhelm, E. Ricardo 1994, (Clinical); DDS, 1978, Universidad Tecnológica de Mexico (Mexico); MSD, 1996, Indiana University; fixed prosthodontics, restorative dentistry, implants, removable prosthodontics.

Verhoef, Douglas R. 1998, (Clinical); DDS, 1973, University of Washington; fixed prosthodontics, restorative dentistry.

#### Senior Lecturer

McCoy, Richard B. 1992; DDS, 1961, University of Washington; MS, 1973, Loma Linda University; restorative dentistry.

#### Lecturers

Anderson, J. Martin 1966; DDS, 1965, University of Washington; restorative dentistry, gold foil, operative dentistry.

Stoddard, James W. 1965; DDS, 1961, University of Washington; restorative dentistry, operative dentistry.

Strand, Harvey A. 1967, (Emeritus); DDS, 1957, University of Washington; restorative dentistry.

Townsend, John D. 1977; DDS, 1967, McGill University (Canada); MSD, 1973, University of Washington; restorative dentistry, fixed prosthodontics, periodontics.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

**RES D 449 Directed Studies in Restorative Dentistry (\*)** See DPHS 449 for course description and prerequisite. Offered: AWSpS.

**RES D 510- P-Dental Materials Science ([1/2]-, max. 3)** Basic concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Clinical use of restorative dental materials also presented. Offered: WSp.

**RES D 511 P-Applied Dental Materials (3)** Lecture/laboratory emphasizing proper use of restorative dental through simulated clinical projects. Student self-evaluation also emphasized. Offered: Sp.

**RES D 515 P-Dental Anatomy (3)** Lecture and laboratory on the morphology and nomenclature of individual teeth of the adult human dentition. Introduction to tooth histology and function and the influence of tooth anatomy on clinical dental procedures. Offered: A.

**RES D 516 P-Introduction to Occlusion (3)** Lecture/laboratory in the functional determinants of occlusal morphology. Preparation and waxing techniques for developing opposing quadrants by the additive waxing technique. Offered: W.

**RES D 517 P-Functional Analysis of Occlusion (3)** Clinical and laboratory experiences in examination and charting of patient's occlusion, record-taking for analysis of occlusion on a dental articulator, and preclinical diagnostic correction of problems of occlusion on articulated clinical casts. Provides basic background or technique information relative to laboratory and clinical experiences. Offered: Sp.

**RES D 519 P-Operative Dentistry (1)** Lecture series introducing operative dentistry. Nomenclature, cavity classification, instrumentation, pulp protection, and principles of cavity preparation. Offered: Sp.

**RES D 520 P-Introduction to Operative Dentistry Technique (3)** Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for one-surface restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: A.

**RES D 521 P-Introduction to Operative Dentistry Technique (3)** Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for multiple-surface direct filling restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: W.

**RES D 522 P-Introduction to Operative Dentistry Technique (3)** Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for proper coverage cast gold and foundation buildup restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: Sp.

**RES D 525 P-Fixed Prosthodontics (3)** Serves as introduction to area of restorative dentistry dealing with indirect partial restorations and complete coverage restorations. Preclinical experience provided in tooth preparation, provisional restoration, and fabrication for various crown designs. Projects emphasize the various designs of single-tooth preparation/restoration. Offered: A.

**RES D 526 P-Fixed Prosthodontics (3)** Serves as introduction to area of fixed prosthodontics dealing with multiple-unit restorations. Preclinical experience provided with multiple tooth preparations and provisional restoration. Fabrication for various crown designs, singly and in conjunction with various pontic and connector types, to serve as fixed partial denture prostheses. Projects emphasize multiple-tooth preparation/restoration and implant-supported restorations. Offered: W.

**RES D 527 P-Fixed Prosthodontics (3)** Serves as introduction to area of fixed prosthodontics dealing with esthetic veneer indirect restorations. Preclinical experience provided in tooth preparation and restoration, fabrication for various esthetic veneer crown designs, singly and in conjunction with various pontic types to serve as fixed partial denture prostheses. Projects emphasize anterior single- and multiple-tooth preparation/restoration, provisional prosthesis, and esthetic veneer restorations. Offered: Sp.

**RES D 530 P-Restorative Dentistry (2)** Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Offered: A.

**RES D 531 P-Restorative Dentistry (2)** Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Offered: W.

**RES D 532 P-Restorative Dentistry (2)** Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Offered: Sp.

**RES D 540 P-Advanced Restorative Dentistry (2)** Broadens base of restorative procedures. Introduction of new techniques and preparation for state board examination. Offered: A.

**RES D 541 P-Advanced Restorative Dentistry (2)** Broadens base of restorative procedures. Introduction of new techniques and preparation for state board examination. Offered: W.

**RES D 542 P-New Developments in Dental Materials (1)** Dental materials recently introduced to dental profession reviewed, compared to current materials, and clinically demonstrated. Offered: Sp.

**RES D 550 P-Directed Studies in Restorative Dentistry (\* max. 6)** See DPHS 449 for course description and prerequisite. Offered: AWSpS.

**RES D 570 Review of Literature Seminar (1, max. 6)** Continuous weekly seminar devoted to a review of restorative and related literature, and discussion of teaching methods, philosophy of teaching and treatment. Offered: AWSpS.

**RES D 580- Restorative Treatment Planning Seminar (1-, max. 8)** Continuous weekly seminar to discuss controversial treatment problems and difficult diagnostic cases selected for graduate students. Offered: AWSp.

**RES D 581- Comprehensive Treatment Planning (2-, max. 4)** Seminar devoted to the diagnosis and treatment of comprehensive dental cases with special emphasis given to the relationship of periodontics to restorative dentistry. Offered: Sp.

**RES D 585 Advanced Dental Materials Science (2)** Advanced concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Emphasis also on research design, testing methods, and proper selection of dental materials for clinical practice. Offered: W.

**RES D 588 Masticatory Functional Analysis and Occlusal Adjustment (2)** Lecture/seminar and clinical sessions in the study of the physiology of occlusion. Pertinent literature reviewed and discussed from the multidisciplinary viewpoint. The clinical sessions include training in masticatory functional analysis and treatment of occlusally related diseases. Offered: A.

**RES D 589 Review of Literature in Occlusion (2)** Seminar to review pertinent literature in occlusion. Offered: S.

**RES D 590- Fundamentals of Fixed Prosthodontics (2-, max. 4)** Lecture/laboratory/clinical sessions in the study of gnathological principles and procedures as they pertain to the treatment of comprehensive cases assigned to the students. Use and application of several fully adjustable articulators. Offered: AW.

**RES D 600 Independent Study or Research (\*)** Prerequisite: permission of graduate program adviser. Offered: AWSpS.

**RES D 620 P-Introduction to Clinical Restorative Dentistry (1)** Orientation to restorative clinical operations, administrative procedures associated with patient management and completion of initial treatment plans. Emphasizes problem-based learning, treatment outcomes, the sequence of clinical treatment, and the diagnosis and management of caries-susceptible patients. Offered: S.

**RES D 630- P-Clinical Restorative Dentistry ([1-3]-, max. 9)** Clinical training in fundamental restorative dentistry procedures, including diagnostic, treatment planning, and therapeutic aspects of operative dentistry, fixed prosthodontics, and occlusal treatment. Offered: AWSp.

**RES D 640- P-Advanced Clinical Restorative Dentistry ([1-3]-, max. 12)** Clinical training in restorative dentistry procedures, including diagnostic, treatment planning, and therapeutic aspects of operative dentistry, fixed prosthodontics, and occlusal treatment. Offered: AWSp.

**RES D 650 Restorative Dentistry Clinical Elective (1-6, max. 12)** Elective offering in clinical areas related to discipline. Offered: AWSpS.

**RES D 659 P-Restorative Dentistry Extended Learning (\* max. 4)** Supplemental work in restorative dentistry to correct an area of student deficiency. Credit/no credit only. Offered: S.

**RES D 660- Oral Rehabilitation ([2-6]-, max. 32)** Clinical course to provide experience in diagnosis and treatment of patients requiring restorative procedures from single restorations to complex oral rehabilitative methods. Special emphasis is directed toward the integration of periodontics and occlusion as they relate to restorative dentistry. Offered: AWSpS.

# College of Education

## Dean

Allen D. Glenn  
222 Miller

## Associate Deans

Sheila Lowenbraun  
Richard S. Neel

General Catalog Web page:  
[www.washington.edu/students/genocat/academic/College\\_Education.html](http://www.washington.edu/students/genocat/academic/College_Education.html)

College Web page:  
[www.educ.washington.edu/COE/](http://www.educ.washington.edu/COE/)

The College of Education is a graduate and professional school dedicated to the improvement of education through the research and study of important educational problems. The College has four broad curricular areas: Curriculum and Instruction, Educational Leadership and Policy Studies, Educational Psychology, and Special Education. Degrees conferred are M.Ed., Ph.D., Ed.D., and M.I.T. Certificates can be earned in teaching (elementary, secondary, and special education), school administration (principals, program administrators, and superintendents), school counseling, and school psychology.

The College is committed to the preparation of caring, knowledgeable, and reflective practitioners grounded in the best practices and dedicated to meeting the needs of all students.

## Special Offices and Services

The College of Education maintains a number of special offices to assist in the fulfillment of its goals. Among these are the Office of Teacher Education, the Office of Student Services, and the Office of Minority Recruitment and Retention. In addition, the College of Education maintains formal relationships with a number of school districts in the area to provide research and field experience opportunities for students in the various programs. Individuals interested in teacher certification or in graduate degree programs should contact the Office of Student Services, 206 Miller.

## Professional Certification

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Academic counselors are available to help with pre-program counseling, long-range planning, applications, registration, referrals to other campus resources, general program advising, and continuing/professional certificate requirements.

## Administrator Certificates

Administrator Certificate preparation programs for superintendents, principals, and program administrators are offered in the College of Education. Information concerning admission and requirements for these programs is available from the Area of Educational Leadership and Policy Studies, M209 Miller.

## Educational Staff Associate Certificates

Educational Staff Associate Certificate preparation programs are offered for the school counselor, school psychologist, school speech language pathologist or audiologist (SLP), occupational therapist, and school social worker. Information concerning requirements and admission may be obtained as follows: school counselor and school psychologist—College of Education Office of Student Services, 206 Miller, or Area of Educational Psychology, 312 Miller, Box 353600, University of Washington, Seattle, Washington 98195-3600; school speech language pathologist or audiologist—Department of Speech and Hearing Sciences, 203 Eagleson, Box 354875, University of Washington, Seattle, Washington 98195-4875; occupational therapist—Department of Rehabilitation Medicine, CC902 University of Washington Medical Center, Box 356490, Seattle, Washington 98195-6490; school social worker—School of Social Work, Box 354900, University of Washington, Seattle, Washington 98195-4900.

## Teaching Certificates

The College of Education is authorized by the State Board of Education to prepare and recommend individuals for Initial/Residency and Continuing/Professional Teaching Certificates. The Teacher Education Program is accredited by the National Association of State Directors of Teacher Education and Certification. Graduates are qualified for certification in all states party to the Interstate Certification Compact and in other states as well.

## Residency Teaching Certification Program

The College of Education offers residency teaching certification for individuals desiring careers as elementary or middle/secondary school teachers, or as special education teachers working with students with severe disabilities or infants, toddlers, and preschool children with disabilities. Candidates may also select a teacher education/special education option which provides initial certification in elementary education with course work in special education. All programs are offered at the master's level. For additional information contact the Office of Student Services, 206 Miller.

An undergraduate or postbaccalaureate program leading to certification in music education, grades K-12, is offered through the School of Music. For additional information contact the School of Music Advising Office, 116 Music, Box 353450, University of Washington, Seattle, WA 98195-3450.

## Professional Teaching Certificates

For information on the OSPI guidelines and where programs exist, contact any Educational Service District or the Office of Professional Licensing and Certification, OSPI, Box 47200, Old Capitol Building, Olympia, Washington 98504. For information about Professional Teacher Certificate programs at the University, contact the Office of Teacher Education at (206) 543-1754.

## Endorsements on Teaching Certificates

Teachers holding an initial/residency or continuing/professional teaching certificate may add endorsements to their certificates which will qualify them to teach additional subjects. For information on endorsement requirements through the University of Washington, contact the Office of Teacher Education, 211 Miller, Seattle, WA 98195-3600.

## Graduate Degree Programs

Graduate Program Coordinator  
206 Miller, Box 353600  
(206) 543-7833  
[edinfo@u.washington.edu](mailto:edinfo@u.washington.edu)

The College of Education currently offers four advanced degrees: Master in Teaching, Master of Education, Doctor of Education, and Doctor of Philosophy. The M.I.T. degree will be awarded to elementary and secondary certification students at the completion of their program. Graduate students may specialize their degree studies in teacher preparation, curriculum and instruction, educational psychology including cognitive studies, educational leadership and policy studies, or special education. A focus on higher education leadership leading to Master of Education or Doctor of Education degrees is offered through the Evening Degree Program. Questions regarding graduate study in education should be directed to the Office of Student Services, 206 Miller, Box 353600, College of Education, University of Washington, Seattle, Washington 98195-3600.

## Master in Teaching

The Master in Teaching (M.I.T.) degree program results in a Washington residency teaching certificate for elementary or secondary (specific subjects) school teaching. The program is an integrated sequence of full-time, daytime course work and field experiences spanning five quarters. One quarter is devoted to full-time placement in a school. Field experiences are in schools in the Seattle/Puget Sound area chosen to provide a variety of situations in regard to level, school population, and location.

## Master of Education

The Master of Education (M.Ed.) degree requires a minimum of 45 credits, including at least 15 credits in a specialized area of study in education; 9 credits related to, but outside of, the specialization, some course work outside education; 9 thesis credits or, for the non-thesis option, 9 credits in a field study or other approved project; and a final examination.

## Doctor of Education

The Doctor of Education (Ed.D.) degree is designed to prepare professionals whose primary interest is to deal directly with problems of educational practice. The program of study leading to the Ed.D., as a professional degree, focuses on the utilization of research and practitioners' knowledge, rather than on the production of research knowledge. Those who aspire to positions as master teachers, curriculum designers, or learning resource specialists, for example, would appropriately seek the Doctor of Education degree.

This professional degree requires at least two years of resident study, a program of specialized study with credit in education and related fields, sufficient preparation in research methodology to interpret research findings for use in practice, an internship and leadership training, a General Examination, a dissertation on a problem of educational practice, and a Final Examination.

## Doctor of Philosophy

The Doctor of Philosophy (Ph.D.) in education is a research degree. It offers preparation for a career of research on issues fundamental to education—issues that range from fairly narrow questions about human learning to macroquestions regarding the form of societies' educational institutions. The scope of the Ph.D. degree in education is broad. It is possible to pursue a degree organized around traditional study areas such as educational psychology, curriculum and instruction, special education, or educational leadership and policy making. A student may develop a course of study that integrates various elements of more than

one study area (e.g., multiethnic education and literacy). One of the study options in the Ph.D. program is school psychology, which prepares students for the professional practice of psychology with school-age children, as well as for research.

Degree requirements include a minimum of two years of resident study, a program of specialized study with credits both in education and in other academic units, preparation in research methodology adequate to design and assess research in the field of specialization, sufficient study in cognate fields inside and outside of education to ensure that the candidate can place the specialized research in a broader context, a General Examination, a research dissertation, and a Final Examination.

## Accreditation

The College of Education has the following formal accreditation: American Psychological Association (APA) and National Association of School Psychologists (NASP) for the Ph.D. programs in school psychology, Washington State Board of Education for Initial/Residency and Continuing/Professional teaching certificates and Initial/Residency certification for school psychology and school counseling, National Association of State Directors of Teacher Education and Certification, National Council for Accreditation of Teacher Education (pending), and University Council for Educational Administration (UCEA) for the administrator preparation programs. Graduates qualify for certification in all states party to the Interstate Certification Compact.

## Admission Requirements

Applicants to the Master of Education and Master in Teaching degree programs must hold a baccalaureate degree from an accredited institution. Admission decisions are based on the applicant's grade-point average, Graduate Record Examination general test scores, goal statement, and other prerequisites stipulated by the area of specialization within the College. Application deadlines vary by program.

Consideration for admission to either doctoral program requires a master's degree or equivalent preparation in a field appropriate to the area of specialization, usually a 3.50 GPA in the master's program, a sample of scholarly writing, goal statement, and other prerequisites stipulated by the individual program of study. Graduate Record Examination general test scores are required.

Although admission is competitive, admitted students have exhibited a wide range of performance on traditional criteria such as GPA and GRE scores. The College values diversity and encourages all interested persons to seek additional information and apply. For more information contact the Office of Student Services, 206 Miller, Box 353600.

## Financial Aid

The College of Education offers a limited number of awards with varying stipends for graduate students in education. Primary consideration is given to doctoral students with a background of successful teaching or administrative experience. Specific information on the various types of remunerative appointments for graduate students in education, amounts of stipends, and application procedures may be obtained from the College of Education, Office of Student Services, 206 Miller, Box 353600, Seattle, Washington 98195-3600. The annual application deadline is March 1.

## Special Research and Service Facilities

Within the College of Education opportunities exist for students to gain research and service experience.

**The Center for Multicultural Education** focuses on research projects and activities designed to improve practices related to equity issues, intergroup relations, and the achievement of students of color.

**The Clinical Training Laboratory**, operating under the aegis of Educational Psychology, offers observation rooms equipped with video recorders where trainees and clients can be observed and taped through one-way mirrors.

The world-renowned **Experimental Education Unit** offers an interdisciplinary approach to research, training, and service, providing integrated classes for 150-200 young children, toddlers, and infants with disabilities and their typically developing peers, and services for their families.

**The Multidisciplinary Learning Disabilities Center** conducts research on preventing and treating reading and writing disabilities and on the biological basis of learning disabilities. The center disseminates its findings to teachers through its Teacher Training Project.

**The National Center for the Study of Teaching and Policy**, a consortium of five universities headed by the University of Washington, conducts a wide range of studies aimed at local, state, and national policy strategies to promote teacher excellence.

**The Institute for the Study of Educational Policy** promotes interdisciplinary studies that bring together research and practice for the benefit of children and youth, educators, policy makers, and the larger community. The institute includes (a) **The Center for Educational Renewal**, which responds to a growing nationwide interest in the renewal of schools and teacher education by creating partnerships, promoting innovative programs and policies for the education of educators, and reforming leadership and governance structures; (b) **The Center for Effective Schools**, which is committed to engaging in research and service activities designed to promote instructionally effective schools through collaboration and self-evaluation; (c) **The Center for the Study and Teaching of At-Risk Students**, which was established to foster interprofessional projects to encourage students to stay in school; and (d) **The School Law Division**, which deals with the improvement of professional practices of school administrators, including superintendents, principals, and program directors. Additionally, the institute conducts policy research pursuant to grants and contracts with school districts, state and federal agencies, and other educational organizations.

## Faculty

### Professors

Abbott, Robert D. \* 1975; PhD, 1970, University of Washington; measurement, statistics and research design.

Affleck, James Q. \* 1967, (Emeritus); MA, 1963, San Francisco State; EdD, 1968, Columbia University; special education/inclusion.

Anderson, Robert A. \* 1965, (Emeritus); PhD, 1964, University of Minnesota; educational administration.

Banks, James A. \* 1969; MA, 1967, PhD, 1969, Michigan State University; social studies, multiethnic education.

Berninger, Virginia Wise \* 1986; PhD, 1981, Johns Hopkins University; educational psychology.

Billingsley, Felix F. \* 1977; PhD, 1974, University of Washington; special education (severely handicapped).

Bolton, Dale Leroy \* 1965, (Emeritus); PhD, 1958, University of Wisconsin; educational administration.

Boroughs, Homer Jr. 1946, (Emeritus); MA, 1947, PhD, 1949, University of Washington; history and philosophy of education.

Brammer, Lawrence M. \* 1963, (Emeritus); PhD, 1950, Stanford University; counseling, adult development.

Brown, Frances A. 1953, (Emeritus); MA, 1950, Columbia University; business education.

Burgess, Charles O. \* 1964, (Emeritus); PhD, 1962, University of Wisconsin; history of education.

Butterfield, Earl C. \* 1981, (Emeritus); PhD, 1963, George Peabody College; cognitive development, metacognition.

Dohner, Charles W. \* 1967; PhD, 1966, Ohio State University; program evaluation, administration, faculty development.

Doi, James I. \* 1979, (Emeritus); PhD, 1952, University of Chicago; finance and management of colleges and universities.

Driscoll, John P. \* 1967, (Emeritus); PhD, 1957, Pennsylvania State University; educational communications.

Edgar, Eugene Bayard \* 1972; PhD, 1972, George Peabody College; special education.

Evans, Ellis D. \* 1964, (Emeritus); EdD, 1964, Indiana University; human development and cognition.

Forster, Jerald R. \* 1966; PhD, 1966, University of Minnesota; counseling.

Foster, Clifford D. \* 1959, (Emeritus); PhD, 1957, University of Washington; curriculum and instruction.

Freehill, Maurice F. \* 1962, (Emeritus); EdD, 1948, Stanford University; school psychology/human development and cognition.

Gay, Geneva \* 1989; PhD, 1972, University of Texas (Austin); general curriculum theory, multicultural education, and educating African American students.

Gehrke, Nathalie J. \* 1979; PhD, 1976, Arizona State University; curriculum.

Glenn, Allen D. \* 1989; PhD, 1970, University of Michigan; teacher education, social studies education, and instructional computing.

Goodlad, John I. \* 1983, (Emeritus); PhD, 1949, University of Chicago; EdD, 1982, Eastern Michigan University; education reform, curriculum theory.

Haring, Norris Grover \* 1965, (Emeritus); EdD, 1956, Syracuse University; special education (early childhood).

Hill, Paul T. \* 1993, (Adjunct Research); PhD, 1972, Ohio State University; education policy and reform.

Hunkins, Francis Peter \* 1966; PhD, 1966, Kent State University; curriculum.

James, William H. 1979, (Research); PhD, 1989, University of Massachusetts; motivation, cross-cultural factors, and substance abuse issues.

Jarolimek, John \* 1962, (Emeritus); PhD, 1955, University of Minnesota; social studies.

Jenkins, Joseph R. \* 1978; PhD, 1967, University of Minnesota; special education (mildly handicapped).

Kaltsounis, Theodore \* 1967; PhD, 1961, University of Illinois; social studies.

Kerr, Donna H. \* 1973; PhD, 1973, Columbia University; philosophy and education.

Kerr, Stephen T. \* 1985; PhD, 1975, University of Washington; information technology and telecommunications.

Klockars, Alan J. \* 1963; PhD, 1967, University of Washington; measurement, statistics and research design.

Knapp, Michael S. \* 1990; PhD, 1981, Stanford University; public policy in education; policy research; sociology of education.

Lovitt, Thomas C. \* 1966, (Emeritus); EdD, 1966, University of Kansas; special education (mildly handicapped).

Lowenbraun, Sheila \* 1968; PhD, 1969, Columbia University; special education (hearing impaired).

- Madsen, David L. \* 1962, (Emeritus); PhD, 1961, University of Chicago; history of education.
- McCartin, Rosemarie E. \* 1969, (Emeritus); PhD, 1964, University of Southern California; school psychology/human development and cognition.
- McCutchen, Deborah Elaine \* 1986; PhD, 1985, University of Pittsburgh; cognitive processes underlying reading and writing skills.
- Meacham, Merle L. \* 1964, (Emeritus); MS, 1956, University of Washington; school psychology.
- Mizokawa, Donald T. \* 1973; PhD, 1974, Indiana University; human development and cognition.
- Morishima, James K. \* 1960, (Emeritus); PhD, 1967, University of Washington; human development and cognition.
- Morris, Arval \* 1955, (Adjunct); JD, 1955, University of Colorado (Boulder); LLM, 1958, Yale University; LLD, 1972, Colorado College; constitutional law, jurisprudence, education law, civil rights.
- Neel, Richard S. \* 1972; PhD, 1972, University of Southern California; special education, behavior disorders, learning disabilities.
- Olstad, Roger G. \* 1964, (Emeritus); PhD, 1963, University of Minnesota; science education, teacher education.
- Olswang, Steven G. \* 1975; JD, 1971, University of Illinois; PhD, 1977, University of Washington; higher education administration and policy, law, faculty government, collective bargaining.
- Parker, Walter C. \* 1985; PhD, 1982, University of Washington; social studies.
- Peckham, Percy D. \* 1968, (Emeritus); PhD, 1968, University of Colorado (Denver); measurement, statistics and research design.
- Reitan, Henry M. 1967, (Emeritus); PhD, 1950, University of North Dakota; educational leadership and policy studies, higher education.
- Robinson, Nancy M. \* 1969, (Adjunct); PhD, 1958, Stanford University; developmental psychology, giftedness.
- Ryckman, David B. \* 1969; EdD, 1966, University of Illinois; special education (mildly handicapped).
- Sax, Gilbert \* 1965, (Emeritus); PhD, 1958, University of Southern California; measurement, statistics and research design.
- Sebesta, Sam L. \* 1963, (Emeritus); EdD, 1963, Stanford University; reading/language arts, children's literature.
- Sirotnik, Kenneth A. \* 1985; PhD, 1969, University of California (Los Angeles); measurement, statistics, research design and evaluation, educational change and school renewal.
- Standal, Timothy \* 1976; PhD, 1976, University of Minnesota; reading/language arts.
- Stowitschek, Joseph James \* 1986, (Research); EdD, 1973, Utah State University; vocational and social development, service policies regarding disabled youth.
- Strayer, George D. 1949, (Emeritus); MA, 1928, PhD, 1934, Columbia University; educational administration.
- Thompson, Marie D. \* 1979, (Emeritus); PhD, 1970, University of Washington; special education (hearing impaired).
- Tostberg, Robert E. \* 1962, (Emeritus); PhD, 1960, University of Wisconsin; philosophy of education.
- Valencia, Sheila Denise W. \* 1987; PhD, 1978, University of Colorado (Boulder); reading remediation, comprehension, instruction and assessment.
- White, Owen R. \* 1973; PhD, 1971, University of Oregon; special education (severely handicapped).
- Williams, Donald T. \* 1969, (Emeritus); PhD, 1963, Stanford University; higher education.
- Williams, Richard C. \* 1990, (Emeritus); PhD, 1966, University of Minnesota; career socialization of school principals; the process of school reform.
- Wineburg, Samuel S. \* 1989; PhD, 1990, Stanford University; educational psychology, cognitive psychology of school subjects, historical cognition.
- Winn, William David \* 1985; PhD, 1972, Indiana University; educational technology, instructional theory, instructional design, visual information processing.

### Associate Professors

- Beadie, Nancy Elizabeth \* 1993; PhD, 1989, Syracuse University; history of education.
- Beal, Jack L. \* 1973, (Emeritus); MS, 1962, University of Kansas; PhD, 1972, University of Nebraska; secondary mathematics education.
- Brown, Robert Lewis \* 1965, (Emeritus); EdD, 1961, University of Arkansas; school psychology.
- Cohen, Marilyn 1987, (Research); PhD, 1971, University of Washington; childhood development, telecommunications technology and research.
- Dimmitt, Norma M. 1969, (Emeritus); MEd, 1963, University of Washington; EdD, 1970, Stanford University; curriculum and instruction, teacher education.
- Frerichs, Alberta J. 1955, (Emeritus); MEd, 1951, University of Nebraska; business education.
- Frey, Karin S. \* 1983, (Research); PhD, 1978, University of Washington; educational psychology, relationships between social cognitions and behaviors.
- Gray, Carol A. \* 1971, (Emeritus); PhD, 1971, University of Washington; educational psychology, human development and cognition, school psychology.
- Hansen-Krening, Nancy M. \* 1974; PhD, 1974, University of Oregon; reading/language arts, multiethnic literature.
- Jones, Diane Carlson \* 1996; MA, 1969, University of Texas (Austin); MA, 1977, PhD, 1980, Wayne State University; development of social-cognitive/emotional competencies and peer relations, especially friendships.
- Kelly, Samuel E. 1970, (Emeritus); MA, 1960, Marshall University; PhD, 1971, University of Washington; educational leadership and policy study, higher education.
- Kerdeman, Deborah \* 1990; MA, 1988, PhD, 1991, Stanford University; philosophy of education, philosophy of social inquiry, and hermeneutics.
- Nelson, Mary Lee \* 1990; PhD, 1989, University of Oregon; counseling, interpersonal theory, process research, supervision, gender issues.
- Nolen, Patricia A. \* 1970, (Emeritus); PhD, 1970, University of Washington; school psychology/human development and cognition.
- Nolen, Susan B. \* 1990; PhD, 1986, Purdue University; development of students' achievement motivation and learning strategies.
- Ostrander, Kenneth H. \* 1968; EdD, 1968, University of Tennessee; educational administration.
- Schwartz, Ilene Sharon \* 1991; PhD, 1989, University of Kansas; early childhood, classroom-based interventions, and applied behavior analysis.
- Smith, John P. \* 1969, (Emeritus); EdD, 1969, Stanford University; science education.
- Sulzbacher, Stephen 1976, (Adjunct); MA, 1964, Hollins College (Virginia); PhD, 1971, University of Washington; psychiatry and behavioral sciences.
- Taylor, Catherine S. \* 1991; MS, 1978, PhD, 1986, University of Kansas; educational psychology.
- Thalberg, Stanton P. \* 1965, (Emeritus); PhD, 1964, University of Iowa; school psychology.
- Valadez, James R. \* 1996; PhD, 1990, University of California (Santa Barbara); sociology of education, social and cultural influences that shape student education/career decisions.

### Assistant Professors

- Antony, James Soto \* 1995; PhD, 1996, University of California (Los Angeles); aspirations and success of professional occupations, post-secondary faculty careers.
- Bashey, Husain Ismail 1968; MA, 1955, Bombay University (India); MA, 1960, MacMurray College; PhD, 1975, University of Oregon; counseling.
- Bell, Philip L. \* 1998; PhD, 1998, University of California (Berkeley); cognition and learning, science education, argumentation, design for learning technologies.
- Cheney, Douglas A. \* 1989; PhD, 1992, University of Washington; education, treatment and support of students with behavioral/learning disabilities.
- Dutro, Elizabeth M. 1999, (Acting); PhD, 1999, University of Michigan; reading/language arts.
- Herrenkohl, Leslie R. \* 1996; PhD, 1995, Clarkson University; cognitive and social processes of students in preschool and elementary school settings.
- Kazemi, Elham \* 1999; PhD, 1999, University of California (Los Angeles); mathematics education, elementary.
- Kimball, Kathleen L. \* 1987; EdD, 1993, University of Washington; educational leadership and policy studies.
- Mazza, James J. \* 1996; MS, 1990, PhD, 1993, University of Wisconsin; educational psychology/child and adolescent mental health.
- Plecki, Margaret L. \* 1994; MS, 1976, University of Illinois; PhD, 1991, University of California (Berkeley); school finance, economics of education, policy analysis, school choice, study of education reform.
- Portin, Bradley S. \* 1995; MEd, 1987, Seattle Pacific University; DPhil, 1995, Oxford University (UK); school administration/educational leadership.
- Rodriguez, Patricia 1999, (Acting); PhD, 1999, University of North Carolina; special education (early childhood).
- Sandall, Susan R. \* 1996; PhD, 1986, University of Washington; special education (early childhood).
- Stage, Scott A. \* 1995; MS, 1988, PhD, 1991, Florida State University; educational psychology.
- Stevens, Reed R. \* 1998; PhD, 1999, University of California (Berkeley); ethnography research on cognition, learning, social interaction, and technology use.
- Taylor, Edward Jr. \* 1990; MA, 1983, Gonzaga University; PhD, 1994, University of Washington; leadership, critical theory and discourse concerning race in education and society.
- Troia, Gary A. 1999; PhD, 1999, University of Maryland; special education (mild handicapped).
- Walker, Cindy M. 1998; PhD, 1998, University of Illinois; educational psychology, applied psychometrics, statistical analysis.
- Windschitl, Mark A. \* 1996; MS, 1993, PhD, 1995, Iowa State University; area of curriculum and instruction, use of technology in learning environments, constructivism.

### Senior Lecturer

- Bamburg, Jerry D. \* 1985; EdD, 1989, University of Washington; educational reform, organizational change.

## Course Descriptions

See page 39 for an explanation of course numbers, symbols, and abbreviations.

For current course descriptions, visit the online course catalog at [www.washington.edu/students/crscat/](http://www.washington.edu/students/crscat/).

## Education Curriculum and Instruction

**EDC&I 324 Physical Education and Health in the Schools (2)** Techniques and procedures for teaching physical education and health in elementary and secondary schools. For students in Teacher Education Program. Credit/no credit only.

**EDC&I 424 Multiethnic Curriculum and Instruction (3)** Primarily for preservice and in-service teachers who have little or no previous exposure to issues related to ethnicity and schooling. Designed to help teachers better understand the school's role in the ethnic education of students and acquire the insights, understandings, and skills needed to design and implement curricular and instructional strategies that reflect ethnic diversity.

**EDC&I 425 Instructional Strategies for Minority Students (3)** Designed to equip educators with appropriate skills in effective teaching of culturally and socioeconomically different students. Attention is directed to understanding how these students differ from mainstream youth and what the implications are for instructional strategies in the classroom.

**EDC&I 434 Introduction to Computers in the Classroom (3)** Overview of the uses of computers in education. Uses of computers in instruction, classroom management (gradebooks, utilities), evaluation of software, overview of programming, and word processing. Prior experience not required.

**EDC&I 436 Design and Authoring of CAI (3)** Introduction to the design of computer-assisted-instructional programs. Types of learning, characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with T C 436.

**EDC&I 437 Uses of Computer Application Packages in Schools (3)** Introduction to the instructional and management uses of application programs. Topics may include: databases, spreadsheets, word processing, graphics packages, graphing utilities, telecommunication, desktop publishing. Emphasis is on K-12 setting. Prerequisite: EDC&I 434.

**EDC&I 440 Gender and Education (5) I&S** Gender bias, discrimination, and gender-equity efforts in education. Includes curriculum instruction, instructional materials, testing, counseling, athletics, teacher education, educational employment issues, and sexual harassment. Relevant federal and state laws, court decisions, and strategies for promoting gender equity also addressed. Recommended: WOMEN 200 or SOC 110. Offered: jointly with WOMEN 415.

**EDC&I 453 Teaching the Bilingual-Bicultural Student (3)** Educational needs of bilingual students: research findings, special programs, materials, and methodologies that bilingual-bicultural education can provide to meet those needs. Cultural combinations of bilingual populations in American culture; historical, social, and linguistic factors affecting their K-12 education.

**EDC&I 455 The Language Arts: Language and Learning (3)** The teaching of language arts requires research-based knowledge of language learning and its influence on listening, speaking, reading, writing, and nonverbal communication. Emphasizes techniques for building both a solid literacy curriculum and sound instructional practices.

**EDC&I 456 Workshop in Instructional Improvement: Language Arts (1-6, max. 15)** Individual or group study projects on the improvement of instruction in language arts.

**EDC&I 457 Methods in Teaching English as a Second Language (3)** Prepares preservice and in-service teachers to teach English as a second language and to meet the educational and linguistic needs of students who have little or no English language skills. Emphasis on a survey of first- and second-language acquisition research and its educational implications, as well as instructional strategies consistent with the audiolingual, cognitive, and creative construction approaches to second-language learning. Includes diagnostic-prescriptive strategies for classroom application.

**EDC&I 459 Workshop in Instructional Improvement: Reading (1-6, max. 15)** Projects on the improvement of instruction in reading. For experienced teachers and students in Teacher Education Program.

**EDC&I 460 Early Literacy Instruction (3)** Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, comprehension, invented spelling, and writing. Emphasis on classroom instruction strategies for first and second language learners. Offered: A.

**EDC&I 461 Materials for Teaching Reading: Children's and Young Adult's Literature (3)** Designed to provide acquaintance with materials used in the teaching of reading. Trade books and materials from content areas are examined.

**EDC&I 462 Reading Comprehension Instruction in Elementary and Secondary School (3)** Research-based practices for explicit teaching of reading comprehension of both fiction and content-area texts including issues of reading strategies, text difficulty, teacher modeling, guided reading, discussion, assessment, and adaptations for struggling students. Offered: Sp.

**EDC&I 464 Educating Native-American Youth (3)** Assists students in understanding the North American Indian child from cultural, socioeconomic, and psychological points of view. Provides opportunities for the student to apply knowledge and skills gained in other courses to prepare programs and learning aids relevant to the educational situation of the Indian child.

**EDC&I 465 Social Studies Education: Elementary School Programs and Practices (3)** Stresses curriculum patterns, instructional procedures, resource materials, and the selection of content in social studies. For elementary and middle school teachers and students in Teacher Education Program.

**EDC&I 466 Social Studies Education: Secondary School Programs and Practices (3)** Stresses curriculum patterns, instructional procedures, resource materials, and a selection of content in social studies for middle, junior, and senior high school teachers. For experienced teachers and students in Teacher Education Program.

**EDC&I 469 Teaching African American Students and Culture (3)** Examination of sociocultural and pedagogical factors that influence African American students' learning styles, opportunities, and outcomes; exploration of ways to reform teaching techniques to better accommodate cultural styles and experiences to improve the educational achievement of African American students.

**EDC&I 470 Science Education: Elementary School Programs and Practices (3)** Designed for classroom teachers with reference to the teaching and learning of science from kindergarten through grade 6. Emphasis is placed on objectives, methods, and materials as related to the concepts and processes of science.

**EDC&I 471 Science Education: Secondary School Programs and Practices (3)** Survey of the status and potential role of science in education; trends and their implications for the teaching of both biological and physical sciences in the junior and senior high schools; representative curricula and related teaching procedures; the psychology of concept formation and problem solving; and organization of science programs.

**EDC&I 472 Environmental Education for Teachers (3)** Status, selected problems, and role of environmental education in program of elementary, middle, and junior high schools. Opportunity to examine and receive instruction in use of existing environmental education instructional materials. Instruction is in the spirit of inquiry/discovery.

**EDC&I 473 Workshop in Instructional Improvement: Science (1-6, max. 15)** Individual or group study projects on the improvement of instruction in science.

**EDC&I 474 Multi-Ethnic Studies: Methods, Content, and Materials (3)** Designed to help preservice and in-service teachers identify content and materials and devise methods for implementing ethnic studies programs and for incorporating ethnic content into regular K-12 social studies, language arts, and humanities curricula. Special attention is given to teaching about American Indians, Mexican Americans, African Americans, Asian Americans, Puerto Rican Americans, and White ethnic groups.

**EDC&I 475 Improvement of Teaching: Elementary School Mathematics (3)** Designed for elementary teachers. Emphasis is placed on the contributions of research to the improvement of the teaching of mathematics in the elementary school. For experienced teachers.

**EDC&I 478 Special Topics in Mathematics for Teachers (2-9, max. 9) NW** Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with MATH 497.

**EDC&I 479 Workshop in Instructional Improvement: Mathematics (1-6, max. 15)** Individual or group study projects for the improvement of instruction in mathematics.

**EDC&I 480 Introduction to Graduate Study in Educational Technology (3)** Introduction to the theoretical and practical aspects of educational technology. Introduces the history, conceptual orientation, and research of the field. The practical application of theory and research through the procedures of instructional design and development are also examined.

**EDC&I 481 Introduction to Instructional Design (3)** Students design a unit of instruction that relies upon a technology for its delivery. Steps in the design process discussed and practiced, and principles that guide selection of methods and materials applied.

**EDC&I 485 Workshop in Instructional Improvement: Educational Communication and Technology (2-6, max. 6)** Individual or group study projects on the improvement of instruction through use of educational communication and technology.

**EDC&I 488 Educational Technology and Learning in Alternative Settings (3)** How educational technology can be used to encourage learning in nonschool environments, such as museums, radio and television broadcasts, parks and recreation

centers, and distance education programs. Students investigate one of these areas and prepare a project.

**EDC&I 494 Workshop in Improvement of Curriculum (1-6, max. 15)** Stresses the application of procedures for curriculum development, maintenance, and evaluation. Opportunities furnished to develop and perfect strategies for program development with occasions given to utilize the strategies in master plan and materials preparation for simulated or real school situations. Specific focus of workshop is determined by instructor or by arrangement with district.

**EDC&I 495 Workshop in Improvement of Teaching: Selected Topics, Issues, or Problems (1-6, max. 15)** Individual or group projects to help teachers adapt instruction to selected topics, issues, or problems and to identify the approaches and instructional resources that provide the soundest learning experiences.

**EDC&I 496 Workshop in Instructional Improvement (2-6, max. 6)** Individual or group study projects on the improvement of instruction with attention to designing instructional plans.

**EDC&I 499 Undergraduate Research (2-5, max. 5)** Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

**EDC&I 500 Field Study (1-10, max. 10)** Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Curriculum and Instruction in the College of Education.

**EDC&I 505 Seminar in Curriculum and Instruction (1-3, max. 15)** Seminar on advanced topics in curriculum and instruction. Critical examination of current research and practice. Content varies, check quarterly Time Schedule for topics to be covered. Prerequisite: permission of instructor.

**EDC&I 510 History of Educational Technology (3)** Examines the role of technology in education through history. Early systems of instruction, advent of textbooks, models for school architecture, instructional devices and teaching machines, mediated and distance learning. Focuses on the interplay between designed educational approaches and contexts in which they were implemented, and consequent success for failure.

**EDC&I 511 Current Issues in Technology and Education (3)** Examines current genres of learning technology, novel approaches for integrating technology into curriculum and instruction, and recent theoretical perspectives that inform future work in educational technology. Prerequisite: EDC&I 510 or instructor permission.

**EDC&I 512- Survey of Educational Technology Research (2, max. 4)** Critically examines active research projects in educational technology. Critiques of research practice. Corequisite: EDC&I 511 and EDC&I 580.

**EDC&I 524 Seminar in Teacher Education (3, max. 6)** Focus on recent research, issues, and proposals for future development in teacher education, certification, and continuing professional growth. Alternate year offering focuses on either preservice or inservice issues. Prerequisite: permission of instructor.

**EDC&I 530 Approaches to Literacy Instruction (3)** Designed to aid experienced teachers who possess background in the teaching of literacy, this course presents a variety of approaches and actual analysis of approaches. Prerequisite: teaching experience and a basic course in the teaching of reading.

**EDC&I 531 Seminar: Critical Review of Literacy Materials (3)** Students formulate and apply criteria for assessing materials, with emphasis on linguistic, cultural, and psychological factors; instruction effectiveness, interest level; and educational objectives. Prerequisite: teaching experience and one basic course in the teaching of reading.

**EDC&I 532 Seminar in Literacy Research (3, max. 9)** Primary focus on those aspects of the literacy process that are of concern in a developmental literacy program. Emphasis on research design, evaluation of research, and research findings, dealing with factors influencing literacy ability, problems in skill development, recreational reading, and writing. Prerequisite: permission of instructor.

**EDC&I 533 Seminar: Conducting Research in Reading (3, max. 6)** Students design and conduct original research studies in the field of reading. Emphasis on research rationale, choice of productive research types, and reporting of research results and implications. Prerequisite: EDC&I 532.

**EDC&I 534 Seminar in the Reading of Literature (3)** Reading of literature and its effect on reading skills, language development, social values, and literary judgment of children and adolescents. Emphasis on analysis of research in these areas and on the development of action research designed to study response to literature. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults.

**EDC&I 541 Seminar in Bilingual Education: Organization and Structure (4)** Study of the structure and organization of bilingual programs. Includes study of the developmental and organizational factors affecting bilingual education. Assists graduate students in reviewing the historical antecedents in bilingual education and in developing a personal philosophy about bilingual education.

**EDC&I 542 Seminar in Bilingual Education: Instructional Foundations and Issues (4)** Study of the theoretical foundations and instructional implications of psychology and linguistics as they apply to bilingual education. Assists graduate students in exploring learning styles of bilingual children and in becoming familiar with the crucial issues in bilingual education.

**EDC&I 543 Seminar in Bilingual Education: Instructional Strategies (4)** Study of instructional factors affecting bilingual education. Particular emphasis is given to research related to the variables involved in teaching in a bilingual environment. Assists graduate students in exploring instructional methodologies and formats as they apply to bilingual education and in becoming familiar with the current issues in bilingual education.

**EDC&I 550 Educational Technology Research (3)** Analysis, critique, and practical experience with research studies of all types (experimental, ethnographic, evaluation) concerning questions of interest to educational technologists. Prerequisite: EDC&I 480, a research methods course, or permission of instructor.

**EDC&I 552 Management of Educational Technology Programs (3)** Factors contributing to effective management of programs incorporating educational technology and microcomputers. Manager's role as agent of instructional change and processes leading to successful adoption and long-term implementation of a new instructional system. Prerequisite: EDC&I 480 or permission of instructor.

**EDC&I 553 Seminar on Instructional Systems Development (3)** Critical analysis of processes involved in the development of instructional systems. Prerequisite: EDC&I 481 or permission of instructor.

**EDC&I 555 Educational Futures (3)** Concept of alternative futures stressing manageability of the future. Attention is given to current and future events that can or might impact education. Basic future studies methods are considered with opportunities to apply such methods within educational arena. Prerequisite: prior graduate course work or experience in education.

**EDC&I 556 Elementary School Curriculum (3)** Study of elementary school curriculum, its design, rationale, and delivery. Current trends and issues affecting elementary school curriculum analyzed.

**EDC&I 558 Secondary School Curriculum (3)** Systematic analysis of current curriculum practices, with particular emphasis on the social and historical forces affecting secondary-school curriculum.

**EDC&I 559 Principles and Procedures of Curriculum Development (3)** Intensive study of basic principles and procedures utilized in development of curricula. Participants have opportunities to apply such procedures in class activities. Attention given to curriculum foundations.

**EDC&I 561 Seminar in Language Arts (3)** Study of language with special attention to research pertaining to the social context of language in the classroom. Course work includes group and individual analysis of language arts studies with attention to research design and measurement. Prerequisite: EDC&I 455.

**EDC&I 562 Seminar in Reading and Language Arts: Secondary Emphasis (3)** Study of recent research in listening, oral language, reading, and written language, emphasizing psychological and interrelated aspects. Prerequisite: permission of instructor.

**EDC&I 563 Current Issues in Literacy Education (1-3, max. 6)** Discussion of problems and issues of current interest and importance in language arts education. Prerequisite: EDC&I 561.

**EDC&I 565 Seminar in Social Studies Education: Elementary Emphasis (3)** Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 465 or equivalent.

**EDC&I 566 Seminar in Social Studies Education: Secondary Emphasis (3)** Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 466 or equivalent.

**EDC&I 567 Current Issues in Social Studies Education (1-3, max. 6)** Discussion of problems and issues of current interest and importance in social studies education.

**EDC&I 569 Educating Ethnic Minority Youths (4)** Intensive analysis and review of the research and curricular programs related to the social, psychological, and political factors that influence the school experiences of ethnic minority youths. Special attention given to instructional and curricular programs for African-American, American-Indian, Mexican-American, Puerto Rican-American, and Asian-American students. Prerequisite: graduate standing or permission of instructor.

**EDC&I 570 Seminar in Science Education: Elementary Emphasis (3)** Investigation of curriculum and instruction in science at elementary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 470 or equivalent.

**EDC&I 571 Seminar in Science Education: Secondary Emphasis (3)** Investigation of curriculum and instruction in science at secondary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 471 or equivalent.

**EDC&I 572 Current Issues in Science Education (1, max. 6)** Discussion of topics and problems of current interest and importance in science education. Prerequisite: graduate standing.

**EDC&I 573 School Reform and Multicultural Education (3)** Similarities and differences among the visions, goals, and strategies of proposals for school reform and multicultural education are analyzed; implications for practice in curriculum and instruction are deduced from these analyses. Prerequisite: one course in multicultural education or permission of instructor.

**EDC&I 574 Race, Gender, and Knowledge Construction: Curriculum Considerations (3)** Using historical and contemporary perspectives, considers ways in which knowledge related to race and gender has been and is constructed and the implications of ways in which knowledge is constructed for curriculum reform and teaching. Prerequisite: one course in ethnic studies, multicultural education, or women studies or permission of instructor.

**EDC&I 575 Seminar in Mathematics Education: Elementary Emphasis (3)** Investigation of curriculum and instruction in mathematics at the elementary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

**EDC&I 576 Seminar in Mathematics Education: Secondary Emphasis (3)** Investigation of curriculum and instruction in mathematics at the secondary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

**EDC&I 577 Current Issues in Mathematics Education (1, max. 6)** Discussion of problems and issues of current interest and importance in mathematics education. Prerequisite: graduate standing.

**EDC&I 578- Qualitative Methods of Educational Research (5-)** Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second year doctoral standing and one course in statistics. Offered: jointly with EDPSY 586.

**EDC&I -579 Qualitative Methods of Educational Research (-5)** Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second year doctoral standing and one course in statistics. Offered: jointly with EDPSY 587.

**EDC&I 580 Technology in Context (3)** Focuses on development of appropriate methods and concepts for research on technology in schools, workplaces, and other naturalistic settings. Fieldwork exercises and reading exemplary studies from multiple disciplinary perspectives. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, or permission of instructor.

**EDC&I 581 Cognitive Systems Design (3)** Covers the design of applied technology-based learning systems, informed by current views of learning, technology, and cognition. Emphasizes synthesizing students' knowledge of technology, learning and research in collaborative settings. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, or permission of instructor.

**EDC&I 582 Design Experimentation and Implementation in Context (3)** Introduces theoretical, methodological, and practical issues involved with studying the designed use of learning technologies in real world settings. Focuses on engaging in empirical study of the designed system through partnerships involving education researchers, educators, and technologists. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, EDC&I 581, or permission of instructor.

**EDC&I 583 Message Design (3)** Research and theory on design of instructional messages in various modalities (visual, auditory), and in various formats (pictorial, verbal, graphic). Prerequisite: EDC&I 480 or permission of instructor.

**EDC&I 584 Instructional Graphics for Microcomputers (3)** Study of current research on instructional uses of computer graphics. Development, selection, and application of design principles for graphically-based instructional and training programs. Prerequisite: EDC&I 436, EDC&I 481.

**EDC&I 585 Technology and the Culture of Education (3)** Social impact of technology on education in the United States and elsewhere: social, political, and cultural factors affecting educational communication and technology; roles and relationships among instructors and learners; appropriate technology in developing countries; technology's long-term influence on thought and values. Prerequisite: EDC&I 480 or permission of instructor.

**EDC&I 586 Current Issues for Computers in the Classroom (1, max. 6)** Addresses many of the current topics in computer-related education. Issues and research related to computer uses in curriculum, instruction, and management of instruction.

**EDC&I 587 Design and Application of Interactive and Immersive Instructional Systems (3)** Theoretical and empirical questions involved in design of interactive instructional systems using such technologies as virtual reality and CAI. Specific problems inherent in design of complex learning environments: immersion, control, structure, sequence of experiences, navigation, learner guidance. Educational uses of systems. Prerequisite: EDC&I 481 or EDC&I 583, EDC&I 436, or permission of instructor.

**EDC&I 588 Seminar: Computers in Education (3)** Provides opportunity for graduate students to analyze, discuss, and design research in areas of computers in education. Includes historical development of research in this area as well as a platform for the development of research proposals and refinement of ongoing research. Prerequisite: EDC&I 434 or EDC&I 436.

**EDC&I 589 Current Issues in Educational Communications (1, max. 9)** Discussion of problems and issues of current interest and importance in the field of educational communications. Serves also as a forum for discussion of doctoral research. Designed for master's and doctoral candidates in educational communications. Credit/no credit only. Prerequisite: graduate standing.

**EDC&I 590 Seminar in Elementary Education (3)** Exploration of the philosophy, history, purposes, curriculum, methods, and school organization of elementary education. Prerequisite: elementary-school teaching experience, EDC&I 556.

**EDC&I 591 Seminar in Curriculum Research (3)** Analysis of past and current empirical, historical, ethnographic research, and philosophical analysis of the curriculum field. Studies considered include research in curriculum development, the curriculum plan, contextual characteristics, and factors related to curriculum participants. Group and individual analyses focus on theory generation and practical applications of research. Prerequisite: EDC&I 559 or permission of instructor.

**EDC&I 592 Seminar in Secondary Education (3)** Research and study of secondary education. Primary focus on factors involving change in secondary-school curriculum and organization. Prerequisite: EDC&I 558.

**EDC&I 593 Seminar in Curriculum: Theory and Practice (3)** Investigation of curriculum theory and practice. Consideration is given to theoretical writings that address the relationships between various curricular variables. Theoretical positions are related

to curricular practices and innovations. Prerequisite: EDC&I 559.

**EDC&I 594 Seminar in Curriculum: Issues, Systems, Models (3)** Emphasis on the current approaches to curriculum and curriculum innovation. Attention is given to major educational issues that affect curricular activity. Prerequisite: EDC&I 559.

**EDC&I 595 Seminar in Analysis of Teaching (3)** Investigation of the ways in which classroom teaching has been analyzed from a variety of disciplinary perspectives. Focus on methods, findings, and implications of research on teaching. Prerequisite: teaching experience.

**EDC&I 597 Curriculum Evaluation Seminar (3, max. 6)** Focuses on the evaluators' roles, evaluation theory and models, and selected curricular evaluations. Examples are drawn from the several disciplines commonly offered in the elementary and secondary schools. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisite: EDC&I 559 and permission of instructor.

**EDC&I 599 Independent Studies in Education (\*)** Independent studies or readings of specialized aspects of education. Prerequisite: permission of instructor.

**EDC&I 600 Independent Study or Research (\*)** Prerequisite: permission of instructor.

**EDC&I 601 Internship (1-10, max. 10)** Credit/no credit only. Prerequisite: graduate standing and permission based on approval of proposal submitted during quarter preceding the internship.

---

## Educational Leadership and Policy Studies

**EDLPS 479 Crucial Issues in Education (3)** Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns.

**EDLPS 496 Workshop: Education Programs and Problems (1-6, max. 12)** Study of such topics as planning, development, supervision, organization, operation, or evaluation of current or emerging programs or problems in education.

**EDLPS 499 Undergraduate Research (\*)** Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

**EDLPS 501 Introduction: Leadership Beyond the Classroom (3-6, max. 6)** First course in principal certification program; explores Washington state laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to the EDLPS Principal/Program Administrator Preparation Program.)

**EDLPS 502- Leadership Core ([3-6, max. 6]-)** Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic

year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

**EDLPS -503- Leadership Core (-[3-6, max. 6]-)**

Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

**EDLPS -504 Leadership Core (-[3-6, max. 6])**

Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

**EDLPS 505 Transition to Leadership (3-6, max. 6)**

Development and administration of systems for selection, evaluation and clinical supervision of certificated and classified personnel. Focuses on leadership models and transition to a leadership role, including opening a school or program and dealing with student/school crises. (Only for students admitted to the EDLPS Principal/Program Administrator Program.)

**EDLPS 507 Reflective Seminar (1-6, max. 6)**

Integration of theory and internship experience; group process laboratory and peer feedback and review of written work, oral presentations, and journals. Reading and discussion of crucial issues. (Only for students admitted to the EDLPS Principal/Program Administrator Preparation Program.) Credit/no credit only.

**EDLPS 510 School Finance (3)**

Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

**EDLPS 514 Washington School Law (3)**

Overview of Washington State specific legal provisions affecting the operations and management of public schools, including school organization and operations, school finance, separation of church and state, school employment, student conduct, discipline and rights, equity, intergovernmental agreements, and student health and safety.

**EDLPS 516 Special Education and the Law (3)**

Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered: jointly with EDSPE 504; W.

**EDLPS 518 Reflective seminar: The Superintendency (1-6, max. 6)**

Integration of theory and internship experience. Readings and discussion of crucial issues, presentations by local school superintendents: district budgeting processes, personnel, staff relations and collective bargaining, superintendent-board relations, bond issues, facilities planning, superintendent as instructional leader. Credit/no credit only.

**EDLPS 519 Special Topics in Educational Leadership (1-6, max. 15)**

Readings, lectures and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Topics vary; check Time Schedule for topic(s) to be covered.

**EDLPS 520 Education as a Moral Endeavor (3)**

An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions. Credit/no credit only.

**EDLPS 521 Philosophy of Education (3)**

Philosophy of education considered as a study of the conceptual basis for educational policy and practice. Emphasis on relationships between enduring educational problems and fundamental philosophic issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

**EDLPS 522 Contemporary Philosophies of Education (3)**

Intensive study of the writings of selected contemporary philosophers of education.

**EDLPS 523 Analysis of Educational Concepts (3)**

Selected concepts central to conduct and understanding of education.

**EDLPS 524 Seminar in Philosophy of Education (3, max. 6)**

Philosophical examination of ways in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives.

**EDLPS 525 Educational Inquiry (3)**

General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

**EDLPS 526 Educational Inquiry (3)**

General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

**EDLPS 530 History of Education (3)**

Historical survey of education. Emphasis on relationship between idea and practice. Topics include education and colonialism, formation of state school systems, progressive education, equal educational opportunity, changes in textbooks and curricula, education and social structure, and education in the history of cultures.

**EDLPS 531 History of American Higher Education (3)**

Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

**EDLPS 535 Historical Inquiry in Education Research (3, max. 6)**

Methods and critique of historical research in education. Examination of landmark

works in education history and historiography. Hands-on experience framing historical questions, finding historical sources, using historical evidence, substantiating historical claims, and addressing issues in the history of education.

**EDLPS 536 Historical Analysis of Educational Issues (3)**

Analysis and interpretation of the history of education in its broadest sense: the transfer of culture across generations. Examination of the problems of evidence and interpretation with which the authors of exemplary works in the history of education struggled.

**EDLPS 540 Sociology of Education (3)**

Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.

**EDLPS 541 Topics in Comparative Education (3, max. 6)**

International efforts in education, including the role of the United States in overseas programs. Analysis of the relation of education and society in foreign areas, stressing social change and conflict. Regions of the world considered in the course vary from one offering to another.

**EDLPS 542 Seminar in Educational Sociology (3)**

Application of sociological principles to school problems; individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees.

**EDLPS 543 Seminar: Research in Educational Sociology (3)**

Theory, concept, and method of sociological inquiry as applied to problems in education.

**EDLPS 549 Special Topics in Educational Studies (1-6, max. 15)**

Readings, lectures, and discussions pertaining to significant and enduring ideas in the philosophy, history and sociology of education. Specific topics are critically examined in light of contemporary problems in education. Topics vary; check Time Schedule for topic(s) to be covered.

**EDLPS 550 The Dynamics of Educational Organizations (3)**

Exploration of the literature in organizational theory and leadership, the assumptions that underlie the development of various approaches to organizational theory and how these approaches are applied, and an acquaintance with different conceptual frames that can be used to determine how to improve and change organizations. Credit/no credit only.

**EDLPS 552 Organizational Change in Education (3)**

Change and innovation in educational organizations. Theoretical approaches include sociopsychological, rational planning, political perspectives, and those associated with notion of organized anarchies. Specific topics related to change and innovation (e.g., roles of beliefs, symbols and norms, diffusion of innovations, and research issues).

**EDLPS 560 Perspectives on Policy and Policy Making in Education (3)**

This course introduces a variety of theoretical perspectives that can be used to analyze policy content, processes and outcomes. Includes a consideration of the power and limits of policy and a discussion of the many ways people in different positions in organizations can influence policy. Credit/no credit only.

**EDLPS 561 Education Policies and Leadership in Political Context (3)**

Systematic consideration of the structure and function of educational policies and problems of research in political context.

**EDLPS 563 Education, The Workforce, and Public Policy (3, max. 6)**

Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimina-

tion issues, and the role of education and training in economic development. Offered: jointly with PB AF 571.

**EDLPS 564 Seminar in Economics of Education (3)** Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The economics of public education. Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

**EDLPS 565 Power and Politics in Organizational Leadership and Decisionmaking (3)** Focuses on conceptual frameworks that can be used to analyze power-influence processes in complex organizations and research methods that are well-suited to the study of these processes. Opportunities to design studies of power relations and political processes are provided.

**EDLPS 566 Education Policy Serving Disenfranchised Groups (3)** This seminar examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminar members critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

**EDLPS 567 Education Policy and the Improvement of Teaching and Learning (3)** Examines connections between policies and classroom practice, in P-12 and higher education settings. Of particular concern is the capacity of policy to improve the quality of curriculum and instruction. Students design and critique policies, drawing on research and feedback from policymakers.

**EDLPS 568 Policy Evaluation in Education (3)** Examination of methods for evaluating educational policies across the educational continuum. Students design and conduct a policy evaluation which draws on the policy evaluation literature. Examination of the uses of policy evaluation information in shaping organization-decision making is also included.

**EDLPS 579 Special Topics in Organizational and Policy Analysis (1-6, max. 15)** Readings, lectures and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to the analysis of educational organizations, policies, and policy making. Topics vary; check Time Schedule for topic(s) to be covered.

**EDLPS 580 The American College and University (3)** Introduction to contemporary United States higher education, with special emphasis on emerging trends, roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

**EDLPS 583 Higher Education and the Law (3)** Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

**EDLPS 584 Academic Governance and Collective Bargaining in Higher Education (3)** Explores the concept and operation of collective bargaining in higher education: its origin; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subsumed under its operation; and its relationship to the traditional form of faculty governance mechanisms.

**EDLPS 585 Resource Allocation in Higher Education (3)** After attention to the basic tools of economic analysis, focus is on application of those tools to

specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).

**EDLPS 589 The Community College (3)** Intensive study of the community college—its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

**EDLPS 590 Student Populations and Experiences in Higher Education (3)** Examines foundational literature dealing with students in higher education. Primary focus is on how students change during college, how they make choices and decisions, what roles institutional climate and structure play in the students' experiences, and what impact college has on students.

**EDLPS 598 Special Topics in Higher Education (1-6, max. 15)** Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to education in community colleges, four-year colleges and universities. Topics vary; check for topic(s) to be covered.

**EDLPS 599 Independent Studies in Education (1-10, max. 10)** Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor.

**EDLPS 600 Independent Study or Research (\*)** Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Credit/no credit only. Prerequisite: permission of instructor.

**EDLPS 601 Internship (1-4, max. 12)** Name of faculty member responsible for supervising the student should be indicated on program of studies. Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

## Educational Psychology

**EDPSY 304 Educational Psychology (5)** Human learning in the educational setting. Cognition, development, learning, motivation, affective processes, and socialization. Emphasis on skills in influencing classroom learning and discipline. Open to students in the Music Education program or by permission of instructor. Offered: Sp.

**EDPSY 449 Laboratory in Educational Psychology (2-6, max. 6)** Special studies for counselors, teachers, administrators, and others concerned with student personnel and psychological services in schools and colleges. The course focuses on special topics that have either local or contemporary significance.

**EDPSY 471 Neuropsychology of School Learning and Behavioral Problems (5)** The microstructure, macrostructure, and structural and functional development of the brain are reviewed with a focus on the educational relevance of developmental neuropsychology. Four areas are covered: Hemispheric differences and integration; neurological soft signs, attention deficit, and hyperactivity; language, reading, and learning disabilities; and medical syndromes. Credit/no credit only. Offered: Sp.

**EDPSY 490 Basic Educational Statistics (3)** Measures of central tendency and variability, point and interval estimation, linear correlation, hypothesis testing. Offered: AWSp.
